To my Jane

Vejo melhor os rios
quando vou contigo
Pelos campos até à beira
dos rios;
Sentado a teu lado
reparando nas nuvens
Reparo nelas melhor ...

I see the river more
clearly when I go with you
Through the fields to the
riverside
Sitting by your side
watching clouds
I see them better ...

INTRODUCTION AND WHAT'S NEW

1.1 Scope of this book
1.2 A statute-focussed approach
1.3 The year 2023/24 in review, and the future
1.3.1 Simplification/complification
1.4 The future
1.5 Thanks ...and request for help

1.1 *Scope of this book*

There are three original themes to this book:

(1) Taxation of foreign domiciliaries
(2) Taxation of non-residents on UK assets
(3) Taxation of UK residents on foreign assets

To attempt to cover these topics comprehensively is ambitious, perhaps quixotic, and if books could burst, this one might. But these territorial issues must be understood in a wider context: in taxation, as in life, everything is connected. So I discuss private client topics which go beyond the original themes of this book:

- substantial: fundamental terms and concepts, and tax avoidance codes
- procedural: disclosure/compliance, tax return filing positions, CDD, TRS

1.2 *A statute-focussed approach*

I set out statutory and other material verbatim:

> ... in the end we must always return to the words of the statute[1]

Returning to the verbatim text, it is surprising how often one finds that the words do not say what one expects.

This is not just a common law approach. Richard Hyland tells this story of his class at Université Paris II Panthéon-Assas:[2]

[1] *RFC 2012 Plc v AG* [2017] UKSC 4 (the *Rangers* case) at [11]; see 87.5.2 (A judicial gloss).

[2] Hyland. *Gifts: A study in comparative law*, 1st ed (1989) p.xvi.

> Mme Gobert asked simply: *L'article 2 du Code civil, qu'est-ce qu'il dit?* Article 2 of the Civil Code, what does it say?
> My classmates were some of the best private law students in France. This was a question to which they knew the answer. One of them explained that article 2 provides for the nonretroactivity of the law. Mme Gobert looked at the student without smiling. Then she repeated the question. *L'article 2 du Code civil, qu'est-ce qu'il dit?* A different student mentioned Paul Roubier's suggestion that a new law may be applied to *les situations juridique en cours.* Again she repeated the question. *L'article 2 du Code civil, qu'est-ce qu'il dit?* Another student tried, and then another, each new voice attempting yet a more refined statement of the concepts involved. After each comment she responded in the same way. It was my first French law class, so I did not know what to think. It seemed like a Zen-like version of the Socratic method. The French students were terrified. This was material they thought they knew, and yet they could not guess what was on her mind. Finally, one of the students had the presence of mind simply to read the code provision aloud. Mme Gobert's eyes lit up. *Mais bien sûr!* she responded *C'est ça qu'il dit!*

1.3 *The year 2023/24 in review, and the future*

HMRC have had an unbroken run of successes establishing a UK domicile. *Fisher* finally reached Supreme Court, only to be promptly reversed by the F(no.2)A 2024. We have the first case on the statutory residence test, introduced in 2013 (*A Taxpayer v HMRC*), now on the way to the Court of Appeal, and the first on the remittance basis, introduced in 2008 (*Seghal v HMRC).* Scotland continues its fiscal drift from the UK, with Northern Ireland and Wales following.

But the changes of 2023/24 are overtaken by the surprise announcement in the Spring Budget 2024 of the abolition of domicile as a connecting factor for UK tax, from 2025/26, and the replacement of the remittance basis with a short term relief for foreign income/gains. The next edition of this book will be different from the present, and will have a new title.

1.3.1 *Simplification/complification*

OTS stated in 2017:

> The UK tax code is widely cited as being the longest in the world".[3]

[3] It is hard to empirically assess the claim that the UK has the longest tax code in the world, and OTS made no attempt to do so. But if any readers are aware of other

This claim had been made at least since 2010.[4] In recent years Parliament added:[5]

Finance Act(s)	**Pages**		
2012	703 (a record)	2018	196
2013	648	2019	337
2014	668	2020	217[6]
2015	597 (2 Finance Acts)	2021	428
2016	662	2022	225
2017	829 (2 Finance Acts)	2023	416 (2 Finance Acts)

The Office of Tax Simplification estimated HMRC guidance at 90,000 pages in 2018;[7] whatever the true figure, it will have grown considerably since then. This guidance was "not comprehensive" - something of an

serious contenders for that title, I would be interested to hear.

[4] For older references see the Introduction to the 2016/17 edition of this work.

[5] Finance Act page counts are a rough proxy for the ever growing complexity of the UK tax system, but not an altogether bad one. A (slightly) better proxy would also consider secondary legislation and HMRC guidance; and, perhaps, case law; then the page counts would multiply the Finance Act numbers set out here tenfold.
For a discussion of the multidimensional concept of tax complexity, see Tran-Nam and Evans, "Towards the Development of a Tax System Complexity Index" (2014) Fiscal Studies Vol 35 p.341.
OTS have published two (somewhat simplistic) discussions of tax complexity:
Length of Tax Legislation as a Measure of Complexity (Apr 2012)
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/193496/ots_length_legislation_paper.pdf
OTS Complexity Index (2012)
http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/193493/ots_complexity_index_methodology_paper.pdf

[6] The unusually short length of the FA 2020 is due to the December 2019 election.

[7] OTS, "Guidance for taxpayers: a vision for the future" (2018) para 1.21. These pages have assuredly not been printed or counted. Quantification raises methodological issues which deserve a short essay to itself. We have reached the stage where the amount of HMRC guidance is impossible to quantify: the words are uncountable. Within the limits of guesswork, and assuming 500 words per page (single spacing), the figure of 90,000 pages seems to me to be on the low side. There are 150 HMRC Manuals, just for a start.
Perhaps the focus of enquiry should be whether HMRC guidance is too short, because 90,000 pages would not be sufficient to do justice to the topic. The legislation, measured by pages of the Orange & Yellow tax handbooks, can be counted and amounts to 20,836 pages in 2020/21 (that does not include DTAs, which would be another 3,000 pages). The Tax Cases reports, which began in 1875, and ceased publishing in 2014, reached 82 volumes and did not cover VAT.

understatement; but according to the OTS "real life cannot be reduced to a neat description in a few (!) pages of writing".[8]

F(no.2)A 2023 abolished the OTS. In its 12 years of existence, the OTS did not achieve much simplification, at least in relation to topics covered in this book, and I do not think it will be missed.[9]

It is easier to *talk* of simplification. In the ill-fated "mini" budget of October 2022:

> the government will embed tax simplification into the institutions of government ... and set a mandate to HM Treasury and HMRC to focus on simplifying the tax code.[10]

The reader may think that satirists better identify the reality:

> We will further complicate the UK tax system so that large companies can no longer find loopholes.[11]

This year, the abolition of furnished holiday letting relief is a simplification; though that is not much to set against the size of this year's Finance Acts.

1.4 *The future*

We face an extended period of change and uncertainty, in politics, economics, law and taxation, and will continue to live in fiscally exciting times.

1.5 *Thanks ...and request for help*

I am very grateful to my colleagues in chambers, especially Robert

[8] Para 1.24.

[9] This view is not unanimous; according to CIOT,"OTS has achieved a great deal".; Letter to Chancellor of the Exchequer (24 October 2022).

[10] HM Treasury, "The Growth Plan 2022".
https://www.gov.uk/government/publications/the-growth-plan-2022-documents
The emphasis, or one might say, rhetoric, of simplification has fluctuated. OOTLAR 2008 had 45 references to simplification. OOTLAR 2021 had none. The "Growth Plan 2022" had 15.
In (I think) 2013 the government came up with the slogan "Creating a simpler, fairer tax system", which OTS adopted; it imagines away a troubling reality in which simplicity and fairness are competing values which require hard choices.
https://www.gov.uk/government/policies/creating-a-simpler-fairer-tax-system

[11] Official Monster Raving Loony Party Manifesto 2017
https://www.loonyparty.com/2017-general-election-manicfesto

Venables KC, Philip Simpson KC and Rory Mullen KC, for discussions on many aspects of tax. Yijia Liu as research assistant resolved many puzzles. I owe a great debt to Jane Hunt and Ruth Shaw who work committedly on this text throughout the year.

Comments from my readers and clients continue to be of the greatest value and interest. I am very grateful to all who commented, and in particular to John Barnett and Sam Dewes (who commented on a variety of topics), and Mark Pearce (cryptoassets). In order not to be defeated by the size of this work, readers' help is needed more than ever. If anyone would like to offer to write or revise a section - or chapter - of this book please get in touch.

The pleasure in writing this book consists in the interest of the questions which it raises, and the success which it may have achieved in answering them. On the basis of what is known at 1 April 2024, and assuming the F(no.2) Bill 2024 is enacted in its present form, it seeks to state the law for 2024/25.

OBTAINING FURTHER ADVICE - AND DISCLAIMER

Further advice

If you want advice on which you are legally entitled to rely you can obtain it - but not from this work.

In particular, you may instruct the author to advise. I enjoy writing, but spend most of my time giving independent specialist professional advice in private client matters, especially areas covered in this work. For further details see *https://www.kessler.co.uk*

TFD Online

TFD Online is an online version of this book and more. It can be used:
(1) to search the text of this book or to access it online.
(2) to see if the book has been updated
(3) to correct or contribute to the book

TFD Online is moderated by Rebecca Sheldon, a member of Tax Chambers, 15 Old Square, Lincoln's Inn.

TFD Online is accessible on *https://www.foreigndomiciliaries.co.uk* An authorisation code for a 3 week trial period is in the inside cover of volume 1.

Disclaimer

The professional bodies issue the *Professional Conduct in Relation to Taxation* with a disclaimer:

> While every care has been taken in the preparation of this guidance[1] the PCRT Bodies do not undertake a duty of care or otherwise (?) for any loss or damage occasioned by reliance on this guidance. Practical guidance cannot and should not be taken to substitute appropriate legal advice.[2]

[1] PCRT is not in fact guidance: it is mandatory.

[2] *Professional Conduct in Relation to Taxation* (2019), Forward. *https://www.tax.org.uk/professional-standards/professional-rules/professional-conduct-relation-taxation*
The second sentence is an improvement on the common form that guidance on legal

When that appeared in 2011 it seemed extraordinary. But nowadays no professional body issues guidance without a disclaimer.[3] Similarly, and *a fortiori*, the views expressed in this book are put forward for consideration only and are not to be relied upon. Neither the author nor the publisher accept responsibility for any loss to any person arising as a result of any action or omission in reliance on this work. But could anyone have thought that a claim might arise in absence of this disclaimer?

A note to the lay reader

This book is not intended as a self-help guide, and is addressed to tax practitioners. In earlier editions I said: "... but it is readable for a lay person." I think that is still true, though the text is more daunting than when I first wrote those words, because the law has become much more complicated. However, initiation in these matters must often be by the taxpayer. If you wish to research this subject in depth, and so take more control of your own tax affairs, read on. But for implementation you will need to find professionals to advise you. Self-help guides extol "the benefit of bypassing expensive lawyers"; but the bypass may prove the more expensive route in the long run.

This book was called *Taxation of Foreign Domiciliaries* for 9 editions; it

issues "does not constitute legal advice". That seems an idiosyncratic use of the word "advice"; but for the meaning of "advice" see 132.6 (Tax adviser).

[3] For instance, the Law Society likewise issue a disclaimer for their Practice Notes: The standard form is: "While care has been taken to ensure that they are accurate, up to date and useful, the Law Society will not accept any legal liability in relation to them."

changed to *Taxation of Non-Residents and Foreign Domiciliaries* in the 10th edition.[4]

[4] The text of earlier editions is available on *https://www.foreigndomiciliaries.co.uk*

CONTENTS AT A GLANCE

The chapters are organised thematically as follows:

Volume 1

Introduction and What's New
Obtaining further advice and disclaimer
A1 FIG Relief//Abolition of Domicile Rule

Non-dom policy & avoidance

1. Foreign Domicile: Tax Policy
2. Tax Avoidance
3. Targeted Anti-avoidance Rules (TAARs)

Domicile & residence

4. Domicile
5. Deemed Domicile
6. Residence of Individuals
7. Residence of Trustees

Volume 2

8. Residence of Companies
9. Treaty-Residence
10. Split Years
11. Temporary Non-residence
12. Exit Taxes
13. UK Arrival or Departure: Tax Checklist

Income tax: Principles & remittance basis

14. Income Categorisation
15. Income Recognition: Received /Entitled/Arise/Paid
16. Source/RFI/Territorial Principles
17. The Remittance Basis
18. The Meaning of Remittance
19. Remittance Reliefs
20. Mixed Funds

Income by category

21. Trading Income

Volume 3

22. Trading in Land
23. Performers
24. Property Income
25. Deduction of Interest from Property Income

26. Interest Income
27. Exempt Interest of Non-Residents
28. Accrued Income Profits
29. Deeply Discounted Securities
30. Dividend Income
31. Annual Payments
32. Intellectual Property Income
33. Misc Sweep-Up Income
34. Employment Income
35. Travel Expenses: Employment Income
36. PAYE
37. Employment Income: DT Relief

Volume 4

38. Pension and Annuity Income
39. Benefit in Kind: Family Home and Chattels
40. Benefit in Kind: Loans from Non-Resident Companies

IT: general

41. Discretionary Trusts: Income Tax
42. IIP Trusts: Income Tax
43. Rates of Income Tax: CGT
44. Personal Allowances
45. Non-Resident Income Tax Relief
46. National Insurance Contributions

IT avoidance codes

47. Settlor-Interested Trust Code
48. Transfer of Assets Abroad: Introduction
49. Transfer of Assets Abroad: Transferors
50. Transfer of Assets Abroad: Benefits
51. Transfer of Assets Abroad: Relief From Overlapping Charges
52. Transfer of Assets Abroad: Motive Defence
53. Profit Fragmentation

Volume 5

54. Transfer of Income Stream
55. Transactions in Securities

Capital Gains Tax

56. Chargeable Gains
57. UK Property held by Non-residents
58. Reorganisations
59. Residential Property: CGT
60. Gains of Non-resident Settlor-interested Trust: s.86
61. Capital Payments from Non-resident Trusts: s.87

62. Borrowing by Non-resident Trusts: Sch 4B
63. Sub-funds
64. Gains of Non-resident Companies
65. Capital Losses

Funds

66. FIG Relief - Abolition of Domicile Rule
67. Offshore Income Gains
68. Income from Offshore Funds
69. Unit Trusts

Volume 6

70. Life Policies and Contracts
71. Intermediated Securities
72. Investment Manager Exemptions
73. Investment Management Fees & Carried Interest

Inheritance Tax

74. IHT Terms and Concepts
75. Excluded Property: Definition
76. Excluded Property Exemptions
77. Wills and IOVs
78. Reservation of Benefit
79. Inter-trust Transfers: IHT
80. IHT Deduction for Debts
81. IHT Close-company Code
82. IHT Residential Property Code
83. Pe-owned Assets
84. Pension Schemes and IHT

Entities

85. Partnerships
86. Partnership Income Attribution

Volume 7

87. Settlement, Bare Trust and Associated Terminology
88. Estates of Deceased Persons: CGT
89. Estates of Deceased Persons: Income Tax
90. Foreign Entities
91. Hybrid Entities

Concepts & topics affecting more than one tax

92. Protected Trusts
93. Non-dom/Non-resident Spouse
94. Joint Accounts
95. Foreign Currency Issues
96. Cryptoassets

97. Unremittable Assets
98. ATED and SDLT
99. Who is the Settlor?
100. Multiple Settlors

Volume 8

101. Statutory Tax Indemnities
102. Situs of Assets for IHT
103. Situs of Assets for CGT
104. Control, Connected, Close and Related Expressions
105. Participation and % Interest Tests
106. Permanent Establishment and Branch/Agency

Double Taxation Agreements: IT/CGT

107. Double Taxation Arrangements: Introduction
108. DTA Anti-Abuse Rules
109. Third Party Relief/Savings Clause
110. Limitation on Benefits
111. Credit for Foreign Tax
112. Non-discrimination
113. Mutual Agreement Procedure

Double Taxation Agreements: IHT

114. IHT Double Taxation Treaties: Introduction
115. IHT DTAs: India, Pakistan, Italy, France
116. IHT DTA: Netherlands
117. IHT DTA: South Africa
118. IHT DTA: Switzerland
119. IHT DTA: USA
120. Credit for Foreign IHT

Administration

121. Reporting and Compliance
122. Tax Return Filing Position
123. Claims
124. Collection of Tax from UK Representatives

Volume 9

125. Reporting and Compliance: IHT
126. Penalties
127. Failure to Prevent Tax Evasion
128. Reporting Offshore Trusts
129. International Movement of Capital: Reports
130. Common Reporting Standard
131. Trust Registration
132. Customer Due Diligence
133. Money Laundering: POCA

Appendices

Words & Concepts

Appendix 1: Words of Dispute
Appendix 2: Common Legal Expressions
Appendix 3: Family Terminology
Appendix 4: Consideration, Arm's Length, Full Value
Appendix 5: Commercial/View to Profit
Appendix 6: Beneficial Ownership/Entitlement
Appendix 7: What Do We Mean by "Real"?

Construction of Statutes

Appendix 8: Deeming Provisions
Appendix 9: Purpose of Statute

Special Taxpayers

Appendix 10: Parliamentarians
Appendix 11: Visiting Forces
Appendix 12: Students and Teachers

Tax reform

Appendix 13: How to Improve Residence and Domicile Taxation
Appendix 14: Reform of Offshore Anti-avoidance Law
Appendix 15 Citizenship-based Taxation
Appendix 16: The Wisdom of Parliament

Index

CONTENTS IN DETAIL

Introduction . . . . *i*

Abbreviations. . . . . *cciv*

CHAPTER A1
FIG Relief - Abolition of Domicile Rule

The 2025 revolution: Introduction. A1.1
FIG relief for new residents A1.2
Offshore trusts A1.3
Non-dom transitional reliefs A1.4
Overseas Workday relief A1.5
Remittance basis for pre-2025 FIG A1.6
IHT domicile reform A1.7
Other domicile reforms? A1.8
Amounts raised and policy issues A1.9
Policy issues. A1.10
Some certainties and uncertainties. A1.11

CHAPTER 1
Foreign Domicile: Tax Policy

Introduction 1.1
Tax competition 1.2
Other tax competition. 1.3
Mobility tests 1.4
Fairness and mobile-individual reliefs. 1.5
Warwick/LSE paper 1.6
Non-dom tax reform history. 1.7
Assessment of reform: Metrics 1.8
2008 reform: Assessment 1.9

2017 domicile reform: Assessment 1.10
The promise of stability 1.11
State of UK tax reform. 1.12

CHAPTER 2
Tax Avoidance

Tax avoidance: Introduction 2.1
Avoidance/mitigation, evasion. 2.2
Politics of tax avoidance 2.3
Need for analysis 2.4
Attitudes to tax avoidance 2.5
Tax Gap 2.6
Avoidance legislation 1955 critique 2.7
The Rule of Law 2.8
Retrospective tax legislation 2.9
Naming and shaming 2.10
EU tax haven blacklist 2.11
Avoidance: Multinationals. 2.12

CHAPTER 3
Targeted Anti-avoidance Rules (TAARs)

TAAR/unallowable purpose test 3.1
Types of TAAR 3.2
Disentangling issues. 3.3
View arrangement as a whole 3.4
Purpose words: Terminology. 3.5
Whose purpose?. 3.6
Multiple minds. 3.7
Effect/purpose distinction: Subjective test 3.8
How to identify purpose. 3.9
Purpose: Party’s adviser/agent. 3.10
Foresight/purpose distinction. 3.11
Choices and purpose 3.12
Commercial needs and purpose 3.13
“Main” purpose 3.14
Burden of proof 3.15
Time to ascertain purpose 3.16
Meaning of “avoidance” 3.17
Purpose of tax avoidance 3.18
“Tax advantage”. 3.19
Avoidance/mitigation distinction. 3.20
Failed indicia of avoidance 3.21
Intention: parliament\government 3.22

Finding intention of parliament 3.23
Time to ascertain intention of parliament: Change in law 3.24
Reduction/deferral/failed avoidance 3.25
The GAAR 3.26
Tax avoidance: Critique 3.27

CHAPTER 4
Domicile

Domicile: Introduction 4.1
Concepts of domicile 4.2
Only one domicile 4.3
Domicile of origin 4.4
Domicile of choice 4.5
“Domicile-residence” 4.6
Permanent/indefinite residence 4.7
Remaining non-dom: UK resident 4.8
Abandoning domicile of choice 4.9
Losing UK domicile of origin 4.10
Dual residence and domicile 4.11
Statements of domicile 4.12
Domicile of choice: Illness 4.13
Citizenship and domicile 4.14
Refugee/illegal immigrant/temporary visa 4.15
Married women 4.16
Child’s domicile: England 4.17
Child’s domicile: Scotland 4.18
Adoption and parental orders 4.29
Same-sex parents 4.20
No mental capacity 4.21
Domicile territory/country 4.22
HMRC domicile ruling 4.23
HMRC investigations 4.24
Domicile of company 4.25
Domicile: Adviser’s duty of care 4.26
Domicile mistakes 4.27

CHAPTER 5
Deemed Domicile

Deemed domicile: Introduction 5.1
Deemed domicile: Outline 5.2
Scope of deemed-domicile 5.3
IT/CGT deemed-domicile 5.4
IHT formerly-domiciled resident rule 5.5

IHT 15-year rule . . . 5.6
Counting split years . . . 5.7
IHT 3-year rule . . . 5.8
Start/end date uncertainty . . . 5.9
Children . . . 5.10
Transitional rules . . . 5.11
Deemed domicile: Planning . . . 5.12
Deemed dom wording compared . . . 5.13
Election-domicile . . . 5.14
Channel Islands/IoM Domicile . . . 5.15
International comparisons . . . 5.16
Deemed domicile mistakes . . . 5.17

CHAPTER 6
Residence of Individuals

Concepts of residence . . . 6.1
History and guidance . . . 6.2
Scope of SRT . . . 6.3
Outline of SRT . . . 6.4
Automatic overseas tests . . . 6.5
Overseas test 1: < 16 UK days . . . 6.6
Overseas test 2: 3 years non-resident . . . 6.7
Overseas test 3: Overseas work . . . 6.8
“Automatic” UK tests . . . 6.9
UK test 1: 183 UK days . . . 6.10
UK test 2: UK home . . . 6.11
UK test 2: Examples . . . 6.12
UK test 3: UK work . . . 6.13
Sufficient ties test . . . 6.14
Days spent in UK . . . 6.15
Transit days . . . 6.16
Exceptional circumstances . . . 6.17
Covid . . . 6.18
Deeming rule (frequent visits) . . . 6.19
“Home” . . . 6.20
“Home” vocabulary compared . . . 6.21
“Work” . . . 6.22
Where is work done . . . 6.23
Reference period: Non-work days . . . 6.24
“Significant break from work” . . . 6.25
Minor definitions . . . 6.26
UK ties . . . 6.27
Family tie . . . 6.28

Accommodation tie 6.29
Work tie 6.30
90-day tie 6.31
Country tie 6.32
Year of death 6.33
International transport workers 6.34
Record keeping. 6.35
Residence: Burden of proof 6.36
Non-resident's tax return: SA109 . . . . 6.37
Residence rules now abolished 6.38
Non-residence & tax avoidance 6.39
Resident of nowhere. 6.40
SRT: Critique 6.41
Future of SRT 6.42
Scottish/Welsh taxpayers 6.43

CHAPTER 7
Residence of Trustees

Trustees and residence: Introduction 7.1
Who are the trustees. 7.2
Trustees a distinct person. 7.3
Trust residence for IT/CGT 7.4
Trustees all UK resident 7.5
Mixed-resident trustees 7.6
Residence condition C 7.7
Individual trustee/split year 7.8
Accidental residence: A trap 7.9
Separate sub-fund trustees 7.10
Transfer between settlements 7.11
PE-residence rule 7.12
When is there a UK PE 7.13
Fixed place of business PE 7.14
Agency PE 7.15
Individual trustee: Branch/agency 7.16
PE-residence rule guidelines 7.17
Protectors and trust residence 7.18
Trust residence for IHT 7.19
Trust residence: Critique 7.20
Residence of bare trustees 7.21

CHAPTER 8
Residence of Companies

Company residence: Introduction 8.1

History of corporate residence 8.2
The incorporation rule 8.3
Business cessation/winding up 8.4
Pre-1988 companies 8.5
Central management/control test 8.6
Control: company law background 8.7
CMC: Top level control 8.8
CMC a question of fact 8.9
Directors meetings 8.10
Some UK directors 8.11
Parent/subsidiary relationship 8.12
Period of enquiry 8.13
Covid & company residence 8.14
CMC: Summary 8.15
Dual residence/no CMC 8.16
HMRC practice/clearance 8.17
CMC/trade income source compared 8.18
DTA residence rule 8.19
Residence outside UK 8.20
Change of company residence 8.21
OEIC residence 8.22
Societas Europea/SCE 8.23
Company residence: Critique 8.24
Company resident nowhere 8.25
Loss importation 8.26

CHAPTER 9
Treaty-Residence

Treaty-residence: Introduction 9.1
Treaty/UK-tax residence compared 9.2
Residence under art 4(1) 9.3
Treaty-person 9.4
"Liable to tax" 9.5
Liable: Causation requirement 9.6
State/subdivision/local authority 9.7
Liable to source tax only 9.8
Residence change during year 9.9
Tie-breaker tests 9.10
Tie-breaker tests: Individuals 9.11
Permanent home 9.12
Centre of vital interests 9.13
Habitual abode 9.14
Nationality/mutual agreement 9.15

Period of enquiry: Tie-breaker 9.16
Tie-breaker: Entities 9.17
Tie-breaker: Mutual agreement 9.18
POEM tie-breaker 9.19
POEM: Critique 9.20
Treaty-residence: Trusts 9.21
Treaty-residence: Partnerships 9.22
Partnership: Non-OECD Model DTAs 9.23
Treaty-residence: Pension fund 9.24
RIC/REIT/REMIC 9.25
USA/UK DTA 9.26
Tax exempt organisations 9.27
S Corporation 9.28
Treaty-residence: Non-OECD DTA 9.29
Proof of treaty-resident status 9.30
Covid and treaty-residence 9.31

CHAPTER 10
Split Years: Arrival and Departure

Residence throughout tax year 10.1
Split year rules 10.2
Split-year reliefs 10.3
Definition of “split year” 10.4
Definitions for split-year rules 10.5
Case 1: Start work overseas 10.6
Case 2: Partner starts work overseas 10.7
Case 3: Cease to have UK home 10.8
Case 4: Start to have UK home only 10.9
Case 5: Start work in UK 10.10
Case 6: Stop work overseas 10.11
Case 7: Partner stops work overseas 10.12
Case 8: Start to have UK home 10.13
Priority between Cases 10.14
Split year: Tax return 10.15
Arrival/departure: Disclosure 10.16
Split year of trustees and PRs 10.17
Split-year rules: Critique 10.18

CHAPTER 11
Temporary Non-residence

Temporary non-residence: Introduction 11.1
Purpose of TNR rules 11.2
Terminology 11.3

"Temporarily non-resident" 11.4
Examples 11.5
TNR gain/loss 11.6
Post-departure acquisition 11.7
DTA override: Gains 11.8
TNR: BAD relief claim 11.9
TNR s.86/s.87 interaction 11.10
TNR dividend code 11.11
TNR dividends: Definitions 11.12
Taxation of TNR dividends 11.13
"TNR dividends" 11.14
Non-resident IT relief 11.15
DTA override: UK dividend 11.16
Post-departure trade profits 11.17
TNR: Life policies 11.18
TNR: Offshore funds 11.19
Pre-departure income remitted 11.20
Pre-departure gains remitted 11.21
Planning 11.22
TNR rules: Critique 11.23

CHAPTER 12
Exit Taxes

Exit taxes: Introduction 12.1
Hold-over clawback: Emigration of individual 12.2
Clawback of EIS relief 12.3
Charge on emigration of trust 12.4
Liability for trust exit charge 12.5
Treaty-emigration of trust 12.6
Payment by instalments 12.7
Trader: Emigration/immigration 12.8
Exit taxes: DTAs 12.9
Exit charge on individuals? 12.10

CHAPTER 13
UK Arrival or Departure: Tax Checklist

Review of residence status 13.1
Individual coming to UK; not TNR 13.2
Key dates to diarise 13.3
Temporary non-resident 13.4
Individual an employee 13.5
Trustee 13.6
Director/partner 13.7

Trusts 13.8
Company not held in trust 13.9
Pre-deemed-domicile planning 13.10
Pre-actual domicile planning 13.11
Departure planning. 13.12

CHAPTER 14
Income and its Categorisation

Income: Introduction 14.1
Terminology: Income/gains/profit 14.2
Charges to IT/CGT. 14.3
Need for a source? 14.4
Income Tax: a tax on income? 14.5
Income categories. 14.6
Categorisation tie-breakers 14.7

CHAPTER 15
Income Recognition: Received/Entitled/Arise/Paid

Income-recognition vocabulary 15.1
Paradigm contexts 15.2
Recognition/attribution: Analysis 15.3
Glosses and paraphrases 15.4
When is interest recognised 15.5
When are dividends recognised 15.6
Waiver of interest/dividends 15.7
Receipt by nominee/trustee 15.8
Income recognition: Breach of trust. 15.9
Retrospective acts/backdating 15.10
Income recognition in DTAs 15.11

CHAPTER 16
Source/RFI/Territorial Principles

Source/RFI: Introduction 16.1
Source: IT territorial limit 16.2
Approach to locating source 16.3
Do sources have a location?. 16.4
Formal/substantive source rules. 16.5
No source/deemed source 16.6
Source of gains. 16.7
Non-UK cases on source 16.8
Relevant foreign income 16.9
RFI collection costs 16.10
General territorial principle 16.11
Territorial principle: Application. 16.12

CHAPTER 17
The Remittance Basis

Remittance basis: Introduction 17.1
History of remittance basis 17.2
HMRC guidance. 17.3
"Foreign income and gains". 17.4
"Clean capital" and income/capital 17.5
Remittance basis: Who qualifies 17.6
Remittance-basis claim: s.809B 17.7
Remittance basis claim: Procedure 17.8
Sub-£2k taxpayer: s.809D 17.9
Non-taxpayer: s.809E 17.10
Time of foreign domicile 17.11
Remittance basis claim charge 17.12
Charge on remitted RFI 17.13
Charge on remitted gains 17.14
Remittance after income/gains arise 17.15
Remittance when UK domiciled 17.16
Arising basis taxpayer remittance 17.17
Remittance when non-resident. 17.18
Remittance after death 17.19
Remittance after source ceased 17.20
RFI/gains of non-resident, remitted when resident 17.21
RFI from Ireland 17.22
Remittance basis for trustees: Pre-2007 transitional rules. 17.23
Forward tax agreements 17.24
Divorce: Remittance liabilities 17.25
Remittance compliance/enquiry. 17.26
Tax return: Unremitted RFI/gains 17.27

CHAPTER 18
The Meaning of Remittance

ITA remittance basis: Introduction 18.1
Remittance conditions A to D 18.2
Relevant person: Introduction 18.3
Relevant person: Family 18.4
Relevant person: Companies 18.5
Relevant person: Trusts 18.6
Body connected with trust 18.7
Company relevant person: Examples 18.8
Relevant person: Partnership 18.9
Relevant person: Pre-2008 income/gain 18.10

Relevant person: Compliance 18.11
Relevant person: Critique 18.12
"Property" 18.13
Remittance condition A: UK link 18.14
Service provided in UK 18.15
Condition B: Link to income/gain 18.16
Property is the income or gains 18.17
Derived property 18.18
Bank errors 18.19
Relevant-debt remittance 18.20
Relevant debt 18.21
Debt "related" to property (debt-related asset) 18.22
Use "in respect of" debt 18.23
Use as security for debt 18.24
Guarantees 18.25
Becoming/ceasing to be relevant person: Conditions A & B 18.26
Debt becomes/ceases to be relevant debt 18.27
Conditions C/D: Introduction. 18.28
Gift of income/gains. 18.29
Examples of condition C 18.30
Condition C: Pre-2008 income/gain. 18.31
Condition D: Connected operation 18.32
Condition D: Examples 18.33
Condition D: Pre-2008 income/gain 18.34
Amount remitted 18.35
Debt-remittance: Amount remitted 18.36
Debt-remittance: P(10) cap 18.37
Security for debt: Amount remitted 18.38
Amount remitted: post-2020 HMRC view. 18.39
Wholly-relevant debt: no cap 18.40
Post-charge ingredients of mixed fund 18.41
Amount remitted: P(12) cap. 18.42
Condition C/D: Amount remitted 18.43
Sets 18.44
Gain on disposal at undervalue 18.45
Purchase of family home 18.46
School fees 18.47
Remittance before income/gains arise 18.48
Partnerships 18.49
Proceeds of divorce settlement 18.50
Debit, credit and charge cards 18.51
Gift to charity 18.52

Transitional: Pre-2008 property 18.53
Transitional relief: Pre-2008 loans 18.54
Remittance basis planning 18.55
Reform 18.56

CHAPTER 19
Remittance Reliefs

Remittance reliefs: Introduction 19.1
Remittance investment relief 19.2
Relevant event 19.3
Remittance by virtue of relevant event 19.4
Claims 19.5
The relief 19.6
Investment relief TAAR. 19.7
Investment fails to proceed 19.8
"Qualifying investment" 19.9
Condition A: Trading co/group 19.10
Condition B: No benefit. 19.11
Clawback remittance charge 19.12
Potentially chargeable event 19.13
Extraction of value rule 19.14
"Appropriate mitigation steps" 19.15
"Taken offshore" or "re-invested". 19.16
"Disposal proceeds". 19.17
Grace period 19.18
Effect of mitigation steps 19.19
Pooling investments in co/group 19.20
Investment from mixed fund 19.21
Clearance 19.22
Investment relief: Critique 19.23
Relief on paying remittance charge 19.24
Foreign services relief 19.25
Services condn A: non-UK property 19.26
Services condn B: Pay non-UK bank. 19.27
Services relief: s.730/s.87 benefit 19.28
Exempt property 19.29
Exempt property code: Definitions 19.30
Public access rule 19.31
Personal use rule 19.32
Repair rule 19.33
Temporary importation rule 19.34
Small remittance rule 19.35
Exempt property clawback charge. 19.36

Sales relief 19.37

CHAPTER 20
Mixed Funds

Mixed funds: Introduction 20.1
Definition of "mixed fund" 20.2
Interaction with share pooling 20.3
Ingredients of mixed fund 20.4
Onshore transfers 20.5
Offshore transfer 20.6
Income/gains used to pay debt 20.7
Fund with different types of RFI 20.8
Income/gains arise to 3rd party 20.9
Gift of income/gains. 20.10
Mixed-fund TAAR 20.11
Cleansing mixed funds. 20.12
Para 44 cleansing relief 20.13
Para 45 cleansing relief 20.14
Loss in mixed fund. 20.15
Pre-2008 mixed fund 20.16
Pre-2008 mixed fund rules 20.17
Pre-2008 mixed funds: examples 20.18
Nominated income/gain remitted. 20.19
Nominated income: Critique 20.20
Mixed funds: Critique 20.21

CHAPTER 21
Trading Income

Trading income: Introduction 21.1
Charge on trading income 21.2
Profession/vocation 21.3
IT territorial limit: Trading 21.4
To whom trading income arises. 21.5
CT territorial limit: Trading. 21.6
Where is trading income source. 21.7
Place where contract made 21.8
Place-of-contract test rejected 21.9
Where profits in substance arise 21.10
Preparatory/auxiliary activities 21.11
Buying from UK sellers 21.12
Buying/selling to UK purchasers 21.13
Services 21.14
Construction/engineering work 21.15

Manufacturing 21.16
Use of UK commodity markets 21.17
Hire of chattels 21.18
Research division/shop windows 21.19
Where is contract made? 21.20
Trade partly in UK: Apportionment 21.21
Post-cessation receipts 21.22
DT relief: trading income 21.23
Independent personal services 21.24

CHAPTER 22
Trading in Land

Trading in land: Introduction 22.1
What is trading in land 22.2
Dealing/developing UK land 22.3
Land-dealing TAAR 22.4
Transactions in land: Introduction 22.5
Direct disposal of land 22.6
TiL person 22.7
TiL gateway conditions 22.8
Definitions 22.9
Indirect disposal of land 22.10
Deriving/attributing value 22.11
TiL trade 22.12
Chargeable person/company 22.13
Fragmentation 22.14
Calculation of gain 22.15
TiL TAAR 22.16
Pre-development gain 22.17
Private residence: Til relief 22.18
Indirect arrangements 22.19
"Another person" 22.20
"Arrangement" 22.21
"Disposal" 22.22
Definitions 22.23
Notification and assessment 22.24

CHAPTER 23
Performers

Entertainers and sportspeople 23.1
Definitions 23.2
Charge independent of withholding tax 23.3
Deemed UK trade 23.4

Connected payment/transfer 23.5
Activity otherwise taxable 23.6
Payment to third parties 23.7
Notional UK trade: profit computation 23.8
Trading loss 23.9
Withholding tax 23.10
Arrangements with HMRC 23.11
Chains of payments 23.12
Position of payor 23.13
Administration 23.14
DT Relief 23.15

CHAPTER 24
Property Income

Property income: Introduction 24.1
Property business terminology 24.2
Territorial limits: Property income 24.3
Non-resident co: Transitional rules 24.4
Quantum of property income 24.5
Overseas property business: Loss 24.6
DT relief: Property income 24.7
Non-resident landlord scheme 24.8
Non-resident landlord 24.9
Definitions 24.10
Prescribed persons 24.11
Tax computation: Agent. 24.12
Tax computation: Tenant 24.13
Returns and administration 24.14
Gross payment of property income 24.15
Credit for withholding tax 24.16
Agent indemnity. 24.17

CHAPTER 25
Deduction of Interest from Property Income

Deduction of interest 25.1
Basis for deduction 25.2
Capital expenditure 25.3
Wholly and exclusively 25.4
Tax relief schemes 25.5
Transfer pricing/thin capitalisation 25.6
“The basic pre-condition” 25.7
Participation condition 25.8
The general rule 25.9

"Provision otherwise made" 25.10
Securities (loans) 25.11
Definitions 25.12
Potential advantage for UK tax 25.13
SME exemption 25.14
Election into transfer pricing 25.15
Non-qualifying territory resident 25.16
Qualifying territory 25.17

CHAPTER 26
Interest Income

Interest: Introduction 26.1
Definition of interest 26.2
Discount 26.3
Premium 26.4
Deemed interest 26.5
Funding bonds 26.6
Part payment: Interest or principal 26.7
Interest: Charge to tax 26.8
Interest: Location of source 26.9
The situs approach 26.10
Rejection of situs approach 26.11
Modern case law 26.12
Relevant factors 26.13
Weighing up factors 26.14
Source of interest: Conclusion 26.15
Building society income 26.16
Co-operative & community benefit society income 26.17
Non-resident's interest: Outline 26.18
Withholding taxes: Introduction 26.19
Interest withholding tax 26.20
To whom is interest paid 26.21
Usual place of abode 26.22
Withholding tax: Exceptions 26.23
Excepted payment 26.24
Disguised interest 26.25
Loan or credit transaction 26.26
DT relief: Interest income 26.27
Interest: Pre-1963 DTAs 26.28
DT relief: Withholding tax 26.29
Obtaining a DTRR notice 26.30
DTT passport scheme 26.31
DTTP scheme: Guarantors 26.32

DTTP scheme: Application process . . . 26.33
No notice to pay gross . . . 26.34
Grossing-up: Not interest . . . 26.35
Failure to withhold . . . 26.36
Claim procedure: Critique . . . 26.37

CHAPTER 27
Exempt Interest of Non-Residents

Exempt interest: Introduction . . . 27.1
"FOTRA securities" . . . 27.2
Interest withholding tax . . . 27.3
FOTRA exemption . . . 27.4
Beneficial ownership . . . 27.5
FOTRA securities: Trust . . . 27.6
FOTRA exemption and DT relief . . . 27.7
Exempt foreign currency securities . . . 27.8
International organisation security . . . 27.9

CHAPTER 28
Accrued Income Profits

Accrued income profits . . . 28.1
AIP securities . . . 28.2
"Transfer" . . . 28.3
Transfer "with accrued interest" . . . 28.4
Deemed interest/credit/debit . . . 28.5
Accrued income profits and losses . . . 28.6
Charge on AIP income . . . 28.7
Accrued income loss relief . . . 28.8
AIP remittance basis . . . 28.9
Excluded persons . . . 28.10
AIP arising to non-resident . . . 28.11
Trusts . . . 28.12
Settlor-interested trusts . . . 28.13
ToA rules/AIP income . . . 28.14
AIP: Protected-trust reliefs . . . 28.15
DT relief: AIP income . . . 28.16
AIP/CGT interaction . . . 28.17
Foreign currency securities . . . 28.18

CHAPTER 29
Deeply Discounted Securities

DDS code . . . 29.1
"Deeply discounted security" . . . 29.2
"Issued" . . . 29.3

Foreign currency security. 29.4
Excluded occasions of redemption 29.5
Securities outside DDS code 29.6
Excluded indexed security 29.7
"Disposal" 29.8
"Profit". 29.9
Charge to tax on DDS income 29.10
DDS remittance basis 29.11
UK resident trust 29.12
Non-resident individual 29.13
Non-resident trust 29.14
Transfer of assets abroad 29.15
Non-resident company 29.16
Interaction with CGT 29.17
DDS/CGT compared 29.18

CHAPTER 30
Dividend Income

Dividends and distributions 30.1
Dividends a separate source. 30.2
UK dividend regime. 30.3
"Distribution". 30.4
"In respect of shares/securities". 30.5
Definition of distribution 30.6
Non-resident recipient 30.7
Offshore dividend regime 30.8
Non-resident company: Income/capital 30.9
Share premium/share capital 30.10
Consolidation of accounts 30.11
Co law approach: Critique 30.12
Gift to non-shareholder 30.13
Winding-up TAAR. 30.14
DT relief: Dividend income 30.15
Dividend nil rate/DTA interaction. 30.16
Dividend taxation: Critique 30.17

CHAPTER 31
Annual Payments

Annual Payments: Introduction 31.1
Charge on income 31.2
Annual Payment: Meaning. 31.3
Post-cessation trading receipt 31.4
Charge on Annual Payments 31.5

Annual Payment exemption 31.6
Commercial Annual Payment 31.7
Non-taxable consideration 31.8
Foreign maintenance payments 31.9
Annual-Payment withholding tax 31.10
Relief for payor within WHT 31.11
Annual Payment from RFI 31.12
Annual Payments: Critique 31.13

CHAPTER 32
Intellectual Property Income

IP income: Introduction 32.1
IP: Terminology 32.2
Types of IP income 32.3
Charge on non-trade IP income 32.4
IP income: Income/capital 32.5
Deductible expenditure 32.6
Source of non-trade IP income 32.7
Trade IP income 32.8
IP/AP WHT: Introduction 32.9
IP WHT conditions A&B 32.10
Application of IP WHT 32.11
IP WHT: DT relief 32.12
IP WHT: Treaty override 32.13
Professional authors 32.14
Films and sound recordings 32.15
DT relief: Royalties 32.16
Offshore receipts from IP 32.17
ORIP charge 32.18
Residence 32.19
UK-derived amount 32.20
Apportionment 32.21
De minimis rule 32.22
“Intangible property” 32.23
Exemptions 32.24
UK sales below £10m 32.25
Company in specified territory 32.26
Business undertaken within territory of residence 32.27
Foreign tax at least half of UK tax 32.28
Opaque partnership taxable in full treaty territory 32.29
Body corporate transparent in full treaty territory 32.30
Double taxation on control group 32.31
Collection from control group 32.32

Control group 32.33
Offshore IP receipts: TAAR 32.34
Interaction with other provisions 32.35
ORIP appeals 32.36
Definitions 32.37

CHAPTER 33
Misc Sweep-up Income

Misc Sweep-up Income 33.1
General principles 33.2
Source/voluntary transaction 33.3
Gift/voluntary transaction 33.4
Disposal of asset 33.5
Types of Misc Sweep-up Income. 33.6
Income from assets. 33.7
Income from company 33.8
Services 33.9
Examples of services 33.10
Income from finance 33.11
Futures and options 33.12
Swaps 33.13
Restraint of trade 33.14
US economic impact payments 33.15
Tax avoidance cases. 33.16
Sweep-up income: Computation 33.17
Sweep-up income: Remittance basis 33.18
Misc Sweep-up Income: Source. 33.19
DT relief: “Other Income” 33.20

CHAPTER 34
Employment Income

Employment income: Introduction. 34.1
Employment income Parts 34.2
Employment/employer/employee 34.3
Employment income/earnings 34.4
Earnings causation tests 34.5
Charge on employment income 34.6
Amount charged to tax 34.7
“Taxable earnings”. 34.8
Earnings for year/from employment/received 34.9
Earnings “for” tax year 34.10
Pre/post-employment earnings 34.11
UK resident/dom employee 34.12

COE remittance basis 34.13
Chargeable overseas earnings 34.14
Foreign employer 34.15
Incidental duties in UK 34.16
Dual contract arrangements 34.17
Dual-contract rule 34.18
Dual contract outside s.24A rule 34.19
Dual-contract apportionment 34.20
Split year 34.21
Overseas workday relief. 34.22
OWR mixed funds 34.23
OWR: Qualifying account 34.24
OWR mixed fund rule 34.25
Two or more employments 34.26
Salary paid into 2 accounts 34.27
The deposit rule 34.28
Non-resident employee 34.29
Where are duties performed. 34.30
Earnings “in respect of” UK duties 34.31
Remitting after year earnings are for 34.32
Remittance after employment 34.33
Earnings for year employee non-resident 34.34
Remittance when non-resident 34.35
Receipt/remittance after death 34.36
Earnings from Ireland 34.37
Termination payments 34.38
Relocation expenses 34.39
Overseas Crown employment 34.40
Seafarers 34.41
Lower-paid employee exemption 34.42
Tax equalisation 34.43
Accountancy services benefit 34.44

CHAPTER 35
Travel Expenses: Employment Income

Introduction 35.1
“Workplace”. 35.2
“Permanent” workplace 35.3
“Temporary” workplace. 35.4
Period of continuous work 35.5
Minor workplace changes 35.6
Workplace a base 35.7
Deduction rule 35.8

Ordinary commuting 35.9
Private travel 35.10
What is the journey? 35.11
Workplace an area 35.12
Remittance basis taxpayer 35.13
Travel in performance of duties 35.14
Wholly and exclusively 35.15
Conferences and seminars 35.16

CHAPTER 36
PAYE

PAYE: Introduction 36.1
Relevant payment 36.2
Employment/employer/employee 36.3
Duty to deduct PAYE 36.4
Employee works for non-employer 36.5
PAYE clearance: s.690 direction 36.6
Leaving UK: PAYE 36.7
PAYE if no personal allowance 36.8
PAYE repayment not remittance 36.9
International employee schemes 36.10
DTA relief: PAYE NT code 36.11
PAYE 60-day rule: EP App 8 . . . . 36.12
PAYE exemption: EP App 4 . . . . 36.13
Foreign tax credit: EP App 5 . . . . 36.14
Tax equalisation: EP App 6 . . . . 36.15
NIC arrangements 36.16

CHAPTER 37
Employment Income: DT Relief

DT employment reliefs 37.1
Employment income DT relief 37.2
Salary/wages/remuneration 37.3
Pay for work when employed 37.4
Where is employment exercised 37.5
Short-term Business Visitors 37.6
STBV payment condition (b) 37.7
Who pays remuneration 37.8
Labour-hire arrangement 37.9
DTA 60-day rule 37.10
Labour-hire: Avoidance motive 37.11
STBV payment condition (c): PE 37.12
STBV condition a: 183-day rule 37.13

Employer foreign PE of UK co 37.14
Employer a partnership 37.15
Deemed employment/non-employment 37.16
Share options 37.17
DT claims & procedure 37.18
DT relief: Directors 37.19
DT relief: Government service 37.20

CHAPTER 38
Pension and Annuity Income

Pensions & annuities: Introduction 38.1
Pension income of split year 38.2
Types of pension scheme 38.3
s.569 UK pension 38.4
Foreign pension 38.5
Employment-related pension 38.6
Commonwealth pension 38.7
DT relief: Pension income 38.8
Australia/UK DTA 38.9
USA/UK DTA: Pension income 38.10
Income of pension fund 38.11
Transfer between schemes 38.12
Relief for pension contribution 38.13
Cross border contribution relief 38.14
Canadian RRSP and RRIF 38.15
Annuity income: Introduction 38.16
Annuity terminology 38.17
Purchased life annuity: Charge 38.18

CHAPTER 39
Benefit in Kind: Family Home and Chattels

Home/chattels owned by company 39.1
The benefits code 39.2
Property law background 39.3
“Family” and “household” 39.4
“Director” 39.5
Shadow directors 39.6
“Employment” & related terms 39.7
Accommodation/benefit charge 39.8
Employment-causation test 39.9
Employer-provision test 39.10
Personal relationship exemption 39.11
Former employee 39.12

Market rent 39.13
Accommodation: The charge 39.14
Available but not used 39.15
Cash equivalent: Computations 39.16
Cost of providing accommodation 39.17
Home sub-£75k: Computation 39.18
"Making good" 39.19
Home over £75k: Computation 39.20
Revaluation: Delayed occupation 39.21
Home for more than 1 employee 39.22
Accommodation charge: Planning 39.23
Reimbursement solution 39.24
Settlor finance 39.25
Co-ownership of home 39.26
Defences to home BiK charge 39.27
Foreign homes relief 39.28
Other planning 39.29
BiK/general earnings: Interaction 39.30
Planning for home charge 39.31
Home BiK: HMRC enquiries 39.32
Home BiK: Critique 39.33
SDLT on accommodation charge 39.34
Benefit BiK charge 39.35
"Cash equivalent" 39.36
s.205 cost rule 39.37
Ordinary earnings/BiK border 39.38
BiK: Remittance basis 39.39
Benefits in kind: Non-resident 39.40
Section 731 charge 39.41
Transfer pricing & BiK 39.42

CHAPTER 40
Benefit in Kind: Loans from Non-Resident Companies

Loans from non-resident company 40.1
Employment-related loan 40.2
"Employment-related loan" 40.3
"Employment-related" 40.4
Official rate of interest 40.5
Loan released/written off 40.6
Death of employee 40.7
Loan to participators 40.8
Benefit to participators 40.9
Company loans: GAAR 40.10

CHAPTER 41
Discretionary Trusts: Income Tax

Discretionary trusts: Introduction 41.1
Tier 1: Trust charge on income receipt 41.2
Tier 3: Discretionary payment charge 41.3
Beneficiaries tax credit 41.4
Tier 2: Trust withholding tax 41.5
Trust tax-pool credit 41.6
Examples 41.7
Trust payment: Income/capital 41.8
Discretionary trust transparency reliefs 41.9
ESC B18: Non-resident trust 41.10
s.629 income: Settlor's child 41.11
UK trust, non-resident beneficiary: DT relief 41.12
Dual-resident trustees 41.13

CHAPTER 42
IIP Trusts: Income Tax

Introduction and terminology 42.1
Taxation of IIP trustees 42.2
Income mandated 42.3
Life tenant non-resident 42.4
Life tenant remittance basis user 42.5
Taxation of life tenant 42.6
Trustees expenses 42.7
Life tenant's foreign tax credit 42.8
Life tenant: Source of income 42.9
Scots IT rates 42.10
DT relief 42.11
Baker or Garland trust jurisdiction? 42.12

CHAPTER 43
Rates of Income Tax: CGT

IT rates: Introduction 43.1
IT rates in outline 43.2
Devolution issues 43.3
Dividend/Savings Income 43.4
IT rates: Figures 43.5
IT rates: Application 43.6
Application of savings rates 43.7
Starting rate for savings 43.8
Savings nil rate 43.9
Application of dividend rates 43.10

Settlor-interested trust IT rate 43.11
s.720: transferor IT rate 43.12
CGT rates: Introduction 43.13
CGT rates: Individuals 43.14
CGT rates: PRs. 43.15
CGT rates: Trusts. 43.16
CGT rates: Critique 43.17
Inflation/fiscal drag 43.18
Rates of CT 43.19

CHAPTER 44
Personal Allowances

Personal allowances: Introduction 44.1
CGT annual exemption 44.2
IT personal allowances 44.3
Allowance in year of birth/death 44.4
IT allowances: high earners 44.5
Allowances: remittance basis user. 44.6
Entitlement to IT personal allowances 44.7
Personal allowances under DTAs 44.8
Non-residents allowances: Reform 44.9

CHAPTER 45
Non-Residents Income Tax Relief

Non-residents IT relief: Introduction 45.1
Amount A: Tax deducted at source 45.2
Amount B: Non-disregarded income/reliefs 45.3
Disregarded reliefs 45.4
Disregarded income 45.5
Disregarded savings & investment income 45.6
Disregarded Annual Payments 45.7
Disregarded pension/social security income 45.8
Individuals: Split years. 45.9
Trusts: UK beneficiary rule 45.10
Critique 45.11

CHAPTER 46
National Insurance Contributions

NICs: Introduction 46.1
Employment/employed/self employed. 46.2
“Secondary contributor” 46.3
Territorial limitation: Outline 46.4
Bilateral social security agreements 46.5
ROW: Employed in GB 46.6

ROW: Residence requirements 46.7
Class 1 NIC: HMRC examples 46.8
ROW: Class 2 NIC 46.9
ROW: Class 3 NIC 46.10
Place of business in UK 46.11
Residence and ordinary residence 46.12
EU/EEA/Switzerland 46.13
Definitions 46.14
Persons covered 46.15
General rules 46.16
Detached workers 46.17
Forms 46.18
Activity in 2 states: Tie-breaker 46.19
Class 4 contributions 46.20
Partnerships 46.21

CHAPTER 47
Settlor-Interested Trust Code

Settlor-interested trust code 47.1
"Income" arising under a settlement 47.2
Arising under a settlement 47.3
Settlor deductions/reliefs 47.4
Settlor-interested trust 47.5
Meanings of "settlor-interested" 47.6
Minor s.624 reliefs 47.7
s.624 remittance basis 47.8
Non-resident settlor 47.9
s.624 double-charge relief 47.10
Trustees of settlor-interested trust 47.11
Interaction of s.624/CGT 47.12
s.624/s.720 compared 47.13
Settlor receives capital sum 47.14
Payment to settlor's child 47.15
Corporate settlor 47.16
Tax return: s.624 income 47.17
DT relief: s.624 income 47.18
s.643A charge: Outline 47.19
s.643A application conditions 47.20
Untaxed Benefits Total 47.21
Available Protected Income 47.22
s.643A income charge 47.23
s.643A remittance basis 47.24
s.643A income matching rule 47.25

s.643A charge on non-resident? 47.26
s.643A commencement 47.27
s.643A settlor-attribution rule: Outline 47.28
s.643A attribution conditions 47.29
s.643A settlor-attribution rule 47.30
s.643A onward-gift rule 47.31
s.643A onward-gift conditions 47.32
s.643A misc rules 47.33
s.643A onward-gift donee charge 47.34
Donee not taxable: s.643A onward-giftable amount 47.35
s.643A Onward-gift settlor-attribution rule 47.36
Indirect gift to settlor/close family 47.37
s.643A onward-gift remit. basis 47.38

CHAPTER 48
Transfer of Assets Abroad: Introduction

ToA: Introduction 48.1
Construction of ToA provisions 48.2
"Relevant transfer" 48.3
"Transfer" of "assets" 48.4
"Person abroad" 48.5
"Resident outside the UK" 48.6
Income "payable" to person abroad 48.7
Situs of asset transferred 48.8
Transfer for full consideration 48.9
Income of person abroad: Causation 48.10
Associated operation: Definition 48.11
Why associated operations matter 48.12
Income received as indirect consequence of transfer 48.13
Income of person abroad 48.14
Capital receipts deemed income 48.15
Income of person: Quantum 48.16
Genuine transaction defence 48.17
Spouse of transferor 48.18
ToA information notices 48.19

CHAPTER 49
Transfer of Assets Abroad: Transferors

Transferor charge: Introduction 49.1
Purpose of transferor charge 49.2
Charge on transferor 49.3
Who is the transferor 49.4
Transferor: Procurement test 49.5

Shareholders not transferors 49.6
Quasi-transferor: Other cases. 49.7
X pays Y to make transfer 49.8
Quasi-transferor when individual is direct transferor 49.9
Trustees/fiduciaries: Transferors 49.10
Co-owner transferors 49.11
Transferor/settlor compared. 49.12
Must transferor (intend to) avoid IT 49.13
Condition A: Power to enjoy 49.14
"Power to enjoy" 49.15
Enjoyment conditions A-D 49.16
Enjoyment condition E: Control 49.17
Power to enjoy: Topics 49.18
Power to enjoy: Causation 49.19
s.721 income chargeable to IT 49.20
s.721 Cond. C: Transferor UK resident 49.21
Amount of s.720 charge 49.22
Transferor receives capital sum 49.23
Capital receipt conditions 49.24
Time extent of s.727 charge 49.25
s.720 remittance basis 49.26
s.720/s.624 interaction 49.27
No indemnity for transferor 49.28
Tax return: s.720 income 49.29
DT relief: s.720 income 49.30

CHAPTER 50
Transfer of Assets Abroad: Benefits

s.731 charge/s.731 income. 50.1
s.731 application conditions. 50.2
Relevant transfer condition 50.3
Benefit 50.4
Who receives the benefit? 50.5
Benefit in course of divorce 50.6
Valuation of benefits: Principles 50.7
Benefit not loan/use of property 50.8
Statutory valuation rules 50.9
Benefit of loan 50.10
Use of chattel 50.11
Use of land 50.12
Benefit causation condition 50.13
Benefit causation: 2 transfers. 50.14
Taxable-transferor defence 50.15

Capital-benefit condition 50.16
s.731/s.87 interaction 50.17
Computation of s.731 income 50.18
Deduction for s.87 charge 50.19
"Relevant income": Definition. 50.20
Deemed income of person abroad 50.21
Life tenant: Relevant income 50.22
Settlor-interested trust: Relevant income. 50.23
s.720 income: Relevant income 50.24
Income "can" be used to benefit 50.25
When does one ask: Timing issue 50.26
Distributed income: HMRC view 50.27
Relevant income spent 50.28
Income distributed as it arises 50.29
Income distributed after it arises 50.30
Accumulated income 50.31
Company income distributed 50.32
Income reinvested: Tracing 50.33
Relevant income in mixed fund 50.34
Income of co held by trust 50.35
Non-beneficiary when income arises 50.36
Avoid relevant income: Planning 50.37
Tax of person abroad 50.38
s.731 remittance basis 50.39
When is benefit remitted to UK. 50.40
When is relevant income remitted 50.41
s.731 matching rules 50.42
s.731 remittance basis: Critique 50.43
"Protected Income" 50.44
Non-resident receives benefit. 50.45
s.731 income arising to non-resident 50.46
s.731 income of split year 50.47
s.731 settlor-attribution: Outline 50.48
s.731 attribution conditions 50.49
s.731 settlor-attribution rule. 50.50
s.731 settlor-attribution remittance-basis. 50.51
s.731 onward-gifts 50.52
s.731 onward-gift conditions 50.53
s.731 misc rules 50.54
s.731 onward-gift donee charge. 50.55
Donee not taxed 50.56
s.731 onward-gift settlor-attribution rule. 50.57

Responses to s.731: Summary 50.58
Record keeping. 50.59
Tax return: s.731 income 50.60
DT relief: s.731 income 50.61

CHAPTER 51
Transfer of Assets Abroad: Relief From Overlapping Charges

Overlapping ToA charges: Relief 51.1
IT on person abroad’s income 51.2
CT on person abroad’s income 51.3
Person-abroad’s credit 51.4
Distribution relief. 51.5
Direct company ownership 51.6
Distribution to non-transferor 51.7
Identifying relievable income 51.8
Double-counting relief. 51.9
Charge on two individuals 51.10
“Taken into account for IT”. 51.11
Trust/co structure 51.12
s.731 charge & income distribution. 51.13
s.720/s.731 overlap 51.14
Benefits exceed relevant income 51.15
Co-transferors within s.720 . . . . . 51.16
Other s.720 overlaps 51.17
Life policy/s.720 overlap 51.18
CFC/s.720 overlap 51.19
Taxpayer confidentiality 51.20

CHAPTER 52
Transfer of Assets Abroad: Motive Defence

Motive defence: Introduction. 52.1
Motive defence conditions. 52.2
Motive defence condition A 52.3
Motive defence condition B 52.4
Enactment history 52.5
Mixed tax/non-tax purposes. 52.6
“Commercial”: Undefined sense 52.7
“Commercial” in New Condition B. 52.8
Meaning of “taxation” 52.9
Practical examples: Introduction 52.10
Trust: Settlor excluded. 52.11
Foreign settlor; UK/non-UK beneficiaries. 52.12
Foreign settlor; UK beneficiaries. 52.13

UK settlor and UK beneficiaries 52.14
UK settlor; foreign beneficiaries 52.15
UK settlor; UK/foreign beneficiaries. 52.16
Trust transfer; settlor beneficiary. 52.17
Appointing non-UK trustees 52.18
Trust transfer: IHT avoidance 52.19
Transfer: Non res/dom Individual to offshore co 52.20
Transfer: Trust to underlying co 52.21
UK resident non-dom transfers to offshore co. 52.22
Transfer to UK resident foreign incorporated co. 52.23
Transfer between trusts 52.24
Employee benefit trusts 52.25
Associated operations: Introduction 52.26
Pre-2005 associated operations 52.27
Post-2005 transfer + associated operations 52.28
Associated operations: Avoidance purpose 52.29
Income after tainted operation 52.30
Income before tainted operation 52.31
Pre-2005 transfer; post-2005 operation 52.32
Tax return: Motive defence 52.33
HMRC enquiry on claim 52.34
Appeals. 52.35
Motive defence: Disclaimer. 52.36
Abolish the 2006 rules 52.37

CHAPTER 53
Profit Fragmentation

Profit fragmentation: Introduction 53.1
The target 53.2
Parties to PFA 53.3
Profit Fragmentation Arrangements. 53.4
Condition a: Material provision 53.5
Condition b: Transfer of value 53.6
Condition c: Arm’s length 53.7
Condition d: Enjoyment conditions 53.8
Tax mismatch 53.9
Counteraction 53.10
Exemptions. 53.11
Payment to fund 53.12
Diversity of ownership. 53.13
Double charge relief. 53.14
Reimbursement relief. 53.15
TAAR. 53.16

PFA: EU law 53.17
Partnerships 53.18
“Partnership”/“Trust". 53.19
Other anti-avoidance rules: Interaction 53.20
NICs 53.21
Commencement 53.22
PFA impact. 53.23

CHAPTER 54
Transfer of Income Stream

Transfer of income streams 54.1
Is income transferable? 54.2
Application of IS code 54.3
Relevant receipts 54.4
Transfer of income, not asset 54.5
“Transfer” 54.6
Charge on income-stream value 54.7
Exceptions to charge 54.8
Transfer to partnership/trust. 54.9
Position of transferee 54.10
Income streams: Trusts 54.11
Territorial limitation 54.12
Partnership income stream/asset 54.13
Application conditions 54.14
Charge on partnership transfer. 54.15
Chap 5AA/5D interaction 54.16
DT relief. 54.17

CHAPTER 55
Transactions in Securities

Transactions in securities 55.1
Minor definitions 55.2
Transaction in securities 55.3
TiS application conditions 55.4
TiS Circumstances 55.5
TiS Circumstances A(a)(b)(c) 55.6
TiS Circumstance B 55.7
Circumstance A/B compared 55.8
“Relevant Consideration” 55.9
Fundamental change of ownership 55.10
TiS TAARs 55.11
TiS issue list. 55.12
Examples 55.13

Individual sells shares to co 55.14
Capital distributions 55.15
Examples with foreign company 55.16
Counteraction 55.17
TiS clearance 55.18

CHAPTER 56
Chargeable Gains

2019 CGT rewrite: Navigation 56.1
Charge to CGT/CT on gains 56.2
"Disposal" and "assets" 56.3
Computation of gain 56.4
Amount charged to CGT/CT 56.5
CGT/CT: Territorial scope 56.6
Trade through UK branch/PE 56.7
Asset ceases to be chargeable 56.8
Gain in split year 56.9
Date of disposal/acquisition 56.10
Pre-arrival rebasing 56.11
Share pooling and matching 56.12
"Securities" 56.13
Pooling/matching: Cryptoassets 56.14
Pooling/matching: ISAs 56.15
2017 rebasing 56.16
CGT remittance basis 56.17
Remittance basis and taper/indexation 56.18
BAD relief: Remittance basis 56.19
Winding-up offshore company 56.20
Trust a taxable unit 56.21
CGT treatment of debts 56.22
DT relief for capital gains 56.23
DT CGT relief: Exceptions 56.24
DT relief: Remittance basis 56.25
Tax return: Gains 56.26

CHAPTER 57
UK Property Held by Non-Residents

Introduction 57.1
Charge on land/land-rich assets 57.2
Land-rich asset 57.3
Derivation of value 57.4
"Qualifying assets" 57.5
Chose in action disregard 57.6

"Related party" . . . 57.7
Trading exemption . . . 57.8
Linked disposals . . . 57.9
Substantial indirect interest . . . 57.10
Normal commercial loan . . . 57.11
Connected persons aggregated . . . 57.12
TAAR/Treaty override . . . 57.13
Grant of option . . . 57.14
UK-land rebasing: Introduction . . . 57.15
General rebasing conditions . . . 57.16
2019 rebasing . . . 57.17
2019 Rebasing: The relief . . . 57.18
Election out of 2019 rebasing . . . 57.19
2015 rebasing conditions . . . 57.20
2015 rebasing relief . . . 57.21
Elections out of 2015 rebasing . . . 57.22
2015/2019 rebasing conditions . . . 57.23
2015/2019 rebasing: the relief . . . 57.24
Election out of 2015/2019 rebasing . . . 57.25
Rebasing: Company onshoring . . . 57.26
Company/trust leaves UK . . . 57.27
Rebasing: Wasting asset . . . 57.28
Rebasing election procedure . . . 57.29
Interaction with anti-avoidance . . . 57.30
Hold-over relief . . . 57.31
Hold-over relief: Standard version . . . 57.32
Land-asset hold-over relief . . . 57.33
Land-asset: Resident transferee . . . 57.34
Non-resident transferee . . . 57.35
Unascertainable consideration . . . 57.36
Residential property gain . . . 57.37
Residential property . . . 57.38
Commencement . . . 57.39
Non-residents CG/CT: History . . . 57.40
Non-residents CGT/IT: Critique . . . 57.41

CHAPTER 58
Reorganisations

Reorganisations: Introduction . . . 58.1
Reorganisation relief . . . 58.2
Share-for-share relief . . . 58.3
Share issue/cancellation relief . . . 58.4

Transfer of business relief 58.5
CGT reorganisation TAAR 58.6
Redomiciled (ex-UK) securities. 58.7

CHAPTER 59
Residential Property: CGT

Private residence relief. 59.1
"Residence" 59.2
Non-residents PRR disallowance. 59.3
Residence in territory of house 59.4
Day count test. 59.5
MPR notice 59.6
Which is main residence 59.7
Spouses. 59.8
MPR notice on marriage 59.9
Periods of absence relief 59.10
2015 transitional rules 59.11
Residence held by trust or PRs 59.12
Commencement of PRR rules 59.13

CHAPTER 60
Gains of Non-resident Settlor-interested Trust: s.86

CGT on non-resident trusts 60.1
Section 86 charge. 60.2
Fundamental s.86 conditions 60.3
Minor definitions 60.4
Settlor-interested condition 60.5
Pre-1998 protected trusts 60.6
Qualifying settlement 60.7
Pre-1991 protected trusts 60.8
Trust residence condition 60.9
Settlor residence/domicile conditions 60.10
Section 86 gains condition 60.11
Death of settlor. 60.12
Death/divorce of beneficiaries 60.13
s.86 gains attributed to settlor 60.14
Interaction of s.86/s.3 TCGA 60.15
Corporate settlor 60.16
s.86/87 & BAD relief interaction. 60.17
Tax return: s.86 gains. 60.18
DT relief: s.86 gains. 60.19
Restriction on DTR for s.86 gains 60.20

CHAPTER 61
Capital Payments from Non-resident Trusts: s.87 code

s.87 code: Introduction 61.1
"Settlement"/"settled property" 61.2
Non-classic trust. 61.3
Non-resident trust condition 61.4
The s.87 charge 61.5
Section 1(3) amount 61.6
Capital payment 61.7
Receipt from trustees 61.8
Capital payment to/from company. 61.9
Payment from close co: s.96(1) rule 61.10
Payment to close co: s.96(2) rule. 61.11
Trust/company group disregard 61.12
Payment to/from co across trusts 61.13
Payment to non-beneficiary 61.14
Matching 61.15
Planning by matching 61.16
Interest surcharge 61.17
s.87 gains of split year 61.18
s.87 remittance basis 61.19
Non-resident disregards: Outline 61.20
Non-resident disregard. 61.21
Payment to temporary non-resident 61.22
Migrant disregard. 61.23
Final trust year 61.24
Non-resident disregard: Critique 61.25
Settlor-attribution: Introduction. 61.26
"Close-family" 61.27
Settlor-attribution indemnity 61.28
s.87 settlor-attribution rule. 61.29
Onward-gifts: Introduction. 61.30
s.87 onward-gift conditions 61.31
s.87 onward-gift definitions. 61.32
s.87 onward-gift rule 61.33
Onward-gift to close-family: s.87 settlor-attribution rule 61.34
Donee remittance basis user. 61.35
Series of gifts: A to B to C. 61.36
Migrant settlement 61.37
Dual-Resident trust: s.88 TCGA 61.38
Transfer between trusts 61.39
Pre-1981 gain/capital payment. 61.40

Pre-1998 gain/capital payment. 61.41
s.1(3) amount at 5/4/2008 . . . . 61.42
Pre-2008 capital payments 61.43
Pre-2008 capital payment/trust gain, matched post 2008 . . . . 61.44
Pre-2008 inter-trust transfer 61.45
Pre-2008 trust immigration 61.46
2008 rebasing election 61.47
2008 Rebasing: The relief 61.48
2008 rebasing: HMRC examples 61.49
2008 rebasing: Minor rules 61.50
2008 rebasing: OIG amounts 61.51
Rebasing: Transfer between trusts 61.52
UK dom/formerly-dom resident. 61.53
Non-resident trust: CGT planning 61.54
Trust holding company 61.55
Basic planning for s.87. . . . . 61.56

CHAPTER 63
Sub-funds

Position outside sub-fund regime 63.1
Sub-Fund regime 63.2
Sub-Fund election: Conditions 63.3
Condition 1: No sub-subfund 63.4
Condition 2: At least 2 Sub-Funds 63.5
Condition 3: No co-ownership 63.6
Cond. 4: Distinct beneficiaries 63.7
Procedure for election 63.8
Effect of sub-fund election 63.9
Planning 63.10
Sub-Funds: Critique 63.11

CHAPTER 64
Gains of Non-resident Companies

Section 3 TCGA: Introduction 64.1
Non-resident close company 64.2
s.3 gain attributed to participator 64.3
Computing gains: CT rules 64.4
Gain from loan relationship 64.5
Amount attributed to participator 64.6
Participators overlap 64.7
Participators overlap: Loan creditors 64.8

Participators overlap: Trustees/beneficiaries 64.9
Co chain: Indirect participator 64.10
Co chain not wholly-owned 64.11
s.3 gains of split year 64.12
25% minimum holding. 64.13
Loss accruing to non-resident co 64.14
Negligible value claim 64.15
s.3 motive defence 64.16
Foreign trade exemption 64.17
Economically significant activity 64.18
Partnership holds non-resident co 64.19
s.3 distribution relief 64.20
Deduction relief 64.21
Reimbursement by non-resident co 64.22
Section 3 remittance basis 64.23
CG group reliefs 64.24
Group/principal co of group. 64.25
"51/75/90 % subsidiary" 64.26
UK-group relief 64.27
Dividend in specie 64.28
Disposal + acquisition needed 64.29
Exceptions to group relief 64.30
Non-resident group relief 64.31
De-grouping charge 64.32
QCB: Non-resident co 64.33
Private residence relief 64.34
BAD relief: Trade group 64.35
Foundations 64.36
Pension scheme 64.37
Administration and appeals 64.38
Tax return: s.3 gain 64.39
DT relief: s.3 gain 64.40
Trust participator: No DT relief. 64.41
Foreign tax credit relief: s.3 . . . . 64.42

CHAPTER 65
Capital Losses

Capital losses: Introduction 65.1
Relief for losses 65.2
Loss within scope of CGT 65.3
Corporation tax losses 65.4
Computation of loss 65.5
Allowable loss 65.6

Loss of non-resident . . . 65.7
Loss in split year . . . 65.8
Loss on connected person disposal . . . 65.9
Chattels . . . 65.10
Losses used in best way . . . 65.11
Losses on death . . . 65.12
Loss of non-resident trust . . . 65.13
Personal loss and s.87 gain . . . 65.14
Personal loss and s.86 gain . . . 65.15
Loss of remittance basis taxpayer . . . 65.16
Foreign loss disallowed if no election . . . 65.17
Effect of loss foreign-election . . . 65.18
When is loss election worthwhile . . . 65.19
Basic planning for losses . . . 65.20
Capital-loss TAAR . . . 65.21
Spouse-transfer loss . . . 65.22
Loss-TAAR: Critique . . . 65.23
DT relief on gain + loss . . . 65.24

CHAPTER 66
Funds: Terms & Concepts

Fund terminology . . . 66.1
Participant/participate . . . 66.2
Mutual fund/CIS/OIEC . . . 66.3
Mutuality conditions . . . 66.4
Control conditions . . . 66.5
Realisation conditions . . . 66.6
OEIC: Purchase of own shares . . . 66.7
Mutual fund: winding-up exemption . . . 66.8
Condition D: Realisation on winding up . . . 66.9
Condition E: Fixed end date . . . 66.10
Condition F: Fund income . . . 66.11
Share buy-back and share issue . . . 66.12
Company in liquidation . . . 66.13
CIS exemptions . . . 66.14
Offshore fund: Definition . . . 66.15
Partnerships . . . 66.16
One fund or more? . . . 66.17
Offshore fund: Clearance . . . 66.18

CHAPTER 67
Offshore Income Gains

Taxation of offshore funds . . . 67.1

Definitions 67.2
Charge to tax on OIG 67.3
Meaning of "disposal" 67.4
OIG charge on death 67.5
OIG arising to partnership 67.6
OIG remittance basis 67.7
OIG arising to UK trust 67.8
OIG non-residence defence 67.9
OIG arising to non-resident trust 67.10
OIG anti-avoidance: Outline 67.11
OIG ToA provisions. 67.12
OIG s.87 charge 67.13
OIG s.3 charge 67.14
OIG and s.86 . . . . 67.15
OIG s.87/CGT s.87: Priority 67.16
OIG s.3/ToA priority: Company structure. 67.17
OIG s.87/ToA: priority 67.18
OIG s.87/ToA motive defence 67.19
Computation of OIG 67.20
CGT gain from offshore fund 67.21
Losses from offshore funds 67.22
Tax regimes priority to OIG 67.23
Transparent fund exemption 67.24
DT reliefs: OIG 67.25
Fund becomes reporting fund 67.26
Reorganisations: navigation. 67.27
"Collective investment scheme" 67.28
Usual reorganisation rules disapplied 67.29
Exchange within same scheme. 67.30
Exchange: other scheme units 67.31
Reconstruction: issue of units 67.32
Reconstruction with conversion. 67.33
Supplementary provisions 67.34
Reorganisation TAAR 67.35
Reorganisations: Offshore funds 67.36

CHAPTER 68
Income from Offshore Funds

Introduction 68.1
Bond fund. 68.2
Deemed reporting-fund income 68.3
Taxation of reporting-fund income 68.4
Non-reporting fund income 68.5

Summary 68.6
Non-reporting fund holds reporting fund 68.7
Fund treated as non-trading 68.8
Non-reporting becomes reporting fund 68.9
2009 transitional rules 68.10

CHAPTER 69
Unit Trusts

Unit trusts: Introduction 69.1
Definition of “unit trust” 69.2
Categories of unit trust 69.3
Authorised unit trust 69.4
Unauthorised unit trusts 69.5
NE UUT: UK trustees 69.6
NE UUT: Foreign trustees 69.7
CGT: Deemed-company fiction 69.8
Tax transparent funds 69.9
Situs of unit 69.10
Gain on disposal of unit 69.11
Fonds commun de placement 69.12
Irish Common Contractual Fund 69.13

CHAPTER 70
Life Policies and Contracts

Policies: Introduction 70.1
Definitions 70.2
The charge 70.3
Individuals and settlors 70.4
No remittance basis 70.5
Non-UK period relief 70.6
Non-UK period relief: PRs/trustees 70.7
Pre-2013 non-UK period relief 70.8
Liability of UK trust 70.9
ToA: Chargeable-event gains 70.10
s.624: Chargeable-event gains 70.11
Personal representatives 70.12
Planning for immigrant to UK 70.13
Personal portfolio bonds 70.14
Definition of PPB 70.15
Whitelisted property 70.16
Whitelisted indices 70.17
Variation of policy 70.18
Converting PPB into non-PPB 70.19

CGT exemption for policies. 70.20
Tax return: Chargeable event. 70.21
DT relief: Chargeable-event gain. 70.22
Policy held by non-dom: IHT. 70.23

CHAPTER 71
Intermediated Securities

Securities law background 71.1
Transparent/contract-based securities 71.2
Situs of transparent intermediated security for IHT & IT 71.3
Proprietary intermediated security: Situs for CGT 71.4
Other CGT issues. 71.5
Manufactured payments: Introduction. 71.6
Manufactured payment relationship 71.7
Manufactured payment: Payor. 71.8
Manufactured payment: Payee. 71.9
Manufactured interest: UK payor 71.10
Creditor repos. 71.11
Company payor 71.12
DCC Holdings 71.13
Voting on intermediated securities 71.14
Intermediated securities: IHT BPR 71.15

CHAPTER 72
Investment Manager Exemptions

Investment manager exemptions 72.1
IME PE relief 72.2
IME non-resident IT relief 72.3
IME UK-representative relief 72.4
IME definitions 72.5
Investment transaction list 72.6
Investment manager conditions 72.7
Cond. A/B: Investment manager 72.8
Cond. C: Independence test 72.9
The 20% rule 72.10
Cond. E: Customary remuneration. 72.11
Independent broker conditions 72.12
Transactions through broker 72.13
Relevance of trading to IME 72.14
What is a financial trade?. 72.15

CHAPTER 73
Investment Management Fees & Carried Interest

Investment management fees & carried interest 73.1

DIMF: history and guidance 73.2
"Disguised fee" 73.3
Disguised-fee cn (a): IM services 73.4
Disguised-fee cn (c): from investment scheme 73.5
Disguised-fee cn (d): Untaxed 73.6
"Management fee" 73.7
"Carried interest" 73.8
Carried interest: general definition 73.9
Subordinated carried interest 73.10
"Investment scheme" 73.11
Misc definitions 73.12
DIMF: Deemed trade 73.13
DIMF: Territorial limitation 73.14
To whom DIMF arises 73.15
809EZDA: Connected non-company 73.16
809EZDB: Company/unconnected person 73.17
DIMF double taxation 73.18
Carried interest: CGT 73.19
"Permitted deductions" 73.20
Co-investment 73.21
Disposal of carried interest 73.22
Carried-interest remittance basis 73.23
Non-residents 73.24
Other anti-avoidance rules 73.25
DIMF/Carried interest TAARs 73.26
Carried interest double taxation 73.27
External investors 73.28
Deferred carried interest 73.29
Interest ceases to be deferred 73.30
Income-based carried interest 73.31
IBCI: Returning non-resident 73.32
Returns and compliance 73.33

CHAPTER 74
IHT Terms and Concepts

IHT terminology 74.1
Estate 74.2
Transfer of value/value transferred 74.3
Disposition 74.4
Omission: Deemed disposition 74.5
Chargeable/exempt transfer 74.6
Qualifying interest in possession 74.7
Relevant property 74.8

Settlement commencement date 74.9
Settlement power 74.10
Associated operation 74.11
Why associated operations matter 74.12
Arm's length transaction 74.13
Relevant operation 74.14
Disposition by associated ops 74.15
Transfer of value by 2 operations 74.16
Gift followed by sale: APR/BPR 74.17

CHAPTER 75
Excluded Property: Definition

Excluded property: Introduction 75.1
Non-settled foreign property 75.2
Non-settled UK funds 75.3
Non-settled FOTRA securities 75.4
FOTRA exemption conditions 75.5
Ownership & Registration 75.6
Channel Islands/IoM domicile 75.7
Trusts: Foreign property 75.8
Income unpaid on life tenant death 75.9
Trusts: UK funds 75.10
Trusts: FOTRA securities 75.11
Estate IIP trust 75.12
Initial interest settlor/spouse 75.13
s.80 transitional rules 75.14
Adding property: 2020 changes 75.15
Interest in trust property 75.16

CHAPTER 76
Excluded Property Exemptions

Excluded property exemptions 76.1
Lifetime IHT charge 76.2
Lifetime IHT charge: Exemption 76.3
Death: IHT charge & exemption 76.4
IHT spouse exemption and excluded property 76.5
Allocation of exemption 76.6
10-year charge 76.7
Exit charge 76.8
Exit charge reliefs 76.9
Termination of estate IIP 76.10
Termination of IP: Reliefs 76.11
When excluded property matters 76.12

Foreign currency account 76.13
Works of art 76.14
Residence nil-rate band 76.15
Overseas pensions 76.16
Excluded property planning 76.17
UK dom settlor becomes non-dom 76.18
Planning for non-estate IIP trust 76.19
Planning: Trust with UK dom settlor 76.20
UK funds v foreign funds 76.21
FOTRA securities: Planning 76.22
Channel Islands/IoM domicile 76.23

CHAPTER 77
Wills and IOVs

IHT on death: Introduction 77.1
UK-dom testator: Non-dom beneficiaries 77.2
Non-dom testator: UK-dom beneficiaries 77.3
Gifts to spouse by will 77.4
Charitable gift by will 77.5
Instrument of variation (IOV) 77.6
Forced heirship/légitime/Sharia 77.7
Family Provision Act claim 77.8

CHAPTER 78
Reservation of Benefit

GWR: Introduction 78.1
Purpose of GWR 78.2
Basic GWR conditions 78.3
GWR terminology 78.4
Disposal by way of gift 78.5
Reservation of benefit 78.6
Full consideration exemption 78.7
IHT on disposal by way of gift 78.8
Gift of excluded property 78.9
GWR spouse exemption 78.10
GWR exempt transfer reliefs 78.11
GWR death charge 78.12
GWR over debt owed by deceased 78.13
Death: Non-settled excluded prop 78.14
Death: Settled excluded property 78.15
Gift to non-dom who creates trust 78.16
GWR lifetime charge 78.17
Termination of estate IIP 78.18

GWR on death: Spouse exemption 78.19
Tracing gifted property 78.20
Tracing non-settled property 78.21
Tracing settled property 78.22
1986 transitional relief 78.23

CHAPTER 79
Inter-trust Transfers: IHT

Inter-trust transfers: Navigation 79.1
Addition/transfer to trust 79.2
One IHT-settlement or more 79.3
Inter-trust transfer: IHT effect 79.4
Separate-settlement fiction. 79.5
B adds property to A’s trust 79.6
Direct and indirect settlors. 79.7
Transfer: A’s trust to B’s trust 79.8
Transfer: A’s trust to A’s trust. 79.9
Same-settlement fiction: s.81 . . . . 79.10
Trust-transfer retesting. 79.11
Post-2020 transfer retesting 79.12
s.81 transitional rules 79.13
Transfers to/from underlying co 79.14

CHAPTER 80
IHT Deduction for Debts

IHT deduction for debts: Introduction 80.1
Position of creditor. 80.2
Basis of deduction for debts. 80.3
Amount of deduction for debt 80.4
Allocation of debt 80.5
GWR property subject to debt 80.6
Invalid claim. 80.7
Time-barred debt 80.8
Disallowed debts: Introduction 80.9
Right to reimbursement 80.10
Debt not for full consideration 80.11
Section 103 FA 1986 . . . . 80.12
Debt owed by individual to trust 80.13
Debts to and from trusts. 80.14
Deduction for trust debt 80.15
Estate IIP trust debt to life tenant. 80.16
Deduction for foreign taxes 80.17
Excluded property disallowance 80.18

"Financing" an acquisition . . . 80.19
Maintenance/enhancement of value . . . 80.20
"Indirectly" financing . . . 80.21
Excluded property disallowance reliefs . . . 80.22
Disposal of debt-financed asset . . . 80.23
Debt-financed asset becomes non-excluded property . . . 80.24
Debt exceeds excluded property . . . 80.25
Debt attributable to foreign account . . . 80.26
Excluded property disallowance: planning . . . 80.27
Business/agricultural property debt . . . 80.28
Business property debt . . . 80.29
Agricultural property debt . . . 80.30
Debt of unincorporated business . . . 80.31
Property qualifying for BPR/APR . . . 80.32
Gift of debt-financed business/agricultural property . . . 80.33
Part payment of mixed debt . . . 80.34
Payment of disallowed debt . . . 80.35
Debt unpaid after death . . . 80.36
Discharge "out of the estate" . . . 80.37
Commercial reason defence . . . 80.38
Part payment of mixed debt after death . . . 80.39
Interaction of s.175A disallowance/spouse exemption . . . 80.40
When must debt be discharged? . . . 80.41
The 2013 disallowances: Critique . . . 80.42
GAAR: Debt reduces 10 year charge . . . 80.43
GAAR: Debt against UK residence . . . 80.44
Funeral expenses . . . 80.45
Foreign administration expenses . . . 80.46

CHAPTER 81
IHT Close-company Code

Close-co code: Introduction . . . 81.1
Transfer of value by close co . . . 81.2
Close company terminology . . . 81.3
Individual participators . . . 81.4
Trustee participators . . . 81.5
Dividend: Close-co code analysis . . . 81.6
Change in share capital/rights . . . 81.7
s.98 transfer: Value transferred . . . 81.8
Deferred shares . . . 81.9
Alteration: Estate IIP trust . . . 81.10
Close-co IHT: Liability . . . 81.11

CHAPTER 82
IHT Residential Property Code

IHT residential-property code 82.1
De-exclusion of sch A1 property 82.2
Residence-company 82.3
Residence-partnership 82.4
5% exemption 82.5
Liabilities of Residence-company 82.6
Why relevant loans matter 82.7
Relevant loan: Definition 82.8
Deductibility of relevant loan 82.9
Residence-security 82.10
Residence-security: Double IHT issues 82.11
Residence-tail 82.12
Residence-tail Property 82.13
Residence exit-charge reliefs 82.14
Company dividend in specie 82.15
Spouse and other exemptions 82.16
Sch A1 TAAR 82.17
DTA override 82.18
“Residential property interest” 82.19
Residence co: Share value 82.20
Home of non-dom: Planning 82.21
IHT residence code: Critique 82.22

CHAPTER 83
Pe-owned Assets

Pre-owned assets: Introduction 83.1
Purpose of POA rules 83.2
POA land charge 83.3
Disposal conditions 83.4
Contribution conditions 83.5
“Provide” 83.6
POA chattel charge 83.7
POA intangible property charge 83.8
Excluded transactions 83.9
Excluded transactions: Disposals 83.10
Excluded transaction: Contributions 83.11
“Outright gift” 83.12
POA exemptions 83.13
“Relevant property” 83.14
Estate exemptions 83.15
Derived property 83.16

Excluded liability rule 83.17
Estate “reduced” by liability 83.18
GWR exemptions 83.19
Reverter to settlor restriction 83.20
Full consideration exemption 83.21
Partnerships 83.22
Non-resident individual 83.23
UK resident non-dom 83.24
Former non-dom 83.25
Loan to trust 83.26
Quantum of charge: Land 83.27
Quantum of charge: Chattels 83.28
Quantum: Intangible property 83.29
Land/intangibles charge overlap 83.30
Interaction with benefits in kind 83.31
De minimis exemption 83.32
POA election 83.33
Election: Eversden scheme 83.34
Election: Home loan scheme 83.35
Unwinding existing structures 83.36
Is existing scheme validly created 83.37
Human rights 83.38
Critique 83.39

CHAPTER 84
Pension Schemes and IHT

Scope of chapter. 84.1
Pension scheme history 84.2
Types of pension scheme 84.3
Registered pension scheme 84.4
Qualifying non-UK pension scheme 84.5
QNUP: Schemes recognised abroad 84.6
Section 615(3) scheme. 84.7
EFURBS. 84.8
Sponsored superannuation scheme 84.9
IHT-exempt pension schemes: reliefs 84.10
Non-exempt schemes 84.11
General powers 84.12
Transfer of death benefit 84.13
Transfer between schemes 84.14
Lump sum benefit: position before payment 84.15
Scheme-benefit trust 84.16
2006-SSS reliefs. 84.17

Reservation of benefit 84.18

CHAPTER 85
Partnerships

Partnerships: Introduction 85.1
"Partnership" and "Firm". 85.2
Nature of partnership share 85.3
Valuation of partnership share. 85.4
Partnership law primer. 85.5
Partners. 85.6
Nominee partner. 85.7
Tiered partnership 85.8
Tiered partnership through nominee 85.9
Service company 85.10
Limited partnership 85.11
Investment partnership. 85.12
Partnership/co-ownership compared 85.13
Partnership: person/body corporate 85.14
Partnership: Body/office 85.15
Partnership transparency: IT/CT 85.16
Entity-disregard rule 85.17
"Trade". 85.18
Partnership income: Remittance basis 85.19
Partnership transparency: CGT 85.20
Limited liability partnership 85.21
Tax treatment of LLP. 85.22
Residence of partnership 85.23
Partnerships: Group reliefs 85.24
DT relief: Partnership 85.25

CHAPTER 86
Partnership Income: Attribution

Partnership income: outline 86.1
Partnership income: Computation 86.2
Partnership income: Attribution. 86.3
Mixed partnership code 86.4
s.850C application conditions 86.5
Condition X: Deferred profit 86.6
Condition Y: Excess profit allocation 86.7
Condition Y(a): Profit share excessive 86.8
Appropriate notional profit 86.9
Condition Y(b): Power to enjoy. 86.10
PtoE condition Y(c): PtoE is cause 86.11

s.850C counteraction: Income reallocation 86.12
A (transferor) not partner: s.850D 86.13
s.850D counteraction: deemed partner 86.14
Associated partnership 86.15
Reliefs for B (transferee) 86.16
Alternative investment fund manager 86.17
Business transferred to partnership 86.18
Takeover of LLP 86.19
Private equity investment 86.20
Share issue 86.21
International aspects 86.22
International structures 86.23

CHAPTER 87
Settlement, Bare Trust and Associated Terminology

Definitions of “settlement” 87.1
Classic trust 87.2
Settlement: Standard IT/CGT definition 87.3
Settlement-arrangement definition 87.4
Bounty requirement 87.5
Definition of “IHT-settlement” 87.6
Bare trust/nomineeship 87.7
Other trust terminology 87.8
3 ½ types of invalidity 87.9
General power 87.10
Illusory trust 87.11
Construction of trust: Comments 87.12
Testamentary disposition 87.13
Sham 87.14
Invalidity rules compared 87.15
Foreign applicable law 87.16
Consent powers 87.17

CHAPTER 88
Estates of Deceased Persons: CGT

Succession law background 88.1
Period of administration 88.2
PRs: Meaning for CGT/IT/CT 88.3
Residence of PRs for CGT 88.4
Acquisition by PRs 88.5
Rebasing on death of life tenant 88.6
Transfer from PRs to beneficiaries 88.7
Deceased not UK resident 88.8

Non-resident co held by non-resident PRs 88.9
Capital payment from co in estate 88.10
Deceased UK resident 88.11
CGT planning for UK PRs 88.12
CGT planning by IoV 88.13
Succession under foreign law 88.14

CHAPTER 89
Estates of Deceased Persons: Income Tax

Income taxation of estates 89.1
Meaning of "PRs" for IT 89.2
Residence of PRs for IT 89.3
Income taxation of PRs 89.4
Income from specific legacy 89.5
Income from residuary estate 89.6
Types of interest in residue 89.7
"UK estate" and "foreign estate" 89.8
Other definitions 89.9
Charge to tax on estate income 89.10
Estate income 89.11
Amount of estate income 89.12
"Basic amount of estate income" 89.13
Assumed income entitlement 89.14
Beneficiary a discretionary trust 89.15
Estate income remittance basis 89.16
Non-resident beneficiary of UK estate: DT relief 89.17
Non-resident beneficiary of UK estate: Concessionary relief 89.18
Time limit for claim/assessment 89.19
HMRC practice: Conventional basis 89.20
Tax returns & registration 89.21
Income tax of estates: Critique. 89.22

CHAPTER 90
Foreign Entities

Foreign entities: Introduction. 90.1
Roles of UK/foreign law 90.2
Entity classification test(s). 90.3
How labels may mislead 90.4
Foreign law classification/treatment 90.5
Transparency issues 90.6
How to determine transparency 90.7
Definition of "company" 90.8
Body corporate. 90.9

US revocable (grantor) trust. 90.10
Garland trusts 90.11
Liechtenstein: Introduction 90.12
Beneficiary rights. 90.13
Stiftung/Foundation 90.14
Anstalt/Establishment 90.15
Treuunternehmen/Trust Enterprise 90.16
Treuhandschaft (trust) 90.17
Civil law trust equivalents 90.18
Fiducie/fiducia 90.19
Fideicomiso/Fideicommissum 90.20
Treuhand: Austria/Germany 90.21
AG/GmbH/SE 90.22
Proper liferent (Scotland). 90.23
Legal life interest (N. Ireland) 90.24
Usufructs 90.25
Foreign partnership: Legal person 90.26
German partnerships 90.27
Offene Handelsgesellschaft 90.28
Kommanditgesellschaft 90.29
Stille Gesellschaft 90.30
Société en nom collectif 90.31
Société civile 90.32
Société en commandite par actions 90.33
Commanditaire vennootschap (Netherlands). 90.34
Sociedad civil (Spain) 90.35
Jersey partnerships 90.36
Foreign LLP 90.37
European Economic Interest Grouping 90.38
Common investment fund 90.39
Dutch stichting/Foundation 90.40
Fonds voor gemene rekening 90.41
Bewind 90.42
Limited liability company 90.43
Delaware LLC Act. 90.44
LLC: Entity categorisation. 90.45
LLC: US tax credit. 90.46
LLC: Transparency 90.47
LLC: Corporate tax credit 90.48
US limited partnership 90.49
Cell companies. 90.50
Hindu undivided property 90.51

Tokkin (Japan) 90.52
Hapja Hoesa (Korea) 90.53
HMRC transparent/opaque list 90.54
Ordinary share capital 90.55
Capital contribution 90.56
UK check-the-box rules? 90.57
Change of entity type 90.58
Redomiciliation 90.59
Ascertaining foreign law 90.60

CHAPTER 91
Hybrid Entities

Hybrid entities: Introduction 91.1
Background and guidance 91.2
Hybrid categories 91.3
DTA hybrid-entity rules 91.4
MLI hybrid-entity rule: Application 91.5
Hybrid-entity rule: Effect 91.6
USA hybrid-entity rule: Guidance 91.7
Hybrid entities: Part 6A TIOPA 91.8
Mismatches 91.9
Payment 91.10
“Quasi-payment” 91.11
Payer/Payee/Relevant deduction 91.12
“Payer/payee jurisdiction” 91.13
“Ordinary Income” 91.14
Hybrid entity 91.15
Chap 7 application conditions 91.16
Chap 7 condition D: D/NI mismatch 91.17
Chap 7 condition E 91.18
Chap 7 counteraction: Outline 91.19
Counteraction: Disallow deduction 91.20
Counteraction: CT charge 91.21
Hybrid LLP payee 91.22
Hybrids TAAR 91.23
Minor definitions 91.24
“Control group” 91.25
Partnership income 91.26
HMRC example: LLP 91.27
HMRC example: tax-exempt investor 91.28
HMRC example: Reverse hybrid 91.29
Interaction with other provisions 91.30

CHAPTER 92
Protected Trusts

Protected-trust regime 92.1
Protected trusts: Policy 92.2
s.86 protected-trust relief 92.3
Condition D: Tainting 92.4
The 7 disregards 92.5
Sale for instalments of capital 92.6
Payments under loans 92.7
Protected income: Terminology 92.8
Protected s.624 income 92.9
s.624 protected-trust relief 92.10
s.629 protected-trust relief 92.11
Protected s.720 income 92.12
Protected s.720 trust income 92.13
Protected s.720 company income 92.14
s.720: Protected-trust relief 92.15
s.727 protected-trust relief 92.16
Protected-trust conditions: Navigation 92.17
Protected-trusts: Commencement 92.18
Tax return: Protected income/gain 92.19

CHAPTER 93
Non-dom/Non-resident Spouse

Non-dom/non-resident spouse 93.1
Restricted IHT spouse exemption 93.2
Settlor spouse/widow: trust receipt 93.3
Disposition for maintenance of spouse 93.4
Transferable nil-rate band 93.5
Residence Nil-rate Band 93.6
Gift of BPR/APR property to spouse 93.7
Divorce settlement 93.8
Spouse gift: Associated operations 93.9
Non-dom spouse: IHT planning 93.10
CGT spouse exemption 93.11
Non-dom spouse: CGT 93.12
Non-resident spouse: CGT 93.13
Non-dom/non-resident spouse: IT 93.14
s.624 spouse exemption 93.15
Gift to spouse: s.720 . . . . . 93.16
Gifts to spouse: GAAR 93.17

CHAPTER 94
Joint Accounts

Introduction 94.1
Property law background 94.2
Joint account: IHT 94.3
Trust from joint account: Who is settlor 94.4
Scottish joint account 94.5
Remittance from joint account 94.6
Property held jointly by spouses 94.7
Planning for joint account 94.8

CHAPTER 95
Foreign Currency Issues

Foreign currency: Introduction 95.1
CGT: Currency conversion date 95.2
Trading and property income 95.3
Arising basis: Conversion date 95.4
Income converted to foreign currency 95.5
Remittance basis: Conversion date 95.6
Sub-£2k taxpayer: Currency conversion date 95.7
Nominated income/gains: Currency conversion date 95.8
Foreign tax credit: Currency conversion date 95.9
Foreign currency bank account: CGT 95.10
Foreign banknotes/coins 95.11
Interaction with mixed fund rules: HMRC examples 95.12
Foreign currency issues: Critique 95.13

CHAPTER 96
Cryptoassets

Cryptoasset guidance 96.1
Cryptoasset terminology 96.2
Assets which are not cryptoassets 96.3
Cryptoassets: Property 96.4
Cryptoassets: Currency/money? 96.5
Cryptoasset situs 96.6
Crypto activity: Trading? 96.7
Lending/staking cryptoassets 96.8
Computation of income 96.9
Capital receipt 96.10
Computation of gain 96.11
Borrowing 96.12
Collateral 96.13
Satisfaction of loan 96.14

Transfer between ledgers 96.15
CGT allowable expenses 96.16
HMRC Examples 96.17
Borrowing/lending examples 96.18
HMRC examples: Token exchange 96.19
Lending: Repo treatment 96.20
Mining cryptoassets 96.21
Blockchain forks 96.22
Airdrops 96.23
Loss of cryptoassets 96.24
Stamp duty/SDRT 96.25

CHAPTER 97
Unremittable Assets

Unremittable assets: Introduction 97.1
Unremittable asset relief 97.2
“Unremittable” income 97.3
The relief 97.4
ECGD payment 97.5
Claims 97.6
Remittance basis claimant 97.7
Clawback of unremittable income relief 97.8
Position if no relief claim made 97.9
Unremittable trading/property income 97.10
Unremittable accrued income profits 97.11
Interaction with anti-avoidance rules 97.12

CHAPTER 98
ATED and SDLT

ATED regime 98.1
ATED terminology. 98.2
“Chargeable interest” 98.3
Annual tax on enveloped dwellings 98.4
Corporate ownership condition 98.5
Chargeable person 98.6
Rates of ATED 98.7
Change of ownership 98.8
Taxable value 98.9
Valuation for ATED 98.10
“Chargeable period” 98.11
“Single-dwelling interest” 98.12
Different interests in 1 dwelling 98.13
Interests of connected person 98.14

Partnerships 98.15
Tax consequences of paying ATED 98.16
ATED reliefs 98.17
ATED rental relief 98.18
Non-qualifying individual 98.19
Farmhouses 98.20
“Chargeable”, “within the charge”. 98.21
ATED returns. 98.22
SDLT: Introduction 98.23
Ordinary SDLT rates 98.24
ATED-SDLT rate 98.25
“High-value” transaction 98.26
Co. purchaser (non-natural person) 98.27
Trusts 98.28
Linked transactions 98.29
ATED-SDLT reliefs 98.30
SDLT on winding up company 98.31
Company in liquidation owes debt 98.32
Section 75A: Anti-avoidance 98.33
Notional land transaction 98.34
Charities and ATED taxes 98.35
ATED in Scotland\Wales. 98.36
De-enveloping 98.37
Methods of de-enveloping 98.38
ATED regime: Critique 98.39
SDLT non-resident surcharge 98.40
Non-resident surcharge 98.41
“Non-resident transaction”. 98.42
SDLT residence test. 98.43
When post-acquisition period ignored. 98.44
Crown employees. 98.45
Non-resident company 98.46
Foreign-controlled company 98.47
Non-UK control 98.48
Attribution of rights and powers 98.49
Funds 98.50
Co-ownership contractual scheme 98.51
Spouses. 98.52
Bare trust acquiring lease. 98.53
Trust purchaser. 98.54
Alternative property finance 98.55
SDLT surcharge: administration 98.56

Dwelling 98.57
Surcharge: Commencement 98.58

CHAPTER 99
Who is the Settlor

Why settlors matter 99.1
Definitions of “settlor” 99.2
Will trust or intestacy 99.3
Reciprocal arrangements 99.4
Nominal settlor 99.5
Tainting 99.6
A gives to B, B gives to trust 99.7
B makes trust at A’s request 99.8
Trust appoints to B, B gives to new trust 99.9
Inter-trust transfer: Trust law background 99.10
Inter-trust transfer: Appointment 99.11
Inter-trust transfer: IHT 99.12
Inter-trust transfer: Advancement 99.13
Inter-trust transfer: General power 99.14
Power of revocation 99.15
Consent to exercise power 99.16
Beneficiary assigns interest 99.17
Disclaimer 99.18
Dividend-waiver settlement 99.19
Alphabet share arrangement 99.20
Partnership-settlement 99.21
Resettlement by beneficiaries 99.22
Variation under VTA 1958 . . . . . 99.23
Property provided to co in a trust 99.24
Provision of services 99.25
Loans 99.26
Indemnities and guarantees 99.27
Transaction on favourable terms 99.28
Payment of admin expenses 99.29
Property maintenance/management 99.30
Retaining life tenant income 99.31
Purpose: Inattentive settlor 99.32
Purpose: Settlor’s adviser/agent 99.33
Trust by court: Person lacking capacity 99.34
Trust by compromise: Minor/person lacking capacity 99.35
Trust under Criminal Injuries Compensation Scheme 99.36
Trust made by deed of variation 99.37

Charitable trust. 99.38
Pension/employee benefit trust 99.49
Property provided by company 99.40
Planning to create excluded property trust. 99.41

CHAPTER 100
Multiple Settlors

Trust with multiple settlors 100.1
Just & reasonable apportionment. 100.2

CHAPTER 101
Statutory Tax Indemnities

Statutory tax indemnities 101.1
Settlor trust-tax indemnities. 101.2
Procedural issues 101.3
Tax on indemnity payment. 101.4
Failure to claim indemnity 101.5

CHAPTER 102
Situs of Assets for IHT

Concepts of situs 102.1
Intangible property has a situs 102.2
Every asset has one situs 102.3
Situs of shares: General principle 102.4
Situs of registered shares 102.5
Place-of register rule: Application. 102.6
More than one register 102.7
Registered debt-securities 102.8
Bearer and negotiable instruments 102.9
CREST 102.10
Share certificate endorsed in blank 102.11
Letter of allotment of shares 102.12
International organisation security 102.13
Simple contract debt 102.14
Specialty obligation 102.15
Meaning of “specialty” 102.16
Jurisdictions without “deeds” 102.17
Specialties: Conflict of laws 102.18
Mortgage debt 102.19
Claim for breach of trust 102.20
Debt under letter of credit 102.21
Judgment debt 102.22
Bank account 102.23

Building society account 102.24
Insurance policy 102.25
Land 102.26
Chattels 102.27
Ships and aircraft 102.28
Goodwill. 102.29
Intellectual property 102.30
Land subject to contract of sale 102.31
Bare trust or nomineeship 102.32
Interest under substantive trust 102.33
Estate of deceased person 102.34
Situs of partnership share 102.35
Situs of pension and death benefits 102.36
Reform of IHT/CGT situs rules 102.37

CHAPTER 103
Situs of Assets for CGT

Asset situs for CGT: Introduction 103.1
"Shares" and "debentures" 103.2
Co-owned assets 103.3
Municipal/government security 103.4
Securities of UK company 103.5
Registered security: Non-UK co 103.6
Bearer shares 103.7
Bearer debenture: Non-UK co 103.8
Debt situs rule 103.9
Judgment debt 103.10
Debt rules: Critique 103.11
Bank account 103.12
UK-law rule 103.13
Futures/options. 103.14
Insurance policy 103.15
Land 103.16
Chattels 103.17
Ships and aircraft 103.18
Goodwill 103.19
Intellectual property 103.20
Bare trust or nomineeship 103.21
Substantive trust interest 103.22
Estate of deceased person 103.23
Planning: Changing situs 103.24

CHAPTER 104
Control, Connected, Close and Related Expressions

Introduction 104.1
Control 104.2
Control: Ultra-wide sense 104.3
Trustees of settlement 104.4
Nominees: Control 104.5
Associates 104.6
Associate-attribution rule 104.7
Ultra-wide control: Critique 104.8
Control: Strict sense 104.9
Strict-sense control: Trusts 104.10
Control of partnership 104.11
Connected person 104.12
Connected: Family members 104.13
Connected: Trustees 104.14
Connected: Company 104.15
Company connected with trust 104.16
Associated co/joint control 104.17
Connected: Partners 104.18
Connected: Unit trust 104.19
Examples 104.20
Why participators matter 104.21
Definitions of participator 104.22
Participator: Standard definition 104.23
Participator: Extended definition 104.24
Loan creditor 104.25
Close company: Introduction 104.26
Control test 104.27
Close co winding-up test 104.28
Non-close companies 104.29
State-controlled company 104.30
Open company exemption 104.31
Pension schemes 104.32
Quoted company exemption 104.33
Principal members: Vote cap 104.34

CHAPTER 105
Participation and % Interest Tests

Participation 105.1
Direct participation 105.2
Indirect participation tests 105.3

Indirect participation: s.159 . . . . 105.4
Major participant: s.160 . . . . 105.5
s.161 test: s.148/175 financing. 105.6
s.162 test: Other financing 105.7
% investment tests 105.8

CHAPTER 106
Permanent Establishment and Branch/Agency

PE: Introduction 106.1
PE: UK-law/OECD Model meanings 106.2
PE in non-tax contexts 106.3
Some general points 106.4
Fixed place of business PE 106.5
Geographic condition 106.6
"Through which" enterprise carried on 106.7
Fixed/permanency condition 106.8
Personnel condition 106.9
The enterprise. 106.10
Items included as PE 106.11
Agency-PE 106.12
OECD Model agency-PE 106.13
Home office due to Covid 106.14
Remote working/home office. 106.15
Independent agent exemption 106.16
Independent status 106.17
Controlled companies/groups 106.18
Preparatory/auxiliary activities 106.19
Fragmented business operation 106.20
Services PE clause 106.21
Alternative finance arrangements 106.22
PE: Pre-1963 DTAs 106.23
Trade in UK without PE 106.24
Definitions of PE: Critique 106.25
Why branch/agency matters. 106.26
Meaning of “branch or agency” 106.27
Branch/agency: Critique 106.28

CHAPTER 107
Double Taxation Arrangements: Introduction

DT reliefs: Introduction 107.1
Treaty terminology 107.2
Types of double taxation 107.3
Co/shareholder double taxation 107.4

DT exemption/credit compared 107.5
Double non-taxation. 107.6
Types of residence/dual residence 107.7
DTA: Classes of residents 107.8
DTA income categories 107.9
DTA interpretation principles 107.10
OECD Commentary. 107.11
Undefined treaty terms. 107.12
Taxes Covered 107.13
Effectively connected with PE. 107.14
BEPS multilateral instrument. 107.15
Definitions 107.16
Scope of BEPS MLI. 107.17
BEPS MLI commencement 107.18
Incorporating DTAs in UK law 107.19
Claim for DT reliefs 107.20
Remittance basis income 107.21
Characterisation 107.22
Channel Islands/IoM DTAs 107.23
Pre-1963 DTAs 107.24
Treaty commencement dates 107.25
The future. 107.26

CHAPTER 108
DTA Anti-Abuse Rules

DTA anti-abuse rules: Introduction 108.1
DTA title/preamble/purpose 108.2
BEPS MLI preambles 108.3
Purpose of DTAs: Summary 108.4
Domestic anti-abuse rules 108.5
Implied treaty anti-abuse rule. 108.6
OECD-concept abuse. 108.7
Principal purpose test. 108.8
USA DTA: Conduit arrangement. 108.9
DTA beneficial owner rule 108.10
Bona fide conduit co 108.11
Beneficial ownership: Canada 108.12
“Subject to tax” 108.13

CHAPTER 109
Third Party Relief/Saings Clause

Third-party DT relief/credit. 109.1
Third-party DT relief 109.2

3rd-party tax credit relief 109.3
Characterisation: Same income? 109.4
Savings Clause 109.5

CHAPTER 110
Limitation on Benefits

Limitation on Benefits 110.1
Qualified persons 110.2
Active business 110.3
Derivative Benefits 110.4
Principal purpose test 110.5
LoB: Definitions 110.6
Channel Islands/IoM LoB 110.7

CHAPTER 111
Credit for Foreign Tax

Credit for foreign tax 111.1
DTA/Unilateral Credit compared 111.2
TIOPA restrictions on FTCR 111.3
Which foreign taxes give credit 111.4
Same income rule 111.5
Domestication relief 111.6
Same gain: roll-over relief 111.7
Foreign-source rule 111.8
Tax in accordance with DTA 111.9
Hybrid example: Tax a/c DTA 111.10
Tax credit: Dividends 111.11
DTA/Unilateral Credit: Priority 111.12
DTA excluding tax credit 111.13
Method of providing credit 111.14
Foreign tax credit: Claim 111.15
Tax sparing arrangements 111.16
When credit not allowed 111.17
Restriction to UK residents 111.18
Election against credit 111.19
Computing FTC: Income 111.20
Computing FTC: CGT 111.21
Minimisation of foreign tax 111.22
Limit on credit relief 111.23
Credit for TNR CGT 111.24
UK-resident USA citizen 111.25
Credit for underlying USA co tax 111.26
CGT/IT computation deduction 111.27

CHAPTER 112
Non-discrimination

Non-discrimination: OECD Model 112.1
Nationals discrimination 112.2
Stateless persons discrimination 112.3
PE discrimination. 112.4
Discrimination in tax deductions 112.5
Enterprise owned in other state 112.6
"Taxes". 112.7
"Non-discrimination provision". 112.8
Channel Islands/IoM DTAs 112.9

CHAPTER 113
Mutual Agreement Procedure

Presentation of case 113.1
Resolution of case 113.2
Inter-state agreements 113.3
Inter-state communications 113.4
Arbitration 113.5

CHAPTER 114
IHT Double Taxation Treaties: Introduction

IHT double taxation treaties 114.1
Estate and inheritance taxes 114.2
OECD IHT Models 114.3
IHT DTAs: Taxes covered. 114.4
Treaty-domicile 114.5
IHT DTAs: Incorporation in UK law 114.6
Claims for IHT DTA reliefs. 114.7
Nil-rate band and DTAs. 114.8
Deductions for DTA purposes 114.9

CHAPTER 115
IHT DTAs: India, Pakistan, Italy, France

Estate duty/IHT treaties 115.1
Estate duty DTAs applied to IHT 115.2
Interpretation 115.3
Treaty IHT exemption 115.4
Reliefs extended: France 115.5
Proper-Law rule 115.6
Domicile: applicable law 115.7
UK-law domicile 115.8
Foreign-law domicile 115.9

Treaty-situs. 115.10
Certificate of tax paid. 115.11
The future. 115.12

CHAPTER 116
IHT DTA: Netherlands

Netherlands IHT DTA 116.1
Scope 116.2
Taxes covered 116.3
Definitions 116.4
Treaty-Domicile 116.5
Immovable property 116.6
Business property. 116.7
Ships and aircraft 116.8
Other property 116.9
Conflict on property nature 116.10
Deductions 116.11
Limitations on relief. 116.12
Settled property 116.13
Requirement to pay foreign tax 116.14
Spouse exemptions. 116.15
Foreign tax credit 116.16
Time limit. 116.17
Other articles 116.18

CHAPTER 117
IHT DTA: South Africa

Introduction 117.1
Scope 117.2
Taxes covered 117.3
Definitions 117.4
Treaty-domicile 117.5
Treaty reliefs 117.6
Requirement to pay foreign tax 117.7
Immovable property. 117.8
Business property. 117.9
Ships and aircraft 117.10
Shares/debentures/unit trusts 117.11
Dual nature property 117.12
Dual situate property 117.13
Deductions/allowances/reliefs 117.14
Foreign tax credit 117.15
Time limit. 117.16

Non-discrimination 117.17
Other articles 117.18

CHAPTER 118
IHT DTA: Switzerland

Swiss IHT treaty. 118.1
Scope 118.2
Taxes covered 118.3
Definitions 118.4
Treaty-domicile 118.5
IHT exemptions 118.6
Solely Swiss domicile 118.7
Tie-breaker Swiss domicile 118.8
IHT spouse exemption extended 118.9
Immovable property 118.10
Business property. 118.11
Other articles 118.12

CHAPTER 119
IHT DTA: USA

USA IHT treaty 119.1
Scope 119.2
Taxes covered 119.3
Definitions 119.4
Treaty-domicile 119.5
IHT exemptions: Individuals 119.6
IHT exemptions: Trusts 119.7
Requirement to pay US tax 119.8
Dual-situate asset 119.9
Immovable property 119.10
Business property. 119.11
IHT spouse exemption extended 119.12
Non-discrimination 119.13
Other articles 119.14

CHAPTER 120
Credit for Foreign IHT

Credit for foreign IHT 120.1
Unilateral IHT credit 120.2
Requirement to pay foreign IHT 120.3
Use of foreign IHT credit 120.4
Amount of credit 120.5
Planning 120.6

France/Italy IHT credit 120.7
USA IHT credit 120.8

CHAPTER 121
Reporting and Compliance

Reporting/compliance: Introduction 121.1
Duty to notify liability 121.2
Duty to notify: Exemption 121.3
Duty to make SA return 121.4
Reporting bare trusts 121.5
s.8 return: self-assessment 121.6
Amending a SA return 121.7
SA Enquiries 121.8
Assessment after enquiry window 121.9
Full-disclosure requirement 121.10
Full-disclosure standard 121.11
Full-disclosure: Examples 121.12
IT/CGT assessment time limits 121.13
4 year limit 121.14
6 year limit: Carelessness 121.15
12-year limit: Offshore Matter 121.16
20 year limit: deliberate error 121.17
20 year limit: Failure to notify 121.18
RTC time limit: 5/4/21 . . . . . 121.19
Personal representatives 121.20
Enquiry ends: Closure notice 121.21
Appeals 121.22
CT registration 121.23

CHAPTER 122
Tax Return Filing Position

Codes of conduct 122.1
Adviser’s duties 122.2
Tax return filing position 122.3
Properly-arguable standard 122.4
SPTS examples 122.5
Low detection risk 122.6
Cost and estimates 122.7
Disclosing doubt/further information 122.8
When disclosure required 122.9
Disclosure for good HMRC relations 122.10
Certificate of tax position 122.11
Professional conduct: Back duty 122.12

CHAPTER 123
Claims

Claims 123.1
Standard claim rules. 123.2
Quantification of claim 123.3
Types of claim 123.4
Tax return claims 123.5
Free-standing claims 123.6
Late claim: Non -culpable taxpayer. 123.7
Late claim: Culpable taxpayer 123.8

CHAPTER 124
Collection of IT/CGT from UK Representatives

Tax collected from non-resident 124.1
Tax collected from UK representative 124.2
UK representative 124.3
Partnership: UK representative 124.4
UK representatives: Exemptions 124.5
Subsidiary points 124.6
Agents/investment managers 124.7

CHAPTER 125
Reporting and Compliance: IHT

IHT compliance: Introduction 125.1
Meaning of “PRs” for IHT. 125.2
Who is liable for IHT. 125.3
Priority of persons liable 125.4
Reporting duties. 125.5
Standard reporting duties. 125.6
Excepted estate. 125.7
Reporting excepted estate 125.8
Excepted settlements 125.9
Disclosure: Territorial limitation. 125.10
Correcting error in Account. 125.11
Payment due dates 125.12
Notice of determination 125.13
IHT recovery time limits 125.14
12 year limit: Offshore matter 125.15
No time limit 125.16
IHT certificate of discharge. 125.17
Inland Revenue charge. 125.18

CHAPTER 126
Penalties

Penalties: Introduction 126.1
Error in taxpayer document 126.2
Error due to 3rd party 126.3
Uncorrected assessment 126.4
Failure to notify liability 126.5
Failure to make return 126.6
Asset-based penalty 126.7
RTC penalty 126.8
Culpability definitions 126.9
Reasonable excuse 126.10
Disqualified advice codes 126.11
Disqualified advice 126.12
Interested person 126.13
Arrangement with interested person 126.14
Appropriate expertise 126.15
All relevant circumstances 126.16
Receiver of advice 126.17
Advice not known disqualified 126.18
Disqualified advice: PRs 126.19
Egregious arrangements 126.20
Amount of penalty 126.21
Categories of information/inaccuracy/failure 126.22
Offshore/Domestic Matters 126.23
Offshore Matter/Transfer: RTC 126.24
Categories of territory 126.25
Potential lost revenue 126.26
PLR: Error-based penalties 126.27
PLR: Failure to notify chargeability 126.28
Matching overpayment 126.29
Offshore PLR: Asset-based penalty 126.30
Offshore PLR: RTC 126.31
Reductions for disclosure: Which para? 126.32
Summary 126.33
What disclosure requires 126.34
Additional information 126.35
Amount of reduction for disclosure 126.36
Reduction: Special circumstances 126.37
Interaction of penalties 126.38
RTC Definitions 126.39
RTC: “Tax” 126.40

RTC: “Tax non-compliance” . . . 126.41
“Offshore” non-compliance . . . 126.42
Original tax non-compliance . . . 126.43
Relevant tax non-compliance . . . 126.44
Cond. C: Assessable in 2017 . . . 126.45
Correcting non-compliance . . . 126.46
RTC: Nil liability disclosure . . . 126.47
Application of TMA rules . . . 126.48
RTC: Interpretation . . . 126.49
Assessment of penalties . . . 126.50
RTC: Disguised remuneration . . . 126.51
GAAR penalties . . . 126.52
Public list of defaulters . . . 126.53
Public attitude(s) to compliance. . . . 126.55

CHAPTER 127
Failure to Prevent Tax Evasion

Failure to prevent evasion . . . 127.1
Definitions . . . 127.2
The CFA offences . . . 127.3
Facilitation Offence . . . 127.4
Prevention procedures . . . 127.5
Procedural aspects . . . 127.6
HMRC CFA guidance . . . 127.7
Fraudulent evasion offences . . . 127.8
A change in corporate culture? . . . 127.9
Offshore tax offences . . . 127.10
“Offshore income/assets/activities” . . . 127.11
Offshore tax offences penalties . . . 127.12
Enablers of offshore tax offences . . . 127.13
Liability for penalty . . . 127.14
“Involving offshore activity” and related expressions . . . 127.15
Amount of penalty . . . 127.16
PLR: enabling Q to commit offence . . . 127.17
PLR: enabling Q’s conduct incurring civil penalty . . . 127.18
PLR: tax evasion/non-compliance . . . 127.19
Reduction of penalty: disclosure . . . 127.20
Special circumstances . . . 127.21
Procedure for assessing penalty, etc . . . 127.22
Time limits . . . 127.23
Appeals. . . . 127.24
Double jeopardy . . . 127.25

Application of TMA 1970 . . . . 127.26
Interpretation of Part 1 . . . . 127.27
Naming and shaming 127.28

CHAPTER 128
Reporting Offshore Trusts

Reporting offshore trusts: Introduction 128.1
IHT: Reporting creation of trust 128.2
Reporting addition to pre-1998 trust 128.3
CGT: Reporting creation of trust 128.4
Reporting: Settlor becomes UK-dom 128.5
CGT: Reporting trust emigration 128.6
Exceptions to CGT reporting 128.7
IHT/CGT reporting compared 128.8

CHAPTER 129
International Movement of Capital: Reports

IMOC: Introduction 129.1
Definitions of “Reporting body” 129.2
Reportable event/transaction 129.3
Reportable transactions 129.4
Excluded transactions 129.5
Information in report 129.6
Penalties 129.7
Definitions 129.8

CHAPTER 130
Common Reporting Standard

CRS & other information sources 130.1
Common Reporting Standard 130.2
FATCA 130.3
CRS/FATCA navigation 130.4
Entity 130.5
“Income” 130.6
Non-financial Entity (NFE) 130.7
Active NFE 130.8
Passive NFE 130.9
Financial Institution 130.10
Investment Entity 130.11
Fund-manager IE 130.12
Fund-managed IE 130.13
Participating Jurisdiction FI 130.14
Passive NFE held by a trust 130.15

Financial Asset 130.16
Financial Account 130.17
"Beneficiary" 130.18
Reportable Account 130.19
Reportable Person 130.20
Reportable/Participating Jurisdictions 130.21
Reportable Jurisdiction Person 130.22
Controlling person 130.23
Change of controlling persons 130.24
Inter-trust transfer 130.25
Controlling person: Non-trusts. 130.26
Controlling person: Foundation 130.27
Control of controlling person. 130.28
Charities 130.29
Private trust companies 130.30
CRS-residence 130.31
Reporting Financial Institution 130.32
Non-reporting FI 130.33
Reporting duties 130.34
CRS TAAR 130.35

CHAPTER 131
Trust Registration (TRS)

LR: Introduction. 131.1
TRS: Introduction 131.2
MLR: EU law background 131.3
MLR definitions 131.4
Relevant Trust 131.5
Express trusts 131.6
Relevant trust (i): UK trust 131.7
Rel trust (ii): Taxable trust. 131.8
Rel trust (iii): Other UK link 131.9
Underlying trust company 131.10
Excluded trusts. 131.11
Excluded trust categories 131.12
Estates and will trusts. 131.13
"Taxable" relevant trust 131.14
Beneficial Owner: MLR meaning 131.15
Beneficial Owner: Company 131.16
Control of company 131.17
Beneficial Owner: Partnership. 131.18
Beneficial Owner: Trust. 131.19

Beneficial Owner: Estate 131.20
Beneficial Owner: Other entities 131.21
Trusts register (TRS) 131.22
TR trust: Duty to register 131.23
Type 10A/B/C trusts 131.24
Type A/B/C trusts 131.25
UK trust holds Irish bond 131.26
Estates 131.27
Unit trusts/CIS 131.28
Data format 131.29
Trust record keeping 131.30
Disclosure to relevant person 131.31
Changes to trust data 131.32
Time limits 131.33
Retention of data 131.34
Authorities information power 131.35
MLR disclosure immunity 131.36
Third party access 131.37
Legitimate interest 131.38

CHAPTER 132
Customer Due Diligence

Customer due diligence: Introduction 132.1
LSAG guidance 132.2
Regulators 132.3
Business relationship 132.4
Relevant person 132.5
Tax adviser 132.6
Independent Legal Professional 132.7
Trust/company service provider 132.8
Relevant person: Exclusions 132.9
Risk assessments 132.10
Practice risk assessments 132.11
Policies and procedures 132.12
Internal controls 132.13
Nominated officer 132.14
Training 132.15
Types of CDD 132.16
When CDD required 132.17
CDD: Standard information 132.18
How to get CDD data 132.19
Client risk assessment 132.20

CDD/Tipping off 132.21
Supervision of CDD. 132.22
CDD time limits 132.23
Duty to check register 132.24
Unable to satisfy CDD 132.25
Enhanced CDD. 132.26
Politically exposed person (PEP). 132.27
Simplified CDD 132.28
Reliance on third party. 132.29
Record-keeping 132.30

CHAPTER 133
Money Laundering: POCA

Money laundering: Introduction 133.1
"Money laundering". 133.2
Criminal Property. 133.3
Knows or suspects 133.4
Conceal/transfer Criminal Property 133.5
Assisting money laundering. 133.6
Possession of Criminal Property 133.7
POCA disclosure immunity 133.8
Duty to disclose money laundering 133.9
Professional privilege. 133.10
Overseas conduct 133.11
General defences 133.12

TABLE OF CASES

A v A [2014] AC 1	46.12.6

TABLE OF ABBREVIATIONS

Statutes, Statutory Instruments, EU Directives, Treaties

ACA 2002	:	Adoption and Children Act 2002
AMLD	:	Anti-Money Laundering Directive (also called Money Laundering Directive)
CA	:	Companies Act
CFA	:	Criminal Finances Act 2017
CJJA 1982	:	Civil Jurisdiction and Judgments Act 1982
CRCA 2005	:	Commissioners for Revenue and Customs Act 2005
CTA	:	Corporation Tax Act
DMPA	:	Domicile and Matrimonial Proceedings Act 1973
DTRR	:	Double Taxation Relief (Taxes on Income) (General) Regulations 1970
ECHR	:	European Convention on Human Rights
EUSD	:	European Savings Directive 2003/48/EC
FA	:	Finance Act
F2A	:	Finance (no. 2) Act
FB	:	Finance Bill
FLRA 1987	:	Family Law Reform Act
FSMA[1]	:	Financial Services & Markets Act 2000
GOWA	:	Government of Wales Act 2006
HFEA 2008	:	Human Fertilisation and Embryology Act 2008
HGB	:	Handelsgesetzbuch
ICTA	:	Income and Corporation Taxes Act 1988
IHTA	:	Inheritance Tax Act 1984
IRD	:	Interest and Royalties Directive
ITA	:	Income Tax Act 2007
ITEPA	:	Income Tax (Earnings and Pensions) Act 2003
ITTOIA	:	Income Tax (Trading and Other Income) Act 2005
IMOCR	:	International Movement of Capital (Required Information) Regulations 2009
LLCA	:	Limited Liability Company Act

[1] Statute sometimes uses the abbreviation FISMA.

LP(MP)A	:	Law of Property (Miscellaneous Provisions) Act 1989
MLR 2017	:	Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017
MSSCA	:	Marriage (Same Sex Couples) Act 2013
OFTR	:	The Offshore Funds (Tax) Regulations 2009
PA 1890	:	Partnership Act 1890
POA Regs	:	Charge to Income Tax by Reference to Enjoyment of Property Previously Owned Regulations 2005
SLA	:	Settled Land Act
SLR 2017	:	Scottish Partnerships (Register of People with Significant Control) Regulations 2017
SSC	:	Protocol on Social Security Coordination
SSCBA	:	Social Security Contributions and Benefits Act 1992
SSCER	:	Social Security (Categorisation of Earners) Regs 1978
SSCnR	:	Social Security (Contributions) Regs 2001
TCGA	:	Taxation of Chargeable Gains Act 1992
TFEU	:	Treaty on the Functioning of the European Union
NRLR	:	Taxation of Income from Land (Non-residents) Regs 1995
TIOPA	:	Taxation (International and Other Provisions) Act 2010
TOLATA	:	Trusts of Land and Appointment of Trustees Act 1996[2]
TMA	:	Taxes Management Act 1970
VTA	:	Variation of Trusts Act 1958

Periodicals

BTR	:	British Tax Review
OITR	:	Offshore & International Taxation Review
OTPR	:	Offshore Tax Planning Review[3]
PCB	:	Private Client Business
PTPR	:	Personal Tax Planning Review
STI	:	Simon's Tax Intelligence

HMRC Manuals and Publications

References to HMRC Manuals are accompanied by their dates of entry according to information provided at *http://www.taxhub.co.uk*.

BI Manual	:	Business Income Manual
CF Manual	:	Corporate Finance Manual

[2] I would prefer TLATA, but TOLATA has become the standard form.

[3] OTPR (1992-1996) was renamed "Offshore Taxation Review" (1997-1998) and renamed OITR from 1999.

CG Manual	:	Capital Gains Manual
CT Manual	:	Company Taxation Manual
EI Manual	:	Employment Income Manual
IFM	:	Investment Funds Manual
INT Manual	:	International Manual
IPT Manual	:	Insurance Policyholder Taxation Manual
NI Manual	:	National Insurance Manual
NRLS	:	Non-resident Landlord Scheme
PI Manual	:	Property Income Manual
RDR Manual	:	Residence Domicile and Remittances Manual[4]
SAI Manual	:	Savings & Investment Manual (*HMRC sometimes call this the Savings & Investment Income Manual*)
SALF	:	Self Assessment: The Legal Framework
TAH	:	Transfer of Assets Handbook
TSE Manual	:	Trusts Settlements and Estates Manual

Courts

FTT	:	First-tier tribunal
UT	:	Upper Tribunal
CoA	:	Court of Appeal
HL	:	House of Lords
SC	:	Supreme Court

Other

AIP	:	Accrued income profits
ATED:	:	Annual tax on enveloped dwellings
AUT	:	Authorised unit trust
BAD relief	:	Business Asset Disposal relief (formerly called entrepreneurs' relief)
BEPS	:	Base erosion and profit shifting
BiK	:	Benefits in kind
BPR	:	Business property relief (for IHT)
BSB	:	Bar Standards Board
CCF	:	Common Contractual Fund
CDD	:	Customer Due Diligence

[4] The RDR Manual must not be confused with HMRC Guidance Notes known as RDR1 (a general guide to residence issues), RDR3 (the Statutory Residence Test) and RDR4 (Overseas Workday Relief).

CG	:	Capital gains
CFC	:	Controlled foreign company
CFP	:	Fonds commun de placement
CGT	:	Capital Gains Tax
CIOT	:	Chartered Institute of Taxation
CMC	:	Central management and control[5]
COE	:	Chargeable overseas earnings
CRP	:	Corporate Residential Property
CRS	:	Common Reporting Standards
CT	:	(1) Corporation Tax
		(2) *in case names:* Commissioner of Taxation
CVI	:	Centre of vital interests
DDS	:	Deeply discounted security
DIMF	:	Disguised investment management fees[6]
DOTAS	:	Disclosure of tax avoidance schemes
DRs	:	Depository receipts
DT	:	Discretionary trust
DTA	:	Double taxation arrangement
EC	:	Commission of the European Communities
EEA	:	European Economic Area
EEIG	:	European Economic Interest Grouping
EN	:	Explanatory notes
ESC	:	Extra-statutory concession
FATF	:	Financial Action Task Force
FATCA	:	Foreign Account Tax Compliance Act (US)
FCT	:	Federal Commissioner of Taxation
FI	:	Financial Institution
FIFO	:	First in first out
FIG	:	Foreign income & gains
FTC	:	Failure to correct
GAAR	:	General anti-abuse rule[7]
GB	:	Great Britain

[5] The abbreviation CM&C is also found.

[6] HMRC use the abbreviation DMF.

[7] In this book references to "the GAAR" are to the general anti-abuse rule in FA 2013. For completeness, there are (at least) two other (rather specialist) GAARs (where the abbreviation stands for general anti-*avoidance* rule): Part 5 Revenue Scotland and Tax Powers Act 2014; Part 3A Tax Collection and Management (Wales) Act 2016.

GWR	:	Gift with reservation of benefit
HMRC	:	Her Majesty's Revenue and Customs
ICAEW	:	Institute of Chartered Accountants in England & Wales
IFS	:	Institute of Fiscal Studies
IGA	:	Intergovernmental Agreement
IHT	:	Inheritance tax
IME	:	Investment manager exemptions
IoM	:	Isle of Man
IOV	:	Instrument of variation
IIP	:	Interest in possession[8]
IP	:	Intellectual property
IPDI	:	Immediate post-death interest
IT	:	Income tax
LIFO	:	Last in first out
LLC	:	Limited liability company
LLP	:	Limited liability partnership
LTT	:	Land Transaction Tax
MLI	:	Multilateral instrument
MS	:	Member state
NAV	:	Net asset value
NFE	:	Non-financial entity
NINO	:	National insurance number
NICs:	:	National insurance contributions
NOR	:	Not ordinarily resident
NPO	:	Non-profit organisation
NRCGT	:	Non-residents CGT (CGT on UK dwelling-house held by non-resident)
NRLS	:	Non-resident landlord scheme
oao	:	on the application of
OECD	:	Organisation for Economic Cooperation and Development
OEIC	:	Open-ended investment company
OIG	:	Offshore income gain
OPC	:	Office of Parliamentary Counsel
ORIP	:	Offshore receipt from intangible property
OTS	:	Office of Tax Simplification
OWR:	:	Overseas workday relief
PCRT	:	Professional Conduct in Relation to Taxation

[8] I prefer IP, but adopt IIP to be consistent with HMRC practice.

PE	:	Permanent establishment
PET	:	Potentially exempt transfer
PFA	:	Profit Fragmentation Arrangements
POEM	:	Place of effective management
POA	:	Pre-owned assets
PRs	:	Personal representatives
PRR:	:	Private residence relief
PPT	:	Principal purpose test
RFI	:	Relevant foreign income
RFI	:	Reporting Foreign Institution (in context of CRS)
RI	:	Revenue Interpretation
RTC	:	Requirement to correct
SA	:	Self-assessment
SDLT	:	Stamp Duty Land Tax
SDRT	:	Stamp Duty Reserve Tax
SP	:	Statement of practice
SPTS	:	Standards for the Provision of Taxation Services
SRA	:	Solicitors Regulation Authority
SRT	:	Statutory residence test
SSE	:	Substantial Shareholding Exemption
STEP	:	Society of Trust & Estate Practitioners
TAAR	:	Targeted anti-avoidance rule
ToA	:	Transfer of assets abroad[9]
TG	:	Technical Guidance
TIIN	:	Tax Information and Impact Notes
TIN	:	Taxpayer Identification Number
TNR	:	Temporary non-residence
TRS	:	Trust Registration Service
TSI	:	Transitional serial interest
UN	:	United Nations
WHT	:	Withholding Tax

[9] Some use the abbreviation TOAA.

A1.1 The 2025 revolution: Introduction

This chapter discusses the domicile tax reforms announced in Spring Budget 2024.

At the time of writing, a few days after the Budget, the information available is:

Spring Budget 2024 and Spring Budget 2024: Policy Costings[1]
HMRC: Spring Budget 2024: Overview of tax legislation and rates (OOTLAR)[2]
HMRC Technical note: Changes to the taxation of non-UK domiciled

[1] *https://www.gov.uk/government/publications/spring-budget-2024*

[2] *https://www.gov.uk/government/collections/spring-budget-2024-tax-related-documents*

individuals Updated 7 March 2024[3]
The Technical Note covers everything in the other two papers, except for estimates of yield, so that is all that one needs to study.

This chapter will be updated online during the year as further details emerge.

A1.2 FIG relief for new residents

A1.2.1 *FIG relief*

The Technical note provides:

> **3.1 4-year FIG regime overview**
> From 6 April 2025, a new regime for personal FIG [foreign income & gains] will be available to individuals for the first 4 tax years once becoming UK tax resident after a period of 10 years non-UK tax residence. Eligible individuals will not pay tax on FIG arising in the first 4 years, where a claim is made, and will be able to remit these funds to the UK free from any additional charges....

I coin the following terminology (with initial capitals to reflect the technical meaning of my terms):

Term	Meaning
New Resident	Individual who comes to UK after 10 years non-residence
Exempt Period	First four years of tax residence
FIG relief	Relief for first 4 years of tax residence

It appears that the New Resident will need to dispose of foreign assets during the Exempt Period, to obtain the relief, there is no rebasing at the end of it.

Life insurance might be an attractive investment vehicle for those staying in the UK for more than 4 years, but not permanently.

Will the foreign income/gains qualify for DT relief? Article 4(1) OECD Model second sentence provides:

> This term ["resident of a Contracting State"], however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.[4]

[3] *https://www.gov.uk/government/publications/changes-to-the-taxation-of-non-uk-domiciled-individuals/technical-note-changes-to-the-taxation-of-non-uk-domiciled-individuals*

[4] See 9.8 (Liable to source tax only). But this will be a question for the foreign State to answer, it will not arise in the UK.

What about capital losses? Losses on disposals of foreign assets during the 4 year period will not be allowable, will losses on disposals after that be allowable? What will be the effect of existing capital-loss elections?

It may be useful to set out an aide memoire of when a full four year's FIG relief can apply:

Last UK resident year	**First possible year of return for 4 years FIG relief**
2014/15	2025/26
2015/16	2026/27
2016/17	2027/28
2017/18	2028/29
2018/19	2029/30
2019/20	2030/31
2020/21	2031/32
2021/22	2032/33
2022/23	2033/34
2023/24	2034/35

It seems optimistic to assume that the FIG regime will remain in its current form for a whole decade. But clearly there is an incentive for those who are nearly there to remain non-resident a little longer.

A1.2.2 *Claim for relief*

The Technical note provides:

> Claims to use the new 4-year FIG regime are to be made for each year to which it is to apply. Individuals need not make a claim for every year of the 4-year period. For example, an individual who makes a claim for the new 4-year FIG regime in year 1 but chooses not to make a claim for year 2 will still be able to claim for years 3 and 4.

Will the claim have to specify the amount of the foreign income and gains? If so the taxpayer will have additional work to complete their tax return; if not, the true cost of the relief will not be known.

The Technical note provides:

> If an individual chooses to be taxed under the new 4-year FIG regime, they will lose entitlement to personal allowances and the CGT annual exempt amount.

If one ignores the CGT annual exemption, now trivial, a claim is worthwhile if the individual has foreign income above the personal allowance, but that now a modest £12,570 (and frozen to 2028). The income would have to be larger if a foreign tax credit was available.

Taxpayers with small amounts of foreign income will need to do the computation to check the benefit matches the cost.

A1.2.3 *The test of residence*

The Technical note provides:

> The Statutory Residence Test will be used to determine tax residence for any one tax year. Treaty residence or non-residence and split years will be ignored.

That is, a UK resident year is counted as one of the years of the exempt period, even though it is a year during which the person is treaty non-resident or a split year, so FIG relief may not be needed. That is not surprising, as these are the usual rules:

Rule	**See**
Treaty non-residence ignored	9.2
Split year treated as a resident year	10.2

A1.2.4 *Non-residence in Exempt Period*

The Technical note provides:

> If an individual leaves the UK temporarily during the 4-year period they will be able to make a claim under the 4-year FIG regime for any of the qualifying tax years remaining on their return to the UK. For example, if someone becomes non-UK resident in year 2 and 3 but is UK resident again for year 4, they will be able to use the new 4-year FIG regime for year 4.

A1.2.5 *Transitional rules for UK residents*

The Technical note provides:

> Individuals who on 6 April 2025 have been tax resident in the UK for less than 4 years (after a period of 10 years non-UK tax residence) will be able to use this new regime for any tax year of UK residence in the remainder of those 4 years. For example, an individual who became resident in the UK in 2022-23, after a 10-year period of non-residence, will have been resident in the UK for up to three tax years on 6 April 2025. They will be able to claim under the new 4-year FIG regime for 2025-26 because this is their fourth year following a period of 10 years non-UK tax residence.

The transitional rules for return to the UK before FIG relief starts (but were away for 10 years before they returned) will be:

Last UK resident year	**First possible year of return for FIG relief from 25/26**	**FIG relief for**	**Years of relief**
2011/12	2022/23	2025/26 only	1
2012/13	2023/24	2025/26 + 2026/27	2
2013/14	2024/25	2025/26 to 2027/28	3

A1.2.6 *FIG relief/rem. basis compared*

The main differences between the new FIG relief and the old remittance basis are as follows:

Topic	**Remittance basis**	**FIG relief**
Relief	Remittance basis (on FIG)	Exemption (on FIG)
Who qualifies	Non-doms	New Residents
Cost of claim	Rem.basis charge + allowances lost	Allowances lost (only)

FIG relief is for a shorter period than the remittance basis, but:

(1) it is much more generous (exemption for foreign income/gains, rather than remittance basis); no flat charges

(2) it is much more widely targeted (applying to all New Residents, including UK domiciled individuals)[5]

Those thinking of returning to the UK in the course of a year would do well to defer their return until the following year (avoiding a split year), if that is possible.

A1.3 Offshore trusts

A1.3.1 *Post-2025 income/gains*

The Technical Note provides:

> **3.3 Trust Protections**
> From 6 April 2025, the protection from tax on income and gains arising within settlor-interested trust structures will no longer be available for non-domiciled and deemed domiciled individuals who do not qualify for the new 4-year FIG regime. FIG arising in the trust (whenever established) from 6 April 2025 will be taxed on the settlor on the same basis as UK domiciled settlors at present, unless the settlor is eligible for

[5] The pre-2025 regime, particularly once the remittance basis charges applied, was restricted to very top of the income distribution. According to Advani, Burgherr & Summers, "Taxation and Migration by the Super-rich", IZA DP No. 16432, 29% of those claiming the remittance basis were in the top 0.1% income range. See *https://docs.iza.org/dp16432.pdf*

the new 4-year FIG regime.

A1.3.2 *Pre-2025 income/gains*

The Technical Note provides:

> From 6 April 2025 the matching of pre-6 April 2025 FIG to trust distributions will continue, but UK resident non-domiciled individuals will no longer be entitled to the remittance basis in respect of worldwide trust distributions. Beneficiaries and settlors who are within the 4-year FIG regime will also be able to receive benefits from 6 April 2025 free from any UK tax charges whether or not the benefits are received in the UK. However, such benefits are not matched to trust income and gains and will be subject to a modified onwards gift rule.

The best course will sometimes be to wind up the trust, but there will be IHT and many other matters to consider.

A1.4 Non-dom transitional reliefs

Spring Budget 2024 provides three transitional reliefs for "existing non-doms claiming the remittance basis". Presumably a claim for 2024/25 will suffice. It may be beneficial to make a remittance basis claim to take advantage of the transitional reliefs (rather than to qualify for the remittance basis).

A1.4.1 *2019 CGT Rebasing*

The Technical Note provides:

> **3.5 Capital Gains Tax rebasing**
> From 6 April 2025, an individual who is not, or who later ceases to be, eligible for the new 4-year FIG regime will be taxed on foreign gains in the normal way.
> Transitional rules will apply for individuals who
> [1] have claimed the remittance basis and
> [2] are neither UK domiciled nor UK deemed domiciled by 5 April 2025.
> If, on or after 6 April 2025, they dispose of a personally held foreign asset that they held at 5 April 2019, they will be able to elect to rebase that asset to its value as at 5 April 2019. This rebasing will be subject to conditions that will be set out later.

Rebasing reliefs can been done in many different ways. Details remain to follow.

There is no relief proposed for assets held in trusts or companies.

A1.4.2 *2025/26 50% IT relief*

The Technical Note provides:

> **3.4 Reduced amount of foreign income subject to tax**
> There will be a one-year reduction in the amount of foreign income that will be subject to tax for individuals who
> [1] move from the remittance basis to the arising basis from 6 April 2025 and
> [2] who are not eligible for the new 4-year FIG regime.
> For these individuals only 50% of the foreign income arising in 2025-26 will be subject to tax. The reduction in the amount of foreign income subject to tax will apply for one tax year only and the reduction will not apply to foreign chargeable gains.

Charles Russell Speechley comment:[6]

> It is not entirely clear from this whether only individuals who would have been eligible for the remittance basis in 2025/26, had the regime continued, will be eligible for the reduced rate, or whether individuals becoming deemed domiciled on 6 April 2025 will also qualify.
> A further question is whether the relief will apply to offshore income gains and other deemed income. The Parliamentary drafting team have form for forgetting about OIGs and producing tax legislation that does not address them, resulting in anomalies and controversy.

A1.4.3 *Temporary Repatriation Facility*

The Technical Note provides:

> **3.6 Temporary Repatriation Facility (TRF)**
> A new 12% rate of tax will be introduced for remittances of FIG made in tax years 2025-26 and 2026-27 where the FIG arose to the individual personally in a year when the individual was taxed on the remittance basis and the individual is UK resident in the relevant tax year.
> There will be some relaxation of the mixed fund ordering rules to make it easier for individuals to take advantage of the TRF if, for example, they have FIG in a mixed fund or they are unable to precisely identify the quantum of their FIG.

[6] *https://www.charlesrussellspeechlys.com/en/insights/expert-insights/private-wealth/2024/regime-change-the-beginning-of-the-end-of-the-remittance-basis/* (March 2024)

> From 2027-28 remittances of pre-6 April 2025 FIG will be taxed at normal tax rates.

Where DT relief is available, this will generally be an effective 0% rate. Taxpayers will plan to remit, and, where appropriate to trigger clawback of remittance investment relief.

A1.5 Overseas Workday relief

A1.5.1 *Who qualifies for OWR*

The Technical Note provides:

> **3.2 Overseas Workday Relief**[7]
> Relief will continue to be available for employees who opt to use the new 4-year FIG regime. The new Overseas Workday Relief (OWR) will be like that currently available, providing relief on earnings for employment duties performed outside the UK.
> The new OWR will be available for the first 3 tax years of UK residence.
> The new OWR will provide relief from income tax whether or not these earnings are brought to the UK. As under the current rules, the new OWR will not provide relief from National Insurance contributions (NICs), so any NICs liabilities on these earnings will be determined as usual.

Thus differences between OWR and FIG relief include:

Topic	**FIG relief**	**OWR**
Relief for	FIG (not OWR income)	employment income for duties abroad
Duration of relief	4 years	3 years
Applies to	All New Residents	OWR Employees
Transitional rules	2023/4 & 2024/5 OWR users	New Residents only

A1.5.2 *23/4 & 24/5 residents: Transitional rule*

The Technical Note provides:

> Employees who are eligible for OWR in 2023-24 or 2024-25 for their first year since returning to the UK should still be able to claim OWR for the full three years. However, those re-entering from 2025-26 will not be able to claim OWR, if they are not eligible for the FIG regime.

[7] See 34.22 (Overseas workday relief).

A1.6 Remittance basis for pre-2025 FIG

The Technical Note provides:

> **4. Ending the existing income tax and capital tax regime**
> The remittance basis of taxation will be abolished for UK resident non-domiciled individuals from 6 April 2025. The last year for which a remittance basis claim can be made will be the 2024-25 tax year.
> FIG that has arisen to a remittance basis user prior to 6 April 2025 will continue to be taxed if they are remitted on or after 6 April 2025, subject to the TRF set out above.
> Business Investment Relief will be available for qualifying investments of pre 6 April 2025 FIG made on or after 6 April 2025 and will continue to be available for qualifying investments made prior to 6 April 2025.

The remittance basis is not abolished: it is *prospectively* abolished.

A1.7 IHT domicile reform

The Technical Note provides:

> **5. Inheritance tax**
> Inheritance tax (IHT) is currently a domicile-based system. The government intends to move IHT to a residence-based system, subject to consultation and applying this only from 6 April 2025.

A1.7.1 *Non-settled property post-2025*

The Technical Note provides:

> **5.3 The position from 6 April 2025 – Property owned outright**
> It is envisaged that the new rules will involve charging IHT on worldwide assets owned outright when a person has been resident in the UK for 10 years (the "residence criteria"), with a provision to keep a person in scope for 10 years after leaving the UK (the "tail" provision). The design of the system (including consideration of further criteria such as other connecting factors) will be subject to consultation. UK situs assets will remain in charge on the same basis as at present, regardless of residence.

In the following discussion, a **"IHT-chargeable person"** is an individual who

(1) been resident in the UK for 10 years, and
(2) if they have left the UK, have not achieved 10 year's non-residence

There will be winners and losers. The winners may include UK

domiciliaries who are not IHT-chargeable persons.[8] They will fall outside the scope of personal IHT under the new regime. The losers are individuals who are:
(1) non-domiciled and non deemed domiciled; and
(2) become IHT-chargeable persons (10-year residents).

Losers will outnumber winners. For some there will be a strong incentive not to become an IHT-chargeable person, or to cease to be one, ie to leave the UK (or not to come).

Important commencement issues are currently unanswered. If a long term resident leaves in 2024/25, they should avoid the 10 year tail, but that remains to be seen. HMRC's intention might be that there should be no transitional rules and that potentially those who left as long ago as 2016/17 (and have been non-resident since) could be brought back into the 10 year tail in 2025/26. But this would seem particularly retroactive and would give rise to significant lobbying against

The restriction on the IHT spouse exemption will operate differently. Expect gifts from H to W to be PETs, not exempt, (and within GWR) if H is an IHT-chargeable person and W is not; subject to a domicile election.

A1.7.2 *Post-2025 settlements*

The Technical Note provides:

> **5.4 The position from 6 April 2025 – Property held in trust**
> It is envisaged that the new rules for chargeability of assets comprised in a settlement will depend upon whether a settlor meets the residence criteria or is within the tail provision at the time the assets are settled and/or when charges such as 10-year anniversary charges or exit charge arises.
> The design of the system (including consideration of further criteria such as other connecting factors) will be subject to consultation. UK situs assets will remain in charge on the same basis as at present, regardless of residence.

It appears that if the settlor becomes an IHT-chargeable person, a post-2025 settlement will fall within the scope of IHT, and (unless the settlor is excluded) GWR. What will happen after the death of the settlor? The current intention seems to be that the settlor's status at the date of death

[8] Depending on the (unidentified) "other connecting factors".

fixes the IHT status of the trust permanently thereafter.

The reference to "other connecting factors" is intriguing, but it is impossible to say what it might mean.

Settlement will move in and out of the IHT net from time to time. The 10 year tail means that trusts which fall within the IHT net will generally suffer at least one 10-year charge.

A1.7.3 *Pre-2025 settlements*

The Technical Note provides:

> The treatment of non-UK assets that are settled by a non-UK domiciled settlor and become comprised in a settlement prior to 6 April 2025 will not change. For these settled assets:
>
> - provided the assets in the settlement continue to meet the legislative requirements to be excluded property under current legislation, and subject to any future anti-avoidance provisions, there will be no IHT charges; and
> - the interaction between the gift with reservation provisions and excluded property trust rules will also remain, meaning excluded property will not be brought into charge on the settlor's death even if the settlor retains a benefit in the trust assets.

This seems a generous transitional rule, but it would have been difficult or impossible, in some cases, to backdate a 10-year residence rule, as residence records may not be available. So domicile is not abolished for IHT purposes. It is *prospectively* abolished. Domicile will remain important for the duration of pre-2025 settlements, ie for about a century.

> The exception to this is that the treatment of non-UK property comprised in a settlement that currently comes back into scope where the settlor is a formerly domiciled resident (see above) will be subject to consultation.

It is impossible at present to say what will be the position of a settlement made by a formerly domiciled resident, but perhaps it will remain as at present.

A1.7.4 *IHT consultation questions*

The Technical Note provides:

> **5.5 The IHT consultation**
>
> The IHT consultation will deal with the design of a new residence based system to apply from 6 April 2025. There are a number of detailed

> issues and interactions that will be consulted on such as ...

The Technical Note identifies the following:

Issue	**JK Comment**
Transitional provisions	
Length of the residence criteria	
Length of the tail provision	
Connecting factors other than residence	
Gifts with reservation	
Domicile elections	See 5.14 (Election-domicile)
Formerly domiciled residents	
Calculation of trust charges	

One can add to this list. What about existing IHT DTAs?

A1.7.5 *Comments on IHT reforms*

The IHT proposals are at an early stage, and the final rules may be significantly different from the sketch in the Technical Note.

If a 10-year tail applies to those who are UK resident for 10 years, there would in some cases be a significant incentive to leave within 10 years (in other cases an IHT DT relief may apply; in other cases (younger individuals, especially if married) the effective IHT exposure could inexpensively be covered by insurance or ignored (self-insured). The individual would still need advice in connection with lifetime giving for 10 years (essentially the need to avoid chargeable transfers, and the risks of PETs and, perhaps, GWR).

A1.7.6 *International comparisons*

Short summary descriptions of foreign tax laws are bound to mislead. Nevertheless the following quote is of interest as it illustrates how foreign jurisdictions have, unsurprisingly, struggled with the policy issues of using residence as a connecting factor for IHT:[9]

> Last year, [2017] Japanese inheritance tax rules were amended such that, where a foreign national had lived in Japan for 10 years (in the aggregate) out of the last 15, died outside of Japan, the foreigner national's heirs would be subject to Japanese inheritance tax on such foreign national's assets located both in Japan and elsewhere (a similar

[9] *https://www.notaio-busani.it/it-IT/INTERNATIONAL---JAPAN--Disastrous-Japanese-inheritance-tax-IHT-amendment-to-be-repealed.aspx*

> rule also applies for gift tax purposes).
>
> The above rule resulted in a situation where the heirs of a foreign national who had left Japan would potentially be subject to Japanese inheritance tax on the foreign national's worldwide assets for up to five years after such foreign national had left Japan. The fact that Japanese inheritance tax could "follow" a foreign national for up to five years after such person had left Japan caused great concern among Japan's expatriate community, and threatened to derail the Japanese government's efforts at attracting successful foreign talent to live and work in Japan.
>
> In this year's tax reform, [2018] the Japanese government indicates that it will abolish the above rule applying to foreign nationals, subject to a certain anti-avoidance countermeasures in the context of gift tax... This change to the inheritance tax provisions should aid Japan in its efforts to show Japan to be an attractive location for successful foreign executives to reside long term.

I would be interested if readers with knowledge of Japanese IHT have further comments on this episode.

A1.8 Other domicile reforms?

There are other topics where domicile matters for tax purposes, for instance, trustee residence.[10] It would be logical to rewrite all these rules to avoid reference to domicile, but the work involved would be considerable.

The Technical Note does not consider these aspects, and what will happen remains to be seen.

A1.9 Amounts raised and policy issues

A1.9.1 *Amounts raised*

Spring Budget 2024 provides estimates, combining into one figure 3 distinct matters: the abolition of the nondom regime, the FIT regime which replaces it, and transitional reliefs.

Sensibly, the estimates ignore the IHT reforms, though these may well increase Revenue receipts.

2024-25	**2025-26**	**2026-27**	**2027-28**	**2028-29**
+0m	+185m	+2,805m	+3,675m	+2,715m

[10] See 7.6 (Mixed-resident trustees).

These figures should not be given any credence, because:

(1) There is no indication of the working behind the figures[11] (the reader may think this suggests that the authors would prefer no serious investigation into the figures).
(2) We do not have full details as to what the rules will be, on which large sums will depend.
(3) The Warwick/LSE paper estimated the saving from abolishing the remittance basis as £3.2 billion *without any short term residence relief.*[12] The cost of FIG relief can hardly be less than that.

The apparent precision (to within 5m) is obviously spurious. It would be more reasonable to estimate figures to the nearest £500m.

Spring Budget 2024 states that the Temporary Repatriation Facility "is expected to bring in an additional £15 billion of foreign income and gains onshore to the UK and raise over £1 billion in additional tax receipts." [13] Assuming the £1billion is spread equally between 2025/26 and 2026/27, that equates to £500m receipts in each of the two years. It is not clear if those sums are included in the figures above. But while the TRF will affect the timing of receipts, it is not obvious why someone should chose to remit and pay the tax if there is a viable alternative of not remitting.[14] The TRF will not raise significant *additional* tax receipts.

My own guess would be no net gains to the Revenue at all, and more likely than not a net loss, except for additional receipts:

(1) For 2025/26, because of additional income timed to take advantage of 2025/26 50% IT relief
(2) for 2025/26 and 2026/27, because of remittances to take advantage of the Temporary Repatriation Facility

Those receipts will be outweighed by lower receipts in other years.

A1.10 Policy issues

Spring Budget 2024 states that the reforms create "a modernised[15] regime

[11] For what it is worth, HM Treasury, "Spring Budget 2024 Policy Costings" states:

> "The costing accounts for behavioural responses including migration and tax planning."

But what allowance is made for these matters is not identified.

[12] See 1.6 (Warwick/LSE paper). This is likely to be an overestimate.

[13] Para 2.36.

[14] Unless the UK tax charge is covered by DTA relief.

[15] Para 2.35; see App 1.2 (Clarify/modernise/reform).

that is simpler, fairer and more competitive". But I doubt if anyone is expected to take that seriously.

A1.10.1 *Tax competitive*

Spring Budget 2024 claims the new system will remove a rule "that incentivises individuals to keep income and gains offshore in the current system".[16] That is very broadly correct, though it does not mention that the new relief will continue to incentivise individuals to realise income and gains offshore in the four year Exempt Period, that IHT may also continue to provide a similar incentive, and that the incentive will continue to apply to pre-2025 FIG (mitigated to some extent by the Transitional Relief Facility).

A1.10.2 *Simplicity*

The sketch in the Technical Note is simple. The final law will not be simple; FIG relief and transitional provisions will need 3 schedules and I guess about 100 pages of legislation.

The Technical Note says:

> Under the new regime individuals will not be required to track the movement of their FIG through investments in the way they are required to do now under the current regime. This will make the new 4- year FIG regime much simpler than the remittance basis regime.

The law for post 2025 FIG will be simpler than the present law, because the remittance basis has become so very complicated (mainly a result of the 2008 and 2017 reforms). But the remittance basis, with all its complications, will remain for a generation, as it will continue to apply to unremitted income/gains before 2025/26, though mitigated by the TRF, and after a couple of decades will gradually fade into insignificance.

Simplicity is multi-faceted. The abolition of protected trusts (certainly a simplification) means that attention will need to be given to the ToA and CGT s.3 motive defences, and reliefs such as SSE, which did not have to be considered for protected trusts.

A1.11 Some certainties and uncertainties

A1.11.1 *Certainties*

Countless client briefing emails will be sent, and conferences arranged.

[16] Box 2C, p.40.

Tax practitioners will be busy advising on the implications of the new regime (coming up to 5 April this year, and next year, frantically so).

There will be much scope for tax planning.

Parts of this book will need to be rewritten - but large parts will remain substantially the same. The title of the book will change; I have wanted to change it for a while but have been unable to think of the right title. Suggestions from readers would be welcome.

A1.11.2 *Uncertainties*

Some non-doms will leave the UK as a result of the reforms, (and some will chose not to come). But how many?

Others will be attracted to the UK, but how many and will they stay?

We will know a little more in a decade, when figures for the early years of the FIG regime are available and academics have studied them.

Macfarlanes say:[17]

> we would anticipate that individuals who are planning a major exit from a business within that four-year period will be attracted to the UK. In this sense, the regime is better than Italy, because in Italy there can be significant problems with disposals of major private company shareholdings in the first five years of residence.

It remains to be seen what view the next government take. It was Labour policy to abolish the remittance basis and replace it with a new residents relief.[18] On that basis one can expect the FIG regime to survive for now. The transitional reliefs might be restricted or abolished even before they take effect.

The Technical Note does not mention forestalling rules, but such rules may emerge (under the current government or the next) and it may be desirable for taxpayers to act sooner rather than later. We will only know with the benefit of hindsight.

The new law will not be enacted in the Bill which will become the F(no2)A 2024. It is a matter of politics whether it will be in FA 2025, or

[17] *https://www.macfarlanes.com/what-we-think/in-depth/2024/non-uk-domiciliary-regime-an-analysis* (March 2024)

[18] The nature of Labour's new relief were unspecified, presumably undecided, and most likely, unconsidered.
There is of course a history of Conservative governments adopting popular Labour policies; see 1.10.1 (Political background). There is nothing necessarily wrong with that: indeed, one might applaud it.

in a F(no.3)A 2024, though there is not enough time to do a good job in 2024 and anything enacted in 2024 will be reviewed in 2025. One hopes that the debacle of the 2008 reforms will not be repeated.[19]

The IHT reforms can only go in the FA 2025. The timetable might slip to 2026 but I would not plan on that.

A1.11.3 *Will IT/CGT regime be stable*

The law will no doubt be amended a few times in the next few years, as issues emerge. After that, will the new law be stable? It seems unlikely. A government in need of funds might:

(1) Cut the Exempt Period to 2 or 3 years, or

(2) Impose a FIG relief claim charge comparable to the remittance basis claim charge.

That is especially likely if, as I would guess, the published figures underestimate the cost of FIG relief.

On the other hand, there will be pressure to increase the Exempt Period. Macfarlanes say:[20]

> ... the four-year period is really very short, especially when looked at in the international context. The Irish remittance regime does not have a time limit, the Italian and Greek regimes are each available for 15 years, a French inbound regime lasts for eight years and the Spanish "Beckham" law lasts five years.
>
> A four year period is significantly less attractive. Such a short period could also be said to encourage what might be termed "fiscal nomadism". Individuals who choose to benefit from the regime are likely to leave a limited footprint in the UK. After all, why would they purchase a property, or invest in the UK, if they only choose to be in the UK for four years?

That is not comparing like with like. FIG exemption while it lasts is more generous than a remittance basis, is uncapped, and does not incur a significant flat tax payment. The length of the Exempt Period is only part of the picture.

As to whether the new IHT law will be stable, discussion should wait until we know what the law will be.

[19] See 1.9.4 (FA 2008 enactment process).

CHAPTER ONE

MOBILE INDIVIDUALS: TAX POLICY

1.1 Introduction
1.2 Tax competition
1.2.1 Tax competition: Analysis
1.2.2 Extent of tax competition
1.3 Other tax competition
1.3.1 Tax competition within UK
1.3.2 Attitudes to tax competition
1.3.3 Tax competition: International law
1.4 Mobility tests
1.4.1 Domicile test
1.4.2 Residence tests
1.5 Fairness and mobile-individual reliefs
1.6 Warwick/LSE paper
1.6.1 Are mobile reliefs fair
1.7 Non-dom tax reform history
1.7.1 1974-2002
1.7.2 2003 - 2008
1.8 Assessment of reform: Metrics
1.9 2008 reform: Assessment
1.9.1 Clear and easy to operate
1.9.2 Benefit to UK economy
1.9.3 Fairness of 2008 reforms
1.9.4 FA 2008 enactment process
1.10 2017 domicile reform: Assessment
1.10.1 Political background
1.10.2 Clear and easy to operate
1.10.3 Fairness
1.10.4 Benefit to UK economy
1.10.5 2017 enactment process
1.11 The promise of stability
1.12 State of UK tax reform
1.12.1 Tax Consultation Framework
1.12.2 Compliance with Framework
1.12.3 Alternatives to Framework

1.1 Introduction

In this chapter I coin the following terms:

“Mobile Individuals” means some class of individuals who are less connected with, or settled in, the UK than Established Residents.

“Established Residents” are UK residents with sufficient UK links that they do not qualify as Mobile Individuals.

“Mobile Individual relief” is some relief for UK resident Mobile Individuals (which is not available to Established Residents)

Until 2025 the distinction between Mobile Individuals and Established Residents was determined by reference to domicile (supplemented by 7-year, 12-year and 15-year residence tests). After 2025, as all readers will know, the distinction will principally be determined by 10-year absence followed by no more than four year's residence.[1]

The topics of this chapter are:

(1) Policy arguments for a lighter tax regime for a class of Mobile Individuals
(2) How that class may be determined (which is to change in 2015)
(3) A brief history of domicile tax reform, with comments on the reforms of:
    (a) 2008
    (b) 2017
(4) The state of UK tax reform, and prospects for the future

1.2 Tax competition

All UK residents may choose where to reside, but some are less securely attached to the UK than others. Tax competition arguments claim that if their tax burden was as great as established residents, fewer would choose to live in the UK, and overall the UK economy would lose:

(1) directly, from tax paid by them (including VAT and SDLT); and
(2) indirectly, from UK investment and expenditure which is more likely to be made by UK residents.[2]

Similarly, UK firms competing in the global market for talent and expertise will find recruitment easier if the tax regime for foreign employees is lighter. Some potential employees would not choose, or could not afford, to come if the UK tried to tax them on worldwide income.

In a nutshell: the argument is that the UK economy benefits from mobile individual reliefs.

1.2.1 *Tax competition: Analysis*

Tax competition raises a number of sub-issues:

(1) To assess the existence and amount of tax competition
(2) What the UK should do in the light of that tax competition
(3) What international agreements might do to regulate tax competition

The first question is essentially one of fact; the second is a question of domestic politics. The third is a matter of foreign politics.

[1] See Chapter A1 (FIG Relief - Abolition of Domicile).

[2] Except to the extent that tax makes UK investment unattractive, as to which, see 19.23 (Investment relief: Critique).

The debate about international tax competition is long standing.[3] All countries, of course, grapple with the same issues.[4]

1.2.2 *Extent of tax competition*

It seems clear that there is plenty of tax competition for wealthy mobile individuals: there are many low-tax or preferential tax regimes in Europe where they may choose to reside,[5] even without looking any further.

In assessing the existence and amount of international tax competition several points must be borne in mind.

Effective low tax may be achieved in other countries by relaxing legal provisions at administrative level, in a non-transparent way.

One-paragraph summaries of a country's tax system are bound to be

[3] See the evidence of Lord Vestey to the 1920 Royal Commission, *https://www.kessler.co.uk/wp-content/uploads/2013/07/Vestey_Royal_Commission_evidence_and_ensuing_debate.pdf*

[4] See eg New Zealand Inland Revenue "Tax, foreign investment and productivity" *https://taxpolicy.ird.govt.nz/publications/2022/2022-other-draft-ltib* (2022)

[5] Switzerland, for instance, has a lump sum taxation regime for non-Swiss citizens, specifically targeted for this purpose and more favourable than the UK remittance basis; see 9.5.4 (Swiss forfait taxpayer). This was at one time politically controversial; it was abolished in Zurich in 2009 and 5 other cantons followed suit. But in a referendum in 2014, the regime was supported by 59% of voters, on a 49% turnout; see Sigg and Luongo, "The Swiss lump-sum taxation regime: after the storm comes the calm?" [2015] JITTCP 169
http://www.swissinfo.ch/eng/bloomberg/swiss-say-foreign-millionaires-are-still-welcome-after-tax-vote/41144174
So I expect that Swiss tax law is now stable. In the 2014/15 edition of this work I added "and probably more stable than the UK" and that proved to be correct!
In 2017, Italy introduced a *forfait* regime for new residents: art.24-bis [Italy] *Testo unico delle imposte sui redditi*; as there is no further tax on remittance, this is more favourable than the UK remittance basis.
In 2024, Macfarlanes comment:

> ... other regimes have been created (most notably by Italy and Greece) which are based on the UK rules but are significantly more generous. As a result, wealthy individuals probably now have greater choice than they have ever had if they want to take advantage of a time limited but tax advantaged status. Some attractive inpatriate regimes (such as the Portuguese regime) have come and gone but overall, the number of international competitors to the UK has grown.

https://www.macfarlanes.com/what-we-think/in-depth/2024/non-uk-domiciliary-regime-an-analysis/?utm_source=vuture&utm_medium=email&utm_campaign=11%20march%202024-passle%20emails%20(ongoing)
Ireland retains the pre-2008 remittance basis.

misleading.

The terms of statutory tax law are only one aspect of tax competition. Compliance costs are important. The quality of tax administration is important. An OECD study identifies six desiderata: a developed legal system, confidentiality, impartiality, proportionality, responsiveness (meaning a CRM for large companies, and at least answering correspondence from lesser taxpayers) and competence. They add:

> Frequent changes in legislation, particularly where there has been an absence of consultation, can have an adverse impact on the taxpayers and their advisers trust in the tax system.[6]

But there are others: can a tax authority subject an individual to an expensive and intrusive tax investigation without evidence that tax returns were wrong? Certainty is very important.[7] When individuals make decisions of where to live, perception matters as much as reality. Rates of tax on UK source income may matter more than non-dom reliefs. By some of these measures, the UK competes poorly.

1.3 Other tax competition

Tax competition arises in many areas of taxation, and affects different types of income in different ways.

In areas where investment by non-residents is (more or less) completely mobile, tax competition has driven UK tax rates down to zero. Examples include:

Topic: Relief	**See para**
Interest: Reliefs for non–residents	26.23; 45.1
IME: Trading income of non-residents from dealing in investments	72.1
UK funds: IHT relief for foreign domiciliaries[8]	75.3

[6] "Engaging with High Net Worth Individuals on Tax Compliance" (2009) para 208 and 243; see *http://www.oecd.org/ctp/aggressive/engagingwithhighnetworthindividualsontaxcompliance.htm*

[7] See 2.8 (The Rule of Law).

[8] Another example from the field of shipping:

> "The location of ownership, flagging (registration) and management activities is very 'footloose', since it can easily be transferred from one country to another. This makes it vital to have regard to the fiscal regimes in other countries if we want to maintain a successful shipping industry in the UK. The modern armoury in the battle for success invariably includes a virtually tax-exempt fiscal regime."

In the case of very mobile sources of income, such as interest on bank deposits and trading income from asset management, any UK tax charge would only cause non-resident investors to move the investments to a different jurisdiction with a resultant loss in economic activity and profits in the UK.

In the corporate field, tax competition reduced the rate of CT, before 2023, though not of course to zero or near it. Tax competition may not have been the only factor which contributed to the historic reduction in CT rates, but if HM Treasury is to be believed, it was an important factor. In the 2017 spring budget:

> 3.11 The UK is one of the most open economies in the world, and a highly competitive business tax regime remains a key factor in retaining that position. The UK's corporate tax rate is the lowest in the G20.[9]

But headline rates are only part of the story.[10]

The increase in CT rates announced in the 2021 budget with effect from 2023 is a reversal of this trend, which surprised everyone who expected consistency in tax policy. The explanation may be that the government were constrained by promises not to raise the rates of IT or VAT. And as Paul Johnson has pointed out, a rise in corporation tax is politically attractive because it is not obvious who bears the burden of the tax. What the vagaries of the CT rates do illustrate is that tax competition is only one factor in determining tax policy.

(Independent Enquiry into a Tonnage Tax, Lord Alexander, HM Treasury 1999.) Another example is the exemptions for major sports events; see s.48 FA 2014. These events would not be held in the UK in the absence of tax exemption.

[9] *https://www.gov.uk/government/publications/spring-budget-2017-documents*
This was the latest in a line of similar statements, traced in the 2016/17 edition of this work para 1.2.2, but I omit that here as it has little contemporary significance.
Reductions in UK corporation tax rates from 2012 may have been partly motivated by anticipation of Scottish tax competition; but if so, this was tactfully not mentioned.

[10] If one looks deeper, a different (and more complex) picture emerges, having regard to other major changes to corporate taxation:

(1) Reduced capital allowances (subsequently increased); see Pomerleau, "What We Can Learn from the UK's Corporate Tax Cuts" (2017) *https://taxfoundation.org/can-learn-uks-corporate-tax-cuts/*

(2) Increases in taxation of dividends in 2016, and again in 2023 (though dividend tax is less relevant to tax competition, as it does not apply to non-residents).

1.3.1 *Tax competition within UK*

Devolution raises the issue of tax competition within the UK.

The possibility was once mooted that Scotland may compete in the corporate field, by a lower corporation tax rate than England:

> a lower headline rate of corporation tax could encourage greater investment by Scottish and UK firms in both physical and human capital and in research and development within Scotland.
>
> At the same time, it could make the country more attractive as a location for multi-national investment. It could also act as an important signal to global companies and investors as to Scotland's ambition to be a location for competitive business.[11]

Similar issues apply to taxation of individuals.[12] Competition in the foreign domicile field is therefore only one aspect of a wider topic.

1.3.2 *Attitudes to tax competition*

Most sober commentators accept that tax competition is an important consideration in framing UK taxation. The UK could not act alone, as if

[11] "Devolution of tax powers to the Scottish Parliament - Commons Library Standard Note" (2012, 2013)
The consultation paper does not consider the possibility that England might match the Scottish lower rate and does not address the question of what constitutes a Scottish company for the purpose of the lower rate. The most recent version of this paper is "Devolution of tax powers to the Scottish Parliament - recent developments" (2016)
https://commonslibrary.parliament.uk/research-briefings/sn07077/
Likewise in Northern Ireland: The Corporation Tax (Northern Ireland) Act 2015; House of Commons Briefing paper No 7078, "Corporation tax in Northern Ireland" (2017)
http://researchbriefings.parliament.uk/ResearchBriefing/Summary/SN07078#fullreport
HMRC, "Draft guidance on the NI CT regime"
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/677832/NI_CTregime-draft_guidance.pdf
Wales would also like to join in:

> "If Northern Ireland is allowed to cut corporation tax, it would be outrageous if Welsh politicians did not have the option of doing the same."

Gerald Holtham, chair of the Holtham Commission for Wales (Cited in the Scottish consultation paper).
So in the future there might be no shortage of corporation tax competition within the UK.

[12] See 43.3.4 (IT competition within UK).

there were no such thing as international tax competition.[13]

Tax competition offers advantages to countries which compete successfully and disadvantages to those who do not. In some areas government have accepted the challenge of competition, and sometimes with enthusiasm:

> The [investment manager] exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers.[14]

Those opposed to the consequences of this line of argument deride it as:
(1) a "race to the bottom"[15]; and
(2) "harmful" tax competition

It is correct that if tax competition were the only policy consideration, it should logically drive tax rates on the mobile sources of income of non-residents down to zero; and in some cases that has been the result. Of course tax competition is not the only consideration in forming tax policy.

The expression "harmful tax competition" conceals awkward questions about harmful to whom? "Harm" is not an obvious or self-defining concept. The focus is often on harm to the G7 countries.[16]

[13] However at the extreme even this is denied; eg "Tackle Tax Avoidance" a campaign of Progress (which describes itself as a New Labour pressure group):

> "There is real fear at the heart of government that if it gets tough on business, businesses will flee the UK. But as the chief executive of Google, Eric Schmidt, himself admitted in an interview: 'Google will continue to invest in the UK no matter what you guys do because the UK is just too important for us.'

[14] SP 1/01; see 72.1 (Investment manager exemptions). The point is restated in HMRC "Expanding the Investment Transactions List for the Investment Management Exemption and other fund tax regimes" section 1 (2022) *https://www.gov.uk/government/consultations/expanding-the-investment-transactions-list-for-the-investment-management-exemption-and-other-fund-tax-regimes*

[15] This metaphor goes back at least to OECD *Harmful Competition* (1998) *https://www.oecd.org/ctp/harmful/1904176.pdf*
The problem is not unique to tax: international regulatory competition may also lead to a "race to the bottom"; but perhaps in areas outside tax it is easier to reach international agreements imposing minimum standards.

