> In May 2008 they divorce and A's former wife's interest ends. The initial exclusion comes to an end, but A's subsequent qualifying life interest (a TSI under IHTA/S49C (IHTM16061)) is not exempt under FA04/Sch15/Para11(1).

83.21 Full consideration exemption

Para 11(5)(d) sch 15 FA 2004 provides a POA exemption where (in my paraphrase) the relevant property or derived property:

> would fall to be treated as property subject to a reservation but for s.102C(3) and Schedule 20 para 6 FA 1986.

There is a set of exemptions here:[63]

(1) Where the GWR rule would apply but for s.102C(3) FA 1986 (this

[63] Another possible reading is that the exemption only applies if s.102C(3) and sch 20 para 6 both apply, ie it is not enough that sch 20 para 6 applies if s.102C(3) does not. But a close reading of s.102C shows that s.102C(3) and para 6 sch 15 FA 2004 are alternatives. They cannot both apply. *Hansard* confirms this (if it were necessary): HC 7 July 2004 col.881, 900 and the IHT Manual set out below takes the same view.

section is not discussed here).

(2) Where the GWR rule would apply but for para 6 sch 20 FA 1986.

Para 6(1) sch 20 FA 1986 provides two exemptions to the GWR rule. The first is:

> In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—
>
> (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth ...

I call this the "**full consideration exemption**". This is particularly important in relation to chattels because full consideration would be much less than the deemed income charge.

For the concept of "full consideration", see App 4.9 (Market value/full consideration).

The full consideration exemption only applies if there would otherwise be a GWR. If an individual has carried out an *Eversden* scheme, they will not qualify for the full consideration exemption even if they pay full consideration for use of the land (though the rent paid will reduce the quantum of the POA charge).

The second exemption in para 6(1)(b) sch 20 is less likely to be important in practice.

The IHT Manual provides:

> **IHTM44048 exclusion of reservation of benefit under FA86/Sch20/Para6** [Aug 2016]
>
> Where the chargeable person makes a gift that is not subject to a reservation of benefit because the benefit is excluded under FA86/Sch20/Para6(a) & (b), it is also exempt from the POA charge under FA04/Sch15/Para11(5)(d). This covers two situations.
>
> **Full consideration**
>
> Where the donor gives away land and continues to occupy it, or gives away a chattel and continues to use and enjoy it, but pays full consideration in money or money's worth, there is no reservation of benefit (IHTM14341) nor is there a POA charge. What is full consideration and the way the parties should go about the transaction to avoid being subject to a charge as a reservation of benefit applies

equally to the exemption from the POA charge.

If the consideration paid is less than full consideration, or if they initially pay full consideration but, over time, this falls below market rates, a reservation of benefit will arise at the time they ceased to pay full consideration. There will be no POA charge in view of FA04/Sch15/Para11(5)(a).

Change in donor's circumstances

Where the donor makes a gift of property that is not subject to a reservation of benefit, but they subsequently have to return to the property due to an unforeseen change in their circumstances and are unable to look after themselves because of age or infirmity, there is no reservation of benefit (IHTM14342) nor is there a POA charge.

83.22 Partnerships

The guidance formerly published on the HMRC website provided:

> The treatment of a share of a partnership interest for Schedule 15 purposes follows that applied for IHT purposes. In other words, we do not regard the partnership interest as transparent, and the disposal of a share is unlikely to give rise to a Schedule 15 charge in any circumstances.

This is not a view which bears much examination. If a partnership holds land, a partnership interest is an interest in land, and a disposal of that interest meets the disposal condition.[64] But the legislation was not intended to catch partnerships and HMRC avoid the problem by informal concession dressed up as a statement of practice. The passage is not in the IHT Manual but there is no reason to think that HMRC practice has changed.

83.23 Non-resident individual

Para 12(1) sch 15 FA 2004 provides:

> This Schedule does not apply in relation to any person for any year of assessment during which he is not resident in the UK.

This is straightforward.

[64] Contrast the original HMRC guidance (called "Technical Guidance", 2004) which took the correct (if worrying) line that the POA rules in principle apply "if C, an existing partner, brings his son D into partnership"; see the 6th edition of this work, para 43.10.1.

83.24 UK resident non-dom

Para 12(2) sch 15 FA 2004 provides:

> Where in any year of assessment a person is resident in the UK but is domiciled[65] outside the UK, this Schedule does not apply to him unless the property falling within para 3(1)(a), 6(1)(a) or 8(1)(c) is situated in the UK.

This provides exemptions to:
(1) POA land charge, where T occupies non-UK situate land
(2) POA chattel charge, where T uses non-UK situate chattels
(3) POA intangible property charge, where intangible property is not UK situate.[66]

Para 12(2) does not provide exemption where T transfers assets to a non-UK company which holds UK land occupied by T. But the GWR or estate exemption will usually apply.

83.25 Former non-dom

Para 12(3) sch 15 FA 2004 provides:

> In the application of this Schedule to a person who was at any time domiciled[67] outside the UK, no regard is to be had to any property which is for the purposes of IHTA excluded property in relation to him[68] by virtue of section 48(3)(a) of that Act.[69]

The words "was at any time domiciled outside the UK" refer to a person who was formerly foreign domiciled but who has become UK domiciled. The words do not refer to a person who was and remains foreign domiciled. (The words in isolation could, taken literally, apply in such a

[65] "Domiciled" is defined in para 12(4) sch 15 FA 2004:
"For the purposes of this paragraph, a person is to be treated as domiciled in the UK at any time only if he would be so treated for the purposes of IHTA."

[66] This exemption (anomalously) does not apply to FOTRA securities, AUTs or OEICs which may be excluded property but which are UK situate. But the intangible property charge is not likely to affect non-dom settlors, so it may not matter.

[67] This includes deemed domicile: see above footnote.

[68] The words "in relation to him" are misconceived. Property is excluded property or not excluded; but it cannot be excluded property "in relation to" any particular beneficiary. It is considered that these words should simply be disregarded.

[69] The exemption (anomalously) does not apply to FOTRA securities, AUTs or OEICs which may be excluded property, but not under s.48(3)(a) IHTA.

case, but the word *was* in para 12(3) is to be contrasted with *is* in para 12(2).)

Suppose:

(1) T (not UK domiciled) creates a discretionary trust of which T is a beneficiary;

(2) The trust holds:

    (a) Non-UK investments.

    (b) A company holding UK property occupied by T.

At this point, the conditions for the POA intangible property charge and the POA land charge are satisfied but the GWR exemption provides relief in both cases.

(3) Suppose T becomes IHT deemed domiciled (or actually UK domiciled).

At first sight T ceases to enjoy the benefit of the GWR and estate exemptions as the trust property is excluded property, so "no regard" is to be had to it.

(1) In relation to the investments, there is still no POA intangible property charge, since the investments are excluded property, so no regard is to be had to them either.

(2) However, the land is not excluded property, so the POA land charge seems to apply.[70] This was certainly not foreseen at the time the legislation was passed. It is suggested that para 12(3) sch 15 FA 2004 is, like a deeming provision, to be construed to have effect so far as intended but it was not intended to disapply the GWR and estate exemptions. The purposive approach to construction of tax statutes may on this occasion assist the taxpayer. The 17 March 1986 POA start date supports this view. That date shows that the object of the rules is to prevent GWR avoidance, not other kinds of IHT mitigation.

HMRC agree. CIOT Statement provides at para 7:

> Para 12(3) states that no regard is to be had to excluded property. In a case where a trust settled by a foreign domiciliary owns a UK house through a foreign registered company the shares in the company (and any loan to the company) are excluded property. Concern has been expressed that since para 12(3) says that no regard is to be had to these

[70] A further tax charge would arise if (as some have argued) T is also caught by the GWR rules on his death; see 78.15 (Death: settled excluded property).

> assets, this in turn means that the shares and loan have to be ignored in applying para 11 and in particular cannot be taken into account in determining whether there is derived property which is in the taxpayer's estate or GWR property in relation to him (which the shares and loans otherwise are). We think that this argument is misconceived but it has been advanced.
>
> **Question 42**
>
> Can HMRC confirm that they agree para 12(3) does not operate in this way and that para 11 can still work to protect the UK house or underlying assets owned by the offshore company in these circumstances?
>
> *HMRC*
>
> We agree with what you say in para 7.1 about the interaction between paras 12(3) and 11.

The guidance formerly published on the HMRC website provided at 4.1:

> Para 12(3) of the schedule provides that if any property situated outside the UK became comprised in a settlement when the person settling the property was domiciled outside the UK it will not be subject to the charge. Even if that person becomes domiciled in the UK at a later date this property will remain excluded from the charge.
>
> Para 12(3) provides that a charge under this Schedule shall not arise in relation to property regarded as excluded by virtue of section 48(3) IHTA'84. We do not regard this provision as having an impact on para 11 in determining whether there is derived property in the taxpayer's estate, or GWR property in relation to him (see foreign domiciliary example in appendix).

The passage is not in the present IHT Manual, but HMRC practice may not have changed.

The IHT Manual provides:

> **IHTM44054 exemptions: foreign element - foreign domiciliaries**
> [Aug 2016]
>
> Example (Gregor)
>
> G, who is non-UK domiciled but resident in the UK, gives his French house to an offshore company which is 100% owned by him and continues to live there. This is a disposal of land, but there is no POA charge because of the exemption under FA04/Sch15/Para12(2). However G owns the company shares that derive their value from the house, so he is also exempt under FA04/Sch15/Para11(1). If, after a period of time, G becomes deemed domiciled in the UK, this exemption under FA04/Sch15 /Para12(2) will be lost. However, exemption under

FA04/Sch15/Para11(1) (IHTM44041) is still available as G's estate includes property (the company shares) which derives its value from the relevant property.

If G had given his UK house to the offshore company and continued to live there, a POA charge potentially arises. The exemption under FA04/Sch15/Para12(2) does not apply because the property is situated in the UK. However, exemption under FA04/Sch15/Para11(1) is still available as G's estate includes property (the company shares) which derives its value from the relevant property.

Note that in the second scenario above, the exemption still applies even though should G die non-UK domiciled the property will not be liable to Inheritance Tax because the shares in the offshore company will be excluded property (IHTM04260).

IHTM44055 exemptions: foreign element - foreign domiciliaries: settled property exemption [June 2016]

Where a person who is domiciled outside the UK creates a settlement that contains overseas property, that settlement is an excluded property settlement for Inheritance Tax purposes (IHTM27220). No regard is to be had to any such property for the purposes of the POA charge, FA04/Sch15/Para12(3). This provision provides an exemption for individuals who subsequently become domiciled in the UK and continue to benefit from the settled property and who would therefore no longer be able to rely on the foreign domiciliary exemption (IHTM44054).

If, having become domiciled in the UK the person adds property, wherever it may be situated, to the settlement, the added property may be subject to the POA charge in the normal way. If available, the exemptions and exclusions would apply as they would for any person domiciled in the UK.

The definition for excluded property for inheritance purposes includes interests in UK unit trusts, OEICs and gilts, but this is not extended to the POA charge.

83.26 Loan to trust

The IHT Manual provides

IHTM44113 insurance based products: gift and loan trust [Jun 2016]

A gift and loan trust is where the settlor makes a small gift into trust, possibly by way of an insurance policy and settles it on trusts for the benefit of others and from which the settlor is entirely excluded. They then make a substantial interest free loan to the trustees, repayable on demand. The trustees use the loan to purchase more policies, and make partial surrenders each year to pay off part of the loan.

> This arrangement is not a gift with reservation for inheritance tax. The settlor is not a beneficiary of the trust itself and the making of the loan does not constitute a settlement for the purposes of Inheritance Tax. No POA charge arises as the benefit to the settlor arises as a creditor and not under the trust.

83.27 Quantum of charge: Land

We find the usual cascade of definitions. Para 3(5) sch 15 FA 2004 provides:

> Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 4 is to be treated as income of his chargeable to income tax.

83.27.1 *Chargeable amount/deductions*

One therefore turns to para 4 sch 15 FA 2004 to find the quantum of the charge. Para 4(1) sch 15 FA 2004 provides:

> For any taxable period[71] the chargeable amount in relation to the relevant land is
> [a] the appropriate rental value ... less
> [b] the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the relevant land in respect of the occupation of the land by the chargeable person.

To obtain a deduction requires good paperwork:
(1) a legal obligation; and
(2) payment to the owner of the relevant land.
This is straightforward in an *Eversden* scheme, but who is the "owner" of the land in an *Ingram* scheme (where there is a lease owned by T and a reversion owned by others)? Who is owner of the land in a home loan scheme (where the land is held by trustees)?

83.27.2 *"Appropriate rental value"*

This is defined in para 4(2) sch 15 FA 2004. This provides:

[71] "Taxable period" has common sense definition in para 4(6) sch 15 FA 2004:
"In this paragraph—
'the taxable period' means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person."

The appropriate rental value is R × (DV ÷ V)

In short, R is the **R**ental value; V is the capital **V**alue. DV ÷ V is (in a sense) the chargeable part of that value. **DV** stands, perhaps, for Disposal Value.