[16] See Littlewood, "Tax Competition: Harmful to Whom?" in Asif Qureshi and Xuan Gao, eds, Critical Concepts in Law: International Economic Law, Routledge, London (2010) volume VI, 162-234; reprinted from (2004) 26 Michigan Journal of International Law 411-487
https://repository.law.umich.edu/cgi/viewcontent.cgi?article=1227&context=mjil

Unfortunately, it is usually hard and sometimes impossible to predict the economic effects of any reform, even approximately; and predictions reflect the views and hopes of the partial pundits who make them.[17] Ascertaining the effect of reforms after they are made is scarcely less difficult. As a significant number of non-doms[18] work in senior roles in banking or finance,[19] one might infer that non-dom reliefs have until now contributed to the UK's success in these industries, but it is difficult to prove or disprove.

1.3.3 *Tax competition: International law*

International tax competition against other countries is subject to certain constraints of international law and politics. International fiscal co-operation in this area at present operates only to a limited extent. It made some progress in a (non-binding) EU code of conduct on business taxation,[20] but that is now defunct as far as the UK is concerned.

State Aid rules also impose restrictions on UK's freedom to tax and untax.

Tax competition extends beyond the EU, and those hoping for a body to curb international tax competition tend to look to OECD.[21] At present this is focussed on corporate rather than personal taxation. There seems little prospect of that changing.

Avi-Yonah "Globalization, Tax Competition, and the Fiscal Crisis of the Welfare State" [2000] Harvard Law Review p.1573.

[17] For instance, HMRC estimate that a reduction in the rate of Corporation Tax in Scotland to 12.5% would cost £2.6bn, but the Scottish Parliament say the impact would be positive: "Corporation Tax: Discussion Paper Options for Reform" (2011) p.43, *https://webarchive.nrscotland.gov.uk/3000/https://www.gov.scot/Resource/Doc/919/0120786.pdf*

[18] I use the term "non-dom" here to mean those who benefit from non-dom reliefs; see 4.2.1 ("Non-doms").

[19] A CAGE Warwick Policy Briefing, "The UK's 'non-doms': Who are they, what do they do, and where do they live?" (2022) records that around 22% of bankers in the top 1% (income above £125,000) are non-doms. *https://warwick.ac.uk/fac/soc/economics/research/centres/cage/manage/publications/bn36.2022.pdf*

[20] *https://taxation-customs.ec.europa.eu/harmful-tax-competition_en*

[21] Eg Jeffrey Sachs "Stop this race to the bottom on corporate tax" Financial Times, March 28 2011.

1.4 Mobility tests

1.4.1 *Domicile test*

The domicile concept is not ideally framed to identify the mobile (or "footloose") individuals, whose UK links are sufficiently less that a lighter IT/CGT regime is appropriate on fairness or tax competition arguments.

(1) The adhesive quality of a domicile of origin, and the restrictive rules for the acquisition of a domicile of choice, sometimes allow fortunate individuals to enjoy foreign domicile tax treatment, despite close UK links and only tenuous, historical and fortuitous links to their domicile of origin.

(2) The test depends on intention, which is expensive to prove and allows the possibility of mistaken or false claims.[22]

To the extent that those points apply, non-dom reliefs fail on both economic and fairness criteria.

In considering these objections to domicile, however, one should bear in mind that there are no perfect criteria of what we are seeking to ascertain, which is "footlooseness", or "UK links". The question is not whether domicile always produces the right answer, but whether one can do significantly better with other concepts or refinements.

1.4.2 *Residence tests*

Various long term residence concepts are sometimes used:

(1) Deemed domicile: 15 years residence
(2) Remittance basis claim charge: 7 and 12 years residence
(3) Temporary non-residence: 4 years residence and 5 years absence
(4) Arriver/leaver rules for residence: 3 years non-residence
(5) New residence rules: 10 years non-residence and up to:
  (i) 4 years residence (FIG, proposed)
  (ii) 3 years residence (OWR, proposed)
  (iii) 10 years residence (IHT, proposed)

These are ways to distinguish between UK residents with stronger or weaker UK links.

Citizenship/nationality is not much used in tax, and is unsuitable as a sole test of taxability,[23] though it might be used to supplement other tests.

[22] See 4.24.1 (Change of HMRC practice).

[23] See App 15.5 (When citizenship matters for UK tax).

Until 2025, these residence-based concepts were used to modify or supplement a domicile test rather than to wholly replace it.

Budget 2024 proposes to abandon domicile as a test and replace it with a new residence-based test. To those who have lobbied against domicile, one might say: be careful what to wish for! To the extent that UK domiciled individuals who have worked abroad would return to their home in any event, the mobile residents relief fails at least on economic criteria. Just as there are non-doms, or alleged non-doms, who did not "deserve" the relief, there will be "undeserving"new residents who do not "deserve" FIG relief.

But again, the question is not whether this always produces the right answer, but whether one can do significantly better with other concepts or refinements.

1.5 Fairness and mobile-individual reliefs

The other consideration in the assessment of mobile individual taxation is fairness.

The starting point for any serious discussion of fairness in tax is terminology from economics:

Term	**Meaning**
Horizontal equity	Those relevantly equal should pay the same amount of tax
Vertical equity	Those relevantly different should pay different amounts of tax

It is considerations of vertical equity which have lead to the (more or less) accepted view that fair taxation should be progressive rather than regressive.

Economists have developed the concepts of horizontal/vertical equity with considerable sophistication[24] but their limitations are exposed when one tries to apply them in a real life context, such as an assessment of the fairness of a non-dom remittance basis or of the proposed new residence relief. The concepts are not so much a definition of fairness as an approach to identifying the issues. In deciding whether non-dom reliefs are fair, one needs to ask if UK domiciliaries are relevantly equal; in deciding whether

[24] For a starting point, see Kaplow, "Horizontal Equity: Measures in Search of a Principle" National Tax Journal 42, no. 2 (1989) p.139-55
https://www.nber.org/system/files/working_papers/w1679/w1679.pdf
Musgrave "Horizontal Equity Once More" National Tax Journal 43, no. 2 (1990) p.113-23
https://www.journals.uchicago.edu/doi/abs/10.1086/NTJ41788830?journalCode=ntj

new residents FIG relief is fair, one needs to ask if new residents are relevantly equal. In neither case is the answer self-evident.

1.6 Warwick/LSE paper

This section discusses two papers (together, "the Warwick Paper")

- Reforming the non-dom regime: revenue estimates
- Taxation and Migration by the Super-Rich[25]

As far as I know, this is the first attempt to assess the financial implications of abolishing UK non-dom reliefs[26] on anything other than an impressionistic or anecdotal basis.[27]

Key questions here are:

(1) The **"emigration response"**: how many would leave if non-dom reliefs were abolished
(2) The **"immigration response"**: how many would chose not to come

The Warwick Paper concluded, contrary to the generally- and long-accepted view, that the emigration and immigration responses would be small. If that were right, the tax competition argument for non-dom reliefs[28] is invalid. The Paper gives figures for the tax yield which would *increase* if the reliefs were abolished:

> After accounting for this limited migration response, including the loss of existing tax paid by non-doms who leave, the additional tax that would be received is £3.23 billion. The net additional revenue to government, after also accounting for the loss of the remittance basis

[25] *https://warwick.ac.uk/fac/soc/economics/research/centres/cage/manage/publications/bn38.2022.pdf*
https://warwick.ac.uk/fac/soc/economics/research/workingpapers/2022/twerp_1427_-_advani.pdf
Both by Arun Advani, David Burgherr and Andy Summers, two economists and a lawyer, and published Sep 2022. The two papers need to be read together.

[26] I use the expression "non-dom reliefs" to mean the remittance basis for IT/CGT and protected-trust reliefs. The Warwick Paper does not consider IHT.

[27] For international studies in this area, see: Kleven et al., "Taxation and Migration: Evidence and Policy Implications" NBER Working Paper No. 25740 (April 2019); Young et al., "Millionaire Migration and Taxation of the Elite: Evidence from Administrative Data" American Sociological Review Vol 81, Issue 3, (2016); Kleven et al., "Migration and Wage Effects of Taxing Top Earners: Evidence from the Foreigners' Tax Scheme in Denmark" The Quarterly Journal of Economics (2014) p.333.

[28] 1.2 (Tax competition).

> charge receipts, is £3.16 billion. Based on the upper bound for the expected migration effects, we can rule out increases in receipts of below £2.4 billion.
>
> These findings allow us to rule out the concern – previously raised by Labour and Conservative politicians alike – that abolishing the non-dom regime would 'cost Britain money'. For the reform not to raise any revenue, the migration response would have to be more than 15 times larger than the emigration response that we observe following the 2017 reforms. There remains uncertainty over the precise extent of any immigration response and the wider economic impacts associated with abolishing or restricting the non-dom regime, but these would need to be very large to outweigh the revenue gains under even our upper bound (for migration) estimate. Objections to restriction or removal of the remittance basis cannot therefore be based on their fiscal effects.

The methodology of the Warwick Paper is as follows:

(1) It estimates the foreign income/gains of non-doms by reference to comparable UK domiciled taxpayers. The economic analysis here is as sophisticated as one would expect, and the author (not being an economist) could not critique it, except to say that the precision of the headline figures of £3.23/£2.4 billion (suggesting tax yields could be reliably measured to within £10m/£100m) seems unjustified.

(2) The paper estimates the emigration response to the abolition of all non-dom reliefs by assuming it would be the same as the emigration response as two groups:
   (a) those who became deemed UK domiciled (for IT/CGT) under the 15 year rule
   (b) formerly domiciled residents

   It finds those response rates in 2018 to have been small.[29]

(3) The paper assumes that:
   (a) The immigration response would be small (based on its conclusion that the emigration response would be small)[30]

[29] Data from subsequent years was not available though the authors propose to consider subsequent years in due course.

[30] The Paper says: "Looking at the (small) variation in responsiveness by length of time in the UK is suggestive that any immigration response is also likely to be small, given the limited size of the emigration response even for very recent arrivals."

Clearly, if the Paper's comments on the emigration response are wrong, its assumption that there would be no immigration response is also wrong. But even if the emigration response was small, or tiny, it is a leap to say that the immigration

(b) Once deemed domiciled, non-doms in the UK would pay the same amount of tax as their UK domiciled comparables.[31]

(c) The headline figure of £3.2 billion is computed on the assumption that:

  (i) there would be no transitional reliefs[32]

  (ii) there would be no relief for short-term residents to replace the current remittance basis[33]

There are reasons to doubt the points at (3).[34] But the biggest weakness in the analysis, which seems to me to render its conclusions unreliable, is at point (2). The Paper cites and takes at face value the Chancellor's statement that the 2017 changes "abolished permanent non-dom status".[35] But that was (at best) a half truth.[36]

(1) For those who became deemed domiciled under the 15-year rule, the 2017 reforms did not involve the abolition of non-dom reliefs. In assessing the emigration response of this class of non-doms one must take into account:

response would be the same. In the absence of data, we are in the field of intuition, or guesswork, but a decision to come is not the same as a decision to remain.

[31] Those coming to the UK, and those planning to leave, have tax planning opportunities which are not available to those here long term See 13.1 (UK arrival or departure: Tax Checklist). The most obvious include realising income/gains before arriving, or deferring until departure; and rebasing gains before arriving; see 13.2 (Individual coming to UK; not TNR). If non-dom reliefs were abolished, this would become more important than it is now, because non-doms currently expect to qualify for the remittance basis, and so (generally) do not need to take any further tax planning steps.

[32] The Paper does not note that extensions to the territorial scope of UK tax have normally had transitional relief; see 56.16.1 (Rebasing reliefs).

[33] In fact current Labour policy is that:

> "We will ... introduce a modern scheme for people who are genuinely living in the UK for short periods."

James Murray MP, Shadow Financial Secretary to the Treasury
https://hansard.parliament.uk/Commons/2023-01-31/debates/7A361B65-9960-49F1-BE34-EA2A0B5FDD4F/Non-DomicileTaxStatus

The authors estimate that if a remittance basis was allowed for up to four years of UK residence, the tax saving is cut by half, because many non-doms who claim the remittance basis do not stay in the UK for more extended periods.

[34] See above footnotes.

[35] Warwick Paper p.12. It is at one point acknowledged that non-dom reliefs were not "entirely abolished".

[36] See 90.2 (Protected trusts: Policy).

(a) protected-trust relief[37]
(b) cleansing relief which (if it had any purpose) was specifically designed to mitigate the cost of the changes for this class of taxpayer

(2) For those who became deemed domiciled as formerly domiciled residents, the emigration response is more relevant, as this class of non-doms did not qualify for those reliefs. However this class of individuals:
(a) is small, and
(b) by definition, has UK connections that other non-doms lack[38]

In short, the Warwick Paper does not assess the emigration response to a future reform by reference to the actual response to the actual 2017 reform, but by reference to the actual response to an imaginary reform which did not happen. Had the 2017 changes actually "abolished permanent non-dom status" (more analytically, abolished non-dom reliefs for deemed domiciliaries under the 15-year rule), the emigration response may have been different.

1.6.1 *Are mobile reliefs fair*

Even if it is accepted that it is fair to tax foreign domiciliaries less than UK domiciliaries, the question of what constitutes a fair reduction is a distinct and more difficult issue.

The 2008/2017 reforms accepted the principle of a distinction (which is why they did not go far enough for some commentators) but reduced the extent of the tax reduction by making the remittance basis less attractive. The effective rate of tax under the remittance basis (broadly) declines with income and it can be described as regressive taxation. If one accepts that taxation ought in principle to be progressive, which has long been a broad feature of UK taxation, then there is a sound argument that the remittance basis is unfair.

What effect did the 2008/2017 reforms have in this area? So far as they

[37] The Warwick Paper paid little attention to protected-trust relief other than to disparage it as a "major loophole"; this tabloid expression is to be deprecated in serious policy discussion; see App. 1.9 (Loophole/tax break).

[38] Just how significant those UK connections are will vary from case to case, and anyone in this class must also have substantial foreign connections in order to justify the claim to have acquired a foreign domicile of choice, but on average they will be more UK linked than other non-doms.

decreased the attractiveness of the remittance basis they have decreased the unfairness.

So far as they have introduced the remittance basis claim charge, the reforms have targeted the benefit of the remittance basis at a small number of ultra-wealthy individuals. That may make sense under the tax competition argument, but from a fairness point of view it is difficult to justify.

FIG is a much more generous relief, though for a relatively short term. Is it fair? Discuss.

1.7 Non-dom tax reform history

The chequered history reflects the difficulty, or impossibility, of reconciling incompatible policy considerations.[39]

1.7.1 *1974-2002*

The 1974 Finance Bill included a provision (clause 18) that an individual ordinarily resident in the UK for 5 out of 6 years should be deemed UK domiciled for IT and CGT purposes. By the time the clause came to be debated, the Labour (Wilson) administration proposed to amend it so that individuals resident for 9 years out of 10 years were deemed UK domiciled.[40] That would have been similar to the 2017 reforms, but without protected-trust relief. But even after this concession, the clause did not survive to the Finance Act.[41]

The 1988 Consultative Document (Residence in the UK) made radical proposals. The remittance basis would be abolished. Those resident here for less than seven out of 14 years (and, perhaps, also not UK domiciled) would qualify for a new "intermediate basis" of taxation. This would require disclosure of worldwide income in order to tax it at an effective rate of 2% or less. This proposal was abandoned.

[39] See too 17.2 (History of remittance basis).

[40] Hansard, Finance Bill debate 9 May 1974.

[41] For an account of the lobbying behind this, see Barnett, *Inside The Treasury* (1982) p.28–9. For the Parliamentary debate, see HC Deb 13 June 1974 vol 874 cc1842-948 *https://api.parliament.uk/historic-hansard/commons/1974/jun/13/cases-i-and-ii-of-schedule-e*
It is perhaps relevant to the outcome that the Labour administration was a minority government from 4 March 1974 until the election on 10 October 1974, after which it had a majority of 3 seats.

1.7.2 *2003 - 2008*

In 2002 a newspaper campaign pressed the Blair administration into action, or at least into the appearance of action. The Budget of April 2003 delivered a "Background Paper".[42] This was a facile document[43] but it may be unfair to criticise its (unnamed) authors. Their instructions may have been to be uncontroversial; by saying nothing, there was nothing in the document to which anyone could object.

Nothing then happened from 2003 to 2008. It is clear that the 2003 review of foreign domicile tax did not follow the normal course of consultation, decision and implementation. In the absence of a frank explanation of what went on, it is tempting to speculate. The likely explanation is that the Blair administration wanted to do nothing, but prevaricated to avoid an announcement which would have lead to a furore from those in favour of reform. Blair resigned in 2007. A change of power led to an unannounced U-turn from that unannounced policy.[44]

1.8 Assessment of reform: Metrics

It is a common feature of HMRC papers to ignore point [2], and to claim the mantles of fairness and competitiveness without acknowledging a conflict between them. Thus the HMRC policy paper "Domicile: Income Tax and CGT":

> The government wants to reform the tax treatment of non-doms so that the UK can continue to benefit from the presence of talented foreigners

[42] "Reviewing the residence and domicile rules as they affect the taxation of individuals" *http://webarchive.nationalarchives.gov.uk/20091222074811/http://www.hmrc.gov.uk/budget2003/residence_domicile.pdf*

[43] It contained an outline of the law and one paragraph summaries of the law of 29 other countries (of insufficient detail to be of any use and generally said to be misleading). The paper did not consider any proposals or their possible impact. It (consciously?) ignored every earlier discussion of reform: the Royal Commissions of 1920 and 1955, the 1936 Codification Committee, the 1974 Finance Bill, the 1987 Law Commission Report and the 1988 Consultation Paper.
For an account of the decline in quality of government white and green papers, see Forster, *British Government in Crisis* (2005), p.134.

[44] Earlier editions of this work contain a more detailed history of the period 2003-2007, see the 9th edition of this work para 1.3.2, but details seem less important with the passage of time.

> while also addressing unfair tax outcomes.[45]

One might describe this as the Janet and John approach to tax reform, but the phenomenon is currently known as "cakeism" referencing Boris Johnson's witticism on cake: "pro having it and pro eating it".

The House of Commons Treasury Committee provide an intelligent approach to assessment of tax reform, identifying 8 criteria:

> The Committee recommends that tax policy should be measured by reference to the following principles. Tax policy should:
> 1. **be fair**. We accept that not all commentators will agree on the detail of what constitutes a fair tax, but a tax system which is considered to be fundamentally unfair will ultimately fail to command consent.
> 2. **support growth and encourage competition**.
> 3. **provide certainty**. In virtually all circumstances the application of the tax rules should be certain. It should not normally be necessary for anyone to resort to the courts in order to resolve how the rules operate in relation to his or her tax affairs. **Certainty about tax requires**
> i. **legal clarity**: Tax legislation should be based on statute and subject to proper democratic scrutiny by parliament.
> ii. **Simplicity**: The tax rules should aim to be simple, understandable and clear in their objectives.
> iii. **Targeting**: It should be clear to taxpayers whether or not they are liable for particular types of charges to tax. When anti-avoidance legislation is passed, due regard should be had to maintaining the simplicity and certainty of the tax system.
> 4. **provide stability**. Changes to the underlying rules should be kept to a minimum and policy shocks should both be avoided. There should be a justifiable economic and/or social basis for any change to the tax rules and this justification should be made public and the underlying policy made clear.
> 5. The Committee also considers that it is important that a person's tax liability should be easy to calculate and straightforward and cheap to collect. To this end, tax policy should be **practicable**.
> 6. The tax system as a whole must be **coherent**. New provisions should complement the existing tax system, not conflict with it.

The Committee acknowledge that these objects are incompatible:

> 85. No tax system is, or can be, static. There will always be trade-offs

[45] *https://www.gov.uk/government/publications/domicile-income-tax-and-capital-gains-tax/domicile-income-tax-and-capital-gains-tax* (2016)

> and difficult decisions; a desire for fairness may increase complexity; a desire for certainty may increase administrative complexity. Nonetheless, the principles we set out, which reflect a surprising degree of convergence within our evidence, give a direction of travel which, in the long run, can both secure consent and improve the performance of the economy.[46]

1.9 2008 reform: Assessment

The 2008 reforms increased the tax burden on foreign domiciliaries in four main ways:

(1) Remittance basis claim charge for long-term residents
(2) Withdrawal of personal allowances for remittance basis claimants
(3) ITA remittance basis, stricter than the pre-2008 remittance basis
(4) Extension of anti-avoidance provisions to remittance basis taxpayers (in particular, the s.720, s.3 and s.87 remittance bases)

1.9.1 *Clear and easy to operate*

It will be evident to anyone who skims this work that the 2008 rules were a failure by this criteria. The rules are unclear, often difficult and sometimes impossible to operate. In these respects they are unquestionably worse than the pre-2008 rules.

1.9.2 *Benefit to UK economy*

On one side of the account is the gain of more tax paid by foreign domiciliaries. On the other is:

(1) Tax and investment lost from individuals who leave the UK, and those who (because of the reforms) decide not to come.
(2) The loss to the economy that the 2008 rules generally discourage or prevent investment in the UK and use of UK service providers.

The 2008 reforms did not in the event greatly reduce the non-dom population, though they may have reduced it slightly.

1.9.3 *Fairness of 2008 reforms*

The FA 2008 contained a package of reforms and any short assessment of its merits must be limited to its main features.

[46] Treasury "Principles of tax policy" (2011) *http://www.publications.parliament.uk/pa/cm201011/cmselect/cmtreasy/753/753.pdf*

The remittance basis claim charge distinguishes between short term and long-term residents, and taxes the latter more heavily, the connecting factor here being the long term residence tests. One cannot categorise those distinctions as unfair.

On the other hand, among long-term foreign domiciliaries, the charge distinguishes between the extremely wealthy (to whom the remittance basis is still attractive) and others (to whom it is not). This offends against the principle of vertical equity, that people with higher incomes should pay more tax. That is not fair, it represents a decision to prioritise the economic advantage of tax competition by targeting the remittance basis to the wealthiest. The tax competition consideration conflicts with fairness.

The withdrawal of personal allowances as a quid pro quo of a remittance basis is not unfair (though it comes at a cost in terms of complexity).

Of perhaps greater importance is the other aspects of a package of reforms which affect all foreign domiciliaries, not just long-term residents.

The stricter ITA remittance basis is not unfair, except for the wilder reaches of the relevant person definition[47] and the supposed rule (probably ignored in practice) that the taxable amount remitted may exceed the value of the asset remitted.[48]

The extended 2008 anti-avoidance rules can work unfairly but complete fairness is impossible to achieve in this area.

All in all, the 2008 reform may be given some limited marks for fairness. This is not to say that the pre-2008 rules should be regarded as unfair: the concept of fairness (especially if viewed with some attention to practicality) is so vague that a very wide range of tax policies may all be categorised as "fair".

1.9.4 *FA 2008 enactment process*

The manner in which the FA 2008 was introduced deserves to be recorded.

In January 2008, 26 pages of draft clauses were published whose unwritten message to wealthy non-residents was broadly: *do not come to the UK if possible; if you must, do not invest any money here.* The clauses were officially described as work in progress, but this was unfit for publication.

[47] See 18.8.1 (Company person: Critique); 18.12 (Relevant person rules: Critique).

[48] See 18.35.2 (Remittance of derived property).

HMRC[49] presumably agreed. On 27 March the Finance Bill was published, containing 54 pages of legislation. The FB clauses bore almost no resemblance to the January draft. One consequence is that the professional time and clients' money spent considering the old clauses was almost entirely wasted. That certainly cost many £millions. Another consequence was that the profession had nine frantic days to scramble around before the end of the tax year. Because of the absence of sensible transitional reliefs, large amounts of tax depended on decisions and actions taken in those days. Sensible consideration of difficult and important matters was rendered impossible.

On the date of publication the Treasury announced that the Finance Bill was incomplete and amendments covering almost every aspect of the rules[50] were made in the course of progress of the Finance Bill.[51] Thirty pages of amendments duly emerged in mid June – far too late in the Finance Bill timetable to give them any serious consideration. Forty eight more Report Stage amendments were published on 26 June. The report stage and third reading (after which no further amendments could be made) were held on 1 and 2 July 2008. Avery Jones notes that "Report Stage amendments are usually a disaster."[52]

The former editor of *Taxation* is blunt:

> The standard of strategic policy making at the Treasury has been unacceptably poor in recent years, but this must surely have been one of its lowest ebbs ever.[53]

[49] In this work I use the expression HMRC loosely, to include those in HM Treasury and in Government who share the responsibility for tax reform; it is not easy, or necessary, to identify where tax reform decisions are actually made.

[50] Explanatory notes to sch7, para 36 (mixed funds); para 47 (s.87 charge); para 52 (non-resident trusts); para 74 (sch 4C); para 91 (ToA provisions; para 106 (works of art); para 107 (employment related securities).

[51] In the 2008/09 edition I said:
"This is a new development in tax legislation. While from time to time inadequately drafted clauses have always been found in Finance Bills, this is as far as I am aware the first time that the Government has had to announce that fact at the time of publication of the Finance Bill."
There are similar examples in the FA 2009 but it has not become a trend.

[52] See "Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis", Avery Jones in *Studies in the History of Tax Law* (Vol 1 2004) *https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf*

[53] *Taxation* 12 June 2008 Vol 161 No. 4160 p.627 (Malcolm Gunn).

CIOT say:

> when corners are cut, especially under time pressures, there can be serious deficiencies.

and their example to prove the point is the 2008 non-dom reforms.[54]

The House of Lords Economic Affairs Committee comment in measured language:

> Our private sector witnesses would not have used words like "a real shambles" if they did not feel strongly about this. ...
> 176. We recommend that, if they have not already done so, HMT and HMRC should carry out a full review of the reasons why there were so many difficulties in the development of this policy initiative. They should ensure that the lessons are learned so that these problems do not emerge in other initiatives.

No review was carried out.

> 177. We also recommend that if another policy initiative gets to the point where the legislation cannot be finalised for inclusion in the Finance Bill, that initiative should not be included in the Bill, or, if feasible, the part which is not finalised should not be included. We cannot support the approach of the Finance Bill's still being subject to much amendment at the time it is published, particularly when the proposals come into effect from the beginning of the tax year, as in this case. [55]

Does it now matter? Readers may think it pointless to cry "foul" in a game which had no referee, whose result was long ago declared, and which (from 2025) is no longer played. But I think the story deserves to be recorded as what Lord Howe described as "an object lesson in how not to legislate."[56]

1.10 2017 domicile reform: Assessment

The 2017 reforms[57] contained another package of reforms and any short assessment of its merits must be limited to its main features. These are:

[54] The Making of Tax Law, para 3.2, CIOT, June 2010.

[55] Select Committee on Economic Affairs, 2nd Report of Session 2007–08, The Finance Bill 2008
http://www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf

[56] Making Taxes Simpler - The final report of a Working Party chaired by Lord Howe (2008) *https://conservativehome.blogs.com/torydiary/files/making_taxes_simpler.pdf*

[57] I use the term "2017 reforms" to refer to the reforms which took effect in 2017 and the supplemental offshore trust reforms which were announced in 2017 and implemented in 2018.

(1) 15-year deemed domicile rule for IT/CGT
(2) Formerly-domiciled resident rules
(3) Protected-trust regime
(4) IHT residential-property regime
(5) Non-resident disregard for s.87 gains

1.10.1 *Political background*

The inspiration for the changes was political. The decision did not much depend on an assessment of the policy arguments analysed in this chapter. The decision should be seen in the context of the 2015 summer budget's adoption of a number of Labour policies: the increased national living wage[58] and the apprenticeship levy.[59] The Cameron administration sought to occupy ground left vacant, or perceived vacant, by the Corbyn opposition.

The Government showed no interest in debate on the policy issues. Since the policy was taken from the Labour manifesto,[60] and continued to be supported by Labour, there was no opposition to it.

This is not to say that the 2017 reforms are not defensible, on the basis of fairness or otherwise, just that little reasoned debate took place in public, and probably little debate took place in private. The IFS, as usual, shone an intelligent beam into the fog, but I am not sure that anyone took any notice.[61]

Contrast the 2008 reforms where there was at least the appearance of consultation and debate (though not on the legislation itself).

Perhaps it would be naive to expect otherwise.

1.10.2 *Clear and easy to operate*

By this criterion the 2017 reforms failed hopelessly.

[58] Labour Manifesto 2015 provided: "We will [raise] the National Minimum Wage to more than £8 an hour by October 2019". *https://manifesto.deryn.co.uk/wp-content/uploads/2021/04/BritainCanBeBetter-TheLabourPartyManifesto2015.pdf*

[59] Labour Manifesto 2015 provided: "[Apprenticeships] will be co-funded ... by employers..." *https://www.slideshare.net/miquimel/2015-04-labourgeneralelectionmanifesto2015britaincanbebetterlabour*

[60] See 1.5.2 (Are non-dom reliefs fair).

[61] IFS, "Unknown quantities: Labour's 'non-dom' proposal" (2015) *http://www.ifs.org.uk/publications/7703*

1.10.3 *Fairness*

A 15-year deemed domicile rule for IT/CGT seems fair. The protected-trust regime leaves us short of equality between long term foreign domiciled individuals and UK domiciliaries, but that can itself be defended as fair.

Formerly-domiciled resident rules can work harshly, but all workable rules must have hard cases at the borders and the number of truly unfair cases will be very small.

The difficulty in assessing the fairness of the IHT residential-property regime is that IHT (unlike its predecessor, CTT) is a fundamentally unfair and illogical tax. I would have thought it reasonably clear that any advantage does not justify the complexity and oddity of the results from the territorial limits of the tax which now apply.

The non-resident disregard operates unfairly, and significantly extends the unfairness of a code which was already unfair.

1.10.4 *Benefit to UK economy*

Perhaps more importantly: Did the 2017 reforms benefit the UK economy? The consultation was prefaced with the statement that:

> The government wants to attract talented individuals to live in the UK who will help to contribute to the success of this country by investing here and creating jobs. The long-standing tax rules for individuals who are not domiciled in the UK are an important feature of our internationally competitive tax system, and the government remains committed to that aim.[62]

I wonder how far that was meant to be taken seriously.

Perhaps economic benefit was not a major consideration, or not a consideration at all, in the 2008 or the 2017 reforms. Does that now even matter? Discuss.

1.10.5 *2017 enactment process*

The 2017 revolution on the reform of offshore trust taxation - the term is not too strong - was introduced in breach of the Tax Consultation Framework, as the proposals first emerged in the HMRC summary of

[62] Consultation paper "Reforms to the taxation of non-domiciles" (2015) *https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles/reforms-to-the-taxation-of-non-domiciles*

responses to the original consultation paper. In fact there was little consultation on the principles at all, and only limited opportunity to consult on the drafting, since the draft published September 2017 differed substantially from the Finance Bill, which in turn received 32 amendments at committee stage. Parliamentary discussion in the Public Bill committee was perfunctory. In this respect the pattern of the 2008 reform was repeated. Perhaps one should not be surprised.

1.11 The promise of stability

There is a long tradition of instability in the UK tax system. In 1981:

> One of the most noticeable characteristics of the British tax system is that it is under continual change.[63]

In 1993:

> The major distinguishing characteristic of the British tax system is its instability. The British tax system changes faster, more frequently, and more radically than any other tax system I have observed.[64]

In 1999:

> The UK tax system is caught in a culture of never-ending change.[65]

The years 2008 - 2013 saw a series of broken promises of stability without any perceptible change of practice.[66] The promises of stability should be regarded as lip-service to the desideratum of stability. The practice, which lies deep in the culture of government, proved immune to such announcements. A true commitment to stability requires HMRC to refrain from making reforms which they would like to make, and when actual proposals come to the table, the interest of reform overcomes the interest of stability. It is easier for politicians to talk about stability than to achieve it. Perhaps HMRC recognised this, as the 2014, 2015 budgets contained no further promises of stability. The 2017 budget had a vague reference to "a more stable and certain tax environment", but I doubt if anyone was

[63] James & Nobes, *Economics of Taxation* (1st ed., 1981), p.135.

[64] Steinmo, *Taxation and Democracy* (1993), p.44.

[65] ICAEW TAXGUIDE 4/99 (Towards A Better Tax System) *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/pre-2017/taxguide-0499.ashx*

[66] I set them out the 2016/17 edition of this work para 1.10 (The promise of stability) but omit that here as it has diminishing contemporary significance.

expected to take that seriously. Subsequent budgets have made no reference to stability in taxation; and everything changes again in 2025.

1.12 State of UK tax reform

In 2010 CIOT expressed itself strongly:

> The way tax law is developed and effected in the UK is deeply flawed.[67]

Two publications shed light on what went wrong with tax legislation in recent years. Demos say:

> The centralisation of [tax policy-making power] is a particular problem because of the lack of institutional accountability of the Treasury on taxation policy and the lack of accountability of chancellors themselves in matters of taxation. ... The concept of checks and balances in tax policy is nonexistent.
>
> ... the current relationship between the Treasury and HMRC was 'very dysfunctional', had 'almost gone as wrong as it could have gone'...
>
> At the moment, pursuing a career only in tax policy is not valued within the Treasury hierarchy. Officials pass through the tax teams rather than making tax policy a career choice. ... High turnover results in a lack of experience in the tax section and little institutional memory...
>
> ... There are traditional areas that are ring-fenced as not for consultation, including tax rates and anti-avoidance measures. ...
>
> ... 'at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.'
>
> At present, policies are frequently changed without understanding the impact the policy has initially had in practice.[68]

Re-inforcing the tendency not to consult is an HMRC culture which is hostile to the tax profession . The Director of the HMRC Tax Avoidance Group 2004-2009 records:

> ... I was never happier than when a new tax avoidance initiative was greeted with howls of protest from the tax avoidance quarter.[69]

In short, preventing avoidance has been a priority that outweighs other considerations, such as certainty, workability and the Rule of Law; or

[67] Letter from CIOT to George Osborne, 19 May 2010

[68] Ussher and Walford, *National Treasure* (Demos, 2011) *https://demos.co.uk/wp-content/uploads/2011/03/National_treasure_-_web.pdf* Demos claims to be Britain's leading cross-party think-tank.

[69] Tailby, "Some Reflections on Tax Avoidance" [2011] PCB 41.

rather obliterates all consideration; and listening to the tax avoidance quarter – which includes the professional bodies and almost any practitioner who said what HMRC did not want to hear – has been ruled out. The professional bodies are regarded by HMRC as a pressure group whose vaunted commitment to fairness, practicality and the Rule of Law is merely a cloak for self-interested whingeing of a featherbedded elite.[70]

That policy has ruled since the 1997 Blair administration, and its consequences can be seen in seeking to state the law, as this book seeks to do, or in seeking to understand the law, as you the reader will do now.

1.12.1 *Tax Consultation Framework*

In 2011 the coalition administration promised a fresh start with the Tax Consultation Framework. The 2015 Cameron administration also committed to this.[71] I am not aware that any subsequent administration has formally committed to it, though it has not been repudiated either.

The Tax Consultation Framework provides:

> 2. There are five stages to the development and implementation of tax policy:
> Stage 1 Setting out objectives and identifying options.
> Stage 2 Determining the best option and developing a framework for implementation including detailed policy design.
> Stage 3 Drafting legislation to effect the proposed change.
> Stage 4 Implementing and monitoring the change.
> Stage 5 Reviewing and evaluating the change.
> 3. Where possible, the Government will:
> - engage interested parties on changes to tax policy and legislation at each key stage of developing and implementing the policy;
> - make clear at what stage (or stages) the engagement is taking place so that its scope is clear;
> - carry out at least one formal, written, public consultation in areas of

[70] This may be seen in the context of a more general antagonism to the legal (and other) professions, and dismissal of their ethical pretensions. That is an ancient trope, but took renewed vigour under the Thatcher administration, and has lead to a transfer of regulatory power from the Bar and Law Society to regulation by non-lawyers.

[71] HM Treasury: "Tax policy consultation will continue and be strengthened. The government remains committed to consulting on policy as set out in 'The new approach to tax policy making' in 2010." (2016). *https://www.gov.uk/government/news/7-things-you-need-to-know-about-the-new-budget-timetable*

significant reform;

- set out, as the policy develops, its strategy for stakeholder engagement including planned formal consultation periods, informal discussions, working groups and workshops;
- consult, where it can, on the policy design, draft legislation and implementation of anti-avoidance and other revenue protection measures, provided this does not present additional risk to the Exchequer;
- minimise the occasions on which it consults only on a confidential basis. Where confidential consultation has been necessary the Government will be as transparent as possible about its outcome and consult openly if pursuing the policy change further; and
- provide feedback which sets out the Government's response to the views received and makes clear what changes, if any, have been made to the planned approach as a result of those views.

4. At each stage of consultation, the Government will set out clearly:

- the policy objectives and any relevant broader policy context;
- the scope of the consultation, in particular what is already decided and where there is still scope to influence the outcome;
- its current assessment of the impacts of the proposed change and seek to engage with interested parties on this analysis. A final assessment of impacts will be published once the final policy design has been confirmed...

5. Informal consultation will be as transparent as possible, consistent with the need to protect revenue. The best principles of formal consultation will be applied to informal consultation to ensure clarity of scope, impact, accessibility, and meaningful feedback. ... Informal consultation can run alongside formal consultation but will often be most appropriate at the earliest and latest stages of tax policy development to identify options and then to fine-tune the detailed legislation and implementation of change.

Exceptions

8. The Government will generally not consult on straightforward rates, allowances and threshold changes, or other minor measures; recognising, however, that even in these cases some level of consultation can often be informative. It may also adopt a different approach for revenue protection or anti-avoidance measures where following this Framework could present a risk to the Exchequer. In other circumstances where the Government decides not to consult during tax policy development it will explain the reasons for that decision.

9. There will be times when it will be necessary to deviate from this Framework. In these circumstances the Government will be as open as

> possible about the reasons for such deviations.[72]

Of course tax is not unique in this respect: similar considerations apply to all areas of law reform. The Data Retention and Investigatory Powers Act 2014 was enacted in two working days; and in holding it to be unlawful, the Divisional Court noted in moderate terms:

> legislation enacted in haste is more prone to error.[73]

And again:

> it is widely acknowledged that the [Immigration] Rules have become overly complex and unworkable. They have quadrupled in length in the last ten years. They have been comprehensively criticised for being poorly drafted, including by senior judges. Their structure is confusing and numbering inconsistent. Provisions overlap with identical or near identical wording. The drafting style, often including multiple cross-references, can be impenetrable. The frequency of change fuels complexity.[74]

1.12.2 *Compliance with Framework*

How far has tax reform since 2011 complied with the Framework? That is a broad question; it would need a series of volumes, there has been so much.

In brief, compliance with the Framework's tax reform timetable has been patchy. It is easier to announce good intentions than to abide by them. The culture of "ready, fire, aim" still prevails.

A few examples will illustrate the point.

The ATED regime was introduced in breach of the Framework. The House of Lords Economic Affairs Committee commented:

> ... the Government's response to SDLT avoidance might have been more appropriately designed had it consulted interested parties at the outset as its 'new approach to tax policy making' stipulates. We recommend that the Government adhere to that approach in designing future tax changes.[75]

[72] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/89261/tax-consultation-framework.pdf*

[73] *Davis (R, oao) v Secretary of State* [2015] EWHC 2092 (Admin) at [121].

[74] Law Com No 388, "Simplification of the Immigration Rules: Report" (2020) para 1.1.

[75] House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (March 2013) para 210

The 2016 dividend income reforms, a major change (also misdescribed as simplification[76]), were introduced in breach of the Framework. The House of Lords Economic Affairs Committee comment:

> We deeply regret the lack of consultation on the savings [Personal Savings Allowance] and dividend income proposals and repeat the recommendation in our Report on the draft Finance Bill 2014 that the Government should reassert its commitment to the 'new approach' to tax policy making and make sure that, in future, it adheres to it in full except in the most exceptional circumstances.[77]

The Law Society say:

> ... the new approach is (i) not always followed, and (ii) side-stepped by labelling new tax law as anti-avoidance when it is no such thing.
> A case in point is the FA 2014, which introduced changes to the way in which certain members of limited liability partnerships were taxed. When this proposal was first published, it was an anti-avoidance measure. Following initial consultation, the nature of the proposal changed markedly and became more widely applicable to professional partnerships. This was not anti-avoidance legislation but, nevertheless, there was no formal consultation of the kind envisaged by Tax Consultation Framework.[78]

The Tax Professionals Forum note some cases where the framework was followed, and then say:

> In contrast, however, in other cases, consultations have started:
> - part way through the process (such as that on the provisions relating to the transfer of assets abroad and gains made by offshore close companies),
> - without a clear articulation of the policy involved (for example, on IR35 and Controlling Persons), or
> - without any discussion of the policy (for example, the changes to SDLT on properties owned by non-residents through companies,

http://www.publications.parliament.uk/pa/ld201516/ldselect/ldeconaf/108/108.pdf

[78] The House of Lords Economic Affairs Committee was also critical: see the Committee report "The Draft Finance Bill 2014" (2014).

investment funds and others and the cap on income tax reliefs).[79]

The 2017 domicile reforms were announced in 2015, which should have allowed time for thinking and consultation. Two years is an appropriate time scale to introduce major reforms, and at the time it seemed a refreshing break from the pattern of 2008 to see reform enacted on that basis. But two caveats to this welcome development:

(1) A distant deadline allowed the more difficult and serious work to be put off, the matter was concluded in the usual frantic rush, and the end result is disappointing. Still, deferring some aspects of the offshore tax reforms to 2018, to allow consideration, is encouraging.

(2) The need for time was not accepted by Labour:

> ... why else would the Government have given a grace period for those non-doms affected to get an offshore trust if they do not have one already? ... why else would the Government have actively signposted the changes for non-doms, which has set hares running? It seems to me that those are things that the architect of the measures would do if they were of a mind to completely undermine the measures' effectiveness.[80]

On the other hand, the IHT residence nil-rate band, 10 pages of dense, foolish legislation, was slotted into F(no.2)A 2015, precluding debate and consideration, even though the rules only took effect from 2017/18! and even though there had to be a second installment of the legislation in FA 2016.

The last part of the Tax Consultation Framework requires post-implementation monitoring and evaluation. This is almost never done.[81] It is interesting to speculate what would happen if it were. Much would depend on the identity of those carrying out the review and, in controversial areas, on their instructions and on their politics.[82]

Does anyone think that the 2025 reforms will be stable?

[79] Tax Professionals Forum Second Independent Annual Report (2013).

[80] Peter Dowd (Labour Shadow Chief Secretary to the Treasury) Hansard, 19 Oct 2017 *https://hansard.parliament.uk/Commons/2017-10-19/debates/aea0b4b1-dc6c-4153-a24f-09fb6be7d155/FinanceBill(FourthSitting)*

[81] Even in the cases where the FA 2018 required post-implementation reviews, the results were "singularly unilluminating. Most of them merely contains words to the effect of 'this legislation is new and we haven't yet seen how it will work in practice'." See Hubbard, Taxation Magazine, 4 April 2019.

[82] See 121.16.5 (12 year limit: Critique).

1.12.3 *Alternatives to Framework*

There is one route and one route only to a good tax system: sound tax policy, devised by those with a sound understanding of the current tax system, carried out by those who have reflected seriously on the issues in the context of the tax system as a whole; a leisurely timetable of consultation and legislative drafting as envisaged in the Tax Consultation Framework and the 10 tax tenets of ICAEW.[83] That is a hard prescription, though CIOT and others continue to bang the drum, and IFS do useful work.[84]

It is tempting to look for easier solutions. Past attempts include the Tax Law Rewrite, which achieved little; and, perhaps, the GAAR.[85] Advocates of the GAAR claimed:

> Enacting an anti-abuse rule should make it possible, by eliminating the need for a battery of specific anti-avoidance sub-rules, to draft future tax rules more simply and clearly. Also, fewer schemes would be enacted and so there will be less call for specific remedial legislation...In time, once confidence is established in the effectiveness of the anti-abuse rule, it should be possible to initiate a programme to reduce and simplify the existing body of detailed anti-avoidance rules.[86]

I am not sure if anyone seriously believed that, but it has not happened, and it seems unlikely that it will. But it will take several decades to assess

2.12.2 GAAR

2.1 Tax avoidance: Introduction

Tax avoidance is as old as taxation itself;[1] but the topic has taken prominence in recent decades, with extensive attention from parliament and the media.[2]

[1] For examples from 1798 and 1920, see "Tax Avoidance in 1798" *https://www.kessler.co.uk/wp-content/uploads/2013/06/Tax-avoidance-criticism-in-1798.pdf* and "Vestey: Royal Commission debate" *https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey_Royal_Commission_debate.pdf*

[2] It is interesting to speculate why that has been the case. I think the reasons lie in politics and sociology rather than tax law or practice. The Public Accounts

The subject impinges on many aspects of this book, but it is best to consider it as a topic of its own. This chapter considers general aspects, and the following considers targeted anti-avoidance rules (TAARs).

2.2 Avoidance/mitigation, evasion

I first discuss the complicated, emotionally charged, and in practice constantly abused term "tax avoidance".

2.2.1 *Terminology*

It is helpful to begin with a fourfold categorisation:

(1) *Tax evasion*: Conduct which constitutes a criminal offence (fraud on HMRC or similar offences). This typically involves dishonest submission of an incorrect tax return. Dishonesty is essential to these offences.[3]

(2) *Honest misdeclaration*: The submission of an incorrect tax return without dishonesty. Those involved may be culpable (eg careless) but not dishonest.

(3) *Tax avoidance*: Arrangements that reduce tax liability in a manner contrary to the intention of parliament (I come later to consider this concept in more detail).

(4) *Tax mitigation*: Conduct which reduces tax liabilities without "tax avoidance" (not contrary to the intention of parliament).

The distinctions between these concepts (especially avoidance/evasion and avoidance/mitigation distinctions) are now commonplace. They may appear obvious. They are taught to every student. No sensible debate is possible without them. However, the concepts and their terminology have only emerged after a gradual process of development and even now the terminology is not always adopted. It is essential to bear this in mind on reading sources on this subject.[4]

Committee, and some effective pressure groups, have clearly contributed but given the pressure on the front page, why has their work received so enthusiastic a reception? The 2008 financial crisis and climate of austerity may be a factor.

[3] See 127.8 (Fraudulent tax offences). Although there are now offences which do not require dishonesty, see 123.10 (Offshore tax offences), I would not characterise these offences as evasion

[4] eg the 1920 Royal Commission on the Income Tax Cmd. 615 discussed evasion, honest misdeclaration and avoidance in a chapter headed "The Prevention of Evasion", in which the words "avoidance" and "evasion" were used quite indiscriminately, see para 625. It is an interesting question whether the absence of

2.2.2 *Avoidance/evasion distinction*

An avoidance/evasion distinction very similar to the present was recognised very early (and was surely self-evident at any time) but at first there was no terminology, or at least no commonly agreed terminology, to express it. In 1860 Turner LJ suggested evasion/contravention (where evasion stood for the *lawful* side of the divide).[5] In 1900 the distinction was noted as two meanings of the word "evade".[6] It is possible that the current use of the words avoidance/evasion in the modern sense originated in the USA where it was established by the 1920s.[7] But by 1936, at least, knowledgeable writers in the UK adopted the same terminology, and castigated those who did not:

> In referring to these devices, those who took part in the debates on the new [ToA] provisions in the House of Commons repeatedly used the word "evasion." Even the spokesmen of the Government at times allowed themselves this indulgence. The Financial Secretary to the Treasury (for example) described [s.18 FA 1936, transfer of assets] as a "Clause for the prevention of tax evasion", while the Attorney-

terminology hampered discussion of the issues or whether the lack of discussion or interest led to the absence of suitable terminology. I suggest the latter: in the 1920s, criminal prosecution for tax evasion was rare, and only in blatant cases. Thus the avoidance/evasion distinction was not relevant. Likewise, tax avoidance (in the modern sense) was still in its infancy, so the avoidance/mitigation distinction also had little relevance.

[5] *Fisher v Brierly* (1860) 1 de G F&J 643 at p.663. It is a pity that this use of *contravention* did not catch on because it is more transparent than *evasion*.

[6] *Bullivant v AG* [1901] AC 196 at p.207:
"The word 'evade' is ambiguous. ... there are two ways of construing the word 'evade': one is, that a person may go to a solicitor and ask him how to keep out of an Act of Parliament – how to do something which does not bring him within the scope of it. That is evading in one sense, but there is nothing illegal in it. The other is, when he goes to his solicitor and says, 'Tell me how to escape from the consequences of the Act of Parliament, although I am brought within it'. That is an act of quite a different character."

[7] It is found in the scholarly Sears, *Minimising Taxes* (1922), and can be traced to Oliver Wendell Holmes in *Bullen v Wisconsin* (1916) 240 US 625 at p.630. It is regarded as basic in Hartman, *Tax Avoidance* (1930) which cites two textbook definitions in similar terms. Perhaps the practice of tax avoidance began earlier in the USA; the first published work on the subject in England was Moore, *The Saving of Income Tax Surtax and Death Duties* (1935), the publication of which lead to the enactment of the ToA provisions.

> General, dealing with the same clause, spoke of "marginal cases in which there may be some element other than tax evasion". Private members, and on at least one occasion the Financial Secretary, spoke of "guilt" and "innocence" as though the House were discussing the suppression of crime.[8]
>
> There can be no question of any real confusion of thought, but the confusion of language is none the less to be deprecated. The new provisions have nothing to do with "evasion"; they are concerned solely with legal avoidance.[9]

The distinction is accepted internationally:

> 72. The terms "tax evasion" and "tax avoidance" have not always been used precisely or with a uniform meaning. Strictly speaking, tax evasion is considered to consist of wilful and conscious non-compliance with the laws of a taxing jurisdiction. Tax evasion is an action by which a taxpayer tries to escape legal obligations by fraudulent or other illegal means. The illegal conduct might involve simply failing to report income or fabricating deductions, or it may involve highly sophisticated tax planning that is premised on false or intentionally deceptive

[8] Official Reports, 15th June 1936, col. 676, 704, 692.

[9] Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies' sur-tax, children's settlements* (1936) p.1. Jacques Stein (1887–1973) was a significant figure in his day, see *http://www.encyclopedia.com/religion/encyclopedias-almanacs-transcripts-and-maps/stein-leonard*.

Similarly, the 1955 Royal Commission Cmd. 9474 para 1016:

> "It is usual to draw a distinction between tax avoidance and tax evasion. The latter denotes all those activities which are responsible for a person not paying the tax that the existing law charges upon his income. *Ex hypothesi* he is in the wrong, though his wrongdoing may range from the making of a deliberately fraudulent return to a mere failure to make his return or to pay his tax at the proper time. By tax avoidance, on the other hand, is understood some act by which a person so arranges his affairs that he is liable to pay less tax than he would have paid but for the arrangement. Thus the situation which he brings about is one in which he is legally in the right, except so far as some special rule may be introduced that puts him in the wrong."

Note that "evasion" is used here (unlike present usage) to describe dishonest criminal evasion and honest mis-declaration. Lord Templeman used this (by then old-fashioned) terminology in *IRC v Challenge Corporation* [1986] STC 548: "Tax evasion occurs when the commissioner is not informed of all the facts relevant to an assessment of tax. Innocent evasion may lead to a re-assessment. Fraudulent evasion may lead to a criminal prosecution as well as re-assessment." It does aid clarity if the term "evasion" is restricted to what Lord Templeman termed "fraudulent evasion".

> representations to the tax authorities. ...[10]
> 73. Tax avoidance, in contrast, involves the attempt to reduce the amount of taxes otherwise owed by employing legal means. However, the borderline between evasion and avoidance in specific cases may be difficult to define. For one thing, the criminal laws of countries differ, so that behaviour that is criminal under the laws of one country may not be criminal under the laws of another. In addition, the definitions of civil and criminal tax fraud may overlap, so that it is within administrative discretion whether or not to pursue a criminal fraud case in a specific instance. In reality, there is a continuum of behaviour, ranging from criminal fraud on one extreme, to civil fraud, to tax avoidance that is not fraudulent but which runs afoul of judicial or statutory anti-avoidance rules and therefore does not succeed in minimizing tax according to law, and finally to tax-planning behaviour which is successful in legal tax reduction. ...[11]

Avoidance/evasion distinctions are found outside tax, though the terminology may differ. Accountants for instance distinguish "creative accounting" (also known as aggressive accounting), which is legal; and accounting fraud, which is criminal.[12]

2.2.3 *Avoidance/evasion terms misused*

There are contexts where the reader will see evasion/avoidance terminology misused (evasion being used for avoidance or vice versa).

The first is historical: in law reports and elsewhere, at least up to the 1970s. In *Hawker v Compton* (1922):[13]

> ... it is perfectly open for persons to evade this particular tax if they can do so legally. I again say I do not use the word "evade" with any dishonourable suggestion about it. If certain documents are drawn up,

[10] The text muddies the waters here by adding: "In a broader sense, tax evasion may encompass a reckless or negligent failure to pay taxes legally due, even if there is no deliberate concealment of income or relevant information." But this is not common usage, and is better regarded as incorrect usage.

[11] United Nations, Note on the Revision of the Manual for Negotiation of Bilateral Tax Treaties 2011 (footnotes omitted).

[12] See Jones (ed) *Creative Accounting, Fraud and International Accounting Scandals* (2011).

[13] 8 TC 306 at p.314.; the tax involved was income tax of occupiers of farmland; the tax would be reduced if the land was farmed in partnership, and the issue was whether a partnership existed. So this was not what one would call a case of avoidance in modern terminology.

> and the result of those documents is that persons are not liable to a particular duty, so much the better for them.

The word "evade" continued to be used to refer to lawful tax planning (not necessarily avoidance in the modern sense)[14] until the 1970's.[15] At that time UK economists were giving increasing attention to the subject of tax avoidance and evasion[16] and perhaps their work had an effect on legal usage.

The second context is in post-1970 writing of those not knowledgeable about tax, including lawyers[17] (non-tax lawyers) and politicians.[18] When writing for non-tax lawyers, it may be helpful to use the expressions "legal avoidance"[19] and "illegal evasion", or better, "fraudulent evasion" to make the meaning clearer.

Outside the UK, the older terminology may still be found.[20]

Lastly, the distinction may be deliberately muddled for polemical effect:

> in practice tax evasion and avoidance are too often conflated ... For

[14] Examples include: *Coutts v IRC* [1964] 1 AC 1393 at p.1420; *Jamieson v IRC* (1963) 41 TC 43 at p.70; *Cory v IRC* [1965] AC 1088 at p.1107; *Greenberg v IRC* (1971) 47 TC 240 at p.271: "Parliament attempted to prevent this and other methods of tax evasion by provisions in the FA 1960".

[15] Note that this is purely a semantic and not a substantive point that is being made here. The old usage does not reflect the view that the evasion/avoidance distinction is unreal or unclear or that one can shade into the other. The legal distinction between the two is tolerably clear since evasion involves dishonesty, a tolerably well defined and understood concept. The IEA *Tax Avoision* (1979) coined the term "avoision" to mean avoidance/evasion. The book noted the lack of *economic* distinction between the two concepts; the economic similarity was the justification for the new coinage. The book also noted the blurring of a moral distinction between the two concepts either because avoidance was seen by some as immoral or because evasion was seen by some as not immoral; the book did not suggest a lack of a legal distinction which was unquestioned then and still should be now.)

[16] IEA, *Tax Avoision* (1979) p.1,

[17] For example, see *R v Charlton* [1996] STC 1418 at p.1421.

[18] Eg The Progress Tackle Tax Avoidance Charter: "HMRC HAS GOT TO GET A GRIP … 4. Get tough on tax avoiders by mounting more prosecutions." See *http://www.progressonline.org.uk/campaigns/tackle-tax-avoidance*

[19] "Legal avoidance" is a standard term in recent double tax conventions.

[20] The avoidance/evasion distinction in UK terminology is not adopted in EU law, which has a distinct technical terminology.
Similarly, s.482 United States Internal Revenue Code refers to allocation of income that "is necessary to prevent evasion of taxes" but the intended concept is one of avoidance.

> example, users of disguised remuneration schemes were troubled when the schemes were called "illegal" by the Chancellor of the Exchequer and the Financial Secretary to the Treasury. HMRC has not claimed that these schemes are illegal; rather that they are not effective, ... in reducing an individual's tax liabilities.[21]

It is sometimes hard to tell whether the misuse is deliberate or accidental. But as Alldridge observes, those who wish to equate avoidance and evasion should pay attention to where this may lead.[22]

See too 127.10 (Offshore tax offences),

2.2.4 Validity of tax avoidance

There is no *universal* rule that tax avoidance is ineffective. In *Hurstwood Properties v Rossendale BC*:[23]

> We emphasise that this conclusion is not founded on the fact that the defendant's only motive in granting the lease was to avoid paying business rates, although that was undoubtedly so. If the leases entered into by the defendants had the effect that they were not liable for business rates, their motive for granting the leases is irrelevant.

Similarly,the *Ramsay* doctrine (whatever it is) is not a "broad spectrum antibiotic which killed off all tax avoidance schemes".[24]

But the rules which do exist are numerous and sufficient to ensure that successful avoidance is rare. Have there been any recent cases where a tax avoidance scheme has been upheld, and if so, how many? An answer to this must depend on what one means by avoidance. Examples at or near the abusive end of the spectrum are not recent cases:

[21] House of Lords Economic Affairs Committee "HMRC: Treating Taxpayers Fairly" (2018) para 23, 24.
https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf
The report recommended "Clearer distinctions are needed in the Government's approach and rhetoric towards tax avoidance." But the Government rejected the recommendation, so this debate will continue: HMRC, "The Powers of HMRC: Treating Taxpayers Fairly (House of Lords Paper 242) Government Response" p.2
https://www.parliament.uk/documents/lords-committees/economic-affairs/Govt%20HMRC%20Powers%20report%2022%20Jan%202019%20.pdf

[22] Alldridge, *Criminal Justice and Taxation* (1st ed, 2017) p.34 (Blurring the line between avoidance and evasion).

[23] [2021] UKSC 16 at [51].

[24] *MacNiven v Westmoreland Investments* [2001] UKHL 6 at [49], often cited.

Case	**Topic**	**See para**
HMRC v Mayes [2011] EWCA CIV 407	Secondhand insurance policies	-
HMRC v D'arcy [2007] EWHC 163 (Ch)	Manufactured dividends	-
Davies v Hicks [2005] EWHC 847 (Ch)	Share pooling/matching	56.11.4

Few would expect the same outcome if these schemes were re-litigated now (though the question is moot, as that will never happen).

Non-abuse examples of where avoidance is still possible, if they constitute avoidance, are:

Example	**See para**
Going non-resident	6.42
Use of protected trusts	91.1

2.3 Politics of tax avoidance

The topic is political, so I begin with a politician (David Cameron):

> Of course there is a difference between tax evasion and tax avoidance. Evasion is illegal. It can and should be subject to the full force of the criminal law.
>
> But what about tax avoidance? Now of course there's nothing wrong with sensible tax planning and there are some things that governments want people to do that reduce tax bills, such as investing in a pension, a start up business or giving money to a charity. But there are some forms of avoidance that have become so aggressive that I think it is right to say these raise ethical issues, and it is time to call for more responsibility and for governments to act accordingly.
>
> In the UK we've already committed hundreds of millions (?) into this effort, but acting alone has its limits. Clamp down in one country and the travelling caravan of lawyers, accountants and financial gurus will just move on elsewhere. ...
>
> I believe in low taxes, that is why my government is cutting the top rate of income tax, we've cut corporation tax. [*Delete - political*].[25]
>
> Individuals and businesses must pay their fair share. And businesses who think they can carry on dodging that fair share, or that they can keep on selling to the UK and setting up ever more complex tax arrangements abroad to squeeze their tax bills right down, well they need to wake up and smell the coffee, because the public who buy from

[25] This side note is included in the version of the speech published online; one wonders what happened when the speech was delivered.

> them have had enough.[26]

All the main tropes of the political debate are in this passage:
(1) Everyone should pay a "fair share" of tax.
(2) Some taxpayers fail to do so due to tax avoidance.
(3) Tax avoidance is unethical, immoral or anti-social.
(4) Acknowledgement of the avoidance/evasion distinction;[27] but it does not contradict point (3). In the words of Margaret Hodge: "We're not accusing you of being illegal, we're accusing you of being immoral."
(5) Disparaging references to tax advisers.[28]

On the political left, the same points are made, but more stridently, and, of course, without Cameron's approval of low taxes.

2.4 Need for analysis

This chapter draws on a paper published by the Oxford University Centre for Business Taxation, (the **"OUCBT paper"**).[29] The OUCBT paper says:

> The question is how to tackle the problems. This requires a clear analysis of their cause and differentiation between different causes. Labelling a whole range of quite different behaviours as "avoidance" without further differentiation is unhelpful. ...

Differentiation requires terminology. As there is no agreed terminology, it is best not to use any terms at all without some explanation of what is meant.

2.4.1 *Categorisation of avoidance*

If one is to identify the correct response to the problems of avoidance, one must distinguish:
(1) **Ineffective avoidance** (no tax saving if the law is correctly applied)

[26] David Cameron speech to World Economic Forum in Davos, 2013 *https://www.gov.uk/government/speeches/prime-minister-david-camerons-speech-to-the-world-economic-forum-in-davos*

[27] I suspect newspaper libel readers (rightly) insert this if a journalist overlooks it.

[28] This feeds on a very ancient trope concerning lawyers. Of course this is not limited to tax. Contemporary attacks on lawyers have focussed on those working in immigration law ("lefty lawyers")

[29] "Tax avoidance" (2012) *https://wayback.archive-it.org/org-467/20200808011125/http://eureka.sbs.ox.ac.uk/4428/2/TA_3_12_12.pdf* (I omit some footnotes here).

(2) **Effective avoidance** (tax saved by avoidance)
(3) **Non-avoidance** (little tax paid but not due to avoidance)[30]

These distinctions matter because:
(1) Ineffective avoidance may be countered by enforcement of the law.
(2) Effective avoidance can only be countered by changes in tax law.
(3) In cases of non-avoidance:
  (a) It may be no change in tax law is appropriate.[31]
  (b) If change is needed, the change is one of policy as well as of tax law; and the matter should be considered without the haste and moral outrage associated with avoidance.

If one wishes to assess emotional and moral responses to avoidance, and actual or theoretical anti-avoidance rules, we need further vocabulary to discuss the range of tax-motivated behaviour.

We might cover the terrain in four categories:[32]

Uncontroversial tax planning Taking advantage of a tax relief in a manner *everyone* would accept as reasonable and indeed desirable. As this is at the bottom of the spectrum, it is easy to find clear examples: for instance, pension contributions, and moderate[33] charity giving.[34] This is so even if, as is usually the case, care is needed in order to use or to maximise the relief, for instance, limiting contributions each year to below the cap for the relief, or limiting benefits within the permitted limits for gift aid.

"Ordinary" tax planning Using tax legislation in a way which *some* politicians and commentators do not like, but where the planning is

[30] The OUCBT paper adopts the somewhat unhelpful labels "categories A, B, and C". It is difficult to find short labels which neatly sum up the concepts: "Ineffective avoidance" is not ideal as this is not really "avoidance" at all.

[31] It may be that a change in public expectation or knowledge is desirable.

[32] There are many ways to slice this cake. Lord Walker proposed seven types of tax avoidance (a riff on Empson's *Seven Types of Ambiguity*): "Ramsay 25 years on" [2004] LQR 120. Contrast Barnett, "A baker's dozen" Taxation Magazine, 2 August 2012. But one must resist the temptation to taxonomy for its own sake. Classification is (or should be) purposive: a useful taxonomy must draw *useful* distinctions: it should identify categories which call for different responses, and only those.

[33] In the debate on the Budget 2012, some said that giving more than £50k or 25% of income was excessive.

[34] These are the examples which Cameron called "sensible tax planning" in the quote at the start of this chapter.

ordinary in the sense that many people have done and continue to do it; it is obvious and foreseeable; the point probably came to the mind of those responsible for the legislation, or should have done, or there is no reason to think that parliament would have done anything different if it had considered the point. "Ordinary" tax planning is not contrary to the "intention of parliament" as that construct is normally understood.

I write the word "ordinary" with scare quotation marks, to indicate the vague, evaluative and disputable nature of the expression.

I regard the following as examples of "ordinary" tax planning (but other views have been expressed):

"Ordinary" planning	**But for other views see**
Advancing/delaying:	
(a) disposals for CGT purposes	56.9.7
(b) payment of income (eg dividends or bonus)	2.5.9
(c) pension contributions for IT purposes	
in anticipation of tax rate changes/becoming resident/non-resident	
Inter-spouse transfer to equalise income	2.5.9
Transfer to a company to reduce tax rates	
Lifetime giving to avoid IHT	
Going non-resident (unless the planning involves further steps)	

The term "tax mitigation" could be used as a synonym of "ordinary" tax planning, but it covers uncontroversial tax planning and "ordinary" tax planning: anything short of avoidance.

Occasionally one sees the epithet "vanilla" tax planning, paraphrased as "such as any High Street Solicitor would recommend to any client."[35] The cases have concerned applications to set aside transactions for mistake. In *Hartogs v Sequent (Schweiz) AG*[36] the planning involved a (supposedly) non UK domiciled settlor transferring funds to a trust, which acquired a company, which acquired a UK residence and classic cars. The settlor described this as a "normal and standard approach to estate-planning for someone in his position" and the judge agreed: "this was not a controversial tax planning scheme".

[35] *PBC v JMA* [2018] EWCOP 19 at [54]. The planning in this case was a lifetime gift (to a trust) which was intended to be a PET (!).

[36] [2019] EWHC 1915 at [25]. The facts were (more or less) the same in *Abadir v Credit Suisse Trust* [2021] EWHC 2573 (Ch), where the planning was "not an artificial form of avoidance against which public policy would militate against setting aside the transfer".

Tax avoidance Something legal but contrary to the intention of parliament in the sense that had parliament thought about it, it would probably prevent the tax advantage. Examples are likely to have been counteracted by subsequent legislation; though it may be a matter of judgement whether:

(1) The planning was avoidance, stopped by legislation.

(2) The planning was "ordinary" and the legislation reflected a change in policy.

Some examples (beginning with clear avoidance, concluding with what might be regarded as the top end of the "ordinary" planning spectrum):

Avoidance	**Counteracted by**	**See**
Transfer of assets abroad	ToA code	48.1
Share-for-share relief	CGT reorganisation TAAR	58.3; 58.6
Temporary non-residence	TNR rules	11.2

Tax abuse Tax avoidance with aggravating features (typically, self-cancelling steps) that make it (more) unreasonable.[37] As this is at the top of the spectrum, it is easy to find clear examples, eg:

Ramsay
Fitzwilliam v IRC[38]
Astall
Mayes
UBS
The Rangers case[39]

This terminology raises three distinctions:

(1) Uncontroversial/"ordinary" tax planning

(2) Tax planning/avoidance

(3) Tax avoidance/abuse

Before considering whether these distinctions have, or should have,

[37] The epithet commonly used is "egregious" or "aggressive". That does not clarify anything but it neatly expresses the point.
For completeness: In technical EU-law terminology the term "abuse" is used in a different sense; similarly in OECD discussion; see 108.7 (OECD-concept abuse). However we are not concerned with that usage here.

[38] For this case, see 99.9 (Trust appoints to B, B gives to new trust).

[39] *RFC 2012 Plc (formerly Rangers Football Club) v AG* [2017] UKSC 45 at [2]: "an aggressive tax avoidance scheme".

different consequences, it is important to note three difficulties which they entail:

(1) *Demarcation problems* Except at the extreme ends of the spectrum, the demarcation problem is intractable: the classification of specific examples (if it actually had to be decided) would give rise to endless disagreement (and has done so in the context of tax motive defences). There are two reasons for this:
    (a) The distinctions rely on:
        (i) imponderable hypothetical questions (what would parliament have done if it had noticed the issue?)
        (ii) vague constructs ("intention of parliament" and "spirit of the legislation")
        (iii) identifying tax policy (there may be no clear policy, or it may fluctuate)
    (b) The four distinct categories attempt to impose an order on tax motivated behaviour which exhibits a scale of unreasonableness, without distinct divisions. It might be better to mark out a sliding scale from 1 to 10, recognising finer distinctions, but that would not help for practical purposes. It is often the case that experience is a continuum on which the law seeks to impose bipolar categories, but the difficulty in doing so here is greater than usual because the distinction is more imponderable.

(2) *Tax-law knowledge problems* Except for the extreme ends of the spectrum, (a small part of the field) a serious discussion of where any particular arrangement should be classified, or graded, can only be carried out by someone who understands the tax background. Few non-practitioners have much understanding. Journalists in the UK do not allow their work to be reviewed by someone who understands tax. Politicians are characterised by grandstanding and soundbites. Pressure groups grind their axes. The details, important to those within the profession, tend to bore or bewilder people outside it.

(3) *Factual knowledge problems* If discussing particular instancies, one needs to know the facts, which are not usually in the public domain.

2.4.2 *Why distinctions matter*

The distinctions I have drawn are not entirely satisfactory, but it is hard to think of better.

The "ordinary" tax planning/tax avoidance dividing line is established in tax law at least since *Willoughby* (1997). It marks the point where:

(1) Tax motive provisions begin to bite
(2) Extra-statutory concessions cease to apply
(3) HMRC Manuals cease to bind HMRC[40]

For this distinction, see 3.20 (Avoidance/mitigation distinction) to 3.27 (Tax avoidance: Critique).

The tax avoidance/tax abuse distinction was established in 2013: it marks the point at which the GAAR is intended to bite.[41] It may also mark the point where a Court might refuse discretionary remedies such as setting aside for mistake.

There has not been much judicial discussion but a passage in *Furniss v Dawson* anticipated something like a tax avoidance/abuse distinction:

> The scheme [in *Furniss*] has none of the extravagances of certain tax avoidance schemes which have recently engaged the attention of the courts, where the taxpayer who has been fortunate enough to realise a capital profit has gone out into the street and, with the aid of astute advisers, manufactured out of a string of artificial transactions a supposed loss in order to counteract the profit which he has already made.[42] The scheme before your Lordships is a simple and honest scheme which merely seeks to defer payment of tax until the taxpayer has received into his hands the gain which he has made.[43]

The arrangement in *Furniss* was, in modern terms, avoidance but not abuse.

[40] HMRC Guidance Manuals introduction: "Subject to [limited specified] qualifications readers may assume the [HMRC Manual] guidance applies in the normal case; but where HMRC considers that there is, or may have been, avoidance of tax the guidance will not necessarily apply."
http://www.hmrc.gov.uk/manuals/advisory.htm

[41] It is significant that the GAAR is called a general anti-*abuse* rule, not a general anti-*avoidance* rule, in contrast to the two devolved GAARs. See 3.26 (The GAAR).

[42] [Author's footnote] At least two of these schemes were litigated, so preserving in the law reports examples of "extravagent" schemes with "a string of artificial transactions":
Ramsay v HMRC 54 TC 101; see App. 2.14 (s.132 TCGA definition)
Eilbeck v Rawling 54 TC 101; see 99.12.1 (Transfer: A's trust to B's trust)
Needless to say, the schemes failed to generate an allowable loss even without recourse to the *Ramsay* principle.

[43] [1984] AC 474 at p.518.

2.5 Attitudes to tax avoidance

2.5.1 *Morality and taxation*

This is intended to be a practical work. But attitudes to tax avoidance do of course have practical consequences for tax: it affects judicial attitudes and decisions; it was a driver for the enactment of the GAAR and other legislation.

The topic of the relationship between morality and taxation should be seen as part of a wider discussion of the relationship between morality and law. Without entering into these deep waters, it should generally be accepted that not everything which is disapproved of should be proscribed by law.

2.5.2 *Judicial view in the past*

Older cases uniformly took a neutral attitude to tax avoidance. In 1900:

> Bundey J. recognises to the full both the legal *and the moral* right of every man to dispose of his property if he can in a way which does not expose it to be taxed under the existing system of taxation.[44]

In 1922:

> it is perfectly open for persons to evade[45] this particular tax if they can do so legally. I again say I do not use the word "evade" with any dishonourable suggestion about it. If certain documents are drawn up, and the result of those documents is that persons are not liable to a particular duty, so much the better for them.[46]

In 1926:

> the highest authorities have always recognised that the subject is entitled so to arrange his affairs as not to attract taxes imposed by the Crown, so far as he can do so within the law, and that he may legitimately claim the advantage of any express terms or of any omissions that he can find in his favour in taxing Acts. In so doing, he neither comes under liability *nor incurs blame*.[47]

[44] *Simms v Registrar of Probates* [1900] AC 323 at p.333.

[45] Nowadays one would use the word "avoid" here; but the modern terminology had not developed at this point; see 2.2.2 (Avoidance/evasion distinction).

[46] *Hawker v Compton* 8 TC 306 at p.30.

[47] *IRC v Fisher's Executors* 10 TC 302 at p.340. If more examples are needed, which I doubt, see *Levene v IRC* 13 TC 486 at p.501-502; and the well known passage from

During the second world war, judicial opinion changed. The most familiar passage to that effect comes in 1941:

> It scarcely lies in the mouth of the taxpayer who plays with fire to complain of burnt fingers.[48]

This expresses an ethos appropriate to the wartime background; "as we are at war, the ordinary mode of construing legislation has been suspended".[49] In 1943:

> of recent years much ingenuity has been expended in certain quarters in attempting to devise methods of disposition of income by which those who were prepared to adopt them might enjoy the benefits of residence in this country while receiving the equivalent of such income, without sharing in the appropriate burden of British taxation. Judicial dicta may be cited which point out that, however elaborate and artificial such methods may be, those who adopt them are "entitled" to do so. There is, of course, no doubt that they are within their legal rights, but that is no reason why their efforts, or those of the professional gentlemen who assist them in the matter, should be regarded as a commendable exercise of ingenuity or as a discharge of the duties of good citizenship. On the contrary, one result of such methods, if they succeed, is, of course, to increase pro tanto the load of tax on the shoulders of the great body of good citizens who do not desire, or do not know how, to adopt these manoeuvres.[50]

After the war, the old orthodoxy returned. In 1965:

> The fact that a settlement is drawn with a view to avoiding particular charging provisions is *neither reprehensible, nor* a proper ground for inclination to a conclusion that it ought to come within those or some other charging provisions. ... If any moral criticism could be levelled at them, then the consciences of the judges of the Chancery Division, in the exercise of their discretionary jurisdiction under the Variation of Trusts Act 1958, would be in a sorry state.[51]

Ayrshire Pullman Motor Services v IRC (1929) set out at 2.5.7 (Impact of the GAAR).

[48] *Howard de Walden v IRC* 25 TC 121at p.124. For the full passage, see 48.2.2 (ToA provisions: Penal).

[49] Darling J, cited in Foxton, "*R v Halliday* in Retrospect" [2003] LQR 455.

[50] *Latilla v IRC* 25 TC 107 at p. 117.

[51] *Re Kirkwood* [1965] Ch 286 at p.327.

Lord Diplock expressed the traditional view in 1964:

> Tax law no more lies within the field of morals than does a crossword puzzle.[52]

Likewise in 1982:

> the fact that the purpose of the scheme was tax avoidance does not carry any implication that it was in any way reprehensible or other than perfectly honest *and respectable*.[53]

2.5.3 *Attitudes outside UK*

Without attempting a full survey, which would require a team of experts, it appears that the same view was held throughout the common law world. In America in 1947:

> Over and over again courts have said that there is nothing sinister in so arranging one's affairs as to keep taxes as low as possible. Everybody does so, rich or poor; and all do right, for nobody owes any public duty to pay more than the law demands: taxes are enforced exactions, not voluntary contributions. To demand more in the name of morals is mere cant.[54]

Oliver Wendell Holmes is often quoted for his extra-judicial comment "I like to pay taxes. With them I buy civilization."[55] But those who quote that tend to quote selectively. The same judge said:

> The only purpose of the vendor here was to escape taxation... The fact that it is desired to evade the law, as it is called, is immaterial, because the very meaning of a line in the law is that you may intentionally go as close to it as you can if you do not pass it.[56]

In Australia in 1995:

[52] Diplock, "The Courts as Legislators" Address to The Holdsworth Club (1965) *https://www.kessler.co.uk/wp-content/uploads/2012/05/CourtsAsLegistlators.pdf*

[53] *IRC v Burmah Oil* 54 TC 200 at p.220; followed in 1988 in *Craven v White* 62 TC 1 at p.196.

[54] *Commissioner v Newman*, 159 F2d 848 (1947). The case concerned the taxation of settlor-interested trusts.

[55] In *Ensign Tankers v Stokes* [1992] STC 226 at p.235 the apophthegm is paraphrased, with, perhaps, a change of nuance: "taxation is the price which we pay for civilisation."

[56] *Superior Oil Co v Mississippi* 280 US 390.

> The obligation to pay [income tax] is a legal one. Some politicians try to treat it as a moral obligation. But it is not. The citizen is bound to pay no more tax than the statute requires him to pay according to the relevant state of his affairs.
> Consistently with this view, it has long been a principle of the law of income taxation that the citizen may so arrange his affairs as to render him less liable to pay tax than would be the case if his affairs were cast in some different form. .. This is sometimes expressed as a right to avoid tax.[57]

2.5.4 *Pro-avoidance rationale*

The following points can be made in favour of the traditional view, that tax avoidance is morally neutral:

(1) *Difficulties of "right" amount of tax*
The tax system is full of anomalies, artificial, arbitrary, and not based on any consistent principles. One might say there is generally no "right" amount of tax except in the sense of what is due by statute.

(2) *Difficulty of applying moral principles*
This is perhaps another way of putting point (1): The view that taxation is governed by moral principles distinct from the rules of black letter tax law either:

(a) requires one to enter into the intractable distinction of tax avoidance/abuse; or
(b) spreads the net very wide, far wider than any practitioner is likely to accept (and still requires one to enter into the intractable distinction of uncontroversial/"ordinary" tax planning).

In practice, public debate does not engage with black letter tax law and it is difficult to envisage that it ever could. Ethics is a practical subject. It only works if the entities called "right" and "wrong" are reasonably distinguishable and of a more or less permanent nature. If standards are so vague, or so difficult to apply in actual cases, that we cannot see how we could act on them, we become sceptical. That suggests that morality has little if any role to play.

(3) *Egregious over-taxation*
I coin the expression **"egregious over-taxation"** to refer to situations

[57] Sir Garfield Barwick (Chief Justice of Australia 1964–81), *A Radical Tory* (1995) at p.229.

where HMRC take advantage of anomalies in their favour in a manner which is unfair and contrary to the intention of Parliament (as that expression is understood in a tax avoidance context). It is the opposite of tax avoidance. Three distinct sub-issues arise here:

(a) Does egregious over-taxation arise in practice
(b) Is it proper for HMRC to seek egregious over-taxation
(c) What light does that shed on the issue of tax avoidance morality

Issue (a) is a question of fact, to which the short answer is, yes. Of course the Courts generally try to construe statutes to prevent egregious over-taxation, just as they try to prevent avoidance; but sometimes they do not achieve this. For instance, the unfortunate Mr Lobler fell into the trap of a partial surrender of life policies:

> He made no profit or gain as that term is commonly or commercially understood and yet he becomes liable to pay tax which exhausts his life savings and may bankrupt him. That is an outrageously unfair result....
> This is legislation which does not seek to tax real or commercial gains. Thus it makes no sense to say that the legislation must be construed to apply to transactions by reference to their commercial substance….No overriding principle can be extracted from the legislation....
> Thus with heavy hearts we dismiss the appeal.[58]

There are then four possible moral approaches:

View	**Tax avoidance**	**Egregious over-taxation**
1	Wrong	Right
2	Right	Wrong
3	Wrong	Wrong
4	Right	Right

One might perhaps adopt view 1, that tax avoidance is wrong but egregious over-taxation is right, in other words, fairness should apply in favour of HMRC but not the taxpayer; but no-one has had the temerity to advocate that.

[58] *Lobler v HMRC* [2013] UKFTT 141 (TC). In order to avoid the unfairness the Upper Tribunal allowed the appeal, though it had to rewrite the law of rectification in order to do so; see [2015] UKUT 152 (TCC). The law was later amended; see 70.3.5 (Partial surrender trap). But that does not affect the point being made here.
For another example, see *Hunters Property v HMRC* [2018] UKFTT 96 (TC), where EIS relief was unfairly lost, because a group company was member of a guarantee company which was "merely a vehicle for holding client funds and had no intrinsic value of its own". For another example, see 90.56 (Capital contribution).

One might perhaps adopt view 2, that tax avoidance is right, but HMRC should be bound by a further requirement of fairness; but few if any advocate that either.

So if sauce for the goose is sauce for the gander, we are limited to views 3 or 4.

View 3 is possible, but it is not supported by HMRC. Those who support the view that tax should be governed by rules rather than discretion cannot logically criticise HMRC for seeking egregious over-taxation, where the law requires, though one could criticise HMRC for not seeking to change the law promptly after unfairness has been identified (and, if appropriate, publish an ESC to operate in the meantime).

So we fall back on view 4, thus this consideration supports the view that there is nothing wrong in avoidance.[59]

One might wish that HMRC were as concerned about egregious over-taxation as they are about its flipside, avoidance (egregious or otherwise). Of course, egregious over-taxation is different in that it brings in revenue rather than losing it. However, it imposes the cost of professional fees for better advised taxpayers who avoid it, and an intangible cost in that it brings the UK tax system into disrepute, even if one is indifferent to the unfairness for its victims. But there it is.

(4) *Tax avoidance sometimes leads to fair result*

This relates to point (3): There are cases where tax avoidance avoids egregious over-taxation. An example is the use of multiple policies to avoid the tax trap of partial surrender.[60]

Parliament sometimes admits this, by enacting a new relief to allow directly what had previously been achieved by avoidance. Examples are:

(a) Nil rate band discretionary trusts, which allowed transferable nil rate bands before the IHT relief was enacted in 2007.

(b) CGT group relief to obtain loss relief. A company about to realise a gain on an asset would formerly transfer it to a group company that had realised an allowable loss. Alternatively, a company which had realised a gain might acquire from a group company an asset which was to be sold at a loss. That would allow the loss to be set against the gain before the introduction of group loss elections, in 2009.[61]

[59] For an example of this line of reasoning in use, the well known passage from *Ayrshire Pullman Motor Services v IRC* (1929) set out at 2.5.7 (Impact of the GAAR).

[60] See 70.3.5 (Partial surrender trap).

[61] Section 171A TCGA.

Offshore trusts mitigate the economically deleterious lock-in effect of CGT by deferring tax until gains are received.

Tax avoidance (if it be such) sometimes permits a business to continue which would otherwise be destroyed by taxation.[62]

Related to this is the use of tax avoidance for political/economic ends. High tax rates may be mitigated by avoidance, achieving a pragmatic compromise between incompatible political viewpoints, or allowing a public perception which is different from the reality. IFS say:[63]

> ... there may even be benefits to the UK from avoidance opportunities if the lower tax rates achieved on mobile activities – for example, through profit shifting – mean that more real activity is in the UK than would otherwise be the case.[64]

This fudge has its costs, including the inefficiencies that arise from tax planning, fiscal instability and public cynicism; but it happens.

2.5.5 *Practitioner/judicial views today*

The above sets out the intellectual case in favour of the view that avoidance, like Lord Diplock's crossword, is morally neutral. It was formerly generally accepted, and has never been refuted. But the argument has been found less convincing, or unconvincing, I think for two reasons:

(1) The traditional view was formed in earlier times when there was tax avoidance but little (if any) activity in the category of tax abuse. After that began to change, I think in the 1970's, the view became far reaching, and so might be regarded more skeptically.

(2) The argument requires an understanding of the tax system as it actually is. Politicians and other non-tax practitioners entered into the debate without that knowledge.

Whatever the reason, the argument has become perceived as less cogent. By 2007:

> For many directors, the objection to arrangements that are in their view

[62] For an example, see *Fisher v HMRC* [2021] EWCA Civ 1438.

[63] IFS, *Green Budget 2013* p.290 *https://ifs.org.uk/sites/default/files/output_url_files/gb2013.pdf*

[64] Footnote original: There is an academic literature on the costs and possible benefits of tax planning. See for example, D. Dharmapala, "What problems and opportunities are created by tax havens?", Oxford Review of Economic Policy, 2008, 24, 661–79.

> ‘too’ artificial may be framed largely in terms of business ethics. Other directors, equally determined to behave in an ethical way, may consider that the degree of artificiality is not an ethical issue provided no attempt is made to misrepresent the facts or to hide them from the tax authorities....
>
> At one time such a view would perhaps have been more widely held than now. At the present time it represents one end of a range of views in a debate where probably most commentators would hold that within the compass of what is legal there is some behaviour that is acceptable and some that is not...[65]

In 2011, Aaronson’s GAAR study reported the views of taxpayer representative bodies:

> There was unanimous disapproval, indeed distaste, for egregious tax avoidance schemes.[66]

Of course tax practitioners do not all share the same view. But I think it is the case that they are mostly drawn to the view that opprobrium should only attach at the top end of the scale, in cases of tax abuse, in which case the GAAR has more or less rendered the issue academic; or if any opprobrium attaches to tax motivated behaviours lower down the scale, the amount of opprobrium should vary according to the scale.

This might be consistent with Lord Templeman’s views in tax abuse cases, which were expressed trenchantly (some would say, stridently[67]):

> In common with my predecessors I regard tax-avoidance schemes *of the kind invented and implemented in the present case* as no better than attempts to cheat the Revenue.[68]

In the Supreme Court in 2014:

> Since the seminal decision of the House of Lords in *Ramsay v IRC*[69]

[65] David Williams “Developing the Concept of Tax Governance” (2007)

[66] Aaronson, *GAAR Study* (2011) *http://webarchive.nationalarchives.gov.uk/20130321041222/http:/www.hm-treasury.gov.uk/d/gaar_final_report_111111.pdf*

[67] Lord Neuberger referred tactfully to Lord Templeman’s “characteristically colourful language”; *Evans (R, oao) v Attorney General* [2015] UKSC 21 at [53].

[68] *IRC v Fitzwilliam* (1993) 67 TC 614 at p.756. Lord Templeman’s claim that his attitude was held in common with his predecessors is untenable. It was not even held in common with his contemporaries. But it is held in common with his successors. In this respect, Lord Templeman was ahead of his time.

[69] (1982) 54 TC 101.

> there has been an increasingly strong and general recognition that artificial tax avoidance is a social evil which puts an unfair burden on the shoulders of those who do not adopt such measures.[70]

"Social evil" represents the top end of judicial rhetoric in recent times;[71] though the scope of the critique depends on the word "artificial", which may mean little or much.

And again in 2015, but more moderately expressed:

> [Tax avoidance] gives rise to social costs which are significant and increasingly controversial.[72]

Since the 1970's there has been no judicial unanimity, and that is still the case today. So the pendulum seems to swing erratically. In a rating avoidance case in 2019:

> Views may differ as to whether the purpose for which the SPVs were used was socially reprehensible.[73]

2.5.6 *Avoidance: Discretionary remedies*

In *Altus Group v Baker Tilly* negligent accountants argued it was contrary to public policy to award damages for their failure to advise or implement an avoidance scheme. The argument was summarily rejected.[74]

Where courts grant discretionary remedies, the question arises whether tax avoidance is a reason to refuse the remedy ("avoidance-based reasoning"). This issue may arise in discretionary remedies such as: setting aside a gift for mistake, rectification, variation of trusts, and remedies for unfair prejudice to minority shareholders.

The idea was first tentatively raised in *Futter v HMRC*:[75]

> In some cases of artificial tax avoidance the court might think it right to refuse relief, either on the ground that such claimants, acting on supposedly expert advice, must be taken to have accepted the risk that the scheme would prove ineffective, or on the ground that discretionary

[70] *Futter v HMRC* [2013] UKSC 26 at [135].

[71] But perhaps "social evil" differs from evil as "social justice" differs from justice.

[72] *Pendragon v HMRC* [2015] UKSC 37 at [5].

[73] *Hurstwood Properties v Rossendale BC* [2019] EWCA Civ 364. The decision was reversed on appeal but without comment on this point. For other aspects of this case see 76.17.5 (Companies: Situs planning).

[75] [2013] UKSC 26 at [135].

> relief should be refused on grounds of public policy. ... But it is unnecessary to consider that further on these appeals.

In Guernsey, the Courts have rejected the idea. Thus when an ill-advised gift to an EBT was set aside for mistake, the fact that the individual was seeking to avoid UK tax was not a reason for the Guernsey Court to refuse relief.[76] It may be that UK tax avoidance is regarded with less hostility in foreign jurisdictions, and especially tax haven jurisdictions. Foreign courts may also be more sympathetic than UK courts to taxpayers facing unfair or penal anti-avoidance rules.[77]

In practice, there has not yet been a case in the UK where a discretionary relief was actually refused on the grounds of avoidance, though have been some where this has been mooted.[78] I do not attempt to discuss all the cases where this point has been discussed, but only to assess (if one can) which way the wind is blowing.

Estera Trust (Jersey) v Singh[79] was an unfair prejudice case. The unfairly prejudiced shareholder was a non-resident trust. The Court ordered the company ("the defendant co") to purchase the trust's shares. Unfortunately that would be a distribution for tax purposes, and subject to IT at the dividend trust rate. The trust proposed a different arrangement:

(1) The trust transferred the shares to a newly created company wholly owned by the trust ("Newco")
(2) The defendant co purchased its shares from Newco

This would avoid the IT charge.[80] The Court refused to order this arrangement for a variety of reasons, but one of them was that:

> the scheme ... could be regarded as aggressive tax avoidance, even though relatively unsophisticated in comparison with other notified avoidance schemes. The Court should not without very good reason order reluctant parties to enter into a scheme that could be held to be

[76] *Whittaker v Concept Fiduciaries* (Guernsey 15/2017).
See too *Nourse v Heritage Trustees* (Guernsey) 15 Jan 2015) at [15] and [71] accessible *https://www.kessler.co.uk/tfd-archive*

[77] See App 14.5.1 (Critique of s.87 regime).

[78] See *Bhaur v Equity First Trustees* [2021] EWHC 2581 (Ch) at [118] - [119]; Herbert, "Equitable mistake and artificial tax avoidance" [2022] PCB 59.

[79] [2019] EWHC 2039 (Ch).

[80] The case was not a tax case, and does not give much tax analysis. For completeness: the transfer at step (1) would in principle give rise to a trust gain but presumably that did not matter on the facts of the case.

> improper (in the sense that I have identified).[81]

A tax practitioner may be surprised that this simple arrangement could be regarded as "aggressive"; for as the Court acknowledged, it is "perfectly common" for Jersey trusts to own companies that hold trust assets. But practitioners should remember that these issues are not decided by tax practitioners. Perhaps mere use of non-resident trusts for UK resident beneficiaries is sufficient?

The problem with avoidance-based refusals of discretionary remedies is of course how uncertain and subjective the concept of avoidance actually is.[82] For that reason, avoidance-based reasoning, if it applies at all, ought to be limited to clear and egregious cases and in practice it has not been applied to "vanilla tax planning" involving offshore trusts and companies.[83] In the light of the GAAR, such cases are not likely to happen after 2013, though pre-2013 avoidance cases will continue to occupy the Courts for a little longer.

2.5.7 *Impact of the GAAR*

Has the GAAR altered the position? GAAR guidance provides:

> B2.1 The GAAR ... rejects the approach taken by the Courts in a number of old cases[84] to the effect that taxpayers are free to use their ingenuity to reduce their tax bills by any lawful means, however contrived those means might be and however far the tax consequences might differ from the real economic position.

HMRC cite one of the best known dicta in taxation. In *Ayrshire Pullman Motor Services v IRC*:[85]

> [1] No man in this country is under the smallest obligation, moral or other, so to arrange his legal relations to his business or to his property as to enable the Inland Revenue to put the largest possible shovel into his stores.
>
> [2] The Inland Revenue is not slow - and quite rightly - to take every

[81] [2019] EWHC 2039 (Ch) at [26].

[82] See 3.27.1 (Avoidance: coherent concept?).

[83] See 2.4.1 (Categorisation of avoidance).

[84] The phrase "a number of old cases" is a tendentious way to refer to judicial unanimity from the earliest times until the 1980s; see 2.5.2 (Judicial view in the past). But GAAR guidance is not a neutral document: it is written by HMRC and adopts an HMRC perspective.

[85] (1929) 14 TC 754 at p.763.

> advantage which is open to it under the taxing Statutes for the purpose of depleting the taxpayer's pocket.
>
> [3] And the taxpayer is in like manner entitled to be astute to prevent, so far as he honestly can, the depletion of his means by the Revenue.

HMRC say that the GAAR has changed this:

> [The above quote] epitomises the approach which Parliament has rejected in enacting the GAAR legislation.[86]

At the abuse end of the spectrum, the GAAR now applies, so the rules have indeed changed. This impinges on the avoidance-morality debate insofar as the debate only concerns successful avoidance, ie avoidance not caught by the GAAR. But nothing else has changed. *Ayshire* itself was *not* an abuse case (the issue was whether the taxpayer's children had entered into a valid partnership) and the decision would not have been affected by the GAAR.

Proposition [1] of the quote is still correct. It also continues to be the case that HMRC enforce egregious over-taxation when the rules work in their favour,[87] and it is unlikely that they intended to cast doubt on proposition [2]. And proposition [3] is still broadly correct, though now qualified in cases which pass the high threshold of abuse.

The above paragraph is reading the text closely and in the manner of a lawyer. It is it is a matter of speculation as to what thoughts were actually in the mind of the author of the GAAR guidance. I think we are in the territory of mood music here.

The rhetoric continues:

> Taxation is not to be treated as a game where taxpayers can indulge in any ingenious scheme in order to eliminate or reduce their tax liability.

The game metaphor begs an essay to itself.[88]

[86] HMRC, "GAAR Guidance" (2017) *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[87] See 2.5.4 (Pro-avoidance rationale) under the heading: Egregious over-taxation.

[88] What, in fact, is a game? It is an elastic concept which can be analogised in different ways. What is it in the notion of game which HMRC would characterise as significantly different from tax? Is it a notion of non-seriousness? Or an adversarial approach? Or a notion of a rule-based activity? Or arbitrary rules? In the latter three respects, tax law and non-tax law very much resemble games.
Perhaps the thinking is that games are morally neutral, whereas tax avoidance is held to be morally obnoxious. If this is the point, it is significant that a moral based argument needs to present itself in non-moral terminology. But elsewhere, "fair play"

2.5.8 *Codes of practice/regulators*

PCRT provides:

> Members must not create, encourage or promote tax planning arrangements or structures that
> i) set out to achieve results that are contrary to the clear intention of Parliament in enacting relevant legislation and/or
> ii) are highly artificial or highly contrived and seek to exploit shortcomings within the relevant legislation.[89]

I take this as a rough paraphrase of the GAAR. In earlier editions of this work I criticised this, saying:

> But as no-one would *sensibly* advise clients to enter into avoidance schemes which do not work, because of the GAAR or otherwise, it is (more or less) meaningless exhortation.

But this overlooks that the code does serve a purpose in providing a sanction for members of professional organisations who foolishly or cynically advise clients to enter into avoidance schemes which are hopeless or worse than hopeless.

and "playing by the rules" are understood positively, and even claimed as defining features of the English national character.

These problems suggest that it would help clarity of thinking not to use the word "game": a stale and failed metaphor. See Midgley, *Heart and Mind* (1981) chapter 8 (The game game).

However the game metaphor seems to be irresistible, in rhetoric if not in sober thought. For a recent example, see *Clark v HMRC* [2020] EWCA Civ 204 at [114]: "Both grounds seem to me to be examples of tax litigation as a board game, with large prizes for the winners. People who pay tax in the usual way are entitled to feel aggrieved when elaborate avoidance schemes ... succeed."

[89] PCRT, Helpsheet B: Tax Advice. Para (ii) is otiose, but it does not matter.
In 2015 HMRC called on the professional bodies

> "to take on a greater lead and responsibility in setting and enforcing clear professional standards around the facilitation and promotion of avoidance to protect the reputation of the tax and accountancy profession and to act for the greater public good."

See "Tackling tax evasion and avoidance" (the juxtaposition is significant) (2015) para 3.19.
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/413931/Tax_evasion_FINAL__with_covers_and_right_sig_.pdf
This was the spur for PCRT Helpsheet B.
The same wording is found in HMRC Standard for Agents para 3.3; see 122.1.2 (HMRC standard for agents).

A more literal reading might take this as prohibiting advice on avoidance arrangements which *do* work. There are conflicting normative visions of the lawyer's role, raising the basic question: can a good lawyer be a good person? For legal practitioners, client autonomy is a fundamental value, and the client is in all cases entitled to be told what the law is. That is an aspect of the Rule of Law.[90] So far as that may be what it means, the PCRT does not apply to lawyers, because SRA/Bar codes of conduct have priority.[91] SRA say:[92]

> When advising a client on avoidance of tax schemes you should make clear that any avoidance arrangements the client enters into might deliver tax outcomes that were never envisaged or intended by Parliament and may be challenged. You should be clear as to the legal implications, the costs and penalties of non-compliance should the arrangement fail.
>
> You should also consider your own position in facilitating such an arrangement. Should the arrangement be found to be abusive, your conduct may be called into question. To be involved in such arrangements is likely to reflect badly on you and to damage public confidence in those delivering legal services. You will leave yourself open to the risk of disciplinary proceedings as well as committing a criminal offence. Where you believe, as a consequence of your client's instructions, you are at risk then you should advise your client you cannot comply with their instructions and unless they change instructions you should terminate your retainer.

SRA refer to PCRT and say:

> Where you consider that a scheme is likely to be found to be abusive, you can advise a client to this effect. Where a scheme can reasonably be argued not to be abusive, you can advise a client to this effect, facilitate the scheme where so instructed by a client properly advised as to the

[90] That view is not wholeheartedly accepted, or understood, by the general public or by HMRC, and a whole chapter would be needed to discuss this topic. For an introduction, see Windsor, "The Ethics of Government Legal Advisers" in Feldman (ed) *Law in Politics, Politics in Law* (2015).

[91] See 122.1.1 (Status of PCRT).

[92] SRA, "Tax avoidance your duties" (2019)
https://www.sra.org.uk/solicitors/guidance/tax-avoidance-duties/
The original version (2017) was criticised in earlier editions of this work, see the 2023/24 ed, para 2.5.8 (Codes of practice/regulators). But the guidance was substantially rewritten in 2019, and the earlier version is now of historic interest only.

> risks, and litigate on behalf of a client as to the legality of the scheme where you can do so in a manner consistent with your duty to the Court. It is for the relevant courts and tribunals to adjudicate on the legality of tax avoidance schemes. However, where schemes are found to be abusive, or where there is no finding but schemes contain indicators of abuse (such as, but not limited to, misleading conduct or the indicators set out in the GAAR or PCRT), and solicitors have facilitated such schemes, whether by providing supportive advice which advocates the use of such schemes, or does not sufficiently highlight the associated risks or otherwise, we will see this, on the face of things, as evidence of breach of the SRA Principles and are likely to investigate. If a solicitor gives advice to the effect that a scheme is likely to be found to be abusive and takes no steps to give effect to such a scheme, it is unlikely that enforcement action would be taken.

In practice there have been disciplinary proceedings[93] and further cases are pending. They tend for obvious reasons to be extreme cases where the question of what is abusive does not arise.

2.5.9 *Views of non-tax practitioners*

Outside the tax profession, the concept of what is unacceptable/immoral is not restricted to tax abuse, but extends to the "ordinary" tax planning level. Indeed, some very "ordinary" tax planning has come under fire. Practitioners might dismiss the views of those who know nothing about tax as unworthy of consideration. I give four examples from those whose views carry some weight.

Deferring bonus in order to take advantage of announced reduction in tax rates: This arose in 2013/14 when top rates fell from 50% to 45%. Practitioner-readers are likely to agree that this is "ordinary" tax planning near the bottom end of the spectrum. But Mervyn King, then Governor of the Bank of England, is reported to have criticised Goldman Sachs for it.[94] The House of Lords select committee noted that the GAAR will not apply to the deferral of bonuses from one tax year to another,[95] but one might

[93] See *Solicitors Regulation Authority v Chan* [2015] EWHC 2659 (Admin).

[94] Financial Times, 15 Jan 2013. King is co-author of the excellent (now out of date) *British Tax System* (5th ed, 1990).

[95] Select Committee on Economic Affairs Report on The Draft Finance Bill 2013 *http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf* The Select Committee said this was because that "the issue is one concerning the structure of the tax system rather than avoidance involving manipulation of loopholes

infer that they disapproved none the less for that.

The Bump Plan In 2013 a now-forgotten political furore arose after a tax practitioner was secretly filmed, suggesting bonus payments to pregnant employees; if made during the relevant period this would increase the amount of statutory maternity pay. I do not think practitioners would regard that as on the abusive side of the line (though there are many points which need to be made to properly understand the legal and moral analysis, none of which were heard in the public debate).[96] Perhaps the point was just political hot air but the practitioner involved had to leave the GAAR panel.

Income transfer between spouses I think practitioners were surprised that HMRC found this unacceptable in their (ultimately unsuccessful) attack in *Jones v Garnett*.

To digress: It is interesting to note that the same planning has been criticised in India:

> While tax evasion is universally condemned, there is a disposition in certain quarters to regard tax avoidance as a permissible course of action. We are unable to endorse this view. The mere fact that the income-tax law is not violated does not mean that the procedure which results in tax avoidance is justified. We might take as an illustration the act of introducing, without adequate consideration, one's wife ... as partner in a business of which the assessee himself is a partner. It is an attempt to fraction income and reduce tax liability under a provision of law meant to apply to genuine partnerships. Conduct of this nature, though legal, cannot but be regarded as anti-social.[97]

Different jurisdictions will approach the intractable issues of taxation of

in the legislation." More analytically, the reason is that these are not examples of tax abuse (in my sense, which I take to be the same as the definition of "abusive" in the GAAR).

The GAAR guidance makes this point; see 56.10.8 (Postpone disposal: GAAR).

[96] In particular: (1) This planning does not give rise to a tax advantage, but to a benefit advantage for the employer; it could not be counteracted by the GAAR. (2) Not every payment to an employee is earnings so it is possible for planning of this kind to fail on the facts. (3) The privacy aspects of secret filming, and the ease with which short clips may misrepresent nuanced positions, seem particularly worrying.

For the background, see Johnson, "Tax, Lies and Hypocrisy" (CCH Tax News , Issue 133 25 September 2013); for the law, see the Statutory Maternity Pay (General) Regulations 1986.

[97] Government of India, *Report of the Taxation Enquiry Commission* (1953-54), Vol II para 5.

families in different ways. I would not go so far as to say that international comparisons are never helpful, but valid comparisons would require a good understanding of both tax systems, which would generally need a team rather than a single author. Isolated quotes are likely to mislead. In the UK, at least, Parliament has decided that income sharing and other inter-spouse transfers are acceptable tax planning, subject to quite limited exceptions.[98]

Gift of company to political party A donor who owns a suitable company might arrange that:
(1) The donor gives the company to the political party.
(2) The political party extracts the funds by way of dividend.

The gift at stage (1) qualifies for CGT hold-over relief; and the distribution at stage (2) would not be taxable, assuming the party is a company for tax purposes.

It seems that Labour arranged this in 2013, giving rise to a fit of indignation, or purported indignation, from the Tories. An open letter from George Osborne to Ed Milliband provided:

> ... the Labour Party has gone to great lengths to help your biggest donor, ... avoid paying tax on a political donation. ...
> The Labour Party registered a donation of shares in JML worth £1.65 million in January 2013, from Mr John Mills. By making a donation in shares rather than as a single cash dividend, it has been reported that Mr Mills managed to avoid a potential tax charge of £724,710.[99] ...
> As leader of the Labour Party, and given your previous statements on tax avoidance, such actions by your party appear to be directly at odds with your public statements.
> Most importantly, will you now pass the amount of tax that has been avoided to the Exchequer? As you say, this is money that is needed to fund vital public services such as the health service and our schools.[100]

What is one to make of this? I think any practitioner, or anyone who understood the tax background, would regard this as in the category of

[98] See 93.1 (Non-dom/non-resident spouse).

[99] This figure is wrong: it represents a tax rate of 44%. The effective rate of tax should have been 36.11% = £600k tax. Perhaps it is a typo. Perhaps it is irony. Perhaps no-one is intended to take the letter so seriously as to check the figures. If this is an indication of the tax advice given to Mr Osborne, it is rather worrying.

[100] 6 June 2013

"sensible tax planning" or, perhaps, "ordinary" tax planning; in either case, well short of avoidance and opprobrium. The letter could be seen as just an example of debased political debate, meaningless playground insults whose object is just to knock the opposition. It could be taken as a case where "ordinary" tax planning is regarded as immoral. However, it may be regarded as an illustration of the difficulties which arise if one regards taxation as governed by moral principles distinct from black letter tax law. The letter might then be regarded as a rather subtle contribution to the political/moral debate. Perhaps there are elements of each of these.

2.5.10 *Context of discussion*

It is possible to discuss tax-morality in a lofty, disinterested and high-minded way. What is the good life? What would Aristotle say?

But in practice discussion is invested with flaming indignation, hatred for those who benefit from or support perceived injustices. This is fed by a sense of superiority that we are not like these instruments and accomplices of evil. The result is moral panic, contempt and aggression.[101] There is a great and easily mobilised hostility to anything that can be represented as avoidance. The remedies proposed become ever more penal and more discretionary.

The debate sometimes suffers from profound bad faith or hypocrisy. Politicians accuse others of tax-immorality in order to attack their opponents. Or journalists do so to sell papers. A example is when the archive of Tony Benn was transferred to the British Library, under the acceptance in lieu scheme, which one might have thought as innocuous as any transaction could possibly be.[102]

In 2021, it emerged that:

(1) Tony & Cheri Blair had (in 2017) incorporated a company (the purchaser).
(2) The purchaser acquired a BVI property company (holding office accommodation) from an unconnected non-resident company.
(3) The purchaser liquidated the BVI company and so acquired the land, which was subsequently used for a trading business of Cheri Blair.

[101] This is a danger to which any discussion of morality is subject: see Taylor, *A Secular Age* (2007) chapter 18.

[102] Reported by the Telegraph (4 Mar 2019) under the snide headline "Tories praise Tony Benn's financial planning as donation of his archive knocks £210,000 off family's tax bill". The article shows some signs of a libel readers scrutiny, as it falls just short of an allegation of hypocrisy.

The (suggested) avoidance here was that SDLT was not payable, which it could have been if the purchaser had acquired the land directly rather than the BVI company![103] Of course any practitioner would understand that:

- The choice between a company purchase and an asset purchase is one which Parliament has allowed, is not avoidance, and is so commonplace that no-one would have expected the matter to be dealt by a company purchase.
- The fact that this was a *BVI* company was irrelevant to the SDLT saving, as (more or less) the same saving would have applied to a purchase of a UK property company.[104]

"Move along, nothing to see here" - but that does not sell news or promote party politics.

2.5.11 *Conclusion*

In short, there is widespread disagreement about the starting point, not to mention finish line, when it comes to the concept of avoidance or on issues of morality in connection with tax avoidance. This should not be a surprise, since the same applies to many contemporary moral issues, for instance, assisted suicide. There is no tribunal to adjudicate arguments on morality, except the court of public opinion, which, as Ibsen observed, is an extremely mutable thing. But disapproval of avoidance, however understood, is now the norm. That that represents a major change of attitude is now forgotten. Changes in morality are accompanied by amnesia.

2.6 Tax Gap

Another thread in public debate is a vast estimate of the amounts involved.

[103] The Guardian, 5 Oct 2021 "Tony and Cherie Blair bought property via offshore firm and saved £300,000 in tax".

[104] In the case of a UK company the SDLT saving would have been slightly reduced by SDRT at the rate of 0.5%.
For a complete tax analysis further points need to be made.
There was also a tax downside to the arrangement as the purchaser acquired the historic acquisition cost of the BVI company; though that too could be avoided by an onward sale of the UK company rather than its asset.
Even the acquisition of the property by the BVI company should not be regarded as avoidance: Non-residents will (almost) always acquire non-residential investment property through a company - again from a UK tax viewpoint it makes no difference whether it is a BVI company or established elsewhere.

HMRC publish annual figures, with a catchy title, the "tax gap".[105] This is said to be £35 billion, or 5% of tax liabilities, in 2021/22.[106]

Broken down, the HMRC figures are:

Amount £bn	**Behaviour**	**Explanation**
10.7	Failure to take reasonable care	
4.1	Criminal attacks	
4.7	Evasion	Excluding hidden economy
4.1	Legal interpretation	Taxpayer/tribunal disagree with HMRC on tax law (excluding avoidance)[107]
3.3	Non-payment	Tax written off as uncollectible
2.1	Hidden economy	Income undeclared/understated
5.4	[Non-careless] error	
1.4	Avoidance	
35.8	Total	

Statistics are only as useful and reliable as the definitions on which they are based. Most of these categories are vague, and assessment of the figures is, to say the least, challenging. I think a certain amount of scepticism is in order. There is a danger that spurious statistics may gain currency and influence policy.[108]

The combination of disparate categories makes the total "tax gap" figure meaningless, but perhaps it is intended only for headline purposes. I write

[105] I think this tabloid term originated in the US, where IRS have been measuring the Federal Tax Gap since at least 1993: *https://www.irs.gov/statistics/irs-the-tax-gap*

[106] HMRC, "Measuring tax gaps 2023 edition, table 7.1 *https://www.gov.uk/government/statistics/measuring-tax-gaps*

[107] The concept is so arbitrary and subjective that it can fairly be described as ludicrous. CIOT rightly ask why it should be part of the tax gap at all.

[108] For a critique of the methodology, see Oxford University Centre for Business Taxation "The Tax Gap for Corporation Tax", (2012) *https://wayback.archive-it.org/org-467/20200808011019/http://eureka.sbs.ox.ac.uk/4428/4/TaxGap_3_12_12.pdf*

The HMRC paper itself acknowledges at B3 that "there are sources of uncertainty and potential error". (Formerly this read "*many* sources" but the *many* has been deleted.) The caveat is forgotten in the figures provided, which present a spurious precision, and in public discussion.

For the practical relevance of the data, see Mirrlees Review, *Dimensions in Tax Design* (2010), p.1132.

it with scare quotation marks.

IFS say:

> we don't know how much corporate tax is lost to the UK as a result of tax avoidance. This is partly because there is no accepted definition of exactly what constitutes 'avoidance' and partly because we lack full information about the activities of firms.[109]

Of course, the fact that an amount is unknown and unknowable does not mean that it is small or unimportant. I wonder if time spent guessing at figures is productive. It is however striking how tiny a part tax avoidance plays in the "tax gap" figures, 0.2% in percentage terms, compared to the attention it receives.

The IFS report continues:

> Importantly, even if we knew that information and could calculate the tax lost to avoidance, it would not be right to assume that, were all avoidance opportunities to be completely removed, the UK would be able to collect that full amount. We would expect higher taxes to feed through, at least to some degree, to lower investment and changes in prices such that genuine UK profits may be lower. To the extent that the corporate tax affects prices or wages, or the location of firms' activities (and therefore jobs), there may also be lower receipts from income taxes or VAT.

This is true for all taxes, but particularly for corporation tax:

> First, corporation tax is a particularly distortionary form of taxation that can work to reduce investment. This is especially the case for internationally mobile investments because firms will consider tax when choosing where to locate real activities...
>
> Second, the ultimate incidence of corporate tax always lies with households and is borne either by the owners of capital (in the form of lower dividends), by workers (in the form of lower wages) or by consumers (in the form of higher prices). We do not know with any precision who is made worse off as the result of the corporation tax. However, estimates suggest that, because capital tends to be much more mobile than workers or consumers, a significant share of the burden of corporate tax tends to be shifted to domestic factors – and specifically labour. In other words, there is reason to believe that at least a part, and

[109] IFS, *Green Budget 2013* p.297 *https://ifs.org.uk/sites/default/files/output_url_files/gb2013.pdf*

> in some cases a large part, of the corporation tax that companies are subject to is ultimately passed on to workers in the form of lower wages.[110]

There is a certain irony in the second point, given the left's enthusiasm for corporation tax; I think most economists agree that the burden of corporation tax is generally borne by employees,[111] though not all. But all that matters in politics is that no-one *realises* who pays it.

2.7 Avoidance legislation 1955 critique

In 1955 the Royal Commission said:[112]

> We are disturbed by the criticism that much of the anti-avoidance legislation is obscurely worded and drawn more widely than its purpose requires. ... We doubt if many lawyers could expound with confidence the effect of the 26 sections that make up Part XVIII of the [ITA 1952]. [The Royal Commission quoted the ToA definition of "power to enjoy" to illustrate the point, and continued:] It appears to us that, if the legislation in this field has to be expressed in this way, there is a danger that our system is becoming delusive. For, while it presents the form of statutory control of the subject by Parliament, it means that in substance the assessment of the individual affected and the charge of tax upon him is not determined by law but by the decision of the [Revenue] ... we think that, now that the main lines of this legislation are to be regarded as fully developed[113] and the administration of them has had time to settle down, the opportunity should be taken in the course of the next few years to conduct an expert review of the enactments as a whole... The purpose of the review would be (a) to enquire to what extent, if any, the relevant legislation may have been shown, in the light of experience, to have been drawn too widely for its purpose,[114] (b) to recommend any

[110] IFS, *Green Budget 2013* p.290 *https://ifs.org.uk/sites/default/files/output_url_files/gb2013.pdf* (footnotes omitted).

[111] ETPF Policy Paper 1 "Who bears the burden of corporate income taxation?" (2015) European Economic and Social Committee, "The Role of Taxes on Investment to Increase Jobs in the EU – An Assessment of Recent Policy Developments in the Field of Corporate Taxes" (2019) *https://www.eesc.europa.eu/sites/default/files/files/qe-03-19-343-en-n.pdf*

[112] Cmd. 9474 para 1029

[113] With hindsight, we see that anti-avoidance legislation was then in its infancy. The 26 sections complained of covered the settlor-interested trust code, ToA and transfer of income streams, with a concision which today one could not dream of.

[114] The decision in *Vestey* subsequently addressed one of the concerns at (a).

modifications of the legislation that will make it shorter, briefer, and more precise.

Here are 4 critiques which have become familiar: obscurity, imprecision, provisions drawn too widely ("overkill"), and discretionary application. Nowadays these critiques may be framed in terms of the Rule of Law.

2.8 The Rule of Law

2.8.1 *What is "the Rule of Law"*

There is a consensus on the Rule of Law. It is a constitutional principle.[115] It is one of four fundamental British values.[116]

There is no consensus on the meaning of the expression. It is an emotionally charged label for a set of principles, or sub-principles, the content of which is contested. This may not be a bad thing: consensus on the importance of the Rule of Law is only possible because of dissensus as to its meaning. There is a certain irony in that the principle which forbids vague legislation is itself difficult to pin down. But the same is true of other cherished political virtues, such as democracy. A discussion needs a book to itself;[117] but as the term is used in different ways, it is best

[115] Section 1 Constitutional Reform Act 2005.

[116] The other three are democracy, liberty and tolerance, according to the Government "*Prevent* Strategy", Cm 8092 (2011), para 6.58 where opposition to these values is the definition of "extremism". The point is repeated in the Government "Counter-Extremism Strategy" Cm 9148 (2015): "Extremism is the vocal or active opposition to our fundamental values, including democracy, the rule of law, individual liberty and the mutual respect and tolerance of different faiths and beliefs."
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/97976/prevent-strategy-review.pdf
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/470088/51859_Cm9148_Accessible.pdf
The new 2024 definition of extremism does not refer expressly to the Rule of Law, though it does refer to "fundamental rights and freedoms" ("in particular those rights and freedoms listed in Schedule 1 to the Human Rights Act 1998") which perhaps covers similar territory.
https://www.gov.uk/government/publications/new-definition-of-extremism-2024/new-definition-of-extremism-2024?utm_source=substack&utm_medium=email#fn:5
The Rule of Law is also one of the six values on which the EU is founded (the others are respect for human dignity, freedom, democracy, equality, and respect for human rights); see Article 2 TEU. But that matters less in the UK after Brexit.

[117] Raz, *The Authority of Law* (2nd ed., 2009), ch. 11 ("The Rule of Law and its Virtue"); Tamanaha, *On the Rule of Law* (1st ed, 2004); Pech, "The Rule of Law as

not to use it without some explanation of how it should be, or may be, understood. This section draws on a paper by Craig, "The Rule of Law" prepared for the House of Lords Constitution Committee.[118]

There is a consensus that the Rule of Law includes at least the following minimum requirements.[119]

Craig says:

> *The Rule of Law and Lawful Authority*
> A core idea of the rule of law to which all would subscribe is that the government must be able to point to some basis for its action that is regarded as valid by the relevant legal system. Thus in the UK such action would commonly have its foundation in statute, the prerogative or in common law power.

It follows that tax should be imposed by parliament through legislation.

Craig continues:

> *The Rule of Law and Guiding Conduct*
> A further important aspect of the rule of law is that the laws thus promulgated should be capable of guiding ones conduct in order that one can plan ones life.
>
> It is from this general precept that Raz deduced a number of more specific attributes that laws should have in order that they could be said to comply with the rule of law. All are related to the idea of enabling individuals to be able to plan their lives. The 'list' includes the following
>
> (1) laws should be prospective, not retrospective;
> (2) they should be relatively stable;
> (3) particular laws should be guided by open, general and clear rules;[120]
> (4) there should be an independent judiciary;

a Constitutional Principle of the EU" (2009)
http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1463242
For the Rule of Law in a tax context, see Freedman & Vella,"HMRC's Management of the UK Tax System: The Boundaries of Legitimate Discretion" Legal Research paper No 73/2012 (2012)
http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2174946##

[118] *http://www.publications.parliament.uk/pa/ld200607/ldselect/ldconst/151/15115.htm*

[119] This may be referred to as a thin, formal, procedural or narrow understanding of the Rule of Law. Some add Human Rights to the list. I would have thought Human Rights is conceptually at least best regarded as a separate matter from Rule of Law; though ultimately Rule of Law is a term which one might define as one wishes.

[120] The OUCBT paper spells out an implication of this: "The rule of law requires that taxpayers are able to determine the tax consequences of their actions in advance."

(5) there should be access to the courts;
(6) the discretion which law enforcement agencies possess should not be allowed to undermine the purposes of the relevant legal rules.

I think these are best regarded as distinct principles, albeit with one underlying rationale.

Although not standard usage, in this work I write *Rule of Law* with initial capitals. It is not exactly a technical expression, that suggests a precision of meaning; but the capitals do indicate that it carries considerable intellectual baggage. It may also be helpful sometimes to specify which aspect (or sub-rule) of the Rule of Law is in point; eg one might refer to Rule of Law/certainty.

2.8.2 *Rule of Law v. other values*

The Rule of Law is something to boast of,[121] and a feature which makes the UK an attractive place to reside, invest or litigate. The Judicial Office boast:

> The Rule of Law represents the cornerstone of liberty and democracy, and is one of the main reasons that the UK attracts global businesses and investors.
> Laws in the UK are:
> - public (so that everyone knows what they say)
> - certain (so that everyone knows where they stand)
> - prospective rather than retrospective (so that they cannot be broken before they exist)[122]

The reality may not match the rhetoric. There is nothing in the idea of government by majority to show that the majority will respect the Rule of Law. Rule of Law principles are challenged, or breached, in various aspects of taxation,[123] but the conflict in the context of tax avoidance is particularly deep. Anti-avoidance is facilitated and indeed characterised by features which breach the Rule of Law:

(1) Legislation which is:

[121] The boast is an old one. See Blackstone's *Commentaries on the Laws of England* (1765) vol 2 chap 37: "a country like this, which boasts of being governed in all respects by law and not by will"; and contrast John Adams "A government of laws, and not of men" (1780).

[122] "English Law, UK Courts and UK Legal Services after Brexit The View beyond 2019".

[123] See for instance the problems raised by *Lobler* at 2.5.2 (Judicial views).

    (a) obscure
    (b) vague
    (c) retrospective

(2) Administrative discretion, which falls into two types:
    (a) expressly conferred
    (b) a consequence, unavoidable but no doubt sometimes intended and welcomed, of obscure or vague legislation

(3) Soft tax law, ie rules (which may be described or misdescribed as guidance or statements of practice) laid down by HMRC without authority of Parliament. This is typically combined with administrative discretion, both because the terms of guidance in practice are generally vague, but more fundamentally, because HMRC are not usually bound by their guidance and may withdraw retrospectively.

(4) Overkill is not (or at least, not necessarily) a breach of the Rule of Law. However in practice it is generally accompanied by administrative relaxation, which breaches Rule of Law principles because it is not laid down by Parliament, and because it confers HMRC discretion.

It is desirable to recognise that there is a *trade-off* between conflicting policy aims, the Rule of Law and the combat of avoidance, rather than to fudge the matter by saying, or pretending, that these matters are consistent with the Rule of Law. Indeed there is a set of trade-offs, because the Rule of Law is a set of rules. For instance, if a TAAR has a clearance procedure, then the ability of taxpayers to plan with confidence is increased, which supports one aspect of the Rule of Law; but HMRC discretion is also increased, which breaches another aspect.

Then one can face the choices aware of the consequences of one choice or another. Craig says:

> ... the rule of law in the above sense is only one virtue of a legal system, and may have to be sacrificed to attain other desired ends. We may feel that the rule of law virtues of having clear, general laws should be sacrificed if the best or only way to achieve a desired goal is to have more discretionary, open-textured legal provisions. This may be so where it is not possible to lay down in advance in the enabling legislation clear rules in sufficient detail to cover all eventualities. Modifications to the rule of law in this manner are not somehow forbidden or proscribed. Given that it is only one virtue of a legal system it should not prevent the attainment of other virtues valued by that

> system.

In 1974, Lord Simon put the Rule of Law above the need to combat tax avoidance:

> Disagreeable as it may seem that some taxpayers should escape what might appear to be their fair share of the general burden of national expenditure, it would be far more disagreeable to substitute the rule of caprice for that of law.[124]

The cure could be worse than the disease.[125] In contemporary debate it is rare to find a statement in such strong terms. An exception comes from the Joint Committee on Statutory Instruments, discussing an arrangement-disregard TAAR in the following form:

> If—
> (a) a person enters into any arrangements; and
> (b) the main purpose, or one of the main purposes, of the person in entering into the arrangements is to avoid any obligation under these Regulations,
>
> these Regulations are to have effect as if the arrangements had not been entered into.[126]

The Committee said:

> ... people who are satisfied that the terms of the regulations do not apply to them will be at constant risk of HMRC initially concluding that they have attempted to avoid the regulations and that the regulations therefore apply anyway – that being the default position in the absence of an appeal. It is unclear that such a result, which breaches the principle of certainty, would be within the contemplation of enabling powers that do not contain express provision for the type of anti-avoidance provision used.
>
> The fact that Parliament has, notably in Part 5 of the Finance Act 2013, [the GAAR] enacted anti-avoidance provisions which are similarly

[124] *Ransom v Higgs* 50 TC 1 at p.94. A similar spirit informed the decision in *Vestey v HMRC* in 1979; see 49.3 (Charge on transferor).

[125] Nietsche puts the point poetically: “Wer mit Ungeheuern kämpft, mag zusehn, dass er nicht dabei zum Ungeheuer wird. Und wenn du lange in einen Abgrund blickst, blickt der Abgrund auch in dich hinein.” (He who fights monsters should be careful lest he become a monster. And if you gaze into an abyss, the abyss will also gaze into you).

[126] Reg 21 The Taxes (Base Erosion and Profit Shifting) (Country-by-Country Reporting) Regulations 2016.

> imprecise or discretionary is irrelevant to the security of such provisions in subordinate legislation, in the absence of express enabling powers. The Committee accordingly reports regulation 21 for a doubt as to whether it is *intra vires*.[127]

But this view did not commend itself to legislators. The regulation which they criticised as possibly *ultra vires* remains in the legislation. Identical wording (where the same criticisms might be made) is found in other regulations.[128] The wording is now common in primary legislation (where the ultra vires objection does not arise, but the Rule of Law/certainty objection is the same).

Tax avoidance is an issue of international tax as well as domestic tax, and in the US, the Rule of Law is, perhaps, more highly valued.[129] Bob Stack (US Treasury Deputy Assistant Secretary for International Tax Affairs) criticised OECD BEPS reforms, and UK diverted profits tax, for breaching Rule of Law/international tax law principles:

> Rather than producing administrable rules, the BEPS negotiators seemed to be opting instead for giving wide discretion to tax officials.[130] This brought into question the whole international tax system. Do the international tax rules even matter anymore?" Do we really need a standard setter to say, 'Tax administrators can use the pornography test to catch tax avoidance. We know it when we see it. And we will get you if we want to'?...
>
> [Diverted Profits Tax] ... took us further down the road in which a taxpayer is at the mercy of whatever a tax auditor decides is the right amount to pay. What made this particularly perturbing was that these measures emanated not from the usual suspects such as India, China, Brazil and South Africa, but from strong traditional residence countries

[127] *http://www.publications.parliament.uk/pa/cm201516/cmselect/cmstatin/461-ix/46103.htm#inst01*
The Committee report was published after the provision came into force.

[128] Reg 23 International Tax Compliance Regulations 2015. The argument that reg. 23 is ultra vires is weaker than in the case of the regulation considered by the Joint Committee, because unlike the position for the 2016 regulations, CRS authorises and requires "rules to prevent ... practices intended to circumvent the reporting and due diligence procedures". See 130.35 (CRS TAAR). Perhaps the argument is still tenable. Perhaps reg 23 will be read purposefully and somewhat restrictively.

[129] Though it is difficult to assess the validity of such a broad generalisation and the statement became more doubtful under the former Trump administration.

[130] Stack probably had in mind the PPT; see 108.8 (Principal purpose test). For another example, see 9.18 (Tie-breaker: mutual agreement).

> [UK and Australia] that happened to be two of our closest friends.[131]

2.8.3 *Breach of Rule of Law*

Craig says:

> The fact that a law is vague or unclear, and that it therefore provides little by way of real guidance for those affected by it, will not lead to a statute being invalidated in the UK.

In relation to secondary legislation (statutory instruments) a court could strike down provisions on the grounds of breach of the Rule of Law (which might be said to be ultra vires, in the absence of clear authority in the authorising act of parliament). In relation to primary legislation, a court could issue a statement of incompatibility. But in a tax context this has not happened.

In other words, the Rule of Law lacks full justiciability. Perhaps ironically, the Rule of Law is not in the strict sense a rule of law. To adopt Dworkin's distinction, it is a principle and not a rule. As such it may encourage a court to interpret a statute more narrowly, in favour of the individual. In this way, however deeply, inchoately, and inconsistently, Rule of Law considerations do to some extent affect case law outcomes[132] and perhaps, tax policy (though I am less sure about that.)

2.8.4 *Is tax Rule of Law compliant*

In earlier editions of this work, I said:

> The UK tax system is largely based on the rule of law rather than informal practice and discretion.

By 2014, as TAARs and other anti-avoidance were multiplying, I qualified the boast, saying: "that is less the case than formerly".[133]

In 2014 the City of London Law Society said:

> 2.4 ... tax policymakers are insufficiently conscious of the importance of the rule of law – that is, the constitutional right of a citizen to determine the law applicable to him at any given date. Related to this is

[131] Speech to OECD International Tax Conference, 2015.

[132] In the context of rules which would prevent access to a Court, the Rule of Law affects outcomes more directly; see for example *Haworth v HMRC* [2019] EWCA Civ 747 at [66].

[133] Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (13th ed., 2014) para 2.4 (The Rule of Law).

> a similar problem of lack of respect for legislation as the only proper source of law, and over-reliance on guidance.[134]

In 2015 the Law Society made the same point:

> ... in recent years, there has been a tendency on the part of government to allow the rule of law in taxation to risk being eroded in the interests of making the executive more effective, in particular in seeking to combat avoidance...

The question "is tax Rule of Law compliant" seems meaningful but as the Rule of Law is a set of rules, it is not one question but a set of questions. In relation to each of the rules, the question is not *whether* tax is Rule of Law compliant but *to what extent*. To answer that question fully, one would test every rule of tax law against each of the principles of the Rule of Law set out above. As tax is vast, discussion must be selective and impressionistic.[135]

In the broadest outline, then, to what extent is it the case that:

Taxpayers are able to determine the tax consequences of their actions in advance? Increasingly not, obscurity, vagueness and overkill are rife, mitigated by HMRC guidance or concession mislabeled as guidance.[136] Most supporters of the GAAR deny or downplay its uncertainty, but, significantly, Jim Harra, Director General, Business Tax at HMRC applauded it:

> It will also create an additional level of uncertainty for the promoters and users of schemes. I believe that that will be a deterrent.[137]

Even the Supreme Court have said something similar. In *Hurstwood*

[134] Response to OTS competitiveness review (2014)
No-one appears to have taken any notice of the Law Society's lobbying.

[135] For the question of Rule of Law compliance in a general (non-tax) context, see the Justice report, "The State We're in: Addressing Threats & Challenges to the Rule of Law" (2023)
https://justice.org.uk/the-uks-longstanding-commitment-to-the-rule-of-law-is-under-grave-threat-according-to-landmark-report-from-justice/

[136] Examples include: (1) s.30 FA 2014 (avoidance by transfer of corporate profits); (2) TAARs, which have become standard in new legislation, especially those of the tax-advantage type. See for instance, 65.21 (Capital-loss TAAR).

[137] Hansard, Public Accounts - Minutes of Evidence (6 December 2012)
http://www.publications.parliament.uk/pa/cm201213/cmselect/cmpubacc/788/121206.htm

Properties v Rossendale BC:[138]

> The value of legal certainty does not extend to construing legislation in a way which will guarantee the effectiveness of transactions undertaken solely to avoid the liability which the legislation seeks to impose.

But we return to a conventional view in *HMRC v Fisher*:[139]

> At some points [HMRC] seemed to be suggesting that this degree of uncertainty about when and to whom the charge applied was a positive virtue of the drafting. The provision was, he said, designed to discourage people from moving assets abroad with a tax avoidance purpose. The problem with having a bright line is that people devise a way round it. The penal provision works better to achieve its aim if taxpayers are unable to know whether they would be caught or not. HMRC could then assess them to tax on the income of the overseas person, leaving the taxpayer to try to convince HMRC or the tribunal on appeal that they were not transferors. That is, in my judgment, an improper argument for HMRC to run. It has a flavour of the same unconstitutional approach to the enforcement of these provisions that was so strongly deprecated in *Vestey*. I agree with [the taxpayer's] submission in response when he said that the law cannot be left in some unclear state "just to scare people".

Is tax imposed by Parliament or HMRC? Increasingly the latter.
Is there a right of appeal to a Court? Not quite always.[140]
Is tax law retrospective? Sometimes, though I do not detect a trend towards increasing retrospectivity.
Is tax law stable? No, though it never has been.

Breaking down the issues under these separate heads illustrates what a disparate group of principles fall within the concept of the Rule of Law. I doubt whether "the Rule of Law" is a helpful label in the context of tax law. It conflates disparate issues and so confuses discussion.[141] While it

[138] [2021] UKSC 16 at [61].

[139] [2023] UKSC 44 at [76].

[140] For instance: (1) The Code of Practice on Taxation for Banks; there is no right of appeal against HMRC determination of a breach of the code. (2) Follower notices: there is no right of appeal against the issue of such a notice on a number of important grounds.

[141] The point is not limited the context of tax. For instance, a summary of the Justice report "The State We're In: Addressing Threats & Challenges to the Rule of Law" (2023) provides:

gives a critique gravitas - the Rule of Law is a powerful slogan - it lies at a level well above the pragmatism that is said to characterise an Anglo-Saxon approach to large philosophical, political and economic issues.

However that may be, we are not, for the most part, as disturbed about these problems as was the Royal Commission in 1955. Should we be? Discuss.

2.9 Retrospective tax legislation

There is general agreement that the Rule of Law includes a prohibition of retrospective legislation.

Although a sub-topic of the Rule of Law, the topic deserves a separate discussion. A full discussion requires a book to itself.[142]

2.9.1 *Meaning of retrospective*

It seems to me that retrospectivity is best considered as a matter of degree, not a matter of yes/no, either/or. Legislation not retrospective in form may be retrospective in effect, if it operates by reference to arrangements carried out in the past, and/or lacks fair and appropriate transitional provisions. In assessing whether (or, better, the extent to which) a provision is retrospective, one should have regard to the object of the prohibition on retrospective legislation, which is that a person should be reasonably able to plan their affairs on the basis of what the law says. In this sense, legislation backdated to the date of an announcement of a proposed change in the law is not retrospective, or at least not objectionably so.

On this analysis, to determine whether a provision is retrospective is an evaluative exercise. So those defending legislation can and generally do

> "... the UK's reputation for upholding the rule of law is under grave threat. In practice we see a palpable reduction in access to justice; inadequate progress in tackling inequalities; a disregard for judicial oversight and independence, including verbal attacks on the profession; and an overall deterioration of the quality of our law-making."

Five distinct matters are mentioned here, and the reader may agree that each is a cause of concern. But does it help to consider them as one item under the rubric of the Rule of Law? They have nothing much in common.

[142] For an illuminating discussion of the policy issues in a US context, see Shaviro, *When Rules Change* (1st ed, 2000). UK taxpayers may on this point look with envy to the USA, where a norm opposing retrospective legislation is "strongly rooted in popular sentiment, legislative practice, and perhaps even the Constitution as the courts are likely to interpret it" (p.104).

contend, with varying degrees of plausibility, that the relevant provision is not retrospective.[143]

The issue does not usually arise in a justiciable context. We are in the realm of politics, not law.

2.9.2 *Retrospective legislation: Extent*

It is perhaps only a slight exaggeration to say that retrospective tax legislation has become a matter of routine, having been applied in particular to a somewhat arbitrary selection of tax avoidance schemes. Examples include:

Topic	**Date**	**See para**
Retrospective reversal of avoidance schemes:		
DT relief for partnership	1987	85.25
s.23 FA 2012 (loan relationships)	2012	*Not discussed*
Provisions retrospective in effect:		
Pre-owned assets	2004	83.39.2
IHT: former Accumulation & Maintenance trusts	2006	*Not discussed*
Aspects of the ITA remittance rules	2008	1.9.3
Disallowance of debts for IHT	2013	80.36.2

Generally, I think the norm requiring commencement rules to avoid retrospective effect has weakened since about 2000, perhaps in line with changed attitudes to tax avoidance.

2.9.3 *Retrospective legislation: Protocol*

In Budget 2011, the coalition Government published a statement on retrospective legislation, grandly entitled a "Protocol" with a capital P. The most important part provides:

> The Government has made clear its aim to strike the right balance between
> [1] restoring the UK tax system's reputation for predictability, stability and simplicity (!) and
> [2] preserving its ability to protect the Exchequer by making changes where necessary.
> In particular, changes to tax legislation where the change takes effect

[143] See for instance HM Treasury, "Section 95 of the Finance Act 2019: report on time limits and the charge on disguised remuneration loans" (March 2019) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/789160/DR_loan_charge_review_web.pdf*

> from a date earlier than the date of announcement will be wholly exceptional.[144]

The attempt to formulate the principles behind a decision to enact retrospective legislation is to be applauded. But the sanction (if any) for ignoring the protocol is political only.

The 2011 statement does not purport to bind future governments. The Cameron administration (2015 - 2016) did not resile from it, but the extent to which the current or subsequent administrations will follow it remains to be seen. The protocol has perhaps shifted political debate from whether or not legislation is justified to debate on whether or not legislation is retrospective, but it is doubtful whether it has had much if any effect on the outcome.

2.9.4 *Retrospective legislation*: *Validity*

The Rule of Law is not justiciable as such and so neither is the restriction on retrospective legislation. Human Rights challenges have not been successful.[145] The protocol has not changed this. That is self-evident, but if authority is needed:

> The Protocol was an extra-statutory announcement or promise made by the government. As such, it operated: in the realm of politics, not of the courts, and the question whether the government should be held to such a promise is a political rather than a legal matter... The sovereignty of Parliament cannot be confined by extra-statutory promises like the Protocol.[146]

I think this is as it should be: the content of legislation is in principle a matter for parliament and not for the courts.

2.9.5 *Retrospective legislation*: *Politics*

Various reasons have been given to justify retrospective legislation.

One is that it concerns an avoidance scheme which will fail (or so the Government believe). If that is true, the legislation is unnecessary; if not (and it is generally debatable) it is not a good reason.

[144] *http://webarchive.nationalarchives.gov.uk/20130129110402/http://cdn.hm-treasury.gov.uk/2011budget_taxavoidance.pdf*

[145] See *Huitson (R, oao) v HMRC* [2011] STC 1860; *APVCO 19 Ltd (R, oao) v HM Treasury* [2015] EWCA Civ 648; *Zeeman v HMRC* [2020] EWHC 794 (Admin).

[146] *APVCO 19 Ltd (R, oao) v HM Treasury* [2015] EWCA Civ 648 at [58].

Another is that it concerns an abusive avoidance scheme (however that flexible term may be understood). Whether that justifies retrospective legislation is ultimately a political question on which views differ depending on how much one values the Rule of Law. It is arbitrary and unfair in that a few particular schemes are retrospectively stopped and others – no less elaborate, artificial and abusive – are not. Pragmatists (to whom the Rule of Law is of little interest) should bear in mind that retrospective legislation increases the "legal risk", a measure under which the UK falls low on international surveys, and the lowering of the UK's reputation in that regard has a significant albeit intangible cost. I suspect major factors in picking on some arrangements may include salience, politics, and the amount of money involved.

2.9.6 *Retrospective relieving legislation*

Retrospective legislation has also become common to provide relief for unintended charges under(what the need for retrospective legislation shows to be) ill thought out legislation. The policy issues are different here. So far as retrospective legislation favours the taxpayer, most would regard it as unobjectionable on Rule of Law grounds; even to the Rule of Law purist, it is less objectionable than the alternative of extra-statutory concession. But the need for it on a regular basis should cause concern about the quality of the tax legislation process.

2.9.7 *Retrospective legislation*: *Future*

How often will retrospective legislation be used in the future? What advice can anyone give to taxpayers seeking to know their position? Prior to the enactment of the GAAR, I said:

> Much depends on the politics of the day, but I guess that retrospective legislation will continue to be a rare response; a popular scheme carried out by many taxpayers and involving larger sums is certainly more at risk than others.[147]

The compatibility of the GAAR with the Rule of Law is open to debate, on the grounds of vagueness in particular. But one positive consequence may be (and should be) at least to restrict the practice of retrospective anti-avoidance legislation; wholly retrospective legislation should less often be necessary. But effectively retrospective legislation, in the form of unfair

[147] Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (7th ed., 2008), Vol.1

commencement rules, will no doubt continue.

2.10 Naming and shaming

"Naming and shaming": The alliteration is irresistible, and for some reason sounds more reputable than just "shaming", which is what this topic is about.

The expression covers a variety of arrangements. I distinguish between statutory shaming, discussed elsewhere,[148] and media shaming, discussed here.

The OUCBT paper provides:

> ... searching for individual or corporate villains will not assist in remedying the underlying problems...
> Even if public naming and shaming influences a few taxpayers in the public eye to impose their own voluntary constraints, it will not necessarily affect the worst avoiders, and may even encourage some non-compliance from those who feel that "everyone is at it". Only understanding the flaws in the tax system and working on serious changes can give long-term results....
> Even if that were to have an effect on one taxpayer it would not tackle the underlying issues.

No-one has taken any notice of that!

Media shaming is at present common for various purposes (more than one may be present at the same time):

(1) In marketing: To sell newspapers with exposures of celebrities who have been involved in tax avoidance schemes.[149]

(2) In politics: To knock the opposition by alleging that politicians, or other party supporters, are guilty of tax avoidance. In this respect, anything goes and some stories have been farcical. For instance, Peter Mandelson was berated for taking a loan from a UK company[150] and Ed Miliband was accused of avoiding tax by means of a deed of variation.[151] The allegations are so off-target as to cast doubt the good

[148] See 126.53 (Public list of defaulters).

[149] Typically film schemes, as the names of members of the LLPs concerned are in the public domain.

[150] *http://www.theguardian.com/politics/2015/jan/27/peter-mandelson-400000-pound-tax-free-loan* The Guardian later amended its website to concede that the loan had been wrongly described as tax-free.

[151] Leading to a gibe in the Spring 2015 budget announcing a policy review of deeds of variation. The Guardian rightly asked: what came first – the policy or the joke?

faith of those who make them and newspapers which uncritically promote them.

(3) As a scandalisation technique, to promote the view that avoidance is immoral; often combined with juxtaposition of avoidance and evasion and the suggestion that there is little or no difference.

When these allegations are made it is impossible to defend oneself.

So public debate is not uninformed but misinformed. It is a yeasty mingling of dimly understood facts with vague but deep impressions, and images, half real, half fantastic. It has more than its fair share of misunderstanding and jejune polemics.

In these circumstances, media shaming may easily lead away from the Rule of Law. In 2012, Starbucks paid £20m to HMRC following a threat to occupy its cafes.[152] If one calls that payment "taxation" at all, it was certainly not taxation imposed by law. A hostile commentator would call this taxation by mob rule. Google and Amazon, who do not have public premises vulnerable to the same threat, have not had to pay similar sums. Perhaps the point was understood, as the campaign was not repeated.

The reader may agree with the journalist Rachel Cooke:

> I'm not saying that shame doesn't have its place ... We should want others to think well of us. But ... it can be a terrifyingly blunt instrument, a cudgel not a scalpel. Wield it too enthusiastically, and the collateral damage is likely to be both grave and enduring.

2.11 EU tax haven blacklist

2.11.1 *"Non-cooperative jurisdictions"*

EU publish a list of "non-cooperative jurisdictions for tax purposes". The current list is set out in Annex 1 of 2020/C 64/03. This provides a list of 12 tax havens, and the reasons they are on the list:

1. American Samoa
American Samoa does not apply any automatic exchange of financial information, has not signed and ratified, including through the jurisdiction they are dependent on, the OECD Multilateral Convention on Mutual Administrative Assistance as amended, did not commit to apply the BEPS minimum standards and did not commit to addressing these issues.

2. Cayman Islands
Cayman Islands does not have appropriate measures in place relating to economic

[152] Ironically, the post-tax cost of the payment would have been diminished as it should in principle be deductible in computing taxable profits.

substance in the area of collective investment vehicles.

3. Fiji

Fiji is not a member of the Global Forum on transparency and exchange of information for tax purposes (‘Global Forum’), has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, has harmful preferential tax regimes, has not become a member of the Inclusive Framework on BEPS or implemented OECD anti-BEPS minimum standard, and has not resolved these issues yet.

4. Guam

Guam does not apply any automatic exchange of financial information, has not signed and ratified, including through the jurisdiction they are dependent on, the OECD Multilateral Convention on Mutual Administrative Assistance as amended, did not commit to apply the BEPS minimum standards and did not commit to addressing these issues.

5. Oman

Oman does not apply any automatic exchange of financial information, has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, and has not resolved these issues yet.

6. Palau

Palau does not apply any automatic exchange of financial information, has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, and has not resolved these issues yet.

7. Panama

Panama does not have a rating of at least ‘Largely Compliant’ by the Global Forum on Transparency and Exchange of Information for Tax Purposes for Exchange of Information on Request and has not resolved this issue yet.

8. Samoa

Samoa has a harmful preferential tax regime and has not committed to addressing this issue.

Furthermore, Samoa committed to comply with criterion 3.1 by the end of 2018 but has not resolved this issue yet.

9. Seychelles

Seychelles has harmful preferential tax regimes and has not resolved these issues yet.

10. Trinidad and Tobago

Trinidad and Tobago does not apply any automatic exchange of financial information, has a ‘Non-Compliant’ rating by the Global Forum on Transparency and Exchange of Information for Tax Purposes for Exchange of Information on Request, has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, has harmful preferential tax regimes, and has not resolved these issues yet.

11. US Virgin Islands

US Virgin Islands does not apply any automatic exchange of financial information, has not signed and ratified, including through the jurisdiction they are dependent on, the OECD Multilateral Convention on Mutual Administrative Assistance as amended, has harmful preferential tax regimes, did not commit to apply the BEPS minimum standards and did not commit to addressing these issues.

12. Vanuatu

Vanuatu does not have a rating of at least ‘Largely Compliant’ by the Global Forum on Transparency and Exchange of Information for Tax Purposes for Exchange of

> Information on Request, facilitates offshore structures and arrangements aimed at attracting profits without real economic substance and has not resolved these issues yet.

The 2020 list is limited in number; from a UK perspective the only significant entry is Cayman, and I doubt if it will stay there very long. The immediate significance of being on this list is relatively small,[153] but it seems to have had some success in encouraging change.

Scotland will not make a coronavirus-related grant to a company with a parent/subsidiary in these jurisdictions.[154] Clearly, there will not be many, if any, grants refused as a result of that particular provision, though it may form part of a more general trend.

How will this approach of ostracism/penalisation of tax havens develop in the future? This is a question of international politics, not law.

2.12 Avoidance: Multinationals

Much attention has been given to multinational companies. The Public Accounts Committee looked at Starbucks, Amazon and Google. The verdict was guilty.[155]

It is not possible to comment sensibly on the taxation of a multi-national group without knowing the relevant facts, which are not usually in the public domain. The claim that these companies have avoided UK corporation tax is often based on the size of their UK sales or UK staff, set against the corporation tax actually paid. But all well-informed commentators know that corporation tax is not a tax on sales, or the size of an establishment, and large sales/staff does not mean large profits. The OUCBT paper provides:

> Starbucks and Facebook ... have been criticized for not paying tax where they are making sales, but sales are not the basis for the corporation tax,

[153] See Thornton, "The Cayman Islands and the EU 'blacklist' Tax Journal, 6 Mar 2020.

[154] Para 16 sch 4 Coronavirus (Scotland) (No.2) Act 2020.

[155] Or was it? "We were not convinced that their actions, in using the letter of tax laws both nationally and internationally to immorally minimise their tax obligations, are defensible." Public Accounts Committee 19th report 2012, para 12. If the convoluted wording was intended to reflect a note of caution, it was lost in the public debate. But perhaps the obfuscation is just the dialect of politics.
The PAC returned to this theme in Ninth Report of Session 2013–14 "Tax Avoidance–Google". A PAC hearing is not, perhaps, well suited to ascertaining the facts; it is not possible to ascertain from this whether the complaint of the PAC is that Google have been conducting successful or unsuccessful tax avoidance.

> so this alone is no cause for criticism of the companies concerned. We could argue that the tax base should change, but unless and until that occurs, the fact that there is a high turnover but no taxable profit is not in itself an indicator that the taxpayer is behaving in an unreasonable way.

Likewise the fact that relatively little CT is paid proves nothing. The OUCBT paper provides:

> The fact that there is little or no tax payable is not, however, conclusive evidence that there is effective or ineffective avoidance. In some of these cases, these companies are simply operating in accordance with incentives created by the international tax system and by domestic governments trying to attract economic activity into their jurisdictions. This the governments may do for non-tax reasons, or because this activity gives rise to forms of taxes other than those which are not being collected. ...

The IFS say:

> A low corporate tax bill is not in itself therefore evidence of tax avoidance. Even if income appears high, there may be genuinely low UK taxable profits if a firm has relatively high current expenditures or can offset the effects of large investment expenditures or losses. The UK tax bill can also be appropriately relatively low compared with declared income if that income is the result of genuinely non-UK activities.

HMRC make the same point:

> Globalisation means that multinationals have the opportunity to structure their business to take advantage of beneficial tax rules in different countries. Provided that this results in profits being taxed in line with where genuine economic activity is carried on, this does not amount to tax avoidance. ... In broad terms, companies are required to pay corporation tax in the country where they carry on the economic activity that generates their profits, not where their customers are located.[156]

Unusually, the facts are known in relation to Apple as a result of US congressional hearings (I suspect, better conducted than the UK equivalent). These have been well analysed by Antony Ting.[157] In short,

[156] HMRC, "Taxing the profits of multinational businesses" Issue Briefing (2012) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/89030/profits-multinationals.pdf*

[157] Ting, "iTax—Apple's International Tax Structure and the Double Non-Taxation Issue" [2014] BTR 40. See 91.1 (Hybrid entities).

there is no reason to think that Apple have avoided *UK* tax. The group has avoided Irish/US tax by Irish/US hybrid entities; and, perhaps, it has reduced Irish tax by informal transfer pricing agreements with the Irish Revenue.

2.12.1 *Transfer pricing*

It is often said that multinationals engage in avoidance through transfer pricing. For instance, Christian Aid say:

> There is debate about the extent to which companies engage in trade mispricing (artificially suppressing the income they earn from activities such as resource extraction, to reduce payments to government), but few would doubt that it has a significant impact on the incomes of governments in the global South.[158]

Transfer pricing is not strictly avoidance. It is in principle in the category of ineffective avoidance:

> We may well question whether the transfer pricing rules are adequate, ... but these are considerations relating to tax policy reform and not to tax avoidance.

The fundamental problem is not terminology, but that the facts needed to assess these claims are not in the public domain. Robert Maas says:

> The Public Accounts Committee believes that Starbucks overpays for its coffee. I am not an expert on the economics of coffee, but I am a bit puzzled that the PAC members consider themselves sufficiently knowledgeable in this area to be able to pass judgment (sorry, to express scepticism).
>
> The committee thinks that a 16.67% margin to a company that sources and buys coffee throughout the world, exercises quality control and works with local farmers, is excessive. Personally, I do not but then I don't have any expertise in coffee.
>
> The PAC also believes that the rate of interest on the inter-company loan from the US company (4.9%) is excessive, "at a higher rate than any similar loan we have seen". I do not know what similar loans the committee has seen, ie a loan to a loss-making business with little asset backing. I must say it looks modest to me...[159]

[158] Christian Aid, "Tax for the common good (2014)

[159] Maas, Taxation Magazine, 27 February 2013.

If transfer pricing is conducted with the consent of the tax authority concerned, it is not avoidance, though it may be unfair tax competition. The EC are currently pursuing state aid rules; it will be interesting to see what results.

2.12.2 *GAAR*

The GAAR guidance provides:

> Many of the established rules of international taxation are set out in double taxation treaties. These cover, for example,
> [1] the attribution of profits to branches or between group companies of multi-national enterprises, and
> [2] the allocation of taxing rights to the different states where such enterprises operate.
> The fact that arrangements benefit from these rules does not mean that the arrangements amount to abuse, and so the GAAR cannot be applied to them. Accordingly, many cases of the sort which generated a great deal of media and parliamentary debate in the months leading up to the enactment of the GAAR cannot be dealt with by the GAAR.[160]

In my terminology, these issues are non-avoidance, and in some cases, tax avoidance, but not tax abuse.

But where there is abuse, one country's domestic GAAR cannot resolve the issue. Apple's planning, for instance, turned on a hybrid entity:

(1) transparent under Irish tax law, and so not paying tax on its profits in Ireland;
(2) opaque in US tax law, and so not paying tax on its profits in the US.

CIOT say:

> As in much of the BEPS project, this is not a case of tax avoidance as previously understood; there can be no avoidance where there is no intent to tax in the first place.[161]

[160] HMRC, "GAAR Guidance" (2017) para B5.2
https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules
The House of Lords Select Committee made the same point

[161] CIOT, "BEPS Action 2: Neutralise the effects of hybrid mismatch arrangements (Recommendations for domestic laws) Response by CIOT (May 2014)
https://www.oecd.org/ctp/aggressive/comments-action-2-hybrid-mismatch-arrangements.pdf

If avoidance is action contrary to the intention of a Parliament, then this kind of planning may properly be described as tax avoidance if it is the case that:

(1) The intention of Oireachtas is that the entity's income should be taxed in the US, and
(2) The intention of US Congress is that the entity's income should be taxed in Ireland.

One might refer to it as international tax avoidance (though there is of course no such tax as "international tax"). The tax advantage is not contrary to the tax policy of either country in isolation; it is the result of a gap between the two.[162] In this case, the gap may in fact be intentional, in that both Ireland and the US deliberately chose to facilitate the planning;[163] in which case the planning should not be called avoidance at all.

Whatever the terminology, CIOT are right to say that the tools to deal with multinational planning/avoidance will not be the same as those used for domestic tax avoidance. It is an international problem which only international consensus can resolve. Hence the OECD BEPS project and Pillar 1 & 2.

We should never lose sight of the fact that public debates about tax avoidance are simultaneously fiscal, moral and political debates, raising issues of equality, redistribution, class, and tax competition; and sensitive ears may also detect elements of xenophobia.

[162] See de Boer & Nouwen (eds) *The EU's struggle with Mismatches and Aggressive Tax Planning* (2013), para 3.5.2 (General anti-abuse rule).

3.27 Tax avoidance: Critique
3.27.1 Avoidance: coherent concept?
3.27.2 Avoidance concept defended

3.1 TAAR/unallowable purpose test

This chapter discusses TAARs and the GAAR:

Abbreviation	Meaning	See
TAAR	**T**argeted **A**nti-**A**voidance **R**ule	*Discussed here*
GAAR	**G**eneral **A**nti-**A**buse **R**ule	3.26

I discuss TAARs in detail, but the GAAR only in outline.

3.1.1 *TAAR terminology*

I use the word "TAAR" to describe unallowable purpose tests in specific tax codes (as opposed to the GAAR, which is an unallowable purpose test which applies throughout taxation).

As far as I know, the term "TAAR" was first used in an HMRC press release of 5 December 2005, and the term "unallowable purpose" was first used in 1996, in the context of loan relationships.[1]

Before then the term used was motive (or purpose) test.[2] That label remains in use for the ToA motive defence, which is, I think, the oldest TAAR in current legislation.

"TAAR" has become a technical term, detached from its literal meaning. So IFS can say without obvious irony that:

> TAARs need to be well targeted ... costs can outweigh... lost revenues when a poorly targeted TAAR is compared with a well-targeted

[1] See 3.19.6 (Loan relationship TAAR guidance).

[2] A note on terminology. The word "motive" is not used in tax legislation, and is perhaps not ideal because a distinction is sometimes drawn between purpose and motive. However the label is convenient, reasonably accurate, and is standard in modern case law, at least in relation to ToA; see eg *HMRC v Fisher* [2021] EWCA Civ 1438. It originates from the Inland Revenue's Notes on clause 18 Finance Bill 1936 *https://www.kessler.co.uk/wp-content/uploads/2014/07/1365_001.pdf*

TAAR.[3]

"TAAR" is a tendentious, approbative term; who could object to *targeted* anti-avoidance? Parliamentary Counsel do not use it in statutory drafting. "Unallowable purpose test" is transparent but clumsy. I have very occasionally seen "specific anti-avoidance rule" (SAAR) but that does not seem better and has not caught on. Principal Purpose Test (PPT) would be an accurate label, but that term is used specifically in relation to DTAs. So *faute de mieux,* I use "TAAR" in its technical sense in this work.

3.2 Types of TAAR

3.2.1 *Types of unallowable purpose*

One can distinguish types of TAAR, depending on the nature of the unallowable purpose, and I coin the following terminology:

Unallowable purpose	**Type of TAAR**	**Example**
Tax avoidance (in strict sense)	Avoidance-purpose TAAR	ToA
Obtaining a tax advantage	Tax-advantage TAAR	TiS
Avoiding application/effect of rule	Arrangement-disregard TAAR	IHT resid prop

A tax-advantage TAAR is wider than an avoidance-purpose TAAR, as "tax advantage" includes cases where there is no element of tax avoidance. An arrangement-disregard TAAR may be wider still. The Joint Committee on Statutory Instruments said this wording is too wide and vague.[4] But no-one took any notice of that. It continues to be a common form for new TAARs.

3.2.2 *Matters tested*

One can distinguish types of TAAR, depending on what it is whose purpose is tested:

Matter tested	**Example**
Arrangement	*Most common form*
Transaction	TiS TAAR
Transfer/associated operation	ToA Motive Defence

[3] The same report refers later to a "wide-ranging TAAR". IFS, "Countering Tax Avoidance in the UK" TLRC discussion paper 7 (2009), para 8.18 *https://ifs.org.uk/sites/default/files/output_url_files/dp7.pdf*

[4] See 2.8.2 (Rule of Law v. other values).

3.2.3 *Consequences of TAAR*

One can distinguish types of TAAR, depending on the nature of the unallowable purpose:

(1) Restricting anti-avoidance rules (a defence, or "escape clause")
(2) Restricting a tax relief
(3) Protecting (or one might say, extending) a code of rules by providing that arrangements intended to avoid the code are disregarded

So a TAAR may be a shield or a sword. I coin the following terminology:

Consequence of TAAR	**My term**	**Example**
Defence/escape clause	TAAR defence	TIS;ToA motive defence
Disapply specific relief	Relief-restriction TAAR	CGT reorganisations
Disregard arrangements	Arrangement-disregard TAAR	Sch A1 IHTA

Some anti-avoidance rules confer a discretion on HMRC to counteract the avoidance; I call that a **"counteraction discretion"**. TiS is an example.

The same code may include more than one TAAR.

3.2.4 *List of TAARs*

The number of TAARs is very large.[5]

Here is a table of TAARs discussed in this book identifying:

(1) Type of unallowable purpose
(2) The arrangement or transaction whose purpose is tested
(3) The consequences of the TAAR

Topic	**Purpose**	**Test**	**Consequence**	**Para**	**Date**
ToA					
Motive defence	Tax avoidance	Transfer/assoc ops	Defence to ToA	52.1	1936
Company transferor	Tax avoidance	Arrangements	Defence to ToA	49.6	2024
Company transferor	Application	Arrangements	Disregard arrangement	49.6	2024
TiS (CT)	Tax advantage	Transactions	Counteraction	55.11	1960
CGT reorganisation	Tax avoidance	Arrangements	Disapply relief	58.6	1977
Loan relationships	Tax advantage	Transaction	Counteraction	3.19.8	1996
SDLT group relief	Tax avoidance	Transaction	Disapply relief	52.29.3	2005
Capital loss	Tax advantage	Arrangements	Disapply relief	65.21	2007
Mixed funds	Tax advantage	Arrangements	Just & reasonable	20.11	2008
TiS (IT)	Tax advantage	Transactions	Counteraction	55.11	2010

[5] Unallowable Purpose Draft Guidance p.7 gave the number as "over 200" in 2009. The number increases with every Finance Act.

s.3 TCGA	Tax avoidance	Arrangements	Defence to charge	64.16	2012
Remittance investment relief	Avoidance	Arrangements	Disapply relief	19.7	2012
Sales relief	Tax avoidance	Arrangement	Disapply relief	19.37.6	2012
GAAR	Tax advantage	Arrangements	Counteraction	3.26	2013
IHTdebt deduction	Tax advantage	Discharge of debt	Disallow debt	80.38	2013
Salaried LLP member	Application	Arrangements	Disregard arrangement	-	2014
Disguised trading	Application	Arrangements	Disregard arrangement	-	2014
DIMF/carried interest	Application	Arrangements	Disregard arrangement	73.26	2015
CRS	Application	Arrangements	Disregard arrangement	130.35	2015
Country reporting	Application	Arrangements	Disregard arrangement	2.8.2	2016
Land-dealing	Tax advantage	Arrangement	Counteraction	22.4	2016
Transactions in land	Tax advantage	Arrangement	Counteraction	22.16	2016
Royalty deemed source	Effect	Arrangements	Disregard arrangement	32.8.6	2016
Royalty withholding tax	Effect	Arrangements	Disregard arrangement	32.11.2	2016
Winding up	Tax advantage	Winding-up	Defence to charge	30.14.4	2016
Hybrids	Tax avoidance	Arrangements	Counteraction	91.23	2016
Residence-property	Effect	Arrangements	Disregard arrangement	82.17	2017
Profit fragmentation	Tax advantage	Arrangements	Defence to charge	53.16	2019
Land-rich company	Tax advantage	Arrangements	Counteraction	57.13.1	2019
Offshore IP receipts	Tax advantage	Arrangements	Counteraction	32.35	2020

TAARs occasionally include:

Topic	**See para**
Commerciality test	App. 5.2
“Reasonable to assume/ conclude” wording	App. 2.24
Clearance procedure	

Here is a list of such TAARs discussed in this work:

Topic	**Commercial**	**Reasonable to assume**	**Clearance procedure**	**Para**	**Date**
ToA	Y	Y		52.1	1936/2005
TiS (IT)			Y	55.11	1960
TiS (CT)	Y		Y	55.11	1960
CGT reorganisations	Y		Y	58.6	1977
Loan relationships		Y		3.19.8	1996
SDLT group relief	Y			52.29.3	2005
GAAR		Y		3.26	2013
IHT deduction of debt	Y			80.38	2013
Winding up		Y		30.14.4	2016
Profit fragmentation		Y		53.16	2019

3.3 Disentangling issues

Discussion of a TAAR should logically be split into a number of distinct issues:

(1) Identify the arrangements/transactions whose purpose is to be found
(2) In the case of a tax advantage/avoidance TAAR:
   (a) Is there a tax advantage/avoidance (with a sub-issue, the meaning of tax advantage/avoidance)
   (b) Is there a purpose to obtain that tax advantage/avoidance (with sub-issues, the meaning of purpose and how to ascertain purpose)
   (c) Is that a "main" purpose (with a sub-issue, the meaning of "main")

If the conditions of an arrangement-disregard TAAR are met, its application raises a further issue: what does one regard and what does one disregard? There is no case law on this yet.[6]

A counteraction discretion raises the question of what should be the counteraction.

The topics of this chapter are therefore:

- The meanings or concepts of purpose/main purpose
- The meanings or concepts of tax advantage and tax avoidance

But in practice discussion easily segues from one to the other.

3.3.1 *Guidance and case law*

In 2009 HMRC issued a discussion document, "Simplifying Unallowable Purpose Tests"[7] which included 60 pages of guidance (**"Unallowable Purpose Draft Guidance"**). Nothing further came of the proposal, but the guidance is discussed here where relevant.

Cases (and guidance) on one TAAR can shed light on others, though of course one must allow for differences of context and wording. It is impossible to discuss (say) the ToA motive defence without regard to non-ToA cases, and wrong to try:

(1) So far as the issue is "purpose", cases on any TAAR may be helpful.
(2) So far as the issue is "tax avoidance", cases on avoidance-purpose TAARs may be helpful.

As TAARs range across the whole of taxation there is a vast amount of material potentially in point. As in any large body of case law, it is

[6] For one set of examples, see 82.17 (Sch A1 TAAR).

[7] *http://webarchive.nationalarchives.gov.uk/20091102172916/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_029748*

possible to find cases or dicta supporting inconsistent views or approaches. It may be possible to reconcile some inconsistent cases by saying that it is only a question of fact, or that different TAARs have different principles, even if similarly worded. But where inconsistency exists it would be better to grasp the nettle and prefer one line of authority to the other.

3.4 View arrangement as a whole

3.4.1 *Test whole arrangement*

Most TAARs depend on the purpose of an arrangement. In ascertaining the purpose of an arrangement one looks at the whole arrangement. I would have thought that was self-evident, but the point is now confirmed in *Delinian v HMRC*:[8]

> it is necessary to consider whether the entire exchange of shares in question ... forms part of a scheme or arrangements of which the main purpose, or one of the main purposes, is avoidance of liability to capital gains tax or corporation tax. In making that ... inquiry, the scheme or arrangements that must be considered are **the whole** of the scheme or arrangements undertaken by the taxpayer in question, not a selected part or selected parts of them.

Delinian was a case on the CGT reorganisation TAAR.[9] The arrangement was as simple as can be: the shareholders exchanged their shares for:
(1) shares worth $85m, and
(2) Redeemable shares worth $21m

Redeemable shares were used (rather than $21m cash, as originally proposed) and with the intention of qualifying for SSE, and this was held to be a tax avoidance purpose.[10] But the redeemable shares were a small part (20%) of the total consideration. Looking at the matter as a whole, avoidance was a minor purpose, not a main purpose, of the arrangement; even though it was a main purpose (or perhaps the only purpose) of one element of the arrangement.

[8] [2023] EWCA Civ 1281 at [8] (emphasis original). This case was reported under the name *Euromoney* in the FTT and UT, because Euromoney changed its name to Delinian in 2023, following a takeover.

[9] See 58.6 (CGT reorganisation TAAR).

[10] See 3.20.3 (How evident is “evident”).

3.4.2 *Test transaction in wider context*

The TiS TAAR depends on the purpose of "the transaction in securities, or any of the transactions in securities".[11] This is different from standard TAAR wording which depends on the purpose of the "arrangement". Here the wording might seem to suggest that one looks for the purpose of the transaction(s) individually and in isolation; but *IRC v Brebner*[12] stated that one tests the purpose of those transaction(s) in the context of the whole arrangement:

> Admittedly, an object of the carrying out of the broad scheme by way of the resolutions was a tax advantage. But that which had to be ascertained was the object (not the effect) of each interrelated transaction in its actual context, and not the isolated object of each part regardless of the others.

3.4.3 *Identifying the arrangement*

This raises the question of identifying:
- the whole arrangement (where an arrangement is to be tested); or
- the wider context (where a transaction in securities is to be tested)

Identifying the arrangement is a question of fact for the FTT.[13] Identifying the wider context (for TiS) is similarly a question of fact.

In *Brebner,* the transactions consisted of two steps:

Step 1: A group of shareholders purchased (nearly) all the shares of a company, and borrowed on a short term loan in order to pay.

Step 2: In order to provide tax free funds for the shareholders to repay the loan:

(a) The company issued shares to its shareholders.

(b) The company immediately reduced its share capital (ie cancelled the shares which had just been issued) and made a payment to shareholders. This payment was at that time not subject to IT as a distribution.[14]

[11] See 55.11 (TiS TAARs).

[12] 43 TC 705 at p.715.

[13] *HMRC v Euromoney* [2022] UKUT 205 (TCC) at [49] and [54].

[14] See 30.9.10 (Issue of debenture/loan stock). But today the payment would constitute a distribution subject to IT, so HMRC would not need to rely on TiS; see 30.6.4 (Para C/D: Issue of securities). (Also the issue and immediate cancellation of shares would fall within the *Ramsay* principle).

There was at the time no CGT but disposal of the shares just purchased would not

HMRC argued that the focus should be on Step 2 alone; Step 1 was "purely introductory". The Special Commissioners regarded the two Steps together as the arrangement, despite the 2 year gap. That is not surprising: indeed it now seems almost self-evident.[15]

So although the transactions in securities which gave the tax advantage were at Step 2, the purpose was decided by looking at the whole arrangement, which included both Steps:

> The first chapter [Step 1] dealt with the transaction down to the acceptance of the group's offer [to purchase shares] ... when it was recognised, though no plans were made, that to implement that offer the group must rely upon, and extract, the cash lying in the company's coffers. ...
>
> It was then said that a second chapter opened and that the group then arranged that the available money for the payment of this project should be obtained from the coffers of the company as capital. Thus ... nearly two years later, the main object of the operation in this chapter was to enable a tax advantage to be obtained because, although it would have been possible to extract the cash from the company by a dividend ... the whole object of the reduction of capital was to extract the cash without paying tax; that, it was strongly urged, showed it to be a main object.
>
> So, the argument proceeds, while the first chapter was carried out for purely bona fide commercial reasons without having as a main object the gain of a tax advantage, it must be regarded as purely introductory to the all important second chapter two years later, when the scheme was devised to extract the cash by a reduction rather than the declaration of a dividend, so that it became plain that one of the main objects of the

have realised a substantial gain. This consideration may have been part of the unarticulated background to the decision.

[15] See App 2.2.5 (Sufficient unity test). Though HL thought the point might have gone the other way:

> [The taxpayer] has, in my view, wisely conceded that the Special Commissioners could have found that there were two separate chapters, one of which [Step 1] was purely commercial, the other of which [Step 2] had as its main object the obtaining of a tax advantage.

Had the Special Commissioners looked at matters that way, the consequence would have been to focus on the purpose of the transactions in securities in the context of Step 2, without regard to the context of Step 1. HL said a main object of Step 2 was to obtain a tax advantage. It might have been argued that the main object of Step 2, even viewed in isolation, was to repay a debt, not to avoid IT; but clearly HL would not have agreed with that.

> transaction was to enable a tax advantage to be obtained...
> I agree the question whether one of the main objects is to obtain a tax advantage is ... essentially a task for the Special Commissioners.[16]

It is considered that the same approach is applied:
(1) in TiS cases, where the question is the purpose of the transaction; and
(2) in cases on standard TAAR wording, where the question is the purpose of the arrangement

3.5 Purpose words: Terminology

TAARs generally use the word "purpose".

"Purpose" is one of a cluster of words describing volition:

Term	**Examples where used**	**See para**
Purpose	TAARs	*Discussed here*
	Definition of settlor: provide property for purpose of settlement	
	Deductible expenses: wholly/exclusively for purpose of trade	
Object	CT TiS TAAR	55.11
	Sale of occupation income	s.773 ITA
Intention	Domicile: Intend to reside permanently	4.7; 4.12; 4.24.8
	Residence: Intend to leave when possible	6.17.5
	IHT: Intention to confer gratuitous benefit	74.13
With a view to		
	Carry on business with a view to profit	App 5.3
	With a view to enabling/facilitating:	
	- a disposition	74.11
	- an arrangement	26.26.1
Deliberate	Penalties	126.9.3
Designed to	ToA motive defence condition B	52.6.2
Words common in general use but not much used in tax:		
	Seek to	
	Motive	

In ordinary English, and in general legal usage, these words are often (I would say, generally) used synonymously and interchangeably.

HMRC agree. Unallowable Purpose Draft Guidance provides:

> Romer LJ in the *Bentleys Stokes* case[17] uses the words 'object', 'motive' and 'purpose' quite indiscriminately... there is no difference between

[16] 43 TC 705 at p.718.

[17] *Bentleys, Stokes and Lowless v Beeson* 33 TC 491, a wholly/exclusively case.

> purpose and object.[18]

Cases on any statutory provisions using the word “purpose” may elucidate the meaning of “purpose” in a TAAR. For example, regard may be had to cases on the meaning of wholly and exclusively “for the purposes of a trade”[19] (“wholly/exclusively cases”) even though the context might seem rather different. Cases on (what is now) the (CT) TiS TAAR are relevant, though the word used there is “object” not “purpose”,[20] because object/purpose here have the same meaning.[21]

Lord Simon deplored what he called “chaotic terminology”:

> Will, volition, motive, purpose, object, view, intention, intent, specific intent or intention, wish, desire; ... such terms, which do indeed overlap in certain contexts, seem frequently to be used interchangeably, without definition ...[22]

It seems to me that this terminological richness should not cause much difficulty - indeed in practice we have no choice but to cope with it - provided one remembers that:

(1) Purpose/intention/object are generally used with the same meaning.

(2) They are occasionally used with specific and distinct meanings[23] but those senses should not be regarded as generally applicable.

In discussing any particular provision, it is best to follow the terminology

[18] Para 10040. In DTAs and other treaties, the doublet “object and purpose” is so standard that one rarely sees one word without the other. This reflects the wording of the Vienna Convention and the OECD Model; see 107.10 (DTA interpretation principles); 108.8.1 (OECD Model/BEPS PPT).

[19] This is the test of deductible expenses: s.34 ITTOIA.

[20] See 55.11 (TiS TAARs). “Object” is unusual, and it survives for historical reasons: had the provision been drafted today the word used would have been purpose. When the IT TiS code was rewritten, the word “purpose” replaced “object”.

[21] See *Wroe v HMRC* [2022] UKFTT 143 (TC) footnote at [112]:

> “The statutory wording under consideration in *Brebner* involved an earlier version of the TiS legislation which used the words "main object" rather than "main purpose". Neither party in this appeal, correctly in my view, sought to draw any distinction between the slightly different wording.”

And note how the Unallowable Purpose Draft Guidance set out below cites cases where the statutory word is “object” and cases where the statutory word is “purpose”.

[22] *DPP v Lynch* [1975] AC 653 at p.688.

[23] See 3.11.2 (Terminology of distinction).

used in the statute; though if that is not done, it is not likely to matter.[24]

The word "motive" may be used with the same meaning as purpose, as it is in the label "motive test". It may alternatively have a different nuance, but there is no need to pursue that here because "motive" is not used in statutory drafting.

3.6 Whose purpose?

3.6.1 *Purpose of arrangement*

Standard TAAR wording refers to arrangements "of which the main purpose" is tax avoidance/obtaining a tax advantage.

"Purpose", if it means anything, is an attribute of a mind.[25] When one says that an inanimate but man-made object such as a tool has a purpose, one is *attributing* to the tool the purpose in the mind(s) of the maker or user of the tool. When one says that an arrangement has a purpose, one is attributing to the arrangement the purpose(s) of purpose(s) the person(s) who make, or enter into the arrangement, ie, the parties to the arrangement. In short, the purpose of the arrangement is the purpose of those who make it.

HMRC agree. Unallowable Purpose Draft Guidance provides:

> **10200 Whose purpose?**
> A purpose test will define the person whose purpose is being considered. Some purpose tests refer to the purpose of a scheme or transaction: in this case, the purpose of the parties to the transaction needs to be considered.[26]

Where only one person enters into an arrangement, the purpose of the

[24] In *HFFX v HMRC* [2023] UKUK 73 (TCC) the FTT had used the word "intention" when the statutory provision used the word "object". The UT said at [128]:

> As regards the FTT's reference to "intention", while on the face of it that displays an error, when the paragraph is read ... with the surrounding context ... it is plain the FTT considered that tax reduction was not simply an intention but an object.

It would have been better to say that there was no error here: "intention" and "object" were used synonymously; but the end result is the same.

[25] This is self-evident, but if authority is needed, see *Chandler v DPP* [1964] AC 763 at p.804: "A purpose must exist in the mind. It cannot exist anywhere else."

[26] Similarly at p.14: "One particular difficulty with testing the purpose of arrangements rather than the purpose of a person is that arrangements are self-evidently inanimate. Any purpose inherent in such arrangements must usually be derived from the purposes of a person or persons who are party to the arrangements." Similarly at para 10110.

arrangement is that person's purpose in making the arrangement. Further consideration is needed where several persons enter into one arrangement with different purposes; see below.[27]

3.6.2 *ToA/Tis: purpose of transactions*

The ToA motive defence depends on "the purpose for which the *relevant transactions were effected*". Similar points apply. The purpose(s) of a transactions (transfer of assets and associated operations) is the purpose(s) of the person(s) who make or enter into the transaction, ie the parties to the transaction. Where only one person enters into an transaction, the purpose of the transaction is that person's purpose in making the transaction. Further consideration is needed where several persons enter into one transaction with different purposes; see below.[28]

Similarly, the IT TiS TAAR depends on the purpose of the transaction(s) in securities, which depends on the purposes of all the persons party to the transactions.