83.27.3 *"Rental value"*

R is the rental value of the relevant land for the taxable period. "Rental value" is defined in the same manner as the income tax benefit in kind rule: it means the "annual value".

"Annual value" is in turn defined in para 5 sch 15 FA 2004. That is copied from s.110 ITEPA, except that s.110(3), (4) are omitted. It is here called **"POA Annual Value"**. POA Annual Value is defined as the rent which will be payable *on the assumption that the landlord (rather than the tenant) pays for all repairs and insurance*. The normal market rent will be lower than the POA Annual Value, because market practice is that the *tenant* pays the cost of repairs and insurance. The difference between POA annual value and normal market rent will vary from one property to another. The difference would be greater with large properties which are expensive to maintain and insure. In relation to other benefits in kind provisions, such as s.87 and s.731, beneficiaries have sometimes been given the benefit of living accommodation on terms that they are responsible for maintenance and insurance. If the maintenance and insurance cost is substantial, they argue that the value of the benefit is small or sometimes even nil. It was perhaps to avoid these arguments that the legislation was framed in this way. It seems extraordinary if one thinks that the legislation is intended to charge income tax on a benefit in kind. However, the object of the legislation is really to penalise taxpayers who have carried out some IHT planning schemes and so it does make sense.

The wording is derived from rating legislation. There is a substantial amount of case law, and to research this the reader should refer to rating law textbooks.

Annual value for benefit in kind purposes is by concession taken to be the rateable value.[72] There is no reason to think that this concession will be applied for POA Annual Value.

POA Annual Value is therefore slightly above market rental value.

[72] See 39.18.1 ("Rental value").

83.27.4 *The proportion (DV ÷ V)*

The key expression is DV. Para 4(2) sch 15 FA 2004 provides:

> DV is—
>
> (a) in a case falling within para 3(2)(a)(i),[73]
>
> [i] the value as at the valuation date of the interest in the relevant land that was disposed of as mentioned in para 3(2)(b) by the chargeable person or,
>
> [ii] where the disposal was a non-exempt sale, the appropriate proportion of that value,
>
> (b) in a case falling within para 3(2)(a)(ii),[74]
>
> [i] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
>
> [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
>
> (c) in a case falling within para 3(3),[75] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
>
> V is the value of the relevant land at the valuation date.

The drafter does not deal with a case falling within the disposal and the contribution condition, eg if the individual disposes of an interest in a contract to purchase land to another person and also provides the purchase price.

83.27.5 *(DV÷V) and valuation date*

The valuation date is determined by the POA Regulations 2005. The Consultation Document "Taxation of Pre-Owned Assets: Further Consultation" 16 August 2004 explains:

> 5. In the case of land, the "cash equivalent" of enjoyment in a particular tax year is derived from market rental that would be paid for use of the land over the "taxable period" (that is, the tax year or any shorter period for which the asset is "caught" by Schedule 15). This figure is then scaled down, in cases where the taxpayer's "stake" in the caught asset is less than 100 per cent, in the proportion DV/V, where V is the value of the whole asset on the "valuation date" for the year, and

[73] ie disposal condition (i), see 83.4.1 (Disposal condition (i)).

[74] ie disposal condition (ii), see 83.4.2 (Disposal condition (ii)).

[75] ie the contribution condition, see 83.5 (Contribution conditions).

> DV is the value reasonably attributable to the taxpayer on that date. In many cases, however, we would expect that taxpayers and their advisors will be able to establish the ratio DV/V from the surrounding circumstances without necessarily establishing the absolute amount of V or DV.

83.27.6 *Non-exempt sale*

Para 4(4) sch 15 FA 2004 provides a relief for a "non-exempt" sale. Para 4(4) sch 15 FA 2004 begins with the definition of this term:

> The disposal by the chargeable person of an interest in land is a "non-exempt sale" if (although not an excluded transaction) it was a sale of his whole interest in the property for a consideration paid in money in sterling or any other currency;

The label ("non-exempt sale") is chosen, presumably, because the sale is not an excluded transaction. (Perhaps "non-excluded sale" would have been clearer.)

The relief is given by the method of re-defining "the appropriate proportion" to a smaller amount. Para 4(4) sch 15 FA 2004 continues:

> and, in relation to a non-exempt sale, "the appropriate proportion" is
> $(MV–P) \div MV$
> where—
> MV is the value of the interest in land at the time of the sale;
> P is the amount paid.

This will not often apply as a sale for full value will usually be an excluded transaction and a sale at an undervalue will probably qualify for the GWR exemption.

83.28 Quantum of charge: Chattels

Para 6(5) sch 15 FA 2004 provides:

> Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 7 is to be treated as income of his chargeable to income tax.

83.28.1 *Chargeable amount*

Para 7(1) sch 15 FA 2004 provides:

> For any taxable period the chargeable amount in relation to any chattel is

> [a] the appropriate amount (as determined under sub-para (2)),
> [b] less the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the chattel in respect of the possession or use of the chattel by the chargeable person.

This follows the format of the POA land charge.

83.28.2 *Appropriate amount*

Para 7(2) sch 15 FA 2004 provides:

> The appropriate amount is N×(DV ÷ V)

In short, N is **N**otional interest. DV and V are similar to the POA land charge. In detail:

> N is the amount of the interest that would be payable for the taxable period[76] if interest were payable at the prescribed rate on an amount equal to the value of the chattel [at][77] the valuation date,
> DV is—
> (a) in a case falling within para 6(2)(a)(i),
> [i] the value as at the valuation date of the interest in the chattel that was disposed of as mentioned in para 6(2)(b) by the chargeable person or,
> [ii] where the disposal was a non-exempt sale,[78] the appropriate proportion of that value,
> (b) in a case falling within para 6(2)(a)(ii),
> [i] such part of the value of the chattel at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
> [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
> (c) in a case falling within para 6(3), such part of the value of the chattel at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
> V is the value of the chattel at the valuation date.

[76] Para 7(5) sch 15 FA 2004 provides that "the taxable period" means the year of assessment, or part of a year of assessment, during which para 6 sch 15 FA 2004 applies to the chargeable person.

[77] The statute erroneously reads "as".

[78] Non-exempt sale is defined in para 7(3) sch 15 FA 2004 following the form of the POA land charge: see 83.27.6 (Non-exempt sale).

83.29 Quantum: Intangible property

Para 8(3) sch 15 FA 2004 provides:

> Where this paragraph applies in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 9 is to be treated as income of the chargeable person chargeable to income tax.

83.29.1 *Chargeable amount*

Para 9(1) sch 15 FA 2004 provides:

> For any taxable period the chargeable amount in relation to the relevant property is N minus T

In short, **N** is **N**otional income; **T** is **T**ax payable. In more detail:

> N is the amount of the interest that would be payable for the taxable period[79] if interest were payable at the prescribed rate on an amount equal to the value of the relevant property at the valuation date, and
>
> T is the amount of any income tax or capital gains tax payable by the chargeable person in respect of the taxable period by virtue of any of the following provisions—
> (a) section 461 [ITTOIA],
> (b) section 624 [ITTOIA],
> (c) sections 720 to 730 [ITA],
> (d) section 77 [TCGA], and
> (e) section 86 [TCGA],
> so far as the tax is attributable to the relevant property.

Setting notional income against tax is penal and bizarre, but then, the POA regime is bizarre and intended to be penal.

There is no provision for carry forward or back if T exceeds N (but that will be rare).

If foreign income is unremitted and no tax is paid because of the s.624 remittance basis, it is considered that the amount of T is nil.

83.29.2 *Valuation date*

Para 9 sch 15 FA 2004 continues:

[79] Para 9(3) sch 15 FA 2004 provides:
"'the taxable period' means the year of assessment, or part of a year of assessment, during which para 8 applies to the chargeable person".

> (2) Regulations may, in relation to any valuation date, provide for a valuation of the relevant property by reference to an earlier valuation date to apply subject to any prescribed adjustments.
> (3) In this paragraph—
>
> ...
>
> "the valuation date", in relation to a year of assessment, means such date as may be prescribed.

The date is prescribed in the POA Regulations 2005.

83.30 Land/intangibles charge overlap

Para 18 sch 15 FA 2004 provides:

> *Persons chargeable under different provisions by reference to same property*
> (1) Where, in any year of assessment, a person ("the chargeable person") is (apart from this paragraph) chargeable to income tax both—
> (a) under para 3 (land) or para 6 (chattels) by reason of his occupation of any land or his possession or use of any chattel, and
> (b) under para 8 (intangible property) by reference to any intangible property which derives its value (whether in whole or part) from the land or the chattel,
>
> he is to be charged to income tax under whichever provision produces the higher chargeable amount in relation to him.
> (2) Where sub-para (1) applies, only the amount under the paragraph under which he is chargeable is to be taken into account in relation to the chargeable person for the purposes of para 13(2).

83.31 Interaction with benefits in kind

Para 19 sch 15 FA 2004 provides:

> Where, in any year of assessment, a person is (apart from this paragraph) chargeable, in respect of his occupation of any land or his possession or use of any chattel, to income tax both—
> (a) under this Schedule, and
> (b) under Part 3 of ITEPA,
>
> the provisions of that Part shall have priority and he shall not be chargeable to income tax under this Schedule, except to the extent that the amount chargeable under this Schedule exceeds the amount to be treated as earnings under that Part.

83.32 *De minimis* exemption

The Press Release announcing the POA regime promised "a substantial *de minimis* exemption" (*sic*). This turned out to be £5,000 per annum. As this book predicted, the "substantial" £5,000 figure has not been raised in line with inflation.

Para 13 sch 15 FA 2004 provides:

> (1) This paragraph applies where, in relation to any person who would (apart from this para) be chargeable under this Schedule for any year of assessment, the aggregate of the amounts specified in sub-para (2) in respect of that year does not exceed £5,000.
>
> (2) Those amounts are—
>
> (a) in relation to any land to which para 3 applies in respect of him, the appropriate rental value as determined under para 4(2),
>
> (b) in relation to any chattel to which para 6 applies in respect of him, the appropriate amount as determined under para 7(2), and
>
> (c) in relation to any intangible property to which para 8 applies in respect of him, the chargeable amount determined under para 9.
>
> (3) Where this para applies, the person is not chargeable for that year of assessment under any of the following provisions—
>
> (a) para 3(5) (land),
>
> (b) para 6(5) (chattels), or
>
> (c) para 8(3) (intangible property).

This is significant if annual value is (contrary to my expectation) construed by concession to mean rateable value. It could also be significant where husband and wife entered into IHT planning arrangements jointly, since each have their own separate allowance. The exception applies to the "appropriate rental value", so deductible expenses are not relevant. Another problem here is that the £5,000 limit must be satisfied every year.

The *de minimis* limit is not time apportioned so the full £5,000 can be set against a much shorter period of deemed income.

It is therefore necessary to ascertain "the appropriate rental value". That takes us to para 4(2) sch 15 FA 2004:

> The appropriate rental value is R×(DV/V) where
>
> R is the rental value of the relevant land *for the taxable period*

The "taxable period" is defined in para 4(6) sch 15 FA 2004:

> "the taxable period" means the year of assessment, or part of a year of

assessment, during which para 3 applies to the chargeable person.

Thus it seems clear that if para 3 sch 15 FA 2004 only applies for part of the year, the taxable period is reduced, so R is reduced, so the "appropriate rental value" is reduced and so (carrying the chain to the end) the *de minimis* exemption may apply. Note that the estate exemption in para 11(1) sch 15 FA 2004 disapplies para 3 sch 15 FA 2004: see para 11(1) sch 15 FA 2004.

83.33 POA election

One can elect out of the POA regime at an IHT cost. Para 21 sch 15 FA 2004 deals with the POA land and chattels charges. Para 22 sch 15 FA 2004 deals with intangible property. They are not quite the same but for reasons of space I only cover the former.

83.33.1 *Conditions for election*

Para 21(1) sch 15 FA 2004 provides

> This paragraph applies where—
> (a) a person ("the chargeable person") would (apart from this paragraph) be chargeable under para 3 (land) or para 6 (chattels) for any year of assessment ("the initial year") by reference to his enjoyment[80] of any property ("the relevant property"), and
> (b) he has not been chargeable under the paragraph in question in respect of any previous year of assessment by reference to his enjoyment
> [i] of the relevant property, or
> [ii] of any other property for which the relevant property has been substituted.

If an election is made by mistake (because the POA regime does not in fact apply) it has no effect.

83.33.2 *Effect of election*

Para 21(2) sch 15 FA 2004 provides:

[80] "Enjoyment" is defined in para 21(4) sch 15 FA 2004:
"For the purposes of this paragraph a person 'enjoys' property if—
(a) in the case of an interest in land, he occupies the land, and
(b) in the case of an interest in a chattel, he is in possession of, or has the use of, the chattel."

> The chargeable person may elect in accordance with para 23 that—
> (a) the preceding provisions of this Schedule shall not apply to him during the initial year and subsequent years of assessment by reference to his enjoyment of the relevant property or of any property which may be substituted for the relevant property ...