3.6.3 *Purpose of company*

In *Brebner v HMRC*:[29]

> The "object" which has to be considered ... cannot be narrowed down to a mere object of a company, divorced from the directors who govern its policy or the shareholders who are concerned in and vote in favour of the resolutions for the increase and reduction of capital. For the company, as such, and apart from these, cannot form an intention.[30] Thus the object is a subjective matter to be derived in this case from the intentions and acts of the various members of the group.

Company law/agency principles[31] should be applied to attribute to the company (and so to the arrangement/transfer/transaction to which the company is party) the purpose of the individual(s) who manage and control the relevant actions of the company; in other words, the company's

[27] See 3.7 (Multiple minds).

[28] See 3.7 (Multiple minds).

[29] 43 TC 705 at p.715. For the facts see 3.4 (View arrangement as a whole).

[30] Note how "intention" is used here as a synonym of the statutory word "object".

[31] See *El Ajou v Dollar Land Holdings* [1994] BCC 143 at p.150-151. The principles are not entirely clear, and different attribution principles may apply in different circumstances; see Watts, "Attribution and limitation" [2018] LQR 350.

directing mind(s) in respect of the relevant actions.[32]

3.7 Multiple minds

3.7.1 *Multiple minds: Arrangement*

What is the purpose of an arrangement if different parties to an arrangement have different purposes? One identifies the purpose of the arrangement by looking at the matter in the round, considering the purposes of all the parties to the arrangement.

Coll v HMRC, a case on the CGT reorganisation TAAR,[33] concerned a share-for-debenture exchange where:

(1) one shareholder intends to leave the UK and dispose of the debenture free of CGT, which is a tax avoidance purpose; but
(2) another shareholder intends to stay and does not have that purpose

The UT said:[34]

> s 137 is an all-or-nothing provision applying to all the shareholders ... if there is such a scheme or arrangement as is mentioned in s 137 then none of the shareholders qualify for [reorganisation relief] under s 135, other than unconnected shareholders holding 5% or less.

At first sight that seems rather surprising. It could operate unfairly. But it is difficult to see how any other conclusion could be reached from the statutory words. In practice the problem may not often arise.

3.7.2 *Multiple minds: ToA transfer*

A transfer will typically have only one transferor. But there might be more than one transferor in relation to the same transfer. How does one ascertain the purpose of the transfer if the transferors have different purposes? The same approach applies. One identifies the purposes of the transfer by looking at the matter in the round, considering the purposes of all the transferors, both direct and quasi-transferors.

In *IRC v Pratt*[35]

> There is a single transfer. That transfer was either made with the purpose

[32] This is not quite how the FTT put the point in *Fisher* at [290] - [297] but it comes close.

[33] See 58.6 (CGT reorganisation TAAR).

[34] [2010] UKUT 114 (TCC) at [10].

[35] 57 TC 1 at 53.

> or not with the purpose of avoiding liability to taxation. How could one apply that to, say, a two-transferor situation where A had the purpose of avoiding tax and B had only a simple commercial purpose?

The Revenue's solution was to look at each co-transferor separately:

> [The Revenue's] answer was to say that, in such a case, B could show that so far as he was concerned the purpose was a simple commercial purpose, and that will enable him to claim the benefit of [the Motive defence].

That would be the sensible outcome, but the judge rejected it:

> But this is not what the subsection says. It is not the transferor's purpose in effecting the transfer" but "the purpose for which the transfer was effected".[36]

At the CoA stage in *Fisher v HMRC*:[37]

> it is by no means uncommon for tax legislation to require a single purpose or object to be identified in circumstances where individuals with different motivations may have been involved... It is true that, if a transfer is considered to have had more than one transferor, a particular transferor might find himself unable to rely on [the ToA motive defence] because the overall purpose of the transfer was tax avoidance despite having no such purpose himself. In practice, however, cases of that kind can be expected to be rare: those promoting a transfer are likely to have had a common purpose.

This was common ground in the Supreme Court:

> the [ToA motive defence] focuses on the purpose for which the *transfer* was effected not the purpose of each individual whom HMRC seek to charge to tax.

But since the SC held that shareholders are not transferors in relation to a transfer made by a company, the problem of multiple minds will not often arise in a ToA context.

[36] 57 TC 1 at p.53. the judge added: "Of course, if, as is in my judgment the case, there can only be a single transferor to consider at a time, this subsection presents no problems whatsoever." But the judge did contemplate the possibility of multiple transferors, in cases of companies with two or three shareholders, even though that situation did not arise on the facts of *Pratt.*

[37] [2021] EWCA Civ 1438 at [70].

3.8 Effect/purpose distinction: Subjective test

It is (almost) self-evident that there is a distinction between:

(1) The effect of a transaction/arrangement
(2) The purpose of the transaction/arrangement

Purpose is subjective in the sense that it depends (at least usually) on what is in the mind of the individual. Effect is objective in that it does not (at least usually) depend on what is in the mind of the individual. Two transferors may carry out identical transactions, with the same effect, but with different purposes.

A transaction which has the effect of avoiding tax may not have that purpose. A transaction which does not have the effect of avoiding tax might nevertheless have had that purpose.[38]

In the context of TiS TAAR, I do not think this view has ever been disputed. In *IRC v Brebner*:[39]

> the question whether one of the main objects is to obtain a tax advantage is subjective

In the context of the ToA motive defence, HMRC once argued for an "objective purpose" test. But that view is no longer tenable and HMRC have abandoned it.[40]

[38] That was the case in *McGuckian* 69 TC 1, where transaction had the purpose of avoiding income tax, but did not have the effect of avoiding tax, because an anti-avoidance provision had been overlooked. If further authority is needed, which I doubt, see *Tower One St George Wharf Ltd v HMRC* [2022] UKFTT 154 (TC) at [63]:

> "Arrangements may be intended to achieve a purpose, even if they ultimately fail to achieve it due to an inherent flaw in the design of the arrangements themselves. Thus, arrangements can have the purpose of avoidance of liability to tax, even if ultimately no liability to tax is avoided."

In this case transactions had the purpose of avoiding CT, but did not do so because the scheme failed for reasons not made clear.

[39] 43 TC 705 at p.718. Similarly Lord Clyde in the Court of Session:

> "There is no doubt that this transaction did result in a tax advantage to the shareholders, ... but that is not the issue in this case. The material question is not what was the effect of each or all of the interrelated transactions; the question is what was the main object or objects for which any of them was adopted. [The TiS TAAR] draws a clear distinction between effect and object."

See too *Addy v IRC* 51 TC 71 at p.81E.

[40] I considered the argument in detail in the 2020/21 edition of this work para 49.9.4 (Objective purpose?) and 49.9.5 (Objective test abandoned), but omit that now as it

Draft ToA guidance provided:

> **10050 What is purpose?: effects do not determine purpose**
> There is a clear difference between the purpose of a transaction and its effects. The effects are the advantages or benefits actually obtained (whether intended or not); these benefits can often be computed mathematically and can usually be measured objectively...
> In the Special Commissioners' decision of *Snell v HMRC*,[41] it was observed that the implications of [the *Brebner* case] were that:
>
> > "That case is also authority for the proposition that there is a clear distinction between the effect and the object of a transaction. I take that to mean that however directly a transaction leads to a tax advantage the question whether that was one of its objects is not answered by that clarity of effect"
>
> In *Mallalieu v Drummond* [42] Lord Brightman said:
>
> > "The object of the taxpayer in making the expenditure must be distinguished from the effect of the expenditure."
>
> Thus, merely reviewing the effects of a transaction will not usually enable a conclusion to be drawn as to the taxpayer's purpose.

When the draft guidance moved the INT Manual, this passage was not included, but there is no reason to think that HMRC's view has changed.

3.8.1 *The limit of subjectivity*

Unallowable Purpose Draft Guidance para 10030 provides:

> Thus, where there is a purpose test, the consequences of a transaction will be dependent on the subjective purpose of the taxpayer. It is entirely

is of historical interest only. In brief, an objective test was put forward in RI 201 and said to be supported by a sentence in *IRC v Willoughby* [1997] STC 995 at p.1003:

> "Where the taxpayer's chosen course is seen upon examination to involve tax avoidance (as opposed to tax mitigation), it follows that tax avoidance must be at least one of the taxpayer's purposes in adopting that course, whether or not the taxpayer has formed the subjective motive of avoiding tax."

But the subjective test was affirmed in *Beneficiary v IRC* [1999] STC (SCD) 134 at p.143; *Carvill v IRC* [2000] STC (SCD) 143 at [9]–[13]; and *Burns v HMRC* [2009] UKSPC SPC00728 at [36]. In *Fisher v HMRC* [2021] EWCA Civ 1438 at [82] it was common ground that the test was subjective. The sentence set out above was set out uncritically in *Tower One St George Wharf Ltd v HMRC* [2022] UKFTT 154 (TC) but hopefully that will turn out to be a blip.

See too App. 5.4.1 (Does objective/subjective matter).

[41] [2008] UKSPC SPC00699 at [23].

[42] 57 TC 330 at p.365; this was a wholly/exclusively case.

> possible that two taxpayers entering into similar transactions, but with different purposes, will be taxed differently....

This can lead to uncomfortable consequences. In *Mallalieu v Drummond*[43] a wholly/exclusively case, it lead to the position that the cost of a barrister's suit to wear in court would be deductible if and only if the barrister preferred coloured clothes to black. The majority thought that was ridiculous, and one can understand why. They decided that purpose turned on the barrister's subconscious purpose, and what was her subconscious purpose was decided by the Court, not by the barrister. So (at a cost of logical rigour[44]) they fell back on what one might describe as an objective test of purpose (if that is not a contradiction in terms):

> As the taxpayer's "object" in making the expenditure has to be found, it inevitably follows that (save in obvious cases which speak for themselves) the Commissioners need to look into the taxpayer's mind...[45]

Mallilieu v Drummond was, it seems, an obvious case which spoke for itself.

I cannot see how a case of this type could arise in the context of a TAAR. But HMRC will not rule it out:

> However, in the *Vodafone* case Millett LJ said that:
>
> > "Some consequences are so inevitably and inextricably involved in the payment that unless merely incidental they must be taken to be a purpose for which the payment was made."[46]
>
> So, in some circumstances, the "inevitable consequences" of a payment do allow the inference to be drawn that a particular purpose existed, even if that was only an unconscious motive of the taxpayer.

The CT Manual makes similar comments on comparable wording in the winding-up TAAR.[47]

3.9 How to identify purpose

How does one ascertain an individual's (subjective) purpose? All facts

[43] 57 TC 330.

[44] Cf the Oliver Wendel Holmes' apothegem: "The life of the law has not been logic: it has been experience." These are deep waters.

[45] *Mallalieu v Drummond* 57 TC 330 at p.365. Note that "object" is here used as a synonym of "purpose".

[46] *Vodafone Cellular v Shaw* 69 TC 376.

[47] See 30.14 (Winding-up TAAR).

which may shed light on purpose must be taken into account. This is self-evident, but if authority is needed, see *IRC v Brebner:*

> The question whether in fact one of the main objects was to avoid tax[48] is one for the Special Commissioners [now the first-tier tribunal] to decide upon a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence.[49]

An assertion by an individual of their intention is not definitive, because that assertion may be self-serving, and not credible in the light of other facts.[50]

It is relevant to consider two objective questions:

(1) did the transfer significantly reduce tax? ie was that the effect
(2) was a tax reduction reasonably foreseeable at the time?

These are objective indicators of subjective intention. If the tax reduction was not reasonably foreseeable, it is not likely to have been the purpose to achieve it.

Conversely the fact that a tax advantage is reasonably foreseeable as a consequence of the transfer may be cogent evidence of subjective purpose. We normally have the purpose of achieving the foreseeable consequences of our acts. However, this is not necessarily so. First the transferor may not have foreseen the advantage even though a reasonably well-informed person might have done so: no-one at all times acts with the foresight of the reasonably well-informed.[51]

In *Brebner* there were two issues, identifying the arrangement, and whether a main purpose of the arrangement once identified was to obtain

[48] This is a slightly loose paraphrase of the statutory question, which is whether the transactions "had as their main object, or one of their main objects, to enable tax advantages to be obtained"; but nothing turns on that.

[49] 43 TC 705 at p.718.

[50] See too 4.12 (Statements of domicile).

[51] Contrast s.8 Criminal Justice Act 1967:

"A court or jury, in determining whether a person has committed an offence,—

(a) shall not be bound in law to infer that he intended or foresaw a result of his actions by reason only of its being a natural and probable consequence of those actions; but

(b) shall decide whether he did intend or foresee that result by reference to all the evidence, drawing such inferences from the evidence as appear proper in the circumstances."

This is also a common law approach: *Frankland v The Queen* [1987] AC 576.

a tax advantage.[52] These are both questions of fact not law.

3.10 Purpose: Party's adviser/agent

In ascertaining purpose, one should have regard not only to the mind of the relevant individuals, but also the mind of those acting for or advising them.[53]

Where a person is acting by an agent or attorney, the purpose of the agent/attorney should, on normal agency principles, be attributed to them.

If a person relies on advisers (typically professionals but also others, such as parents) and executes documents with no more than a vague idea of approving proposals put to them, they have adopted the purpose of their advisers or (which comes to the same thing) the purpose of their advisers should be attributed to them. This is so even if they have not read, or not understood, the advice. This is (almost) self-evident, but authority can be cited if needed. In *IRC v Pratt*, a ToA case, an individual (who transferred £80k to an offshore company) "did not understand the scheme: it was masterminded by his own professional advisers". Nevertheless, "he, *through his advisers*, was fully acquainted with the fact that what was to follow was a tax avoidance scheme, he must fall fairly within the section".[54]

[52] See 3.4 (View arrangement as a whole).

[53] See too 99.33 (Purpose: Settlor's adviser/agent).

[54] 57 TC 1 at pp.47, 49. The same point is made in *Burns v HMRC* [2009] UKSPC SPC00728 at [20] and [39]: "The purpose for which the two girls effected the transactions was simply to do what their parents suggested, and it seems appropriate to me to proceed on the basis that the two girls effectively sought to achieve those purposes that influenced their parents."

Hoey v HMRC [2019] UKFTT 489 (TC) at [145] - [161] offers another example, if needed. This concerned an offshore EBT: see 52.25 (Employee benefit trusts). The naive Mr Hoey "had no idea that the arrangements involved tax avoidance". But the ToA motive defence did not apply. The point was upheld on appeal; [2021] UKUT 82 (TCC) at [241] - [242].

I stress this because the opposite view was taken in *Philippi v IRC* 47 TC 75 at p.114:

> "Young Mr. Philippi ... said that he never had any idea of tax in his mind when he made that transfer. It was true that it was saving him a great deal in UK tax ... but that had not occurred to him; the only reason why he had made the transfer was because his father and other members of the family had told him that he ought to do so. He appears to have had no idea why they gave him that advice."

"Young Mr Philippi" was aged 23; that did not seem young when I wrote the 1st edition of this work, though it does now. But however that may be, a court would nowadays hold that he had adopted the (tax avoidance) purpose of his father.

Likewise in *Addy v IRC,* a TiS case:[55]

> [The taxpayer] says one has to look simply to the minds of the [directors], but I would think also that of their professional adviser"

The INT Manual provides:

> **INTM602960 Avoidance purpose exemption: Purposes** [Jul 2023]
> ... If any professional advice obtained in a particular case is treated as a relevant factor and the individual states that they had no intention to avoid tax, it is reasonable to see whether the advice they acted on is consistent with that contention.
>
> If the individual proceeds in accordance with advice obtained (or simply instructs the agent to proceed), the purpose of the adviser would on normal principles be attributed to the individual, whether they understood the implications of the advice or not. For example, if evidence emerged that an individual's adviser or agent had
>
> - devised a particular structure, or
> - recommended or arranged the creation (or use) of a particular non-resident entity
>
> for the purpose of saving UK tax, that purpose should be taken into account in determining, from all the circumstances of the case, the purposes for which the transactions were effected. That is the case whether or not the adviser had expressly informed the client of the purposes behind the transactions. For example, it would be sufficient if evidence emerged from third parties or from the agent's working papers.

For the purposes of ToA New Conditions A and B, s.737 ITA provides an express rule to this effect:

> (5) In determining the purposes for which the relevant transactions or any of them were effected, the intentions and purposes of any person within subsection (6) are to be taken into account.
>
> (6) A person is within this subsection if, whether or not for consideration, the person—
>
> (a) designs or effects, or
>
> (b) provides advice in relation to,
>
> the relevant transactions or any of them.

This (more or less) restates the general law and so makes no difference to the position. So it does not matter that this provision is not applicable to other TAARs, or other provisions referring to purpose.

[55] 51 TC 71 at p.81g.

Of course the adviser's purpose is only attributable to the individual if or so far as the individual adopts or accepts the advice, and the advice may be privileged.[56]

3.10.1 *Significance of tax advice*

If a person enters into a transaction without any tax advice, or without tax planning advice, that may suggest that tax saving was not a purpose of the transaction. But of course it does not prove it: possibly the person understood the tax position without needing advice (or thought they did).

If a person does take tax advice before entering into a transaction, that does not suggest that tax saving was a purpose of a transaction, because it is sensible to consider the tax position before doing anything:

> Apparently this part of the country[57] is inhabited by persons so unsophisticated that they enter into transactions without thinking of the Income Tax Acts, whereas everybody who does anything ought to think, how are the Income Tax Acts going to affect, or will they affect at all, this transaction which I am entering into?[58]

The significance of tax advice is discussed in *Ebsworth v HMRC*:[59]

> Much was made ... of certain of the notes made by Mr. Ebsworth's tax advisers. ... I did not find them particularly illuminating in reaching my decision as they were what one would expect from a tax adviser engaged to advise on tax rather than as a commercial or other adviser. Taking tax advice does not of itself make tax avoidance one of the main objects of the transactions concerned....
>
> 62. The fact that Mr. Ebsworth sought tax advice ... does not of itself mean that tax avoidance was a main object of the transactions.

GAAR guidance makes the same point:

[56] See 52.34.3 (Professional privilege).

[57] The reference is to Seaham, a small town in County Durham.

[58] *Seaham Harbour Dock Co v Crook* 16 TC 333 at p.340. Likewise *Khan v HMRC* [2021] EWCA Civ 624 at [1]: "a cautionary tale, which illustrates all too graphically the importance of seeking specialist tax advice before entering into commercial arrangements that might have adverse tax consequences, however remote that risk might appear."

[59] [2009] UKFTT 199 (TC) at [13]. In *Fisher v HMRC* [2020] UKUT 62 (TCC) at [107] it was common ground that "The mere fact of taking tax advice does not mean there is a tax avoidance motive".

> It is important to note that the fact that tax advice has been obtained is not, on its own, an indication that the obtaining of a tax advantage is a main purpose of the arrangement. Where large sums are involved many taxpayers will routinely seek professional advice, including tax advice.[60]

In *Fisher* in the Upper Tribunal it was common ground that:[61]

> Awareness of tax aspects does not equate to having a tax avoidance motive.

On the other hand, much depends on what the advice says. In *BCM*, the accountants had said that their proposed scheme was "a bespoke piece of tax planning developed by Ernst & Young". That was taken to support the Tribunal's finding a main object to obtain a tax advantage.[62] One should bear in mind how notes of advice may be scrutinised unsympathetically a decade later, in determining the purpose of a transaction. Though that is easier said than done.

3.11 Foresight/purpose distinction

3.11.1 *Making the distinction*

It is (almost) self-evident that there is a distinction between:

(1) Foresight - anticipating that a result will follow from an act

(2) Purpose - having the purpose of achieving that result (ie wanting it)

Foresight is a necessary but not sufficient condition of purpose. Purpose requires foresight, but foresight does not entail purpose.[63]

This is easiest to see where a result is foreseen but not desirable. A purchaser of shares can foresee that the purchase incurs stamp duty, but will not enter into the transaction with the purpose of paying stamp duty.

The same applies where the foreseen result is a matter of indifference.

The same may apply where the foreseen result is desired, but it is not in

[60] HMRC, "GAAR Guidance" (2017) para C3.7. *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[61] [2020] UKUT 62 (TCC) at [107].

[62] *HMRC v BlueCrest Capital Management* [2022] UKUT 00200 (TCC) at [141].

[63] See too Kaveny, "Inferring Intention from Foresight" 120 LQR 81; Avery Jones "The mental element in anti-avoidance legislation" [1983] BTR 22
Bratman, "Intention, Plans & Practical Reason" (1987), chapter 10 (Intention and expected side effects)
https://www.foreigndomiciliaries.co.uk/index.php/Documents_archive

fact the purpose. It may just be "the icing on the cake", or a mere "by-product".

Mallalieu v Drummond (a wholly/exclusively case) offers this example:[64]

> An expenditure may be made exclusively to serve the purposes of the business, but it may have a private advantage. The existence of that private advantage does not necessarily preclude the exclusivity of the business purposes. For example a medical consultant has a friend in the South of France who is also his patient. He flies to the South of France for a week, staying in the home of his friend and attending professionally upon him. He seeks to recover the cost of his air fare. The question of fact will be whether the journey was undertaken solely to serve the purposes of the medical practice. This will be judged in the light of the taxpayer's object in making the journey. The question will be answered by considering whether the stay in the South of France was a reason, however subordinate, for undertaking the journey, or was not a reason but only the effect. If a week's stay on the Riviera was not an object of the consultant, if the consultant's only object was to attend upon his patient, his stay on the Riviera was an unavoidable effect of the expenditure on the journey and the expenditure lies outside the prohibition in [what is now s.34 ITTOIA].

For example, suppose a purchaser wants asset A, but in order to acquire it has to buy a company which holds two assets, A and B.

(1) It may be that his purpose is to acquire asset A but not to acquire B, because:
    (a) he would rather not acquire B, but has to do so to get A
    (b) it is a matter of indifference whether he acquires B or not (eg suppose asset B is cash which the company needs)
    (c) he is pleased to acquire B as well as A, but it is not sufficiently important
(2) It may be that the purpose is to acquire both assets.

RI 201 makes the point this way:

> "Purpose" is taken to be the end it is sought to achieve by the transaction.[65]

[64] 57 TC 330 at p.365.

[65] This is based on *Newton v CT* [1958] AC 450 at p.465. Note by the way how use of the passive voice ("it is sought to achieve") ducks the issue of whose purpose one is looking for. Contrast 6.22.3 (Para 26(2) employment-income test) where a similar

Purpose in a TAAR is what an individual actually wants, or hopes, to achieve (not merely foresight).

3.11.2 *Terminology of distinction*

Sometimes an attempt is made to desynonymise the words intention/ purpose/object, in order to provide labels for a purpose/foresight distinction. But none of these have found general acceptance.[66]

For instance, clause 14(1) of the draft Offences Against the Person Bill[67] defines intention in this way:

> A person acts *intentionally* with respect to a result if—
> (a) it is his *purpose* to cause it, or
> (b) although it is not his purpose to cause it, he knows that it would occur in the ordinary course of events if he were to succeed in his purpose of causing some other result.

Paras (a)/(b) express the purpose/foresight distinction. Applying this terminology to a purchaser of shares, the purchaser would have the *intention* to incur stamp duty but not the *purpose* of incurring it.

However the words "purpose" and "intention" are not always understood that way:

> The word [purpose] can be used to designate either
> [1] the main object which a man wants or hopes to achieve by the contemplated act, or ...
> [2] those objects which he knows will probably be achieved by the act, whether he wants them or not.
> I am satisfied that in the criminal law ... its ordinary sense is the *latter* one.[68]

Applying this terminology to the purchaser of shares, one would say that the purchaser did not have the *object* of incurring stamp duty, but did have the *purpose* of doing so.

It is unfortunate that there are no standard words to express a foresight/ purpose distinction. Butit does not matter much, as long as one bears the distinction in mind, and, where appropriate, defines or explains the terms

point arises in connection with the phrase "if value were received".

[66] Bentham's terminology was direct and oblique intention: *The Principles of Morals & Legislation*, Chapter VIII (Of Intentionality).

[67] A Home Office consultation paper, 1998, never implemented.

[68] *Chandler v DPP* [1964] AC 763 at p.804, emphasis added.

being used.

3.12 Choices and purpose

We must begin with a "celebrated"[69] passage in *IRC v Brebner*:[70]

> [1] ... when the question of carrying out a genuine commercial transaction ... is reviewed, the fact that there are two ways of carrying it out - one by paying the maximum amount of tax, the other by paying no, or much less, tax - it would be quite wrong, as a *necessary* consequence, to draw the inference that, in adopting the latter course, one of the main objects is, for the purposes of the section, avoidance[71] of tax.
>
> [2] No commercial man in his senses is going to carry out a commercial transaction except upon the footing of paying the smallest amount of tax that he can.
>
> [3] The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners...

3.12.1 *A close reading*

This passage is cited so often that it seems canonical. It is in general a mistake to construe a passage from a judgment as if it was a statute, but let us examine it closely.

The third sentence is not contentious.

The second sentence is not a proposition of law: it is a statement of fact. It is self-evident: of course a commercial person carrying out a commercial transaction would seek to pay as little tax as possible.

So it is the first sentence which matters, or seems to. It is a proposition of law. But it is (almost) self-evident. No-one would seriously contend that where there are two ways of carrying out a commercial transaction,

[69] *IRC v Willoughby* [1995] STC 143 at p.167.

[70] For the facts of *Brebner* see 3.4 (View arrangement as a whole).
There are minor stylistic differences between the law reports [1967] 2 AC 18 at p.30, and 43 TC 705 at p.718. I here set out the AC version which is more authoritative and more correct (in particular, using the word *speech* rather than *judgment* in the first line). The italic emphasis is in the original printed report, though it is missing in the LexisNexis database.

[71] This is a loose paraphrase of the statutory provision, which asks whether main object, or one of their main objects, is to enable "tax advantages" to be obtained. Lord Upjohn is here considering purpose, not the tax avoidance/mitigation distinction; though that distinction might perhaps be thought to lie behind the dictum, or to be embryonically present.

there is a *necessary* inference that, in adopting the latter course, a main purpose *must* be the avoidance of tax or (to use the correct statutory words) to obtain a tax advantage.

But this does not take us far, because there is still a *possible* inference that the main purpose *may* be a tax advantage. The proposition at [3] is statement of the trivial. It addresses a "straw man" argument that a choice of the lower tax route necessarily means a tax advantage purpose.

3.12.2 *Non-commercial transactions*

What *Brebner* says about commercial transactions is equally true of a non-commercial transaction. It is obvious that:

> [1] ... when the question of carrying out a genuine transaction, *commercial or not* ... is reviewed, the fact that there are two ways of carrying it out - one by paying the maximum amount of tax, the other by paying no, or much less, tax - it would be quite wrong, as a *necessary* consequence, to draw the inference that, in adopting the latter course, one of the main objects is, obtaining a tax advantage.
>
> [2] No person in his senses is going to carry out a transaction *commercial or not,* except upon the footing of paying the smallest amount of tax that he can.
>
> [3] The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners...

For instance, a person making a gift to charity, a non-commercial transaction, would seek to pay as little tax as possible, and there are often two or more ways of carrying that out, paying more or less tax. But even understood or extended in this way, it remains the case that the statement does not take us very far.

In *Allam v HMRC* the FTT said:

> We accept that, in a particular case, the fact that an alternative transaction existed and was perhaps considered but rejected, may be a factor in deciding whether or not an inference can be drawn that the obtaining of an income tax advantage was a main purpose of a transaction.

In *Fisher v HMRC* the FTT said:[72]

> the *Brebner* dicta does not go as far as suggesting that if you take the lower tax route this cannot mean you have a tax avoidance purpose.

[72] [2014] UKFTT 804 (TC) at [283] citing 70 TC 57 at p.108.

> While taking a lower tax route does not mean that by that fact alone it must be inferred that one of the main objects is tax avoidance, tax avoidance is not precluded.

Quite so.

The question then is *when* does a conscious choice of a tax advantageous course evidence a tax avoidance purpose in its own right in addition to any other (commercial) purpose? Lord Upjohn does not give an answer to this: to say at [3] that it is a question of fact for the Commissioners, if true, is not exactly helpful.

A useful approach may be to ask: does the tax advantage form an incidental or subsidiary consequence of achieving the commercial transaction (as opposed to being an end in its own right)? If so, there is no tax avoidance purpose and *a fortiori* not a main purpose. This is an evaluative test which is perhaps easier to state than to apply, but it may sometimes be helpful.

3.13 Commercial needs and purpose

I suggest the spirit of *Brebner* lies here: where one purpose (or the principal purpose) for a transaction is a commercial (non-tax) purpose, one should be *a bit slower* to conclude that another purpose is tax avoidance than in the case of a purely tax motivated transaction.

Another way to put it may be to ask: does some overwhelming commercial objective frank or override any tax advantage purpose? That might explain *Brebner*. The shareholders held their eye only on the commercial necessity to acquire the shares. Tax fell outside their range of vision. Or even if that seems implausible, the Special Commissioners were entitled so to decide. That line of thinking might be said to represent the spirit of the decision.

If that is the law, it is unfortunate. It does not really make sense to provide a different approach to purpose when considering commercial transactions. The same principles should apply to any transaction carried out for primarily non-tax reasons including "ordinary family dealing".[73] Still, right or wrong, *Brebner* seems to suggest that the Courts should take a generous and sympathetic approach in relation to commercial dealings.

However the cases are not consistent.

[73] *Mangin v IRC* [1971] AC 739 at p.751 and p.756, restating the *Brebner* principle in the context of an extremely free reading of a New Zealand statute.

HMRC v Fisher neatly raised this issue. It was not a choice case, as the taxpayer had no real choice to make; but it was a commercial case because the transfer to a foreign company, which avoided Betting Duty, was essential in order to achieve the business purpose, which was to save the business. The business could not run at all if it had to pay Betting Duty (which its foreign competitors did not). The "choice" was to make the transfer or close down the business.

CA rejected an argument that the purpose was saving the business and betting duty avoidance was "simply the means of achieving" that purpose:[74]

> The avoidance of betting duty and saving of the business were inseparable. The main purpose of the transfer of the business was to avoid betting duty and thereby to save the business: the two were perceived as going together. Put slightly differently, there can be no question of [the ToA motive defence] applying because a transferor hopes that an intended avoidance of liability to taxation will achieve some further end. It will rarely, if ever, be the case that a transferor wishes to avoid liability to tax for the sake of it; in normal circumstances, a transferor will be intending to use the avoidance of tax to attain another object. That being so, were someone able to escape [ToA] by looking beyond the tax avoidance to its consequences, the motive defence would, as the FTT pointed out, be generally available. That will not have been Parliament's intention.

The situation in *Fisher* was that the tax charge would destroy the business: no business was possible unless the tax could be avoided/mitigated. But that is not in the least unusual. Everyone knows, or should know, that investors are interested in *post-tax* returns; and much business activity which would be profitable pre-tax is not profitable post-tax, and does not take place, as a result of taxation. That is unavoidably the case.

On this basis the decision in *Fisher* on this point ought to be upheld on appeal. But the cases are not consistent.

Allam v HMRC[75] was a TiS case on simple facts: The taxpayer sold one company to another company. The vendor received a capital sum from the company which was an Income Tax Advantage.[76] The question was whether one of the main purposes was to obtain the IT Advantage.

The taxpayer's purposes were (1) to facilitate borrowing by the group (a commercial purpose) and (2) to obtain funds for retirement (described as

[74] [2021] EWCA Civ 1438 at [91].

[75] [2020] UKFTT 216 (TC) at [210].

[76] See 55.14.4 (Sale to close co for cash).

a personal purpose). The TiS motive-defence TAAR applied:

> (1) [the taxpayer gave clear reasons for the transfer: the need to unite ADL and AML under common corporate ownership to support the bank financing ... and the desire to create a cash fund for his retirement. ... Those reasons are either "commercial" or "personal" reasons, to adopt the terminology used by HMRC, but the crucial point is that they are not the purpose of obtaining an income tax advantage.
> (2) ... The second reason[77] that HMRC gave was that the transaction could have been undertaken in an alternative manner which would have incurred an income tax cost....
> As regards the second argument, ... the mere fact that there exists an alternative means of undertaking a transaction which has a different tax result is not conclusive of the question as to whether an inference can be drawn that the obtaining of an income tax advantage was a main purpose of the transaction.
> We accept that, in a particular case, the fact that an alternative transaction existed and was perhaps considered but rejected, may be a factor in deciding whether or not an inference can be drawn that the obtaining of an income tax advantage was a main purpose of a transaction. However, we do not draw that inference on the facts of the present case. Dr Allam did not consider an alternative transaction. Dr Allam had a clear purpose for the transfer (to unite the companies under common ownership) and a clear purpose for his desire to receive the proceeds in cash (to fund his retirement). The latter was not a commercial reason. It was a personal reason, but it was not a tax reason.
> (3) The effect of the transaction was to realize the value of ADL and to use that value to support Dr Allam's desire for a fund for his retirement. The sale of the shares to AML was the simplest transaction to undertake to achieve that purpose and the purpose of uniting the companies under common ownership.
> (4) The other surrounding circumstances do not support the inference that Dr Allam was seeking to obtain an income tax advantage: he received significant dividends from the companies in the tax year in question including the dividend of £550,000 from ADL representing almost 50% of the retained profits in that company.
> 211. For these reasons, in our view, ... the obtaining of an income tax advantage was not a main purpose of Dr Allam in being party to the transaction. The income tax advantage was merely an incidental benefit that was obtained as a result of the transaction.

[77] The first reason turned on unusual facts and is not of general interest.

The reader may think that HMRC had the better of the argument. If the taxpayers argument is right, it could apply generally. The purpose of a transaction extracting value from a company is never to obtain a tax advantage for its own sake: a tax advantage is always a means to an end, not an end in itself. Money is obtained in order to be spent in some particular way. In *Allam* the purpose was to obtain a pension; would it be any different if the purpose was to pay for a house? or a chattel? or to gamble? The law would be more consistent if the decision had been reversed on appeal. But on the basis that the question was one of fact, the UT did not reverse it.

3.14 "Main" purpose

3.14.1 *Main purpose: Requirement*

TAARs generally refer to main purpose.

It is helpful to have a term for a purpose which is not a main purpose. I refer to that as a **"minor purpose"**.

Standard TAAR wording refers to a main purpose, and a minor purpose does not pass the test. The ToA motive defence is different and, I think, unique: it refers to "the purpose or one of the purposes" of transfers or associated operations: it does not say "main" purpose.[78] It would seem sensible to bring the wording of the ToA motive defence ("the purpose or one of the purposes") into line with standard TAAR wording, ("main purpose or one of the main purposes"). But the change would be more trouble than it is worth, unless made as part of a wider ToA reform. In practice it does not make much difference.

3.14.2 *Main purpose: Meaning*

In *Travel Document Service v HMRC*:[79]

[78] For the reason for the omission of the word *main*, see 52.5 (Enactment history). Outside TAARs, an example is the test of deductible expenditure where the expenditure must be incurred wholly and exclusively for the purpose of the trade. This is self evident but if authority is needed, see *Mallalieu v Drummond* 57 TC 330 at p.365: "If it appears that the object of the taxpayer at the time of the expenditure was to serve two purposes, the purposes of his business and other purposes, it is immaterial ... that the business purposes are the predominant purposes intended to be served."

[79] [2018] EWCA Civ 549 at [48]. This was said in relation to the main purpose test in the loan relationship TAAR, but the comment applies generally in TAARs.

> I do not accept that, as was submitted by [HMRC], "main", as used in [the loan relationships TAAR], means "more than trivial". A "main" purpose will always be a "more than trivial" one, but the converse is not the case. A purpose can be "more than trivial" without being a "main" purpose. "Main" has a connotation of importance.

HMRC formerly argued that:

> any purpose which is more than incidental is prima facie a main purpose.[80]

That is no longer tenable. Still, if a purpose is just incidental, then it is clearly not a main purpose. That does not take us very far, as "incidental" is itself vague and evaluative. In *Allam*, cited above, "The income tax advantage was merely an incidental benefit that was obtained as a result of the transaction."

The temptation to explain a vague and evaluative expression (such as main purpose) with a paraphrase is irresistible. One sometimes sees "more than mere icing on the cake"[81] but that metaphor (I am tempted to say, stale metaphor) does not help at all. One also sees "just a bonus", which is not much better, and "one of the primary aims" but "primary" is just a synonym of "main"; and by-product.

In *Tower One St George Wharf Ltd v HMRC:*[82]

> A purpose can be a "main" purpose, even if it is not as significant a consideration as another main purpose. Thus, if arrangements are driven by two particularly significant aims, A and B, as well as other subsidiary aims, both A and B may both be "main" purposes even if the taxpayer considers A to be more important than B.
>
> Indeed, purpose B could be a main purpose of the arrangements, even if the arrangements would not have been entered into at all but for the need to achieve purpose A. Even if purpose A is the sole reason for entering into arrangements in the first place, once the decision to enter into the arrangements has been taken, an additional purpose can become an additional main purpose of the arrangements. Whether this is the case will be a question of fact, depending on the individual case. The question is whether a purpose is one of the main purposes, not whether it is the

[80] HMRC Discussion Document "Simplifying Unallowable Purpose Tests" (2009) para 10140.

[81] *Sema Group Pension Scheme v IRC* 74 TC 593, in the High Court judgment at [53].

[82] [2022] UKFTT 154 (TC) at [69]-[70].

> most important purpose, and not whether the arrangements would be proceeded with in the absence of any of the other purposes.

That is self-evident.

3.15 Burden of proof

3.15.1 *Identifying scheme*

In *Coll v HMRC*[83]

> We agree with [HMRC] that there is no obligation on HMRC to identify the scheme or arrangements [whose purpose is tax avoidance] and it is for the appellants to prove that there is no scheme or arrangements [whose purpose is tax avoidance].

But while that reflects the general rule that the onus is on the taxpayer, it does not matter because the tribunal will have normally plenty of evidence to identify the what the scheme or arrangement is, and what its purpose is. The point was made in *Wilkinson v HMRC*:[84]

> Nor am I persuaded that HMRC's submission that *Coll* [citing the passage set out above] has any particular significance this case: there is sufficient evidence before the tribunal for me to find, in this case, that there *was* a scheme or arrangements of which the exchange formed part; the nature and extent of that scheme are, as the Upper Tribunal said in Euromoney, matters on which this tribunal is called upon to make findings of fact.

3.15.2 *Burden in TiS TAAR*

For completeness: In *Wroe v HMRC,* a TiS case:[85]

> Previous iterations of the Transactions in Securities legislation made it clear that the burden of proof lay upon the taxpayer to demonstrate that its purpose was not to obtain an income tax advantage.[86]

[83] [2010] UKUT 114 (TCC) at [8].

[84] [2023] UKFTT 695 (TC) at [81].

[85] [2022] UKFTT 143 (TC) at [104] - [105].

[86] Section 685 ITA 2007 provided prior to 2010:

Section 684 does not apply to a person in respect of a transaction in securities or two or more such transactions if the person shows that the transaction or transactions meet conditions A and B.

The underlined words should be regarded otiose; see App 2.24.5 ("It is shown that"). But see *IRC v Garvin* 55 TC 24 at p.52 and p.79

> However, the current wording of section 684(1) [ITA] is silent as to who must demonstrate the requisite purpose of being a party to the transactions in securities. A number of commentators[87] consider that the burden of proof now lies upon HMRC. This is a curious result, because the main purpose of the person who is a party to a transaction in securities, the test being a subjective one, will be a matter which is primarily within the knowledge of the taxpayer rather than HMRC.

The general rule is that the burden of proof rests on the taxpayer.[88] The change from the wording of previous legislation is not an indication to the contrary. The former wording was just otiose and the argument is an argument from redundancy.[89] In *Wroe v HMRC*, HMRC accepted that the burden of proof lay on them to show that one of the main purposes of the transaction was to obtain an IT advantage, and the judge proceeded on that basis. If that is right, it is an exception which applies to TiS cases only.

In *Wroe,* it made no difference to the outcome. Burden of proof rarely does. The person on whom the burden of proof lies speaks first at the hearing, and has the right of reply, and some advocates consider that to be an advantage; but I don't think there is much in it, and it would be a sad reflection on our jurisprudence if there was.

3.16 Time to ascertain purpose

What matters is the purpose at the time of the arrangement or transaction whose purpose is being tested.[90]

3.17 Meaning of "avoidance"

3.17.1 *History of avoidance concept*

The clear[91] articulation of the *concept* of an avoidance/mitigation

[87] The text does not identify who these commentators are, presumably because the point was not in issue.

[88] See 6.36 (Residence: Burden of proof).

[89] See App 2.1.2 (Argument from redundancy);

[90] This is self-evident, but if authority is needed, see *Herdman v IRC* 45 TC 394. Similarly *Mallalieu v Drummond* 57 TC 330 at p.365: "the Commissioners need to look into the taxpayer's mind at the moment when the expenditure is made. After events are irrelevant to the application of [the wholly & exclusively test] except as a reflection of the taxpayer's state of mind at the time of the expenditure."
ToA has rules to address this; see para 52.26 (Associated operations: Introduction).

[91] One can find some earlier examples: *Mangin v IRC* [1971] AC 739 is a moderately clear example; the concept is embryonically present in *Newton v CT* [1958] AC 450.

distinction goes back only to the 1970s[92] and the concept originated from economists, not lawyers. In 1973 Sandford wrote:

> A government may have one of three attitudes to a particular 'avoidance' measure – using the wide definition of avoidance.
>
> It may welcome it; the government may have deliberately offered a tax concession to promote some objective, e.g. tax concessions on mortgage interest ... in order to encourage owner-occupation; or investment and initial allowances to stimulate new investment in development areas.
>
> Second, without having sought positively to encourage a particular 'avoiding' action the government may find it entirely acceptable as when an income tax payer reduces his tax liability by taking a wife or having children; or when a person on retirement transfers savings from a building society to some other form of investment in order to reclaim income tax.[93]
>
> Third, the government may deplore certain actions as contrary to its intentions; the action is in accord with the letter of the law but not its spirit. *Only actions in this third category should rank as 'avoidance'.*[94]

But these cases do not draw the line as clearly or quite on the same basis as Sandford and modern cases following him.

[92] In 1946, Wrottesley J was unaware of it. Discussing the motive defence, he said: "There cannot, I think, be two opinions as to what 'avoiding' means. Where what is to be avoided is a liability, it must mean to evade, or to keep out of the way of, whether it be as in Richard III, 'The censures of the carping world', or anything else unpleasant that might befall a man, such as a tax": *Congreve v IRC* 30 TC 163. This is describing avoidance in the loose or etymological sense (including mitigation).

[93] Child allowance was abolished in 1979, and one can now reclaim tax deducted from building society interest; but that does not spoil the validity of the examples.

[94] *Hidden Costs of Taxation*, IFS, 1973, p.113 (emphasis added). Sandford proposed a second requirement of "avoidance" which he related to the taxpayer rather than to the legislature:

> "It is reasonable to confine 'avoidance' to action which results in the would-be avoiders substantially achieving the objective to which the tax had become an obstacle. Let us give some examples. If a man ceases to buy cigarettes because of tobacco tax he has not achieved his pre-tax objective, i.e. to smoke. Buying sweets instead of cigarettes therefore, is not avoidance. Again, if a taxpayer decides to use most of his wealth for a consumption spree because estate duty makes it not worth while saving for heirs, he is not 'avoiding' for he has abandoned his objective of passing property to heirs. On the other hand, if he reacts to estate duty by making *inter vivos* gifts (assuming he survives for seven years), this is avoidance; it has achieved, though by a more circuitous route, the objective of passing to heirs an intact property."

This is problematic, because there is no obvious way to identify the "objective to

3.17.2 *Terminology of concept*

The use of the terminology avoidance/mitigation to express this distinction is an innovation of Lord Templeman in 1986.[95] The expression "tax avoidance" has very often been used in the loose sense, meaning or including mitigation.[96] The reason may be either that the author does not have any avoidance/mitigation distinction in their mind or (if they do) that they are not using the modern terminology to express it. Even now, the term "tax avoidance" is sometimes still used in a loose or etymological sense to include mitigation but nowadays this usage is sometimes jocular, which suggests that the technical meaning has seeped into public consciousness.[97]

Likewise "mitigation" was and sometimes still is used in the sense of "avoidance".[98]

Other vocabulary has been used or suggested. In *Newton v Taxation Comr*, Lord Denning said that "ordinary" transactions do not count as avoidance.[99] In *Peterson v IRC*, Lord Millett said that "acceptable" tax advantages do not count as avoidance.[100] I do not think these words imply

which the tax has become an obstacle", and it has not been adopted into the law.

[95] *IRC v Challenge* [1986] STC 548. Lord Templeman was describing a concept relatively new to tax jurisprudence and framing terminology altogether new to describe it. But in accordance with the (according to Austin, "childish") declaratory theory of law, he did not say so.

[96] C.T. Sandford:

> "Amongst tax practitioners the generally accepted definition of avoidance ... is any legal method by which a person can reduce his tax bill... this definition can cover almost anything... I can legally reduce my income tax bill by buying a more expensive house (on which I get additional mortgage interest relief), getting married, having more children, taking out more insurance or simply stopping work."

(*Hidden Costs of Taxation*, IFS, 1973).

[97] The author once saw an advertisement for PEPs: "Be a tax avoider!" (PEPs were a tax free investment now replaced by ISAs.) For another example, see *Board of Inland Revenue v Hoe*, A.P. Herbert's *More Uncommon Law*: "Evidently those who do not smoke or drink are ... avoiding taxation."

[98] eg C.T. Sandford wrote in 1973 that tax avoidance (in the strict sense) "is often referred to by expressions such as tax planning or tax mitigation": *Hidden Costs of Taxation*, IFS, 1973, p.104. *Craven v White* 62 TC 1 at p.203 (a requirement of *Furniss v Dawson* is that a transaction "had no other purpose than tax mitigation").

[99] [1958] AC 450 at p.466.

[100] [2005] UKPC 5 at [35]–[37].

different tests, but only different terminology.

In this book I use the words "avoidance" and "mitigation" in the strict (or correct) sense and I use "ordinary" tax planning as a synonym of mitigation.

It would be convenient to have a neutral term to describe both avoidance and mitigation (described above as the loose etymological sense of "tax avoidance"). There is no agreed term, but "tax reduction",[101] "tax saving", "tax planning" and "tax advantage" might all be used in this sense. It may be less confusing if less elegant to refer to "avoidance/ mitigation" where one wishes to refer to the two.

3.17.3 *"Avoidance" in motive defence*

The House of Lords decided in *IRC v Willoughby* that "avoidance" in the ToA motive defence means tax avoidance in the strict sense and not mitigation:

> ... it was essential to understand what was meant by "tax avoidance" for the purposes of [the ToA motive defence]. Tax avoidance was to be distinguished from tax mitigation.[102]

This would have surprised those who framed the legislation in 1936/8; they were unaware of any avoidance/mitigation distinction. But the enormously increased complexity of the tax system since 1936 makes the distinction sensible, perhaps necessary:

> One of the traditional functions of the tax system is to promote socially desirable objectives by providing a favourable tax regime for those who pursue them. Individuals who make provision for their retirement or for greater financial security are a familiar example of those who have received such fiscal encouragement in various forms over the years. This, no doubt, is why the holders of qualifying policies, even those issued by non-resident companies, were granted exemption from tax on the benefits received. In a broad colloquial sense tax avoidance might be said

[101] INT Manual provides:
INTM208010 Introduction to the motive test [May 2012]
... Despite numerous valiant attempts there has never been a consensus about what is meant by 'tax avoidance' ...
The [CFC] motive test attempts to solve the first problem by avoiding any mention of the term 'tax avoidance', settling instead for the rather more neutral concept of a 'reduction in tax' ...

[102] [1997] STC 995 at p.1003.

> to have been one of the main purposes of those who took out such policies, because plainly freedom from tax was one of the main attractions. But it would be absurd in the context of [the motive defence] to describe as tax avoidance the acceptance of an offer of freedom from tax which Parliament has deliberately made.[103]

HMRC accepted that the purchase of an "ordinary" offshore bond should be taxed under the chargeable event provisions and not under the ToA provisions. The most obvious way[104] to reach that result is to give a narrow meaning to tax avoidance and so to widen the motive defence

3.17.4 *Purpose of tax evasion*

Suppose an individual transfers assets abroad with the dishonest purpose of *evading* UK taxation. Can one apply the avoidance/evasion distinction and say that the individual did not intend to *avoid* taxation, so that – while they may be liable to criminal sanctions – the motive defence applies and excludes the transfer of assets rules? The answer is plainly no. The argument is anachronistic, since in 1936 and for 40 years afterwards, the word "evasion" was used in English jurisprudence to describe avoidance. More fundamentally, the context shows that the expression "tax avoidance" includes (criminal) tax evasion. This was assumed without argument in *R v Dimsey*.[105]

3.18 Purpose of tax avoidance

The first task is to look into the mind of the transferor to ascertain whether their purpose was (to use the neutral term) to reduce tax. If they had no purpose to reduce tax then that is the end of the matter.

Before *Willoughby,* identifying a purpose of reducing tax was the also the end of the matter because an avoidance/mitigation distinction had not been recognised. Any tax reduction purpose would fail the ToA motive defence.

Now there is a second stage. If the individual did have the purpose of reducing tax, one must move on, applying *Willoughby*, to categorise that purpose as "avoidance" or "mitigation".

[103] 70 TC 57 at p.116.

[104] An alternative, less satisfactory, would be to refuse to recognise the tax purpose of the acquisition, by saying that it is merely incidental, or by applying a *Brebner* or choice principle: see 3.20.6 (A choice principle?).
Another solution is to say there is no relevant transfer.

[105] [2001] UKHL 46.

This is a question of law. It is determined objectively (in the sense that the issue is independent of the mind of the individual). It would be wrong at stage (2) to ask whether the individual subjectively thought their purpose was "tax avoidance" (as opposed to mitigation) because

(1) Avoidance/ mitigation is a question of law, a matter for the court.
(2) It would generally be pointless to ask the individual, since (unless the individual is a tax lawyer) they will not know the correct meaning of the terms.[106]

Whether or not the transferor knew that their purpose was tax avoidance is as irrelevant as whether M. Jourdain knew that he was speaking prose.

The motive defence therefore involves a mixture of objective and subjective elements, as often happens.

Anything said on the meaning of tax avoidance in cases before *Willoughby* needs to be reviewed because it will not have considered an avoidance/mitigation distinction.

3.19 "Tax advantage"

3.19.1 *Tax advantage: Definitions*

The expression "tax advantage" is always defined. There is no single standard definition, but the definitions are based on a common template, so it is helpful to consider the as a separate topic, rather than in any particular context in which it may arise.

The expression was first used in the TiS TAAR in 1960.[107] That

[106] This is self-evident but if authority is needed, see *Beneficiary v IRC* [1999] STC (SCD) 134 at p.143: "The question of whether there was tax avoidance must be looked at objectively".
For completeness: In *Davies v HMRC* [2020] UKUT 67 (TCC) at [29], one ground of appeal was that the witnesses said that their motive was tax mitigation, and it should have been put to the witnesses that the motive was tax avoidance. The point was dismissed on the broad ground that the witnesses had fair notice of the issue and an opportunity to respond to it. But more narrowly and analytically, it should also have been said that the avoidance/mitigation issue was a point of law, not evidence, on which evidence not needed or admissible. (There is a suggestion to this effect at [33]).
The point was overlooked in *Fisher v HMRC* [2014] UKFTT 804 (TC) where the FTT asked, I think wrongly, whether the transferor appreciated that the transfer was avoidance rather than mitigation: see paras [422] - [430]. The point was not considered in the later appeals.

[107] Section 43(4)(g) FA 1960.

definition survives in the current CT version of TiS, and elsewhere. I discuss here the following definitions:[108]

Definition (my terminology)	**Reference**
Standard definition	Many; for example, s.16A TCGA
GAAR definition	s.208 FA 2013
IHT definition	s.162A(8) IHTA

Standard definition	**GAAR definition**	**IHT definition**
"Tax advantage" means—	A "tax advantage" includes—	"tax advantage" means—
(a) relief or increased relief from tax,	(a) relief or increased relief from tax,	
(b) repayment or increased repayment of tax,	(b) repayment or increased repayment of tax,	
(c) the avoidance or reduction of a charge to tax or an assessment to tax,	(c) avoidance or reduction of a charge to tax or an assessment to tax,	(a) the avoidance or reduction of a charge to tax, or
(d) the avoidance of a possible assessment to tax,	(d) avoidance of a possible assessment to tax,	(b) the avoidance of a possible determination in respect of tax.
	(e) deferral of a payment of tax or advancement of a repayment of tax, and	
	(f) avoidance of an obligation to deduct or account for tax.[109]	

The drafter sometimes adds a provision that:

> it does not matter whether the avoidance or reduction is effected—
> (a) by receipts accruing in such a way that the recipient does not pay or bear income tax[110] on them, or
> (b) by a deduction in calculating profits or gains.

[108] TiS has a non-standard definition: see 55.11.1 ("Income tax advantage").

[109] I think para (f) is referring to withholding tax.

[110] See App.2.3.2 (Bear tax by deduction or otherwise).

This also derives from the original 1960 provision. It is hard to see what it adds, and it probably adds nothing.[111] But as the precedent is there it has often been followed.

3.19.2 *The definitions compared*

The GAAR definition is slightly wider than the standard definition:

(1) It has become an inclusive definition. But this probably makes no difference. It is not easy to think of anything which is a tax advantage (in the general sense) which does not fall within paras (a) to (f).

(2) Paras (e) and (f) are added.

Post-2013 TAARs often adopt the GAAR definition, either by reference or repeating it verbatim,.

The IHT definition is based on the standard definition with minor variations appropriate for IHT.

3.19.3 *"Tax"*

The definitions set out above refer to "tax"; the actual tax or taxes referred to varies from one TAAR to another. The word is either defined expressly for the purposes of the definition of tax advantage; or else a default definition applies (in the IHTA, tax means IHT; in the IT Acts, tax means IT or CT).

In the GAAR definition, the word "tax" is of course widely defined. Section 206(3) FA 2013 provides:

> The general anti-abuse rule applies to the following taxes—
> (a) income tax,
> (b) corporation tax, including any amount chargeable as if it were corporation tax or treated as if it were corporation tax,
> (c) capital gains tax,
> (d) petroleum revenue tax,
> (da) diverted profits tax,
> (e) inheritance tax,
> (f) stamp duty land tax, and
> (g) annual tax on enveloped dwellings.

[111] This is (almost) self-evident, but if authority is needed, see *HMRC v Hyrax Resourcing Ltd* [2019] UKFTT 175 (TC) at [185]: "I would say that those additional words are unnecessary as that meaning is implicit in the first part of the definition ...".

TAARs refer only to UK taxes. A foreign tax advantage, or avoidance of foreign taxation, does not count.[112]

3.19.4 *Relief/repayment*

After some vacillation, the courts decided that "relief" in limb (a) of the definition is a word of wide import. It includes the exemptions for charities and pension schemes. In *Sema Group Pension Scheme v IRC*:[113]

> 63. [The taxpayer] submits that the relevant advantage obtained by the trustees in consequence of the buybacks was the tax credit to which the trustees were entitled ... and that the entitlement to a tax credit is not a "tax advantage" ... since it is neither a "relief" from tax nor a "repayment" of tax.
>
> 64. As to "relief", he submits that exemption from tax is a different concept from relief from tax, in that whereas relief from tax predicates a liability to tax which would have existed but for the relief, exemption from tax by definition precludes the existence of any such liability.
>
> [65] He further submits that there is nothing in the authorities to indicate that "relief" ... is to be given anything other than its normal and natural meaning, and that to construe it as including an entitlement to a tax credit would be to distort that meaning.
>
> [108] ... I reject [the taxpayer's] submissions based on the conceptual difference between exemption and relief. Such submissions seem to me to involve a degree of sophistication which runs entirely counter to the general approach to be adopted to the construction of the [TiS Code]...
>
> [109] In my judgment, what the draftsman was manifestly trying to do when defining "tax advantage" ... was to cover every situation in which the position of the taxpayer vis a vis the Revenue is improved in consequence of the particular transaction or transactions. ... the distinction between "relief" and "repayment" is not based on any conceptual difference between the two; the true interpretation of [the TiS TAAR] is in my judgment much simpler than that. In my judgment, "relief" ... is intended to cover situations where the taxpayer's liability is reduced, leaving a smaller sum to be paid, and "repayment" is intended to cover situations in which a payment is due from the Revenue. In the same way, the references to "increased relief" and "increased repayment" are directed at situations in which the taxpayer is otherwise entitled to a relief or repayment, with which the "relief" or "repayment" ... must be

[112] See 52.10 (Meaning of "taxation").

[113] 74 TC 593 confirming *IRC v Universities Superannuation Scheme* 70 TC 193.

> aggregated.
> [110] It follows that I respectfully agree with the observation of Aldous J in *Sheppard* (at p.253e) that the words "tax advantage" in the relevant statutory provision ... presuppose that a better position has been achieved. However, I respectfully differ from him when he goes on to answer the question "An advantage over whom or what?" by saying: "An advantage over persons of a similar class". In my judgment, the simple answer to that question is that a better position has been achieved vis a vis the Revenue.

3.19.5 *Tax advantage: Comparators*

The GAAR guidance provides:

> The concept of a "tax advantage" is common in UK tax legislation. The language suggests that in deciding whether an advantage arises the actual tax position should be compared with another tax position.
> The appropriate comparison or alternative tax position will depend on the facts, but will usually derive from the arrangements that would have occurred without the abusive tax purpose (which may include no arrangement at all).
> In situations where there is more than one alternative arrangement that might have been adopted if the taxpayer had not adopted an abusive arrangement, then the appropriate comparison would be the transaction that the taxpayer would most likely have carried out.[114] This might not be the arrangement that would give rise to the greatest tax liability.[115]

The loss-TAAR guidance[116] proposes a test to help identify the main purpose:

> ... it will be relevant to draw a comparison in order to consider whether,

[114] Footnote original: This follows the approach adopted by Lord Hoffmann in the Hong Kong case *IRC v Tai Hing Cotton Mill* (CACV 343/2005): "[The Commissioner] would not be entitled, as the more alarmist submissions of counsel for the taxpayer suggested, to make an assessment on the hypothesis that the taxpayer had entered into an alternative transaction which attracted the highest rate of tax. That would not be a reasonable exercise of power. But she may adopt the hypothesis which the evidence suggests was most likely to have been the transaction if the taxpayer had not been able to secure the tax benefit."

[115] HMRC "GAAR Guidance" (2015) para C2.5 *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[116] See 65.21 (Capital-loss TAAR).

> in the absence of the tax considerations:
> [1] the transaction giving rise to the advantage would have taken place at all;
> [2] if so,
> [a] whether the tax advantage would have been of the same amount;[117] and
> [b] whether the transaction would have been made under the same terms and conditions.

I refer to this as a "**but-for**" test. It is not a decisive test.

Where the taxpayer passes the but-for test, ie the same arrangements would be made even without the tax advantage, it is likely that tax is not a main purpose. But tax *might* still be a main purpose. A person may have two main purposes, P1 (non-tax) and P2 (tax) either of which may be sufficient to cause the arrangements.

Where the taxpayer fails the but-for test, ie the same arrangements would *not* have been made but-for the tax advantage, it is likely that tax is a main purpose. A person may have two purposes, P1 (non-tax) and P2 (tax), where P1 is the main purpose (but not sufficient to trigger the arrangements). P2 is just enough, the straw that breaks the camel's back, but not a main purpose in itself. But that scenario seems somewhat implausible.

Elsewhere in the loss-TAAR guidance, HMRC say:

> So to determine whether or not the TAAR applies all the circumstances surrounding the arrangements have to be taken into account, considering:
> - the overall economic objective of the arrangements,
> - whether that objective is one that the participants might be expected to have, and which is genuinely being sought, and
> - whether that objective is being fulfilled in a straightforward way, or additional, complex or costly steps have been inserted.

3.19.6 *Loan relationship TAAR guidance*

The guidance on the loan relationship unallowable purpose test is lengthy, and it is not necessary to set it out in full. Cutting to the chase, s.442(4) CTA 2009 requires a "business or other commercial purpose" and that excludes a tax avoidance purpose if it is:

[117] Para [a] is not well expressed. It seems to ask whether in the absence of the tax considerations the tax advantage would have been of the same amount. It is not clear what point is being made here. But the rest of the paragraph makes sense.

> (a) the main purpose for which the company is a party to the loan relationship or, as the case may be, enters into the related transaction, or
> (b) one of the main purposes for which it is or does so.

Section 442(5) CTA 2009 provides:

> The references in subsections (3) and (4) to a tax avoidance purpose are references to any purpose which consists of securing a tax advantage[118] for the company or any other person.

This differs in part from standard TAAR wording. But the guidance is still relevant for other TAARs. The CF Manual provides:

> **CFM38150 Example** [Nov 2019]
> **Example of unallowable purpose**
> A company borrows £50 million from a finance company at arm's length. The company becomes insolvent and disposes of all its assets. This leaves it with an outstanding debt of £40 million. The company is not liquidated and interest continues to accrue on the debt.
> The finance company either does not accrue the interest receivable or it accrues the interest and then writes it off as a bad debt. The company accrues the interest and makes a deficit on which group relief claims are made.

The company continues to exist and the interest accrues, but is it correct to say that the company "accrues the interest"? The company does not do anything. Still, interest does accrue. HMRC give two reasons why the debit is disallowed. The first is based on s.444(2) which has no equivalent in other TAARs.

> The company has no activity which is within the charge to corporation tax (CTA09/S442(2)). The purpose of the loan relationship is therefore specifically excluded from being a business or commercial purpose and it is an unallowable purpose.

The second reason is of wider interest:

> In addition, although the loan relationship was originally bona fide, its continued existence is not commercial. The test of unallowable purpose

[118] "Tax advantage" has the CT definition: see s.476(1) CTA 2009. It is confusing to use the term "tax avoidance" and define it to mean tax advantage, as the two concepts are usually used with quite distinct meanings. But there it is.

> given by CTA09/S442(1) & (2) is the purpose of the loan relationship in the accounting period. The only purpose of the loan relationship in the current accounting period is to generate group relief, securing a tax advantage for another group company (CTA09/S442(5)).
> The debits relating to the loan relationship should be disallowed.

The omission to liquidate the company, or write off the debt, is itself an unallowable purpose. Is that going too far? Since HMRC's first reason is sufficient, the question does not arise here but it might elsewhere.

CFM38160 Application [Nov 2019]
Applying the unallowable purposes rule
... You will note from the Economic Secretary's comments that SS441-442

- will normally apply where UK branches of overseas companies borrow for overseas activities outside the UK tax net,
- will not normally apply where a company borrows to acquire shares in companies, whether in the UK or overseas, or to pay dividends, provided that the borrowings are not structured in an artificial way. And a similar view is taken as regards borrowings, whether from a third party or intra group, to acquire other business assets whether located in the UK or overseas. This approach is not affected by the substantial shareholdings rules, and
- will not normally apply where a company is choosing between different ways of arranging its commercial affairs, if it chooses the course that gives a favourable tax outcome, provided that tax avoidance is not the object, or one of the main objects, of the arrangements.

CFM38170 Application: Hansard Report [Nov 2019]
Applying the unallowable purposes rule: Economic Secretary's comments
'The Government are aware of concerns that have been raised by my hon. Friends and by others regarding the particular anti-avoidance provisions in paragraph 13 [now s.441/442]. This paragraph was amended significantly in Standing Committee but, because of the concerns that my hon. Friends and others have raised, I take the opportunity to allay some of the fears that have been expressed about the anti-avoidance rules.

Paragraph 13 of the schedule disallows tax deductions to the extent that tax avoidance is the main motive behind a loan relationship. We have been told of concerns that this could be interpreted as preventing companies from getting tax relief for legitimate financing arrangements. I am happy to offer a reassurance that this is not the intention of the legislation. The paragraph denies tax deductions on loans that are for the purpose of activities outside the charge to corporation tax. Among other things, this will ensure that UK branches of overseas companies do not get tax relief for borrowings that are for overseas activities outside the UK tax net.

We have been asked whether financing - which, for example, is to acquire shares in companies, whether in the UK or overseas, or is to pay dividends - would be affected by the paragraph. In general terms, the answer is no, but the paragraph might bite if the financing were structured in an artificial way.

It has been suggested that structuring a company's legitimate activities to attract a tax relief could bring financing within this paragraph - some have gone so far as to suggest that the paragraph might deny any tax deduction for borrowing costs. These suggestions are clearly a nonsense.[119] A large part of what the new rules are about is ensuring that companies get tax relief for the cost of their borrowing.

One specific point has been put to me by my hon. Friend the Member for Gloucester - that is, borrowing by a finance leasing company to acquire assets where this is more tax efficient than the lessee investing in the asset direct. Again, I am happy to offer a reassurance. Where a company is choosing between different ways of arranging its commercial affairs, it is acceptable for it to choose the course that gives a favourable tax outcome. Where paragraph 13 will come into play is where tax avoidance is the object, or one of the main objects, of the exercise.

Companies that enter into schemes with the primary aim of avoiding tax will inevitably be aware of that. The transactions we are aiming at are not ones which companies stumble into inadvertently. As one top tax adviser said recently, companies will know when they are into serious tax avoidance; apart from anything else, they are likely to be paying fat fees for clever tax advice and there will commonly be wads of documentation.

The last thing I want to do, however, is set out a list of so-called acceptable or unacceptable activities. Borrowing for commercial purposes can be structured in a highly artificial way in order to avoid tax. If we said that borrowing for certain types of activity would always be okay, tax advisers would quickly take advantage and devise artificial financial arrangements simply to avoid tax. Provided that companies are funding commercial activities or investments in a commercial way, they should have nothing to fear. If they opt for artificial, tax-driven arrangements, they may find themselves caught.

It is clear that a balance must be struck between meeting the concerns that have been raised and weakening the provision in those instances where it needs to apply, but I can assure my hon. Friends that we shall keep the matter under review.' (Hansard 28 March 1996 Finance Bill Report Stage, Columns 1192-1193.)

The reader may think that is rather shallow.

CFM38180 Transactions Not Normally Within 'Unallowable Purposes' [Nov 2019]
When CTA09/SS441-442 will not normally apply

S441-442 will not normally apply to loan relationship debits:

- simply because a company is able to obtain relief for the same expenditure or loss on the borrowing to which the debits relate in more than one jurisdiction. However, S441-442 would apply where the structure that has been adopted has one or more non-commercial features (so that the loan relationship can be said to have an unallowable purpose) and/or where, taking account of the overall position of the company or group, relief for interest and other finance costs might otherwise be available more than once in the UK in respect of the true economic costs of the borrowing;
- that relate to a borrowing from an exempt body (such as a pension fund), even if that exempt body is connected with the borrower, provided the arrangements are commercial;
- that relate to a straightforward borrowing by a UK plc in order to fund a repurchase of its shares provided that there are no attempts to structure the arrangement in such a way as to provide a tax advantage for any other person and/or the amount borrowed (the level

[119] Author's footnote: The reader may not agree.

of gearing up) is dictated by market forces and hence is at arm's length;

- that relate to a third party borrowing undertaken by one group member, that fulfils the commercial borrowing requirements of the group, which it on-lends interest-free (or at a rate not exceeding the costs of the third party borrowing) to other UK-resident group members. In such circumstances, S441-442 would not apply, provided that the group gets one and only one deduction in the UK for the costs associated with the true economic cost of the borrowing. For example, S441-442 will not normally apply where intra-group interest-free loans are made primarily to enable borrowings to be matched with assets within the meaning of CTA09/S317; or
- where a loan relationship debit in one group company is matched by an equal and opposite loan relationship credit, which is fully taxed, in another group company for the same loan relationship and the funding is not then utilised to secure a tax advantage. On the other hand, S441-442 are potentially in point if the main or one of the main purposes of the intra-group funding is to achieve a tax advantage for the group as a whole, in that the loan relationship credit on the intra- group funding is in some way shielded from tax. An example of the loan relationship credit being shielded would be the soaking up of otherwise stranded surplus expenses of management etc. Where the loan relationships involve cross-border transactions, thin capitalisation and transfer pricing legislation as well as the provisions of the Double Taxation Treaties may be applicable.

CFM38190 Transactions Normally Within 'Unallowable Purposes' [Nov 2019]

When CTA09/SS441-442 will normally apply

SS441-442 would normally apply to loan relationship debits:

- which, subject to the comments at CFM38180 (fourth and fifth bullets), relate to the write-off of loans where the purpose of the loans was not amongst the business or other commercial purposes of a company. An example of a loan of this nature would be an interest-free loan made by a company, whose business consists in operating a widgets retail outlet, which had lent the money to a football club supported by one of the directors of the company for the purpose of providing financial support to the football club. Furthermore, if the company borrowed to make the loan to the football club, then SS441-442 would normally also apply to disallow the loan relationship debits relating to the interest or other finance costs on that borrowing. If, however, the purpose of the loan included a commercial or other business purpose such as advertising, then this would be taken into account in arriving at the amount attributable to the unallowable purpose on a just and reasonable basis (S441(1)-(3));
- which, subject to the comments at CFM38180 (fourth and fifth bullets), relate to a borrowing the proceeds of which are used in such a way that the company cannot or does not expect to make an overall pre-tax profit. An example would be where a company borrows at interest and on- lends at a rate of interest that is less than the rate of interest on the borrowings; or
- where a company or a group of companies enters into one or more transactions or arrangements which have the main purpose or one of the main purposes of securing loan relationship debits for repayments of loan principal, in addition to payments of interest, on the true economic commercial borrowing to the company or group. An example of this would be where one group company undertakes a borrowing of £20 million at 8.4% for 5 years from a third party and at the same time a second group company pays that third party £13 million for preference shares of £20 million in the first group company to be delivered 5 years later. The effect of this is that, economically, the group borrows

£7 million on an amortising basis at 8.4% but for tax purposes the group claims relief as loan relationship debits for both the interest of £1.4 million on the group amortised borrowing of £7 million and the repayment of the £7 million loan principal. In such circumstances SS429-430 are likely to apply to disallow the amounts equivalent to repayments of principal.

3.19.7 *Tax advantage: Case law*

The TAAR guidance above is soundly based on TiS case law. The leading case is *IRC v Parker*:

> The paragraph, as I understand it, presupposes a situation in which
> [1] an assessment to tax, or increased tax, either is made or may possibly be made,
> [2] that the taxpayer is in a position to resist the assessment by saying that *the way in which he received what it is sought to tax* prevents him from being taxed on it;
> [3] and that the Crown is in a position to reply that if he had received what it is sought to tax *in another way* he would have had to bear tax.
> In other words, there must be a contrast as regards the "receipts" between
> [a] the actual case where these accrue in a non-taxable way with
> [b] a possible accruer in a taxable way,
> and unless this contrast exists, the existence of the advantage is not established.[120]

In the following discussion:

(a) The actual case, where the receipt accrues in a non-taxable way, is the **"actual receipt"**

(b) The "possible accruer in a taxable way" is the **"comparator"**, (sometimes called the "hypothetical receipt")

The comparator need not be received as a result of the same kind of transaction as was the actual receipt. *IRC v Cleary*[121] concerned a share sale: the shareholder sold shares to a company for cash. The actual receipt of the proceeds of sale was not income-taxable. The comparator was a possible dividend from the company (which would have been income-taxable). So there was a "tax advantage".[122] A dividend and a sale are different types of transaction. The dividend would reduce the company's

[120] 43 TC 396 at 441 (emphasis added).

[121] 44 TC 399 at p.423. For TiS aspects of this case, see 55.14.4 (Sale to close co for cash).

[122] At that time the standard definition applied to both IT and CT TiS codes.

assets available for distribution (unlike the actual sale). That did not matter. So in short, the question was whether the company can pay a dividend to the shareholder equal to the amount which the shareholder received tax-free.

The comparator must involve receipt of the same asset as the actual receipt. *Anysz v IRC*[123] concerned a share for share exchange: the shareholder transferred shares in A Ltd to another company (B Ltd) in exchange for an issue of shares in B Ltd. B Ltd could have declared a cash dividend, but cash was not a valid comparator to the actual receipt of B Ltd shares. However A Ltd could have:

(1) bought B Ltd shares, and
(2) distributed them to the shareholder by dividend in specie.

That was a valid comparator. Hence the shareholder obtained a "tax advantage".

3.19.8 *Tax advantage/avoidance compared*

On a natural reading,"tax advantage" in the standard sense is wider than tax avoidance. Tax advantage includes a relief from or repayment of tax, as well as the avoidance or reduction of a charge to tax. The concept thus includes both tax avoidance and mitigation.

In *Marwood Homes v IRC*:

> Taking steps to obtain relief under s 242 [ICTA 1988] following payment of a dividend outside a group election is clearly within the spirit of the ACT code in the tax legislation. But the fact that a transaction has been carried out to achieve a benefit conferred by a statutory provision will not of itself exclude the application of [the TiS rules]. This follows from the definition of tax advantage in [what is now s.732 CTA 2010] which covers both everyday tax planning and transactions, such as traditional dividend stripping, which fall more obviously within the mischief that [the TiS code] was introduced to counteract. The only safeguards available to the taxpayer are the clearance procedures and the escape clause [motive defence]. It cannot therefore avail Marwood to rest its case on the simple proposition that the dividends ... were directly within the spirit of s 242.[124]

That concerns the meaning of "tax advantage" in the TiS code, where

[123] 53 TC 601.

[124] [1999] STC (SCD) 44 at [20].

special principles of construction apply, but it should apply to TAARs generally.[125]

The same approach was taken in the context of DOTAS.[126]

Nevertheless, the context of some TAARs may show otherwise. HMRC guidance on TAARs often adopts an avoidance test.[127]

3.20 Avoidance/mitigation distinction

This section sets out the most important judicial and other statements on the avoidance/mitigation distinction, which is at the core of the concept of "tax avoidance".

I would first of all note a widespread misconception. It is the misconception that the term "tax avoidance" has a single, relatively clear-cut referent; that subject perhaps to some borderline cases, to classify a transaction as tax avoidance is as straightforward and unproblematic as to identify the colour of a dye. This may relate to a wider misconception about the nature of language, namely the mistake that the meaning of words is given by the existence of things in the world to which they correspond, so that, with any contested term, one can find a core referent and establish what the word really means.

3.20.1 *Avoidance: Willoughby definition*

IRC v Willoughby is the leading case:[128]

> Tax avoidance within the meaning of [the ToA motive defence] is a course of action designed to conflict with or defeat the evident intention of Parliament.[129]

I refer to this as the **"Willoughby definition"** of tax avoidance.

[125] See 55.1.2 (Construction of TiS code).

[126] *HMRC v Hyrax Resourcing Ltd* [2019] UKFTT 175 (TC) at [151] - [161]. But the arrangement in that case did constitute tax avoidance in the strict sense, so the issue did not need to be decided.

[127] See 65.21.5 ("Genuine" loss and the TAAR).

[128] [1997] UKHL 29.

[129] The Tax Law Review Committee used a similar definition of "avoidance" but referring also to the possibility of Parliamentary oversight:

> We have regarded tax avoidance as action taken to reduce or defer tax liabilities in ways that Parliament plainly did not intend or could not possibly have intended had the matter been put to it.

Tax avoidance: A Report by the Tax Law Review Committee (1997) para 1.13, citing *Willoughby*.

3.20.2 *Avoidance/mitigation distinction rejected*

Two cases on the CGT reorganisation TAAR have rejected the avoidance/mitigation distinction. In *Snell v HMRC*:[130]

> 35. Counsel for the Revenue did not dispute the relevance of the dictum of Lord Nolan in *IRC v Willoughby*. He was content to submit that the relevant parliamentary intention is that to be found in s.135, namely that acceptance of loan notes is legitimate to defer liability to capital gains tax but not as part of a scheme to avoid it altogether. Such a scheme, he submitted, comes within the express words of s.137. Accordingly that section applies so as to withhold the right to deferral of liability which would otherwise be conferred by s.135.

But the Judge took a different view:

> 36. I have difficulty in understanding why the dictum of Lord Nolan in *IRC v Willoughby* is relevant to the construction of that part of s.137(1) as requires one of the main purposes of the scheme or arrangements to have been the avoidance of liability to capital gains tax. The passage on which counsel for Mr Snell relies deals with the difference between tax mitigation and tax avoidance. No such distinction is drawn in s.137.... it matters not whether the scheme etc. was formed for purposes of tax mitigation, avoidance or indeed evasion.[131]

It is true that the avoidance/mitigation distinction is not "drawn", in the sense that it is not expressly mentioned, in s.137 TCGA. But it is also not expressed in the ToA motive defence, or anywhere else. It is inherent in the word "avoidance", as understood by tax lawyers and well informed commentators, since *Willoughby*.

The comment in *Snell* was not a necessary part of the decision, and so non-binding.[132] In *Wilkinson v HMRC*[133] it was simply ignored (pre-

[130] [2006] EWHC 3350 (Ch). For completeness, the same issue arose in *Coll v HMRC* [2010] UKUT 114 (TCC) but this case primarily concerns the factual issue of what whether the taxpayer actually intended to leave the UK at the time of the exchange in question.

[131] [2006] EWHC 3350 (Ch) at [36].

[132] The textbook *Taxation of Companies & Company Reconstructions* (looseleaf) agrees: para W1.4.1.

[133] [2023] UKFTT 695 (TC) at [87]; though the FTT held that the transaction was avoidance, not mitigation, so the issue did not in fact arise; see 3.20.3 (How evident is "evident").

sumably HMRC did not raise it in argument). I thought it was just an aberration. However the same conclusion was reached in a lightly reasoned passage in *Delinian v HMRC*:[134]

> 52. We can deal briefly with Euromoney's argument that the FTT ought to have held that the word "avoidance" in section 137(1) was to be construed objectively as a course of conduct designed to defeat the evident intention of Parliament, as distinct from the acceptance of an offer of freedom from tax which Parliament has deliberately made (the *Willoughby* point). Euromoney submitted that taking advantage of the substantial shareholdings exemption was not tax avoidance, and that section 137 was not engaged because the second limb, with its reference to tax avoidance, never arose.
> 53. In our judgment, the Chancellor was right in *Snell* to place emphasis on the fact that the regime in sections 135-137 provides for the right to defer tax to be lost if it is used to avoid tax altogether. Parliament has said that, if the exchange of shares forms part of a scheme or arrangements of which even a main purpose is tax avoidance, the taxpayer loses the ability to rely on the deferral mechanism at all, and must pay all the tax at that stage. That is an entirely intelligible Parliamentary intention.
> 54. Lord Nolan in *Willoughby* was contrasting tax avoidance with the acceptance of a deliberate offer made by Parliament of freedom from tax. That was not the situation in this case. Euromoney's scheme or arrangements involved deferring tax in order later to take advantage of the substantial shareholdings exemption. That was to rely on a provision intended to defer tax to secure an outcome where no tax was paid. The meaning of tax avoidance in section 137(1) is clear without the need to refer to Willoughby. If the scheme or arrangements lead to the non-payment of tax that would otherwise have had to be paid, even if deferred, then that is tax avoidance for these purposes.

There is no material distinction between the ToA motive defence and the CGT reorganisation TAAR. The distinction should apply to the CGT reorganisation TAAR as it applies to other TAARs which use the word "avoidance". TAARs carefully distinguish between tax avoidance and tax advantage. It remains to be seen if the Supreme Court will have an opportunity to put the matter right.

[134] [2023] EWCA Civ 1281 at [8] (emphasis original). This case was reported under the name *Euromoney* in the FTT and UT, because Euromoney changed its name to Delian in 2023, following a takeover. For the facts of this case, see 3.4.1 (Test whole arrangement).

Assuming no appeal, the passage in *Delinian* is not binding because the case was decided on another point. If it comes up again it deserves to be dealt with at length, not "briefly". It is suggested that a tribunal below the level of CoA should refuse to follow it, even in the context of the CGT reorganisation TAAR. If that does not happen, the point may become settled in Courts below the level of CoA. Even then, it is considered that the comment ought to be restricted to the CGT reorganisation TAAR and not to apply to other TAARs.

In practice the issue will rarely arise, as nowadays the Courts are quick to find that there is avoidance in the *Willoughby* sense, as they did on the facts of *Snell* and *Delinian*.

What if, say, there was a share for share exchange with the expectation that the individual would make a (CGT free) gift to charity in the following year? Or die and receive the CGT uplift on death? One would expect that that reorganisation relief would apply. Prior to *Delinian* I would have said this was because there was mitigation not avoidance. Now one would have to say that the purpose was not avoidance or mitigation.

Lying unexpressed behind *Snell*, and, perhaps, *Delinian,* was scepticism about the use and coherence of an avoidance/mitigation distinction. There is a debate to be had on those topics,[135] but the ship has sailed.

3.20.3 *How evident is "evident"*

Looking back on the *Willoughby* definition of avoidance, after a generation has passed: it still represents the law on the meaning of avoidance, but the Courts have applied the test of what is avoidance with less stringency than "evident" intention might suggest. The boot is on the other foot: there is mitigation if the tax planning is consistent with the evident intention of parliament, and less clear cases are avoidance. On this reading, even *Willoughby* would be a borderline case.[136] For example, avoidance includes:

(1) A Jersey resident non-domiciled individual transferring UK farmland to a Jersey company, to avoid IHT[137]

(2) An exchange of shares for securities, in circumstances where:

  (a) An immediate sale of the shares would be subject to CCT; but

[135] See 3.27 (Tax avoidance: Critique).

[136] The result would have been different if it was planned from the start that the taxpayer would be non-resident when disposing of the offshore policy.

[137] See 52.21.2 (Transfer for avoidance).

(b) A disposal of the securities a year or so after the exchange would not be subject to CGT, because:
 [i] The individual would then be non-resident[138]
 [ii] shares were given to the shareholder's children who would then qualify for entrepreneur's relief[139]
 [iii] the individual would then qualify for the substantial shareholder exemption[140]

In this list:

(1) Item [i] is not surprising. Going non-resident has at least an element of avoidance.[141]

(2) Item [ii] is not surprising in the context of the decision, because artificial steps were required to qualify for the relief:

> I do not ... accept the appellants' argument that the Wilkinsons' CGT planning was ... merely "the acceptance of an offer of freedom of tax which Parliament had deliberately made" – as
> (1) securing the CGT planning affected the deal in material ways ...
> (2) one of those ways – satisfying the condition [that the daughters held shares after the share-for-share exchange, and were directors] – went against the commercial grain of the deal – being, to have BCA take over P Ltd from its former shareholders; that element therefore
> (a) required significant negotiation (and ... caused there to be some risk of the deal failing) and
> (b) led to the insertion into the deal of significant features that otherwise would not have been present (the daughters' post completion holding of B ordinary shares and directorships).[142]

(3) Item [iii] seems somewhat surprising. But there it is. The point will not often arise, as SSE will usually be available on a reorganisation as on a sale of shares.[143]

[138] See 58.6.2 (CGT avoidance by non-residence).

[139] *Wilkinson v HMRC* [2023] UKFTT 695 (TC) at [87].

[140] *Euromoney v HMRC* [2021] UKFTT 61 (TC); the point was not discussed on the appeals to the UT or to the CoA (where the case was reported under the name *Delinian*).

[141] See 108.7.2 (Emigration to treaty-state).

[142] [2023] UKFTT 695 (TC) at [87].

[143] SSE did not apply in *Euromoney* because at the time of the share-for-share exchange, the shares carried no dividend rights: see [2021] UKFTT 61 (TC) at [5].

3.20.4 *Watered down definitions*

HMRC adopt this watered-down approach:

> Tax avoidance is any action taken to obtain a tax advantage in a way that Parliament did not intend or would not have intended had the matter been put before it. This definition is based upon the report on tax avoidance produced by the Tax Law Review Committee in 1997.[144]

Note that HMRC had already altered the nuance by deleting the words "plainly" and "possibly" from the TLRC formulation set out above: Lord Nolan's emphasis (expressed by use of the word *evident)* is absent in HMRC's definition.

House of Commons Briefing Paper "Tax avoidance and tax evasion" has offers more examples of watering down the definition:[145]

In the House of Lords:

> Lord McKenzie: The term "tax avoidance" is usually used to refer to an inappropriate reduction in tax liability.

In the Commons:

> Mr Gauke: avoidance ... is widely understood to entail taking a view of the tax treatment of a transaction that is tenable but has tax consequences that were not intended by the legislature.

And HMRC:

> Judith Knott (then HMRC Director, Corporation Tax International Anti-Avoidance): What we mean by legitimate tax planning is tax planning that is very much in line with Parliament's intentions when it passed the rules. A good example would be putting cash into an ISA account. That is legitimate and what Parliament intended to happen. Avoidance, on the other hand, is behaviour that seeks to bend the tax rules in a way that Parliament did not intend.

With hindsight, one can see that HMRC have been successful in promoting these looser readings of the definition in the Courts. This reflects changes

[144] IR152 Trusts: An Introduction (withdrawn on 30/09/04) *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[145] Briefing paper no 7948, 13 April 2021 *http://researchbriefings.files.parliament.uk/documents/CBP-7948/CBP-7948.pdf*

in public and judicial opinion since *Willoughby* was decided in 1997.[146]

There have been some attempts to be more specific.

3.20.5 *Special tax regime*

In *IRC v Willoughby*:

> The genuine application of the taxpayer's money in the acquisition of a species of property for which Parliament has *determined a special tax regime* does not amount to tax avoidance merely on the ground that the taxpayer might have chosen a different application which would have subjected him to less favourable tax treatment.[147]

This repeats the test of the intention of parliament (what parliament has "determined" is, I think, the same as what parliament has intended). It brings the added refinement of identifying "special tax regimes" which parliament intended to apply. Professor Willoughby's offshore bonds seem a reasonably clear[148] example of a "species of property for which parliament had determined a special tax regime".

This approach can be generalised into all occasions where parliament has determined a "special tax regime" (regardless of whether there is any particular "species of property" involved):

> The adoption of a course of action which avoids[149] tax should not fall within section 99 if the legislation, upon its true construction, was intended to give the taxpayer the choice of avoiding it in that way.[150]

The existence of a special tax regime is neither a necessary nor a sufficient condition of tax mitigation. It is only a factor to consider. There is no relieving provision for bed-and-breakfast transactions, which are accepted as mitigation.[151] Conversely, as the Special Commissioner rightly said in *Carvill v IRC*:

[146] See 2.5 (Attitudes to tax avoidance).

[147] [1995] STC 143 at p.183, emphasis added. This is from the CoA judgment, but HL did not disagree.

[148] It might be argued that parliament had intended the chargeable events regime for normal bonds but not for personal portfolio bonds.

[149] Lord Hoffmann has here used "avoid" in the loose etymological sense (to include mitigation). Section 99 provided that an arrangement was void as against the Commissioner for Income Tax if its purpose or effect was "tax avoidance".

[150] *O'Neil v IRC* [2001] STC 742.

[151] See 3.20.8 (Other indicia of avoidance).

> It is not enough to say that if you find a relieving provision then it is the evident intention of Parliament that the taxpayer should be entitled to use it whatever the circumstances. As *Furniss v Dawson* shows it is quite possible to mis-use a relieving provision. To give an example in the same area as this case, suppose the Appellant had formed [the non-resident company] solely to give him a non-resident employer in order to obtain the foreign emoluments deduction. If that company had been funded entirely by the UK companies and had done nothing other than employ the Appellant, it might be the case that the Appellant would have been avoiding tax because he was misusing a relieving provision. ... the taxpayer must do more than point to the existence of a relieving provision; he must be using, rather than misusing, the relieving provision in a way consistent with Parliament's evident intention.[152]

Willoughby was perhaps close to the line. In *Davies v HMRC* the taxpayer owned a non-resident property development company through an offshore life insurance wrapper. This was (unsurprisingly) held to be avoidance:

> The taking out of life policies per se does not constitute tax avoidance. However, unlike in *Willoughby*, that is not the only transaction in this case. The creation of a special purpose vehicle was primarily for the purpose of creating an entity to complete the purchase in SAP's place. The selection of Mauritius as the jurisdiction for this vehicle, however, was specifically for tax reasons: to avoid paying tax in the UK under the terms of the Treaty. In addition, the purpose of creating a vehicle to replace SAP was to avoid SAP becoming liable to UK tax on income from the property development ...[153]

3.20.6 *Choices and avoidance*

There is sometimes said to be a "choice principle", which is:

> Choosing between two alternatives – if one is carrying out a commercial or a family or an investment transaction, choosing the most tax-efficient – is not avoidance.[154]

[152] [2000] STC (SCD) 1543 at [91].

[153] [2018] UKFTT 559 (TC) at [88]. The UT agreed: [2020] UKUT 67 (TCC) at [43]. HMRC conceded that the company did not have a UK PE, but nowadays the company would be subject to CT on its profits, PE or no PE: see 22.3 (Dealing/developing UK land).

[154] Baker "Tax avoidance, tax mitigation and tax evasion" *https://vdocuments.mx/tax-avoidance-tax-mitigationphilip-baker.html*

It is self-evident that no such principle exists; or at least, expressed in this form, it goes too far. If a UK settlor creates a trust for their family they have to choose between UK and foreign trustees; but the choice of foreign trustees by a UK settlor is avoidance.[155]

One can accept a choice principle if it is combined with the concept of the intention of parliament, ie if the settlor makes choices *within the intention of parliament*, there is no tax avoidance; this is equivalent to the concept of "special tax regime".[156]

The choice principle is said to be based on the well-known passage from *Brebner*.[157] But it is essential to distinguish two issues:

(1) Identifying the purpose
(2) Classifying the purpose as avoidance/mitigation

Brebner, if one reads it carefully, only concerns point (1). It is not an early recognition of an avoidance/mitigation distinction: that would be anachronistic because the distinction was not then made.[158] It would also be wrong because that distinction is irrelevant in the transactions in securities motive defence.

In *Fisher* in the Upper Tribunal it was common ground that:[159]

> Picking a lower tax route over a higher tax route does not equate to tax avoidance (but equally does not preclude tax avoidance)

3.20.7 *Economic consequences*

In *Willoughby*:[160]

> The hallmark of tax avoidance is that the taxpayer reduces his liability to tax without incurring the *economic consequences* that Parliament *intended* to be suffered by any taxpayer qualifying for such reduction in his tax liability. The hallmark of tax mitigation, on the other hand, is that the taxpayer takes advantage of a fiscally attractive option afforded to

[155] The choice principle has been criticised in Australia, as a "false dichotomy": see Myers "Tax avoidance and the High Court since Sir Garfield Barwick" *http://law.unimelb.edu.au/__data/assets/pdf_file/0005/1585994/2005-Myers1.pdf*

[156] See 3.20.5 (Special tax regime).

[157] See 3.11 (Choices and purpose).

[158] It is possible that an unarticulated avoidance/mitigation distinction was embryonically present in *Brebner*.

[159] [2020] UKUT 62 (TCC) at [107] where this proposition was common ground.

[160] See App.7.7.2 (Economic reality/consequences).

> him by the tax legislation, and genuinely suffers the *economic consequences* that Parliament *intended* to be suffered by those taking advantage of the option.[161]

This repeats the test of the intention of parliament with the added refinement of identifying "economic consequences". This is based on two Templeman judgments:

> The material distinction in the present case is between tax mitigation and tax avoidance ... Income tax is mitigated by a taxpayer who reduces his income or incurs expenditure in circumstances which reduce his assessable income ...Income tax is avoided ... when the taxpayer reduces his liability to tax without involving him in the loss or expenditure which entitles him to that reduction. The taxpayer engaged in tax avoidance does not reduce his income or suffer a loss or incur expenditure but nevertheless obtains a reduction in his liability to tax as if he had.[162]

The non-recourse loan in *Ensign Tankers* is an example of a transaction without economic consequences and in *Challenge* Lord Templeman gave another example which is particularly relevant to trusts:

> When a taxpayer makes a settlement, he deprives himself of the capital which is a source of income and thereby reduces his income. If the settlement is irrevocable and satisfies certain other conditions the reduction in income reduces the assessable income of the taxpayer. The tax advantage results from the reduction of income.[163]

These are transactions with obvious economic consequences.

Professor Willoughby's investment in his bond had some "economic consequences" as compared to a direct investment in the underlying assets though one might have thought they were not very substantial.[164]

[161] [1997] UKHL 29 (emphasis added).

[162] *IRC v Challenge* [1986] STC 548 cited in *Ensign Tankers v Stokes* [1992] STC at p.240. Lord Millett (whose decision in the High Court was reversed in *Ensign Tankers*) took the opportunity in *Collector of Stamp Revenue v Arrowtown Assets* [2003] HKCFA 46 *http://www.ird.gov.hk/eng/pdf/facv4_2003.pdf* to cast doubt on the correctness of *Ensign Tankers*, but that does not affect the point here.

[163] *IRC v Challenge* [1986] STC at p.554–555.

[164] Lord Nolan identified the following economic consequence [1997] UKHL 29:

> "The reality in truth is that the bond holder has a contractual right to the benefits promised by the policy, no more and no less. It is therefore quite wrong to describe the bond holder as having, in the words of the Appellants' printed case 'in substance all the advantages of direct personal ownership without the tax

The GAAR also uses an "economic" criteria. Section 207(4) FA 2013 provides:

> Each of the following is an example of something which might indicate that tax arrangements are abusive—
>
> (a) the arrangements result in an amount of income, profits or gains for tax purposes that is significantly less than the amount for economic purposes,
>
> (b) the arrangements result in deductions or losses of an amount for tax purposes that is significantly greater than the amount for economic purposes...

3.20.8 *Other indicia of avoidance*

It is suggested that "economic consequences" and "special tax regime" are categories of tax saving steps which do accord with the intention of parliament but are not an exhaustive categorisation of mitigation. They should be regarded as indicia or "badges" of mitigation (like the badges of trade). One can think of others. The Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations are interesting series of attempts to identify indicia of tax avoidance for the purposes of disclosure obligations. The fact that the regulations (originally made 2004) were amended in 2006, 2009, 2010, 2013 and 2016 shows that the exercise was not a straightforward one. The indicia in the Regulations include:
(1) confidentiality from other promoters; and
(2) premium fees (typically linked to tax savings).

OECD also identified secrecy[165] as a common characteristic of avoidance:

> disadvantages'. The significance of this misdescription would become all too apparent if—perish the thought—Royal Life were to become insolvent and unable to meet its obligations to the bond holders."

Before 2008 I described this as unconvincing, as the insolvency of Royal Life seemed so remote a possibility as to be discounted. The 2008 recession proved the risk was not quite as low as one might have thought.

See App 7.7 (Economic reality etc).

[165] There are different types of secrecy:
(1) Secrecy (better described as confidentiality) against other tax advisers (the scheme vendor wishing to keep the profits of a scheme to themselves).
(2) Secrecy against HMRC (as OECD envisage) in order to postpone the time when HMRC are informed for as long as lawfully possible.
(3) Secrecy against HMRC in order to avoid or frustrate any investigation. Of course dishonest breach of a duty of disclosure marks a point where avoidance

> Secrecy may also be a feature of modern avoidance. In some cases tax advisers sell ready-made avoidance devices, one term of the contract of sale being that the taxpayer keeps the facts secret for as long as possible. It is in the interest of the avoiders to keep the administration from learning about new schemes because official and public knowledge may be followed by legislation to counter that kind of avoidance.[166]

Neither secrecy nor premium fees are normally associated with commonplace offshore trust transactions. But if, exceptionally, that was the case then it would be a factor suggesting that the transaction should be characterised as tax avoidance.

3.20.9 *Established practice*

An important indicia is familiarity and use. Once a tax avoidance arrangement becomes common, it is almost always stopped by new legislation within a few years. If something commonly done is contrary to the intention of parliament, it is only to be expected that parliament will stop it. So that which is commonly done and not stopped is not likely to be contrary to the intention of parliament. It follows that tax reduction arrangements which have been carried on for a long time are unlikely to constitute tax avoidance.

There are arguments against this view.

(1) It may seem strange that an act might be stigmatised as tax avoidance if challenged by HMRC or parliament promptly after it is first done; but if such acts become the general practice over a period of time then the intention of parliament is decided differently.

(2) Common practice may not be easily identified, It may be quickly forgotten (especially given a swift turnaround of HMRC staff and lack of institutional memory).[167] Whether it is recorded may be a matter of chance.

becomes evasion.

Concealment in category (3) is not primarily characteristic of tax avoidance schemes. It is a problem which may affect all aspects of tax collection (whether or not involving avoidance). The Keith Committee recognised this: Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.5. By contrast, lawful concealment in category (1) and (especially) category (2) is an indicia of tax avoidance.

[166] OECD Report by Committee of Fiscal Affairs (1980) cited in OECD International Tax Avoidance and Evasion (1987), p.17.

[167] For an example, see 34.18.8 (Dual-contract rule: Critique).

Nevertheless, the better view is to have close regard to this factor. Judges have a strong intuitive sense that that which everyone does, and has long done, should not be stigmatised with the pejorative term of "avoidance". This, I suggest, is the true reason why the courts classify bed-and-breakfast transactions and back-to-back loans as mitigation and not tax avoidance.[168]

This is consistent with the approach of the GAAR. Section 207(5) FA 2013 provides:

> The fact that tax arrangements accord with established practice, and HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice, is an example of something which might indicate that the arrangements are not abusive.

Professor Sandford drew another categorisation of tax savings which offers a related indicia of avoidance. He refers to:

(1) Tax savings offered by government to induce a certain kind of behaviour or to fulfill what it feels to be an obligation.
(2) Methods of saving that a government dislikes, but allows to remain for administrative reasons.
(3) Tax savings deriving from technical loopholes unforeseen at the time of drafting.[169]

Category (1) is obviously mitigation and category (3) is obviously avoidance. It is suggested that category (2) should be classified as mitigation rather than avoidance. An example is a transfer of a land-owning company (instead of its land) to reduce the rate of stamp duty from SDLT rates on land to SD rates (if any) on shares. The Government considered imposing stamp duty at land rates on shares in land-owning companies to prevent this, but decided not to proceed with the idea.[170]

[168] *Ensign Tankers (Leasing) v Stokes* 64 TC 617 at p.741: "A taxpayer who carries out a "bed and breakfast" transaction by selling and repurchasing shares establishes a loss for capital gains tax because he has actually suffered that loss at the date of the transaction. In "back to back" transactions the taxpayer is entitled to any reduction in tax which Parliament has attached to each transaction."
Back-to-back loans have been accepted by HMRC for decades: International Tax Handbook, para 1201.

[169] *Tax Avoision* (1979, IEA) p.81.

[170] Modernising Stamp Duty (HMRC, Consultative Document 2002) para 2.34. Contrast Australia where the transfer of shares in "land-rich" companies is subject to stamp duty at the rates applicable to land.

ATED is said to be aimed at these transactions, but is restricted to residential property. Transfers involving other property should be considered mitigation rather than avoidance. An example is the use of offshore companies to hold UK assets (other than UK residential property) to save IHT.

3.21 Failed indicia of avoidance

3.21.1 *Spirit of statute*

Other approaches in distinguishing tax avoidance and tax mitigation are to seek to identify "the spirit of the statute" or "misusing" a provision. I take this to mean exactly the same as the "evident intention of parliament" properly understood. If that is right, the expression adds nothing but rhetoric and confusion. If it means anything vaguer or more intuitive than that, then the concept deserves the ridicule expressed in *Norglen v Reeds Rains Prudential*.[171] Either way, the expression is best avoided in this context (and indeed in any context, other than the theological[172] from which it draws its rhetorical power.)

3.21.2 *"Artificial/devices"*

Another approach is to seek to identify "artificial" transactions. This raises a number of difficulties.

First, while tax avoidance frequently involves transactions that can be described as "artificial", this is not always the case. You can have tax avoidance without much (if any) artificiality[173] and, of course, artificiality without tax avoidance. That in itself would not be a fatal objection if we are merely seeking badges of avoidance and not a test which will work every time.

However, the unlawyerlike term "artificial" is too vague to be useful even as a badge of tax avoidance. The 1955 Royal Commission commented on s.44 F(No. 2)A 1915 ("A person shall not, for the purpose of avoiding

[171] "It is not that the statute has a penumbral spirit which strikes down devices or strategies designed to avoid its terms or exploit its loopholes. There is no need for such spooky jurisprudence." [1999] 2 AC 1 at p.14.

[172] 2 Corinthians 3:6-8: "... a new covenant, not of the letter but of the Spirit. For the letter kills, but the Spirit gives life".

[173] For instance: (1) appointment of a non-resident trustee; (2) transfer to a non-resident company; (3) sale of an income stream for a capital sum (now caught by Income Stream code).

payment of excess profits duty, enter into any fictitious or artificial transaction ..."):[174]

> A transaction is not well described as "artificial" if it has valid legal consequences, unless some standard can be set up to establish what is "natural" for the same purpose. Such standards are not readily discernible.

The Supreme Court makes the same point:

> Artificiality, if it is to be deployed as a workable legal concept, has to be tested against some standard of transactional normality, and the search for such a standard is far from straightforward.[175]

The problem is not that the word "artificial" is meaningless. But it only has a meaning to the extent that there are standards of what is non-artificial (or "natural" or "normal").[176]

For a striking illustration, see the comment of a MP opposing the proposal in the Married Women's Property Bill 1868, that a married woman should own property, as creating:

> an *artificial* and an unnatural equality between men and women.[177]

The 1915 Act was used as a model for anti-avoidance provisions, thus forcing the courts to decide what is artificial as best they can:

> 'Artificial' is an adjective which is in general use in the English language. It is not a term of legal art; it is capable of bearing a variety of meanings according to the context in which it is used. ... their Lordships

[174] Royal Commission on the Taxation of Profits and Income Cmd. 9474 para 1024.

[175] *Pendragon v HMRC* [2015] UKSC 37 at [5]. Similarly, *Hurstwood Properties v Rossendale BC* [2021] UKSC 16 at [51]: "Nor does it illuminate the legal issues to use words such as "artificial" or "contrived" ..."

[176] In this respect "artificial" is like "real"; see App 7.7.1 (Economic terms with antonym).
A further problem is that if standards of artificiality can be identified, a transaction is may be regarded as more or less artificial, that is, artificiality is a matter of degree which does not easily lend itself to resolution into the stark dichotomy of artificial/non-artificial. But resolving shades of gray into black or white is a problem which frequently arises in law.

[177] Married Women's Property Bill Deb 18 May 1870, vol 201 cc878-92 *https://api.parliament.uk/historic-hansard/commons/1870/may/18/bill-16-second-reading* see Holford, "Victorian Wives and Property" in Vicinus, *A Widening Sphere* (1980).

> reject the trustees' first contention that its use by the draftsmen of the subsection is pleonastic, that is, a mere synonym for 'fictitious'. A fictitious transaction is one which those who are ostensibly the parties to it never intended should be carried out. 'Artificial' as descriptive of a transaction is, in their Lordships' view a word of wider import.

No further definition was attempted:

> Where in a provision of a statute an ordinary English word is used, it is neither necessary nor wise for a court of construction to attempt to lay down in substitution for it, some paraphrase which would be of general application to all cases arising under the provision to be construed. Judicial exegesis should be confined to what is necessary for the decision of the particular case. Their Lordships will accordingly limit themselves to an examination of the shares agreement and the circumstances in which it was made and carried out, in order to see whether that particular transaction is properly described as 'artificial' within the ordinary meaning of that word.[178]

In *CT Audit v Cigarette Company of Jamaica* the Privy Council cite this and continue:

> 22. ... a transaction is an abstract construct. Every transaction is in a sense artificial in that it is put together by two or more parties in order to create or alter legal rights and obligations as between them. While mindful of Lord Diplock's warning against too much judicial exegesis the Board consider that in this context a transaction is "artificial" if it has, as compared with normal transactions of an ostensibly similar type, features that are abnormal and appear to be part of a plan. They are the sort of features of which a well-informed bystander might say, "This simply would not happen in the real world." Recognising a transaction as artificial in this sense is an evaluative exercise calling for legal experience and judgment. It is certainly not an ordinary question of primary fact....
> 23. A transaction is not artificial merely because it is not commercial, or not fully commercial. Income tax affects transactions by way of bounty as well as commercial transactions. But if a transaction effected in a commercial context is attacked as uncommercial that may be a reason for looking at it closely... it is necessary to examine the particular transaction and the circumstances in which it was made and carried out.[179]

[178] *Seramco Superannuation Fund Trustees v IT Commissioner* [1977] AC 287.
[179] [2012] UKPC 9 at [22] - [23].

A long term interest-free company loan to a shareholder (rather than dividend) was held not to be artificial. It was relevant that the borrower was able to repay.

It would be easy to compose a judgment in favour of the opposite view (as did the court at first instance.) The word "artificial" is unclear because there are rarely clear standards. It is of little if any use in determining whether examples which arise in practice are tax avoidance.

In practice the word "artificial" is often used to describe a transaction carried out for tax avoidance purposes. A transaction is not categorised as tax avoidance because it is artificial: it is described as artificial because it is tax avoidance. For instance:

> such elaborate arrangements would not have been entered into other than for the purpose of tax avoidance. The arrangements had no genuine commercial purpose. ... The arrangements can, *therefore*, correctly be described as artificial.[180]

Similar points apply to that particular obstacle to clear thinking, the pejorative term "device".[181] The term "contrived" is just a synonym of "artificial".

In UK statutory drafting the word or concept "artificial" is not used. The word abnormal is occasionally used, and whatever its problems, it is at least clearer than artificial, as it raises the fundamental issue directly and not indirectly: what is normal and what is not?

3.21.3 *"Genuine"*

The word "genuine" is used in three distinct senses:

(1) It is used as the antithesis of sham (in the legal sense of the term, aka fictitious). In *Ramsay v IRC*:[182]

> to say that a document or transaction is a "sham" means that while professing to be one thing, it is in fact something different. To say that a document or transaction is genuine, means that, in law, it is what it

[180] *Huitson (R, oao) v HMRC* [2010] EWHC 97 at [11] (emphasis added).

[181] *Norglen v Reeds Rains Prudential* [1999] 2 AC 1 at p.13: "I do not think that it promotes clarity of thought to use terms like stratagem or device."

[182] 54 TC 101 at p.18. Likewise *McGuckian v IRC* 69 TC 1 at p.78: "It was thought that if the steps were genuine, ie. not sham or simulated documents or arrangements, the court was not entitled to go behind the form of the individual transactions."

professes to be, and it does not mean anything more than that.

(2) It is used as the antithesis of tax avoidance. For instance:

> Genuine commercial transactions (i.e. those where gaining or obtaining a tax advantage was not a main purpose, or one of the main purposes) ...[183]

A transaction is not tax avoidance because it is non-genuine: it is non-genuine because it is tax avoidance.

(3) "Genuine" in expressions such as "genuine commercial transaction". The word here reflects the drafter's sense of a risk that (because of the vagueness of the word *commercial*) a transaction which is not actually commercial may wrongly be presented as if it was. The word might be regarded an intensifier[184] but it seems to me that is no difference between "commercial transaction" and "genuine commercial transaction" even as a matter of nuance. The word is (more or less) otiose. In this context the older expression *"bona fide* commercial", and the plain English paraphrase "*real* commercial (reason)" have the same connotation.

In none of these senses is the word or concept "genuine" of any assistance in drawing the line between what is and is not tax avoidance. In this respect it is like the word "real" which requires serious unpacking: see App.7.1 (What do we mean by "real"?).

3.22 Intention: parliament\government

I suggest two broad approaches to "tax avoidance" can usefully be distinguished:

(1) "Tax avoidance" as politicians, civil servants (and perhaps most non-tax lawyers) use the term. This means a tax reduction arrangement which is contrary to the intention or wish of the *Government of the day* (ministers or civil servants, primarily HMRC). A National Audit Office Report offers an example of this usage:[185]

[183] HMRC Consultation Document, *Simplifying Transactions in Securities Legislation* (July 2009) para 3.3. For another example see 52.14 (UK settlor and UK beneficiaries).

[184] See App 7.4 (Real used as intensifier).

[185] Countering VAT Avoidance, (1992).

> Avoidance involves complex issues and the position is constantly changing. A policy change in the UK, or a ruling from the European Commission or European Court of Justice, can easily result in today's unacceptable avoidance becoming tomorrow's acceptable tax mitigation, and vice versa.

This is "tax avoidance" for the purposes of politics and administration.[186] For example, accumulation & maintenance trusts[187] which between 1974 and 2006 were a paradigm example of mitigation, suddenly became tax avoidance in the political vocabulary of the Blair administration when it imposed IHT charges on such trusts in 2006.

Similarly when lobbyists (particularly those in favour of higher taxation) use the term tax avoidance to mean any tax behaviour of which they disapprove, often including behaviour which neither government nor HMRC regard as objectionable.[188]

(2) "Tax avoidance" in the sense used by tax lawyers. This means a tax reduction arrangement which is contrary to the intention of*parliament*. The view of the Government or HMRC should not come into it.

This lawyer's concept of "tax avoidance" is better in law because it is consistent with the Rule of Law: the rule of law requires that tax liabilities are to be determined by settled rules derived from statute and other sources of law, and not by the opinion or decision of a civil servant or politician.[189] This concept is also less volatile. It is right, indeed necessary, for it to be so. If the meaning of "tax avoidance" were "constantly changing" as a result of a mere "policy change in the UK" then the concept is unworkable for tax.

My distinction was accepted in the former ITH:

[186] A purist may say this usage is incorrect or debased; that takes us to the debate as to whether or not there is such a thing as "correct" English usage (where different groups use English differently) and how one determines it if there is. But the purist cannot stop the word being used in this political sense.

[187] These trusts qualified for IHT relief under s.71 IHTA 1984.

[188] The 2016 version of Professional Conduct in Relation to Taxation used a similar concept: "The definition of 'avoidance' is an evolving area that can depend on the tax legislation, the intention of Parliament, interpretations in case law, the view of HMRC and the varying perceptions of different stakeholders...". But this is not in the current version; see 122.1 (Codes of conduct).

[189] See 2.8 (The Rule of Law).

> **103. Avoidance in international context**
> *Within the Revenue we do not categorise avoidance in quite the narrow way that the Courts have done.* Of course we make a distinction between mitigation and avoidance. However, if a taxpayer takes advantage of the law to get a tax advantage which is not, *in our understanding*, within the spirit of the legislation, we tend to look on that as avoidance.[190]

The avoidance/mitigation distinction is not self-explanatory, it is not a given. It is a construct defined and determined by reference to values and attitudes of the tax culture in which we live. The difference between the approaches (1) and (2) is partly: *whose* values and tax culture does one apply, and: *to what materials* does one refer to ascertain these values?

The taxation of PETs offers an example. In 1973, CT Sandford wrote:

> At present gifts made more than seven years prior to death pay no tax (with the possible exception of capital gains tax). ... Is there evidence that such gifts are contrary to the intention of Parliament? Both circumstantial evidence and logic point to this conclusion. Thus if Parliament were indifferent to the making of gifts prior to death, would there have been successive increases in the gifts *inter vivos* period, which, since 1894, has risen in four successive stages from one to the present seven years?

Sandford considered and dismissed some policy arguments in favour of an estate duty and concluded:

> A reasonable interpretation would be that the gifts *inter vivos* provision was intended to prevent as many gifts as possible from circumventing estate duty.[191]

The repeal of CTT and return to an estate duty under the name of Inheritance Tax shows that lifetime giving since 1986 cannot now be regarded as "tax avoidance".[192] I suggest that even in 1973 lifetime giving was not "avoidance" of estate duty (in the strict sense). If parliament intended to tax all lifetime gifts it would *not* have increased the lifetime

[190] Emphasis added.

[191] *Hidden Costs of Taxation*, 1973, p.113.

[192] This is self-evident, but if authority is needed, HMRC's GAAR guidance para 2.2.1 provides at D2.2.1 that "giving assets to children to reduce future IHT liabilities" is not abusive.

gift period to seven years. It is obvious that such an increase would not stop tax-free lifetime giving. parliament would certainly not have enacted IHT taper relief under which gifts made more than four years before death pay a reduced rate! How then did Professor Sandford reach the opposite conclusion? Perhaps because he wished to advocate the imposition of a capital transfer tax. When one wishes to support a tax reform, the temptation to describe the old law as permitting "avoidance" is irresistible (as a tool of advocacy) and also has a certain underlying logic. There is tax avoidance in a political if not a lawyer's sense. If a future Government abolishes PETs, and returns to some form of CTT, it seems safe to predict that those supporting the reform will castigate lifetime giving as tax avoidance.

One point to note is that a comment from the Government (or any proponent of a tax reform) that existing law permits "avoidance" needs special scrutiny because it is easy to conflate the intention of parliament (tax avoidance in the strict sense) with the intention of Government (or of the proponent), which I would call tax avoidance in a political sense.

Understood in this sense, the term "tax avoidance" is still vague but not, I think, hopelessly so, as, for instance, the phrase "the right amount of tax".

3.23 Finding intention of parliament

This is the problem at the heart of the *Willoughby* definition of "tax avoidance". If this term means an action contrary to the intention of parliament, one must identify that intention. C.T. Sandford addressed the problem:

> But here we meet the major difficulty. ... As individuals we may feel certain that a particular action is contrary to the intention of the law; but the *objective* interpretation of that intention can only be found in the words the law uses.[193]

Sandford was right. The issue is statutory interpretation and the principles of statutory interpretation should be applied. The intention of parliament should be decided primarily from the words of the statutes. Other material may be relevant on the usual principles of statutory interpretation: White and Green Papers, Royal Commission Reports, Hansard on *Pepper v Hart* principles, textbooks and learned articles.

The City of London Law Society comment:

[193] IFS, *Hidden Costs of Taxation*, 1973, p.114 (emphasis in original).

> Government and HMRC must also improve their institutional memory in relation to policy decisions. Members of our Committee have had experiences of talking to HMRC officials who have no idea why particular provisions are included within given legislation, even where that legislation was introduced relatively recently. In the world of the GAAR, where it is necessary to identify the consistency or otherwise of a transaction with policy, it will in turn be necessary for that policy to be identifiable if excessive uncertainty is not to result.[194]

This is true not just for the GAAR, but whenever policy is an explicit or implicit factor in tax law.

Textbooks can help support fading institutional memories with fuller discussion of policy issues.

3.23.1 *Levels of intention*

It has been said that a concept of "tax avoidance" based on what is contrary to "the intention of parliament" is not coherent. The object of statutory construction is always said to be to find "the intention of parliament".[195] A successful tax avoidance scheme is a scheme where a court has concluded that the intention of parliament was not to impose a tax charge in the circumstances which the tax avoiders had placed themselves. This applies whether the scheme constitutes mere avoidance or tax abuse (though abusive schemes are not likely to succeed after the GAAR).

Shenfield made this point:

> What is meant by the intentions of the law and in what sense does avoidance circumvent them? Courts of law in our system seek to find the intention of a law in the words it uses. In this sense the avoider does not circumvent its intentions but abides by them.[196]

The answer is that the expression "intention of parliament" is being used

[194] Response to Office of Tax Simplification competitiveness review (2014) para 2.6.

[195] See *Cross on Statutory Interpretation*, Oxford University Press (3rd ed., 1995), Chapter 2.

[196] A.A. Shenfield, *The Political Economy of Tax Avoidance*, Institute of Economic Affairs, Occasional Paper 24, 1968, pp.20–21. Lord Hoffmann made the same point in "Tax Avoidance" [2005] BTR 197 at p.206: "tax avoidance in the sense of transactions successfully structured to avoid a tax which Parliament intended to impose should be a contradiction in terms. The only way in which Parliament can express an intention to impose a tax is by a statute which means that such a tax is to be imposed."

in two senses. It is consistent to say that (say) the *Fitzwilliam* scheme:

(1) escapes IHT (there being no provision to impose an IHT charge); and yet

(2) constitutes the avoidance of IHT.

One is seeking the intention of parliament at a higher, more generalised level. A statute may fail to impose a tax charge, leaving a gap that even a court cannot fill even by purposive construction, but nevertheless one can conclude that there would have been a tax charge had the point been considered. An example is the notorious case of *Ayrshire Employers Mutual Insurance Association v IRC* where the House of Lords held that parliament had "missed fire".[197] A.A. Shenfield recognised this (perhaps grudgingly):

> What the complainant against avoidance means by the intentions of a law is not what may be deduced from what it says, but what parliament intended it to say, or what parliament ought in the complainant's opinion to have intended it to say, or what in his opinion it would have been equitable for it to say. Now I do not say that this can never have substance. We all know that, quite apart from outright errors of draftsmanship, there is a distinction between the letter and the spirit of a law. But the spirit of a law is elusive. It is tempting to believe that one has grasped the spirit of a law when in truth one is moved by prejudice or preconception. We ought to be extremely careful ...[198]

3.24 Time to ascertain intention of parliament: Change in law

The concept of tax avoidance as an act contrary to the intention of parliament raises the question of *at what time* parliament's intention is to be ascertained. The intention of parliament may change and the same act could be tax avoidance at one time but not at another. Of course, it needs an Act of Parliament to make this change.

[197] 27 TC 331. It might be objected that this case is wrongly decided, by modern standards of statutory interpretation: "I venture respectfully to suggest that if, as in this case, the courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed"; Diplock, "The Courts as Legislators", Address to the Holdsworth Club (1965). *https://www.kessler.co.uk/wp-content/uploads/2012/05/CourtsAsLegistlators.pdf* In *Cooper v Billingham* 74 TC 139 para 35 the CoA thought that the same result could happen (albeit rarely); but that was in 2001, and I doubt if one could find that view stated more recently.

[198] *Ibid*, note 94.

For the purpose of TAARs, tax avoidance must mean an act contrary to the intention of parliament at the time of the arrangement or transfer which is tested. This is consistent with the rule that one examines the purpose of the transferor at the time of the transfer.[199] Otherwise changes in the intention of parliament would often have considerable retrospective effect: a transfer which was not tax avoidance when it was made would retrospectively be treated as made for a tax avoidance motive (or vice versa). This view was adopted in *Rialas v HMRC.*[200]

This rule may of course favour HMRC. A transfer to avoid (say) Selective Employment Tax would fail the motive defence and that would continue to be the case even after the abolition of that tax.

3.24.1 *Transfer in anticipation of reform*

An arrangement or transfer made in 2007/08 to avoid the rules in the FA 2008 from 2008/09 is not tax avoidance for two reasons:

(1) It is not contrary to the intention of parliament to avoid *future* tax laws: the intention of parliament is to be determined at the date of the transfer.[201]

(2) Parliament clearly anticipated and accepted that such disposals and appointments would be made and took no steps to counteract them.

3.24.2 *Transfer by non-resident pre-1996*

Parliament decided in 1936 not to apply (what is now) s.720 ITA to transfers made by non-resident transferors, and that was (after some vacillation) held to be the law.[202] It might be argued that a transfer of assets by a non-resident between 1936 and 1996 could not be said to be contrary to the intention of parliament, and so it could not constitute income tax avoidance.[203] However the legislation which reversed *Willoughby* and brought transfers by non-residents into the scope of the transfer of asset provisions applies to pre-1996 transfers, so it is clearly

[199] See 3.16 (Time to ascertain purpose).

[200] See 52.21.2 (Transfer for avoidance).

[201] See 3.24 (Time to ascertain intention of parliament: change in law).

[202] See 49.21.3 (Transferor non-resident when transfer made).

[203] Contrast pre-1936 transfers by UK resident individuals; these were caught by the new 1936 legislation, but parliament had never made a decision that such transfers should not be taxed so it would be possible to regard such transfers as made for tax avoidance purposes.

assumed that such transfers could have been for avoidance purposes.[204] The explanation is that:

(1) A transfer by a non-resident before 1996 does not normally involve income tax avoidance.

(2) However, there are special circumstances where a transfer by a non-resident may be for income tax avoidance[205] and, of course, a pre-1996 transfer made for CGT or IHT avoidance would also be caught.

3.24.3 *Transfer pre-1981; no power to enjoy*

Similar considerations apply to a transfer before 1981 to which s.720 ITA did not apply (because the transferor had no power to enjoy the income of the asset transferred). Parliament decided in 1936 not to apply the transfer of asset provisions to transfers where the transferor had no power to enjoy, and that was (again after some vacillation) held to be the law.[206] So it might be argued that a transfer where the transferor had no power to enjoy could not be said to be contrary to the intention of parliament, so it could not constitute income tax avoidance. However in 1981 parliament brought in s.731 ITA which applied to pre-1981 transfers,[207] so it is clearly assumed that such transfers could have been for avoidance purposes. The explanation is that:

(1) A transfer made before the 1981 reforms where the transferor had no power to enjoy does not normally involve income tax avoidance.

(2) However there are special circumstances where a transfer where the transferor had no power to enjoy may be IT avoidance (one example would be where the settlor did have power to enjoy but later died or was excluded) and, of course, a pre-1981 transfer made for CGT or IHT avoidance would also be caught.

[204] s.81 FA 1997. There is an exemption only for income arising before 1996.

[205] Examples of special cases are:

(1) a transfer in anticipation of becoming UK resident or

(2) a transfer made just before the enactment of the new legislation (when the change of the law was predictable).

Another view could be that such transfers constitute tax avoidance from after the 1952 and 1970 consolidations, which parliament enacted on the basis of the *Congreve* and *Herdman* decisions (later reversed) that transfers by non-residents were caught. But that offends common sense and the principle that a consolidation does not alter the law.

[206] See 47.6 (Meanings of “settlor-interested”).

[207] s.45 FA 1981; there is an exception for income arising before 1981.

3.25 Reduction/deferral/failed avoidance

3.25.1 *Reduction*

The motive defence refers to "avoidance" alone but standard definitions of "tax advantage" refer to "avoidance *or reduction*" of tax.[208] In this expression it could be that avoidance is used in the strict sense and reduction is referring to mitigation, but that is anachronistic (since the distinction was not known at the time). The word "reduction" was probably added to forestall an argument that the mere reduction of tax was not avoidance as long as some tax remained payable.[209] But nowadays a court would not be so literal and there is no doubt that (for the purposes of the motive defence) a reduction of tax from £10 to £6 amounts to the avoidance of £4.

3.25.2 *Deferral*

Arrangements to defer tax may constitute "avoidance".[210] Indeed the classic avoidance case *Furniss v Dawson* might be characterised as involving mere "deferral" of tax. However, the fact that tax is merely deferred, and will or may later be paid, is a factor which may support the conclusion that the arrangement is to be characterised as mitigation and not avoidance.[211]

3.25.3 *Unsuccessful avoidance*

A purpose may exist independently of its success. HMRC correctly say:

[208] See 3.19 ("Tax advantage"). The earliest use of this formula was s.35 FA 1941 (Excess Profits Tax), 3 years after the ToA motive defence was recast; but I do not think anything turns on that chronology.

[209] Contrast the statutory expression "mitigate or remit" a penalty.

[210] This is self-evident, but if authority is needed, see *Davies v HMRC* [2020] UKUT 67 (TCC) [at 44]: "there could be tax "avoidance" where tax was deferred or reduced; it was not necessary for the arrangements to produce the result that no tax was payable in any circumstance."

[211] This is also self-evident, but for an example, see *IRC v Willoughby* in the Court of Appeal [1995] STC at p.183: "I do not see why the choice of an offshore bond or policy, for the taxation of which Parliament has made express and recent provision, should be regarded as tax avoidance at all. The tax is not avoided it is deferred. Moreover it is deferred to an event which Parliament has prescribed not to a time of the taxpayer's choice." This aspect was not considered on appeal.

> ... even if the transaction does not achieve its expected result, there may still be a tax avoidance purpose.[212]

OECD agree:

> Successful tax reduction is neither a sufficient nor a necessary test of tax avoidance. It is not sufficient because this would cover acceptable tax planning [ie mitigation] and it is not necessary because an avoidance scheme designed to reduce tax may not succeed.[213]

3.26 The GAAR

3.26.1 *GAAR terminology*

"GAAR" is the acronym for the **g**eneral **a**nti-**a**buse **r**ule introduced in the FA 2013. This has inspired similar rules in devolved taxes:

Rule	**See**
General anti-avoidance rule	s.81A Tax Collection and Management (Wales) Act 2016
General anti-avoidance rule	s.62 Revenue Scotland and Tax Powers Act 2014

The original *anti-abuse* rule has been extended (or watered down, depending on one's outlook) into wider *anti-avoidance* rules. These, confusingly, also abbreviate to GAAR, but some other term is required to avoid confusion, perhaps, "devolved GAARs". I do not discuss the two devolved GAARs in this work.

3.26.2 *Tax arrangements*

Section 207(1) FA 2013 defines "tax arrangements" using standard TAAR wording:

> Arrangements are "tax arrangements" if, having regard to all the circumstances, it would be reasonable to conclude[214] that the obtaining of a tax advantage was the main purpose, or one of the main purposes, of the arrangements.

3.26.3 *Anti-abuse rule*

Section 206 FA 2013 provides:

[212] Unallowable Purpose Draft Guidance para 10050.

[213] OECD Report by Committee of Fiscal Affairs (1980) cited in OECD's International Tax Avoidance and Evasion (1987), p.17.

[214] See App 2.24 (Reasonable-to-assume).

> (1) This Part [Part 5 FA 20130 has effect for the purpose of counteracting tax advantages arising from tax arrangements that are abusive.
> (2) The rules of this Part are collectively to be known as "the general anti-abuse rule".

Thus the GAAR is not an anti-*avoidance* rule; it is an anti-*abuse* rule. The key term is "abusive". Section 207(2) FA 2013 provides:

> Tax arrangements are "abusive" if they are arrangements the entering into or carrying out of which cannot reasonably be regarded as a reasonable course of action in relation to the relevant tax provisions...

This is the so called "double-reasonableness test". In practice no-one has been able to provide an example of arrangements which fail a single reasonableness test, but are saved by the double reasonableness test. The difference is not so much a test as an attitude of mind:

> The Government agrees with the Report's recommendation to introduce a rule which is targeted at artificial and abusive arrangements (those that the Report refers to as "egregious", "very aggressive" or "highly abusive contrived and artificial"). It accepts the Report's conclusion that introducing a "broad spectrum" general anti-avoidance rule would not be beneficial for the UK tax system. ... the GAAR should not affect what the Report describes as "the centre ground of tax planning".[215]

The extent to which HMRC or the Courts will focus the GAAR on this target remains to be seen. The GAAR's definition (perhaps unavoidably) allows some scope for mission creep.[216]

3.26.4 *GAAR factors*

Section 207(2) FA 2013 continues:

> ... having regard to all the circumstances including—
> (a) whether the substantive results of the arrangements are consistent

[215] HMRC consultation document "A General Anti-Abuse Rule" (2012) para 2.1. Similarly, HMRC consultation document "Modernising the taxation of corporate debt and derivative contracts" (2013) para 14.3:

> "The test of "abuse", for the purposes of the GAAR, is a high threshold, and ...[the GAAR] does not seek to encompass the full range of tax avoidance activity."

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/205432/2013_06_05_Condoc_FINAL_FOR_PUBLICATION.pdf

[216] See 30.14.7 (Sale of company: GAARable?).

> with
> [i] any principles on which those provisions are based (whether express or implied) and
> [ii] the policy objectives of those provisions,
>
> (b) whether the means of achieving those results involves one or more contrived or abnormal steps, and
>
> (c) whether the arrangements are intended to exploit any shortcomings in those provisions.

Section 207 FA 2013 continues:

> (3) Where the tax arrangements form part of any other arrangements regard must also be had to those other arrangements.
>
> (4) Each of the following is an example of something which might indicate that tax arrangements are abusive—
>
> (a) the arrangements result in an amount of income, profits or gains for tax purposes that is significantly less than the amount for economic purposes,
>
> (b) the arrangements result in deductions or losses of an amount for tax purposes that is significantly greater than the amount for economic purposes, and
>
> (c) the arrangements result in a claim for the repayment or crediting of tax (including foreign tax) that has not been, and is unlikely to be, paid,
>
> but in each case only if it is reasonable to assume that such a result was not the anticipated result when the relevant tax provisions were enacted.
>
> (5) The fact that tax arrangements accord with established practice, and HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice, is an example of something which might indicate that the arrangements are not abusive.
>
> (6) The examples given in subsections (4) and (5) are not exhaustive.

Of course the Courts would have worked that out for themselves, so all this might be regarded as unnecessary; but perhaps it is helpful.

3.26.5 *Avoidance/abuse compared*

The GAAR provides a different test from "avoidance". What is abusive will be avoidance, but the contrary does not hold: what is avoidance need not be abusive. But the GAAR factors are all also applicable to determine what is avoidance.

It follows that guidance on what is abusive for the GAAR may not necessarily be applicable to the question of what is avoidance for an avoidance-purpose TAAR. But it should be helpful - so far as guidance ever is or can be helpful. In many cases the GAAR guidance is all there is.

At present the concepts seem quite close. It might happen in the future the Courts (further) water down the concept of avoidance, but uphold the (intended) high threshold for abuse. Then the gap between the concepts would increase.

In the first decade of the GAAR we have not had any GAAR case law.[217] Perhaps in 10 or 20 years time we will know more. Or perhaps not. Discuss.

3.27 Tax avoidance: Critique

3.27.1 *Avoidance: coherent concept?*

Littlewood surveyed the Privy Council case law and reached a gloomy conclusion:[218]

> ... on the basic issue—what is tax avoidance?—very little progress has been made. In particular, no one (neither the Privy Council, nor the courts of Australia or New Zealand, nor anyone else) has yet devised a satisfactory definition of tax avoidance. Worse, the Privy Council (like the Australian and New Zealand courts and the various commentators who have addressed the problem) has not only failed to *define* tax avoidance; it has failed even to produce a coherent set of guidelines as to how it might be recognised... Of the 13 cases, some were found by the Privy Council to fall on one side of the line, and some on the other. Surely, then, it might be said, these cases must provide *some* guidance as to where the line is to be drawn? Even this, however, seems unduly optimistic. In other areas of the law, judges (and commentators) might disagree as to how particular cases should be resolved, but at least they generally agree as to what constitutes a marginal case (as with, for example, the distinction between capital and revenue). This is not so,

[217] The absence of case law may be partly due to the deterrent penalty cost of taking and losing a GAAR appeal; see 126.52 (GAAR penalties).
There have been many decisions of the GAAR Panel. It is debatable how much attention should be given to these, but almost of them concern schemes that seem clearly abusive. The only decision so far in favour of the taxpayer is the Opinion Notice issued on 26 April 2022, for which see 40.10 (Company loans: GAAR).

[218] Littlewood "The Privy Council and the Australasian Anti-Avoidance Rules" [2007] BTR 175.
https://www.yumpu.com/en/document/read/28456681/the-privy-council-and-the-australasian-anti-avoidance-rules

> however, of the distinction between tax avoidance and tax mitigation. Rather, the judges tend to present whichever outcome they prefer not only as correct, but as clearly so—even when they fail to agree. This is perhaps the strangest feature of these cases. For example, in *Challenge* Lord Templeman (for the majority) said "a clearer case ... cannot be imagined",[219] though this was evidently less clear to Lord Oliver who dissented. Similarly in *Peterson* the majority regarded it as clear that the anti-avoidance rule did not apply; and the minority as equally clear that it did: "a clearer case", said Lord Bingham and Lord Scott in their joint *dissenting* judgment, "can hardly be imagined".[220]

But to describe an uncertain point as "clear" is common in judicial rhetoric, even outside the field of avoidance.[221]

> The cases thus confirm what is notorious: that the idea of tax avoidance is one of the most difficult in the whole of the law. To describe the distinction between avoidance and mitigation as "vague" is to understate the problem, for it suggests that there is general agreement as to roughly where the line lies and that the disagreement is only as to marginal cases. But none of their Lordships appear to have regarded any of the cases as marginal. It is difficult, therefore, to extract from them any guidance as to where the line lies. Notable, too, is the frequency of disagreement: of the eight cases decided after the Privy Council started permitting dissents in 1966, only two were decided unanimously.[222] Dissents tended, moreover, to be colourful. Lord Wilberforce, dissenting in *Mangin v IRC*, accused the majority of "interpretative astigmatism".[223] Lord Oliver, in *Challenge*, described the majority view as "eccentric".[224] And, in *Peterson*, Lord Bingham and Lord Scott said the majority view was "extraordinary"[225] and required "shutting one's eyes to the obvious."[226] It would seem reasonable to conclude that the idea of tax avoidance is simply not susceptible to coherent explication.

[225] [2005] UKPC 5 at [101].

[226] [2005] UKPC 5 at [78] and [101].

Technical Teams Operational Guidance Manual reaches the same conclusion:

> **TTOG3435 Identification of Code 8 cases: Tax avoidance** [Jun 2016]
> ‘Avoidance’ is not defined in the Taxation Acts and attempts to define it have not in the past been successful.

There has been some judicial recognition of this point, though not as strongly expressed:

> While ‘tax avoidance’ is a phrase that most people think they understand, tax avoidance is a difficult concept to define and means different things to different people.[227]

3.27.2 *Avoidance concept defended*

Recognising the shortcomings of the attempts to define tax avoidance often triggers scepticism. According to such views, the concept is illusory and the search for a definition is a wild goose chase. Rules against tax avoidance amount to taxation by discretion; and existing anti avoidance rules, or at least, the GAAR, should be repealed. Littlewood comments:

> Arguments along these lines are indeed common. Perhaps they are sound. But there are nonetheless grounds upon which anti-avoidance rules might be defended.
> The first of these is expediency: the rules might be radically indeterminate, but they work.
> Secondly, the complaint is based on a fallacy. The scope of anti-avoidance rules is obviously uncertain, but it does not follow that *not* having such a rule results in any less uncertainty: even in the absence of a rule against avoidance, the courts seem inevitably (as in the UK) to be called upon to determine whether taxing statutes should be interpreted in such a way as to give efficacy to, or to negate, taxpayers’ attempts to avoid tax. The UK’s experience, in particular the *Ramsay* line of cases, suggests that the degree of uncertainty might be much the same, or worse. For, although the scope of the *Ramsay* principle remains uncertain, it seems that the idea of avoidance (and presumably also,

[227] *HMRC v Hyrax Resourcing* [2019] UKFTT 175 (TC) at [153]. Likewise *Carlton (R, oao) v HMRC* [2018] EWHC 130 (Admin) at [69]:
“There is, of course, a good reason why the statute makes no reference to tax avoidance: that concept is difficult to define ...”.
Likewise *Fisher v HMRC* [2020] UKUT 62 (TCC) at [130]:
“The concept of avoidance is a slippery one.”

> therefore, the distinction between avoidance and mitigation) is embedded in it ... Consequently there seems to be little reason to suppose that anti-avoidance rules *add to* the level of uncertainty from which taxing statutes suffer. In other words, the uncertainty may be a feature not of the anti-avoidance rule, but of the rules defining the scope of the tax. The effect of the anti-avoidance rule, therefore, is perhaps to tilt the field in favour of the Revenue, whilst leaving the degree of uncertainty more or less unchanged (or perhaps ameliorating it a little).
>
> Thirdly, the unpredictable scope of general anti-avoidance rules seems appropriately selective in whom it inconveniences. Taxpayers and their representatives in Australia and New Zealand routinely complain that this unpredictability deters taxpayers from undertaking economic activity which is not tax-driven and which would be beneficial to society.[228] The 13 Privy Council cases, however, suggest that this is not so, since in every one of them (including those in which the rule was held not to apply) the taxpayer plainly went out of his way to structure his affairs in a manner calculated to reduce his liability to tax. The cases thus suggest that it is only those who sail close to the wind who get wet. On this last point, however, it is necessary to acknowledge that the taxpayers who have ended up in the law reports may not be typical of all those against whom the Australian and New Zealand Revenues have invoked their general anti-avoidance rules. In particular, it is possible that the rules have been invoked in cases in which the amount of tax in dispute was too small to be worth litigating, or in which the taxpayer could not afford to litigate.
>
> In other words, it is possible that the general anti-avoidance rules *have* served as a basis for arbitrary taxation even though the law reports contain no evidence of it. It is possible that in the UK the *Ramsay* principle has functioned in this way also.[229]

In the current climate of hostility to avoidance, the point is perhaps academic.

Cross references

The following topics are discussed elsewhere

Topic	**See para**
Domicile as fiscal test: Critique	1.4.1

4.1 Domicile: Introduction

Domicile is important for many tax purposes, in particular:

(1) IT/CGT remittance basis
(2) IHT on foreign situate assets

Domicile is also important for non-tax purposes, including aspects of family law, civil jurisdiction and succession.

4.2 Concepts of domicile

Domicile is a concept of private international law.

In English law, the rules are laid down by common law, but modified by statute. *Coller v HMRC* contains a convenient 7 page summary of the law of domicile.[1]

Scots domicile law is the same as English law (except where statutory provisions have diverged, which they have only on minor points[2]). Indeed the leading case of *Udny v Udny* is a Scottish case. Northern Ireland domicile law is the same as English law.

These rules apply for tax purposes except so far as modified by tax law.

"Domicile" has a technical meaning in UK law which is distinct from the meaning of "domicile" in ordinary English (it is not used much in

[1] [2023] UKFTT 212 (TC) at [11] ff.

[2] *Arnott v Groom* (1846) 9 Court of Sess Cas (2nd Series) 142 accessible *https://www.kessler.co.uk/wp-content/uploads/2015/06/Arnott-v-Groom.pdf* "in a matter like the present, involving a question of international law, the judgments of the English courts are of equal authority with our own."

ordinary English, but if used it simply means, home).[3]

This chapter considers the UK law sense of domicile, which one may call the general law sense; and references to domicile below are to that sense of the word. Note however that there are a number of other (more or less) distinct concepts of domicile.

An individual may be deemed to be UK domiciled for tax purposes ("deemed domicile").[4] I discuss deemed domicile in the next chapter.

For DTA purposes it is sometimes necessary to look at foreign law concepts of domicile. As a general rule:

(1) Foreign common law jurisdictions have a concept of domicile which derives from English law, and is very similar. Statutory provisions have diverged, but only affect minor points; the apples have not fallen far from the tree.

(2) Civil law jurisdictions also use the word "domicile" but it has a different meaning there (which is, perhaps ironically, close to ordinary English usage).[5]

The term "domicile" is used in a defined sense in IHT DTAs. I refer to that as **"treaty-domicile"**; the definition varies from one treaty to another.[6]

Article 4 of the OECD Model contains the definition of (what I call) "treaty-residence". The heading to that article in the 1963 version of the Model was "fiscal domicile". The 1977 version changed the heading to "Resident", which is more apt; but some existing DTAs still use the old heading "fiscal domicile". Here the drafter used the word domicile as a synonym of residence, and it may be that civil lawyers generally regard the two terms as (broadly) the same. But in UK law, the terms residence and domicile have distinct meanings. The term "fiscal domicile" is not apt to describe residence, or treaty-residence, and I think it is best avoided altogether.

The term "domicile" is also used in a defined sense in international treaties and elsewhere,[7] but that is not usually relevant for UK tax

[3] e.g. in Walt Disney's *Lady and the Tramp*:
"Now we lookin' over our new domicile
If we like we stay for maybe quite a while" (!)

[4] See 5.1 (Deemed domicile: Introduction); App 10.1 (Parliamentarians).

[5] See 115.9.3 ("Domicile" in France/Italy).

[6] See 114.5 (Treaty-domicile).

[7] Eg Part 5 CJJA 1982.

purposes.

The spelling *domicil* (without the final -e) is archaic.[8]

A person whose domicile is under consideration was traditionally called the propositus, but the Latin word is unnecessary and best avoided.

4.2.1 *"Non-doms"*

"Non-dom" started as slang, but language evolves, and in keeping with the Zeitgeist, the irresistible monosyllables entered the statute book in 2013.[9] "Non-dom" should now be regarded as acceptable standard usage. For the time being, at least, I prefer not to use it in more formal writing; though it is useful in headings, where space is limited, and eventually the title of this book might be shortened to *Taxation of Nonresidents and Non-doms*.

"Non-dom reliefs" may be used to refer to IT/CGT remittance basis, or more widely, extend other IT/CGT reliefs such as protected-trust relief and rebasing.

In current usage, the expression "non-dom" is used not to refer all those who are not UK domiciled (which is of course almost all the world's population) but to a smaller group, namely UK resident non-domiciled individuals who claim the remittance basis, or otherwise enjoy non-dom reliefs. It is sometimes useful to have a label to describe this group, and "non-dom" has come to serve it. I think it is now pedantic to object that this is not correct legal usage. But the expression does contain some ambiguity unless one specifies exactly what "non-dom reliefs" are included. Is a person a "non-dom" in this sense if they have claimed the remittance basis in the past, or if they may do so in the future? or if they do not claim the remittance basis but qualify for protected-trust reliefs? Does the term extend to UK resident foreign domiciliaries who benefit from IHT reliefs? Or UK domiciliaries (or deemed domiciliaries) who have created a settlement when non-UK domiciled when the trust qualifies as excluded property? Careful writers should consider and explain the intended meaning of the expression before using it, or these ambiguities may lead to error.

[8] A Google search records an overwhelming preference for spelling with a final -e.

[9] The FA 2013 uses the heading *Remittance basis restricted to non-doms*. A *Bailii* search shows the expression gradually finding its way into the law reports. At present the law reports often use quotation marks, implying a certain unease; but it seems safe to predict those will disappear in the course of time.

4.3 Only one domicile

Everyone has one and only one domicile. The expression "**non-domiciled**" is in a literal sense inapt, because everyone is domiciled somewhere. It is, however, an acceptable and convenient abbreviation (in context) for non-UK domiciled (just as "non-resident", in context, means non-UK resident).

A person must be domiciled in a single legal jurisdiction.[10] The expression "**UK domiciled**" is in a literal sense inapt because a person must be domiciled in England, Scotland or Northern Ireland. It is, however, universally and aptly used to describe someone who is domiciled in England, Scotland or Northern Ireland.[11] (Similarly the expression "UK law" may aptly be used to refer to the law applicable in any part of the UK, ie English/Scots or Northern Ireland law, as appropriate.)

For tax purposes it makes no difference where in the UK a person is domiciled, though for non-tax purposes that may be important.

4.4 Domicile of origin

Dicey states:[12]

> Every person receives at birth a domicile of origin:
> (a) A legitimate child born during the lifetime of his father has his domicile of origin in the country in which his father was domiciled at the time of his birth;
> (b) A legitimate child not born during the lifetime of his father, or an

[10] See 4.22 (Domicile territory/country).

[11] For completeness: legislation does very occasionally refer to a person domiciled
- "in any part of the UK"
- "in a part of the UK" or
- "anywhere within the UK"

Eg, s.721(3) ITEPA (somewhat pedantically) provides:

> "Any reference in this Act to being domiciled in the UK is to be read as a reference to being domiciled in any part of the UK."

The Tax Law Rewrite later decided this was unnecessary, and (quite correctly) did not put an equivalent clause in subsequent rewrite legislation. It would be tidier to repeal s.721(3) as it is unnecessary, but that is probably more trouble than it is worth, until such time as ITEPA itself comes to be rewritten or replaced. Complete consistency in legislation is not to be expected.

[12] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 6R-025 ("*Dicey*"). "Mr Dicey's celebrated work" (*IRC v Cohen* 21 TC 301 at p.309) is the one that the Courts cite.

> illegitimate child, has his domicile of origin in the country in which his mother was domiciled at the time of his birth; ...

This rule embodies gender assumptions which reflect its date of origin. Domicile is now one of the few areas of English law where legitimacy still matters.

Where the parents of an illegitimate child marry, the child becomes legitimate from the date of the marriage, so that does not affect the domicile of origin.[13] The legal definition of legitimacy is a large topic, but not sufficiently important to discuss here.

At present illegitimacy issues rarely arise, because domicile most commonly concerns older individuals who were born at a time when illegitimacy rates were low. Approximately 50% of children in the UK are now born to unmarried parents, so in a generation's time, the issues will arise much more often.

The position in Scotland has been revised and avoids sex/marital status discrimination.[14] English law should follow Scotland, and, the reader may think, the sooner the better.

See too 4.19 (Adoption and parental orders); App. 3.7 (Illegitimacy).

4.5 Domicile of choice

The test of acquiring a domicile of choice has been expressed in a variety of ways. In *IRC v Bullock*:

> ... the true test is whether he intends to *make his home* in the new country....[15]

In *Whicker v Hume*:[16]

> By domicile we mean home, the permanent home;[17]

[13] Section 2 Legitimacy Act 1976. The marriage may affect a domicile of dependency; see 4.17 (Child's domicile: England).

[14] See 4.18 (Child's domicile: Scotland). It is doubtful whether the English law rule is human-rights compliant.

[15] 51 TC 522 at p.540.

[16] (1858) 7 H.Cas. 124, 160.

[17] The passage continues:

> "and if you do not understand your permanent home, I am afraid that no illustration drawn from foreign writers or foreign languages will very much help you to it."

This witticism has often been cited. But it is not true: "permanent home" is a vague expression which benefits from further elucidation and examples.

In *Udny v Udny*,[18] the test is "the country in which he has chosen to settle himself". A person who acquires a domicile of choice:

> does an act which is more nearly designated by the word 'settling' than by any one word in our language. Thus we speak of a colonist settling in Canada or Australia, or of a Scotsman settling in England.

Here the word "settling" is another way of expressing the test that a person must live in a place as his sole or chief residence.

In *Bell v Kennedy*[19] the test is whether the person:

> had determined to make, and had made, Scotland his home, with the intention of establishing himself and his family there, and ending his days in that country.[20]

The above cases refer to "home" but others use the term "residence". In *Udny v Udny* the test is that:[21]

> a man fixes voluntarily his sole or chief residence in a particular place with an intention of continuing to reside there for an unlimited time.

Dicey states:[22]

> Every independent person can acquire a domicile of choice by the combination of residence and intention of permanent or indefinite residence, but not otherwise.

All the above come to the same thing. In domicile cases, the expressions home and residence are used interchangeably.[23]

Adopting Dicey's formulation, there are two requirements: residence and intention. I consider them separately.

Case law expressions should not be construed like statutory expressions, and that applies even if the expression is codified in a textbook rule in the style of Dicey.

[18] LR 1 Sc & Div 441 at p.452.

[19] (1868) LR 1 Sc and Div 307 .

[20] This is often cited, eg *SA v FA* [2022] EWFC 115 at [15]: "this test by its reference to ending one's days usefully emphasises the need for the subject to have a fixed purpose that he will live in the country of his domicile of choice".

[21] (1869) LR 1 Sc & Div App 441 at p.458.

[22] Dicey, Morris & Collins, Conflict of Laws (16th ed., 2022), para 6R-037 (Rule 12)

[23] The conflation of *home* and *residence* is found elsewhere; see 6.21.3 (Home/residence compared).

4.6 "Domicile-residence"

Residence matters for:

(1) Acquisition of domicile of choice: in order to acquire a domicile of choice, the individual must be resident in the country concerned.

(2) Abandonment of domicile of choice: in order to lose a domicile of choice, the individual must cease to be resident in the country concerned.

"Residence" in this context is not quite the same as residence for tax purposes (the SRT). It is necessary to have different terms: I use "**tax-residence**" and "**domicile-residence**".

Domicile cases do not provide much discussion of domicile-residence. It has been said to mean "a bona fide resident here, not casually, or as a traveller";[24] not, as one would say today, a tourist or short-term business visitor. The word sometimes used is an "inhabitant"; as in *Plummer v IRC*:[25]

> I find the contrast between an inhabitant and a person casually present useful to describe the minimum quality of residence which must be taken up in a new country before a domicile there can be acquired...

But inhabitant is just another word for resident, so this does not take us very far.

It is considered that residence, in the context of domicile-residence, has its ordinary meaning (sometimes called the common law meaning). This is the same as jurisdiction-residence,[26] and (more or less) the same as the concept of residence applied for tax purposes before the SRT.[27]

In practice the SRT and domicile-residence will usually come to the same thing, since the SRT is intended to encapsulate the ordinary meaning of the word residence.[28] So far as possible it would be best to avoid having two concepts of residence, one for tax and one for domicile. But there are some differences:

(1) For domicile-residence an individual is resident (or not) on a

[24] *Manning v Manning* (1871) LR 2 P & D 223.

[25] 60 TC 452 at p.463.

[26] See 102.14.2 ("Jurisdiction-residence").

[27] For the common law (pre-2013) test, see the 2012/13 edition of this work chapter 3 (Residence of individuals).

[28] See 6.38.1 (SRT/pre-2013 law compared).

particular date, whereas for tax-residence an individual is UK resident (or not) for a tax year.

(2) Assuming an individual resides as an inhabitant, there is no minimum period of presence required for domicile-residence: domicile-residence commences immediately on arrival if the intention is to stay.[29]

(3) Domicile-residence must be in one of England, Scotland or Northern Ireland; tax-residence is in the UK. But this will rarely if ever matter in practice.

(4) Is it possible to have domicile-residence (or in the case of dual residence, a chief residence) in the UK without being tax-resident under the SRT? It should not be common because the object of the SRT is to clarify the ordinary meaning of residence, not to set a residence test significantly different from the ordinary meaning of "residence".[30]

(5) The SRT only applies for determining whether individuals are resident in the UK. But for domicile-residence the issue may be whether individuals are resident in some other jurisdiction.

4.7 Permanent/indefinite residence

Intention to reside permanently/indefinitely matters for:

(1) Acquisition of domicile of choice: in order to acquire a domicile of choice, the individual must intend to reside permanently/ indefinitely in the country concerned.

[29] *Fasbender v AG* [1922] 2 Ch 850 at p.857-8: "I have great doubts whether her domicile at the time of the marriage was English. She had left England, and become resident in Germany at the time, though she had only been there a few days. She had done so with the intention of being married to a German resident in Germany, and of continuing to reside there with him after marriage, and I think this is, at any rate, evidence that she had adopted a German domicile." Likewise *Bell v Kennedy* (1868) LR 1 Sc & Div 307 at p.320: "Now this case was argued at the Bar on the footing, that as soon as Mr. Bell left Jamaica he had a settled and fixed intention of taking up his residence in Scotland. And if, indeed, that had been ascertained as a fact, then you would have had the *animus* of the party clearly demonstrated, and the *factum,* which alone would remain to be proved, would in fact be proved, or, at least, would result immediately upon his arrival in Scotland."
If further authority is needed, which I doubt, see *Re Plummer* 60 TC 452: "When there is no competing place of continuing residence, settlement may be established by presence for a very short time; even for a single day."

[30] See 6.38.1 (SRT/pre-2013 law compared).

(2) Abandonment of domicile of choice: in order to lose a domicile of choice, the individual must cease to intend to reside permanently/indefinitely in the country concerned.

"Permanent" residence seems straightforward, but despite the apparent rigidity of the word, what constitutes "permanence" in human affairs is to some extent a matter of degree and dependant on context.[31]

The meaning of "indefinite" is similarly, and more obviously, a matter of degree and context-dependent.

The phrase "permanent or indefinite" should be regarded as a composite expression, with a nuance slightly different from the sum of its parts, but given the context-dependant nature of the parts, it does not much matter. It is not a statutory expression, and should not be construed in the manner of a statute.

"Indefinite" (in its context) requires that the individual intends to reside in a country "until the end of their days". It seems to me that "indefinite" is an inapt word to use, because in its standard sense it is used to describe any period whose duration is not known exactly, even a relatively short period. For instance the duration of a strike may be indefinite;[32] so is the duration of a contract of employment. That is not the meaning here. However there is no single English word which neatly encapsulates the intended meaning. "Unlimited" is sometimes used and seems to me to be more apt, but this too needs clarification. *IRC v Bullock* 51 TC 522 cited the "classic statement" that a domicile of choice is acquired when:

> a man fixes voluntarily his sole or chief residence in a particular place with an intention of continuing to reside there for an *unlimited* time... it must be residence fixed not for a limited period or particular purpose, but general and indefinite in its future contemplation.[33]

[31] For a context where relatively short periods count as "permanent" see 9.12.2 ("Permanent").

[32] This is self-evident, but if authority is needed, see *Howard E. Perry v British Railways Board* [1980] 1 WLR 1375 at p.1380 which described the period of a strike as "clearly ... indefinite. It may be short, or it may be long; but it is plainly uncertain." The Law Commission made the same point in *The Law of Domicile* (1987) Law Com 186 *http://www.scotlawcom.gov.uk/download_file/view/228/* para 5.12: "'Indefinitely' by itself is insufficient: it could, on one view, cover an intention to live in a country for a short time for some temporary purpose, for example a short holiday of indefinite duration."

[33] *Udny v Udny* (1869) LR 1 Sc & Div App 441 at p.458 (emphasis added).

IRC v Bullock continues:

> I accept that statement ... with this qualification only that the expression "unlimited time" requires some further definition. A man might remove to another country because he had obtained employment there without knowing how long that employment would continue but without intending to reside there after he ceased to be employed. His prospective residence in a foreign country would be indefinite but would not be unlimited in the relevant sense. On the other hand, ... I do not think that it is necessary to show that the intention to make a home in the new country is irrevocable or that the person whose intention is under consideration believes that for reasons of health or otherwise he will have no opportunity to change his mind.[34]

And crucially:

> ... the true test is whether he intends to make his home in the new country until the end of his days unless and until something happens to make him change his mind.[35]

It is helpful to have a label to describe this, and I use the expression **"intention to reside permanently (in the domicile sense)"**. Earlier generations used the expression *animus manendi* (intention to remain). Legal Latin provided convenient shorthand labels for complex legal concepts. In the absence of a knowledge of Roman law, which contemporary lawyers do not possess, the use of Latin expressions offers little more than that, it seems to me; but also no less. But the current generation does not know even the rudiments of the classical languages, and Latin expressions should not now be used.[36]

The intention to reside permanently (in the domicile sense) is therefore very strict. In *IRC v Bullock*[37] the taxpayer resided in England for over 40 years but intended to return home to Nova Scotia (to which his wife objected) should he survive her or persuade her to change her mind. This possibility had sufficient substance to represent a real determination to return home rather than a vague hope or aspiration.[38] Group Captain

[34] 51 TC 522 at p.540.

[35] *IRC v Bullock* 51 TC 522 at p.540. This test was reaffirmed in *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [5] to [7].

[36] See 34.5.1 (Latin causation test rejected).

[37] 51 TC 522 at p.541.

[38] It is significant that at the time of this case Bullock was in his early 60's. Had he been a decade or more older, and still in the UK, a tribunal might perhaps have found an

Bullock did not acquire a UK domicile of choice but retained his domicile of origin.[39]

4.7.1 *Insufficient intention*

In *IRC v Bullock*:

> ... if a man who has made his home in a country other than his domicile of origin has expressed an intention to return to his domicile of origin or to remove to some third country upon an event or condition of an indefinite kind; for example. "if I make a fortune" or "when I've had enough of it." it might be hard, if not impossible, to conclude that he retained any real intention of so returning or removing. Such a man ... is like a man who expects to reach the horizon; he finds it at last no nearer than it was at the beginning of his journey. In *Aikman v Aikman*[40] Lord Campbell LC said that a mere intention to return to a man's native country on a doubtful contingency would not prevent residence in a foreign country putting an end to his domicile of origin.[41]

An example is *Re Furse* where the individual intended to live in England for the rest of his life except that he would return to America if he became physically incapable of taking an active interest in his farm. This was too indefinite:

> That contingency is altogether indefinite. It has no precision at all. A man's idea of an active physical life is likely to contract with the years. At the age of 80, after 40 years in England, the testator was still living at West Hoathly and, although he had been ill, he had no firm plans at all for leaving England.
>
> The testator's expressed intention, it seems to me, depended entirely on his

intention to return home to Nova Scotia was less likely. See *Ray v Sekhri* [2014] EWCA Civ 119 at [40]: "the potential death of a spouse is no more than a matter which may, or may not, prevent the acquisition of a domicile of choice. All will turn upon the facts in any individual case."

[39] For examples of long UK residence without acquiring a UK domicile of choice see:

Case	**Period in UK**
Ramsay v Liverpool Royal Infirmary [1930] AC 588	36 years
Winans v AG [1904] AC 287	37 years
IRC v Bullock 51 TC 522	44 years
Buswell v IRC [1974] 1 WLR. 1631	34 years
Cyganik v Agulian [2006] EWCA Civ 129	43 years

[40] (1861) 4 LT 374.

[41] 51 TC 522 at p.541.

> own assessment of whether an ill-defined event had occurred.[42]

Accordingly Mr Furse acquired a domicile of choice in England. Again:

> If a man intends to return to the land of his birth upon a clearly foreseen and reasonably anticipated contingency, e.g., the end of his job, the intention required by law [to acquire a domicile of choice] is lacking; but, if he has in mind only a vague possibility, such as making a fortune (a modern example might be winning a football pool), or some sentiment about dying in the land of his fathers, such a state of mind is consistent with the intention required by law.[43]

In another case, the intention to return was "no more than a pipe dream" and the individual acquired a domicile of choice in the UK.[44] In plain English: "wishful thinking".

In *Henkes v HMRC*[45] the taxpayer claimed to intend to leave the UK on retirement. That would normally prevent acquisition of a domicile of choice in the UK. However the facts cast doubt on his claim:

(1) He was age 76 and had no current plans to retire. The intention to retire was "no more than a vague aspiration."

(2) He had no significant links to his domicile of origin, or elsewhere. (A holiday home in Spain, and a Dutch passport, did not count for much).

(3) His links to the UK were profound: more than 50 years residence; his children and grandchildren were settled here; his wife was settled here and even after retirement he might stay in the UK during the rest of her lifetime.

In these circumstances he was held to have acquired a domicile of choice here. Other cases where a claim to intend to leave was similarly unimpressive are *Coller* and *Strachan*.

4.7.2 *Tax and intention*

Tax may be relevant to intention. For instance if a tax exile remains in the UK, intending to return home if and when their home tax regime is

[42] [1980] STC 596 at p.604.

[43] [1980] STC 596 at p.604.

[44] *Ray v Sekhri* [2014] EWCA Civ 119.

[45] [2020] UKFTT 159 (TC). If further factual examples are needed, which I doubt, implausible claims of an intention to leave the UK (which never happened) were rejected in *Coller v HMRC* [2023] UKFTT 00212 (TC); *Shah v HMRC* [2023] UKFTT 539 (TC).

relaxed, they would not acquire a domicile of choice here.

Likewise if an individual intended to remain in the UK only so long as UK tax law continues to allow a remittance basis and protected-trust reliefs, they would not acquire a domicile of choice here.

In *Spence v Spence* an individual moved to Spain to avoid CGT. The CGT avoidance motive showed an intention to remain in Spain long enough to cease to be resident and ordinarily resident in the UK (the then requirement) but as far as intention to reside permanently was concerned, it was a neutral factor. It shed no light either way. It was argued that if the avoidance of tax was a dominant factor in the move to Spain, this undermined the argument that the individual had from the start the intention of residing there permanently. That was a non-sequitur:

> ... the mere fact that a person moves to another country in order to avoid liability to tax in the country of origin does not necessarily mean that he cannot or is unlikely to acquire thereby a domicile of choice in that other country. It is plainly a matter which depends upon the facts and circumstances of the particular case.[46]

The acquisition of a foreign domicile which is primarily motivated by a desire to avoid UK tax is possible in theory, but may be difficult in practice, as if the only driver is to avoid tax, the intention to live in the territory may prove to be insufficiently firm. Sir Charles Clore is an example. In *Re Clore (No. 2)*:[47]

> ... Sir Charles was ... unhappy in Monaco and often said that he would really like to return to England permanently and accept the tax consequences. [A witness] asked him why he had decided to go there when all his interests were elsewhere. Sir Charles said that he did not know and that he was thinking of changing his mind and returning to live in England... he did not feel at home in Monaco.

On those facts the court found that Clore had not acquired a domicile of choice in Monaco. But it is a question of fact.

4.7.3 *Standard of proof*

In *Ramsay v Liverpool*:[48]

[46] [1995] SLT 335 at p.339.

[47] [1984] STC 609 at p.615.

[48] [1930] AC 588, at p.590. Again, in *Winans v Attorney-General* [1904] AC 287 at p.291:

> A domicile of origin can be changed and in its place a domicile of choice acquired, but the alteration is a serious matter not to be lightly assumed, for it results in a complete change of law in relation to two of the most important facts of life, marriage and devolution of property.

It is considered that the same applies to the abandonment of a domicile of choice:

> That leaves the question whether there is any difference in
> [1] the strength of the case which Mr Henwood must show if he acquired a domicile of choice in Mauritius without his domicile of origin reviving and
> [2] the strength of the case which he must show if his domicile of origin revived [on abandonment of a domicile of choice].
> It would be odd to have two different approaches within the same case... It seems to me that as a general proposition the acquisition of any new domicile should in general always be treated as a serious allegation because of its serious consequences. ... such an approach ensures logical consistency between two situations where the policy interest to be protected is ... the same.[49]

But just how "clear and compelling" the evidence needs to be depends on the facts of the case in point.[50]

4.7.4 *Who has burden of proof*

In *The Lauderdale Peerage*:[51]

> The onus of proving a change of domicile... lies upon those who assert it.

> "'unless you are able to shew that with perfect clearness and satisfaction to yourselves, it follows that a domicil of origin continues.' So heavy is the burden cast upon those who seek to shew that the domicil of origin has been superseded by a domicil of choice! And rightly, I think. A change of domicil is a serious matter -- serious enough when the competition is between two domicils both within the ambit of one and the same kingdom or country -- more serious still when one of the two is altogether foreign. The change may involve far-reaching consequences in regard to succession and distribution and other things which depend on domicil."

If further authority is needed, which I doubt, see *Re Fuld* [1968] P 675 at p.686.

[49] *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [89] -[94]. The contrary view has been suggested; see *Strachan v HMRC* [2023] UKFTT 617 (TC) at [157]. The view expressed in *Barlow Clowes* is to be preferred, but it is difficult to imagine a case which turns on this point.

[50] *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [84] to [96].

[51] (1885) 10 App Cas 692, at p.739.

So the burden of proof lies on HMRC to show that an individual has acquired a UK domicile of choice.[52]

But the significance of this is limited:

> the importance of onus of proof is easily exaggerated. While the burden of proof always exists, few substantial cases turn upon it and in making their factual findings the judge is usually expressing their considered judgment as to what in truth occurred.[53]

The onus of proof may be significant in ascertaining the domicile of a person who died long ago, as the evidence available is likely to be limited.

4.7.5 *Domicile of choice: Critique*

It is difficult to acquire a domicile of choice for two reasons:

(1) The requirement of intention to reside permanently (in the domicile sense) is a strong one.
(2) The onus of proof is a heavy one.

The reason is in part historical:

> For centuries, people have gone into the world from this country intending ultimately to return and without any intention of severing their connection with the British legal system and the ideas underlying it. It would not be in harmony with the temper of the British people if those who happen to be living abroad had to be told that there was no method whereby they could continue to regulate their lives according to the familiar British conceptions. It should also be remembered that a country which does not apply nationality as a yardstick in matters of private international law is bound to substitute for it a strict test involving a measure of permanence.[54]

The rules were designed to accommodate the empire builders of the 19th century. It is pleasant and profitable to trace the origin of legal rules in the social and economic conditions of a bygone age. But the question arises whether the rules are appropriate at the current time. The purpose here is of course private international law, not (or not primarily) tax law.

[52] See too 6.36 (Residence: Burden of proof).

[53] Bingham, "The Judge as Juror", *Current Legal Problems* (1985) p.2; reprinted in *The Business of Judging* (2000) p.2 (good holiday reading).

[54] First Report of the Private International Law Committee (1954) Cmd 9068, para 7 *https://www.kessler.co.uk/wp-content/uploads/2014/07/1261_001.pdf*

It has often been said that the rules are too strict. In 1954 the Private International Law Committee proposed that if an individual had his home in a country, they should be presumed to intend to reside there permanently (in the domicile sense).[55] A bill to that effect was introduced in 1958 but failed as a result of lobbying by UK resident foreign domiciliaries. The government argued that the fears of foreign businessmen were groundless, as the reform would not affect them; but that was a damaging defence, as if the reform did not have much effect, why was it worth making?[56]

A similar reform was proposed by the Law Commission in 1987.[57] The Government initially accepted the proposals but there was no change in the law. In 1996 the proposals were formally abandoned, probably for the same reason.[58]

Neither of these proposals were tax motivated. If they had any effect, it should have been broadly revenue-neutral, as to the extent that they may have made it easier to acquire a UK domicile of choice, they also made it easier to acquire a foreign domicile of choice. But they suffered from the problem of many tax reforms, that losers (UK resident foreign domiciliaries) complain more than winners.

In considering reform of the onus of proof, one should bear in mind that it may have limited significance in the way that cases are actually decided. If that is right, the reform of amending the burden of proof in domicile cases would have little if any practical effect.

In an interesting article in 1991, Professor Fentiman argued that "substantial connection" is a better test than intention, for acquisition of a domicile of choice.[59] That would have given a more sensible outcome,

[55] First Report of the Private International Law Committee (1954) Cmd 9068, para 7; *https://www.kessler.co.uk/wp-content/uploads/2014/07/1261_001.pdf*

[56] The controversy is recorded in Mann "The Domicile Bills"(1959) 8 ICLQ 457.

[57] Law Com. No. 168 *The Law of Domicile* *http://www.scotlawcom.gov.uk/download_file/view/228/*

[58] According to Hansard HC, 16 Jan 1996 Col 487:

> "The Government have decided not to take forward these reforms on the basis that, although they are desirable in themselves, they do not contain sufficient practical benefit to outweigh the risks of proceeding with them and to justify disturbing the present long established body of case law on this subject."

This was the right reason for the right decision. However, behind this decision was pressure of the foreign domicile lobby: see "Rules for Determining Domicile", Law Reform Commission of Hong Kong (2005) para 4.28 *http://www.hkreform.gov.hk*

[59] Fentiman, "Domicile Revisited" [1991] CLJ p.445.

in cases such as *Bullock, Ramsay,* and *Winans,* (where the individuals' connections with England were very substantial indeed). It seems to me that if we actually had a substantial connection test, the question of what amounts to a substantial connection would generate even more difficulty than an intention-based test; and in any case, it would not be desirable for the Courts to upset well-established rules of private international law. In practice the Courts have not developed the law in that direction and the intention test rules the day. However as intention is determined by examination of connections, substantial connection may determine findings of intention; and it is possible that a tribunal may pay lip service to intention but decide a case on the basis of substantial connection, holding that the individual's stated intention, however genuine, is insufficiently firm.[60]

4.8 Remaining non-dom: UK resident

Suppose an individual with a foreign domicile of origin (and not born in the UK) comes to the UK and wishes to retain their foreign domicile. The concern is not to acquire a UK domicile of choice.

The primary advice to be given is that the individual may live in the UK as long as they wish from year to year, but should not form the intention to reside here permanently. Unless they do so, the essential condition for the acquisition of a new domicile is not satisfied.

However, the individual should not be content with this mental step unless their stay here is short or fixed term. They should also take appropriate steps to broadcast the absence of any intention of residing here permanently and to manifest an intention to return elsewhere in due course. This is important because the court will decide for itself what is the true intention of the individual, and will have regard to the way that the individual conducts their affairs while in the UK.

The individual should if possible retain ties with their country of origin or the country where they intend in the future to settle. There are many ways to do so and what they do must be tailored to their circumstances. Possibilities for consideration include regular and extended visits home; local business interests, bank accounts and investments; membership of local social, political and religious organisations.

Conversely, the individual's social and business commitments in the UK

[60] See 4.12.2 (Evidence of living person).

should be minimised. But the significance of such commitments depends on the facts. The purchase of a home in this country (directly or through a trust structure) may indicate a greater degree of permanence than rented accommodation, but purchasing a property may imply nothing more than an intention of medium-term residence. Changing one's name (or its spelling) to accord with UK usage, may suggest a long term intention to remain in the UK; but it was common before and during the 2nd world war for refugees to change their name for the protection of themselves and relatives exposed to enemy control;[61] and not much of an inference as to long term intention could be drawn from that.

The individual should make a will taking effect under the law of their domicile.[62] The will should include a declaration that the individual intends to return home in due course or the circumstances in which that is to occur. The will might if appropriate express a desire to be buried in that country.

The purchase of a burial plot suggests an expectation to be buried in that country. If that is in the UK, it suggests an intention to remain there for the rest of the individual's life. If the burial plot is elsewhere, it may suggest an intention to leave the UK. However, this is not necessarily a matter which carries much weight and if done at the suggestion of a tax adviser, it carries no weight at all.

The retention of a foreign domicile of origin is not dependent on establishing a positive intention to return home: it is determined negatively by the absence of an intention to stay in the UK. An intention to move from the UK, whether to the country of origin or somewhere else, is enough to enable the domicile of origin to be retained:

> though a man has left the territory of his domicile of origin with the intention of never returning, though he be resident in a new territory, yet if his mind be not made up or evidence be lacking or unsatisfactory as to what is his state of mind, his domicile of origin adheres.[63]

The assembling of evidence of an intention to return to the country of origin, while potentially helpful, is in some cases unnecessary or inappropriate.

[61] This was so common that there was a standing order to facilitate the procedure: Army Council Instruction no 475 of 1943.

[62] A separate UK will may also be appropriate to deal with UK property.

[63] *Re Fuld* [1968] P 675 at p.685.

4.8.1 *Involvement in politics*

The general rule is that involvement in UK politics is compatible with a non-UK domicile though it is a factor to be taken into account in ascertaining intention to reside permanently. However, MPs and other parliamentarians are deemed UK resident and domiciled,[64] and the position of politicians is fraught if they or even their spouses are foreign domiciled, at least if they claim the remittance basis.[65]

There is a proposed rule that (in short) non-resident and foreign domiciled individuals may not make gifts (above a small amount) to a political party.[66] But although the law was enacted in 2009,[67] it is not in force: the necessary commencement order has not been made. Presumably the Brown administration fell before it could be done, and subsequent coalition/Conservative administrations did not favour the change. So gifts to political parties by foreign domiciliaries are currently lawful. It may be safer for foreign domiciliaries whose domicile might be challenged not to make major donations; but it depends on the facts.

The UK franchise may include commonwealth and Irish citizens, so while voting in the UK is not irrelevant to intention and domicile, it should not count for much.

[64] See App 4.1 (Parliamentarians).

[65] In April 2022 it was leaked (how?) that the wife of the Chancellor claimed the remittance basis; she was (or was said to be) domiciled in India. This was thought by some to be scandalous. It is difficult to see how anyone who had any understanding of UK tax could think that, but there it is. The story died down after she said that she would not claim the remittance basis.
This has been the state of politics at least since the 1920's when a peerage was given to Lord Vestey who had been a tax exile: see *"Vestey: Royal Commission evidence and debate*"
https://www.kessler.co.uk/wp-content/uploads/2013/07/Vestey_Royal_Commission_evidence_and_ensuing_debate.pdf

[66] The requirement is that "the individual's liability to income tax for the current tax year (including eligibility to make any claim) falls to be determined (or would fall to be determined) on the basis that the individual is resident, ordinarily resident and domiciled in the UK in that year."
Would that condition be met if the individual was deemed domiciled, or did not claim the remittance basis in the year, at least if the individual was not the settlor of a protected trust? At present the point does not arise.

[67] Section 10 Political Parties and Elections Act 2009 amending s.54 Political Parties, Elections and Referendums Act 2000.

Registration and voting as an overseas elector[68] is (in short) ignored in a domicile tax appeal, unless the taxpayer wishes otherwise.[69] This rule was intended to encourage UK expatriates to vote without imperiling their claim to be non-UK domiciled. There is considerable force in the objection made by Labour MP Mike O'Brien:

> Whereas the American colonies in 1774 cried, "No taxation without representation," it seems that ... overseas voters are now demanding representation without taxation... [Section 200] has all the hallmarks of a cynical amendment motivated by the self-interest of the Tory party. ... registration to vote shows a commitment to one's country. It can be evidence of domicile. In each case, that evidence will have a different weight, depending on the other circumstances of the individual, but it is right that registration should have some weight and show some degree of commitment to one's country.[70]

The rule ought to be repealed, but in the scrabble for political advantage it would be unrealistic to expect cool and impartial reflection, and it does not much matter.[71] Those who are concerned about possible UK domicile would still be best advised not to register or vote in the UK (and to vote in their country of domicile, if possible).

[68] This is an interesting corner of election law. Before 1985 non-residents could not vote in Parliamentary elections. The Representation of the People Act 1985 extended the franchise to "Overseas electors" who are (in short) non-resident British citizens who had registered as voters when UK resident; they may continue to vote until they have been non-resident for 15 years.
See House of Commons Library "BRIEFING PAPER 5923", 28 April 2022
http://researchbriefings.parliament.uk/ResearchBriefing/Summary/SN05923

[69] See s.200 FA 1996; the section was (unhelpfully) rewritten for IT purposes in s.835B ITA.

[70] Hansard, HC Deb 27 March 1996 vol 274 cc1106-10.
http://www.publications.parliament.uk/pa/cm199596/cmhansrd/vo960327/debtext/60327-41.htm The subsequent election (1997) was the Blair landslide, and O'Brien was no doubt also right to question whether this provision helped the Tories.

[71] There are over 5m overseas British citizens, and as of December 2021, there were almost 100,000 overseas electors: see
https://www.ons.gov.uk/peoplepopulationandcommunity/elections/electoralregistration/bulletins/electoralstatisticsforuk/december2021#overseas-electors
The US has a similar rule in s.106 [US] Uniformed and Overseas Citizens Absentee Voting Act 1986, but since the US taxes its non-resident citizens, the objection of "representation without taxation" does not arise.

4.9 Abandoning domicile of choice

Dicey states:[72]

> A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.

Thus there are two requirements: cessation of residence[73] and cessation of intention[74]. Dicey continues:

> When a domicile of choice is abandoned, either
> (i) a new domicile of choice is acquired; or
> (ii) the domicile of origin revives.[75]

A note on terminology. A person may be said to "abandon" a domicile in in three circumstances.

(1) A person may abandon a domicile of choice without acquiring a new domicile of choice, so their domicile of origin revives.

(2) Acquisition of new domicile of choice:
   (a) A person with a domicile of choice in country A, who acquires a new domicile of choice in country B, may be said to "abandon" their old domicile of choice.
   (b) A person with a domicile of origin in country A, who acquires a domicile of choice in country B, may be said to "abandon" their domicile of origin (though the domicile of origin continues in a spectral sense, as if they later abandon their domicile of choice, without acquiring a new domicile of choice, the domicile of origin revives).

IRC v Bullock illustrates all 3 senses:[76]

> since no man can have more than one domicile at one time, the act of acquiring a new domicile must necessarily involve the abandonment of the previous domicile.... *Lord v Colvin*[77]... refers to a man intending to abandon an acquired domicile and to resume his domicile of origin or to

[72] Dicey, Morris & Collins, Conflict of Laws (16th ed., 2022), para 6R-077 (Rule 15).
[73] See 4.6 ("Domicile-residence").
[74] See 4.7 (Permanent/indefinite residence).
[75] Dicey, Morris & Collins, Conflict of Laws (16th ed., 2022), para 6R-077 (Rule 15).
[76] 51 TC 522 at p.539.
[77] 4 Dr. 366 at p.422.

> his abandoning his domicile of origin to acquire a domicile of choice. In truth the insistence of Lord Chelmsford upon the importance of finding a fixed intention of abandoning one domicile and permanently adopting another is but a method of emphasising the importance of finding that the person in question intends to make his new country his permanent home. The abandonment of the previous home is implicit in the adoption of the new home if the latter is intended to be exclusive and permanent.[78]

It seems to me that the word "abandon" is most apt to describe case (1), ie where a person abandons a domicile of choice without acquiring a new one. In cases (2)(a)(b) it would be more apt to say that the former domicile is "lost", rather than "abandoned". As *Bullock* observes, the focus of enquiry in these cases is not on abandonment but on acquisition of the new domicile of choice (though the latter implies the former). But the terminology is too well established to change; and no difficulty arises as long as one bears in mind the differences between the three types of abandonment.

4.9.1 *Abandoning domicile of dependency*

A domicile of dependency ceases:
(1) for a child, on attaining the age of independence
(2) for a woman who was married on 1 January 1974, on that date or when the marriage ended, if earlier

Once the dependency has ceased, the domicile of dependency continues but it may be lost or abandoned in the same way as a domicile of choice.[79] In this respect a domicile of dependency is treated like a domicile of choice.[80]

[78] Likewise *Steiner v IRC* 49 TC 13 at p.35: "A criticism was made of the decision of the Special Commissioners that there was no finding in terms of abandonment of the German domicile of choice. This is, strictly speaking, correct; but I do not take it to be a valid criticism, because, if a tribunal comes to the conclusion that a sufficient intention has been established to justify a conclusion of a different domicile of choice, then it necessarily involves a finding of abandonment of the other. They are inseparable opposite sides of the same coin."

[79] See 4.16.2 (Marriage existing in 1974); 4.16.1 (Marriage ended pre-1974); 4.17 (Child's domicile: England).

[80] Indeed, a domicile of dependency has been described as a type of domicile of choice, see 4.16.3 (Marriage ended pre-1974). The reader may think that is stretching the concept of "choice", and some writers have suggested the term "quasi-choice". But it does not matter whether or not one calls a domicile of dependency a type of

It has been suggested that the test for abandonment of a domicile of dependency is more lenient than the test for abandonment of a domicile of choice. However, it is considered that the *test* is the same: the individual must (1) cease to reside in the place of domicile of dependency and (2) cease to intend to reside there permanently. In the case of a domicile of dependency it is possible that the individual may never have intended to reside there permanently, in which case requirement (2) may in practice be easier to satisfy. The test is more lenient in that the onus of proof may be easier to satisfy.[81]

4.10 Losing UK domicile of origin

The domicile rules are favourable to individuals with a foreign domicile of origin. They may stay many years in this country without acquiring a UK domicile of choice and becoming exposed to the concomitant tax burden (though this is subject to the 15-year deemed domicile rule). But the rules are correspondingly unfavourable to an individual who wishes to replace their UK domicile of origin by a foreign domicile of choice. Such a person must not only reside in that other country; they must hold and manifest their intention to remain resident there permanently. Having done so, they must:

(1) maintain their residence in the country of domicile of choice; or
(2) maintain the intention to reside there permanently; or
(3) acquire a new foreign domicile of choice.

An individual cannot shed their UK domicile of origin without acquiring

domicile of choice, or quasi-choice. We simply need some rule for abandoning a domicile of dependency, after the dependency has ceased, and it is sensible to apply the same rule as that which applies for abandoning a domicile of choice.

[81] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022) para 6-018 states:
There is a presumption that a person continues to be domiciled in the country in which he is domiciled; or, to put it differently, the burden of proving a change of domicile lies on those who assert it. This presumption varies in strength according to the kind of domicile which is alleged to continue. It is weakest when that domicile is one of dependency and strongest when the domicile is one of origin.
Henderson v Henderson [1967] P. 77 at p.82 cites this and comments:

> There are dicta in some Scottish and Irish cases to support this statement; though I think that it is really more a matter of common sense and experience than a rule of law. The abandonment of a domicil of choice acquired dependently in favour of a domicil of origin re-acquired by personal volition must, in the nature of things, generally be of all changes of domicil the one the least onerous of proof.

a domicile of choice in another country; it is not enough to intend to leave the UK permanently, never to return. Departure from the UK must therefore be accompanied by permanent residence in the chosen country. If any time is spent in the UK, the UK must not be the chief residence

In order to acquire a domicile of choice in a country, one must *want* to live there. If a UK domiciliary has plans of a business or personal nature which lead them to want to settle abroad, then acquiring a foreign domicile may be feasible. Links with the UK must be kept to a minimum, particularly at first: there must be a break with the UK.

Fawcett concluded in 1985 that an unspoken policy of not allowing individuals with a UK domicile of origin to escape UK tax was influential in determining the result in domicile tax cases.[82] Subsequent cases suggest this is still true.[83]

4.11 Dual residence and domicile

The tests of residence and intention to reside are (relatively) straightforward if a person resides (and intends to reside) in only one country. What if the person resides (or intends to reside) in more than one country? Increased mobility makes this a common problem.

4.11.1 *Acquiring domicile of choice: Dual resident*

In *Udny v Udny* Lord Westbury said that a domicile of choice is acquired when:

> a man fixes voluntarily his sole *or chief* residence in a particular place, with an intention of continuing to reside there for an unlimited time.[84]

If a person resides in more than one country, they acquire a domicile of choice in country A if and only if:

(1) country A is their chief residence; and

(2) their intention is permanently to reside in country A as their chief

[82] "Result Selection in Domicile Cases" (1985) OJLS vol 5 p.378. *https://academic.oup.com/ojls/article-abstract/5/3/378/1599609?redirectedFrom=fulltext* The formerly-domiciled resident rule reflects a similar intuition: see 4.7.1 (Former-dom resident: Critique).

[83] Cases in which apparently strong claims of a UK domiciliary to a foreign domicile of choice failed include: *Portland; Plummer; Gaines-Cooper*.
Fawcett also found that a policy of upholding wills is influential in probate cases.

[84] (1869) LR 1 Sc & Div App 441 at p.458 (Emphasis added).

> residence.[85]

If a person has a secondary residence in a country (for example a holiday home used every summer or winter), they do not acquire a domicile in that country even if:
(1) they intend to retain that secondary residence permanently, or
(2) they intend to make it their primary residence at some future time.[86]

But if a person acquires (and intends to permanently retain) a chief residence in a country, they become domiciled there even if they retain a secondary residence elsewhere.

In *Plummer v IRC*:[87]

> ... a person who retains a residence in his domicile of origin can acquire a domicile of choice in a new country only if the residence established in that country is his chief residence...
> [Counsel] submitted that a person whose presence in a new country is sufficient to amount to residence may, notwithstanding that his chief residence remains in his domicile of origin, acquire a domicile of choice by evincing an intention to continue to reside permanently in the new country. I think that this submission is inconsistent with the passage which I have quoted[88] ... which has always been treated as an authoritative statement of the circumstances in which a domicile of choice may be acquired.

This should not be controversial.[89]

[85] This passage was approved in *Strachan v HMRC* [2023] UKFTT 617 (TC) at [360].

[86] These were the facts of *Strachan* (see above FN).

[87] 60 TC 452 at p.463.

[88] See 4.7 (Permanent/indefinite residence).

[89] "It is possible for a person to have two homes, each in a different territory. In that event, the relevant enquiry is which of the two homes is the chief residence": *Re Shaffer* [2004] WTLR 457 at [11]. The same point is made in *IRC v Bullock* 51 TC 522 at p.539F where the expression used is "principal home": " A man may have homes in more than one country at one time. In such a case, for the purpose of determining his domicile, a further inquiry may have to be made to decide which, if any, should be regarded as his principal home."
In *IRC v Duchess of Portland* 54 TC 648 at p.656, Nourse J said that the test was, in which of the two countries did the individual reside "as an inhabitant". That comes to the same thing, but to ask which of the two countries is the chief or principal residence is a clearer way to approach the question. This point was made in *Plummer v IRC* 60 TC 452 at p.463 ("the concept of being an inhabitant seems to me less illuminating in cases of dual or multiple residence").

4.11.2 *Losing domicile of choice: Dual resident*

The judge continued:

> Rule 13(1) of Dicey and Morris, if read literally, appears to go too far. This says that:
>
> > "A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise."
>
> These words might suggest that a domicile of choice (and presumably a fortiori a domicile of origin) cannot be lost unless the person in question has ceased altogether to reside there. I do not think that the rule was framed with dual residence in mind. At any rate, it seems to me that *Udny v Udny* shows that loss of a domicile of *origin or choice* is not inconsistent with retention of a place of residence in that country if the chief residence has been established elsewhere.
>
> (Emphasis added)

This passage has caused confusion. One needs to consider domicile of origin and domicile of choice separately:

(1) *Loss of domicile of origin* The only way to lose a domicile of origin is to acquire a domicile of choice. This passage (so far as it concerns a domicile of origin) is correctly stating the point made at 4.11.1 (Acquiring domicile of choice: dual resident).

(2) *Loss of domicile of choice* There are two ways to lose a domicile of choice:
   (a) by acquiring a new domicile of choice
   (b) by abandonment without acquiring a new domicile of choice

The judge here is considering acquisition of a new domicile of choice.[90] The passage (so far as it relates to a domicile of choice replaced by a new domicile of choice) correctly states the point made at 4.11.1 (Acquiring domicile of choice: dual resident) above.

What is the test for abandonment of a domicile of choice (without acquiring a new domicile), in a dual residence context? It is considered that Hoffmann is correct to say that T abandons his domicile of choice where:

(1) T acquires a domicile of choice in country A.

[90] Hence the words at the end of the passage ("if the chief residence has been established elsewhere").

(2) T continues to reside in country A but
  (a) they cease to reside there as their chief residence; and
  (b) they cease to intend to reside there as their chief residence.
(3) T does not acquire a domicile of choice elsewhere.

This is consistent with the test of acquisition of domicile of choice.[91]

4.11.3 *Which is chief residence*

How does one ascertain which of two competing residence countries is the chief residence? The term sometimes used is principal home, but it comes to the same thing.[92]

The test is multifactorial: no single factor is decisive. In *Barlow Clowes International v Henwood*:

> [The] test of chief residence ... cannot simply be a reference to the main home in terms of size or amenities. Nor can it be a reference to the home in which the subject spends the most time. The court has to look at the quality of the residence in order to decide in which country the subject has an intention to reside permanently.[93]

The cases offer examples and a little guidance, but the question is essentially one of fact and degree.

In *Plummer v IRC* the taxpayer had a domicile of origin in England. She intended to live in Guernsey, but was studying at university in London. In all, she spent two-thirds of her time in England and one-third in Guernsey (some weekends and holidays). It was held that England remained her chief residence so she did not acquire a domicile of choice in Guernsey. However the test was not just a matter of counting days:

> [Counsel for the taxpayer] submitted that the Commissioners paid no regard to anything except the relative amounts of time which the taxpayer spent in England and Guernsey during the years in question. They ignored the quality of her presence in each country; the fact that she was in England solely for the purpose of education and in Guernsey because it was her family home. I do not think that this is a fair reading of the Commissioners' decision. They set out at length the taxpayer's ties

[91] See 4.11.1 (Acquiring domicile of choice: Dual resident).

[92] Perhaps inevitably, we also have references to the "real" home: *Barlow Clowes* at [141]. But references to reality do not help much, if at all; see App.7.1 (What do we mean by real).

[93] [2008] EWCA Civ 577 at [104].

> with Guernsey and her reasons for remaining in England. In deciding whether the house in St. Peter Port had become her chief residence, they said:
>
> > "We accept the [taxpayer's] evidence that she likes Guernsey and enjoys the amenities of the island when she is there, quite apart from enjoying the company of her family ... We do not underestimate the part which Guernsey plays in her thinking.."
>
> Nevertheless they said that these considerations did not outweigh the fact that the taxpayer had resided for the greater part of the year in England and that there had been no "break in the pattern" which would justify a finding that she had ceased to have her chief residence in England. She had not, to use the language of Lord Hatherley in *Udny v Udny*,[94] settled in Guernsey.
>
> ... in my judgment it was the right conclusion. If the taxpayer had ... broken altogether with England and settled in Guernsey like her mother and sister and then, even after a relatively short interval, returned to England for study, the quality of her presence here might have been such as to prevent a revival of her domicile of origin. But the fact is that she has not yet settled in Guernsey, and the reasons why she has been unable to do so are in my view irrelevant. ... To treat the house in Guernsey as her chief residence simply because it is the sole residence of her mother and sister would in my view be attributing to her a kind of quasi-dependent domicile for which there is no legal justification. And the fact that the taxpayer may intend to settle in Guernsey after her education and training are completed and then to remain permanently is not sufficient to give her a proleptic domicile of choice.[95]

The concept of "chief residence" is one of a cluster of similar concepts:

Concept	**Relevant for**	**See para**
Centre of vital interests	Treaty-residence	9.13
Main private residence	MPR relief	59.7

Some guidance may be had from discussion of those concepts, though the period of enquiry may perhaps be different.

4.12 Statements of domicile

4.12.1 *Written statements*

Where domicile may be unclear, a will should contain at least a brief

[94] See 4.5 (Domicile of choice).

[95] 60 TC 452 at p.464.

statement of domicile, or a statement should be prepared to accompany the will. An individual making a lifetime gift may also wish to prepare a domicile statement.[96]

According to *Proles v Kohli*:[97]

> the courts are reluctant to give effect to declarations which refer in terms to "domicile" since the declarant is unlikely to have understood the meaning of the word.

Whether the individual has understood the meaning of "domicile" depends of course on the facts. An uninstructed lay person is unlikely to fully understand the legal meaning of the word, but if competent advisors are acting, the matter will be explained.

A short template declaration that "I am domiciled in xxx" is sufficient if it is just desired to record the fact of, or claim to, foreign domicile; but if it is desired to serve as evidence to support the claim then more details are needed. The statement should not be regarded as a formality. Even a brief statement in a will should be drafted in accordance with the individual's specific circumstances and the domicile issue should be properly considered.[98]

The declaration may be self-serving and often is. The statement is most needed when the individual has a tax motive for claiming a particular domicile. It is then of limited value. *Agulian v Cyganik* made the point:

> in a case of proof of the subjective intentions of a person who has died, little weight is attached to direct or indirect evidence of statements or declarations of intention by the person concerned. Subjective intentions have to be ascertained by the court as a fact by a process of inference from all the available evidence about the life of the person, whose domicile is disputed.[99]

Of course, declarations of intention are not conclusive. They

> must be examined by considering the persons to whom, the purposes for which, and the circumstances in which they are made, and they must be further be fortified and carried into effect by conduct and action

[96] For added gravitas, that might take the form of a statutory declaration under the Statutory Declarations Act 1835. But I doubt if that would make a difference.

[97] [2018] EWHC 767 (Ch) at [13].

[98] For precedents, see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 18.36 (Testator domiciled outside UK).

[99] [2006] EWCA Civ 129 at [13].

> consistent with the declared expressions.[100]

One should bear in mind that a domicile statement will be considered in the light of records (including contemporary email and text messages) which are likely to be available. Expect the correspondence to be reviewed in the event of a challenge. There is a temptation to 'overegg the pudding' when drafting domicile statements, which needs to be avoided. One cannot draft one's way to a foreign domicile. The value of the statement is that it is a record of the relevant facts for the benefit of all concerned, available to supply to HMRC or other interested parties. It may become particularly important for the future when the facts may be more difficult to obtain or when the individual may not be able or available to give evidence.

It may be helpful to keep a domicile statement up to date by reviewing every few years and amending as appropriate. The statement might usefully be supplemented by statements from other connected or unconnected persons who are familiar with the facts.

In *Morgan v Cilento*, the evidence included the memoir of the playwright Anthony Shaffer:[101]

> The book opens with a quotation from Gore Vidal:
>
> > "A memoir is how one remembers one's own life, while an autobiography is history, requiring research, dates, facts double-checked."
>
> The parties invited me to read it, which I did. I have not taken it as evidence of historical facts, but it has helped me in forming a view about Mr Shaffer's state of mind during its composition.

4.12.2 *Evidence of living person*

In the event of a dispute, an individual who is alive and well will give oral evidence subject to cross examination. So their domicile statement is of value as a first draft of a witness statement, and as a record of evidence which may be needed if the issue comes to be reviewed some time later, especially after the individual has died.

[100] *Ross v Ross* [1930] AC 1 cited in *Proles v Kohli* [2018] EWHC 767 (Ch) at [12]. For an example of a simple declaration rightly disregarded, see *Reddington v MacInnes* [2002] ScotCS 46 at [28]. (If those drafting the will had considered domicile more carefully, the litigation might have been avoided.)

[101] [2004] EWHC 188 (Ch) at [5]-[6].

In *Wilson v Wilson*:[102]

> when we have the man here, and when he swears that that was his intention, why should not the Court believe him?

The answer is that the court may accept the individual's oral evidence (though of course it assesses that evidence in the light of any other evidence). This is self-evident, but *Wilson v Wilson* makes the point, if authority is needed:

> The Court must not take his word as conclusive proof of the fact, and if there are circumstances in the case which tend to shew that what he says is not true or likely to be true, they may influence the conclusion at which the Court would arrive. Therefore the question is here not so much whether the circumstances of his English residence tend to prove English domicile as whether, the man swearing to his intention to create an English domicile, there are such circumstances on the other side as warrant the Court in throwing over his oath and disbelieving him.

Rejecting an individual's oral evidence as to intention does not require a finding that the individual is dishonest. In *Macey v Pizza Express* the question was whether the landlord intended to occupy for business purposes. Rejecting the landlord's evidence did not involve impeaching his honesty:[103]

> It was not open to the Judge to find that Mr Macey was lying about his intentions, and the Judge did not do so. Rather the Judge concluded that, although Mr Macey was asserting that he had a "firm and settled" intention, considering the totality of the evidence, Mr Macey had (perfectly understandably and innocently) mischaracterised his state of mind. His "intention" was insufficiently firm and settled to constitute "subjective" intention for the purposes of section 30(1)(g).

Or it may be that the individual is unconsciously biased in favour of the desired outcome.

4.13 Domicile of choice: Illness

In *Moorhouse v Lord*:

[102] (1872) LR 2 P & D 435 at p.444.

[103] [2021] EWHC 2847 (Ch) at [33]. Likewise *Gaines-Cooper v HMRC* [2007] EWHC 2617 (Ch) at [22]-[24].

> Take the case of a man labouring under a mortal disease. He is informed by his physicians that his life may be prolonged for a few months by a change to a warmer climate and that at all events his sufferings may be mitigated by such a change. Is it to be said that if he goes out to Madeira he cannot do that without losing his character as an English subject, without losing his right to the intervention of the English laws as to the transmission of property after his death, and the construction of his testamentary instruments. My lords, I apprehend that such a proposition is revolting to common sense, and the common feelings of humanity.[104]

Thus a person does not *acquire* a domicile of choice in a place to which they move for short term medical reasons. This is so even if they go for end-of-life care and know that they will not recover to return home.

For the same reason, a person will not *lose* a domicile of choice in a country, if they leave that country for end-of-life medical care, even if they go to the country of their domicile of origin for treatment.[105] In *Proles v Kohli* an individual had a domicile of origin in India, acquired a domicile of choice in England, but fell ill and died in India:

> It may be that as his illness progressed, it became clear that he would be unable to [return to England]. It may be that at some stage it became clear to the deceased that he would die within a short period; and that at that stage he decided to remain in India. In my judgment, such decisions would not be an abandonment of his English domicile of choice, for two reasons. The first is that such a decision would be one forced upon him by his illness and impending death: .... The second is that it would not be a decision as to where he was to live indefinitely, because, for all practical purposes, there was, sadly, no life remaining to be lived by him. Indeed, even if the deceased had travelled to India intending to die there,

[104] (1863) 10 HLC 272 at p.292. Similarly *Udny v Udny* (1869) 1 LR Sc & Div 441 at p.458: "There must be a residence freely chosen, and not prescribed or dictated by any external necessity, such as ... the relief from illness ...". And more recently, *Foote v. Foote Estate* [2011] ABCA 1 at [21]: "Some authorities speak of one's domicile of choice as a place where one intends to "end one's days". That language is unhelpful where, as here, a person with a fatal and fast-moving illness makes a trip shortly before his death for treatment. Determining an intention to change domiciles in such a situation is not a simple matter of saying the deceased intended to "live out his days" in the new location. It could not, in most cases, be described as a voluntary move."

[105] But the individual could become deemed UK domiciled, as a formerly-domiciled resident.

> this would not, in my judgment, be an abandonment of his domicile of choice, for similar reasons. Where, for practical purposes, a person has no life left to live, then a decision to go to his/her country of origin to die, is not a decision to spend any significant part of one's life ("the end of one's days") in that country - it is a decision that the specific event of his/her death should be in that country.[106]

However, that applies only to a person who goes purely for short term medical treatment or palliative care. If, say, a person comes to England who is housebound and needs long-term care, or because the weather in Bournemouth is better for their health than Falkirk,[107] they may acquire an English domicile. In *Hoskins v Matthews*:

> it was contended ... that Mr Matthew's residence out of England was a matter of necessity and not of choice. That his health compelled him to reside abroad, and that domicile cannot be founded on such a compulsory residence. That there may be cases in which even a permanent residence in a foreign country, occasioned by the state of the health, may not operate a change of domicile may well be admitted. ... But such cases must not be confounded with others in which the foreign residence may be determined by the preference of climate or the hope or the opinion that the air or the habits of another country may be better suited to the health or the constitution. In the one case, the foreign abode is determined by necessity; in the other it is decided by choice.[108]

It seems to me that to ask whether a person has acted by necessity or by choice is not the best way to put the question: where a person goes to a country for medical reasons, there is (almost) always *some* element of volition. The better way to put the question is whether the individual has "settled" in the country to which they have gone; whether they are there "as an inhabitant". But it comes to the same thing, as if an individual goes to a country for medical reasons as a matter of necessity, they will not have settled there.

4.14 Citizenship and domicile

This section draws on:

Citizenship: Our Common Bond (**"Goldsmith report"**)[110]

Citizenship[111] has generated a lively scholarship, which ranges across law, politics, sociology and ethics.

4.14.1 *Citizenship/domicile compared*

The starting point is to note that citizenship is distinct from domicile.[112] Important differences include the following:

(1) The rules for acquiring/changing domicile are distinct from the rules for acquiring/changing/losing citizenship.

(2) Every person has one and only one domicile, but a person may have two or more nationalities (dual nationals) or no nationality (stateless persons).

(3) A citizen of a federal or multi-jurisdiction state can only be domiciled in one of its constituent legal jurisdictions, not the state itself. Eg, a UK citizen may be domiciled in England, Scotland or Northern Ireland, but not (strictly speaking) in the UK.

Although citizenship and domicile are distinct, decisions to acquire, retain or renounce citizenship of a state may shed light on intention to reside in that state, which is central to domicile.

Note that while a citizen will usually have a substantial connection with their country, that is not necessarily the case. A person may be unaware that they are a citizen of a country, which they may never have visited, and to which they have only a tenuous connection. The Australian dual citizenship crisis of 2017-18 illustrates the point. Australia bans dual citizens from sitting in parliament. *Fifteen* MPs discovered that their election was void because unbeknown to them they were also nationals of another state. In one case, for instance, an MP's mother had taken Italian

[110] *https://www.kessler.co.uk/wp-content/uploads/2012/10/Citizenship-Report-Goldsmith.pdf*

[111] A note on terminology: In UK law the words citizenship and nationality are (more or less) interchangeable; though attempts are made to desynonymise them, and when dealing with statutory provisions it is best to adopt the statutory term.
The position might be different elsewhere, which may explain why the Government Service article of some DTAs, such as the Taiwan/UK DTA, refer to a "citizen or national" of a territory; but it is not necessary to pursue that here.

[112] This is self-evident, but if authority is needed, see *IRC v Bullock* 51 TC 522 at p.540; *Udny v Udny* 1 Sc & Div 441 at p.452: "The question of naturalization and of allegiance is distinct from that of domicile;" likewise at p.457.

citizenship, not realising that this arguably made her son an Italian citizen, disqualifying him from sitting as an Australian MP.[113]

4.14.2 *Retention of citizenship*

In *IRC v Bullock*:

> The fact that the taxpayer chose to retain his Canadian citizenship and not to acquire UK citizenship would not be inconsistent with his having acquired a domicile in the UK, but his adherence to his Canadian citizenship is, in my opinion, one of the circumstances properly to be taken into consideration in deciding whether he acquired a UK domicile.[114]

That is not controversial.

4.14.3 *Change of citizenship*

Acquiring citizenship is known as naturalisation. In *Wahl v AG*:[115]

> [1] Naturalisation is one thing; change of domicile is another:
> [2] it is not the law either
> [a] that a change of domicile is a condition of naturalisation, or
> [b] that naturalisation involves necessarily a change of domicile.

Point [1] is correct. The two points at [2] are distinct:
(a) Whether acquisition of UK domicile is a condition of naturalisation is a question of nationality law and practice.
(b) Whether UK naturalisation involves acquisition of UK domicile is a question of domicile law.

These points require further consideration in the light of changes in law and practice since *Wahl*. I only discuss acquisition of British citizenship.

[113] *https://en.wikipedia.org/wiki/2017%E2%80%9318_Australian_parliamentary_eligibility_crisis*

[114] 51 TC 522 at p.540. Similarly, in *Gaines-Cooper v HMRC* the Special Commissioners noted that the taxpayer retained British citizenship, and did not apply for citizenship in the Seychelles. Perhaps more significantly, his wife applied for British citizenship: [2007] EWHC 2617 (Ch) at [12] (quoting the Special Commissioners comments at [141]).

[115] (1932) 147 LT 382; [1938] All ER 922 at p.926.
https://www.kessler.co.uk/wp-content/uploads/2012/04/Wahl-v-Attorney-General.pdf
The case concerned naturalisation under the 1870 Act.

4.14.4 *Nationality law background*

The law of naturalisation has changed over the years:

Act	**Intention required for naturalisation**
1870 Act	To reside [permanently][116] in the UK[117]
1914 Act	To reside [permanently] in His Majesty's dominions[118]
1948 Act	To reside [permanently] in the UK or in any colony, protectorate or UK trust territory, or Anglo-Egyptian Sudan[119]
1981 Act	Home (or principal home) in the UK

The current legislation is the British Nationality Act 1981. In order for a person to become a British citizen under this Act, it is usually a requirement that:

> his intentions are such that, in the event of a certificate of naturalisation as a British citizen being granted to him, his home or (if he has more than one) his principal home will be in the UK.[120]

I refer to this as the **"UK-home naturalisation requirement"**. The applicant must certify that that is their intention; I refer to that as the **"UK-home statement"**.

The 1981 Act was preceded by a White Paper, *British Nationality Law* ("the 1980 white paper").[121] This sheds some light on the present wording, and why it differs from the pre-1981 law, which referred to *residence* as opposed to *home/principal home*:

> 60. In the Government's view the residential qualification should be such as to demonstrate very clearly that an applicant has thrown in his lot with the UK, and that he intends to regard the UK as his home. There have been signs that under the present [pre-1981] law citizenship has sometimes been sought merely for the convenience of having a UK passport, and that having obtained one, the person has later gone elsewhere to live. The Government do not take the view that citizenship should be available solely for convenience of travel.

[116] The word "permanently" was not in the Acts of 1870, 1914 or 1948, but it appears to have been required by Home Office practice.

[117] Section 7 Naturalization Act 1870 (this is the spelling of the 1870 Act).

[118] Section 2 British Nationality and Status of Aliens Act 1914.

[119] Sch 2 para 1(e) British Nationality Act 1948.

[120] Para 1(d) sch 1 British Nationality Act 1981.

[121] Cmnd 7987 (1980) *http://www.uniset.ca/naty/maternity/wpaper.pdf*

This may explain why the practice before 1981 was to require a declaration of intention to reside *permanently*.[122]

> 61. Neither of the terms "residence" and "ordinary residence" has been the subject of interpretation by the Courts for purely nationality purposes. Neither has been found entirely satisfactory in all circumstances.[123]

This may explain why the wording of the naturalisation UK-home requirement changed from "residence" to "home/principal home". The change was not intended to relax the naturalisation requirement and maybe tends to strengthen it.[124]

Home Office practice is set out in the document "Nationality policy: Naturalisation as a British citizen by discretion".[125] This contains the guidance used by the Home Office when deciding applications for citizenship.

> **Principal home in the UK**
> ...Information may also come to our attention that HMRC regard an applicant as domiciled abroad for tax purposes. In such cases, you must request the applicant's permission to contact the HMRC. You should then ask the HMRC to provide us with a copy of the applicant's completed 'Domicile Enquiry' questionnaire,[126] which may throw some light on future intentions. If the applicant refuses permission, you must refuse the application. ...
> **Applicant intends to live outside the UK**
> If applicants make it clear that, while they intend to live in the UK for a period, they have made firm plans to establish their principal home abroad at some future date the application must be refused. You must not refuse an application solely on the suspicion that the applicant will reside outside of the UK.

[122] The word "permanently" was not in the statute, but as the grant of nationality was discretionary, the Home Office presumably considered it had power to add this requirement.

[123] This is something of an understatement: see the 2012/13 edition of this work para 3.12 (Commentary: Assessment of case law tests).

[124] But although residence/home may have a slightly different nuance, the words are often used interchangeably; see 4.6 ("Residence").

[125] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1032568/Naturalisation_as_British_citizen_by_discretion.pdf* (November 2021)

[126] Author's footnote: The reference is to form Dom 1, which has not been used since 2009! But any tax return will disclose if a claim is made for foreign domicile.

> ... Where an applicant has more than one home and their principal home is outside of the UK at the time of application you must refuse the application.

Home Office guidance formerly stated expressly that the UK-home naturalisation requirement (that the individual's "home is in the UK") was distinct from, and fell short of, the requirement for acquisition of a domicile of choice (an intention to reside in the UK permanently, in the domicile sense).[127] The current guidance suggests that, at least from Sep 2019, the Home Office will not accept an application for naturalisation by a person who openly maintains that they will not be domiciled in the UK after naturalisation. It is not clear whether the Home Office regard this is a requirement of nationality law, or as a matter of Home Office practice in exercising their discretion. The Home Office have probably not addressed the question; it does not much matter.

There is no case discussing the meaning of home/principal home in the British Nationality Act 1981, but the concept is (more or less) the same as "chief residence" for domicile (where the expression "principal home" is also used).[128]

4.14.5 *Naturalisation: Domicile cases*

The case law in this area needs some care as a cursory reading will mislead.

Wahl v Attorney-General concerned an individual naturalised under the 1870 Act. He declared that he intended to reside *permanently* in the UK and had no intention of permanently leaving the UK. The House of Lords found nevertheless that he did not intend to make his home in the UK and did not acquire a UK domicile of choice.[129] But that was a finding of fact

[127] The Home Office Nationality Instructions 2013, discussed in the 2018/19 edition of this work para 3.11.4, stated:

> "The replies to the [HMRC] domicile questionnaire [form Dom 1] should not be given undue weight, and they should not form grounds for refusal if they merely indicate that applicants see their ultimate home as a country other than the UK. (It is not a requirement for naturalisation that applicants intend to make their home permanently in the UK.)"

The change was made in Sep 2019.

[128] See 4.11 (Dual residence and domicile).

[129] (1932) 147 LT 382; [1938] All ER 922
https://www.kessler.co.uk/wp-content/uploads/2012/04/Wahl-v-Attorney-General.pdf
The reader may find the decision less than convincing. Lord Macmillan dissented

(not law) which depended on all the facts of the case and was not binding on other cases.[130]

The point was reargued in *Steiner v IRC*, which also concerned naturalisation under the 1870 Act. So once again the taxpayer had declared that he intended "to reside *permanently* in His Majesty's dominions" (which, in the context, meant England). The court, I think rightly,[131] brushed *Wahl* aside:

> The Special Commissioners attached some importance to the declaration associated with the naturalisation application, and so do I ... I bear in mind, of course, the views expressed in the House of Lords in *Wahl v Attorney-General*. But the significance of such matters must be judged in the context of any particular case and the background against which the application for naturalisation and the statements therewith is to be viewed. ... I think it would be quite wrong for this Court to dismiss the view of the Special Commissioners ...

And again:

> Now, it is true that in *Wahl v Attorney-General* a similar application and a statement in somewhat similar terms were regarded by the majority of the House of Lords as not affording any strong evidence of intention to reside permanently in England; but Lord Macmillan, in a dissenting speech, was of opinion that considerable weight should be attached to these matters, and Lord Atkin, who was one of the majority, said, at page 385: "I am far from saying that an application for naturalisation is not a matter to be carefully considered as part of the evidence in a case of domicile"; and the opinion of Lord Atkin was entirely concurred in by Lord Dunedin. In those circumstances, it appears to me that the Special Commissioners acted entirely properly in taking into account
> [1] the fact of the application for naturalisation, to which they indicated that they did not attach great weight, and
> [2] further in taking into account the statement made as to the applicant's intentions as to residence.[132]

and the failure of the mainstream law reports to report the case might be taken as tacit disapproval.

[130] Nowadays the Supreme Court would not concern itself with issues of fact. The reader may think this finding of fact somewhat implausible, but insofar as the point is one of fact and not law, it does not now matter.

[131] But for a defence of *Wahl*, see 4.14.8 (Citizenship: Critique).

[132] 49 TC 13. Likewise *Gulbenkian v Gulbenkian* [1937] 4 All ER 618 at p.627: "When ... Gulbenkian expressed upon oath that he intended to reside permanently

It would be relevant to consider whether after naturalisation the individual has dual citizenship. There are three possibilities:

(1) After naturalisation the individual may be a British citizen only, because:
   (a) The individual was formerly stateless, or
   (b) Foreign citizenship lapsed on becoming a British citizen[133]
(2) After naturalisation the individual may have dual citizenship

Naturalised citizens may and often do identify with their original homeland as well as with their new state of residence: both form part of their identity. But of course "identity" is not the test of domicile.

4.14.6 *Naturalisation: Conclusions*

In summary:

(1) British naturalisation, and the declaration of intention which that requires, are relevant in determining intention for domicile purposes, and always have been.
(2) Nevertheless, it was accepted practice before 2019[134] that:
   (a) A change of domicile was not a condition of naturalisation, and
   (b) Naturalisation did not *necessarily* involve acquiring a UK domicile.

   In particular, it was considered that the UK-home statement in the naturalisation application did not entail the high degree of permanency in residence which a domicile of choice requires (the intention to reside permanently in the domicile sense).

in Great Britain, I can see no reason why that declaration should not be taken at its full value as a desire to acquire a domicile of choice in this country."
Likewise *Bheekhun v Williams* 1 ITELR 491: on the independence of Mauritius in 1968, the individual had to choose British or Mauritian nationality; the choice of British nationality was a "clear pointer" towards acquisition of a domicile of choice in England.
For completeness, *Wahl* was cited in *F v IRC* [2000] STC (SCD) 1 but *Steiner* was not cited and *F* has nothing to add.

[133] Dual citizenship is increasingly common. In the UK, the rule was formerly that British citizenship lapsed on becoming a citizen elsewhere, s.13 British Nationality Act 1914, but that ceased to be the case after the 1948 Act. In some countries, eg China, citizenship is lost on naturalisation elsewhere. India prohibits dual citizenship but there is an intermediate category,"Overseas Citizen of India", which confers some citizenship rights (to reside and to work) but not political rights.

[134] This applied to naturalisation under 1981 Act and under its predecessors.

(3) From 2019 it seems that:
   (a) A change of domicile is or is intended to be a condition of naturalisation: Home Office practice is to refuse a naturalisation application made by a person who openly maintains that they will continue to be domiciled outside the UK if granted citizenship.
   (b) While Home Office practice does not determine the facts or the law, the inference that a person acquiring a British citizenship post 2019 has the intention to reside permanently in the domicile sense, (and so acquires a domicile of choice) is somewhat stronger than before.
   (c) An applicant for naturalisation whose priority is not to become UK domiciled should make their position clear in the application; but that carries a risk that the naturalisation application may fail. Better not to apply at all, if circumstances permit.

There are circumstances where naturalisation falls short of demonstrating an intention to reside permanently (in the domicile sense):

(1) If an application was primarily for the convenience of a UK passport, (or if for any other reason the application was not accompanied by a genuine intention to reside in the UK permanently).
   (a) The 1980 White Paper records this happened in practice under the 1948 Act.
   (b) *F v IRC*[135] concerned an application under the 1981 Act. The individual wanted citizenship in order to obtain a British passport; he lied in his naturalisation application. In the circumstances his application did not show an intention to reside in the UK.
   (c) The same may apply after the 2019 Home Office change of practice. A taxpayer is not bound by the terms of their UK-home statement, or any other statement which accompanies the application for naturalisation.[136] Mistakes are always possible, and indeed lies. But the Tribunal may not view with favour a taxpayer who argues that statements made in their application for naturalisation were incorrect or were intended to be understood narrowly.[137] In short, the Tribunal may adopt an unspoken policy

[135] [2000] STC (SCD) 1.

[136] See 4.12.2 (Evidence of living person).

[137] The argument might also risk revocation of naturalisation on the grounds of false representation; see s.40 British Nationality Act 1981.

of not allowing individuals naturalised after 2019 to escape UK tax.

(2) There are two further exceptions of somewhat narrow interest:

(a) A person who intends their home to be in the UK might not have decided whether to reside in England, Scotland or Northern Ireland: one cannot acquire a UK domicile of choice unless and until one intends to reside in one specific jurisdiction.[138] However, in practice this will rarely if ever matter, since a person who makes an application for naturalisation will normally have decided where in the UK their home is to be.

(b) In some exceptional cases an applicant for naturalisation does not need to intend that their home will be in the UK.[139] In these cases it is still consistent for an the individual who becomes a naturalised British citizen to maintain that they have not acquired a UK domicile of choice. However even without the UK-home naturalisation requirement, the decision to apply for naturalisation still tends to suggest that the individual has formed the intention to live in the UK permanently: the issue is to be decided in the light of all the facts.

An individual who does acquire a UK domicile of choice on naturalisation may of course lose it later, by abandonment.[140]

An individual who is naturalised, or who acquires a UK domicile of choice, may still be treaty-resident outside the UK, if (in short) the facts show the centre of vital interests (personal and economic relations) are abroad.

It is possible to renounce citizenship and renunciation is likely to be

[138] This is self-evident, but if authority is needed, the point was made in *Wahl*.

[139] A full discussion of naturalisation law is not possible here, but one alternative requirement is that the person intends, in the event of naturalisation,

> "to enter into, or continue in,
>
> [a] Crown service under the government of the UK, or
>
> [b] service under an international organisation of which the UK or Her Majesty's government therein is a member, or
>
> [c] service in the employment of a company or association established in the UK."

See sch 1 British Nationality Act 1981.

In these cases a person may become a British citizen by registration without expressing any intention to make their home in the UK.

[140] See 4.9 (Abandoning domicile of choice).

persuasive evidence of an intention not to return. Though again, it depends on the facts.

4.14.7 *Holding a UK passport*

A British passport is evidence that the holder is a British citizen, and something to which every British citizen is in principle entitled.[141] Holding British citizenship and holding a British passport are (more or less) synonymous: they are two sides of the same coin. So holding a passport is not a separate or further indication of intention, for the purposes of the law of domicile.

4.14.8 *Citizenship: Critique*

Citizenship is a status. It confers a bundle of rights and responsibilities, but not just that. It also has social, psychological, cultural, political and emotional aspects, which link to deep questions of nationhood and identity. As a matter of political theory, naturalisation involves a reciprocal relationship in which an individual offers loyalty to a state in exchange for protection.[142] It is a form of membership of a community.

Many will accept this theory,[143] and may even think it self-evident. But attitudes vary. Naturalised individuals will feel or understand the implications of their nationalisation in a variety of ways.[144] The incentives to naturalise may be instrumental or affective. Likewise, some native born citizens may not lightly accept naturalised individuals as full members of

[141] See the Goldsmith report para 3.34.

[142] See the Goldsmith report para 1.1.

[143] For instance, in *SA v FA* [2022] EWFC 115 at [13] the individual "was proud and pleased to accept and achieve British citizenship by naturalisation in 2005 and ... had a sense of pride and belonging when she publicly swore her allegiance to HM The Queen". That was a factor in concluding the individual had acquired a domicile of choice in the UK

[144] That is, the immigrants may not have studied or accepted the political theory. The 1980 White Paper reported that "citizenship has sometimes been sought merely for the convenience of having a UK passport, and that having obtained one, the person has later gone elsewhere to live." And notwithstanding Government disapproval, that may sometimes continue to be the case.

The literature shows different behaviour for immigrants from different origin countries and human capital endowments. For example, while naturalised non-Turkish immigrants were found to less likely to leave Germany, citizenship is not significantly correlated with the return migration of Turkish immigrants living in Germany; Oxford Handbook, p.214.

the community, no doubt more in the past than now.[145]

If one does accept the political theory, what impact does it have on domicile, or on domicile taxation? Can we descend from the general to the particular? In earlier editions of this work I suggested that there should be a rule that naturalised citizens should be deemed UK domiciled for UK tax purposes.[146] On this point the lighter fiscal regime for foreign domiciliaries could be better targeted.

Subsequently, I rejected the suggestion, on the pragmatic grounds that the need for this change was reduced by the introduction of the 15-year deemed domicile rule, and the benefit did not seem to be worth the trouble involved in a statutory change.[147]

But the 2019 change in Home Office practice is a step towards just that reform. The reader may speculate whether the change was connected with the change in HMRC practice on domicile.[148] It is perhaps unlikely to be entirely co-incidental. Needless to say, there was no public consultation.

4.15 Refugee/illegal immigrant/temporary visa

Refugees may be forced to sever their links with their country of origin. But while that may show they have no intention to return to their country of origin, it would not, by itself, show that they have acquired an intention to reside in the UK permanently.

A person in a country illegally may become domiciled there, though the illegality is a factor in deciding whether they have a genuine intention of remaining there.[149]

In *Barlow Clowes International v Henwood*:

> He was not able to live there on a permanent basis without the permission of the Mauritian government. His residence was ... in that

[145] Eg *Loudon v Ryder (no.2)* [1953] Ch 423 at p.424:

> "The defendant Ryder is a Polish Jew, born in Galicia, and educated in Vienna. He lived until 1938 on the Continent ... and though he has been in this country since shortly before the war and was naturalized in 1947, he remains very much a foreigner."

This sceptical, perhaps hostile, attitude to naturalisation and naturalised citizens may explain the thinking behind the decision in *Wahl*. Naturalisation has in the past been, and perhaps sometimes still is, a contested concept.

[146] See the 2015/16 edition of this work para 3.11.6 for a fuller discussion of the issues.

[147] See the 2017/18 edition of this work, para 3.11.6.

[148] See 4.24.1 (Change of HMRC practice).

[149] *Mark v Mark* [2005] UKHL 42.

> sense precarious. This does not make it impossible for him to acquire a domicile of choice in Mauritius but makes it less likely that he did so.[150]

In *Puttick v Attorney-General* an individual came to England to escape arrest and trial in Germany:[151]

> The mere fact that a person is liable to be deported, for example, an alien subject who was subject to the Aliens Order 1920 (see *Boldrini v. Boldrini and Martini* [1932] P. 9), does not of itself prevent acquisition of a domicile of choice: but see *Briggs v. Briggs* (1880) 5 P.D. 163, where the respondent left the country through fear of his creditors but did not acquire a domicile of choice in the United States of America. The question is whether the person is in England primarily to avoid detection, or is it primarily to set up home? She never set up home here, although she resided and obtained work qualifications; but she did not want to go back to Germany, her domicile of origin, because she did not want to surrender to her bail, to be tried. Her primary purpose in living here was to avoid detection, and no abandonment of domicile of origin has been proved. She agreed also in her evidence that she might have returned to Germany if the charges against her were ever dropped. In my opinion she did not acquire a domicile of choice in this country.

4.16 Married women

4.16.1 *Marriage post-1974*

Until 1 January 1974, a married woman had the domicile of her husband (a "domicile of dependency"). This no doubt represented a patriarchal view of the family, though giving husband and wife the same domicile also simplified family law jurisdiction issues, and prevented dual nationality for the offspring, which was once more frowned upon than it is today.

Section 1 Domicile and Matrimonial Proceedings Act 1973 ("DMPA") now provides:

> (1) Subject to subsection (2) below, the domicile of a married woman as at any time after the coming into force of this section [1 Jan 2014] shall, instead of being the same as her husband's by virtue only of marriage, be ascertained by reference to the same factors as in the case

[150] [2008] EWCA Civ 577 at [119].

[151] [1980] Fam. 1

> of any other individual capable of having an independent domicile. ...
> (3) This section extends to England and Wales, Scotland and Northern Ireland.[152]

Although a wife does not automatically acquire the domicile of her husband, the decision to marry and set up home in the UK tends to suggest an intention to reside in the UK permanently; but of course that depends on all the facts.[153]

4.16.2 *Marriage existing in 1974*

There is a transitional rule for women who were married on 1 January 1974. Section 1(2) DMPA provides:

> Where immediately before this section came into force [1 January 1974] a woman was married and then had her husband's domicile by dependence, she is to be treated as retaining that domicile (as a domicile of choice, if it is not also her domicile of origin) unless and until it is changed by acquisition or revival of another domicile either on or after the coming into force of this section.

A domicile of choice under s.1(2) continues unless and until it is lost by abandonment.[154]

The issue arose in *IRC v Duchess of Portland* 54 TC 648, where a foreign domiciled wife married a UK domiciled husband before 1974, so she acquired a UK domicile of dependency. After 1974 she continued to reside in the UK. However at no time did she intend to reside there permanently. She therefore retained her former domicile of dependency ("as a domicile of choice"). That domicile could only be abandoned by ceasing to intend to reside in the UK permanently (which she did) *and* ceasing to reside in the UK (which she did not).

In Ireland the wife's domicile of dependency was held unconstitutional[155]

[152] For the background to this provision, see Law Commission report no. 48, *Family Law Report on Jurisdiction in Matrimonial Causes* (1972) *http://www.bailii.org/ew/other/EWLC/1972/48.pdf*

[153] This is obvious but if authority is needed, see *Cyganik v Agulian* [2006] EWCA Civ 129 at [46]. Likewise the fact that T's spouse is resident in the UK (and not resident elsewhere) may tend to suggest that T has not acquired a foreign domicile of choice; see (if authority is needed) *Gaines-Cooper v HMRC* [2007] EWHC 2617 (Ch) at [46] [47].

[154] See 4.9.1 (Abandoning domicile of dependency).

[155] *JW v JW* (1992) 4 Irish Tax Reports p.437.

and it is an interesting question whether the UK transitional provision is human-rights compliant. In practice the issue may never arise.

4.16.3 *Marriage ended pre-1974*

Under the pre-1974 law, a domicile of dependency also continued after the marriage ended, unless and until it was lost by abandonment.[156] The issue arose in *Re Wallach*[157] where a widow died in 1943, five days after the death of her husband. The Judge cited *Udny* ("Other domicils, including domicil by operation of law, as on marriage, are domicils of choice") and continued:[158]

> He, therefore, included the domicil which counsel for the plaintiff prefers to call a dependent domicil under the heading of domicil of choice and that seems to me to be the appropriate heading under which to put it because when a woman marries a man she exercises a choice in the marriage and takes the consequence of that choice which in law involves the acquisition of his domicil. There is no reason why, if it is a domicil of choice, it should be lost in a way different from that in which any other domicil of choice can be lost, namely, by abandonment.

This is the same test which applies to a woman who was married on 1 January 1974.

The marriage in *Wallach* ceased on death of the husband, but the position is the same in the case of a pre-1974 divorce: the ex-wife's domicile of dependency continues as a domicile of choice, unless and until it is abandoned.

4.16.4 *Woman a US national*

The USA/UK DTA[159] undoes the effect of a UK domicile of dependency for a woman who is a US national who married before 1974. Article 4(6) of the treaty provides:

> A marriage before January 1st, 1974 between a woman who is a United States national and a man domiciled within the UK shall be deemed to

[156] See 4.9.1 (Abandoning domicile of dependency).

[157] [1950] 1 All ER 199, followed in *Re Scullard* [1957] Ch 107 where, on the facts, the domicile of choice was found to have been abandoned immediately following the death of the husband.

[158] [1950] 1 All ER 199 at p.200.

[159] That is, the IT/CGT treaty (2001). The USA IHT DTA (1978) does not contain the same rule. Gender issues presumably had greater importance by 2001.

> have taken place on January 1st, 1974 for the purpose of determining her domicile for UK tax[160] purposes, on or after the date on which this Convention first has effect in relation to her.

The USA/UK DTA Technical Explanation provides:[161]

> under UK law, a female US citizen who married a UK domiciliary male before January 1, 1974, does not have the same opportunity to prove a domicile outside the UK as does a male US citizen who married a UK domiciliary female before January 1, 1974. Paragraph 6 of the Convention equalizes the treatment of male and female US citizens in this situation.

As far as I am aware, the US Treaty is the only one which does this. Perhaps this reflects a cultural difference, a greater sensitivity to gender equality issues in the US.[162] This rule does not however apply where a *UK* woman married an *American* man before 1 January 1974. In that case the 1974 transitional rule continues to apply, and the woman keeps her domicile of dependency as a domicile of choice. In this situation a woman is in a better position than a man.

4.17 Child's domicile: England

The domicile of a child is not usually important during its minority. However if the child acquires a domicile of dependency during their minority, that domicile will continue until lost by abandonment, so the issue may arise long after the child has become adult.

This section deals with the position in England and Northern Ireland. Scotland is considered in the next section.

4.17.1 *Domicile independence age*

Section 3 DMPA provides:

> (1) [a] The time at which a person first becomes capable of having an independent domicile shall be when he attains the age of sixteen or marries under that age;
>
> [b] and in the case of a person who immediately before 1st January 1974 was incapable of having an independent domicile, but had

[160] ie, Income tax and CGT; see art 2(1) USA/UK DTA.

[161] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[162] The English common law rule that a married woman had the domicile of her husband was rejected by US case law.

> then attained the age of sixteen or been married, it shall be that date.
>
> (2) This section extends to England and Wales and Northern Ireland (but not to Scotland).

The age at which a person becomes capable of having an independent domicile has been reduced gradually:

Age of independence	**In force from**	**May apply to those born from**	**Reference**
21	-	-	Common law rule
18	1 Jan 1970	1 Jan 1949[163]	s.1 Family Law Reform Act 1969[164]
16	1 Jan1974	1 Jan 1958[165]	s.3 DMPA

The age of 16 was set as the age at which a person may marry; it was thought a person old enough to marry should be regarded as old enough to acquire a domicile of choice.[166]

4.17.2 *Domicile of dependency*

Dicey states:[167]

> Subject to [s.4 DMPA discussed below] the domicile of an unmarried child under 16 is determined as follows:
> (1) the domicile of a legitimate child is, during the lifetime of his father, the same as, and changes with, the domicile of his father;
> (2) the domicile of a legitimated child is, from the time at which the legitimation takes effect, during the lifetime of his father, the same as, and changes with, the domicile of his father;

[163] Those born 1949-1951 reached the age of independence on 1 January 1970, which would have been after their 18th Birthday.

[164] The 1969 Act adopted the recommendations of the Report of the Committee on the Age of Majority (the Latey Report), 1967 Cmnd 3342. Northern Ireland had separate legislation: s.1 Age of Majority Act (Northern Ireland) 1969.

[165] Those born 1956-1957 reached the age of independence on 1 January 1974, which would have been after their 16th Birthday.

[166] See Law Commission report no. 48, *Family Law Report on Jurisdiction in Matrimonial Causes* (1972) *http://www.bailii.org/ew/other/EWLC/1972/48.pdf* In 2023 the minimum age for marriage in England was raised to 18, and if this rule was extended to Scotland and Northern Ireland, there would be a case for raising the domicile age to 18; but it does not seem important.

[167] *Conflict of Laws* (16th ed., 2022), para 6R-092. Some tie-breaker rule will be needed in case of a child adopted by same-sex civil partners/spouses, if the couple have different domiciles.

> (3) the domicile of an illegitimate child and of a child whose father is dead is, in general,[168] the same as, and changes with, the domicile of his mother;
> (4) the domicile of a legitimate or legitimated child without living parents, or of an illegitimate child without a living mother, probably cannot be changed;
> (5) the domicile of an adopted child is determined as if he were the legitimate child of the adoptive parent or parents.

A child's domicile of dependency can be abandoned after the age of independence.[169]

4.17.3 *Parents living apart*

Section 4 DMPA provides:

> (1) Subsection (2) of this section shall have effect with respect to the dependent domicile of a child as at any time after the coming into force of this section when his father and mother are alive but living apart.
> (2) The child's domicile as at that time shall be that of his mother if—
> (a) he then has his home[170] with her and has no home with his father; or
> (b) he has at any time had her domicile by virtue of paragraph (a) above and has not since had a home with his father.
> (3) As at any time after the coming into force of this section, the domicile of a child whose mother is dead shall be that which she last had before she died if at her death he had her domicile by virtue of subsection (2) above and he has not since had a home with his father.
> (4) Nothing in this section prejudices any existing rule of law as to the cases in which a child's domicile is regarded as being, by dependence, that of his mother.
> (5) In this section, "child" means a person incapable of having an independent domicile.[171]
> (6) This section extends to England and Wales, Scotland[172] and Northern Ireland.

Prior to 1/1/1974, what was the test of domicile of a child whose parents

[168] See *Conflict of Laws* (16th ed., 2022), 6R-092 (Rule 17)

[169] See 4.9.1 (Abandoning domicile of dependency).

[170] See 9.12.1 ("Home").

[171] See 4.17.1 (Domicile independence age).

[172] Schedule 3 Family Law (Scotland) Act 2006 repeals this section in relation to Scotland. However see below on whether this has effect for tax purposes.

were divorced, and who was living with the mother? Dicey recorded that the position in Scotland was that domicile followed the father; in Northern Ireland, it followed the mother; Dicey suggested English law should follow the Northern Ireland decision.[173]

4.18 Child's domicile: Scotland

The position is different in Scotland.

4.18.1 *Age of independence: Scotland*

In the law of Scotland the age at which a child could acquire an independent domicile was originally 12 for girls and 14 for boys.[174] These ages derived from Roman law, reflecting an understanding that girls mature faster than boys.

The provisions of the FLRA 1969 and the DPMA 1973 which set the age of independence for domicile in England did not apply in Scotland. The rule was instead altered by s.7 Age of Legal Capacity (Scotland) Act 1991 which provided:

> The time at which a person first becomes capable of having an independent domicile shall be the date at which he attains the age of 16 years.

This provision was repealed by the Family Law (Scotland) Act 2006 (which provided new rules for children under 16, see below). Presumably it was considered unnecessary because by implication, it continued to be the case that children over the age of 16 may acquire a domicile of choice. So the age at which a person becomes capable of having an independent domicile under Scots law is as follows:

Age of	**In force**	**Applies to**	**Reference**
independence	**from**	**those born from**	
12 (girls)	-	-	Scots common law rule
14 (boys)	-	-	Scots common law rule
16 (girls)	25 July 1991	25 July 1979	s.7 ALC (Scotland) Act 1991/s.22
16 (boys)	25 July 1991	25 July 1977	Family Law (Scotland) Act 2006

[173] Dicey & Morris, *Conflict of Laws* (9th ed., 1973) p.119. This passage is not in later editions.

[174] Scottish Law Commission Report No 110, "Legal Capacity and Responsibility of Minors and Pupils" (1987), recommending the changes which took effect in 1991.

4.18.2 *Domicile of child under 16*

Section 22 Family Law (Scotland) Act 2006 provides:

> **Domicile of persons under 16**
> (1) Subsection (2) applies where—
> (a) the parents of a child are domiciled in the same country as each other; and
> (b) the child has a home with a parent or a home (or homes) with both of them.
> (2) The child shall be domiciled in the same country as the child's parents.
> (3) Where subsection (2) does not apply, the child shall be domiciled in the country with which the child has for the time being the closest connection.
> (4) In this section, "child" means a person under 16 years of age.

I refer to domicile under the rules of s.22(2)/(3) as **"s.22(2)/(3) domicile"**.

4.18.3 *Scots domicile post- age 16*

The relevant commencement order provides:

> 2 ... the provisions of the Act shall come into force on 4th May 2006....
> 4 The provisions of sections ... 21, 22 ... shall not apply in relation to any proceedings which commenced before 4th May 2006.[175]

This does not consider domicile after the individual has reached the age of 16. Clearly, an individual after 16 can acquire a new domicile of choice. But can an individual abandon their s.22(3) domicile, without acquiring a domicile of choice? There are various permutations. Suppose, for instance:

Case 1	**Case 2**
At birth, an individual ("P") has a s.22(2) domicile in country X (both parents domiciled in X, and P has a home with them).	At birth, an individual ("P") has a s.22(3) domicile in country X (eg parents differently domiciled, and P's closest connection is in X.
P then acquires a s.22(3) domicile in country Y (eg parents separate, and P's closest connection is in Y.	P then acquires a s.22(3) domicile in country Y (eg P's closest connection becomes country Y.

[175] Reg 2 Family Law (Scotland) Act 2006 (Commencement, Transitional Provisions and Savings) Order 2006.

P then attains 16	P then attains 16

Can P abandon their s.22(3) domicile by ceasing to reside in country Y, and ceasing to intend to reside there? and if so, is country X regarded as a domicile of origin, which revives? It is considered that domicile of origin is abolished, in Scotland, and s.22 domicile cannot be abandoned, it continues unless replaced by a new domicile of choice.[176]

4.18.4 *Commencement*

The 2006 Act does not make plain the time at which the section 22 rule takes effect. Does it govern the domicile only of those who, at the date of coming into force of the Act, were under 16, and those born subsequently? Or does it also govern the domicile of someone who attains 16 before commencement, but dies after commencement? One would expect not.

4.18.5 *Abolition of illegitimacy*

Section 22 domicile does not depend on legitimacy/illegitimacy: that is irrelevant for s.22 domicile. Scots law (like most countries but not, yet, England) has abolished the status of illegitimacy:

> No person whose status[177] is governed by Scots law shall be illegitimate; and accordingly the fact that a person's parents are not or have not been married to each other shall be left out of account in—
> (a) determining the person's legal status; or
> (b) establishing the legal relationship between the person and any other person.[178]

This raises the question of when a person's status is governed by Scots law.

If (applying s.22 if relevant) a person has Scottish domicile, their status cannot be one of illegitimacy.

If (applying s.22 if relevant) a person does not have a Scottish domicile, their status must be determined by foreign law, which may apply a

[176] This accords with the recommendation of the Law Commission in *The Law of Domicile* (1987) Law Com 186 *http://www.scotlawcom.gov.uk/download_file/view/228/* para 4.21 etc. Though the Law Commission draft Bill, sensibly, made this point expressly.

[177] "Status" means the status of being legitimate/illegitimate.

[178] s.1(1) Law Reform (Parent and Child) (Scotland) Act 1986 as amended s.21 Family Law (Scotland) Act 2006.

legitimate/ illegitimate distinction.[179]

4.18.6 *Does Scots domicile law apply for tax*

The Family Law (Scotland) Act 2006 is an Act of the *Scottish* Parliament. It is an interesting question whether its reform of Scots domicile law applies for tax purposes. Taxation is (in general) a reserved matter over which the Scottish Parliament has no competence.

A full discussion of Scottish Parliament competence would need a long chapter, which the importance of the issue here does not justify; it is however suggested that a reform of domicile law, which has a merely incidental consequential effect on taxation, should be within the power of the Scottish Parliament.[180]

HMRC agree: the RDR Manual provides:

> **RDRM22120 The Family Law (Scotland) Act 2006** [Mar 2019]
> The Family Law (Scotland) Act 2006 [FL(S)A 2006] came into effect on 4 May 2006. Section 22 of the Act creates a new form of domicile in Scotland for individuals under the age of sixteen. Legitimacy has ceased to be a factor in determining domicile in Scots law under the FL(S)A 2006, section 21 of the Act having abolished the status of illegitimacy.
> In Scotland only, since 4 May 2006, where a child's parents share a domicile and the child has a home with either or both of them, the child is domiciled in the same country as its parents.
> Where a child's parents are domiciled in different countries, or the child has a home with neither parent, the child is domiciled in the country with which he or she has 'for the time being the closest connection'.
> The wording of FL(S)A 2006 indicates that in any proceedings commenced on or after 4 May 2006 the legislation should be applied retrospectively in order to determine the domicile of an individual under the age of sixteen.

But then what is the position of a person where English and Scots law produce a different answer as to domicile? The solution to the conundrum is to remember that when statute refers to domicile in the UK, that is shorthand for domiciled in England, Scotland or Northern Ireland. A person should be regarded as domiciled in the UK if they are:

(1) domiciled in England according to English law, or
(2) domiciled in Scotland according to Scots law, or

[179] See s.41 Family Law (Scotland) Act 2006.

[180] See *Martin v HM Advocate* [2010] UKSC 10.

(3) domiciled in Northern Ireland according to NI law.[181]

It could then happen that (say) an English tribunal has to apply Scots law principles in order to consider whether a taxpayer is domiciled in Scotland, and so domiciled in the UK. But that is inevitable; one should avoid so far as possible a situation under which the selection of a tribunal (which may turn on matters such as the residence of a witness) leads to a difference as to applicable law and so to a different outcome.

It is suggested that the law of domicile ought to be as similar as possible in each jurisdiction, and in this case, the law of England and Northern Ireland ought to be amended to adopt the Scots law approach.

4.19 Adoption and parental orders

A parental order transfers parenthood status to the intended parents in a surrogacy arrangement. I refer to them as "the new parents".

There are about 3,000 adoptions and 400 parental orders p/a in England.[182]

For a full discussion of parenthood and its impact on domicile, see Dewes, "Is this My Child? Who is My Parent? Legal Parent-child Relationships in UK Tax Law in An Era of Complex Family Networks" (2018).[183]

4.19.1 *Family law background*

The relevant legislation is:

- the Adoption and Children Act 2002 (ACA 2002)
- Human Fertilisation and Embryology Act 2008 (HFEA 2008)
- Human Fertilisation and Embryology (Parental Orders) Regs (HFEA regs 2018)

The same principles apply to adoption under Scots and Northern Ireland law.[184]

[181] See too 102.18.2 (Situs in Scots law).

[182] *https://www.gov.uk/government/statistics/family-court-statistics-quarterly-april-to-june-2021/family-court-statistics-quarterly-april-to-june-2021*

[183] Accessible *https://www.foreigndomiciliaries.co.uk/index.php/Documents_archive* I am grateful to Sam Dewes of HW Fisher for his comments on this topic.

[184] Section 40 Adoption and Children (Scotland) Act 2007; s.40 Adoption (Northern Ireland) Order 1987. HFEA 2008 applies throughout the UK. Further consideration would be needed in the case of foreign law adoption/parental orders.

It is not possible to discuss the law fully here, but in outline:

Adoption: s.67 ACA 2002	**Parental order: s.67 amended by HFE regs**
(1) An adopted person is to be treated in law as if born as the child of the adopters or adopter.	(1) A person to whom a parental order applies is to be treated in law as the child of the person or persons (as the case may be) who obtained that order, and, if more than one person, is to be treated as the child of the relationship of those persons.
(2) An adopted person is the legitimate child of the adopters or adopter and, if adopted by— (a) a couple, or (b) one of a couple under section 51(2), is to be treated as the child of the relationship of the couple in question.	(2) A person to whom a parental order applies is to be treated in law as not being the child of any person other than the person or persons (as the case may be) who obtained that order, but this subsection does not affect any reference in this Act to a person's natural parent or to any other natural relationship.
(3) An adopted person— (a) if adopted by one of a couple under section 51(2) [one adoptive parent], is to be treated in law as not being the child of any person other than the adopter and the other one of the couple, and (b) in any other case [two adoptive parents or one adopter under s.50 ACA 2002], is to be treated in law, subject to subsection (4), as not being the child of any person other than the adopters or adopter; but this subsection does not affect any reference in this Act to a person's natural parent or to any other natural relationship. (4) In the case of a person adopted by one of the person's natural parents as sole adoptive parent, subsection (3)(b) has no effect as respects entitlement to property depending on relationship to that parent, or as respects anything else depending on that relationship.	(3) Where a parental order is granted under section 54A [one new parent] of the 2008 Act to a person who is a natural parent of the person to whom the order applies, subsection (2) has no effect as respects entitlement to property depending on relationship to that parent, or as respects anything else depending on that relationship.

4.19.2 *Domicile consequences*

Dicey states:[185]

> A domicile of origin may be changed
> [1] as a result of adoption or
> [2] by issue of a parental order under the HFEA 2008,
> but not otherwise.

A child adopted by opposite-sex parents is treated as the legitimate child of their adoptive parents and so their domicile of origin is that of their adoptive father.

What matters is the domicile of the adoptive father at the child's birth, rather than at the date of the adoption order. For example, if the adoptive father was domiciled in England when the child was born, but domiciled in France when the adoption order was granted, the child would (as from the date of the adoption) have a domicile of origin in England and a domicile of dependency in France.

Under the previous HFEA Regs (from 2010), a parental order had the same impact as an adoption order as regards the status of the child; i.e. the child is treated as being the legitimate child of the new parents. The purpose of the subsequent HFEA Regs 2018 was to allow parental orders to be granted to a single person. However, they also removed any reference to the child's legitimacy status (perhaps accidentally). The Government's consultation document on the draft HFEA Regs 2018[186] suggests that the intention was to provide for the child to be legitimate and, in this case, it may be reasonable to treat the child as such, albeit the law is now unfortunately unclear.

An adoption/parental order can be made in favour of a sole parent.[187] In this case the domicile of origin must follow the domicile of the sole parent (whether adoptive mother or father), except in the case of a person adopted by the natural mother as sole adoptive parent.

4.20 Same-sex parents

There are around 40,000 same-sex families with dependent children in the

[185] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 6R-025.

[186] *https://assets.publishing.service.gov.uk/media/5a9fd645ed915d07a00fd8a8/consultation-document-human-fertilisation-and-embryology-parental-order-regulations-2018.pdf*

[187] Section 51(2) ACA 2002; s.54A HFEA 2008.

UK.[188] It will be not be long before these children are old enough that their domicile becomes important for tax and general law purposes.

The domicile rules discussed thus far assume that an individual is a child of opposite-sex parents. An individual with same-sex parents with different domiciles faces the difficulty of applying rules of domicile of origin/dependency which depend on the domicile of their father.

Sam Dewes[189] proposes some solutions to these problems. One must first distinguish three categories:
(1) Individuals with two female parents from birth
(2) Individuals with same-sex parents by virtue of a parental order
(3) Individuals with same-sex parents by virtue of an adoption order

4.20.1 *Two female parents from birth*

For individuals in category 1, their female parents are:
(1) their birth mother, and
(2) another woman who has met the conditions in either s.42 or s.43 of the HFEA 2008 (referred to in the Act as the "other parent").

This is the only scenario in which an individual can have same-sex parents from birth.

In this case it is possible to distinguish between the two parents, either on account of who provided the egg to create the embryo (which could be either parent) or on account of the fact that only one of them carried the child. On the basis that the common law identifies a mother through childbirth, and that the HFEA 2008 does not call the other female parent a "mother", it is suggested that the child's domicile should follow that of the birth mother, rather than the other female parent.

4.20.2 *Same-sex parents: Parental order*

Section 54 HFEA 2008 requires that one of the applicants to the parental order has provided one half of the gametes needed to create the embryo. It is suggested that the child's domicile should follow that of the parent who provided the gametes. Although in some cases the applicants do not know whose gametes have been used, it should be relatively easy to ascertain. Dicey supports this view:[190]

[188] *https://www.gov.uk/government/statistics/families-and-households-in-the-uk-2021* These figures are unreliable but more definitive figures are not available.

[189] "Uncharted Waters" STEP Journal, Issue 2, 2020.

[190] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 6-036.

> In the case of a child the subject of a parental order, an objective method of choosing between the two parents would be for the child to take the domicile of the parent whose gametes were used to bring about the creation of the embryo.

4.20.3 *Same-sex parents: Adoption*

Unless one of the applicants to the adoption order was previously a parent of the child prior to the adoption order being granted, it is difficult to distinguish between two adoptive parents.

If the adoptive parents do not share a common domicile, one could determine the adopted child's domicile based on the closest connection test used in Scots Law. This is not an ideal test: it was designed to determine an individual's domicile at a moment in time and is less appropriate for determining an individual's domicile of origin which is capable of reviving later in life. But it is difficult to think of a better test.

4.21 No mental capacity

Dicey states:[191]

> A person lacking mental capacity to make decisions as to his future permanent residence cannot acquire a domicile of choice and, subject to the Exception hereinafter mentioned, retains, while lacking that capacity, the domicile he had when last having that capacity...
> *Exception:* The domicile of a person who never acquires, or who loses as a dependent child, the mental capacity to make decisions as to his future permanent residence is determined, so long as he lacks that capacity, as if he continued to be a dependent child.

The exception does not apply in Scotland. The Law Commission say:[192]

> The effect of the current rules governing the domicile of adults who lack the mental capacity to acquire a domicile of choice' appears to be that:
>
> (a) a mentally incapable person cannot acquire a domicile of choice and, subject to (b) below, retains while his incapacity lasts the domicile he had at the onset of his incapacity or (in Scotland) on the attainment of the age when his domicile of dependency

[191] Dicey, Morris & Colins, *Conflict of Laws* (16th ed., 2022), para 6R-110, 6E-117.

[192] "The Law of Domicile" (Law Com no. 168) para 6.1. *https://www.lawcom.gov.uk/project/private-international-law-law-of-domicile/*

ceases, whichever is the later; but

(b) in England and Wales and Northern Ireland, where the onset of the incapacity predates the person's sixteenth birthday, his domicile of dependency continues thereafter unless and until he recovers his capacity.

Thus it is possible to envisage circumstances where Scotland/England reach different outcomes, for a person who never had capacity, or who loses capacity while under 16. But that will rarely matter for tax. An individual who loses capacity while under 16 is not likely to have substantial taxable assets.

4.22 Domicile territory/country

Dicey states that a person has a domicile in a "country", and comments on the terminology:[193]

> This word [Country] has from long usage become almost a term of art among English-speaking writers on the conflict of laws... It was defined by [Albert Venn] Dicey as 'the whole of a territory subject under one sovereign to one body of law.'

In *Adams v Cape Industries*:[194]

> ... for conflict of law purposes, each state within the United States is a "country" and ... for many conflicts of law purposes the United States is not a "country". Each state, for example, has its own common law. The United States has no common law... Domicile in the United States as a whole is a meaningless concept.

This rule is obviously necessary because one of the main purposes of domicile is to link a person to a jurisdiction for the purposes of family and succession law. If one needs to know which law to apply, one must make the link to a single jurisdiction, applying a specific law; and in the USA, each state has its distinct family and succession law.

The question, then, for federal states is to determine whether

(1) the federation has "one body of law", in which case one is domiciled in the federation; or

(2) the individual states have distinct bodies of law, or as it is sometimes

[193] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 1-020 (Meaning of "Country").

[194] [1990] Ch. 433 at p.488.

put, distinct legal systems,[195] in which case one is domiciled in an individual state within the federation.

Dicey states:[196]

> England, Scotland, Northern Ireland, the Isle of Man, Jersey, Guernsey, Alderney, Sark, each British colony, each of the American and the Australian states and each of the Canadian provinces is a separate country in the sense of the conflict of laws, though not one of them is a state known to public international law.
> ... On the other hand, Wales is not a country, because its system of law is the same as that of England.

There may be borderline cases, and the position may change from time to time as a result of devolution or other major constitutional changes.

4.22.1 *Terminology*

When the word "Country" is used in this technical sense, one should perhaps use an initial capital, or scare quotation marks. I think "legal jurisdiction" is a better expression, because, say, California is not in the normal sense a country, but it is a legal jurisdiction.

There have been other suggestions:[197]

> [Albert Venn Dicey] suggested that a better expression might be 'law district': but this phrase has never found much favour with English-speaking writers, who prefer the more familiar word 'country'.

The use of the word "Country" seems too well established to change.

4.22.2 *Bailiwick of Guernsey*

The Royal Commission on the Constitution states:[198]

> The Channel islands consist of two separate Bailiwicks, the Bailiwick of Jersey... and the Bailiwick of Guernsey, which comprises the Islands of Guernsey (with Herm and Jethou), Alderney and Sark... There are no formal links between the two Bailiwicks. ... Alderney and Sark both have a large measure of independence within the Bailiwick of

[195] *Re Fuld* [1968] P 675 at p.684.

[196] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 1-020 - 1-022.

[197] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 1-020 (Meaning of "Country").

[198] Cmnd. 5460 (1973) para 1349 etc.

> Guernsey ... and legislative assemblies of their own.

The RDR Manual provides:

> **RDRM20060 Domicile and Law Territories** [Mar 2019]
> ... the Bailiwick of Guernsey includes Guernsey, Alderney and Sark, which are all separate law territories.

That is, a person is domiciled in one of these three jurisdictions, not in "the Bailiwick of Guernsey".[199]

4.22.3 *Ireland*

Para 8 Government of Ireland (Adoption of Enactments) (No. 1) Order 1922 provides:

> For the purpose of determining the domicile of any person, Northern Ireland shall be deemed always to have been a separate part of the UK.

In *Re M*[200] the question arose concerning a person's domicile prior to the partition of Ireland in 1922. A person who lived all their life in what is now Northern Ireland was held to be domiciled in the part of the divided territory in which they had resided.

The RDR Manual provides:

> **RDRM20060 Domicile and Law Territories** [Mar 2019]
> The last two centuries have seen many changes in national and political boundaries. Any new territories should be regarded as having existed for the purposes of ascertaining domicile **prior** to their creation. Authority for this approach is provided by cases in which the 1921 division of Ireland into its present parts was considered.

4.22.4 *Switzerland*

Switzerland is a federation of 26 cantons. But I understand that Swiss family and succession law are set at federal level, and not at canton level.[201] So it is considered that a person is domiciled in Switzerland, not in one of its cantons.

[199] See too App 2.19.2 (British Isles).

[200] [1937] NI 159 followed in *Re P* [1945] Ir Jur Rep 17. Both cases accessible *https://www.kessler.co.uk/tfd-archive*

4.23 HMRC domicile ruling

HMRC formerly provided rulings on domicile, but that stopped in 2010.[202] Perhaps rulings were judged not to be efficient use of HMRC resources.

Domicile rulings are obtainable on death. PRs complete form IHT401 (Domicile outside the UK). The IHT Manual explains HMRC practice on receipt of this form:

> **IHTM13011 Investigation of form IHT401** [Jan 2020]
> When a taxpayer or agent considers that a deceased person was domiciled outside the UK they must submit a form IHT400 together with a form IHT401. We will consider the question of domicile after the grant has been issued..
> Pre-Grant will flag up the fact that a foreign domicile has been claimed before they issue form IHT421 [Probate summary]. The file will then be passed to Risk who will decide whether a domicile outside the UK can be accepted or should be referred to Compliance to take the matter up with the taxpayer or agent.
> If a Double Taxation Convention (IHTM27161) applies and foreign tax has not been paid the initial calculation should be made without taking the convention into account. The caseworker should investigate the tax implications of the convention further at a later stage.
> **IHTM13012 Risk decisions** [Jan 2020]
> Where an IHT401 is submitted with a foreign domicile claimed, it is referred to Risk. They will make a risk assessment decision to:
>
> - accept the domicile, or
> - investigate the domicile.
>
> This decision is based on a number of factors. These can include whether the deceased was born, lived and died abroad, or whether they were born abroad and resided in the UK for a fixed period (which ended before the death and lasted no more than 10 years).
> If the domicile can be accepted, that will be the end of the domicile question, unless other information subsequently arises which will lead HMRC to challenge it.
> In cases where Risk cannot agree the domicile, the file will be referred to Compliance to challenge the domicile claim.
> If Risk need any further information to make a decision at this stage they will refer the file to Technical.

[202] HMRC Brief 34/10.

4.23.1 *Effect of old ruling*

A ruling that a UK resident individual is not UK domiciled will generally entail two findings of fact:

(1) The individual did not have a UK domicile of origin (or a UK domicile of dependency).

(2) The individual had not acquired a UK domicile of choice at or before the time of the ruling.

It is self-evident that a ruling does not entail any statement that the individual will not acquire a UK domicile of choice *after* the date of the ruling. HMRC Brief 17/09 makes this point:

> Where an individual has already submitted a form DOM 1 or P86 and obtained an initial view from HMRC about their domicile status it will be unusual for us to open an enquiry into domicile status in the few years after that, unless new information becomes available that indicates our initial view was incorrect or there has been a change in circumstances. However with the passage of time, circumstances and intentions change and so that initial view from HMRC can become less and less useful as an indicator of domicile status. For example if an individual had advised HMRC on their arrival in England a decade or so ago that they planned to leave the UK after five years but had since married, had a family and decided to make England their permanent home then they will have adopted a domicile of choice within the UK.
>
> **Domicile and Inheritance Tax**
>
> ... As is currently the case, where HMRC has expressed an opinion on the domicile status of a settlor for Inheritance Tax purposes we will not normally seek to reconsider that opinion unless new information becomes available that indicates our initial opinion was incorrect or there has been a material change in the circumstances of the settlor. However, when we make a decision it applies only to the date of the transaction concerned. So if circumstances change, the individual returns to the UK for example, that individual's domicile may need to be considered again at another point in time. Domicile is not a static thing, it can change as people's circumstances and intentions change.
>
> ... Where HMRC has expressed a view on an individual's domicile status for income tax or capital gains tax purposes, as a result of an enquiry, then that view will also apply for Inheritance Tax purposes at that time. Likewise a HMRC view expressed for Inheritance Tax purposes, following a Part VIII IHTA enquiry, will also apply for income tax and capital gains purposes at that time. However, it is important to remember that each decision on domicile will be made at

> a certain point in time, if circumstances have changed since the time of the relevant decision, the domicile of the taxpayer may also have changed.

In *Gulliver v HMRC*[203] the taxpayer (chief executive of HSBC) had a UK domicile of origin. He obtained a (somewhat cursory[204]) ruling for 2002 that he had acquired a domicile of choice in Hong Kong in about 1999.[205] HMRC opened a domicile enquiry for 2013/14, a decade or so later. The taxpayer argued that HMRC were bound (presumably, for ever) by the ruling: they could not question the acquisition of a domicile of choice, though they were entitled to contend that the taxpayer had abandoned his domicile of choice after the date of the ruling. This was an argument that HMRC were bound not to collect tax which may actually have been due. It is well established that such an argument requires judicial review, and cannot be taken before the tribunal in a tax appeal, or in proceedings preliminary to a tax appeal (in this case, an appeal against a sch 36 notice requiring information going back to 1981.) The taxpayer's appeal failed for that procedural reason.

Could the taxpayer have succeeded in judicial review? That was (rightly) not investigated, but the facts reported in the judgment fall far short of the required degree of unfairness. This does not mean that all ruling are unenforceable, but enforceability depends on the facts, it requires something more than just an HMRC view or representation, and even if enforceable for earlier periods, the unfairness of reopening the

[203] [2017] UKFTT 222 (TC).

[204] The decision at [10] provided:

> At the time, HMRC took a "risk based approach" to requests for confirmation of the IHT treatment of lifetime transfers that took into account the amount of the tax potentially in issue, and the chance of the taxpayer concerned being UK domiciled on the basis of the information provided. Applying that approach, Mr Murray did not consider it an appropriate use of resources to engage in a full enquiry into all aspects of Mr Gulliver's domicile given that the amount of tax in issue was only £4,735. He also concluded that there was not a high risk, based on the information provided, of Mr Gulliver having a UK domicile. Mr Murray did not, therefore, conduct a detailed investigation as to Mr Gulliver's circumstances before writing the Letter.

With hindsight, there was perhaps a false economy on the part of the taxpayer. But that is not relevant to the decision.

[205] That seems surprising, bearing in mind that Hong Kong sovereignty was only transferred to China in 1997.

issue diminishes over time.[206]

The particular issue in *Gulliver* was whether HMRC were bound by a ruling that an individual with a UK domicile of origin had acquired a foreign domicile of choice. More commonly the question will be whether HMRC are bound by a ruling that an individual has a foreign domicile of origin (and at the date of the ruling, had not acquired a UK domicile of choice). But the principles of enforceability are the same.

The issue will arise less often after the introduction of the 2017 deemed domicile rules, but actual domicile still matters for protected trusts and for years before 2017/18.

With hindsight, HMRC domicile rulings should have included clear indication of when they can be relied on. Some did, but we generally had the usual muddle and fudge.

4.24 HMRC investigations

4.24.1 *Change of HMRC practice*

In 2013, HMRC practice on domicile was described as follows:

> with the exception of the one case of *Steiner v IRC*[207] and perhaps another one, HMRC had never won a case on domicile against a living taxpayer [with a foreign domicile of origin] and ... they rarely take on such cases.[208]

In the past, HMRC's domicile cases normally concerned those with a UK domicile of origin who claimed to have acquired a foreign domicile of choice.

HMRC policy changed in about 2016 (there was no announcement). HMRC have set up a unit which pursues investigations into individuals with a foreign domicile of origin, who have been UK resident for substantial periods. The change is illustrated by the fact that HMRC have often decided that HMRC's earlier domicile rulings were wrong.[209]

This is so even though from 2017, under the current deemed domicile

[206] It is also relevant to note that post-ruling facts are relevant to the issue of acquisition of domicile of choice in a pre-ruling year; see 4.24.7 (Period for domicile enquiry).

[207] For *Steiner* see 4.14.4 (Citizenship if UK home required).

[208] *Mehjoo v Harben Barker* [2013] EWHC 1500 (QB) at [258]. The point was not considered on appeal.

[209] See 4.23.1 (Effect of old ruling).

rules, the amount at stake will be less than before.[210]

This unit is acting zealously, and in some cases, in a manner which amounts to bullying and harassment. This includes HMRC sending letters in 2018 to their customers directly, even though the taxpayer is professionally represented.[211] These letters threatened penalties under the Requirement to Correct legislation. ICAEW comment:

> We understand that HMRC's Wealthy Units are writing to all taxpayers within their units with respect to the RTC. From what we have seen there appear to be two different categories of letters going out:
>
> 1. Specific detailed letters where there is an ongoing enquiry.
> 2. A basic one-page bulk mailing to other individuals within the Wealthy Units.
>
> There is a sub-category of letters within category 1 letters that deals with enquiries into individuals claiming foreign domiciled status. The letters sent out are detailed (a four-page letter and a three-page schedule) and are mostly the same for each taxpayer, with some occasional minimal tailoring of the schedule to add requests for a few additional pieces of information HMRC considers relevant.
>
> **Our concerns**
>
> We have a number of issues with these letters and have communicated our concerns to HMRC.
>
> We think that where there is an ongoing enquiry, the letters are too aggressive in tone (particularly the domicile letters). We are particularly concerned that none of the letters mention reasonable excuse where appropriate advice has been taken from a disinterested adviser. This is a material omission and gives advisers and individuals the wrong impression.
>
> We also think that the information HMRC is requesting from taxpayers goes beyond what the legislation defines as "relevant information" and does not follow HMRC's own guidance on domicile enquiries.

HMRC have so far been successful in establishing a UK domicile, in all of the domicile appeals which have followed this change of practice:

[210] In the absence of neglect, the years in issue will be 2013/4 to 2016/17. Of course even in those four years the tax at stake, with interest, may be substantial.

[211] The professional bodies criticised HMRC for similar action in 2013, see 17.26 (Remittance compliance/enquiry).

Case	**Ref**	**See**
Henkes v HMRC	[2020] UKFTT 159 (TC)	4.7.1
Perlman v HMRC	[2021] UKFTT 219 (TC)	4.24.5
Shah v HMRC	[2023] UKFTT 539 (TC)	4.7.1
Coller v HMRC	[2023] UKFTT 212 (TC)	4.7.1
Strachan v HMRC	[2023] UKFTT 617 (TC)	4.11.1, 4.24.9

These all seem clear cases, at least on the basis of the facts found by the Tribunal. More cases are bound to follow.

4.24.2 *Enquiry procedure*

The usual enquiry rules apply. HMRC Brief 17/09 provides:

> **Enquiries into domicile status**
> ... if HMRC decides to enquire into an individual's domicile status this will be by way of a section 9A TMA enquiry into their Self Assessment tax return. (Alternatively in appropriate cases HMRC may enquire into an individual's domicile status by way of a Part VIII IHTA enquiry into an Inheritance Tax return.)
> Where a claim to the remittance basis is not challenged for that year it does not mean HMRC necessarily accepts the individual's domicile is outside the UK and does not prevent HMRC from later opening an enquiry to consider the domicile status of the individual in relation to that, or any earlier year.

HMRC Brief 34/10 provides:

> HMRC will consider opening an enquiry where domicile could be an issue, or making a determination of Inheritance Tax in such cases, only where there is a significant risk of loss of UK tax.
> The significance of the risk will be assessed by HMRC using a wide range of factors. The factors will depend very much on the individual case but will include, for example:
>
> - a review of the information available to HMRC about the individual on HMRC databases
> - whether there is a significant amount of tax (all taxes and duties not just Inheritance Tax) at risk
>
> HMRC does not consider it appropriate to state an amount of tax that would be considered significant, as the amount of tax at stake is only one factor.[212] It should be borne in mind that HMRC will take into

[212] Author's footnote: I would have thought the main (and proper) reason to withhold this information is to prevent fraud; but it does not matter.

> account the potential costs involved in pursuing an enquiry, and also those of potential litigation should the enquiry not result in agreement between HMRC and the individual; clearly such costs can be substantial.
>
> Where HMRC does open an Inheritance Tax enquiry in any of these cases, it will keep the factors in view and may stop the enquiry at any stage if it considers the continuation of the enquiry is not cost effective. The outcome of such an enquiry may be that HMRC does not consider it appropriate to make a determination of the Inheritance Tax.

4.24.3 *Domicile appeal procedure*

HMRC should be supplied with the information they reasonably require; and once HMRC have sufficient information to make a decision on domicile, the taxpayer should generally apply for a closure notice. In the absence of such pressure, HMRC domicile enquiries may drag on for years, and sometimes decades.

4.24.4 *Domicile as preliminary issue*

Domicile appeals typically raise two distinct sets of issues:

(1) Domicile
(2) The amount of tax at stake, if the taxpayer loses on domicile

Point (2) will sometimes raise lengthy and complex issues. Then the sensible procedure would be to resolve the issue of domicile first, leaving other issues to be considered later if it turns out to be necessary to do so. That seems self-evident, but the Courts have been reluctant to allow it to happen.

In order to follow discussion on *Embiricos*, the reader must bear in mind that there are for present purposes two types of tax appeals. In short:

(1) An enquiry procedure, where the steps are:
 (a) an enquiry
 (b) a closure notice
 (c) an appeal against the closure notice
(2) A discovery procedure. where the steps are:
 (a) a discovery assessment
 (b) an appeal against the assessment

The first *Embiricos* case concerned an enquiry. The CoA decided that under the enquiry procedure, statute requires HMRC to issue a closure notice in relation to domicile and related tax issues.[213] The Tribunal had no case-management power to hear the domicile point first, as a preliminary issue, even if it was sensible to do so (as the FTT found it was).

The taxpayer tried again in the second *Embiricos* case, which was a discovery appeal. As this concerned an appeal which had been made to the Tribunal, the Tribunal did have a case-management power, if it thought fit, to hear the domicile point as a preliminary issue. But a differently constituted FTT did not think fit; it was better for all the issues to be heard at one single hearing.[214]

A sub-issue in such cases is how long a preliminary domicile hearing ought to take. HMRC estimate more than the taxpayer:

Case	**Domicile issue time estimate (days)**			**Other issues**	**See at**
	HMRC	*Taxpayer*	*Court*		
Wrottesley	4-5	2-3	3-4	10-15 days	[50]-[51]
Embiricos	7	2-3	7 !	6+	[29]

The time estimate of 7 days in *Embiricos* is in the author's view excessive.[215] Better case management is needed to prevent cases running so long. In *U v J* the Court had to determine the domicile of both parties, and an issue of *forum non conveniens,* in a case involving "particularly unusual and complex facts," and "about as difficult a forensic exercise as one might encounter in a case of this kind".[216] The hearing lasted 3 days.

[213] *Embiricos v HMRC* [2022] EWCA Civ 3. The reader may think that FTT's decision to the contrary was to be preferred; but there it is.
For completeness: It would be possible to hear domicile as a preliminary issue in an enquiry if both parties agree; s.28ZA TMA. However in *Embiricos* HMRC did not agree, and it appears that it is HMRC's policy not to do so.

[214] *Embiricos v HMRC* [2022] UKFTT 464 (TC).
In *Wrottesley v HMRC* [2015] UKUT 637 (TCC) the issues were (1) domicile of origin and (2) domicile of choice/dependency. The Tribunal refused to hear issue (1) as a preliminary issue.
Wrottesley also considered the position where the issues were (1) domicile and residence. These are separate issues but given the inevitable factual overlap it would not usually be sensible to consider one of them as a preliminary issue; see at [26]. I don't think either of those conclusions are surprising.

[215] Nine days is far longer than the courts have generally taken to decide domicile: see *https://www.kessler.co.uk/wp-content/uploads/2017/06/Domicile-cases-length-of-hearing.pdf* Whether for this or some other reason, the substantive hearing in *Wrottesley* never took place.

[216] [2017] EWHC 449 (Fam) at [6].

The FTT allowed the recent *Coller*[217] domicile appeal, a straightforward domicile case, to last a leisurely 9 days, including 3 days to cross - examine the taxpayer! That would not have happened in the High Court.

4.24.5 *Domicile in information notice appeal*

In *Perlman v HMRC*[218] the FTT held:

(1) It could not determine a disputed domicile in an appeal against an information notice.
(2) Even if it could, it would chose not to do so.

Even if the FTT did have power to determine domicile on an appeal against an information notice, cases where it would be appropriate to do so would be very rare.

4.24.6 *Further appeals*

It is well established that a trial judge who has heard the witnesses is to be afforded considerable respect by an appellate court which has not. The principle has been applied in a domicile context. *Agulian v Cyganik* considered the role of an appellate court in a domicile appeal considering inferences drawn by the trial judge, rather than findings of primary fact:[219]

> …this was not an appeal against the exercise of a discretion by the lower court nor was it a case in which the lower court was applying a fairly flexible and imprecise standard involving an evaluation of all the facts. In those cases the appellate court is more reluctant to interfere with the trial judge's decision than in the case of a finding of primary fact or an inference from primary facts. This is an appeal contesting the correctness of an inference as to Andreas's relevant intentions between 1995 and 1999. The function of the appellate court is to decide whether the inference is wrong, making proper allowances for any advantages that the trial judge would have had and an appellate court would not have and not interfering with inferences which the judge could reasonably have made.

Similarly *Barlow Clowes*:[220]

> ... the approach of the appellate tribunal to findings of fact would

[217] *Coller v HMRC* [2023] UKFTT 212 (TC); see at [161].

[218] [2021] UKFTT 219 (TC), not following *Henkes v HMRC* [2020] UKFTT 159 (TC).

[219] [2006] EWCA Civ 129 at [12].

[220] *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [6].

> depend on the extent to which the judge had had an advantage over the appellate court. So, where findings turn wholly or substantially on oral evidence given by witnesses at trial, an appellate court will be slow to interfere. Thus there is in general a greater latitude where the findings in issue on an appeal are not primary facts but inferences from the proved facts… If an appellate court considers that the judge has come to a conclusion that is plainly wrong and outside the ambit within which reasonable disagreement is possible, it is bound to intervene, even though the question is one of fact.

4.24.7 *Period for domicile enquiry*

What is the period for an enquiry into domicile?[221] The issue is normally domicile as at some particular date, but conduct long before that date may be relevant. In *Cyganik v Agulian* :

> ... whether Andreas was domiciled in England and Wales at the date of his death. Although it is helpful to trace Andreas' life events chronologically and to halt on the journey from time to time to take stock, this question cannot be decided in stages. Positioned at the date of death in February 2003 the court must look back at the whole of the deceased's life, at what he had done with his life, at what life had done to him and at what were his inferred intentions in order to decide whether he had acquired a domicile of choice in England by the date of his death. Søren Kierkegaard's aphorism that 'Life must be lived forwards, but can only be understood backwards'[222] resonates in the biographical data of domicile disputes.[223]

Likewise, although the question is domicile on some particular date, conduct after that date may be relevant. That is self-evident, but if authority is needed, see *Perdoni v Curati*:[224]

> In making an assessment of the intention as to domicile of a person at a particular date, the evidence of things said and done by him up to that date will obviously be important. In my view, evidence of things said and done by him after that date may also be relevant, but only in so far as an inference can properly be drawn from them as to what his

[221] See 9.16 (Period of enquiry: Tie-breaker).

[222] Kierkegaard,(1843) Journals IV.A.164 in Papers and Journals: A Selection (1996) (A. Hannay, trans.) pp 63, 161.

[223] [2006] EWCA Civ 129 at [46].

[224] [2011] EWHC 3442 (Ch) at [26]; this point was not discussed on the appeal.

> intention in fact was at the date in question.[225]

Likewise *Gaines Cooper v HMRC*:[226]

> if the fact-finder is required to determine which of two residences is a person's chief residence, then the tribunal must look at the evidence over a more prolonged period ...
> It seems probable, as a matter of common sense, that the further one gets from the point at which a domicile of choice is alleged to have been acquired, the less cogent will be any inference that one can draw from conduct. But that is a question of evaluating the evidence, rather than saying that it is irrelevant.

4.24.8 *Facts relevant to domicile*

Domicile disputes generally turn on the individual's intention. So the court must determine what is or was the individual's intention. In order to do so the court will have regard to all facts which might shed light on intention.[227]

HMRC Brief 17/09 provides:

> Enquiries aimed at establishing an individual's domicile are, by their very nature, examinations of an individual's background, lifestyle, habits and intentions, possibly over the course of a lifetime. Consequently, any such enquiries conducted by HMRC will, where necessary, extend to areas of individuals' and their families' affairs that may not normally be regarded as relevant to their UK tax position. ...

The RDR Manual provides:

> **RDRM23080 Domicile: Enquiries into domicile status: Schedule of useful information and documents** [Mar 2019]
> The list below shows the types of information that might be requested during an enquiry. It should not be regarded as either prescriptive or comprehensive, and the individual may offer other relevant information or evidence for consideration too.
> Any information request should be tailored to the particulars of the

[225] Likewise *Re Grove* (1888) 40 Ch D 216; "in order to determine a person's intention at a given time, you may regard not only conduct and acts before and at the time, but also conduct and acts after the time, assigning to such conduct and acts their relative and proper weight and cogency."

[226] [2007] EWHC 2617 (Ch) at [39], [43].

[227] Except voting as an overseas elector: see 4.8.1 (Involvement in politics).

> individual's claim, and their present circumstances. It is always important to think about the relevance of particular items of information to the detailed subject matter of each enquiry.

This is sound advice, but not always well observed in practice.

> An information request need not be limited only to the items listed here, nor will all items listed necessarily be appropriate in all cases. It may not be possible for some individuals to provide some of the items on the list, even if they would be useful to an understanding of their domicile status. Given the inevitable passage of time in many cases, HMRC and the individual may need to consider how best the facts can be checked and tested.

HMRC lists the following:

Information
Date of birth.
Full name at birth.
Parents' full names, including mother's maiden name, and places of birth.
Place of birth, identifying the relevant law territory.
Background to the place of birth, if this was not in the same territory as the parental home at the time.
Details of any name changes, and where, if at all, such changes were registered.
Nationality (citizenship) at birth, including an explanation of its basis where this is not obvious from the context.
Details of any changes in or additions to the nationality (citizenship) at birth, with explanations of the relevant background.
Family background, including marital status of parents during the period of derived domicile[228].
Information about any adoption proceedings.
If parents were not living together at any time during the period of derived domicile, an explanation of the background to this matter and how parental responsibilities were exercised.
Information about relationships entered into by parents following their separation during the period of derived domicile.
Details of siblings
List of places of residence from birth to the time of the enquiry, including home addresses.

[228] A note on terminology. In the RDR Manual:

> "derived domicile" refers to what is usually called "domicile of dependency"
> "The period of derived domicile" is the period during which an individual is incapable of acquiring a domicile of choice, ie from birth to (now) age 16.

The terminology is not helpful, and as far as I know, it has not been adopted outside the RDR Manual; but it does not matter.

An explanation of the reason for residence at each place on the list.

Details of legal rights of residence in respect of each place and a summary of any visas, permits or other official documents required.

Summary of educational background, including places of education, periods of attendance and qualifications obtained.

Details of military service.

Details of governmental or diplomatic service.

Summary of employment and/or business history.

Explanation of employment and/or business plans, including anticipated retirement, and any arrangements that are in place in respect of these matters.

A detailed summary of properties that have been available for use other than as short-term holiday lettings. This should include the addresses of all the properties, a description of them, details of their ownership, the periods during which the properties have been available, and an explanation of how they have been used when not occupied by the individual.

Details of all marriages, civil partnerships, separations and divorces, including information relating to other relationships involving long-term cohabitation. These should cover the full names of any relevant parties, their dates, places of birth and nationalities, the periods during which the relationships existed, the dates of any formal acts or ceremonies, information relating to the domicile of the other parties, and explanations of any periods during which the parties to the relationship did not live together.

Information about transfers of property, including those between spouses or civil partners.

A summary of the names, dates of birth and nationalities of the children of the individual.

Details of where any children were or are being educated.

The current locations of any children and the relevant background.

Information relating to the exercise of political rights in any territory, as either a voter or a representative.

Membership of any political parties, or participation in campaigns or lobbying groups, and the extent of any activities.

Details of professional qualifications, membership of professional bodies and active participation in these, including offices held.

Summary of membership of clubs, societies, associations, organisations and other bodies, and details of the level of participation in these.

Information about any representative activities undertaken on behalf of a country, territory, or any political, territorial or other sub-division thereof.

The location of personal papers and any items of financial, sentimental or other value. If such items are moveable, the place where they are usually kept and details of any insurance policies in respect of them.

Details of any wills, including an explanation of the law by which the will is intended to be construed and upon which it relies for its formal validity.

Summary of any deeds, declarations, covenants and similar documents created, including those relating to dependants.

Information relating to any legal proceedings or other matters in which domicile was relevant, either as a basis for any action or as an evidential point.

Locations of members of the extended family, including a description of the relationship between the individuals.

Details of religious, cultural and social connections, including the degree of religious observation, the level of participation in social and cultural life, and ability to speak, read and write relevant languages.

Information about charitable and voluntary activities, including the foundation of charitable trusts, donations to charities and good causes, and active participation in the administration or fund-raising activities of third-sector organisations.

Summary of professional and personal advisers, including their locations and details of the nature and extent of the services that they provide.

An explanation of the individual's intentions for the future. What plans have been made? What contingencies have been taken into account? What would cause a change of residence? What provision has been made for the future? What has the individual actually done that provides evidence for the answers to these questions?

A summary of any connections not specifically mentioned above that the individual has with various territories. When did these begin and precisely what form have they taken over the years? How much time has the individual spent in each territory during the relevant period? What was the reason for such presence?

Documents

The list below deals with the types of documentary evidence that might be requested during an enquiry. Again, it is important to think about the relevance of particular documents to the detailed subject matter of each enquiry. Also, consider the extent to which corroborative documentary evidence of particular aspects of an individual's lifestyle or background is needed.

In some cases it might be necessary to request applications and other documents relating to the acquisition, loss or withdrawal of the items listed below:

Birth certificates
Adoption papers
Registrations of name changes
Marriage certificates
Civil Partnership certificates
Passports and identification documents
Social security documents
Applications for nationality (citizenship)
Documents renouncing nationality (citizenship)
Visas, residence permits, work permits and similar documents
Driving, firearms and other licences
Practising certificates and authorisations from professional or regulatory bodies
School records and reports
Examination certificates
Military service records
Employment contracts
Business accounts, reports and planning documents
Conveyances, leases, tenancy agreements and other documents relevant to the ownership, occupation or use of property
Mortgage and loan agreements
Health insurance policies
Property, motor and other insurance policies
Life assurance policies
Documents relating to savings, retirement and pension plans
Wills, expressions of wishes, deeds of covenant and other legal documents
Personal financial records, including bank account and credit card statements and documents relating to investments
Documents confirming membership of or participation in organisations and activities
Personal correspondence, photographs or electronic records relating to an individual's background, lifestyle and intentions

This is a daunting list, but forewarned is forearmed.

There are nevertheless limits to what information HMRC can require, based on relevance, proportionality and article 8 ECHR (respect for private life and correspondence). In *Re Flynn*:[229]

> In one sense there is no end to the evidence that may be adduced; for the whole of a man's life and all that he has said and done, however trivial, may be prayed in aid in determining what his intention was at any given moment of time.

If one takes that approach to its logical conclusion, then no enquiry will ever be completed. But the judge continued:

> ... All that the court can do is to draw inferences from what has been said and done; *and in doing this, too much detail may stultify.*

There are 3 objections to providing more information than reasonably required. The first is a principle of privacy.[230] The second is cost. The third is the risk that what starts out as a domicile enquiry may segue into other issues.

4.24.9 *Allegation of carelessness*

It appears that HMRC may routinely allege carelessness in domicile cases. Whether or not a taxpayer, or their agents, are guilty of carelessness is a matter of fact, but some general points can be made.

A taxpayer may be careless if:

(1) They have never considered the issue of domicile.
(2) They have relied on an old domicile ruling without considering whether the facts have changed.[231]

However ascertaining domicile may not be a straightforward question. The difficulties have often been recognised. The Hong Kong Law Reform Commission say:

> 2.10 The principal criticisms of the rules for acquiring a domicile of choice are … they also lead to uncertainty: it is hard to decide a person's domicile because of the inherent difficulty of ascertaining his

[229] [1968] 1 All ER 49 at p.51. This comment is cited with approval in a number of subsequent domicile cases.

[230] In particular, article 8 ECHR (respect for private and family life).

[231] *Strachan v HMRC* [2023] UKFTT 617 (TC) at [337] ff. All domicile rulings are now very old.

> intention.
>
> 2.12 The problems stemming from the difficulties and uncertainties of determining a person's domicile were well summarised as follows:
>
> > Trials are apt to be long and expensive; for since a man's state of mind must be investigated, evidence even of the smallest matter is relevant. Besides, the difficulty of reaching certainty in matters of domicile in the absence of any decision by a competent court is a serious inconvenience to numerous people when they come to make a will or in the many other circumstances in which it is necessary to know which legal system is applicable. The practitioner may find it impossible to advise his client with confidence, since he cannot prophesy what impact the facts will have upon the judge's mind.[232]

The English Domicile Report mentioned went on to note:

> Mr Winans' optimistic hopes of being able at some time to return to the United States impressed Lord Macnaghten, but were dismissed by Lord Lindley as of no significance.

It would be easy to assemble further observations of this kind.

There has been a significant change in HMRC practice.[233] What steps should be taken by a reasonably careful taxpayer, and their reasonably careful advisors, should be assessed in the light of HMRC's practice at the time the issue arises. In case where the issue was carelessness HMRC's change of practice, the circumstances behind setting up the current HMRC unit, and what proportion of cases where the domicile question is conceded immediately lead to an allegation of carelessness by HMRC, against the taxpayer or their advisors, are matters which would merit a full examination. But in practice that has not happened. I think today reasonably careful advisers should take more care than was previously the case, and generally they do.

Although the issue is, often, domicile in the years to 2016/17, conduct after that date is relevant insofar as it may shed light on intention at an earlier time.[234] But facts not available at the time the relevant tax returns were submitted should not be relevant to the issue of carelessness, which

[232] Law Reform Commission of Hong Kong, *Rules For Determining Domicile* (2015) *https://www.legco.gov.hk/yr06-07/english/bc/bc54/papers/bc540713-rpt0504-e.pdf* citing the First Report of the Private International Law Committee (1954) Cmd 9068 para 9 *https://www.kessler.co.uk/wp-content/uploads/2014/07/1261_001.pdf*

[233] See 4.24.1 (Change of HMRC practice).

[234] See 4.24.7 (Period for domicile enquiry).

should not be decided with the benefit of hindsight.

In a case where a taxpayer's advisors were careless, but the taxpayer was not, the question would arise as to whether the advisors were acting on behalf of the taxpayer, in the relevant sense.[235]

In *Strachan v HMRC*[236] the taxpayer was found to be careless, having failed to seek advice. However if he had taken advice, it was not clear whether that would have made any difference, because:

(1) Some advisers would have advised correctly that he was UK domiciled but
(2) At least one adviser would have advised incorrectly that he was not (and later did so).[237]

It was held that HMRC had failed to meet the burden of proving that the carelessness caused a loss of tax. But the point was not thought through. The FTT should have asked *why* a tax adviser gave, or might have given, the wrong advice. Was it because the tax adviser took the wrong view of the law? One would think at least on the balance of probabilities that competent advisers would advise correctly on the law.[238] Or was it because the tax adviser took the wrong view of the facts? In that case the question should have been whether the facts were properly put to the adviser. One cannot evaluate advice of Counsel (or any adviser) without considering their instructions. Further discussion will have to wait until the case is final.

4.24.10 *Disclosure to curtail enquiry*

The advantage of full disclosure is that, for any tax year, HMRC can only open the domicile issue, after the end of the enquiry period for that year (one year from submission of the tax return), if (in short) the inspector "could not have been reasonably expected to be aware" that the taxpayer is UK domiciled.[239]

It is impossible to disclose *all* the information which could be relevant

[235] See 121.15.6 (Carelessness of agent).

[236] [2023] UKFTT 617 (TC) at [364] ff.

[237] The basis on which that incorrect advice was given was not examined, and it was not clear whether the Tribunal was supplied with instructions and a copy of the advice. But one should never assess or rely on Counsel's advice without reviewing their instructions.

[238] Not least because the relevant law was clearly set out in this work.

[239] See 121.10 (Full-disclosure defence).

to domicile, but if the taxpayer discloses the principal information relevant to the case *against* foreign domicile, it should be difficult for HMRC to raise an assessment, after the one-year enquiry period, unless they can show that some of the statements given are false.

In practice the taxpayer might supply:

(1) The answers to the questions in the former form Dom 1 (which asks mostly routine questions)[240]

(2) A statement setting out the relevant background information.

This would be attached to the self-assessment tax return.

4.25 Domicile of company

A company is domiciled where it is registered, which is the place of incorporation.[241]

Company domicile as such[242] does not usually matter for tax purposes. But the issue of company domicile can arise; for instance, Inheritance Taxation of trusts depends on the domicile of the settlor, and this rule applies to a corporate settlor.

A UK resident foreign incorporated company could be deemed domiciled in the UK for IHT purposes, as the relevant provision refers to a "person", which includes a company. In practice this point will rarely (if ever) arise.

A company could not be deemed domiciled for IT/CGT purposes as the relevant provision refers to an individual. But this point will not arise because a UK resident company is subject to CT, not IT/CGT.

It is better where possible to avoid using the word domicile, in relation to a company, and to refer to place of incorporation/registration, as that term is more basic and transparent; but it comes to (more or less) the same thing.

In general speech, the word domicile is often used in connection with companies without any very precise meaning.[243] But the same is true of

[240] *http://webarchive.nationalarchives.gov.uk/20090211190203/http://www.hmrc.gov.uk/cnr/dom1.pdf*

[241] *Gasque v IRC* 23 TC 209; Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 30-002.

[242] Tax rules generally refer to place of registration or incorporation, rather than domicile, though of course it comes to the same thing.

[243] For instance, Budget 2016 provides: "The measure forms part of wider work to establish the UK as an attractive domicile for vehicles issuing insurance linked

domicile in connection with individuals.

See too 90.59 (Redomiciliation).

4.26 Domicile: Adviser's duty of care

An adviser's duty depends on the terms of their retainer:

> There is no such thing as a general retainer ... The expression "my solicitor" is as meaningless as the expression "my tailor" or "my bookmaker" in establishing any general duty apart from that arising out of a particular matter in which his services are retained. The extent of his duties depends upon the terms and limits of that retainer and any duty of care to be implied must be related to what he is instructed to do.[244]

In *Mehjoo v Harben Barker* the judge held that a generalist accountant should:

(1) Raise the topic of domicile, if aware that the client was originally from outside the UK.

(2) Be aware that "non-dom was a favoured status ... which brought with it tax advantages... there was some sort of opportunity there."[245]

(3) Advise the client to take further advice from a non-dom expert.[246]

But the CoA took a more limited view of the accountant's retainer, or more accurately speaking, of this accountant's retainer:

> 56. The reasonably competent accountant setting out to advise Mr Mehjoo of the tax consequences of the sale would not, in my view,

securities..,. the government has been working with the insurance industry to develop a new corporate and tax structure for allowing vehicles issuing Insurance Linked Securities to be domiciled in the UK."

HMRC, "Overview of legislation and rates" (2016) para 1.43

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508859/OOTLAR_complete_for_publication.pdf

[244] *Midland Bank Trust Co v Hett Stubbs & Kent* [1979] Ch 384 at p.402.

[245] The opportunity was a bearer share scheme. There is still scope for planning, and for CGT planning if action is taken at the time the company is set up (rather than at the time of disposal): see 103.24.4 (UK resident non-UK incorporated co).

[246] [2013] EWHC 1669 (QB) at [183] - [189]. The judge said, correctly, that it is not time-consuming or difficult for a generalist to recommend taking specialist advice. In that case, £800k CGT was at stake; the damages came to £1.2m and the claimant's costs were over £5m. The cost of consulting a specialist (in 2004) was said to be £500 (presumably the cost of an initial enquiry rather than detailed advice).

> have been under any obligation to raise for discussion the claimant's domicile unless it was relevant to the CGT liability on the disposal. The accountant would have known that [domicile] gave Mr Mehjoo no tax advantages in relation to the sale of [UK registered] shares unless the situs of the shares could be changed. As this was something which [the accountants] neither knew or could have been expected to know was achievable, there was no reason to mention the matter still less a liability in negligence for not having done so...
> 59. I take the same view in respect of the claim that [the accountant] should have told Mr Mehjoo that his probable non-dom status carried with it significant tax advantages. Again, these were not advantages which were available to the claimant on the sale of UK registered shares and, in the absence of any claim that [the accountants] should have known and advised Mr Mehjoo that it would or might be possible to change the situs of the shares without triggering a charge to CGT in the process, it is difficult to understand why they were under any legal duty to bring the existence of "very significant tax advantages" to the claimant's attention. The competent accountant would not have believed that they existed.[247]

4.27 Domicile mistakes

In (at least) two cases the Courts have set aside a gift to a trust made under a mistaken view of the settlor's domicile (and so a mistaken view of the IHT consequences).[248] In the second case the mistake was not as to domicile (which was never determined) but just as the risk that HMRC would investigate domicile. That may be help to close down an HMRC investigation.

App 10.1 (Parliamentarians)

5.1 Deemed domicile: Introduction

This chapter discusses the deemed domicile rules which apply for IHT and IT/CGT.

The development of the 2017 rules can be traced in a series of papers which are now of historical interest only:

- "Technical Briefing on Non-Dom changes" (**"the July 2015 Non-Dom paper")**[1]
- Consultation paper "Reforms to the taxation of non-domiciles" **("the September 2015 condoc")**[2]
- Policy paper "IHT: reforms to the taxation of non-domiciles" & draft IHT clauses (December 2015)[3]
- Policy paper "Domicile: Income Tax and CGT" & draft IT/CGT clauses ("**the 2016 policy paper**")[4]
- Budget 2016
- "Reforms to the taxation of non-domiciles: further consultation" (August 2016) ("**the 2016 consultation paper**")[5]
- Finance Bill (March 2017)
- Revised draft clauses + EN (13 July 2017)

5.2 Deemed domicile: Outline

IT/CGT have 2 categories of deemed-domicile; IHT has those and 2 more, making four in all:

Deemed-domicile category	**ITA**	**IHTA**
Formerly-domiciled resident	s.835BA Condition A	s.267(1)(aa)
15-year rule	s.835BA Condition B	s.267(1)(b)
3-year rule	*not applicable*	s.267(1)(a)
Election-domicile	*not applicable*	s.267ZA

A person who is domiciled under these rules is **"deemed domiciled"**.[6]

A person who is UK domiciled under the general law, discussed in the last chapter, may be described as **"actually domiciled"**.

[1] *https://www.gov.uk/government/publications/technical-briefing-on-foreign-domiciled-persons-changes-announced-at-summer-budget-2015* (July 2015)

[2] *https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles/reforms-to-the-taxation-of-non-domiciles* (September 2015)

[3] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/484090/151209_publication_v1_4.pdf*

[4] *https://www.gov.uk/government/publications/domicile-income-tax-and-capital-gains-tax* (2 Feb, updated 5 Feb 2016)

[5] *https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles-further-consultation*

[6] Thus the meaning of "deemed domiciled" depends on whether the context is IT/CGT or IHT. Where statute uses this term, it is defined: for instance, para 5A sch 5 TCGA, see 92.4 (Condition D: Tainting).

If an individual is deemed UK domiciled, their actual domicile may not matter; but it may still be important, eg for:

- protected-trust relief
- 2017 rebasing[7]
- non-tax purposes

5.3 Scope of deemed-domicile

5.3.1 *Scope of IT/CGT deemed-dom*

Section 835BA(1) ITA provides:

> This section has effect for the purposes of the provisions of the Income Tax Acts or TCGA 1992 which apply this section.

So IT/CGT deemed-domicile only applies when s.835BA is expressly applied. This is done by a standard form clause:

> Section 835BA of ITA 2007 (deemed domicile) applies for the purposes of [the specified provision].

I refer to that as a **"standard-form deemed-domicile application clause"**. That clause appears dozens of times, and the total list covers (just about) everything which is important:

Income tax
ICTA: s.266A
ITEPA: s.355, s.373, s.374, s.376
ITA: s.476, s.718, s.809B, s.809E, s.834
CGT
TCGA: s.69, s.86, s.275, Sch 5A para 3
Sch 7 FA 2008 transitional reliefs (formerly-domiciled residents only):
paras 100(1)(b), 101(1)(c) and 102(1)(e)
para 118(3)(b) so far as having effect for the purposes of para 118(1)(d)
paras 124(1)(b), 126(7)(b), 127(1)(e) and 151(1)(b)

Where IT/CGT legislation refers to domicile but does not expressly apply s.835BA, the IT/CGT deemed-domicile rules do not apply and the reference is to actual domicile. This is rare, but there are examples:

Section	**Topic**	**See para**
s.809D ITA	Remittance basis for sub-£2k taxpayer	17.9
sch 5A TCGA	Disclosure of non-resident trusts	128.4.1

[7] See 56.16 (2017 rebasing).

Tax often distinguishes formerly-domiciled residents (more harshly treated) from other deemed domiciliaries. So a common formula is to refer to an individual who-

> (a) is domiciled in the UK, or
> (b) is regarded for the purposes of [a specified provision] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly-domiciled resident].

In para (a), the context, and the absence of a standard-form deemed-domicile application clause, show that the reference to domicile is a reference to actual domicile; for clarity, I gloss the provision to add the word [actual] in square brackets.

The drafter of the s.643A close-family income rule, and the s.731 equivalent, coined the term "relevantly domiciled" to describe this case (ie where someone is actually domiciled or a formerly domiciled resident).[8] The reader may think that the legislation is easier to follow without this opaque term; and, perhaps for the best, it is not used elsewhere.

5.3.2 *Scope of IHT deemed-dom*

IHT deemed-domicile applies "for the purposes of the IHTA"[9] ie for all IHT purposes, unless expressly disapplied.

There are 3 (somewhat specialist) occasions where deemed-domicile is disapplied for IHT:

Topic: cross reference
FOTRA securities: see 75.5.1; and for FOTRA reliefs, see 75.4; 75.11
Qualifying certificates of IoM/Channel Island doms: see 75.7
Double tax treaties: see 115.8.1 (Deemed domicile); 115.8.2 (Election-domicile)

The IT/CGT and IHT 15-year rules do not apply to visiting forces.[10]

5.4 IT/CGT deemed-domicile

5.4.1 *IT/CGT deemed-domicile rules*

Section 835BA(2) ITA provides:

> An individual not domiciled in the UK at a time in a tax year ("the

[8] See 50.15.1 ("Relevantly domiciled").
[9] See s.267(1) IHTA.
[10] See App 11.2.3 (Residence/domicile relief); App 11.4.2 (IHT deemed-domicile).

> relevant tax year") is to be regarded as domiciled in the UK at that time if—
>
> (a) condition A is met, or
> (b) condition B is met.

I use the following terminology:

Condition	**Term**
A	IT/CGT formerly-domiciled resident rule
B	IT/CGT 15-year rule

5.4.2 *IT/CGT formerly-dom resident rule*

Section 835BA(3) ITA provides:

> Condition A is that—
>
> (a) the individual was born in the UK,
> (b) the individual's domicile of origin was in the UK, and
> (c) the individual is resident in the UK for the relevant tax year.[11]

Statute does not coin a term for an individual who is domiciled under IT/CGT dom condition A. Instead, it uses the clumsy formula:

> regarded for the purposes of [a specified section] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met

I use the term **"formerly-domiciled resident"**[12] for IT/CGT as well as for IHT. This might be regarded as slightly loose language, because:

(1) Statute uses the term "formerly domiciled resident" only in its IHT sense.[13]

(2) The two definitions (IHT and IT/CGT) are not quite identical, as IT/CGT has no equivalent to para (d) of the IHT definition (one-year grace period).

(3) The expression "formerly-domiciled resident" is in any case a rough shorthand, because it ignores the requirement to be born in the UK. ("Born-domiciled" would be more accurate; but it is best to adopt the statutory terminology, because anything else is even more confusing).

[11] The "relevant tax year" is the tax year in which deemed domicile may apply; see 5.4.1 (IT/CGT deemed-domicile rules).

[12] For clarity I add the hyphen which is not in the statutory term.

[13] See 5.5 (IHT Formerly-domiciled resident rule).

I do not think my terminology is likely to cause confusion in practice.

So for IT/CGT, the domicile start date for a formerly-domiciled resident is 6 April in the 1st year of residence. In that year, an individual may be a formerly-domiciled resident for IT/CGT but not for IHT.

The domicile end date is 6 April in a year of non-residence, which is the same as the IHT rule.

5.4.3 *IT/CGT 15-year rule*

Section 835BA(4) ITA provides:

> Condition B is that the individual has been UK resident for at least 15 of the 20 tax years immediately preceding the relevant tax year.[14]

Section 835BA(5) ITA provides:

> But Condition B is not met if—
> (a) the individual is not UK resident for the relevant tax year, and
> (b) there is no tax year beginning after 5 April 2017 and preceding the relevant tax year in which the individual was UK resident.

At first this seems slightly different from the IHT rule, because s.835BA(5) is not an exact equivalent of s.267(1)(b)(ii). But after the wording is compared, it is clear the end result is the same, and the IHT and IT/CGT 15-year rules are equivalent.[15]

5.5 IHT formerly-domiciled resident rule

Section 267(1) IHTA provides:

> A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if ...
> (aa) he is a formerly domiciled resident for the tax year in which the relevant time falls ("the relevant tax year")

I refer to this as the **"IHT formerly-domiciled resident rule"**.

"Formerly-domiciled resident" is a label for a set of four rules. Section 272 IHTA provides:

[14] The "relevant tax year" is the tax year in which deemed domicile may apply; see 5.4.1 (IT/CGT deemed-domicile rules).

[15] See 5.13 (Deemed dom wording compared). See too 5.6.1 (15-year rule start date: Figures).

> In this Act, except where the context otherwise requires ...
> "formerly domiciled resident", in relation to a tax year, means a person—
> (a) who was born in the UK,
> (b) whose domicile of origin was in the UK,
> (c) who was resident in the UK for that tax year, and
> (d) who was resident in the UK for at least one of the two tax years immediately preceding that tax year.

I call the condition in para (d) the **"one-year grace period"**. IT/CGT does not have this requirement.[16]

The place of birth can be ascertained if necessary from the birth certificate.

The domicile start date for formerly-domiciled residents under the IHT deemed dom rule is 6 April in the 2nd year of residence.

The domicile end date for formerly-domiciled residents is 6 April in the first year of non-residence.

The rules can catch in particular:

(1) Those who (would like to) return to the UK for medical treatment of a terminal illness
(2) Short term secondees from abroad
(3) Those who make settlements when non-domiciled and subsequently return to the UK

5.5.1 *Former-dom resident: Critique*

The rule reflects an intuition that a formerly-domiciled resident is likely to have a closer connection to the UK than other UK resident non-doms. Perhaps there is also a disapproval of those losing UK domicile and subsequently becoming UK resident again, or some administrative convenience in not having to argue domicile issues in these circumstances.

However the rule can affect those whose UK connections seem quite tenuous, because:

(1) The rules which determine domicile of origin can be capricious
(2) The place of birth is to some extent a matter of chance

CIOT give this example:

> an individual:
> - born in the UK of UK domiciled but non-resident father who is in the UK for some temporary purpose

[16] See 5.4.2 (IT/CGT formerly-dom resident rule).

- taken out of the UK in infancy, grows up, lives and works abroad for the next, say, 30-40 years during which time he acquires a foreign domicile of choice;
- seconded by his employer to the UK on a short term basis

CIOT say:

> The individual will ... be treated for income tax and capital gains tax purposes in the same way as a UK domiciliary.
> This is arguably inequitable given that it is pure happenstance that the individual was born in the UK.
> The harshness of the rule is highlighted further if one compares the position with the individual's sibling who was born outside the UK and who is, therefore, not affected by the returning UK domiciliary proposal. The sibling may therefore take up temporary secondment in the UK or come to the UK to look after his/her parents without incurring the same adverse consequences as the individual.[17]

This applies for IHT and IT/CGT, though in the case of IHT the unfairness is mitigated slightly by the one-year grace period.

It seems to me that the answer to this objection is that all connecting factors used to define territorial limits to tax must be somewhat arbitrary.[18] There is no perfect solution, and to ask for one is to cry for the moon.[19]

Others may question whether the place of birth should be regarded as "pure happenstance". Compare the rule (known as birthright citizenship) that a person becomes a citizen of the place where they happen to be born. This applies even to children of short term visitors and illegal immigrants. That was formerly UK law[20] and continues to be the law in the USA[21] and some other countries.

But views may differ.

5.6 IHT 15-year rule

Section 267(1) IHTA provides:

[17] CIOT, "Response to Consultation on draft clause 43 Finance Bill 2016" (Feb 2016).

[18] See App 1.10 (Arbitrary).

[19] See 1.4.1 (Domicile as fiscal test: Critique).

[20] Until the British Nationality Act 1981.

[21] The 14th Amendment to the United States Constitution, ratified in 1868, provides: "All persons born ... in the United States, and subject to the jurisdiction thereof, are citizens of the United States ...".
Hence the phenomenon of "accidental Americans", a category which included Boris Johnson.

> A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if ...
>
> (b) he was resident in the UK—
>
> (i) for at least fifteen of the twenty tax years immediately preceding the relevant tax year,[22] and
>
> (ii) for at least one of the four tax years ending with the relevant tax year.

I refer to this as the "**IHT 15-year rule**".

The start date for acquisition of 15-year deemed domicile is 6 April in the tax year *after* the 15/20 year test is satisfied. It does not matter whether or not a person is resident in that tax year. But if the person remains non-resident, the only impact of IHT deemed-domicile is a 3 year "tail" of IHT exposure, which may not be a serious matter.

5.6.1 *15-year rule start date: Figures*

It may be useful to set out an aide memoire of when the 15-year rule begins to apply. The position is the same for IHT and IT/CGT. Assuming a continuous period of UK residence:

UK residence	**Deemed-domicile**	**UK residence**	**Deemed-domicile**
from	**start date**	**from**	**start date**
2005/06	6 April 2020	2006/07	6 April 2021
2007/08	6 April 2022	2016/17	6 April 2031
2008/09	6 April 2023	2017/18	6 April 2032
2009/10	6 April 2024	2018/19	6 April 2033
2010/11	6 April 2025	2019/20	6 April 2034
2011/12	6 April 2026	2020/21	6 April 2035
2012/13	6 April 2027	2021/22	6 April 2036
2013/14	6 April 2028	2022/23	6 April 2037
2014/15	6 April 2029	2023/24	6 April 2038
2015/16	6 April 2030	2024/25	6 April 2039
		2025/26	6 April 2040

5.6.2 *Domicile end date*

Deemed domicile under the 15-year rule ends when an individual ceases to meet *either* of the two conditions in s.267(1)(b). The conditions are:

> (b) he was resident in the UK—

[22] The "relevant tax year" is the tax year in which deemed domicile may apply; see 5.5 (IHT formerly-domiciled resident rule).

(i) for at least fifteen of the twenty tax years immediately preceding the relevant tax year, *and*

(ii) for at least one of the four tax years ending with the relevant tax year.

The condition in (b)(ii) is not met from the beginning of the individual's fourth consecutive year of non-residence (including the relevant tax year). But if the individual has not been UK resident for 15 consecutive years, then the condition in s.267(1)(b)(i) will not be satisfied. So the condition in (ii) only matters at the margin.

Take the case of an individual continually UK resident since 2004/05 who ceases to be UK resident in 2019/20:

Relevant Tax Year			**deemed dom**	**Res^{t} years / 20** ***exclude* rel year**[23]	**non-res^{t} years** ***include* rel year**[24]
1	2004/05	resident	no	0	-
2	2005/06	resident	no	1	-
3	2006/07	resident	no	2	-
4	2007/08	resident	no	3	-
5	2008/09	resident	no	4	-
6	2009/10	resident	no	5	-
7	2010/11	resident	no	6	-
8	2011/12	resident	no	7	-
9	2012/13	resident	no	8	-
10	2013/14	resident	no	9	-
11	2014/15	resident	no	10	-
12	2015/16	resident	no	11	-
13	2016/17	resident	no	12	-
14	2017/18	resident	no	13	-
15	2018/19	resident	no	14	-
16	2019/20	non-resident	yes	15	1
17	2020/21	non-resident	yes	15	2
18	2021/22	non-resident	yes	15	3
19	2022/23	non-resident	no *	15	4
20	2023/24	non-resident	no *	15	5
21	2024/25	non-resident	no *	15	6
22	2025/26	non-resident	no	14	7

[23] That is, the number of years in the last 20, not including the relevant tax year, in which the individual was UK resident.

[24] That is, the number of years, including the relevant tax year, in which the individual was continually not UK resident.

In the years marked *, ie 2022/23 to 2024/25, the fourth to sixth years of continuous non-residence, the individual escapes deemed domicile because of s.267(1)(b)(ii) (four continuous years of non-residence). If they resume UK residence, they become deemed domiciled. But in the following year, the seventh year, the individual escapes deemed domicile because of s.267(1)(b)(i) (less than 15 years UK residence over the last 20) and if they subsequently become UK resident, the 15 year period starts again from zero.

5.6.3 *"Residence" for 15-year rule*

Section 267(4) IHTA provides:

> For the purposes of this section the question whether a person was resident in the UK for any tax year shall be determined as for the purposes of income tax.

This is not needed from 2013/14, as the statutory residence test applies for IHT generally.[25]

It is, perhaps, relevant for the years from 1993 to 2013 (when the SRT took effect), but the wording was there for historical reasons only.

Prior to 1993/94, the provision concluded: "but without regard to any dwelling-house available in the UK for his use".[26] That phrase was deleted in 1993 "where the year of assessment concerned is 1993-94 or a subsequent year of assessment."[27] The pre-1993 wording would still be relevant in ascertaining the domicile of the settlor for IHT purposes, and so for excluded property status, if a settlement was made between 1975 and 2013, and residence in the period 1973-1993 is in issue.

5.7 Counting split years

A tax year for which the individual is UK resident will count in full for deemed domicile purposes, even if the year is a split year.[28]

It follows that there is a mismatch in the overseas part of a split year:

(1) For IT/CGT: Foreign income/gains arising to the individual in the

[25] See 6.3 (Scope of SRT).

[26] For a more detailed analysis, see Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (15th ed., 2016-2017) para 4.2.5 (Meaning of "residence" for 17-year rule).

[27] Section 208 FA 1993.

[28] See 10.1 (Residence throughout tax year).

overseas part of a split year are not usually taxed; deemed domicile does not prevent split-year relief applying.

(2) For IHT: Foreign situate property is chargeable (non-excluded) property even in the overseas part of the year.

But this is not the only mismatch between IHT and IT/CGT deemed-domicile rules; so perhaps it does not matter.

5.8 IHT 3-year rule

Section 267(1) IHTA provides:

> A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if—
>
> (a) he was domiciled in the UK within the three years immediately preceding the relevant time...

The 3-year rule concerns the person who is actually UK domiciled and who loses their UK domicile. The domicile start date for this rule is the date of change of domicile, and the domicile end date is 3 years after that date.

The IHT Manual gives a straightforward example:

> **IHTM13024 Change of Domicile: Deemed Domicile** [Jan 2020]
> ... **Example 1** (Paula)
> P has an English domicile and lives in England. She retires from work and decides that she wants to live for the rest of her life in Spain. She goes to Spain and takes a Spanish domicile of choice on 31 January 2007.
> She dies on 1 January 2010 still in Spain.
> Because of the deemed domicile 'three year rule' she is deemed domiciled in the UK at her death and her world wide estate is chargeable to IHT. Her estate can, of course, claim tax relief for any Inheritance Tax paid in another country.

Unlike the 15-year rule, the domicile start and end dates do not relate to tax years.

Section 267(5) IHTA provides:

> In determining for the purposes of this section whether a person is, or at any time was, domiciled in the UK, sections 267ZA and 267ZB are to be ignored.

Thus election-domicile and the 3-year rule operate independently: the loss of election-domicile does not give rise to deemed domicile under the 3-year rule.

5.9 Start/end date uncertainty

Under the 15-year rule, deemed domicile in a year (year X) can depend on:

(1) UK residence for the previous year, under s.267(1)(b)(i), which depends on facts during the previous year, and also in some cases, on facts after that year; and

(2) UK residence for the actual year (relevant tax year) under s.267(1)(b)(ii)

So on 6 April, and for some time after, an individual may not know whether they are resident, and so they will not know whether they are deemed domiciled for IHT or not. On the facts of the example set out above, the individual ceases to be UK domiciled on 6 April 2022 and may in principle safely make a gift of excluded property to a trust. But if they unexpectedly become UK resident in the year 2022/23, that turns into a chargeable transfer. So the tax cost of a return to the UK may be high.

Similar problems arise for formerly-domiciled residents, whose domicile in a year depends on UK residence for that year.

As at a domicile start or end date of 6 April, in any year, the individual will often not know whether they will be resident for the year or not, because facts which emerge during the year (or even after the year) are relevant to determine residence. So they will not know whether they are deemed domiciled or not. For IT/CGT this matters less, as tax returns are due long after the year end, by which time the position should be known. For IHT, on the other hand, the returns may be due before the relevant facts are known. Taxpayers will have to judge as best they can.

5.10 Children

5.10.1 *Child of deemed domiciliary*

The July 2015 Non-Dom paper provides:

> 20. The deemed domicile of the long term resident non-dom has no effect on the domicile status of the children, whose actual and deemed domicile position is looked at independently. Thus they will take their father's domicile under general law at the date of their birth and if they are long term residents within the new rules will become deemed domiciled here. But they do not become deemed domiciled here simply because either parent is deemed domiciled here nor do they lose deemed

> domicile just because a parent does.

Similarly, the RDRM provides:

> **RDRM25080: Deemed domicile: Other issues** [May 2020]
> Unlike domicile under common law, deemed domicile status is not passed from parent to child.

5.10.2 *Child under 18*

UK resident years count towards the 15 year total even if the individual is under the age of 18. So a child who is born in the UK and who does not have a UK domicile of origin could become deemed-domiciled before reaching adulthood. However, the child could still lose deemed-UK domiciled status if they leave the UK and spend sufficient years non-resident.

5.11 Transitional rules

Section 30(9) F(no.2)A 2017 provides:

> The amendments made by this section have effect in relation to times after 5 April 2017, subject to subsections (10) to (12).

5.11.1 *15-year rule: 2017 transition*

The July 2015 Non-Dom paper provides:

> 16.... For those who leave the UK before 6 April 2017 but would nevertheless be deemed domiciled under the 15 year rule on 6 April 2017 the present [pre-2017] rules will apply.

Accordingly, s.30(10) F(no.2)A 2017 provides:

> The amendment to section 267(1) of IHTA 1984 made by subsection (1)(c) does not have effect in relation to a person if—
> (a) the person is not resident in the UK for the relevant tax year, and
> (b) there is no tax year beginning after 5 April 2017 and preceding the relevant tax year in which the person was resident in the UK.
>
> In this subsection "relevant tax year" is to be construed in accordance with section 267(1) of IHTA 1984 as amended by subsection (1).[29]

Undoing the 2017 amendments, s.267(1)(b) IHTA reverts to its pre-2017

[29] The "relevant tax year" is the tax year in which deemed domicile may apply; see 5.5 (IHT formerly-domiciled resident rule).

form (a 17-year rule):

> A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if ...
>
> (b) he was resident in the UK in not less than seventeen of the twenty years of assessment ending with the year of assessment in which the relevant time falls.

Section 30(11) F(no.2)A 2017 provides:

> The amendment to section 267(1) of IHTA 1984 made by subsection (1)(c) also does not have effect in determining—
>
> (a) whether settled property which became comprised in the settlement on or before that date is excluded property for the purposes of IHTA 1984;
>
> (b) the settlor's domicile for the purposes of section 65(8) of that Act in relation to settled property which became comprised in the settlement on or before that date;
>
> (c) whether, for the purpose of section 65(8) of that Act, the condition in section 82(3) of that Act is satisfied in relation to such settled property.

Although there is no grandfathering, the 15-year rule is not retrospective in that it does not impact on past actions taken. For example, suppose a trust was made in January 2017, by a settlor who

(1) was not deemed domiciled under either the then 17-year rule or the 3-year rule, but

(2) would be deemed domiciled under the current 15-year rule.

The trust continues to have excluded property status after 5 April 2017.

CIOT lobbied for transitional relief for individuals who:

(1) left the UK before they became deemed-domiciled for IHT under the former 17-year rule and

(2) subsequently returned to the UK:

> a non-UK domiciliary who had been in the UK for many years, then left prior to 2011/12 and returned just after 2014/15 would have stayed for four complete tax years out of the UK. On their return he/she would have reasonably expected to be able to complete another 17 years in the UK before the current IHT deemed domicile 17/20 year test would have caught them again. It is not unreasonable for 17 years to be shortened to 15 years for such a case. However, it is unreasonable for the period to be shortened to zero years, because they will be become immediately

> deemed domicile again on 6 April 2017.[30]

However no relief is given for this case, so on these facts the individual would become deemed domiciled on 6 April 2017.

5.11.2 *Former-dom: 2017 transition*

There is no transitional relief for formerly-domiciled residents. The July 2015 Non-Dom paper provides:

> 29. This measure will affect all returning UK doms from 6 April 2017, including those who returned prior to April 2017. The five year rule will affect UK doms leaving after 5 April 2017. It will also affect trusts set up while such individuals were not UK domiciled if they are UK resident on or after 6 April 2017. In these circumstances, an individual will be taxed on all income and gains arising in such trusts under the same rules as any other UK domiciliary. The IHT treatment of such trusts will also be the same as for UK taxpayers who have never lost a UK domicile.

5.11.3 *Pre-2015 temporary non resident: CGT*

ICAEW raised a problematic interaction with the temporary non-UK residence rules:

> On 2 January 2015, prior to the announcement, an individual, who would have met the “15 out of 20” rule if it had been in force, left the UK on a three year secondment.
>
> Between January and June 2015 she made various disposals of foreign assets at very significant gains with the expectation that when she returned she would pay the £90,000 Remittance Basis Charge and not have to pay tax on the gains (as there would not be any remittances).
>
> Without a transitional provision the changes mean that she will not be able to access the remittance basis when she returns to the UK, so she will have a very significant CGT liability.[31]

The 2016 policy paper accepted the point:

> The part of the measure affecting capital gains tax in respect of foreign chargeable gains accruing to temporary non-residents will not affect accruals arising in respect of periods of temporary non-residence beginning on or before 7 July.

[30] CIOT, “Response to Consultation on draft clause 43 Finance Bill 2016” (Feb 2016).

[31] Taxguide 04/15.

Accordingly, para 16 sch 8 F(no.2)A 2017 provides:

> (1) This paragraph applies in a case where section 10A of TCGA 1992 as substituted by paragraph 119 of Schedule 45 to FA 2013 applies in relation to an individual.
> (2) For the purposes of capital gains tax in respect of foreign chargeable gains accruing to the individual during a temporary period of non-residence beginning before 8 July 2015, the amendment made by paragraph 14(2) does not have effect in relation to the tax year which consists of or includes the period of return.
> (3) Where by virtue of sub-paragraph (2) an individual makes a claim under section 809B of ITA 2007 for any of the tax years 2017–18 to 2020–21 inclusive, sections 809C, 809G and 809H of ITA 2007 do not apply to the individual for that tax year.
> (4) In this paragraph, "foreign chargeable gain" has the meaning given by section 12(4) of TCGA 1992.
> (5) Part 4 of Schedule 45 to FA 2013 explains what "temporary period of non-residence" and "period of return" mean.

Para 15 contains the same rule for pre-2013 departures; that is needed as they have a separate code.

This only refers to gains. It does not apply to *income* accruing in the period of temporary non-residence. For employment income, the 2016 consultation paper provides:

> Some stakeholders sought clarification of the tax treatment which would apply where an individual who is subject to the remittance basis receives employment income relating to a period when they were not deemed-domiciled under the 15 out of 20 rule but is paid after they become deemed-domiciled... the government can confirm that such income will be taxable only to the extent that it is remitted to the UK. This is in line with the current treatment, which currently applies to deferred payments made after an individual ceases to be taxed on the remittance basis.

5.11.4 *1974 transitional rules*

Section 267(3) IHTA contains five transitional rules:

> Para (a) of subsection (1) above shall not apply in relation to a person who (apart from this section) has not been domiciled in the UK at any time since 9th December 1974 ...

This disapplies the 3-year rule only. It would only apply in a relatively rare case of someone who was actually UK domiciled and ceased to be so before 9 December 1974.

> and para (b) of that subsection shall not apply in relation to a person who has not been resident there at any time since that date ...

This only disapplies the former 17-year rule. It would apply to someone who had been UK resident for 17-years and ceased to be so before 9 December 1974.

> and that subsection shall be disregarded—
> (a) in determining whether settled property which became comprised in the settlement on or before that date is excluded property,

This applies to pre-9 December 1974 settlements.

> that subsection shall be disregarded— ...
> (b) in determining the settlor's domicile for the purposes of section 65(8) above in relation to settled property which became comprised in the settlement on or before that date, and
> (c) in determining for the purpose of section 65(8) above whether the condition in section 82(3) above is satisfied in relation to such settled property.

This applies to the exemption for FOTRA securities.

These transitional reliefs are preserved by the 2017 reforms. Section 30(12) F(no.2)A 2017 provides:

> Despite subsection (2), section 267(1) of IHTA 1984, as originally enacted, shall continue to be disregarded in determining—
> (a) whether settled property which became comprised in the settlement on or before 9 December 1974 is excluded property for the purposes of IHTA 1984;
> (b) the settlor's domicile for the purposes of section 65(8) of that Act in relation to settled property which became comprised in the settlement on or before that date;
> (c) whether, for the purpose of section 65(8) of that Act, the condition in section 82(3) of that Act is satisfied in relation to such settled property.

5.12 Deemed domicile: Planning

5.12.1 *Anticipating deemed domicile*

There is scope for planning in anticipation of acquisition of deemed domicile. For a summary see 13.10 (Pre-deemed-domicile planning)..

A person ("H") with a UK place of birth and domicile of origin may be married to a person ("W") who was not born in the UK, or who did not have a UK domicile of origin. If H and W become UK resident, then H will be deemed domiciled as a formerly-domiciled resident; and W will not. In that case the tax issues can be resolved by a transfer from H to W (and a transfer from a settlement made by H to W). This should be considered before H and W become UK resident.

5.12.2 *Losing deemed domicile*

An individual who is deemed domiciled because of:

(1) a domicile election; or

(2) 15 years UK residence

will lose deemed domicile status for IHT after 3 or 4 non-resident years. A formerly-domiciled resident ceases to be UK domiciled on non-residence.

For such individuals, a simple form of IHT planning is to refrain from making any gifts until they have ceased to be deemed domiciled.

5.13 Deemed dom wording compared

The text of IT/CGT and IHT deemed domicile rules does not sit side by side altogether neatly, because the wording is not always closely aligned. But it may be helpful to try:

s.835BA ITA	**s.267 & 272 IHTA**
(1) This section has effect for the purposes of the provisions of the Income Tax Acts or TCGA 1992 which apply this section.	**s.267(1)** A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if—
[No equivalent]	(a) he was domiciled in the UK within the three years immediately preceding the relevant time,
(2) An individual not domiciled in the UK at a time in a tax year ("the relevant tax year") is to be regarded as domiciled in the UK at that time if— (a) condition A is met, or (b) condition B is met.	

(3) Condition A is that—	(aa) he is a formerly domiciled resident for the tax year in which the relevant time falls ("the relevant tax year"), or
	s.272 "formerly domiciled resident", in relation to a tax year, means a person—
(a) the individual was born in the UK,	(a) who was born in the UK,
(b) the individual's domicile of origin was in the UK, and	(b) whose domicile of origin was in the UK,
(c) the individual is UK resident for the relevant tax year.	(c) who was resident in the UK for that tax year, and
[No equivalent to para (d)]	(d) who was resident in the UK for at least one of the two tax years immediately preceding that tax year;
(4) Condition B is that the individual has been UK resident for at least 15 of the 20 tax years immediately preceding the relevant tax year.	**s.267(1)** (b) he was resident in the UK— (i) for at least fifteen of the twenty tax years immediately preceding the relevant tax year, and
(5) But Condition B is not met if— (a) the individual is not UK resident for the relevant tax year, and (b) there is no tax year beginning after 5 April 2017 and preceding the relevant tax year in which the individual was UK resident.	(b) he was resident in the UK ... (ii) for at least one of the four tax years ending with the relevant tax year.

Lastly, for completeness, s.267 has four further subsections which have no IT/CGCT equivalent because that is not needed:

> (2) Subsection (1) above shall not apply for the purposes of section 6(2) or (3) or 48(4) above and shall not affect the interpretation of any such provision as is mentioned in section 158(6) above.
> (3) Paragraph (a) of subsection (1) above shall not apply in relation to a person who (apart from this section) has not been domiciled in the UK at any time since 9th December 1974, and paragraph (b) of that subsection shall not apply in relation to a person who has not been resident there at any time since that date; and that subsection shall be disregarded—
> (a) in determining whether settled property which became comprised in the settlement on or before that date is excluded property,
> (b) in determining the settlor's domicile for the purposes of section

65(8) above in relation to settled property which became comprised in the settlement on or before that date, and

(c) in determining for the purpose of section 65(8) above whether the condition in section 82(3) above is satisfied in relation to such settled property.

(4) For the purposes of this section the question whether a person was resident in the UK for any tax year shall be determined as for the purposes of income tax

(5) In determining for the purposes of this section whether a person is, or at any time was, domiciled in the UK, sections 267ZA and 267ZB are to be ignored.

5.14 Election-domicile

5.14.1 *Navigation*

The legislation is slotted in after s.267 and before s.267A, so the two sections are numbered s.267ZA and s.267ZB.[32] The drafting is as abstruse as the numbering.

There are essentially two parties involved here, and I call them H (the donor) and W (the non-dom donee). My terminology embodies a gender assumption, which the drafter of the statute rightly avoids, namely that *H* (the donor) makes a gift to *W* (the donee). But in the statutory provision "person" sometimes refers to one spouse[33] and sometimes the other, and discussion is easier to follow if this is glossed with H or W, as the case may be. The reader may grasp at any aid to navigation.

The spur to the provisions was EC infringement proceedings, and their development can be traced through an HMRC Technical Note[34] but that is now of historical interest only.

5.14.2 *Right to elect UK domicile*

Lifetime election s.267ZA(1) IHTA	**Death election s.267ZA(2) IHTA**
A person [W, the non-dom donee] may, if condition A or B is met, elect	A person's personal representatives [W's PRs] may, if condition B is met, elect for the person [W]

[32] See App.13.3 (Section numbering system).

[33] I use the word "spouse" to include a civil partner.

[34] HMRC, "IHT: spouses and civil partners domiciled outside the UK" (2012) *http://webarchive.nationalarchives.gov.uk/20130102183002/http://www.hmrc.gov.uk/budget-updates/11dec12/784.pdf*

to be treated for the purposes of this Act as domiciled in the UK (and not elsewhere).	to be treated for the purposes of this Act as domiciled in the UK (and not elsewhere).

I coin the following terminology:

Term	**Meaning**
Election-domicile	IHT deemed-domicile under s.267ZA
Domicile election	Election under s.267ZA
Election conditions A & B	The conditions in s.267ZA

The point of making a domicile election is to qualify for the unrestricted IHT spouse exemption[35] and the GWR spouse exemption.[36] Election-domicile only applies for IHT, not for IT/CGT.

5.14.3 *Election conditions A & B*

Lifetime of W : Condition A **s.267ZA(3) IHTA**	***Death of W: Condition B*** **s.267ZA(4) IHTA**
Condition A is that,	Condition B is that
	[A] a person ("the deceased") [H, the donor] dies and,
at any time [a] on or after 6 April 2013 and [b] during the period of 7 years ending with the date on which the election is made,	[B] at any time [i] on or after 6 April 2013 and [ii] within the period of 7 years ending with the date of death,
the person [W, the non-dom donee] had a spouse or civil partner [H, the donor] who was	the deceased [H, the donor] was—
domiciled in the UK.	(a) domiciled in the UK, and
	(b) the spouse or civil partner of the person [W, the non-dom donee] who would, by virtue of the election, be treated as domiciled in the UK.

[35] See 93.2 (Restricted IHT spouse exemption for non-dom spouse).
[36] See 78.10 (GWR spouse exemption).

The election conditions are in short that H (the donor) is or was UK domiciled or deemed domiciled. But in practice W (the non-dom donee) or her PRs will only consider a domicile election if:

(1) H has made (or intends to make) a gift to W.
(2) The IHT spouse/GWR exemptions are not available because at the date of the gift:
    (a) H is UK domiciled or deemed-domiciled.
    (b) W is not UK domiciled or deemed-domiciled.
(3) The gift would or might otherwise give rise to IHT because:
    (a) It was chargeable gift, ie it was:
        (i) made on the death of H (the donor) or
        (ii) a failed PET (H has died within 7 years of the gift) or
        (iii) a failed PET is anticipated (H still living but may not survive 7 years) or
    (b) H would be chargeable on his death under the GWR rules.

In the following discussion, it is assumed that this is the case. These are the scenarios where the domicile election is important.[37]

5.14.4 *Lifetime/death election*

Section 267ZB(1) IHTA defines these terms:

> For the purposes of this section–
> (a) references to a lifetime election are to an election made by virtue of section 267ZA(3) [Condition A, election by W, the non-dom donee], and
> (b) references to a death election are to an election made by virtue of section 267ZA(4) [Condition B, election by W's PRs].

A *lifetime* election (s.267ZA(3)) is made by W so W must be alive at the time of the election. H (the donor) may be alive or dead at the time of a lifetime election.

A *death* election (s.267ZA(4)) is made by W's PRs, so W must have died at the time of a death election. H must also have died in order to make a death election. The term "PR's election" would have been better than "death election", but it is easier to stick to the statutory term as anything else is even more confusing.

Summarising in a table:

[37] See 93.2 (Restricted IHT spouse exemption).

W(non-dom donee)	H (donor)	Election	Which condition met
Alive	Alive	Lifetime election	A
Alive	Dead	Lifetime election	A
Dead	Alive	No election possible until H dies[38]	
Dead	Dead	Death election	B

5.14.5 *Conditions A/B: 7 year periods*

Election conditions A and B refer to distinct periods, thus:

Condition	Period
Condition A	7 years ending with date on which the election is made
Condition B	7 years ending with date of death of H (the donor)

I refer to these as the "**7-year periods**".

5.14.6 *Election-domicile start date*

It is necessary to distinguish:
(1) The date that the domicile election is *made*
(2) The date that the domicile election *takes effect*; this is earlier, and will be election-domicile start date.

The starting point is that W (the non-dom donee), or her PRs, can choose the date from which the domicile election takes effect. Section 267ZB(3) IHTA provides:

> A lifetime or death election is treated as having taken effect on a date specified, in accordance with subsection (4), in the notice.

Then s.267ZB(4) IHTA goes on to impose a number of restrictions on that freedom of choice. Firstly:

> (4) The date specified in a notice under subsection (3) must—
> (a) be 6 April 2013 or a later date

The earliest date that a domicile election can take effect is 6 April 2013. That is the effective commencement date of the election-domicile regime. That will not normally matter now, as pre-2013 PETs must have become exempt.[39]

[38] It does not seem logical that if W dies survived by H, no election can be made until H dies. Could it be that an election could be made under s.267ZA(3) by W's PRs?

[39] The issue could still arise where:
(1) H made a gift to W before 2013.

Section 267ZB IHTA continues:

> (4) The date specified in a notice under subsection (3) must ...
> (b) be within the period of 7 years ending with—
> (i) in the case of a lifetime election [condition A], the date on which the election is made, or
> (ii) in the case of a death election [condition B], the date of the deceased's death ...

In the case of a lifetime election the election must take effect (and election-domicile begins) within 7 years of the election.

If H (the donor) makes a gift to W (the non-dom donee), and the gift is a PET, there is a choice:

(1) W could elect immediately.
(2) W could wait and see. If H died (or was expected to die) then an election could be made later:
  (a) If H survived 7 years then an election would not be needed.[40]
  (b) If H died within the 7-year period, W could make an election after the death of H.

This allows W to consider the advantages and disadvantages of the election in the light of the circumstances at the time. For instance, if H survived more than 3 years from H's gift, then W's election decision could take into account IHT taper relief.

Section 267ZB IHTA provides:

> (4) The date specified in a notice under subsection (3) must—
> (c) meet the condition in subsection (5).

So we turn to s.267ZB(5) IHTA:

> The condition in this subsection is met by a date if, on the date—
> (a) in the case of a lifetime election—
> (i) the person making the election [W, the non-dom donee] was married to, or in a civil partnership with, the spouse or civil partner, and
> (ii) the spouse or civil partner was domiciled in the UK, or

(2) The gift was a gift with reservation of benefit.
(3) H dies and there is a charge under the GWR rules.

In practice that will not often happen (and if it does, the GWR may often be overlooked).

[40] Unless there is a GWR.

> (b) in the case of a death election—
> (i) the person who is, by virtue of the election, to be treated as domiciled in the UK [W, the non-dom donee) was married to, or in a civil partnership with, the deceased, and
> (ii) the deceased was domiciled in the UK.

In short, H (the donor) must be UK domiciled when the domicile election takes effect, but that does not matter as in practice the election is only wanted in those circumstances.

If H (the donor) has become UK domiciled, W may still make an election to cover an earlier period when H was non-UK domiciled.

The IHT Manual correctly provides:

> **IHTM13046: election by non-UK domiciled spouse or civil partner: the date the election takes effect** [Jan 2020]
> The person making the election does not need to be married or in a civil partnership when the election is made

Individuals who divorce may make an election to cover the period they were married.

5.14.7 *Election-domicile end date*

IHT deemed-domicile is advantageous from the point of view of allowing the unrestricted IHT spouse exemption; but of course it has the drawback that IHT may become due on the death of W (the non-dom donee) and on gifts and trusts made by her. How much that matters depends of course on the facts of the case. It may be a serious drawback; it may not. The point of the election is to allow W (the non-dom donee) to weigh the advantages and disadvantages.

Section 267ZB(9) IHTA provides:

> A lifetime or death election cannot be revoked.

There is one escape from election-domicile once an election is made: non-residence. Section 267ZB(10) IHTA provides:

> If a person who made an election under section 267ZA(1) [W, the non-dom donee] is not resident in the UK for the purposes of income tax for a period of four successive tax years beginning at any time after the election is made, the election ceases to have effect at the end of that period.

So the election-domicile end date is 5th April in the 4th non-resident year; four years non-residence effectively breaks the connection with the UK, and IHT liability then ceases for foreign situate assets.[41]

The IHT Manual provides:

> **IHTM13049: election by non-UK domiciled spouse or civil partner: election ceasing to have effect** [Jan 2020]
> ...This approach is in line with the position where a taxpayer is deemed domiciled in the UK under IHTA84/S267(1)(b). To shake off that deemed domicile, they need to be resident outside the UK for four years.

In fact the rules are not aligned. The election-domicile end date is 5th April in the 4th *successive* tax year of non-residence; under the 3 year rule, the deemed-domicile end date is at the end of the 4th year of non-residence. The requirement to lose s.267 deemed IHT domicile under the 15-year rule is to be non-resident for 4 tax years, but the non-resident years need not be successive and the deemed domicile end date is the start of the fourth year of non-residence.[42]

5.14.8 *Time limit for election*

There is no express time limit for a lifetime election. However since the election can only take effect within the 7-year period up to the election, there is an effective time limit of 7 years:

(1) from the date of the gift, in the case of a lifetime election
(2) from the date of the death of H (the donor) in the case of a death election.[43]

Section 267ZB(6) IHTA provides:

> A death election [by W's PRs] may only be made within 2 years of the death of the deceased [W][44] or such longer period as an officer of Revenue and Customs may in the particular case allow.

CIOT complained that the rule was not EU-law compliant, but the EC did not pursue the matter, and post-Brexit the point is not likely to arise.

[41] Assuming W (the non-dom donee) is not then deemed IHT domiciled under s.267 IHTA, or actually UK domiciled.

[42] See 5.6.2 (Domicile end date).

[43] See 5.14.3 (Spouse-election condition B).

[44] I think "the deceased" refers to W (the non-dom donee) and not to H (the donor) (though in the case of a death election, H has also died).

5.14.9 *Planning*

The IHT Manual provides some IHT planning advice:

> **IHTM13047 election by non-UK domiciled spouse or civil partner: consequences of making an election** [Jan 2020]
> When an election is made, the person making the election will be treated as domiciled in the UK for all IHT purposes from the date stated in the election. Consequently, any transfers between spouses or civil partners made after that date qualify for full spouse or civil partner exemption. Whether to make an election and the date it is take effect from will require careful consideration as it could mean that a transfer that did not give rise to a charge at the time is was made, proves to be chargeable.
> **Example** (David and Birgit) ("H" and "W")
> H, who is domiciled in the UK transfers property worth £1m in 2014 to his spouse, W who is not domiciled in the UK.
> Subsequently, in 2016, W transfers some German shares to the trustees of an offshore[45] trust.
> H dies in 2019.

The HMRC analysis is as follows:

> At the time of H's transfer, the value transferred is exempt to the extent of £325,000 and a PET to the extent of £675,000. Following his death, the failed PET is chargeable and after deducting the nil-rate band, £350,000 is subject to tax.[46]
> W's transfer was a transfer of excluded property, IHTA84/S6(1). Following H's death, W has the choice of electing to be treated as domiciled in the UK. If she does so, the gift from H in 2014 will become fully exempt as a transfer where both spouses are domiciled in the UK. However, W will then be treated as domiciled in the UK from 2014 for all IHT purposes. This means that her transfer to the trustees is no longer one of excluded property and will be subject to IHT. As a transfer to a trust, it will be immediately chargeable to tax.
> W will need to consider all the consequences of making an election...

W (or her advisers) will indeed have much to consider. Firstly, if she elects and falls within the scope of IHT, what will be the IHT on her

[45] Author's footnote: The residence of the trust is not relevant to the example.

[46] Author's footnote: It is assumed that H has not made earlier gifts which would reduce the IHT spouse exemption. Some taper relief is available as H survived 5 years from the date of the gift.

death? Will she be non-resident for 4 years, so as to lose election-domicile status?

The example assumes that W did not have to consider the position until the death of H in 2019. But if she is non-resident, she should consider the issue in 2014 when the gift was made. If she had made an election then, and was non-resident, her election-domicile would expire in 2018; by waiting until 2019, she extends the period during which she is at risk of IHT on her death.

In fact, if W is non-resident, she should consider the position before H makes the gift. If W had made the domicile election in 2013, then the gift made in 2016 would be exempt, and election-domicile would expire in 2017. Even if W is in good health, insurance against the risk of death would be cheaper if the election is made sooner rather than later.

5.14.10 *Procedure for making election*

Section 267ZB(2) IHTA provides:

> A lifetime or death election is to be made by notice in writing to HMRC.

There is no prescribed form. The IHT Manual provides:

> **IHTM13043: election by non-UK domiciled spouse or civil partner: how to make an election** [Jan 2020]
> An election must be made by notice in writing and sent to HMRC. It must be made by the person who is not domiciled in the UK. There is no prescribed form of election, but for HMRC to keep meaningful records it must contain:
> - the full name and address of the person making the election, or for whom the personal representatives are making an election,
> - their date of birth and, if appropriate, their date of death,
> - the full name of their spouse or civil partner who is domiciled in the UK, and
> - the date the election is to take effect from.
>
> If you receive an election that does not contain all of the information we need you should write to the sender, using standard letter SL16, to ask for the missing information. The election should be sent to:
> WMBC Assets Risk Team (Elections), Inheritance Tax, HM Revenue and Customs, BX9 1HT.

5.14.11 *IHT payment/return dates*

A retrospective election could mean that gifts and trusts made by W (the non-dom donee) become retrospectively chargeable. This requires some tinkering with the rules relating to time limits and interest. Section 267ZB IHTA provides:

> (7) Subsection (8) applies if—
> (a) a lifetime or death election is made,
> (b) a disposition is made, or another event occurs, during the period beginning with the time when the election is treated by virtue of subsection (3) as having taken effect and ending at the time when the election is made, and
> (c) the effect of the election being treated as having taken effect at that time is that the disposition or event gives rise to a transfer of value.
>
> (8) This Act applies with the following modifications in relation to the transfer of value—
> (a) subsections (1) and (6)(c) of section 216 [date for payment of IHT][47] have effect as if the period specified in subsection (6)(c) of that section were the period of 12 months from the end of the month in which the election is made, and
> (b) sections 226 and 233 [interest on unpaid tax] have effect as if the transfer were made at the time when the election is made.

5.14.12 *Informing PRs of election*

The IHT Manual provides:

> **IHTM13045: election by non-UK domiciled spouse or civil partner: disclosure about elections** [Jan 2020]
> If a person who has made an election has died, it is possible that their personal representatives may want to know whether or not a lifetime election had been made. This is because it could have a significant impact on the tax liability that arises following their death. If they cannot trace any information amongst the deceased's papers, they may phone the Helpline to find out if we have any record of an election.
> You may not disclose any information about the existence of an election over the phone. Instead, you should ask the executors to make their request in writing and provide evidence that they are the people entitled to apply for a grant of representation.
> If the executors can demonstrate that they are appointed by sending us a copy of the Will, you can disclose whether or not the person has made an election and the date that the election took effect. You can also disclose this information to administrators, provided they can

[47] See 125.5 (Reporting: Standard estate).

> demonstrate that they are applying for letters of administration, or that they are entitled to apply. You should refer any case of doubt to Technical.

5.14.13 *Election domicile: Critique*

I wonder if this was fully worked out at the time when the legislation was enacted. Probably not.[48]

Election-domicile was introduced in order to comply with EU law, and post-Brexit, there is much to be said for abolishing it: that would be a simplification.

5.15 Channel Islands/IoM Domicile

The law discussed in this section is of historical interest only, but there are territorial policy issues here which continue to resound.

Section 45(1)(c) FA 1975 formerly provided a person was deemed domiciled for IHT purposes if:

> *[i] he has, since 10th December 1974, become and has remained domiciled in the Islands*[49] *and,*
> *[ii] immediately before becoming domiciled there, he was domiciled in the UK.*

This was unlike other types of deemed domicile in that it would continue without limit of time.

The rule was repealed by s.12 F(no.2)A 1983:

> (1) Section 45(1)(c) of the FA 1975 (which treats certain persons who have become domiciled in the Channel Islands or in the Isle of Man as domiciled in the UK) shall cease to have effect.
> (2) This section has effect in relation to transfers of value made, and other events occurring, on or after 15th March 1983.

The repeal extends to the taxation (from 1983) of a settlement made by an

[48] One's confidence is slightly dented by s.267ZA(8) IHTA which provides:

> In determining for the purposes of this section whether a person making an election under this section is or was domiciled in the UK, section 267 is to be ignored.

This is otiose as the domicile of the person making the election (in my terminology, W, the non-dom donee) is not relevant. The provision made sense under the original Finance Bill clauses, but lost its purpose when the provisions were amended at committee stage.

[49] Section 45(3) FA 1975 provided: "In this section "the Islands" means the Channel Islands and the Isle of Man."

Islander who was deemed domiciled under the former s.45(1)(c): the former deemed domicile of the settlor is now disregarded so the trust property may now be excluded property.

John Moore (then Economic Secretary to the Treasury) explained the reason for the repeal:

> The original justification for the [deemed domicile] rule applying to emigrants to the offshore islands was that they were thought to provide particularly convenient bases for those who wished to maintain some contact with the mainland. Morever, at the time when the rule was introduced the islands were within the exchange control area. It was thus easier to shift property there than elsewhere abroad. The rule has been strongly resented in the islands as being discriminatory. The removal of exchange control restrictions has deprived one of the main arguments in support of the special rule of its force.[50]

Although not mentioned, I wonder if enforceability issues also affected the decision. EU-law compliance was probably not given consideration in 1983 as the issues only emerged subsequently.

5.16 International comparisons

Short summary descriptions of foreign tax laws are bound to mislead. Nevertheless the following quote is of interest as it illustrates how foreign jurisdictions have, unsurprisingly, also struggled with the policy issues underlying deemed domicile rules:

> Last year, Japanese inheritance tax rules were amended such that, where a foreign national had lived in Japan for 10 years (in the aggregate) out of the last 15, died outside of Japan, the foreigner national's heirs would be subject to Japanese inheritance tax on such foreign national's assets located both in Japan and elsewhere (a similar rule also applies for gift tax purposes).
>
> The above rule resulted in a situation where the heirs of a foreign national who had left Japan would potentially be subject to Japanese inheritance tax on the foreign national's worldwide assets for up to five years after such foreign national had left Japan. The fact that Japanese inheritance tax could "follow" a foreign national for up to five years after such person had left Japan caused great concern among Japan's

[50] Hansard HC Deb 14 July 1983 vol 45 cc1055-9, *https://hansard.parliament.uk/Commons/1983-07-14/debates/429c3b2a-86ac-44e2-9410-bcf3b71b3d7a/Domicile*

> expatriate community, and threatened to derail the Japanese government's efforts at attracting successful foreign talent to live and work in Japan.
> In this year's tax reform, the Japanese government indicates that it will abolish the above rule applying to foreign nationals, subject to a certain anti-avoidance countermeasures in the context of gift tax... This change to the inheritance tax provisions should aid Japan in its efforts to show Japan to be an attractive location for successful foreign executives to reside long term.

5.17 Deemed domicile mistakes

In (at least) two cases the Courts have set aside a gift to a trust overlooking the settlor's deemed domicile (and so based on a mistaken view of the IHT consequences).[51] Given the right facts, the case for setting aside the gift seems clear.

The following topics are considered elsewhere:
App 10.1 (Parliamentarians)

6.1 Concepts of residence

This main topic of this chapter is the definition of residence of individuals for UK tax. This is known as the statutory residence test (**"SRT"**).[1]

I also discuss the definition of Scottish/Welsh taxpayers.

It aids clarity of thought to distinguish between:

(1) A person's *residence for tax purposes*, which is a status, and requires a nexus between a person and a territory; and

(2) A person's residence in the sense of *home* or *dwelling*, which is an item of property, and requires a nexus between a person and that property[2]

I use the terms *tax-residence* (or territory-residence) and *private residence* (or dwelling/residential property). Both terms should be seen in the context of a cluster of synonyms and related concepts:

Concepts of territory-residence:

Concept	***Relevant for***	***See para***
Tax-residence:	Most taxes	
for individuals (SRT)		*See this chapter*
for trusts		7.1
for companies		8.1
Treaty-residence	DTAs	9.1
Jurisdiction-residence[3]	Situs/private international law	102.14.2
Domicile-residence	Domicile	4.6
Ordinary residence	NICs and others	6.38.3
Habitual residence	International law	46.12.6
Habitual abode in state	Treaty-residence	9.14
Usual place of abode outside UK	Withholding tax	26.11

[1] This is the statutory term. Para 1(2) sch 45 FA 2013 provides: The rules are referred to collectively as "the statutory residence test".

[2] Though of course there is some overlap, as the location of a private residence is relevant to territory-residence.

[3] One might perhaps use the term "common-law residence" to describe what I refer to as jurisdiction-residence and domicile-residence.

Usual place of residence in country	VAT	26.22.5
Normally lives/lived in country	Employment-related loan	40.5.1
Permanent home in state	Double Tax Treaties	9.12
Place to live in UK	Accommodation tie	6.29.1
Place of residence in UK	Scottish/Welsh taxpayer	6.43.5
SDLT residence test	SDLT non-resident surcharge	98.43
CRS-residence	CRS	130.31
MLR-residence	Trust registration (TRS)	131.4.2

Concepts similar to private residence:

Concept	***Relevant for***	***See para***
[Private] residence	CGT private residence relief	59.2
Dwelling/Residential property	CGT/SDLT/ATED/IHT	App 2.22
Living accommodation	Accommodation tie/benefits in kind	6.29.1; 39.8
Home	Many purposes	6.20
Usual residential address	TRS	131.23.2

Tax law is not economical with its concepts; or at least, with its terminology, because different words do not necessarily entail different concepts. Such is the patchwork nature of taxation.

Generally a person is tax-resident (or not) for all tax purposes, but occasionally a person may be tax-resident for some purpose but not for others.[4]

The question may also arise which of two competing territories is the chief territory-residence; and which of two competing private residences is the main private residence.[5]

6.2 History and guidance

HMRC guidance is in the RDRM.[6]

For completeness there are also:

(1) RDR3[7] (post-2019 version): this is now short, entry-level guidance.

[4] See 56.6.4 (CGT/CT charge: UK residents).

[5] See 4.11.3 (Which is chief residence); 59.7 (Which is main residence).

[6] Historical note: From 2013-2019, HMRC guidance was in RDR3. The text moved to the RDRM in 2019. I discussed this change in earlier editions, but omit that now as it is of historical interest only.

[7] HMRC, "RDR3: Statutory Residence Test (SRT) notes" *https://www.gov.uk/government/publications/rdr3-statutory-residence-test-srt/guidance-note-for-statutory-residence-test-srt-rdr3*

(2) A general guide (RDR1)[8] covering residence and domicile and their tax implications. In any attempt to address these vast topics in 88 pages, oversimplification and omission is inevitable. RDR1 is entry-level guidance, aimed at the non-professional reader.[9]
(2) An online Tax Residence Indicator.[10] I suspect that this is also aimed at the non-professional user and practitioners will not usually find it useful.

The development of the SRT can be traced through 3 HMRC papers:
(1) Consultation paper[11]
(2) Response to consultation[12]
(3) A further response paper[13]

These are now of historical interest only.

6.3 Scope of SRT

Para 1 sch 45 FA 2013 provides:

> (1) This Part of this Schedule sets out the rules for determining for the purposes of relevant tax whether individuals are resident or not resident in the UK....
> (4) "Relevant tax" means-

[8] HMRC "Guidance Note: Residence, Domicile and the Remittance Basis" *https://www.gov.uk/government/publications/residence-domicile-and-remittance-basis-rules-uk-tax-liability*

[9] Gordon gave this a poor review in *Taxation Magazine*, 24 October 2013, p.5: "The new RDR1 goes so far out of its way to avoid making any promises that a taxpayer could rely on, that it puts caveats on propositions that are actually provided for by the statute. ... RDR1 will be an inadequate guide for anyone wishing to determine their residence status, whereas anyone who does rely on it will risk being misled."

[10] *https://www.gov.uk/government/collections/hmrc-calculators-and-tools*

[11] HM Treasury/HMRC, "Statutory Definition of Tax Residence" (2011) *http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf*

[12] HM Treasury/HMRC, "Statutory definition of tax residence and reform of ordinary residence: a summary of responses" (2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf*

[13] HM Treasury, "Statutory definition of tax residence and reform of ordinary residence: summary of responses to the June 2012 consultation" (2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult_responses_statutory_definitions_of_tax_residence_reform_of_ordinary_residence_responses.pdf*

(a) income tax,
(b) capital gains tax, and
(c) (so far as the residence status of individuals is relevant to them) inheritance tax and corporation tax.

In para (c), the words in brackets are not strictly needed, but they recognise the fact that (unlike IT/CGT) the residence of individuals is less important to IHT/CT. However, there are circumstances where the residence status of an individual is relevant to IHT; the most important is deemed domicile. But are there any circumstances where the residence status of an individual is relevant to CT? I cannot think of any.

The SRT does not apply for VAT[14] or NIC[15].

Para 1(3) sch 45 FA 2013 provides:

> The rules do not apply in determining for the purposes of relevant tax whether individuals are resident or not resident in England, Wales, Scotland or Northern Ireland specifically (rather than in the UK as a whole).

But it is a very rare case where that matters.

The SRT does not apply in determining whether an individual is resident in a foreign state, but that does not often matter for UK tax.[16]

In cases where the SRT does not apply, the common law residence test still applies,[17] but I expect that the SRT will be influential. That would be

[14] See 26.22.5 (Usual place of residence).

[15] See 46.12 (Residence and ordinary residence).

[16] Cases where residence in a foreign state is relevant for UK tax include:

Topic	**Definition of residence**	**See para**
DTA	Treaty-residence	9.3
Private residence relief	Mix of OECD Model/SRT	59.4
CI/IoM resident personal allowance	No definition	44.7.3
Offshore Receipts for IP	Based on OECD Model	32.8.1
Hybrid entities	Foreign tax/general sense	91.24.2

[17] See chapter 3 of the 2012/13 edition of this work. The pre-2013 law was hopelessly uncertain, and following changes of HMRC practice leading up to *Gaines Cooper*, it generated more litigation than any other topic. So cases on pre-2013 residence continue to roll in.

Residence needs to be reviewed in the light of: *Yates v HMRC* [2012] UKFTT 568 (TC); *Rumbelow v HMRC* [2013] UKFTT 637; *Daniel v HMRC* [2014] UKFTT 173; *Healey v HMRC* [2014] UKFTT 889 (TC); *Glyn v HMRC* [2015] UKUT 551 (TCC) and [2018] TC 06452; *Peck v HMRC* [2017] UKFTT 770 (TC); *Charman v HMRC* [2018] UKFTT 765; *McCabe v HMRC* [2022] UKFTT 356 (TC) *Hargreaves v* sensible since the SRT "broadly recreates the outcome" of the pre-2013 residence rules".[18] The fewer residence tests we have the better.

Para 2(1) sch 45 FA 2013 dots *I'*s and crosses *T'*s:

> In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to being resident (or not resident) in the UK in accordance with the statutory residence test.

6.3.1 *SRT: Application to trustees/PRs*

The SRT only applies to individuals: there are distinct definitions of residence for trustees, PRs, and companies.

Para 145 sch 45 FA 2013 provides an non-standard definition of individual:

> In this Schedule ... "individual" means an individual acting in any capacity (including as trustee or personal representative)

Para 2(2) sch 45 FA 2013 makes a similar point; it needs to be read with para 2(1) to follow the sense:

> (1) In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to being resident (or not resident) in the UK in accordance with the statutory residence test.
> (2) Sub-paragraph (1) applies even if the reference relates to the tax liability of an actual or deemed person who is not an individual (for example, where the liability of another person depends on the residence status of an individual).

I think the point is that where an individual is trustee or PR, the residence of the PRs or trustees depends (at least in part) on the residence of the individual in their private capacity; and for that purpose the SRT applies.

HMRC [2019] UKFTT 244 (TC) considers carelessness, established practice, and assessment time limits in the context of residence.

Australia follows pre-2013 UK tax-residence case law, and also generates much litigation: *Dempsey v CT* [2014] AATA 335; *Shord v CT* [2015] AATA 355; Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.48 *https://taxboard.gov.au/sites/taxboard.gov.au/files/migrated/2018/07/T307956-income-tax-res-rules.pdf*

[18] See 6.38.1 (SRT/pre-2013 law compared).

6.4 Outline of SRT

Sch 45 FA 2013 provides:

> 3 An individual ("P")[19] is resident in the UK for a tax year ("year X") if–
> (a) the automatic residence test is met for that year, or
> (b) the sufficient ties test is met for that year.
> 4 If neither of those tests is met for that year, P is not resident in the UK for that year.

This suggests a two-stage test, but it is better to regard the SRT as having three stages:

1. Automatic overseas tests: First are 5 overseas tests; if one of these tests are met the individual is not UK resident:

No.	Requirement in outline	See para
1	Less than 16 UK days	6.6
2	3 years non-residence and less than 46 UK days	6.7
3	Overseas work	6.8
4	Death in year; 2 years non-residence & less than 46 UK days	6.33.2
5	Death in year; overseas work	6.33.3

2. "Automatic" UK tests: Subject to that, there are four UK tests, if one these tests are met the individual is UK resident:

No.	Requirement in outline	See para
1	183 UK days	6.10
2	UK home	6.11
3	UK work	6.13
4	Death in year; UK home	6.33.4

3. Sufficient ties test: Then comes the sufficient ties test, with 4 or 5 connecting ties. If the individual has sufficient UK ties (the number depending on the number of UK days) the individual is UK resident, and otherwise, not UK resident. The possible ties are:

Tie	See para
Family tie	6.28
Accommodation tie	6.29
Work tie	6.30
90-day tie	6.31
Country tie	6.32

[19] "P" stands for "person".

6.5 Automatic overseas tests

Sch 45 FA 2013 first sets out the "automatic" UK tests in paras 6-10, and then the automatic overseas tests in paras 12-16. I consider the overseas tests first as if they apply, they have priority over the UK test. An overseas test trumps an "automatic" UK test and leads to a conclusion of non-residence.

Para 11 sch 45 FA 2013 provides:

> There are 5 automatic overseas tests.

I refer to these as **"overseas tests 1-5"**.

6.6 Overseas test 1: < 16 UK days

Para 12 sch 45 FA 2013 provides:

> The first automatic overseas test is that–
> (a) P was resident in the UK for one or more of the 3 tax years preceding year X,
> (b) the number of days in year X that P spends in the UK is less than 16, and
> (c) P does not die in year X.

If condition (a) is not met (ie P was non resident for the 3 preceding years) then one moves on to the (more generous) overseas test 2.

If condition (c) is not met (ie P dies in year X) then one moves on to overseas tests 4 and 5.