This disapplies schedule 15. The price is in sub-para (b):

> ..., but
> (b) so long as the chargeable person continues to enjoy the relevant property or any property which is substituted for the relevant property—
> (i) the chargeable proportion of the property is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property,
> (ii) section 102(3) and (4) of that Act shall apply, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property, and
> (iii) if the chargeable person is beneficially entitled to an interest in possession in the property, sections 53(3) and (4) and 54 of IHTA 1984 (which deal with cases of property reverting to the settlor etc) shall not apply in relation to the chargeable proportion of the property.

Suppose a former foreign domiciliary makes an election in relation to a discretionary trust of which they are a beneficiary and the property is excluded property. How does s.102(3) apply? See 78.15 (Death: settled excluded property).

83.33.3 *Chargeable proportion*

This takes us to the definition of "chargeable proportion" in para 21(3) sch 15 FA 2004:

> In this paragraph, "the chargeable proportion", in relation to any property, means DV ÷ V
> where DV and V are to be read in accordance with para 4(2) or 7(2), as the case requires, but as if—
> (a) any reference in para 4(2) or 7(2) to the valuation date were a reference—
> (i) in the case of property falling within subsection (3) of section 102 of the FA 1986, to the date of the death of the

> chargeable person, and
> (ii) in the case of property falling within subsection (4) of that section, to the date on which the property ceases to be treated as property subject to a reservation, and
> (iii) in the case of property in which the chargeable person is beneficially entitled to an interest in possession, to the date of his death or if his interest comes to an end on an earlier date) that earlier date, and
>
> (b) the transactions to be taken into account in calculating DV included transactions after the time when the election takes effect as well as transactions before that time.

I do not see the purpose or effect of para 21(3)(b) sch 15 FA 2004. How does this work in the case of an *Ingram* scheme?

83.33.4 *Time limit for election*

Para 23(3) sch 15 FA 2004 provides:

> The election must be made on or before—
> (a) the relevant filing date, or
> (b) such later date as an officer of Revenue and Customs may, in a particular case, allow..

The key expression is "relevant filing date" which is defined in para 23(1) sch 15 FA 2004:

> "the relevant filing date" means 31 January in the year of assessment that immediately follows the initial year within the meaning of para 21 or (as the case requires) para 22.

Time runs from when the schedule begins to apply. Normally that will be 6 April 2005,[81] because in the future no-one will deliberately enter into arrangements caught by the schedule. But where a person is non-resident or domiciled, the schedule may not begin to apply until a later time when they become UK resident or domiciled, and in such a case time for the election starts at that later time; a sensible rule.

83.33.5 *Revocation of election*

Para 23(5) sch 15 FA 2004 provides:

[81] Or 6 April 2007 for those caught by the reverter to settlor restriction in the FA 2006; see 83.20 (Reverter to settlor restriction).

> The election may be withdrawn or amended, during the life of the chargeable person, at any time on or before the relevant filing date.

This will only be useful in very exceptional circumstances.

83.33.6 *Retrospective effect of election*

Para 23(6) sch 15 FA 2004 provides:

> Subject to sub-para (5), the election takes effect for the purposes of inheritance tax from the beginning of the initial year within the meaning of para 21 or (as the case requires) para 22 or, if later, the date on which the chargeable person would (but for the election) have first become chargeable under this Schedule by reference to the property to which the election relates.

83.34 Election: *Eversden* scheme

If a client has lost their appetite for IHT planning, it would be better to unwind an *Eversden* scheme than to elect. Unwinding an *Eversden* scheme is straightforward.

By contrast, unwinding home loan schemes needs considerable care. Watch out for the proper purpose rule.

83.35 Election: Home loan scheme

Suppose:

(1) The client ("H") has entered into a home loan plan: H has sold H's home to a trust (before 22 March 2006) ("the property settlement") in return for a debt, and given away the debt.

(2) Under the terms of the property settlement, income is paid to H for life, and then for H's widow ("W") after H's death.

(3) Suppose first of all that the home has not increased in value, so that the net value of the trust fund of the property settlement is nil.

(4) A POA election has been made.

(5) H is survived by W.

83.35.1 *Effect of election*

The chargeable proportion (here = the whole) of the property:

> is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation.

So it is treated as property to which H is beneficially entitled.

However, H is already entitled to the property as H has an interest in possession in it. The property is subject to the debt. Is this taken into account in valuing the estate of H on H's death? If so the debt scheme still works! In *IRC v Ayrshire Employers Mutual Insurance Association* 27 TC 331 the House of Lords notoriously said that the legislation had "misfired". But the modern approach of the courts is to make sure that legislation does not "misfire" if they can. Indeed this approach is not so modern, and in 1965 Lord Diplock criticised the *Ayrshire* decision:

> If the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed.

83.35.2 *Spouse exemption*

The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

> ... is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner; or
> [b] so far as the value transferred is not so attributable, to the extent that the estate is increased.

See s.18(1) IHTA 1984.

H does not qualify for exemption within [b]. We have to argue that the value transferred is "attributable to property" (the home) "which becomes comprised in the estate of the spouse or civil partner".

Does it? Only subject to the debt. The Revenue may reply that "property" in s.49(1) IHTA means net property and this is supported by *St Barbe Green v IRC*:

> Section 49(1) IHTA 1984 [deems] the deceased to be beneficially entitled to "the property" in which his life interest subsists. It does not say "net property" (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section.[82]

On the facts of the above example, no net property becomes comprised in the estate of the spouse. A purposive construction supports that view. It does not make sense for the spouse exemption to apply there.

The spouse exemption would apply to the extent that the value of the

[82] [2005] STC 288.

property exceeds the debt.

If the debt were released, the problem disappears and it is clear that the spouse exemption would apply.

83.36 Unwinding existing structures

What is to be done when an existing structure falls within the POA land charge?

Do nothing and pay the POA tax? A suitable option where the client has a short life expectancy. Mitigate the charge by arranging that maintenance costs are deductible: see 83.27.1 (Chargeable amount and deductible expenses).

Elect out of the POA regime? Generally unattractive: you have the IHT charge on death usually without CGT uplift or spouse exemption on death.[83] Consider it if IHT is a long term problem (middle-aged clients). Perhaps a future government will scrap these rules in a decade or so's time.

It may be sensible to elect and retain the structure where:

(1) IHT is not a problem (eg insurance is inexpensive);
(2) Shadow directorship is not a problem (expect an investigation to follow the election); and
(3) A sale of the company is envisaged in the short or medium term. See 83.6.3 (Secondhand company).

In most cases shadow directorship may be a problem; it will usually be better to liquidate the company if IHT, CGT and SDLT issues permit.

The best solution is usually unwinding, or reorganising so as to fall within the estate exemption.

83.37 Is existing scheme validly created

In *Wolff v Wolff* [2004] STC 1633, a husband and wife entered into a reversionary lease of the property in favour of their daughters for 125 years starting from 2017. Subsequently, they became aware that from 2017 they had no right to stay in the property and were at the mercy of the owners of the lease! The lease was set aside for mistake.

83.38 Human rights

The Parliamentary Joint Committee on Human Rights considered the

[83] See 78.19 (GWR on death charge: Spouse exemption).

POA provisions to be HR compliant[84] – except (intriguingly) in relation to the spouse exemptions (which deny relief to cohabitees) but no-one took any notice of that. The prospect of a successful human rights challenge now seems slender.

83.39 Critique

83.39.1 *Nature of POA charge*

What is the nature of the POA charge? Although the charge is imposed under the Income Tax Acts, it is not an income tax (in the sense that it is not a tax on income or in any way relating to income). To put it another way, the provisions impose an income tax charge on income which does not exist. Once it is accepted that income tax is not in general charged on an individual who occupies their own property[85] then it is anomalous to charge income tax on the benefit of occupation through a trust or company. And since the POA intangible property charge applies even if the property also produces income subject to income tax, it is obviously not income which Schedule 15 is seeking to tax.

The POA charge might be seen as an *ersatz* annual IHT charge on property which has slipped through the IHT net.[86] However, the quantum of the charge is penal (compared to IHT rates).

The true nature of the POA charge is therefore that it is a penalty for carrying out (and not unwinding) certain IHT planning. Hardly anyone is seriously expected to pay it. The object is to force taxpayers (by electing or unwinding) to bring themselves back into the IHT net.[87] The POA charge takes the clothes or label of income tax, but – looking beyond the label to the content – it is not income tax; indeed, it is not a "tax" at all, as that word is properly understood. It is well established that a fee, levy or toll may in fact be a tax despite its name.[88] Likewise provisions carrying the label of a tax do not necessarily constitute a tax.

This point may be relevant to construction, because the principle of construction that penalty provisions are to be strictly construed may have more force than the principle that clear words are required to impose a

[84] *http://www.publications.parliament.uk/pa/jt200304/jtselect/jtrights/93/9305.htm*

[85] See Kay and King, *The British Tax System* (5th ed., 1990), p.80.

[86] It is significant that the pre-owned asset charge is dealt with in IHT textbooks and in the HMRC IHT Manual.

[87] And to stop similar arrangements being made in the future.

[88] *Re a By-law of the Auckland City Council* [1924] NZLR 907 at p.911.

tax.

83.39.2 *Retrospectivity*

One controversial aspect of the POA regime is that it is retrospective in effect. (One should avoid semantic – indeed Orwellian – debate about the meaning of "retrospective" and look at the effect.) Retrospective legislation is pernicious when it entails liability for conduct which would have been different if the agent had known of the terms of the retrospective law. The POA rules are unashamedly targeted at taxpayers who carried out *Eversden*, *Ingram* and home loan schemes before these were stopped by anti-avoidance legislation.

Those that carried out *Ingram* schemes were particularly unfairly treated. They entered into a package with an IHT advantage (generally) at a significant CGT cost. Parliament removed the benefit and left them with the cost. In 2004 I said:

> This is unprecedented in the UK tax system, which has traditionally allowed taxpayers to plan their affairs more securely on the basis of the law of the day. One may approve of this as an attack on tax avoidance, or disapprove as contrary to the rule of law. Views may divide on party political lines.

Since 2004, however, retrospective tax legislation has become a matter of routine.[89]

83.39.3 *Assessment*

No doubt the POA rules bring some revenue for the Government, though how much is a matter of speculation. Set against the tax raised (whatever it is) and the blow against tax avoidance (however one values or regards that) there are some entries to make on the debit side: the POA rules impose significant costs of compliance and tax planning (for they require taxpayers to incur professional fees in order to rearrange their affairs). They impose the unquantifiable burden of complexity and uncertainty which (combined with unfairness) will lead to an equally unquantifiable loss of taxpayer goodwill. One cannot put a value on that goodwill, but it is essential to successful tax administration.

Back in 2004, I think everyone who understood and cared about the UK tax system was aghast at the conception, enactment process and

[89] See 2.9 (Retrospective tax legislation).

administration of the POA provisions.[90] Looking back with hindsight it can be seen that the provisions were not an aberration. They are the natural result of a fiscal policy with one and only one priority, the attack on tax avoidance, set against which any other *desiderata* of a tax system count for very little and views of practitioners count for nothing at all.

The House of Commons Treasury Committee cite Pre-owned Assets as a paradigm of bad anti-avoidance legislation:

> 53. The charge on non-domiciled individuals is only one example of a tax whose imposition may have had unforeseen consequences. For example, the Finance Act 2004 introduced rules intended to clamp down on the avoidance of inheritance tax. Someone who gave away an asset but who later benefits from that asset may now be subject to an income tax charge. The intention was to close a loophole relating to inheritance tax; imposing a potential charge which can affect a wider population leads to unwelcome complexity. The likelihood is that many people do not realise they are caught, still less that they should be paying income tax in consequence. **Tax policy must be clearly targeted, so that taxpayers can have certainty about which rules apply to them.**[91]

OTS discussed the topic in two sentences, and called for a review,[92] but no-one took any notice of that.

The HMRC change of view that home loan schemes are caught by the GWR rules is icing on the cake of poor administration.

It is suggested that:

(1) The POA intangible property charge should be repealed except for transactions carried out before the anti-Eversden legislation enacted in 2003. That would be more or less a repeal.

(2) The POA land and intangible property should be repealed and replaced by an IHT charge on the death of the person who carried out

[90] "The anti-avoidance Pre-Owned Assets regime ... is: retrospective in its effect, disproportionate to the mischief at which it is purportedly aimed, contrary to taxpayers' legitimate expectations, and arbitrary ... ."
CIOT and ICAEW Tax Faculty (October 2004).

https://www.gov.uk/government/publications/ots-inheritance-tax-review-simplifying-the-design-of-the-tax

Ingram or Home Loan arrangements (with credit for POA charges if paid). If this was restricted to death after the new rules comes in, it should not be regarded as offensively retrospective.

That would be a valuable simplification.

84.18 Reservation of benefit
84.18.1 GWR: IHT-exempt pension scheme
84.18.2 GWR: Non-exempt pension scheme

84.1 Scope of chapter

This chapter considers IHT aspects of pension schemes. I consider the matter in the round but do not attempt to be comprehensive.