6.7 Overseas test 2: 3 years non-resident

Para 13 sch 45 FA 2013 provides:

> The second automatic overseas test is that–
> (a) P was resident in the UK for none of the 3 tax years preceding year X, and
> (b) the number of days that P spends in the UK in year X is less than 46.

This applies even if P dies in the year.

6.7.1 *Newborn child*

A child born on or after 20 February (21 February in a leap year) is non-UK resident for that year! They will not have been resident in any previous year and will not spend 46 days or more in the UK in that year.

The same can apply to a child born before that date, if they spend some days out of the UK.

Or does one count days spent *in utero*?

6.8 Overseas test 3: Overseas work

6.8.1 *Introduction & terminology*

This test is complicated. Para 14(1) sch 45 FA 2013 provides:

> The third automatic overseas test is that—

A set of 4 conditions then follow: I refer to **"overseas work conditions (a) to (d)"**.

> (a) P works sufficient hours overseas, as assessed over year X,
> (b) during year X, there are no significant breaks from overseas work,
> (c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31, and
> (d) the number of days in year X falling within sub-paragraph (2) is less than 91.

I refer to days within (c) as **"UK workdays"** and days within (d) as **"UK days".**

For a comparison with UK test 3 (UK work) see 6.13.8 (UK/foreign work tests compared).

6.8.2 *(a): Sufficient hours overseas*

Para 14(1) sch 45 FA 2013 requires:

> (a) P works sufficient hours overseas, as assessed over year X.

This takes us to para 14(3) sch 45 FA 2013, which provides:

> Take the following steps to work out whether P works "sufficient hours overseas" as assessed over year X—
> *Step 1 [disregard UK workdays]*
> Identify any days in year X on which P does more than 3 hours' work in the UK, including ones on which P also does work overseas on the same day.
> The days so identified are referred to as "disregarded days".

It may be more helpful to use the term **"disregarded UK workdays"**.

> *Step 2 [net overseas hours]*
> Add up (for all employments held and trades carried on by P)

> [a] the total number of hours that P works overseas in year X, but
> [b] ignoring any hours that P works overseas on disregarded days [UK workdays].
>
> The result is referred to as P's "net overseas hours".
>
> *Step 3 [reference-period days]*
> Subtract from 365 (or 366 if year X includes 29 February)—
> (a) the total number of disregarded days [UK workdays], and
> (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.[20]
>
> The result is referred to as the "reference period".

Armed with the figures from steps 2 and 3, we proceed to the computation. This is set out in the remaining two steps:

> *Step 4 [reference-period weeks]*
> Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

Division by 7 (rounded down) yields the number of full weeks in the reference period. If there are no disregarded days or other deductions, then the computation is 365 (or 366) ÷ 7 = 52 (rounded down).

One might question whether rounding is appropriate at this preliminary stage; though in this case rounding down slightly helps the taxpayer. It does not matter much.

> *Step 5 [compute net overseas hours ÷ no. of reference-period weeks]*
> Divide P's net overseas hours by the number resulting from step 4.
> If the answer is 35 or more, P is considered to work "sufficient hours overseas" as assessed over year X.

The computation set out in steps 4 and 5 might have been more clearly expressed algebraically; but the drafter of the SRT was somewhat algebraphobic.

The RDRM provides two examples:

> **RDRM11180: Annual and parenting leave** [Aug 2019]
> Example (Anne)
> A is working overseas, and has had a period of maternity leave, she is considering her UK residence status. She finds she needs to consider

[20] See 6.24 (Reference period: non-work days).

whether she has worked sufficient hours overseas in the tax year, to be treated as working full-time overseas for the purposes of the third automatic overseas test.

Step 1: A has no disregarded days [UK workdays]

Step 2: A has no sickness absences or gaps between employments. Her normal pattern of employment is for 7 hours 40 minutes, Monday to Friday. During the year she:

- worked as normal between 6 April and 2 June
- started her maternity leave on 3 June, returning to work after 26 weeks, on 2 December
- worked from 2 December to 20 December
- took annual leave across the Christmas period from Monday, 23 December through to Wednesday 1 January, returning to work on 2 January
- worked as usual through from 2 January to 5 April; taking 5 days leave from Monday 3 February to Friday 7 February, and another 3 days leave from Thursday 13 March to Monday 17 March (dates are inclusive).

A calculates her net overseas hours (Step 2)

between 6 April and 2 June, she worked on 38 days, (there were 2 bank holidays in this period)

- between 2 December and 20 December she worked on 15 days
- between 2 January and 5 April she worked on 59 days
- total days worked = 38 + 15 + 59 = 112
- on each day she worked for 7 hours 40 minutes, therefore her total net overseas hours = 112 × 7 hours 40 minutes = 858 hours and 40 minutes

Step 3: To calculate her reference period A starts with 365 days and subtracts:

- maternity leave, including embedded weekends from Monday 3 June, to Friday 29 November = 180 days, (30 November and 1 December do not meet the rules about embedded non-working days)
- annual leave on 23, 24, 27, 30 and 31 January, 3-7 February and 13, 14 and 17 March = 13 days

As 25 and 26 December and 1 January and all the weekend dates are non-working days that do not meet the rules about embedded non-working days, A makes no adjustment for them.

A calculates her reference period:

= 365-180-13 = 172 days

Step 4: Divide number from Step 3 by 7 = 172/7 = 25.47 (rounded down to 25)

Step 5: Divide net overseas hours by result from Step 4 = 858 hours and

40 minutes/24 = 35.78
A meets the sufficient hours test. She will need to consider whether she meets all other parts of the third automatic overseas test, in particular that the number of days spent in the UK was less than 91.

RDRM11160: Gaps between employments [Aug 2019]
Example 2 (MayLing)
ML is considering whether she meets the third automatic overseas test in respect of her work in Italy in the previous tax year. She worked for her first employer there for an average of 8 hours a day, 5 days per week, between 6 April and 23 August (20 weeks). During that period she took 9 days annual leave, (there were no embedded non-working days); consequently ML had worked for 18 full weeks and only 1 day in another week. She ceased that employment and took a break of 30 days to tour round Italy.
She then took up a new employment, again in Italy, between 23 September and 5 April (27 weeks and 6 days - amounting to 28 working weeks). During that period she worked for 9 hours and 30 minutes from Monday to Thursday, and for 4 hours on a Friday. She took:

- 5 days of annual leave; for 3 weeks she only worked 3 long days and a short day, and for 1 week she worked 2 long days and a short day, thereby reducing her number of full working weeks by 5 weeks
- 10 days of annual leave, with 2 embedded non-working days, (the Saturday and Sunday in the middle of this 2 week period), reducing her number of full working days by 2
- 5 days continuous sick leave, (with no embedded non-working days), reducing her number of full working weeks by 1

She therefore worked for only 20 full working weeks in this part of the year. ML spends no time in the UK in the tax year.
Step 1
ML has no disregarded days
Step 2 Net overseas hours
Employer 1: 18 weeks and 1 day at (5 days × 8 hours) = 728 hours
Employer 2: 20 weeks at (4 days × 9.5 hours) + 4 hours) = 840 hours
3 weeks at (3 days × 9.5 hours) + 4 hours) = 97.5 hours
1 week at (2 days × 9.5 hours) + 4 hours) = 23 hours
Total net overseas hours: = 728 + 840 + 867.5 + 23 = 1688.5 hours
Step 3 Reference period:

subtract from	365 days
disregarded days	0 days

Other days that can be deducted:
9 days leave Employer 1
15 days leave Employer 2

2 embedded days
5 days sick = 9 + 15 + 2 + 5 = 31 days
Gaps between employments 15 days (total gap 30 days but the amount deducted is limited to 15 days)
Reference period is: 365-31-15 = 319 days
Step 4
Divide reference period by 7: = 319/7 = 45.57 (rounded down to 45)
Step 5
Divide net overseas hours by figure at Step 4
= 1688.5/45 = 37.52
ML meets the sufficient hours test. She will need to consider whether she meets all other parts of the third automatic test.

6.8.3 *Sufficient hours: Planning*

Peter Ashby has done the maths:

> The good news here is that you exclude from the days that qualify sick days and paternity or maternity leave. You also exclude holidays – which is fair enough as you don't work any hours then. But you do not exclude weekends (or more correctly non-working days because these include public holidays – and for shift workers it may not be the weekend that is a non-working day) unless they are 'embedded' in a holiday. So one week of holiday excludes five days and a two-week holiday means 12 days are excluded – unless you start your holiday midweek because you need at least three days before and after the weekend to qualify that weekend. As you divide the denominator by seven to calculate a weekly amount, you do lose out by including these 'non-qualifying embedded days'. The answer of course is to work longer hours. If you can!
> Say I usually work 37 hours per week and take three two-week holidays, the average hours would be:
>
> $$\frac{37 \times (52-6)}{(365 - (3\times12))/7} = 36.2 \text{ hours}$$
>
> If you work 40 hours a week it will probably make no difference. If you work 36 hours a week you may be borderline and fail. If you work 35 hours a week you will almost certainly not get [sufficient hours overseas] without doing some overtime.
> I suppose it does at least encourage a work mentality so [foreign] employers may be happy with this![21]

[21] Ashby, "Employees working abroad" [2013] Tax Adviser 38.

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> **Sufficient hours – interaction with significant breaks**
> **Question:** Can a non-working period of up to 31 days (i.e. a lesser period than a significant break) preceding or following a period of full-time work can be included as part of that period (assuming that the 35 hours test is met)?
> **HMRC Answer:** Provided the FTW test is met over the period by the calculations that are set out, it does not matter if there is a non-working period of up to 31 days at the start or end of the period. An individual would need to work significantly more than 35hrs a week in order to do enjoy periods off from work (which were not annual, sick or parenting leave) and still meet the FTW tests.[22]

6.8.4 *(b): No significant break*

Para 14(1) sch 45 FA 2013 requires:

> (b) during year X, there are no significant breaks from overseas work

See 6.25 ("Significant break from work").

6.8.5 *(c): Less than 31 UK workdays*

Para 14(1) sch 45 FA 2013 requires:

> (c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31

I refer to these days as UK workdays.

6.8.6 *(d): Less than 91 UK days*

Para 14(1) sch 45 FA 2013 requires:

> (d) the number of days in year X falling within sub-paragraph (2) is less than 91.
> (2) A day falls within this sub-paragraph if—
> (a) it is a day spent by P in the UK, but
> (b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.

Para 2(b) excludes the deeming rule (frequent visits) in computing days

[22] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

spent in the UK.[23] Why?

6.9 "Automatic" UK tests

Sch 45 FA 2013 provides:

> 5 The automatic residence test is met for year X if P meets–
> (a) at least one of the automatic UK tests, and
> (b) none of the automatic overseas tests.
> 6 There are 4 automatic UK tests.

I refer to these as **"UK tests 1-4"**. "Automatic" residence tests is not a particularly apt label for this set of tests; I add scare quotation marks.

6.10 UK test 1: 183 UK days

Para 7 sch 45 FA 2013 provides:

> The first automatic UK test is that P spends at least 183 days in the UK in year X.

The figure 183 is one day more than half a year.

6.11 UK test 2: UK home

6.11.1 *Introduction*

This test is complicated. Para 8(1) sch 45 FA 2013 provides:

> The second automatic UK test is that–
> (a) P has a home in the UK during all or part of year X,
> (b) that home is one where P spends a sufficient amount of time in year X, and
> (c) there is at least one period of 91 (consecutive) days in respect of which the following conditions are met—
> (i) the 91-day period in question occurs while P has that home [the UK home],
> (ii) at least 30 days of that 91-day period fall within year X, and
> (iii) throughout that 91-day period, condition A or condition B is met or a combination of those conditions is met.

I refer to these 3 paragraphs as **"UK-home limbs (a) to (c)"**.

6.11.2 *UK home: Limb (a)*

Para 8(1) sch 45 FA 2013 requires:

[23] See 6.19 (Deeming rule (frequent visits)).

> (a) P has a home in the UK during all or part of year X

See 6.20 ("Home").

6.11.3 *30 days in UK home: Limb (b)*

Para 8(1) sch 45 FA 2013 requires:

> (b) that home [the UK home] is one where P spends a sufficient amount of time in year X

Para 8(4) sch 45 FA 2013 provides:

> In relation to a home of P's in the UK, P "spends a sufficient amount of time" there in year X if there are at least 30[24] days in year X when P is present there on that day for at least some of the time (no matter how short a time).

The test for limb (b) is the number of days spent in the home *in year X*, not in the Test Window (which is different).

6.11.4 *"Present at the home"*

Para 8(6)(b) sch 45 FA 2013 provides:

> In sub-paragraphs (4) and (5)...
>
> (b) a reference to P being present at the home is to P being present there at a time when it is a home of P's (so presence there on any other occasion, for example to look round the property with a view to buying it, is to be disregarded).

Thus "present at the home" means present at a time when the property is a home. It is not necessary to be present at midnight (unlike the days spent test).

6.11.5 *More than one UK home*

Para 8(8) sch 45 FA 2013 provides:

> If P has more than one home in the UK—
>
> (a) each of those homes must be looked at separately to see if the second automatic UK test is met, and

[24] Para 8(6)(a) sch 45 FA 2013 explains how to count to 30: "In sub-paragraphs (4) and (5)—
(a) a reference to 30 days is to 30 days in aggregate, whether the days are consecutive or intermittent".

> (b) the second automatic UK test is then met so long as it is met in relation to at least one of those homes.

Time spent at one home is not aggregated with time spent at another home, in assessing limb (b).

The RDRM provides a straightforward example:

> **RDRM11360: 30 day presence rule** [Aug 2019]
> Example (Fatima)
> F has had 4 UK homes for several years, in the tax year under consideration, F is present in her home in Swansea on 15 days, 20 days in her home in Callander, 29 in her London apartment and 29 in her Newcastle apartment.
> F has been present on 92 days in total in those UK homes. However, as she was not present in any individual home on at least 30 days, she will not have spent a sufficient amount of time in any single UK home. She will not meet the second automatic UK test for the tax year under consideration.

This example is straightforward: UK-home limb (b) is not met.

At first sight F's peripatetic lifestyle seems somewhat implausible; but perhaps F acted on tax advice on how to avoid the UK home test.

6.11.6 *91 day Test Window: Limb (c)*

Para 8(1) sch 45 FA 2013 requires:

> (c) there is at least one period of 91[25] (consecutive) days in respect of which the following conditions are met—
> (i) the 91-day period in question occurs while P has that home,
> (ii) at least 30 days of that 91-day period fall within year X, and
> (iii) throughout that 91-day period, condition A or condition B is met or a combination of those conditions is met.

It is limb (c) which makes the UK home test complicated.

Limb (c) is in fact a set of requirements, which I call **"conditions (c)(i)**, **(c)(ii)**, and **(c)(iii)A** and **C(iii)B"**.

I refer to the 91-day (= 13 weeks) period in limb (c) as the **"Test Window"**. As 30 days of the Test Window must fall within a tax year:

[25] Para 8(7) sch 45 FA 2013 explains that numbers do not stop at 91: " Sub-paragraph (1)(c) is satisfied so long as there is a period of 91 days in respect of which the conditions described there are met, even if those conditions are in fact met for longer than that."

- the Test Window must begin no earlier than 61 days before the tax year starts (ie 4 February[26])
- the Test Window must end no later than 61 days after the tax year ends (ie 5 June)

For any tax year, there are altogether 426 possible Test Windows:

- The first is 4 Feb[27] - 5 May (inclusive) starting in the previous tax year
- The next is 5 Feb[28] - 6 May (inclusive)
- The list of Test Windows continues from day to day until:
- The last Test Window is 4 Mar-2 June (inclusive) ending in the next tax year

6.11.7 *Overseas home conditions A & B*

Para 8(2) sch 45 FA 2013 provides:

> Condition A is that P has no home overseas.

Condition B is that P has a home but does not use it enough. Para 8(3) sch 45 FA 2013 provides:

> Condition B is that—
> (a) P has one or more homes overseas, but
> (b) each of those homes is a home where P spends no more than a permitted amount of time in year X.

Para 8(5) sch 45 FA 2013 provides:

> In relation to a home of P's overseas, P "spends no more than a permitted amount of time" there in year X if there are fewer than 30 days in year X when P is present there on that day for at least some of the time (no matter how short a time).

The test for Overseas Home Condition B is the number of days spent in the home *in year X*, not in the Test Window (which is different).

The requirement is that throughout the 91-day Test Window, condition A or condition B is met or a combination of those conditions is met. Conditions A and B cannot be met at the same time, but it is possible that first one condition is met, and then the other.

If P has a UK home, P must spend at least 30 days in year X in P's

[26] 5 February if the February is in a leap year.
[27] 5 February if the February is in a leap year.
[28] 6 February if the February is in a leap year.

overseas home. However, there is no requirement for P to have the overseas home during the whole of the 91-day Test Window, provided there is at least 1 day in the Test Window when P does have an overseas home.

If P's overseas home ceases to be P's home (eg it is sold) the requirements of UK test 2 will still not be met provided P acquires another overseas home within 90 days of the disposal of the previous home, and P is present in either the old overseas home or the new one for 30 days in year X.

6.12 UK test 2: Examples

The RDRM provides some examples of UK test 2 (UK home).

6.12.1 *Acquiring UK home*

The first example is straightforward: an individual ceases to have an overseas home and acquires a UK home. The facts (stripping out irrelevancies) are as follows:[29]

> **Example 1**
> S ceases to have an overseas home on 10 January 2014.
> S acquires a UK home on 1 February 2014 and remains there for a year.

The HMRC analysis is as follows:

> In 2013-14 S has a home in the UK ... and is present in it on at least 30 days.

Thus UK-home limbs (a) and (b) are met.

> Also from 1 February 2014 there is a period of 91 consecutive days at least 30 of which fell in 2013-14 (the tax year under consideration)

[29] The example in full (including its irrelevant detail) is as follows:
RDRM11340: Time spent in the UK home [Nov 2019]
Example 1 (Stan)
S has lived in Australia all his life. In June 2012 he takes a holiday in London and likes it so much he decides to immigrate to the UK. He spends the next few months preparing for the move. He sells his Australian house (his only home), on 10 January 2014, and arrives in the UK on 25 January 2014. He finds a flat in London and moves in on 1 February 2014. The London flat is now his only home and he lives there for a year.
During the 2013-2014 tax year S is present in his Australian home on 250 days, and he is present in his London flat on 55 days.

> when S has a UK home and no overseas home.

Thus UK-home limb (c) is met. The Test Window is 1 February - 3 May 2014. UK-home limb (c)(iii)A is met.

> As S does not meet any of the automatic overseas tests, he is resident under the second automatic UK test for tax year 2013-14.

There are several points to note from this example:

(1) The Test Window extends well into 2014/15, so S does not know on 6 April 2014 whether he was resident in 2013/14. If he had left, or died, before 3 May 2014, he would not have been UK resident.

(2) S is UK resident in 2013-14 even though he is present in his overseas home on 250 days, and present in his UK home on only 55 days. But split year relief (Case 8) may apply and DT relief should be available for the period when S was treaty-resident overseas.

(3) A little planning would avoid UK residence. For instance, if S kept his overseas home until 7 March, rather than selling or letting it on 10 January, he would not be UK resident.

6.12.2 *Acquiring overseas home*

The next example is an individual who acquires an overseas home and retains a UK home:

> **RDRM11340: Time spent in the UK home** [Nov 2019]
> Example 2 (Jane)
> J has a home in the UK throughout the tax years 2013-2014 and 2014-2015. She is present in that home on more than 30 days during the 2013-2014 tax year.

Thus UK-home limbs (a) and (b) are met.

> J acquires a home overseas on 1 March 2019 and is present there on 30 days in the 2013-2014 tax year.

The HMRC analysis is as follows:

> Although there is a period of 91 consecutive days, 30 of which fall in 2013-2014, (the tax year under consideration), when J had both a UK home and an overseas home; there is also a period of at least 91 consecutive days, (6 April 2013 to 28 February 2014), when she had a UK home, (in which she spent sufficient time in 2013-2014), but no overseas home.

The Test Window is 6 April - 28 February 2014. UK-home limb (c)(iii)A is met.

> J is therefore resident in the UK for 2013-2014 under the second automatic UK test.

6.12.3 *No overseas home*

The next example is an individual who retains a UK home and does not acquire an overseas home:

> Example 3 (Edith)
> E has had a home in Cheshire for many years. It is her only home. E retires towards the end of 2014-2015 tax year, and decides to use her retirement lump sum to see the world.
> During the 2015-2016 tax year she takes 3 long holidays, visiting 22 different countries. She moves around and does not establish a home overseas. She keeps her Cheshire home throughout, returning briefly between trips, and is present there on 41 days in the 2015-2016 tax year.

The HMRC analysis is as follows:

> In 2015-2016 E has a home in the UK in which she is present on at least 30 days in the tax year.

Thus UK-home limbs (a) and (b) are met.

> During the year E has no overseas home.

Thus UK-home limb (c) is met. The Test Window is the whole of 2015/16. UK-home limb (c)(iii)A is met.

> E does not meet any of the automatic overseas tests, and therefore she is resident under the second automatic UK test for the 2015-2016 tax year.

This is straightforward.

6.12.4 *Losing overseas home*

Next, an example of passing the UK home test by renting out an overseas home.

> Example 4 (Berni)
> At 6 April 2014 B considers whether she meets the second automatic UK test for 2013-2014:
>
> - she bought a home in the UK on 1 January 2013 - it was her only home throughout 2013-2014
> - she was present in that home on at least 30 days in the tax year 2013-2014

> - she came to the UK on 10 April 2013 and rented out her overseas home, (which she had owned for many years), from 11 April 2014 to 10 March 2014
>
> Therefore, during 2013-2014 there was a period of 91 days, 30 of which fell in the tax year during which B had a home in the UK in which she was present for a sufficient amount of time, and had no overseas home. As B did not meet any of the automatic overseas tests she is resident under the second automatic UK test.
>
> If there is any uncertainty over whether a property constitutes a home RDRM13020 gives further details.
>
> In certain circumstances a home can cease to be a home temporarily, which may have a bearing on whether an individual meets the second automatic UK test.

Thus UK-home limbs (a) and (b) and (c)(iii)A are met.

If B had not let out the overseas home, and had been present there sufficient days, she would not have been resident under the UK home test.

6.12.5 *Acquiring UK home*

The last example might be designed to illustrate the importance of tax planning. The facts (stripping out irrelevancies) are as follows:[30]

> Example 5 (Rosa)
>
> R is a professional cricketer who lives in New Zealand. She comes to the UK for the summer of 2015 to play for Trinity Bridge Ladies. She rents a house in Dorking for 4 months, commencing on 1 May 2015. She is present in her Dorking home on 100 days in 2015-2016. After the English cricket season ends she returns to New Zealand.
>
> Throughout 2015-2016 R owns a house in New Zealand. She is present in that house on 200 days in 2015-2016.
>
> While she is in the UK, R lets out her New Zealand home on a commercial basis to a third party, from 1 June to 31 August 2015, (92

[30] The example including its irrelevant detail in full is as follows:
"R is a professional cricketer who lives in New Zealand. She comes to the UK for the summer of 2015 to play for Trinity Bridge Ladies. She rents a house in Dorking for four months commencing 1 May 2015. She is present in her Dorking home on 100 days in 2015-16. After the English cricket season ends she returns to New Zealand.
Throughout 2015-16 R owns a house in New Zealand. She is present in that house on 200 days in 2015-16.
While she is in the UK, R lets out her New Zealand home on a commercial basis to a third party, from 1 June to 31 August 2015 (92 days). For that period the New Zealand house is not R's home."

> days). For that period the New Zealand house is not R's home.

The HMRC analysis is as follows:

> There is a period of 91 consecutive days, at least 30 of which fall in 2015-2016, when R had a UK home where she spends a sufficient amount of time, and when she does not have an overseas home. R meets the second automatic UK test for 2015-2016.

HMRC draw the moral:

> If R had not let out her New Zealand house, and it had remained available for R to use throughout the summer; it would have remained her home and R would not have met the second automatic UK test.

It may make no difference whether R is resident or not, once one has allowed for DT relief and that UK source income earned as a sportswoman while in the UK would be subject to UK tax anyway. But the cost of dealing with UK tax affairs may well exceed the rent from the short let of the overseas home.

6.13 UK test 3: UK work

6.13.1 *Introduction and terminology*

This test is complicated. Para 9(1) sch 45 FA 2013 provides:

> The third automatic UK test is that–
> (a) P works sufficient hours in the UK, as assessed over a period of 365 days,
> (b) during that period, there are no significant breaks from UK work,
> (c) all or part of that period falls within year X,
> (d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK, and
> (e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

I follow the terminology of RDRM and refer to the **"365-day reference period"**. This period must satisfy the five conditions, which I refer to as **"UK-work conditions (a) to (e)"**.

6.13.2 *(a): Sufficient UK hours*

Para 9(1) sch 45 FA 2013 requires:

> (a) P works sufficient hours in the UK, as assessed over a period of 365 days...

This takes us to para 9(2) sch 45 FA 2013 which provides:

> Take the following steps to work out, for any given period of 365 days, whether P works "sufficient hours in the UK" as assessed over that period—
> *Step 1 [disregarded overseas days]*
> Identify any days in the period on which P does more than 3 hours' work overseas, including ones on which P also does work in the UK on the same day.
> The days so identified are referred to as "disregarded days".

It may be more helpful to use the term "disregarded overseas days".

> *Step 2 [net UK hours]*
> Add up (for all employments held and trades carried on by P) the total number of hours that P works in the UK during the period, but ignoring any hours that P works in the UK on disregarded days.
> The result is referred to as P's "net UK hours".
> *Step 3 [reference-period days]*
> Subtract from 365—
> (a) the total number of disregarded days, and
> (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.[31]
> The result is referred to as the "reference period".
> *Step 4 [reference-period weeks]*
> Divide the reference period by 7.
> If the answer is more than 1 and is not a whole number, round down to the nearest whole number.
> If the answer is less than 1, round up to 1.

Division by 7 reflects the number of weeks in the reference period.

If there are no disregarded days or other deductions, then the computation is 365 ÷ 7 = 52 (rounded down).

One might question whether rounding is appropriate at this preliminary stage; it does not matter much.

> *Step 5 [compute net UK hours ÷ no. of reference-period weeks]*

[31] See 6.24 (Reference period: non-work days).

> Divide P's net UK hours by the number resulting from step 4.
>
> If the answer is 35 or more, P is considered to work "sufficient hours in the UK" as assessed over the 365-day period in question.

This mirrors the approach of overseas test 3 (overseas work).[32]

The RDRM provides an example:

> **RDRM11380: Is the work full-time in the UK** [Aug 2019]
>
> Example (Sam)
>
> S has never been resident in the UK. On 3 March 2014, he starts a 2 year contract to work on a North Sea oil platform in UK waters. S is contracted to work 2 weeks off-shore, working 12 hours a day over 14 days, followed by 2 weeks onshore field break.
>
> Unfortunately, half-way through his shift on 9 April 2014, S has an accident at work and is medically unfit to work up to 30 April 2014. The doctor certifies that he is fit enough to return to work from 1 May 2014.
>
> From 10 April to 30 April 2014 (21 days), when S is unfit to work, there is a period of 14 days (14-27 April), which were non-working days, when S was scheduled for his onshore field break.
>
> For the purpose of calculating whether he meets the third automatic UK test, S considers whether he worked sufficient hours in the UK. Usually, his non-working days cannot be deducted from the 365 day period over which his average weekly hours are calculated; as they do not meet the rules about embedded non-working days (see RDRM11190).
>
> However, when calculating whether S works sufficient hours in the UK over a 365 day period, the 14 non-working days between 14 and 27 April 2014 can be subtracted from the 365 day period when calculating the 'reference period' at Step 3 of the calculation.
>
> This is because the 14 non-working days are embedded within a period
>
> - where S was unfit to work, from 10-30 April 2014, and
> - there were at least 3 consecutive days of sick leave before the non-working period, and
> - there were at least 3 consecutive days of sick leave after the non-working period
>
> For the purpose of this example we look at the 365 day period starting on 3 March 2014, the date S started work in the UK.
>
> *Step 1:* there are no disregarded days on which S worked for more than 3 hours overseas
>
> *Step 2:* net UK hours - S worked for 23.5 days (between 3 March and midway through 9 April), then a total of 22 weeks and 5 days between

[32] See 6.8.2 ((a): Sufficient hours overseas).

5 May and 2 March 2015.
Hours worked = ((22 × 7) + 23.5) × 12 = 2190 hours
Step 3: calculate the reference period - subtract from 365 the disregarded days and other days that can be subtracted = 365 - 21 =344
Step 4: divide reference period by 7 = 344/7 - 49.19, rounded down to 49
Step 5: divide net UK hours by result of Step 4 = 2190/49 = 44.69
S works sufficient hours in the UK because he works an average of more than 35 hours per week, calculated over the 365 day period. He would have to consider other aspects of the third automatic UK test to determine his residence status.

6.13.3 *Significant break from work*

Para 9(1) sch 45 FA 2013 requires:

> (b) during that period, there are no significant breaks from UK work

See 6.25 ("Significant break from work").

6.13.4 *365-day period across tax year*

Para 9(1) sch 45 FA 2013 requires:

> (c) all or part of that period falls within year X

6.13.5 *75% UK workdays*

Para 9(1) sch 45 FA 2013 requires:

> (d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK

I refer to days on which P does more than 3 hours' work in the UK as **"UK workdays"**.

6.13.6 *UK workday in year/365-day period*

Para 9(1) sch 45 FA 2013 requires:

> (e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

Para (e) ensures that at least one day of more than 3 hours' work must fall within both year X and the 365-day period. Without it, the test could be satisfied if the 365-day period ended in, for example, May (with no days of working more than 3 hours in the UK in that tax year), but there was a solitary 7 hour UK workday in the following March.

6.13.7 *HMRC examples*

The RDRM provides some examples. The first is straightforward:

> **RDRM11370: Third automatic UK test** [Aug 2019]
> Example 1 (Henri)
> H travels to the UK on 1 July 2013 to start a new job the following day. His posting finished on 1 July 2014, and he leaves the UK on 6 August 2014, 400 days after he arrived.

The reference period is 1 July 2013 - 30 June 2014. UK-work conditions (a) and (b) are satisfied for that period. The period falls within 2012/13 and 2013/14 so condition (c) is satisfied for those years.

> Over the 365 day period to 30 June 2014, H calculates that he worked full-time in the UK and has not taken a significant break from his UK work during this period. Part of the period of 365 days fall in the tax year 2013-2014 and part within the tax year 2014-2015.

So UK-work condition (e) is satisfied for 2013/14.

> Over the period of 365 days ending 30 June 2014, H works for over 3 hours on 240 days, 196 (80%) of which are days when H worked for more than 3 hours in the UK. At least 1 day when H does more than 3 hours work in the UK falls within tax year 2013-2014; therefore H is resident in the UK under the third automatic UK test for 2013-2014 tax year.

So UK-work condition (e) is satisfied for 2014/15.

The next example is a case where one 365-day reference period does not satisfy the conditions, but another does (resulting in UK residence):

> Example 2 (Frank)
> F works full-time in Paris for a branch of a multi-national export company. He comes to work in the UK every month for 2 days; on both days he works for more than 3 hours in the UK. On 1 September 2013 F is seconded to work in the UK for a period of 2 years. F returns to the Paris office and works there for more than 3 hours on 2 days each month. In the period of 365 days ending 5 April 2014 F calculates he worked full-time in the UK, (the days worked overseas are identified and disregarded at Step 1 of the calculation of full-time work overseas). As F worked for more than 3 hours on 2 days each month in the UK prior to September 2013, F did not have a significant break from UK work. In the 365 day period ending 5 April 2014, F worked for more than 3

hours on 240 days. However, only 150 days (62%) were days when F worked for more than 3 hours in the UK. Using that 365 day reference period F would not be resident in the UK under the third automatic UK test for the 2013-2014 tax year.

So it seems that the UK work test is not satisfied. But no:

F needs to check the 75% test against another 365 day period.
In the 365 day period ending 31 August 2014, F calculates he worked full-time in the UK. Again days worked overseas are identified and disregarded at Step 1 of the calculation of full-time work overseas. In the 365 day reference period ending 31 August 2014, F worked for more than 3 hours on 230 days; 210 days (91%) were days when F worked for more than 3 hours in the UK. Part of this 365 day period falls within the 2013-2014 tax year and at least 1 day in 2013-2014 is a day on which F worked for more than 3 hours in the UK. Therefore, using the 365 day reference period ending 31 August 2014, F is resident in the UK under the third automatic UK test for 2013-2014.

6.13.8 *UK/foreign work tests compared*

To keep in mind the differences between the UK and the overseas full-time work tests, it may be helpful to set them side by side:

Sch 45 para 9: UK work test	**Para 14: Overseas work test**
(1) The third automatic UK test is that—	(1) The third automatic overseas test is that—
(a) P works sufficient hours in the UK, as assessed over a period of 365 days,	(a) P works sufficient hours overseas, as assessed over year X,
(b) during that period, there are no significant breaks from UK work,	(b) during year X, there are no significant breaks from overseas work,
(c) all or part of that period falls within year X,	
(d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK, and	(c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31, and
(e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.	

(d) the number of days in year X falling within sub-paragraph (2) [UK days] is less than 91.

(2) A day falls within this sub-paragraph if—
(a) it is a day spent by P in the UK, but
(b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.

The definitions of sufficient hours are sufficiently close that they can more conveniently be set out in track change format. Para 9(2)/14(3) provide:

> ~~(3)~~(2) Take the following steps to work out, for any given period of 365 days, whether P works "sufficient hours ~~overseas~~ in the UK" as assessed over ~~year X~~ that period—
>
> *Step 1*
>
> Identify any days in ~~year X~~ the period on which P does more than 3 hours' work ~~in the UK~~ overseas, including ones on which P also does work ~~overseas~~ in the UK on the same day.
>
> The days so identified are referred to as "disregarded days".
>
> *Step 2*
>
> Add up (for all employments held and trades carried on by P) the total number of hours that P works ~~overseas in year X~~ in the UK during the period, but ignoring any hours that P works ~~overseas~~ in the UK on disregarded days.
>
> The result is referred to as P's "net ~~overseas~~ UK hours".
>
> *Step 3*
>
> Subtract from 365 ~~(or 366 if year X includes 29 February)~~ —
>
> (a) the total number of disregarded days, and
>
> (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.
>
> The result is referred to as the "reference period".
>
> *Step 4*
>
> Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.
>
> *Step 5*
>
> Divide P's net ~~overseas~~ UK hours by the number resulting from step 4. If the answer is 35 or more, P is considered to work "sufficient hours ~~overseas~~ in the UK" as assessed over ~~year X~~ the 365-day period in

question.

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> **Sufficient hours - simultaneous FTWUK and FTWO**
> *Question:* Because of the way in which working days are disregarded for both the numerator and denominator of the sufficient hours test where the employee has worked for more than three hours in the "wrong" country (e.g. worked for more than three hours in the UK on some days when working all day abroad on most other days) it is possible to be employed full-time simultaneously in both the UK and an overseas work country for a period. This might happen where an individual transitions into a new cross-border role over a short period. This is not an intuitive outcome and will confuse taxpayers. Could there be a rule to prevent it?
> *HMRC answer:* Because the FTW tests are mechanical, HMRC agrees it is possible to be simultaneously FTWUK and FTWO. In reality this is likely to happen in a small number of cases and for a very short period of time. The SRT provides a tie-breaker in this scenario, with those meeting automatic overseas tests becoming definitively non resident. The split year cases have also been drafted so there is a priority rule between Case 5 (starting FTWUK) and Case 6 (ceasing FTWO).[33]

6.14 Sufficient ties test

Para 17(1) sch 45 FA 2013 provides:

> The sufficient ties test is met for year X if–
> (a) P meets none of the automatic UK tests and none of the automatic overseas tests, but
> (b) P has sufficient UK ties for that year.

6.14.1 *"Sufficient" ties*

Para 17(3) sch 45 FA 2013 defines "sufficient":

> Whether P has "sufficient" UK ties for year X will depend on–
> (a) whether P was resident in the UK for any of the previous 3 tax years, and
> (b) the number of days that P spends in the UK in year X.

The sufficient ties test distinguishes between "leavers" and "arrivers":

[33] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

Category	**Para**	**Test**
Leavers	18	UK resident for 1 or more of the 3 tax years preceding year X
Arrivers	19	UK resident for none of the 3 tax years preceding year X

Para 18/19 sch 45 FA 2013 define "sufficient ties" for leavers/arrivers. It is convenient to combine the two into a single table:

Days spent by P in the UK in year X	**sufficient ties**	**sufficient ties**
	leavers	***arrivers***
More than 15[34] but not more than 45	At least 4	[non-resident]
More than 45 but not more than 90	At least 3	All 4
More than 90 but not more than 120	At least 2	At least 3
More than 120	At least 1	At least 2

See too 6.35.4 (Recordkeeping: UK ties).

The same result might have been achieved more neatly by counting residence in any of the 3 preceding years as another UK tie. But it comes to the same thing.

The rules reflect a policy principle that residence should be adhesive; that is, it should be harder to lose residency than to acquire it.

6.15 Days spent in UK

"Days spent" matters for many SRT purposes, in particular:

(1) Overseas test 1: Less than 16 UK days
(2) Overseas test 2: 3 years non-residence, less than 46 UK days
(3) UK test 1: 183 UK days
(4) The sufficient ties test:
    (a) The number of "sufficient" UK ties depends on the number of UK days spent
    (b) The 90 day tie
    (c) The country tie

Para 24 sch 45 FA 2013 tries to explain the word "in":

> Any reference to a number of days spent in the UK "in" a given period is a reference to the total number of days spent there (in aggregate) in that period, whether continuously or intermittently.

6.15.1 *Ascertaining "days spent" in UK*

Sch 45 FA 2013 provides the general rule:

[34] The words "More than 15" are otiose since if P spends less than 16 days in the UK automatic overseas test 1 will be satisfied and P will not be UK resident.

> 22(1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK...
> 23(1) If P is not present in the UK at the end of a day, that day does not count as a day spent by P in the UK.

There are three exceptions to this general rule:

Exception	**Outline**	**See para**
Transit passengers	Transit days not counted as days in UK	6.16
Exceptional circumstances	Up to 60 UK days not counted	6.17
Deeming rule	Frequent visits count as UK days even though *not* present at midnight	6.19

So "days spent" are ascertained by a qualified midnight test, not a simple midnight test.

6.16 Transit days

The rule is in para 22(3) sch 45 FA 2013 but that needs to be read with para 22(1)(2):

> (1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK.
> (2) But it does not do so in the following two cases.
> (3) The first case is where–
> (a) P only arrives in the UK as a passenger on that day,
> (b) P leaves the UK the next day, and
> (c) between arrival and departure, P does not engage in activities that are to a substantial extent unrelated to P's passage through the UK.[35]

This is vague, but the RDRM provides a gloss:

> **RDRM11730: Days spent in the UK: Transit days** [Dec 2019]
> Merely taking dinner or breakfast at their hotel, in the normal course of events, would be related to their passage.
> In contrast, enjoying a film at a local cinema, spending any time in your home in the UK or catching up with friends or relations would be considered substantially unrelated to their passage through the UK. ...
> Example 1 (Holly and Lawrence)
> H regularly visits the UK for work and social engagements. She also travels widely. She is planning to visit her aunt in Philadelphia, and will

[35] The drafting is, exceptionally for the SRT, from the pre-2013 legislation: s.831(1B)(b) ITA.

be flying in from Rome to connect with her flight at Heathrow.

H's flight lands at 23.05 on Monday evening. Her flight to Philadelphia does not depart from Heathrow until 11.05 on Tuesday morning. H decides to stay at an airport hotel to catch some sleep, before returning to board the plane for her onward journey. She merely leaves the airport terminal, catches a taxi to the hotel, sleeps, and snatches a quick breakfast before returning to the airport.

The transit arrival day (Monday) spent in the UK would not count as a day for H when she considers how many days she spent in the UK at the end of the tax year. The departure day (Tuesday), may count as a qualifying day under the deeming rule.

Example 2(a)

H's brother, L, has a similarly itinerant lifestyle. He too is visiting their aunt in Philadelphia, and will be flying in from Toulouse to connect with their continental flight at Heathrow.

L's flight lands at 17.20 on Monday evening. The flight to Philadelphia does not depart Heathrow until 11.05 on Tuesday morning. L decides to stay at an airport hotel, before returning to board the plane on Tuesday.

In this scenario the midnight spent in the UK will not count as a day spent in the UK for SRT purposes. The departure day (Tuesday), may count as a qualifying day under the deeming rules.

Example 2(b)

The circumstances are for 2(a), but L decides that as he has a long transit period in the UK he will meet up with some friends and go to the theatre.

In this scenario L's meeting friends and visiting the theatre is regarded as being to a substantial extent unrelated to his passage through the UK. The midnight spent in the UK will count as a day spent in the UK for SRT purposes. The following day (Tuesday), may also count as a qualifying day under the deeming rule.

Example 2(c)

The circumstances are as for 2(a), but L meets his team leader for dinner to discuss work related issues. Their meeting lasts for an hour and a half.

In this scenario the meeting with his team leader is regarded as being to a substantial extent unrelated to his passage through the UK, and the midnight spent in the UK will count as a day spent in the UK for SRT purposes. The following day (Tuesday), may also count as a qualifying day under the deeming rule.

Example 3(a) (Simon)

S is a lawyer who lives in France but works internationally. A business trip to Canada requires him to transit through the UK. He lands at Gatwick at 18.30 on Tuesday and his onward flight to Canada departs Heathrow at 14.00 on Wednesday.

While S is waiting for the shuttle bus to his Heathrow hotel he spots a work colleague from the London office who he has not seen for some time. They go for a coffee and talk about their families and recent holidays. That evening after dinner in his hotel, S uses social media to look at his colleague's holiday photographs and then exchanges a few emails with him about them. Before going to bed S watches a film on an internet website.

S's chance meeting with his colleague and his use of social media and internet websites are regarded as being related to his transit through the UK. This is because the meeting was entirely by chance, not planned, and he and his colleague did not talk about work issues. His use of social media at the hotel is acceptable, as it was not used in any way whatsoever for business or work purposes.

S's day of arrival in the UK may be treated as a transit day and will not count as a day of presence in the UK for SRT purposes. S's departure day (Wednesday) may also count as a qualifying day under the SRT deeming rule.

Example 3(b)

The situation is the same as for example 3(a), however S and his colleague discuss a litigation case they are both involved in. That evening S contacts his boss on his social media site to make him aware of the earlier discussion with his colleague, and they exchange some emails on the case.

Although S met his colleague by chance they discussed both private and work related issues. He also used social media for work purposes. These activities are regarded as being to a substantial extent unrelated to his transit through the UK.

S's day of arrival in the UK may not be regarded as a transit day and will be treated as a day spent in the UK for SRT purposes. If S works in the UK for more than 3 hours, the day will also count as a UK work day. S's departure day (Wednesday), may also count as a qualifying day under the SRT deeming rule.

EN FB 2008 provides some unexceptionable examples:

Example 1 – Peter works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt. He flies from Jersey to Gatwick and will catch his onward flight the next day to Frankfurt from London City airport. He travels from Gatwick to Canary Wharf for a meeting with several other HSBC colleagues before staying overnight in a nearby hotel.

The meeting with colleagues is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 2 – John works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt via Gatwick and London City airport. In lobby of his hotel near London City Airport, he unexpectedly spots another colleague who has just arrived from Paris. They have a couple of pints together and their conversation covers a number of business-related issues. [John][36] then travels to London City airport to catch his onward connection.

This meeting was not planned and therefore it can be considered that John's activities in the UK substantially related to completing travel to a foreign destination. The transit passenger provisions will apply.

Example 3 – Shirley lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. She has planned to spend most of the day with her daughter and grandchildren, who live in Crawley and will also spend the night there before travelling to Heathrow for her onward flight.

Her visit is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 4 – Phil lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. His flight from Guernsey is delayed by fog and he arrives too late to make his onward connection to New Zealand that day. His son had already arranged to meet him at Gatwick and drive him to Heathrow, now he drives him to a hotel near Heathrow instead where Phil will stay overnight before catching his rearranged flight. At the hotel they have a snack together.

These activities are substantially related to completing travel to a foreign destination – Phil would have eaten in the hotel even if he had been unaccompanied. The transit passenger provisions will apply.

Example 5 – George lives in the Isle of Man and is flying to New York on business via Manchester. He has made an appointment with a consultant orthopaedic surgeon based in Manchester to carry out a number of tests. He will stay in the clinic overnight before travelling on to New York the following afternoon.

The appointment is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 6 – George lives in Jersey and is travelling to Stavanger. He does not fly and travels to the UK by ferry before continuing to London by train. He stays overnight at a West End hotel, having prearranged dinner and a trip to the theatre with friends. The next day he travels to Newcastle by train, where he boards a ferry to Stavanger. His activities in the UK are not substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

The minutes of the Joint Forum on Expatriate Tax and NICs provides:

> **Transit days and "substantially related" – general clarification**
>
> *Question:* If the statutory phrasing is viewed narrowly, whatever [an individual] is likely to do, whether watching a film in his hotel room, telephoning family, reviewing work e-mails, catching up with friends on Facebook or going to the hotel gym or pool could be viewed as "substantially unrelated" to passage through the UK because it is not an intrinsic part of the journey.

[36] The original erroneously reads: Peter.

> *HMRC answer:* HMRC confirms that it will not interpret "substantially related" narrowly. It is reasonable to expect that, for example, anyone who chose to stay in a hotel to avail themselves of the facilities, to check Facebook and so on. The facts in each case will be important. In the final analysis we would consider whether a person was in fact enjoying the benefit of being in the UK – for example by going to the theatre – which is out with the spirit of a transit day. However it is true that doing any work, including reviewing emails, is unrelated to P's passage through the UK and the day would result in a day spent in the UK.
>
> **Transit days and "substantially related" – work of any sort and alternative approaches**
>
> *Question:* A restriction on doing work of any sort means individuals cannot check work emails (e.g. on smartphones and tablets) which is unreasonable. Can a more pragmatic interpretation be struck? e.g. US Treasury Regulations 301.7701(b)-3(d) covering Days in Transit, which hinges on whether or not there has been a business meeting.
>
> *HMRC answer:* HMRC interprets the term "substantially unrelated" with reference to what the transit day provisions are there to achieve – to allow leeway for day counting purposes for those passing through the UK who carry out no work. A simple reading means there is can be no debate around the degree and nature of work done.
>
> **Departure days and deemed days**
>
> *Question:* Are departure days that are disregarded under the transit rule counted for the deeming rule? In other words, do transit departure days count towards an excess over 30 days, as per in para 23(3)?
>
> *HMRC answer:* Departure days, following a day in transit, are not disregarded under the transit rules and may count towards the deemed days rule. A day of departure may be a "qualifying day" under the terms of para 23(3)(b). The intention is to minimises the scope for the deemed days rule to be circumvented.[37]

If the individual arrives in the UK and leaves on the *same* day, that day will not count even though work or other matters are done in between.[38] The individual does not need to rely on the transit passenger exemption.

The transit passenger rule is essential to the role of Heathrow airport as an international hub. Heathrow relies on transit passengers for the viability of its hub status. Transit passengers facilitate network diversity and

[37] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

[38] Unless the deeming rule (frequent visits) applies.

frequency. Passengers would not change planes in the UK if that might make them UK resident.

6.17 Exceptional circumstances

6.17.1 *Exceptional circ. disregard*

The rule is in para 22(4) sch 45 FA 2013 but that needs to be read with para 22(1)(2):

> (1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK.
> (2) But it does not do so in the following two cases....
> (4) The second case is where–
> (a) P would not be present in the UK at the end of that day but for exceptional circumstances beyond P's control that prevent P from leaving the UK, and
> (b) P intends to leave the UK as soon as those circumstances permit.

I refer to this as the **"exceptional circumstances disregard"**.

Para (4) can be unpacked into 5 separate requirements:[39]

Ref	**Requirement**
Para (a)[i]	The circumstances are exceptional
Para (a)[ii]	The circumstances are beyond P's control
Para (a)[iii]	The circumstances prevent P from leaving the UK
Para (a)[iv]	P would not be present in the UK at the end of the day but for those circumstances
Para (b)	P intends to leave the UK as soon as those circumstances permit

These are the five requirements which must be satisfied, and it is best to address them separately, though there is an element of overlap, and discussion easily segues from one element to another.

"The circumstances" here means the matters which cause P to be present in the UK at any particular time.

The exceptional circumstances disregard does not require a formal claim or election, but where the individual submits a tax return,[40] it is necessary to complete box 11 in SA109 (Residence, remittance basis etc) (2022/23). The rubric to this box provides: "Number of days in box 10 [days spent in the UK] attributed to exceptional circumstances".

[39] This is self-evident, but if authority is needed, see *A Taxpayer v HMRC* [2022] UKFTT 00133 (TC) at [134].

[40] See 121.4 (Duty to make SA return).

6.17.2 *Exceptional*

"Exceptional" is contextual, evaluative, and a matter of degree.

Para 22(5) sch 45 FA 2013 elucidates the word here:

> Examples of circumstances that may be "exceptional" are–
> (a) national or local emergencies such as war, civil unrest or natural disasters, and
> (b) a sudden or life-threatening illness or injury.

The point of saying that civil unrest, sudden illness etc, may be exceptional is it might have been argued that such matters are in fact not exceptional, or insufficiently exceptional: in practice, sadly, disasters of these kinds are all too common.

In *R v Kelly*:[41]

> We must construe 'exceptional' as an ordinary, familiar English adjective, and not as a term of art. It describes a circumstance which is such as to form an exception, which is out of the ordinary course, or unusual, or special, or uncommon. To be exceptional, a circumstance need not be unique, or unprecedented, or very rare; but it cannot be one that is regularly, or routinely, or normally encountered.

That seems self-evident.

The RDRM provides a self-evident example:

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
> For example, if an individual is a passenger on a commercial aircraft that is forced to make an emergency landing in the UK, and there is no available onward flight to their original destination for 2 days afterwards. The 2 days that would otherwise count as time spent in the UK would be ignored due to exceptional circumstances...

Outside the movies, emergency landings are, happily, exceptional (and more often due to medical emergencies than other reasons).

6.17.3 *Foreseeability*

In *A Taxpayer v HMRC*:[42]

> 147... There is no requirement in the statutory language for foreseeability

[41] [2000] QB 198 at p.208, cited in *A Taxpayer v HMRC* [2022] UKFTT 00133 (TC) at [143].

[42] [2022] UKFTT 00133 (TC). This will need to be reviewed when the case is final.

> or non-foreseeability to determine whether circumstances are "exceptional". Foreseeability is not the statutory test. It is true that foreseeability may be an element of exceptionality, but it is not a determining factor which, of itself, excludes the application of the exemption. For example, it may be ... that a non-resident has a UK-located family member who has a long-term degenerative disease. It may be foreseeable that that condition may worsen and become life-threatening. That does not, however, lead to the conclusion that when the condition worsens and becomes life-threatening the circumstances become non-exceptional simply because they were foreseeable...
>
> 148. Furthermore, the fact that some or all of the circumstances claimed to be exceptional may be foreseeable does not necessarily mean that those circumstances are within the control of the taxpayer. Whether those circumstances are beyond the taxpayer's control is a matter to be determined in the light of all the relevant facts. Certainly, foreseeability may be a relevant factor in this context but it is not a determining factor.[43]

6.17.4 *Para (a)[iii] & [iv]*

Para (a)[iii] The circumstances prevent P from leaving the UK
Para (a)[iv] P would not be present in the UK but those circumstances

These are distinct conditions, but are conveniently considered together.

In assessing whether circumstances "prevent" P from leaving the UK, it is appropriate to adopt the approach in the test of duress in criminal law, which is "whether a person of reasonable firmness, sharing the characteristics of P, would have responded to the situation by acting as P did."[44] It is helpful to have a short label for the situation where the

[43] The RDRM provides:

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
>
> ... the event or situation in question must be one over ... which cannot reasonably have been foreseen.
>
> **RDRM13260: Examples of circumstances not normally considered to be exceptional circumstances** [Dec 2021]
>
> Days spent in the UK will not be considered exceptional where the circumstances are not beyond the individual's control, or where they could have reasonably have been foreseen or predicted.

This needs to be rewritten, or, better, deleted, in the light of *A Taxpayer v HMRC*. The case is not yet final but HMRC do not appeal on this point.

[44] Halsbury's Laws of England , Volume 25 (Criminal law), para 27 (Duress by threats).

circumstances prevent P from leaving the UK, and I describe that as P's presence being **"forced"**.

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
> **Example 3** (Claude's car crash)

The facts (stripping out irrelevancies) are as follows:[45]

> C came to the UK 1 June intending to leave on 31 October.
> On 29 September C has an accident and is in hospital for 14 weeks.
> He leaves the UK on the day he is discharged.

The HMRC analysis is as follows:

> C has been in the UK for 220 days.
> C spent 14 weeks in hospital, but because his original intention was to stay in the UK until 31 October, only the days from 1 November up to the date of discharge can be ignored due to exceptional circumstances.

More analytically, until 31 October, C fails the condition in para (a)[iv], that "P would not be present in the UK but those circumstances".

> The maximum number of days in the tax year that can be ignored is 60.
> In this scenario C has 160 days counted as a day of presence in the UK.

HMRC accept that (subject to the 60-day cap)[46] the hospital days fall within the exceptional circumstances disregard.

The RDRM provides:

> **RDRM13250: Foreign and Commonwealth Office advice** [Dec 2021]
> Exceptional circumstances will generally not apply in respect of events that bring an individual back to the UK. However, there may be circumstances such as civil unrest or natural disaster where associated FCO advice is to avoid all travel to the region.
> Individuals who return to and stay in the UK while FCO advice remains at this warning level would normally have days spent in the UK ignored under the SRT, subject to the 60 day limit.

[45] The example in full (including its irrelevant detail) is as follows:
"C is retired and came to the UK for the first time on 1 June for a 5 month extended travelling holiday, intending to leave on 31 October.
On 29 September while travelling to Scotland C is involved in a car crash, suffering multiple injuries. He is in hospital for a total of 14 weeks and arranges to travel back to his home in France on the day he is discharged."

[46] See 6.17.7 (60-day cap).

The Manual provides a straightforward example of this factual scenario:

> **RDRM13250: FCO advice** [Dec 2021]
> **Example** (Philip - military coup)

The facts (stripping out irrelevancies) are as follows:[47]

> P works outside the UK. His wife and children live in the UK.
> In early July the FCO issued advice against all but essential travel to the country. P continued to work there.
> In mid-October the FCO upgraded their advice, warning against all travel to the country. P returned to the UK on 21 October.
> On 29 January the FCO downgraded their advice to avoid all travel to the country. P took the first available flight back.

The HMRC analysis is as follows:

> The days P spent in the UK were due to an exceptional circumstance beyond his control, and can be ignored for the purpose of the day counting tests of the SRT. However, the maximum period that can be ignored due to exceptional circumstances is 60 days. P was in the UK for 103[48] days during this period, which means P must count 43 days as days spent in the UK for the purposes of the SRT day counting tests.

It is clear that Para (a)[iv] is met: P would not be present in the UK but those circumstances. Here, HMRC also accept Para (a)[iii] is met: the

[47] The example in full (including its irrelevant detail) is as follows:
"P is a structural engineer, and has worked full-time abroad for many years. He is currently working on a project in Africa. His wife and children live in the UK.
In May the government of the country in which he is working is overthrown in a military coup. This initially gave rise to peaceful protests, but soon developed into increasing levels of civil unrest. In early July the FCO issued advice against all but essential travel to the country. P continued to work there.
By mid-October the country was on the verge of civil war, and the FCO upgraded their advice, warning against all travel to the country. P returned to the UK on 21 October.
Due to international intervention, by the end of January the following year, political stability had returned to the country. On 29 January the FCO downgraded their advice to avoid all travel to the country. P took the first available flight back and resumed work on 31 January."

[48] For completeness: It does not affect the point of the example, but the figure of 103 days is wrong. P arrived in the UK on 21 October. The example does not precisely identify the date he left the UK, but it was between 29 January (when FCO downgraded their advice) and 31 January (when P resumed work). Days spent in the UK were therefore between 100 and 102 days.

circumstances prevent P from leaving the UK. HMRC do not object on the basis that P could have arranged to live almost anywhere else in the world, though no doubt he could. That must be right, assuming that P's home is in the UK, which is suggested by saying that "His wife and children live in the UK." This illustrates that whether P is forced to be in the UK is assessed by reference to what a reasonable person would do.

In *A Taxpayer v HMRC*:[49]

> ... HMRC argued that the "exceptional circumstances" exemption applied only to persons who were already in the UK and, while they were in the UK, were overtaken by "exceptional circumstances" which prevented them from leaving. The exemption did not, according to HMRC, apply to a taxpayer who came to the UK because of the "exceptional circumstances" and who was then prevented from leaving by those same circumstances. ... we consider that there is no statutory justification for such a limitation of the test. ... paragraph 22(4) looks at why a taxpayer is in the UK at the end of a particular day and whether a taxpayer is prevented from leaving the UK at that time in order to determine the number of days spent in the UK. It does not look at why the taxpayer came to the UK in the first place or whether the taxpayer was already in the UK.

Similarly, the exemption could apply to someone whose home was in the UK, and who had been planning to leave, but was prevented due to civil unrest\natural disaster in the intended destination. There would be nothing to stop them going to a third country. But that still counts as exceptional circumstances which prevent P leaving the UK if P is *reasonably* prevented from leaving the UK.

A similar point arises in relation to illness/injury of a person's family members. The RDRM provides:

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
> There may also be limited situations where an individual who needs to stay in the UK to deal with a sudden or life threatening illness or injury to a spouse, person who they are living with as husband and wife, civil partner or dependent child; can have those days spent in the UK ignored under the SRT, subject to the 60 day limit.
>
> There may also be limited situations where an individual who comes back to the UK to deal with a sudden or life threatening illness or injury

[49] [2022] UKFTT 00133 (TC) at [151]. Note that this argument was contrary to the HMRC Manual example of Philip.

> to a partner or dependent child, can have those days spent in the UK ignored under the SRT subject to the 60 day limit.
> **Example 2(a)** (Henrik and Victoria - injury to minor daughter)

The facts (stripping out irrelevancies) are as follows:[50]

> H is a lone parent. V, his 13 year-old daughter, usually lives with him. V comes to the UK for a holiday. She has an accident and is taken to hospital with a suspected major injury.
> H travels to the UK, to be with V.
> H arranges for V to be moved back to Germany as soon as possible. This happens 3 days after the accident.

The HMRC analysis is as follows:

> The 3 days H spends in the UK with his daughter arranging her transfer, after this potentially life threatening[51] accident, would count as exceptional circumstances.

It is clear that Para (a)[iv] is met: H would not be present in the UK but the circumstances. Again, HMRC also accept Para (a)[iii] is met: the circumstances prevent H from leaving the UK. HMRC do not object on the basis that it would have been possible for the father not to visit his daughter. The requirements are not construed so strictly.

Why does the example specify that V is a lone parent? Suppose V lived with both parents, and H still came to the UK. I think H's visit is still forced, even if W could have come instead. But this illustrates how HMRC examples tend to posit strong facts, so as not to give any hostage to fortune.

> **Example 2(b)**
> A similar judgement would be applied had H and his daughter been in the

[50] The example in full (including its irrelevant detail) is as follows:
"H is working in the construction industry and lives in Germany. He has business interests in the UK and has spent 68 days working here in the current tax year. He is a lone parent and his children usually live in the family home in Germany with him. H sends V, his 13 year-old daughter, for a 2 week holiday at a UK summer holiday camp. Whilst undertaking one of the activities she has an accident and is taken to hospital with a suspected major neck injury. H immediately travels to the UK, to be with his daughter and arranges for her to be moved back to Germany as soon as possible. This happens 3 days after the incident. V remains in hospital in Germany for a further 4 weeks."

[51] This originally read "life changing": HMRC have strengthened the facts to avoid giving a hostage to fortune.

> UK when the accident had occurred. If H stays with his daughter beyond their planned return date,[52] until she can be transferred back to Germany, the additional days where he is present at midnight would count as exceptional circumstances.
>
> Had H chosen not to arrange for his daughter to be transferred to a German hospital, and had elected to stay in the UK until she was released from hospital here, the additional time spent in the UK would not be considered as exceptional circumstances.

It would be a matter of medical evidence at what point it becomes *reasonably* possible for H to return home, but that point should not be before the discharge from hospital.

In *A Taxpayer v HMRC*:[53]

> 149... HMRC submitted that the "exceptional circumstances" test did not encompass a person who came to the UK under a moral obligation or an obligation of conscience to care for a family member or other person. Instead, HMRC argued that the "exceptional circumstances" test only applied where a person came to and remained in the UK either under a legal obligation (e.g. to care for their minor child) or was physically prevented from leaving the UK (e.g. by a volcanic eruption which made flights impossible). HMRC based their submission on the word "prevent" which, so the argument ran, should be construed so as to preclude a moral obligation or an obligation of conscience...
>
> 150. ... It could hardly have been Parliament's intention to have required the "exceptional circumstances" test to be failed if, for example, a taxpayer thought it necessary to be present because of serious illness or at the death bed of a close relative. The word "prevent" can encompass all manner of inhibitions – physical, moral, conscientious or legal – which cause a taxpayer to remain in the UK.

On the facts of the case, the need to care for the taxpayer's twin, who needed help which no-one else could provide, and her minor children, constituted exceptional circumstances which qualified for relief. The FTT said that "it would be hard to imagine a more unjust conclusion than that advocated by HMRC".[54] The reader may agree with that sentiment. But HMRC may not, as they have appealed on this point, and the case is not yet final.

[52] The period before the planned return date does not meet the condition in para (a)[iv]; see the example of Claude's car crash, above.

[53] [2022] UKFTT 00133 (TC).

[54] *A Taxpayer v HMRC* [2022] UKFTT 00133 (TC) at [150].

6.17.5 *Para (b): Intention to leave*

The requirement in para 22(4)(b) is:

> P intends to leave the UK as soon as those circumstances permit.

The RDRM provides:

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
> For days spent in the UK due to exceptional circumstances to be ignored, an individual must intend to leave the UK as soon as those circumstances permit. If an individual does leave the UK once the exceptional circumstances have ended, HMRC will usually accept this as evidence of such an intention.

Conversely if the individual does not leave as soon as the circumstances permit, it may be inferred that they never did intend to leave, in which case none of the days qualify for exemption.

The RDRM provides an example where the individual originally intended to leave as soon as possible, but changed his mind:

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
> **Example 4**
> The circumstances are the same as example 3 [Claude's car crash[55]]. However, C's nephew, who lives in Wales, writes to him in hospital and suggests C should stay with him when C leaves hospital. C writes back on 1 December agreeing.
> From 1 December it is no longer C's intention to leave the UK as soon as the exceptional circumstances have come to an end; and so only the period 1 November to 30 November can be discounted as exceptional circumstances for SRT day counting purposes.

C would do better to leave the UK as soon as he recovers, and then visit the Welsh nephew on a subsequent occasion. How long a gap should there be? Strictly, one day away would suffice (or maybe even less?). But the reader may think that a little longer may be wise. Fortunately the problem will not often arise.

6.17.6 *Non-exceptional: examples*

The RDRM provides:

[55] See 6.17.4 (Para (a)[iii] & [iv]).

> **RDRM13260: Examples of circumstances not normally considered to be exceptional circumstances** [Dec 2021]
> Life events such as birth, marriage, divorce and death, are not routinely regarded as exceptional circumstances.

A visit to the UK on the occasion of the birth of a grandchild may not be exceptional enough, in the absence of special circumstances. But if a visit for the illness or accident of close family is sufficient (see above) why not the same for a visit to attend the funeral? One may be getting close to the border, here, and the issue is fact sensitive. "Not routinely" is not much guidance, but it may be the most that can be said.

> Choosing to come to the UK for medical treatment, or to receive elective medical services such as dentistry, cosmetic surgery or therapies will not be regarded as exceptional circumstances.

There are two possible reasons why the relief may not apply for less serious medical conditions such as routine dentistry:
(1 The condition may not be exceptional.[56]
(2) The condition may not prevent P from leaving the UK.

Suppose however:
(1) a person is suffering from a serious, life-threatening condition, which qualifies as exceptional circumstances, but
(2) they chose to come to the UK for treatment (to ensure continuity of treatment with their own doctor) when they might have sought treatment elsewhere.

The treatment, at least once it starts, does prevent P from leaving the UK. It might be said that the effective reason that the person is in the UK is not the treatment, but that they chose to come here for the treatment. But that does not matter. The requirement of para (a)[iv] is still met that "P would not be present in the UK but for the exceptional circumstances". That is a looser test of causation, which is met.

> Travel problems, for example a delayed or missed flight due to traffic disruption, train delays or cancellations, or a car breakdown, will not be considered as exceptional circumstances, nor will delays in obtaining visas.

Ordinary travel problems are (by definition) not exceptional, but it is a

[56] But it is a question of fact, and it is possible that a dental emergency may be exceptional circumstances.

question of fact and degree. HMRC (rightly) accepted that individuals prevented from leaving the UK because of travel disruption caused by the Eyjafjallajökull volcanic eruption qualified for the exceptional circumstances disregard.[57]

6.17.7 *60-day cap*

Para 22(6) sch 45 FA 2013 caps the number of exceptional days allowed:

> For a tax year–
>
> (a) the maximum number of days to which sub-paragraph (2) may apply in reliance on sub-paragraph (4) is limited to 60, and
>
> (b) accordingly, once the number of days within sub-paragraph (4) reaches 60 (counting forward from the start of the tax year), any subsequent days within that sub-paragraph, whether involving the same or different exceptional circumstances, will count as days spent by P in the UK.

The RDRM provides a simple example. The facts are the same as for Claude's car crash:

> **RDRM13240: What are exceptional circumstances** [Dec 2021]
> **Example 1 (Anna - explosion)**

The facts (stripping out irrelevancies) are as follows:[58]

> A suffers an accident on a boat. She is found unconscious. The emergency services airlift A to the UK, where she remains for 5 months.
> A leaves the UK as soon as she is discharged from hospital.
> A has been in the UK for 202 days.

The HMRC analysis is as follows:

> The disaster would be considered to be an exceptional circumstance

[57] See the 2012/13 edition of this work para 3.26.1 (Volcanic Ash: disruption to air travel 2010/11).

[58] The example in full (including its irrelevant detail) is as follows:
"A is returning to her home in Denmark having spent her 7 week summer holiday working in the UK. This was her first visit to the UK.
On her boat journey home there is an explosion in the engine room. Emergency rescue services attend the vessel, and A is found unconscious and badly burned. The emergency services make the decision to airlift A to a specialist burns unit in the UK, where she remains for 5 months. A returns to Denmark as soon as she is discharged from hospital.
A has been in the UK for 202 days."

> beyond A’s control. However, the maximum number of days that can be ignored towards days spent in the UK is 60. So A has 142 days which count as days spent in the UK.

What if A had remained conscious? Once again, the example posits easy facts and avoids harder problems.

6.17.8 *Exceptional: Record keeping*

RDRM12930 comments on record keeping. If appropriate, the individual should keep information and records relating to:

- what their circumstances were
- what did they do to mitigate them where that was possible, for example making alternative travel arrangements

6.17.9 *Exceptional circumstances ignored*

The RDRM provides:

> **RDRM13220: where exceptional circumstances can be taken into account when determining the number of days spent in the UK** [Dec 2021]
> The following parts of the SRT allow for days attributable to exceptional circumstances to be discounted:
> - First automatic UK test (RDRM11320) – an individual spends 183 days or more in the UK
> - First automatic overseas test (RDRM11120) – an individual spends fewer than 16 days in the UK
> - Second automatic overseas test (RDRM11130) – an individual spends fewer than 46 days in the UK
> - Third automatic overseas test (RDRM11140) – number of days an individual spends in the UK is fewer than 91, excluding qualifying days under the deeming rule
> - Fourth automatic overseas test for deceased individuals (RDRM11920) – an individual spent less than 46 days in the UK
> - Sufficient ties tables (RDRM11520) – number of days an individual spends in the UK compared against the number of ties they have
> - 90 day tie (RDRM11570) – an individual spends more than 90 days in the UK in the previous tax year, or the one before that
> - Split year cases 1 and 2 (RDRM12050 and RDRM12110) – permitted limit of number of days an individual spends in the UK, excluding qualifying days under the deeming rule
> - Split year case 3 (RDRM12130) - an individual spends fewer than 16 days in the UK
> - Split year cases 4, 5 and 8 (RDRM12150 , RDRM12170 and RDRM12270) –

proportionately reduced number of days an individual spends in the UK for sufficient ties

- Split year cases 6 and 7 (RDRM12190 and RDRM12240) – permitted limit of number of days an individual spends in the UK, excluding qualifying days under the deeming rule

6.17.10 *Exceptional circumstances not ignored*

However there are many SRT rules for which exceptional circumstances do not provide a defence:

RDRM13230: where exceptional circumstances cannot be taken into account when determining number of days spent in the UK [Dec 2021][59]
The following SRT tests do not allow for the deduction of days attributable to exceptional circumstances to be discounted:

[1] Second automatic UK test (see RDRM11330)

- An individual is present in their home on at least (for UK homes), or fewer than (for overseas homes) 30 separate days
- Period of 91 consecutive days, at least 30 of which fall within the tax year

[2] Third automatic UK test (see RDRM11370)

- An individual works sufficient hours in the UK, as assessed over a period of 365 days
- 75% of the total number of days
- At least 1 day in the tax year is a day on which an individual does more than 3 hours of work in the UK
- Significant break – 31 days go by

[3] Third automatic overseas test (see RDRM11140)

- Significant break – 31 days go by
- Number of days on which an individual does more than 3 hours work in the UK is fewer than 31

[4] Full-time work – 15 day gap between employments, and 30 day maximum number of days that may be subtracted for gaps between employments (see RDRM11150 or RDRM11380)

[5] Family tie (see RDRM11530)

- An individual spends time with their child in person on 60 days or fewer, for all or part of a day
- An individual's child spends fewer than 21 days in the UK outside term-time

[6] Accommodation tie (see RDRM11550)

- Continuous period of 91 days

[59] I have amended the layout for the sake of clarity.

- Gap of 15 days or fewer

[7] Work tie – an individual works in the UK for at least 40 days (see RDRM11560)

[8] Country tie – midnight test – greatest number of midnights (see RDRM11580)

[9] Deeming rule – if an individual has more than 30 qualifying days, the excess are treated as if the individual were in the UK at the end of the day, subject to the conditions set out in RDRM11720.

That rather reduces the value of the exceptional circumstances disregard.

6.18 Covid

6.18.1 *Covid: Exceptional circumstances*

RDRM specifies five straightforward cases where Covid-related circumstances meet the statutory requirements. I set these out here. But these cases are not a comprehensive list of when Covid constitutes exceptional circumstances, and do not claim to be:

> **RDRM11005 Coronavirus (COVID-19)** [Dec 2021]
> Whether days spent in the UK can be disregarded due to exceptional circumstances will always depend on the facts and circumstances of each individual case.

I set out the guidance below, but ultimately the question to consider is not whether P's circumstances fall within one of the HMRC specified cases, but whether they meet the statutory requirements set out above.

In considering whether a person is forced to be in the UK due to Covid, it should be assumed that the person will comply with the law and follow government guidance. It does not matter that a person might theoretically be able to leave the UK in breach of the law, or in breach of government guidance.

6.18.2 *Quarantine/self-isolation*

> **RDRM11005 Coronavirus (COVID-19)** [Dec 2021]
> ... if you:
> [1] are quarantined or advised by a health professional or public health guidance to self-isolate in the UK as a result of the virus...
> the circumstances are considered as exceptional.

> **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Dec 2021]
> **4. Does UK wide Government advice on self-isolation mean that**

> **exceptional circumstances apply?**
> If your stay in the UK has been extended because you are self-isolating in line with government advice, the period of self-isolation after your original planned departure date will be covered by exceptional circumstances.

6.18.3 *Advice not to travel*

> **RDRM11005 Coronavirus (COVID-19)** [Dec 2021]
> ... if you ...
> [2] find yourself advised by official Government advice not to travel from the UK as a result of the virus...
> the circumstances are considered as exceptional.

The RDR Manual provides:

> **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Dec 2021]
> ... **1. Are travel restrictions due to the COVID-19 pandemic counted as exceptional circumstances for the statutory residence test?**
> ... Circumstances are considered exceptional where you find yourself advised by official government advice not to travel from the UK as a result of the virus. For example, on the 17 March 2020 the Foreign and Commonwealth Office (FCO) advised British nationals against all but essential international travel during the pandemic.

Para [3] could apply to anyone in the UK, for the period that:

(a) The Government advised against all but essential travel, or
(b) Travel was prohibited in the absence of a reasonable excuse. What constitutes a reasonable excuse will partly depend on government guidance, which has varied over time. From 26 March to 1 June 2020, travel was permitted only for limited reasons, eg for work which could not be done from home.[60] Leaving one's home in the UK was in principle unlawful.

6.18.4 *Closure of borders*

> **RDRM11005 Coronavirus (COVID-19)** [Dec 2021]
> ... if you ...
> [3] are unable to leave the UK as a result of the closure of international

[60] Reg 6 Health Protection (Coronavirus, Restrictions) (England) Regulations 2020 (26 March 2020). Lockdown in the UK started 23 March 2020, with some restrictions in effect earlier.

> borders...
> the circumstances are considered as exceptional.

The RDR Manual provides:

> **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Dec 2021]
> **2. What does HMRC mean by closure of international borders?**
> Circumstances are considered exceptional where you are unable to leave the UK as a result of the closure of international borders.
> Many territories will continue to allow citizens, permanent residents or nationals to return to those territories even with wider border restrictions in place. However, if you are unable to leave the UK as a result of the closure of international borders, for exceptional circumstances to apply, you must be able to demonstrate that you have made every effort to leave once those restrictions have been lifted.

6.18.5 *Return at request of employer*

> **RDRM11005 Coronavirus (COVID-19)** [Dec 2021]
> ... if you ...
> [4] are asked by your employer to return to the UK temporarily as a result of the virus
> the circumstances are considered as exceptional.

6.18.6 *Return to support family*

> **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Dec 2021]
> **7. I came to the UK to support my vulnerable family members who needed assistance during the COVID-19 pandemic. Would this be considered an exceptional circumstance?**
> Certain vulnerable people have been asked to 'shield' or 'self-isolate' due to the COVID-19 pandemic. Whether or not the impact of those circumstances is exceptional to you, will depend on the facts and circumstances of your case. You will need to be able to demonstrate why it was necessary for you to come and remain in the UK to provide support for a vulnerable member of your family.
> Documentation to support your case may include, but is not limited to, a letter, email or text message from a medical professional telling the family member to shield or self-isolate, and evidence from the local authority that help or support was not available to them, or confirmation that they were relying on you to provide the support.

See the HMRC example of Henrik at 6.17.4 (Para (a)[iii] & [iv]).

6.18.7 *Covid: other residence rules*

Covid provides no relaxation or relief for tax rules beyond the exceptional circumstances rule. For instance, there are no extensions to the 60-day cap for exceptional circumstances,[61] or the 30 day UK workday limit[62]. The minutes of the Joint Expatriate Forum on Tax & NICs provide:

> **Question**: Is there going to be any movement from HMRC on the 60 days for exceptional circumstances, particularly given we are in June now? For people this year, still stranded in the UK, that is a key question. Also, regarding full-time work abroad, are HMRC are reviewing any concessions where an individual is remote working in the UK and has gone over the 30 workdays?
> **HMRC Answer**: The 60 days is a statutory rule. We have no latitude to impact that, and there is nothing in line to amend the legislation in respect to that at the moment. The same applies to working in the UK for 31 or more days. Discretion can be exercised with exceptional circumstances, however as statutory issues are not within our gift, it would be a ministerial consideration. There are also no plans to change the legislation in respect of a 'significant break'...
> There are no plans to change the legislation in respect of the 60 days and UK workdays, and we think the SRT is written broadly enough to accommodate people having to stay in the UK a little bit longer. We are only at the start of the tax year, and so people have the rest of the year to plan their presence here.[63]

Lobbying on that issue was not successful. The Manual now restates HMRC's approach:

> **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Dec 2021]
> ... The maximum of 60 days in a tax year that can be disregarded due to exceptional circumstances will continue to apply...
> Any day on which you work in the UK for more than 3 hours will count as a UK workday, even if they are days which have been disregarded for other tests due to exceptional circumstances...
> **9. I am normally non-resident for UK tax purposes. My company**

[61] See 6.17.7 (60-day cap).

[62] See 6.8.5 ((c): Less than 31 UK workdays).

[63] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

> **have asked me to come to the UK to work because of COVID-19. How will this impact my residence status?**
> Returning to the UK may result in a significant break in your overseas work (see RDRM11760) and you may no longer meet the 3rd automatic overseas test (working full-time abroad). Any day on which you work in the UK for more than 3 hours will count as a UK workday, even if they are days which have been disregarded for other tests due to exceptional circumstances.
> ... A change in anticipated residence in 2020-2021 may affect the prior year if it was a split year, see RDRM13230.
> **11. As a trustee of a non-UK resident trust, if I am unable to leave the UK due to COVID-19 travel restrictions, how will my presence in the UK affect the trust?**
> There are no special rules for determining the residence status of a trustee, the SRT rules apply. Days spent in the UK as a result of exceptional circumstances will be considered in determining whether you have become UK resident. If you become UK resident, this could affect the residence of the trustees as a body.
> **13. If I was planning to leave the UK during 2020-2021 so that I do not become deemed domiciled in 2021-2022, but I am unable to do so because of the restrictions currently in place, how am I affected?**
> There have been no changes to the deemed domiciled rules...
> **15. I usually carry out the duties of my employment both in the UK and abroad. I am non-UK domiciled and the duties I carry out abroad are taxed on the remittance basis. If I am unable to travel due to travel restrictions, how will I be taxed if I carry out my overseas duties in the UK?**
> There have been no changes to the current legislation. The earnings for the duties you perform in the UK will be treated as earnings in respect of UK duties. These earnings will not be eligible for the remittance basis and they will be taxed on the arising basis.
> **17. How will the employment article within a treaty be applied while I am working in the UK but for an overseas employer?**
> There is no change to the employment article and how it applies will depend on your circumstances.

In short: it is largely a matter of business as usual.

See too 9.31 (Covid and treaty-residence).

6.19 Deeming rule (frequent visits)

Para 23 sch 45 FA 2013 provides:

> (1) If P is not present in the UK at the end of a day, that day does not

> count as a day spent by P in the UK.
> (2) This is subject to the deeming rule.

Para 23 sch 45 FA 2013 provides:

> (3) The deeming rule applies if—
> (a) P has at least 3 UK ties for a tax year,
> (b) the number of days in that tax year when P is present in the UK at some point in the day but not at the end of the day ("qualifying days") is more than 30, and
> (c) P was resident in the UK for at least one of the 3 tax years preceding that tax year.
>
> (4) The deeming rule is that, once the number of qualifying days in the tax year reaches 30 (counting forward from the start of the tax year), each subsequent qualifying day in the tax year is to be treated as a day spent by P in the UK.
>
> (5) The deeming rule does not apply for the purposes of sub-paragraph (3)(a) (so, in deciding for those purposes whether P has a 90-day tie, qualifying days in excess of 30 are not to be treated as days spent by P in the UK).

The label "deeming rule" is opaque; I adopt the statutory term but add in brackets: "frequent visits".

6.20 "Home"

6.20.1 *Why "home" matters*

"Home" matters for many tax purposes, in particular:

Purpose	**Wording (in short)**	**See para**
The SRT:		
UK test 2	P has a UK home	6.11
UK test 4	P's home was in the UK in year of death	6.33.4
Accommodation tie	P's home is in the UK	6.29
Split-year rules:		
Case 2	No home in UK	10.7.4
Case 3	T ceases to have home in UK	10.8.2
Case 4	T has a home in UK	10.9.2
Case 7	T has no home in UK	10.12.3
Case 8	T has a home in UK	10.13.2
Treaty-residence	Permanent home available to T	9.12
Child's domicile, if parents living apart		4.17.3
Deductibility of travel expenses for employment income		35.9; 35.10

The word *home* is also used:

(1) as a synonym for private-residence (ie having a home is the same as having a private-residence);[64] and
(2) as a synonym for territory-residence (ie having a home in a territory is synonymous with residing in the territory)[65]

Para 25 sch 45 FA 2013 elucidates the meaning of "home". This provision only applies for the purposes of sch 45 (SRT, split year rules) but (with the exception of the rule relating to holiday homes) it sets out the normal meaning of the word "home", and so there is not much difference between the meaning of home in sch 45 and the meaning elsewhere.

Also see 6.35.2 (Record keeping: Home).

6.20.2 *Home: nutshell definitions*

In *Re Y*:

> 'Home' is defined thus in the Shorter Oxford English Dictionary:
>
> > "A dwelling-place, house, abode: the fixed residence of a family or household; one's own house; the dwelling in which one habitually lives, or which one regards as one's proper abode."
>
> It is a definition which, in my judgment, contains the essential elements of a "home" as it is to be understood for present purposes.[66]

The Law Commission observes:

> "Home" conveys ... the combined ideas of physical presence and emotional link.[67]

The point is encapsulated in the folk saying that "home is where the heart is". In the dictionary definition set out above, home is a place which one *regards* as one's proper abode. The views of the individual are therefore important. It would be surprising if a place which an individual regards as home is not in fact their home. The views of the parties as to which property was the main residence were held to be relevant in *Frost v Feltham*; see 55 TC at p.16; the same applies *a fortiori* in determining whether a property is a "home".

A New Zealand case offers a metaphor:

[64] See 6.21.3 (Home/residence compared).

[65] See 4.6 (Domicile-residence).

[66] [1985] Fam 136 at p.140.

[67] *The Law of Domicile* (1987) Law Com 186 at para 4.20 *http://www.scotlawcom.gov.uk/download_file/view/228/*

> the location of what for the present constitutes the centre of gravity of the domestic life of the taxpayer—the axis around which his domestic life revolves.[68]

I am not sure how helpful that would be in a borderline case.

Fox discusses "home" from an interdisciplinary viewpoint, and concludes that the concept "represents a complex amalgam of financial, practical, social, psychological, cultural, politico-economic, and emotional interests to its occupiers".[69]

The fact that one does not have a room set aside for oneself in a "home" does not shed much light on whether it is a "home". The more important question is whether space is available when one wishes to use it. In Robert Frost's lines:

> Home is the place where, when you have to go there,
> They have to take you in.

6.20.3 *HMRC examples: Disclaimer*

The RDRM provides the usual disclaimer:

> **RDRM13030 The second automatic UK test and the context of a 'home'** [Dec 2021]
> As the meaning of 'home' can vary according to its context, it is not possible for this guidance to provide an absolute definition of the term. What this guidance does is to give indicators outlining the characteristics that a home will generally have.
> There are some general examples of what a home may or may not be. Whether a place is or is not a home will always be dependent on the facts and circumstances of its use by the individual. HMRC may choose to enquire into those facts and circumstances.

6.20.4 *Any form of home*

Para 25(1) sch 45 FA 2013 provides:

> A person's home could be
> [1] a building or
> [2] part of a building or, for example,

[68] *Geothermal Energy New Zealand Ltd v CIR* [1979] 2 NZLR 324 approved *O'Brien v Quigley* [2013] IEHC 398 at [31] - [33].

[69] Fox, "The meaning of home: a chimerical concept or a legal challenge?" [2002] JLS 580.

> [3] a vehicle,
> [4] vessel or
> [5] structure of any kind.

OECD Model Commentary provides:

> 13 As regards the concept of home, it should be observed that any form of home may be taken into account (house or apartment belonging to or rented by the individual, rented furnished room).

This is making a similar point in the context of treaty-residence. The rule in para 25(1) reflects the general meaning of the word.

The RDRM gives a straightforward example of a caravan:

> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
> Example 1 (Jim)
> J lives in a mobile home with his wife. They travel extensively throughout the UK to wherever J can find work. They keep their personal belongings in the mobile home, take most of their meals there, and with the exception of their annual holiday abroad, sleep in it every night. It is where J and his wife spend most of their time when J is not working. It is their home.

6.20.5 *Period of occupation*

One characteristic of a "home" is that one lives there, with some degree of permanency. In *Re Y*:[70]

> ... any individual may have two homes; but each, in my judgment, to be properly so called, must comprise some element of regular occupation (whether past, present, or intended for the future, even if intermittent), with some degree of permanency, based upon some right of occupation whenever it is required, where ... "You find the comforts of what is known as home"; the fixed residence of a family or household.

How long is needed? A few days or weeks is insufficient, but 6 months is clearly enough. In *Nemcova v Fairfield Rents Ltd*: [71]

> Occupation as a home requires a degree of permanence. This is likely to be met if [the appellant] were to sublet the Flat on an assured shorthold tenancy for a term of, say, six months. It is not, in our view, met in the

[70] [1985] Fam 136 at p.140.
[71] [2016] UKUT 303 (LC) at [15].

> type of short term letting entered into by the respondent where the occupants only stay for a few days or possibly weeks. We do not think it conceivable that such an occupant would think of themselves as using the Flat as a home.

However, the *amount* of time that one spends in a place may not shed much light on whether that place is a "home". One can spend relatively little time in a place which is still a home, or even a main or principal residence.[72] Para 25(2) sch 45 FA 2013 acknowledges the point without providing any further guidance:

> Whether, for a given building, vehicle, vessel, structure or the like, there is a sufficient degree of permanence or stability about P's arrangements there for the place to count as P's home (or one of P's homes) will depend on all the circumstances of the case.

The RDRM gives an example of an international commuter spending roughly equal time in two homes:

> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
> Example 3 (William)
> W has business interest in both Switzerland and the UK. He flies to Switzerland each Monday returning to the UK every Thursday. In Switzerland he lives in a rented flat. When in the UK he lives with his family at the family home, which he has owned for many years.
> In this situation both properties are his homes.

That is an easy case.

A home ceases to be a home if it is let to a third party:

> W subsequently decides he does not need to spend so much time in Switzerland, and starts to travel there less frequently. He sub-lets his flat in Switzerland retaining no rights to use it, choosing instead to stay in whatever hotel can accommodate him.
> He now only has 1 home, which is in the UK.

The next example concerns a relatively short absence (2 months):

> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
> Example 4 (Elizabeth)
> E is seconded to New York for 2 months by her UK employer. She stays

[72] *Frost v Feltham* 55 TC 10, see 4.11.3 ("Chief" residence).

> at a hotel when she is there. Prior to her secondment she lived with her husband in their home in London. Her husband continues to live and work in the UK. When E returns to the UK after her secondment she returns to live with her husband in their London home.
>
> The London house was E's home throughout the period of her secondment.

The next example concerns a longer and more indefinite absence:

> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
>
> Example 5 (Asif)
>
> A has lived and worked in the UK for many years, occupying the same apartment in Liverpool since the day he arrived here. A's father lives in Sweden and is seriously ill. Ten months ago A decided to take a career break to care for his father and moved to Sweden. He does not know how long he will be out of the UK.
>
> Since moving to Sweden A has not returned to Liverpool, but his apartment remains empty and available for him to return to whenever he wants.
>
> In this situation A will have a home both in Liverpool and Sweden, even though he is spending all of his time in Sweden.

The next example concerns absence during temporary building work:

> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
>
> A place that is used as a home will remain a home even if it is temporarily unavailable, for example, because of damage or renovation work.
>
> Example 6 (Rachel and Tom)
>
> R and T's kitchen and dining room have suffered flood damage. The estimated clean-up and repair operation will take 6 weeks, so they stay with R's parents while the work is being done.
>
> The property will remain their home even though R and T are unable to stay there for the time being.

That seems an easy case.

Building work *before* moving into a home is different:

> An individual's home starts to be their home as soon as:
>
> - it is capable of being used as their home, for example, individual has taken ownership of it, even if it is temporarily unavailable because of renovation
> - they actually use it as their home

> If the first point above is satisfied, but in fact the individual never actually uses it as their home, then it will not be the individual's home.
>
> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
>
> Example 7 (Aneta)
>
> A moved from Poland to the UK and she completed the purchase of her new house on 1 June. Whilst it was empty she stayed with friends, until her belongings arrived. These were moved in by the removal firm on 15 June.
>
> A stayed in her new home overnight that night. However, as she had arranged to have some extensive refurbishment done to her bathrooms and kitchen, she stayed in a local hotel and with friends while the main works were carried out. She moved into her home on a permanent basis on 15 July.
>
> For SRT purposes HMRC would consider that the house became A's home from 15 July.
>
> The key points are that:
>
> - a place must be capable of being used as a home, even if it is temporarily unavailable
> - an individual must actually use it as a home.

The rule in para 25(2) represents the general meaning of the word "home".

Two DTA cases are consistent with this guidance, and illustrate how the issue is multi-factorial and fact sensitive.

In *FFF v IRC*[73] the taxpayer took a 3 year post in Fiji (later extended). He retained the property in New Zealand which had been the family home. He conducted building works at the property, expected to be a six-month project, but matters dragged on, as commonly happens. The building work was to enhance the property as his family home, and on return to New Zealand he returned to the property. In the meantime he lived in accommodation provided by his employer in Fiji, which did not constitute a home. In these circumstances the taxpayer continued to have a home in New Zealand throughout the rebuilding works.

Contrast *O'Brien v Quigley*.[74] Here the taxpayer, who did have a home in Portugal, purchased a property in Ireland in May 2000, commenced major work in June 2000, and moved into the property in 2002. The property was not his home prior to moving in, in 2002.

[73] [2011] NZTRA 8. The reader may think this a borderline case.

[74] [2013] IEHC 398; and see Avery Jones case note in 19 ITLR 605.

6.20.6 *Holiday home*

Para 25(3) sch 45 FA 2013 provides:

> But somewhere that P uses periodically as nothing more than a holiday home or temporary retreat (or something similar) does not count as a home of P's.

The RDRM provides:

> **RDRM13060 What is not considered a home for the purposes of the SRT** [Dec 2021]
> [The Manual sets out para 25(3) and continues:] So a holiday home where an individual spends time for occasional short breaks, and which clearly provides a distinct respite from their ordinary day to day life, will not be a home.
> However, if there comes a time when an individual's use of a holiday home or temporary retreat changes, so that it is used as a home, it will become a home from the time of the change. It will then continue to be a home until such time as circumstances change again, and it ceases to be used as a home.
> Example 3 (Jenny)
> J lives in Birmingham and works from home. She also owns an apartment in Spain, which she rents out apart from 2 to 3 weeks a year when she takes her holiday there. The Spanish property is not her home.

That is an easy case as the property is let out except for the 3 weeks it was occupied by J. But under para 25(3) the Spanish property would not be J's home if J occupied it for her 3 week holiday, and it was either empty or used by other members of J's family or friends for the rest of the year. In this respect it might be that the rule in para 25(3) might not represent the natural meaning of "home". That is, the property on those facts might be a home available to J for DTA purposes even though it was not a home for SRT purposes.

The HMRC example continues:

> However, J then decides to live in the Spanish apartment throughout the British winter time, from October to March. Her use of the property has changed from being somewhere she used as an occasional short break, to somewhere she uses as a home for part of the year. The property is her home from the point she commences using the property as her home.

6.20.7 *No ownership requirement*

Para 25 sch 45 FA 2013 provides:

> (4) A place may count as a home of P's whether or not P holds any estate or interest in it (and references to "having" a home are to be read accordingly).
> (5) Somewhere that was P's home does not continue to count as such merely because P continues to hold an estate or interest in it after P has moved out (for example, if P is in the process of selling it or has let or sub-let it, having set up home elsewhere).

The rules in para 25(4)(5) represent the general meaning of the word "home".

A house belonging to parents will be the home of children who live there:

> **RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]
> Example 2 (Mary)
> M comes back to the UK to take up employment after spending 3 years studying abroad. She has given up the tenancy on the flat she occupied abroad and moves into her parent's house. Her parent's house is her home.

The RDRM provides:

> **RDRM13060 What is not considered a home for the purposes of the SRT** [Dec 2021]
> If an individual moves out of their home completely, and makes it available to let commercially on a permanent basis; it will not be their home during the period it is let unless, they or their family retain a right to live there.
> This can happen, for example, where the rental agreement permits the individual to use the property or part of the property as living accommodation.
> Example 1 (Ivan)
> I left the UK to work in Germany. He lets the flat he previously lived in to a tenant on a 2 year lease. After 18 months I is made redundant and returns to the UK. The rental agreement on his flat gave exclusive use of the property to the tenant, so I arranged to stay with relatives and friend until the lease expires. For the period his property was let, it is not his home.
> However, if the rental agreement had allowed I to use the flat and he had stayed there when he visited the UK, it would have remained his home throughout.
> A place that has never been capable of functioning as a home cannot be a home. For example, a property purchased in such a state of disrepair that it is not capable of being lived in as a home, is not a home, until such time as it becomes habitable.

> If an individual completely moves out of a property and make no further use if it whatsoever, it will no longer be their home.
> **RDRM13060 What is not considered a home for the purposes of the SRT** [Aug 2019]
> Example 2 (Harry)
> H's new job requires him to travel extensively around Europe. He spends some time working in the UK, but most of his work is carried out in other countries. He decides to sell his UK property. On 3 June he puts his furniture and other belonging in storage, and 2 weeks later he hands the keys to his estate agent.
> He did not return to his UK property after 3 June, and stayed in hotels or with friends, on the occasions he came back to the UK. The property is not his home from 3 June, the date H put his furniture and belongings into storage.

It makes no difference whether a property is owned by an individual or by a company of which the individual is the ultimate beneficial owner.[75]

6.20.8 *No kitchen*

Uratemp Ventures v Collins[76] decided that a dwelling (ie a home) does not require a kitchen. The rhetoric to fine to omit, though the point will not often arise in a tax context:

> According to the Book of Common Prayer, "the fir trees are a dwelling for the storks" (Psalm 104); while W. S. Gilbert condemned the billiard sharp "to dwell in a dungeon cell" (The Mikado). It is hardly necessary to observe that Victorian prison cells did not possess cooking facilities... An earlier and greater poet wrote of Lucifer being hurled "to bottomless perdition, there to dwell in adamantine chaos and penal fire": (Paradise Lost).
> ... his home is not the less his home because he does not cook there but prefers to eat out or bring in ready-cooked meals.

6.21 "Home" vocabulary compared

I noted at the start of this chapter that "home" is one of cluster of synonyms or near synonyms, such as residence and dwelling. This section considers what differences there may be between these terms. This question matters, as so far as the words are the same, cases and guidance

[75] This is self-evident, but if authority is needed, see *O'Brien v Quigley* [2013] IEHC 398 at [49].

[76] [2001] UKHL 43 at [30].

on, say, what constitutes a residence for CGT private residence relief,[77] would be relevant in determining what is a home; and vice versa. And more generally, it is good to know what we are talking about.

I am here considering the general sense of these terms. Of course, the context, or a statutory definition may alter the general sense. In particular, para 25 sch 45 FA 2013 elucidates the meaning of home for the SRT and has no equivalent elsewhere. But most of para 25 represents the usual meaning of home, except for the exclusion of holiday homes: a holiday home is not a home for the SRT, but may be a home in the general sense.

There may be reasons for selecting any particular term. In the SRT and the OECD Model the word "home" is better than "private residence", because the legislation uses the word "residence" in the sense of tax residence. The drafter of the SRT may have had precedent of the OECD Model in mind when selecting the term "home".

When discussing a statute, it is better to use the statutory term, whichever it may be.

6.21.1 *Home: SRT/DTA compared*

According to the RDRM, "home" in DTAs has a different meaning from "home" in the SRT:

> **RDRM13030: the context of a 'home'** [Dec 2021]
> The concept of home as described in this guidance relates only to the SRT. The guidance does not apply for the purpose of applying the Residence Article under a double taxation agreement. Double taxation agreements have additional qualifiers that are not included as part of the SRT and so the 2 terms do not have the same meaning.

The differences are minor ones:

(1) The question for the OECD Model is whether a person has a permanent home *available*. A dwelling which has never been occupied, but which is ready for occupation, would be a home for the OECD Model but for the SRT.

(2) As noted, para 25 sch 45 FA 2013 applies for sch 45 but not for DTAs. Most of para 25 represents the usual meaning of home, but a holiday home (excluded for the SRT) may be a home for the DTA.[78]

[77] See 59.2 ("Residence").

[78] A further apparent difference is that the expression in the OECD Model is "*permanent* home"; but "permanent" does not add anything. Temporary accommodation does not constitute a "home" at all. See 6.20.5 (Period of

Subject to those points, it is suggested that the meaning of home is the same in both contexts.

6.21.2 *Home/dwelling compared*

"Dwelling" is the same as home. In *Uratemp Ventures v Collins:*[79]

> The words "dwell" and "dwelling" are not terms of art with a specialised legal meaning. They are ordinary English words, even if they are perhaps no longer in common use. They mean the same as "inhabit" and "habitation" or more precisely "abide" and "abode", and refer to the place where one lives and makes one's home....
> ... residential accommodation is "a dwelling" if it is the occupier's home (or one of his homes). It is the place where he lives and to which he returns and which forms the centre of his existence.

6.21.3 *Home/residence compared*

Is there a difference between:
(1) "home" (in the SRT or elsewhere) and
(2) "residence" (in the sense of private residence[80]) or dwelling-house?

There could be a difference of nuance, for while a home must be a residence, the word home is more emotive and perhaps a residence need not be a home. This view is supported by *Uratemp Ventures v Collins:*[81]

> The words "dwell" and "dwelling" ... mean the same as "inhabit" and "habitation" or more precisely "abide" and "abode", and refer to the place where one lives and makes one's home. They suggest a greater degree of settled occupation than "reside" and "residence" ...

And again, in *Nemcova v Fairfield Rents Ltd*[82]

> The covenant refers explicitly to use 'as a private residence'. It does not refer to the word 'home', nor does it require the occupier, in terms, to use the premises as his or her home. It is important to be extremely careful not to gloss the terms of the clause so as to impose a requirement that was not intended. It is necessary to take care in importing the concept of "home"... That concept may carry with it imputations of

occupation).

[79] [2001] UKHL 43 at [30].

[80] See 6.1 (Concepts of residence).

[81] [2001] UKHL 43 at [30] - [31].

[82] [2016] UKUT 303 (LC) at [47].

> permanence, personal attachment, emotional ties or exclusivity. None of those are necessarily inferred by the words actually employed. The question to be asked is not whether the premises are being used as the occupier's home but whether they are being used as a private residence.

But it is considered that the difference is too slight to bear any weight, given the general vagueness of both words. The words have essentially the same meaning: they as close as makes no difference. (Are there *any* two English words which are *completely* synonymous? Discuss).

The CG Manual takes this view:

> **CG64435 Meaning of residence: judicial interpretation** [Jul 2019]
> The scheme of private residence relief was summarised by Brightman J in *Sansom v Peay* (52 TC 1) as,
>
> > "To exempt from liability to Capital Gains Tax the proceeds of sale of a person's home."
>
> Here Brightman J uses the word 'home' in substitution for the word 'residence'.
> And in *Frost v Feltham* (55 TC 10), where the Court was asked to decide which of an individual's residences was his main residence, Nourse J stated,
>
> > "A residence is a place where somebody lives."
>
> These quotations clearly emphasise the point that the test of residence is one of quality rather then quantity: the dwelling house must have become the owner's home.

In the quote from *Sansom,* home is used as a *synomym* of residence. In the last sentence of the passage, home is used as an *explanation* of residence. But it comes to the same thing.

This view leaves the law in a more rational state, as a distinction between a home and a residence is a fine one, if it is comprehensible at all, and best avoided if possible.

6.21.4 *Home/living accommodation compared*

It is suggested that "living accommodation" does not require the degree of permanence of a home. A place one lives in for a few days may be living accommodation, though not a home.

6.22 "Work"

6.22.1 *Work: Introduction*

"Work" matters for:

(1) Overseas test 3: Overseas work

(2) UK test 3: UK work
(3) The work tie

See too 6.35.3 (Record keeping: Work).

The starting point is para 26(1) sch 45 FA 2013 which provides:

> P is considered to be "working" (or doing "work") at any time when P is doing something–
> (a) in the performance of duties of an employment held by P, or
> (b) in the course of a trade carried on by P (alone or in partnership).

In the following discussion:
Work within para (a) is **"employment-work"**.
Work within para (b) is **"trading-work"**.

The residence consultation response paper explains:

> 3.53 A variety of respondents asked for clarification about the definition of work as applied throughout the residence test. There were concerns that the definition would be too broad and could include activities that were related to work but which did not amount to undertaking work. ...
> 3.54 The Government proposes that, for the purposes of the residence test, an individual will be working if they are performing the duties of their office or employment or, in the case of the self-employed, doing something in the course of their trade. The Government believes this will ensure that the definition is not too broad.[83]

For instance, gardening in one's own garden, or completing one's own tax return, does involve work, often hard work, in the general sense; but it is not employment-work or trading-work, which is narrower.

6.22.2 *Employment-work*

Para 26(1) sch 45 FA 2013 provides:

> P is considered to be "working" (or doing "work") at any time when P is doing something–
> (a) in the performance of duties of an employment held by P...

There is a similar definition in s.689(6) ITEPA.[84]

[83] HM Treasury/HMRC, "Statutory definition of tax residence and reform of ordinary residence: a summary of responses" (June 2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf*

[84] See 36.5.3 ("Work").

In order to apply this, it is necessary to ask:

(1) whether P holds an employment; and
(2) what are the duties of the employment.

The question of what are the duties of an employment comes up in various contexts, but most importantly in s.336 ITEPA which provides:

> ... a deduction from earnings is allowed for an amount if... the amount is incurred wholly, exclusively and necessarily in the performance of the duties of the employment.

"Duties of the employment" has always been narrowly understood. *Snowdon v Charnock* summarised:[85]

> All the authorities distinguish between
> [1] expenditure incurred in the performance of duties (which is deductible) from
> [2] expenditure incurred to put the taxpayer in a position to perform the duties (which is not).

In *Consultant Psychiatrist v HMRC*:[86]

> The principle to be derived from the authorities is that there is a distinction between
> [1] the nature of the job requiring the incurring of the expenditure, and
> [2] the expenditure enabling the person to do the job better …

So in *Simpson v Tate*[87] the expenses of a medical officer keeping up-to-date were not deductible: this was not

> moneys expended in the performance of his official duties. He does not incur these expenses in conducting professional inquiries or get the journals in order to read them to the patients … He incurs these expenses in qualifying himself for continuing to hold his office.

Similarly, in *Humbles v Brooks*[88] the expenses of a headmaster attending history lectures were not deductible:

> "In the performance of the said duties" means in the course of their

[85] [2001] STC (SCD) 152 at [15]; and see Morse, "A confusion of facts, opinion and law? Employment income expenses and questions of fact and law: HMRC v Banerjee in the Court of Appeal" [2010] BTR 485.

[86] [2006] STC (SCD) 653.

[87] 9 TC 314 at 318.

[88] 40 TC 500 at 502.

> performance … "in doing the work of the office …". It does not include qualifying initially to perform the duties of the office, or even keeping qualified to perform them … it does not mean adding to [his] usefulness in performing his duties.

In *Perrin v HMRC*[89] the judge summarised these cases and continued:

> 25. These cases to my mind expose a prior question: you have to decide what is the nature of the job before you can decide whether what is done is in the course of the job, or is merely enabling or improving. A surgeon reads the latest research in his lunch break, looks at the scans and x-rays, consults his notes, washes his hands, puts on his gloves and picks up his knife. Which of those acts are part of the nature of his job and which enable him to do it better or puts him in a position to perform the duties of his job? It depends on how, semantically, you describe the nature of his job.
>
> In *Fitzpatrick v IRC* Lord Templeman said:
>
> > The journalists in the present case chose to spend several hours everyday reading a formidable mass of repetitive newsprint dealing with the events of yesterday. In my opinion, they were not, in the course of that reading, engaged in the performance of the duties for which they were paid.[90]
>
> I note the last few words 'for which they were paid'. Lord Templeman then also notes that a fact common to all the journalists was that 'the journalist was not remunerated for the time he spent in reading newspapers at home.' It seems to me therefore that a valuable insight into the nature of the job may be obtained by asking: what activities are paid for? And there may be a difference between the activities which are paid for, and those which are required as a condition of the employment (the student assistant in the laboratories in *Blackwell v Mills*, the bank manager in *Brown v Bullock* were all required to do something, but in each case that was not something 'paid for' or in the course of his duties)...
>
> 30. In *Snowdon v Charnock* Dr Brice found the following factors as being particularly relevant to the decision that the attendance at the psychotherapy sessions was not in the duties of the training post job: that the cost was not normally met by the employer; that the timing was not dictated by the employer but a matter between the individual and the analyst; and that the timing of the sessions was not acceptable as a reason for being unable to fulfil course requirements. It seems to me that the last

[89] [2008] STC (SCD) 672.

[90] 66 TC 407.

two of these factors are valuable indicators of what the psychiatrist was 'paid for'.

31. If an employer recruits a number of new employees and says to them 'You will start work in the summer, but on the following 1 October and 1 February you must all attend a week's course at our training centre', then it seems to me that this attendance is part of the nature of the job and in the performance of their duties: they are paid to attend, they attend at a place and at times specified by the employer, and do what their employer wants them to do there. The same would be true in my view if the course were run by a third party. And, in such a case, if the employee were obliged to pay for the course, then it could be said that the nature of the duties included attendance at the course, and that the obligation to pay was incurred in the performance of those duties.

32. But where the employer does not dictate the times of attendance, where the attendance is generally required but is outside normal working hours, where attendance must not conflict with other duties, in those situations one hesitates to say that the employee is 'paid for' attendance, and it can be said that the nature of the job does not encompass attendance even though it may be required by the employer.

33. In Mr Perrin's case I find that the following factors point away from the attendance at the courses being one of the duties for which he was paid (or something required by the nature of his job):

(i) some of the courses took place partly on Saturdays and he was not paid for attendance on Saturdays,

(ii) the staff handbook indicated that study leave could be granted in the discretion of the firm: it is described as 'leave' ie in the nature of time away from his duties; and there was no prescription as to what training should be done when. The requirement to attend training in the letter of 6 April 2004 did not alter the fact that paid leave to attend the courses was discretionary.

34. I do not find that [the employer's] view that the attendance at the courses was in the performance of Mr Perrin's duties, nor the fact that Mr Perrin was obliged to attend them by his contract nor even that he could be dismissed if he did not, sufficient to cause me to think that the attendance was part of the nature of his job. Mr Perrin was a trainee accountant and it seems to me that he was not paid for attending the courses, but for his work in the firm's business.

35, I conclude that the nature of Mr Perrin's job did not require the expenditure on the courses even though it enabled him to do the job better (with consequent benefit for himself and the firm), and even though attendance was required by his contract; and therefore that the cost of attendance was not incurred in the performance of the duties of his employment.

The EIM discusses this issue:

> **EIM31650 in the performance of the duties** [May 2020]
>
> An expense cannot be deducted under the general rule for employees' expenses in Section 336 ITEPA 2003 unless it is incurred "in the performance of the duties of the office or employment". The Courts have emphasised the importance of finding out exactly what the duties entail, see EIM31635, and have traditionally taken a very restrictive approach. In *Nolder v Walters* (15 TC 380) Rowlatt J commented at page 387 that the phrase means:
>
> > "in doing the work of the office, in doing the things which it is his duty to do while doing the work of the office."
>
> Therefore, to satisfy this test, the expense must be incurred in actually carrying out the duties of the job. It is not enough for the expense to be relevant to the job, or to be incurred in connection with the duties of the job. Nor is it enough if the expense only puts the employee in a position to start work or keeps the employee qualified to do the work. Expenses that are incurred in preparation to carry out the duties of the employment or as training to carry out the duties of the employment are not deductible...
>
> **EIM31651 decided cases** [May 2020]
>
> There are a number of cases in which the Courts have held that expenditure incurred in connection with an employment was not deductible because it was not incurred in the performance of the duties of the employment. Examples include
>
> *Shortt v McIlgorm* (26 TC 262) Fees paid to an employment agency to get a job, see EIM32560.
>
> *Blackwell v Mills* (26 TC 468) Cost of attending evening classes to become better qualified, see EIM32525.
>
> *Eagles v Levy* (19 TC 23) Legal costs to recover wages, see EIM32865.
>
> *Ansell v Brown* (73 TC 338) Cost of dietary supplements for professional sports player, see EIM32507.
>
> **EIM31652 Fitzpatrick v IRC** [May 2020]
>
> The case of *Fitzpatrick v IRC* (66 TC 407) contains a recent restatement by the House of Lords of the traditionally stringent and restrictive approach of the Courts to defining the duties of the employment.
>
> The case concerned journalists and other employees in the newspaper industry who received an allowance from their employer to pay for the purchase of other newspapers that they mostly read at home. It was not disputed that the allowance was a taxable emolument but they argued for a deduction for the amount spent because reading other newspapers was part of the duties of their employment.

> It was accepted by the Courts that the purpose of the journalists in reading other newspapers was to perform their duties more efficiently. It was also accepted that the reading of other newspapers was encouraged or even required by their employers. Nevertheless, no deduction was allowed.
>
> Lord Templeman commented on page 521 that:
>
>> "a journalist does not purchase and read newspapers in the performance of his duties but for the purpose of ensuring that he will carry out his duties efficiently... A sports reporter is employed to report sport, not to read newspapers, a photographer is employed to produce pictures for his newspaper not to study the pictures of others. An editor is employed to select, draft and arrange items in his newspaper, not to read other newspapers. A journalist who reads newspapers does so in order to be able to perform his duties to the highest possible standard but he does not read "in the performance of his duties".
>
> **EIM31653 in the performance of the duties: example** [May 2020]
>
> An employee is a salesman for a company with a major export trade to France. He knows that he will not be able to perform his duties properly unless he improves his command of the French language. He enrols in a night school course for one evening each week. He asks for a deduction for the cost of the course.
>
> No deduction is due. The employee's duties as a salesman do not extend to learning French at night school, see EIM31650.

Underlying all these decisions was a policy decision not to allow employees to deduct expenses. In *Simpson v Tate*:[91]

> I think that all subscriptions to professional societies and all taking in of professional literature and all that sort of expense, which enables a man to keep himself fit for what he is doing, are things which can none of them he allowed. If they were allowed every professional man would say "I have to belong to this society and I have to belong to that society; I have to take in this publication and I have to take in that publication, and to do all sorts of things," and there would be no end to it.

Lord Templeman picked up the point in *Fitzpatrick*:[92]

> If deductions of this kind were allowed in one case every journalist or other similar employee would claim to be entitled to deduct the payment made by him for every newspaper and periodical which he chose to

[91] 9 TC 314 at p.318.

[92] 66 TC 407 at p.521H.

> purchase "...and there would be no end to it".

But the phrase "in the performance of duties of an employment" should have the same meaning throughout, so the same approach applies in deciding what counts as working for the SRT; even though in residence cases it will sometimes be in the interest of HMRC to argue that actions *are* in the performance of the duties of employment, and in the interest of taxpayer to argue that they are not.

6.22.3 *Para 26(2) employment-income test*

Para 26(2) sch 45 FA 2013 provides:

> In deciding whether something is being done in the performance of duties of an employment, regard must be had to whether, if value were received by P for doing the thing, it [the receipt] would fall within the definition of employment income in section 7 of ITEPA 2003[93].

I refer to this provision as the **"para 26(2) employment-income test"**. There are two aspects to this provision:

(1) A hypothetical question: if value were received by P for doing something, would the receipt be employment income?

(2) If the answer to that question is yes, then it does not necessarily follow that the thing done is employment-work. One must "have regard" to that fact. It is suggested that this means that the thing done should be regarded as work if appropriate in the context of the SRT. That must be decided on the facts of the case.

The hypothetical question is not as straightforward as the authors of the SRT may have thought.

(1) It does not specify who provides the value received by P. The passive voice ("if value were received") conceals the identity of the actor, in this case the person who provides the value.[94] If value (a benefit) is provided by the employer, it would be deemed to be by reason of the employment and so necessarily employment income![95] But clearly that is to be ignored for the purposes of the hypothetical question. The question is whether the value would be ordinary earnings[96] (in pre-

[93] See 34.4.4 ("Employment income").

[94] See Fowler's *Dictionary of Modern English Usage* (4th ed, 2015) entry under *Passive Voice* 5: Criticised Uses).

[95] See 39.10 ("By reason of the employment").

[96] See 34.4.1 ("Ordinary" earnings).

rewrite terminology, emoluments).

(2) If someone else pays, the question is, why did they pay? Was it a reward for services?

For instance, an employee may choose to have a health check. If an employer paid the employee to do that, the receipt would be employment income.[97] But if anyone else paid then presumably, not. The health check is not employment-work. However, one hardly needs the help of para 26(2) to reach that conclusion.

Given the difficulties of the hypothetical question, and the intangible nature of the consequences of the answer to it if an answer can be found, it is doubtful whether the para 26(2) employment-income test is ever going to be helpful. It may be significant in relation to the topics of gardening leave and shadow directors; see below.

6.22.4 *Trading-work*

Para 26(1) sch 45 FA 2013 provides:

> P is considered to be "working" (or doing "work") at any time when P is doing something ...
>
> (b) in the course of a trade carried on by P (alone or in partnership).

In order to apply this, it is necessary to ask:

(1) whether P carries on a trade; and

(2) whether P is doing something in the course of that trade.

Para 145 sch 45 FA 2013 provides an inclusive definition of trade:

> "trade" also includes–
>
> (a) a profession or vocation,
>
> (b) anything that is treated as a trade for income tax purposes, and
>
> (c) the commercial occupation of woodlands (within the meaning of section 11(2) of ITTOIA 2005).

Para 26(3) sch 45 FA 2013 provides guidance towards the issue of whether something is done in the course of a trade:

> In deciding whether something is being done in the course of a trade, regard must be had to whether, if expenses were incurred by P in doing the thing, the expenses could be deducted in calculating the profits of the

[97] Perhaps under the benefits code, which falls within the definition of employment income, see 34.4 (Employment income/earnings).

> trade for income tax purposes.

Para 26(3) seems self-evident, since deductible trading expenses are incurred wholly for trading purposes. Perhaps the point is that if expenses could not be deducted (because they were incurred partly for non-trading purposes) then that suggests the activity is not done in the course of a trade. But since para 26(3) does not supply a determinative factor (it only says "regard must be had...") this really does not take us much further; though it does no harm.

6.22.5 *Training*

Para 26 sch 45 FA 2013 provides:

> (5) Time spent undertaking training counts as time spent working if–
> (a) in the case of an employment held by P, the training is provided or paid for by the employer and is undertaken to help P in performing duties of the employment, and
> (b) in the case of a trade[98] carried on by P, the cost of the training could be deducted in calculating the profits of the trade for income tax purposes.
>
> (6) Sub-paragraphs (4) and (5) have effect without prejudice to the generality of sub-paragraphs (2) and (3).

Para (a) does not add much, as the gist of the cases above is that training is paid for by the employer is likely to be one of the duties of the employment, in the general sense, and so working within the general definition.

Para (b) seems self-evident, since deductible trading expenses are incurred wholly for trading purposes. Perhaps the point is that if cost could not be deducted (because it was incurred partly for non-trading purposes) then that suggests the training is not done in the course of a trade.

6.22.6 *Time on call*

The RDRM provides:

> **RDRM11750: Days spent in the UK: Travel either to or from a temporary workplace** [May 2020]
> ... Being on- call or stand-by may count as time spent working depending on the conditions of an individual's employment and the nature of their duties.

[98] Para 145 sch 45 FA 2013 provides a wide definition set out in a footnote above.

The RDRM provides 2 examples:

> Example 3 (Paula)
> P works as an engineer and is contractually required to be on-call for 4 night a month, in addition to her normal full-time attendance. She is paid a retainer for those 4 nights, in addition to being paid for any work if she is called out. The 4 nights are counted as working time.
> Example 4 (Franek)
> F is a self-employed locksmith, who keeps his mobile phone switched on 24 hours a day to receive customer calls. For the purposes of calculating work time, F should only include the time spent carrying out his jobs and the related travelling time.

While care needs to be taken in referring to cases on different provisions, this is consistent with case law on the working time regulations.[99]

6.22.7 *Gardening leave*

The expression "gardening leave" is used when an employee is instructed not to work, during a notice period. P is not working in the general sense and not within para 26(1) as P is not "doing something". P is doing nothing. If that is working, how many hours a day is P working? and where is the work done?

But the para 26(2) employment-income test[100] does support the view that gardening leave counts as employment-work, as P is being paid for doing nothing, and what he is paid is employment income. The answer to the hypothetical question in para 26(2) is, yes.

The HMRC view is that gardening leave counts as working. The RDRM provides:

> **RDRM11740: Days spent in the UK: Work for the purpose of the SRT** [May 2020]
> ...An individual's time spent working includes:
>
> - instances where their employer instructs an individual to stay away from work, for example while serving a period of notice while they remain on the payroll.

HMRC say:

> *Question:* If an expat is on gardening leave abroad for say 90 days (in between 2 overseas employments), would this be considered a significant

[99] *MacCartney v Oversley House Management* [2006] UKEAT 0500_05_3101.
[100] See 6.22.3 (Para 26(2) employment-income test).

> break[101] when looking at residence status for FTWA. They would not be able to go to work for the odd day but are they really on call (so working) so not on a break ?
> *HMRC answer:* HMRC can confirm that for the purpose of the SRT gardening leave is regarded as work and satisfies the test at para 26(2) Sch 45 FA 2013. In the scenario outlined there is no significant break from work.[102]

6.22.8 *Travel*

Para 26 sch 45 FA 2013 provides:

> (4) Time spent travelling counts as time spent working–
> (a) if the cost of the journey could, if it were incurred by P, be deducted
> [i] in calculating P's earnings from that employment under section 337, 338, 340 or 342 of ITEPA 2003,
> [ii] or, as the case may be, in calculating the profits of the trade[103] under ITTOIA 2005, or
> (b) to the extent that P does something else during the journey that would itself count as work in accordance with this paragraph...
> (6) Sub-paragraphs (4) and (5) have effect without prejudice to the generality of sub-paragraphs (2) and (3).

The rules for the deductibility of travel costs are complex. For employments see 35.1 (Travel expenses: Introduction). For trades there are no express statutory rules but there is extensive case law, discussed in BIM37605 onwards. I hope to cover that topic in a future edition.

Para (a) raises the pleasing possibility of situations where HMRC argue *for* deductibility of the expenses, and the taxpayer argues against.

Para (b) applies "to the extent" that the individual works; eg if the individual spends 5 minutes working during a six hour journey only the 5 minutes will be classified as work. Reading emails will count as work, so in practice travel will generally involve some work, unless the employee deliberately chooses not to work.

What is "travelling" is not always clear. A person who stops at a traffic

[101] See 6.25 "Significant break from work".

[102] Joint Expatriate Forum on Tax and NICs (July 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf*

[103] Para 145 sch 45 FA 2013 provides a wide definition of trade, set out in a footnote above.

light is still travelling. A person who stops for lunch has stopped travelling. What about queuing at immigration or for luggage? Perhaps it depends on whether the queue is an ordinary one or unusually long.

See too 6.23 (Where is work done).

6.22.9 *Assumption of chargeability*

Para 26(7) sch 45 FA 2013 provides:

> Assume for the purposes of sub-paragraphs (2) to (5) that P is someone who is chargeable to income tax under ITEPA 2003 or ITTOIA 2005.

This prevents an argument that the rules in para 26(2)-(5) are not applicable where DT relief overrides the usual charge on employment income.

6.22.10 *Shareholder tasks*

Suppose a person is both shareholder and director. One must distinguish:

(1) Actions carrying out duties of the directorship
(2) Actions carrying out powers (or duties, if any) of shareholders which are not duties of the directorship ("shareholder tasks").

Shareholder tasks are not employment-work. Under standard company articles, that includes decisions such as appointing directors, issuing shares, and putting a company into liquidation.

It is considered that the para 26(2) employment-income test[104] does not alter that conclusion. But in practice, little time will be spent on shareholder tasks, and it is likely that the large majority of the time spent will count as employment-work.

6.22.11 *Work by shadow director*

Para 26(1) sch 45 FA 2013 provides:

> P is considered to be "working" (or doing "work") at any time when P is doing something–
>
> (a) in the performance of duties of an *employment* held by P...

A shadow director does not hold an "employment" within the applicable definition.[105] So at first sight it seems that a shadow director cannot do

[104] See 6.22.3 (Para 26(2) employment-income test).

[105] See 6.26.1 ("Employment"). It is assumed that the shadow director does not have an actual contract of employment.

employment-work.

It would however be surprising if one could avoid the work tie (and UK test 3, UK work) by:

(1) arranging not to be a director or employee, while
(2) continuing to work for the company, and act as shadow director, for no express remuneration (but able to take effective remuneration by way of dividend).

HMRC may well argue that the answer is found in the para 26(2) employment-income test:[106]

(1) If value were received by the shadow director for doing what he does, the receipt would fall within the definition of employment income in s.7 ITEPA.[107]
(2) One must "have regard" to that fact. In the context of the SRT, it is suggested that the implication is:
    (a) a shadow directorship is to be regarded as an employment
    (b) the things done by the shadow director are to be regarded as duties.

6.22.12 *Work by actual director*

Suppose an individual is not a shadow director, but nevertheless does work for a company (of which they may be the owner or indirect owner) for no express remuneration (but able to take effective remuneration by way of dividend). Assume that the individual does not have an actual contract of employment or office.

In this scenario, the individual again does not have an "employment" within the applicable definition.[108] So at first sight it seems that the individual cannot do employment-work.

HMRC may argue that the para 26(1) definition of work is inclusive, not exclusive. Thus a person who does not have an employment (or trade) may be "working", if their activities are otherwise exactly what one would expect to fall within the scope of para 26(1). But if one treats para 26(1) as an inclusive definition, it is difficult to see where to draw the line between work which counts for the SRT and work which does not.

HMRC may argue that the answer is found in the para 26(2) employment-income test:[109]

[106] See 6.22.3 (Para 26(2) employment-income test).
[107] See 39.6.4 (Charge on shadow director).
[108] See 6.26.1 ("Employment").
[109] See 6.22.3 (Para 26(2) employment-income test).

(1) If value were received by the individual for doing what he does, would the receipt would constitute employment income? In the absence of an employment, it would not. But if value were received, there is likely to be an employment. In other words, para 26(2) imposes a deemed employment.

(2) If the answer to the hypothetical question is yes, and one has regard for it, the provision may be taken to allow the non-employees employment-like activities to count as employment-work.

It is suggested that the court should draw the line at shadow directors, so those who are not employees or shadow directors cannot do employment-work. But taxpayers concerned about the work tie should err on the side of caution; and in cases where a taxpayer terminated a contract of employment specifically to take advantage of this rule, the courts may not be sympathetic.

6.23 Where is work done

The location of work matters as work must be done overseas to qualify for overseas test 3 (overseas work), and in the UK to qualify for UK test 3 (UK work) or for the work tie. See 34.30 (Where are duties performed). Para 27(1) sch 45 FA 2013 provides a commonsense rule:

> Work is done where it is actually done, regardless of where the employment is held or the trade is carried on by P.

There is special rule for the location of travelling work. Para 27 sch 45 FA 2013 provides:

> (2) But work done by way of or in the course of travelling to or from the UK by air or sea or via a tunnel under the sea is assumed to be done overseas even during the part of the journey in or over the UK.
> (3) For these purposes, travelling to or from the UK is taken to–
>> (a) begin when P boards the aircraft, ship or train that is bound for a destination in the UK or (as the case may be) overseas, and
>> (b) end when P disembarks from the aircraft, ship or train.

This applies:

(1) Where travel itself counts as work[110] ("work by way of travelling); and

(2) Where the travel is not work, but other work is done while travelling ("work in the course of travelling").

[110] See 6.22.8 (Travel).

This rule may make flying directly to or from a regional airport more attractive as UK work would not start until the individual disembarks at the regional airport rather than at (say) Heathrow/Gatwick before taking a connecting flight or other transport to the destination. The use of cross channel ferries may be disadvantageous when compared with travel by Eurostar given the point at which UK work is deemed to begin and end. But I suspect that however the journey is arranged, it will be rare for a business trip to the UK not to constitute a 3-hour UK workday.

6.24 Reference period: Non-work days

The reference period matters for computing the sufficient hours tests for
(1) Automatic overseas test 3 (Overseas work) and
(2) "Automatic" UK test 3 (UK work).

Para 28(1) sch 45 FA 2013 provides:

> This paragraph applies in calculating the "reference period" (which is a step taken in determining whether P works "sufficient hours in the UK" or "sufficient hours overseas" as assessed over a given period of days).

6.24.1 *Reduction for non-work days*

There are three reductions. Para 28(2) sch 45 FA 2013 provides:

> The number of days in the given period may be reduced to take account of—
> (a) reasonable amounts of annual leave or parenting leave taken by P during the period (for all employments held and trades carried on by P during the period, whether in the UK or overseas),
> (b) absences from work at times during the period when P is on sick leave and cannot reasonably be expected to work as a result of the illness or injury in question, and
> (c) non-working days embedded within a block of leave for which a reduction is made under paragraph (a) or (b).

6.24.2 *Annual/parenting leave*

These terms matter for the concepts of reference period and significant breaks from work, which are relevant for overseas test 3 (overseas work) and UK test 3 (UK work).

Para 145 sch 45 FA 2013 provides:

> "parenting leave" means maternity leave, paternity leave, adoption leave or parental leave (whether statutory or otherwise);

Para 146 sch 45 FA 2013 provides:

> In relation to an individual who carries on a trade—
> (a) a reference in this Schedule to annual leave or parenting leave is to reasonable amounts of time off from work for the same purposes as the purposes for which annual leave or parenting leave is taken, and
> (b) what are "reasonable amounts" is to be assessed having regard to the annual leave or parenting leave to which an employee might reasonably expect to be entitled if doing similar work.

HMRC say, correctly, that regular (rotational) leave is not "annual leave":

> *Question:* Client works a 48 hour week (Mon to Sat) in Saudi and he works the 48 hour weeks in blocks of 10. He then gets 2 weeks off and this is called rotational leave, he does not get any other annual leave.
> Are the 2 weeks off after every 10 weeks of work considered annual leave for the 'sufficient hours worked overseas' test, or would it fall within the non-working day embedded within a block of leave rules.
> *HMRC answer*: The SRT does not define annual leave. Any entitlement to annual leave will usually be set out in the clauses of an employment contract or contract for services.
> [HMRC refer to the statutory provisions and continue]
> In the example you have used the 2 week periods of rotational leave taken after every 10 weeks of working 48 hours per weeks do not appear to be annual leave and therefore no deduction in the reference period calculation will be due. The days do however appear to be non-working days. However no deduction can be made in the reference period calculation for them unless they are 'embedded within a block of leave'. This will of course be a question of fact.
> For example, if a period of sick leave includes days when the individual would not normally work (and does not work) no deduction can be made for those non work days in the reference period calculation. However, if the period of sick leave begins at least 3 days before the non work day(s) and ends at least 3 days after the non work days the non work days are regarded as 'embedded within' a block of leave and can be deduced in the reference period calculation.[111]

Para 28(4) sch 45 FA 2013 attempts to elucidate "reasonable amounts":

[111] Joint Expatriate Forum on Tax and NICs (July 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf*

> For any particular employment or trade, "reasonable" amounts of annual leave or parenting leave are to be assessed having regard to (among other things)—
> (a) the nature of the work, and
> (b) the country or countries where P is working.

6.24.3 *Disregarded days*

Para 28(3) sch 45 FA 2013 provides:

> But no reduction may be made in respect of any day that is a "disregarded day" (see paragraphs 9(2) and 14(3) in Part 1 of this Schedule).

For overseas test 3 (overseas work), "disregarded days" are UK workdays.[112]

For UK test 3 (UK work), "disregarded days" are overseas workdays.[113]

6.24.4 *"Embedded in block of leave"*

Para 28(5) sch 45 FA 2013 provides:

> Non-working days are "embedded within" a block of leave only if there are, as part of that block of leave—
> (a) at least 3 consecutive days of leave taken before the non-working day or series of non-working days in question, and
> (b) at least 3 consecutive days of leave taken after the non-working day or series of non-working days in question.

6.24.5 *"Non-working day"*

Para 28(6) sch 45 FA 2013 provides:

> A "non-working day" is any day of the week, month or year on which P—
> (a) is not normally expected to work (according to P's contract of employment or usual pattern of work), and
> (b) does not in fact work.

6.24.6 *Rounding*

Para 28(7) sch 45 FA 2013 deals with rounding:

> In calculating the reductions to be made under sub-paragraph (2)—

[112] See 6.8.2 ((a): Sufficient hours overseas).

[113] See 6.13.2 (Sufficient hours in UK)..

> (a) if it turns out, after applying sub-paragraph (3), that the reasonable amounts of annual leave or parenting leave or, as the case may be, the absences from work on sick leave do not add up (across the period) to a whole number of days, the number in that case is to be rounded down to the nearest whole number, but
> (b) any such rounding is to be ignored for the purposes of subparagraph (2)(c).

6.24.7 *Change of employment*

Para 28 sch 45 FA 2013 provides:

> (8) If—
> (a) P changes employment during the given period,
> (b) there is a gap between the two employments, and
> (c) P does not work at all at any time between the two employments,
>
> the number of days in the given period may be reduced by the number of days in that gap.
>
> (9) But—
> (a) if the gap lasts for more than 15 days, only 15 days may be subtracted, and
> (b) if there is more than one change of employment during the period, the maximum number of days that may be subtracted under subparagraph (8) for all the gaps in total is 30.

The RDRM gives a straightforward example:

> **RDRM11160: Gaps between employments** [May 2020]
> Example 1 (Jack)
> J is calculating his reference period and has 2 gaps between employments within the 365 day period he is considering.
> The first gap was of 21 days and the second 5 days. J does not work at all in either gap. As the first gap exceeded the maximum number of days allowed for a single gap, J can only subtract 15 days from his reference period in relation to this gap between employments. He can subtract the full 5 days of the second gap.
> J therefore subtracts a total of 20 days for gaps between employments from his 365 days period under Step 3 of the sufficient hours calculation.

The provision for gaps between employments does not apply for the self-employed; there is no deduction for gaps between self-employed work periods.

6.25 "Significant break from work"

"Significant break from work" matters for:
(1) Overseas test 3 (Overseas work)
(2) UK test 3 (UK work)

Para 29 sch 45 FA 2013 provides the definitions, which are conveniently read side by side:

Para 29(1): Break from UK work	**29(2) Break from overseas work**
There is a "significant break from UK work" if at least 31 days go by and not one of those days is—	There is a "significant break from overseas work" if at least 31 days go by and not one of those days is—
(a) a day on which P does more than 3 hours' work in the UK, or	(a) a day on which P does more than 3 hours' work overseas, or
(b) a day on which P would have done more than 3 hours' work in the UK but for being on annual leave, sick leave or parenting leave.[114]	(b) a day on which P would have done more than 3 hours' work overseas but for being on annual leave, sick leave or parenting leave.

6.26 Minor definitions

6.26.1 *"Employment"*

"Employment" matters for:
(1) Overseas test 3: Overseas work
(2) UK test 3: UK work
(3) The work tie

Para 145 sch 45 FA 2013 incorporates the standard ITEPA definition.[115] In short, the term includes:
(1) Employment in the strict employment law sense
(2) An office (the most common example is company director)

Para 26(8) sch 45 FA 2013 provides:

[114] See 6.24.2 (Annual/parenting leave).

[115] "employment"—
(a) has the meaning given in section 4 of ITEPA 2003, and
(b) includes an office within the meaning of section 5(3) of that Act.
For this definition see 34.3 ("Employer", "employee" "employment").

> A voluntary post for which P has no contract of service does not count as an employment for the purposes of this Schedule.

At first sight, this is otiose. A contract of service is simply another expression for an employment contract. It would however be relevant in the case of a director of a charitable company (or other nonprofit company). That director would typically not be paid and not have a contract of service. Such a person would not hold an employment for the purposes of the SRT. That may in principle be advantageous (if the director works in the UK) or disadvantageous (if the director works outside the UK); but in the latter case it may be possible to give the director a contract of service, so that time spent working for the charity does count for the sufficient hours test.

Similarly, a trusteeship is an office but an unremunerated trusteeship is a voluntary post. That is so even if trustees could be remunerated, under a trustee charging clause in the trust deed or by statute, so long as the power to remunerate is not used. So acting as unpaid trustee does not count as work. That is the case for private trusts and for charitable trusts.

Well organised nonprofit organisations will have contracts with regular volunteers, but the contract is not likely to be a contract of service (an employment contract) so volunteers are not likely to have an employment.

"Voluntary post" is not defined. A voluntary post must be unpaid, but not all unpaid posts are voluntary. The word suggests an element of altruism. A director/shareholder of a commercial (for-profit) company may choose to work for no remuneration, taking profits by way of dividend; but a directorship of that kind is not a voluntary post.

6.26.2 *"Overseas"*

Para 145 sch 45 FA 2013 provides a definition:

> "overseas" means anywhere outside the UK;

One might have thought "abroad" was more apt. Northern Ireland is not "overseas" but if one crosses the land border to the Republic of Ireland, one finds oneself "overseas"! But it does not matter.

6.26.3 *Zero is a number (!)*

Para 147 sch 45 FA 2013 provides:

> A reference in this Schedule to a number of days being less than a specified number includes a case where the number of days is zero.

The drafter's concern that zero may not be considered a number seems somewhat misconceived.

6.27 UK ties

This section considers the definition of "UK tie". This matters for the application of the sufficient ties test, see 6.14 (Sufficient ties test).

Para 31(1) sch 45 FA 2013 provides:

> What counts as a "UK tie" depends on whether P was resident in the UK for one or more of the 3 tax years preceding year X.

Thus there are different rules for leavers and for arrivers. Para 31(2) sets out the ties for leavers:

> If P was resident in the UK for one or more of those 3 tax years, each of the following ties counts as a UK tie.
> (a) a family tie,
> (b) an accommodation tie,
> (c) a work tie,
> (d) a 90-day tie, and
> (e) a country tie.

Para 31(3) sets out the ties for arrivers:

> Otherwise, each of the following ties counts as a UK tie.
> (a) a family tie,
> (b) an accommodation tie,
> (c) a work tie, and
> (d) a 90-day tie.

These are the same, but without the country tie.

6.28 Family tie

Para 32(1) sch 45 FA 2013 provides:

> P has a family tie for year X if–
> (a) in year X, a relevant relationship exists at any time between P and another person, and
> (b) that other person is someone who is resident in the UK for year X.

If a couple split up during the year, or a child attains 18 during the year, the family tie can still be met until the next tax year.

6.28.1 *Relevant relationship*

Para 32(2) sch 45 FA 2013 provides:

> A relevant relationship exists at any time between P and another person if at the time–
> (a) P and the other person are husband and wife or civil partners and, in either case, are not separated,[116]
> (b) P and the other person are living together as husband and wife or, if they are of the same sex, as if they were civil partners,[117] or
> (c) the other person is a child of P's and is under the age of 18.

6.28.2 *Limited child contact in UK*

Para 32(3) sch 45 FA 2013 provides:

> P does not have a family tie for year X by virtue of sub-paragraph (2)(c) if P sees the child in the UK on fewer than 61 days (in total) in–
> (a) year X, or
> (b) if the child turns 18 during year X, the part of year X before the day on which the child turns 18.

The RDRM provides examples:

> **RDRM13330: Annex C: Relevant relationships** [May 2020]
> Example 1 (Jurgen)
> Between May and November J visited the UK for 125 days, 104 of which were days on which he worked for more than 3 hours in the UK. When in the UK he stayed in a number of different hotels, so has no accommodation tie. He was not resident in the UK for any of the last 3 years. J's 17 year-old son lives and works full-time in the UK and is UK resident.
> Under the sufficient ties test, J will be resident if he has 2 or more UK ties. He has a work tie. However, the only tie J and his son spent together in the UK during his visit was 3 weeks in the summer. Therefore J has no family tie and, having only 1 tie is not resident in the UK for that tax year. ...
> Example 2 (Pierre)
> P has a company flat in the UK which is permanently available to him and which he always uses when he comes here. This year P has been in

[116] Para 32(5) sch 45 FA 2013 provides the standard definition of "separated": see App 3.4.3 (Living together: married couple). The definition is repeated here because the standard definition applies for IT/CGT but not for IHT or (generally) for CT.

[117] See App 3.4.3 (Meaning of "living together").

> the UK for 75 days, 41 of which were days on which he worked for more than 3 hours in the UK. He was resident in the UK the year before last. P's ex-wife lives in the UK with their 15 year old daughter. P has spent 70 days with his daughter this year.
> Under the sufficient ties test (see RDRM11500 onwards), P will be UK resident if he has 3 or more UK ties. He has an accommodation tie and a work tie.
> However, although P has spent 70 days with his daughter in the tax year, 21 of these days were spent at P's home in Paris, and 14 were spent in Spain. Only 35 of the days P has spent with his daughter were spent in the UK. So, P does not have a family tie, and because he only has 2 ties he will not be UK resident for this tax year. ...

It is a sign of the times that the drafter clarifies the word "see". Para 32(4) sch 45 FA 2013 provides:

> A day counts as a day on which P sees the child if P sees the child in person for all or part of the day.

Seeing one's child on Skype does not count.

A blind person cannot satisfy the family tie.

In some circumstances, a parent may need to instruct a child to stay in bed and not get up until they leave the house!

If relevant, the individual should keep records of time spent visiting children in the UK.

6.28.3 *Ascertaining spouse's residence*

In order for an individual to apply the family tie test, it is necessary to decide whether the spouse/child is resident in the UK. But in order to decide whether an individual's spouse is resident under the SRT, it may be necessary to decide whether the individual is resident in the UK.

Para 33 sch 45 FA 2013 solves that problem by amending the residence test:

> (1) This paragraph applies in deciding for the purposes (only) of paragraph 32(1)(b) whether a person with whom P has a relevant relationship (a "family member") is someone who is resident in the UK for year X.
> (2) A family tie based on the fact that a family member has, by the same token, a relevant relationship with P is to be disregarded in deciding whether that family member is someone who is resident in the UK for year X.

The RDRM provides:

> **RDRM13320: Annex C: The importance of a family tie** [May 2020]
> Example (George and Mary)
> G and his wife M both spend 140 days in the UK, (a fewer number of days than the 183 day threshold in the automatic UK test). Neither of them was resident in any of the 3 previous tax years. Under the sufficient ties test they will each be resident if they have 2 or more ties.
> Both G and M have an accommodation tie. They also have a relevant relationship to each other, because they are man and wife. Therefore, if they had a family tie they would both be regarded as resident in the UK. However, because the family tie only exists because of their relevant relationship, the tie can be ignored.
> As each of them only has 1 UK tie, neither of them is UK resident in that tax year.

6.28.4 *Child in full-time education*

Children at school in the UK are likely to be UK resident under one or more of:

(1) UK test 1: 183 UK days
(2) UK test 2: UK home
(3) The sufficient ties test

Para 33(3) sch 45 FA 2013 provides a special rule for residence of children for the purposes of the family tie:

> A family member falling within sub-paragraph (4) is to be treated as being not resident in the UK for year X if the number of days that he or she spends in the UK in the part of year X outside term-time is less than 21.

The RDRM provides:

> **RDRM13330: Annex C: Relevant relationships** [May 2020]
> For the purpose of the SRT half-term breaks are regarded as term-time.

Para 33(4) sch 45 FA 2013 provides:

> A family member falls within this sub-paragraph if he or she–
> (a) is a child of P's who is under the age of 18,
> (b) is in full-time education in the UK at any time in year X,[118] and

[118] Para 33(5) sch 45 FA 2013 provides:
In sub-paragraph (4)–

(c) is resident in the UK for year X but would not be so resident if the time spent in full-time education in the UK[119] in that year were disregarded.

The disregard means that the child will not be regarded as resident under 183 day test or the sufficient ties test. It is still possible that the child could be UK resident under the UK home test.

Note that in the year in which the child attains 18, the disregard (time spent in full-time education in the UK) may be reduced.

The RDRM provides 2 straightforward examples:

> **RDRM11540: Full-time education of children and the family tie** [May 2020]
> Example (Yok Lin)
> YL attends boarding school in the UK.[120]
> She remains in the UK for the half-terms, staying with various friends and relatives, returning to the family home in Thailand during Christmas and Easter holidays.
> She spends 2 weeks of the summer break with her friends, travelling home to Thailand on 21 July.

The HMRC analysis is as follows:

> As YL is only in the UK for 14 days outside term-time, her parents will not have a family tie with YL for the purposes of the SRT.

> **RDRM13330: Annex C: Relevant relationships** [May 2020]
> Example 3 (Clara)
> C is 14 years-old and her parents, who reside in Dubai, because of her father's work, send her to boarding school in the UK. She spends 10 days of her summer break on a school trip to Scotland, and 1 week (7 days), of her Christmas break staying with friends in London. C has therefore spent 17 days in the UK outside term-time, but will not be regarded as resident in the UK for the purposes of the family tie, even though C herself is resident for tax purposes in the UK. ...

(a) references to full-time education in the UK are to full-time education at a university, college, school or other educational establishment in the UK

[119] Para 33(5) sch 45 FA 2013 provides:
In sub-paragraph (4) ...
(b) the reference to the time spent in full-time education in the UK is to the time spent there during term-time.

[120] The example specifies the exact term dates, but I omit that as it is not relevant, except, perhaps, to confirm that YL is in full time education.

The 2022/23 edition of this work para 6.28 considered RDRM guidance on school closure due to Covid, which affected 2020/21 and 2021/22, but I omit that here as it is now of historical interest only.

6.29 Accommodation tie

Para 34(1) sch 45 FA 2013 provides:

> P has an accommodation tie for year X if–
> (a) P has a place to live in the UK,
> (b) that place is available to P during year X for a continuous period of at least 91 days, and
> (c) P spends at least one night at that place in that year.

6.29.1 *Place to live*

Para 34(3) sch 45 FA 2013 provides a commonsense definition:

> P is considered to have a "place to live" in the UK if–
> (a) P's home or at least one of P's homes (if P has more than one) is in the UK, or
> (b) P has a holiday home or temporary retreat (or something similar) in the UK, or
> (c) accommodation is otherwise available to P where P can live when P is in the UK.

Para (a) is unnecessary, as a home is by definition a place to live, but perhaps it is intended to set the context for para (b) and (c).

A hospital bed is not a place to live, as it is not a home or accommodation, but is also perhaps unlikely to be available for 91 days.

A hospice could be a place to live, at least if available for 91 days.

6.29.2 *Accommodation "available"*

Para 34(4) sch 45 FA 2013 provides:

> Accommodation may be "available" to P even if P holds no estate or interest in it and even if P has no legal right to occupy it.

The RDRM provides:

> **RDRM13070 accommodation tie** [May 2020]
> Example (Peter)
> P left the UK last year to travel the world. He let his UK property on a 2 year lease, and has no rights to use the property. P has no home in the UK.
> Before leaving the UK P agreed with his cousin that he could stay with her on any occasion he was in the UK. This is more than a casual offer;

P's cousin is fully prepared to put P up for several months at a time should he need it. He made 2 visits to the UK this year, each for 10 days, and stayed with her. P has an accommodation tie.

The main difference between the term 'home' for SRT purposes and available accommodation, is that accommodation can be transient and does not require the degree of stability or permanence that a home does. If an individual does not have a home in the UK they may still have an accommodation tie if they have a place to live in the UK.

RDRM13080 The principle and characteristics of accommodation as a UK tie [May 2020]

This guidance aims to give examples of what an accommodation tie may or may not be; whether somewhere is or is not an accommodation tie will always be dependent on the facts and circumstances of its use by the individual. HMRC may choose to enquire into those facts and circumstances.

Example 1 (Mary)

M has lived and worked in the USA for many years. Her uncle has a holiday houseboat in the UK where he has agree M can stay any time she wishes, for as long as she wishes, when she comes to the UK. M's uncle does not allow other people to stay in the houseboat.

Last year M came to the UK twice. She made arrangements to stay for 3 weeks with a friend and for 4 weeks with her brother. Although the houseboat was available for a continuous period of at least 91 days, M did not use it at all. Therefore, she had no accommodation tie in respect of the houseboat last year.

This year M again visited the UK twice, spending her 5 week summer holiday on her uncle's houseboat. This year M has an accommodation tie as the houseboat is available for a continuous period of at least 91 days and she has stayed on t for at least 1 night.

Example 2 (Simone)

S has lived and worked in France all her life. She and her brother purchased a cottage in the UK several years ago as a holiday home. The cottage is let for most of the year but June, July and August are always kept free so S or her brother can stay there. There are sufficient rooms in the cottage to ensure that S is able to stay there even when her brother and his family are there also.

S spent 2 weeks in the cottage last year and 3 weeks this year. S has an accommodation tie both last year and this year.

Accommodation is regarded as available to an individual for a continuous period of 91 days if they are able to use it, or it is at their disposal, at all times throughout that period, (subject to the 16 day gap rule, see below). If a relative were to make their home available to an individual casually, for a social visit, say, it will not mean that the accommodation would be

> regarded as being available to them. However, if it is available to an individual for a continuous period of 91 days and they use it casually, it will be a tie.
>
> Similarly, a casual offer from a friend to 'stay in my spare room any time', will not constitute an accommodation tie, unless the friend really is prepared to put the individual up for 91 days at a time, (whether they actually do so or not).
>
> Example 3 (Sacha)
>
> S visits the UK on business and usually stays in different hotels. On one of these visits he takes an opportunity to attend Wimbledon Tennis Championships. A business associate who lives in Wimbledon invites S to stay at his flat for 3 nights rather than use a hotel. The arrangement is a one-off invitation, and the accommodation is not available to S for 91 days. It is not an accommodation tie. ...
>
> **RDRM13090 When accommodation is not considered to be an accommodation tie** [May 2020]
>
> Accommodation owned by an individual but which they have wholly let out commercially would not be considered as available to live in unless they retained the right to use the property or part of the property...

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> *Question:* It would be useful to have some guidance as to what arrangements HMRC perceive to be continuously available for a consecutive period of 91 days – e.g. a situation where "your room" in your parents' home is always potentially available but is not maintained for your exclusive use. If the parent has other visitors, they may also be put in that room. Consequently, it will always necessary to check in advance of each visit whether it will be possible to stay on specific dates. Can HMRC confirm this type of arrangement would not constitute continuously available accommodation for purposes of the SRT?
>
> *HMRC answer:* HMRC can confirm that accommodation availability has to be more than ad hoc or casual. Arrangement can be tacit, verbal or written but the availability itself will be a question of fact and every case will be determined by reference to the available facts and circumstances of each case. Situations where availability is agreed but on a particular occasion it cannot be used - perhaps because some else is using it – will often be rendered irrelevant by the 'gaps of fewer than 16 days are ignored' rule at 34(2).[121]

[121] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

6.29.3 *Continuous period of 91 days*

Para 34(2) sch 45 FA 2013 provides:

> If there is a gap of fewer than 16 days between periods in year X when a particular place is available to P, that place is to be treated as continuing to be available to P during the gap.

This would be a problem for those who visit and stay in hotels every fortnight, because one ignores the gap of 15 days. The RDRM provides:

> **RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]
> Example 4 (Hyo)
> H lives and works in Poland, he is his company's European sales manager. This year he will be responsible for launching a new product in the UK and will need to spend time here. His sales force are on the road in the last week of every month, so he books a room in the same hotel for the first 3 weeks of June, July, August and September.
> H has an accommodation tie.
> **RDRM13090 When accommodation is not considered to be an accommodation tie** [May 2020]
> Short stays at hotels and guesthouses will not usually be considered to be an accommodation tie. However, if an individual books a room in the same hotel or guesthouse, (and does not cancel those bookings), for at least 91 days continuously in a tax year, bearing in mind that short gaps may be discounted, they will have an accommodation tie. (See example 4 in RDRM13080).

6.29.4 *Home of close relative*

Para 34(5) sch 45 FA 2013 provides:

> If the accommodation is the home of a close relative of P's, sub-paragraph (1)(c) has effect as if for "at least one night" there were substituted "a total of at least 16 nights".

Amended as para 34(5) directs, para 34(1) provides:

> P has an accommodation tie for year X if–
> (a) P has a place to live in the UK [in the form of accommodation which is the home of a close relative of P],
> (b) that place is available to P during year X for a continuous period of at least 91 days, and
> (c) P spends ~~at least one night~~ a total of at least 16 nights at that place in that year.

The relief is that one can stay up to 15 nights at a close relative without satisfying the accommodation tie. If someone is in a position where night 16 could trigger an accommodation tie, they may have to move to a hotel.

Para 34(6) sch 45 FA 2013 provides:

> A "close relative" is–
> (a) a parent or grandparent,
> (b) a brother or sister,
> (c) a child aged 18 or over, or
> (d) a grandchild aged 18 or over,
> in each case, including by half-blood or by marriage or civil partnership.

The words "by marriage or civil partnership" do not make sense; maybe they come from an earlier draft; maybe the intention is to include close relatives of a spouse/civil partner or the spouse/civil partner of a close relative?

The RDRM gives a straightforward example:

> **RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]
>
> Example 5 (Ravi)
>
> R can stay with his grandparents whenever he is in the UK. They will put him up for more than 91 days if he wishes. He usually comes from India every year to visit them, and stays with them for the whole summer.
>
> Last year R spent only the first 2 weeks with his grandparents, then went on a one-off visit to his uncle, (who would not be regarded as a close relative for the purposes of the SRT), for 2 months before returning home. So, although accommodation at his grandparents, who are regarded as close relatives, was available for more than 91 days, R stayed with his grandparents for only 14 days, and therefore had no accommodation tie.
>
> This year R spent the whole of the summer with his grandparents.
>
> This year R has an accommodation tie.
>
> If an individual stays in UK accommodation held by a spouse, partner or minor children, then they will be considered to have an accommodation tie if they spend at least 1 night there.
>
> **RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]
>
> Example 6 (Peter and Andrew)
>
> P and his civil partner A share an apartment in London. Last year A moved to the USA to take up a university post to study marine biology. This year A came back to the UK for a 3 week holiday which he and P spent in Scotland. A spent the first and last nights of his holiday in their

> London apartment.
> This year A has an accommodation tie.
> It is possible to have more than 1 place in the UK that counts as available accommodation. However, this would still represent only 1 accommodation tie, no matter how many different places of accommodation are available.
> **RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]
> Example 7 (Julie)
> J has lived in Canada with her husband for many years.
> J and her husband own a holiday home in the UK which they do not let out, and in addition J can stay with her parents whenever she is in the UK, for as long as she wishes.
> This year J visits the UK and stays with her parent for 4 weeks, and then spends a further 3 weeks in her holiday home before returning to Canada.
> This year although J has 2 places that count as available accommodation, she only has 1 accommodation tie.

6.30 Work tie

Para 35(1) sch 45 FA 2013 provides:

> P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.

Para 35(2) sch 45 FA 2013 defines "works in the UK for a day":

> For these purposes, P works in the UK for a day if P does more than 3 hours' work in the UK on that day.

Thus the requirement is forty 3-hour UK workdays. An individual may work any number of days in the UK if they work less than 3 hours in that day. On a workday they may work up to 24 hours and the day would only count as one UK workday for the work tie.

A day may count as a UK workday which does not count as a "day spent" in the UK (because P is not in the UK at midnight or because of exceptional circumstances).[122]

6.31 90-day tie

Para 37 sch 45 FA 2013 provides:

> P has a 90-day tie for year X if P has spent more than 90 days in the UK

[122] See 6.15.1 (Ascertaining days spent in UK).

> in–
> (a) the tax year preceding year X,
> (b) the tax year preceding that tax year, or
> (c) each of those tax years separately.

It does not matter whether P is UK resident for the year in which P spends 90 days in the UK.

6.32 Country tie

Para 38(1) sch 45 FA 2013 provides:

> P has a country tie for year X if the country in which P meets the midnight test for the greatest number of days in year X is the UK.

Para 38(2) sch 45 FA 2013 provides a tie-breaker rule in the unusual case where P spends an equal number of midnights in two countries:

> If–
> (a) P meets the midnight test for the same number of days in two or more countries, and
> (b) that number is the greatest number of days for which P meets the midnight test in any country in year X,
> P has a country tie for year X if one of those countries is the UK.

The country tie applies to leavers but not to arrivers. That seems anomalous, but it does slightly simplify the administrative burden on those who are not leavers.

Perhaps one object is that HMRC can notify tax authorities of the country where the individual spends most time, to see if tax should be paid there.[123]

6.32.1 *The midnight test*

Para 38(3) sch 45 FA 2013 provides:

> P meets the "midnight test" in a country for a day if P is present in that country at the end of that day.

The 3 exceptions which qualify the midnight test for "days spent" (transit passengers /exceptional circumstances/frequent visitors deeming rule)[124] do not apply here.

Para 145 sch 45 FA 2013 provides:

[123] See too 6.40 (Resident of nowhere).

[124] See 6.15.1 (Ascertaining days spent in UK).

> "country" includes a state or territory

Thus if an individual spends time in different states of a federal state, such as the USA, then the time counts as spent in one country. Eg if P spends 100 days in Florida, 100 days in New York, and 165 days in the UK, that counts as 200 days in the USA and P will not satisfy the country tie. That might not have been clear without the definition.[125]

Some constitutional research will occasionally be necessary. Are Spain and Majorca one country? Or Guernsey, Alderney and Sark? Or are they separate countries?

6.33 Year of death

6.33.1 *Death and the SRT*

Many of the residence tests depend on the number of days that some condition is satisfied during the year. The outcome could be affected if the individual dies during the year. For instance, overseas test 1 requires less than 16 UK days. There needs to be some provision for death during the year, or someone who died between 6 and 20 April would be non-resident.

Death alters the SRT in the following ways:

(1) Overseas test 1 does not apply in the year of death
(2) Additional residence tests apply in the year of death: overseas tests 4 and 5 and UK test 4
(3) The day count requirement in the sufficient ties test is reduced in the year of death

6.33.2 *3 years non-resident: Overseas test 4*

Para 15 sch 45 FA 2013 provides:

> (1) The fourth automatic overseas test is that—
> (a) P dies in year X,
> (b) [i] P was resident in the UK for neither of the 2 tax years preceding year X or, alternatively,
> [ii] P's case falls within sub-paragraph (2), and
> (c) the number of days that P spends in the UK in year X is less than 46.
> (2) P's case falls within this sub-paragraph if—
> (a) P was not resident in the UK for the tax year preceding year X, and

[125] See 4.22 (Domicile territory/country).

> (b) the tax year before that was a split year as respects P because the circumstances of the case fell within Case 1, Case 2 or Case 3 (see Part 3 of this Schedule) [that is, a leaver's split year].

6.33.3 *Working overseas: test 5*

Para 16 sch 45 FA 2013 provides:

> (1) The fifth automatic overseas test is that—
>
> (a) P dies in year X,
>
> (b) P was resident in the UK for neither of the 2 tax years preceding year X because
>
> [i] P met the third automatic overseas test [Overseas work] for each of those years or, alternatively,
>
> [ii] P's case falls within sub-paragraph (2), and
>
> (c) P would meet the third automatic overseas test for year X if paragraph 14 were read with the relevant modifications.
>
> (2) P's case falls within this sub-paragraph if—
>
> (a) P was not resident in the UK for the tax year preceding year X because P met the third automatic overseas test for that year, and
>
> (b) the tax year before that was a split year as respects P because the circumstances of the case fell within Case 1 (see Part 3 of this Schedule) [leaving for overseas work].[126]
>
> (3) The relevant modifications of paragraph 14 are—
>
> (a) in sub-paragraph (1)(a) and (b) and sub-paragraph (3), for "year X" read "the period from the start of year X up to and including the day before the day of P's death", and
>
> (b) in step 3 of sub-paragraph (3), for "365 (or 366 if year X includes 29 February)" read "the number of days in the period from the start of year X up to and including the day before the day of P's death".

Amended as para 16(3) directs, para 14 reads:

> (1) The third automatic overseas test is that—
>
> (a) P works sufficient hours overseas, as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death,
>
> (b) during ~~year X~~ the period from the start of year X up to and including the day before the day of P's death, there are no significant breaks from overseas work,
>
> (c) the number of days in year X on which P does more than 3 hours' work

[126] See 10.6 (Case 1: Start work overseas).

> in the UK is less than 31, and
>
> (d) the number of days in year X falling within sub-paragraph (2) is less than 91.
>
> (2) A day falls within this sub-paragraph if—
>
> (a) it is a day spent by P in the UK, but
>
> (b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.
>
> (3) Take the following steps to work out whether P works "sufficient hours overseas" as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death—
>
> *Step 1 [disregarded days]*
>
> Identify any days in ~~year X~~ the period from the start of year X up to and including the day before the day of P's death on which P does more than 3 hours' work in the UK, including ones on which P also does work overseas on the same day.
>
> The days so identified are referred to as "disregarded days".
>
> *Step 2 [net overseas hours]*
>
> Add up (for all employments held and trades carried on by P) the total number of hours that P works overseas in ~~year X~~ the period from the start of year X up to and including the day before the day of P's death, but ignoring any hours that P works overseas on disregarded days.
>
> The result is referred to as P's "net overseas hours".
>
> *Step 3 [reference-period days]*
>
> Subtract from ~~365 (or 366 if year X includes 29 February)~~the number of days in the period from the start of year X up to and including the day before the day of P's death
>
> (a) the total number of disregarded days, and
>
> (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.
>
> The result is referred to as the "reference period".
>
> *Step 4 [reference-period weeks]*
>
> Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.
>
> *Step 5 [compute net overseas hours ÷ no. of reference-period weeks]*
>
> Divide P's net overseas hours by the number resulting from step 4.
>
> If the answer is 35 or more, P is considered to work "sufficient hours overseas" as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death.

6.33.4 *UK test 4: UK home*

Death in a year may prevent any of the UK tests from being met. For instance, UK test 2 (UK home) will not be met if P dies within the 91-day Test Window.

Para 10(1) sch 45 FA 2013 provides an additional UK test for the year of death:

> The fourth automatic UK test is that–
> (a) P dies in year X,
> (b) for each of the previous 3 tax years, P was resident in the UK by virtue of meeting the automatic residence test,

UK residence by virtue of meeting the sufficient ties test does not count.

> (c) even assuming P were not resident in the UK for year X, the tax year preceding year X would not be a split year as respects P (see Part 3 of this Schedule),

So if the preceding year (year X - 1) is a split year, UK test 4 is not met. The words "even assuming P were not resident in the UK for year X" are needed for split year Cases 2 and 3, under which a requirement for split year treatment in one year is that P is non-resident in the following year.[127]

> (d) when P died, either–
> (i) P's home was in the UK, or
> (ii) P had more than one home and at least one of them was in the UK

Unlike UK test 2, there is no requirement to have a home for a specified time, or to spend any time in the home. But there must be a home at the time of death (not earlier). There might be some scope for deathbed planning there: granting lease to a third party just before death would prevent this condition being met.

> (e) if P had a home overseas during all or part of year X, P did not spend a sufficient amount of time there in year X.

The point of para (e) is that the test is not intended to catch, for example, someone who is living back in their overseas home following a secondment to the UK but retains a UK home. Provided the 'spending sufficient time' requirement is met, in respect of an overseas home, the rule ensures that the individual does not automatically become UK resident as a result of their death.

Para 10 sch 45 FA 2013 provides:

> (2) In relation to a home of P's overseas, P "spent a sufficient amount of time" there in year X if—

[127] See 10.7.5 (Non-resident in next year: Case 2); 10.8.4 (Non-resident in next year: Case 3).

> (a) there were at least 30 days in year X when P was present there on that day for at least some of the time (no matter how short a time), or
> (b) P was present there for at least some of the time (no matter how short a time) on each day of year X up to and including the day on which P died.

Para (b) must be hard to meet. If P becomes ill, and is taken to hospital, then condition (b) is met if P dies on the same day but not if P dies on the next day. If P has two foreign homes, and is sometimes present in one and sometimes present in the other, condition (b) will not be met.

> (3) In sub-paragraph (2)—
> (a) the reference to 30 days is to 30 days in aggregate, whether the days were consecutive or intermittent, and
> (b) the reference to P being present at the home is to P being present there at a time when it was a home of P's.
> (4) If P had more than one home overseas—
> (a) each of those homes must be looked at separately to see if the requirement of sub-paragraph (1)(e) is met, and
> (b) that requirement is then met so long as it is met in relation to each of them.

This repeats the rules which apply to UK test 2.

6.33.5 *Death: Sufficient ties*

The sufficient ties test is amended if the individual dies during the year. Para 20(1) sch 45 FA 2013 provides:

> If P dies in year X, paragraph 18 has effect as if the words "More than 15 but" were omitted from the first column of the Table.

The first column of the table therefore reads:

Days spent by P in the UK in year X	**Number of ties that are sufficient**
~~More than 15 but~~ not more than 45	At least 4

Para 20 sch 45 FA 2013 provides:

> (2) In addition to that modification, if the death occurs before 1 March in year X, paragraphs 18 and 19 have effect as if each number of days mentioned in the first column of the Table were reduced by the appropriate number.
> (3) The appropriate number is found by multiplying the number of days, in each case, by A ÷ 12

where “A” is the number of whole months[128] in year X after the month in which P dies.

(4) If, for any number of days, the appropriate number is not a whole number, the appropriate number is to be rounded up or down as follows–

(a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,

(b) otherwise, round it down to the nearest whole number.

Amended as para 20 requires, the sufficient ties test for a death before 1 March becomes:

Leavers

Days spent by P in UK in year X	**Number of ties that are sufficient**
~~More than 15 but~~ not more than 46×A÷12	At least 4
More than 45×A÷12 but not more than 91×A÷12	At least 3
More than 90×A÷12 but not more than 121×A÷12	At least 2
More than 120×A÷12	At least 1

Arrivers

Days spent by P in UK in year X	**Number of ties that are sufficient**
More than 45×A÷12 but not more than 91×A÷12	All 4
More than 90×A÷12 but not more than 121×A÷12	At least 3
More than 120×A÷12	At least 2

The RDRM offers the following tables:

RDRM11970: Deceased individuals: Table C [May 2020]

Ties needed by a deceased person who was UK resident in one or more of the 3 tax years before the tax year under consideration.

The figures shown in the table below represent the days spent in the UK in the year of death.

Date of death	At least 4 ties	At least 3 ties	At least 2 ties	At least 1 tie
6 - 30 April	not more than 4	5 - 7	8 - 10	over 10
1 -31 May	not more than 7	8 - 15	16 - 20	over 20
1 - 30 June	not more than 11	12 - 22	23 - 30	over 30
1 -31 July	not more than 15	16 - 30	31 - 40	over 40
1 - 31 Aug	not more than 19	20 - 37	38 - 50	over 50
1 - 30 Sep	not more than 22	23 - 45	46 - 60	over 60
1 - 31 Oct	not more than 26	27 - 52	53 - 70	over 70
1 - 30 Nov	not more than 30	31 - 60	61 - 80	over 80
1 - 31 Dec	not more than 34	35 - 67	68 - 90	over 90

[128] Para 145 sch 45 FA 2013 provides: “whole month” means the whole of January, the whole of February and so on, except that the period from the start of a tax year to the end of April is to count as a whole month.

1 - 31 Jan	not more than 37	38 - 75	76 - 100	over 100
1 - 29 Feb	not more than 41	42 - 82	83 - 110	over 110
1 Mar - 5 Apr	not more than 45	46 - 90	91 - 120	over 120

RDRM11980: Deceased individuals: Table D [May 2020]

Ties needed by a deceased person who was UK resident for none of the 3 tax years before the tax year under consideration.

The figures shown in the table below represent the days spent in the UK in the year of death.

Date of death	All 4 ties	At least 3 ties	At least 2 ties
6 - 30 April	4 - 7	8 - 10	over 10
1 - 31 May	8 - 15	16 - 20	over 20
1 - 30 June	11 - 22	23 - 30	over 30
1 - 31 July	15 - 30	31 - 40	over 40
1 - 31 Aug	19 - 37	38 - 50	over 50
1 - 30 Sep	23 - 45	46 - 60	over 60
1 - 31 Oct	27 - 52	53 - 70	over 70
1 - 30 Nov	31 - 60	61 - 80	over 80
1 - 31 Dec	34 - 67	68 - 90	over 90
1 - 31 Jan	38 - 75	76 - 100	over 100
1 - 29 Feb	42 - 82	83 - 110	over 110
1 Mar - 5 April	46 - 90	91 - 120	over 120

6.33.6 *UK residence risk on death*

A person with a UK home faces some risk of being unexpectedly UK resident in the event of death. This can happen in two ways:

(1) An individual may expect not to meet UK test 2, on the basis that they will spend sufficient time 30 days in the overseas home later in the year. If they die unexpectedly, the person may be resident under UK test 2 because they may not have had the opportunity to clock up the 30 days.

(2) The person may be UK resident under UK test 4, particularly if they die early in the year and have not clocked up 30 days residence in the home.

The only way to avoid this risk is to ensure that the person spends some time in the overseas home in each of the first 30 days of the tax year; though there is no guarantee that will be possible.

A person with four UK ties also faces a risk of being unexpectedly UK resident in the event of death. The individual may expect not to spend 16 days in the UK, so as not to meet the usual sufficient ties test. But in the year of death they will be UK resident even if they spend *no* days in the UK.

6.33.7 *Transitional: Years to 2015/16*

Para 154(5) sch 45 FA 2013 deals with the transitional problem where the 3 previous tax years include pre-2013 periods, where the SRT (and in particular the automatic residence tests) did not apply:

> Unless, in relation to a pre-commencement tax year, an election is made under sub-paragraph (3) as respects that year[129]—
>
> (a) paragraph 10(b) of this Schedule has effect in relation to that year as if the words "by virtue of meeting the automatic residence test" were omitted

6.34 International transport workers

6.34.1 *"Relevant job"*

Para 30(1) sch 45 FA 2013 provides:

> P has a "relevant" job on board a vehicle, aircraft or ship if condition A and condition B are met.

"Relevant job" is not a helpful label: I refer to a person with a relevant job as an **"international transport worker"**.

I refer to **"international transport conditions A and B."**

6.34.2 *Transport condition A*

Para 30(2) sch 45 FA 2013 provides:

> Condition A is that P either—
>
> (a) holds an employment, the duties of which consist of duties to be performed on board a vehicle, aircraft or ship while it is travelling, or
>
> (b) carries on a trade, the activities of which consist of work to be done or services to be provided on board a vehicle, aircraft or ship while it is travelling.

Para 30(4) sch 45 FA 2013 provides:

> Sub-paragraph (2)(b) is not satisfied unless, in order to do the work or provide the services, P has to be present (in person) on board the vehicle, aircraft or ship while it is travelling.

6.34.3 *Transport condition B*

Para 30(3) sch 45 FA 2013 provides:

[129] See 6.38.2 (Ascertaining pre-2013 residence).

> Condition B is that substantially all of the trips made in performing those duties or carrying on those activities are ones that involve crossing an international boundary at sea, in the air or on land (referred to as "cross-border trips").

6.34.4 *Incidental duties*

The RDRM provides:

> **RDRM11750: Days spent in the UK: Travel either to or from a temporary workplace** [May 2020]
> ... Being on- call or stand-by may count as time spent working depending on the conditions of an individual's employment and the nature of their duties.
> Example 3 (Paula)
> P works as an engineer and is contractually required to be on-call for 4 night a month, in addition to her normal full-time attendance. She is paid a retainer for those 4 nights, in addition to being paid for any work if she is called out. The 4 nights are counted as working time.
> Example 4 (Franek)
> F is a self-employed locksmith, who keeps his mobile phone switched on 24 hours a day to receive customer calls. For the purposes of calculating work time, F should only include the time spent carrying out his jobs and the related travelling time.

Para 30(5) sch 45 FA 2013 provides:

> Duties or activities of a purely incidental nature are to be ignored in deciding whether the duties of an employment or the activities of a trade consist of duties or activities of a kind described in sub-paragraph (2)(a) or (b).

The RDRM provides:

> **RDRM11780: Days spent in the UK: Workers with relevant jobs** [May 2020]
> ... In deciding whether or not an individual falls within one of the categories of relevant job, duties or activities of a purely incidental nature can be ignored. For instance, where a pilot whose job consists of making long haul international flights; attends a meeting in the UK to hear an announcement about the airline's restructuring, the duties spent at the meeting are incidental to the duties of flying the plane, and so can be ignored.
> Example 2 (Preeya)
> P is a member of a cabin crew on board flights between London and

> Geneva for a short-haul airline. For 1 month during the year she changes her shifts and works on UK domestic flights. However, substantially all of the trips she makes in the performance of her duties are cross-border ones, P does have a relevant job.
>
> An individual will not have a relevant job simply because they occasionally work during a journey from 1 country to another; for example, if they catch up on business emails during a flight from their base in 1 country to visit a client in another country.

See 34.16 (Incidental duties in UK).

6.34.5 *Significance of relevant job*

Para 9(3) sch 45 FA 2013 disapplies UK test 3 (UK work):

> This paragraph does not apply to P if—
>
> (a) P has a relevant job on board a vehicle, aircraft or ship[130] at any time in year X, and
>
> (b) at least 6 of the trips that P makes in year X as part of that job are cross-border trips that either begin in the UK, end in the UK or begin and end in the UK.

Para 14(4) sch 45 FA 2013 disapplies overseas test 3 (Overseas work). The wording is identical.

The work tie is different for international transport workers. The rules in para 35, 36 sch 45 FA 2013 need to be read together:

> 35 (1) P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.
>
> (2) For these purposes, P works in the UK for a day if P does more than 3 hours' work in the UK on that day.
>
> 36 (1) This paragraph applies for the purposes of paragraph 35.
>
> (2) It applies in cases where P has a relevant job on board a vehicle, aircraft or ship.
>
> (3) When making a cross-border trip as part of that job—
>
> (a) if the trip begins in the UK, P is assumed to do more than 3 hours' work in the UK on the day on which it begins,
>
> (b) if the trip ends in the UK, P is assumed to do fewer than 3 hours' work in the UK on the day on which it ends.
>
> (4) Those assumptions apply regardless of how late in the day the trip begins or ends (even if it begins or ends just before midnight).

[130] Defined para 145 sch 45 FA 2013: "'ship' includes any kind of vessel (including a hovercraft)".

> (5) For the purposes of sub-paragraph (3)(a), it does not matter whether the trip ends on that same day.
> (6) A day that falls within both paragraph (a) and paragraph (b) of sub-paragraph (3) is to be treated as if it fell only within paragraph (a).
> (7) In the case of a cross-border trip to or from the UK that is undertaken in stages—
> (a) the day on which the trip begins or, as the case may be, ends is the day on which the stage of the trip that involves crossing the UK border begins or ends, and
> (b) accordingly, any day on which a stage is undertaken by P solely within the UK must (if it lasts for more than 3 hours) be counted separately as a day on which P does more than 3 hours' work in the UK.

6.35 Record keeping

Careful record keeping will often be necessary, especially for individuals whose residence is governed by the sufficient ties test.

6.35.1 *Record of UK days*

Note that it is not possible in practice to be present in the UK without leaving an electronic trail. In *Morris v HMRC*:

> the Revenue used their powers ... to obtain copies of the taxpayers' credit card and mobile phone records. These indicated that their credit cards and phones had been used in the UK on many more days than the taxpayers claimed they had been in the country. In subsequent correspondence, the solicitors said that this was because they had been used by other family members...[131]

Perhaps it would be wise for non-UK residents not to share their phones and credit cards with UK residents.

6.35.2 *Record keeping: Home*

Two issues may arise: whether a residence is a home; and when is the individual present in the home. The RDRM provides:

> **RDRM12920: Record keeping: Home** [May 2020]
> When considering whether the individual had a home in the UK or abroad, HMRC would look for evidence that establishes the individual's presence at a particular home, and whether or not a home existed, the

[131] 79 TC 184 at [6].

following information would help establish the facts:

- general overheads – utility bills which may demonstrate that the individual has been present in that home, for example, telephone bills or energy bills, which show usage commensurate with living in the property
- TV/satellite/cable subscriptions
- local parking permits
- membership of clubs, for example, sports, health or social clubs
- mobile phone usage and bills pointing to the individual's presence in a country
- lifestyle purchases pointing to the individual spending time in their home, for example, purchases of food, flowers and meals out
- presence of your spouse, partner or children
- engagement of domestic staff or an increase their hours
- home security arrangements
- increases in maintenance costs or the frequency of maintenance, for example, having their house cleaned more often
- insurance documents relating to that home
- SORN notification that a vehicle in the UK is 'off road'
- re-directed mail requests
- the address to which the individual's personal post is sent
- the address to which the individual's driving license is registered
- bank accounts and credit cards linked to the individual's address, and statements which show payment made – for example to utility companies
- evidence of local municipal taxed being paid
- registration at that address with local medical practitioners
- what private medical insurance cover the individual has, is it an international policy?
- credit card and bank statements which indicate the pattern and place of the individual's day by day expenditure

The list above is not definitive, no one piece of evidence will demonstrate the existence of the individual's UK or overseas home, with the requisite time spent there. HMRC will consider the weight and quality of all the evidence as, taken together, a number of pieces of evidence may be sufficiently strong enough to demonstrate their presence in a particular home.

Where the individual's home has changed from a holiday home to their home for the purposes of the SRT. The change in occupation could be evidence by amongst other things:

- utility bills which may show an increase in usage
- changes they have notified to:
- local municipal authorities

- the company providing their buildings and contents insurance

The same record keeping may be required to determine whether an individual is a Scottish/Welsh taxpayer.

6.35.3 *Record keeping: Work*

The RDRM provides:

> **RDRM12930: Record keeping: Working hours and location of work done - records** [May 2020]
> Where the individual's residence status is determined by the automatic tests relating to working full-time in the UK or overseas, they should keep information and records relating to:
>
> - the split in their working life between the UK and overseas, particularly noting days where they worked (including training, being on stand-by and travelling), for more than 3 hours
> - the nature and duration of their work activities – a work diary/calendar or timesheet is likely to indicate this. It might be found to be beneficial to ensure the diary is sufficiently detailed, maybe reflecting hours worked, and the nature of the work. For example, reviewing and responding to emails, meetings or completing travel claims
> - breaks the individual had from working, for example between jobs, and why
> - any periods of annual, sick or parenting leave
> - time spent visiting dependent children (those under the age of 18), when they are in the UK
> - their contracts of employment, and documentation/communications which relate to these, particularly to curtailment or extension of these or other changes to them
> - time the individual has had to spend in the UK owing to exceptional circumstances:

6.35.4 *Record keeping: UK ties*

The RDRM provides:

> **RDRM12940: Record keeping: The sufficient ties test** [May 2020]
> ...
>
> - In which countries they have spent their days and midnights, for example:
> - Their travel schedule/details
> - Booking information
> - Tickets and boarding cards (including etickets)

- If they left the UK to live or work abroad:
  - the date they left the UK
  - visa or work permit applications
  - contracts of employment
- If they come to the UK to live or work
  - the date they arrived here
  - Visa or work permit applications
  - documentation relating to when they take up employment, or ceasing their previous employment
- When the individual was present at their home or homes, or other available accommodation
- How long the individual owned or rented those homes, for example when they purchased, sold or leased those homes
- The time their home was unavailable for their use, for example because it was rented out

6.36 Residence: Burden of proof

The burden of proof generally lies on the taxpayer. This follows from s.50(6) TMA:

> If, on an appeal notified to the tribunal, the tribunal decides—
> (a) that the appellant is overcharged by a self-assessment;
> (b) that any amounts contained in a partnership statement are excessive; or
> (c) that the appellant is overcharged by an assessment other than a self-assessment,
>
> the assessment or amounts shall be reduced accordingly, but otherwise the assessment or statement shall stand good.