84.2 Pension scheme history

Hosking comments on the early history of pensions:[1]

[1] Hosking, *Pension Schemes and Retirement Benefits* (1956) which is a second edition of Hosking & Lane, *Superannuation Schemes* (1948).

> Although pension schemes for employees existed in this country in the latter part of the 19th century, it was the raising of the level of taxation during World War 1 which brought home to many employers the desirability of taking out of their business assets money representing the accruing liability, moral or legal, for pensions for their employees and setting it aside as a separate entity in the form of a trust or under a contract with a Life Office. ... The FA 1956 has opened up a new era in pension provision. Until it was passed it was only those in pensionable employment for whom pension provision could be made economically. Now controlling directors, those who are self-employed and also employees in non-pensionable employment can save for their old age.

And he continues with a comment with contemporary resonance:

> While in essence the principles involved are simple, the provisions of the Act are complicated and several chapters are devoted to their elucidation...

There was another major change in 2006, when a single set of rules was introduced to replace the previous eight different regimes.

84.3 Types of pension scheme

There are countless types of pension scheme. The following is not a full list:

Type of scheme: current law	**Abbreviation**	**Definition**	**See para**
IHT-exempt schemes			
Registered pension scheme	RPS	Pt 4 FA 2004	84.4
Overseas pension scheme		s.150(7) FA 2004	
Qualifying non-UK pension scheme	QNUP	s.171A IHTA	84.5
Section 615(3) scheme	-	s.615(3) ICTA	84.7
Employer-financed retirement benefits scheme	EFURBS	s.393A ITEPA	84.8
Type of scheme: pre-2006 law	**Abbreviation**	**Definition**	**See para**
Sponsored superannuation scheme	SSS	s.624 ICTA	84.9
Retirement benefits scheme		s.611 ICTA	
Non-approved retirement benefits scheme		s.387 ITEPA	
Approved scheme		s.612(1) ICTA	
Relevant statutory scheme		s.611A ICTA	

FURBS (funded unapproved retirement benefit scheme) is not a statutory term (unlike EFURBS with the initial *E*). FURBS is used to describe an unapproved pension scheme funded with employer contributions, typically, I think, a SSS funded pre-2006.

Statute frequently refers to 3 types of scheme:

(1) a registered pension scheme
(2) a qualifying non-UK pension scheme
(3) a s.615(3) scheme

I refer to these together as **"IHT-exempt schemes"**. (This term, as I use it, does not include other types of scheme which can qualify for some IHT relief, such as an SSS).

Funded schemes may be **"trust-based"**, ie the funds are held in trust; or **"contract-based"** ie the scheme takes the form of a contract with a Life Office.

84.4 Registered pension scheme

84.4.1 *Pension scheme*

Section 150 FA 2004 provides:

> (1) In this Part [Part 4 FA 2004] "pension scheme" means a scheme or other arrangements, comprised in one or more instruments or agreements, having or capable of having effect so as to provide benefits to or in respect of persons—
> (a) on retirement,
> (b) on death,
> (c) on having reached a particular age,
> (d) on the onset of serious ill-health or incapacity, or
> (e) in similar circumstances.

84.4.2 *Registered pension scheme*

Section 272 IHTA provides the definition by reference:

> registered pension scheme" has the same meaning as in Part 4 of the Finance Act 2004;

Section 150(2) FA 2004 provides:

> A pension scheme is a registered pension scheme for the purposes of this Part at any time if it is at that time registered under Chapter 2.

Schemes that were approved before then were automatically registered on that date.

84.5 Qualifying non-UK pension scheme

Section 271A IHTA provides the definition for QNUP:

> (1) For the purposes of this Act "qualifying non-UK pension scheme" means a pension scheme (other than a registered pension scheme) which—
> (a) is established in a country or territory outside the UK, and
> (b) satisfies any requirements prescribed for the purposes of this section by regulations made by the Commissioners for Her Majesty's Revenue and Customs.
>
> (2) "Pension scheme" has the same meaning as in Part 4 of the Finance Act 2004 (see section 150 of that Act).

The regulations are Inheritance Tax (Qualifying Non-UK Pension Schemes) Regulations 2010 ("QNUPR"). Reg 3 QNUPR provides:

> These Regulations apply to pension schemes which are established in a country or territory outside the UK.

84.6 QNUP: Schemes recognised abroad

Regulation 4 QNUPR provides:

> (1) For the purposes of section 271A of the Inheritance Tax Act 1984 (qualifying non-UK pension scheme) a pension scheme must-
> (a) be recognised for tax purposes under the tax legislation of the country or territory in which it is established (see regulation 5) and satisfy regulation 6 ...

Reg 5 QNUPR provides:

> (1) A scheme is recognised for tax purposes under the tax legislation of a country or territory in which it is established if it meets both Primary Condition 1 and Primary Condition 2 and either Condition A or Condition B.

84.6.1 *Primary Conditions*

Reg 5(1) QNUPR continues:

> Primary Condition 1
> The scheme is open to persons resident in the country or territory in which it is established.
> Primary Condition 2
> The scheme is established in a country or territory where there is a system of taxation of personal income under which tax relief is available in respect of pensions and-
> (a) tax relief is not available to the member on contributions made to the scheme by the member or, if the member is an employee,

> by their employer, in respect of earnings to which benefits under the scheme relate;
>
> (b) the scheme is liable to taxation on its income and gains and is of a kind specified in the Schedule to these Regulations; or
>
> (c) all or most of the benefits paid by the scheme to members who are not in serious ill-health are subject to taxation.
>
> For the purposes of this condition "tax relief" includes the grant of an exemption from tax.

84.6.2 *Conditions A & B*

Reg 5 QNUPR provides:

> Condition A
>
> (2) The scheme is approved or recognised by, or registered with, the relevant tax authorities as a pension scheme in the country or territory in which it is established.
>
> Condition B
>
> (3) If no system applies for the approval or recognition by, or registration with, relevant tax authorities of pension schemes in the country or territory in which it is established-
>
> (a) the scheme must be resident there;
>
> (b) the scheme rules must provide that at least 70% of a member's relevant scheme funds[2] will be designated by the scheme manager for the purpose of providing the member with an income for life, or, in the case of a member who has died, so provided immediately before the member's death; and
>
> (c) the pension benefits payable to the member under the scheme (and any lump sum associated with those benefits) must be payable no earlier than they would be if pension rule 1 applied.[3]

84.6.3 *Recognition*

Reg 6 QNUPR provides:

> (1) This regulation is satisfied if paragraph (2), (3) or (4) applies.

[2] Defined in reg 2: "relevant scheme funds" means any sums and assets held under a pension scheme-

(a) to which these Regulations apply, and

(b) which would be subject to inheritance tax if the scheme did not meet the requirements for a qualifying non-UK pension scheme.

[3] Defined reg 2: "pension rule 1" means pension rule 1 in section 165 of the Finance Act 2004.

> (2) This paragraph applies if the scheme is an occupational pension scheme and there is a body in the country or territory in which it is established-
>
> (a) which regulates occupational pension schemes; and
>
> (b) which regulates the scheme in question.
>
> (3) This paragraph applies if the scheme is not an occupational scheme and there is a body in the country or territory in which it is established-
>
> (a) which regulates pension schemes other than occupational pension schemes; and
>
> (b) which regulates the scheme in question.
>
> (4) This paragraph applies if neither paragraph (2) nor (3) applies by reason only that no such regulatory body exists in the country or territory and-
>
> (a) the scheme is established in a member State, Norway, Iceland or Liechtenstein; or
>
> (b) the scheme is one where-
>
> (i) the scheme rules provide that at least 70% of a member's relevant scheme funds will be designated by the scheme manager for the purpose of providing the member with an income for life, or, in the case of a member who has died, so provided immediately before the member's death, and
>
> (ii) the pension benefits payable to the member under the scheme (and any lump sum associated with those benefits) are payable no earlier than they would be if pension rule 1 applied.
>
> (5) In this regulation "occupational pension scheme" has the meaning given by section 150(5) of the Finance Act 2004.

84.6.4 QNUP: International organisations

Regulation 4 QNUPR provides:

> (1) For the purposes of section 271A of the Inheritance Tax Act 1984 (qualifying non-UK pension scheme) a pension scheme must ...
>
> (b) be established by an international organisation for the purpose of providing benefits for, or in respect of, past service as an employee of the organisation and satisfy regulation 7.
>
> (2) In this regulation "international organisation" means an organisation to which section 1 of the International Organisations Act 1968 applies by virtue of an Order in Council under subsection (1) of that section.

Reg 7 QNUPR provides:

> This regulation is satisfied if-
> (a) the scheme rules provide that at least 70% of a member's relevant scheme funds will be designated by the scheme manager for the purpose of providing the member with an income for life, or, in the case of a member who has died, so provided immediately before the member's death, and
> (b) the pension benefits payable to the member under the scheme (and any lump sum associated with those benefits) are payable no earlier than they would be if pension rule 1 applied.

84.7 Section 615(3) scheme

Section 272 IHTA provides the definition by reference:

> section 615(3) scheme" means a superannuation fund to which section 615(3) of the Taxes Act 1988 applies;

So we turn to s.615 ICTA, which still survives in the 1988 Act. Section 615(3) is an exemption from withholding tax on pension payments. Section 615(6) ICTA provides:

> (6) Subsection (3) above applies to any superannuation fund which—
> (a) is bona fide established under irrevocable trusts in connection with some trade or undertaking carried on wholly or partly outside the UK;
> (b) has for its sole purpose (subject to any enactment or Northern Ireland legislation requiring or allowing provision for the value of any rights to be transferred between schemes or between members of the same scheme) the provision of superannuation benefits in respect of persons' employment in the trade or undertaking wholly outside the UK;
> (c) is recognised by the employer and employed persons in the trade or undertaking; and
> (d) meets the benefit accrual condition (see subsection (6A)).

In short, s.613(3) schemes are pension schemes for undertakings outside the UK. This overlaps with QNUPs. I leave the reader to follow the trail from there unaccompanied.

84.8 EFURBS

Section 393A ITEPA provides:

> (1) In this Chapter "employer-financed retirement benefits scheme"

means a scheme[4] for the provision of benefits consisting of or including relevant benefits to or in respect of employees or former employees of an employer.

(2) But neither—

(a) a registered pension scheme, nor

(b) a section 615(3) scheme,

is an employer-financed retirement benefits scheme.

84.9 Sponsored superannuation scheme

This type of scheme ("SSS") was introduced in 1956. The definition was most recently found in s.624 ICTA 1988. This was repealed by FA 2004 with effect from 6 April 2006, but the term is relevant for 2006-SSS reliefs.[5]

Section 624 ICTA provided:

> *(1) ... "a sponsored superannuation scheme" means a scheme or arrangement—*
>
> *(a) relating to service in particular offices or employments, and*
>
> *(b) having for its objects or one of its objects to make provision in respect of persons serving in those offices or employments*
>
> *[i] against future retirement or partial retirement,*
>
> *[ii] against future termination of service through death or disability, or*
>
> *[iii] against similar matters,*
>
> *[c] being a scheme or arrangement under which any part of the cost of the provision so made is or has been borne[6] otherwise than by those persons by reason of their service*
>
> *[d] (whether it is the cost or part of the cost*
>
> *[i] of the benefits provided, or*

[4] Section 393A(4) ITEPA provides an (unnecessary) definition:
"Scheme" includes a deed, agreement, series of agreements, or other arrangements.
See App 2.2.2 (Scheme or arrangement).

[5] See 84.17 (2006-SSS reliefs).

[6] Bearing the cost was defined in s.624(2) ICTA:
For the purposes of subsection (1) above a person shall be treated as bearing by reason of his service the cost of any payment made or agreed to be made in respect of his service, if
[a] that payment or the agreement to make it is treated under the Income Tax Acts as increasing his income, or
[b] would be so treated if he were chargeable to tax under section 15 of ITEPA 2003 in respect of his general earnings from that service.

> *[ii] of paying premiums or other sums in order to provide those benefits, or*
> *[iii] of administering or instituting the scheme or arrangement).*

The IHT Manual provides:

> **IHTM17039 Sponsored Superannuation Schemes**
> The provision of the benefits does not need to be the main object of the scheme.
> Some employee benefit trusts (IHTM42900) set up before 6 April 2006 will also be sponsored superannuation schemes, even though the only superannuation benefit they provide is a death or disability in service payment.

84.10 IHT-exempt pension schemes: reliefs

As there are many charges to IHT, there are a number of distinct reliefs, which are scattered across the IHT legislation.

84.10.1 *Contribution to exempt scheme*

A contribution to a scheme is not a transfer of value for various reasons:
(1) A contribution by a member would not normally reduce their estate
(2) A contribution by an employer would qualify for relief under s.12(1) IHTA.

But if there are any gaps, s.12(2) IHTA fills them:

> Without prejudice to subsection (1) above, a disposition made by any person is not a transfer of value if it is a contribution under
> [a] a registered pension scheme,
> [b] a qualifying non-UK pension scheme or
> [c] a s.615(3) scheme in respect of an employee of the person making the disposition.

84.10.2 *Relief for 10-year/exit charges*

Section 58 IHTA provides:

> (1) In this Chapter [Chapter 3 Part 3 IHTA] "relevant property" means settled property in which no qualifying interest in possession subsists, other than ...
> (d) property which is held for the purposes of
> [i] a registered pension scheme,
> [ii] a qualifying non-UK pension scheme or

> [iii] a (3) scheme;[7]

The effect is that IHT-exempt schemes are outside the scope of IHT 10-year and exit charges.[8]

84.10.3 *Limited relief for pension rights*

Section 151(2) IHTA provides a relief for pension or annuity rights:

> [A] An interest in or under
> [i] a registered pension scheme,
> [ii] a qualifying non-UK pension scheme or
> [iii] a section 615(3) scheme which comes to an end on the death of the person entitled to it ...

That is, in my terminology, an interest in/under an IHT-exempt scheme...

> ... shall be left out of account in determining for the purposes of this Act the value of his estate immediately before his death,
> [B] if the interest—
> (a) is, or is a right to, a pension or annuity, and
> (b) is not an interest resulting (whether by virtue of the instrument establishing the scheme or otherwise) from the application of any benefit provided under the scheme otherwise than by way of a pension or annuity.

That is a limited exception, so if a member has other rights under a scheme, these are in principle assets of their estate and subject to IHT on a lifetime gift or on death.

The ABI guidance note provides:

> 5.8 A claim might arise under section 3(1) of the Act where the death benefit is assigned whilst the member is in ill health. Although the death benefit and the pension rights are mutually exclusive, at the date of assignment both remain potentially available. The section 3(1) claim is on the loss to the estate, i.e:
> - the open market value of the whole plan, i.e. the death benefits, less
> - the value of the pension rights retained at that date,
> i.e. the maximum commutable lump sum plus the value of the 10 year guaranteed annuity payable monthly in advance which the remainder of

[7] Defined in s.272 IHTA: "section 615(3) scheme" means a superannuation fund to which section 615(3)of the Taxes Act 1988 applies".

[8] See 74.8 (Relevant property).

> the fund would purchase.
> 5.9 Where any existing bolt-on term assurance exists (e.g. under IHTA84/S226A) and is assigned in similar circumstances a claim may also arise. The claim would be based on the open market value of the term assurance, which would be dependant inter alia on the individuals state of health.

84.10.4 *Relief for omission to exercise right*

Section 12A IHTA provides a relief for IHT-exempt schemes:

> (1) Where a person has a drawdown fund, section 3(3) above[9] does not apply in relation to any omission that results in the fund not being used up in the person's lifetime.
> (2) For the purposes of subsection (1) above, a person has a drawdown fund if the person has—
> (a) a member's drawdown pension fund,
> (b) a member's flexi-access drawdown fund,
> (c) a dependant's drawdown pension fund,
> (d) a dependant's flexi-access drawdown fund,
> (e) a nominee's flexi-access drawdown fund, or
> (f) a successor's flexi-access drawdown fund, and
> in respect of a money purchase arrangement under a registered pension scheme.

These terms are defined by reference in s.12A(4) IHTA:

> (4) In this section ...
> "money purchase arrangement" has the same meaning as in Part 4 of the Finance Act 2004 (see section 152 of that Act);
> "member's drawdown pension fund", "member's flexi-access drawdown fund", "dependant's drawdown pension fund", "dependant's flexi-access drawdown fund", "nominee's flexi-access drawdown fund" and "successor's flexi-access drawdown fund" have the meaning given, respectively, by paragraphs 8, 8A, 22, 22A, 27E and 27K of Schedule 28 to that Act.

Section 12A(3) IHTA extends this relief to corresponding foreign schemes:

> (3) For the purposes of subsection (1) above, a person also has a drawdown fund if sums or assets held for the purposes of a money

[9] See 74.5 (Omission: Deemed disposition).

> purchase arrangement under a corresponding scheme[10] would, if that scheme were a registered pension scheme, be the person's—
> (a) member's drawdown pension fund,
> (b) member's flexi-access drawdown fund,
> (c) dependant's drawdown pension fund,
> (d) dependant's flexi-access drawdown fund,
> (e) nominee's flexi-access drawdown fund, or
> (f) successor's flexi-access drawdown fund,
> in respect of the arrangement.

Section 12 (2ZA) IHTA provides:

> Where a person who is a member of
> [1] a registered pension scheme,
> [2] a qualifying non-UK pension scheme or
> [3] a section 615(3) scheme ...

That is, in my terminology, a member of an IHT-exempt scheme...

> ... omits to exercise pension rights under the pension scheme, section 3(3) above does not apply in relation to the omission.

Section 12 IHTA provides:

> (2F) For the purposes of this section—
> (a) a person omits to exercise pension rights under a pension scheme if he does not become entitled to the whole or any part of a pension or lump sum (or both) under the pension scheme at a time when he was eligible to become so entitled (whether or not he does become entitled to any other benefits under the pension scheme)
> (2G) In this section—
> “entitled”, in relation to a pension or lump sum, shall be construed in accordance with section 165(3) or 167(1A), or section 166(2), of the Finance Act 2004;
> “pension” has the same meaning as in Part 4 of that Act (see section 165(2) of that Act);

84.10.5 *Relief for IIP trust charges*

Section 151(3) IHTA provides:

[10] Defined s.12A(4): In this section ... "corresponding scheme" means—
(a) a qualifying non-UK pension scheme (see section 271A below), or
(b) a section 615(3) scheme that is not a registered pension scheme”.

> (3) Sections 49 to 53 above shall not apply in relation to an interest satisfying the conditions of paragraphs (a) and (b) of subsection (2) above.

84.11 Non-exempt schemes

I turn to consider schemes which are not IHT-exempt schemes.

84.11.1 *Contribution to scheme*

A contribution to a scheme is not normally a transfer of value for various reasons:

(1) A contribution by a member would not normally reduce their estate

(2) A contribution by an employer would qualify for relief under s.12(1) IHTA.

There might be cases where a contribution is chargeable. The IHT Manual provides:

> **IHTM17043 IHT charges: contributions made whilst in ill-health**
> Contributions made into a persons own pension scheme may be transfers of value if they are made at a time when the person is unlikely to survive to take some or all of the retirement benefits and the death benefits will be paid outside the estate. Any transfer of value depends on the health of the scheme member at the time the contributions were made. In general, where contributions are made more than 2 years before a death you can assume that the member was in normal health, unless there is evidence that suggests they were not. If the member is in normal health there is no transfer of value.
> Where contributions have been made to a pension scheme within 2 years of death the relevant section of form IHT409 should have been completed. If the contributions are substantial and unusual (where they are not made under regular arrangements that have been in existence for more than 2 years) you should establish the full facts and refer to Technical for advice on any transfer of value.

This only applies to non-exempt schemes, as IHT-exempt schemes have a statutory relief.

84.11.2 *10-year and exit charges*

Non-exempt trust-based schemes are within the scope of 10-year and exit charges, unless within

(1) 2006-SSS relief; see 84.17;

or

(2) s.86 IHTA (not discussed here)

84.11.3 *Omission to exercise right*

Tax Bulletin 2 (Feb 1992) provides:

> **Retirement Benefits Under Private Pension Contracts - s.3(3) IHTA**
> BACKGROUND
> Many pension scheme benefits are written under trust on terms which provide that
> [1] the retirement benefit (that is, the pension) continues to be for the policyholder and
> [2] the death benefit is assigned, normally to members of the family.
> The two benefits are mutually exclusive: once the retirement benefit is taken, the death benefit lapses.
> A common feature of these schemes is that from a specified age – from fifty upwards depending on the type of scheme – the policyholder can elect to take the retirement benefit. There are cases where policyholders do not elect to take the benefit at the specified age and have still not done so when they die (so that the death benefit becomes payable). In such cases the Capital Taxes Offices (CTO) take the view that, in certain circumstances, the failure to exercise the right to take the retirement benefit before death can give rise to a lifetime charge to inheritance tax under Section 3(3).
> The Association of British Insurers asked the CTO to clarify the circumstances in which a Section 3(3) claim might arise with these pension arrangements. The CTO set out their view in correspondence with the Association. It is summarised here.
> **The Scope for a s.3(3) Claim**
> In practice, the overwhelming majority of pension arrangements are not affected. The CTO expect to see very few cases where a claim would even be considered. This is because
> [1] the vast majority of policyholders exercise their right to take retirement benefits during their lifetime or survive to the age beyond which they cannot defer taking the retirement benefit. All these cases fall outside the scope of a potential claim
> [2] the chargeable estate of many policyholders will be below the inheritance tax threshold. If no tax is actually payable CTO would naturally not pursue a claim
> [3] any claims that do arise are likely to be limited to retirement annuity contracts or personal pension schemes. Only exceptionally would claims involve occupational pension schemes
> [4] there is no question of a claim being raised in cases of genuine

> pension arrangements, that is, where it is clear that the policyholder's primary intention is to provide for his or her own retirement benefit.
>
> CTO would consider raising a claim in such cases as remain only where there was evidence that the policyholder's intention in failing to take up retirement benefits was to increase the estate of someone else (the beneficiaries of the death benefit) rather than to benefit himself or herself.
>
> To this end, CTO will look closely at certain pension arrangements where the policyholder became aware that he or she was suffering from a terminal illness, or was in such poor health that his or her life was uninsurable, and at or after that time the policyholder
>
> [1] took out a new policy and assigned the death benefit on trust, or
>
> [2] assigned on trust the death benefit of an existing policy, or
>
> [3] paid further contributions to a single premium policy or enhanced contributions to a regular premium policy where the death benefit had been previously assigned on trust, or
>
> [4] deferred the date for taking retirement benefits.
>
> In these circumstances it would be difficult to argue that the actions of the policyholder were intended to make provision for his or her own retirement given the prospect of an early death. Even then CTO would not pursue the claim where the death benefit was paid to the policyholder's spouse and/or dependents (that is, any individuals financially dependent on the policyholder). In addition, a claim would not normally be pursued where the policyholder survived for two years or more after making any of these arrangements but the CTO reserve the right to examine each case individually.
>
> For the avoidance of doubt, CTO would adopt a similar approach in cases involving
>
> – personal pension schemes set up under deed poll under the Superannuation Funds Office or
>
> – Integrated Model rules, or buy-out policies under trust, approved under ICTA 1988, Section 591(2)(g) (commonly known as 'Section 32 policies' after the original legislation).

The s.3(3) charge on omissions has ceased to apply to IHT-exempt schemes[11] but the statement remains relevant for other schemes.

The IHTM provides:

> **IHTM17102 income drawdown**
>
> Income drawdown is the situation where the deceased has reached

[11] See 84.10.4 (Relief for omission to exercise right).

pension age but has chosen not to buy an annuity that will provide their pension. Instead they decide to draw a certain level of income from their pension fund with a view to buying an annuity at a later date.

The option to defer purchase of an annuity was introduced by FA95 at a time when annuity rates were relatively poor. This allowed the member to defer taking their whole retirement benefits. They would take a part lump sum and a certain level of income drawdown (between 35% - 100% of what the fund produced) and then at some later date (but no later than age 75) when annuity rates had hopefully improved the member could go back and purchase an annuity with the balance of the fund.

For Inheritance Tax (IHT) purposes the member is effectively taking less than their full entitlement when they retire so there is a possibility of an IHT lifetime transfer (IHTM14000) for a failure to exercise a right under IHTA84/S3 (3)...

IHTM17103 ABI guidance note

In June 1999 the Association of British insurers (ABI) (after discussion with HMRC Inheritance Tax) issued a guidance note setting out the basis on which a claim to Inheritance Tax might arise. The text of the guidance note is as follows:

1. **Introduction**

1.1 This paper sets out the conclusions reached in discussions and correspondence between ABI and the Capital Taxes Office on the Inheritance Tax position regarding the deferral of annuity purchase/income withdrawal facility under personal pensions.