In *Norman v Golder*:[132]

> ... the language of [what is now s.50(6) TMA] makes it clear, beyond possibility of doubt, that the assessment stands, unless and until the taxpayer satisfies the Commissioners that it is wrong... The point really is not arguable.

In *Brady v Group Lotus Car Companies*:[133]

> The starting point is an ordinary appeal before the commissioners. Here, however unacceptable the idea may be to the ordinary member of the public, it has been clear law binding on this court for sixty years that an

[132] 26 TC 293 at p.297.

[133] [1987] STC 635, at p.642.

> inspector of taxes has only to raise an assessment to impose on the taxpayer the burden of proving that it is wrong.

Unfortunately the point which the Court of Appeal said was not arguable was argued successfully in a company residence case, where residence was wrongly said to be a matter of jurisdiction. It is no more a matter of jurisdiction than any other fact relevant to an appeal. In practice no-one has taken much notice and the burden of proof, in issues of individual and corporate residence, has generally been held to rest on the taxpayer.[134]

For completeness: a case to the contrary is *Marsh v HMRC* which concerned residence of an individual:[135]

> That the burden of proof [on residence] is on HMRC can be seen from *Cesena Sulphur Co Ltd v Nicholson* 1 TC 88 cited and approved in *Untelrab Ltd v McGregor* [1996] STC (SCD) 1).

But the parties were not represented by Counsel, and the point had not been argued.

The rule that the onus of proof is on the taxpayer is inconsistent with the HMRC Charter ("We'll assume you're telling the truth, unless we've good reason to think you're not."). But no-one takes any notice of that.

6.37 Non-resident's tax return: SA109

Non-residents who complete a tax return will include SA109 (Residence, remittance basis etc), which contains HMRC's standard questions on residence.

The Joint Expatriate Forum on Tax and NICs discussed this form in 2014:[136]

> 3.3 HMRC was aware that some agents and taxpayers felt that the SA109 asked for unnecessary or duplicate information. HMRC explained that this additional information was useful because it would allow HMRC to consider whether the claimed residence status was

[134] See *Wood v Holden* 78 TC 1 (Special Commissioners) at [120]. Brandon considers the point in more detail, and reaches the same conclusion, in *Taxation of Non-UK Resident Companies and their Shareholders* (1st ed, 2002) para 2.1.2 (Burden of Proving Residence Status). In any event, disputes are rarely decided by the burden of proof: see 4.7.4 (Who has burden of proof).

[135] [2017] UKFTT 320 (TC) at [58]. The burden of proof on ordinary residence was also held to be on HMRC, at [59]; but ordinary residence does not now matter.

[136] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expat_Forum_Minutes_FINAL.pdf* (April 2014)

> correct even though the basis of the claim was incorrect, e.g. an individual who failed to be automatically non-resident might not have sufficient UK ties or days of presence to be resident, and vice versa. HMRC made clear that an individual had no obligation to answer question other than those they believed to be appropriate to their circumstances.... HMRC said that it is up to the individual to decide which of the boxes are appropriate to complete and use a white space note to qualify the information provided.

6.38 Residence rules now abolished

6.38.1 *SRT/pre-2013 law compared*

The Residence Consultation Paper provides:

> 3.55 The SRT ... will broadly recreate the outcome of the current residence rules...[137]

In short, the SRT was not generally intended to change the old law, only to clarify its vagueness.

It is possible to identify some cases which would be decided differently under the SRT. I discussed these in earlier editions[138] and concluded that they were outliers: the SRT has provided a test of residence which is true to the principles of the pre-2013 (common law) rules as well as being more clear and certain.

Batten v HMRC[139] suggests the gap between the SRT and pre-2013 residence may be greater than that, perhaps because the more recent cases on residence had become increasingly stringent. There is no recent case where a taxpayer was held to be non-resident. In *Batten*, the the taxpayer was found to be UK resident under the pre-2013 rules, though he would have been non-resident under the SRT; and the FTT were not concerned by any inconsistency:

> We also recognise that the application of the SRT to the tax year 2012-2013 would have produced a different result. However, those rules are not applicable to that year. While we recognise that the SRT was designed to incorporate sufficient elements that it would generally produce the same result as the preceding common-law, codification of

[137] HM Treasury/HMRC, "Statutory Definition of Tax Residence" (2011) *http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf*

[138] 2021/22 ed, para 5.39 (SRT/pre-2013 law compared).

[139] [2022] UKFTT 199 (TC) at [207].

> common law principles will, by nature, produce some differing results. ... More importantly, there is no basis on which we can apply the SRT retrospectively.

Fortunately the pre-2013 test is now (more or less) of historical interest only.[140]

6.38.2 *Ascertaining pre-2013 residence*

The distinction between leavers and arrivers depends on whether a person is UK resident in the previous 3 years, so pre-2013 residence will be relevant to determine whether a person is a leaver or an arriver, and so may be relevant to post-2013 residence:

2013/14: position depended on residence in 2010/11, 2011/12, 2012/13
2014/15: position depended on residence in 2011/12, 2012/13
2015/16: position depended on residence in 2012/13

From **2016/17** the position depends on residence in 2013/14 onwards, but the residence position may in part depend on the old law. Thus it will take decades before pre-2013 residence is completely irrelevant to post 2013 residence, but the number of cases in which it matters is now small and will continue to diminish.

Para 154 sch 45 FA 2013 explains how one determines pre-2013 residence. In short, one applies the pre-2013 residence law but with an election to apply the SRT. But it is not necessary to discuss this here.[141]

6.38.3 *Ordinary residence*

FA 2013 (more or less) removed the concept of ordinary residence from tax law. The concept survives in the context of NICs,[142] in non-tax law, and in obscure corners of tax where it could not conveniently be abolished.[143]

6.38.4 *Coronavirus worker relief*

This relief applied to determine residence of coronavirus workers for 2019/20 and 2020/21. Accordingly it is now of (more or less) historical interest only. I do not discuss it here, though the topic might conceivably

[140] But see 99.13.1 (Jurisdiction-residence).

[141] See the 2018/19 edition of this work para 5.28, 5.29.

[142] See 46.12 (Residence and ordinary residence).

[143] Eg, taxation of diplomats; see s.841 ITA. The concept of habitual residence, which covers similar ground, remains in the context of DTAs.

arise if UK residence in those years was relevant for deemed domicile or temporary non-residence. See s.109 FA 2020 and the 2023/24 edition of this work para 6.35 (Coronavirus worker relief).

6.39 Non-residence & tax avoidance

6.39.1 *Avoidance irrelevant to residence*

In *Reed v Clark* the taxpayer carefully organised his year abroad to reduce his tax liability but that did not matter:

> Residence abroad for a carefully chosen limited period ... is no less residence abroad for that period because the major reason for it was the avoidance of tax.[144]

Again, in *McCabe v HMRC*, a pre-SRT case on residence and treaty-residence:[145]

> The authorities set out what it means to be UK or non-UK resident for the purposes of UK law, and where a person actually arranges their life in the knowledge of those rules and in accordance with those rules, I would not consider that of itself to be an abuse of either UK law or the provisions of the DTC.

This principle continues to apply under the SRT.

6.39.2 *Is it tax avoidance?*

In the absence of a TAAR, it rarely matters whether planning is called avoidance or mitigation. But it is good to know what one is talking about. I prefer the view that the simple act of becoming non-resident for tax reasons ("a tax exile") is mitigation rather than avoidance in the strict sense. It is difficult to say that this is contrary to the intention of Parliament. Popular opinion would probably disagree; that reflects different approaches to the concept or definition of tax avoidance.[146]

[144] 58 TC 528 at p.556. Likewise the Special Commissioner in *Shepherd v HMRC* [2005] UKSPC SPC484 at [62]: "although the Appellant's intention in going to Cyprus was to mitigate tax, I do not regard that as a relevant factor in deciding whether he was resident in the UK."

[145] [2022] UKFTT 356 (TC) at [216]. For the treaty-residence point, see 108.7.2 (Emigration to treaty-state).

[146] See 2.5.9 (Views of non-tax practitioners); "Vestey: Royal Commission debate" *https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey_Royal_Commission_debate.pdf*

Further steps to take advantage of non-resident status may cross the avoidance line. Possible examples are:

Example: comment	**See**
Share for loan note exchange in advance of non-residence: avoidance	58.6.2
Becoming treaty non-resident: contentious, has been called treaty abuse	108.7
Timing of disposals: mitigation but Manuals do not like it	56.10.6 ff
Inter-spouse disposals: mitigation	93.13

What is tax avoidance is very fact-sensitive.

6.40 Resident of nowhere

"Resident of nowhere" is a convenient term to describe a person who is not tax-resident under the domestic law of any jurisdiction.

It is possible for a peripatetic individual to be a resident of nowhere, since most jurisdictions require a person to be present for a period of time before they become tax-resident.

In practice it would be unusual for an individual to be a resident of nowhere for an extended period. But it can happen that an individual was a resident of nowhere for a short time, eg if:

(1) someone ceases to be UK resident on 5 April,
(2) has a two week holiday in a third country, and
(3) then moves to a new country of residence.

They may (depending on the rules of the new country of residence) be a resident of nowhere for those two weeks.

In Australia:

> 1.231 ... Where an individual becomes a non-resident ... but has not established tax residency in another jurisdiction, the individual can become a 'resident of nowhere'. ..
> 1.232 When adopting the new outbound individual resident rules, the Board considers that, where an individual that has been an Australian resident might otherwise determine their status as a non-resident, the change in status should only be effective where the individual can demonstrate that they have established residency in another country...
> 1.233 The new test should reflect that such individuals remain Australian residents unless and until tax residency is established in another jurisdiction.[147]

[147] Board of Taxation recently a review of Australia's individual income tax residency rules (2018).

This is not part of UK law, under the SRT, though some of its rules may reflect a similar policy intuition.[148] There is a case for applying a similar rule in the UK. But like most "good ideas" relating to tax reform, it gets harder as one thinks more about it. Just for a start:

(1) It is a complication, as HMRC and taxpayers would need to consider whether individuals were tax resident elsewhere in the world under foreign tax laws.[149] Residence is not a simple concept, as anyone who studies this chapter will know.

(2) A person may be tax-resident for some purposes but not for others. Under the proposed Australian rule, would a person be regarded as resident in the UK during the offshore part of a split year?

(3) Rules would needed for countries that did not have a concept of tax-residence.

(4) It would be anomalous if the reform drew a distinction between:
  (a) resident of nowhere, who would be subject to UK IT/CGT and
  (b) a resident of a low-tax state, who would not be a resident of nowhere, and would not be subject to UK taxes, but may not pay much if any tax.

  There is little practical difference for tax between (1) being a resident of nowhere and (2) being a resident in a jurisdiction which does not impose tax on worldwide income/gains (which for non-doms could include the UK). The latter does not involve being a resident of nowhere, though it might be relevant for other regulatory purposes, such as CRS.

(5) Would tax raised by this reform justify these complications? It may be that residents of nowhere are not such a challenge to international taxation as the eye-catching label might suggest to a non-tax practitioner.

Trusts and companies may also be residents of nowhere. Indeed this is more easily the case, as criteria of trust residence differs more than for individuals.[150]

[148] See 6.32 (Country tie); 10.8.5 (Sufficient overseas link: Split Year Case 3). The former coronavirus workers relief (a relief of very narrow interest) was designed to exclude a resident of nowhere; see 6.38.4 (Coronavirus worker relief).

[149] FATCA/CRS require a person to know where they are resident, but they matter less: they only concern disclosure, not liability to tax.

[150] See 8.25 (Company resident nowhere).

6.41 SRT: Critique

The consultation response paper provided:

> 3.5 [1] The Government does not believe the test is complicated (!) and [2] taxpayers will be able to determine their residence status with clarity if they know how many days they have spent in the UK and which of the relevant connection factors they have.[151]

Tax complexity is a complex topic;[152] but no practitioner will take point [1] seriously, and nor do HMRC:

> HMRC noted that while the statutory test provides certainty, the legislation is quite lengthy and can be resource intensive to learn and apply.[153]

Australia will not follow the UK example:

> On balance, the Board considers that codification akin to the UK approach would not align with the Government's simplification agenda and the Board's preferred principles based drafting approach. The overly complex drafting of the law and increased length of legislation is in direct conflict with simplification.[154]

It is however true that taxpayers will be able to determine their residence status (in the large majority of cases) with reasonable certainty. That is a change for the better. The SRT is complex, voluble and repetitious, onerous in record keeping, and on some points uncertain; but no-one would swap the complexities of the SRT for the uncertainties of the previous law. Almost all the problems raised by the pre-2013 (non)definition of residence have been swept away. This carries out the

[151] HM Treasury/HMRC, "Statutory definition of tax residence and reform of ordinary residence: a summary of responses" (June 2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf*

[152] See the Introduction to this work.

[153] Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.171 *https://taxboard.gov.au/sites/taxboard.gov.au/files/migrated/2018/07/T307956-income-tax-res-rules.pdf*

[154] Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.172 *https://taxboard.gov.au/sites/taxboard.gov.au/files/migrated/2018/07/T307956-income-tax-res-rules.pdf*

reform recommended by the Consolidation Committee in 1936,[155] though the committee would have been astonished that the definition of residence required more than 50 pages of legislation and over 100 pages of guidance.

The reform benefited from the input of the professional bodies from an early stage of policy development, rather than being produced by HM Treasury/HMRC and then presented in a complete form, at a consultation stage.

6.42 Future of SRT

Section 218(2) FA 2013 provides:

> The Treasury may by order make any incidental, supplemental, consequential, transitional or saving provision in consequence of Schedule 45.

It appears that parliament anticipated that changes might be needed as the effect of the rules began to be understood. But in practice none have been made.

CIOT once lobbied for a review:

> CIOT notes that the TIIN for the SRT, published on 11 December 2012, included a commitment that 'This measure will be kept under review through communication with affected taxpayer groups.'...[156]
> Accordingly, after a suitable interval, CIOT recommends that the new SRT be formally evaluated, by an independent review, against its declared objectives in order to assess whether it is achieving those objectives.[157]

But HMRC did not carry out a significant review and it now seems unlikely.

One hopes that a review (if it did happen) would give weight to the desiderata of stability. Residence status in earlier years (sometimes very distant years) is often relevant to tax issues in the current year (the arrivers/leavers distinction for the SRT; temporary non-residence; deemed domicile; etc). So where there is a change in the definition of residence,

[155] See the 2012/13 edition of this work, para 3.15.1 (Practice prior to 1936).

[156] Author's footnote: An internet search shows this is a standard form sentence, frequently cut and pasted into TIINs. But perhaps it is not intended to be taken seriously: few if any substantial reviews seem to result in practice.

[157] CIOT, letter to HMRC (2013)
CIOT tried again two years later: letter to HMRC (21 July 2015).

advisers must keep in mind the old law as well as the present law, for two decades and sometimes more.

6.43 Scottish/Welsh taxpayers

6.43.1 *Scots/Welsh taxpayer: Concept*

The concepts of Scottish/Welsh taxpayer are distinct from the concept of residence as defined in the statutory residence test. They are relevant for the Scots/Welsh rates of income tax.[158] Even where the rates are the same, Scottish/Welsh taxpayer status is important for the government(s), as it affects the allocation of tax receipts.

The statutory provisions are in the Scotland Act (SA 1998) and Government of Wales Act 2006 (GOWA). The provisions are (more or less) the same so I set them out side by side.

HMRC have published Manuals (in very similar terms):

(1) Scottish Taxpayer Technical Guidance[159]
(2) Welsh Taxpayer Technical Guidance

6.43.2 *The basic rule*

s.80D(1) SA 1998	**s.116E(1) GOWA**
For any tax year, a Scottish taxpayer is an individual (T)—	For any tax year, a Welsh taxpayer is an individual (T)—
(a) who is resident in the UK for income tax purposes for that year (see sch 45 to the Finance Act 2013), and (b) who, for that year, meets condition A, B or C.	[identical]

For condition C, see App 10.3 (Scottish/Welsh parliamentarian).

In order to be a Scottish/Welsh taxpayer, the individual must be UK resident under the SRT. The following cannot be a Scottish/Welsh taxpayer:

(1) A non-individuals (trust or company)
(2) A non-resident individual

[158] See 43.5 (IT rates: the numbers); 43.6 (IT rates: Application).

[159] This is based on HMRC, "Scottish Rate of Income Tax – Technical Guidance on Scottish Taxpayer Status" (2015) (now withdrawn) ("Scottish Taxpayer Guidance").

6.43.3 *Condition A (close connection)*

s.80D(2) SA 1998	**s.116E(2) GOWA**
T meets condition A if T has a close connection with Scotland (see section 80E).	T meets condition A if T has a close connection with Wales (see section 116G).

Section 80E(1) SA 1998/s.116G(1) GOWA define close connection:

> To find whether, for any year, T has a close connection with any part of the UK see—
> (a) subsection (2) (where T has only one place of residence in the UK), or
> (b) subsection (3) (where T has 2 or more places of residence in the UK).

6.43.4 *One UK residence*

Section 80E(2) SA 1998/s.116G(2) GOWA provide:

> T has a close connection with a part of the UK if in that year—
> (a) T has only one place of residence in the UK,
> (b) that place of residence is in that part of the UK, and
> (c) for at least part of the year, T lives at that place.

6.43.5 *"Place of residence*"

Section 80E(4) SA 1998/s.116G(4) GOWA provide:

> In this section "place" includes a place on board a vessel or other means of transport.

Thus a caravan or houseboat may be a place of residence.[160]

Residence is not otherwise defined, but it should carry (more or less) the same meaning as "residence" for CGT private residence relief,[161] which is in turn (more or less) the same as "home" in the SRT.[162]

HMRC agree. Scottish Taxpayer guidance provides:

> 10. ["Place of residence"] is not defined by the legislation so must be given its ordinary meaning.
> For an individual its ordinary meaning is the dwelling in which that

[160] A similar rule applies for the SRT: see 6.20.4 (Any form of home).

[161] See 59.2 ("Residence").

[162] See 6.21.3 (Home/residence compared).

> person habitually lives: in other words his or her home. As such, it should be regarded as having similarities to the concept of "home" within the Statutory Residence Test.
> 11. This interpretation is supported by considerable case law, albeit relating to similar but not identical concepts elsewhere in law.
> N.B. An individual's election of 'main residence' for CGT purposes will not determine 'main place of residence for Scottish taxpayer status purposes.

The guidance then copies the text of the CG Manual on what is a residence for PRR.[163]

Scottish taxpayer guidance provides:

> **A property which is used as nothing more than a holiday home, temporary retreat or something similar** is not a place of residence. So a holiday home where an individual spends time for only occasional short breaks, and which clearly provides a distinct respite from their ordinary day to day life will not be a place of residence. However if there comes a time when an individual's use of a holiday home or temporary retreat changes so that it is used more frequently and for longer periods of time it will become a place of residence from the time of the change.
> *Example*
> 40. Jenny lives in Birmingham and works from home. She also owns a small house on Skye which she rents out apart from 2 to 3 weeks a year when she takes her holiday there. The Skye property is not a place of residence.

The SRT has an express provision to cover the point.[164]

> A property, vehicle or other 'home' that an individual never stays in will not be a place of residence for them. For example a property purchased solely as an investment or a property bequeathed to an individual and which they never stay in will not be a place of residence. This point is further reinforced by "close connection" test set out in s.80E Scotland Act 1998[165] making clear that "living" at a place is necessary to establish a "close connection".

Likewise for "residence" for PRR: see 59.2.4 (Physical occupation).

[163] For the CG Manual text, see 59.2 ("Residence").
[164] See 6.20.6 (Holiday home).
[165] The original erroneously reads: 2012.

6.43.6 *Two UK residences*

Section 80E(3) SA 1998/s.116G(3) GOWA provide:

> T has a close connection with a part of the UK if in that year—
> (a) T has 2 or more places of residence in the UK,
> (b) for at least part of the year, T's main place of residence in the UK is in that part of the UK,
> (c) the times in the year when T's main place of residence is in that part of the UK comprise (in aggregate) at least as much of the year as the times when T's main place of residence is in each other part of the UK (considered separately), and
> (d) for at least part of the year, T lives at a place of residence in that part of the UK.

If T has 2 or more places of residence in the UK at the same time, it is necessary to decide which is the main place of residence. For this question, Scottish taxpayer guidance repeats the CG Manual guidance on "main residence".[166]

Scottish taxpayer guidance provides:

> 68. Where, in the course of a tax year, an individual has more than one "main place of residence" but all in the same part of the UK, they will have a "close connection", to that part of the UK. If that part of the UK is Scotland they will be a Scottish taxpayer
> 69. Where in the course of a tax year, an individual has a "main place of residence" both in Scotland and elsewhere in the UK, (this may occur through a move from a single place of residence to another; or where there is more than one place of residence throughout the tax year) - whether a "close connection" with Scotland exists will be determined by whether his or her main place of residence was in Scotland for at least as much of the year as it was in any one other part of the UK
> 70. It is important to note that, for the purposes of this test, the time for which a main place of residence was in Scotland during a particular tax year is compared to the time for which it was in England, Northern Ireland or Wales individually during the course of that year not in aggregate.

The guidance gives an example of a move from one place of residence to another:

[166] See 59.7 (Which is main residence).

> Example (Donovan)
> 73. D has rented and lived at a house in Birmingham for a number of years – this is his sole place of residence.
> On June 30th he stops renting the Birmingham property and purchases a flat in Aberdeen, moving in immediately and living there for the rest of the tax year.

The HMRC analysis is as follows:

> In the course of the tax year D has two places of residence – one in Birmingham and one in Aberdeen. On the basis that D's place of residence was in Scotland (Aberdeen) for a greater period of time (July-April 5th) than it was in any other part of the UK (England – Birmingham from 6th April to June 30th), D has a close connection to Scotland and is a Scottish taxpayer for the whole of the tax year.
> Were the order of the moves to be reversed (i.e. Aberdeen to Birmingham) but the dates stay the same then D would not be a Scottish taxpayer as, on the basis the length of time at each place of residence, a close connection to England would exist.

In the next example the individual moves twice:

> Example (Emily)
> 74. E has owned and lived at a house in Fort William for a number of years – this is her sole place of residence.
> In the course of the year she sells her house in Fort William and moves into rented accommodation in Swansea where she stays until moving into a new house she has purchased in London.
> The period of time each location constituted her place of residence in the course of the tax year was as follows:

Fort William	125 days
Swansea	115 days
London	115 days

The HMRC analysis is as follows:

> E is a Scottish taxpayer, for the whole of the tax year, on the basis that the period of time for which her place of residence was in Scotland was a least as great (and in this case greater) than the periods of time her place of residence was in any one of the other parts of the UK.

6.43.7 *"Living at" place of residence*

"Living at" a place is not defined but I do not think it is obscure. If a person is physically present in a place of residence, for more than a minimal transitory period (such as dropping in to collect post) they are "living at" the place.

6.43.8 *Cond. B: Scots/Welsh days*

It will be a rare case where condition A does not apply. That would only arise if:

(1) T has no place of residence in the UK
(2) T has a place of residence in the UK but does not live at that place during the year
(3) T has 2 or more places of residence in the UK but none of them is T's main place of residence in the UK
(4) T has a main place of residence in a part of the UK but does not live there (or in another place of residence in that part) during the year.

In these circumstances one turns to condition B.

s.80D(3) SA 1998	**s.116E(3) GOWA**
T meets condition B if— (a) T does not have a close connection with England, Wales or Northern Ireland (see section 80E), and (b) T spends more days of that year in Scotland than in any other part of the UK (see section 80F).	T meets condition B if— (a) T does not have a close connection with England, Scotland or Northern Ireland (see section 116G), and (b) T spends more days of that year in Wales than in any other part of the UK (see section 116H).

There a slightly artificial definition of the phrase "spends more days of that year in Scotland/Wales":

s. 80F(1) SA 1998	**s.116H(1) GOWA**
T spends more days of a year in Scotland than in any other part of the UK if (and only if)-	T spends more days of a year in Wales than in any other part of the UK if (and only if)
(a) the number of days in the year on which T is in Scotland at the end of the day equals or exceeds	the number of days in the year on which T is in Wales at the end of the day exceeds each of the following—
(b) the number of days in the year on which T is in any other part of the UK at the end of the day.	(a) the number of days in the year on which T is in England at the end of the day;

> (b) the number of days in the year on which T is in Scotland at the end of the day;
> (c) the number of days in the year on which T is in Northern Ireland at the end of the day.

Scottish taxpayer guidance provides:

> **83. Where an individual spends at least as many days in Scotland as elsewhere in the UK they are a Scottish taxpayer.**
> 84. In other words - days spent in Scotland compared to days spent in England, Northern Ireland, and Wales in aggregate rather than to days spent in each of those parts of the UK individually.
> 85. For these purposes Scotland includes the adjacent UK territorial waters (i.e. up to 12 nautical miles from the shore), but does **not** include the adjacent UK continental shelf. Days spent in the UK continental shelf (for example on an oil rig or similar installation) are **not** days spent in any part of the UK for these purposes.
> **Note** - this is a different test to that used to establish "close connection" where an individual has had, in any given tax year, "places of residence" or a "main place of residence" in more than one of the constituent regions of the UK (England, Wales, Scotland & Northern Ireland). In such cases days where the residence is in Scotland are considered separately against days where the residence is in each region individually.

Section 80F(2) SA 1998/s.116H(2) GOWA provide a rule for transit days:

> T is treated as not being in the UK at the end of a day if-
> (a) on that day T arrives in the UK as a passenger,
> (b) T departs from the UK on the next day, and
> (c) during the time between arrival and departure T does not engage in activities which are to a substantial extent unrelated to T's passage through the UK.

This is based on the SRT rule; see 6.16 (Transit days).

Scottish taxpayer guidance provides an example where an individual has places of residence but no main place of residence:

> Example (Meera)
> 89. M and her husband own and run a successful multi-national business. They have no children or close family. Both travel extensively on business, occasionally staying in hotels but usually basing themselves

at houses they own in a variety of UK and overseas locations. Despite this travel both are resident in the UK for tax purposes. They are registered to vote at their London residence but seldom stay long at any of their residences and have numerous bank accounts and cars registered at different addresses.
M and her husband have numerous "places of residence" but it is not possible to identify one of these as their "main place of residence" – Scottish taxpayer status should be decided for each by a day count for days spent in Scotland and elsewhere in the UK.

Similarly an example where an individual has no place of residence:

Example (Ruth)
90. R is employed by an oil company working four weeks on/four weeks off, on a rig in the North Sea. R is single and has no children. When not on the rig she stays in work-related accommodation near Aberdeen but spend most of her nonworking time visiting friends or on holiday. She keeps some of her possessions in storage near Aberdeen but the majority are at her mother's home in Belfast which she also uses as her address for bank and other correspondence, although she seldom visits.
R has no place of residence. Her mother's house is not a "place of residence" as R does not reside there. Neither the rig (even if it is in UK territorial waters) nor the on-shore work accommodation are places of residence as there is little permanence or continuity in their occupation – none of her possessions are kept in them – there is no close connection. R's Scottish taxpayer status will be decided by day counting.

Example (Stuart)
91. S is a UK citizen but has no fixed place of residence during the course of a tax year – neither owning nor renting property. He works for consultancy firm advising on IT implementation projects and as such travels round the UK on short term assignments, staying in hotels. In the course of the tax year he spends 120 days in Scotland, 100 days in England, 50 days in Wales and 10 days in Northern Ireland.
Since S has no place of residence during the course of the tax year so the "days" he spends in Scotland are compared against the days he spends in aggregate in other parts of the UK. Since the 120 "days" S spent in Scotland is less than the 160 "days" he spent in another part of the UK he is not a Scottish taxpayer.
Had the number of days S spent in another part of the UK stayed the same but the number of days he spent in Scotland increased to 160 days or more – S would have been a Scottish taxpayer.

6.43.9 *Irrelevant factors*

HMRC Scottish Taxpayer guidance correctly states:

> None of the following factors will cause an individual to be a Scottish taxpayer if their place of residence is outside of Scotland.
>
> - National identity – regarding oneself to be Scottish
> - Location of work – working in Scotland
> - Location of income source – receiving a pension or salary from a Scottish entity
> - Travelling in Scotland – driving a lorry in or frequent work visits to Scotland

6.43.10 *Split year*

Scottish taxpayer guidance provides:

> 50. If an individual is identified as being a Scottish taxpayer that status applies for a whole tax year - it is not possible to be a Scottish taxpayer for part of a tax year.
>
> 51. However, it should be noted that, in a year that the individual becomes or ceases to be UK tax resident the extent to which income in that tax year is subject to income tax at the Scottish rates remains subject to 'split year' treatment under the statutory residence test.

6.43.11 *Administration*

An individual may not know until the end of the year whether or not they are a Scottish/Welsh taxpayer.

CIOT comment:

> 3.2 We understand that it is the responsibility of HMRC to identify Scottish taxpayers and notify them. In addition, for PAYE taxpayers, they will issue specific 'S' PAYE codes to employers and pension providers. We have a concern, however, that for some taxpayers, whose residence status changes during a tax year, the only way of resolving their tax position will be via self assessment – since it will only be possible to determine their final residence status in retrospect. It is likely therefore that many more individuals will be forced into self assessment as a result of the changes to income tax under the Scotland Act ...

See too 6.35 (Record keeping).

CHAPTER SEVEN

RESIDENCE OF TRUSTEES

7.1 Trustees and residence: Introduction
7.2 Who are the trustees
7.2.1 Nominees/bare trustees
7.2.2 De facto trustees
7.3 Trustees a distinct person
7.3.1 Terminology: Trustees or trust
7.4 Trust residence for IT/CGT
7.5 Trustees all UK resident
7.5.1 Ascertaining trustee residence
7.6 Mixed-resident trustees
7.7 Residence condition C
7.7.1 Adding property: Tainting
7.7.2 Ordinary residence: 2013 transitional rules
7.8 Individual trustee/split year
7.9 Accidental residence: A trap
7.10 Separate sub-fund trustees
7.10.1 Settled land act settlement
7.11 Transfer between settlements
7.12 PE-residence rule
7.12.1 "Business"
7.12.2 Acting in course of business
7.12.3 Business "carried on in UK"
7.12.4 One trustee of several trusts
7.12.5 Several trustees of one trust
7.12.6 "Through branch/agency/PE"
7.12.7 Which definition of PE
7.13 When is there a UK PE
7.13.1 Auxiliary v core activities
7.13.2 Marketing
7.14 Fixed place of business PE
7.14.1 Occasional visits
7.15 Agency PE
7.15.1 Accountancy/law/tax advice
7.15.2 Investment managers/brokers
7.15.3 HMRC guidance
7.15.4 Director/employee of trustee
7.16 Individual trustee: Branch/agency
7.16.1 General approach
7.16.2 UK office
7.16.3 Fund manager
7.16.4 Employee of trustee
7.16.5 Trustee not own agent
7.17 PE-residence rule guidelines
7.18 Protectors and trust residence
7.18.1 Protectors
7.18.2 Reserved powers
7.19 Trust residence for IHT
7.19.1 IHT trust residence: Critique
7.20 Trust residence: Critique
7.20.1 Reason for PE-residence rule
7.20.2 Relief for professional trustee
7.21 Residence of bare trustees

Cross references

The following topics are considered elsewhere:
10.17 (Split year of trustees and PRs)
87.8.2 (Non-classic trust: Trustee)

7.1 Trustees and residence: Introduction

The topics of this chapter are:

(1) Who are the trustees
(2) Residence of trustees

The identity of trustees matters in particular:
(1) to ascertain trust residence
(2) for liability to tax: the trustees are the persons liable to IT/CGT/IHT on trust income/gains/property.

Residence of trustees matters in particular for:
(1) Territorial limitations for IT/ CGT. Trust residence plays a role similar to individual residence:
    (a) UK resident trustees are taxable on worldwide income/ gains
    (b) Non-resident trustees are taxable only on UK source income and certain UK-linked gains.
(2) Anti-avoidance rules such as s.87 and ToA rules: these rules (in general) only apply to trusts which are non-resident.

The focus of this chapter is the residence of trustees of substantive trusts. Different rules apply to residence of:

Topic	**See para**
Bare trustees	7.21
Unit trusts	69.7.3
PRs	88.4 (PRs residence for CGT); 89.3 (PRs residence for IT)

7.2 Who are the trustees

"Trustee" is not usually defined in tax legislation, and the identity of trustees of a classic trust is a matter of trust law.

For the question whether a protector may be a trustee, see 7.18 (Protectors and trust residence).

For trustees of settlement-arrangements and IHT settlements, which may not be trusts in the trust-law sense, see 61.3 (Non-classic trusts).

7.2.1 *Nominees/bare trustees*

Trust property may be, and often is, held by nominees for trustees. Nominees are trustees in the sense that they hold property on trust. Nominee/bare trustee are synonymous terms, and a bare trustee must by definition be a type of "trustee". But nominees are not the "trustees of a settlement" for the purposes of s.474 ITA/s.69 TCGA:[1] they are trustees of

[1] In addition, for CGT, a nominee would be within s.60 TCGA which provides that "this Act shall apply as if the property were vested in, and the acts of the nominee or

a bare trust which is not a settlement. No-one would doubt that, but it is helpful to keep this in mind in considering the position of de facto trustees.

In ordinary legal usage, the term "trustee" (without further elaboration) is normally reserved for trustees of a settlement.

7.2.2 *De facto trustees*

What if there has been an invalid appointment of new trustees, and (perhaps) the trust property has been transferred to the invalidly-appointed trustees? Trust law distinguishes between:

(1) A validly appointed trustee

(2) A person purportedly but invalidly appointed trustee; such a person is not the proper owner and administrator of the trust assets, but:
   (a) If trust assets are held by them, of course they have a duty to transfer the assets to the correct trustees, like any bare trustee; and
   (b) if they act as trustee, they become a de facto trustee (also called a trustee *de son tort*, but it is not necessary, or desirable, to use antique Law French).[2]

A de facto trustee is not a "trustee" in the normal trust-law sense, for instance:

(1) A de facto trustee cannot exercise trustee powers, such as a power of appointment.

(2) It does not need a deed of retirement for a de facto trustee to cease to act.

A de facto trustee may be described as a constructive trustee, and so in one sense, perhaps a loose sense, may be described as a type of trustee.[3] But even if that usage is correct, de facto trustees are not "trustees of a settlement", for the purposes of s.474 ITA/s.69 TCGA,[4] and in ordinary

[bare] trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or [bare] trustee"; see 87.7 (Bare trust/nomineeship). IT does not have an express equivalent of s.60, but if necessary the same rule could be implied.

[2] The term "de facto trustee" is defined and used in this sense in the Charities SORP. One might alternatively use the term "ostensible trustee".

[3] See R.C. Nolan's learned article "Equitable Property" [2006] LQR 232.

[4] See *Jasmine Trustees v Wells & Hind* [2007] EWHC 38 (Ch) at [33] - [50]; this describes the point as "obvious" - at [39] - but then goes on to examine the scheme of the TCGA in detail before concluding that the obvious answer is correct.
Express provision is therefore needed to say that a de facto executor is a personal

legal usage, the term "trustee" (without further elaboration) is normally reserved for the latter. In that respect the position is analogous to that of bare trustees or nominees.

7.3 Trustees a distinct person

The IT/CGT provisions are effectively identical; it may be helpful to read them side by side:

s.474(1) ITA	**s.69(1) TCGA**
For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).	For the purposes of this Act the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time).

I call this the **"distinct-person rule"**.[5] Following the EN, I refer to the single person (distinct from the actual trustees) as the **"notional person"**.[6]

For corporation tax, s.1169 CTA 2010 incorporates the IT rule by reference.[7]

EN CTA 2010 Annex 1 change 3 discusses this provision:

> Section 474(1) of ITA ... substitutes a notional person for the trustees. That notional person is not a company and so cannot be an associated company [for the purposes of the small profits rate[8]]. It follows that [the former] ESC C9[9] is not needed to prevent a trustee company and a

representative for IHT purposes; see 125.2 (Meaning of "PRs" for IHT).

[5] I formerly used the term "distinct-person fiction"; but, in some ways at least, the rule reflects the substantive reality, so the word "fiction" is does not seem wholly apt.

[6] ITA uses the expression "the single person mentioned in s.474(1)"; TCGA uses the expression "the deemed person referred to in s.69(1)".

[7] The IHT position is more complicated. Sections 178(4)/191(3) IHTA apply a distinct-person rule for the purposes of Chapters 3/4 Part 6 IHTA (Sale of land/shares from deceased's estate). Apart from that there is no express distinct-person rule; but it may be implied, see 104.23.8 (PRs and beneficiaries of estate), and it will not often matter.

[8] See 43.20.1 (Small profits rate).

[9] ESC C9 provided (so far as relevant): "The Revenue will not, by concession, treat one company as being associated with a trustee company where the company is only

> company which it controls from being treated as associated.[10]
> Similarly, if section 474(1) of ITA treats the trustees of two settlements as separate notional persons, the concession is not needed to prevent two companies controlled by different settlements from being treated as associated [even if the trustees are actually the same person].[11]

It also matters in some other contexts that a trustee, even a corporate trustee, is a notional person, and not a company for IT/CGT/CT purposes.

The distinct-person rule applies for the taxation of the trust but not for the taxation of the trustee in their private capacity: trustee remuneration is income of the person who is actually the trustee, not the notional person. That is a case where context "otherwise requires".

Just as the notional person is not a company, it is also not an "individual". For completeness: s.65(2) TCGA provides:

> ... nor shall any trustee or personal representative be regarded for the purposes of this Act as an individual.

This is otiose, as the word individual is not normally understood to refer to trustees or personal representatives. So it does not matter that there is no equivalent for IT.

The distinct-person rule is only expressed to apply for IT/CGT/CT. But in other cases, a distinct-person rule, or something similar, is easily implied by context. Thus the SDLT Manual provides:

> **SDLTM31745: Changes in the composition of trustees of a continuing settlement** [Nov 2019]
> For Stamp Duty Land Tax (SDLT) purposes we treat trustees of a settlement as a single and continuing body of persons, as we do for capital gains tax.
> It follows that for a continuing settlement a change in the composition of trustees is not a land transaction.
> This means in particular that there is no charge on such an occasion where trust property is secured by a mortgage or other borrowing.

associated with that trustee company because it is under its control by taking into account rights and/or powers the trustee company holds in trust."

[10] Section 18E(4)(a) CTA 2010 provides that a company is an associated company of another if "one of the two has control of the other"; see 104.17.1 (Associated company).

[11] Section 18E(4)(b) CTA 2010 provides that a company is an associated company of another if "both are under the control of the same person or persons".

> Since there is no land transaction for SDLT purposes on a change in the composition of trustees of a continuing trust, a land transaction return should not be completed...

7.3.1 *Terminology: Trustees or trust*

As a matter of trust law, and tax law, trustees are persons, but a trust is not a person. So it is more accurate to refer to trustee residence, not trust residence; and to say *the trustees hold,* or *lend,* not *the trust holds,* or *lends*; etc. However the expressions may be used synonymously, without causing confusion; and they often are.[12]

Moreover, in the present context, it is essential to distinguish between:

(1) Residence of the trustees (in their capacity as trustees); or, more accurately, the residence of the notional person referred to in s.474/s.69

(2) Residence of trustees (in their private capacity)

For simplicity, I refer to:

(1) **"Residence of the trust"**

(2) **"Residence of trustees (in their private capacity)"**

7.4 Trust residence for IT/CGT

There is one main definition of trust residence, which is the same for IT and CGT.[13] The IT and CGT provisions are differently worded, but the effect of the rules is the same.[14] In this chapter I set out both sets of provisions.

The current rules adopt proposals originally made in the Trusts Consultative Document (1991).[15] This is of more than historical interest, as it explains the background to the current rules.

[12] See 9.21.1 (Trust law background).

[13] For IHT see 7.19 (IHT trust residence for IHT).

[14] When introduced in 2006, the wording was exactly the same (though the provisions were set out twice, in ICTA and in TCGA). But ITA repealed the ICTA provisions and recast them in its own plain English style. If (as the professional bodies asked at the time) the 2006 reform had been put back to 2007, this complication would have been avoided. This history is now unimportant, but it illustrates how transient microeconomic considerations (convenience of civil service administration) may lead to a permanent sub-optimal outcome.

[15] Chapter 10 *https://www.kessler.co.uk/wp-content/uploads/2014/02/1108_001.pdf*

s.475 ITA	**s.69 TCGA**
(1) This section applies for income tax purposes and explains how to work out, in relation to the trustees of a settlement, whether or not the single person mentioned in section 474(1) [the notional person] is UK resident.	
(2) If at a time either condition A or condition B is met, then at that time the single person is UK resident.	(2) The deemed person referred to in subsection (1) [the notional person] shall be treated for the purposes of this Act as resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied.
(3) If at a time neither condition A nor condition B is met, then at that time the single person is non-UK resident.	(2E) If the deemed person referred to in subsection (1) [the notional person] is not treated for the purposes of this Act as resident in the UK, then for the purposes of this Act it is treated as being not resident in the UK.

There are therefore two circumstances in which a trust is UK resident. In the ITA they are called Conditions A/B. In the TCGA they are called Conditions 1/2. I refer to them as "**trust-residence conditions**".

7.5 Trustees all UK resident

s.475(4) ITA	**s.69(2A) TCGA**
Condition A is met at a time if, at that time, all the persons who are trustees of the settlement are UK resident.	Condition 1 is that all the trustees are resident in the UK.

If all the trustees are UK resident, the trust is UK resident. If all the trustees are not resident in the UK, then (subject to the PE-residence rule) the trust is non-resident.

7.5.1 *Ascertaining trustee residence*

One must identify whether the trustees are UK tax-resident in their private capacities, applying:
(1) the statutory residence test, if the trustee is an individual[16]
(2) the company residence rules, if the trustee is a company

In the case of a company not incorporated in the UK, residence is decided by central management and control, which is where the top-level decisions are made. A company which is a trustee will make two classes of top-level decisions:
(1) Trustee decisions, made in its capacity as trustee (eg major decisions relating to management and distribution of trust assets)
(2) Corporate decisions, made in its private capacity (eg decisions as to whether to act as trustee, what it charges, how to distribute its profits)

Strictly speaking, only the corporate decisions are relevant to ascertain the trust company's tax-residence. Trustee decisions are treated as made by a separate, notional, person. The place where those decisions are made does not matter, for corporate residence, regardless of how important the decisions may be. But trustee decisions can matter for the PE-residence rule.

What if the trustee is a company incorporated *in* the UK? The company is UK resident for CT purposes under the incorporation rule.[17] But this rule is expressed to apply only for the purposes of Corporation Tax. Perhaps the company might regarded as non-resident, if central management and control was not in the UK. Perhaps a purposive (non-literal) construction is appropriate here. Fortunately this question is not likely to arise in practice.

7.6 Mixed-resident trustees

Condition B deals with the position of trustees of mixed residence.[18]

s.475(5), 476 ITA	**s.69 TCGA**
s.475(5) Condition B is met at a time if at that time—	(2B) Condition 2 is that:

[16] See 6.3.1 (SRT: Application to trustees/PRs).

[17] See 8.3 (The incorporation rule). The same would apply to other statutory company residence rules, but it is difficult to see that the point could ever arise in practice.

[18] For TRS, see 131.9.2 (Non-UK trust with UK trustee).

(a) at least one person who is a trustee of the settlement is UK resident and at least one such person is non-UK resident, and	(a) at least one trustee is resident in the UK, (b) at least one is not resident in the UK, and
(b) a settlor in relation to the settlement meets condition C (see section 476).	(c) a settlor in relation to the settlement was resident or domiciled[19] in the UK at a time which is a relevant time in relation to him
s.476(1) This section applies for the purpose of working out whether a settlor (“S”) in relation to a settlement meets condition C at a time.	(2C) In subsection (2B)(c) ‘relevant time’ in relation to a settlor—
s.476(2) If— (a) the settlement arose on S’s death (whether by S’s will, on S’s intestacy or in any other way), and (b) immediately before S’s death, S was UK resident or domiciled[20] in the UK, then S meets condition C from the time of S’s death until S ceases to be a settlor in relation to the settlement.	(a) means where the settlement arose on the settlor’s death (whether by will, intestacy or otherwise), the time immediately before his death, and
s.476(3) If— (a) the settlement is not within subsection (2)(a), and (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as	(b) in any other case, a time when the settlor made the settlement (or was treated for the purposes of this Act as making the settlement).

[19] Section 476(3A) ITA/s.69(2F) TCGA provide:

Section 835BA (deemed domicile) applies for the purposes of subsections (2)(b) and (3)(b).	Section 835BA (deemed domicile) applies for the purposes of subsection (2B)(c).

This is the standard wording to apply the deemed domicile rules.

[20] See above footnote.

making the settlement), S was UK resident or domiciled[21] in the UK, then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

7.7 Residence condition C

Trust-residence condition C corresponds to the CGT relevant time requirement in s.69(2B)(c) and (2C) TCGA.

There is no express split-year rule, so the default rule applies: condition C is met even if a trust is made during the overseas part of a split year.[22]

For the purposes of discussion it is convenient to have some terminology and I coin the following terms:

(1) A "**UK-linked settlor**" is one within Condition C, i.e. (in short) who is resident or domiciled in the UK when they made the settlement.

(2) A "**UK-linked trust**" is one where the settlor (or a settlor) was UK-linked when they made the settlement.

(3) A trust has "**mixed-resident trustees**" if some trustees are UK resident and some are not.

Thus (in my terminology) a trust with mixed-resident trustees is UK resident if it is a UK-linked trust; conversely it is non-resident if it is not a UK-linked trust.

7.7.1 *Adding property: Tainting*

In trusts with mixed-resident trustees, it is necessary to identify the settlor(s)[23] and to ascertain when the settlor(s) provide trust property.

A trust whose settlor is not UK-linked may have some UK trustees (as long as they are not the sole trustees). In that case, however, one must take care that no other UK-linked person provides even a nominal amount of funds because that will make them co-settlors and the trust UK resident. This is known as "tainting" the trust.[24]

Suppose:

(1) Year 1: the settlor makes a trust when not UK resident;

[21] See above footnote.

[22] See 10.1 (Residence throughout tax year).

[23] See 99.1 (Why settlors matter).

[24] See 99.6 (Tainting).

(2) Year 2: the *same* settlor becomes UK resident and then adds property to the settlement.

The time that S made the settlement was year 1; S does not make a separate settlement in year 2; so at first sight it seems that the settlement is not UK-linked. But S is treated as making a settlement in year 2,[25] so it is considered that the settlement does become UK-linked.

7.7.2 *Ordinary residence: 2013 transitional rules*

Prior to the abolition of ordinary residence in 2013, s.476 ITA provided:

> (2) If—
> (a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and
> (b) immediately before S's death, S was UK resident, ordinarily UK resident or domiciled in the UK,
> then S meets condition C from the time of S's death until S ceases to be a settlor in relation to the settlement.
> (3) If—
> (a) the settlement is not within subsection (2)(a), and
> (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident, ordinarily UK resident or domiciled in the UK,
> then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

Para 57(2)(3) sch 46 FA 2013 deleted the underlined words. But para 57 provides:

> (4) The amendment made by sub-paragraph (2) does not apply if the person died before 6 April 2013.
> (5) The amendment made by sub-paragraph (3) does not apply if the settlement was made before 6 April 2013.

Thus the pre-2013 rules continue to apply to govern the income taxation of pre-2013 settlements. But it only makes a difference if a settlor is

[25] The pre-rewrite wording was clearer. Section 110 FA 1989 referred to "the time *or, where there is more than one, each of the times* when he has provided funds ... for the purposes of the settlement." It is an interesting question to what extent the courts will refer to pre-rewrite legislation to construe post-rewrite legislation. But that will not arise here, as the current legislation seems clear enough.

ordinarily resident but not UK resident, which rarely if ever happens.[26]

Prior to the abolition of ordinary residence in 2013, s.69 TCGA provided:

> (2) The [trustees] shall be treated for the purposes of this Act as resident and ordinarily resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied...
> (2B) Condition 2 is that—
> (a) at least one trustee is resident in the UK,
> (b) at least one is not resident in the UK, and
> (c) a settlor in relation to the settlement was resident, ordinarily resident or domiciled in the UK at a time which is a relevant time in relation to him.

Para 82 sch 46 FA 2013 deleted the underlined words. In this case there are no transitional provisions. There is a small difference between the IT and the CGT rules, though in practice it will rarely if ever matter.

7.8 Individual trustee/split year

The HM Treasury residence response paper provides:

> 3.122 Under the SRT an individual is resident for the whole of a tax year or not at all. It follows that provisions that look at residence status at a particular time may not work in the same way as previously. It is recognised that this may have an unintended impact on the position of a trust in the year in which an individual trustee comes to or leaves the UK and is resident for that year.
> 3.123 Accordingly the draft legislation contains a new rule that provides that an individual trustee is not regarded as resident for the purposes of determining the residence status of the trust if the only period in the year when the individual is a trustee falls within the overseas part of a split year for that individual.[27]

s.475(7)(8) ITA	**s.69(2DA) TCGA**
(7) Subsection (8) applies if—	A trustee who is resident in the UK for a tax year is to be treated for the

[26] See the 2012/13 edition of this work para 3.14 (Ordinarily resident but not resident).

[27] HM Treasury, "Statutory definition of tax residence and reform of ordinary residence: summary of responses to the June 2012 consultation" (2012) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult_responses_statutory_definitions_of_tax_residence_reform_of_ordinary_residence_responses.pdf*

	purposes of subsections (2A) and (2B) as if he or she were not resident in the UK for that year if—
(a) an individual becomes or ceases to be a trustee of the settlement during a tax year,	(a) the trustee is an individual, (b) the individual becomes or ceases to be a trustee of the settlement during the tax year,
(b) that year is a split year as respects the individual, and	(c) that year is a split year as respects the individual, and
(c) the only period in that year when the individual is a trustee of the settlement falls wholly within the overseas part of the year.	(d) in that year, the only period when the individual is a trustee of the settlement falls wholly within the overseas part of the year.
(8) The individual is to be treated for the purposes of subsections (4) and (5) as if he or she had been non-UK resident for the year (and hence for the period in that year when he or she was a trustee of the settlement).	

This applies if an individual becomes trustee during the overseas part of a split year. It does not apply if the individual is trustee throughout the year. In such a case the trust may be resident in part of the year, and so subject to CGT for the whole year.

There is an exception relating to the PE residence rule:[28]

s.475(9) ITA	**s.69(2DB) TCGA**
But subsection (8) is subject to subsection (6) and, accordingly, an individual who is treated under subsection (8) as having been non-UK resident is, in spite of that, to be treated as UK resident whenever the individual acts as mentioned in subsection (6)	Subsection (2DA) is subject to subsection (2D) and, accordingly, an individual who is treated under subsection (2DA) as not resident is, in spite of that, to be regarded as resident whenever the individual acts as mentioned in subsection (2D).

[28] See 7.12 (PE residence rule).

7.9 Accidental residence: A trap

A trust may become UK resident if:
(1) its sole trustee becomes UK resident; or
(2) any trustee becomes UK resident and it is a UK-linked trust.

The consequences of a trust becoming UK resident may be disastrous for CGT and (except for IIP trusts) for IT. So it is essential for an individual to resign all trusteeships before becoming UK resident if:
(1) trustee of a UK-linked trust; or
(2) a sole trustee.[29]

This includes trusteeships of foreign law charitable trusts.

This state of affairs is deliberate, for the 1991 consultative document discussed a relief for temporary resident trustees, but suggested, the reader may think, implausibly, that the problem was not significant. In practice, in cases of unfairness, I expect the problem will be overlooked or ignored by non-compliant taxpayers, and HMRC may not spot it or turn a blind eye.

7.10 Separate sub-fund trustees

It is common for one trust to hold separate funds ("sub-funds") on separate terms, and it is possible (though not common) for the sub-funds to have separate trustees. The position here is governed by s.474(2)(3) ITA and s.69(3) TCGA. I do not set these out here because I do so elsewhere.[30]

The trust is UK resident unless the trustees of the sub-funds jointly meet the trust-residence conditions.

7.10.1 *Settled land act settlement*

The same provisions also deal with Settled Land Act settlements. These are (almost) obsolete in England, but the rules may shed light on the position of foreign trust-like entities by analogy. The trustees for tax purposes are the settled land act trustees *and* the tenant for life.

What is the position where the settled land is vested in the tenant for life, and there are no other investments, so nothing is vested in the trustees of the settlement? It is suggested that the trustees (for tax purposes) are still

[29] In the case of a non-UK linked trust, an appointment of a second non-resident trustee would be an alternative to resignation. See too 12.4.9 (Immigration on death of trustee).

[30] See 63.1.1 (Separate sub-fund trustees). For the (somewhat theoretical) case where a sub-fund election is made, see 63.9 (Effect of sub-fund election).

the tenant for life and the trustees of the settlement for SLA purposes. Whether the settlement includes investments representing capital money should not affect the question of who are the trustees.

7.11 Transfer between settlements

Section 476 ITA deals with transfers between settlements:

> (4) Further, if—
> (a) there is a transfer of property in relation to which section 471 applies,
> (b) S is a settlor in relation to settlement 2 as a result of that section, and
> (c) immediately before the disposal by the trustees of settlement 1, S meets condition C as a settlor in relation to settlement 1 as a result of subsection (2) or (3) or this subsection,
> then S meets condition C as a settlor in relation to settlement 2 from the time S becomes such a settlor until S ceases to be such a settlor.
> (5) "Settlement 1" and "settlement 2" are to be read in accordance with section 470(1).

For CGT, the equivalent is the last paragraph of s.69(2C) TCGA:

> and, in the case of a transfer of property from Settlement 1 to Settlement 2 in relation to which s.68B applies, "relevant time" in relation to a settlor of the transferred property in respect of Settlement 2 includes any time which, immediately before the time of the disposal by the trustees of Settlement 1, was a relevant time in relation to that settlor in respect of Settlement 1.

7.12 PE-residence rule

s.475(6) ITA	**s.69(2D) TCGA**
If at a time a person ("T") who is a trustee of the settlement acts as trustee in the course of a business which T carries on in the UK through a branch, agency or permanent establishment there, then for the purposes of subsections (4) and (5) assume that T is UK resident at that time.	A trustee who is not resident in the UK shall be treated for the purposes of subsections (2A) and (2B) as if he were resident in the UK at any time when he acts as trustee in the course of a business which he carries on in the UK through a branch, agency or permanent establishment there.

I refer to this as the "**PE-residence rule**".

The PE-residence rule has four requirements:

(1) A trustee carries on a business.
(2) It carries on business in the UK.
(3) It carries on business through a branch/agency or PE in the UK.
(4) It acts as trustee in the course of that business.

HMRC has published guidance on the PE-residence rule (**"HMRC PE-residence rule guidance"**).[31]

The professional bodies have issued a 31-page guidance note "Taxguide 06/15".[32] This consists of (I think, excessively) detailed examples put to HMRC, followed by brief generalities from HMRC. That format makes it difficult to identify relevant principles, though one or two significant points can be found.

See too 7.20.1 (Reason for PE-residence rule).

7.12.1 *"Business"*

The PE-residence rule only applies if the trustee carries on a business. A trustee which does not charge, or only charges to recoup expenses (such as a family/SPV trustee company) does not carry on business. This may offer a solution to the problem of the PE-residence rule.

HMRC agree. HMRC PE-residence rule guidance provides:

> By business we mean the business of providing professional trustee services for a fee.

7.12.2 *Acting in course of business*

The business must be (or include) the business of acting as trustee. For instance, if the trust holds UK investment properties, the trustee will carry on a property business in the UK, but is not acting as trustee in the course

[31] *http://www.hmrc.gov.uk/manuals/tsemmanual/attachments/tsem1461_appendix1.doc* The guidance was published in 2009 and lightly revised in 2011 (though the website version is still dated 1 July 2009). The guidance is in appendix 1 of the TSE Manual but in the form of a downloadable word file, not online text; as a result it is missing in commercial tax databases.

[32] *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/pre-2017/taxguide-0615.ashx*
This provides: "This Taxguide was originally published as Taxguide 3/10 which is now withdrawn. It has been reissued following a change to example 19 and the removal of example 28 which is now covered in the extended example 19. The revised example 19 was agreed by HMRC in 2015."

of running that business: it is running the business in the course of acting as trustee. In other words, the test is looking at the business that the trustee is carrying on in its private capacity, not in its capacity as trustee.

The CGT exit charge rules confirm that a trustee who (in the capacity as trustee) carries on a trade in the UK through a branch/agency or PE may be non-resident.[33]

HMRC agree. HMRC PE-residence rule guidance provides:

> 8. When considering the applicability of the [PE-residence rule] the following three questions are relevant:
>
> **A. Is the trustee carrying on a business in the UK?**
>
> ... This question does not relate to the business of a particular trust that might be conducted by the trustee. It enquires whether the person who is a trustee carries out business activities (as a professional or businessman, not as trustee of a particular trust) in the UK.
>
> **B. If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment in the UK?**
>
> Again this means that the trustee is carrying on through the branch, agency or permanent establishment the sort of activities from which it substantially derives its worldwide profits - providing professional services for a fee - and not what it is doing in relation to an individual trust.

7.12.3 *Business "carried on in UK"*

What if T carries on business partly in the UK and partly elsewhere? It is suggested that T carries on business in the UK, so if the UK part is carried on through a PE, T is deemed UK resident. If this is right, the rule lacks all proportionality. There is no *de minimis* rule. If a small part of T's trust business is carried on through a UK PE, the entire trust may become UK resident. As to whether a business is partly carried on in the UK, see 21.4.4 (Trading income of a non-resident), but if the business is carried on through a PE in the UK, there must be a business carried on (at least party) in the UK.

7.12.4 *One trustee of several trusts*

What is the position if a person is trustee of several trusts and acts as trustee through a UK PE for one trust, but not the others? It is considered that only

[33] See 12.4.2 (Assets of UK trade).

that one trust is UK resident. This follows from the rule that trustees are a notional person distinct from the person who is actually trustee.[34] This view also makes better sense in the context.

HMRC agree. HMRC PE-residence rule guidance provides:

> 8. When considering the applicability of the [PE-residence rule] the following three questions are relevant ...
> **C. If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?**
> For example, a corporate trustee could have a permanent establishment in the UK but it is only when it is acting as a trustee through that place that the deemed residence rules apply in relation to the particular trust for which the company acts as trustee. The test is on a trust by trust basis. So while a corporate trustee might be acting as a trustee in relation to one trust through a fixed place of business in the UK, other trusts must be considered separately according to their facts and circumstances.
> The same principle applies in the case of a non-corporate trustee: the test is on a trust by trust basis.

7.12.5 *Several trustees of one trust*

Suppose:

(1) A trust has two trustees, T1 and T2
(2) (a) T1 is deemed UK resident (because it has a UK PE)
    (b) T2 is not (e.g. T2 is an individual who does not carry on business)

This is treated as a trust with mixed-resident trustees So where a trust does not have a UK-linked settlor, the appointment of a co-trustee who does not carry on trustee business would solve the difficulty posed by the PE-residence rule.[35] HMRC agree. Trust residence guidance example 4b provides:

> **Example 4b** (December Ltd & Mr Wednesday joint trustees of Tuesday Trust)
> As in example 4a[36] but the significance of the meetings M has in the UK with the beneficiaries of the Tuesday Trust is sufficient for D Ltd to have a permanent establishment in the UK in respect of that trust. However D Ltd has a co-trustee Mr. W who is a non-UK resident trustee.

[34] See 7.3 (Trustees a distinct person).
[35] See 7.6 (Mixed-resident trustees).
[36] See 7.15.4 (Director/employee of trustee).

> **HMRC view**: As there is a co-trustee who is non-UK resident and as the settlor of the T Trust was not resident or domiciled in the UK when he introduced property into the trust that means that the trustees of the T Trust as a body will not be UK resident.

7.12.6 *"Through branch/agency/PE"*

In UK domestic tax law, the concept PE is used for companies[37] and "branch or agency" is used for individuals.[38]

HMRC PE-residence rule guidance provides:

> 5. HMRC accept that for trustees the '*branch*' and '*agency*' tests apply to non-corporate trustees and the '*permanent establishment*' test to corporate trustees. Non-UK resident companies that are trustees therefore need only be concerned about being treated as UK resident if they carry on a business through a permanent establishment in the UK. This is in line with section 10B TCGA 1992 which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here. ...

Thus in the HMRC view, the PE-residence rule applies:

(1) If a corporate trustee is carrying on a trustee business through a PE.
(2) If an individual trustee is carrying on a trustee business through a branch/agency.

One does not ask if an individual has a PE, or if a company has a branch or agency.

In practice offshore trusts do not often have individuals as trustees, and where individuals do act, they do not usually do so in the course of business. Accordingly, the question will normally be whether a corporate trustee has a PE: branch/agency will not normally arise. Since branch/agency is a somewhat undeveloped concept that is just as well. If, exceptionally, the issue did arise, the concept of branch/agency is more or less the same as PE and for most practical purposes is identical.[39]

If, as advocated in this book, the concept of branch/agency was replaced altogether by PE, this complication would cease.[40]

[37] The statutory definition of PE applies only to companies: see 106.2.2 (Scope of UK law definition).

[38] See 106.2 (PE: UK-law/OECD Model meanings); 106.27 (Meaning of "branch or agency").

[39] See 106.27 (Meaning of "branch or agency") .

[40] See 106.28 (Branch/agency: Critique).

7.12.7 *Which definition of PE*

The term "permanent establishment" has several distinct definitions.[41] I use the following terminology:

(1) "**UK-law PE**" defined in s.1141 CTA 2010
(2) "**OECD-Model PE**" defined in OECD Model
(3) PE as defined in any particular DTA

The term "PE" is not defined for the purposes of trust residence. Which definition applies? It is suggested that the UK-law PE should be the relevant definition. That is a statutory, taxes-act-wide definition.

The UK-law definition of PE only applies "in relation to a company"[42] so it does not apply to a non-corporate trustee, which is consistent with the view that for non-corporates, one applies the branch/agency rule and PE is not relevant.

A corporate trustee is treated as not being a company for IT/CGT purposes[43] unless the context otherwise requires. But we are here concerned with the business which the trustee carries on in its private capacity, so it is suggested that the context does otherwise require.

HMRC PE-residence rule guidance in its original form (2009) assumed that the applicable definition was OECD-Model PE. That is *an* ordinary sense, but in the light of the statutory definition, it cannot be said to be *the* ordinary sense. Another difficulty is that this definition changed in 2017.[44] Which definition applies, the pre-2017 definition one or the current one? While UK tax legislation occasionally delegates, or outsources, to OECD, one would expect the legislation to say so.

In 2011, the following passage was added to the guidance:

> **Treaty Issues**
> 13. Most UK treaties contain a permanent establishment threshold (Article 5 in OECD Model) for taxing business profits of a non-resident. This applies to both corporate and non-corporate trustees. Although permanent establishment is generally relevant to corporate trustees, and branch and agency to non-corporates, where trustees are residents of a treaty country (and the treaty contains a permanent establishment threshold) then effectively that is the standard that needs to be met in the

[41] See 106.2 (PE: UK-law/OECD Model meanings).
[42] See 106.2.2 (Scope of UK-law definition).
[43] See 7.3 (Trustees a distinct person).
[44] See 106.2.1 (Pre/post-2017 OECD Model).

> case of all trustees, non-corporate as well as corporate. This means that for treaty countries broadly the same considerations for permanent establishment as set out in the guidance will apply in the case of non-corporates. This includes the independent agent exemption outlined below.
> 14. Thus, where a treaty exists between the UK and the country in which the trustee is resident the permanent establishment article needs to be satisfied for the trustee to be treated as UK resident for the purposes of the trustee residence rules.
> 15. Annex A outlines in more detail how OECD Commentary interprets Article 5...

Thus the HMRC view is as follows:

(1) Where a corporate trustee is treaty-resident in a foreign state under a DTA with a definition of PE, the expression PE in the PE-residence rule is understood to refer to PE as defined in the treaty. Branch/agency does not apply.

(2) Where an individual trustee is treaty-resident in a foreign state under a DTA with a definition of PE, the expression PE in the PE-residence rule is understood to refer to PE as defined in the treaty. Branch/agency does not apply.

(3) Where a trustee is not treaty-resident in a foreign state under a DTA with a definition of PE:
    (a) In the case of a corporate trustee, one applies OECD-Model PE (I think); and branch/agency does not apply.
    (b) In the case of a non-corporate trustee, one asks whether the trustee has a UK branch/agency; and PE does not apply.

I suspect that the authors of the guidance (both the original and the 2011 revision) overlooked the UK-law definition of PE.

This is all a terrible muddle, though it could easily be resolved by straightforward tax simplification.[45] Fortunately (in the context of a trustee business in particular) there is probably little difference between:

(1) UK-law PE
(2) OECD-Model PE
(3) PE as defined in any particular treaty
(4) Branch/agency

So it will rarely if ever matter which definition or concept applies. Still, it

[45] See 106.25 (Definitions of PE: Critique).

would be good to know precisely what we are talking about.

7.13 When is there a UK PE

The more important question is what amounts to a PE, whichever definition applies. The difficulty is that the concept of PE, which was designed for international tax/DTA purposes, is not well suited as a test of trustee residence. Moreover I suspect that the part of HMRC which deals with trusts does not speak much to the part which deals with PE, and has little understanding of the difficult definition of PE. So on this point HMRC PE-residence rule guidance offers only vague and heavily qualified generalities.

There are two types of PE which I call:

(1) **"Fixed place of business PE"** and
(2) **"Agency PE"**

7.13.1 *Auxiliary v core activities*

HMRC PE-residence rule guidance provides:

> **Core activities**
> 9. In connection with Question C and in line with the Commentary to the OECD Tax Model Convention, "carrying on the function of being a trustee" means in this context activities which are the core activities of a trustee and not those activities which are auxiliary or preparatory.[46] This applies equally to non-corporate trustees.

It is correct that activities of a preparatory or auxiliary character do not constitute a PE.[47] The use of the label "*core* activities" to describe those which are not merely preparatory/auxiliary is not entirely apt. In another context, the expression is criticised by Lord Templeman, referring to the "incomprehensible test" of core duties.[48]

HMRC PE-residence rule guidance explains what it regards as "core activities":

> 10. A trustee is the person who has a legal duty to manage the assets of that trust in the best interests of the beneficiary or beneficiaries. The trustee manages, employs and disposes of the trust assets in accordance with both the terms of the trust and the duties and responsibilities which the law places upon trustees. The core activities of a trustee would

[46] See 7.12.4 (One trustee of several trusts).
[47] See 106.19 (Preparatory and auxiliary activities).
[48] *Fitzpatrick v IRC* 66 TC 407 at p.527.

> therefore be regarded as including:
> 10.1 the general administration of the trusts
> 10.2 the over-arching investment strategy
> 10.3 monitoring the performance of those investments
> 10.4 decisions on how trust income will be dealt with and whether distributions should be made.[49]

HMRC PE-residence rule guidance then explains "auxiliary activities":

> 11. There are other activities which trustees carry out which are not core activities central to their conduct and management of the trust, but are instead preparatory or auxiliary activities. These *generally* can include information gathering meetings, including meetings with independent agents or with beneficiaries but, as mentioned below, each case will have to be considered individually.

The rule that information gathering is auxiliary is in fact a statutory rule.[50] But in practice meetings tend to move seamlessly from information gathering to decision making.

> 12. In deciding whether the conduct and management of a particular trust is being carried on in the course of the corporate trustee's business through a permanent establishment, HMRC's approach will be to look at where the core activities are physically being carried out. If these core activities are being carried on in the UK through the corporate trustee's permanent establishment, the trustee would be treated as UK resident for the purposes of the particular trust. However as well as the nature or significance of the individual activities and meetings and whether they are core activities, we would also consider the issue of frequency. So where there is, in relation to a particular trust, evidence of considerable administrative work – such as meetings with investment managers or beneficiaries – being carried on in the UK through a permanent establishment, so that such meetings have become a major element of the trustee's activities in relation to that trust, and no longer preparatory or auxiliary, we would need to consider carefully whether as a matter of fact the non-UK resident corporate trustee was acting as a trustee through that permanent establishment.

Before turning to examples, the Guidance sets out the usual disclaimers:

[49] The draft guidance included a further paragraph 10.5: "accounting, making tax returns and record keeping." Significantly, the final guidance deleted this.

[50] See 106.19 (Preparatory and auxiliary activities).

> 16. The guidance that follows sets out examples of when a corporate trustee may or may not be regarded as UK resident. This guidance is based on the law as it stood on the day of publication. HMRC will publish amended or supplementary guidance if there is a change in the law or in the Department's interpretation of it. Whilst the guidance is intended to be as extensive and helpful as possible, it should not be assumed that it will provide a definitive answer in every case. That will depend upon the facts of each individual case. You can of course take your own advice on this issue...

7.13.2 *Marketing*

Marketing to prospective settlors is not carrying on trust business in the UK, because no trust at that time exists. HMRC agree:

> **1. Preparatory work prior to the creation of any trust**
> 1.1 A non-UK resident trust company that is to be a trustee of a settlement may carry out a number of activities in the UK before the trust is created. This might, for example, include discussions with clients such as potential settlors or beneficiaries over the appropriate terms of any trust. It could also include research with specialist professionals about possible trust investments and assets. These discussions may take place even before the beneficiaries are chosen.
> **Example 1** (February Ltd trustee of January trust)
> Before the J Trust is established, F Ltd, a non-UK resident trust company holds several meetings in the UK at its Manchester office with the potential settlor Mr J. The meetings are to discuss the possible terms of the trust and suitable investments.
> **HMRC view** The J trust does not yet exist, so there is no need to consider the tests in section 69(2D) TCGA 1992 and section 475(6) ITA. In any case, introductory meetings and discussions of this type would generally be regarded as preparatory or auxiliary activities and not core activities.

7.14 Fixed place of business PE

7.14.1 *Occasional visits*

A place which the trustees use occasionally to meet the settlor, beneficiaries or others cannot constitute a fixed place of business PE, which requires a degree of permanency.[51] HMRC PE-residence rule guidance provides:

[51] See 106.8.2 (Degree of permanency).

> **2. Trustee carrying out duties for the administration of any trust**
> As mentioned in paragraphs 9 to 11 of the Background section of this guidance,[52] a range of activities may be carried out by a trustee once a trust has been set up including meetings. When considering whether the corporate trustee is carrying on the administration of a particular trust in the course of their business through the permanent establishment, the frequency of the meetings will be looked at as well as their significance and quality.
>
> **Example 2** (March Ltd, trustee of April trust)
> M Ltd, a non-UK resident trust company that is trustee of the A Trust, holds quarterly meetings in the UK at its London offices with investment advisers. The purpose of these meetings is for M Ltd to collect purely factual information about potential assets to inform future investment strategy for the A trust. The actual decisions about the investment strategy are taken by M Ltd at their home office outside the UK. No other activities or meetings relating to the A Trust are carried on in the UK.
>
> **HMRC view:** M Ltd has a permanent establishment in the UK. However, the significance of the meetings with the investment advisers is not sufficient for March Ltd to be regarded as acting as a trustee in respect of April Trust through that permanent establishment. They will not, therefore, be regarded as UK resident for the purposes of the April Trust.

The correct analysis is that the trustee does not have a PE in the UK, for two independent reasons: information collecting is an auxiliary matter, and the office is not used with sufficient regularity to constitute a PE. (One is of course looking on the matter on a trust by trust basis).

The author assumes that the trustee does have a fixed place of business PE but does not carry on business through it. Strictly a PE means a place of business through which a business is carried on, so there is no PE. However the end result is the same.

By contrast:

> **Example 2a** (May Ltd, trustee of June Trust)
> M Ltd, a non-UK resident trust company, is sole trustee of the J Trust. M Ltd carries out all the work for the trust through its UK offices, including preparatory work, general administration, meetings with investment managers, accountants, beneficiaries etc.. The investment and distribution policies are also all determined in the UK office. Formal ratification of those strategies, including signature of documents, is made by M Ltd at very brief meetings outside the UK, with little or no further discussion of

[52] See 7.13.1 (Auxiliary v core activities).

> the proposals before approval is given.
> **HMRC view:** Although the strategic decisions are core activities, all the administration of the J Trust has been carried out in M Ltd's UK office. The formal meetings outside the UK although prima facie core activities are in reality merely "rubber stamping" all the UK work. M Ltd has acted as a trustee in respect of the J Trust through its UK permanent establishment and so will be treated as UK resident for the purposes of the J Trust.

That seems correct. M Ltd has a fixed place of business PE.

> **Example 2b** (July Ltd, trustee of August trust)
> J Ltd, a non-UK resident trust company is trustee of the A Trust. It always carries out the core activities of the A Trust at its office overseas. The beneficiary of the trust has a single one-off meeting with J Ltd at J's Manchester office to discuss the potential release[53] of capital from the A trust. The discussion involves the imposition of certain conditions on the beneficiary before such a release.
> **HMRC view:** On the face of it J Ltd by discussing the release of capital and the imposition of conditions with the beneficiary has engaged in a core activity and this has taken place at what is J's permanent establishment in the UK. So prima facie J Ltd is acting as trustee of the A Trust through a permanent establishment. However the whole context has to be looked at - i.e. where the decision making on the trust is being carried on and if the meeting in the UK was a one-off. If the trustee took the information from the meetings out of the UK with them and then discussed and made the decisions outside the UK, they would not be UK resident. If there was any doubt as to where the decision making is taking place we would as part of our considerations consider the frequency of any meetings both within and outside the UK.

More analytically, the issues (which are not clearly identified or addressed) are:

(1) Are the acts of the trustee in the UK merely preparatory (such as information gathering)? If so, there is no PE.

(2) Is the office used with sufficient regularity to constitute a fixed place of business PE? On the given facts, a one-off meeting is clearly not sufficient and the UK office is not a PE, so (although the HMRC example does not reach any conclusion) the answer is that the trustee

[53] The Guidance seems unfamiliar with trust terminology and practice, though nothing turns on that.

is not UK resident.

7.15 Agency PE

An agency PE arises if (in short):

(1) An agent has and habitually exercises authority to do business on behalf of the trustee; and

(2) it is not an agent of independent status acting in the ordinary course of their business.[54]

7.15.1 *Accountancy/law/tax advice*

A person who provides accountancy services, or legal or tax advice, cannot be an agency PE as providing services of that kind does not constitute doing business on behalf of the trustee: an accountant or tax adviser has no authority to do any business at all on behalf of the trustee.

If necessary, I would also say that these activities were auxiliary, not core; but it is not necessary to rely on that.

The accountant or adviser is likely to be an agent of independent status, and so not a PE for that reason too.

7.15.2 *Investment managers/brokers*

If IME PE relief applies, it is not necessary to consider further whether or not the broker/IM would otherwise be an agency PE.[55] In this section I concentrate on investment managers; the position of brokers is the same.

The relief is in s.1146(1) CTA 2010 which provides:

> This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.

This relief can apply. The non-UK resident company (the trustee) is not carrying on the trade of dealing in securities. However the trustee is carrying on the trade of acting as trustee in the UK. The contrary view has been suggested, but this seems reasonably clear.

The question then is whether investment manager conditions A to E are met. I deal with these briefly here as they are discussed in detail elsewhere.[56] Conditions A and B are straightforward. Conditions C and

[54] See 106.12 (Agency PE) and 106.16 (Independent agent exemption).

[55] See 72.2 (IME PE relief).

[56] See 72.7 (Investment manager conditions).

E require an arm's length relationship and full remuneration (which overlap: can one envisage an arm's length relationship without remuneration?). Condition D is the 20% rule. This was not written with trustees in mind, but construed in the context (perhaps a purposive construction) it should be regarded as satisfied provided that the investment manager (and connected persons) do not have an interest in more than 20% of the trust income. That will usually be the case.

It follows that investment managers/brokers on arm's length terms will not constitute a PE. Taxguide 06/15 confirms this:

> It doesn't matter that there is a corporate relationship between the investment manager and the trustee (such as the two entities being in the same corporate group) and this will not prevent the independent agent status applying. This follows the principle in OECD Commentary on Article 5 that a subsidiary is not automatically assumed to be a dependent agent of its parent.

7.15.3 *HMRC guidance*

The HMRC guidance in this area bears only a tenuous connection to the law. The original HMRC guidance did have the merit of clarity:

> I can confirm that our interpretation of the rules is that the provision of services on an arms length basis would not cause non-UK trustees to have a permanent establishment and therefore would not make the non-resident trustee UK resident.
>
> More specifically, this would include where services are carried out by a subsidiary on a fully arms length basis, such as:
>
> - maintaining the financial or accounting records
> - preparation of accounts
> - preparation and submission of tax returns for any settlement by a separate entity within the organisation contracting at arms length terms.
>
> Provided the services are contracted (at arms length terms) HMRC would not consider this constitutes a permanent establishment as the UK company will be rendering a service to the trust. Therefore, these activities would not cause the non-UK trustees to have a permanent establishment in the UK and the non-UK trustee is not made resident by [the PE-residence rule].[57]

The correct questions are whether the agent has and habitually exercises

[57] Extract from letter dated 18 July 2007.

authority to do business on behalf of the trustee, and if so whether the IM exemption applies, and whether the agent is of independent status and acting in the ordinary course of their business. The question is not whether the agent is receiving an arm's length fee. However the HMRC arm's length fee test reflects the policy aims of the provision, would be a simpler and workable rule, and would not normally give a different result from the correct approach.

In HMRC PE-residence rule guidance, this approach is maintained but is watered down with qualifications such as "likely" or "ordinarily":

> **3. Activities carried on for the trust other than by the non-UK resident trust company**
> 3.1 Whilst a non-UK resident trust company acting as a trustee may not carry out trust business at a fixed place of business permanent establishment in the UK, it is also necessary to consider whether activities are carried out in the UK on that non-UK resident trust company's behalf by a dependent agent. If this is the case the trustee may be treated as having a permanent establishment in the UK. ...
> 3.2 The activity of providing services to a non-UK resident trustee, whether by a connected person or not, does not of itself create a dependent agency permanent establishment ... It is necessary to consider the capacity in which the person provides the services to the trust on behalf of the non-UK resident trustee. Where
> [1] the services that are provided to the trust are only those that the person is contractually obliged to provide under their agreement with the non-UK resident trustee and
> [2] are remunerated at arm's length,
> then this is *unlikely* to create a dependent agency permanent establishment.

Point [1] is hard to understand. Who would provide services without a contract? Perhaps the author has in mind a beneficiary providing services to the trust informally, but it is difficult to see how remuneration could be paid in the absence of a contract, express or implied.

> 3.3 Whether there is a dependent agency permanent establishment will depend on the facts of the case; the position is the same whether it is an unconnected third party or a UK subsidiary or other connected person that carries out the work for the trust. Where, say, a UK subsidiary of a non-UK resident trust company is providing services to a trust, then unless the powers granted to it by the non-UK resident trust company are such that it becomes a '*dependent agent with authority to do business on behalf of the non-resident trustee*' ... we will not contend that the UK subsidiary's

> actions cause the non-UK resident trustee company to have a permanent establishment.

This is correct.

> **Example 3** (September Ltd trustee, October Ltd investment advisers, November trust)
> S Ltd, a non-UK resident trust company contracts with O Ltd which is a UK company within the same group. The services to be provided by O Ltd are for investment advice for the N Trust. The contract between S Ltd and O Ltd is on an arm's length basis and O Ltd has no powers granted to it by September Ltd.
> **HMRC view:** O Ltd is providing a service for S Ltd and has contracted to do so on arm's length terms. They have no authority to do business on behalf of S Ltd so are not their dependent agent. Therefore, S Ltd will not be treated as having a permanent establishment through the work carried out by O Ltd in the UK. So S Ltd will not be treated as UK resident for the purposes of the N Trust.

This is straightforward. If the investment adviser had no authority to do business on behalf of its principal, then it is not an agent at all. It cannot be an agency PE.

If the investment adviser did have power to do business on behalf of the trust, it is still not PE as long as it qualified for the IM exemption (which in practice should usually be the case).

> Other examples which would be treated in the same way where there was an arm's length relationship are:
> •. Preparing trust accounts for the trustees' review and approval
> - Preparing trust tax returns for the trustees' review and approval and filing the return on their behalf with HMRC
> - Obtaining quotes for necessary repair work on trust property
> - Having contact with workmen to ensure that those repairs are carried out
> - Day to day management of let property (such as dealing with tenants etc)
> - Signing small cheques such as paying for minor repairs
>
> **Example 3a** (September Ltd trustee, October Ltd investment advisers)
> As above but O Ltd also has authority to buy and sell commodities with a view to realising profits for the trust subject to trading limits set by S Ltd. It receives an arm's length fee for this activity.
> **HMRC view:** The investment manager is appointed by the trustee, and so is its agent. If it receives an arm's length fee for the investment management services, it will not *ordinarily* constitute a dependent agent

of the non-UK resident trustee.

If, however O Ltd was providing investment management services to the trustees other than on arm's length terms i.e. was acting as their dependent agent, rather than simply providing a service to them, in that case the trustees would be *likely* to have a dependent agent permanent establishment.

(This is in line with the Investment Manager Exemption provisions – in particular that the provision of services at less than a customary rate can indicate that the investment manager is not an independent agent of the non-UK resident trustee.)

7.15.4 *Director/employee of trustee*

The question may arise whether a UK resident director/employee of a corporate trustee can constitute an agency PE; though I wonder how often a non-resident trustee company has a UK resident director/employee.

HMRC PE-residence rule guidance provides:

> **4. UK resident directors or other employees of a non-UK resident trust company.**
>
> 4.1 First, it is necessary to consider the role of the UK resident director or employee of the non-UK resident trustee.
>
> 4.2 If the UK resident employee is not carrying out activities that would be regarded as core trustee activities in relation to a particular trust then the presence in the UK of an employee of a non-UK resident trust company could not by itself cause a non-UK resident trustee to have a permanent establishment in the UK.

This is consistent with the point made at 7.13.1 (Auxiliary v core activities).

> 4.3 Where in relation to a particular trust the UK resident employee does carry out [core] trustee activities in the UK then it is likely that the non-UK resident trustee will have a permanent establishment in the UK. This will be the case if
>
> [1] the employee operates from a fixed base, or
>
> [2] does not have a fixed base but habitually acts on behalf of the non-UK resident trustee for the particular trust, i.e. is a dependent agent permanent establishment of the non-UK resident trustee.
>
> The crucial point in relation to a dependent agent permanent establishment is whether the non-UK resident trustee company has in the UK-resident employee a dependent agent with authority to conduct business on behalf of the non-UK resident trustee. If this UK resident employee of a non-UK resident trustee does have the authority to make

> decisions then s/he is likely to constitute a dependent agent permanent establishment of the non-UK resident trust company.

The first example is a simple variant of example 1:[58]

> **Example 4 (December Ltd trustee; Mr Monday employee)**
> D Ltd, a non-UK resident trustee has a director or other employee M who is resident in the UK. (This individual may also be an employee or director of UK resident group members.)
> The group provides office accommodation in the UK to M. His role is to market the business of the non-UK resident trust company in the UK which includes meeting with prospective settlors and other business contacts for this purpose.
> **HMRC view:** In this case, M's role is only meeting with prospective settlors and other business contacts for the purpose of marketing the business of D Ltd. Although these activities are carried out at the same place, they are not activities as a trustee that are carried out at a fixed place of business. They would generally be preparatory or auxiliary activities. This would not cause D Ltd to be treated as carrying on trustee business through a permanent establishment in the UK.

In the next example, the director/employee does more than marketing:

> **Example 4a**
> As in example 4, but M's role also extends to meeting beneficiaries of existing trusts.
> **HMRC view**: In this case, the importance of the subject matters discussed and the decisions taken at those meetings, and the frequency of the meetings held, will need to be analysed in relation to each trust in order to reach a conclusion as to whether D Ltd is carrying on a business through a permanent establishment in the UK for that trust through M.
> If no office accommodation is at his disposal M could still constitute a dependent agent permanent establishment of the non-UK resident trustee if he has authority to enter into contracts or otherwise do business on behalf of the trustee of the trusts i.e. more than simply meeting the beneficiaries and he habitually exercises that authority on behalf of his employer for the trust.

HMRC do not answer the question in the example, but the general approach to the answer is correct. Of course the example only applies if the trustee acts as trustee in the course of a business.

[58] See 7.13.2 (Marketing).

7.16 Individual trustee: Branch/agency

7.16.1 *General approach*

Taxguide 06/15 provides:

> **Example 19** (Mr S trustee of Rho Trust; Sigma Ltd fund manager)
> Mr S, a resident of the Cayman Islands, carries on a business of providing trustee services in the Cayman Islands. Mr S is the sole trustee of the R Trust. Mr S is not UK resident.
> Because its sole trustee is non-UK resident, the R Trust is non-resident for income tax and CGT purposes, unless Mr S acts as trustee for the R Trust in the course of business which Mr S carries on in the UK through a branch or agency.
> HMRC accepts that the "permanent establishment" test normally applies only to corporate trustees. In this case there is no Article 5 in the UK: Cayman Double Taxation Agreement and the PE threshold do not need to be considered, only branch or agency.
> **Question**
> When might ITA 2007, s 475(6)/TCGA 1992, s 69(2D) apply such that the non-resident R Trust is UK resident for income tax and CGT purposes?
> **Analysis**
> As set down in the HMRC Trustee residence guidance (Trusts and Estates Manual, Appendix 1) when considering the applicability of the tests in ITA 2007, s 475(6) and TCGA 1992, s 69(2D) the following three questions are relevant:
> a) Is the trustee carrying on a business in the UK?
> b) If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment in the UK?
> c) If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?
>
> If the answer to all three questions is "yes" then Mr S will be acting as trustee for the R Trust in the course of business which he carries on in the UK through a branch or agency and, since he is the sole trustee, this will mean that the trust is UK resident.
> The answers to the three questions will depend on the specific facts. The facts set out above are insufficient to enable any of the questions to be answered. As such, supplementary facts are provided in each of scenarios 19.1 to 19.4 below...

7.16.2 *UK office*

Taxguide 06/15 provides:

> **19.1 Mr S has an office in the UK and activities with respect to his trustee business are carried out through that office.**
> Mr S's London office is a branch of his Cayman trustee business. As such:
> a) Mr S is carrying on a business in the UK.
> b) Since there is a London office Mr S is carrying on that business through a branch in the UK.
> If activities with respect to the R Trust are carried out through the London office, then the R Trust is UK resident. But the R Trust would not be UK resident if the affairs of the R Trust are not handled through the London office.
> Note that if Mr S has employees who work through the London office he would also have agents in the UK. However, since the London office is a branch and so within the ITA s 475(6) requirement by virtue of that fact alone, this does not need to be considered further.

7.16.3 *Fund manager*

Taxguide 06/15 provides:

> **19.2 Mr S does not have an office in the UK. Mr S appoints S Ltd. a London fund manager, to manage the R Trust's portfolio. Neither Mr S nor his employees visit the UK.**
> S Ltd is not connected to Mr S and so is not a branch of his business of providing trustee services. S Ltd is not acting as agent of the trustee, but providing a service to the trust, for which it is paid. S Ltd is not an agent of Mr S in his personal capacity of administering trusts. There is no branch or agency so the R trust is non-UK resident.

7.16.4 *Employee of trustee*

Taxguide 06/15 provides:

> **19.3 Mr S does not have an office in the UK. Mr S appoints S Ltd. a London fund manager, to manage the R Trust's portfolio. Mr S's employees visit the UK to discuss the affairs of the R Trust with S Ltd at S's London office.**
> As discussed above (19.2), S Ltd cannot be said to be either a UK branch or a UK agent through which Mr S carries out trustee activities with respect to the R Trust. Even though Mr S's Cayman trustee business does not have a UK office, the R Trust could be UK resident if employees of

Mr S visited the UK, and discussed the affairs of the R Trust with S Limited at its office. In this event Mr S would be carrying on part of his trustee business of providing trustee services in the UK through the employees acting as Mr S's agents in the UK.

Whether the trust was UK resident or not would depend on the nature and extent of the employees visits to the UK offices of S Limited:

- If the activities carried out are core activities then the trust will be UK resident.
- If the activities are merely auxiliary or preparatory (such as delivering instructions from Mr S or picking up reports) then the trust will not be UK resident.

7.16.5 *Trustee not own agent*

Taxguide 06/15 provides:

> **19.4 Mr S does not have an office in the UK. Mr S appoints S Ltd. a London fund manager, to manage the R Trust's portfolio. Mr S himself visits the UK to discuss the affairs of the R Trust with S Ltd at S's London office.**
>
> As discussed above (19.2), S Ltd cannot be said to be either a UK branch or a UK agent through which Mr S carries out trustee activities with respect to the R Trust.
>
> A person cannot be an agent of himself. As such, the R Trust would not be UK resident if Mr S made the visits to S Limited himself.
>
> As explained in above (19.3) the position would be different if Mr S's employees made the UK visits to S Limited as the employees would be acting as Mr S's agents in the UK.

7.17 PE-residence rule guidelines

It is considered that the following guidelines will avoid difficulties under the PE-residence rule. It is assumed that the trust has only a corporate trustee, or if it has individual trustees, they are not carrying on a business (so it is necessary to consider PE issues but not branch/agency issues).

Use of professional UK investment managers and brokers on arm's length terms is safe.

Use of professional UK advisers to prepare tax returns or give tax advice is safe.

Use of UK agents to manage UK property investments is safe, providing they are acting in the ordinary course of their business, which in practice they should be.

The trustees may meet beneficiaries (or others) in the UK in any of the following circumstances:

(1) If the meeting is at the offices of the beneficiaries (or others) or hotels; not in the trustees own offices, or in offices provided by a company in the same group as the trustees.
(2) If the meeting is occasional. Once a year or less would safely be "occasional" for this purpose.
(3) If the meeting is purely for information gathering purposes. (The minutes of the meeting should make that clear.) However it may be difficult to restrict meetings to information gathering topics.

The trustees should not appoint a beneficiary to act for the trustee (unless, exceptionally, the beneficiary is carrying on a business and acting in the course of that business).

Where the trustees own a house which is occupied by the beneficiary, I see no difficulty in the trustees authorising the beneficiary to maintain the house, as that does not constitute carrying on business in the UK.

Marketing and meetings with prospective settlors are safe.

In cases where the settlor was not UK resident or domiciled when the settlement was made, all difficulty under the PE-residence rule can be avoided by the appointment of an individual co-trustee who is not UK resident and not carrying on a business.

7.18 Protectors and trust residence

7.18.1 *Protectors*

The concept of "protector" is not a technical term: trust deeds provide different rights and obligations on a protector. Trusts typically confer on the protector:

(1) power to remove and appoint trustees and
(2) powers of consent, as key powers of the trustees are only exercisable with the protector's consent[59]

A protector could not be regarded as a trustee[60] and so their actual

[59] This is self-evident, but if authority is needed, see *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch) at[180].

[60] In *Bridge Trustees v Noel Penny (Turbines)* [2008] EWHC 2054 (Ch) an employer had power to distribute the surplus assets of a pension scheme. The employer was not "a trustee properly so called, that is to say, a person in whom property is vested as trustee"; see at [23].
All the textbooks agree: Hubbard *Protectors of Trusts* (1st ed, 2013) paras 2.24 (Distinction between a Protector and a Trustee) and 8.70 ('Not a trustee' provision);

Underhill and Hayton, *Law of Trusts and Trustees* (20th ed, 2022), para 1.83: "A power-holder other than a trustee may be described in a trust deed as a 'protector' but this is not a legal term of art and some other expression may be used, such as 'advisor' or 'committee' or 'investment advisor', depending on the settlor's design."; Hayton (ed.,) *International Trusts* (3rd ed, 2011) at para 4.11; *Thomas on Powers* (2nd ed 2012), para 7.109 fn 458.

If further authority is needed, which I doubt, see *Manoogian v Sonsino* [2002] EWHC 1304 (Ch). In this case a trust provided (in short):

> “the Bank [which was the trustee] shall make such investments as may be directed to be made by the Armenian Patriarchate of Jerusalem.”

The Patriarch was not a trustee for the purposes of the Charities Act:

> “His position is analogous to powers of a life tenant under a conventional strict settlement. The life tenant is often given powers to possess land, direct investments and so on, but none of those things make him a trustee of the settlement.” See at [41].

To the same effect, see *Gomez v Gomez* [2008] EWCA Civ 1065. One of the questions in this case was whether the defendant was sued “as trustee of a trust” within the meaning art article 5(6) Council Regulation (EC) No 44/2001 (now repealed). Article 5(6) was to be interpreted narrowly, or restrictively. The Court of Appeal said at [99]:

> “... I can see no basis for extending Article 5(6) to such persons as appointors, or protectors, or to any other person with fiduciary powers who does not come within the normal meaning of the expression “trustee.”

Gomez is a decision on a provision where the word “trustee” had to be understood restrictively, but it confirms, if confirmation is needed, that protectors, and any other person with fiduciary powers, do not come within the *normal* meaning of the word “trustee.”

For completeness: It might be different if the protector’s role extends beyond that normally given to a protector. One could imagine a trust deed under which:

(1) persons named “trustees” held legal title to property; and

(2) a person (mis)named “protector” held the administrative and dispositive powers normally given to trustees.

This case (depending on the drafting) might be equivalent to the common situation where trust property is vested in nominees. In such a case no one suggests that the nominees are “trustees” for the purposes of the trust residence rule. Although the legal title may not be vested in the trustees, the trustees have the right to call for it.

Alternatively (depending on the drafting) the case may be equivalent to the situation where custodian trustees hold the trust fund on behalf of managing trustees under s.4 Public Trustee Act 1906. In such a situation, the (so-called) protector would be a trustee. This is hypothetical – I have never seen it in practice – but worth mentioning as warning of problems which might arise if the powers of a UK resident protector were extremely extended.

Many offshore Trust Laws state expressly that a protector is not a trustee; but (i) that only states what would in principle be the position, and (ii) that could not be residence is irrelevant in ascertaining the actual residence of the trustees in their private capacities.

A protector has functions conferred by the trust deed, and is not an agent of the trustees. So a protector does not constitute an agency PE, and does not affect trust residence under the PE-residence rule.

It follows that a protector may be UK resident without affecting the residence of the trust.

If trust assets are held through an underlying company, the acts of a protector in the UK could be relevant to the company's tax residence, if they impinge on its central management & control. But that seems unlikely.

7.18.2 *Reserved powers*

The same points arise for reserved power trusts. Taxguide 06/15 provides:

> If the settlor has reserved the investment function to himself do HMRC consider the settlor to be an agency PE of the trustees if he habitually exercises the investment function while present in the UK?
> Our view is that this is NOT the case. The settlor cannot be a PE of the trustees' business because the investment function is not part of the trustees' business. The trustees' primary and overriding responsibility is to comply with the terms of the trust deed and the trust deed does not give the trustees the investment function in the first place.
> **HMRC answer**
> If settlor has investment function under trust deed then it cannot be acting as agent of trustee.

7.19 Trust residence for IHT

Trust residence is not very important for IHT but the concept is used on a few occasions. IHT definitions of trust residence are different from the IT/CGT definition.

For the (somewhat academic) relief for foreign currency bank accounts,[61] s.157(4) IHTA provides:

> For the purposes of this section—
> (a) the question whether a person is resident in the UK shall, subject to paragraph (b) below, be determined as for the purposes of income tax; but

determinative of the meaning of "trustee" in a UK statute.

[61] See 76.13 (Foreign currency account).

> (b) the trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are resident there.

For the duty to disclose the creation of non-resident trusts,[62] s.218(3) IHTA provides:

> For the purposes of this section trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are for the time being resident in the UK.

For the purposes of s.201(1)(d) IHTA (collection of non-resident trust tax from settlor), s.201(5) IHTA makes an identical provision.[63]

For the question of where the administration of a settlement is carried on, see the 5th edition of this work, para 5.6. There are various interesting points that could in theory arise under these definitions, but I doubt if they will arise in practice.

7.19.1 *IHT trust residence: Critique*

IHT trust residence is a mess: essentially the same definition is repeated four times.

There is no need to have a separate definition of trust residence for IHT at all, and if we need to keep the concept of trust residence, it would be best to switch to the IT/CGT definition. Failing that, a single standard definition applying for all IHT purposes would be a small improvement.

7.20 Trust residence: Critique

Various policy considerations simmer below the surface of this topic.

One factor is tax competition: the desirability of attracting trust administration business to the UK (or not driving it away). The work will not be done in the UK if that is going to incur additional tax liabilities.

Another factor is to avoid a loss of tax, measured from the benchmark of the present system.

More fundamentally, trust residence needs to be discussed in the context

[62] See 128.2 (Reporting creation of settlement).

[63] For completeness, the same definition is set out yet again in the IHT (Delivery of Accounts) (Excepted Settlements) Regulations 2008.

of the very broad set of questions of how to tax trusts generally on (1) trust gains, and (2) trust income.[64]

Residence of *individuals* is a sensible connecting factor for UK taxation: everyone accepts that an individual who is UK resident should to some extent at least be subject to UK tax. It is not self-evident that residence should be the main connecting factor, or a connecting factor at all, for the taxation of *trusts*. The move from individual residence to trust residence is problematic in two respects:

(1) Residence of trusts is a matter which is chosen by the appointment of trustees.
(2) Trustees are taxed as representing the beneficiaries, who may or may not be UK resident. Unfortunately the solution of taxing beneficiaries on trust income or gains on an arising basis is not available.

There are three broad categories of solution. None are wholly satisfactory. The first solution is the present system with or without minor variants.

The second solution is a system of residence by election:

> Why not let all trustees elect that they and their beneficiaries and settlors should be taxed as if they were non-UK resident. All the trust business which now goes offshore could come back to the UK. The economy, and therefore the Revenue, would benefit, while beneficiaries would be less exposed to some of the practical problems to which offshore trusts are prone. Drug enforcement officers would then know that the reason that Mr X had set up a trust in some Caribbean jurisdiction would have nothing to do with UK taxation.[65]

Venables concludes: “No doubt the suggestion will be dismissed out of hand. Yet is it so absurd?” Discuss.

A third and more radical solution abandons the concept of trust residence. Trusts pay tax on trust income and gains regardless of the residence of the trustees: the connecting factor should be that property is provided by a UK domiciled or resident settlor. Conversely, trusts should be exempt from CGT and IT (like non-residents) in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. This is (I think) the

[64] In this paragraph I use the term “trust income” to mean income of trustees other than a life tenant’s income. The taxation of life tenant’s income is easy: one should tax the life tenant. I assume that settlor-interested trust rules are not in point.

[65] Venables, *Comments on the Inland Revenue Consultative Document on Trusts* (1991) p.60.

basis of taxation of trust income and gains in Canada, New Zealand and, I suspect, most other common law jurisdictions. It is also the basis of IHT trust tax. Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by tax planning. But the rickety anti-avoidance structure of ss.86 to 98 TCGA, bolstered (supposedly) by Schs 4A to 5A, can be replaced with one based on the TAA rules. The reform, like any, would bring winners and losers but the overall result could - if properly drafted - be a system which was fairer, simpler and more effective. New Zealand takes this view of the policy issue:

What is a foreign trust?
4.7 The term foreign trust is used to describe a trust that is established in New Zealand but where no settlor is resident in New Zealand at any time. The term was developed specifically for New Zealand tax purposes (see section HC 11 of the Income Tax Act 2007 (ITA)). This sometimes creates confusion, as a trust in Australia, for example, may be viewed from New Zealand as a foreign trust, but it would not be a foreign trust for New Zealand tax purposes.
4.8 A foreign trust may have one or more trustees resident in New Zealand. Most New Zealand foreign trusts have one resident trustee, often a limited liability company that provides professional trustee services. Some also have one or more trustees who are resident offshore.
4.9 It is normal for all of the beneficiaries of a foreign trust to be resident offshore, but there is no prohibition against having New Zealand beneficiaries.
Tax treatment and underlying tax policy
4.10 Foreign trusts which do not derive New Zealand source income or distribute income to New Zealand resident beneficiaries are exempt from New Zealand tax.[66] The tax exemption is one of the key features of New Zealand law that is attractive to offshore investors looking to establish foreign trusts in this country. The tax status of such trusts features prominently on the websites of firms providing services to foreign investors.
4.11 Commentary in the media around the Panama Papers has caused some observers to describe the exempt tax status foreign trusts enjoy in New Zealand as a loophole, and it has been suggested that this should be closed by imposing tax ...
4.12 Before 1988, New Zealand's rules for taxing trusts followed the residence of the trustees. This led to concerns in relation to the taxation of income derived by New Zealand residents from offshore. A trust established overseas with non-resident trustees was not liable to New Zealand tax on its foreign sourced income, even where the settlor and the beneficiaries were New Zealand residents.
4.13 As a result, the old trust tax rules made it relatively easy for New Zealand residents to escape tax on their offshore income. This could be achieved by establishing a trust offshore and settling investment assets on it. The trustee, who would be a non-resident of New Zealand, would invest the funds and accumulate income. No New Zealand tax would

[66] Footnote original: The exemption is in ss. CW 54 and HC 26(1) ITA.

be payable on the income except where it was distributed within six months of the trust's tax year end to beneficiaries resident in New Zealand. Distributions after that time were capital, and not taxable. Unsurprisingly, distributions of income were rare.

4.14 Like many aspects of the New Zealand tax system at that time, the trust tax rules were wholly deficient. They were overhauled in 1988 as part of a comprehensive overhaul of New Zealand's international tax rules. As was the case with the other international tax reforms, the changes were designed to protect the domestic tax base.

4.15 The reforms were based on the core principle of taxing New Zealand residents on their worldwide income and non-residents on income sourced from New Zealand. It follows from this principle that non-residents should not be taxed on non-New Zealand sourced income. This was, and remains, orthodox international tax policy.

4.16 For trusts, the residence of the settlor was chosen as the basis for determining the liability (through the trustee[67]) for New Zealand tax. This was because, although the settlor has no right to receive income from the trust, in reality he/she typically has substantial influence over the trustees, either through specific provisions in the trust deed or on an informal basis. The economic substance of a trust may differ from its legal form.

4.17 The Consultative Committee[68] that recommended the settlor regime in 1988 specifically recognised that one consequence of this approach would be that New Zealand would not tax the foreign source income of a resident who was the trustee of a trust with a non-resident settlor. The Committee noted[69]-

> *In our view, this is the appropriate treatment since such income has no definite connection with New Zealand apart from the existence here of the trust administrator ... who will ... have no beneficial interest in the income.*

4.18 The Inquiry considers that the current tax treatment of foreign trusts is based on design considerations that are entirely consistent with the coherent set of core principles that underpin New Zealand tax policy. It is clear from the history that the primary driver of the international tax reforms, of which the trust regime is an important subset, was to protect the New Zealand tax base.

The reforms appear to have been very effective in achieving that goal.[70] New Zealand's attractiveness as a place to invest from offshore was a by-product of the reforms and the primary reason for this (the foreign trust tax exemption) was identified at the time. While it seems unlikely that policy makers predicted the size of the New Zealand foreign trust industry that would emerge, the Inquiry doubts that it would have created any concerns had they done so.[71]

[67] Footnote original: If the trustee does not pay the tax (because it is not resident in New Zealand) the tax liability for trustee income falls to the New Zealand settlor as agent.

[68] Footnote original: Prebble, (1988) International Tax Reform Part 1. Report of the Consultative Committee.
http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1580354

[69] Footnote original: Ibid, para 5.25.

[70] Footnote original: The fact that very few New Zealanders have been named as investors in the entities in the Panama Papers is probably attributable to the scope and effectiveness of the international tax rules.

[71] Government Inquiry into Foreign Trust Disclosure Rules (2016)
https://treasury.govt.nz/sites/default/files/2016-06/report-giftdr-27jun2016.pdf

7.20.1 *Reason for PE-residence rule*

It appears that the PE-residence rule is based in part on loss of tax considerations and in part (somewhat implausibly) on a desire to support UK professional trustees.

The Trusts Consultative Document (1991) explains:

> 10.21 The income tax test might need to be modified for certain foreign corporate trustees. A trust company, resident outside the UK, could be the sole trustee of a trust which was dealt with in this country by the company's UK branch. It would not be appropriate if such a trust were treated as non-resident, because it would then be taxed more favourably than a similar trust dealt with by a branch of a UK corporate trustee, or by some other UK professional. That could both lead to a loss of tax and put UK professionals at a competitive disadvantage. It is therefore suggested that the UK branch of a foreign trustee should be treated as a trustee resident in the UK for the purpose of the common residence test.[72]

7.20.2 *Relief for professional trustee*

The law before 2007/08 provided that a UK professional trustee of a trust with a non-resident, non-domiciled settlor was regarded as non-resident. This sensible provision allowed UK professional trustees to act without attempting to tax them. The object was to allow the UK to compete on equal tax terms with foreign trustees. The reason given for its abolition was that the Department of Trade and Industry had advised the rule breached EU State Aid rules.[73]

[72] *https://www.kessler.co.uk/wp-content/uploads/2014/02/1108_001.pdf*

[73] The view that the former law was not State Aid compliant was debatable, and indeed the former UK rule still applies in Ireland: s.574(b) [Ireland] Taxes Consolidation Act 1997. HMRC refused to disclose the DTI advice which makes it impossible to assess the advice which HMRC said they received. One might speculate as to whether State Aid was the true reason or a pretext. Following an application under the Freedom of Information Act, the Information Tribunal urged HMRC to disclose their reasons (which were "bald and substantially unexplained.") Unfortunately the Tribunal did not order HMRC to do so and HMRC disregarded the urging of the Information Tribunal as non-binding. This hindered public debate, which the reader may think unfortunate. This non-disclosure may be viewed in the context of a more general culture of secrecy.
For the freedom of information aspect, see *https://www.kessler.co.uk/FoI* For the State Aid aspect.

7.21 Residence of bare trustees

The residence of bare trustees for tax purposes rarely matters. If it does arise, however, the position will not be governed by the statutory provisions which apply to substantive trusts.[74] The pre-1989 rules will apply. A sole bare trustee will be resident where they are resident in their private capacity. If there are joint bare trustees, they will not be UK resident unless they are all UK resident.[75]

The distinct-person rule does not apply to bare trustees, but that also rarely matters.

[74] See 7.2.1 (Nominees/bare trustees).

CONTENTS AT A GLANCE

The chapters are organised thematically as follows:

Volume 1

Introduction and What's New
Obtaining further advice and disclaimer
A1 FIG Relief//Abolition of Domicile Rule

Non-dom policy & avoidance

1. Foreign Domicile: Tax Policy
2. Tax Avoidance
3. Targeted Anti-avoidance Rules (TAARs)

Domicile & residence

4. Domicile
5. Deemed Domicile
6. Residence of Individuals
7. Residence of Trustees

Volume 2

8. Residence of Companies
9. Treaty-Residence
10. Split Years
11. Temporary Non-residence
12. Exit Taxes
13. UK Arrival or Departure: Tax Checklist

Income tax: Principles & remittance basis

14. Income Categorisation
15. Income Recognition: Received /Entitled/Arise/Paid
16. Source/RFI/Territorial Principles
17. The Remittance Basis
18. The Meaning of Remittance
19. Remittance Reliefs
20. Mixed Funds

Income by category

21. Trading Income

Volume 3

22. Trading in Land

The following topics are considered elsewhere:
6.36 Residence: Burden of proof

8.1 Company residence: Introduction

Residence of companies matters in particular for:

(1) Territorial limitations. Company residence plays a role similar to individual residence:
    (a) UK resident companies are taxable on worldwide income/gains.
    (b) Non-resident companies are taxable only on UK source income and certain UK-linked gains.
(2) Anti-avoidance rules such as s.3 TCGA and ToA only apply to companies which are non-resident.

Normally HMRC will want to argue that a company is UK resident, and the company will want to argue that it is not. But there are circumstances where the boot may be on the other foot.

The law is to be found in case law (the CMC test) which applies except so far as varied by statutory rules. The statutory rules are in Chapter 3 Part 2 CTA 2009, and are in short, the incorporation and DTA residence rules

Chapter 3 is expressed to apply for the purposes of Corporation Tax. However these rules also apply for IT and CGT:

s.835A ITA	**s.286A TCGA**	**s.109A TMA**
Chapter 3 of Part 2 of CTA 2009 (rules for determining residence of companies) applies for the purposes of the Income Tax Acts as it applies for the purposes of the Corporation Tax Acts.	Chapter 3 of Part 2 of CTA 2009 (rules for determining residence of companies) applies for the purposes of— (a) this Act (so far as relating to capital gains tax), and (b) any other enactment relating to capital gains tax, as it applies for the purposes of the Corporation Tax Acts.	Chapter 3 of Part 2 of CTA 2009 (rules for determining residence of companies) applies for the purposes of this Act as it applies for the purposes of the Corporation Tax Acts.

It could have been more economically expressed; but it works.

8.2 History of corporate residence

8.2.1 *Early history*

The INTM sets out the old ITH, parts of which are cited here. It is melancholic to compare the quality of the ITH with today's Manuals. But I expect it also outshone its contemporary Manuals.

ITH309 incorporation and residence: early days

In the early days we regarded a company as resident in this country if it was incorporated here. Viscount Sumner refers to the matter in the *Egyptian Delta Land* case (ITH311). He mentions Dowell who was the Board's Solicitor and whose 'Income Tax' was a standard work. The 1874 edition of Dowell, the first edition, said nothing at all on the subject of company residence. The second edition in 1885[1] merely said that a company incorporated here was resident here. We clearly started with the idea that residence was determined by incorporation and in the middle of the nineteenth century there was no problem. But as foreign trading became more complex this simple view was questioned.

ITH310 incorporation/residence: early days: Calcutta Jute Mills

One of the first cases was *Calcutta Jute Mills* [*Calcutta Jute Mills Company v Nicholson* 1 TC 83] a company which did what its name implies. It held board meetings and annual general meetings in London in an office lent by a director but everything of a practical nature was in India. It claimed that it was not resident here and that its trade was not carried on here. The judgements in *Calcutta Jute Mills* are the basis on which our later residence ideas rest and on which the case which became the authority on residence - *De Beers* - drew heavily (ITH314). The company was an English incorporated company at a time when it would have been exceptional for an English company to have directors and shareholders meetings anywhere but in England. The Judges, while looking at the board of directors and giving much weight to its constitutional role of management in this country, also took into account the fact that annual general meetings were here and incorporation was here. The people in India were mere agents acting solely on behalf of the company to be instructed by the company here; their acts were the company's acts. The case was decided before the Court of Appeal decision in the *Automatic Self-Cleansing Filter Syndicate Company*[2].

ITH311 incorporation/residence: early days: Egyptian Delta Land

After the *Calcutta Jute Mills* case in 1876 it was many years before another company residence case came before the Courts and it seems to have been generally accepted that a UK incorporated company was resident here. There was no further litigation until the *De Beers* case in 1905 and it is important to remember that De Beers was not a UK incorporated company. The significance or otherwise of incorporation was, rather surprisingly perhaps, not settled until the *Egyptian Delta*

[1] Author's footnote: The pace of change in the mid-19th century was such that 11 years passed between the first and the second edition.

[2] See 8.7.1 (Board /shareholder roles).

> *Land* [*Todd v The Egyptian Delta Land and Investment Company Ltd* 14 TC 119] case in 1928. Then the Lords reversing the lower Courts held that the bare fact of incorporation here did not constitute residence. Both Rowlatt J in the High Court and the Court of Appeal came down quite clearly for the Revenue. The Lords were equally clearly against us.

This is now of historical interest only but it explains the background to the older cases.

8.2.2 *Treasury consent to migration*

> **ITH401 Treasury consent: migrations/transfers of business**
> Subsection 1(a) and (b) of ICTA88/S765 and its predecessors required companies to have Treasury consent to a migration or to a transfer of business to a non-resident. Provisions (a) and (b) of subsection 1 were repealed by FA 1988 with effect from 15 March 1988. However, for nearly forty years (a) was the major obstacle in the Taxes Acts to companies moving their residence out of the UK without regard for loss of tax to the Exchequer. Consent for transfer of business was a necessary corollary to prevent the transfer of the whole of the business to a newly formed non-resident company thus defeating the purpose of the Section. But since 1965 the charge on capital gains has provided some compensation to the Revenue for transfers of business.
> **ITH402 Treasury consent: why needed**
> The reasons for the introduction of the Treasury consent requirement in 1951 were mentioned in chapter 1 (ITH127). The post war improvement in communication had led to greater mobility and some important companies transferred their management and control abroad. The Revenue regarded such action as tax avoidance. The Royal Commission of 1953 disagreed but the decision to enact what became Section 765 was pragmatically based. The country simply could not afford the loss of tax which wholesale migration would have led to and decided to hold on to what it held.
> **402-403 Company residence. Some consequences of the law**
> The difficulty our predecessors had in framing this provision was discussed in Chapter 1. In the climate of emergency at that time no alternative was seen to what has come to be known as the 'turnstile' - the requirement that Treasury consent be sought. The Treasury would rely on the Revenue for advice. The 1951 provision for Treasury consent extended to the issues and transfers of shares and debentures in non-resident subsidiaries of UK resident companies. This requirement survives in subsection 1(c) and (d) of Section 765 [ICTA, now repealed] ...

ITH403 migrations/business transfers: Treasury consent: later need

It became clear some years after the Treasury consent provisions were enacted that it would no longer be possible or necessary to resist the migration of the type of company at which the section had originally been aimed. The intention had been to keep resident in the UK companies whose main trading activities were overseas where tax rates were low so that substantial UK tax would continue to be paid. But as former colonies became independent, political pressure grew for these companies to be wholly established locally. At the same time overseas tax rates increased with a consequent increase of credit against UK tax. The terms of reference of the Advisory Panel, which was set up to advise the Chancellor on cases where refusal was contemplated, no longer justified refusal of consent for these companies to cease to be resident.

However, we continued to need subsections(l)(a) and (b) to prevent loss of tax from migrations in rather different circumstances. Absolute freedom in the residence field might have had some very undesirable consequences.

1 Take the case of the UK company whose business was here in every way. Without (1)(a) such a company could have run its operation here as a branch of a tax haven resident company. If it did, it would have had all sorts of problems, but it might not have been beyond the wit of the tax planners to surmount them.

2 After the tax haven legislation was enacted a UK company whose interests were mainly overseas could simply have moved offshore to avoid the legislation.

3 There would have been companies who would migrate just before realising substantial capital gains - possibly becoming resident again later.

ITH404 Companies: Treasury consent: migrations: Daily Mail Trust

One company which nearly succeeded in migrating to avoid a charge on capital gains was the Daily Mail and General Trust plc. This was an investment holding company whose main interests were in the UK. The company wanted to transfer its central management and control to the Netherlands before a reorganisation in the course of which it intended to sell part of its assets which would yield substantial capital gains. It applied for Treasury consent. When the Revenue and Treasury raised objections the company claimed, on judicial review [*Regina v HM Treasury ex p. Daily Mail and General Trust plc* (1987) STC 157 (1988) STC 787] that the requirement for Treasury consent was contrary to Article 52 of the Treaty of Rome. This Article prohibits restrictions on the freedom of establishment of nationals, including companies, of a Member State in the territory of another Member State. The English court referred the matter to the European Court of Justice. The European Court was clear that the Article applied to restrictions on nationals leaving to go to another Member State as well as restrictions on those coming in but, somewhat to the surprise of experts in European law, the Court decided that Article 52 did not confer a right on a company incorporated in one Member State to transfer its central management and control to another Member State.

The Daily Mail decision was something of an anti-climax. While the case was going through the European Court procedures, fundamental changes in UK law on company residence and migrations took place and the requirement for Treasury consent to migrations and transfers of business was abolished.

We have seen in the preceding chapter that it was in 1988 that the incorporation rule of residence was enacted and that the possible threat from the Treaty of Rome was a contributory factor. One obvious result of the rule was that, broadly speaking, it stopped UK incorporated companies from migrating, although FA94/S249 [now s.18 CTA 2009] has changed the position again.

8.3 The incorporation rule

Section 14(1) CTA 2009 provides:

> A company which is incorporated in the UK is UK resident for the purposes of the Corporation Tax Acts.

This is called the **"incorporation rule"**. This rule also applies for income tax and CGT.[3]

The INTM has an extract from the ITH:

> **ITH357 incorporation rule: reasons for the rule**
> Three factors contributed to the coming of the incorporation rule. One was the possible threat posed by the Treaty of Rome to the provision in what became ICTA88/S765 that UK resident companies could not lawfully cease to be resident without Treasury consent. This provision was repealed when the incorporation rule became law. ...
> The second factor was the growing use by non-residents of UK incorporated but non-resident companies in order to avoid other countries' tax or for even more nefarious purposes...

[3] See 8.1 (Company residence: Introduction).

> The third factor, not unconnected with the second, was that in not having an incorporation rule of residence the UK was out of line with most other countries in Europe and indeed in the developed world. Most of the countries have a residence type rule equivalent to our incorporation rule though in some civil law countries it takes the form of the 'seat' test which comes to much the same thing. Very broadly speaking, a company formed under the laws of a country which has a 'seat' test must designate its seat of central management and administration in its registered 'Articles' and it is generally difficult for such a company to have its designated seat outside the country in which it was formed.

8.3.1 *Relationship of incorporation rule/other rules*

Section 14(2) CTA 2009 provides:

> Accordingly, even if a different place of residence is given by a rule of law, the company is not resident in that place for the purposes of the Corporation Tax Acts.[4]

SP 1/90 refers to this and provides:

> 23 ... This incorporation rule determines residence under UK domestic law and is subject to the provisions of any applicable double taxation agreement. It does not override the provisions of a double taxation agreement which may make a UK incorporated company a resident of an overseas territory for the purposes of the agreement (see paras 20 and 21 above).

8.4 Business cessation/winding up

Section 15(1) CTA 2009 provides:

> This section applies to a company which is neither–
> (a) incorporated in the UK, nor
> (b) resident in the UK by virtue of section 16 or 17.[5]

There are two rules which may conveniently be read side by side:

s.15(2) CTA 2009	**s.15(3) CTA 2009**
If the company– (a) is no longer carrying on a	If the company– (a) is being wound up outside the

[4] This rule also applies for income tax and CGT; see 8.1 (Company residence: Introduction).

[5] See 8.23 (Societas Europea/SCE).

business, and (b) was UK resident for the purposes of the Corporation Tax Acts immediately before it ceased to carry on business,	UK, and (b) was UK resident for the purposes of the Corporation Tax Acts immediately before any of its activities came under the control of a foreign liquidator,[6]
the company continues to be UK resident for the purposes of the Corporation Tax Acts.	the company continues to be UK resident for the purposes of the Corporation Tax Acts.

In short, if a foreign company is UK resident under the CMC rule, UK residence continues during a period during which the company is dormant or being liquidated, even if it ceases to have its CMC in the UK.

These rules apply for income tax and CGT.[7]

8.5 Pre-1988 companies

The INTM has an extract from the ITH:

> **ITH359 Company residence: incorporation rule: exceptions**
> During the course of the Finance Bill representations were made on behalf of companies which had been resident but had migrated, or were about to migrate, with Treasury consent. In response to these representations, a category of indefinite exceptions to the incorporation rule was created for companies which migrated with Treasury consent, so long as they continued to carry on business and their central management and control remained outside the UK. Most of these companies would have had specifically to apply to the Treasury for consent and their reasons for migration would have been scrutinised. But some companies controlled by non-residents were entitled to migrate under the benefit of a general consent which did not require them to make a specific application. These companies only qualify for indefinite exception if they are also liable to tax in another country on a basis intended to be the equivalent of taxation on worldwide income. The aim of this latter provision was to cut down as far as possible the number of companies with operations based in tax havens which would be entitled to indefinite exception.

[6] Defined in ss(4): "In subsection (3) "foreign liquidator" means a person exercising functions which, in the UK, would be exercisable by a liquidator."

[7] See 8.1 (Company residence: Introduction).

SP 1/90 provides:

> 2 The incorporation rule applies to companies incorporated in the UK subject to the exceptions in FA 1988 Sch 7 for some companies incorporated before 15 March 1988.

8.5.1 *Carrying on business*

SP 1/90 provides:

> 3 The exceptions from the incorporation test in FA 1988 Sch 7 depend in part on the company carrying on business at a specified time or during a relevant period. The question whether a company carries on business is one of fact to be decided according to the particular circumstances of the company. Detailed guidance is not practicable but the Revenue take the view that "business" has a wider meaning than "trade"; it can include transactions, such as the purchase of stock, carried out for the purposes of a trade about to be commenced and the holding of investments including shares in a subsidiary company. Such a holding could consist of a single investment from which no income was derived.
>
> 4 A company such as a shelf company whose transactions have been limited to those formalities necessary to keep the company on the register of companies will not be regarded as carrying on business.
>
> 5 For the purposes of the case law test (see B below) the residence of a company is determined by the place where its real business is carried on. A company which can demonstrate that in these terms it is or was resident outside the UK will have carried on business for the purposes of FA 1988 Sch 7.

8.5.2 *Taxable in territory outside UK*

SP 1/90 provides:

> 6 A further condition for some companies for exception from the incorporation test is provided by FA 1988 Sch 7 paras 1(1)(c), 5(1). The company has to be taxable in a territory outside the UK. "Taxable" means that the company is liable to tax on income by reason of domicile, residence or place of management. This is similar to the approach adopted in the residence provisions of many double taxation agreements....[8]

[8] See 9.6.1 (By reason of residence).

8.5.3 *"Treasury consent"*

SP 1/90 provides:

> 8 Before 15 March 1988 it was unlawful for a company to cease to be resident in the UK without the consent of the Treasury. Companies which have ceased to be resident in pursuance of a Treasury consent, as defined in FA 1988 Sch 7 para 5(1), are excepted from the incorporation rule subject to certain conditions. A few companies ceased to be resident without Treasury consent but were informed subsequently by letter that the Treasury would take no action against them under the relevant legislation. Such letter is not a retrospective grant of consent and the companies concerned cannot benefit from the exceptions which depend on Treasury consent.

8.6 Central management/control test

So far as no statutory rule applies, case law fills the gap. In *De Beers Consolidated Mines v Howe*:[9]

> In applying the concept of residence to a company, we ought, I think, to proceed as nearly as we can upon an analogy of an individual. A company cannot eat or sleep, but it can keep house and do business. We ought, therefore, to see where it really keeps house and does business...a company resides for purposes of income tax where its real business is carried on. I regard that as the true rule, and the real business is carried on where the central management and control actually abides.

This definition of residence applies not just for tax law, but also for non-tax law, generally[10], in the absence of other statutory provisions.

SP 1/90 provides:

> 10 The "central management and control" test, as set out in *De Beers*, has been endorsed by a series of subsequent decisions. In particular, it was described by Lord Radcliffe in the 1959 case of *Bullock v Unit Construction Company* [(1959) 38 TC 712 at 738] as being-
>
> > 'as precise and unequivocal as a positive statutory injunction … I do not know of any other test which has either been substituted for that of central management and control, or has been defined with

[9] 5 TC 198 at p.212. This view comes from the *Calcutta Jute Mills* case as far back as 1 TC. *De Beers* was the company founded by Cecil Rhodes, who has taken an unexpected prominence in contemporary political life.

[10] For an exception see 102.14.2 ("Jurisdiction-residence").

> > sufficient precision to be regarded as an acceptable alternative to it. To me … it seems impossible to read Lord Loreburn's words without seeing that he regarded the formula he was propounding as constituting the test of residence.'
>
> Nothing which has happened since has in any way altered this basic principle for a company the residence of which is not governed by the incorporation rule; under current UK case law such a company is regarded as resident for tax purposes where central management and control is to be found.

It is rare to elevate a case law phrase to the status of statute law, but that is what has happened here.[11] But the meaning of the phrase still depends on the case law.[12]

"Management and control" is a composite phrase, where the two words are used more or less synonymously. There are not two distinct tests, one of management and one of control.

Central management and control may be abbreviated to CMC.

8.6.1 *Guidance on CMC*

In addition to the usual UK sources, foreign revenue guidance may be helpful, as the CMC test applies in many common law jurisdictions. For instance, *Unit Construction v Bullock* cites the Australian case of *Koitaki Para Rubber Estates v FCT*.[13]

Material on place of effective management may be helpful as the test is (more or less) the same.[14] This chapter draws on:

"Australia CMC guidance" [15]

"SA POEM guidance" [16]

See too: 9.19.9 (Trust Fund CMC in Australia).

[11] It was relevant that this phrase had received statutory recognition: see *Bullock v Unit Construction* 38 TC 712 at p.735.

[12] This is self-evident, but if authority is needed, see *Swedish Central Railway v Thompson* 9 TC 342: "That test must be applied as interpreted in the decided cases."

[13] 64 CLR 15 and 241.

[14] See 9.19.4 (POEM/CMC compared).

[15] TR 2018/5 Income tax: central management and control test of residency

[16] Interpretation Note: No. 6 (Issue 2) (2015) *https://www.sars.gov.za/wp-content/uploads/Legal/Notes/LAPD-IntR-IN-2012-06-IN-6-Resident-Place-of-effective-management-companies.pdf*
This strictly concerns place of effective management, not CMC, but the difference is not significant here.

8.7 Control: company law background

8.7.1 *Board /shareholder roles*

Gower explains:[17]

> Until the end of the 19th century, it was generally assumed that ... the board of directors was ... subject to the control of the company in general meeting. It followed that the shareholders could at any time by ordinary resolution give the directors binding instructions as to how they were to exercise their management powers...
> In 1906, however, the Court of Appeal in *Automatic Self-Cleansing Filter Syndicate Co v Cuninghame*,[18] made it clear that ... the division of powers between the board and the company in general meeting depended entirely on the construction of the article of association, and that, where powers had been vested in the board, the general meeting could not interfere with their exercise. ... since *Quin & Axtens v Salmon*[19] it has been generally accepted that where the relevant articles are in the normal form... the general meeting cannot interfere with a decision of the directors ...

The pre-1906 law may still be relevant to understanding the oldest company residence cases. Gower continues:

> In *Shaw & Sons (Salford) Ltd v Shaw*,[20] in which a resolution of the general meeting disapproving the commencement of an action by the directors was held to be a nullity, the modern doctrine was expressed ...as follows:
>
> > "A company is an entity distinct alike from its shareholders and its directors. Some of its powers may, according to its Articles be exercised by directors; certain other powers may be reserved for the shareholders in General Meeting. If powers of management are vested in the directors, they and they alone can exercise those powers. The only way in which the general body of the shareholders can control the exercise of the powers vested by the Articles in the directors is by altering the Articles or, if opportunity arises under the Articles, by refusing to re-elect the directors of whose actions they disapprove.[21] They cannot themselves usurp the powers which by the

[17] Gower, *Principles of Modern Company Law* (11th ed, 2021), para 9-003.

[18] [1906] 2 Ch 34.

[19] [1909] 1 Ch 311.

[20] [1935] 2 KB 113 at p.134,

[21] They can now remove the directors by ordinary resolution.

> Articles are vested in the directors any more than the directors can usurp the powers vested by the Articles in the general body of shareholders."

Standard articles now provide:[22]

> **3. Directors' general authority**
> 3.Subject to the articles, the directors are responsible for the management of the company's business, for which purpose they may exercise all the powers of the company.
> **4. Shareholders' reserve power**
> 4.(1) The shareholders may, by special resolution, direct the directors to take, or refrain from taking, specified action.
> (2) No such special resolution invalidates anything which the directors have done before the passing of the resolution.

The board is therefore the normal source of management and control.

> **ITH317 Company residence: legal power to manage/control: with directors**
> ... Of course the shareholders in General Meeting have rights and duties apart from those of appointing and dismissing the directors. They approve the accounts and pass the dividend and have a voice in such matters as issuing new capital, in the reduction of capital and in changes of the objects clause of the Memorandum or changes in the Articles. These things do not constitute the management and control of the business. They are rather keeping a critical eye on the interests of the shareholders...

8.7.2 *Foreign law*

In the case of a foreign company, it will be a matter of considering the foreign company law, which may of course be quite different.

In Germany, a two-tier board is mandatory for an Atkiengesellschaft (public company). The managing board runs the business and the supervisory board monitors the managing board. The INT Manual provides:

> **INTM120180 How To Review Residence** [May 2020]
> ... We would usually take the view that central management and control of the business is to be found at Managing Board level. But the exact set-up differs from country to country and between different types of

[22] Sch 1 Companies (Model Articles) Regulations 2008.

> company in each country and may depend on the instrument governing the management of the company. In some companies the shareholders themselves may have management functions.

The supervisory/managing board split would only affect company residence if the two boards operate in different countries, which would be unusual.

8.8 CMC: Top level control

SP 1/90 provides:

> 11 In determining whether or not an individual company outside the scope of the incorporation test is resident in the UK, it thus becomes necessary to locate its place of "central management and control". The case law concept of central management and control is, in broad terms, directed at the highest level of control of the business of a company. It is to be distinguished from the place where the main operations of a business are to be found, though those two places may often coincide.

CMC means control at board level.

A decision of a director to resign does not count for the purposes of CMC, because it is not a board decision. Likewise shareholder decision in general meeting to appoint or dismiss directors.[23]

Decisions of a corporate trustee in its capacity as trustee also do not count for the purposes of CMC of the company.[24]

Australian CMC guidance comments further on what constitutes CMC:

> 16. Exercising central management and control of a company can involve:
> [1] setting investment and operational policy including:
> [a] setting the policy on disposal of trading stock, and/or the use and development of capital assets
> [b] deciding to buy and sell significant assets of the company
> [2] appointing company officers and agents and granting them power to carry on the company's business (and the revocation of such appointments and powers)
> [3] overseeing and controlling those appointed to carry out the day-to-day business of the company, and
> [4] matters of finance, including determining how profits are used and

[23] See 8.12 (Parent/subsidiary relationship).
[24] See 7.5.1 (Ascertaining trustee residence).

> the declaration of dividends.
>
> *Matters of company administration*
>
> 17. Matters of company administration are not acts of central management and control. These include:
>
> [1] keeping a company's share register, including registering transfers of shares
>
> [2] keeping and adopting a company's accounts
>
> [3] where a company pays dividends, and
>
> [4] the minimum acts necessary to maintain a company's registration.

8.8.1 *Day-to-day/operational level*

There are many ways to slice the management cake. One should distinguish top level and day-to-day control. The Australian CMC guidance provides:

> 12. The control and direction of a company is different from the day-to-day conduct and management of its activities and operations. The day-to-day conduct and management of a company's activities and operations is not ordinarily an act of central management and control. Nor is the management of day-to-day activities under the authority and supervision of higher-level managers or controllers.
>
> 13. The day-to-day conduct and management of a company's operations might be an exercise of central management and control in circumstances where they are effectively the same. For example, for a small passive investment company with a very small number of investments, the decisions to make, hold and dispose of those investments, would be both the day-to-day management and the central management and control of the company.

The term sometimes used is operational management: that is the same as day-to-day control. SA POEM guidance discusses the same issue:

> **4.2.6 Operational management versus broader top level management**
>
> Operational management decisions are generally of limited relevance in determining a company's place of effective management and must be distinguished from the key management and commercial decisions.
>
> Operational management generally concerns the oversight of the day-to-day business operations and activities of a company. Key management and commercial decisions are concerned with broader strategic and policy decisions and tend to be made by members of the senior management team. For example, a decision to open a major new manufacturing facility or to discontinue a major product line would be

> examples of key commercial decisions affecting the company's business as a whole. By contrast, decisions by the plant manager appointed by senior management to run that facility, concerning repairs and maintenance, the implementation of companywide quality controls and human resources policies, would be examples of operational management.
>
> What constitutes a key management or commercial decision as opposed to an operational management decision is critical since it is the former that is relevant in the context of establishing the place of effective management. Again, determining what constitutes a key management or commercial decision is an aspect that can be determined only on a case-by-case basis. For example, in some businesses the conclusion of each and every contract will be a key commercial decision while in other businesses the setting of standardised pricing will be a key commercial decision but the conclusion of individual contracts will not be.
>
> Depending on the particular case, the person responsible for operational decisions may be the same as the person responsible for the key management and commercial decisions. In this situation it is still necessary to distinguish between the two types of decisions and to assess where the key management and commercial decisions are made. The location of this decision-making is critical.

Kotakai[25] is a case of rubber but not rubber-stamping:

> 130. ... The company in *Koitaki*, which was incorporated in Sydney, owned rubber plantations in Papua. The plantations were managed by an officer of the company who acted under a power of attorney by which the company authorised him to manage, carry on and conduct the company's property, affairs and business. The officer sent weekly reports of the working of the plantations to the chairman of directors in Sydney which is where the directors of the company resided and met. He also periodically sent to the manager of the company in Sydney for presentation to the directors, reports concerning the running of the plantations and the yield of rubber.
>
> 131. ... the company was not a resident of Papua as the company's central management and control was not there exercised, despite the responsibilities of the attorney. His Honour stated that the responsibility of the attorney was confined to the production and shipment of rubber and did not extend to the control of the general or corporate affairs of

[25] *Koitaki Parra Rubber Estates v FCT* (1941) 64 CLR 241.

the company or to matters of policy and finance.[26] The matters of policy and finance were matters which in fact formed part of the CM&C of the company as distinct from the day to day management of the production and shipment of rubber. The fact that the performance of the attorney was being monitored from Sydney was also an important consideration in the decision of Dixon J.

8.8.2 *Head office v top level control*

The ITH provides:

> **ITH328 Company residence: looking at the command structure**
> ... the problems start to emerge when different levels of management can be seen in different countries.
> **ITH329 command structure: three levels of management**
> There might, for example, be a company engaged in some real activity in which it would be possible to detect at least three levels of management. Starting at the bottom there might be
> 1 shop floor or on the spot management;
> 2 what might, in every day language, be called the Head Office; the place where one would expect to find the executives and senior staff who actually make the business tick, the people directly giving the orders that govern the company's operations;
> 3 the central policy core of the whole enterprise - and this is the difficulty. It may be indistinguishable from (ii) above or it may not. It may be a passive sort of body merely keeping its eye on things or it may be a very active body.
> **ITH330 Company residence: executive/non-executive directors**
> The way in which UK public companies actually go about organising themselves has changed over the years. At the time of some of the older tax cases our whole social pattern was very different from today's. Then, the men at level two - the action men - would probably have been people like the chief general manager and his immediate management colleagues who would not have been members of the board at all. The board would have consisted wholly of non-executive directors. Later, senior managers became board members and indeed the managing director or chief executive may have near absolute power.
> That is a great change; such people are seen, and see themselves, as rare and valuable and will not be given orders by a non-executive board. But the practice of appointing non-executive directors did not disappear and indeed became more customary in the later years of the twentieth

[26] (1940) CLR 15 at 18; (1940) 6 ATD 42 at 45.

> century. These directors are not necessarily mere ciphers, and a board which includes both executives and non- executives may well exercise central management and control. Some so-called non-executives may in fact act more like executives. In this respect titles can be misleading and should not be regarded as conclusive of the true role taken by an individual.
>
> **ITH331 Company residence: command structure: The pinnacle doctrine**
>
> It is quite apt to think of the central management and control doctrine as the pinnacle doctrine - one looks at the very top of the pyramid of control. There is nothing conceptually wrong with that, indeed it is an idea which, in theory, is reasonably easy to apply. Putting aside the exceptional cases of dual residence in the special sense described in ITH338, a pyramid has only one top. There is no doubt whatever that in the past the non-executive directors who sat on the board did hold the reins though active intervention by them in the working of the company may have been a rare thing. Theirs was the power and everybody knew it. Even with the increasing power of executive directors it is difficult to find the pinnacle of control anywhere other than with the board combining executive and non-executive directors. That is level three management. With modern means of communication it is easy to move that sort of pinnacle about. The board does not have to be tied to the operational base. It is less easy, though not impossible, to move level two around.

8.8.3 *Economic nexus*

SA POEM guidance provides:

> **4.2.8 Economic nexus**
>
> The extent of a company's economic nexus with a country is generally irrelevant in the determination of its place of effective management. However, this factor may be considered circumstantial and given some weight in cases where other factors are inconclusive.

The term "economic nexus", undefined, is too vague to be a satisfactory test, or even a factor, for determining CMC.

8.8.4 *Legal nexus*

SA POEM guidance provides:

> **4.2.7 Legal factors**
>
> Legal factors such as a company's place of incorporation, formation or establishment, the location of its registered office and the location of its

public officer are generally not relevant in the determination of a company's place of effective management.

8.9 CMC a question of fact

In *De Beers* [*De Beers Consolidated Mines Ltd v Howe* 5 TC 198:

> ... where the central management and control actually abides... is a pure question of fact, to be determined, not according to the construction of this or that regulation or by-law, but upon a scrutiny of the course of business and trading.

SP 1/90 provides:

> 12 Successive decided cases have emphasised that the place of central management and control is wholly a question of fact. For example, Lord Radcliffe in *Unit Construction* said that "the question where control and management abide must be treated as one of fact or 'actuality'".[27] It follows that factors which together are decisive in one instance may individually carry little weight in another.

Why does the heart sink when one reads that something is a pure question of fact?

8.10 Directors meetings

8.10.1 *Board meeting significance*

SP 1/90 provides:

> 12... a series of decisions has attached importance to the place where the company's board of directors meet. There are very many cases in which the board meets in the same country as that in which the business operations take place, and central management and control is clearly located in that one place. In other cases central management and control may be exercised by directors in one country though the actual business operations may, perhaps under the immediate management of local directors, take place elsewhere.
> 13 But the location of board meetings, although important in the normal case, is not necessarily conclusive. Lord Radcliffe in *Unit Construction* pointed out[28] that the site of the meetings of the directors' board had not been chosen as "the test" of company residence. In some cases, for example, central management and control is exercised by a single

[27] 38 TC 712 at p.741.
[28] 38 TC 712 at p.738.

individual. This may happen when a chairman or managing director exercises powers formally conferred by the company's Articles and the other board members are little more than cyphers, or by reason of a dominant shareholding or for some other reason. In those cases the residence of the company is where the controlling individual exercises his powers.

14 In general the place of directors' meetings is significant only insofar as those meetings constitute the medium through which central management and control is exercised. If, for example, the directors of a company were engaged together actively in the UK in the complete running of a business which was wholly in the UK, the company would not be regarded as resident outside the UK merely because the directors held formal meetings outside the UK. While it is possible to identify extreme situations in which central management and control plainly is, or is not, exercised by directors in formal meetings, the conclusion in any case is wholly one of fact depending on the relative weight to be given to various factors. Any attempt to lay down rigid guidelines would only be misleading.

15 Generally, however, where doubts arise about a particular company's residence status, the Revenue adopt the following approach-

(i) they first try to ascertain whether the directors of the company in fact exercise central management and control;

(ii) if so, they seek to determine where the directors exercise this central management and control (which is not necessarily where they meet);

(iii) in cases where the directors apparently do not exercise central management and control of the company, the Revenue then look to establish where and by whom it is exercised.

8.10.2 *Where meeting takes place*

If or so far as the location of a meeting is important, the question arises where a meeting does takes place. Developments in communication and business practice have made this problematic.

If the directors meet in person, no problem arises. In other cases, assuming a fully functioning board, it is suggested that the position is in principle as follows:

(1) If one director attends electronically (by phone or computer link such as Zoom) and the rest meet physically in one place, the place of meeting is where the majority meet.

(2) Where all directors attend by electronic means:

(a) If all are in the same territory, the meeting takes place in that territory.

(b) If they are all in different territories, it is impossible to identify anywhere where the meeting "takes place". For corporate residence purposes the concept is then useless and inappropriate, and I would say it is meaningless. If all meetings take place in this way, one must either look for some other links to determine residence, such as the location of the head office; or else the company may have to be regarded as dual resident.[29]

(c) If they are all in the same territory but one, the meeting takes place in that territory.

Standard company articles provide:[30]

> If all the directors participating in a meeting are not in the same place, they may decide that the meeting is to be treated as taking place wherever any of them is.

But the place (if any) where a meeting actually takes place is a question of fact which is not determined or even affected by a deeming provision of that kind. Or more analytically, an article of that kind has effect only for the purposes of the articles,[31] and not for the purpose of ascertaining company tax-residence.

8.10.3 *Delegation of board powers*

The ITH provides:

[29] See 8.16 (Dual residence/no CMC). The issue is not an entirely new one. SP 1/90 also comments on developments in communications:

> 19 The case law test examined in this statement is not always easy to apply. The courts have recognised that there may be difficulties where it is not possible to identify any one country as the seat of central management and control. The principles to apply in those circumstances have not been fully developed in case law. In addition, the last relevant case was decided almost 30 years ago, and there have been many developments in communications since then, which in particular may enable a company to be controlled from a place far distant from where the day-to-day management is carried on. As the Statement makes clear, while the general principle has been laid down by the courts, its application must depend on the precise facts.

But that does not take us very far.

[30] Art 10(3) Model articles for private companies limited by shares, *https://www.gov.uk/guidance/model-articles-of-association-for-limited-companies*

[31] It would have effect for the purposes of an article (if there is one) referring to the place where a board meeting is held.

> **ITH318 Company residence: power to manage/control: managing director**
> ... Of course the board of directors can still appoint agents and as long as they are mere agents they do not, by the bare fact of being there and fulfilling their agencies, detract from the management and control of the board. There is, however, one special case and that is where the board under the authority of the Articles appoint a managing director. In such cases one has to look very carefully at what the powers of the managing director are. One distinguished writer [Gower, *The Principles of Modern Company Law*] on the subject has said that if the service agreement with a managing director purports to confer exclusive powers on him without expressly reserving a right of supervision, he thinks that the board could not interfere with a managing director's exercise of his powers during the subsistence of the service agreement. The writer concludes that in that situation the directors are in effect substituting a managing director for themselves as one of the primary organs of the company. Certainly there is all the difference in the world between a managing director in that sense and a manager who happens also to be a director.

Delegation by the board may be wider or narrower, but I expect it is usually narrower. In *BW Noble v Mitchell*[32] the directors exercised their power of delegation, granting a power of attorney which gave one of the directors power to carry on the company's business in France. The French attorney sent some reports on the progress of the business to the directors in London, and on one or two occasions received the agreement of the board to his proposals. It was held that CMC of the company remained with the board of directors in London, and had not shifted to France under the delegation:

> ...that power of attorney did not and could not, consistently with the Articles, and did not by its tenor, divest the Board in London of their authority; it did not make an independent plenipotentiary who could do what he liked until the power of attorney was determined. It seems to me that although he held the power of attorney, the Directors at any moment could have said to him: 'Well, we do not think under your power you ought to do this; we decide that it shall not be done, although you might have done it under your power of attorney if we had not told you to the contrary'.[33]

[32] 11 TC 372.
[33] 11 TC 372 at p.410.

8.10.4 *Passive oversight/tacit control*

SP 1/90 provides:

> 11 Moreover, the exercise of control does not necessarily demand any minimum standard of active involvement: it may, in appropriate circumstances, be exercised tacitly through passive oversight.

The ITH provides:

> **ITH327 difficulties: central management/ control test**
> It is now possible to look at the heart of our difficulties over the central management and control test. If, as is usual in this country and in many others, the directors of a company have the constitutional power to manage and control, they can exercise that power in truth and fact by doing very little indeed. They can appoint agents and servants to attend to the day-to-day running of affairs on the spot and they can exercise their management and control perhaps from far away. Nothing in the *Unit Construction* case changes that: what *Unit Construction* says is that if the directors stand aside and allow others to manage and control, it is those people to whom one must look in reaching a conclusion. The clearest example in Case Law of the minimal activity required to establish management and control is *Ogilvie v Kitton* [5 TC 338] the case of the gentleman in Aberdeen with a shop in Canada...[34] It is not indeed a residence case but concerned with the Case I/Case V [UK/foreign source] argument. It is nevertheless wholly relevant to the point.
> The difficulty can be put in this way - just as *Calcutta Jute Mills* can be managed and controlled in the UK so can an English trading company be managed and controlled in a tax haven. The law sets no minimum standard of participation in the affairs of the business to establish management and control. Lord Sumner said in the *Egyptian Hotels* Case (again on the Case I/Case V point - see ITH343) that it was not enough that the proprietors had the legal right to intervene. There must be actual participation and then come the very important qualifying words ‘though it may not go beyond passive oversight and tacit control’ [6 TC 542 at p.551].

In *Tulip Trading Ltd v Bitcoin Association For BSV*:[35]

[34] See 21.4 (IT territorial limit: Trading).

[35] [2022] EWHC 667 (Ch) at [149] ff. The case is not yet final, but is not likely to be reversed on this point.

> ... where its central management and control is located... is not a straightforward test to apply in this case. TTL has no active business. Its sole function appears to be to act as a vehicle to hold digital assets. I saw no evidence that it holds any digital assets apart from those the subject of the dispute. On TTL's case those assets were acquired before Dr Wright based himself in this jurisdiction. From that point on there is no indication that TTL took any material action until it decided to bring this claim.
>
> TTL's case relies on the fact that Dr Wright had power to access and control its assets from his home office in Surrey, and that he or his wife were TTL's CEO and controlled TTL ...
>
> More significantly, however, Dr Wright's own evidence is that he had not accessed the bitcoin for many years before the hack. Leaving to one side any administrative steps (which have not included filing any accounts or tax returns), TTL's only real "action" was therefore the inaction of not choosing to deal in the assets. It is not clear to what extent, if at all, there was any conscious decision-making to that effect. The claim to be resident here therefore appears largely to depend on management and control having been manifested by the fact that Dr Wright and/or his wife did not deal with the assets, but had the ability to do so.
>
> TTL also relies on the lack of any activity in the Seychelles (which neither Dr Wright nor his wife have ever visited) and its registration under the International Business Companies Act 2016, which TTL maintains is intended for companies not carrying on business there. Although there is a registered agent in the Seychelles which maintains the register of members, other books and records are said to be kept at Dr Wright's home office, where day to day management and administration is conducted. However, there is no indication that TTL has filed any tax returns or has registered a place of business[36] here...
>
> I would be prepared to conclude that TTL has the better of the arguments on residence. ... Dr Wright did in fact have the ability to deal in the assets from this jurisdiction, and determining not to do so (whatever level of activity that involved) can be described as an exercise of control. The only alternative to England that has been put forward appears to be the Seychelles, and it is hard to see that TTL is resident in a place where its directing minds have never visited, it keeps no books and records, and where it appears not even to have filed accounts.

[36] Footnote original: Strictly, a UK establishment: Overseas Companies Regulations, 2009.

8.10.5 *Usurping board powers*

In *Unit Construction v Bullock*, a UK parent company had three subsidiary companies incorporated in Kenya, with boards of directors consisting of local people, and carrying on trading activities in Africa - merchanting, mining, etc. The subsidiaries' articles of association provided that management was vested in the directors and their boards could meet anywhere other than in the UK. Presumably the drafter was trying to avoid UK residence.[37] But in practice, every decision of any importance was taken by the directors of the parent company in London. That was because the subsidiaries had been operating so unsuccessfully that the parent company had decided that "it was unwise to allow them to be managed in Africa any longer, and their management must be taken over by the directors of [the parent company] in London".[38]

On these facts the Kenyan subsidiaries were UK resident:[39]

> Nothing can be more factual and concrete than the acts of management which enable a Court to find as a fact that central management and control is exercised in one country or another. It does not in any way alter their character that in greater or less degree they are irregular or unauthorised or unlawful. The business is not the less managed in London because it ought to be managed in Kenya. Its residence is determined by the solid facts, not by the terms of its constitution, however imperative. ... it is the actual place of management, not that place in which it ought to be managed, which fixes the residence of a company.

De facto control was exercised in the UK and the local directors "stood aside" from their duties and did not even purport to function as a board of management. That was said to be unusual:

> It is surely exceptional for a parent company to usurp the control; it usually operates through the boards of the subsidiary companies.[40]

That is no doubt true, both when written and now, in cases of large and

[37] Ironically, it was the company which was arguing for UK residence, for reasons relating to loss relief.

[38] at p.737.

[39] 38 TC 712 at p.736.

[40] 38 TC 712 at p.744. The point was repeated in *Wood v Holden* [2005] EWHC 547 (Ch) at 23 describing *Unit Construction* as "a very important case, but ... a highly exceptional case in terms of the result".

well run company groups, with access to good legal advice. Beyond that, readers will have to judge for themselves. The answer is not self-evident.

The INTM has an extract from the ITH:

> **ITH323 legal control overridden: Unit Construction**
> ... the Revenue view had been that in looking at the acts which constitute management and control one should look only at those acts which are intra vires the Articles - at those acts which are constitutional. This view was held to be wrong in the *Unit Construction* .. case .... Here, the Lords, overruling both lower Courts, dismissed the argument that 'only constitutional, and therefore authorised, management and control are relevant to an enquiry as to the residence of a company'...

It seems strange that the Revenue chose to argue the point, for it was surely against their own interest.[41] But there it is.

The ITH continues:

> So there are two questions.
> 1 Where and by whom according to the constitution of the company and the law of the land ought this company to be managed and controlled.
> 2 Exceptionally, if the people lawfully charged with management and control did not exercise it, who did? ...

The distinction between passive oversight and no oversight can be a fine one. A case on the other side of the line is *Esquire Nominees v CT*.[42] The question was whether Esquire Nominees was resident in Norfolk Island, an Australian offshore territory. The company was incorporated in Norfolk Island, its office was there, the directors and shareholders were there, and meetings of the company and of the directors were held there. The business of the company was to act as trustee of trusts set up on the advice of accountants in Melbourne for its clients. The Australian Revenue contended that the directors of the trustee company merely carried out directions given to them by the accountants, so management and control of the company was in Australia. It was said that the activities of the company were confined to acting as trustee of trusts set up on the advice

[41] At p.736, as Counsel for the taxpayer must have pointed out:
"In how many cases would a limited company register in a foreign country, prescribe by its articles that its business should be carried on by its directors meeting in that country, and then claim that its residence was in that country though every act of importance was directed from the United Kingdom?."

[42] 129 CLR 177.

of the accountants; that the administration of the various trusts followed a pattern which had been laid down by that firm in advance; and that detailed agenda for meetings of the directors of the company, and of the company itself, were prepared by the accountants in advance. But the company was not controlled in Australia:

> ... what the appellant did ... was done in the course of carrying out a scheme formulated in Australia and that [the accountants] not only communicated to the appellant particulars of the scheme but advised the appellant in detail of the manner in which it should be carried out.
>
> But if it be accepted that the appellant did what [the accountants] told it to do in the administration of the various trusts, it does not follow that the control and management of the appellant lay with [the accountants]. That firm had no power to control the directors of the appellant in the exercise of their power or the 'A' shareholders in the exercise of their voting rights. Although it is doubtless true that steps could have been taken to remove the appellant from its position as trustee of one or more of the trust estates, [the accountants] could not control the appellant in the conduct of its business of a trustee company. The firm had power to exert influence, and perhaps strong influence, on the appellant, but that is all. The directors in fact complied with the wishes of [the accountants] because they accepted that it was in the interests of the beneficiaries, having regard to the tax position, that they should give effect to the scheme.
>
> If, on the other hand, [the accountants] had instructed the directors to do something which they considered improper or inadvisable, I do not believe that they would have acted on the instruction. It was apparent that it was intended that the appellant should carry on its business of trustee company on Norfolk Island. It was in my opinion managed and controlled there, none the less because control was exercised in a manner which accorded with the wishes of the interests in Australia.[43]

In short, the fact that directors of an SPV were accustomed to act in accordance with the wishes of the sponsor – in that case, the accountants as adviser to their client – did not lead to the conclusion that the CMC of company was where the sponsor was.

Another example is *Untelrab v McGregor*.[44] The directors of the company were in Bermuda and Jersey. Board meetings were held in

[43] at 190-1 (emphasis added). There was no appeal on this point, and on the appeal, 2 of the 4 members of the full Court expressly agreed with it.

[44] [1996] STC (SCD) 1.

Bermuda, two or three times a year. The meetings were not attended by the Jersey based director; but he was sent copies of the minutes. The company had been set up for the specific purpose of receiving a payment due to its parent, Unigate plc, The business of Untelrab was the receipt of the money, investment, and making loans to other companies in the Unigate group. Requests for such loans usually originated from Unigate. The Special Commissioners said:

> although a board might do what it is told to do it did not follow that the control and management of the company lay with another, so long as the board exercised their discretion when coming to their decisions and would have refused to carry out an improper or unwise transaction

The manner in which the board of Untelrab carried out its role was close to being controlled by the parent, Unigate, but did not cross the line. The board met in Bermuda and transacted the company's business there; at board meetings, proposals were discussed and decisions made by the two directors present "in the best interests of the company"; and the directors would have refused to carry out any proposal which was improper or unreasonable. Unigate could have removed the directors; but could not control them in the exercise of their powers. The special commissioners found that, although Untelrab was compliant to do the wishes of Unigate, "it did actually function in giving effect to its parent's wishes." That is, the directors did actually address their minds to the question whether, in relation to each request for a loan, it was in the interests of Untelrab to comply with the request.

The crucial question in cases of this type is whether the directors of the company are able to say "No" to a proposed transaction; and can be expected to do so if their duty to the company so requires.

Another example is *Wood v Holden* which concerned the residence of a company, Eulalia, incorporated in the Netherlands. Eulalia had been acquired, on the advice of Price Waterhouse, for a CGT avoidance scheme. The sole director was the trust company of a Dutch bank. Eulalia was used for a single transaction: the acquisition and disposal of shares. The director of Eulalia caused it to participate in the transaction in accordance with the scheme devised by Price Waterhouse and on the basis of documents which Price Waterhouse had prepared. Although Price Waterhouse intended and expected that Eulalia would make the decisions which it did make, Price Waterhouse did not dictate what decision it should take. In particular:

> it is inherently improbable that a major bank (or its trust company) would allow its actions to be dictated by a client's professional advisers (however eminent).[45]

Or so the CoA thought. There was no reason why Eulalia should not decide to do as it was requested; and ample reason why it should enter into the transaction, as it was expected that it would.

The INTM provides:

> **INTM120180 How To Review Residence** [May 2020]
> ...When determining whether the directors do have control, the first step may be to consider whether any person is, in fact, likely to be able to instruct the directors, irrespective of the legal position. If so, are the directors of sufficient standing and likely to have the requisite expertise to be able to act on their own authority and do they, in fact, do so?
> ... The place of directors' meetings is significant as an indication of the place of central management and control if, but only if, the board of directors does have the controlling power and exercises that power wholly or mainly at board meetings. The place of meetings will not be decisive if the directors are acting on the instructions of some other person or if they artificially divorce the place of their meetings from the place where they together manage and control the business outside the meetings - see paragraph 14 of SP1/90 at INTM120200.[46]
> It is necessary to look at what happens between meetings. But if, for example, a main board made up of executive and non-executive directors meets regularly overseas and the directors in the UK are only executive directors, subject to the control of the board, it is unlikely that the company is resident in the UK even though the role of the main board may be relatively passive. The board must, however, have real control. This is unlikely if it is made up partly of 'stooge' directors recruited simply to give the appearance of control.
> In a detailed examination of residence, try to build up a complete picture of just how the business is run, over a period of time. Meetings with those involved in the management, and examination of records and correspondence are essential to a thorough examination.

8.10.6 *Sleeping directors*

The Australian CMC guidance provides:

[45] [2006] EWCA Civ 26 at 41.

[46] See 8.10.1 (Board meeting significance).

> 23. A person who has legal power or authority to control and direct a company, but does not use it, does not exercise central management and control.[47] For example, in *Bywater*,[48] the court disregarded the role of those directors who were formally appointed but did not play any real role in the affairs of the company.

I refer to a board which is not "rubber stamping" the decisions of others as a **"functioning board"** and one all of whose directors participate (no sleeping directors) is a **"fully functioning board".**

8.10.7 *Influence v control*

Australian CMC guidance provides:

> 26. An outsider who merely influences those with legal power to control and direct a company, even if they can and do exert strong influence, is not the relevant decision maker and does not exercise central management and control of the company. However, if an outsider is more than merely influential, and actually dictates or controls the decisions made by the directors, the outsider will exercise central management and control of the company.
> 27. The distinction turns on what amounts to decision making for the central management and control test of residency. In *Bywater*,[49] the High Court observed that this turns on whether the people said to make the decisions of the company, actually consider whether to do what they are told, or are advised to do, and make a decision to do it because it is in the best interests of the company. If they do, they are the relevant decision maker and exercise central management and control of the company. If they do not, and merely mechanically implement or rubberstamp company decisions already made by others based on what they are told or advised to do, the person who gave the instruction is the real decision-maker and exercises central management and control of the company.
> 28. It is relevant to consider whether the directors would refuse to follow advice or directions of outsiders that are improper or inadvisable. If they would, it is more likely the directors are the real decision makers. If not, it is more likely the outsider who exercises central management and control.

[47] *BW Noble* at p.412.

[48] *Bywater Investments v CT* [2016] HCA 45.

[49] *Bywater Investments v CT* [2016] HCA 45.

> 29. The directors' knowledge of the business is also relevant. A lack of knowledge of the business sufficient to enable them to determine if following advice or instructions would be improper or inadvisable, suggests they are not the real decision makers and are more likely rubberstamping or implementing decisions already made by others.

SA POEM guidance provides:

> In considering whether a board is making the decisions or, alternatively, is limited to formally approving or rubber-stamping the decisions made by someone else, a variety of factors must be taken into consideration. These factors include, for example,
> [1] whether the directors have sufficient knowledge and information at hand,
> [2] whether the directors are suitably qualified and experienced generally and in relation to the particular company, and
> [3] whether the directors had reasonable time to assess the information and make the decision.
>
> The details regarding quorums and casting votes and the circumstances in which those aspects are applied may be relevant. Again, it is necessary to look at all the relevant facts and circumstances of a particular case.
>
> Similarly, when considering the role of different directors, it must be established whether the particular director is involved in the decision-making or is perhaps merely ratifying a decision made by other directors or people. For example, it is possible for a director to be appointed with a governance-focussed role or as a shareholder representative and custodian as opposed to being actively involved in making decisions on behalf of the company. In some companies executive directors have traditionally been involved in decision-making while non-executive directors have not had a decision-making role.

8.10.8 *Service of inevitability*

This section draws on an article by Chadwick LJ writing extra-judicially.[50] This considers the position of an "orphan SPV". That is an entity where:

(1) the entity is established for a person ("the sponsor") who does not control the entity (in the strict sense of control); but

(2) the sponsor intends and expects that the SPV will in practice conduct

[50] Chadwick, "Control of Special Purpose Vehicles" Jersey & Guernsey Law Review 2007 *https://www.jerseylaw.je/publications/jglr/Pages/JLR0706_Chadwick.aspx* This was written a year after Chadwick gave his judgment in *Wood v Holden*.

> its affairs in a way which fulfils the sponsor's purpose, which is usually determined in advance.

Directors or trustees of such entities may be said to provide a "commercial service of inevitability".[51]

In *Wood v Holden*:[52]

> 'Vehicle' has a belittling sound to it, but such companies ... can and do fulfil important functions within international groups, and they are principals, not mere nominees or agents, in whatever roles they are established to undertake. They usually have board meetings in the jurisdictions in which they are believed to be resident, but the meetings may not be frequent or lengthy. The reason why not is that in many cases the things which such companies do, though important, tend not to involve much positive outward activity. So the companies do not need frequent and lengthy board meetings

Chadwick gives the following advice:

> What guidance can be given in relation to practical problems which may arise in the course of administering an orphan SPV. The problems can, I think, be addressed under two main heads. The first may be described as constitutional: the second as comprehensional.

On the constitutional aspect:

> The constitution of the SPV company must ensure that the sponsor does not have legal control. That precludes the sponsor from having a legal or beneficial interest in a controlling shareholding. It is probably safer that the sponsor has no interest as shareholder. The structure in *Mahonia*[53] – where the shares in the SPV company were owned by a charitable trust[54] – provides an obvious way in which this requirement can be met. The structure in *Esquire Nominees*, or in *Regent*, will suffice: provided it can be demonstrated that the shareholders are wholly independent of the sponsor.
>
> The constitution of the SPV company should vest management control in the board of directors. It should provide for the appointment of

[51] This felicitous phrase is from *Macdonald v Dextra Accessories* 77 TC 134 at p.157.

[52] [2005] EWHC 547 (Ch) at [25] approved on appeal by Chadwick LJ at [2006] EWCA Civ 26 at [27].

[53] *Mahonia v West* [2004] EWHC 1938 (Comm).

[54] Author's footnote: A charity must take care to fulfill its charitable objects, which might be problematic. But Chadwick does not seem to share these concerns.

> directors by the shareholders. There are obvious dangers in giving the sponsor power to nominate directors; and dangers in giving the sponsor power to remove directors. Those dangers are better avoided. The constitution should specify the minimum number of directors. It should contain provisions as to the notice to be given in relation to board meetings; and should specify the quorum for a valid board meeting. A quorum of at least two directors is desirable: there are dangers in having a sole director, or in providing for a quorum of one.
>
> In cases where the residence of the SPV is of importance – as it usually will be if the SPV is to be used for a fiscal purpose – it will be sensible to provide for the territory in which the board is to meet. That will not, of course, be determinative of residence if the board does, in fact, choose to meet elsewhere: as the *Unit Construction* case demonstrates. But it may have the advantage of focussing attention on the need to exercise central management and control in the specified territory...[55]

The comprehensional aspect is what actually matters, because constitutional issues do not determine residence.[56]

> I have described the second of the problems as comprehensional. By that I mean that the directors of the SPV must have a proper understanding of their role; and that that understanding must be shared by the sponsor and its advisers.
>
> The directors must understand that their first and overriding duty is to have regard to the interests of the SPV company; the desire to give effect to the wishes of the sponsor must be subordinate to that duty. In that context it is, I think, no coincidence that, in [*Esquire Nominees*], one of the two directors was a solicitor; that a solicitor was the Jersey based director of Untelrab Ltd; and that both Regent and Mahonia were owned and directed by Jersey law firms. The advantages of having an independent lawyer or other professional in the role of director of the SPV are twofold. Not only can he be expected to appreciate the scope of the fiduciary duties imposed on directors: his own professional standing is likely to provide a powerful incentive to observe those duties. Taking those factors together, the assertion by a professional that he would not accede to a request which he thought contrary to the company's interests is likely to carry weight: as it did in the cases that I have mentioned.
>
> That is not, of course, to suggest that directors from other disciplines or

[55] The omitted passage deals with electronic meetings.

[56] See 8.12 (Parent/subsidiary relationship).

> with other experience or expertise will not inspire equal confidence; as in the case of the bank trustee company in the *Eulalia* case. But it is to suggest that the directors of an orphan SPV should be chosen with care; and with the requirement that they may need to demonstrate a proper understanding of their role in mind...
>
> Finally, I should emphasise that it is necessary that the sponsor and its advisers should have a proper understanding of the function of the SPV directors. The sponsor's wishes should not be couched in terms of instructions or demands; but in terms of proposals and requests. Its advisers should not lose sight of the fact that the SPV directors are not the sponsor's agents or employees: to do as they are told without question. If the course proposed is a sensible course and in the interests of the SPV company, the directors are no less likely to follow it if they are merely requested to do so than they would be if they were instructed to do so: or if they are, then they are the wrong choice for the role. And, if the transaction comes under scrutiny, it will be easier to satisfy the regulator, the revenue or the court that both sponsor and orphan understood the nature of the relationship if the communications between them reflect that understanding. The key to a successful relationship, of course, lies in the need for the sponsor and its advisers to be attuned to what the directors of the orphan SPV can, and cannot, properly be asked to do.

The issue may be compared to the philosophical problem of reconciling free will with determinism/divine foreknowledge. If it is (more or less) certain what the outcome will be, can directors (or anyone else) actually be making decisions? But maybe that is over-conceptualising.

8.10.9 *Residence in avoidance cases*

Underlying Chadwick's advice is an attitude of neutrality to tax avoidance which was changing at the time it was written and now seems dated.[57] Courts unsympathetic to avoidance could either step back from the law as set out above, or decide that appeals fail on the facts; and subsequent to the date of Chadwick's article (2007), this has been happening.[58]

[57] See 2.5.5 (Practitioner/judicial views today).

[58] Examples are:

(1) *Smallwood*. a POEM case, but (more or less) the same principles apply; see 9.19.7 (POEM: Round the World scheme).

(2) *HMRC v Development Securities* [2020] EWCA Civ 1705; see [2021] BTR 51 but this case is not yet final.

SP 1/90 comments on avoidance cases:

> 18 In outlining factors relevant to the application of the case law test, this statement assumes that they exist for genuine commercial reasons. Where, however, as may happen, it appears that a major objective underlying the existence of certain factors is the obtaining of tax benefits from residence or non-residence, the Revenue examine the facts particularly closely in order to see whether there has been an attempt to create the appearance of central management and control in a particular place without the reality.

8.11 Some UK directors

This section considers how the CMC test works where:

(1) The directors manage the company, ie we are not concerned with usurpation/rubber stamping.

(2) Some of the directors work is done in the UK.

De Beers offers an illustration. On one side:[59]

> The head office is formally at Kimberley, and the general meetings have always been held there.
> Also, the profits have been made out of diamonds raised in South Africa, and sold under annual contracts to a Syndicate for delivery in South Africa ...
> Further, some of the Directors and Life Governors live in South Africa, and there are Directors Meetings at Kimberley as well as in London.

On the other side:

> ... the majority of Directors and Life Governors live in England, ...
> the Directors' Meetings in London are the meetings where the real control is always exercised in practically all the important business of the Company, except the mining operations.
> London has always controlled the negotiation of the contracts with the Diamond Syndicates, has determined policy in the disposal of diamonds and other assets, the working and development of mines, the application of profits, and the appointment of directors.
> London has, also, always controlled matters that require to be determined by the majority of all the Directors, which include all questions of expenditure except wages, materials, and such like at the mines...

[59] 5 TC 198 at p.213.

On these facts, CMC was in the UK. I would not say that was obvious. A minority of directors, and governance of the mining (which one might think was important, for a mining company) were in South Africa.

8.11.1 *HMRC examples*

The INTM provides:

> **INTM120150 When HMRC Will Not Usually Review Residence: Examples** [May 2020]
> Examples 1 to 8 illustrate circumstances in which HMRC would not usually seek to establish that a company is UK resident for the purposes of S5/CTA09 (see INTM120010).

The examples are subject to 8 qualifications, which I set out first. These qualifications are wide as to would allow HMRC to refuse to follow the examples on any occasion, but of course the guidance is not binding on HMRC even if, as could happen, the facts were that all that the HMRC qualifications require them to be.

> [1] Enquiries will still be undertaken if they are necessary in order to fulfil the UK's obligations under a double taxation agreement.

It is difficult to see how this could arise in practice, or at least, it will be rare.

> [2] HMRC also reserves the right to enquire into any case in which arrangements appear to have been made to exploit these examples by, for example, creating the form of compliance without the substance.

This overlaps with point [6] below. In practice it could mean little or much. Maybe contemporary tax haven substance requirements likely to meet this requirement.

> [3] The following circumstances are assumed to be present in all the examples below;
> [a] the company is wholly owned by a UK headed group or a UK headed sub-group with a non-UK resident ultimate parent;

INTM120160 [May 2020] returns to this point:

> a company may fall outside one of the examples because it is not wholly owned by a UK headed group or sub-group. Where this is due to the presence of small minority shareholdings wholly unconnected with the wider group arising from, say, local legal requirements regarding

> employee share ownership, it is unlikely to have an impact on the corporate residence issue.

But why are the examples meant to be limited to cases of UK groups or subgroups? Would not a 100% UK parent only make a subsidiary more likely UK resident, not less?

> [b] the company is incorporated outside the UK in a territory where it is considered to be resident for tax purposes by virtue of its incorporation there;
> [c] the country of incorporation and residence has a double taxation agreement with the UK which contains a residence tie-breaker (INTM120070);

What has any of this to do with UK corporate residence is obscure.

> [d] the company is genuinely established in its territory of residence;

Whatever that means, it overlaps with point [1] above.

> [e] the company does not (except in the particular circumstances of examples 6 to 8 [holding co of trading group]) have investment business as its main business, and;
> [f] the central management and control of the business of the company is at least in part exercised at meetings of its board of directors.

The explanation of requirements [3](a) and (e) may perhaps be that the examples were composed to respond to questions from specific multinational trading groups, and the fact that the similar problems arise for corporate residence more generally has been ignored.

Subject to those (considerable) qualifications, the examples where HMRC will in principle accept non-residence then follow. In summary:

Example	**Directors**	**UK board meetings**
1	single UK director, not sole director	none
2,6	minority of UK directors	none
3	exceptionally, majority UK directors	none
4,7	minority UK directors	meet electronically, from UK
5,8	minority UK directors	1 or 2 UK board meetings

In all these cases, HMRC accept the company as non-resident:

> **Example 1** [single UK director, not sole director]
> A company includes as a member of its board of directors a UK resident, all other members being resident in its territory of residence and elsewhere outside the UK. The company's board of directors meets

only outside the UK.

Example 2 [minority of UK directors]

A company has more than one UK based director on its board, but the majority of board members are based outside the UK in its territory of residence or elsewhere. The board meets only outside the UK.

Example 3 [exceptionally, majority of UK directors]

The minority UK based attendance in example 2 becomes a majority on an isolated occasion due to the unforeseen unavailability of one or more of the overseas based directors.

Example 4 [minority UK directors meet by electronic link]

The UK based directors in examples 1 and 2 do not travel to attend board meetings in person but habitually participate by electronic link from the UK.

Example 5 [minority UK directors, small minority UK board meetings]

The board of directors in examples 1 and 2 hold the majority of its meetings in any one accounting period outside the UK but a small minority - no more than one or two - of the meetings are habitually held in the UK.

Similar rules apply to a holding company of a non-resident group, where examples 6-8 mirror examples 2, 4, 5

Example 6 [minority of UK directors]

A company has as its main business the holding of majority shareholdings in operating companies resident in its own territory of residence or region (which does not include the UK). Its board of directors meets both in its territory of incorporation and in the territories of incorporation of its subsidiaries. It includes on its board a minority of one or more UK based directors.

Example 7 [minority UK directors meet by electronic link]

The UK based directors in example 6 habitually participate in meetings by way of electronic link from the UK.

Example 8 [minority UK directors, small minority UK board meetings]

The situation is the same as in examples 6 or 7 except that while the board holds the majority of its meetings in any one accounting period outside the UK, a small minority of the meetings (no more than one or two) are habitually held in the UK.

INTM120160 When HMRC Will Not Usually Review Residence: Other Cases [May 2020]

Cases falling outside the examples

Inevitably very many cases will fall outside the scope of the examples set out at INTM120150. Whilst this means that they will not strictly be covered by this guidance it is crucial to remember that the application

> of the case law test depends on the facts in particular situations. Therefore a consideration of the reasons why a particular company falls outside the examples may assist in assessing the likelihood of HMRC raising enquiries. The examples therefore have a wider role in the risk assessment of company residence issues...

The passage ends remarkably:

> The examples should not be interpreted to suggest that the correct test for residence involves comparing the number of board meetings held in the UK against those held elsewhere. The application of the test in *De Beers Consolidated Mines Ltd v Howe*, 5 TC 213 involves scrutinising the company's course of business and trading. Relevant factors would therefore be what happened at particular board meetings and what happened between them...

That is of course exactly what all the examples (5 & 8 in particular) do suggest.

In summary, the author of INTM120150 wished to give the appearance of guidance without the slightest hostage to fortune, and succeeded in doing so. But I think the examples are worth studying, not so much because it is HMRC who published them, but because they are, subject to the usual caveats, a correct interpretation of the CMC test - as illustrated by the facts of *De Beers* itself.

8.11.2 *Director tax residence n/r*

Of course if director(s) spend more time in the UK, or if there is a larger number or proportion of directors living here, there is correspondingly more opportunity for management and control of the company to take place in the UK. But a director's tax-residence as such does not matter, in the sense that the SRT has no role to play here. HMRC agree:

> **INTM120170 When HMRC Will Not Usually Review Residence: Individual Directors** [May 2020]
> *Location of individual directors*
> The relevance of individual directors' tax residence to the place of central management and control of the companies that they serve is sometimes raised as an issue. In principle it is the place from which an individual exercises central management and control that is the relevant factor for locating the residence of a company rather than the territory in which their personal tax liabilities arise.

That is self-evident, though there is authority if needed.[60]

8.11.3 *UK directors meeting abroad*

The ITH provides:

> **ITH334 Company residence: the reality**
> It has been said that the management and control test is bad because it leads to the nonsense of directors flying to Jersey for board meetings. That device is no longer of use to a UK incorporated company which is resident here anyway. But it is quite easy for a company operating here to incorporate in Jersey and claim to be managed and controlled there with only a minimal tax cost in Jersey provided the shareholders are not resident there. So the criticism is still relevant.
> On the face of it the point is a valid one. But criticism of that kind is concerned as much with questions of fact as of concept and the two things must be kept separate in our minds. There is, in principle at any rate, no reason why a business which is visibly in this country should not be managed and controlled from, let us say, Jersey. But if the directors of that company are working in this country on a regular basis and probably living here as well, it may be highly unlikely that they will be doing anything more in Jersey than reaffirming decisions already taken here. If that is so the mere fact of having board meetings in the Channel Islands is irrelevant. The question is, where do the people concerned exercise management and control. If they really do it in this country and go through a meaningless form of words in Jersey, that will achieve nothing for them but, of course, it leaves the Revenue with the difficult burden of proof.
> It may help to put the problem into a context which is very familiar. A small grocery store is run by a man A and his son A junior. There is a grandfather, once sole proprietor, who no longer takes an active part in the business but owns the property and makes his views known on important matters. A company is formed with A as chairman and managing director, the son as sales director and grandfather as a mere shareholder. Every year A and his son spend holidays in Jersey. It is very unlikely that any body of Commissioners would accept that by holding their only board meetings when they are in Jersey they had made the company resident outside the UK. Both level two and level three management are exercised by A and his son and they are clearly based in the UK.

[60] *John Hood v Magee* 7 TC 327; *North Australian Pastoral Co v FCT* (1946) 71 CLR 623 at p.628.