1.2 While there will be cases where there is an Inheritance Tax liability, these are likely to be relatively few...

2. **Background**

[The statement summarises the s.5(2) and 3(3) IHTA charges and continues:]

2.4 During the recent discussions ABI argued that income withdrawal was a direct alternative to annuity purchase and so electing the income withdrawal option should not carry any Inheritance Tax implications which do not apply where an annuity has been bought. We do not accept this argument. They point out that after the death of a member who had elected for income withdrawal, the lump sum is paid subject to a 35% tax charge. That is therefore an indication that at that time the money has ceased to be what was previously a tax approved pension scheme. The protection under IHTA84/S151 of the Act would not apply and there is therefore nothing to prevent an Inheritance Tax liability arising where this is appropriate. (Section 151 provides, broadly, that an interest

> in a pension or annuity under an exempt approved occupational scheme, an approved personal pension or an approved retirement annuity contract will not be taken into account in determining the value of an individuals estate immediately before his death.) ...
>
> **The application of Section 3(3) to income withdrawal**
>
> 3.1 The circumstances in which an Inheritance Tax charge might be considered under section 3(3) are where decisions have been made prima facie with the aim of benefiting others on death rather than to make provision for the members retirement. If having elected to take income withdrawal it can be shown that the member (or survivor, where applicable) was in normal health and that the option was elected for commercial and retirement planning reasons, a section 3(3) claim would not arise. As a rule of thumb, if the member makes a decision, unless it was known the member is in ill health, and lives for two years, that is evidence that he was not suffering from ill-health when he made the decision (ill-health in this context means terminal ill-health or such ill health that the members life is uninsurable). We acknowledge that income withdrawal will usually be elected for commercial and retirement planning rather than donative reasons.
>
> **Valuation of a Section 3(3) Claim**
>
> 3.2 When a section 3(3) claim does arise the claim is on the failure to take up the retirement benefits available to the member at the instant before death, i.e. on the loss to the estate at that date. At that point the member had the right to use the whole remaining fund for the purchase of an annuity.
>
> 3.3 The section 3(3) claim is therefore based on the value of an annuity guaranteed for 10 years payable monthly in advance calculated by HMRC, which the balance of the whole fund would have purchased. The annuity value for this purpose will be based upon the drawdown providers single life rates, without increases or provision for dependants except to the extent that this is specified in the scheme rules. (Any lump sum payment would have to have been taken at the outset of drawdown and so would not feature in the calculation.)

Fryer v HMRC has a discussion, not considered here, on valuation of the value transferred in these circumstances.[12]

[12] See too **IHTM17306 omission to exercise a right: calculation of the charge**

> When there is an omission to exercise a right to take pension benefits, the amount of the deemed disposition derives from the loss to the estate resulting from the failure to take up the available benefits at the latest time these benefits could be taken, which is immediately before the members death.

> 3.4 We stress that no claim under section 3(3) will normally arise where there is no change in the established pattern of income withdrawal i.e. where what was clearly initially a commercial transaction or plan continues without change despite intervening ill health. In addition the concessions given in the Tax Bulletin of February 1992 will continue to apply and the result should be that very few claims will arise.
>
> **The importance of planning within the advice process: the implications for Inheritance Tax**
>
> 3.5 It is essential that, as part of the advice process, an adviser discusses death during income withdrawal and the Inheritance Tax position. General advice about death and Inheritance Tax on the plan will not prejudice the position as regards a claim. However, this would not be the case if the advice dealt with, say, a scenario whereby the holder became ill and the drawdown was altered because of the ill-health of the holder.
>
> 3.6 If a clear commercial plan of action is agreed and documented while the individual is in good health, and is then acted upon, much greater certainty then exists regarding Inheritance Tax. The plan would set out the level of income to be taken for each year and might include other parameters, such as when an annuity is to be bought. If this member later becomes terminally ill, or so ill as to be uninsurable, this does not of itself give rise to an Inheritance Tax charge. If he then decides to reduce any payments received under drawdown this will give rise to a potential Inheritance Tax charge as this is a decision driven by being ill. The charge will arise on the annuity capable of being produced by the whole of the remaining residual fund...

In the case of a trust-based scheme, a right under the scheme is a settlement power and should be disregarded.[13] This would not apply to a contract-based scheme. That may seem anomalous, but it is not, as a trust-based scheme is potentially within 10-year and exit charges, which a contract-based scheme is not. The point did not arise in *Parry* or *Fryer*, which were contract-based schemes.

The calculation is based on the value of an annuity guaranteed for 10 years, payable monthly in advance, which the balance of the whole fund would have purchased. The annuity value for this purpose will be based on the drawdown providers single life rates, without increases or provision for dependants except to the extent that this is specified in the scheme rules.

Technical and the Boards Actuarial Officer can advise on any potential liability to IHT under ITA84/S3 (3).

[13] See 74.10 (Settlement power).

84.12 General powers

84.12.1 *General power: IHT-exempt scheme*

Section 151(4) IHTA provides:

> In relation to an interest in or under
> [a] a registered pension scheme,
> [b] a qualifying non-UK pension scheme or
> [c] a section 615(3) scheme,

That is, in my terminology, an interest in/under an IHT-exempt scheme.

> section 5(2) above shall apply as if the words "other than settled property" were omitted (in both places).

Amended as directed, s.5(2) IHTA provides:

> [A] A person who has a general power which enables him, or would if he were sui juris enable him,
> [a] to dispose of any property ~~other than settled property~~, or
> [b] to charge money on any property ~~other than settled property~~,
> shall be treated as beneficially entitled to the property or money;
> [B] and for this purpose "general power" means a power or authority enabling the person by whom it is exercisable to appoint or dispose of property as he thinks fit.

In practice, general powers under exempt pension schemes are not common. This provision effectively discourages them: perhaps that was the point of it. Death benefits are payable at the discretion of the scheme trustees, or held on the terms of a trust, so they are not within the estate.

This provision applies to IHT-exempt schemes, but not to other types of scheme. That makes sense where schemes are within the scope of IHT. It might seem rather favourable to an SSS which qualifies for 2006-SSS relief, but it fits the wider pattern of continuing transitional exemptions for these schemes.

84.12.2 *What is a general power*

The ABI guidance note provides:

> **4. The application of Section 5(2) to income withdrawal**
> 4.1 ... An example of a general power is the option of the survivor to take a lump sum within two years of the members death during income withdrawal. If the survivor dies within those two years the value of the lump sum would form part of the survivors estate for Inheritance Tax

> purposes unless the survivor gives up the right to take the lump sum, at a time when he/she could reasonably have expected to live to enjoy the benefits, by effecting an irrevocable disclaimer of that right.
> 4.2 ... a potential Inheritance Tax liability is unlikely where the member had a power of nomination in relation to a lump sum death benefit, revocable in life but binding on death, to select from a limited class of survivors. There would be a claim, of course, if the effect of a revocation is that the lump sum is paid to the legal personal representatives as of right.

The IHT Manual provides:

> **IHTM17052 general power over death benefits**
> The issue of a general power over property arose in the case of *Kempe v IRC* [2004] STC (SCD) 467. This case involved a term life policy where the policyholder could designate the beneficiaries who would receive the sum assured when he died. After the policyholder's death the sum assured was paid to his sisters as the designated beneficiaries. It was held that the deceased did have a general power to dispose of the property, so it fell into his estate.

See 87.10 (General power). See too 87.10.1 (General power: Terminology)

84.12.3 *Relief for spouse/dependent*

Section 152 IHTA provides:

> Where on a person's death an annuity becomes payable under
> [a] a registered pension scheme,
> [b] a qualifying non-UK pension scheme or
> [c] a section 615(3) scheme
> to a widow, widower, surviving civil partner, dependant or nominee of that person and under the terms of the scheme a sum of money might at his option have become payable instead to his personal representatives, he shall not, by virtue of section 5(2) above, be treated as having been beneficially entitled to that sum.

84.13 Transfer of death benefit

The IHT Manual provides:

> **IHTM17070 lifetime transfers of death benefits**
> Lifetime transfers of death benefits can occur when a pension scheme member changes or transfers pension rights at a time when they are in ill-health, whatever their reason is for doing so. This can happen when:

- a member assigns their death benefits to a trust (IHTM17071)
- a member transfers their pension fund from one scheme to another (IHTM17072)

Where the transferor is in good health and is likely to take their pension benefits at some later date, then the death benefits have only a nominal value. In general, where transfers are made more than 2 years before a death you can assume that the member was in normal health, unless there is evidence to the contrary. In that case there is no transfer of value.

There may be lifetime transfers to consider even where an estate is spouse or civil partner exempt...

IHTM17071 assignment of death benefits

The right to a death benefit from a pension scheme is often transferred irrevocably to a discretionary trust. Many pension providers have standard documents to put this into effect. This type of transfer or assignment is a lifetime transfer at the date of transfer and can result in a lifetime transfer of value if the scheme member is in ill-health at the time.

Not all cases though involve irrevocable transfers. Where a trust is:

- only one of the potential beneficiaries, even if nominated in a letter of wishes, and
- the pension provider retains the right to make a payment at its discretion

there is no lifetime transfer.

It is also possible that an irrevocable nomination could be made in favour of other beneficiaries. However, this is unlikely because a beneficiary who is an individual may unexpectedly pre-decease the pension scheme member.

Details of any assignment of death benefits within the 2 years before a death should be included on form IHT409 (IHTM17015).

84.14 Transfer between schemes

A transfer between schemes may reduce the member's estate, if their rights under the new scheme are less valuable. So to procure a transfer, or omit to prevent one, may be a transfer of value.

Alternatively a transfer between schemes may increase the member's estate, if their rights under the new scheme are more valuable. In that case an omission to procure a transfer may be a transfer of value.

IHTM17072: transfers between pension schemes [Mar 2021]

A pension scheme member has a statutory right to transfer their pension

> fund from one scheme to another. When this type of transfer is made, the member surrenders their rights under the first scheme in return for rights under the second. A person can do this regardless of their rights to benefits under the first scheme. This includes the situation where there is an existing irrevocable nomination in relation to death benefits, for example where the death benefits have been assigned on discretionary trusts. The second scheme is not subject to directions given in relation to the first scheme.
>
> The funds do not rejoin the member's estate during transit. What is in the estate at this point is the right to determine the terms of payment of death benefits in the second scheme. This right has value because the member could direct the payment to their own estate. If payment is not directed to the estate then there may be a loss to the estate depending on the member's health at the time.
>
> If a person is in normal health at the date of the transfer then the loss to the estate is nominal. If they are in ill-health at the date of the transfer then the loss may be significant.
>
> Details of any transfers made within the 2 years before the death should be reported on the IHT409 (IHTM17014)

This issue arose in *HMRC v Parry*[14] where the taxpayer (somehow) qualified for IHT arm's length transaction relief. But the facts were unusual.

84.15 Lump sum benefit: position before payment

The IHT Manual provides:

> **IHTM17083 Status of funds after death but before payment**
>
> When a person dies and the rules of a trust-based pension scheme mean that a lump sum death benefit becomes payable, this sum is held by the pension scheme trustees on trust before the payment to beneficiaries. But, it is no longer being held for the purposes of the pension scheme.

This seems odd, as there is not normally an identifiably distinct sum held by trustees, and if there was, it is still held for the purposes of the scheme, as it the payment to a trust is one of the purposes of the scheme. The benefit is typically a death benefit (payable on the death of the member) but the same applies to other benefits.

A statutory rule governs the position before payment from an IHT-exempt scheme. Section 58(2A) IHTA provides a relief for IHT-exempt

[14] [2020] UKSC 35. See 74.13.1 (Operation confers benefit).

schemes:

> For the purposes of subsection (1)(d) above [relief for 10-year/exit charges[15]]—
>
> (a) property applied to pay lump sum death benefits within section 168(1) of the Finance Act 2004 in respect of a member of a registered pension scheme is to be taken to be held for the purposes of the scheme from the time of the member's death until the payment is made, and
>
> (b) property applied to pay lump sum death benefits in respect of a member of
>
> [i] a qualifying non-UK pension scheme or
>
> [ii] a section 615(3) scheme
>
> is to be taken to be so held if the benefits are paid within the period of two years beginning with the earlier of the day on which the member's death was first known to the trustees or other persons having the control of the fund and the day on which they could first reasonably be expected to have known of it.

84.16 Scheme-benefit trust

A pension scheme benefit may be paid to a trust (**"a scheme-benefit trust"**). The starting point is that a scheme-benefit trust is not a pension scheme, it does not qualify for pension scheme reliefs, and it is taxed like any other trust.

The IHTM provides:

> **IHTM17084 settlement of death benefits**
> When a payment is made by a pension scheme into a trust set up to receive death benefits, the property is no longer held for the purposes of a pension scheme. It is treated in the same way as any other relevant property and is liable to the ten-year anniversary charge and exit charges (IHTM04096).

It is necessary to consider separately:

(1) a trust of a benefit from an IHT-exempt scheme

(2) a trust of a benefit from a non-exempt scheme

84.16.1 *Trust of benefit from IHT-exempt scheme*

Section 151(5) IHTA provides:

[15] See 84.10.2 (Relief for 10-year/exit charges).

> Where
> [a] Where a benefit has become payable under
> [i] a registered pension scheme,
> [ii] a qualifying non-UK pension scheme or
> [iii] a section 615(3) scheme ...

That is, in my terminology, under an IHT-exempt scheme ...

> [b] and the benefit becomes comprised in a settlement made by a person other than the person entitled to the benefit,
>
> the settlement shall for the purposes of this Act be treated as made by the person so entitled.

The IHT Manual provides:

> **IHMT17085. The identity of the settlor** [Mar 2021]
> The settlor of a discretionary trust created to receive death benefits paid from a pension scheme is the pension scheme member.

This is correct, for IHT purposes, and assuming that the pension scheme is an IHT-exempt scheme, because of s.151(5), and that is presumably what HMRC have in mind. For the position for other taxes, or where the pension scheme is not an IHT-exempt scheme, see below.

The IHTM provides:

> **IHTM17084 settlement of death benefits**
> Where the pension scheme is itself not trust based (for example it is a retirement annuity contract, and the death benefits are paid into a relevant property trust) the ten-year anniversary is based on the date the trust was set up by the member, either during their lifetime or by their Will.
>
> Where the pension scheme paying the death benefits is a trust based scheme, the funds are moving from one settlement to another and IHTA1984/S81 will apply to determine the date of the 10-year anniversary. In this case, the date for the ten-year anniversary in the receiving trust is based on the date the member first joined the original pension scheme.

The Manual provides a straightforward example.[16]

[16] For completeness, the example (Hilary) is as follows:

- H became a member of a trust based pension scheme on 15 May 1974
- She set up a new discretionary trust on 2 September 2007 with 100 and completed a letter of wishes nominating the trust to receive any death benefits from the

84.16.2 *Trust of benefit from EFRBS*

IHMT17085 continues:

> Property settled on the trusts of an employer-financed retirement benefit scheme (EFRBS) (IHTM17027) on or after 6 April 2006 is treated in the same way as settled property in any other discretionary trust. So it is liable to the ten-year anniversary charge and exit charges (IHTM04096).

This is correct. The Manual then becomes more contentious:

> In this case the scheme member is a settlor for Inheritance Tax (IHT) purposes. This applies to:
>
> - contributions made by the member as an individual, and
> - contributions made by their employer (even where this is non-contributory for the employee (member) and is wholly financed by the employer). This is because pension rights and benefits are derived from payments by the employer as deferred or delayed remuneration for the employee's current work. This principle was established in *Parry v Cleaver* and *The Halcyon Skies.*[17]
>
> In this way, the scheme member has provided funds directly or indirectly and is the settlor for IHT purposes.

I think the context suggests that this is not discussing the question of who is the settlor of an EFURBS[18]: it is discussing the question of who is the settlor of a trust to which an EFURBS makes a payment (**"EFURBS-benefit trust"**).

A member is clearly the settlor of an EFRBS-benefit trust if:

(1) They are actually entitled to the benefit and assign it to the trust; or

(2) They have a general power of appointment over the benefit and

pension scheme

- H died on 3 January 2012
- The death benefit is paid at the discretion of the pension scheme trustees to the new trust on 4 August 2012.

The lump sum death benefit is relevant property from the date of payment on 4 August 2012. However, the ten year anniversary is based on the date H joined the pension scheme on 15 May 1974, so will first apply to these funds on 15 May 2014. The ten-year anniversary charge relating to the initial 100 used to set up the trust is based on the date the trust was set up, so it will first apply on 2 September 2017

Author's comment: The last sentence is of theoretical interest, as no-one will bother about the IHT on the initial nominal £100.

[17] *Parry v Cleaver* [1970] AC 1; *The Halcyon Skies* [1977] QB 14.

[18] As to who is the settlor of an EFIRBS, see 99.39 (Pension/employee benefit trust).

creates the trust by exercise of that power.

In other cases the position is different. The two cases cited in the Manual are authority for the well-settled rule that:

> ... pensionable employment is more valuable to a man than the mere amount of his weekly wage. It is more valuable because by reason of the terms of his employment money is being regularly set aside to swell his ultimate pension rights whether on retirement or disablement. His earnings are greater than his weekly wage. [Where the wage is £20 with total contributions to the pension fund of £4 per week] his employer is willing to pay £24 per week to obtain his services, and it seems to me that he ought to be regarded as having earned that sum per week. The products of the sums paid into the pension fund are in fact delayed remuneration for his current work. That is why pensions are regarded as earned income.[19]

The non-tax cases cited in the IHT Manual do not address the issue of who is the settlor for tax purposes. The fact that a pension is delayed remuneration does not answer the tax issue. The member is not generally the settlor of the EFRBS before the transfer of a benefit to the EFURBS-benefit trust.[20] How can they become the settlor? The transfer from one trust (EFURBS) to another (the EFURBS-benefit trust) should not alter the identity of the settlor.[21] It may be said that the EFURBS represents earning of many members but the EFURBS-benefit trust isolates or

[19] *Parry v Cleaver* [1970] AC 1 at p.l6. Similarly, *Imperial Group Pension Trust v Imperial Tobacco* [1991] 1 WLR 589 at p.579:

> "Pension scheme trusts are of quite a different nature to traditional trusts. The traditional trust is one under which the settlor, by way of bounty, transfers property to trustees to be administered for the beneficiaries as objects of his bounty. Normally, there is no legal relationship between the parties apart from the trust. The beneficiaries have given no consideration for what they receive. The settlor, as donor, can impose such limits on his bounty as he chooses ... a pension scheme is quite different. Pension benefits are part of the consideration which an employee receives in return for the rendering of his services. In many cases, ... membership of the pension scheme is a requirement of employment. In contributory schemes ... the employee is himself bound to pay for his or her contributions. Beneficiaries of the scheme, the members, far from being volunteers have been given valuable consideration. The company employer is not conferring a bounty."

[20] See 99.39 (Pension/employee benefit trust).

[21] See 99.12.1 (Transfer: A's trust to B's trust).

represents earnings of one particular member. But even so, the required element of bounty is missing. That is why s.155(5) IHTA is needed.

84.17 2006-SSS reliefs

Para 56 sch 36 FA 2004 provides a set of reliefs which I call **"2006-SSS reliefs"**.

84.17.1 *2006-SSS reliefs: Requirements*

> (1) This paragraph applies in relation to a fund or scheme—
> (a) which is not
> [i] a registered pension scheme,
> [ii] a qualifying non-UK pension scheme[22] or
> [iii] a superannuation fund to which section 615(3) of ICTA applies, but
> (b) to which section 151 of the Inheritance Tax Act 1984 (treatment of pension rights) applied immediately before 6th April 2006.

Schemes within (a) are IHT-exempt schemes, they are excluded from s.151 transitional relief because they do not need it. We need to identify the other schemes to which s.151 formerly applied.

Our journey takes us to the pre-2006 s.151 IHTA. This provided as follows:

> **151 Treatment of pension rights, etc**
> *(1) This section applies*
> *[a] to any fund to which section 615(3) of the Taxes Act 1988 applies,*
> *[b] to any scheme approved under section 620 or 621 of that Act,*
> *[c] to any exempt approved scheme or statutory scheme as defined in Chapter I of Part XIV of that Act and*
> *[d] to any other sponsored superannuation scheme as defined in section 624 of that Act.*
> *(1A) This section also applies to approved personal pension arrangements within the meaning of Chapter IV of Part XIV of the Taxes Act 1988;*

Thus pre-2006 s.151 applied to 5 categories of scheme. Four of these are

[22] Defined by reference: Para 56(4) sch 36 FA 2004 provides:
In this paragraph "qualifying non-UK pension scheme" has the same meaning as in the Inheritance Tax Act 1984 (see section 271A of that Act).

still IHT-exempt schemes, and so do not need 2006-SSS relief.

Para [d] is not on the post-2006 IHT-exempt scheme list, and this is where 2006-SSS reliefs are needed. In short, 2004-transitional relief applies to a sponsored superannuation scheme ("SSS").

Why could the section not say this more directly? Perhaps the object is to include other schemes which were approved pre-2006, but later lost approval?

84.17.2 *SSS: no post-2006 contribution*

Para 56 sch 36 FA 2004 provides 2 reliefs:

> (2) If no contributions are made under the fund or scheme on or after that date—
> (a) section 151 of the Inheritance Tax Act 1984 continues to apply to the fund or scheme on and after that date for all purposes of that Act, and
> (b) property which is part of or held for the purposes of the fund or scheme does not constitute relevant property for the purposes of Chapter 3 of Part 3 of that Act (settlements without interest in possession).

This confers the reliefs which apply to IHT exempt pension schemes: see 84.10 (IHT-exempt pension schemes).

There is no transitional relief comparable to s.12A/12(2ZA) IHTA. so an omission to exercise a right under a SSS may be chargeable on basic principles.[23] I wonder if that is deliberate.

84.17.3 *SSS: post-2006 contribution*

If there are post-2006 contributions, there is a proportionate relief. In practice this may not be so common.

Para 56 sch 36 FA 2004 provides:

> (3) In any other case, paragraphs 57 and 58 apply to the fund or scheme on and after that date.

Para 57 sch 36 FA 2004 provides:

> (1) The percentage of the assets of the fund or scheme which at any time is the protected percentage of those assets does not at that time constitute relevant property for the purposes of Chapter 3 of Part 3 of

[23] See 74.5 Omission: Deemed disposition.

the Inheritance Tax Act 1984 (settlements without interest in possession).

(2) "The protected percentage" of the assets of the fund or scheme at a time is—

(ACV / V) × 100

where—

V is the market value of the assets of the fund or scheme at that time, and

ACV is the adjusted commencement value, that is an amount equal to the market value of the assets of the fund or scheme on 5th April 2006, but subject to the adjustments provided by sub-paragraph (3).

(3) The adjustments are—

(a) an increase by the percentage by which the retail prices index for the month of September immediately preceding the time in question is greater than that for April 2006, and

(b) a reduction by the amount of any relevant payments made under the fund or scheme on or after 6th April 2006 and before that time.

(4) "Relevant payments" are payments other than—

(a) payments of costs or expenses, or

(b) payments which are (or will be) income of any person for any of the purposes of income tax.

Para 58 sch 36 FA 2004 provides:

(1) Section 151 of the Inheritance Tax Act 1984 (treatment of pension rights) continues to apply to so much of the assets of the fund or scheme at any time as does not exceed the amount that is the protected amount at that time.

(2) But sub-paragraph (1) does not affect the operation of subsection (1)(d) of section 58 of that Act (because paragraph 57 makes provision about the extent to which the assets of the fund or scheme constitute relevant property within the meaning given by that section).

(3) If inheritance tax has not previously been chargeable (otherwise than only because of this paragraph) by reference to the value of the assets of the fund or scheme on or after 6th April 2006, the protected amount is an amount equal to the amount of the market value of the assets of the fund or scheme on 5th April 2006, but subject to the adjustments provided by sub-paragraph (4).

(4) The adjustments are—

(a) an increase by the percentage by which the retail prices index for the month of September immediately preceding the time in question is greater than that for April 2006, and

> (b) a reduction by the amount of any relevant payments made under the fund or scheme on or after 6th April 2006 and before that time.
>
> (5) If inheritance tax would (apart from this paragraph) have previously been chargeable by reference to the value of the assets of the fund or scheme on one or more occasions on or after 6th April 2006, the protected amount is what it was immediately before the occasion, or (where there has been more than one) the last occasion, on which inheritance tax would have been so chargeable ("the relevant tax occasion"), but—
>
> (a) reduced by the value of the property on which inheritance tax would have been chargeable on the relevant tax occasion, and
>
> (b) subject to the adjustments provided by sub-paragraph (6).
>
> (6) The adjustments are—
>
> (a) an increase by the percentage by which the retail prices index for the month of September immediately preceding the time in question is greater than that for the month in which the relevant tax occasion fell, and
>
> (b) a reduction by the amount of any relevant payments made under the fund or scheme since the relevant tax occasion.
>
> (7) "Relevant payments" are payments other than—
>
> (a) payments of costs or expenses, or
>
> (b) payments which are (or will be) income of any person for any of the purposes of income tax.

IHTM17039 provides that "A transfer from one pension scheme to another is not treated as a new contribution, so the funds in one protected scheme may be transferred to another protected scheme without the exclusion being lost."

84.18 Reservation of benefit

GWR does not apply on a corporate employer making a contribution, as this only applies where an individual makes a disposal by way of gift.

GWR would not normally apply on an individual making a contribution, as that would not normally be "by way of gift".

GWR might apply on a disposal of a pension benefit (typically, a disposal of a death benefit by a member).

84.18.1 *GWR: IHT-exempt pension scheme*

SP 10/86 provides an GWR exemption for IHT-exempt schemes:

> The Board confirm that their previous practice of not charging capital

> transfer tax on death benefits that are payable from tax approved occupational and retirement annuity schemes under discretionary trusts also applies to Inheritance Tax
> The practice extends to tax under the gift with reservation rules as well as to tax under the ordinary inheritance rules.