> But an alternative scenario has grandfather as both major shareholder and chairman with A and his son as full-time working directors. Grandfather takes no part in the day-to-day running of the business but takes a keen interest in its success and his word on important matters carries great weight. Here level three management emerges as something quite distinct from level two which remains with A and his son. Level three may be found either with grandfather alone or with grandfather and his sons acting as a board depending on the extent of grandfather's real power. If grandfather moves to Jersey, level three management may genuinely move with him, either because he alone exercises central management and control from Jersey or because the board meetings, at which he plays an important part, are held there...

The INTM discusses the same question, but does not give any hostage to fortune:

> **INTM120150 When HMRC will not usually review residence** [May 2020]
> **Example 9**
> The majority of directors habitually perform a significant part of their duties in the UK, merely leaving the UK to attend board meetings. HMRC may wish to examine all relevant factors in such a case to determine whether or not the company should be regarded as resident in the UK.

It is instructive to contrast the two passages. The author(s) of the ITH would not have written anything deliberately vague and unhelpful. But the ITH was written before the Manuals were published.

8.12 Parent/subsidiary relationship

This section discusses subsidiary companies, but there should be little difference in principle between a group (parent/subsidiary) relationship and any other shareholder/company relationship, eg if the shareholder is a trust or an individual.

In *Wood v Holden*:

> in any consideration of the principles governing the common law of corporate residence the normal realities of the parent and subsidiary relationship have to be taken into account... In the context of a group of companies where matters proceed in a normal way and not in an exceptional way it is to be expected that the parent company will have plans for what it wants its subsidiaries to do, and that the directors of the subsidiaries will ordinarily be willing to go along with the parent

> company's wishes. If in those circumstances the subsidiaries were resident for tax purposes wherever the parent company is resident the consequences would, in my view, be unsatisfactory, productive of double taxation clashes between different jurisdictions, and disruptive of national tax systems.
>
> There is a difference between, on the one hand, exercising management and control and, on the other hand, being able to influence those who exercise management and control. There is another difference, highlighted by *Unit Construction v Bullock*, between, on the one hand, usurping the power of a local board to take decisions concerning the company and, on the other hand, ensuring that the local board knows what the parent company desires the decisions to be. It is also necessary to keep in mind that, while the cases which I have referred to so far all involved the residence of companies with active continuing businesses, it is possible (and is common in modern international finance and commerce) for a company to be established which may have limited functions to perform, sometimes being functions which do not require the company to remain in existence for long.[61]

SP 1/90 provides:

> 16 It is particularly difficult to apply the "central management and control" test in the situation where a subsidiary company and its parent operate in different territories. In this situation, the parent will normally influence, to a greater or lesser extent, the actions of the subsidiary. Where that influence is exerted by the parent exercising the powers which a sole or majority shareholder has in general meetings of the subsidiary, for example to appoint and dismiss members of the board of the subsidiary and to initiate or approve alterations to its financial structure, the Revenue would not seek to argue that central management and control of the subsidiary is located where the parent company is resident.

That is right, because CMC means control at board level, not at general meeting level.

> However, in cases where the parent usurps the functions of the board of the subsidiary (such as *Unit Construction* itself) or where that board merely rubber stamps the parent company's decisions without giving them any independent consideration of its own, the Revenue draw the conclusion that the subsidiary has the same residence for tax purposes

[61] From the decision at the HC stage: [2005] EWHC 547 (Ch) at [24].

> as its parent.
> 17 The Revenue recognise that there may be many cases where a company is a member of a group having its ultimate holding company in another country which will not fall readily into either of the categories referred to above. In considering whether the board of such a subsidiary company exercises central management and control of the subsidiary's business, they have regard to the degree of autonomy which those directors have in conducting the company's business. Matters (among others) that may be taken into account are the extent to which the directors of the subsidiary take decisions on their own authority as to investment, production, marketing and procurement without reference to the parent.

The INT Manual provides:

> **INTM120180 How To Review Residence** [May 2020]
> ... Some element of supervision by the parent will be expected. For example, there is often a system of regular reporting from subsidiaries to parents. Reporting by itself, or the issue of general group directives on such matters as finance control, do not necessarily indicate that the residence of the subsidiary lies with the parent. Intervention beyond this may lead to that result.
> ... It remains possible for central management and control to lie with a subsidiary's directors even where it seems improbable that they would act other than in accordance with the directors of the parent.

The INTM has an extract from the ITH:

> **ITH335 Company residence: parent subsidiary relationship**
> The next difficulty in identifying real management and control is concerned essentially with the parent subsidiary relationship. A parent company is merely a shareholder and may have no constitutional right to run the business of the subsidiary; but such parent companies do increasingly exercise influence in the management of their subsidiary companies. The Royal Commission of 1920 observed this and the problem has got a great deal worse since then. The question always is whether the influence exercised by the parent amounts to the management and control of the business of the subsidiary. Unit Construction wanted its African subsidiaries to be resident here - there were losses that could be relieved. For many years the Revenue had taken the view that that was an exceptional case, and it relied on some words of Lord Cohen in his judgment where he said

> ‘the facts of the case before your Lordships are most unusual. It is surely exceptional for a parent company to usurp the control; it usually operates through the boards of the subsidiary companies, and had the Commissioners found in the present case that that was what had in substance happened, it may well be that your Lordships could not have disturbed that finding’. [38 TC 744]

The Department adopted its line for good reason. First, there was some support for it in Lord Cohen’s words. We did not want to argue that large numbers of overseas subsidiaries of UK parent companies were resident here. When such subsidiary companies make profits one often finds that after Double Taxation Relief there is very little UK tax left. Further, we did not want to argue that large numbers of UK incorporated companies, being the subsidiaries of foreign parents, were not resident here: they were quite prepared to be treated as resident and their tax planning was on that basis.

But it became clear that *Unit Construction* was not so exceptional after all. It may be exceptional for the directors of a company to stand aside completely. It is, however, not unusual for directors to act in accordance with the wishes of the parent. We took advice about the matter and the advice was that the test should properly be whether the local directors apply their minds to ‘suggestions’ from the parent and form an independent judgment before implementing their parent’s wishes or whether, on the other hand, they merely ‘rubber stamp’ and carry out without serious question the higher policy wishes of the parent company.

8.12.1 *Parent co guidelines*

SA POEM guidance provides:

> Shareholders sometimes limit the authority of, or provide guidelines for, the board and senior managers of a company. For example, a parent company may set limitations of authority or guidelines for a subsidiary company. These limitations of authority or guidelines must, in conjunction with all the other facts and circumstances, be reviewed in detail to determine whether the effect is that the shareholder is actually making the key decisions or whether the company, although receiving guidance or some input, is still making them. It is quite common for a parent entity of a multinational group to set guidelines and policies for the group as a whole in order to direct, coordinate and monitor activities of the group as a whole. This does not necessarily mean, and often does not mean, that the subsidiary company is not making its own decisions, but all the facts must be considered when making this assessment.

> **Example 2 – Limitation of authority**
>
> *Facts:*
>
> Company A concludes long-term contracts with clients which extend over a number of years. A single contract can have a significant effect on the financial viability of Company A and as a result Company A's senior management team sign off on all contracts. The conclusion of sales contracts represents a predominant key commercial decision for Company A.
>
> Under a limitation of authority, the company's senior management team is restricted to concluding contracts not exceeding a contract value of R10 million. For contracts exceeding this value, the company must submit its recommendation to the parent company and the parent company makes the decision whether or not the contract may be accepted. The company must implement the parent company's decision. 90% of contracts have a value that exceeds R10 million.
>
> *Result:*
>
> Although more detail would be required and all the facts affecting all the key management and commercial decisions of the company as a whole would have to be taken into account, the facts suggest that the effective management of the company may have been usurped by the parent company. The limitation of authority in this case has effectively removed the company's real authority to make decisions and has gone beyond a mere monitoring mechanism or information-reporting requirement.

Limitations of authority and guidelines are common in multi-national groups of companies. The details are critical in assessing who is, in substance, making the company's key management and commercial decisions.

8.12.2 *Support functions*

SA POEM guidance provides:

> **4.2.9 Support functions**
>
> It is not uncommon for a multinational company to centralise certain support functions such as data management, human resources, customer support or accounting, and to locate those services in countries that offer advantages such as superior infrastructure, lower costs or a highly skilled workforce. A group of companies may house these services in the group's ultimate holding company or in a separate subsidiary which provides the services to all the members of the group.
>
> In these situations, the locations where those services are primarily

> performed and where the senior managers responsible for them are based may be different to the location of the company's head office where the top senior management and the senior management's direct support staff are located. Although such support services may be essential to a company with support service related policies and procedures having a company-wide effect, the managers in charge of those services are often not involved, or only secondarily involved, in making key management and commercial decisions that affect the conduct of the company's business as a whole (outside of the area of the specific support functions that they are responsible for). Consequently, the location where such support services may be located is generally of limited relevance to the determination of a company's place of effective management.
>
> The location where a company's accounting records are retained will generally not be indicative of the place where the key management and commercial decisions are made and in these circumstances would therefore be irrelevant in determining a company's place of effective management.

8.13 Period of enquiry

The position must be considered for each tax year under appeal.

In *HMRC v Development Securities*:[62]

> Events before or after the particular date in question may be relevant as casting light on the position on that date

In *Laerstate BV v HMRC*:[63]

> the residence of a company will not fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case.

Similarly *Untelrab v McGregor*:[64]

> when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents.

See too 9.16 (Period of enquiry: tie breaker).

[62] [2020] EWCA Civ 1705 at [14].

8.14 Covid & company residence

INTM120185 HMRC Approach to Company Residence in response to COVID-19 Pandemic [May 2020]

Background

The COVID-19 pandemic has resulted in significant disruption to international travel and business operations, including the locations of directors, employees and other individuals.

HMRC is very sympathetic to the disruption that is being endured.

We have been asked about HMRC's response to the corporate residence challenges posed by COVID-19. The presence of individuals in the UK as a consequence of COVID-19 raises questions about whether the foreign companies, of which those individuals may be directors or employees, could become UK tax resident.

Overview

HMRC considers that the existing legislation and guidance in relation to company residence already provides flexibility to deal with changes in business activities necessitated by the response to the COVID-19 pandemic.

We do not consider that a company will necessarily become resident in the UK because a few board meetings are held here, or because some decisions are taken in the UK over a short period of time. HMRC guidance makes it clear that we will take a holistic view of the facts and circumstances of each case...

Company Residence.

Where the central management and control of a company actually abides is a question of fact. HMRC take the view that whilst the site of board meetings may be important in determining where CMC abides, it is not determinative (see INTM120130 and INTM120180). Each case turns on its own facts and circumstances which makes it difficult for HMRC to provide definitive guidance as to where CMC may abide in cases where businesses are forced to make changes in response to the COVID-19 pandemic.

However, our published guidance as to when we would not usually challenge a company's view on its residence will be relevant in the current circumstances. See in particular INTM120140 and INTM120150.[65] Whilst the examples given in the latter are based on a number of assumptions being made, this guidance sets out HMRC's view that occasional UK board meetings, or participation in such

[65] See 8.11 (Some UK directors).

> meetings from the UK, does not necessarily result in CMC abiding in the UK.
> Similarly, INTM120160 provides guidance in respect of cases which fall outside the examples in INTM120150. This guidance makes it clear that HMRC's view will depend on the facts in particular situations...

See too 9.31 (Covid and treaty-residence).

8.15 CMC: Summary

After a lengthy discussion, a summary may be helpful. In *Mark Higgins Rallying v HMRC*:[66]

> 52. We have found helpful the summary put forward by the Special Commissioners in *Untelrab*[67] (at [74]):
>
> > "From these authorities we have identified the following principles: that the residence of a company is where the directors meet and transact their business and exercise the powers conferred upon them; that if the directors meet in two places then the company's residence is where its real business is carried on and the real business is carried on where the central management and control actually abides; that a determination as to whether a case falls within that rule is a pure question of fact to be determined by a scrutiny of the course of business and trading; that the actual place of management, and not the place where a company ought to be managed, fixes the place of residence of a company; … and that when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents."
>
> 53. Also, the views of the Tribunal in *Laerstate*[68]:
>
> > "There is no assumption that [central management and control] must be found where the directors meet. It is entirely a question of fact where it is found. Where a company is managed by its directors in board meetings it will normally be where the board meetings are held. But if the management is carried out outside board meetings one needs to ask who was managing the company by making high level decisions and where, even where this is contrary to the company's constitution.
> >
> > It is significant, we think, that Lord Loreburn (in *De Beers*) referred

[66] [2011] UKFTT 340 (TC).

[67] *Untelrab v McGregor* [1996] STC (SCD) 1.

[68] *Laerstate BV v HMRC* [2009] UKFTT 209 (TC) at [27]-[29].

> > to the test as being where central management and control 'abides'.[69] This is a test that does not confine itself to a consideration of particular actions of the company, such as the signing of documents or the making of certain board resolutions outside the UK if, in a given case, a more general overview of the course of business and trading demonstrates that as a matter of fact central management and control abides in the UK. As Lord Loreburn said (at 212-213), the factual question must be considered 'upon a scrutiny of the course of business and trading'.
> >
> > This is consistent with the analogy with individual residence which was the basis on which Lord Loreburn propounded the central management and control test. Just as for an individual, for example, where a temporary departure from the UK would not of itself give rise to a change of residence, the residence of a company will not fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case."...
>
> 62. We find that the place where certain contracts – even important ones such as the manufacturers' works team agreements – were signed is not in itself a determining factor. It is evidence towards where decisions were being made but it is the location of the decision-making, rather than where the contracts were signed, which is important.

8.16 Dual residence/no CMC

In *Swedish Central Railway v Thompson* at first instance:[70]

> just as an individual can have two residences, so can a corporation. ... it is easier for a corporation to have two residences than for a natural person because, after all, a natural person, existing as he does in space, as a physical body, can only be in one place at once, and if he has got a residence where he is not in fact, it is because it is all ready for him and he is prepared to go there and intends to go there, and merely is away temporarily, but he is away. It seems to me that as regards a company, which only exists in law and in the mind and does not occupy space at all, the residence which can be imputed to it can co-exist, the presence which can be imputed to a company can be in more places than one at the same time. Therefore I do not think there is any difficulty in the fact that it may be necessary to impute two residences to a company; ... a company residence depends only on the fact of control. It may have two

[69] See 8.6 (Central management/control test).

[70] 9 TC 342 at p.352.

> residences if its control shifts every alternate six months or something of that sort from one capital to another. It may have both those residences, just as a natural person who lives a part of the year in one place and part of the year in another has both as his residences; but... the only test of residence, one or more, is direction and control of the business.[71]

This was for a time controversial, but it was confirmed in *Unit Construction v Bullock*:[72]

> it must now be regarded as clear law that an artificial person may, like a natural person, have more than one residence...
> [In the *Union Corporation* case 34 TC 207] The facts were not such as to allow of Lord Loreburn's test being applied, and therefore some other basis of decision had to be selected. The solution chosen by the Court of Appeal appears to have been that residence arose in any country in which "to a substantial degree" acts of controlling power and authority were exercised; ... It may perhaps still be open to question whether, where the facts are such that Lord Loreburn's test cannot be applied as a whole, the correct way of determining residence is, so to speak, to fragmentate his principle and establish a residence for tax purposes wherever the exercise of some portion of controlling power and authority can be identified. The point does not arise for our decision in this case and I express no view at all upon it. I only note the decision in the *Union Corporation* case as an instance of dual or multiple residence for tax purposes which has its origin in the fact that circumstances do not always make it feasible to apply the Loreburn [CMC] formula.

The International Manual provides:

> **INTM120060: central management and control** [Jun 2016]
> **... Divided or multiple residence**
> The *De Beers* test points to a single country of residence. But the courts have recognised that, exceptionally, a company may have a dual or multiple residence. ... There are some companies for which it is not possible to identify any one country as the seat of central management and control. Management and control may be divided or may change from place to place even. The *De Beers* test as such cannot be applied. No general rule for establishing the residence of these companies has

[71] Part of this is quoting the submissions of HMRC; but the judge is clearly approving them. Dual residence was upheld in the subsequent appeal.

[72] 38 TC 712 at p.735.

> been established. But if, in the context of the company's business, what is done in the UK amounts to part of the management and control, the company is arguably resident here. The decision in the *Swedish Railway Company v Thompson*, 9 TC 342, should be interpreted in this way. The company was not engaged in active trading and its administrative control was divided between this country and Sweden. The Courts decided that the company, while it might be resident abroad, was nevertheless also resident here for tax purposes...

The INTM has an extract from the ITH:

> **ITH338 Companies: dual residence: domestic law**
> Divided central management and control was considered by the Court of Appeal in the *Union Corporation* [34 TC 207] group of cases, although the House of Lords decided the cases on another issue and did not consider the question. Drawing on the judgment in an Australian case, Sir Raymond Evershed's view was that the final and supreme authority cannot be divided between two places. But that is not required for dual residence. The situation can arise where some part of the superior or directing authority may be found in two countries at the same time. The company is resident wherever 'to some substantial degree' acts of controlling power and authority are exercised.
> That conclusion is not entirely easy to reconcile with the idea that central management and control is to be found at the pinnacle. It is easier to understand that the pinnacle may move from place to place, for example where there are ambulatory board meetings. But if one thinks of the pinnacle as the top cone rather than the very top point then that cone can be divided even if one part carries with it the top point.
> Lord Radcliffe in *Unit Construction* makes a valuable contribution towards reconciling the cases on dual residence although dual residence was not an issue in the case. From him we learn that there is one class of case where the *De Beers* test cannot be applied - that is where it is not possible to find central management and control in one country alone. What test is then applicable remains, to some extent, an open question. Where there is a genuine division of the top-most layer of central management and control between identifiable places, we can follow the criteria adopted by the Court of Appeal in *Union Corporation* and cited by Lord Radcliffe - establishing in which of those places acts of controlling power and authority are exercised to some substantial degree. However, where there is not that kind of division but rather the company is peripatetic in the sense that relevant acts of control and management are exercised at different times at perhaps a variety of different locations, it is considered that the Courts have not yet fully

addressed the question.

Examples are (assume the company's directors between them exercise top-level control):

(1) Directors meet only by electronic means, and one cannot identify a territory where board meetings take place.
(2) Directors meetings are in a series of different countries each year.

In these cases one must look for other factors than directors meetings, or else fall back on dual residence. This may not arise much in practice, as a company conscious of residence issues will not do this.

SA POEM guidance provides an example of case (2):

> **Example 3 – Place of effective management** (Bigco)
> *Facts:*
> B is a multinational company, incorporated under the laws of the UK, with substantial operations in South Africa, the UK and the United States. Its shares have a primary listing on the JSE, a secondary listing on the London Stock Exchange and are also traded on the New York Stock Exchange through American Depository Receipts.
> The company's head office is located in South Africa and its Managing Director, Financial Director and Chief Operating Officer are based in South Africa. The divisional managers who are responsible for the company's operations in the UK and the United States are based in those countries, as are several non-executive directors.
> B's board makes the key management and commercial decisions for the conduct of the company's business as a whole. It generally holds three meetings each year, one in each of the countries where B operates. B's Managing Director, Financial Director and Chief Operating Officer typically attend all of the company's board meetings and use the trips to meet with the company's operational managers in the UK and the United States as well as to meet with investors or investment analysts in those countries.
> All of the 'board packs' are prepared by personnel at B's head office, which may include information sent to the head office by the divisional managers. Head office personnel, including the Managing Director, Financial Director and Chief Operating Officer, and their direct staff, are also responsible for developing and formulating proposed strategic plans for consideration and action by the board. The board actively reviews these plans before taking a decision and, from time to time, either rejects or requires modifications to those proposals.
> *Result:*
> Under the circumstances, B's place of effective management is South

> Africa. Amongst other things, one of the three board meetings where decisions are made is held in South Africa with a majority of board meetings not being held at the other locations. In addition, its head office and highest level of senior management are both located in South Africa.
> The fact that B is incorporated in the UK is irrelevant. Any circumstantial evidence related to the company's economic nexus with any of the countries in question would also be of limited or no probative value in this instance.

8.17 HMRC practice/clearance

> **INTM120160 When HMRC Will Not Usually Review Residence: Other Cases** [May 2020]
> ... HMRC is willing to discuss residence issues with businesses. Given the factual basis of the case law test such discussions are generally likely to be more profitable the more information there is available about a particular situation. However in some cases, such as those involving dual resident companies or non-standard tie-breakers (see INTM120070), operational certainty may not be achievable without a joint approach by the company to both tax authorities under the relevant double taxation agreement.

8.18 CMC/trade income source compared

Company residence depends on CMC. Source of trading income depends on whether the trade is carried on wholly abroad.[73] Since 1965 the question whether a UK resident company has foreign source trading income has been significant mainly for loss relief (corporate loss relief is not discussed here). The INTM has an extract from the ITH which discusses the issue:

> **ITH343 Company residence: Case V trade: UK central management control**
> ... If a company is resident in the UK because the central management and control of its business is here, can it have a Case V trade? Usually the answer will be 'no'. But there is one case which suggests that it can. It is the *Egyptian Hotels* [*Egyptian Hotels Ltd v Mitchell* 6 TC 152 and 542] case. That company succeeded as narrowly as possible in establishing a Case V trading source while at the same time remaining resident in the UK (The House of Lords being evenly divided, victory

[73] See 21.4 (IT territorial limit: Trading).

> went to the company). It is important to remember that residence was not an issue in the case and that Egyptian Hotels Ltd was incorporated in the UK. Although *Egyptian Hotels* was heard some six years after *De Beers* which is the great authority for the management and control test, there was ... still some idea that if a company was incorporated here it was resident here. There is no reason why a company which is resident by reason only of incorporation here should not have a Case V trade. The short answer to the apparent contradiction in the *Egyptian Hotels* case is that under the central management and control test (and ignoring the 1988 incorporation rule) we would probably today regard the company as non-resident.
>
> **ITH344 Company/foreign partnership: Case V: UK central management control**
>
> However, business has a wider meaning than trade. There is one situation where a company managed and controlled in the UK may reasonably have a Case V trade. That is where the company is a partner in a partnership but the business of the partnership is managed and controlled abroad.

8.19 DTA residence rule

Section 18 CTA 2009 provides:

> (1) This section applies to a company which is treated as–
> (a) resident in a territory outside the UK, and
> (b) non-UK resident,
> for the purposes of any double taxation arrangements.
> (2) For the purposes of the Corporation Tax Acts the company is–
> (a) resident outside the UK, and
> (b) non-UK resident.
> (3) Subsection (2) applies even if the company would otherwise be UK resident for the purposes of the Corporation Tax Acts by virtue of section 14, 15, 16 or 17 or another rule of law.

I refer to this as the **"DTA residence rule"**. This rule also applies for income tax and CGT.[74]

The usual case will be a company which is incorporated in the UK but treaty-resident in a foreign state under the tie-breaker: the treaty overrides the incorporation rule.

The INTM has an extract from the ITH:

[74] See 8.1 (Company residence: Introduction).

> **ITH365 incorporation rule/treaty non-residents**
> The incorporation rule was introduced primarily as a protection against exploitation of the case law rule and the misuse of UK incorporation. But it is hardly surprising that such a major change in the law had some less desirable repercussions. These appear in what we call Treaty Non-Resident companies - TNRs. These are companies which
> [1] are resident both in the UK under its domestic law and in another country under that country's law and
> [2] the tie-breaker in the Double Taxation Agreement between the two countries awards residence for Agreement purposes to the other country... The most common tie- breaker awards residence to the country in which the company's place of effective management is to be found. Even when the case law rule was the only residence rule of the UK it was possible for a company to be a TNR. It could be centrally managed and controlled here and effectively managed elsewhere.[75] But the incorporation rule increased the scope for TNRs because a company can be incorporated in the UK and yet conduct its business wholly overseas.
>
> **ITH366 Company residence: the problem**
> The problem of the TNR is that for treaty purposes it is non-resident and we cannot tax its income or gains unless the treaty allows us to. If a company incorporated here has all its management and operations abroad there will be little, if anything, that the UK can tax under the treaty. But before 1988 UK domestic law assumed that if a company was resident here it was liable to tax on its world-wide income and gains. So some provisions will not work as intended if the company is resident but not liable.

The Manual gives examples relating to group relief, CFCs and ToA:

> [1] For example, the capital gains provisions allow transfers of assets between resident members of a group on a no gain no loss basis on the assumption that the gain will be taxed when the asset is sold outside the group. But without specific provision to the contrary, an asset could be transferred to a TNR on that basis but the treaty could prevent our taxing the gain when the TNR sells the asset. Examples of other anomalies requiring special treatment for TNRs are to be found in other group situations where a TNR can be treated as a group member for the purpose of intra-group payments of dividends and interest.

[75] Author's footnote: This will be rare in practice; see 9.19.4 (POEM/CMC compared).

> [2] And, without specific provision to the contrary, a TNR could not be a controlled foreign company
> [3] nor count as a non-resident in the income tax anti-avoidance provisions against transfers of assets [abroad].
>
> **ITH367 Company residence: legislation against treaty**
> Starting with 1988 there had been legislation which was either aimed specifically at preventing possible avoidance through TNRs or which, in introducing new provisions for companies in general, took account of TNRs. These provisions are briefly considered in Chapter 4. But by 1993 it was realised that there were many other opportunities for tax planners to exploit the mismatches attributable to a company being resident under domestic law while not resident for treaty purposes. So rather than continue to tackle the problem piecemeal it was decided to go for a general solution and deem such a company to be not resident in the UK for all purposes...

8.19.1 *Claims*

Section 18 CTA 2009 provides:

> (4) To decide whether a company is treated as mentioned in subsection (1)(a) and (b) for the purposes of any double taxation arrangements, assume that–
> (a) the company has made a claim for relief under the arrangements, and
> (b) in consequence of the claim it falls to be decided whether the company is to be treated as mentioned in subsection (1)(a) and (b) for the purposes of the arrangements.
>
> **ITH368 Company residence: general solution**
> ... A company does not have to make a claim under a treaty before the new rule applies. This is to stop companies moving in and out of UK residence depending on whether a claim is made for a particular year.

8.19.2 *Treaties*

The position depends on the treaty, which may take various forms.

> **ITH368 Company residence: general solution**
> ... [1] The residence tie-breaker in most treaties applies an objective test - often the location of 'effective management' (ITH348). If under that objective test, residence has been or would be awarded to our treaty partner then Section [18] applies.
> [2] In a few treaties - for example, in the agreement with Canada, where the tie-breaker can only operate upon agreement between the two

> authorities, the new rule cannot run until that agreement has been reached. The new rule has no application where treaty residence would be awarded to the UK (because then there is no mismatch between the treatment under domestic law and under the treaty) or where the treaty does not contain a tie-breaker ...

The position is now reversed, in that mutual agreement, type [2] above, is now the usual form.[76]

> **ITH453 Company residence: other consequences of [s.18]**
> Although in cases where [s.18] applies it should be easier to challenge the more blatant cases involving manipulation of our residence rules, the main purpose of [s.18] is to align a company's treatment under domestic law with its treatment under a Double Taxation Agreement...
> **ITH453 Company residence: other consequences of [s.18]**
> Where a treaty does not contain a tie-breaker, the company remains UK resident under the treaty and it is logical that its UK residence under domestic law is also unaffected.
> Furthermore, it is not intended that the new rule should be applied in marginal cases where there is no mischief unless the company itself invokes the Double Taxation Agreement. For instance, the location of effective management of the holding company for the UK subgroup of an overseas group may be unclear in a case where a company is mainly managed here but some management decisions are taken abroad. We would not regard as objectionable the fact that the company exists to allow losses to flow as group relief between members of the UK subgroup and the benefit of any doubt on the location of effective management may be given to the company.

8.20 Residence outside UK

Tax legislation usually refers to a company as being "resident in the UK" or "not resident in the UK" and those are well understood expressions.

"Resident outside the UK" is unusual, but not unknown. Examples are:

Term: Definition (in short)	**See**
Person abroad: a person who is resident outside the UK	48.5
Foreign employer: body of persons resident outside UK & not resident in UK	34.15
Offshore fund: mutual fund constituted by body corporate resident out of UK	App. 66.15
IHT deduction for liability to person resident outside the UK	80.5.3

"Resident outside the UK" is not the same as "not resident in the UK" because a person may be dual resident (resident in and out of the UK).

[76] See 9.18 (Tie-breaker: Mutual agreement).

> **ITH358 Company residence: incorporation rule: effect of the rule**
> The incorporation rule takes precedence over the case law rule for UK incorporated companies. But it does not displace the case law rule which remains the rule of residence. Nor was there any attempt to enshrine the case law rule in statute so there is still no comprehensive statutory definition of residence. The case law rule is the only rule for companies incorporated outside the UK. If residence outside the UK is mentioned without any qualification, for example in ICTA88/S293 (2) 'resident in the UK and not resident elsewhere',[77] then, even for a UK incorporated company, 'resident elsewhere' means centrally managed and controlled elsewhere. Nor does the incorporation rule displace the tie-breaker in a double taxation agreement which may award residence to the other country for the purpose of the agreement.

8.21 Change of company residence

Under the SRT, an individual is resident (or not) for a tax year and not during part of a year.[78] This rule does not apply to a company, which may change residence at any time. But an accounting period ends (and a new one starts) when a company becomes, or ceases to be, UK resident.[79]

I do not discuss the CT exit charge in this work.

8.22 OEIC residence

ITTOIA EN Vol II discusses OEIC residence:

> 50. The definition of an open-ended investment company ... carries a limitation that the company should be incorporated in the UK[80] ... All open-ended investment companies within the definition ... are therefore subject to the company residence rule [the incorporation rule]... The company DTA residence rule] could in theory also apply to make such companies non-resident (as explained in connection with industrial and provident societies).[81]

8.23 Societas Europea/SCE

Post-Brexit, this ceases to be an issue but I deal with it for completeness.

[77] Author's footnote: This provision relates to the business expansion scheme, long repealed.

[78] See 10.1 (Residence throughout tax year).

[79] Section 10 CTA 2009.

[80] See App.66.1.2 (Open-ended investment co).

[81] See 26.17 (Co-operative & community benefit society income).

Prior to 31/12/2020 a SE and a SCE were able to transfer their registered office to and from the UK.

Section 16/17 CTA 2009 are conveniently read side by side:

s.16 CTA 09 Societas Europaea	**s.17 CTA Societas cooperativa Europaea**
(1) This section applies to an SE which transfers its registered office to the UK in accordance with Article 8 of Council Regulation (EC) No 2157/ 2001 on the Statute for a European company (Societas Europaea).	(1) This section applies to an SCE which transfers its registered office to the UK in accordance with Article 7 of Council Regulation (EC) No 1435/ 2003 on the Statute for a European Cooperative Society (SCE).
(2) The SE is UK resident for the purposes of the Corporation Tax Acts from the time of its registration in the UK.	(2) The SCE is UK resident for the purposes of the Corporation Tax Acts from the time of its registration in the UK.
(3) Accordingly, even if a different place of residence is given by a rule of law, the SE is not resident in that place for the purposes of the Corporation Tax Acts.	(3) Accordingly, even if a different place of residence is given by a rule of law, the SCE is not resident in that place for the purposes of the Corporation Tax Acts.
(4) The SE does not cease to be UK resident merely because it later transfers its registered office from the UK.	(4) The SCE does not cease to be UK resident merely because it later transfers its registered office from the UK.

In short: SEs/SCEs are treated as UK resident if they are:

(1) incorporated in the UK or

(2) incorporated in another Member State, and transfer their registered office to the UK.

In both cases, the SE/SCE could not cease to be UK resident merely by transferring its registered office out of the UK. But they could cease to be UK resident under the DTA residence rule.

8.24 Company residence: Critique

The INTM has an extract from the ITH:

> **ITH347 Company residence: proposed new management test**
> The central management and control test can be of advantage to the Revenue in the battle against tax haven subsidiaries. We look at this in the next chapter. But in the climate following the abolition of exchange control in 1979 the disadvantages of the case law test were considered

to outweigh any advantages. Wholesale migration of UK resident companies was not a danger whilst the requirement for Treasury consent was still in place.[82] But there were other possibilities of exploitation and no guarantee that the requirement for Treasury consent would continue forever.

So in 1981 proposals were made for a statutory definition of company residence which were designed to solve the problems inherent in the test of central management and control. The aim was for a definition which would have allowed us to look at the place where, in every day language, the Head Office was to be found rather than a remote place where ultimate policy decisions might be taken. The very pinnacle of control would have been ignored. In the case of the UK subsidiary of a United States parent company, for example, the purpose was to look at the activity of the UK board even though it might act under the de facto control of the United States parent. What was really being attempted was to cut level three - where it was distinguishable - out of the reckoning.

ITH349 Company residence: proposed new management test: abandoned

That kind of approach to a new test would have linked residence to a less mobile level though it was never supposed that it would have solved all the problems. It may have solved some of the loss-making problems like *Unit Construction* itself, but it certainly would not have solved all of them. The essential object of the proposed statutory definition was to make the law consistent with what in fact we had been doing for a long time. In the event it proved peculiarly difficult to devise a test which would cut out top level management - level three - but not end up at too low a level. In draft legislation it was suggested that 'immediate day-to-day management of the business as a whole' might identify the level of management to which residence should be attached. What was intended was the type of day-to-day management exercised by a managing director but the expression 'day-to-day' was criticised as possibly implying too low a level of management. The difficulty of providing a sufficiently precise definition, which would not require a long period of litigation before the Courts could determine its meaning, was one of the reasons which caused the attempt at a statutory definition to be abandoned - at least for the time being. However, in 1985 an echo of the draft legislation found its way into what became ICTA88/S812(7) - part of the suspended anti-unitary tax legislation held as a sword of

[82] See 8.2.2 (Treasury consent to migration).

> Damocles over companies connected with the unitary states in the United States (see chapter 5 ITH539).

Arnold discusses similar proposals:[83]

> Couzin finds both the place-of-incorporation and the central management and control tests vulnerable to manipulation by taxpayers. He suggests that consideration should be given to tests based on the location of executive (day-to-day) management of the corporation or the main business operations of the corporation. My initial reaction is to wonder why, even if these tests are better than the existing tests,[84] it is necessary to have a single test. Our current test is a combination of central management and control and place of incorporation. In principle, I have no difficulty adding other tests so that a corporation might be taxable on its worldwide income if
>
> - it is incorporated in Canada,
> - its central management and control are in Canada,
> - the executive (day-to-day) control is exercised in Canada,
> - the majority of the corporation's shareholders are resident in Canada,
> - a substantial or controlling shareholder is resident in Canada, or
> - the corporation has substantial business operations in Canada.
>
> In practice, however, I suspect that such supplementary tests would have little positive impact on the Canadian tax net... in most of these situations, the corporation will also be resident in another country, and the tiebreaker rule in the treaty will often work in favour of the other country. In many cases, therefore, the treaty... will effectively negate the addition of supplemental residence rules. If the tie-breaker rules do not resolve the dual-residence conflicts, unrelieved double taxation becomes a serious concern.

[83] Arnold, "A Tax Policy Perspective on Corporate Residence" [2003] Canadian Tax Journal 1559 at p.1562. *https://www.fcf-ctf.ca/ctfweb/Documents/PDF/2003ctj/2003ctj4_arnold.pdf*

[84] Footnote original: Superficially, it is not readily apparent why these tests are preferable to the existing tests. Executive management is probably as susceptible to manipulation as is central management and control. The executive management test provides less certainty than the place-of-incorporation test. The principal-place-of-business test is not susceptible to manipulation, and it has the virtue of establishing the residence of a corporation exclusively in one country. However, a principal-place-of-business test relies heavily on the facts in a particular case and is therefore uncertain in application. In my view, the type of test of corporate residence adopted by Canada is not as important as international consensus on a particular test.

8.25 Company resident nowhere

The INTM has an extract from the ITH:

> **ITH445 Company residence: nowhere companies before incorporation rule**
> Before looking at the consequences of the incorporation rule of residence, it is convenient to consider briefly the phenomenon of the UK registered non-resident 'nowhere' company before 1988. It was a product not so much of the central management and control test as of the absence of an incorporation rule.
> A 'nowhere' company is not subject to tax on worldwide income anywhere and is unlikely to suffer tax at all. In the 1970s, foreign operators began to realise that the UK provided an ideal opportunity for such companies. Traditional tax-haven countries such as the Channel Islands and Isle of Man have provided tax shelters for companies incorporated but not having real activity there on payment of a fee. In the UK there was no fee - only the cost of setting up and keeping the company on the register. All the operators had to do was to make sure that there was nothing like management and control or trading activity or income here. There was the added advantage of the respectability of UK incorporation. Before other countries got wise to the ploy they might even have assumed the company to be taxable here. Until 1979, exchange control was something of a hindrance ...
> Our own attempts at getting information met with little success. Not only would this information identify the exceptional case of UK resident ownership, it could be passed on to the countries of the beneficial owners where this exchange of information is authorised by a Double Taxation Agreement. But some companies operating in low tax areas such as the Middle East used the UK for the benefit of recourse to its law and had no reason to hide anything. Representations on behalf of these companies were partly responsible for stifling the proposal for an incorporation rule in 1981. By 1988 the number of dubious companies had increased enormously, the Revenue authorities of some countries were complaining at our acquiescence and it was suspected that a number of companies were being used for criminal activities.
> **ITH446 Company residence: successors to the nowhere company**
> ... 'Son of nowhere' companies have appeared in two main guises. In one there is a UK incorporated and, therefore, resident company. But the company is alleged to carry on all its activities as trustee or nominee and only the trustee's remuneration appears in the accounts. As with the original nowhere company, our difficulty is getting at the structure behind the company. The fact that the company is resident and,

therefore, within our taxing charge gives us a stronger lead. International Division is interested to see any such cases.

The other ploy to replace the nowhere company is the 'nowhere' limited partnership. There is more about this in chapter 16 on Foreign Partnerships (ITH1639).

Even after 1993 it is not quite impossible to come across a UK incorporated nowhere company although it will not be one of the type so far considered. A UK incorporated company which migrated with special Treasury consent and continues to be outside the incorporation rule may have become a nowhere company. It does not have to be managed and controlled in the same country or carry on the same business as when it migrated although it does of course have to comply with all the conditions for indefinite exception from the incorporation rule.[85]

8.26 Loss importation

The INTM has an extract from the ITH:

ITH419 Company residence: loss importation

We now come to two problems associated with the central management and control test which we have with companies which become or remain resident here. The first problem is referred to as loss importation. When an overseas subsidiary of a UK parent is making losses it is relatively easy for the parent to ensure that the central management and control of the subsidiary is in the UK even if the whole of its operations are overseas. The losses become available for group relief. The *Unit Construction* case gives an early example of this (chapter 3 ITH323). In those days relief was obtained by way of a deduction for subvention payments. Although the mischief is more obvious if the subsidiary only becomes resident when it starts to make losses, it can also be seen when the subsidiary is resident from the beginning. And there are also possible problems when losses are incurred not by a subsidiary but by an overseas branch of a UK resident company.

ITH420 Company residence: loss importation: the branch

The root of the problem is this. When two countries tax the same source of trading income the treaties, or unilateral relief, soften the impact of double taxation. But where there is a loss both countries may give relief for the loss. The simplest example is that of the genuine branch. In the following illustrations the company is resident in the UK and has a trading branch in country X. There is a standard Double Taxation

[85] See 8.5 (Pre-1988 companies).

Agreement with country X so both countries tax the profits and the UK gives credit. The tax rates are illustrative only.

ITH421 Company residence: loss importation: the branch: example

EXAMPLE 1

THE BRANCH	THE BRANCH	THE BRANCH
Branch result	Branch result	Branch result
Year 1	Profit	£1,000
Year 2	Loss	£(1,000)
Year 3	Profit	£1,000

	UK	Country X
Year 1	£	£
Profit	1,000	1,000
Tax @ 33%	330	330
Credit	-330	
Net Tax	NIL	330
Year 2		
Loss relief @ 33%	-330	
(reduces Case 1)		
Year 3		
Profit	1,000	1,000
Loss relief		-1,000
Tax	330	
Net Tax	330	NIL

Both countries give loss relief and the result is fair. The relief that the UK gives in year 2 is recouped in year 3, so there is nothing essentially offensive in the idea that we give relief for losses which have also been relieved abroad. The next example is of the same situation except that the losses in country X are so large that the operation there is closed down.

ITH422 Company residence: loss importation: branch closes down: example

EXAMPLE 2

THE BRANCH	THE BRANCH	THE BRANCH
CLOSE DOWN -	CLOSE DOWN -	CLOSE DOWN -
Branch result	Branch result	Branch result
Year 1	Profit	£1,000
Year 2	Loss	£1,000
Year 3	Profit	(£10,000)

	UK	Country X
Year 1	£	£
Profit	1,000	1,000
Tax @ 33%	330	330
Credit	-330	
Net Tax	NIL	330
Year 2 as Year 1		
Net Tax	NIL	330
(reduces Case 1)		
Year 3		
Loss relief @ 33%	-3,330	NIL

Country X may have some provision for allowing the loss in part by carry- backwards, but such a large loss is probably in the nature of things not totally relievable in country X which is taxing only the branch profit. The UK, on the other hand, will give relief either by setting against other Case I profit or by group relief. Thus we will have given relief which will never be recouped but that is arguably a consequence of asserting taxing rights on the basis of residence. The company might argue that overall the result is fair. Overall there is a loss of £8,000 (£10,000-£2,000), tax has been paid on £2,000 in country X and the UK has given relief on £10,000 so that in total only £8,000 has been relieved.

ITH423 Company residence: loss importation: the subsidiary

Next we have a similar situation but the trading operations are carried on wholly in country X by a subsidiary which is incorporated there and taxed as a resident there. If the subsidiary is managed and controlled in the UK it will also be taxed as resident here unless in a treaty case FA94/S249 applies to deem the company to be not resident in the UK. If country X allows relief for losses only by way of carry forward, then on the same results, the tax position of the subsidiary in the UK will be the same as that of the branch in examples 1 and 2, except that relief for losses will be by way of group relief.

But for a subsidiary company there are other possibilities. The subsidiary may be part of a sub-group in country X and that country may also give loss relief against group profits. It may be possible for the subsidiary to move its residence in and out of the UK so as to get the best advantage from the provisions for tax credit and loss relief. The following examples illustrate these possibilities.

ITH424 Company residence: loss importation: the subsidiary: example 3A

SUBSIDIARY RESIDENT IN COUNTRY X: Subsidiary results	SUBSIDIARY RESIDENT IN COUNTRY X : Subsidiary results	SUBSIDIARY RESIDENT IN COUNTRY X : Subsidiary results
Year 1	Profit	£1,000
Year 2	Loss	£(1,000)
Year 3	Profit	£1,200

The subsidiary is also resident in the UK all years. Country X gives group relief for year 2.

	UK	Country X
Year 1	£	£
Profit	1,000	1,000
Tax @ 33%	330	330
Credit	-330	
Net Tax	NIL	330
Year 2		
Group relief @ 33%	-330	-330
Year 3		
Profit	1,200	1,200
Tax	396	396
Credit	-396	
Net Tax	NIL	396
Overall Tax	-330	+396

ITH425 Company residence: loss importation: the subsidiary: example 3B

The subsidiary is not UK resident in Year 1; it is UK resident Years 2 and 3. It carries back losses in country X.

	UK	Country X
Year 1	£	£
Profit		1,000
Less Loss		Carried back 1,000
Net Tax	NIL	NIL
Year 2		
Group relief @ 33%	-330	NIL
Year 3		
Profit	1,200	1,200

Tax	396	396
Credit	-396	
Net Tax	NIL	396
Overall Tax	-330	+396

ITH426 Company residence: loss importation: the subsidiary: example 3C

The subsidiary is not UK resident Year 1; is resident Year 2; is not resident Year 3. It carries forward losses in country X.

	UK	Country X
Year 1	£	£
Profit		1,000
Tax @ 33%		330
Year 2		
Group relief @ 33%	-330	NIL
Year 3		
Profit		1,200
Less Loss		- 1,000
		200
Net Tax	NIL	66
Overall Tax	-330	+396

In all three examples A, B and C the UK gets no tax but gives relief on £1000 & 33%. The company makes net overall profits of £1200 but pays tax on only £200 if group relief is taken into account.

ITH427 Company residence: loss importation: the subsidiary: example 3D

If, in example 3C, the company remained resident in Year 3, we would expect the tax to be

	UK	Country X
Year 1	£	£
Profit		1,000
Tax @ 33%		330
Year 2		
Group relief @ 33%	-330	NIL
Year 3		
Profit		1,200
Less Loss		- 1,000
		200

Net Tax	NIL	66
Overall Tax	-330	+396

But prior to FA94/S249 the company may have turned to the treaty between the UK and country X. It would have argued that its place of effective management is in country X and that that is the country, and the only country, of which it is a resident for the purposes of the treaty (see chapter 5 ITH515). It may have a permanent establishment in the UK (the offices where the directors meet) but there is hardly any profit attributable to that. In such circumstances it is unlikely that we would be able to persuade country X that the place of effective management is in the UK or that we could tax any profit. So the result would be

	UK	Country X
Year 3	£	£
Tax	NIL	66

just as in example 3C.

ITH 427 Company residence: loss importation: the subsidiary: example 3D

In all the variations of example 3 the key factor is that the company is resident in the UK in the year of loss. Under the central management and control test that is reasonably straightforward to achieve. But following FA94/S249 if there is a treaty between the UK and country X containing a company residence tie-breaker, we will be able to look to the test in the tie- breaker in determining residence for UK tax purposes. If the tie-breaker is based on the location of effective management which is shown to be in country X in year 3, then it is likely that effective management in year 2 is also in country X.

ITH429 Company residence: loss importation: branch and subsidiary

One final comment on example 3: looking back to the branch position referred to in example 2, that obviously cost the Revenue money and it was suggested that it was, arguably, not offensive. It is the inevitable consequence of asserting taxing rights over income when the primary taxing rights lie with another country. The same sort of thing can occur in the context of an overseas subsidiary becoming resident in the UK during the period of large losses leading to the closure of its business. However, that is different from the branch situation. The benefits of loss relief in the UK do not then arise as an inevitable consequence of the UK's more general assertion of taxing rights over the entity but rather because the company, having chosen to put its profits out of range of UK tax, later endeavours to reverse the consequences of its own action.

Such claims merit critical examination.

ITH430 Company residence: loss importation: effect of Section 249

As we have seen, where a company is resident in the UK under the case law test and also resident in another country with whom we do not have a treaty, or where the treaty lacks a company residence tie-breaker, the company may be able to manipulate its residence status to its advantage. Where, however, it is also resident in another country with whom we have a treaty containing a tie- breaker the effect of Section 249 is to make manipulation more difficult. It will generally be less feasible to move the location of effective management.

It might be asked why we did not legislate for all dual resident companies. But this would have come close to introducing a new statutory company residence rule. The 1994 legislation was not directed specifically at loss importation but instead at removing the anomalies attributable to the mismatch between residence under domestic law and residence under a treaty.

ITH437 Company residence: getting profits back tax free

The second problem for specific mention is loosely referred to as profit importation. It is a fundamental of our tax system that we tax a UK company under Case V if and when it receives a dividend from an overseas subsidiary. There are other tax systems where this is not so - the exemption method countries. But as a matter of policy we do not have such an approach, although, where the subsidiary is a genuine trader, we accept its right to decide whether to retain its profits or to send home dividends. It follows that we must be concerned if companies devise ways of getting profit back to this country tax free. Subsection (1)(c) and (d) of Section 765 which is considered in chapter 13, is concerned with devices of that sort and chapter 13 also looks at the problem of ‘upstream loans’ - from overseas subsidiaries to UK parents. Our concept of residence too may be manipulated in a way which has the effect of bringing home profit tax free.

ITH438 Companies: getting profits back tax free: inward migration

All that happens is that a non-resident subsidiary company - full of lowly taxed profit - becomes resident in the UK. The fact of becoming resident here does not involve that company or its parent in any liability to UK tax in respect of the profit, and once the subsidiary is here it is quite a simple matter to make that profit available to the parent. There are two common ways of achieving this.

1 The subsidiary company declares a dividend which, since it is now resident, is intra-group.

The subsidiary makes a loan to its parent.

The parent company thus has the money in its hands and, tax apart, is in the same position as it would have been in, had the subsidiary company declared a dividend while it was non-resident. Some very large examples of this device have been seen. The tax-haven legislation may have reduced the amounts of lowly taxed profits available for importation and thus the need for legislative action. But capital gains and other profits which escape the CFC provisions may still be worth bringing in this way. International Division would like to be kept informed of cases detected in Districts. It is sometimes possible to make a challenge either by showing that the company was resident when the gains or other profits arose, or by showing that the company has not become resident in the UK. In a treaty case, following FA94/S249 it will normally be necessary for the company to show that effective management is now exercised in the UK.

ITH442 Company residence: advantage of central management/ control test

The consequences of the central management and control test are not all negative for the Revenue. Once we had recognised the significance of the Unit Construction case and had set out our views in the 1983 Statement of Practice, it was possible to take a firmer line on tax-haven subsidiaries. We could argue that central management and control lay in the UK either with the parent or with any UK resident directors of the subsidiary. We have had some success in bringing into the UK tax net tax-haven profits in this way.

Since 1984 the profits of some companies can be taxed under the tax-haven (controlled foreign companies) provisions, but these provisions do not afford complete coverage. The assiduous use of a mixer company to pass dividends to the UK (see chapter 7 ITH728) can further reduce the effectiveness of the provisions. So in CFC cases, as in others, residence will remain an important issue. The residence position should always be borne in mind when an overseas subsidiary is reviewed under the CFC provisions. If arguments on residence are likely to get to Commissioners the case requires an exhaustive review of the facts. Even so, much may depend on oral evidence before Commissioners. It is, therefore, not surprising that cases tend to be settled by some compromise agreement. Nevertheless some settlements have been very substantial indeed. Important cases are usually worked by or under the supervision of International Division who like to hear of potential cases at an early stage.

CHAPTER NINE

TREATY-RESIDENCE

9.1 Treaty-residence: Introduction
9.2 Treaty/UK-tax residence compared

Cross references

The following topics are considered elsewhere:

Topic	**See para**
Introduction to DT reliefs	107.1

9.1 Treaty-residence: Introduction

The starting point is to note that there are (at least) three distinct concepts of residence.[1] We need terms to describe them, and I coin the following terminology.

Term	**Meaning**
UK tax residence/non-residence:	Residence as defined in UK tax law
UK tax-resident[2]	UK resident under UK tax law definition(s)
UK tax non-resident	Not UK resident under UK tax law definition(s)

[1] See 6.1 (Concepts of residence).

[2] If the context is clear (because other forms of residence are not being considered) one can abbreviate these terms to tax-resident or non-resident.
If looking at the position of an individual, one might use the terms SRT-resident and SRT non-resident; but that is only apt for individuals, as the SRT only applies to individuals.
In earlier editions I used the term "UK-law UK resident" or "UK law non-resident".

Treaty-residence:	Residence as defined in a DTA
Treaty-resident in the UK	Resident of UK within DTA definition
Treaty-resident in foreign State	Resident of foreign State within DTA definition[3]
Treaty-resident under art 4(1)	Resident under DTA art 4(1) (before tie-breaker)
Foreign-tax residence	Residence as defined in some foreign tax law
Domestic law	UK law, or a foreign State law (as opposed to treaty or international law)

This chapter discusses treaty-residence as defined in:

- The OECD Model
- The USA/UK DTA (which is similar but not identical)

I also consider some other treaties. In any particular case it will be necessary to review the terms of the relevant treaty.[4]

DTAs refer to a resident *of* a treaty State and UK tax law refers to a person resident *in* the UK; but nothing turns on the choice of preposition. I guess that OECD Model wording was influenced by the French version *résident d'un État contractant.*

9.2 Treaty/UK-tax residence compared

In general, a person cannot be treaty-resident in two treaty states: treaty tie-breaker tests usually require treaty-residence to be in one State alone.

However a person who is UK tax-resident may be resident in another State under the UK law, foreign law, or DTA definitions of residence. That is, UK tax-residence does not preclude residence elsewhere.

In particular, a person may be UK tax-resident while treaty-resident in a foreign State. Treaty-residence in a foreign State does not preclude UK tax-residence (except for companies[5]).

The INT Manual provides:

> **INTM154020. Dual residents** [Sep 2021]
> ... Although the agreement overrides some of the normal consequences of being a UK resident, it does not, in the case of an individual, override the fact of UK residence itself for purely domestic law purposes. Even though an individual may be resident for agreement purposes elsewhere,

[3] One could use the term "treaty-resident outside the UK". Statute sometimes calls this "treaty non-resident" but I think my term is clearer.

[4] See 9.18.6 (A cautionary tale).

[5] See 8.19 (DTA residence rule).

they (as a resident of the UK for UK tax purposes) still have to complete returns and fulfil any similar obligations imposed by the Taxes Management Act.

Sometimes this rule works in favour of the taxpayer; for instance, it may preserve the right to IT personal allowances (which are conferred on UK tax-residents but not always available to non-residents).[6] Mostly however the rule works in favour of HMRC. For instance, a year in which an individual is UK tax-resident counts for the purposes of:
(1) the long-term residence test for the remittance basis claim charge;[7]
(2) deemed domicile (the 15-year residence rule);
even though the individual is treaty-resident in a foreign State throughout the year.

The same rule is proposed for FIG relief from 2025.[8]

In the Canadian case *Black v The Queen*[9] the taxpayer was Canadian tax-resident but treaty-resident in the UK under the tie-breaker. He argued that (contrary to the view taken here) treaty-residence outside Canada precluded his being Canadian tax-resident. I do not see how this was properly arguable: under the treaty, treaty-residence was defined only *for the purposes of this Convention.* The court agreed, though it took 20 pages to set out the arguments behind that conclusion.

9.3 Residence under art 4(1)

Art 4(1) OECD Model	**Art 4(1) USA/UK DTA**
	Except as provided in paragraphs 2 and 3 of this Article,
For the purposes of this Convention, the term “resident of a Contracting State” means	the term “resident of a Contracting State” means, for the purposes of this Convention,
any person who, under the laws of that State, is liable to tax[10] therein	any person who, under the laws of that State, is liable to tax therein by

[6] See 44.8 (Personal allowances under DTAs).

[7] See 17.12.12 (Individual treaty non-resident).

[8] See A1.2.3 (The test of residence).

[9] 2014 TCC 12 *https://www.canlii.org*

[10] The 1963 draft Model referred to “taxation”; the 1977 Model changed the word to “tax”. But there is no difference.

by reason of his domicile,[11] residence,[12] place of management or any other criterion of a similar nature...[13]	reason of his domicile, residence, citizenship, place of management, place of incorporation, or any other criterion of a similar nature...

I describe a person who is within this paragraph as **"resident of a State under art 4(1)"**.

The USA/UK DTA is similar to OECD Model but:

(1) Citizenship is added. This reflects the US rule that US citizens are liable to US tax regardless of residence.

(2) Place of incorporation is added. This reflects the US rule that US incorporated companies are liable to US tax regardless of residence.[14]

(3) "Person" in the USA/UK DTA has a non-OECD Model definition.

(4) The USA DTA has further rules:

Art	**Topic**	**See**
4(2)	Green card holder	9.26.1
4(3)	Tax exempt organisations	9.27

For the purposes of discussion it is convenient to abbreviate the phrase "domicile, residence, place of management or any other criterion of a similar nature" to "UK-law residence"; in a UK context this is a permissible shorthand since in general it is UK-law residence (not the other criteria mentioned) which determines whether a person is liable to UK tax.

There are then four requirements to be a resident of a State under art 4(1):

[11] The word "domicile" here may be understood to have a meaning along the lines of the English common law concept, or the civil law concept; but it does not matter since both meanings are included, one way or another, in the expression "domicile, residence, place of management or any other criterion of a similar nature".

[12] "Residence" here has its domestic law meaning (in my terminology, tax-residence).

[13] The words which follow deal with States and pension schemes, discussed separately below.

[14] The reference to place of incorporation is strictly otiose, on the basis that place of incorporation is equivalent to domicile, or is a criterion of a similar nature; though it may be relevant in a treaty with a country with a different concept of domicile, and it is sensible to use a single form which works in all jurisdictions.

Rule	**See**
There must be a "person"	9.4
The person must be liable to tax in the State	9.5
The person must be domestic-law tax resident in that State	
Domestic-law residence must be the reason for liability to tax	9.6

These are conceptually distinct issues, but they may overlap in practice.

Under art 4(1):

(1) A person may be a resident of one treaty State alone, in which case they are treaty-resident in that State.

(2) A person may be a resident of both treaty states, in which case tie-breaker tests discussed below are applied to identify the State of treaty-residence.

So far as the UK is concerned, a person who is UK tax-resident is in principle a resident of the UK under art 4(1).

9.4 Treaty-person

The first requirement of treaty-residence is that there must be a "person" and one must identify:

(1) Who that person is

(2) Whether that person is an individual or not (because different tie-breaker tests apply)

(3) Whether that person is liable to tax

9.4.1 *Person: Treaty definition*

The use of the word "person" always requires some care.[15]

The term is defined (after a fashion).

Art 3(1) OECD Model	**Art 3(1) USA/UK DTA**
For the purposes of this Convention, unless the context otherwise requires:	[Identical]
a) the term "person" includes an individual,	[identical]
[*no equivalent*]	an estate, a trust, a partnership,

[15] See App.2.6 (Person).

a company[16] and any other body of persons; [17]	a company, and any other body of persons;

I refer to a person within this definition as a **"treaty-person"**. But the definition does not take us very far.

Individuals (who are "natural persons") are straightforward; but trusts, partnerships and some other entities are not mentioned in the OECD model and are more problematic. They are better considered individually, rather than as a single topic:

Entity	**See para**
Trust	9.21
Partnership	9.22
Pension scheme	9.24
Stichting	90.40.4
Cell co	90.50.2

The USA/UK DTA is different from the OECD Model form in that estates, trusts and partnerships are included. in the definition of person.

9.5 "Liable to tax"

Assuming we have identified a person, we move on to consider whether that person is "liable to tax". This should be regarded as a technical term in the OECD Model, and it is sometimes appropriate to write it in scare quotation marks.

9.5.1 *Liable to which tax?*

"Tax" is not defined as such, but the definition follows from art 2 of the DTA (Taxes Covered).[18] Article 2 France/UK DTA is typical:

> (1) The taxes which are the subject of this Convention are:
> (a) in the case of the United Kingdom:
> (i) the income tax;
> (ii) the corporation tax;
> (iii) the capital gains tax.

In order to be a resident of the UK, the person is must be liable to IT, CT

[16] See 30.15.4 (Company: DTA definition). But even if an entity is not a company, as defined, it is still a treaty-person if it is a "body of persons".

[17] See 9.22.1 (Partnership a treaty-person).

[18] See 107.13 (Taxes Covered).

or CGT. Liability to other UK taxes does not count. In this chapter references to tax are to those taxes.

"Liable to tax" means liable to any of the taxes covered by the DTA. This is illustrated by a case concerning the Mauritius/UK DTA. Art 3(1) of this DTA provides:

> (1) The existing taxes to which this Convention shall apply are...
> (b) in Mauritius:
> (i) the income tax;
> (ii) the capital gains tax (*morcellement*);

The trustee was liable to income tax in Mauritius by reason of its residence. That was sufficient to make them a resident of Mauritius under art 4(1); even though:

(1) the trustee was not liable to CGT in Mauritius; and
(2) the taxpayer in the UK claimed relief for CGT, under the capital gains article of the DTA, not IT relief[19]

9.5.2 *Narrow exemption*

It is useful for discussion to distinguish:

(1) **Narrow exemption**: exemption[20] from tax, as a result of which a person does not pay tax in some circumstances, even quite wide circumstances, but there are at least some circumstances where the person may pay tax.
(2) **General exemption**: there are no circumstances (other than a change of law) in which the person may pay tax.

A person may be "liable" to tax in a State (and so qualify as treaty-resident in the State) even if they enjoy narrow exemptions, and do not in fact actually pay any tax. Provided the taxpayer is "liable to tax", DT relief is in principle available even in respect of income/gains on which the person is not liable to tax.

Loss reliefs and DT reliefs are obvious examples of narrow exemptions. SP 1/90 provides:

> 7 ... a company is regarded as liable to tax in a particular territory if it is within the charge there even though it may pay no tax because, for example, it makes losses or claims double taxation relief.

[19] *HMRC v Smallwood* [2010] EWCA Civ 778 at [13]. The taxpayer lost for other reasons.

[20] or relief: the two words are synonymous.

Charity and pension fund reliefs are examples of narrow exemptions. The International Manual provides:

> **INTM162040 whether the customer is a resident of the UK** [Sep 2021]
> The phrase 'liable to tax' means that they only have to be within the general scope to tax. Charities and pension funds can therefore be regarded as resident even if their income is exempt from tax.

Similarly, HMRC, "Double Taxation Pension Scheme Consultation Document" provides:[21]

> The generally held view is that pension funds are tax resident in a jurisdiction for tax treaty purposes, even if they do not pay tax.[22] The UK agrees with this and therefore regards pension funds as resident for the purposes of tax treaties where they are located and able to access treaty benefits.

OECD Commentary leaves this point slightly open. It provides:

> 8.11 Paragraph 1 refers to persons who are "liable to tax" in a Contracting State under its laws by reason of various criteria. In many States, a person is considered liable to comprehensive taxation even if the Contracting State does not in fact impose tax. For example, charities and other organisations may be exempted from tax, but they are exempt only if they meet all of the requirements for exemption specified in the tax laws. They are, thus, subject to the tax laws of a Contracting State. Furthermore, if they do not meet the standards specified, they are also required to pay tax. Most States would view such entities as residents for purposes of the Convention ...
> 8.12 In some States, however, these entities are not considered liable to tax if they are exempt from tax under domestic tax laws. These States may not regard such entities as residents for purposes of a convention unless these entities are expressly covered by the convention...

It seems reasonably clear that a UK charity is "liable" to UK tax since charity exemptions do not apply to all types of income, and are restricted

[21] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/525399/Double_Taxation_Treaty_Passport_scheme_review.pdf* (2016) para 2.18.

[22] The document refers to para 8.6 OECD commentary on art 4, for which, see 9.5.5 (Liable at 0%: Jersey co).

by numerous anti-avoidance rules. The same applies to UK pension funds (though these are now dealt with expressly.)[23]

Perhaps the reservation expressed in para 8.12 concerns foreign entities which qualify for a general exemption under the foreign state tax law; see below.

The remittance basis is another example. A remittance basis taxpayer is "liable to tax" (and so a resident of the UK under art 4(1)).[24] Where a State operates a remittance basis, treaty relief is generally restricted to remitted (taxable) income.[25] So the fact that a remittance basis taxpayer is "liable to tax" does not much matter in practice, except so far as it affects the drafting of treaties. But it illustrates my point that a person may be "liable to tax" without actually paying any tax, because of (what I call) narrow exemptions.

9.5.3 *General exemption*

Different considerations apply where:

(1) An entity (unlike a UK charity/pension fund) has an general, unqualified exemption so it does not pay any tax under any circumstances. An example is a UK Local Authority, which is entirely exempt from UK tax.[26]

[23] See 9.24 (Treaty-residence: Pension fund).

[24] This is, I think, self-evident; but if authority is needed:
(1) The Canada Revenue Authority take this view: "The Department takes the view that individuals who are subject to tax on a remittance basis are liable to tax on a world income basis. Accordingly, persons who are liable to tax in a contracting state on a remittance basis, would not in our view, be precluded from being resident there for the purposes of paragraph 1 of the residence article of a convention." See Canada Revenue Authority, "Income Tax – Technical News No. 16" (March 1999).
(2) OECD Commentary also assumes that is right; see 107.21 (Remittance basis income).
See Sykes [2021] GITC Review p.54 criticising an Italian case which held that a UK remittance basis taxpayer was not treaty-resident in the UK.

[25] See 107.21 (Remittance basis income). For completeness: The issue is one for foreign tax authorities rather than HMRC. It would matter for UK tax only if the foreign State operated a remittance basis; the only examples of which I am aware are Ireland and Japan (in respect of remittances from a branch to head office in Japan). But the DTAs with those states contain the standard form restriction so that unremitted (untaxed) income does not qualify for DTA relief.

[26] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), chap 45 (Local Authorities).

(2) A person is resident in a jurisdiction which does not impose any tax.[27]

I refer to that as a **"wholly exempt person"**.

Is a wholly exempt person "liable to tax"?

Of course a wholly exempt person *could* be taxed, if the State decided to change its law, and that would be in accordance with the international law principle that a State may tax its residents. One could construe "liable to tax" so widely as to include such a case. On this view, "liable to tax" merely means within the scope of a taxing jurisdiction, within the scope of a state's right to tax. I refer to that as the **"wide view"**.

The wide view might be regarded as an application, or small extension, of the principle that a person who qualifies for narrow reliefs is still "liable to tax". However:

(1) It does not seem to fit the natural meaning of the words.
(2) It does not fit with the object of a DTA, to avoid double taxation.
(3) The well-established principle that narrow tax exemptions do not matter does not entail accepting the wide view. There is a difference between narrow and general exemptions, which is generally a significant difference, even if in some cases the difference may only be small (see the discussion on Jersey companies below).
(4) The well-established principle that transparent bodies are not "liable to tax" is not logically consistent with the wide view.

Crown Forest Industries v Canada, discussed below, is not consistent with the wide view. But international case law is inconsistent. (Perhaps that is not unusual, in relation to DTAs). On the other side is *Assistant Director of Income Tax v Green Emirate Shipping & Travels*.[28] The question was whether a shipping company was treaty-resident of UAE under the then India/UAE DTA:

> ... being 'liable to tax' in the contracting state does not necessarily imply that the person should actually be liable to tax in that contracting state by virtue of an existing legal provision but would also cover the cases where that other contracting state has the right to tax such persons irrespective of whether or not such a right is exercised by the contracting state.[29]

[27] It is difficult to see why a DTA should be made with a State which does not impose tax, but a State with a DTA might perhaps repeal the tax leaving the DTA in force.

[28] 9 ITLR 1.

[29] 9 ITLR 1 at p.10.

HMRC have argued in favour of the wide view. In *Weiser v HMRC*[30]:

> 22. ... There is, [HMRC] submitted, an internationally recognised distinction ... which gives the expression "liable to tax" a broader meaning that the expression "subject to tax". She argued that "liable to tax" is understood to require only an abstract liability to taxation on income in the sense that a contracting state may exercise its right to tax the income in question (whether or not the exercise of that right actually results in an amount of tax becoming payable).

But this was not a case where the issue actually arose, and I wonder if HMRC realised the full implications of their position.

The current OECD Model states expressly that the State and its subdivisions and local authorities are residents of the State.[31] Before then, they were generally regarded as treaty-resident, which implies they were "liable to tax" and so perhaps supports the wide view. But that is a very special case.

In conclusion: It is considered that the wide view is not one that the UK courts would find attractive.

9.5.4 *Swiss forfait taxpayer*

SP 1/90 provides:

> 7. A company has to be liable to tax on income so that a company which is, for example, liable only to a flat rate fee or lump sum duty does not fulfil the test.

The Swiss forfait regime (sometimes translated as "lump-sum taxation") is a tax that is usually calculated at five times the annual rental value of the individual's home in Switzerland (subject to a certain minimum amount). Forfait taxpayers do not pay tax on their worldwide income or on income from securities.[32]

Some Swiss DTAs deal expressly with the treaty-residence status of forfait taxpayers. For instance, art 4 Switzerland/Canada DTA follows OECD Model form for individuals, but art 4(5) provides:

[30] [2012] UKFTT 501 (TC). For other aspects of this case, see 108.13 ("Subject to tax").

[31] See 9.7 (State/subdivision/local authority).

[32] See Sigg and Luongo, "The Swiss lump-sum taxation regime: after the storm comes the calm?" [2015] JITTCP 169.

> 5. Where by reason of the provisions of paragraphs 1 and 2 an individual would be a resident of a Contracting State but is not subject in that State, with respect to all income generally taxable from sources from the other Contracting State, to the generally imposed income taxes, then such individual is not a resident of the first-mentioned State for the purposes of this Convention.[33]

USA/Switzerland DTA Technical Explanation provides:

> Paragraph 5 provides that certain individuals are not treated as Swiss residents because they are not liable for tax on the same basis as other Swiss residents. This rule is necessary because Switzerland permits certain alien residents to elect not to be subject to the regularly applicable income tax on residents and instead to pay the "forfait tax." The base for the forfait tax is a multiple of rental value, deemed rental expenses or living expenses of the electing resident. It also includes all income that benefits from a reduction of tax under Swiss income tax conventions. A person who would otherwise be treated as a resident of Switzerland will not be considered a resident of Switzerland for purposes of the Convention if the person makes an election under Swiss law not to be subject to the income tax on residents.[34]

A forfait taxpayer is liable to tax of some kind, and, it appears, they pay it by reason of their residence. The question is whether the forfait tax is a "tax" as defined in the Switzerland/UK DTA.[35] If not, the taxpayer is not treaty-resident in Switzerland.

However it would follow that all these express provisions are unnecessary;[36] and Obrist & Pfister record the opposite view as generally held:

[33] *https://laws-lois.justice.gc.ca/eng/regulations/SI-98-94/page-2.html*

[34] Department of the Treasury Technical Explanation of the USA/Switzerland DTA *http://www.irs.gov/pub/irs-trty/swistech.pdf*

[35] Article 2(1) Switzerland/UK DTA provides:

The taxes which are the subject of this Convention are ... (b) in Switzerland: the federal, cantonal and communal taxes on income (total income, earned income, income from capital, industrial and commercial profits, capital gains and other items of income)	Les impôts auxquels s'applique la présente Convention sont ... (b) en Suisse: les impôts fédéraux, cantonaux et communaux sur le revenu (revenu total, produit du travail, rendement de la fortune, bénéfices industriels et commerciaux, gains en capital et autres revenus)

[36] But this is not a powerful argument; see 107.10.6 (Variations between DTAs).

> Through [forfait] tax status, only a portion of the individual's worldwide income and wealth is ordinarily taxed. According to most Swiss DTCs, a lump sum taxpayer is generally considered as a resident under the DTCs and can therefore claim relief on his foreign source income.[37]

9.5.5 *Liable at 0%: Jersey co*

Section 123C [Jersey] Income Tax Act 1961 provides:

> (1) This Article applies to a company –
> (a) which is regarded as resident in Jersey, or which has a permanent establishment in Jersey; and
> (b) which is not any of the following –
> (i) a company to which Article 123D applies,
> (ii) a utility company, or
> (iii) a registered person within the meaning of Article 118C, such person being exempt from income tax under Article 118C(9).
>
> (2) Notwithstanding the rate of tax required by Article 1 to be charged for a year of assessment, a company to which this Article applies shall be charged to tax under Schedule D at the rate of 0%.

In short, Jersey companies pay income tax at the rate of 0%. Exceptions are:

- The trade of importing or supplying hydrocarbon oil
- Financial services companies with a PE in Jersey[38]

Is the company "liable to tax" and so treaty-resident in Jersey?

One might say liability at 0% is a liability of some kind, but I see no difference between tax at the rate of 0% and no tax liability. Even if there were thought to be a technical difference, a DTA is not to be technically construed.

One might say that a Jersey company qualifies for a narrow exemption and not a general one. It would be taxable if it was a financial services company. Exemption under the Jersey treaty rests on this somewhat

[37] Maisto (ed) *Residence of Individuals Under Tax Treaties and EC Law* (2010) p.565 (footnotes omitted). A full understanding of the relevant Swiss law would be needed to get to the bottom of this issue.
Sykes [2021] GITC Review p.54 reports that "the Italian authorities believe that an Italian resident paying the Italian flat tax for non-Italian income would be a resident of Italy for treaty purposes."

[38] Section 123CA and 123D [Jersey] Income Tax Act 1961.

slender possibility.

The protocol to the Jersey/UK DTA provides:

> It is understood that the term “liable to tax” in paragraph 1 will be interpreted by the Territories in accordance with the principles set out in paragraph 8.6 of the Commentary on Article 4 of the OECD Model Tax Convention as it read on 15 July 2014.

As at 15 July 2014 the Commentary provided:

> 8.6 Paragraph 1 refers to persons who are “liable to tax” in a Contracting State under its laws by reason of various criteria. In many States, a person is considered liable to comprehensive taxation even if the Contracting State does not in fact impose tax. For example, pension funds, charities and other organisations may be exempted from tax, but they are exempt only if they meet all of the requirements for exemption specified in the tax laws. They are, thus, subject to the tax laws of a Contracting State. Furthermore, if they do not meet the standards specified, they are also required to pay tax. Most States would view such entities as residents for purposes of the Convention (see, for example, paragraph 1 of Article 10 and paragraph 5 of Article 11).[39]

In the view of Revenue Jersey, this ensures that 0% tax paying companies are “liable to tax”.[40]

9.6 Liable: Causation requirement

It is not enough to be liable to tax: the person must be liable *by reason of* one of the specified criteria.

OECD Commentary on art 4(1) provides:

> 8. ... As far as individuals are concerned, the definition aims at covering the various forms of personal attachment to a State which, in the domestic taxation laws, form the basis of a comprehensive taxation (full liability to tax).

9.6.1 *Deemed residence*

OECD Commentary on art 4(1) provides:

> 8. [The definition of treaty-residence in art 4(1)] also covers cases

[39] The text, with insignificant amendments, is now in para 8.11 of the OECD Commentary.

[40] Private correspondence.

> where a person is deemed, according to the taxation laws of a State, to be a resident of that State and on account thereof is fully liable to tax therein (e.g. diplomats or other persons in government service).

An example in the UK would be parliamentarians, who are deemed UK resident.

Domestic law deeming raises interesting questions for DTAs; see too 107.22.1 (Deemed classification).

9.6.2 *By reason of domicile/place of management*

In relation to companies, SP 1/90 provides:

> 6. Territories which impose tax on companies by reference to incorporation or registration or similar criteria are covered by the term "domicile".[41] Territories which impose tax by reference to criteria such as "effective management", "central administration", "head office" or "principal place of business" are covered by the term "place of management".

In *Crown Forest Industries v Canada*[42] the question was whether a company was a resident of the USA for the purposes of the US/Canada treaty. The definition was not materially different from the OECD Model.

The company was incorporated in the Bahamas. Its office and place of business was in the US. Under the UK central management and control test, the company would no doubt be US resident. But the US marches to a different drum. It does not tax foreign incorporated companies on worldwide income even if management/control is in the US. Instead the US statute provided:

> A foreign corporation engaged in trade or business within the United States during the taxable year shall be taxable ... on its taxable income which is effectively connected with the conduct of a trade or business within the United States.

The company was engaged in a trade in the US, and so would have paid US tax on its income; but it qualified for a narrow exemption as an international shipping company.

The Canadian Supreme Court accepted that the company was "liable to tax" (despite the shipping exemption, which was, in my terminology, a

[41] See 4.25 (Domicile of company).

[42] [1995] 2 SCR 802.

narrow exemption). However the company not liable to US tax *by reason of* its place of management. The test was "engaged in business in the US" which is different.

9.6.3 *Criterion of similar nature*

In *Crown Forest Industries v Canada*[43] the company was liable to tax by reason of its being engaged in a trade in the US; but that was not "a criterion of a similar nature" to place of management:

> the most similar element among the enumerated criteria is that, standing alone, they would each constitute a basis on which states generally impose full tax liability on world-wide income... In this respect, the criteria for determining residence in Article IV, paragraph 1 involve more than simply being liable to taxation on some portion of income (source liability); they entail being subject to as comprehensive a tax liability as is imposed by a state. In the United States and Canada, such comprehensive taxation is taxation on world-wide income. However, tax liability for the income effectively connected to a business engaged in the U.S. ... amounts simply to source liability. Consequently, the "engaged in a business in the U.S." criterion is not of a similar nature to the enumerated grounds since it is but a basis for source taxation.[44]

The taxpayer did not argue the wide view, ie that it was "liable to tax" on the basis that the US could have imposed a worldwide tax on the company. The result of the *Crown Forest* case is not consistent with the wide view.

GE Financial Investments v HMRC[45] concerned a company was liable to US tax under rules relating to stapled stock. This was held to be a resident of the US, and doubt was cast on the causation condition. Further discussion must be deferred until the case is final.

9.7 State/subdivision/local authority

Article 4(1) OECD Model continues:

> For the purposes of this Convention, the term "resident of a Contracting State" ... also includes
> [a] that State and

[43] [1995] 2 SCR 802

[44] at [40].

[45] [2023] UKUT 146 (TCC); and see Avery Jones, "GE Financial Investments v HMRC: a novel point of treaty interpretation" [2023] BTR 574.

> [b] any political subdivision or local authority thereof...

This is not found in the USA/UK DTA.[46]

9.7.1 *Pre-1995 Model form*

The OECD commentary provides:

> 8.4 It has been the general understanding of most member countries that the government of each State, as well as any political subdivision or local authority thereof, is a resident of that State for purposes of the Convention. Before 1995, the Model did not explicitly state this; in 1995, Article 4 was amended to conform the text of the Model to this understanding

If one thinks about it, the proposition that (say) the UK is liable to tax in the UK (not to mention, liable by reason of its residence, etc) is surprising. Some readers may use a stronger word. So it is not surprising that the OECD Model was amended. But the question is not likely to arise.

9.7.2 *Sovereign wealth funds*

The OECD Commentary provides:

> 8.5 This raises the issue of the application of paragraph 1 to sovereign wealth funds, which are special purpose investment funds or arrangements created by a State or a political subdivision for macroeconomic purposes. These funds hold, manage or administer assets to achieve financial objectives, and employ a set of investment strategies which include investing in foreign financial assets. They are commonly established out of balance of payments surpluses, official foreign currency operations, the proceeds of privatisations, fiscal surpluses or receipts resulting from commodity exports. Whether a sovereign wealth fund qualifies as a "resident of a Contracting State" depends on the facts and circumstances of each case. For example, when a sovereign wealth fund is an integral part of the State, it will likely fall within the scope of the expression "[the] State and any political subdivision or local authority thereof" in Article 4. In other cases, paragraphs 8.11 and 8.12 below will be relevant. States may want to address the issue in the course of bilateral negotiations, particularly in relation to whether a sovereign wealth fund qualifies as a "person" and is "liable to tax" for purposes of the relevant tax treaty (see also paragraphs 50 to 53 of the Commentary on Article 1)

[46] See 107.13.3 (Subdivisions/local authorities).

9.8 Liable to source tax only

Article 4(1) OECD Model/USA DTA continue with a second sentence:

> This term ["resident of a Contracting State"], however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

The OECD Commentary refers to liability to tax on worldwide income (or at least, not just on income with a source in the state) as "comprehensive liability to taxation" or just "comprehensive taxation".

This provision only applies in the unusual case where:

(1) A person is liable to tax in a State by reason of their domicile, residence, place of management or similar criterion; but
(2) the person is only liable on income/gains from a source in that State.

In most cases, a person is liable to tax on income from a source in a State but is not so liable by reason of their residence: non-residents are also liable. So the person would not be a resident of the State under the first sentence of the definition, and the second sentence is not applicable.

One example where the second sentence is needed is the case of a UK resident nominee or trustee for a non-resident beneficiary. Such a person is within the first sentence of art 4(1) but taken out by the second sentence.[47]

OECD Commentary refers to this sentence and provides four examples where it applies. Firstly:

> 8.1 ... That situation exists in some States in relation to individuals, e.g. in the case of foreign diplomatic and consular staff serving in their territory.

UK resident diplomats and consular officials are exempt from tax on foreign source income and gains and so not treaty-resident in the UK.

OECD Commentary provides:

> 8.2 [a] According to its wording and spirit the second sentence also excludes from the definition of a resident of a Contracting State foreign held companies exempted from tax on their foreign income by privileges tailored to attract conduit companies.
> [b] It also excludes companies and other persons who are not subject to comprehensive liability to tax in a Contracting State because these

[47] See 108.13.1 (Subject to tax: History).

> persons, whilst being residents of that State under that State's tax law, are considered to be residents of another State pursuant to a treaty between these two States. ...

I find para [b] difficult to understand.

> 8.3 [a] The application of the second sentence, however, has inherent difficulties and limitations. It has to be interpreted in the light of its object and purpose, which is to exclude persons who are not subjected to comprehensive taxation (full liability to tax) in a State,
> [b] because it might otherwise exclude from the scope of the Convention all residents of countries adopting a territorial principle in their taxation, a result which is clearly not intended.

I find part [b] of this sentence difficult to understand.

9.9 Residence change during year

9.9.1 *Split year of individual*

For individuals, UK tax-residence lasts an entire tax year: an individual cannot cease to be UK tax-resident during a tax year.[48]

Even if a tax year is a "split year" for an individual, the individual is still tax-resident in the UK throughout the tax year, including the overseas part of the split year. During that part the individual is still "liable to tax", since the reliefs for the overseas part of a split year cover most types of income but not all; so the individual is a resident of the UK under art 4(1) during the overseas part of a split year.[49]

For the avoidance of doubt, para 42 sch 45 FA 2013 confirms the point:

> The existence of special charging rules for cases involving split years is not intended to affect any question as to whether an individual would fall to be regarded under double taxation arrangements as a resident of the UK.

Some DTAs expressly address the question of migration during the year. For instance, art 14(6) France/UK DTA qualifies OECD Model CG article:

> The provisions of [art 14(5), CGT relief] shall not affect the right of a Contracting State to levy according to its law a tax chargeable in respect

[48] See 10.1 (Residence throughout tax year).
[49] See 10.2 (Split year rules).

> of gains from the alienation of any property ... on a person who is a resident of that Contracting State at any time during the fiscal year in which the property is alienated.

9.9.2 *UK/foreign tax years mismatch*

The INT Manual provides:

> **INTM154040 Individuals** [Sep 2021]
> ...Different countries have different fiscal years, for example, the United States tax year ends on 31 December. An individual who wishes to make a treaty claim as a resident of the United States in respect of the UK tax year 2010/11 will need to demonstrate that he is a resident of the United States during both of the United States tax years 2010 and 2011.
> If an individual was resident in the United States during the tax year 2010 but ceased to be so resident after 31 December 2010, then he may make a claim as a United States resident for any 2010/11 income which arose during 2010 but no claim is possible in respect of income arising in 2011.
> If income arises partly during a period of residence in the other country and partly during a period of residence in the UK, the income may be apportioned between the periods on a time basis, unless it is clear that the income arose unevenly over the two periods, for example a bonus payable for duties performed in one of the periods.

9.9.3 *Trust residence moves in tax year*

For the various ways that a trustee may change residence, and the time the change takes effect, see 10.17 (Split year of trustees and PRs).

The issue arose in *HMRC v Smallwood,* a case on the Round the World scheme.[50] A trust had three different trustees, resident in different states, in the course of the tax year 2000/01:

Apr - Dec: a Jersey resident trustee ("the Jersey period")
Dec - March: a Mauritius resident trustee ("the Mauritian period")
March onwards: UK resident trustees ("the UK period")

A gain accrued during the Mauritian period. During this period the trustee was a resident of Mauritius under art 4(1), as

(1) It was resident in Mauritius; and
(2) It was liable to Mauritian tax[51] by reason of its residence in Mauritius.

[50] [2010] EWCA Civ 778; see 9.19.6 (Round the World schemes).

[51] In fact the trustees were not liable to CGT in Mauritius, but only to income tax; but

One question was whether, during the Mauritian period, the trustee was also a resident of the UK under art 4(1).[52]

One might have thought that it was not, on the basis that it was not in fact tax-resident in the UK during that period. The Mauritian trustee was liable to CGT in the UK during the Mauritian period, but not by reason of *their* residence during the Mauritian period: it was liable by reason of *someone else's* residence (namely, the residence of their successor trustees) during the UK period.[53] However the CoA held that the trustee-body was a resident of the UK under art 4(1) during the Mauritian period.[54] The CoA reasoning is not easy to follow. Does the reasoning actually matter, when the answer to the question is clear? Discuss. However that may be, I think the best way to justify the outcome (if not quite how CoA put it) is as follows:

(1) the trustee was clearly liable to UK tax[55] during the Mauritian period; and

(2) it was so liable by reason of "its" UK residence, albeit in the subsequent UK period:

that made no difference; see 9.5.1 (Liable to which tax?).

[52] A further question arose concerning POEM; see 9.19.7 (POEM: Round the World scheme).

[53] At the time, s.2(1) TCGA provided (so far as relevant):

"*a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment during any part of which he is resident in the UK*".

As the judge pointed out [2009] EWHC 777 (Ch) at [31:

"residence in part of the year gives rise to a charge to tax on gains made in another part of the year, but [the provisions] do not do so by deeming the residence to be for any period longer than the actual period of residence. They do so simply by defining the gains by reference to the period in which they arise. There is a difference between those approaches, and I do not consider this distinction to be too subtle for the purposes of the Treaty".

Note that the current law is different: see 56.6.3 (Territorial scope: Summary).

[54] and indeed during the Jersey period, but that is not relevant so I refer only to the Mauritian period here.

[55] In fact the trustees were *not* liable to CGT in the UK, because of s.77 TCGA. CGT was paid by the settlor, not by the trustees. But the trustees were still "liable to tax", and so resident of the UK under art 4(1). This is for two reasons (either would suffice):

(1) Section 77 TCGA was (in my terminology) a narrow exemption and not a complete exemption.

(2) The trustees were in any case liable to IT, even if s.624 ITTOIA applied,

(a) Because there is no rule that the trustee has to be resident at the moment the gain arises; or

(b) Because of the rule that trustees should be regarded as a continuing body, distinct from the actual trustees.[56]

During Mauritian period the trustee could not know that it was a resident of the UK under art 4(1), as the facts which made it a resident of the UK occurred later. That did not matter: "The issue of liability has to be looked at retrospectively".[57] Of course, it can happen that individuals do not know in real time whether they are UK resident, since that can depend on what happens later in the same tax year; or indeed, under the SRT, it may depend on events in the subsequent tax year. So the position is similar for trust residence.

Thus the trustee in *Smallwood* was both a resident of the UK under art 4(1), and a resident of Mauritius under art 4(1); so treaty-residence was decided under the tie-breaker test.[58]

The reader might think that the reasoning in the High Court was more convincing, but the point is moot because:

(1) The pre-2019 law is settled at all levels below the Supreme Court; and

(2) The law changed in 2019. In short, a trustee is now deemed to be UK resident for the whole year, if resident in any part of it.[59] That might be taken to decide residence for the purpose of the DTA. While not decisive, this does add a further argument in favour of the outcome of *Smallwood*

In *Smallwood* the outcome favoured HMRC. However the rule will sometimes favour the taxpayer, if

(1) Gains accure at a time when a person does not meet the requirements to be a resident of a treaty State under art 4(1)

[56] The court relied on s.69 TCGA. The wording of the section has changed, but the changes are not significant. The current wording reads:

> "*For the purposes of this Act* the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time)."

It might have been argued that s.69 does not apply for treaty purposes. However art.3(2) (undefined terms have domestic law meanings) would justify treating trustees as a continuing body of persons, so the decision on this point seems right.

[57] *HMRC v Smallwood* [2010] EWCA Civ 778 at [42].

[58] See 9.19.7 (POEM: Round the World scheme).

[59] See 56.6.4 (CGT/CT charge: UK residents).

(2) the person later meets those requirements, and retrospectively qualifies for relief.

Suppose:

(1) A company within s.3 TCGA is resident in Jersey during part of a tax year ("the Jersey resident period").
(2) The company becomes resident in State A under the law of State A during part of the tax year ("the State A resident period").
(3) Under the tax law of State A the company is liable to tax throughout both periods. That is, State A has a rule similar to that which applies to individuals and trusts in the UK.
(4) The company is at no time UK tax-resident.

A gain accruing in the Jersey resident period will retrospectively qualify for relief under a treaty between the UK and State A, which could benefit a UK participator within the scope of s.3. (Before the CoA's decision in *Smallwood*, an adviser might have thought that the company had to be able to say at the time the gain accrued. that it was resident under art 4(1) at that time, in order for treaty relief to apply. But now we know the position is looked at retrospectively.)

9.10 Tie-breaker tests

It is possible for a person to be:
(1) a resident of State A under art 4(1) during the whole of a tax year and
(2) a resident of State B under art 4(1) during the whole of the same period.

This may arise for various reasons:
(1) Two states may have different domestic-law definitions of residence.
(2) Residence (however defined) is distinct from presence: a person may be UK tax-resident throughout a year while only present in the UK during part of the year; such a person may be regarded by the foreign State as a resident of the foreign State.

In such cases tie-breaker tests are needed. There are two tests, or sets of tests. Article 4(2) deals with individuals. Article 4(3) deals with other persons, which I call **"entities"**; that includes companies, trustees and PRs.

9.11 Tie-breaker tests: Individuals

On this topic, see Avery Jones et al, “Dual Residence of Individuals: The Meaning of the Expressions in OECD Model Convention”, [1981] BTR 15 & 104
Maisto (ed.) *Residence of Individuals under Tax Treaties and EC Law* (2010)

For individuals, there are a series of tie-breaker tests, in order of priority:
(1) permanent home
(2) centre of vital interests
(3) habitual abode
(4) nationality
(5) mutual agreement

OECD Commentary provides:

> 10. To solve this conflict special rules must be established which give the attachment to one State a preference over the attachment to the other State. As far as possible, the preference criterion must be of such a nature that
> [1] there can be no question but that the person concerned will satisfy it in one State only,
> [2] and at the same time it must reflect such an attachment that it is felt to be natural that the right to tax devolves upon that particular State.

The last sentence reflects the conflict, endemic throughout taxation, between formal rules which offer more certainty, and rules which seek to track the economic reality, if there is such a thing.

The OECD Model and the USA/UK DTA use the same wording

9.12 Permanent home

Article 4 OECD Model/USA DTA provide:

> 2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:
>
> a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him;

For clarity of exposition it is helpful to consider separately the concepts of:
(1) “home”
(2) “permanent”
(3) “available”

But this neat analysis is not wholly practical: the three terms interact, for a property which is not "available" or "permanent" is less likely to be a "home".

9.12.1 *"Home"*

"Home" matters for many tax purposes; for a discussion, see 6.20 ("Home").

9.12.2 *"Permanent"*

The concept of "permanent" is as vague as the concept of "home". OECD Commentary on para 4(2) is untrammelled by the restraint of precision:

> 11 The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This criterion will frequently be sufficient to solve the conflict, eg where the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State.
> 12 Subparagraph (a) means, therefore, that in the application of the Convention (that is, where there is a conflict between the laws of the two States) it is considered that the residence is that place where the individual owns or possesses a home; this home must be permanent, that is to say, the individual must have arranged and retained it for his permanent use as opposed to staying at a particular place under such conditions that it is evident that the stay is intended to be of short duration.
> 13. ... But the permanence of the home is essential; this means that the individual has arranged to have the dwelling available to him at all times continuously, and not occasionally for the purpose of a stay which, owing to the reasons for it, is necessarily of short duration (travel for pleasure, business travel, educational travel, attending a course at a school, etc).

Para 11 of the Commentary looks at the situation where "the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State". The Commentary is not making a contrast between:
(1) permanent, and
(2) a stay of some length.

The point correctly being made is that the existence of one (undoubtedly) permanent home impacts on whether one regards *another* place as a permanent home.

Paras 12 and 13 contrast:

(1) permanent use, and
(2) a stay of short duration; exemplified as "travel for pleasure, business travel, educational travel, attending a course at a school, etc".

This suggests that a stay of more than short duration qualifies as permanent. Thus in *Hankinson v HMRC* an apartment was held under an 18 month lease. The taxpayer spent some 130 nights there in a period of 271 days (6 Apr 1998 - 2 Jan 1999). This was held to be a permanent home.[60]

A similar view is taken in Australia on the phrase "permanent place of abode":[61]

> "permanent" is used in the sense of something which is to be contrasted with that which is temporary or transitory. It does not mean everlasting. The question is thus one of fact and degree.[62]

9.12.3 *"Available"*

OECD Commentary provides:[63]

> For instance, a house owned by an individual cannot be considered to be available to that individual during a period when the house has been rented out and effectively handed over to an unrelated party so that the individual no longer has the possession of the house and the possibility to stay there.

In *McCabe v HMRC*,[64] the property was owned by the wife ("W") of the taxpayer ("H"). The circumstances were:

> (1) H was a welcome visitor to the property whenever he was in

[60] [2009] UKFTT 384 (TC) at [67]. The point was not discussed in the appeal. Likewise *Oppenheimer v HMRC* [2022] UKFTT 112 (TC) at [281]:

> "permanent" in that context is used objectively in contrast to "temporary". It is not subjectively in the sense of a place where the taxpayer intends to spend the rest of his life. That is not a high threshold...

[61] Section 6(1) [Australian] Income Tax Assessment 1936 provides: "resident or resident of Australia ... includes a person ... whose domicile is in Australia, unless ... his permanent place of abode is outside Australia".

[62] *Applegate v FCT* [1978] 1 NSWLR 126 at p.134, affirmed on appeal [1979] FCA 37; (1979) 38 FLR 1.

[63] Commentary on art 4 para 13.

[64] [2022] UKFTT 356 (TC) at [229].

> Scarborough. H did use it throughout the Relevant Period.
> (2) W would have given H permission to stay overnight whenever he wanted, and for as long as he wanted. The only reason he did not do so was that he had been advised not to for tax purposes.

In these circumstances it seems obvious that the property was "available" and the FTT so found. It added:

> Given the purposes of the DTC, I do not consider that I should place any weight on the artificial step of handing over his set of keys to Mrs McCabe when considering whether the house was available to Mr McCabe.

But it does not need a purposive construction to reach that conclusion.

9.13 Centre of vital interests

Article 4(2)(a) OECD Model/USA DTA provides (I include the French version as reference is made to this below):

if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State with which his personal and economic relations are closer (centre of vital interests);	si elle dispose d'un foyer d'habitation permanent dans les deux États, elle est considérée comme un résident seulement de l'État avec lequel ses liens personnels et économiques sont les plus étroits (centre des intérêts vitaux);

This test is only applied where the individual has a permanent home available to him in both States. If there is a permanent home in one State only, that is the State of residence. If there is no permanent home in either State, then one moves on to the habitual abode test.

9.13.1 *What is the CVI test?*

"Centre of vital interests" (CVI) is a convenient label for this test. But the actual test, in full, is where:

> his personal and economic relations are closer (centre of vital interests)

The brackets show that the words "centre of vital interests" are intended as an explanation, or paraphrase, and, perhaps a label, for the concept of where "personal and economic relations are closer".

There is some debate as to the meaning of "vital" interests. Hattingh and Avery Jones say that the English word is a mistranslation of a French original, and should read: "the centre of interests of his life"; the adjective *vitaux* derives from *vie*.[65] That makes perfect sense because then the phrase is an accurate and helpful explanation, or paraphrase, or label, of where "personal and economic relations are closer".

Oppenheimer v HMRC understood the word "vital" in its normal English sense:[66]

> "vital" meant "necessary or essential"... "…the things, in other words, that are of greatest importance…" to [the individual].

That somewhat overstates the point, because it does not give any weight to the words "[where] personal and economic relations are closer"; but it does not matter as long as the words are not understood too strictly.

Oppenheimer also cites the UN commentary to the United Nations Model:[67]

> Concepts such as 'centre of vital interest' and 'place of effective management' ... require a strong relationship between a taxpayer and a country.[68]

But even if it is right to cite the UN commentary[69] this does not take us very far, as

(1) "Strong relationship" is vague and evaluative; and

(2) However the CVI test is understood, there will always be a "strong relationship" in the circumstances envisaged here, which are that:
   (a) the individual is a resident of a State, and
   (b) the individual has a permanent home available in the State, and
   (c) their personal and economic relations are closer than elsewhere

One should not approach the CVI test by asking if the relationship is

[65] *Hattingh and Avery Jones* [2022] BTR 245. For use of French as an aid, see 107.10.5 (Treaty in two languages).

[66] [2022] UKFTT 112 (TC).

[67] Para 62.

[68] The UN Commentary continues:
"The fact that a taxpayer has a home available to him in a country where he sojourns frequently, is not enough to claim that that country is his centre of vital interests; likewise the mere fact that meetings of a board of directors of a company take place in a country is not sufficient to conclude that this is where the company is effectively managed."
But that is self-evident.

[69] See 107.11.7 (United Nations Commentary).

strong or sufficiently strong.

Oppenheimer records the taxpayer's submissions[70] that:

- The centre of vital interests is not easily moved.
- A move of State for a limited purpose is unlikely to shift the centre of vital interests.

These are two ways of making the same point. The Tribunal does not say expressly whether it accepted this view, though perhaps one might infer that it did. But this is considered to be the wrong approach. The mistake is to focus on the expression "centre of vital interests" and not the phrase which CVI is intended to explain, which is where "personal and economic relations are closer". But it depends on what nuance one gives to the evaluative expressions "not easily moved" and "for a limited purpose". If an individual goes to work in another country for 18 months, the Australian example discussed below, is that "for a limited period"? As the decision in *Oppenheimer* is final, these questions must be left for future litigation to resolve.

A similar expression, "centre of a debtor's main interests" is used in the EU Regulation on insolvency proceedings;[71] case law on that may be helpful in relation to the expression "centre of vital interests" but the wording and contexts are not the same, and we have more than enough cases specifically on treaty-tiebreaker, so there is no need to look further afield.

9.13.2 *Multfactorial test*

The test is multifactorial: no single factor is decisive. OECD Commentary provides:

> 15 If the individual has a permanent home in both Contracting States, it is necessary to look at the facts in order to ascertain with which of the two States his personal and economic relations are closer. Thus, regard will be had to
> [1] his family and social relations,
> [2] his occupations,
> [3] his political, cultural or other activities,
> [4] his place of business,
> [5] the place from which he administers his property, etc.

[70] at [30].

[71] (EC) No 1346/2000 (29 May 2000).

OECD Commentary gives some inkling of priority between the different factors:

> The circumstances must be examined as a whole, but it is nevertheless obvious that considerations based on the personal acts of the individual must receive special attention.

That does not take us very far, as most of the considerations will relate to "personal acts" and it is difficult to think of relevant considerations not based on personal acts of the individual.

Oppenheimer v HMRC[72] rejected the view that personal relationships trump economic relations, if they point in different ways:

> the correct approach is to consider both ties together and then determine with which State both economic and personal ties are closer.

Economic relations may be traced through trust and company structures.[73]

Oppenheimer v HMRC comments on the subjective aspects of the test:[74]

> we need to find facts about Mr Oppenheimer's thinking and, of course, that introduces a subjective element...
> intention alone is not sufficient to establish a movement in the centre of vital interests but it is relevant in assessing the level of attachment to a State, and indeed ... it could tip the balance.

9.13.3 *CVI examples*

Each case will turn on its own facts. They offer illustrations but are otherwise of little importance. In *Yates v HMRC*[75] the decisive point was that the taxpayer's partner (and financial support) was in the UK. The partner was the centre of the taxpayer's vital interests.

Similarly, in *Hankinson v HMRC*[76] the decisive points were the individual's wife and at least one of his sons were in the UK, and he had a house and investments here, as against a short term lease in the Netherlands. It seems a fairly plain case.

[72] [2022] UKFTT 112 (TC).

[73] That seems self-evident, but if authority is needed, see *Oppenheimer v HMRC* [2022] UKFTT 112 (TC) at [319]. Similarly, in *McCabe v HMRC*, the taxpayer's income was from a Belgian company, but what mattered was that all the Belgian company's income was from UK companies; see [2022] UKFTT 356 (TC) at [238]-[239].

[74] [2022] UKFTT 112 (TC) at [226], [230].

[75] [2012] UKFTT 568 (TC) at [126].

[76] [2009] UKFTT 384 (TC); the treaty-residence issue was not discussed in the appeal.

In *Oppenheimer* the facts fill more than 20 pages and it is not possible to see what facts were decisive.[77]

The Australian Revenue offer a helpful illustration:

> **Facts**
>
> The taxpayer and his spouse and children initially lived in the UK.
>
> The taxpayer accepted employment in Australia for a period of 18 months, which is the period in question.
>
> The taxpayer and his spouse and children moved to Australia for that period.
>
> The taxpayer and his spouse own family homes both in Australia and in the UK, and each home is maintained so that it can be used by the taxpayer or his family at any time.

Thus we apply the centre of vital interests test.

> Prior to, and during, the period in question, the taxpayer had business interests in both the UK and Australia.
>
> While the taxpayer lived in Australia, he managed both his Australian and UK business interests from Australia, but he made occasional short trips to the UK when it was necessary.
>
> The taxpayer is a member of several clubs in the UK. When he was living in the UK or visiting the UK he would regularly socialise with friends and with members of his extended family.
>
> While he was living in Australia the taxpayer did not join any clubs, and he did not socialise as regularly, as he did not have many friends or any extended family members in Australia.
>
> The taxpayer's hobby is attending cooking classes, and he attended cooking classes as often as he could, both in Australia and in the UK.
>
> During the 18 months that the taxpayer lived in Australia, he remained on the electoral roll in the UK but he was not on the Australian electoral roll.
>
> The taxpayer's children have a cat, which remained in the UK with friends while the taxpayer was living in Australia.
>
> At the end of the 18 months, the taxpayer and his spouse and children returned to the UK to live.
>
> **Reasons for Decision**
>
> [The decision refers to para 10 of OECD Commentary on art 4[78] and concludes:] In this case the relevant period is the 18 months that the

[77] For criticism of this decision, see *Hattingh and Avery Jones* [2022] BTR 245.

[78] See 9.16 (Period of enquiry: Tie-breaker).

taxpayer lived in Australia.

...

Klaus Vogel on Double Taxation Conventions[79] is consistent with paragraph 15 of the OECD Commentary on Article 4(2)(a) and states that 'personal relations encompass a taxpayer's entire way of life' .... This includes family and social, political and cultural relations. At paras 74 and 74a of p.249, Vogel suggests that factors that are part of a person's personal relations include intention to spend their old age at a certain place; possession of an identity card; enlistment on the electoral roll; and relations to a thing or to an impersonal entity such as a private collection or membership in a club or the exercise of a hobby.

[*Neutral pointers*] As the taxpayer pursued his hobby in both Australia and the UK, the hobby is not significant in deciding the centre of vital interests.

[*UK pointers*] The registration on the electoral roll; the club memberships; the presence of friends and extended family members and the family's cat; and the active social life when he visits the UK, are factors which point to the UK as the taxpayer's centre of vital interests during the 18 months that he is living in Australia.

[*Australian pointers*] However, at p.249, para 74a, Vogel states that the most significant factor in establishing to which state a taxpayer's personal relations are closer is where the taxpayer regularly lives with his family. Where a taxpayer lives alone, the location of any family members will be relevant if the taxpayer maintains relations with them. The taxpayer lived with his family in Australia during the 18 months in question. Even though he had strong ties with the UK during that time, the presence of his spouse and children in Australia carries greater weight.

Regarding economic relations, the OECD Commentary on Article 4 at paragraph 15 refers to 'the place from which he administers his property, etc'.

Consistent with this, Vogel at p.249, para 74b, states:

> **Economic relations will primarily exist with activities** linked with a locality or with sources of income. ... A permanent home mainly serving the realization or maintenance of economic relations, would be a manifestation of special ties with a place to live. This, will as a rule, be **that home from where the individual proceeds to perform his everyday work and from where he manages and**

[79] See *Klaus Vogel on Double Taxation Conventions* (4th ed., 2015), paras 92-101. The text of the current edition, which has changed somewhat from the 3rd edition referred to by the ATO, contains a helpful discussion.

> **controls his capital or income** (emphasis added).
>
> In this case, during the 18 months in question the taxpayer was employed in Australia so the home from where he proceeded to perform his everyday work was in Australia. In addition, although he made some trips to the UK when his business interests made it necessary, he generally managed his business interests from Australia during the time he lived in Australia.
>
> For the 18 months in question the taxpayer lived with his spouse and children in Australia, and generally managed his business interests from Australia. Consequently, even though he also had ties with the UK, the taxpayer's personal and economic relations, during the 18 months in question, were closer with Australia than with the UK.[80]

In short, an 18 month placement in Australia (with family) outweighed all the UK links, even the cat.

9.13.4 *Planning when CVI unclear*

CVI may often be unclear. It is possible to avoid the issue arising by arranging that the individual has a permanent home in one State and not in the other. If the individual has a permanent home in both states, and does not wish to sell one of them, the solution may be to grant a lease of one of them to an unconnected third party. Then the individual will be treaty-resident in the other State.

9.14 Habitual abode

Article 4(2)(b) OECD Model/USA DTA provides (I include the French version as reference is made to this below):

[i] if the State in which he has his centre of vital interests cannot be determined, or	si l'État où cette personne a le centre de ses intérêts vitaux ne peut pas être déterminé, ou
[ii] if he has not a permanent home available to him in either State,	si elle ne dispose d'un foyer d'habitation permanent dans aucun des États,
he shall be deemed to be a resident only of the State in which he has an habitual abode;	elle est considérée comme un résident seulement de l'État où elle séjourne de façon habituelle

[80] ATO ID 2011/53.

The habitual abode test applies in two cases:

(1) Where the individual has a permanent home available in both Contracting States and it is not possible to determine where is the centre of vital interests: the CVI test is too close to call

(2) Where the individual has no permanent home available in either Contracting State

I would have thought case (1) would rarely arise. A tribunal should normally be able to decide CVI one way or another. But it might happen if, say, an individual was resident in three or more countries.

OECD Commentary discusses this with a comment on habitual abode:

> 17 In the first situation, the case where the individual has a permanent home available to him in both States, the fact of having an habitual abode in one State but not in the other appears therefore as the circumstance which, in case of doubt as to where the individual has his centre of vital interests, tips the balance towards the State where he stays more frequently.

9.14.1 *Ascertaining habitual abode*

OECD Commentary continues:

> For this purpose regard must be had to stays made by the individual not only at the permanent home in the State in question but also at any other place in the same State.

OECD Commentary continues:

> 18 The second situation is the case of an individual who has a permanent home available to him in neither Contracting State, as for example, a person going from one hotel to another. In this case also all stays made in a State must be considered without it being necessary to ascertain the reasons for them.

OECD Commentary continues:

> 19. The application of the criterion provided for in [art 4(2)(b]) requires a determination of whether the individual lived habitually, in the sense of being customarily or usually present, in one of the two States but not in the other during a given period; the test will not be satisfied by simply determining in which of the two Contracting States the individual has spent more days during that period...
> As recognised in [art 4(2)(c)], it is possible for an individual to have an habitual abode in the two States, which would be the case if the

> individual was customarily or usually present in each State during the relevant period, regardless of the fact that he spent more days in one State than in the other. Assume, for instance, that over a period of five years,
> [1] an individual owns a house in both States A and B but
> [2] the facts do not allow the determination of the State in which the individual's centre of vital interests is situated.
> [3] The individual works in State A where he habitually lives but returns to State B two days a month and once a year for a three-week holiday.
> In that case, the individual will have an habitual abode in State A but not in State B.
> Assume, however, that over the same period of five years,
> [1] the individual works short periods of time in State A, where he returns 15 times a year for stays of two weeks each time, but
> [2] is present in State B the rest of the time
> [3] (assume also that the facts of the case do not allow the determination of the State in which the individual's centre of vital interests is situated).
> In that case, the individual will have an habitual abode in both State A and State B.

HMRC Self Assessment helpsheet HS302 (Dual Residents 2021) provides:

> **Habitual abode**
> This shows which of the 2 countries you live in regularly, normally or customarily. The test considers the frequency, duration and regularity of stays that are part of your settled routine for each country.

The OECD Commentary para 19 seeks aid from the French:

> The phrase *"séjourne de façon habituelle"*, which is used in the French version of subparagraph b), provides a useful insight as to the meaning of "habitual abode", a notion that refers to the frequency, duration and regularity of stays that are part of the settled routine of an individual's life and are therefore more than transient.

Similarly, *Hankinson v HMRC*:[81]

> In a case in the Tax Court of Canada ... *Lingle v R* 12 ILTR 55, Campbell J makes the point that the French equivalent to an habitual

[81] [2009] UKFTT 384 (TC); the issue was not discussed in the appeal. For use of French as an aid, see 107.10.5 (Treaty in two languages).

> abode is *où elle séjourne d'une façon habituelle* which means "where one stays[82] in an habitual way."

That does not take us much further. More usefully:

> In the overlap period [the appellant] did not stay in either state because he was in Barbados. We find that he did not have an habitual abode in either state during the overlap period. If it is possible to look at a longer period as required by paragraph 19 of the Commentary,[83] such as the UK tax year 1998-99, he stayed in an habitual way in both countries (some 130 nights in the Netherlands and 82 nights in the UK, including non-working days) and the intervals were fairly evenly spaced. We regard both of these as habitual.
>
> We do not read this test as purely a matter of counting days in spite of the Commentary's reference to "tips the balance towards the State where he stays more frequently" unless one is far larger than the other because the Treaty deals with the possibility of habitual abode being in both or neither state, which would virtually never arise with counting days. We would therefore decide if it were relevant that the Appellant had an habitual abode in neither state if only the overlap period were taken or that he had an habitual abode in both states if the tax year 1998-99 were taken.[84]

In *McCabe v HMRC*:[85]

> I do not accept [HMRC's] submission that the test is not comparative; it is plainly comparative, albeit that it is clear from the final limb of the tie-breaker and the 2017 Commentary, and illustrated by the decision in *Hankinson v HMRC* [2009] UKFTT 384 (TC), that an individual can have a habitual abode in both states.

And turning to the facts:[86]

> I have no hesitation in concluding that he had a habitual abode in Belgium. Mr McCabe spent 129 nights in Brussels in 2006-07 and 98

[82] Footnote original: We also point out that *séjourne* is also translated as "is present" in art 15(2)(c) of the Model: *le bénéficiaire séjourne dans l'autre État pendant une période ou des périodes n'excédant pas au total 183 jours durant toute période de douze mois*….("the recipient is present in the other state for a period or periods not exceeding in aggregate 183 days in any twelve month period…").

[83] See 9.16.2 (Enquiry period: Habitual abode).

[84] [2009] UKFTT 384 (TC) at [69].

[85] [2022] UKFTT 356 (TC) at [246].

[86] [2022] UKFTT 356 (TC) at [246].

> the following year; of the 85 occasions he was in Brussels, only two did not involve an overnight stay; the pattern of his travel is such that it was Brussels to where he was returning after his many overseas visits. His presence there was more than transient; he was customarily or usually present there.
> This is not the case for the UK. When reaching this conclusion, I take account of all of the facts in relation to Mr McCabe's physical presence in the UK (including the number of visits to the UK and days or part days in the UK) but pay particular regard to the limited number of nights spent in the UK (33 in 2006-07 and 43 the following year), and that the visits to the UK were generally for just one or two nights. The visits were frequent, but short and irregular. On balance, I conclude that he was not customarily present in the UK and did not have a habitual abode in the UK.

Oppenheimer v HMRC[87] offers another illustration; but each case will depend on its facts.

A person who is not tax-resident in a country may still have a habitual abode in that country. This may be why the word "abode" is used rather than residence.

9.15 Nationality/mutual agreement

Article 4(2)(c)(d) OECD Model/USA DTA provide:

> c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;
> d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This will rarely arise in practice.

9.16 Period of enquiry: Tie-breaker

OECD Commentary discusses this:

> 10. The facts to which the special [tie-breaker] rules will apply are those existing during the period when the residence of the taxpayer affects tax liability, which may be less than an entire taxable period. For example, in one calendar year

[87] [2022] UKFTT 112 (TC).

> [1] an individual is a resident of State A under that State's tax laws from 1 January to 31 March,
>
> [2] then moves to State B. Because the individual resides in State B for more than 183 days, the individual is treated by the tax laws of State B as a State B resident for the entire year.
>
> Applying the special [tie-breaker] rules to the period 1 January to 31 March, the individual was a resident of State A. Therefore, both State A and State B should treat the individual as a State A [treaty-]resident for that period, and as a State B [treaty-]resident from 1 April to 31 December.

9.16.1 *Enquiry period: CVI*

In *Oppenheimer v HMRC*:[88]

> we must look at each tax year in the Relevant Period, nevertheless, because of the possibly unique factual matrix ... we must also look at a broader perspective.

It is considered that one should look at the wider picture even in cases which do not have a "unique factual matrix".

History may be an important factor. The OECD Commentary provides:

> If a person who has a home in one State sets up a second in the other State while retaining the first, the fact that he retains the first in the environment where he has always lived, where he has worked, and where he has his family and possessions, can, together with other elements, go to demonstrate that he has retained his centre of vital interests in the first State.

9.16.2 *Enquiry period: Habitual abode*

OECD Commentary provides:

> 19.1 [Art 4(2)(b), habitual abode] does not specify over what length of time the determination of whether an individual has an habitual abode in one or both States must be made. The determination must cover a sufficient length of time for it to be possible to ascertain the frequency, duration and regularity of stays that are part of the settled routine of the individual's life. Care should be taken, however, to consider a period of time during which there were no major changes of personal circumstances that would clearly affect the determination (such as a separation or divorce). The relevant period for purposes of the

[88] [2022] UKFTT 112 (TC) at [229].

> determination of whether an individual has an habitual abode in one or both States will not always correspond to the period of dual-residence, especially where the period of dual-residence is very short.
> This is illustrated by the following example. Assume that
> [1] an individual resident of State C moves to State D to work at different locations for a period of 190 days.
> [2] During that 190-day period, he is considered a resident of both States C and D under their respective domestic tax laws.
> [3] The individual lived in State C for many years before moving to State D, remains in State D for the entire period of his employment there and returns to State C to live there permanently at the end of the 190-day period.
> [4] During the period of his employment in State D, the individual does not have a permanent home available to him in either State C or State D.

The OECD analysis is as follows:

> In this example, the determination of whether the individual has an habitual abode in one or both States would appropriately consider a period of time longer than the 190-day period of dual-residence in order to ascertain the frequency, duration and regularity of stays that were part of the settled routine of the individual's life.

In *Hankinson v HMRC*:[89]

> It seems therefore that while one applies the tie-breaker at the time of alienation in a case concerning capital gains, this does not mean that one cannot look at a longer period in applying the elements of the tie-breaker when appropriate, which it may not be for permanent home, but it is necessarily for habitual abode.

While one needs to determine whether a person is treaty-resident at a particular moment, or period, one looks over an appropriate period of time to determine whether they are treaty-resident at that moment.[90]

9.17 Tie-breaker: Entities

There are two main tie-breaker tests for entities (ie non-individuals). I refer to them as follows:

[89] [2009] UKFTT 384 (TC) at [60]. The issue was not discussed in the appeal.

[90] See 9.19.5 (Period for enquiry into POEM)). See too 4.24.7 (Period for domicile enquiry).

Tie-breaker	**OECD Model**	**See para**
Mutual agreement tie-breaker	Post-2017	9.18
POEM tie-breaker	Pre-2017	9.19

As early as 1978 some UK DTAs contained a mutual agreement tie-breaker.[91] The 2008 Update to the OECD Model Tax Convention offered the mutual agreement tie-breaker as an alternative to POEM. However a POEM tie-breaker remained the norm until 2017.[92]

There are different tests in some non-OECD Model treaties.[93]

The tie-breaker is only needed for a person who is a resident of both States under art 4(1). OECD Commentary provides:

> 21... It may be rare in practice for a company, etc. to be subject to tax[94] as a resident in more than one State, but it is, of course, possible if, for instance, one State attaches importance to the registration and the other State to the place of effective management. So, in the case of companies, etc., also, special rules as to the preference must be established.

9.17.1 *Person other than individual*

Art 4(3) OECD Model (both pre- and post-2017 forms) refers to "a person other than an individual".

That includes trustees. This may be said to follow from the distinct-person fiction[95] but I think it would be clear on first principles.[96]

OECD Commentary provides:

> 21. This paragraph [art 4(3)] concerns companies and other bodies of

[91] Eg the Canada/UK DTA (1978). Art 4(4) Netherlands/UK DTA (2008) roughly follows the OECD wording but has an exception, not considered here, for listed companies.

[92] See 9.19 (POEM tie-breaker).

[93] The report refers to art 4 commentary, para 24, 24.1; see 9.18 (Tie-breaker: Mutual agreement).

[94] This should read, "liable to tax" but it does not matter.

[95] See 7.3 (Trustees a distinct person).

[96] If authority is needed, which I doubt, see the IHT Manual:

> **IHTM353600 Claims by trustees in Ireland** [Mar 2016]
> Article 4(3) (Fiscal Residence) of the convention makes reference to 'a person other than an individual'. Trustees act as a body of persons and so are persons other than an individual for the purposes of the article, and we therefore refer to the criteria in Article 4(3) to determine whether trustees of an Irish trust are resident in the Ireland for the purposes of the convention...

persons, irrespective of whether they are or not legal persons.

9.18 Tie-breaker: Mutual agreement

From 2017, art 4(3) OECD Model and BEPS MLI[97] are effectively identical, with changes only to conform to MLI's terminology. The USA/UK DTA is broadly similar:

art 4(3) OECD Model	art 4(1) BEPS MLI	art 4(5) USA/UK DTA
[1] Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States,	[A] Where by reason of the provisions of a Covered Tax Agreement[98] a person other than an individual is a resident of more than one Contracting Jurisdiction,[99]	Where by reason of the provisions of paragraph 1 of this Article a person other than an individual is a resident of both Contracting States,
the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the Contracting State of which such person shall be deemed to be a resident for the purposes of the Convention,	the competent authorities of the Contracting Jurisdictions shall endeavour to determine by mutual agreement the Contracting Jurisdiction of which such person shall be deemed to be a resident for the purposes of the Covered Tax Agreement,	the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the mode of application of this Convention to that person.
having regard to [a] its place of effective management, [b] the place where it is incorporated or otherwise constituted and [c] any other relevant factors.	[identical to art 4(3) OECD Model].	[No equivalent]

Under the OECD Model, the States seek to agree which is the state of residence. Under the USA/UK DTA, the States seek to agree "the mode of application" of the DTA. But that seems to mean the same thing. The

[97] See 107.15 (BEPS MLI).

[98] See 107.16.3 (Covered Tax Agreement).

[99] See 107.16.2 (Contracting Jurisdiction/Signatory).

USA/UK DTA Technical Explanation[100] provides:

> Dual residents other than individuals (e.g., companies, trusts, and estates) are addressed by paragraph 5. If such a person is, under the rules of paragraph 1, resident in both Contracting States, the competent authorities shall seek to determine a single State of residence for that person for purposes of the Convention.

The Technical Explanation gives a straightforward example:

> For example, a company is treated as resident in the United States if it is created or organized under the laws of the United States or a political subdivision. Under U.K. law, a company is treated as a resident of the UK if it is either established there or managed and controlled there. Dual residence, therefore, can arise if a U.S. company is managed and controlled in the UK. Paragraph 5 provides that the competent authorities will try to determine a single State of residence for such a company.

The mutual agreement tie-breaker confers a wide Revenue discretion, but governments do not seem to regard that as objectionable.[101]

9.18.1 *Relevant factors*

The OECD Model refers to POEM[102] and place of incorporation and "any other relevant factors." OECD Commentary provides:

> 24.1 Competent authorities having to apply [art 4(3)] would be expected to take account of various factors, such as
> [a] where the meetings of the person's board of directors or equivalent body are usually held,
> [b] where the chief executive officer and other senior executives usually carry on their activities,
> [c] where the senior day-to-day management of the person is carried on, where the person's headquarters are located,
> [d] which country's laws govern the legal status of the person,
> [e] where its accounting records are kept,
> [f] whether determining that the legal person is a resident of one of the Contracting States but not of the other for the purpose of the Convention would carry the risk of an improper use of the

[100] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[101] See 2.8 (The Rule of Law).

[102] See 9.19 (POEM tie-breaker).

> provisions of the Convention etc...

There is no express equivalent in the UK/US DTA, but one would expect the same approach to apply.

9.18.2 *Mutual agreement procedure*

OECD Commentary provides:

> 24.2 A determination under [art 4(3)] will normally be requested by the person concerned through the mechanism provided for under paragraph 1 of Article 25 [Mutual agreement procedure].[103] Such a request may be made as soon as it is probable that the person will be considered a resident of each Contracting State under paragraph 1. Due to the notification requirement in paragraph 1 of Article 25, it should in any event be made within three years from the first notification to that person of taxation measures taken by one or both States that indicate that reliefs or exemptions have been denied to that person because of its dual-residence status without the competent authorities having previously endeavoured to determine a single State of residence under [art 4(3)]. The competent authorities to which a request for determination of residence is made under [art 4(3)] should deal with it expeditiously and should communicate their response to the taxpayer as soon as possible.
>
> 24.3 Since the facts on which a decision will be based may change over time, the competent authorities that reach a decision under that provision should clarify which period of time is covered by that decision.

Even in the case of a POEM tie-breaker, the two States may of course seek to resolve residence (and other) issues under the mutual agreement procedure.

9.18.3 *Position if no agreement*

art 4(3) OECD Model	**art 4(1) BEPS MLI**	**art 4(5) USA/UK DTA**
[2] In the absence of such agreement, such person shall not be entitled to any relief or exemption from tax provided by this Convention	[B] In the absence of such agreement, such person shall not be entitled to any relief or exemption from tax provided by the Covered Tax Agreement	If the competent authorities do not reach such an agreement, that person shall not be entitled to claim any benefit provided by this Convention,

[103] See 113.1(Mutual agreement procedure).

except to the extent and in such manner as may be agreed upon by the competent authorities of the Contracting States.	except to the extent and in such manner as may be agreed upon by the competent authorities of the Contracting Jurisdictions.	except those provided by **Article: Topic**[104] Art 24(4): Foreign tax credit Art 25: Non-discrimination Art 26 Mutual agreement (MAP)

OECD Commentary provides:

> 24.4 The last sentence of [art 4(3)] provides that in the absence of a determination by the competent authorities, the dual-resident person shall not be entitled to any relief or exemption under the Convention except to the extent and in such manner as may be agreed upon by the competent authorities. This will not, however, prevent the taxpayer from being considered a resident of each Contracting State for purposes other than granting treaty reliefs or exemptions to that person. This will mean, for example, that the condition in subparagraph b) of paragraph 2 of Article 15 will not be met with respect to an employee of that person who is a resident of either Contracting State exercising employment activities in the other State. Similarly, if the person is a company, it will be considered to be a resident of each State for the purposes of the application of Article 10 to dividends that it will pay.

The USA/UK DTA Technical Explanation[105] provides:

> If the competent authorities do not reach an agreement on the single State of residence, that person may not claim any benefit provided by the Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-Discrimination), and Article 26 (Mutual Agreement Procedure). Thus, for example, a State cannot discriminate against a dual resident company, and such a company can bring issues to the competent authorities.
>
> Dual resident companies also may be treated as resident for purposes other than that of obtaining benefits under the Convention. For example, if a dual resident company pays a dividend to a resident of the UK, the U.S. paying agent would withhold on that dividend at the appropriate treaty rate because reduced withholding is a benefit enjoyed by the resident of the UK, not by the dual resident. The dual resident company that paid the dividend would, for this purpose, be treated as a resident

[104] For clarity, I set this out in a table format, and abbreviate the section descriptions. For the provisions referred to, see 111.2 (DTA/Unilateral Credit compared); 112.1 (Non-discrimination).

[105] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> of the United States under the Convention. In addition, information relating to dual resident companies can be exchanged under the Convention because, by its terms, Article 27 (Exchange of Information and Administrative Assistance) is not limited to residents of the Contracting States.

9.18.4 *The MLI change*

Article 4 BEPS MLI[106] provides:

> 2. Paragraph 1 shall apply in place of or in the absence of provisions of a Covered Tax Agreement that provide rules for determining whether a person other than an individual shall be treated as a resident of one of the Contracting Jurisdictions in cases in which that person would otherwise be treated as a resident of more than one Contracting Jurisdiction. Paragraph 1 shall not apply, however, to provisions of a Covered Tax Agreement specifically addressing the residence of companies participating in dual-listed company arrangements.

Art 4(3) BEPS MLI provides a variety of opt-outs but the UK has not opted out of this provision.

As required by art 4(4) BEPS MLI, HMRC have published a list of DTAs with tie-breaker provisions, which will be replaced by the mutual agreement tie-breaker under the MLI.[107]

9.18.5 *MLI transitional rules*

It is possible that as a result of the MLI change, a person who was formerly treaty-resident in one treaty-state under the POEM test, becomes treaty-resident in the other treaty-state, at the time the MLI takes effect. It is also possible that a person may change treaty-residence at any time as a result of changed view of the Revenue authorities, or as a result of some change in circumstances, which need not include a change in POEM. But in practice I expect that this will be exceptional.

The INTM provides:

> **INTM120070: 'Treaty non-resident' companies** [Sep 2021]
> **... DTAs with standard tie-breakers**
> ... Following Action Point 6 of the Base Erosion and Profit Shifting

[106] See 107.15 (BEPS MLI).

[107] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

(BEPS) project, the tie-breaker provision of Article 4(3) of the OECD Model Tax Convention was amended from one based on the entity's 'place of effective management' to one based on a determination by the Competent Authorities. A number of the UK's existing DTAs, including those with Canada and the Netherlands, already include this type of tie-breaker. However, many others will be modified to give effect to this recommendation through the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (MLI). As such, the Competent Authority based tie-breaker can now be referred to as the 'standard tie-breaker'.

Where an existing DTA is modified by the MLI and a company was subject to the tie-breaker of Article 4 and determined to be resident in only one of the countries before the modification came into effect, HMRC will generally not seek to revisit any previous determination of the treaty residence position so long as all the material facts remain the same. However, if the arrangements in relation to which the determination has been made are such that any treaty benefits under them would be denied under the conditions of the Principal Purpose Test (PPT) in paragraph 9 of Article 29 of the 2017 OECD Model Tax Convention then HMRC would review the prior determination. Where HMRC believes arrangements in relation to which the determination has been made are such that any treaty benefits under them would be denied under the conditions of the PPT, HMRC may seek a new determination from the date on which the modification came into effect.

In other cases, where the material facts change after the modification came into effect, HMRC would generally seek for any new determination (or the loss of treaty benefits pursuant to the absence of a mutual agreement) to apply only to income or gains arising after the new determination (or notice to the taxpayer of the absence of an agreement) but this will depend on the facts and circumstances.

HMRC cannot however apply the above approach unilaterally and will be subject to agreement between the Competent Authorities.

Such agreement has been reached with the New Zealand Competent Authority and so any previous determination would be 'grandfathered' as set out above. HMRC has also agreed with the Netherlands Competent Authority that in cases where the residence position has previously been determined under either the 1980 or 2008 UK/Netherlands DTC (before the latter was modified by the MLI), that determination will be 'grandfathered' as set out above.

In 2018, HMRC entered into new DTAs with Jersey, Guernsey and Isle of Man. These DTAs include standard tie-breakers. HMRC has agreed

> with the Competent Authorities of those territories that where a company was determined to be resident in either territory under the previous Arrangement that determination will be 'grandfathered' as set out above.
>
> As the standard tie-breaker depends on the agreement of the Competent Authorities, the CTA09/S18 rule cannot be applied unilaterally by HMRC. It can only apply where the respective Competent Authorities have made a determination of residence and residence has been formally awarded to the other country. As is clear from the wording of the legislation, the absence of a claim by a company will not prevent S18 from being applied following a determination by the Competent Authorities. However, it is likely that bilateral negotiations will generally be initiated following discussions between the company and at least one of the tax authorities concerned

9.18.6 *A cautionary tale*

The issue of residence under a mutual agreement tie-breaker arose in the context of a Round the World scheme, under which:

(1) Trustees resident in Canada were appointed for a short period, April - December 2001 ("the Canadian period").
(2) UK trustees were appointed in December 2001.

The Round the World scheme worked on the basis that the trustees were residents of Canada, during the Canadian period, under the treaty tie-breaker.

The advisers overlooked that the Canada/UK DTA applied a *mutual agreement* tie-breaker rule, not the (former) OECD Model POEM tie-breaker. CRA and HMRC agreed that the trust should be treaty-resident in the UK during the Canadian period, so DT relief did not apply.

The only surprise is that:

(1) it took until 2013 for the two authorities to reach that decision (the reason for the decade delay is not given); and
(2) (for limitation purposes) the Court considered that the loss from the adviser's negligence only arose in 2013, so the negligence claim was not out of time.

I would have thought that the authorities' decision on treaty-residence was inevitable from the outset, and so the loss arose in 2001.[108] However that

[108] *Evans v PricewaterhouseCoopers* [2019] EWCH 1505 (Ch). I mention this case only for illustration: The actual decision concerned limitation issues which are

may be, the moral of the story for tax advisers is to read the treaty, and not assume it follows OECD Model form.

9.19 POEM tie-breaker

Until 2017, art 4(3) OECD Model provided (I include the French version as reference is made to this below):

> *Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident only*[109] *of the State in which its place of effective management is situated.*

> *Lorsque, selon les dispositions du paragraphe 1, une personne autre qu'une personne physique est un résident des deux États contractants, elle est considérée comme un résident seulement de l'État où son siège de direction effective est situé*

I refer to this as the POEM tie-breaker.[110]

The majority of UK DTAs originally had this form. Now, the mutual agreement tie-breaker is the standard form, but POEM still matters because:

(1) A number of treaties still have the POEM tie-breaker.

(2) The OECD mutual agreement tie-breaker refers to POEM as a relevant consideration. Where POEM is clear it should be an important consideration;[111] but where POEM is unclear, or marginal, it will not.

9.19.1 *One place of effective management*

Pre-2017 the OECD Commentary provided:

> 24. ... *An entity may have more than one place of management, but it can have only one place of effective management at any one time.*[112]

outside the scope of this work, and the facts are not likely to recur.

[109] The word "only" was not originally in the 1992 Model, and was added, but presumably only for the avoidance of doubt.

[110] See Avery Jones, "Place of Effective Management as Residence Tie-Breaker" (2005) 59 Bulletin for International Fiscal Documentation 1, 20; Avery Jones, "2008 OECD Model: Place of Effective Management- What can we learn from the History?" (2009) 63 Bulletin for International Taxation 183.

[111] See 9.18 (Tie breaker: Mutual agreement).

[112] The point is made in *Oceanic Trust Co Ltd v Commissioner for South African*

It makes sense in the context of a POEM tie-breaker clause, that there can only be one POEM, for if there were two, the tie breaker would not work.

In practice it would be unusual that the management would be so decentralised that a court is unable to identify one place as that of effective management, so the issue of whether there could be two POEMs is not likely to arise.[113]

9.19.2 *POEM: Top level management*

Pre-2017 OECD Commentary provided:

> 24. ... *The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made.*[114]

This has often been cited and adopted in UK cases, as one would expect.[115]

In *Wensleydale's Settlement Trustees v IRC*:

> The place of effective management is where the shots are called, to adopt a vivid transatlantic colloquialism.[116]

This slang may be a vivid metaphor, but it hinders clarity of thought:

> [Counsel for the taxpayer] warned about adopting alternative paraphrases such as "calling the shots" because in a way shareholders called the shots but this was not a relevant type of control.[117]

It is better to refer to the place where the most important decisions are made, which allows focus on the issue of what constitute the most important questions. Thus in *Lee v HMRC*:

> the essential question is, where were the most important decisions relating to the governance, or management, of the Settlements taken?

Revenue Service (2011) 15 ITLR 172 at [54] cited in *Lee v HMRC* [2017] UKFTT 279 (TC) at [61].

[113] Contrast 8.16 (Dual residence/no CMC).

[114] The passage continues: "All relevant facts and circumstances must be examined to determine the place of effective management." But that is self-evident.

[115] Eg *HMRC v Smallwood* [2008] UKSPC SPC00669 at [124], even though this comment originated in an amendment to the OECD Commentary made after the date of the relevant treaty

[116] [1996] STC (SCD) 241 at p 250j.

[117] *HMRC v Smallwood* [2008] UKSPC SPC00669 at [114].

> The first step in the enquiry, as it seems to me, is to identify what were the most important decisions.[118]

The UN Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries 2019 provides:[119]

> 215. There was uncertainty, however, concerning the meaning of "place of effective management".
> [1] Some countries considered that this referred to a place, such as the headquarters of a company, where an entity was managed on a day-to-day basis
> [2] while other countries considered that this referred to the place where the most senior person or groups of persons (such as the board of directors of a company) reached their decisions.

The UK is clearly in group [2], and I find it hard to see how the approach of group [1] ("day-to-day management") could be reconciled with the OECD Commentary ("key decisions").

9.19.3 *POEM: Real management*

There are, inevitably, references to "real" effective management. In *HMRC v Smallwood*:[120]

> We believe 'effective' should be understood in the sense of the French *'effective'* (*siège de direction effective*) which connotes real, French being the other official version of the [OECD] model, though not of the [Mauritius/UK] treaty.

And similarly:

> we adopt [counsel's] reference to "realistic, positive management".[121]

This does not take matters much further. The word "real" never does and "realistic" is even worse.[122]

[118] [2017] UKFTT 279 (TC) at [74].

[119] *https://financing.desa.un.org/sites/default/files/2023-03/manual-bilateral-tax-treaties-update-2019.pdf*

[120] [2008] UKSPC SPC00669 at [102] approved [2010] EWCA Civ 778 at [60]. For use of French as an aid, see 107.10.5 (Treaty in two languages).

[121] *HMRC v Smallwood* [2010] EWCA Civ 778 at [114] referring to *Wood v Holden* [2006] EWCA Civ 26 at [6].

[122] See App.7.1 (What do we mean by "Real"?); App.7.8 (Realistic view of facts).

9.19.4 *POEM/CMC compared*

The former ITH provided:

> **ITH348 Company residence: proposed new test: place/effective management**
> ... At one time the view of the UK was that our domestic concept of central management and control meant the same thing as place of effective management and there was a note to this effect in the Commentary on the 1977 OECD Model Double Taxation Convention.

This note, which lasted from 1977 to 1992, provided:[123]

> Concerning conventions concluded by the United Kingdom which provide that a company shall be regarded as resident in the State in which "its business is managed and controlled", it has been made clear, on the United Kingdom side, that this expression means the "effective management" of the enterprise.

The ITH continues:

> We no longer believe that necessarily to be so and the note does not appear in the 1992 edition of the OECD Model.
> The place of effective management is generally understood to be the place where the Head Office is: the Head Office in the sense of - not the registered office - but the central directing source. The place where one would expect to find the finance director, for example, the sales director and, if there is one, the managing director. The company records would normally be found there together with the senior administrative staff.
> If that Head Office were to be, let us say, in the Netherlands the place of effective management would not be altered if the directors chose to hold their occasional formal meetings in Belgium. ... We think our revised idea of effective management and the attempted 1981 definition[124] are nearer at least to our European Community partners' management tests than is central management and control. Nevertheless it is not that easy to divorce effective management from central management and control and in the vast majority of cases they will be located in the same place.

[123] This is set out in OECD, *Model Tax Convention on Income and on Capital 2017 (Full Version);* the OECD's "Condensed Version" does not include historical notes. *https://read.oecd-ilibrary.org/taxation/model-double-taxation-convention-on-income-and-capital_9789264055919-en#*

[124] See 8.24 (Company residence: Critique).

SP 1/90 also refers to the pre-1992 OECD Commentary and continues:

> 22... It is now considered that effective management may, in some cases, be found at a place different from the place of central management and control. This could happen, for example, where a company is
> [1] run by executives based abroad, but
> [2] the final directing power rests with non-executive directors who meet in the UK.
> In such circumstances the company's place of effective management might well be abroad but, depending on the precise powers of the non-executive directors, it might be centrally managed and controlled (and therefore resident) in the UK.

In *HMRC v Smallwood*:

> [In] *Wood v Holden* ... Chadwick LJ expressed the view that it was difficult to draw any meaningful distinction between the two tests [POEM, and CMC] but that even if they did in fact differ in substance, they were unlikely to lead to different results.[125]

The difference (if any) between top level control (CMC), and key management decisions (POEM) is one of almost imperceptible nuance; what matters is that both stress "top level" or "key supervision" and neither are concerned with day-to-day management. So there never has been a case where an entity had CMC in one place and POEM in another; and it seems safe to say that there never will be.

There is a difference that there can only be one POEM, but there could (at least theoretically) be two or more places of CMC, or perhaps no CMC.

In *HMRC v Smallwood* the Special Commissioners say:

> There was thus some debate about whether, or to what extent, POEM differed from CMC [central management and control]. We consider that this misses the point; the two concepts serve entirely different purposes.

[125] [2010] EWCA Civ 778 at [58]. This is right, though, for completeness, Chadwick LJ actually made the point more circumspectly, [2006] EWCA Civ 26 at [6]:

> "It is not clear—at least, not clear to me—whether the art 4(3) test [POEM] differs in substance from the *De Beers* test [CMC]; and, if the two tests are not, in substance, the same, I find it very difficult to see how, in the circumstances which the Special Commissioners had to consider, they could lead to different answers."

> [1] CMC determines whether a company is resident in the UK or not;
> [2] POEM is a tie-breaker the purpose of which is to resolve cases of dual residence by determining in which of two states it is to be found.
>
> CMC is essentially a one-country test; the purpose is not to decide where residence is situated, but whether or not it is situated in the UK…
>
> POEM, on the other hand, must be concerned with what happens in both states since its purpose is to resolve residence under domestic law in both states, caused for whatever reason, which could include incorporation in one state and management in the other, or different meanings of management applied in each state, or different interpretations of the same meaning of management applied in each state, or divided management. One must necessarily weigh up what happens in both states and ... decide in which state the place of effective management is found.[126]

But this is only theoretical, because in practice dual residence (CMC in two places or in none) does not arise.[127]

In practice, POEM cases and guidance refer extensively to CMC case law, which makes sense if they are (more or less) the same.

A different analysis was adopted by the UT in the second *Haworth* case.[128] I find this difficult to follow; but discussion should wait until the decision is final.

9.19.5 *Period for enquiry into POEM*

While one needs to determine whether a person is treaty-resident at a particular moment, one looks over an appropriate period of time to determine POEM.[129] The issue is where key management and commercial

[126] [2008] UKSPC SPC00669 at [111]-[112]. This case concerned a trust, but the same applies to a company: *Laerstate BV v HMRC* [2009] UKFTT 209 at [48]. See Avery Jones, "The Definition of Company Residence in Early UK Tax Treaties" [2008] BTR 556.

[127] See 8.16 (Dual residence/no CMC).

[128] *Haworth v HMRC* [2024] UKUT 58 (TCC)

[129] This is self-evident, but if authority is needed, see *HMRC v Smallwood* [2010] EWCA Civ 778 at [47]:

> "Both sides approached [the POEM] issue by reference to what the Special Commissioners described as the Mauritius period: i.e. the period up to and including the sale of the shares during which [the Mauritian trustee] remained the trustee. This was on the basis that it is in respect of the Mauritius period that the

decisions are regularly and predominately made.

9.19.6 *Round the World schemes*

As many POEM cases involved a (so called) Round the World scheme, it may be helpful at this point to explain this scheme.

The scheme was designed for a settlor-interested trust where:

(1) The trust was not UK resident.
(2) The trust was within s.86 (ie the settlor was UK resident & domiciled).
(3) The trust was (originally) resident in a tax haven which had no DTA with the UK (or if there was a DTA, it did not cover chargeable gains); for the purpose of discussion, say, Jersey.

If the trust realised a gain, the settlor would therefore be chargeable.

The scheme involved two simple steps and a commercial sale:

(1) The original (say, Jersey) trustees retired in favour of trustees who were residents of a State which had a DTA conferring CGT relief in OECD Model form (commonly, Mauritius).[130]
(2) The Mauritius trustees sold the trust asset and realised a gain.
(3) The Mauritius trustees retired in favour of UK resident trustees.[131]

The tax analysis was:

(1) The settlor was not taxed under s.86 because the trust was UK resident in part of the tax year.[132]
(2) The settlor was in principle within s.77 TCGA (long repealed) but claimed 3rd party treaty relief.[133]
(3) If the UK trustee were subject to CGT, they too claimed treaty relief

trustees are chargeable to tax in both Contracting States."

Contrast 9.16 (Period of enquiry: Tie-breaker).

[130] If the facts were that the trust was already in a state with a DTA, say, Mauritius, then step 1 would not be needed. None of the reported cases were of that kind, so they all began with the move to Mauritius.

[131] The reader may have considered a similar arrangement where the non-resident trust was not within s.86 but is within s.87. In the absence of an anti-avoidance provision, the same steps could be taken in order to avoid a s.1(3) amount (trust gain). But this is caught by s.88 TCGA; see 61.38 (Dual resident trust: s.88 TCGA).

[132] See 60.9 (Trust residence condition)..

[133] Section 77 TCGA formerly charged the settlor on gains of a settlor-interested trust which was resident in the UK in any part of the year. The settlor claimed third-party DT relief, which HMRC accepted could apply; see 109.1 (Third-party DT relief).

I wonder who came up with the catchy title "Round the World". It is not entirely inapt.

The scheme was stopped by statute in 2005.[134]

This scheme was widely used, and in due course, widely litigated. The key to the scheme was the availability of DTA relief at step (2). This required a POEM in Mauritius during the Mauritian period. The cases raise several interesting issues, but first and foremost, POEM.

The schemes had the following important features:

(1) The scheme was devised by tax advisers in the UK.
(2) Under the scheme:
    (a) Trustees in the foreign treaty state acted only for a few months.
    (b) Those trustees disposed of a significant trust asset.
    (c) UK trustees were appointed in the tax year of disposal.

The trustees argued that POEM was in the foreign State as the foreign trustees were managing the trust there during their period of office HMRC argued that POEM was in the UK as the settlor and/or professional advisers in the UK were the true managers.

One might regard this as a usurpation/rubber stamping issue.

Cases on Round the World schemes include:

Case: Level	**Topic**	**See**
Tax cases:		
Smallwood: CoA	POEM	
Lee: FTT	POEM	
1st Haworth case: SC	Follower notices/POEM	
2nd Haworth case: UT	POEM	
Wesley: FTT	POEM	[2023] UKFTT 1041 (TC)
Non-tax cases		
Evans v PWC: HC	Negligence; Limitation; Need to read DTA (!)	9.18.6
MacKay v Wesley: HC	Validity of appointment of UK trustee	*Not discussed*

Round the World schemes (in short) succeeded on all points other than the factual issue of POEM. But to lose on that was to lose on everything.

"Flip-flop" schemes were common at about the same time. After some vacillation, the s.87 version of these schemes succeeded, or at least those of them which held out to the end of the battle.[135] But the successful "flip-

[134] See 56.26 (Immigrant trust: DTR override).

[135] See 62.2 (Flip-flop schemes).

flop" schemes won on issues of law, and the unsuccessful Round the World schemes lost on issues of fact.

What lessons should be learned from this? I leave readers to ponder over that. Perhaps the most important point is that the tax world today is very different from what it was in the year 2000. Though we should hardly need to be told that.[136]

9.19.7 *POEM: Round the World scheme*

HMRC v Smallwood[137] was the first case on the Round the World scheme. In *Smallwood* a trust had three different trustees, resident in different states, in the course of the tax year 2000/01:

Apr - Dec: a Jersey resident trustee
Dec - March: a Mauritius resident trustee ("the Mauritian period")
March onwards: UK resident trustees

The trustees sold an asset, realising a gain, during the Mauritian period. It was necessary to find the POEM during the Mauritian period.[138]

As there is (more or less) no difference between CMC/POEM, the same distinction should drawn between influence and usurpation/rubber stamping, which is discussed in CMC cases.[139]

Patten LJ (dissenting) adopted the traditional usurpation test:[140]

> the question [is]
> [1] whether the effective decision by [the Mauritian trustee] to implement the tax scheme and to sell the shares was taken by the board of directors of that company, albeit on the advice and at the request of KPMG Bristol, or
> [2] whether the [trustees] effectively ceded any discretion in the matter to KPMG by agreeing to act in accordance with their instructions.
> Given that the directors of [the trustee] remained in place and exercised their powers as directors to effect the sale, the approach to this issue

[136] See 2.5 (Attitudes to tax avoidance).

[137] [2010] EWCA Civ 778.

[138] See 9.9.3 (Trust residence moves in tax year).

[139] Eg, South African Interpretation Note: No. 6 (Issue 2) (2015) *https://www.sars.gov.za/wp-content/uploads/Legal/Notes/LAPD-IntR-IN-2012-06-IN-6-Resident-Place-of-effective-management-companies.pdf*
For the "usurpation/rubber stamping" case law, see 8.6 (Central management/control test) ff.

[140] at [61].

> suggested by Chadwick LJ in *Wood v Holden* must be the right test.

Applying this test[141]

> ... the Special Commissioners ... accepted ... that there was no agreement that [the Mauritian trustees] would behave in a certain way or make certain decisions as a quid pro quo for the introduction of the trust and that had the sale of the shares not been in the interests of the beneficiaries as at the date of the sale then [the trustee] would not have agreed to sell.
> ... [the trustees] accepted the advice of KPMG to proceed with and implement the scheme in the interests of the beneficiaries. But they retained their right and duties as trustees to consider the matter at the time of alienation and did not ... agree merely to act on the instructions which they received from KPMG.
> The function of the directors was not therefore usurped in the sense described in *Wood v Holden*. It seems to me to follow that the Special Commissioners' conclusions are not ones which were therefore open to them on the evidence or on the findings of fact which they made.

But the majority reached the opposite conclusion:

> [68] If the question were the POEM of the particular trust company trustee for the time being at the moment of disposal, namely [the Mauritian trustee], then it may (?) be that the reasoning in *Wood v Holden* would justify the conclusion that the Commissioners fell into this kind of error. ... their findings do not go so far as findings that the functions of [the Mauritian trustee] were wholly usurped, and I agree that *Wood v Holden* reminds us that special vehicle companies (or, no doubt, special vehicle boards of trustees) which undertake very limited activities are not necessarily shorn of independent existence; indeed they would be ineffective for the purpose devised if they were.

So far, so conventional.

> [69] But it seems to me that to apply this reasoning to the present case is to ask the wrong question, and indeed to return to the rejected snapshot approach. The taxpayers with whom we are concerned ... are the trustees. Trustees are ... treated as a continuing body...
> On the primary facts which the Special Commissioners found ... I do not think that it is possible to say that they were not entitled to find that the POEM of the trust was in the UK in the fiscal year in question.

[141] at [62] - [63].

The Court then explains why:

> The scheme was devised in the UK by Mr Smallwood on the advice of KPMG Bristol. The steps taken in the scheme were carefully orchestrated throughout from the UK, both by KPMG and by Quilter. And it was integral to the scheme that the trust should be exported to Mauritius for a brief temporary period only and then be returned, within the fiscal year, to the UK, which occurred. Mr Smallwood remained throughout in the UK. There was a scheme of management of this trust which went above and beyond the day to day management exercised by the trustees for the time being, and the control of it was located in the UK.[142]

It seems to me that various arguments are suggested here.

The first is that one determines POEM on the basis of a whole year and not on the basis of the "brief temporary" Mauritian period (in fact, 2½ months). But that cannot be right.[143]

The second rejects the usurpation test. But the majority actually said that they were not doing this.

The third argument is that the Special Commissioners were entitled to find as a fact that discretion of the Mauritian trustee was usurped. On that basis *Smallwood* depends on its facts; and that is the analysis adopted in *Haworth, (R oao) v HMRC* ("the first *Haworth* case"):[144]

> Hughes LJ did not decide that it was an inevitable consequence of a scheme which shared the *Smallwood* pointers[145] that its POEM would be the UK and not Mauritius. All the members of the Court of Appeal accepted that the test was that set out in the Commentary ... that "no

[142] *HMRC v Smallwood* [2010] EWCA Civ 778 at [70].

[143] See 9.19.5 (Period for enquiry into POEM).

[144] [2021] UKSC 25 at [75].

[145] Seven "*Smallwood* pointers" were identified at [31]:
1 The applicable DTA had POEM tie-breaker (as was then standard form)
2 The taxpayer was UK resident.
3 The scheme or arrangements had been devised in the UK.
4 The steps taken in the scheme were carefully orchestrated throughout from the UK.
5 The trust was exported to the overseas territory for a brief period only.
6 The trust returned to the UK in the tax year.
7 The arrangements were implemented in a way which integrated these features. (Point 7 does not seem to add much to points 1-6, but it does not matter).
In practice Round the World schemes (almost) always met these "pointers".

> definitive rule can be given and all relevant facts and circumstances must be examined to determine the place of effective management". Although Hughes LJ summarised the findings of the Special Commissioners in para 70 of his judgment, he was not, in my view, listing those pointers as being necessary and sufficient to establish in any other case that the POEM of the trust is the UK. On the contrary, he referred to the full description of the primary facts found by the Special Commissioners as set out in the judgement of Patten LJ as supporting their finding that in Mr Smallwood's case, the POEM of their trust had been the UK.

The reader may think the dissenting judgment of Patten LJ is more convincing, but so far as the outcome depended on its facts, rather than a point of law, it does not matter - at least, as a matter of strict law. A legal realist may think that *Smallwood* is one of those cases where decision came first and grounds later.

A different, analysis was adopted by the UT in the second *Haworth* case.[146] I find this difficult to follow; but discussion should wait until the decision is final.

The reader can draw the conclusion that a Round the World scheme, and any avoidance scheme involving short term residence in a treaty State, needed meticulous care in execution if it is not to fail on factual POEM grounds.

9.19.8 *POEM of trust*

POEM is the tie-breaker for trusts (and estates), as well as for companies, even if the trustees (or PRs) are individuals.[147]

The test of POEM of a trust is the same as for a company, though the approach and terminology used requires adaptation to reflect trust structures.

The International Manual provides:

> **INTM353600. Claims by trustees in Ireland** [Mar 2016]
>
> ...
>
> ***Criteria for determining the place of effective management of an Irish trust***
>
> You need to find out who generally controls and supervises the work of administering the trust. By administering the trust we mean: keeping

[146] *Haworth v HMRC* [2024] UKUT 58 (TCC).

[147] See 9.21 (Treaty-residence: Trusts).

> accounts, conducting correspondence, arranging the trustees' meetings and putting the trustees' decisions into effect.
>
> ***If the trustees are all individuals***
>
> You will need to find out which of the trustees is responsible for the tasks outlined above, and the dates and locations of all trustees' meetings held during the period of the claim.
>
> ***If a professional body acts as a trustee***
>
> You can accept that the place of business of the professional body is the place of effective management of the trust.
>
> For this purpose the professional body is appointed by the testator or settlor of the trust, and does not include:
>
> - An individual who is a solicitor or an accountant
> - An agent or an attorney administrator appointed by the trustees
>
> ***Residence of a professional body***
>
> If a professional body acting as a trustee is a branch in Ireland of a UK bank or similar institution, it is considered to be in Ireland for the purposes of Article 4(3). A UK branch of an Irish bank would however not be considered to be in Ireland.

This is commenting on the Ireland/UK DTA which at the time adopted a POEM tie-breaker. But these are broad generalities which may give way to the facts of the particular situation.

9.19.9 *Trust Fund CMC in Australia*

The Australian Revenue have given guidance on "central management and control"of a superannuation fund (which is a trust) and it is considered this is also helpful to the concept of POEM of a trust. I only set out selections here:[148]

> ***Meaning of 'central management and control' in the context of a superannuation fund***
>
> 111. ... the question arises as to whether the CM&C test that is applied to companies can also be applied to determine the meaning of CM&C as it relates to superannuation funds.[149]
>
> ... despite differences between the kinds of activities a company may undertake and those

[148] Taxation Ruling TR 2008/9, "Income tax: meaning of 'Australian superannuation fund' in subsection 295-95(2) of the Income Tax Assessment Act 1997" *https://www.ato.gov.au/law/view/document?DocID=TXR/TR20089/NAT/ATO/00001*
Some footnotes are omitted.

[149] For the CM&C test for companies see TR 2018/5 discussed at 8.1 (Company residence: Introduction).

of a superannuation fund, we consider that an analogy can be drawn between the business activities of a company and the activities of a superannuation fund in that the activities of a superannuation fund, like the business activities of a company, require personal control and direction. Accordingly, we consider that the principles established in cases dealing with the operation of the CM&C test in relation to companies are capable of application to determine the meaning of CM&C as it relates to superannuation funds....

115. Like companies, determining the CM&C of a superannuation fund involves a focus on the who, when and where of the strategic and high level decision making of the fund.

116. In the context of the operations of a superannuation fund, the strategic and high level decision making of the fund includes the performance of the following duties and activities:

- formulating the investment strategy for the fund;
- reviewing and updating or altering the investment strategy of the fund as well as monitoring and reviewing the performance of the fund's investments;
- if the fund has reserves - the formulation of a strategy for their prudential management; and
- determining how the assets of the fund are used to fund member benefits, for example the decision to segregate certain fund assets to support superannuation income stream benefits.

117. The other principal areas of operation of a superannuation fund that form part of the day-to-day or operational side of the fund's activities will not constitute CM&C. These activities do not form part of the CM&C of the fund because they are not of a strategic or high level nature. Rather, these activities are of a more formalistic or administrative nature. Examples of such activities include the acceptance of contributions that are made on a regular basis, the actual investment of the fund's assets, the fulfilment of administrative duties[150] and the preservation, payment and portability of benefits.

118. Furthermore, in accepting such contributions, paying benefits and in the fulfilment of administrative obligations, the prudential requirements in SISA, the governing rules of the fund and other legislative requirements are merely being complied with. As emphasised by the courts in the context of companies, compliance with statutory requirements is not, of itself, sufficient to constitute CM&C but rather is a matter to be taken into account in determining where the CM&C is located...

Who exercises the CM&C of the fund?

119. As mentioned above, the majority of superannuation funds operate under a trust structure. According to the general law of trusts, a trust is not a legal person but rather is a collection of rights, duties and powers arising from the relationship to property held by the trustee for the benefit of beneficiaries. Therefore, the trustee is the legal person to that relationship. Since the legal responsibility for operating and managing the fund, including the responsibility for performing the high level duties and actions mentioned in paragraph 116 of this Ruling rests solely with the trustee, it is the trustee of the fund who has the legal obligation for exercising the CM&C of a fund.

122. ... the trustee's duty or responsibility to carry out or perform those activities that constitute CM&C does not, of itself, amount to CM&C. It is only by performing those

[150] Footnote original: Such as lodging the regulatory and income tax return for the fund, the preparation of financial statements, the audit of the fund and record-keeping.

> high level duties and activities that the trustee will be exercising the CM&C in practice. There also may be situations where a person other than the trustee is exercising the CM&C of the fund...
>
> ***Delegation of the investment management function***
>
> 128. The trustee of a superannuation fund will often appoint an investment manager to invest the assets of the fund, consistent with the investment strategy of the fund, on behalf of the trustee. Importantly, the investment manager is subject to a prudential requirement under SISA to periodically provide information to the trustee of the fund regarding the making of, and return on those investments and to provide such information as is necessary to enable the trustee to assess the capability of the investment manager to manage the investments of the fund.
>
> 129. The delegation of the investment management function to an investment manager does not mean however that the investment manager is exercising the CM&C of the fund in any sense. This is because the trustee is still controlling the operations of the fund by ensuring that the investments of the fund are consistent with the investment strategy of the fund and by monitoring and evaluating the performance of the investment manager. Further, the actions of the investment manager in investing the assets of the fund in accordance with the fund's investment strategy comprise part of the day-to-day or 'operational' side of the operations of the fund rather than the strategic or high level decision making activities of the fund...

9.20 POEM: Critique

The POEM tie-breaker test has arisen in tax avoidance cases. I refer to these as "POEM avoidance cases". Examples are the Round the World cases, and *Wensleydale*.

9.20.1 *POEM in avoidance cases*

Strictly, an avoidance context is irrelevant to POEM.[151] But the reader may think that an unspoken policy of defeating tax avoidance has in practice been a factor in determining the result in POEM avoidance cases. The policy is not wholly "unspoken". OECD Commentary provides:

> 24.5 Some States, however, consider that it is preferable to deal with cases of dual residence of entities through the rule based on the "place of effective management" that was included in the Convention before 2017. These States also consider that this rule can be interpreted in a way that prevents it from being abused.

I do not think that the UK was formerly one of the States that considered that the POEM rule could be interpreted in a way that prevented abuse. However the Principal Purpose Test (inserted into treaties by the BEPS

[151] See 6.39.1 (Avoidance irrelevant to residence tests).

MLI) will now achieve this.[152]

9.20.2 *Change from POEM*

OECD report BEPS Action 6 explains the background to the change from POEM to mutual agreement tie-breaker:[153]

> ... a company is a dual-resident often involve tax avoidance arrangements. For that reason, the current rule found in Article 4(3) should be replaced by the [Mutual agreement tie-breaker], which allows a case-by-case solution of these cases.

OECD Commentary provides:

> 22. When [art 4(3)] was first drafted, it was considered that it would not be an adequate solution to attach importance to a purely formal criterion like registration and preference was given to a rule based on the place of effective management, which was intended to be based on the place where the company, etc. was actually managed.
> 23. In 2017, however, the Committee on Fiscal Affairs recognised that although situations of double residence of entities other than individuals were relatively rare, there had been a number of tax-avoidance cases involving dual resident companies. It therefore concluded that a better solution to the issue of dual residence of entities other than individuals was to deal with such situations on a case-by-case basis.

Was this a good reason? Certainly, Round the World schemes were common, but that could have been (and indeed was) dealt with by more targeted legislation (as was the scheme in *Wensleydale*). How often did this problem arise elsewhere? OECD Commentary refers to “a number of tax-avoidance cases”. OECD report BEPS Action 6 went further and said that dual-resident companies *often* involve tax avoidance arrangements. Perhaps that “often” was an exaggeration, but it is hard to say. Did the problem of avoidance justify the substantial increase in Revenue power conferred by a mutual agreement tie-breaker? Or could it be justified by the advantage that we will no longer have unsatisfactory POEM case law? Perhaps there is now less uncertainty than before?[154] Discuss.

[152] See 108.8 (Principal purpose test).

[153] OECD/G20 “Preventing the Granting of Treaty Benefits in Appropriate Circumstances” (BEPS Action 6); (2015), p.72.

[154] See 3.27.2 (Avoidance concept defended).

9.20.3 *Modern business practice*

Van der Merwe identifies difficulties with CMC, which apply equally to POEM:

> ... the phrase was coined when companies were generally organised in a hierarchical structure and management could be located at a specific point within a certain period of time. However, modern companies are increasingly run and managed divisionally rather than through the legal entities in which the divisions are formed. This has resulted in an organisational network spread across different countries.

The second point is perhaps more serious:

> Also, due to modern technology, management has become much more mobile and traditional places of effective management may rotate. Technology has furthermore made it possible to manage without the need for a group of persons to be physically located or to meet in one place, for instance at the company's headquarters. Because of these changed management structures and technology, effective management based on where the directors meet becomes a matter of choice and manipulation. Even when based on a wider interpretation of key management and decision making, it is evident that technology makes it difficult to pin effective management down to one constant location...[155]

These difficulties were not cited as the driver for the change from POEM to mutual agreement tie-breaker, but perhaps they might have been.

The reader may think that this discussion of the merits of the change from POEM to mutual agreement is of academic interest only. The mutual agreement tie-breaker is now established. But exactly the same considerations arise in relation to the central management and control test of company residence. Here, however, it has not (yet?) been suggested that CMC should be replaced by a HMRC discretion to determine corporate residence.

9.21 Treaty-residence: Trusts

The first step is to identify who is the "person" for treaty purposes.[156]

[155] Van der Merwe, "The Phrase 'place of effective management': Effectively Explained?" 18 SA Merc LJ 121 at p.124-125.

[156] See 9.4 (Treaty-person).

9.21.1 *Trust law background*

The use of the word "person" always requires some care.[157]

Three propositions are well established:

(1) A trust is not a person (ie does not have legal personality). This is the case in the trust law of England, Scotland,[158] and, as far as I know, all common law jurisdictions.[159] (In other jurisdictions, trusts or trust-like entities generally do have legal personality.)

(2) A trustee is a person.

(3) It is often convenient to distinguish:
(a) a person acting in their capacity as trustee and
(b) that person acting in their private capacity.
However trust law does not usually recognise the concept of separate personality: as there is only one person, the person acting in one capacity is not a different person from the person acting in another capacity. For instance, a person (as trustee) cannot enter into a contract with himself or herself (in a private capacity, ie as an individual) because of the rule in English law[160] that a contract must be made between distinct persons.[161]

[157] See App.2.6 (Person).

[158] The Scottish Law Commission discussed but rejected a proposal to give trusts legal personality: *Discussion Paper on the Nature and the Constitution of Trusts* (2006) para 2.29-2.45 *https://www.scotlawcom.gov.uk/download_file/view/128*

[159] Though a trust is close to being a person. Gretton, "Trusts Without Equity" (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5:

> "In ordinary language the noun 'trust' is a person word. Idiom treats it like 'company'. 'This land is owned by a trust.' 'These shares are held by a trust'. ... 'The trust is liable for this debt.' Ordinary language is right."

So one should not rule out the possibility that context may show that the word "person" is used (loosely rather than strictly) to mean or include a trust.

[160] The contract law position may be different in Scotland: McBryde, *The Law of Contract in Scotland*, (3rd ed, 2007) para. 3-05 n.11: "A [person] might contract with himself under a different title, e.g. as an individual and as an executor". But the trust law rule is the same; see *Shenken v Phoenix Life* [2015] CSOH 96 at [24]:

> "From the perspective of [Phoenix Life] as debtor under the policy, Mr Schwartz was a single, indivisible, legal person. Either he had title, as a matter of law, to receive the policy proceeds or he did not. If he had had title ... then it would not have mattered, in my view, if he had purported to claim payment in the wrong capacity; the defenders would still have paid the correct person and their liability would have been extinguished."

[161] Discussion of the topic demands reference to *The Mikado:*

Ko-Ko. Pooh-Bah, it seems that the festivities in connection with my approaching

One might say that the source of difficulty is not the rule that a trust is not a person: it is the rule that a trustee does not have a separate personality. But perhaps that comes to the same thing. However that may be, this rule (or its consequences) can be overridden by context. Despite that rule, references in legislation to "individuals" have always been understood to exclude trustees even if the trustees are individuals in their private capacity. Likewise, references to "trustees" exclude individuals. That usage takes us towards some concept of separate personality. Further, for IT/CGT purposes, a trustee is deemed to be a distinct, notional person.[162] So in an IT/CGT context, at least, rule (3) does not apply: the person acting as trustee *is* in principle regarded as a separate person from the

marriage must last a week. I should like to do it handsomely, and I want to consult you as to the amount I ought to spend upon them.

Pooh-Bah. Certainly. In which of my capacities? As First Lord of the Treasury, Lord Chamberlain, Attorney General, Chancellor of the Exchequer, Privy Purse, or Private Secretary?

Ko-Ko. Suppose we say as Private Secretary.

Pooh-Bah. Speaking as your Private Secretary, I should say that, as the city will have to pay for it, don't stint yourself, do it well.

Ko-Ko. Exactly – as the city will have to pay for it. That is your advice.

Pooh-Bah. As Private Secretary. Of course you will understand that, as Chancellor of the Exchequer, I am bound to see that due economy is observed.

Ko-Ko. Oh! But you said just now "Don't stint yourself, do it well".

Pooh-Bah. As Private Secretary.

Ko-Ko. And now you say that due economy must be observed.

Pooh-Bah. As Chancellor of the Exchequer.

Ko-Ko. I see. Come over here, where the Chancellor can't hear us. Now, as my Solicitor, how do you advise me to deal with this difficulty?

Pooh-Bah. Oh, as your Solicitor, I should have no hesitation in saying "Chance it"

Ko-Ko. Thank you. I will.

Pooh-Bah. If it were not that, as Lord Chief Justice, I am bound to see that the law isn't violated.

Ko-Ko. I see. Come over here where the Chief Justice can't hear us. Now, then, as First Lord of the Treasury?

Pooh-Bah. Of course, as First Lord of the Treasury, I could propose a special vote that would cover all expenses, if it were not that, as Leader of the Opposition, it would be my duty to resist it, tooth and nail. Or, as Paymaster General, I could so cook the accounts that, as Lord High Auditor, I should never discover the fraud. But then, as Archbishop of Titipu, it would be my duty to denounce my dishonesty and give myself into my own custody as first Commissioner of Police.

Ko-Ko. That's extremely awkward.

[162] See 7.3 (Trustees a distinct person).

same person acting in their private capacity.

9.21.2 *Trustees under OECD Model*

One would expect:

(1) Trustees (if more than one) to be treated as one person ("a trustee-person"). That avoids the difficulty which may arise if a trust has trustees resident in different places in their private capacities.

(2) Where there is a single trustee, that person is to be treated as a person (again, I use the expression "trustee-person") who is distinct from the individual or company who is the trustee, acting in their private capacity. That allows for the possibility that the person may be treaty-resident in one State in their private capacity and treaty-resident in another State in their trustee capacity.

Is there any difficulty in reading the model treaty to reach this result? Where there is more than one trustee, there is no difficulty at all: the trustees should be regarded as a body of persons (and so constitute one person) for treaty purposes. That trustee-person is necessarily distinct from the persons who act as trustees.

Where there is a sole trustee, it should still be regarded as a person distinct from the person who is actually the trustee in their private capacity. It would be odd to have one rule for a sole trustee and another where there is more than one trustee. One way to reach this result is to say that even a sole trustee is a "body of persons". A single person constitutes a body of persons, because the current trustee together with successors and predecessors constitute the "body". A corporation sole may be an example.

Another way to reach this result is to say that "person" is to be understood by reference to domestic tax law, domestic IT/CGT law treats the trustee as a separate person, despite the trust law rule to the contrary; and so the same rule applies for treaty purposes.

The trustee-person is not an individual, so in a tie-breaker case, its treaty-residence is decided by the POEM rule, not the rule for individuals (which would obviously not be appropriate).

Another possible analysis would be that the *trust* is a person for OECD Model purposes (a treaty-person). There are two difficulties with that:

(1) A trust is not a "person" in English law.

(2) Even if the trust were a treaty-person, it is only a resident of a State under art 4(1) if it is a person "liable to tax". Whether a person is liable to tax is a matter of domestic law. In UK law, it is the trustees

rather than trust which is liable to tax.

These arguments are not insuperable: since treaties can be purpively construed, there are no words from which there is no escape. One could say that a trust is a treaty-person even though not a person in English law; and that the trust is "liable to tax" (in the treaty sense) since the trust fund will bear the tax. But there is no need to take this high-handed course, as to regard the trustee or trustees as a distinct trustee-person is the simpler and more satisfactory solution.[163]

INT Manual provides:

> **INTM162120. Certificates of Residence: for trusts** [Sep 2021]
> Trusts are not themselves liable to tax in the UK, but the trustees may be liable to tax in the UK. A trust therefore cannot be a resident of the UK for the purposes of most UK DTAs. Accordingly a Certificate of Residence (CoR) cannot normally be issued in respect of a trust...
> Trustees as a body (rather than the trust) are regarded as a single person. Where the trustees as a body are regarded as resident in the UK they will be entitled to the benefits of a DTA as they are liable to tax in the UK in respect of the income of the trust. Subject to the comments in the next paragraph a CoR can be issued in respect of a UK resident body of trustees.

9.21.3 *Trust a person in foreign trust law*

As noted above, a trust is not a person in English law or in trust law jurisdictions which follow English law. It is of course possible that a foreign law might classify a trust as a person. Thus a trust in Mauritius was found to be a person. But it made no difference to the applicability of treaty relief.[164]

The same would apply to the estate of a deceased person.

9.21.4 *Trusts: Non OECD Model DTAs*

INT Manual provides:

[163] It has been suggested that the question whether the person for the purposes of OECD Model is the trustees (as a body) or the trust is purely theoretical; it makes no difference in practice. I have some sympathy with that view. But (1) it is always good to know what one is talking about; (2) HMRC need to know what name(s) to put on a residence certificate: the trust or the trustee(s).

[164] *Lee v HMRC* [2017] UKFTT 279 (TC) at [87]. For the consequences, see 109.2 (Third-party DT relief).

> **INTM162120. Certificates of Residence: for trusts** [Sep 2021]
> ... However, some trusts are included within the definition of 'resident of a Contracting State' in specific DTAs. In those limited circumstances a certificate of residence can be issued in respect of a trust. It is therefore essential that the relevant DTA is checked on receipt of all applications.

An example is art 3(1) USA/UK DTA: a trust included in the definition of person in this DTA.[165]

9.22 Treaty-residence: Partnerships

This section considers whether a partnership is a treaty-resident of a State. For other DT issues see 85.25 (DT relief for partnership).

9.22.1 *Partnership a treaty-person*

The first question is whether a partnership is a treaty-person, ie a person for treaty purposes.[166] Before turning to the OECD Model definition, one might expect a partnership to be a treaty-person, since:

(1) It avoids difficulty which would arise if a partnership had partners who were resident in different places in their private capacity.
(2) It avoids an undesirable distinction between English partnerships (which are not legal persons in the English law sense) and Scottish partnerships (which are).
(3) "It is highly improbable that so common a vehicle for commercial activity as a partnership should have been intended to be excluded" from a DTA.[167]

Article 3(1)(a) OECD Model provides that the term "person" includes an individual, a company and any other body of persons.[168] There are three bases for arguing that a partnership is a treaty-person ie within this definition:

(1) A partnership is a body of persons, and so within the definition (the "body of persons" argument).
(2) A partnership is a person in the ordinary sense of the expression (the "ordinary person" argument.)

[165] See 9.4.1 (Person: Treaty definition).
[166] See 9.4 (Treaty-person).
[167] *Padmore v IRC* 62 TC 352 at p.377.
[168] See 9.4.1 (Person: Treaty definition)..

(3) Partners (being individuals or companies) are persons (in their private capacities) and a partnership is a person because the singular includes the plural (the singular/plural argument).

Discussion is made more difficult because of the variety of wording in different treaties.

The body of persons argument succeeded in *Padmore v IRC*, where a partnership was held to be a person for the purposes of the former Jersey/UK DTA. This was a pre-1963 DTA,[169] and the definition of "person" was not quite OECD Model form:

> The term "person" includes any body of persons, *corporate or not corporate*

The court held that a partnership is a body of persons in the ordinary sense of that term. Accordingly it constituted a treaty-person within that definition.

The Revenue referred to the statutory definition. What is now s.898 ITA/1119 CTA 2010 provides:

> 'Body of persons' means any body politic, corporate or collegiate, and any company, fraternity, fellowship and society of persons whether corporate or not corporate".[170]

That is, the Revenue argued:

(1) a partnership (although a body of persons in the general sense) was not a body of persons in this UK tax law sense and
(2) the UK tax law sense applied in the treaty because of the general rule that undefined treaty terms have domestic tax law meanings.[171]

The court's reason for rejecting the argument at point (2) was equally subtle:

> If that [UK tax law] definition [of body of persons] is applicable, a partnership is (I will assume) not within it; because a partnership cannot be brought within any of the groups specified in the definition.[172] ...

[169] See 107.24 (Pre-1963 DTAs).

[170] Jersey Law has a provision in the same terms; see *Padmore v IRC* 62 TC 352 at p.377. The terms used in the definition are of historical significance only, and it is a pity that the tax law rewrite failed to modernise and simplify this, but there it is.

[171] The relevant provision of the former Jersey/UK DTA was similar to OECD Model form; see 107.12 (Undefined treaty terms).

[172] This is supported by s.681DL(7) ITA, which expressly provides that a body of

> however ... the [UK tax law] definition is not applicable. The draftsman of the Arrangement in para 2(1)(d) was giving a comprehensive definition of the word "person". If he was assuming that the statutory definition of "body of persons" would apply, I see no reason why he should have added the words "corporate or not corporate". They form part of the Article 2(1)(d) definition itself, and their inclusion had no purpose if the statutory definition applied. I do not think that they can be dismissed as mere tautology. On the face of the Arrangement they are a specific part of what is intended to be a self-contained definition for the purposes of the Arrangement. They are not, it seems to me, consistent with an intention on the part of the draftsman to utilise the statutory definition. They indicate a contrary intention. A partnership is, as a matter of the ordinary use of English, plainly a body of persons, and the language used by the draftsman does not, in my opinion, indicate that he was intending any different meaning.

Unfortunately that reasoning does not apply to OECD Model definition, since that lacks the words "corporate or not corporate."[173] It is however considered that "body of persons" in OECD Model should still be given its ordinary meaning rather than its UK tax meaning. It is relevant to note that the term does not have a UK tax meaning, only an income tax meaning. There is no definition for CGT. Thus a partnership is a body of persons (within the meaning of the OECD Model) and so a treaty-person within the OECD definition.

Avery Jones agrees:[174]

> ...it is hardly likely that the other State, if it had troubled to ask in the course of negotiations what body of persons meant in UK tax law, would wish to have an 18th century list of bodies govern the interpretation of the treaty. It is therefore not difficult to say that the context otherwise requires, and one should include partnerships either within the ordinary meaning of body of persons, or merely by reading the singular as the plural.[175] On the basis a partnership may be included

persons includes a partnership.

[173] See 9.4.1 (Person: Treaty definition).

[174] Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464.

[175] Footnote original: This was mentioned as a possibility in *Padmore* [1989] STC 493, 498G but Fox L.J. stated that this was not sufficient for the taxpayer to succeed, as those persons were not all resident in Jersey. It is not clear why persons in partnerships should not be given a single residence under TA 1988, s.112, which the court held to be applicable for the purpose of interpreting the treaty...

> in those cases where wording similar to the 1977 Model is used.[176]

Alternatively one could fall back on the ordinary person or the singular/plural arguments. One difficulty with that is that the OECD model wording has varied over time:

1977 Model & subsequent Models	**1963 draft Model**
the term "person" *comprises* an individual, a company and any other body of persons;	the term "person" *means* an individual, a company and any other body of persons;

Both forms of wording are found in actual treaties. Avery Jones comments:

> Normally in modern UK treaties the definition of person is that it *comprises* an individual, a company and any other body of persons, which was the wording of the 1963 model; at first sight this might prevent the ordinary meaning of*person* from being used.[177] The official French version of the Model, however, uses the same word *comprend* in both the 1963 and the 1977 versions. There may therefore be no difference between it and the 1977 Model, which makes it difficult to see why the UK persists in using the 1963 wording. In eight treaties the word *means* is used instead of the Model's *includes*, in which case the ordinary meaning, in addition to the defined meaning, of person cannot be used. But certainly where *includes* and probably in the light of the French version where *comprises*, is used, the argument that the context includes partnerships under the ordinary meaning of body of persons is still available, as these words are not intended to be comprehensive. It is considered that partnerships are so included under that wording, on the basis that they cannot have been intended to be excluded.[178]

It is considered that any of these arguments will suffice, so a partnership is a treaty-person in all treaties, though the precise arguments must vary from one wording to another. OECD Commentary to art 3 supports this view:

> Partnerships will also be considered to be "persons"

[176] Footnote original: See art 1 Comm. Paras. 2-6 of the application of OECD Model to partnerships. The UK gives a residence to a partnership: TA 1988, s.112(1).

[177] Footnote original: OECD Commentary (art 3 Comm. Para.2), however, stated that the provision was not worded as an exhaustive definition and should be read as indicating that the term person is used in a very wide sense.

[178] Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464.

[1] either because they fall within the definition of "company"[179]
[2] or, where this is not the case, because they constitute other bodies of persons.

9.22.2 *Partnership "liable to tax"*

Even though a partnership is a person, it only qualifies as a resident of a treaty State within OECD definition if it is a person liable to tax. Whether a person is liable to tax is a matter of domestic law.

In UK law, it is the partners rather than the partnership which is liable to tax. Partners are of course "persons" in their private capacity. They can be treaty-resident in the UK. It seems that a partnership (though a "person") cannot be treaty-resident in the UK. A partnership could (depending on the foreign domestic law) be treaty-resident in a foreign State.

INT Manual provides:

> **INTM162110 certificates of residence: for partnerships** [Sep 2021]
> UK partnerships (including English and Scottish LPs and UK LLPs) cannot be resident in the UK for the purpose of most of the UK's DTAs, because they are not themselves liable to tax in the UK. Only in a few limited circumstances, when the DTA specifically states that a partnership can be regarded as resident, such as in the UK/Argentina DTA, will HMRC be able to issue a Certificate of Residence (CoR) in the name of the partnership.

This is correct.

Similarly the OECD Commentary on art 4:

> 8.13 Where a State disregards a partnership for tax purposes and treats it as fiscally transparent, taxing the partners on their share of the partnership income, the partnership itself is not liable to tax and may not, therefore, be considered to be a resident of that State In that case, however, paragraph 2 of Article 1 clarifies that the Convention will apply to the partnership's income to the extent that the income is treated, or purposes of taxation by that State, as the income of a partner who is a resident of the State. The same treatment will apply to income of other entities or arrangements that are treated as fiscally transparent under the tax law of a Contracting State (see paragraphs 2 to 16 of the Commentary on Article 1).

[179] This is not the case for UK partnerships, though it may be for foreign partnerships; see 30.15.4 ("Company" in OECD Model).

OECD, “The Application of the OECD Model Tax Convention to Partnerships” (1999) expands on this:

> 38. ... In many countries, the tax laws provide that income derived by a partnership from a particular source must be computed at the partnership level as if the partnership were a distinct taxpayer. Each partner is then allocated his share of that income which retains its character and is added to his income for purposes of determining his taxable income. His taxable income, including his share of the partnership’s income is then reduced by the personal allowances and deductions to which he is entitled and tax is then determined, assessed and paid at the partner’s level. In such cases, it is clear that the partnership is not itself liable to tax.

That is the UK tax system.

> 39. In other countries, the income and the tax payable is computed in a similar way, but the tax payable by the partners is then aggregated at the level of the partnership which is then assessed for the total amount of the tax. In these cases, the assessment of the tax in the hands of the partnership is a collection technique that does not change the fact that the tax payable on the income of the partnership is determined at each partner’s level taking into account the other income of that partner, the personal allowances to which he is entitled and the tax rate applicable to him (which may vary depending on his total income or his nature). In such cases, the partnership is also not liable to tax.

This was the pre-1995 UK tax system.

> 40. The Committee agreed that for purposes of determining whether a partnership is liable to tax, the real question is whether the amount of tax payable on the partnership income is determined in relation to the personal characteristics of the partners (whether the partners are taxable or not, what other income they have, what are the personal allowances to which they are entitled and what is the tax rate applicable to them). If the answer to that question is yes, then the partnership should not itself be considered to be liable to tax. The fact that the income is computed at the level of the partnership before being allocated to the partners, that the tax is technically paid by the partnership or that it is assessed on the partnership as described in the preceding paragraph will not change that result.
>
> 41. The fact that a partnership may be said to be liable to tax in a State will not, however, be sufficient for it to be considered a resident of that State for purposes of tax conventions. Paragraph 1 of Article 4 also

> requires that the liability to tax in that State be caused by one of the criteria listed therein (e.g. residence, domicile etc.). Thus, for a partnership to be a resident of a Contracting State, it has to be liable to tax in that State by reason of one of these criteria.[180]

However HMRC do not always apply this view in practice.

9.22.3 *Partnership claim on behalf of partners*

INT Manual provides:

> **INTM162110 certificates of residence: for partnerships** [Sep 2021]
> ... As a result [of fiscal transparency], partnerships are not themselves entitled to claim benefits under most of the UK's DTAs. However, partnerships will usually be able to claim benefits on behalf of those of its partners who are residents of the UK.[181]

HMRC allow claims from US partnerships. There is no reason why American partnerships should be treated better than other partnerships, and other partnerships could therefore seek to obtain similar treatment, even though there would be no legal remedy if HMRC insist on applying the strict law. In practice HMRC practice has been inconsistent: they have sometimes certified that a partnership is treaty-resident and sometimes

[180] This view was rejected in India: *Linklaters LLP v Income Tax Officer* [2010] ITELR 245. However in India (unlike the UK) a partnership is treated as a person for income tax purposes: s.2 [India] Income Tax Act 1961.

[181] The BI Manual repeats the point in relation to LLPs:
"**BIM82145 Limited Liability Partnership: international aspects** [Jun 2016]
...A UK LLP is not itself liable to tax in the UK as the LLP tax provisions identify other persons (i.e. the members) as the persons who are to be taxed. Accordingly for the purposes of the DTAs the LLP is not regarded as being resident in the UK and cannot itself therefore claim relief from foreign taxes under such agreements. As is the case with ordinary and limited partnerships the members must make the claim. Assuming they are UK residents in accordance with the provisions of the relevant DTA the members of a LLP are entitled to relief for any withholding tax on overseas dividends. Normally a DTA provides for withholding tax of a maximum of 15% to be deducted and relief for that tax given. Where a partner is an individual then no relief is due in respect of the taxes paid (the underlying taxes) on the profits out of which the dividend is paid.
In the very narrow circumstances where the LLP is not treated as transparent, but instead as a body corporate for tax purposes (such as when the LLP is in liquidation or being wound up in circumstances where transparency cannot be retained), we take the view that the LLP can itself claim relief for foreign taxes, including if appropriate underlying tax."

refused to do so. Comment on this point by OTS[182] may lead to greater consistency.

INT Manual provides:

> **INTM335510. Background** [Sep 2021]
>
> ***How Double Taxation Agreements treat partnerships***
>
> DTAs do not normally give a tax-transparent concern such as a partnership the right to claim treaty relief. Instead, in those cases where the income of the partnership is taxable in the hands of the partners (rather than at the level of the partnership) each partner should in strictness make a separate claim to treaty relief...
>
> ***HMRC's approach to Partnerships***
>
> We recognise that applying the provisions of the DTA in such a literal way would be unwelcome and could possibly hamper the business interests of both countries.
>
> Accordingly, HMRC may accept a single claim from a partnership on behalf of its partners. Where a partnership wishes to take advantage of this departure from the strict position and to claim treaty benefits on behalf of its partners, the general or managing partner should sign the declaration on the claim form. In addition to the normal information that is required by the claim form, a list of the names and addresses (residential addresses for individuals and registered addresses where the partners are companies) of the partners should be supplied. These lists should also normally show for each partner their respective percentage shares of the income that is the subject of the claim. In those cases where all of the partners are resident for tax purposes in the same country as the one in which the partnership is established (the country with which the DTA applies) it is not necessary to insist upon this information being provided.
>
> Where any of the partners are resident for tax purposes in a country other than that in which the partnership is established, they should make separate claims to relief from UK tax under the terms of any relevant DTA...
>
> **INTM335520. Examination of claims** [Sep 2021]
>
> ***What Personal Tax International will do***
>
> Where you are able to conclude that all of the beneficial owners of the income for which relief is being claimed are "qualifying persons" within the meaning of a DTA, then you should process the claim in the normal

[182] OTS, "Review of partnerships: final report" (2015) para 4.18 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/396668/ots_partnerships_report_final.pdf*

> way without further enquiry. This includes asking the tax office for the UK payer of the income to complete a report on forms in the 4450 series as appropriate.
>
> If the supplementary information that is supplied with the claim form does not allow you to conclude that each of the partners is resident for tax purposes in the same country as that in which the partnership is established, you will have to ask for further information to be supplied.
>
> If any of the partners that are identified are themselves (at face value) transparent for tax purposes (for instance Limited Partnerships and Limited Liability Companies, as well as Trusts and some types of investment funds) you should ask for similar information to be supplied about these 2nd and 3rd level partners. Your aim should be to reach a reasonable level of assurance that all of the underlying participators in these concerns are themselves "persons" who would be able to claim double taxation relief if they were receiving the money directly rather than through the partnership.

> *(This content has been withheld because of exemptions in the Freedom of Information Act 2000)*
>
> Where the partnership is unable to provide sufficient information about the identity of its partners to allow you to be satisfied that each person is entitled to relief from UK tax, the amount of relief to be allowed must be restricted to the percentage share of the income that is attributable to the partners who you accept as being entitled to treaty benefits in their own right.

INT Manual provides:

> **INTM162110 certificates of residence: for partnerships** [Sep 2021]
>
> UK partnerships (including English and Scottish LPs and UK LLPs) cannot be resident in the UK for the purpose of most of the UK's DTAs, because they are not themselves liable to tax in the UK. Only in a few limited circumstances, when the DTA specifically states that a partnership can be regarded as resident, such as in the UK/Argentina DTA, will HMRC be able to issue a Certificate of Residence (CoR) in the name of the partnership.
>
> As a result, partnerships are not themselves entitled to claim benefits under most of the UK's DTAs. However, partnerships will usually be able to claim benefits on behalf of those of its partners who are residents of the UK.
>
> To assist with such claims, HMRC therefore provides a CoR which confirms that whilst the partnership itself is not UK resident, some or all of its partners are.
>
> It should be noted that, with regards to LLPs, references to 'partners'

> below is interchangeable with 'members'. If requested by the customer, it will therefore be acceptable to replace the references to 'partners' in the CoR with 'members'.
>
> **Partnerships with only UK Resident Partners**
>
> For partnerships where all partners are UK resident there should not be a problem as we will, if requested, confirm that although the partnership itself cannot be UK resident the individual partners are, and are therefore entitled to the relevant DTA benefits.
>
> **Partnerships with Non-Resident Partners**
>
> Non-resident partners are not entitled to the benefits arising from DTAs between the UK and its treaty partners because they are not persons resident in the UK as set out in the residence Article of a UK DTA. But HMRC will, if requested, confirm that although the partnership itself cannot be UK resident, the UK resident partners are entitled to the relevant treaty benefits.
>
> **Information required**
>
> As with any request for a certificate of residence, any partnership requiring a CoR should provide the information listed at INTM162020 as well as:
>
> For partnerships with UK partners only: A list detailing the partners' names with confirmation that each and every partner is UK resident at the date of the request for the CoR.
>
> For partnerships with UK and non-resident partners:
>
> 1. A contact name and address for the partnership; and
> 2. A list detailing the partners' names, separately identifying those that are UK resident and those that are not and confirming that each of the UK partners is UK resident at the date of the request for the CoR.
>
> Once the Officer is satisfied that they can issue a CoR (after making the checks at INTM162030-50), they may issue one using the following form of words...
>
> As stated at INTM162030, HMRC can also certify residence for a particular period (for the purpose of claiming relief in all countries), so long as that period does not end any later than the date of issue. The wording in each case as above can therefore be amended to refer to the period for which certification is required if necessary (although the partnership would need to confirm the periods for which each partner was UK resident)...

9.23 Partnership: Non-OECD Model DTAs

Where specific difficulties are apparent, HMRC seek to make express provision in the treaty. Examples include the treaties with France and Japan, and protocols with Canada and India.

The INTM provides:

> **INTM335510. Background** [Sep 2021]
>
> ***How Double Taxation Agreements treat partnerships***
>
> ... In cases where such a partner is resident in a country which (unusually) does not regard the partnership as fiscally transparent - which would mean that it regards the partnership rather than the UK payer as the source of the payments its resident receives - then that partner may have difficulty in getting a claim form certified as relevant to a DT treaty with the UK. In such rare cases, you should consider accepting an uncertified claim form. If you decide to invite a claim in these circumstances you should ask for the claim form to be supported by additional evidence (for example copies of recent tax returns) to show that the partner is resident for tax purposes in the country concerned. Any such case should be referred to Specialist Personal Tax, PT International Advisory at an early stage.
>
> **INTM153340 Partnerships** [Sep 2021]
>
> UK policy, following *Padmore v IRC*, is to negotiate a provision in agreements confirming UK taxing rights over a UK resident partner's share of partnership profits where the partnership as an entity is resident in the other country for tax purposes under its domestic law. (See INTM163130 for more background).
>
> However, a special article is required in treaties where partnerships established in the other state count as 'persons' qualifying for benefits. It ensures that individual members of such a partnership who are themselves UK resident remain taxable in the UK on their share of the profits of the partnership.
>
> UK domestic law treats partnerships as transparent and taxes individual members on their share of the partnership's profits.
>
> What we now seek to do is either:
>
> - exclude all partnerships from a treaty, by removing them from the definition of 'person' in, typically Article 3, of our treaties; or
> - if the other state treats partnerships as taxable entities and wishes them to be covered by the treaty, another article, typically at Article 23A of our treaties, must be included. This ensures that the UK's right to tax UK resident members of partnerships set up under the laws of the other state is maintained.

9.23.1 *Switzerland & USA DTAs*

Article 4(1) UK/Switzerland DTA provides an example of the policy:

> In the case of Switzerland, the term [resident of a Contracting State] includes a partnership created or organised under Swiss law.

The DTR Manual provides:

> **DT18105: Switzerland: Notes** [Dec 2021]
> *Partnerships (Article 4)*
> This provision [Art 4(1)] should not be understood to override the general requirement that a resident must be liable to taxation in the relevant Contracting State. Where a claim is received in respect of the income of a Swiss partnership it should be ascertained that the income is actually taxed in Switzerland. Any claim that income of a Swiss partnership which has not been taxed in Switzerland should be relieved from taxation in the UK should be referred to Business Profits, International.

Article 27(2) UK/Switzerland DTA provides:

> Where under any provision of the Convention a partnership is entitled, as a resident of Switzerland, to exemption from the UK tax on any income, such provision shall not be construed as restricting the right of the UK to charge any member of the partnership which is a resident of the UK to tax on its share of the income of the partnership; but any such income shall be deemed for the purposes of Article 22 to be income from sources within Switzerland.

Article 3 USA/UK DTA provides that a partnership is a person under the DTA.

9.24 Treaty-residence: Pension fund

9.24.1 *Treaty-residence of pension fund*

Article 4(1) OECD Model provides:

> For the purposes of this Convention, the term "resident of a Contracting State" ... also includes ... a recognised pension fund of that State...

OECD Commentary provides:

> 8.6 Paragraph 1 also refers expressly to a "recognised pension fund". Most member countries have long considered that a pension fund established in a Contracting State is a resident of that State regardless of the fact that it may benefit from a limited or complete exemption from taxation in that State. Until 2017, that view was reflected in the previous version of paragraph 8.6, which referred to "pension funds, charities and other organisations" as entities that most States viewed as residents. Paragraph 1 of the Article was modified in 2017 to remove any doubt about the fact that a pension fund that meets the definition of "recognised pension fund" in paragraph 1 of Article 3 constitutes a resident of the

Contracting State in which it is established.

8.7 As indicated in paragraph 10.4 of the Commentary on Article 3, the effect of the definition of "recognised pension fund" and of the reference to that term in paragraph 1 of the Article will depend to a large extent on the domestic law and on the legal characteristics of the pension funds established in each Contracting State. The type of fund established within a legal entity that is described in paragraph 10.5 of the Commentary on Article 3 would not be covered by the definition of "recognised pension fund", which applies to an entity or arrangement that constitutes a separate person, but since the income of these funds is attributed to the legal entity of which it is part, the provisions of the Convention will apply to that income to the extent that the legal entity itself qualifies as a resident of a Contracting State under paragraph 1 of the Article.

8.8 Where, however, a fund constitutes a "person" which is distinct from any other person by whom, or for the benefit of whom, it has been established and is operated, the definition of "recognised pension fund" will be relevant and, to the extent that the conditions of that definition are met, the fund will itself constitute a "resident of a Contracting State". This will be the case in many countries because it is "liable to tax therein" by reason of the criteria mentioned in the first sentence of paragraph 1, as this sentence is interpreted by the Contracting States or, if that is not the case, because of the specific inclusion of the term "recognised pension fund" in paragraph 1.

9.24.2 *"Pension fund"*

Art 3(1) OECD Model provides:

i) the term "recognised pension fund" of a State means

[1] an entity or arrangement

[2] established in that State

[3] that is treated as a separate person under the taxation laws of that State and:

[4] (i) [ia] that is established and operated exclusively or almost exclusively to administer or provide retirement benefits and ancillary or incidental benefits to individuals and

[ib] that is regulated as such by that State or one of its political subdivisions or local authorities; or

(ii) that is established and operated exclusively or almost exclusively to invest funds for the benefit of entities or arrangements referred to in subdivision (i).

See too 38.10.1 ("Pension scheme").

9.24.3 *"Entity or arrangement"*

OECD Commentary provides:

> 10.9 The first part of the definition of "recognised pension fund" refers to "an entity or arrangement established in that State". There is considerable diversity in the legal and organisational characteristics of pension funds around the world and it is therefore necessary to adopt a broad formulation. The reference to an "arrangement" is intended to cover, among other things, cases where pension benefits are provided through vehicles such as a trust which, under the relevant trust law, would not constitute an entity: the definition will apply as long as the trust or the body of trustees is treated, for tax purposes, as a separate entity recognised as a separate person. It is required, however, that the entity or arrangement be treated as a separate person under the taxation laws of the State in which it is established: if that is not the case, it is not necessary to deal with the issue of the residence of the pension fund itself as the income of that fund is treated as the income of another person for tax purposes (see paragraph 10.5 above).

9.24.4 *Purpose to provide benefits*

OECD Commentary provides:

> 10.10 ... It does not matter how many individuals are entitled to such retirement benefits: a recognised pension fund may be set up, for instance, for a large group of employees or for a single self-employed individual. States are free to replace the phrase "retirement and ancillary or incidental benefits" by a different formulation, such as "retirement and similar benefits", as long as this formulation is interpreted broadly to include benefits such as death benefits.
>
> 10.11 The phrase "exclusively or almost exclusively" makes it clear that all or almost all the activities of a recognised pension fund must be related to the administration or the provision of retirement benefits and ancillary or incidental benefits to individuals. The words "almost exclusively" recognise that a very small part of the activities of a pension fund might involve activities that are not strictly related to administration or provision of such benefits (e.g. such as marketing the services of the pension fund).

9.24.5 *"Retirement benefit"*

OECD Commentary provides:

> 10.12 The entity or arrangement must be established and operated exclusively or almost exclusively for the purpose of administering or

> providing retirement benefits and ancillary or incidental benefits to individuals. A pension paid upon retirement from active employment or when an employee reaches retirement age would be the typical example of a "retirement benefit" but this term is broad enough to cover one or more payments made at or after retirement, or upon reaching retirement age, to an employee, a self-employed person or a director or officer of a company, even if these payments are not made in the form of regular pension payments.
>
> 10.13 In many States, pension funds provide a number of benefits that are not strictly linked to retirement and the phrase "ancillary or incidental benefits" is intended to cover such benefits. The words "ancillary or incidental" make it clear that such benefits are provided in addition to retirement benefits: a fund that would be set up primarily in order to provide benefits that are not retirement benefits would therefore not meet the definition. Whilst it would be impossible to provide an exhaustive list of all benefits that would qualify as "ancillary or incidental benefits", the following are typical examples of such benefits:
>
> - payments made as a result of the death or disability of an individual;
> - pension or other types of payments made to surviving members of the family of a deceased individual who was entitled to retirement benefits;
> - payments made to an individual suffering from a terminal illness;
> - income substitution payments made in the case of long-term sickness or unemployment;
> - housing benefits, such as a loan at a preferential rate granted from accumulated pension contributions to a pension contributor for the acquisition of a principal residence;
> - education benefits, such as the withdrawal of accumulated pension contributions that a pension contributor would be allowed to make for the purpose of financing her education or that of her children;
> - the provision of financial advice to pension contributors.

9.24.6 *Regulated*

OECD Commentary provides:

> 10.14 ... The requirement is intended to restrict the definition to entities or arrangements that are subject to some conditions imposed by the State where it is established (or one of its political subdivisions or local authorities) in order to ensure that the entity or arrangement is used as a vehicle for investment in order to provide retirement and ancillary or incidental benefits to individuals. That part of the definition would therefore exclude an entity, such as a private company, that might be set

> up and used by a person to invest funds in order to provide retirement benefits to persons related to, or employed by, that person but that would not be subject to any special treatment or to rules imposed by the State, political subdivision or local authority concerning the use of that entity as a vehicle to provide retirement benefits. It does not matter whether the regulatory framework to which the entity or arrangement is subjected is provided in tax laws or in other legal instruments (e.g. the legislation that establishes a State-owned entity that will operate a public pension fund); what matters is that the entity or arrangement be recognised by law as a vehicle established to finance retirement benefits for individuals and be subject to conditions intended to ensure that it is used for that purpose.
>
> 10.15 An example of an entity or arrangement that would satisfy the requirements of the definition of "recognised pension fund" is an agency or instrumentality of a State set up exclusively or almost exclusively to administer or provide retirement benefits and ancillary or incidental benefits under the social security legislation of that State. Another example would be a company or other entity that is established in a State for the purpose of administering or providing retirement benefits and ancillary or incidental benefits to individuals and whose only assets include funds that are covered by a retirement scheme regulated by the tax laws of that State which provide that the income from that scheme is exempt from tax. The definition of recognised pension fund would apply to that company or entity regardless of whether that company or entity otherwise qualifies as a resident of a Contracting State because it is "liable to tax therein" by reason of the criteria mentioned in the first sentence of paragraph 1 of Article 4, e.g. because it must pay tax on any income not derived from the scheme (see paragraphs 8.8 to 8.10 of the Commentary on Article 4).
>
> 10.16 Subdivision (i) of the definition applies regardless of whether the benefits to which it refers are provided to individuals who are residents of the State in which the entity or arrangement is established or are residents of other States....

9.24.7 *Pooled pension funds*

OECD Commentary provides:

> 10.17 Subdivision (ii) of the definition covers entities or arrangements that pension funds covered by subdivision (i) use to invest indirectly. Pension funds often invest together with other pension funds pooling their assets in certain entities or arrangements and may, for various commercial, legal or regulatory reasons, invest via wholly owned

> entities or arrangements that are residents of the same State. Since such arrangements and entities act only as intermediaries for the investment of funds used to provide retirement benefits to individuals, it is appropriate to treat them like the pension funds that invest through them.

9.24.8 *Administration*

OECD Commentary provides:

> 10.18 The phrase “exclusively or almost exclusively” found in subdivision (ii) makes it clear that all or almost all of the activities of such an intermediary entity or arrangement must be related to the investment of funds for the benefit of entities or arrangements that qualify as recognised pension funds under subdivision (i).

9.25 RIC/REIT/REMIC

The USA/Switzerland DTA Technical Explanation[183] provides:

> Certain entities that are nominally subject to tax but that in practice are rarely required to pay tax also would generally be treated as residents and therefore accorded treaty benefits. For example, RICs, REITs and REMICs are all residents of the United States for purposes of the treaty. Although the income earned by these entities normally is not subject to U.S. tax in the hands of the entity, they are taxable to the extent that they do not currently distribute their profits, and therefore may be regarded as “liable to tax.” They also must satisfy a number of requirements under the Code in order to be entitled to special tax treatment.

While this is directed at the US DTA, the wording in point (“liable to tax”) is the same and the same argument should apply to REITs in other states.

9.26 USA/UK DTA

9.26.1 *US citizen/green card holder*

Article 4(2) USA/UK DTA provides:

> An individual who is a United States citizen or an alien admitted to the United States for permanent residence (a “green card” holder) is a resident of the United States only

[183] *https://www.irs.gov/pub/irs-trty/swistech.pdf*

> [a] if the individual has a substantial presence, permanent home or habitual abode in the United States and
>
> [b] if that individual is not a resident of a State other than the UK for the purposes of a double taxation convention between that State and the UK.

The USA/UK DTA Technical Explanation[184] provides:

> Paragraph 2 contains an exception to the general rule of paragraph 1 that residence under internal law also determines residence under the Convention. The exception applies with respect to a U.S. citizen or alien lawfully admitted for permanent residence (i.e., a "green card" holder). Under paragraph 1, a person is considered a resident of a Contracting State for purposes of the Convention if he is liable to tax in that Contracting State by reason of citizenship. Although this rule applies to both Contracting States, only the United States taxes its non-resident citizens in the same manner as its residents. In addition, aliens admitted to the United States for permanent residence ("green card" holders) qualify as U.S. residents under the first sentence of paragraph 1 because they are taxed by the United States as residents, regardless of where they physically reside.
>
> Under the exception of paragraph 2, a U.S. citizen or green card holder will be treated as a resident of the United States for purposes of the Convention, and, thereby entitled to treaty benefits, only if he meets two conditions.
>
> [1] First, he must have a substantial presence (see section 7701(b)(3)), permanent home or habitual abode in the United States. This rule requires that the U.S. citizen or green card holder have a reasonably strong economic nexus with the United States.
>
> [2] Second, he must not be treated as a resident of a state other than the UK under any treaty between the UK and a third state. This rule prevents a U.S. citizen or green card holder who is a resident of a country other than the United States or the UK from choosing the benefits of the Convention over those provided by the treaty between the UK and his country of residence. If the U.S. citizen or green card holder's country of residence does not have a treaty with the UK, however, then he will be treated as a resident of the United States as long as he meets the first requirement of an economic nexus...

The text goes on to give some examples:

[184] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> Thus, for example, an individual resident of Mexico who is a U.S. citizen by birth, or who is a Mexican citizen and holds a U.S. green card, but who, in either case, has never lived in the United States, would not be entitled to benefits under the Convention. However, a U.S. citizen who is transferred to Mexico for two years would be entitled to benefits under the Convention if he maintains a permanent home or habitual abode in the United States and is not a resident of Mexico for purposes of the U.K.-Mexico tax treaty. If he were treated as a resident of Mexico under the U.K.-Mexico tax treaty, he could claim only the benefits of that treaty, even if the Convention would provide greater benefits.
>
> The fact that a U.S. citizen who does not have close ties to the United States may not be treated as a U.S. resident under the Convention does not alter the application of the saving clause of paragraph 4 of Article 1 (General Scope) to that citizen. For example, a U.S. citizen who pursuant to the "citizen/green card holder" rule is not considered to be a resident of the United States still is taxable on his worldwide income under the generally applicable rules of the Code.

9.26.2 *Substantial presence*

"Substantial presence" is a technical term in US tax law. 26 CFR 301.7701(b)-1 provides:

> (c) **Substantial presence test -**
>
> (1) **In general.** An alien individual is a resident alien if the individual meets the substantial presence test. An individual satisfies this test if he or she has been present in the United States on at least 183 days during a three year period that includes the current year. For purposes of this test, each day of presence in the current year is counted as a full day. Each day of presence in the first preceding year is counted as one-third of a day and each day of presence in the second preceding year is counted as one-sixth of a day. For purposes of this paragraph, any fractional days resulting from the above calculations will not be rounded to the nearest whole number. (See § 301.7701(b)-9(b)(2) for transitional rules for calendar years 1985 and 1986.)
>
> (2) **Determination of presence -**
>
> (i) **Physical presence.** For purposes of the substantial presence test, an individual shall be treated as present in the United States on any day that he or she is physically present in the United States at any time during the day. (But see § 301.7701(b)-3 relating to days of presence that may be excluded.)
>
> (ii) **United States.** For purposes of section 7701(b) and the

> regulations thereunder, the term United States when used in a geographical sense includes the states and the District of Columbia. It also includes the territorial waters of the United States and the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the United States and over which the United States has exclusive rights, in accordance with international law, with respect to the exploration and exploitation of natural resources. It does not include the possessions and territories of the United States or the air space over the United States.

(3) **Current year.** The term current year means any calendar year for which an alien individual is determining his or her resident status.

(4) **Thirty-one day minimum.** If an individual is not physically present for more than 30 days during the current year, the substantial presence test will not be applied for that year even if the three-year total is 183 or more days. For purposes of the substantial presence test, it is irrelevant that an individual was not present for more than 30 days in the first or second year preceding the current year...

(e) **Examples.** This section may be illustrated by the following examples:

Example 1.

B, an alien individual, is present in the United States for 122 days in the current year. He was present in the United States for 122 days in the first preceding calendar year and for 122 days in the second preceding calendar year. In determining his status for the current year, B counts all 122 days in the United States in the current year plus 1/3 of the 122 days in the United States in the first preceding calendar year (40 2/3 days) and 1/6 of the 122 days in the United States during the second preceding calendar year (20 1/3 days). The total of 122 40 2/3 20 1/3 equals 183 days. B meets the substantial presence test and is a resident alien for the current year.

Example 2.

C, an alien individual, is present in the United States for 25 days during the current year. She was present in the United States for 365 days during the first preceding year and 365 days during the second preceding year. The substantial presence test does not apply because C is present in the United States for fewer than 31 days during the current year.

Example 3.

D, an alien individual, is present in the United States for 170 days during the current year. He was present in the United States for 30 days during the first preceding year and 30 days during the second preceding

> year. In determining his status for the current year, D counts all 170 days in the United States in the current year plus 1/3 of the 30 days in the United States in the first preceding calendar year (10 days) and 1/6 of the 30 days in the United States during the second preceding calendar year (5 days). The total of 170 10 5 equals 185 days. D meets the substantial presence test and is a resident alien for the current year notwithstanding the fact that he was present in the United States for fewer than 31 days in each of the two preceding years.

HMRC accept this meaning applies in the treaty, and that seems right.[185] HMRC Self Assessment helpsheet HS302 (Dual Residents 2021) provides:

> **Substantial presence test**
> This shows how often you're in the US over a certain period. You'll have a substantial presence if you're in the US:
>
> - for at least 31 days of the calendar year in question
> - for the year in question and the 2 years before that and all 3 years add up to at least 183 days
>
> If you spend part of a day in the US, count it as a whole day.
> For the purpose of the example, a day spent in the US, in the following year under test, counts as a third, and a day in the year before that counts as a sixth.
>
> **Example**
> G spends 48 days in the US in 2018, 250 days in 2017 and 365 days in 2016. A day spent in the US in 2017 and 2016, counts as a third and sixth respectively. In 2018, the calculation is as follows:
>
> | | | |
> |---|---|---|
> | 2018 | 48 days × 1/1 | 48 |
> | 2017 | 250 days × 1/3 | 84 |
> | 2016 | 365 days × 1/6 | 61 |
> | Total | | 193 |
>
> G passes both parts of the substantial presence test. She's a resident in the US, under the country's domestic law.

9.27 Tax exempt organisations

The USA/UK DTA Technical Explanation[186] provides:

> [Article 4(3)] provides that certain tax-exempt entities such as pension funds and charitable organizations will be regarded as residents of a

[185] Notwithstanding the rule in art 3(2) USA/UK DTA that undefined terms have domestic law meanings; see 107.12 (Undefined treaty terms).

[186] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> Contracting State regardless of whether they are generally liable for income tax in the State where they are established. The inclusion of this provision is intended to clarify the generally accepted practice of treating an entity that would be liable for tax as a resident under the internal law of a State but for a specific exemption from tax (either complete or partial) as a resident of that state for purposes of paragraph 1.

9.27.1 *Pension scheme*

Art 4(3) USA/UK DTA provides:

> The term "resident of a Contracting State" includes—
> (a) a pension scheme;

For the definition, see 38.10.1 ("Pension scheme").

9.27.2 *Employee benefit trust*

Art 4(3) USA/UK DTA provides:

> The term "resident of a Contracting State" includes...
> (b) a plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is operated exclusively to administer or provide employee benefits and that, by reason of its nature as such, is generally exempt from income taxation in that State;

The USA/UK DTA Technical Explanation provides:[187]

> Subparagraph (b) applies to any plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is generally exempt from taxation in that State because it is operated exclusively to administer or provide employee benefits. The reference to a general exemption is intended to reflect the fact that under U.S. law, certain organizations that generally are considered to be tax-exempt entities may be subject to certain excise taxes or to income tax on their unrelated business income.

9.27.3 *Charity/NPO*

Art 4(3) USA/UK DTA provides:

> The term "resident of a Contracting State" includes ...

[187] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> (c) an organisation that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State according to its laws, notwithstanding that all or part of its income or gains may be exempt from tax under the domestic law of that State;

The USA/UK DTA Technical Explanation provides:[188]

> ... an exempt section 501(c) organization (such as a U.S. charity) that is generally exempt from tax under U.S. law is a resident of the United States for all purposes of the Convention.

9.27.4 *Governmental entity*

Art 4(3) USA/UK DTA provides:

> The term "resident of a Contracting State" includes ...
> (d) a qualified governmental entity that is, is a part of, or is established in, that State.

Article 3(1)(k) USA/UK DTA provides the definition:

> the term "qualified governmental entity" means—
> (i) a Contracting State, or a political subdivision or local authority of a Contracting State;
> (ii)a person that is wholly owned, directly or indirectly, by a Contracting State or a political subdivision or local authority of a Contracting State, provided—
> (a) it is organised under the laws of the Contracting State;
> (b) its earnings are credited to its own account with no portion of its income inuring to the benefit of any private person;
> (c) its assets vest in the Contracting State, political subdivision or local authority upon dissolution; and
> (d) it does not carry on a business;

9.28 S Corporation

9.28.1 *US law background*

The Mirrlees Review summarises the nature of a US S corporation:[189]

[188] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[189] Dimensions of Tax Design ((2010) p.1047.
See too, Staff of the Joint Committee on Taxation, "Choice of Business Entity" (2015) *https://www.jct.gov/publications.html?func=startdown&id=4765*
See 90.57 (UK check-the-box rules?)

> ... in the USA, there has been a tax penalty on incorporation for those intending to distribute profits as a result of the classical system of dividend taxation which taxes dividends both at the corporate level (via corporation tax) and at the personal level (via income tax). This was tackled in 1958 by way of Subchapter S to the Internal Revenue Code which permits partnership or pass-through treatment for US corporations satisfying certain conditions ('S' Corps).

S corporation status is open to a US corporation, requires an affirmative election, and is subject to specific requirements as to the number and nature of shareholders, class of stock, etc. Thus an S corporation is not a specific type of entity: it is a company which has elected for a specific tax treatment, to be treated as transparent for US tax purposes.

9.28.2 *S corp: Treaty-residence*

HMRC classify an S corporation as opaque in the transparent/opaque list[190] so there is no doubt it is a treaty-person.

The Canadian Revenue Agency say:[191]

> **US S-Corps and LLCs**
> The Department views U.S. S-Corps to be resident in the United States for the purposes of the [US/Canada] Convention. This view is based on the fact that they are "liable to tax" under the Internal Revenue Code unless they make an election to be treated as a partnership. Furthermore, notwithstanding the election, an S-Corp. would be taxed in the United States on its world-wide income if certain conditions are not met.

The CRA express reservations about their own view:

> The Department recognizes that the above position is arguably inconsistent with its view that U.S. LLCs are not resident in the U.S. for the purposes of the Convention. [The Department continues to be of the view that a U.S. LLC that is treated under U.S. tax law as a partnership and which is therefore not liable to tax in the United States, is not a resident of the United States for the purposes of Article IV of the Convention.] Possibly if the Department had had the knowledge

[190] See 90.54 (HMRC transparent/opaque list).

[191] The text goes on to comment on Canadian foreign affiliate legislation, which is not relevant here; and Barbados exempt insurance companies, which is too specialist to be considered here.

> and experience it now has in the area of residency determination when it formed its opinion regarding the residence of U.S. S-Corps, it may have reached a different conclusion regarding the residence of U.S. S-Corps.

But the CRA practice (that an S Corp is "liable to tax") seems the better view, on the analysis of "liable to tax" set out above.

One might perhaps distinguish the case of LLCs, as a LLC is not subject to US tax unless it elects to be non-transparent; but a S Corporation is subject to tax unless it elects for transparency. Or one might say that LLC's too are, in fact, resident in the USA.

See too 26.31.3 (S corp/LLC lender).

9.29 Treaty-residence: Non-OECD DTA

9.29.1 *Resident for purposes of UK tax*

Article 4 UK/New Zealand DTA provides:

> (1) For the purposes of this Convention, the term "resident of a Contracting State" means, as the context requires:
> (a) any person who is resident in the UK for the purposes of UK tax; or
> (b) any person who is resident in New Zealand for the purposes of New Zealand tax...[192]

The INT Manual considers that this is the same as article 4(1) OECD Model ("liable to tax by reason of his residence"):

> **INTM162040 certificates of residence...** [Sep 2021]
> ... Some DTAs do not specifically use the phrase 'liable to tax' (for example the UK/New Zealand Double Taxation Convention). Instead, these DTAs state that a UK resident means any person who is a resident of the UK for the purposes of UK tax. HMRC interprets this also to mean that the person is liable to tax by virtue of their domicile, residence, place of management or any other criterion of a similar nature.

9.29.2 *Residence: Pre-1963 DTAs*

Pre-1963 DTAs[193] provide a different definition of treaty-residence.[194] I

[192] A tie-breaker follows in OECD Model form.

[193] See 107.24 (Pre-1963 DTAs).

[194] But the BEPS MLI may change this.

take art 2(1)(g) Belize/UK DTA as an example:

> (g)[i] The terms "resident of the United Kingdom" and "resident of Belize" mean respectively
>
> [A] any person who is resident in the UK for the purposes of UK tax and not resident in Belize for the purposes of Belize tax and
>
> [B] any person who is resident in Belize for the purposes of Belize tax and not resident in the UK for the purposes of UK tax;
>
> [ii] and a company shall be regarded as resident in the UK if its business is managed and controlled in the UK and as resident in Belize if its business is managed and controlled in Belize.

The INTM provides:

> **INTM154030 Resident of both countries** [Sep 2021]
> Some early agreements, mainly with former colonies in the Caribbean ... define a resident of one country as a person who is a resident there for the purposes of that country's tax and not resident for tax purposes in the other country. A person who, under those agreements, is a resident of both countries will only be able to get relief by way of credit for one country's tax against the others.

This comment clearly relates to provisions in the form of art 2(1)(g)[i] which govern treaty-residence of non-companies (individuals or trusts).

Treaty-residence of companies is governed by art 2(1)(g)[ii] on which HMRC say:

> HMRC now takes the view that the better interpretation of the [company residence tie-breaker] in these DTAs is that they include a tie-breaker clause to decide where a company is to be treated as resident for the purposes of the affected DTAs. This represents a change of view. HMRC's previous view was that a dual-resident company – for example, a company resident in the UK by virtue of incorporation and resident in the other jurisdiction by virtue of management and control – was not a resident of either jurisdiction under the terms of the provisions and so was outside the scope of the DTA. HMRC now takes the view that these provisions should be read as treating such a dual-resident company as a resident of the jurisdiction in which it is managed and controlled, for the purposes of applying the affected DTAs.
>
> In cases where the company is managed and controlled in both the UK

> and the other jurisdiction, it will remain outside the scope of the DTA.[195]

HMRC's revised view is correct; it is difficult to see the basis of the former HMRC view.

9.30 Proof of treaty-resident status

9.30.1 *Certificate of residence*

A person who is treaty-resident in the UK may need evidence of that status in order to obtain foreign DT relief. HMRC will help by issuing a certificate of UK DTA-residence (CoR).

Conversely a person who is treaty-resident in a foreign state generally needs a certificate of overseas residence in order to prove entitlement to UK DT relief.

9.30.2 *Certificate of DTA-residence*

The INT Manual provides:

> **INTM162010 certificates of residence: introduction and scope of guidance** [Sep 2021]
> Where the UK has a DTA with a foreign territory, a person who is a resident of the UK (within the meaning of the DTA) may be entitled to claim relief from certain taxes of that foreign territory (either by way of relief at source or refunds of tax already paid) if certain criteria are met.
> In order to assess whether a person is entitled to such relief, the overseas fiscal authority receiving the claim will usually require HMRC to certify that the person is a resident of the UK within the meaning of the DTA. Some fiscal authorities may also require HMRC to confirm that the person fulfils other conditions.
> The certification of residence may need to be made on a specific form produced by the overseas fiscal authority or in a general letter produced by HMRC. For the purpose of this guidance, a Certificate of Residence (CoR) refers to certification on a specific form or in a general letter.
> HMRC is committed to providing UK residents with assistance in claiming all the benefits they are entitled to under a DTA. These DTAs have been carefully negotiated with other states and HMRC will therefore help UK residents claim the benefits they are entitled to. On request, HMRC will therefore provide customers with a CoR where, to the best of our knowledge, that customer is a

[195] *https://www.gov.uk/government/publications/double-taxation-agreements-developments-and-planned-negotiations/change-of-view-on-the-interpretation-of-the-residence-articles-in-sixteen-double-taxation-agreements*
I have deleted Jersey/Guernsey/IoM from the list; these now have DTAs in OECD model form.

resident of the UK.

However, as the purpose of a CoR is to support claims for benefits under a particular Article of a DTA (being the Article applicable to the relevant income source), HMRC may refuse to issue a CoR where it is clear that the customer would not be entitled to those benefits. As such, there may be cases where a resident of the UK will not be able to obtain a CoR because they do not fulfil the criteria of the particular Article under which they intend to claim benefits. It is vitally important that HMRC upholds the terms and purpose of our DTAs by not issuing CoRs to those who are clearly not entitled to relief from foreign taxes.

The decision as to whether relief from foreign taxes can be granted is, ultimately, one to be made by the overseas fiscal authority. It is therefore anticipated that HMRC will issue a CoR in the majority of cases and that a request will only be refused if there is no doubt that customer would not be entitled to benefits.

If HMRC has reason to believe that a customer will not be entitled to benefits, we may request further information from the customer before deciding whether a CoR can be issued. In cases where it is not clear whether a customer would be entitled to benefits, HMRC may decide to make a spontaneous exchange of information with the other state to help them come to an informed decision as to whether benefits can be granted.

Customers should also be aware that the provision of a CoR will not guarantee that they will be successful in their claim to benefits under the relevant DTA. As stated above, it will be up to the overseas fiscal authority to determine whether the customer fulfils all the relevant conditions and whether benefits can be granted. However, in any case where a customer believes an overseas fiscal authority has denied them benefits which they should be entitled to, HMRC will consider engaging with those authorities on the customers behalf under the Mutual Agreement Procedure for the relevant DTA.

To help HMRC decide whether a CoR can be issued, we will require any customer who would like a CoR to provide a certain amount of information when making their request.

The following guidance sets out the information HMRC will require, the checks we will make and the circumstances in which a request may be refused. It also sets out the processes for making and handling such requests. This guidance replaces the guidance issued on 4 January 2013 and which was previously located at INTM162010 to INTM162040.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

INTM162020 certificates of residence: information to be supplied with a request [Sep 2021]

As stated at INTM162010, before HMRC can certify residence for the purpose of claiming benefits under a DTA a customer will need to provide the information listed below. This applies to customers of all types and sizes and is also in addition to the information required in order to identify the customer when they make a request in accordance with INTM162160.

In certain limited circumstances, a customer may be able to agree with their Local Office, Customer Co-ordinator or Customer Compliance Manager that they may not need to provide all of the information listed below with every request.

However, individual customers will always have to provide the information referred to below as they should make a request via the on-line tool referred to at INTM162160. All other customers should also continue to provide the information referred to below unless agreement has been reached with their Local Office, Customer Co-ordinator or Customer Compliance Manager.

Where the other state produces a specific form on which a claim should be made, the customer should also provide a copy of that form (after completing the parts applicable to them) with their request. Details of those states which require claims to be made on specific forms can be found on the country specific pages of the Double Taxation Relief manual (DT2140) ... usually under the ‘relief from [name of territory] tax’ or ‘claims procedure’ section of those pages.

It should be noted that whilst HMRC tries to keep the DTR manual updated there will be occasions where it contains references to forms which are no longer used by the other state or where it does not mention forms which have been recently introduced. Customers should therefore check whether a claim has to be made on a specific form with the relevant overseas tax authorities before requesting a Certificate of Residence (CoR). Claim forms which appear over two pages should be printed on both sides of each piece of paper.

Note that HMRC will only be able to issue a CoR to a third party (such as an agent or other representative) if the principal customer has provided their consent for HMRC to do so. Such consent may be provided in the form of a 64-8[196] or in any other format. If the customer would like the CoR to be issued to a third party, a copy of the consent should therefore be sent with the request unless already provided.

The information HMRC will require with a request is as follows:

1. An explanation as to why the person requires a CoR, including confirmation of which DTA they wish to make a claim under.

2. Confirmation of the type of income in respect of which they wish to make a claim and the particular income article under which they wish to make a claim.

3. Confirmation of the period for which the customer requires a CoR if not for the date on which the certificate is to be issued.

4. If required by the specific DTA, confirmation as to whether the customer (for the whole of the period for which they require a CoR):

(a) is the beneficial owner of the income in respect of which they wish to make a claim,

(b) is subject to UK tax on all of the income in respect of which they wish to make a claim.

5. For newly incorporated companies, who have yet to file a Corporation Tax self-assessment return, the name and residence of each director and shareholder and the reason for which the company believes it is a resident of the UK (bearing in mind the guidance at INTM120030).

6. For individuals who require a CoR for periods on or after 6 April 2013 and

[196] *https://www.gov.uk/government/publications/tax-agents-and-advisers-authorising-your-agent-64-8*

who have yet to file a self-assessment tax return for the period required:

(a) the number of days spent in the UK during the tax year in which they require a certificate,

(b) if the individual has spent less than 183 days in the UK during the tax year in which they require a certificate, the basis on which they are believed to be resident under the Statutory Residence Test (SRT),

(c) the date on which the individual arrived in or departed the UK,

(d) if the individual arrived in or departed the UK during the tax year in which they require a CoR, confirmation of the date on which they began or ceased to be resident according to the SRT split-year rules.

Further information in respect of each of these questions can be found below:

1. If a customer requires HMRC to certify that they are a resident of the UK for any purpose other than claiming relief from foreign taxes under a DTA, they should ask for a 'letter of confirmation' in accordance with the guidance at INTM162140.

2. Customers most commonly require a CoR in order to make claims for relief from tax on business profits, dividends, interest and royalties. The income articles applicable to these sources are usually Articles 7, 10, 11 and 12 respectively (where the DTA follows the OECD Model Convention), although the numbering may be different in some DTAs.

General descriptions of the Articles normally present in a DTA can be found at INTM153000, although customers should always check the particular DTA under which they intend to make a claim as the contents may vary from one to another.

If a customer has more than one source of income (falling under the same or different articles) they should consider the questions at 3 and 4 as above in respect of each source.

3. Please note that a CoR cannot be issued for any future period as HMRC cannot certify that a customer will continue to be UK resident.

4(a). Most DTAs state that if a person wishes to claim relief from tax in the source state in respect of income such as dividends, interest and royalties (but not business profits), that person has to be the beneficial owner of that income. Customers should consider the guidance at INTM162080 before making a request for a CoR where this condition applies. If the customer is not the beneficial owner of the income, the other state may deny relief. In such cases, the customer should request or arrange for each of the actual beneficial owners to request a CoR in their own name (provided they are residents of the UK as well) so that relief can be granted.

4(b). Some DTAs provide that a person must be subject to tax on income such as dividends, interest and royalties as well as or instead of being the beneficial owner. The meaning of subject to tax, and its distinction from liable to tax, can be found at INTM162090 ...

5. Where a company has yet to file a self-assessment tax return, it may not be possible to issue a CoR. This will be particularly so where the company is registered overseas and claims to be UK resident by virtue of being centrally managed and controlled in the UK (INTM120060). If a newly incorporated company does require HMRC to provide a CoR, it should provide as much

information as possible to satisfy HMRC that it is UK resident. If HMRC is not satisfied that a company is UK resident, we may ask for further information and if still not satisfied, we may refuse to issue the CoR.

6. For periods on or after 6 April 2013, an individual's residence status for UK tax purposes will be determined by the SRT. In cases where an individual has yet to file a self-assessment tax return for the period in which the CoR is required, HMRC will require further information in order to satisfy us that they are resident for the period in question. In cases where the individual has just arrived in the UK, it may not be possible to issue a CoR until the individual has stayed in the UK for sufficient time to be able to demonstrate that they are indeed resident... It will only be not appropriate to answer the questions at 4(a) and 4(b) if the income article under which the customer wishes to make a claim does not include such a qualifying condition.

It should also be noted that the conditions referred to in 4(a) and 4(b) as above may not be the only conditions which have to be met for the claim to be accepted by the other state. All customers should therefore check the conditions of the particular income article under which they intend to make a claim before requesting a CoR...

INTM162030 certificates of residence: What HMRC will check - reason and date for which certification is required [Sep 2021]

When an Officer receives a request for a Certificate of Residence (CoR), including a request to certify residence on a specific form, they should initially check:

1. Why the customer wants HMRC to certify that they are a resident of the UK, including which DTA and income article the customer intends to claim relief under.

If the customer requires a CoR for any purpose other than claiming relief from, or refunds of, foreign taxes under a DTA, the instructions at INTM162140 should be followed instead.

2. Whether the other state provides a specific form, or use of words, which should be used to claim the relief in question.

The country specific pages of the Double Taxation Relief manual (DT2140) ... provides details of the forms and words known to be used by other fiscal authorities (usually under the 'relief from [name of territory] tax' or 'claims procedure' section of the country specific guidance).

Whilst HMRC tries to keep the DTR manual updated there will be occasions where it contains references to forms which are no longer used by the other state or where it does not mention forms which have been recently introduced.

If a customer does not believe it would be appropriate to complete a specific form which is mentioned in the DTR manual, the Officer can issue a general CoR instead but they should advise the customer that it may cause delay in their claim being processed if the other state insists on the specific form being completed.

3. The date as at, or period for which, the customer requires a CoR.

HMRC will normally certify that a person is a resident of the UK as at the date of issue. However, HMRC can also certify that a person was resident for a certain period, so long as the period does not end later than the date of issue

(HMRC cannot certify that a person will be a resident of the UK for any future period because we cannot verify whether that will be the case).

If a customer requires a CoR for a particular period, the Officer will need to consider the points at INTM162040 and INTM162070 for the whole of that period.

An Officer should also remember that a CoR can only be issued to a third party (such as an agent or other person acting on behalf of the customer) if the customer has provided consent for them to do so. Consent may be provided in the form of a 64-8 ... or in any other format. Once consent has been obtained, the Officer should note the extent of the consent on the taxpayers' record (on SA or COTAX) for possible future use.

INTM162040 certificates of residence: What HMRC will check - whether the customer is a resident of the UK [Sep 2021]

Once an Officer has completed the initial checks at INTM162030, the Officer should consider whether the customer is, to the best of their knowledge, a person who is a resident of the UK within the meaning of the Double Taxation Agreement (DTA).

[The Manual summarises the OECD Model definition of residence and continues]

The issue of whether a person is a resident of the UK is a matter of self-assessment which HMRC would only normally challenge through an enquiry into a person's self-assessment tax return. ... An Officer will not be expected to carry out a detailed review of residence when they receive a request for a Certificate of Residence (CoR). The Officer will usually be able to certify residence so long as they can see that the customer is (or was for the period requested) liable to UK tax by virtue of their residence (for example, by checking the customer's tax returns or, if no such returns have been submitted yet, the information provided with the request).

However, if HMRC do not have enough information to determine whether a customer is liable to UK tax by virtue of their residence or, despite the self-assessments made by the customer, there are reasonable grounds for believing that the customer may not in fact be a resident of the UK, the request may be refused if sufficient doubt remains following additional correspondence on the issue.

It should be noted that the provision of a CoR (to a customer of any type) will not amount to a formal determination that the customer is a resident of the UK. It will simply be confirmation that, to the best of HMRC's knowledge, the customer is, or was for the period in question, liable to tax by virtue of their residence. HMRC will still have the right to enquire into a customer's self-assessment tax return when it is received.

In cases where a company is suspected of being dual resident or where a customer requests a certificate of residence in respect of a branch or permanent establishment, please refer to the guidance at INTM162050 and INTM162060 respectively.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

INTM162050 certificates of residence: Dual resident companies [Sep 2021]

[This is not set out here as it is too far from the themes of this book]

INTM162070 certificates of residence: what HMRC will check - whether there are any obvious reasons why the customer might not be entitled to treaty benefits [Sep 2021]

Once the Officer has completed their initial checks at INTM162030 and is satisfied that the customer is a resident of the UK for the purpose of the DTA in question (see INTM162040), they should then consider whether, to the best of their knowledge, the customer fulfils the criteria of the particular article under which they wish to make a claim.

Whilst HMRC will not certify that a person fulfils the criteria of a particular income article, the Officer will still be expected to consider whether there are any obvious reasons for believing that the customer might not be entitled to benefits under the DTA.

As such, the Officer will need to check the criteria of the particular income article under which the customer intends to claim relief.

In relation to claims to relief from foreign tax on dividends, interest and royalties, the main criteria which an Officer will need to consider are whether the customer is the beneficial owner of (see INTM162080) and/or is subject to tax (see INTM162090) on the income in question.

The Officer will need to check the particular income article of the DTA to see what conditions need to be fulfilled. Copies or descriptions of each DTA can be found on the GOV.UK site or in the country specific pages at DT2140 ...

The Officer should use the information provided with the initial request (see INTM162020 and, in particular, the answers in response to questions 4(a) and (b), and any other information available to them (for example, the accounts, tax return and electronic records) to decide whether there are any obvious reasons for believing that the customer may not be entitled to benefits.

Officers will need to take a risk assessment approach when dealing with a request for a Certificate of Residence ('CoR'). For example, where a Customer Compliance Manager has discussed the question of CoRs with the customer and is satisfied that they have sufficient internal governance and controls to ensure requests for CoRs are only made when they fulfil all the criteria for relief, the Officer may be able to provide the CoR without a detailed review.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

As stated at INTM162010, customers should note that if HMRC does provide them with a CoR, the CoR will not guarantee that they will be able to claim benefits under the relevant DTA. The CoR will not confirm whether HMRC believe all of the relevant conditions have been fulfilled as that will be a matter for the other state to determine.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

INTM162100 certificates of residence: for individuals and companies [Sep 2021]

[This discusses the wording of a certificate of residence and need not be set out here]

9.30.3 *Certificate: Partnership*

The INT Manual provides:

> **INTM162110 certificates of residence: for partnerships** [Sep 2021]
> ... partnerships will usually be able to claim benefits on behalf of those of its partners who are residents of the UK.
> To assist with such claims, HMRC therefore provides a CoR which confirms that whilst the partnership itself is not UK resident, some or all of its partners are.
> It should be noted that, with regards to LLPs, references to 'partners' below is interchangeable with 'members'. If requested by the customer, it will therefore be acceptable to replace the references to 'partners' in the CoR with 'members'.
> **Partnerships with only UK Resident Partners**
> For partnerships where all partners are UK resident there should not be a problem as we will, if requested, confirm that although the partnership itself cannot be UK resident the individual partners are, and are therefore entitled to the relevant DTA benefits.
> **Partnerships with Non-Resident Partners**
> Non-resident partners are not entitled to the benefits arising from DTAs between the UK and its treaty partners because they are not persons resident in the UK as set out in the residence Article of a UK DTA. But HMRC will, if requested, confirm that although the partnership itself cannot be UK resident, the UK resident partners are entitled to the relevant treaty benefits.
> **Information required**
> As with any request for a certificate of residence, any partnership requiring a CoR should provide the information listed at INTM162020 as well as:
> For partnerships with UK partners only:
> 1. A list detailing the partners' names with confirmation that each and every partner is UK resident at the date of the request for the CoR.
> For partnerships with UK and non-resident partners:
> 1. A contact name and address for the partnership; and
> 2. A list detailing the partners' names, separately identifying those that are UK resident and those that are not and confirming that each of the UK partners is UK resident at the date of the request for the CoR.
> Once the Officer is satisfied that they can issue a CoR (after making the checks at INTM162030-50), they may issue one using the following form of words:
> [The wording is not set out here]

9.30.4 *Certificate of residence: Trust*

The INT Manual provides:

> **INTM162120 certificates of residence: for trusts** [Sep 2021]
> **Information required and checks to be made**
> As with any request for a CoR, the information listed at INTM162020 should be provided and guidance at INTM162030-90 followed before issuing a CoR in respect of a trust. The trust should also however provide a list detailing all the trustees names with confirmation or otherwise of UK residence.

Confirm which CoR to issue

It is important that you check the definition of 'resident of a Contracting State' contained in the residence article (usually Article 4) of the specific DTA relevant to the income concerned to ensure that the correct wording of the CoR is used.

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

Wording for CoR to trust with resident body of trustees

[The wording is not set out here]

INTM162130 certification required to be supported by an apostille [Sep 2021]

... some countries (for example, Kazakhstan) require a Certificate of Residence provided under a Double Taxation Agreement to be supported by an "apostille". An apostille is a document prepared by the Legalisation Office of the Foreign and Commonwealth Office (FCO) that confirms that a UK public official who has signed a document is who they claim to be. The signature must be an original. The Legalisation Office have quite a few HMRC officers on their database, but it may save time for an Officer who is dealing with such a claim for the first time to send a specimen signature to the Legalisation Office in advance, otherwise they will need to verify it for first use. Once a name is on the database there is no need for subsequent verification. Details of the Legalisation Office can be found on the FCO website.

Responsibility for obtaining the apostille rests with the customer making the claim. A small fee is payable to the FCO. The customer should be referred to the current instructions on applying for an apostille that appear on the FCO website.

9.30.5 *Letter of confirmation*

The INT Manual provides:

INTM162140 certificates of residence: letter of confirmation [Sep 2021]

As stated at INTM162020-30, customers will occasionally ask HMRC for confirmation that we regard them as a resident of the UK for purposes other than claiming relief from foreign taxes under the terms of a Double Taxation Agreement (DTA). For example, some countries require confirmation that that person is regarded by HMRC as a resident of the UK before they can start trading in that country. Customers may also want HMRC to confirm that we regard them as UK resident so that they can claim relief from foreign taxes which they might be entitled to under the domestic law of the foreign state or EU law (such as under the EU Interest & Royalties Directive) rather than under the terms of the UK's DTA with that other state.

If a customer requests confirmation that HMRC regards them as being a resident of the UK for any purpose other than claiming benefits under a DTA, a 'letter of confirmation' should be issued instead of a Certificate of Residence (CoR).

The difference between a CoR and a 'letter of confirmation' is that a CoR is issued solely for the purpose of claiming benefits under a particular DTA. If a customer requires a CoR, they will be asked to provide the information listed at INTM162020 and HMRC will consider whether the customer is entitled to treaty benefits in accordance with the guidance at INTM162030-90 before issuing the

> CoR.
> If a customer requires a letter of confirmation, the Officer will not need to check whether the customer fulfils the conditions of any DTA. They will only need to check that they can verify the statements which they are being asked to make.
> The standard form of words to use with a letter of confirmation should be as follows: [The wording is not set out here]

9.30.6 *Customised wording*

The INT Manual provides:

> **INTM162150 customised certificates of residence and side letters** [Sep 2021]
> Customers occasionally ask HMRC to provide a customised Certificate of Residence (CoR) for the purpose of claiming relief under a Double Taxation Agreement. For example, a customer may ask HMRC to confirm that they fulfil particular conditions of the DTA in question.
> In such cases, providing the Officer can verify the additional statements they are being asked to make, it would be acceptable to issue a side letter to accompany the CoR. HMRC would, however, prefer not to make any deviations from the standard form of words it uses in certificates as set out in INTM162100 to INTM162129. If such deviations were allowed for some customers, it may result in other customers facing delays in having their claims to relief accepted.
> Any such side letter should be headed "THIS IS NOT A CERTIFICATE OF RESIDENCE FOR THE PURPOSES OF ANY DOUBLE TAXATION AGREEMENT WITH THE UNITED KINGDOM" and, for the sake of consistency, should be referred to CSTD Business, Assets & International, Base Protection Policy Team.

9.30.7 *Application for certificate*

HMRC say:

> **How to apply**
> There are different ways to apply depending on the type of organisation, or if you're an individual.
> **Individuals**
> You should apply online for a certificate if your foreign income hasn't been taxed yet.[197] This includes self-employed sole traders.
> **Partnerships - including Lloyd's syndicates**
> Partnerships with a Customer Relationship Manager (CRM) or Customer Coordinator within the Large Business Service (LBS) or Large Partnership Unit should send all requests to them.
> All other partnerships should send their requests to:
> HMRC, Self Assessment, PO Box 4000, Cardiff CF14 8HR

[197] *https://online.hmrc.gov.uk/shortforms/form/PT_CertOfRes*

> **Companies**
> Companies, usually limited companies, whose tax affairs are dealt with by HMRC's LBS should send requests to their CRM or any person nominated by the CRM to handle these requests.
> All other companies, whose tax affairs are dealt with by HMRC's Local Compliance office should send requests to the Corporation Tax Services office responsible for handling the company's tax affairs.
> **Registered pension schemes**
> Fill in form APSS 146E and send it back to HMRC. Use the address on the form.
> You'll also need to fill in forms APSS 146C and APSS 146D if someone's applying on your behalf.
> **Collective investment schemes**
> Fill in form CISC9 and send it back to HMRC. Use the address on the form.
> **Trusts or non-registered pension schemes**
> Write to HMRC Trust and Estates, First Floor, Ferrer's House, Castle Meadow Road, Nottingham NG2 1BB
> **Charities**
> Write to HMRC, Charities Correspondence SO708, PO Box 205, Bootle L69 9AZ
> **Public bodies**
> Write to HMRC Public Bodies Group, Customer Coordinator Team, Custom House, The Dockland, Pembroke Dock SA72 6TW[198]

9.30.8 *Claimant USA treaty-resident*

HMRC Self Assessment helpsheet HS302 (Dual Residents 2021) provides:

> **United States of America**
> The US taxes its citizens on their worldwide income, wherever they live, so if you live in the US, you do not need a certificate of overseas residence.
> You're a US resident if:
>
> - you've a substantial presence, permanent home or habitual abode in the US
> - no country other than the UK treats you as a resident

9.31 Covid and treaty-residence

OECD have produced guidance (**"OECD Covid guidance"**).[199]

[198] *https://www.gov.uk/guidance/get-a-certificate-of-residence*

[199] *https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Upd*

9.31.1 *Individual stranded abroad*

OECD Covid guidance provides:

> Two main situations could be imagined:
>
> - A person is temporarily away from their home (perhaps on holiday, perhaps to work for a few weeks) and gets stranded in the host jurisdiction by reason of the COVID-19 pandemic and attains domestic law residence there...
>
> 40.In the first scenario, it is unlikely that the person would acquire residence status in the jurisdiction where the person is temporarily because of extraordinary circumstances. There are, however, rules in domestic legislation causing a person to become a resident if they are present in the jurisdiction for a certain number of days. But even if the person becomes a resident under such rules, if a tax treaty is applicable, the person is unlikely to be a resident of that jurisdiction under the treaty's tiebreaker rule. Such a temporary dislocation should therefore have no tax implications in the vast majority of cases.

The earlier version of the guidance provided:

> ... it is probably unlikely that the person would have a "permanent home" available to them in the host country. But if they did (and an apartment rented for a sufficiently long period would count), and they had rented out their dwelling in their home country, they would be treated as treaty resident of the host state. Where the person had a permanent home in both states, it seems likely that the other tie-breaker tests (centre of vital interests, place of habitual abode, and nationality) would award residence to the home state. No remedial measure is suggested.

The answer is that the individual should not let out their dwelling in the home country; which in any event seems unlikely to happen in the short term.

9.31.2 *Individual returns home*

OECD Covid guidance provides:

> Two main situations could be imagined ...
>
> A person is working in a jurisdiction (the "current home jurisdiction") and has acquired residence status there, but they temporarily return to

ated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic
See 106.14.1 (OECD Covid guidance).

their "previous home jurisdiction" because of the COVID-19 situation. They may either never have lost their status as resident of their previous home jurisdiction under its domestic legislation, or they may regain residence status on their return...

44.In the second case, the same treaty rules apply, but their application produces a more uncertain result because the person's attachment to the previous home jurisdiction is stronger. In cases where the personal and economic relations in the two jurisdictions are close but the tie-breaker rule was in favour of the current home jurisdiction, the fact that the person moved to the previous home jurisdiction during the COVID-19 pandemic may tip the balance towards the previous home jurisdiction. This would usually be decided using the test of "habitual abode". According to paragraph 19[200] of the Commentary on Article 4 of the OECD Model, however, the habitual abode of a person is where the individual lived habitually, in the sense of being customarily or usually present; the test will not be satisfied by simply determining in which of the two contracting jurisdictions the individual has spent more days during that period. "Habitual abode" refers to the frequency, duration and regularity of stays that are part of the settled routine of an individual's life and are therefore more than transient. Days spent in a person's previous home jurisdiction because of travel restrictions imposed as a public health measure by one of the governments of the countries involved should not result in a change to the person's habitual abode. The determination of habitual abode must cover a sufficient length of time for it to be possible to ascertain the frequency, duration and regularity of stays that are part of the settled routine of the individual's life.

45.In conclusion, because the COVID-19 pandemic is a period of major changes and an exceptional circumstance, tax administrations and competent authorities will have to consider a period where public health measures imposed or recommended by the government do not apply when assessing a person's residence status. If in the context of and as a result of the COVID-19 pandemic, an individual's temporary presence in a jurisdiction results in them becoming dual-resident, that person's place of residence for the purposes of the tie-breaker included in the applicable treaty is unlikely to change, given that the tie-breaker provision requires consideration of factors that shall also be assessed in a more normal period. A dislocation because a person cannot travel back to their home jurisdiction due to a public health measure of one of the

[200] See 9.14 (Habitual abode).

> governments of the jurisdictions involved should not by itself impact the person's residence status for purposes of the tax treaty. A different approach may be appropriate however, if the change in circumstances continues when the COVID-19 restrictions are lifted.

9.31.3 *Entity residence*

OECD Covid guidance provides:

> 29.It is unlikely that the COVID-19 situation will create any changes to an entity's residence status under a tax treaty. A temporary change in location of board members or other senior executives is an extraordinary and temporary situation due to the COVID-19 pandemic and such change of location should not trigger a change in treaty residence...
> 31.This potential change of circumstances may trigger an issue of dual residence (in cases where the change in the place of effective management results in a company being considered a resident of two jurisdictions simultaneously under their domestic laws). However, as recognised by the Commentary on the OECD Model, situations of dual residence of companies are relatively rare.
> 32.But even in situations where there would be dual residence of an entity, tax treaties provide tie-breaker rules ensuring that the entity is resident in only one of the jurisdictions. If the treaty contains a provision like the 2017 OECD Model tie-breaker rule, competent authorities deal with the dual residence issue on a case-by-case basis by mutual agreement. This determination will take into consideration all of the facts and circumstances over the determination period. No single factor is determinative, rather a range of factors are taken into consideration.
> 33.In particular, paragraph 24.1[201] of the OECD Commentary on Article 4 illustrates the range of factors that the competent authorities are expected to take into consideration to make their determination, which includes: where the meetings of the company's board of directors or equivalent body are usually held; where the chief executive officer and other senior executives usually carry on their activities; where the senior day-to-day management of the company is carried on; where the person's headquarters are located; etc. It is also possible for competent authorities to agree to more general frameworks for such determinations, for example where particular fact patterns are present, under the authority of Article 25(3).
> 34.In situations where the treaty contains the pre-2017 OECD Model tie-breaker rule, the place of effective management will be the only

[201] See 9.18.1 (Relevant factors).

> criterion used to determine the residence of a dual-resident entity for tax treaty purposes. According to paragraph 24[202] of the Commentary on Article 4 of the 2014 OECD Model, the place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. All relevant facts and circumstances must be examined to determine the place of effective management. Paragraph 149 of the Commentary on Article 29 of the 2017 OECD Model explains that the concept of "place of effective management" was interpreted by some jurisdictions as being ordinarily the place where the most senior person or group of persons (for example a board of directors) made the key management and commercial decisions necessary for the conduct of the company's business.
>
> 35.Therefore, all relevant facts and circumstances should be examined to determine the "usual" and "ordinary" place of effective management, and not only those that pertain to an exceptional period such as the COVID-19 pandemic.
>
> 36.In conclusion, an entity's place of residence under the tie-breaker provision included in a tax treaty is unlikely to be impacted by the fact that the individuals participating in the management and decision-making of an entity cannot travel as a public health measure imposed or recommended by at least one of the governments of the jurisdictions involved.

HMRC sing from the same songsheet:

> **INTM120185 HMRC Approach to Company Residence in response to COVID-19 Pandemic** [Sep 2021]
>
> ... HMRC is very sympathetic to the disruption that is being endured.... POEM, like CMC, requires consideration of all the facts and circumstances. Unlike CMC however, the POEM can only be in one place at any one time. As such, even if CMC started to abide in the UK to a sufficient enough degree to result in UK residence under UK domestic law, it may be that after consideration of the activity in both territories, the POEM may be found to be in the other territory, and the company will therefore be treated as non-UK resident.
>
> In cases where the DTA includes a competent authority based tie-breaker, the UK competent authority usually takes into account the factors as set out at INTM120085. Whilst it is not possible to predict the outcome of any discussions between the two competent authorities, the

[202] See 9.19.2 (POEM: Top level management).

> UK competent authority would take into account a wider range of factors than just CMC and POEM, and these will all be viewed in the round.

See too 8.14 (Covid & company residence).

Cross references

The following topics are considered elsewhere:
10.16 (Arrival/departure: Disclosure)
6.43.10 (Split year): Scots/Welsh taxpayer
7.8 (Individual trustee: Split year)
12.1 (Exit taxes)
13.1 (Pre-arrival planning

The topic of companies becoming or ceasing to be UK resident is not discussed, though I hope to cover it in a future edition.

10.1 Residence throughout tax year

The starting point, under the SRT, is that an individual is resident (or not) in the UK during the whole of a tax year. Sch 45 FA 2013 provides:

> 3 An individual ("P") is resident in the UK for a tax year ("year X") if—
> (a) the automatic residence test is met for that year, or
> (b) the sufficient ties test is met for that year.
> 4 If neither of those tests is met for that year, P is not resident in the UK for that year.

Para 2(3) sch 45 FA 2013 explains the significance of being resident "for" a year:

> An individual who, in accordance with the statutory residence test, is resident (or not resident) in the UK "for" a tax year is taken for the purposes of any enactment relating to relevant tax[1] to be resident (or not resident) there at all times in that tax year.

This general rule is subject to two exceptions of such breadth that the principle only rarely applies:
(1) Statutory split-year reliefs
(2) DTA relief

10.2 Split year rules

Para 40 sch 45 FA 2013 provides:

[1] "Relevant tax" means IT, CGT, IHT and CT; see para 1(4) sch 45 FA 2013, discussed 6.3 (Scope of SRT).

> (1) The effect of a tax year being a split year is to relax the effect of paragraph 2(3) (which treats individuals who are UK resident "for" a tax year as being UK resident at all times in that year).
> (2) When and how the effect of paragraph 2(3) is relaxed is defined in the special charging rules introduced by the amendments made by this Part.

I refer to these special charging rules as "split-year reliefs".

> (3) Subject to those special charging rules (and any other special charging rules for split years that may be introduced in the future)[2], nothing in this Part
> [a] alters an individual's residence status for a tax year or
> [b] affects his or her liability to tax.

A split year matters for two purposes:
(1) It is the gateway to split-year reliefs
(2) It is relevant for temporary non-residence rules (see the next chapter)

However the individual is UK resident throughout the split year for (almost) all UK tax purposes. In a (so-called) split year, it is not the case that the individual is UK resident in part of the year and not UK resident in the offshore part. So far as it may suggest otherwise, the term "split year" is misleading. But it is difficult to think of a better term, and no harm arises as long as that is kept in mind.

10.3 Split-year reliefs

10.3.1 *Split year: Pt 4/5 ITTOIA Income*

For Part 4 ITTOIA (Savings & Investment Income), s.368(2A) ITTOIA provides the split-year relief. To follow the sense, it needs to be read together with its preceding subsection:

> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.
> (2A) If income arising to an individual who is UK resident arises in the overseas part of a split year, it is to be treated for the purposes of this section as arising to a non-UK resident.

For Part 5 ITTOIA Miscellaneous Income, s.577(2A) repeats the same point verbatim.

[2] The words in brackets are otiose.

10.3.2 *Other split-year reliefs*

These two provisions are quite general: they apply to all categories of income within Parts 4/5 ITTOIA (S&I Income/Part 5 ITTOIA Miscellaneous Income). Elsewhere split-year relief is set out separately for each category of income/gains. I discuss them in the chapters considering that type of income/gains:

Type of income/gain	**See para**	s.720 income	49.21.2; 49.26.3
Trading income	21.4.5; 21.22.4	s.731 income	50.47; 50.39.3
Property income	24.3.2	Chargeable-event gains	70.4.5
Employment income	34.12.1	Chargeable gains	56.9
Pension income	38.2	s.3 gains	64.12

Most of the split-year reliefs adopt the same wording as the Parts 4/5 ITTOIA split-year reliefs: they provide that income/gains in the overseas part of the split year are not charged. The individual still retains the status of resident throughout the year, but that does not matter so far as split-year relief applies. I refer to that as **"standard form split-year relief"**.

Occasionally the split-year relief provides that the individual is treated for some limited purpose as non-UK resident in the overseas part of the split year.[3]

10.3.3 *When no split-year relief*

In the absence of an applicable split-year relief, the default rule remains that income/gains of a year are fully chargeable, even if the year is a split year. It is not possible to give a full list of the cases where the default rule applies, but they include:

Type of income/gain	**See para**
ToA income	
s.720 income	49.21.2; 49.26.3
s.731 income	50.39.3; 50.47
s.643A income	47.24
s.86 gains	60.14
s.87 gains	61.18
Non-resident IT relief	45.9

Where these rules are in point, tax needs to be considered before the start

[3] For instance, the trading income split-year reliefs.

of the tax year of arrival.

In addition, there is no split-year relief for the following:

Topic	**See para**
Rules for qualifying for the remittance basis	
Sub-£2k remittance basis taxpayers	17.9.1
Non-taxpayers remittance basis	17.10
Year counting for	
Deemed domicile	5.7
Remittance basis claim charge	17.12.13
OWR (recent arrivals) remittance basis	34.22
FIG relief for New Residents	A1.2.1

10.4 Definition of "split year"

"Split year" is elaborately defined. Para 43(1) sch 45 FA 2013 provides:

> As respects an individual, a tax year is a "split year" if–
> (a) the individual is resident in the UK for that year, and
> (b) the circumstances of the case fall within–
> (i) Case 1, Case 2 or Case 3 (cases involving actual or deemed departure from the UK), or
> (ii) Case 4, Case 5, Case 6, Case 7 or Case 8 (cases involving actual or deemed arrival in the UK).

I refer to **"split-year Cases 1-8"**. The Cases[4] can be summarised as follows:

Case	*sch 45 para/Outline*		*Year before*	*Year after*	*See para*
Leaving UK					
1	44	Start full-time work overseas	Resident	Non-resident[5]	10.6
2	45	Partner starts work overseas	Resident	Non-resident	10.7
3	46	Cease to have UK home	Resident	Non-resident	10.8
Coming to UK					
4	47	Start to have only home in UK	Non-resident	Does not matter	10.9
5	48	Start full-time UK work	Non-resident	Does not matter	10.10
6	49	Cease full-time work overseas	Non-resident[6]	Resident	10.11
7	50	Partner ceases work overseas	Non-resident	Resident	10.12
8	51	Start to have UK home	Non-resident	Resident	10.13

[4] Statute uses an initial capital, to reflect the technical terminology.

[5] The requirement for Cases 1 & 6 (only) is to be non-resident under overseas test 3 (full-time overseas work).

[6] See above footnote.

10.5 Definitions for split-year rules

It is helpful first to deal with some definitions.

10.5.1 *"Relevant year"*

Para 43 sch 45 FA 2013 provides:

> (2) The 8 Cases are described in paragraphs 44 to 51.
> (3) In those paragraphs, the individual is referred to as "the taxpayer" and the tax year as "the relevant year".
> (4) In applying Part 2 of this Schedule to those paragraphs, for "P" read "the taxpayer".

The "relevant year" will be a split year if the conditions of one of the Cases is met.

10.5.2 *"Previous/next tax year"*

Para 52 sch 45 FA 2013 provides commonsense definitions:

> (1) This paragraph applies for the purposes of paragraphs 44 to 51.
> (2) A reference to "the previous tax year" is to the tax year preceding the relevant year.
> (3) A reference to "the next tax year" is to the tax year following the relevant year.

10.5.3 *"Partner"*

Para 52(4) sch 45 FA 2013 provides:

> "Partner", in relation to the taxpayer, means—
> (a) a husband or wife or civil partner,
> (b) if the taxpayer and another person are living together[7] as husband and wife, that other person, or
> (c) if the taxpayer and another person of the same sex are living together as if they were civil partners, that other person.

In non-legal English the word "partner" has long had this sense. In legal English (or at least, in tax legislation) the word has only been used to describe a partner within the meaning of the Partnership Acts; so this is something of a Plain English innovation. But no confusion is likely to arise.

[7] See App 3.4.3 (Living together: married couple).

10.5.4 *Rounding*

Para 52(5) sch 45 FA 2013 provides:

> If calculation of the appropriate number results in a number of days that is not a whole number, the appropriate number is to be rounded up or down as follows—
>
> (a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,
>
> (b) otherwise, round it down to the nearest whole number.

10.5.5 *"The overseas part"*

Para 53 sch 45 FA 2013 provides:

> (1) "The overseas part" of a split year is the part of that year defined below—
>
> (a) for the Case in question, or
>
> (b) if the taxpayer's circumstances fall within more than one Case, for the Case which has priority (see paragraphs 54 and 55).[8]
>
> (2) For Case 1, the overseas part is—
>
> (a) if there is only one period falling within paragraph 44(3) [overseas work period], the part beginning with the first day of that period, and
>
> (b) if there is more than one such period, the part beginning with the first day of the longest of those periods.
>
> (3) For Case 2, the overseas part is the part beginning with the deemed departure day as defined in paragraph 45(7) and (8).
>
> (4) For Case 3, the overseas part is the part beginning with the day mentioned in paragraph 46(3)(a) [day ceasing to have UK home].
>
> (5) For Case 4, the overseas part is the part before the day mentioned in paragraph 47(3) [day UK Home Test is met].
>
> (6) For Case 5, the overseas part is—
>
> (a) if there is only one period falling within paragraph 48(3) [roughly, day starting UK work], the part before that period begins, and
>
> (b) if there is more than one such period, the part before the first of those periods begins.
>
> (7) For Case 6, the overseas part is—
>
> (a) if there is only one period falling within paragraph 49(3), the part ending with the last day of that period, and

[8] See 10.14 (Priority between Cases).

> (b) if there is more than one such period, the part ending with the last day of the longest of those periods.
>
> (8) For Case 7, the overseas part is the part before the deemed arrival day as defined in paragraph 50(7) and (8).
>
> (9) For Case 8, the overseas part is the part before the day mentioned in paragraph 51(3)(a) [day UK home is acquired].

10.5.6 *"The UK part"*

Para 56 sch 45 FA 2013 provides:

> "The UK part" of a split year is the part of that year that is not the overseas part.

10.6 Case 1: Start work overseas

Para 44(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 1 if they are as described in sub-paragraphs (2) to (4).

10.6.1 *UK resident in previous year*

Para 44(2) sch 45 FA 2013 provides:

> The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year Cases 1-3, which apply to leavers.

10.6.2 *Overseas work*

Para 44(3) sch 45 FA 2013 provides:

> There is at least one period (consisting of one or more days) that—
>
> (a) begins with a day that—
>
> (i) falls within the relevant year, and
>
> (ii) is a day on which the taxpayer does more than 3 hours' work overseas,
>
> (b) ends with the last day of the relevant year, and
>
> (c) satisfies the overseas work criteria.

10.6.3 *"Overseas work criteria"*

"Overseas work criteria" is a label for 4 sets of conditions. Para 44(5) sch 45 FA 2013 provides:

> A period "satisfies the overseas work criteria" if—
> (a) the taxpayer works sufficient hours overseas, as assessed over that period,

See 10.6.4 ("Sufficient hours overseas").

> (b) during that period, there are no significant breaks from overseas work,
> (c) the number of days in that period on which the taxpayer does more than 3 hours' work in the UK does not exceed the permitted limit, and

I refer to days within (c) as **"UK workdays"**.

> (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.

I refer to days within (d) as **"UK days"**; see 10.6.6 ("The permitted limit").

10.6.4 *"Sufficient hours overseas"*

Para 44(5) sch 45 FA 2013 provides:

> A period "satisfies the overseas work criteria" if—
> (a) the taxpayer works sufficient hours overseas, as assessed over that period...

Para 44(7) sch 45 FA 2013 provides:

> To work out whether the taxpayer works "sufficient hours overseas" as assessed over a given period, apply paragraph 14(3) but with the following modifications—
> (a) for "P" read "the taxpayer",
> (b) for "year X" read "the period under consideration",
> (c) for "365 (or 366 if year X includes 29 February)" read "the number of days in the period under consideration", and
> (d) in paragraph 28(9)(b), as it applies for the purposes of step 3, for "30" read "the permitted limit".

Amended as para 44(7) requires, para 14(3) provides:

> Take the following steps to work out whether [the taxpayer] works "sufficient hours overseas" as assessed over [the period under consideration]—
> *Step 1 [disregarded days]*
> Identify any days in [the period under consideration] on which [the

> taxpayer] does more than 3 hours' work in the UK, including ones on which [the taxpayer] also does work overseas on the same day.
>
> The days so identified are referred to as "disregarded days".
>
> *Step 2 [net overseas hours]*
>
> Add up (for all employments held and trades carried on by [the taxpayer]) the total number of hours that [the taxpayer] works overseas in [the period under consideration], but ignoring any hours that [the taxpayer] works overseas on disregarded days.
>
> The result is referred to as [the taxpayer]'s "net overseas hours".
>
> *Step 3 [reference-period days]*
>
> Subtract from the number of days in [the period under consideration]—
>
> (a) the total number of disregarded days, and
>
> (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.[9]
>
> The result is referred to as the "reference period".

Armed with the figures from steps 2 and 3, we proceed to the computation. This is set out in the remaining two steps:

> *Step 4*: *[compute reference period ÷ 7]*
>
> Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.
>
> *Step 5 [compute net overseas hours ÷ reference-period weeks]*
>
> Divide [the taxpayer]'s net overseas hours by the number resulting from step 4.
>
> If the answer is 35 or more, [the taxpayer] is considered to work "sufficient hours overseas" as assessed over [the period under consideration].

See 6.8.2 ((a): Sufficient hours overseas).

RDRM provides:

> **RDRM12070: Residence: The SRT: Split year treatment: Case1: Calculating whether individual works full-time overseas in the relevant period** [Sep 2019]
>
> The table below, sets out the permitted limits for Case 1 – the appropriate portions of the full-year permitted limits.
>
> | Date | X - see note | Y - see note |
> |---|---|---|
> | 6 - 30 Apr | 30 | 90 |

[9] See 6.24 (Reference period: non-work days).

1 - 31 May	27	82
1 - 30 Jun	25	75
1 - 31 Jul	22	67
1 - 31 Aug	20	60
1 - 30 Sep	17	52
1 - 31 Oct	15	45
1 - 30 Nov	12	37
1 - 31 Dec	10	30
1 - 31 Jan	7	22
1 - 29 Feb	5	15
1 - 31 Mar	2	7
1 - 5 Apr		

Note

X = permitted limit on days where you can work more than 3 hours and maximum number of days that can be subtracted for gaps between employments

Y = permitted limit on days spent in the UK

RDRM provides some examples:

> **RDRM12080: Residence: The SRT: Split year treatment: Case1: The UK and overseas parts of the tax year** [Aug 2019]
>
> Example 1 (Richard)
>
> R has lived and worked in London for the last 10 years and is UK resident for tax purposes. He is seconded abroad by his employer for a 3 year period. His overseas contract starts on 3 November 2014, when he takes up duty at his new office in Madrid. For the purposes of this example R fails the third automatic overseas test for 2014-2015 but meets it for 2015-2016.
>
> On 2 December 2014 R returns to the UK office to finish off a project he was involved in before his secondment. His work in the UK is completed on 16 December 2014, (11 UK workdays and 4 non-working days). He then takes leave until 28 December (12 days), flying back to Madrid and resuming work on 29 December. On his return to Madrid he works only at the Madrid office until 5 April 2015.
>
> R calculates that he meets the criteria for Case 1 split year treatment from 3 November, this being the first date on which he works for more than 3 hours overseas. Using the table at RDRM12070 he calculates that between 3 November 2014 and 5 April 2015 he can spend 37 days in the UK and work for more than 3 hours in the UK for up to 12 days.
>
> R determines that:
>
> - he was UK resident for the previous tax year (2013-2014)
> - he is resident in the UK for the current year (2014-2015) and that he

does not meet the third automatic overseas test

- he was non-UK resident for 2015-2016
- he calculates he meets the sufficient hours overseas test for the period 3 November 2014 to 5 April 2015
- he did not exceed the limits of 12 UK work days and 37 days spent in the UK between 3 November 2014 and 5 April 2015, and
- he had no significant break from overseas work during the period.

To determine that he worked full-time overseas during the relevant period, R undertook the following calculation.

His reference period:

Days in period 3/11/14 to 5/4/15 =	154
Less:	
• Disregarded days	11
(days spent working in the UK for more than 3 hours)	
• Annual, sick and parental leave	6 (Leave on 17, 18, 19, 22, 23 and 24 December)
• embedded non-working days	2 (20 and 21 December)
Total	19
Reference period =	135 days

Sufficient hours test

All hours worked overseas from 3 November	670
Less	
Hours worked on disregarded days	Nil
Net overseas hours	670

Divide reference period by 7 (135/7) = 19.28 round down to 19

Divide net overseas hours by 19 (670/19) = 35.26

R meets the sufficient hours overseas test because his average over the reference period, (3 November 2014 to 5 April 2015) is more than 35.

For R the UK part of the tax year ends on 2 November 2014, and the overseas part starts on 3 November 2014 – the earliest date from which he meets all the conditions of the sufficient hours overseas test.

Example 2 (Amanda)

A has been living in the UK since she was born and is UK resident for tax purposes. She has worked in the media industry for 5 years and gets a job as a reporter on a 3 year contract based in India. She moves there on 10 November 2013, and lives in an apartment provided by her new employer. She meets the overseas work criteria from 10 November 2013. She returns to the UK to visit her family over the Christmas period for 2 weeks, and does not work while she is there.

A remains working in India throughout the tax year 2014-2015, again only returning to the UK for a 2 week period over Christmas.

A will receive split year treatment for 2013-2014 tax year because:

- she was UK resident for 2012-2013 and 2013-2104
- she is non-UK resident for 2014-2015 and meets the third automatic overseas test for that year

From 10 November 2013 until 5 April 2014 she:

- does not work at all in the UK
- spends 14 days in the UK, which is less, by reference to the table at RDRM12070, than the permitted limit of 37 days.

For A, the UK part of the tax year will end on 9 November 2013, and the overseas part of the tax year will start on 10 November 2013.

The overseas part of the tax year starts on the first day of the relevant period, as long as the individual meets the overseas work criteria for that period. (Refer to RDRM12060).

10.6.5 *UK days within permitted limit*

Para 44 sch 45 FA 2013 provides:

> (5) A period "satisfies the overseas work criteria" if ...
> (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.
> (6) A day falls within this sub-paragraph if—
> (a) it is a day spent by the taxpayer in the UK, but
> (b) it is not a day that is treated under paragraph 23(4)[10] as a day spent by the taxpayer in the UK.

I refer to days within (6) as **"UK days"**.

10.6.6 *"The permitted limit"*

The expression "permitted limit" is used in split-year Cases 1, 2 and 6. It is defined each time, but the Cases 1 and 6 definitions are identical.

For Case 1, the "permitted limit" matters for three purposes:

(1) UK workdays must not exceed the permitted limit: para 44(5))(c).
(2) UK days must not exceed the permitted limit: para 44(5)(d).
(3) For the purposes of ascertaining the reference period: para 44(7)(d).

Case 1 has two definitions of "permitted limit". It would have been simpler to have two terms, but there it is.

Para 44(8) sch 45 FA 2013 provides:

> The permitted limit is—
> (a) for sub-paragraphs (5)(c) [UK workdays] and (7)(d), the

[10] See 6.19 (Deeming rule (frequent visits)).

> number found by reducing 30 by the appropriate number, and
> (b) for sub-paragraph (5)(d) [days spent in UK] , the number found by reducing 90 by the appropriate number.

10.6.7 *"The appropriate number"*

The drafter of the SRT was fond of the expression "appropriate number" which is used in almost all the split year Cases, with a different definition every time, or sometimes (as in split-year Case 1) with two definitions. Para 44(9) sch 45 FA 2013 provides:

> The appropriate number is the result of—
> A × (B÷12)
> where—
> "A" is—
> (a) 30, for sub-paragraphs (5)(c) and (7)(d), or
> (b) 90, for sub-paragraph (5)(d), and
> "B" is the number of whole months in the part of the relevant year before the day mentioned in sub-paragraph (3)(a).

One rounds down or up to the nearest whole number (rounding half up to the next number).[11]

10.6.8 *Overseas work in following year*

Para 44(4) sch 45 FA 2013 provides:

> The taxpayer is not resident in the UK for the next tax year because the taxpayer meets the third automatic overseas test for that year (see paragraph 14).

In short, the individual must continue working overseas in the following year. See 6.8 (Automatic overseas test 3: Overseas work).
Minutes of the Capital Taxes Liaison Group provide:[12]

> The issue being raised was whether a split year residence applies, for case 1 split year treatment, if in the following year a person works full time abroad (and so is non-resident under the third automatic overseas test) and is also non-UK tax resident under other tests, given the wording in para 44 FA2013 Sch45 and para 44(4). It was suggested that this legislation could be interpreted to suggest that case 1 split year

[11] See 10.5.4 (Rounding).

[12] Minutes of meeting March 2023; *https://www.gov.uk/government/groups/capital-taxes-liaison-group*

treatment may apply only when the reason for non-residence was exclusively the third automatic overseas test and that other, for example the first automatic overseas test, cannot also apply where case 1 split year treatment is being claimed.
It was confirmed that as long as the third overseas test is met, case 1 split year treatment can apply regardless of other overseas tests also being met.

10.7 Case 2: Partner starts work overseas

Para 45(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 2 if they are as described in subparagraphs (2) to (6).

10.7.1 *UK resident in previous year*

Para 45(2) sch 45 FA 2013 provides:

> The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year Cases 1-3, which apply to leavers.

10.7.2 *Partner working overseas*

Para 45(3) sch 45 FA 2013 provides:

> The taxpayer has a partner[13] whose circumstances fall within Case 1 for–
> (a) the relevant year, or
> (b) the previous tax year.

10.7.3 *Living with partner*

Para 45(4) sch 45 FA 2013 provides:

> On a day in the relevant year, the taxpayer moves overseas so the taxpayer and the partner can continue to live together while the partner is working overseas.

10.7.4 *No (principal) UK home*

Para 45(5) sch 45 FA 2013 provides:

> In the part of the relevant year beginning with the deemed departure

[13] See 10.5.3 (“Partner”).

> day-
> (a) the taxpayer
> [i] has no home in the UK at any time, or
> [ii] has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and
> (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.

There are two possible deemed departure days. Para 45 sch 45 FA 2013 provides:

> (7) If sub-paragraph (3)(a) applies, [partner's split year is the same year] the "deemed departure day" is the later of—
> (a) the day mentioned in sub-paragraph (4), and
> (b) the first day of what is, for the partner, the overseas part of the relevant year as defined for Case 1 (see paragraph 53).
> (8) If sub-paragraph (3)(b) applies, [partner's split year is the previous year] the "deemed departure day" is the day mentioned in sub-paragraph (4).

Para 45 sch 45 FA 2013 defines the permitted limit in two stages:

> (9) The permitted limit is the number found by reducing 90 by the appropriate number.
> (10) The appropriate number is the result of—
> A × (B÷12)
> where—
> "A" is 90, and
> "B" is the number of whole months in the part of the relevant year before the deemed departure day.

One rounds down or up to the nearest whole number (rounding half up to the next number).[14]

It would have been easier to say that the permitted limit is 90 – (A×B÷12) but the drafter of the SRT is somewhat algebra-phobic (or else thought that the reader would be).

10.7.5 *Non-resident in next year: Case 2*

Para 45(6) sch 45 FA 2013 provides:

> The taxpayer is not resident in the UK for the next tax year.

[14] See 10.5.4 (Rounding).

10.7.6 *HMRC examples*

RDRM provides:

> **RDRM12120: Residence : The SRT: Split year treatment: Case 2: The UK and overseas parts of the tax year** [Aug 2019
> Example (Peter and Amanda)
> P is A's husband (see example 2 at RDRM12080). He too lived in the UK for all his life and was resident in the UK for tax purposes. He travels with A on 8 January 2014 to live with her in India, having given up his job. A and P have let their flat in the UK for a 3 year period, commencing on 9 January 2014.
> Once in India P spends his time following his lifelong hobby as a lepidopterist, and catalogues Indian butterflies. He spend all his time there, except for the Christmas trips to the UK with A.
> P will receive split year treatment for the tax year 2013-2014, as he meets the Case 2 conditions:
>
> - he has no home in the UK after 8January 2014
> - he was resident for 2012-2013
> - he is non-UK resident for 2014-2015
>
> From 8 January 2014 until 5 April 2014 P spends less than the permitted limit of 22 days in the UK, (table at RDRM12070).
> For P the UK part of the tax year will end on 7 January 2014, and the overseas part of the tax year will start on 8 January 2014, the day he joined A to live together in India.

10.8 Case 3: Cease to have UK home

Para 46(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 3 if they are as described in subparagraphs (2) to (6).

10.8.1 *UK resident in previous year*

Para 46(2) sch 45 FA 2013 provides:

> The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year Cases 1-3, which apply to leavers.

10.8.2 *No UK home*

Para 46(3) sch 45 FA 2013 provides:

> At the start of the relevant year the taxpayer had one or more homes in the UK but-
>
> (a) there comes a day in the relevant year when P ceases to have any home in the UK, and
>
> (b) from then on, P has no home in the UK for the rest of that year.

10.8.3 *Less than 16 UK days*

Para 46(4) sch 45 FA 2013 provides:

> In the part of the relevant year beginning with the day mentioned in subparagraph (3)(a) [day when ceasing to have UK home], the taxpayer spends fewer than 16 days in the UK.

10.8.4 *Non-resident in next year: Case 3*

Para 46(5) sch 45 FA 2013 provides:

> The taxpayer is not resident in the UK for the next tax year.

10.8.5 *Sufficient overseas link*

Para 46 sch 45 FA 2013 provides:

> (6) At the end of the period of 6 months beginning with the day mentioned in sub-paragraph (3)(a), the taxpayer has a sufficient link with a country overseas.
>
> (7) The taxpayer has a "sufficient link" with a country overseas if and only if-
>
> (a) the taxpayer is considered for tax purposes to be a resident of that country[15] in accordance with its domestic laws, or
>
> (b) the taxpayer has been present in that country (in person) at the end of each day of the 6-month period mentioned in sub-paragraph (6), or
>
> (c) the taxpayer's only home is in that country or, if the taxpayer has more than one home, they are all in that country.

10.8.6 *HMRC example*

RDRM provides:

> **RDRM12140: Residence: The SRT: Split year treatment: Case 3: The UK and overseas parts of the tax year** [Aug 2019]
>
> Example (M)
>
> M has been based in the UK for most of her working life, and has been

[15] Para 145 sch 45 FA 2013 provides: "country" includes a state or territory.

resident here for tax purposes. On holiday in Bali in the summer of 2013 she meets Maurice, who lives and works in the United Arab Emirates. Some 12 months later, they marry. M resigns from her job and moves out of her home on 24 September 2014. She spends the nights of 24 and 25 September in a hotel and flies out to the UAE to live with Maurice on 26 September 2014. She has no close family in the UK and does not return to the UK in the remainder of the tax year. She does not take up any employment in the UAE. Maurice and M plan to live in the UAE for at least another 5 years.

M will receive split year treatment for 2014-2015 as she meets the Case 3 conditions:

- she was UK resident for 2013-2014
- she is non-UK resident for 2015-2016
- from 24 September 2014 until 5 April 2015 she has no home in the UK and spends fewer than 16 days in the UK
- she had established her only home is in the UAE within 6 months

For M, the overseas part of the tax year will start on 24 September 2014, the day she no longer had a home in the UK.

The overseas part of the tax year is the period which starts on the date in the tax year when the individual ceases to have a home in the UK until the end of the tax year.

10.9 Case 4: Start to have UK home only

Para 47(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 4 if they are as described in subparagraphs (2) to (4).

See too 10.13.5 (Cases 4/8 compared).

10.9.1 *Non-resident in previous year*

Para 47(2) sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

10.9.2 *Acquiring UK home*

Para 47(3) sch 45 FA 2013 provides:

> [a] At the start of the relevant year, the taxpayer did not meet the only home test, but
> [b] there comes a day in the relevant year when that ceases to be the case

> and
> [c] the taxpayer then continues to meet the only home test for the rest of that year.

Para 47(5) sch 45 FA 2013 defines the Only Home Test:

> The "only home test" is met if-
> (a) the taxpayer has only one home and that home is in the UK, or
> (b) the taxpayer has more than one home and all of them are in the UK.

10.9.3 *UK-ties tests*

Para 47(4) sch 45 FA 2013 provides:

> For the part of the relevant year before that day [when Only Home Test is met], the taxpayer does not have sufficient UK ties.

UK-ties tests occur in split-year Cases 4, 5 and 8. The expression "sufficient UK ties" is defined separately, three times in all, but the definitions follow the same template. It has the usual SRT meaning[16] except for two adjustments:

(1) The test is applied over the "overseas part" of the split year (if it is a split year); UK days and UK ties in the UK part of the split year do not count.
(2) There is an reduction in the day count limit, reducing the days allowed in line with the length of the "overseas part" of the split year.

Para 47(6)(a) sch 45 FA 2013 deals with the first adjustment:

> (6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments-
> (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met] ...
> (8) Sub-paragraph (6)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members)[17] so those references must continue to be read as references to year X.

It may be helpful to set out para 17 sch 45 FA 2013 as amended:

[16] See 6.14 (Sufficient ties test).
[17] See 6.28.3 (Ascertaining family residence).

> (1) The sufficient ties test is met for ~~year X~~ the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met] if-
>
> (a) P meets none of the automatic UK tests and none of the automatic overseas tests, but
>
> (b) P has sufficient UK ties for that year.
>
> (2) "UK ties" is defined in Part 2 of this Schedule.
>
> (3) Whether P has "sufficient" UK ties for ~~year X~~ the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met] will depend on-
>
> (a) whether P was resident in the UK for any of the previous 3 tax years, and
>
> (b) the number of days that P spends in the UK in ~~year X~~ the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met].
>
> (4) The Tables in paragraphs 18 and 19 show how many ties are sufficient in each case.

10.9.4 *Computing number of days*

Para 18/19 sch 45 FA 2013 define "sufficient ties" for leavers /arrivers. It is convenient to combine the two into a single table. As amended by para 47(6)(a), para 18/19 provide:

Days spent by P in the UK in ~~year x~~	**sufficient ties**	**sufficient ties**
[the time until Only Home Test is met]	***leavers***	***arrivers***
More than [15] but not more than [45]	At least 4	[non-resident]
More than [45] but not more than [90]	At least 3	All 4
More than [90] but not more than [120]	At least 2	At least 3
More than [120]	At least 1	At least 2

Para 47 sch 45 FA 2013 adjusts the figures in square brackets:

> (6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments ...
>
> (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.
>
> (7) The appropriate number is found by multiplying the number of days, in each case, by A ÷ 12
>
> where "A" is the number of whole months in the relevant year beginning with the day mentioned in sub-paragraph (3) [day Only Home Test is met].

RDRM provides:

> **RDRM12270: Residence: The SRT: Split year treatment: Case 8: Starting to have a home in the UK** [Oct 2019]
> ... not have sufficient UK ties to make them UK resident in the period from the 6 April to the point they start to have a UK home – when they are considering whether they have sufficient UK ties in this part of the year, they should reduce the day count limits in the sufficient ties tables (refer to RDRM11520) by substituting the values from the table below.

Day before satisfying only home or having a UK home tests is[18]

	6 to 30 Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	1 Mar to 5 Apr
"A"	1	2	3	4	5	6	7	8	9	10	11	12
A÷12	0.08	0.16	0.25	0.33	0.42	0.5	0.58	0.67	0.75	0.83	0.92	12
For 15 substitute	1	2*	4	5	6	7*	9	10	11	12*	14	15
For 45 substitute	4	7*	11	15	19	22	26	30	34	37*	41	45
For 90 substitute	7*	15	22*	30	37*	45	52*	60	67*	75	82*	90
For 120 substitute	10	20	30	40	50	60	70	80	90	100	110	120

There are two points to note about this table. Firstly, the author has taken the view that where the Only Home Test is met in the period 6-30 April, the number A is 1. Suppose the Only Home Test is met on 10 April. One might have thought that the number of whole months in the tax year beginning with 10 April is 11.

Secondly, the author has forgotten the rule that a fraction of exactly one half is to be rounded up.[19] The figures marked * should all be increased by one. Perhaps fortunately, that will not often make any difference.

10.9.5 *HMRC example*

RDRM provides:

> **RDRM12160: Residence: The SRT: Split year treatment: Case 4: The overseas and UK parts of the tax year** [Aug 2019]
> Example (Olan)
> O has been working for his employer in Germany for the last 5 years. He

[18] I have added the first two rows to explain the computation which follows, rounded to two decimal places in the second row, and added the asterix.

[19] See 10.5.4 (Rounding).

has no UK ties and was not resident in the UK. On 1 June 2013 O moves to the UK to look for work here. He rents out his apartment in Germany on a 2 year lease, from 27 May 2013.

O arrives in the UK and stays in temporary accommodation while he finds an apartment to rent. He signs a 12 month lease on an apartment in London on 1 July 2013.

He starts UK employment on 22 July 2013 and remains in the UK for a further 2 years.

O receives split year treatment for 2013-2014 as he meets the Case 4 conditions:

- he is non-UK resident for 2012-2013
- he started to have his only home in the UK during the tax year and that continued until at least the end of the tax year
- he had no UK ties from 6 April 2013 to 1 July 2013

For O the overseas part of the tax year will end on 30 June 2013, and the UK part of the tax year will start on 1 July 2013, the day he started to have his only home in the UK.

Note: O might also meet the criteria for Case 5 or Case 8 split years, but priority is given to that case where the overseas part of the tax year is the shortest.

10.10 Case 5: Start work in UK

Para 48(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 5 if they are as described in subparagraphs (2) and (3).

10.10.1 *Non-resident in previous year*

Para 48(2) sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

10.10.2 *UK work*

Para 48(3) sch 45 FA 2013 provides a set of 5 conditions:

> There is at least one period of 365 days in respect of which the following conditions are met—
> (a) the period begins with a day that—
> (i) falls within the relevant year, and
> (ii) is a day on which the taxpayer does more than 3 hours'

> work in the UK,
> (b) in the part of the relevant year before the period begins, the taxpayer does not have sufficient UK ties,
> (c) the taxpayer works sufficient hours in the UK, as assessed over the period,
> (d) during the period, there are no significant breaks from UK work, and
> (e) at least 75% of the total number of days in the period on which the taxpayer does more than 3 hours' work are days on which the taxpayer does more than 3 hours' work in the UK.

10.10.3 *"Sufficient hours in the UK"*

Para 48(4) sch 45 FA 2013 provides:

> To work out whether the taxpayer works "sufficient hours in the UK" as assessed over a given period, apply paragraph 9(2) but for "P" read "the taxpayer".

10.10.4 *UK-ties test: Case 5*

Para 48(3) sch 45 FA 2013 provides:

> There is at least one period of 365 days in respect of which the following conditions are met ...
> (b) in the part of the relevant year before the period begins, the taxpayer does not have sufficient UK ties ...
>
> (5) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (3)(b) with the following adjustments—
> (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (3)(b), and
> (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.
> (6) The appropriate number is found by multiplying the number of days, in each case, by A ÷ 12
> where "A" is the number of whole months in the part of the relevant year beginning with the day on which the 365-day period in question begins.
> (7) Sub-paragraph (5)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members) so those references must continue

to be read as references to year X.

This is (more or less) the standard form for split-year UK-ties tests, and I discuss it elsewhere.[20]

10.10.5 *HMRC example*

The RDRM provides:

> **RDRM12180: Residence: The SRT: Split year treatment: Case 5: The overseas and UK parts of the tax year** [Aug 2019]
> Example
> Andrea arrived in the UK on 20 May 2013 from Poland for a 2 week visit. She stays with her sister who is working in the UK. This is Andrea's first trip to the UK, and she has never previously been UK resident for tax purposes.
> Just before Andrea is about to return to Poland, she is offered a part-time job at a hotel. This will be her first ever job. She starts work on 10 June 2013. For the first 8 weeks of her employment she works 20 hours per week (5 hours per day), but from 5 August 2013 she is offered full-time work of 40 hours per week. Andrea takes 20 days leave during the tax year; there are no non-working days embedded within any of her periods of leave.
> Although for the first 8 weeks of her employment Andrea only works 20 hours per week, she works out that she meets the third automatic UK test from 10 June 2013, her computations are:
> Step 1: In a 365 days period that are no disregarded days when Andrea did more than 3 hours work overseas
> Step 2: Total number of UK hours worked during 365 day period (8 weeks x 20 hours & 40 weeks x 40 hours) = 1760 hours
> Step 3: Subtract disregarded days = 0, and 20 days annual leave, that can be deducted from 365 = 345 days reference period.
> Step 4: Divide reference period by 7 (345/7) = 49.29, rounded down to 49
> Step 5: Divide Andrea's net UK hours by 49 (the result of step 4) 1760/49 = 35.91 hours
> Andrea's hours average out at over 35 over the 365 day period from 10 June 2013 (which is a day on which she worked for more than 3 hours in the UK). She meets the third automatic UK test from that date.
> Andrea meets the criteria for Case 5 split year on the basis that:
>
> - she was non-UK resident in the previous tax year

[20] See 10.9.3 (UK-ties tests).

- she meets the third automatic UK test for the 365 day period commencing on 10 June 2013, (which is a day on which she worked for more than 3 hours in the UK)
- in the part of the year from 6 April 2013 until 10 June 2013 she did not have sufficient UK ties. (Refer to table in RDRM12220)

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> **Sufficient hours – non alignment of Case 5 and FTWUK**
> These tests diverge insofar as, for Case 5, the period starts with a day on which the individual works for three or more hours in the UK, but this is not a requirement for the third automatic UK test. You could therefore find that an individual is resident under the third automatic UK test in the tax year following return to the UK, but does not meet the Case 5 condition to split the arrival year, which would be seen as odd. Could this be addressed?
> HMRC reply: HMRC agrees these dates can differ and this is because the two tests are testing different things. If an individual meets the FTWUK test for a year they will be resident here. Case 5 then determines if they are entitled to split year tax treatment in that tax year. The Case 5 3hr requirement is there to ensure that the UK part of a split year does not start before the individual has done any UK work – which would otherwise be possible under the 35hr averaging requirement. Not setting it as a requirement does not seem to make sense for a split on the basis of FTWUK. The Government believes that for the majority of people the 365 day period they identify for FTWUK is likely to start with a day on which they worked more than 3 hours in the UK even though it is not a requirement for the 3rd automatic UK test.[21]

10.11 Case 6: Stop work overseas

Split-year Case 1 is for individuals who start work overseas. Case 6 is for individuals who have been working abroad and stop. Accordingly there are concepts and definitions in common, though the legislation repeats them in each place.

Para 49(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 6 if they are as described in subparagraphs (2) to (4).

[21] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

10.11.1 *Non-resident in previous year*

Para 49(2) sch 45 FA 2013 provides:

> The taxpayer—
> (a) was not resident in the UK for the previous tax year because the taxpayer met the third automatic overseas test for that year (see paragraph 14), but
> (b) was resident in the UK for one or more of the 4 tax years immediately preceding that year.

Para (a) is a requirement in each of split year Cases 4 - 8, which apply to arrivers, but in this Case non-residence must be specifically due to meeting the 3rd overseas test. See 6.8 (Overseas test 3: Overseas work).

10.11.2 *Full-time overseas work*

Para 49(3) sch 45 FA 2013 provides:

> There is at least one period (consisting of one or more days) that—
> (a) begins with the first day of the relevant year,
> (b) ends with a day that—
> (i) falls within the relevant year, and
> (ii) is a day on which the taxpayer does more than 3 hours' work overseas, and
> (c) satisfies the overseas work criteria.

10.11.3 *"Overseas work criteria"*

Para 49 sch 45 FA 2013 provides:

> (5) A period "satisfies the overseas work criteria" if—
> (a) the taxpayer works sufficient hours overseas, as assessed over that period,
> (b) during that period, there are no significant breaks from overseas work,
> (c) the number of days in that period on which the taxpayer does more than 3 hours' work in the UK does not exceed the permitted limit, and
> (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.
> (6) A day falls within this sub-paragraph if—
> (a) it is a day spent by the taxpayer in the UK, but
> (b) it is not a day that is treated under paragraph 23(4)[22] as a day

[22] See 7.8 (The deeming rule).

spent by the taxpayer in the UK.

This is identical to the "overseas work criteria" in split-year Case 1: see 10.6.3 ("Overseas work criteria").

10.11.4 *"Sufficient hours overseas"*

Para 49(7) sch 45 FA 2013 provides:

> To work out whether the taxpayer works "sufficient hours overseas" as assessed over a given period, apply paragraph 14(3) but with the following modifications—
> (a) for "P" read "the taxpayer",
> (b) for "year X" read "the period under consideration",
> (c) for "365 (or 366 if year X includes 29 February)" read "the number of days in the period under consideration", and
> (d) in paragraph 28(9)(b), as it applies for the purposes of step 3, for "30" read "the permitted limit".

This is identical to "sufficient hours overseas" in split-year Case 1: see 10.6.4 ("Sufficient hours overseas").
Para 49 sch 45 FA 2013 provides:

> (8) The permitted limit is—
> (a) for sub-paragraphs (5)(c) and (7)(d), the number found by reducing 30 by the appropriate number, and
> (b) for sub-paragraph (5)(d), the number found by reducing 90 by the appropriate number.
> (9) The appropriate number is the result of A × (B÷12) where—
> "A" is—
> (a) 30, for sub-paragraphs (5)(c) and (7)(d), or
> (b) 90, for sub-paragraph (5)(d), and
> "B" is the number of whole months in the part of the relevant year after the 365-day period in question ends.

RDRM provides:

> **RDRM12220: Residence: The SRT: Split year treatment: Case 6: Calculating whether individual has worked full-time overseas in the relevant period** [Oct 2019]
> The table below sets out the permitted limits for Case 6 – the appropriate portions of the full year permitted limits.

Date	X - see note	Y - see note
6 - 30 Apr	2	7
1 - 31 May	5	15

1 - 30 Jun	7	22
1 - 31 Jul	10	30
1 - 31 Aug	12	37
1 - 30 Sep	15	45
1 - 31 Oct	17	52
1 - 30 Nov	20	60
1 - 31 Dec	22	67
1 - 31 Jan	25	75
1 - 29 Feb	27	82
1 Mar - 6 Apr	30	90

> Note
> X = permitted limit on days where you can work more than 3 hours in overseas part of the year or maximum number of days which may be subtracted from the reference period on account of gaps between employments
> Y = permitted limit on days spent in the UK in overseas part of year

10.11.5 *Resident in next year: Case 6*

Para 49(4) sch 45 FA 2013 provides:

> The taxpayer is resident in the UK for the next tax year (whether or not it is a split year).

10.11.6 *HMRC example*

RDRM provides:

> **RDRM12230: Residence: The SRT: Split year treatment: Case 6: The overseas and UK parts of the tax year** [Sep 2019]
> Example (Edward)
> E left the UK on 1 November 2010 to work full-time for a company based in Switzerland. Prior to this date he had always lived, worked and been resident in the UK. He has kept an apartment in the UK throughout his time in Switzerland; so he had a place to stay whenever visiting family in the UK.
> E retires from his employment, his last overseas workday being 31 October 2014. He returns permanently to the UK on 3 November 2014, and takes up residence in his apartment. E also has an apartment in Switzerland which is up for sale, but until a buyer is found he continues to use it when he visits Switzerland.
> Provided E did not exceed the limits for days spent working more than 3 hours in the UK, or days spent in the UK before the UK part of the tax year commenced (see table at RDRM12280), he will receive split year treatment under Case 6 for 2014-2015 as follows:

- he is not resident in the UK for 2013-2014 tax year because he met the test for full-time work overseas for that year
- From 6 April 2014 until 31 October 2014 he worked full-time overseas
- he was UK resident for one or more of the 4 tax years (2009-2010, 2010-2011, 2011-2012, 2012-2013), before the year in which he was not UK resident (2013-2014)
- he is resident for the tax year following his return to the UK, 2015-2016 tax year (he has retired permanently to the UK).

The overseas part of the tax year ends on 31 October 2014. This is the day that E finished his spell of working full-time overseas and the UK part of the tax year starts on 1 November 2014.

10.12 Case 7: Partner stops work overseas

Case 2 applies if an individual accompanies their partner who works overseas. Case 7 applies if the individual accompanies their partner who works in the UK. The two Cases share some common drafting.

Para 50(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 7 if they are as described in subparagraphs (2) to (6).

10.12.1 *Non-resident in previous year*

Para 50(2) sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

10.12.2 *Living with partner*

Para 50 sch 45 FA 2013 provides:

> (3) The taxpayer has a partner[23] whose circumstances fall within Case 6 for—
>
> (a) the relevant year, or
>
> (b) the previous tax year.
>
> (4) On a day in the relevant year, the taxpayer moves to the UK so the taxpayer and the partner can continue to live together on the partner's return or relocation to the UK.

[23] See 10.5.3 ("Partner").

The wording is the same as Case 2: see 10.7.3 (Living with partner).

10.12.3 *No previous UK home*

Para 50 sch 45 FA 2013 provides:

> (5) In the part of the relevant year before the deemed arrival day—
> (a) the taxpayer
> [i] has no home in the UK at any time, or
> [ii] has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and
> (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.
> (7) If sub-paragraph (3)(a) applies, the "deemed arrival day" is the later of—
> (a) the day mentioned in sub-paragraph (4), and
> (b) the first day of what is, for the partner, the UK part of the relevant year as defined for Case 6 (see paragraph 54).
> (8) If sub-paragraph (3)(b) applies, the "deemed arrival day" is the day mentioned in sub-paragraph (4).
> (9) The permitted limit is the number found by reducing 90 by the appropriate number.
> (10) The appropriate number is the result of—
> $A \times (B \div 12)$
> where—
> "A" is 90, and
> "B" is the number of whole months in the part of the relevant year beginning with the deemed arrival day.

10.12.4 *Resident in next year: Case 7*

Para 50(6) sch 45 FA 2013 provides:

> The taxpayer is resident in the UK for the next tax year (whether or not it is a split year).

10.12.5 *HMRC example*

RDRM provides:

> **RDRM12260: Residence: The SRT: Split year treatment: Case 7: The overseas and UK parts of the tax year** [Aug 2019]
> Example (Joan and Edward)
> J is E's wife (see RDRM12230). J lived with E in Switzerland for the duration of his employment. She also retires from work and returns to

live in the UK with E. However, she does not return on 3 November 2014 with her husband; she arrives in the UK on 8 November 2014, having worked her notice at her part-time job (20 hours per week) in Switzerland.

Provided J did not exceed the limits for days spent in the UK before the UK part of the tax year commenced, she meets the criteria for case 7 for 2014-2015 as follows:

- she was not UK resident for the 2013-2014 tax year
- she does not qualify for Case 6 as she does not meet the criteria for the third automatic overseas test – nor does she qualify for Case 4, 5 or 8
- her husband will receive Case 6 split year treatment
- she is resident in the UK for the tax year following her return to the UK, 2015-2016
- she has come to the UK to continue to live with her husband

The UK part of the tax year 2014-2015 starts on 8 November 2014 when J moves to the UK.

10.12.6 *Transitional rule for 2013/14*

Para 156 sch 45 FA 2013 provides:

> (1) Sub-paragraph (2) applies in determining whether the test in paragraph 50(3) is met where the relevant year is the tax year 2013-14.
> (2) The circumstances of a partner of the taxpayer are to be treated as falling within Case 6 for the previous tax year if the partner was eligible for split year treatment in relation to that tax year under the relevant ESC on the grounds that he or she returned to the United Kingdom after a period working overseas full-time.
> (3) Where the circumstances of a partner are treated as falling within Case 6 under sub-paragraph (2), the reference in paragraph 50(7)(b) to the UK part of the relevant year as defined for Case 6 is a reference to the part corresponding, so far as possible, in accordance with the terms of the relevant ESC, to the UK part of that year.
> (4) "The relevant ESC" means whichever of the extra-statutory concessions to which effect is given by Part 3 of this Schedule is relevant in the partner's case.

10.13 Case 8: Start to have UK home

Para 51(1) sch 45 FA 2013 provides:

> The circumstances of a case fall within Case 8 if they are as described in subparagraphs (2) to (5).

10.13.1 *Non-resident in previous year*

Para 51(2) sch 45 FA 2013 provides:

> The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

10.13.2 *Acquiring UK home*

Para 51(3) sch 45 FA 2013 provides:

> At the start of the relevant year, the taxpayer had no home in the UK but—
> (a) there comes a day when, for the first time in that year, the taxpayer does have a home in the UK, and
> (b) from then on, the taxpayer continues to have a home in the UK for the rest of that year and for the whole of the next tax year.

10.13.3 *UK-ties test: Case 8*

Para 51(4) sch 45 FA 2013 provides:

> For the part of the relevant year before the day mentioned in sub-paragraph (3)(a) [date of acquiring UK home], the taxpayer does not have sufficient UK ties.

Para 51 sch 45 FA 2013 provides:

> (6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments-
> (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (4) [year until acquiring UK home], and
> (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.
> (7) The appropriate number is found by multiplying the number of days, in each case, by A ÷ 12
> where "A" is the number of whole months in the part of the relevant year beginning with the day mentioned in sub-paragraph (3)(a) [day of acquiring UK home].
> (8) Sub-paragraph (6)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the

> residence status of family members) so those references must continue to be read as references to year X.

This is (more or less) the standard form for split-year UK-ties tests and I discuss it elsewhere.[24]

10.13.4 *Resident in next year: Case 8*

Para 51(5) sch 45 FA 2013 provides:

> The taxpayer is resident in the UK for the next tax year and that tax year is not a split year as respects the taxpayer.

10.13.5 *Cases 4/8 compared*

In outline:

Case 4: start to have *only* UK home	**Case 8: start to have *a* UK home**
Start of year: no UK home	Start of year: no UK home [same]
For rest of the year: (1) UK home and (2) no home elsewhere	For rest of year: UK home (may have home elsewhere)
Next year: need not have UK home	Next year: must have UK home
Next year: need not be UK resident	Next year: must be UK resident
UK-ties test period: from 6 April until later of (1) UK home acquired and (2) no home elsewhere	UK-ties test period: from 6 April until UK home acquired

10.13.6 *HMRC example*

RDRM provides:

> **RDRM12280: Residence: The SRT: Split year treatment: Case 8: The UK and overseas parts of the tax year** [Aug 2019]
> Example (Nicola)
> N is retired, she is non-resident in the UK for tax purposes having lived in Cyprus for a number of years. She has a home in Cyprus and she also has a property in the UK which has been let out on a commercial basis for the last few years.
> She recently became a grandmother, and decides she will split her time between Cyprus and the UK so that she can see more of her grandson, who lives in the UK.

[24] See 10.9.3 (UK-ties tests).

She comes back to the UK and moves into the UK property when the rental agreement with her tenant expires on 4 August 2014. She now has 2 homes, 1 in each country.

Between 6 April 2014 and 4 August 2014 when she started to have a UK home, N only spent 4 days in the UK, visiting her daughter; and therefore did not exceed the limit for days spent in the UK in the overseas period before she started to have a UK home.

N meets the criteria for Case 8 for 2014-2015 on the basis that:

- she was not UK resident for 2013-2014
- she is UK resident for 2015-2016 (N is possibly dual resident in UK and Cyprus)
- she continues to have a home in the UK for the rest of 2014-2015 and the following year
- she did not have sufficient UK ties to make her resident from 6 April 2014 until 4 August 2014

N does not meet the criteria for Cases 4, 5, 6 or 7 split year treatment.

The UK part of the split year starts on 4 August 2014, which is when N starts to have a home in the UK.

10.14 Priority between Cases

If more than one Case applies, priority between them matters because they may specify different periods as the Overseas/UK part of the year.

Para 54 sch 45 FA 2013 deals with priority between split-year Cases 1 to 3 (leavers):

> (1) This paragraph applies to determine which Case has priority where the taxpayer's circumstances for the relevant year fall within two or all of the following—
> Case 1 (starting full-time work overseas);
> Case 2 (the partner of someone starting full-time work overseas);
> Case 3 (ceasing to have a home in the UK).
> (2) Case 1 has priority over Case 2 and Case 3.
> (3) Case 2 has priority over Case 3.

Para 55 deals with priority between split-year Cases 4-8 (arrivers):

> (1) This paragraph applies to determine which Case has priority where the taxpayer's circumstances for the relevant year fall within two or more of the following—
> Case 4 (starting to have a home in the UK only);
> Case 5 (starting full-time work in the UK);
> Case 6 (ceasing full-time work overseas);
> Case 7 (the partner of someone ceasing full-time work overseas);

Case 8 (starting to have a home in the UK).
(2) In this paragraph "the split year date" in relation to a Case means the final day of the part of the relevant year defined in paragraph 53(5) to (9)[25] for that Case.
(3) If Case 6 applies—
   (a) if Case 5 also applies and the split year date in relation to Case 5 is earlier than the split year date in relation to Case 6, Case 5 has priority;
   (b) otherwise, Case 6 has priority.
(4) If Case 7 (but not Case 6) applies—
   (a) if Case 5 also applies and the split year date in relation to Case 5 is earlier than the split year date in relation to Case 7, Case 5 has priority;
   (b) otherwise, Case 7 has priority
(5) If two or all of Cases 4, 5 and 8 apply (but neither Case 6 nor Case 7), the Case which has priority is the one with the earliest split year date.
(6) But if, in a case to which sub-paragraph (5) applies, two or all of the Cases which apply share the same split year date and that date is the only, or earlier, split year date of the Cases which apply, the Cases with that split year date are to be treated as having priority.

10.15 Split year: Tax return

Split year reliefs do not require a formal claim or election, but the individual must tick box 3 in SA109 (Residence, remittance basis etc) (2022/23). The rubric to this box provides: "If your circumstances meet the criteria for split year treatment,... put 'X' in the box." The accompanying SA109 notes (2022/23) provide:

> **Box 3**
> ...If you put 'X' in box 3:
> - you must include details of which split year case applies to you in the 'Any other information' box, box 40
> - do not put 'X' in box 1, but fill in box 6
> - put the number of days spent in the UK for the overseas part of the tax year in box 10
>
> **Box 3.1 If more than 1 case of split year treatment applies**
> Put 'X' in box 3.1 if you think that more than one case of split year treatment applies for the 2022 to 2023 tax year. Give details of which cases apply to you in the 'Any other information' box, box 40, starting on page RR 3.

[25] See 10.5.5 ("The overseas part").

The Joint Expatriate Forum on Tax and NICs discussed this form in 2014:[26]

> When a taxpayer is completing Box 12[27] for split years and there are different ties for the UK/overseas parts, the taxpayer should explain in Box 40 [white space] which tie is relevant to which part. For split years and boxes 10[28] and 12, HMRC is only looking for information in relation to the overseas part of the year...
> When recording split year information, all relevant cases should be disclosed in Box 40 [white space] but there is no need to identify all relevant dates where multiple cases potentially apply (subject to the statutory order of priority) – only the date the individual considers applies need be recorded.

10.16 Arrival/departure: Disclosure

10.16.1 *Arrival*

The RDRM provides:

> **RDRM10215 Residence: Coming to the UK: Form P86** [May 2020]
> Since 1 June 2010 the form P86 has been withdrawn and new arrivals to the UK will be integrated into HMRC processes by existing means
> - The RTI process for new employees
> - CWF1 for newly self employed, or
> - SA1 registration process for customers who are not self-employed but who need to complete a tax return
>
> Please refer to EIM42890 and PAYE81750.

RDR1 provides:

> 1.17 You should tell HMRC immediately if you come to the UK to live or work or leave the UK to live or work overseas. You should also tell HMRC if those circumstances change while you're in the UK.

There is no legal obligation for an arriver to do this "immediately". But at some point arrivers will have to submit a tax return, make a remittance basis claim, or give HMRC notice of liability to tax;[29] it makes sense to

[26] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expat_Forum_Minutes_FINAL.pdf* (April 2014)

[27] This box asks: How many ties to the UK did you have in [the relevant tax year]

[28] This box asks: Number of days spent in the UK during [the relevant tax year]

[29] See 121.2 (Duty to notify liability).

complete the relevant form (form SA1 for those not employed or self-employed) well in advance of the formal deadlines for those steps.

10.16.2 *Departure: Form P85*

Form P85 (Leaving the UK – getting your tax right) is used to claim tax relief or a repayment of tax on becoming non-UK resident.[30]

10.17 Split year of trustees and PRs

Para 2 sch 45 FA 2013 provides that *individuals* are resident during whole tax years.[31] There is no equivalent statutory rule for trustees or PRs.

The split-year rules which exempt income/gains of the offshore part of a split year also apply only to individuals*,* and so do not apply to income/gains of trustees or PRs.

Para 41 sch 45 FA 2013 provides:

> This Part [Part 3: Split Year Treatment]—
> (a) does not apply in determining the residence status of personal representatives, and
> (b) applies to only a limited extent in determining the residence status of the trustees of a settlement (see section 475 of ITA 2007 and section 69 of TCGA 1992, as amended by this Part).[32]

10.17.1 *How can trust residence change*

There are various ways that a trust may change residence:

(1) Change of trustee's personal residence status:
    (a) An individual trustee may change residence in their private capacity. The change happens at the end of a tax year as an individual cannot change residence during a tax year.[33]
    (b) An corporate trustee may change residence in its private capacity. The change could happen during a tax year.
(2) Change in trustees: A trustee resident in one state may be appointed in place of a trustee resident in another state. This could happen during a tax year. In practice this is more common than a change of trustee's personal residence status.

[30] See 36.7 (Leaving UK: PAYE). For a discussion of form P86, see Finney, "A new form of test", Taxation Magazine (24 October 2013).

[31] See 10.1 (Residence throughout tax year).

[32] For para (b) see 7.8 (Individual trustee: split year).

[33] See 10.1 (Residence throughout tax year).

10.17.2 *Trust split year: IT rules*

The TSE Manual provides:

> **TSEM10025 trust residence for Income Tax and CGT purposes - changes during the tax year** [Aug 2019]
> **Changes in residence status - Income Tax**
> [1] For Income Tax purposes, for the period from 6 April 2007 to 5 April 2013, where the residence status of the trust changes during a tax year, the year is split, so that a trust could be resident for part of the year and non-resident for the other part.

But that is now of historic interest only.

> [2] With the introduction of the Statutory Residence Test from 6 April 2013 there is no longer a 'split year' treatment where the trustees are individuals and the residence status of the trust changes. In such circumstances, if a trust is resident for part of the tax year, it is treated as resident for all of the tax year.

That is correct.

> [3] However if an individual becomes or ceases to be a trustee of a settlement during a tax year, that tax year is a split year in respect of the individual. If the individual was acting as a trustee only in the period when they were not resident in the UK, for the purposes of determining the trust residence they will be treated as if they were non-resident for the year. This exception is overridden if the trustee is acting as such in the course of a UK business (see TSEM10020 final paragraph).

In the absence of an express relief, this is, I think, an informal concession.

> [4] The residence position of a corporate trustee follows the general rules for company residence when determining their residence for the purpose of the residence of the trust.

Similarly, form SA906 notes (2022-23) provides:

> If, for part of the year to 5 April 2023, all the trustees were corporate trustees and not resident in the UK, then the trustees as a whole will not be resident in the UK for that period for Income Tax purposes.

The position here is affected by the rule that trustees are a single and distinct person for IT[34] because this notional person is not an individual,

[34] See 7.3 (Trustees a distinct person).

and so not affected by the rule that an individual cannot change residence during a tax year.

10.17.3 *Trust split year: CGT*

The TSE Manual provides:

> **TSEM10025 trust residence for Income Tax and CGT purposes - changes during the tax year** [Aug 2019]
> **Changes in residence status - Capital Gains Tax**
> [1] For Capital Gains Tax purposes, if the trustees are resident for any part of a tax year, gains arising at any time in the tax year are chargeable to Capital Gains Tax.

This is correct. See 56.6 (Territorial scope of CGT).

> [2] However, under the Statutory Residence Test introduced with effect from 6 April 2013 an individual trustee who is resident in the UK for a tax year is resident for every day in that tax year, including those days that fall within the overseas part of a split year for that individual.

This is also correct, but it does not matter, having regard to point [1].

> [The next 2 paragraphs repeat points [3] and [4] above]...

10.17.4 *HMRC examples*

The Manual gives four examples:

Example	**Trustee**	**Facts**	**Result**
1: Alpha trust	Individual	Becomes UK resident during year	Taxable
2: Beta trust	Individual	Resigns in offshore part of year	Not taxable
3: Gamma trust	Individual	Resigns in UK part of year	Taxable
4: Delta trust	Company	Replaced by UK trustee	Split year

In examples 1-3 an individual is sole trustee. This simplifies the example, as it is not necessary to consider the rules for mixed residence trustees. But in practice a sole individual trustee would be unusual.

The first example considers an individual trustee acting throughout a split year:

> **TSEM10030 trust residence for Income Tax and CGT purposes - changes during the tax year - examples** [Aug 2019]
> **Example 1 individual acting as trustee changes residence** (Alpha trust)
> The A Trust was established many years ago and A an individual has been acting as sole trustee. A has been resident overseas.

> However, on 1 October 2013 he comes to live in the UK and is considered to be UK resident from that date.
>
> As A has become resident in the UK during 2013-14 the A Trust is considered UK resident for both Income Tax and Capital Gains Tax for the whole of 2013-14.

The moral is that A should have retired as trustee before coming to the UK.[35]

The next example considers an individual trustee acting as trustee only during the non-resident part of a split year:

> **Example 2 - individual ceases to act as trustee** (Beta trust)
>
> The B Trust was established many years ago and A an individual has been acting as sole trustee. A has been resident overseas.
>
> However, on 1 October 2013, A comes to live in the UK, after resigning as a trustee on 25 September 2013 and is replaced as trustee by B who is not resident in the UK.
>
> As A only acted as a trustee of the Beta Trust during the part of the year 2013-14 when he was not resident in the UK he is regarded as being not resident in the UK when determining the Trust's residence for the year.
>
> As B is not resident in the UK for any part of 2013-14 the B Trust is considered non-resident for both Income Tax and Capital Gains Tax for the year.

This is, I think, concessionary.

The next example concerns an individual trustee acting during both non-resident and resident parts of a split year.

> **Example 3 - individual ceases to act as trustee** (Gamma trust)
>
> The G Trust was established many years ago, and A an individual has been acting as sole trustee. A has been resident overseas.
>
> However, on 1 October 2013, A comes to live in the UK and resigns as trustee on 1 December 2013. B, who is not resident in the UK, replaced A as trustee on 1 December 2013.
>
> As A acted as a trustee of the Trust during the part of the year in which he was resident in the UK, he is regarded as resident in the UK when determining the Trust's residence for the year. In the circumstances, the G Trust is considered to be UK resident for both Income Tax and Capital Gains Tax for the whole of the year 2013-14.
>
> For the year 2014-15 assuming that B remains trustee and continues to

[35] If the trust is not UK-linked, the appointment of a second (non-resident) trustee would suffice.

be non-resident the Trust will be non-resident.

The moral is that A should have retired before the beginning of the UK part of the split year.[36]

The last example concerns a corporate trustee.

> **Example 4 - change in corporate trustees** (Delta trust)
> A Ltd, a trust company resident overseas, has always acted as sole trustee of the D Trust.
> On 1 October 2013, A Ltd resigns as trustee and is replaced by B Ltd, a company which is resident in the UK.
> In the circumstances, the year 2013-14 can be split with the result that, for Income Tax purposes, the Trust is not resident in the UK up to 1 October 2013, and resident in the UK from that date.

For CGT purposes the position is different, see above.

10.18 Split-year rules: Critique

CIOT say:

> The split-year rules... seek to replicate the previous concessions, but do not ask the question what a sensible split-year rule might look like.[37]

The reader who has studied this chapter may agree. Though CIOT do not address the harder question of what sensible split-year rules should look like. However that may be, HMRC do not seem to have an appetite for reform.[38]

[36] Again, if the trust is not UK-linked, the appointment of a second (non-resident) trustee would suffice.

[37] CIOT letter to HMRC (21 July 2015)

[38] See 6.42 (Future of SRT).

Transitional rule for pre-2015 temporary non residents	5.11.3
DIMF: Temporary non-resident	73.32
Interaction with sch 4C TCGA	62.28.2

11.1 Temporary non-residence: Introduction

This chapter discusses the IT/CGT temporary non-residence rules (**"TNR rules"**). The rules are in Part 4 sch 45 FA 2013.

Deemed-domicile rules also include a short term non-residence rule: a person who ceases to be UK resident (or domiciled) may (in short) continue for a 3 or 4 year period to be regarded as UK domiciled for tax purposes, and so within the scope of IHT.[1] But that is not a *temporary* non-residence rule as it applies to those who never return to the UK.

11.2 Purpose of TNR rules

It is helpful to outline the three sets of problems which the TNR rules are intended to address.

In the following discussion I use the terminology discussed in para 9.1 (Treaty-residence: Introduction):

Term	**Meaning**
UK tax residence/non-residence:	Residence as defined in UK tax law (the SRT)
UK tax-resident[2]	UK resident under UK tax law definition
UK tax non-resident	Not UK resident under UK tax law definition

[1] See 5.6.2 (Domicile end date).

[2] If the context is clear one can abbreviate these terms to tax-resident or non-resident. For individuals, one might use the terms SRT-resident and SRT non-resident.

Treaty-residence:	Residence as defined in a DTA
Treaty-resident in foreign State	Resident of foreign State within DTA definition[3]

11.2.1 *TNR gains*

In the absence of the TNR rules, gains accruing to temporary non-residents are not (in general)[4] subject to CGT.

So a possible method of CGT planning for a UK resident would be as follows. An individual could become UK tax non-resident and realise gains (typically by disposing of assets) during a year of non-residence; in the following tax year they could become tax-resident again. Thus relatively brief periods of tax non-residence offered the opportunity of CGT-free disposals.

A variant of this planning is: an individual could remain UK tax-resident but become treaty non-resident (ie treaty-resident in a state with a DTA conferring CGT relief under the tie-breaker); the individual realises gains while treaty non-resident; following the disposal the individual could cease to be treaty non-resident. Thus relatively brief periods of treaty non-UK residence offered some opportunity of CGT-free disposals (so far as CGT treaty relief could be available).[5]

The TNR rules bring gains ("TNR gains") into charge on the return of the temporary non-resident to the UK. The technique used is to deem the gains to accrue in the year of return, and to override DT relief (if otherwise applicable).

11.2.2 *TNR income*

In the absence of the TNR rules:

(1) foreign income of temporary non-residents is not subject to UK tax
(2) Some UK source income qualifies for non-resident IT relief.

So a similar method of IT planning for a UK resident would be to arrange for income to arise to an individual when UK tax non-resident, or when treaty non-resident. Relatively brief periods of tax non-residence or treaty non-residence offered the opportunity of receiving income free of IT.

The TNR rules bring some of this income ("TNR income") into charge on the return of the temporary non-resident to the UK. But whereas the TNR rules apply

[3] One could use the term "treaty-resident outside the UK". Statute sometimes calls this "treaty non-resident" but I think my term is clearer.

[4] See 56.6.3 (Territorial scope: Summary).

[5] For completeness: it has been suggested that planning involving short periods of treaty non-residence may constitute treaty abuse, and so not qualify for treaty relief: see 108.7 (OECD-concept abuse). But in practice, I think rightly, HMRC did not take that point.

to (almost) all chargeable gains, they only apply to limited categories of income. Presumably the rules are aimed at types of income which it was thought could most easily be arranged to arise during the non-resident period. The categories of income caught by the TNR rules are (in short) as follows:

Type of income: Section no	**See para**
Dividends from material interest in close company	11.11 ff
Chargeable-event gains (life policies)	11.18
Offshore income gains	11.19
Pension schemes charges: s.572A, 576A, 579CA ITEPA	*Not discussed*
Specific employment income:	*Not discussed*
(a) Disguised remuneration: s.554Z4A, 554Z11A ITEPA	
(b) Employer-financed retirement benefits: s.394A ITEPA	

The technique used is to deem TNR income to arise in the year of return, and to override DT relief (if otherwise applicable).

HMRC summarise the position as follows:

> 3.47 Ceasing to be UK resident means that an individual is no longer liable to UK tax on income from non-UK sources. In many instances there can also be a reduced tax liability on income from UK sources. This can result in people finding it advantageous to become not resident for a short period of time if they expect substantial amounts of income to arise which otherwise would be liable to tax in the UK. This leads to a cost to the Exchequer.
>
> 3.48 A similar position used to arise for CGT. It was possible for individuals to leave the UK temporarily and realise capital gains in the period of non-residence and therefore be exempt from liability to UK tax on those gains. Legislation was enacted in FA 1998 to counter such avoidance of CGT.
>
> 3.49 Introducing a statutory definition [the SRT] will make it clearer when a person is tax resident or not resident in the UK. This could enable those who want to avoid liability on substantial amounts of income to plan short periods of temporary non-residence with more certainty.
>
> 3.50 The SRT rules will therefore need to counteract the risk of individuals creating artificial[6] short periods of non-residence, during which they receive a large amount of income (which accrued during periods of UK residence) free of UK tax and then bring the income back into the UK tax-free. This activity would undermine the effectiveness of

[6] This is a tendentious use of the word “artificial”, see 3.21.2 (“Artificial/devices”).

an SRT (?) and present an unacceptable risk to the Exchequer.[7]

11.2.3 *TNR remittances*

In the absence of the TNR rules, a possible method of remitting RFI tax free would be as follows. Suppose an individual had RFI taxable on remittance (in this chapter called "**pre-departure income**").

The individual could become UK tax non-resident, and remit the pre-departure income during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of tax non-residence offered the opportunity of tax-free remittances of pre-departure income.[8] The same applies for pre-departure foreign gains, though not for foreign earnings.[9]

The technique used is to deem the income/gains to be remitted in the year of return.[10]

11.2.4 *TNR planning*

All the planning discussed above is still possible for recent UK residents, ie those who have become UK resident but not for long enough to pass the 4/7 UK-years test. This is deliberate. It slightly mitigates the unfairness of the rule that historic gains come into charge to UK tax on a disposal when UK resident, even though the gain accrued during a non-resident period. That is, there is no CGT rebasing on becoming UK resident.

Certain types of income are not within the TNR code, and are not taxed on return to the UK. That includes:

(1) Income arising to non-residents:
(a) Discretionary trust income (Annual Payments)
(b) Royalty income

(2) Income under anti-avoidance rules which do not apply to non-residents:

Topic	**See**
s.624 income (settlor-interested trusts)	47.9
ToA income:	
s.720 income (charge on transferors)	49.21
s.731 income (charge on benefits)	50.45

[7] HM Treasury/HMRC, "Statutory Definition of Tax Residence" (June 2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf*

[8] See 17.18 (Remittance when non-resident).

[9] See 34.35 (Remittance when non-resident).

[10] See 11.20 (Pre-departure income remitted).

It would be rather bold to plan on this continuing to be the position in the future.

11.3 Terminology

11.3.1 *TNR terminology: Navigation*

The TNR provisions use a set of defined terms. There are no taxes-act-wide definitions, so they are either repeated verbatim or incorporated by reference, where used in other statutes in a TNR context. These terms are:

Term	**See para**	**My term (if different)**
Residence period	11.3.3	
Treaty non-resident	11.3.2	Treaty-resident in foreign state
Sole UK residence	11.3.4	
Period A	11.3.5	
Temporary period of non-residence	11.3.6	
Year of departure	11.3.7	
Period of return	11.3.8	
Temporarily non-resident	11.4	
I also coin the following terms:		
SRT-resident	11.3.2	
Treaty-resident	11.3.2	
Sole UK/non-sole UK periods	11.3.5	

11.3.2 *SRT/treaty residence*

In this book I use the following terminology:

(1) **"Tax-residence"** means residence as defined in UK tax law, the statutory residence test. An individual:
   (a) resident in the UK under the SRT is **"tax-resident"**
   (b) not resident in the UK under SRT is **"tax non-resident"**

(2) **"Treaty-residence"** means residence as defined in a DTA. A person who is:
   (a) a resident of the UK under a DTA is **"treaty-resident in the UK"**
   (b) a resident of a foreign state under a DTA is **"treaty-resident in the foreign state"**. Statute calls this *"treaty non-resident"*. Para 112(3) sch 45 FA 2013 provides:

> An individual is "Treaty[11] non-resident" at any time if at the time the individual falls to be regarded as resident in a country[12] outside the

[11] The legislation, I think rather oddly, uses a capital *T* in this expression.

[12] Para 145 sch 45 FA 2013 provides: "country" includes a state or territory.

> UK for the purposes of double taxation arrangements[13] having effect at the time.
>
> But I think my term is clearer.

Since tax-residence and treaty-residence are distinct concepts,[14] a person who is tax-resident may be:

(1) treaty-resident in a foreign state (treaty non-resident) under the tie-breaker test;[15] or
(2) not treaty-resident in a foreign state (ie, not treaty non-resident): statute calls this **"sole UK residence"**.

These are clumsy terms but it is difficult to think of better.

11.3.3 *"Residence period"*

This term is devised to deal with split years and tax years which are not split (**"non-split years"**).

Para 109 sch 45 FA 2013 provides:

> In relation to an individual, a "residence period" is—
> (a) a tax year that, as respects the individual, is not a split year, or
> (b) the overseas part or the UK part of a tax year that, as respects the individual, is a split year.

11.3.4 *"Sole UK residence"*

"Sole UK residence" is a technical term. It is a status, which lasts for a residence period.[16]

Para 112 sch 45 FA 2013 provides two definitions: one for non-split years and one for split years:

Para 112(1): non-split years	**Para 112(2): split years**
An individual has "sole UK	An individual has "sole UK

[13] Para 145 sch 45 FA 2013 provides the standard commonsense definition:
"In this Schedule ... "double taxation arrangements" means arrangements that have effect under section 2(1) of TIOPA 2010".

[14] See 9.2 (Treaty/UK-law residence).

[15] It is assumed that the treaty has a Model form tie-breaker clause.
It would be useful to have a short term to describe someone who is UK tax-resident but treaty-resident in a foreign state (treaty non-resident). But I cannot think of a good term, and prefer to use the full expression when it is needed.

[16] Contrast residence, also a status, which lasts for an entire tax year.

residence" for a residence period consisting of an entire tax year if— (a) the individual is resident in the UK for that year, and (b) there is no time in that year when the individual is Treaty non-resident.	residence" for a residence period consisting of part of a split year if— (a) the residence period is the UK part of that year, and (b) there is no time in that part of the year when the individual is Treaty non-resident.

I abbreviate the statutory language as follows:

Statutory term	**My term**
Residence period for which an individual has sole UK residence	Sole UK period
Residence period for which an individual does not have sole UK residence.	Non-sole UK period

A short period of treaty-residence in a foreign state (treaty non-residence) means that the entire residence period is a non-sole UK period, even if the individual is present in the UK for most of the period. See, for instance, the RDRM example of Max[17] who was treaty-resident in a foreign state for 6 weeks, but the entire tax year (a non-split year) was a non-sole UK period.

The UK part of a split year is a sole UK period unless the individual is treaty-resident in a foreign state. The overseas part of a split year is a non-sole UK period.

11.3.5 *"Period A"*

Para 110(1) sch 45 FA 2013 provides:

> An individual is to be regarded as "temporarily non-resident" if—
> (a) the individual has sole UK residence for a residence period,
> (b) immediately following that period (referred to as "period A"), one or more residence periods occur for which the individual does not have sole UK residence

"Period A" is the pre-departure sole UK period.

11.3.6 *"Temporary period of non-residence"*

Para 113 sch 45 FA 2013 provides:

[17] See 11.5.1 (Departure in non-split year, return in split year).

> In relation to an individual, "the temporary period of non-residence" is the period between—
> (a) the end of period A [the pre-departure sole UK period], and
> (b) the start of the next residence period after period A for which the individual has sole UK residence [the period of return].[18]

11.3.7 *"Year of departure"*

Para 114 sch 45 FA 2013 provides:

> "The year of departure" is the tax year consisting of or including period A [the pre-departure sole UK period].

This is an artificial definition, as it may not be the year in which the individual actually departs. See, for instance, the RDR example of Max[19] who ceased to be UK resident in the UK during 2014/15 (a non-split year) but his "year of departure" was 2013/14. In these cases it is helpful to write the expression with scare quotation marks.

11.3.8 *"Period of return"*

Para 115 sch 45 FA 2013 provides:

> "The period of return" is the first residence period after period A [the pre-departure sole UK period] for which the individual has sole UK residence.

11.3.9 *Multiple non-resident periods*

There may be more than one non-resident period. Suppose:

Period	**Status**	**Period A**
1	Sole UK period	No
2	Sole UK period	Yes ("period A1")
3	Non-sole UK period	No
4	Non-sole UK period	No
5	Sole UK period	No
6	Sole UK period	Yes ("period A2")
7	Non-sole UK period	No
8	Non-sole UK period	No
9	Sole UK period	No
10	Sole UK period	No

[18] Confusingly, the drafter here does not actually use the expression "period of return" which is defined in this sense.

[19] See 11.5.1 (Departure in non-split year, return in split year)

Periods 2 and 6 both meet the definition of period A, as they are followed by non-sole UK periods. I call them period A1 and period A2.

So there are two temporary periods of non-residence:

Period A	**Temporary period of non-residence**
Period A1	End of period A1 to end of period 5
Period A2	End of period A2 to start of period 9

HMRC may rely on either of these in order to apply a TNR charge, and each need to be tested under the 7-year test and 5-year absence test.

11.4 "Temporarily non-resident"

Armed with these definitions, we can turn to the key term "temporarily non-resident".

11.4.1 *Residence then non-residence*

Para 110 sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if—

A set of four conditions then follow. The first two are:

> (a) the individual has sole UK residence for a residence period,
> (b) immediately following that period (referred to as "period A"), one or more residence periods occur for which the individual does not have sole UK residence ...

This sets the scene for the two key conditions: the 4/7 UK-years test and the 5-year absence test.

11.4.2 *4/7 UK-years test*

Para 110 sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if...
> (c) at least 4 out of the 7 tax years immediately preceding the year of departure were either—
> (i) a tax year for which the individual had sole UK residence, or
> (ii) a split year that included a residence period for which the individual had sole UK residence

I refer to this as the **"4/7 UK-years test"** and the 7 years preceding the year of departure are the **"7 tested years"**. Years within (i) or (ii) are **"UK years"** and years outside (i) and (ii) are **"non-UK years"**. It may be useful to set out an aide memoire identifying the 7 tested years:

Year of Departure	**7 tested years (inclusive)**
2016/17	2009/10 - 2015/16
2017/18	2010/11 - 2016/17
2018/19	2011/12 - 2017/18
2019/20	2012/13 - 2018/19
2020/21	2013/14 - 2019/20
2021/22	2014/15 - 2020/21
2022/23	2015/16 - 2021/22
2023/24	2016/17 - 2022/23

11.4.3 *5-year absence test*

Para 110 sch 45 FA 2013 provides:

> (1) An individual is to be regarded as "temporarily non-resident" if...
>   (d) the temporary period of non-residence is 5 years or less.

I refer to this as the **"5-year absence test"** but the label is not completely apt because the period must be more than 5 years.

RDRM provides:

> **RDRM12610 Temporary non-residence: An introduction** [Dec 2021]
> For these special [TNR] rules not to apply, the individual's period of non-residence must exceed 5 years, that is, a minimum period of five years plus 1 day. For example, 4 May 2015 to 4 May 2020.

In the absence of split years, 5 complete non-resident tax years is not sufficient.[20] But if there are split years, the 5 years do not have to be 5 complete tax years.

11.4.4 *TNR issue list*

The steps to ascertain temporary non-residence are as follows:

(1) *Preparatory:*
    (a) Identify the residence periods (split/non-split years)
    (b) Classify each residence period as:
        (i) a sole UK period or
        (ii) a non-sole UK period
(2) *The 4/7 UK-years test:*
    (a) Identify period A (the pre-departure sole UK period)[21]

[20] See 11.5.3 (5 years non-residence, no split years).

[21] There may be more than one period A, in which case steps (2) and (3) need to be done for each period A.

(b) Identify the year of departure (tax year consisting of or including period A)
(c) Identify the 7 tested years
(d) Are (at least) 4/7 of the tested years UK years?

(3) *The 5-year absence test:*
(a) Identify end date of period A
(b) Identify start date of next sole UK period after period A
(c) Identify temporary period of non-residence (period between (a) and (b): is it 5 years or less?

I refer to this as the **"TNR issue list"**. It will be apparent that a rigorous application of the issue list may be a laborious exercise, particularly as the identification of split years can also be a complex matter.

11.5 Examples

RDRM provides 2 examples.

11.5.1 *Departure in non-split year, return in split-year*

The first example (Max) concerns the 5-year absence test. RDRM provides:[22]

> **RDRM12650: Meaning of year of departure and period of return** [Dec 2021]
> M has had sole residence in the UK for the previous 10 years.
> On 22 February 2015 M moves to Poland. From 22 February to 5 April 2015 he is Treaty non-resident.
> M does not satisfy the conditions for split year treatment in tax year 2014-2015.
> M returns to the UK on 26 May 2018, and split year treatment applies.

JK analysis
Working through the TNR issue list, I would analyse the matter as follows:

(1) Preparatory:
(a) Identify the residence periods (split/non-split years)
(b) Classify each residence period as:
(i) a sole UK period or
(ii) a non-sole UK period

Residence period	**Classify**	**Notes**
2013/14 Not split year	Sole UK period	Period A

[22] I have slightly changed the wording of the example for added clarity.

2014/15 Not split year	Non-sole UK period	Left UK 22 Feb
2015/16 Not split year	Non-sole UK period	
2016/17 Not split year	Non-sole UK period	
2017/18 Not split year	Non-sole UK period	
2018/19 Split year		Return UK 26 May
Offshore part (to 25 May 2018)	Non-sole UK period	
UK part (from 26 May 2018)	Sole UK period	

(2) ***The 4/7 UK-years test:***
(a) Identify period A (pre-departure sole UK period): 2013/14
(b) Identify "year of departure" (tax year consisting of period A): 2013/14 (Note that is not the year in which M actually departed!*)*
(c) Identify the 7 tested years: 2006/07 - 2012/13
(d) Are (at least) 4/7 of the tested years UK years? Yes (7 out of 7)

(3) The 5-year absence test:
(a) Identify end date of period A: 5 April 2014
(b) Start date of next sole UK period after period A: 26 May 2018
(c) Identify temporary period of non-residence (period between (a) and (b): is it 5 years or less? Yes

Conclusion: Max is temporarily non-resident.

The Manual analysis is as follows. First it identifies period A and the "year of departure":

> M is not solely UK resident from 22 February 2015, but he will remain UK resident for the tax year.
> As this is not a split year, Period A will end at the end of the tax year 2013-2014. This is because that is the end of the last tax year in which M was solely UK resident.
> His year of departure for the purpose of applying the temporary non-resident provisions is therefore 2013-2014; even though he physically left the UK on 22 February 2015.
> The next residence period begins on 6 April 2014, and M will begin to be regarded as temporary non-resident from this point.

The example next considers the position on return:

> M has sole UK residence from 26 May 2018. He is Treaty resident [in the UK] for the UK part of the year.
> His temporary non-residence ends on 25 May 2018. The period of temporary non-residence is 6 April 2014 to 25 May 2018 inclusive;

> which is less than 5 years, and so M is within the scope of the temporary non-residence provisions.
> 2014/15 is a non-split year and so one residence period.
> M does not have sole UK residence for that period (it is not a UK year) as:
> (a) He is UK law UK resident for the year; but
> (b) He is treaty-resident in a foreign state (treaty non-resident) for part of the year (22 February 2015 - 5 April 2015).
> So period A [the pre-departure sole UK period] is the previous residence period, which is the year 2013/14. The end of period A is 5 April 2014.
> The "year of departure" is 2013/14.
> 2018/19 is a split year.
> For the overseas part of the split year (6 April - 25 May) M does not have sole UK residence as:
> (a) He is UK law UK resident for the year; but
> (b) He is treaty-resident in a foreign state (treaty non-resident).
> For the UK part of the split year (16 May - 5 April) M does have sole UK residence. That is the period of return.
> The temporary period of non-residence runs from 6 April 2014 (end of period A) to 26[23] May 2018 (start of period of return). That is less than five years so M is temporarily non-resident

The conclusion is not surprising, since M's actual absence in fact was only just over 3 years.

11.5.2 *Split-year of arrival/departure*

The RDRM has one more example (Louis):

> L moves to the UK on 9 January 2014, becoming resident here for 2013-2014. He satisfies the conditions for split year treatment for 2013-2014, and is Treaty resident in the UK from arrival.
> On 4 January 2018, L moves to the USA. He becomes a US tax resident and is not treaty resident in the UK from that point onwards. He satisfies the conditions for split year treatment and his overseas part of the split year starts on 4 January 2018.
> L returns to the UK on 9 March 2023, and split year treatment applies. He is treaty resident in the UK from the date of his return.

[23] HMRC take the date to 25th, but it makes no difference: one is looking at midnight 25/26 May.

JK analysis

Working through the TNR issue list, I would analyse the matter as follows:

(1) Preparatory:

(a) Identify the residence periods (split/non-split years)

(b) Classify each residence period as:

(i) a sole UK period or

(ii) a non-sole UK period

Residence period	**Classify**	**Notes**
2013/14 Split year		
Offshore part (to 8 Jan 2014)	Non-sole UK period	
UK part (from 9 Jan 2014)	Sole UK period	
2014/15 Not split year	Sole UK period	
2015/16 Not split year	Sole UK period	
2017/18 Split year		
UK part (to 3 Jan 2018)	Sole UK period	Period A
Offshore part (from 4 Jan 2018)	Non-sole UK period	
2018/19 Not split year	Non-sole UK period	
2019/20 Not split year	Non-sole UK period	
2020/21 Not split year	Non-sole UK period	
2021/22 Not split year	Non-sole UK period	
2022/23 Split year		
Offshore part (to 8 Mar 2023)	Non-sole UK period	
UK part (from 9Mar 2023)	Sole UK period	

(2) The 4/7 UK-years test:

(a) Identify period A (pre-departure sole UK period): 6 Apr 17-3 Jan 18

(b) Identify year of departure (tax year including period A): 2017/18

(c) Identify the 7 tested years 2010/11 - 2016/17

(d) Are (at least) 4/7 of the tested years UK years? Yes (4 out of 7)

(3) The 5-year absence test:

(a) Identify end date of period A: 3 Jan 2018

(b) Identify start date of next sole UK period after period A: 9 Mar 2023

(c) Identify temporary period of non-residence (period between (a) and (b): is it 5 years or less? No.

Conclusion: The TNR rules do not apply.

The HMRC analysis is as follows:

> L meets the '4 out of 7' test for tax years immediately preceding the year of his departure.

- 2013-2014 was a split year which included a residence period for which L had sole UK residence
- 2014-2015, 2015-2016 and 2016-2017 were full tax years for which he had sole UK residence
- 2017-2018 was the year of departure. It was a tax year that included a residence period for which he had sole UK residence (6 April 2017 to 3 January 2018). This last period is period A.

5-year absence test

The HMRC analysis is as follows:

> L has more than 1 residence period immediately following period A in which he does not have sole UK residence. The first such period is 4 January 2018 to 5 April 2018, (the overseas part of the split year in the year of his departure).
> By the time L returns he has been non-resident for more than 5 years, (4 January 2018 to 8 March 2023), therefore he is not temporary non-resident for the purposes of the statutory residence test. He does not need to be non-resident for 5 complete tax years in order to be outside the scope of the temporary non-residence provisions.

The example illustrates that L does not need to be non-resident for 5 complete tax years in order to fall outside the scope of the TNR provisions.

11.5.3 *5 years non-residence, no split years*

STEP guidance provides:

> In certain circumstances, an individual will need to remain outside of the UK for six tax years in order not to be regarded as 'temporarily non-resident'.
> *Example*
> An individual:
> - leaves the UK on or before 5 April in one year (e.g. 4 April 2015);
> - stays outside the UK for five complete tax years (being both tax years and calendar years);
> - returns to the UK on 6 April or later during the following tax year (6 April 2020).
>
> The individual is not, at any point, treaty resident in another country and is not eligible for split-year treatment in the year of arrival or departure.

JK analysis
Working through the TNR issue list, I would analyse the matter as follows:

(1) Preparatory:

(a) Identify the residence periods (split/non-split years)

(b) Classify each residence period as:

(i) a sole UK period or

(ii) a non-sole UK period

Residence period	**Classify**	**Notes**
2014/15 Not split year	Sole UK period	Period A
2015/16 Not split year	Non-sole UK period	
2016/17 Not split year	Non-sole UK period	
2017/18 Not split year	Non-sole UK period	
2018/19 Not split year	Non-sole UK period	
2019/20 Not split year	Non-sole UK period	
2020/21 Not split year	Sole UK period	

(2) The 4/7 UK-years test:

(a) Identify period A (the pre-departure sole UK period): 2014/15

(b) Identify year of departure (tax year consisting of period A): 2014/15

(c) Identify the 7 tested years: 2007/8 - 2013/14

(d) Are (at least) 4/7 of the tested years UK years? Yes (7 out of 7)

(3) The 5-year absence test:

(a) Identify end date of period A: 5 Apr 2015

(b) Identify start date of next sole UK period after period A: 6 Apr 2020

(c) Identify temporary period of non-residence (period between (a) and (b): is it 5 years or less? No

Conclusion: The individual is outside the TNR rules. But STEP say:

> Under the new rules, the individual will be temporarily non-resident as the period of non-residence will be precisely five years and not more. Therefore, they would have to remain outside the UK until 6 April 2021 in order not to be regarded as temporarily non-resident.

But is that right?

11.6 TNR gain/loss

11.6.1 *Gain/loss accrues in year of return*

Section 1M(1) TCGA provides:

> If, in the case of the disposal of an asset by an individual who is temporarily non-resident—
>
> (a) a gain or loss accrues to the individual in the temporary period

> of non-residence, and
> (b) the asset is not excluded from this subsection by section 1N (certain assets acquired in that period),[24]
>
> the gain or loss is treated instead as accruing to the individual in the period of return.

I refer to gains/losses within s.1M(1) as **"TNR gains/losses"**.

Section 87 gains accruing to a non-resident beneficiary before 2008/09 were TNR gains, within (what is now) s.1M(1) TCGA, as they were chargeable gains, treated as accruing to the beneficiary under s.87, even if the beneficiary was non-resident. This point will cease to matter from 6 April 2024 when a 2017/18 s.87 gain will fall out of the scope of TNR. For capital payments to non-residents from 2018, see 61.22 (Payment to temporary non-resident).

Section 1M(1) does not catch s.86 or s.3 gains, as gains under these sections do not accrue to a non-resident. These sections only apply to a settlor or participator who is UK resident. Hence the drafter includes express provisions to catch these gains. It was not necessary to do this for s.87, prior to 2018.

For the interaction with sch 4C TCGA, see 62.28.2 (Trust within s.87).

11.6.2 *TNR s.3 gain*

In the absence of express provision, s.3 gains of a temporarily non-resident participator in a non-resident company would not be TNR gains.

Section 3E TCGA provides:

> (1) This section applies if-
> (a) an individual is temporarily non-resident, and
> (b) a gain or loss accrues to a company in a tax year falling wholly or partly in the temporary period of non-residence.
>
> (2) So much of the gain as would, as a result of section 3, have been treated as accruing to the individual in the tax year if the residence assumption were made is to be treated as accruing to the individual in the period of return.

Section 3E(6) TCGA defines the residence assumption:

> For the purposes of this section the "residence assumption" is-
> (a) that the individual was resident in the UK for the tax year in which the gain or loss accrued to the company, and

[24] See 11.7 (Post-departure acquisitions).

> (b) that the tax year was not a split year as respects the individual.

Section 3E TCGA then deals with the remittance basis:

> (3) But if-
>
> (a) the remittance basis applies to the individual for the tax year that comprises or includes the period of return, and
>
> (b) any part of the gain has not been remitted to the UK before the period of the return,
>
> subsection (2) has effect subject to the further application of Schedule 1 (as read with section 3D) in relation to that part of the gain.
>
> (4) Paragraph 5 of Schedule 1 applies for the purposes of subsection (3) as it applies for the purposes of that Schedule.

Section 3E(7) TCGA provides a treaty override:

> Nothing in any double taxation arrangements prevents a charge to capital gains tax arising as a result of this section.

11.6.3 *TNR s.3 loss*

In the absence of express provision, s.3 losses of a temporary non-resident would not be within the TNR rules, and would not be allowable. Section 3E(5) TCGA provides:

> So much of the loss accruing in the tax year as would, in accordance with section 3(9), have reduced or extinguished a gain treated as accruing to the individual in that year as a result of section 3 if the residence assumption were made is to be treated as accruing to the individual in the period of return.

Section 3 TNR losses are only set against s.3 TNR gains. This is consistent with the usual rule for s.3 losses: see 64.14 (Loss accruing to non-resident company).

Careful timing of disposals is necessary to ensure that s.3 losses are not wasted.

11.6.4 *TNR s.86 gain*

In the absence of express provision, s.86 gains would not be TNR gains. Section 1M(3) TCGA provides:

> If—
>
> (a) an individual is temporarily non-resident, and
>
> (b) a gain would, as a result of section 86, have accrued to the individual in a tax year falling wholly or partly in the temporary

> period of non-residence if the individual had been resident in the UK for that year,
>
> the gain is treated instead as accruing to the individual in the period of return (but see also section 86A[25]).

11.6.5 *Gain taxed on non-resident*

Section 1M(5) TCGA provides:

> Nothing in this section is to affect a gain or loss which, apart from this section, would be chargeable to capital gains tax or would be an allowable loss.

This sensibly disapplies the TNR rules where the temporarily non-resident individual is already subject to CGT. That may be:

(1) The situations where a non-resident is subject to CGT:[26]
    (a) Gain on a disposal of UK land or a land-rich asset
    (b) Individual carries on trade in the UK through a branch/ agency
(2) If the individual is tax-resident and treaty non-resident but:
    (a) the treaty does not have a CG article; or
    (b) the treaty CG article does not apply to the gain (eg UK land)

11.6.6 *TNR gain remitted*

Section 1M(2) TCGA provides:

> If—
>
> (a) a gain is, as a result of subsection (1), treated as accruing to an individual in a tax year for which the remittance basis applies to the individual,[27]
> (b) the tax year consists of or includes the period of return, and
> (c) the gain was remitted to the UK in the temporary period of non-residence,
>
> the gain is treated instead as remitted to the UK in the period of return.

See 11.2.3 (TNR remittances).

What about s.3 gains of a temporary non-resident?

A foreign domiciled settlor is not within s.86, so this provision does not

[25] See 11.10 (TNR s.86/s.87 interaction)

[26] See 56.6.5 (CGT/CT charge: non-residents).

[27] Defined in s.1M(7): "In this section the reference to "the remittance basis" applying to an individual for a tax year is to section 809B, 809D or 809E of ITA 2007 applying to the individual for the year."

refer to s.86 TNR gains.

11.7 Post-departure acquisition

Section 1N(1) TCGA provides:

> An asset is excluded from section 1M(1) if—

I refer to this as **"post-departure acquisition relief"**. Four conditions (or sets of conditions) then follow.

11.7.1 *Acquisition post-departure*

Section 1N TCGA provides:

> (1) An asset is excluded from section 1M(1) if—
> (a) it was acquired by the individual in the temporary period of non-residence,

The asset must be acquired in the temporary period of non-residence. The relief does not apply where:

(1) T acquires an asset when non-resident.
(2) T returns to the UK.
(3) T becomes temporarily non-resident.

The relief does not apply to a s.3 gain accruing to a temporary non-resident who is a participator in a non-resident company, on the disposal of an asset by the company, because the acquisition is not by the individual.

11.7.2 *No gain/loss acquisition*

Section 1N TCGA provides:

> (1) An asset is excluded from section 1M(1) if ...
> (b) the acquisition was otherwise than by means of a disqualifying no gain/no loss disposal,

Section 1N TCGA defines"UK resident disposal" and then "disqualifying no gain/no loss disposal":

> (3) For the purposes of this section "a UK resident disposal" means a disposal by a person ("P") of an asset which was acquired by P at a time when—
> (a) P was resident in the UK, and
> (b) P was not Treaty non-resident.
>
> (4) For the purposes of this section "a disqualifying no gain/no loss disposal" means a UK resident disposal to which section 58, 73 or

> 258(4) applies.

The sections referred to are:

TCGA	**Topic**
s.58	Transfers between spouses
s.73	Death of life tenant
s.258(4)	Works of art

The drafter has not used the term "Sole non-residence"; perhaps because the term is defined in sch 45 FA 2013 and incorporating a definition by reference was more trouble than it was worth.

11.7.3 *Exclusion for settled property*

Section 1N TCGA provides:

> (1) An asset is excluded from section 1M(1) if ...
> (b) the acquisition was otherwise than by means of a disqualifying no gain/no loss disposal.

This prevents an avoidance scheme under which T might acquire an interest under a settlement with relevant income or trust gains, and then sell the interest tax free.

11.7.4 *Exclusion after roll-over*

Section 1N TCGA provides:

> (1) An asset is excluded from section 1M(1) if ...
> (c) there is no reduction in the consideration for the acquisition under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b) by reference to a UK resident disposal, and

The sections referred to are:

TCGA	**Topic**
s.23	Compensation and insurance
s.152/153	Business assets roll-over relief
s.162	Transfer of business to a company
s.247	Compulsory acquisition

11.7.5 *Exclusion after reorganisation*

Section 1N(2) TCGA provides:

> This exclusion does not apply in the case of an asset ("the new asset")

if—

(a) on a disposal of the new asset a gain or loss is treated as a result of 116(10) or (11), 134 or 154(2) or (4) as accruing (ignoring section 1M),

(b) the gain or loss is calculated by reference to another asset ("the old asset"), and

(c) the new asset is one that meets the conditions for exclusion but the old asset does not.

The sections referred to are:

TCGA	**Topic**
s.116	New asset is qualifying corporate bond
s.134	Compensation stock
s.154	Depreciating asset

11.7.6 *Interaction with share pooling*

CIOT raise an interesting question:

> Suppose an individual were to own 100 shares in a limited company.
> The individual becomes non-resident and, whilst non-resident, purchases in the market a further 200 shares (of the same class) in the same company.
> Whilst non-resident, the individual then disposes of the entire shareholding at a gain.
> Under [s.1M TCGA] assets owned at the date of departure which are then disposed of whilst non-resident are treated as disposed of in the year of return if the individual is away for fewer than five tax years. Section [1M] therefore catches the disposal of the 100 shares. The policy behind section [1M] would not therefore seek to charge tax on any gain arising in respect of the 200 shares acquired, held and disposed of whilst the individual was non-resident. This would ordinarily be provided for by section [1N TCGA]. However, section 104 provides that shares (and other fungible assets) are treated as a single asset 'growing or diminishing' as the case may be. Therefore, it would appear that section 104 TCGA treats the 200 shares as if they were part of the same asset which previously consisted of only 100 shares. That asset is one that was held prior to the individual's departure (and therefore falls outside the exception for post-departure acquisitions).[28]

11.8 DTA override: Gains

Most DTAs with a capital gains article broadly adopt OECD Model form:

> Gains from the alienation of any property, other than [specified exceptions] shall be taxable only in the Contracting State of which the alienator is a resident.[29]

Gains accruing to an individual when treaty-resident in a foreign state (in the statutory terminology, treaty non-resident) would in principle qualify for this relief even if within the scope of s.1M. Section 1M(4) TCGA provides a treaty override:

> Nothing in any double taxation arrangements prevents a charge to capital gains tax arising as a result of this section.

This constitutes a breach of treaties in OECD Model form.[30] However the intention of parliament is clear and prevails over the treaty.[31]

11.8.1 *Foreign tax credit relief*

EN FB 2005 provides:

> The application of section 10A [now s.1M] in relation to an individual does not prevent the individual obtaining relief for foreign tax paid in respect of chargeable gains which are treated as arising to him or her in the year of return.

The same would apply to the current rules. For an example in the context of the USA/UK DTA, see 111.24 (Credit for TNR CGT charge),

11.9 TNR: BAD relief claim

Taxguide 1/12 (Entrepreneurs' relief - practical points) provides:[32]

> **Technical tax analysis put forward for HMRC comment**
> 88 Under [s.1M TCGA] the gain will be treated as accruing to a taxpayer in the year of return. The view taken is that the original disposal date applies for ER [now business asset disposal relief] purposes. As s.169M

[29] See 17.18 (DT relief for taxable gains).

[30] This is recognised in some treaties, where a specific provision authorises a TNR charge (and any foreign state equivalent). See 56.24.5 (DTA recent departure rules).

[31] See 107.19.8 (Conflict between DTA/UK law).

[32] *https://www.icaew.com/-/media/corporate/archive/files/technical/tax/taxguides/taxguide-1-12-er-final-at-25-jan-12.ashx*

> TCGA requires an election for ER to be made before the first anniversary of 31 January following the tax year in which the disposal takes place, it is likely that the individual will be out of time in making an ER claim if he waits until he has resumed UK residence. The advice is therefore to make a protective claim...
>
> **HMRC response** ...
>
> 89 ER is only available on the making of a claim and such claim must be made within the statutory time limit which is set by reference to the date of the qualifying disposal (see s.169M(3) TCGA 1992). It is for the taxpayer to consider whether to submit a protective claim for ER within this time period.

11.10 TNR s.86/s.87 interaction

In the absence of relief, gains accruing to the trustees during the settlor's period of temporary non-residence may be:

(1) s.86 gains of the settlor in the year of return, and

(2) s.1(3) amounts (trust gains) which may effectively be charged on beneficiaries of the settlement who receive capital payments.

Section 86A TCGA provides relief against double taxation

Section 86A TCGA provides:

> (1) Subsection (3) applies if—
>
> (a) chargeable gains of an amount equal to the amount referred to in section 86(1)(e) for a tax year ("year A") are treated under section 1M(3)[33] as accruing to a settlor under section 86 in the period of return

"Year A" is one of the temporary non-resident years. The label is not ideal, but I adopt it as it is easiest to follow the statutory terminology.

> (b) there are amounts on which beneficiaries of the settlement are charged to tax under section 87 or 89(2) for one or more tax years, each of which is earlier than the year of return, and
>
> (c) those amounts are in respect of matched capital payments[34] received by the beneficiaries.

It is considered that non-resident beneficiaries are not "charged to tax" unless they are temporary non-resident beneficiaries who have returned to

[33] See 11.6.4 (TNR s.86 gain).

[34] Defined s.86A(2): "A "matched" capital payment is a capital payment, all or part of which is matched under section 87A with the section 1(3) amount for year A."

the UK before the settlor’s year of return. Remittance basis beneficiaries are “charged to tax” even if nothing is remitted.

11.10.1 *The reliefs*

There are three reliefs. Firstly, s.86A(3)(4) TCGA provides s.87 gains charged to tax are deducted from the settlor’s s.86 gains:

> (3) The amount of the chargeable gains mentioned in subsection (1)(a) for year A that are treated under section 1M(3) as accruing to the settlor under section 86 in the period of return is to be reduced by the appropriate amount.
> (4) The appropriate amount is—
> (a) the sum of the amounts mentioned in subsection (1)(c) to the extent that the matched capital payments are matched under section 87A with the section 1(3) amount for year A, or
> (b) if the property comprised in the settlement has at any time included property not originating from the settlor, so much (if any) of that sum as, on a just and reasonable apportionment, is properly referable to the settlor.

Section 86 gains which are brought into charge are deducted from s.1(3) amounts. That follows the usual rule in s.87(4)(b) TCGA.[35] The legislation has separate rules for the year of return and for earlier years (why?). Section 86A(5) TCGA deals with the year of return:

> (5) If a reduction falls to be made under subsection (3) for the year of return, the deduction to be made in accordance with section 87(4)(b) for the settlement for that year must not be made until—
> (a) all the reductions to be made under subsection (3) for that year for each settlor have been made, and
> (b) those reductions are to be made starting with the year immediately preceding the year of return and working backwards.

Lastly, s.86A(6)(7) TCGA deals with the earlier years:

> (6) Subsection (7) applies if, with respect to year A, an amount remains to be treated under section 1M(3) as accruing to any of the settlors in the period of return after having made the reductions under subsection (3) with respect to year A.
> (7) The aggregate of the amounts remaining to be so treated (for all of

[35] See 61.6.7 (s.86 gain deducted from s.1(3) amount).

> the settlors) is to be applied in reducing so much of the section 1(3) amount for year A as has not already been matched with a capital payment under section 87A for any year prior to the year of return (but not so as to reduce the section 1(3) amount below zero).

Section 86A(8) TCGA provides definitions needed for a trust with multiple settlors:

> In this section—
> (a) "the settlement" means the settlement in relation to which the settlor mentioned in subsection (1)(a) is a settlor,
> (b) a reference to "the settlors" or "each settlor" is to the settlors or each settlor in relation to the settlement,
> (c) "period of return" and "year of return" have the same meanings as in section 1M(3), and
> (d) paragraph 8 of Schedule 5 applies in construing the reference to property originating from the settlor.

11.11 TNR dividend code

A table may assist navigation. In order of importance, the provisions are:

Section	**Topic**	**See para**
Foreign dividends		
408A ITTOIA	Foreign dividend	11.13
689A ITTOIA	Foreign distribution	11.13
UK dividends		
812A ITA	Non-resident IT relief	11.15
401C ITTOIA	DT relief	11.16
413A ITTOIA	Stock dividend	*not discussed*
420A ITTOIA	Release of loan to participator	*not discussed; see 40.8*