84.18.2 *GWR: Non-exempt pension scheme*

There may be a GWR if a member disposes of a benefit (typically a death benefit) under a non-exempt scheme and reserves a benefit. The IHT Manual provides :

> **IHTM17074 unregistered schemes and gifts with reservation**
> Where a member of an employer-financed retirement benefits scheme (EFRBS) (IHTM17027) makes (or is deemed to make) a disposition in connection with the EFRBS, the disposition may constitute a gift with reservation, where the class of discretionary beneficiaries includes the members personal representatives. In these circumstances:
>
> - the scheme member will be the settlor (IHTM17073) because they have provided funds, either directly or indirectly, and
> - the inclusion of their legal personal representatives amongst the class of beneficiaries is not consistent with their exclusion or virtual exclusion from the potential conferment of substantial benefit on them.
>
> The rationale for this is as follows:
>
> - the EFRBS is a settlement for Inheritance Tax purposes
> - an unregistered scheme is not within the protection afforded by Statement of Practice 10/86, so the gift with reservation provisions may in principle apply to an EFRBS
> - the death benefits provision under an EFRBS is an item of property for IHT purposes IHTA84/S272. As such it can be the subject of a disposition by the scheme member either on joining the scheme or at any time during their lifetime before they retire. Accordingly it is capable of being the subject matter of a gift. While it is usually of no more than nominal value, its value at any given time will depend on the age and state of health of the scheme member.
> - the member or their estate is not excluded from enjoyment and benefit of the death benefits FA86/S102(1)(b) where the objects of the discretionary trust include the members legal personal representatives...

85.1 Partnerships: Introduction

A full discussion of partnership taxation would require at least two volumes. In this chapter I focus on aspects relevant to the themes of this book but it is necessary to review the topic more generally to understand these matters in their context.

I do not consider losses.

For the general law of partnerships, see *Lindley & Banks on Partnerships* ("Lindley & Banks").

85.2 "Partnership" and "Firm"

85.2.1 *Definitions of "partnership"*

Section 1(1) PA 1890 provides:

> **Definition of partnership**
> Partnership is the relation[1] which subsists between persons carrying on

[1] I think in contemporary English one would use the word relationship rather than relation, but nothing turns on that.

a business in common with a view of profit.

I refer to this as the general (partnership law) meaning.

Both general partnerships and limited partnerships are partnerships within this definition and I refer to them together as **"ordinary partnerships"**.

For IT/CGT/CT purposes the word partnership is (generally) extended to include LLPs[2] but apart from that it is not usually defined.

There are different definitions for:

Topic	**See para**
SDLT/ATED	98.2.1
IHT residential-property code	82.4.1

85.2.2 *Definition of "firm"*

s.4 PA 1890	**s.847(1) ITTOIA/s.1257 CTA 2009**
Persons who have entered into partnership with one another are for the purposes of this Act called collectively a firm ...	In this Act [ITTOIA/CTA 2009] persons carrying on a trade [including business] in partnership are referred to collectively as a "firm".

The definitions are the same, though differently worded.

The ITTOIA/CTA definition is only for the purposes of ITTOIA/CTA 2009. It is incorporated by reference in some parts of ITA,[3] but it does not apply in ITA as a whole. However the ITTOIA/CTA definitions set out the normal meaning of the word, so (subject to context) the same meaning would apply even where the definition is not formally applied. It would be simpler if there were one single taxes-act wide definition, but it does not matter.

In this terminology,"firm" means the *persons* carrying on the business and "partnership" means the *relationship* between them; but in practice the terms are used interchangeably.[4]

There is a different definition in the Companies Act,[5] where the word

[2] See 85.21 (Limited liability partnership).

[3] For the details see the table in sch 4 ITA (Index of Defined Expressions).

[4] The PA 1890 itself is not consistent and sometimes uses "partnership" where, according to its own scheme, "firm" would be more appropriate.
The Law Commission report on Partnership Law proposed to modernise the definition, but nothing came of that.

[5] Section 1193 Companies Act 2006 provides: "firm" means any entity, whether or not a legal person, that is not an individual and includes a body corporate, a corporation

"firm" includes both a partnership and a company. I am not sure that lawyers would use the word firm to mean a company, unless speaking colloquially or informally.

I generally prefer not to use the word "firm", and use the word partnership (or company, as appropriate). But of course the word can be used where the context is clear, and when discussing particular statutory provisions, it is usually best to follow the statutory terminology.

85.3 Nature of partnership share

In order to understand partnership tax, one needs to understand the nature of a partner's interest in a partnership (also known as a partnership share).

I consider English law, then Scots law, and consider LLP's separately below.[6]

85.3.1 *English partnership: 2 analyses*

This section considers the position of partnerships governed by English law, or by a foreign law which adopts common law principles. That includes for instance a Northern Ireland partnership.

Everyone agrees that a partner has an interest in partnership property; but what is the nature of that interest?

Gower doubts whether this question has an answer:

> ... the exact nature of this equitable interest is not crystal clear ... no very satisfactory solution to this problem has been found, and the most one can say is that the partners have an equitable interest... which floats over the partnership assets throughout the duration of the firm, although it crystallises only on dissolution. Still, there is admittedly some sort of proprietary nexus (however vague and ill-defined) between the partnership assets and the partners.[7]

The answer (which explains apparently inconsistent case law) is that a partnership share has a twofold nature:[8]

> [1] As between themselves, partners are not entitled individually to exercise proprietary rights over any of the partnership assets. This is because they have subjected their proprietary interests to the terms of

sole and a partnership or other unincorporated association.

[6] See 85.21 (Limited liability partnership).

[7] Gower, *Principles of Modern Company Law*, 10th ed., para 23.1 (Legal nature of shares).

[8] *IRC v Gray* [1994] STC 360 at p.377.

> the partnership deed which provides that the assets shall be employed in the partnership business, and on dissolution realised for the purposes of paying debts and distributing any surplus.
> [2] As regards the outside world, however, the partnership deed is irrelevant. The partners are collectively entitled to each and every asset of the partnership, in which each of them therefore has an undivided share.

Lindley & Banks refers to the two parts of this dual nature as internal and external perspectives;[9] but for present purposes it is clearer to describe them as a *chose in action* analysis and a *co-ownership* analysis of a partnership share. One might also use the terms *transparent* (for the co-ownership analysis) and *opaque* (for the chose in action analysis).[10]

85.3.2 *Is one analysis correct and the other wrong?*

At first sight the chose in action/co-ownership analyses of a partnership share are inconsistent and one might think that one ought to be right and the other wrong.

Of the two rival analyses, I think the chose in action (opaque) analysis might be described as the dominant or default analysis, as more sources can be cited in its favour. For instance the Stamp Taxes on Shares Manual:

> **STSM091040 nature of a partnership interest** [Sep 2017]
> A partnership interest or share is, in law, a separate item of 'property' in its own right. A partner cannot claim to be the owner of any particular partnership asset, nor of any specific share of a partnership asset. Rather, a partnership interest represents a right to control the partnership assets and affairs for as long as the partnership lasts and, upon dissolution, a right to have the assets liquidated, the liabilities

[9] *Lindley & Banks* (21st ed., 2022), para 19-04; Law Com, *Partnership Law*, Report no 283 (2003), para 9.66 (Nature of a partner's interest) *http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf*

[10] A note on terminology. Under the chose in action (opaque) analysis, a partner's interest is sometimes called a *"future interest"*. Televantos in [2023] LQR 26. refers to it as the *"remainderman model"*. A partner's interest is future, or in remainder, in the sense that the partners receive the partnership capital only after the dissolution of the partnership, and after partnership creditors have been paid. But of course it is not a future interest, or an interest in remainder, in the sense that the partners are in principle entitled to partnership income as it arises. So I prefer to use the term "chose in action (opaque)"; but it does not ultimately matter what label is used.

> discharged and a division of any surplus.[11]

Likewise *Bayonet Ventures LLP v HMRC:*[12]

> Property which belongs to a partnership ... is no more the property of the individual partners than the property of a body corporate is the property of its shareholders. Such property might become the property of members and/or shareholders upon winding up or dissolution once debts and liabilities have been paid, but until that time it is the property of the partnership ... In our judgement it was and is fundamentally wrong for the respondents to proceed on the basis that because a loan was made ... to the first appellant [a LLP] , it follows that that same sum of money was lent to the second appellant [a member of the LLP].

On the other hand one can cite authorities for the co-ownershiop (transparent) analysis:

> A partner ... is, with his partners, an owner of the undertaking in which he is engaged and he is entitled, with his partners, to an undivided share in all the assets of the undertaking.[13]

Televantos argues from first principles that the co-ownership analysis is the correct one as a matter of partnership law.[14] But it seems to me, on the basis of *Gray*, that for tax purposes, at least, this is not a case of either/or. Which analysis is adopted can make a difference for tax purposes, but there is no general answer: the decision is made according to the context of the provisions concerned, and there are plenty of examples of each of them:[15]

[11] Likewise the BI Manual:

> **BIM82058 Partnerships - general notes: property** [Jun 2016]
> ... In commercial law in England and Wales the partner's interest in partnership property is not a proportionate interest in each asset but rather an undivided interest in the totality of the partnership property... The quantum of that interest cannot be finally determined until the partnership is finally wound up (or perhaps earlier should all the assets be sold and the net proceeds after paying liabilities distributed).

These passages were probably written before *Gray*.

[12] [2018] UKFTT 262 at [47]; but HMRC were not represented by Counsel.

[13] *Mackinlay v Arthur Young Mcclelland Moores* [1990] 2 AC 239 at p.249.

[14] Televantos "The Nature of Partnership Property and Equitable Interests" [2023] LQR 26.

[15] The Law Commission refers to "the courts' flip-flopping from one theory to another when they attempt to justify results with reference to the nature of partnership:" Law Com 283, *Partnership Law* (2003) para 3.51.

Topic	**See para**
Co-ownership (transparent) analysis adopted:	
Partnership income arises to partners, not partnership	85.16
Valuation	85.4
Cases where ownership through partnership does not block relief:	
Group reliefs	85.24
IHT relief on FOTRA securities	App 6.5
DT relief for direct investor	30.15.6
Chose in action (opaque) analysis adopted:	
Situs of partnership share for IHT not situs of partnership assets	102.35
Remittance by partnership not remittance by partners	18.49
Pension fund charge: loan to partnership not a loan to partners	[16]

In my view the co-ownership (transparent) analysis applies in the context of BPR, so that ownership of a company through a partnership does not block BPR;[17] but that is controversial.

Sometimes statute addresses the issue and directs that a partnership should be treated as transparent for some purpose (assuming that in the absence of the provision it would or might not be):

Topic	**Expression**	**See**
Withholding tax	Partnership beneficially entitled to income	26.24.3
Incorporation relief	Ownership by partnership	s.162A(8) TCGA

85.3.3 *Scots partnership: 2 analyses*

Just as in England, inconsistent views have been expressed about the nature of a share in a Scottish partnership.

Anson v HMRC adopts (what I call) a chose in action (opaque) analysis:[18]

> Although taxed in the same way as an English partnership,[19] and having many points of similarity to an English partnership, a Scottish partnership differs in possessing separate legal personality. The partners do not, therefore, have any direct proprietary interest in any of the

http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf

[16] *Bayonet Ventures LLP v HMRC* [2018] UKFTT 262 (TC).

[17] See Kessler & Marre, "A Merry Dance" Taxation Magazine, 20 March 2014. The BPR controversy is too far from the themes of this book to pursue here, but it illustrates how in tax everything is connected.

[18] [2015] UKSC 44 at [39]. The judgment is given by a Scottish judge, Lord Reed. References cited are omitted here.

[19] See 85.16 (Partnership transparency: IT/CT).

> partnership assets (unless they happen to hold assets as trustees for the partnership). They have no title to sue for damage to partnership property, and they have no insurable interest in partnership property. What the partners do own is a share of the partnership. That share is an incorporeal moveable right or *ius crediti*: the right is a debt or demand against the partnership. As long as the partnership continues, a partner is entitled under statute to require that the partnership's assets be applied for partnership purposes, and to his share of the profits of the partnership business. On a winding up, a partner is entitled to claim his portion of the net proceeds of sale of partnership assets.

Memec v IRC adopts (what I call) a co-ownership (transparent) analysis. A partner's interest was described as:

> a pro indiviso [joint ownership] right in the stock or common fund vested in the partners, firstly for payment of the company debts and then for the partners themselves[20]

And according to CoA in *Anson v HMRC*:[21]

> a Scottish partner has an (indirect) interest in the profits of the partnership as they accrue as well as in the assets of the partnership. In a real sense the profits and assets are the profits and assets of the partners, the firm, their collective alter ego, merely receiving those profits and holding those assets for the partners who are the firm.[22]

[20] 71 TC 77 citing Bell's Commentaries on the Law of Scotland

[21] *Anson v HMRC* [2013] EWCA Civ 63 at [44]. But as the decision was reversed on appeal, this passage might be questioned.

[22] The IHT Manual provides some support for both views:

> **IHTM25102 Partnership Share Scotland** [May 2020]
>
> In the absence of express provision in the partnership agreement, all the partners have an interest in the entirety of the partnership property but no partner has the right to any particular asset or assets comprised within the partnership property to the exclusion of the other partners. "What is meant by the share of a partner is his proportion of the partnership assets after they have all been realised and converted into money, and all the partnership debts and liabilities have been paid and discharged."

HMRC cite this quote from *Lindley & Banks* (21st ed., 2022), para 19 -08 (The classic definition). But it is not safe to rely on an English law textbook for an analysis of Scots partnerships. The Manual also refers to the Scottish textbook *Miller on Partnership* (2nd ed., 1994) p.199; there has not been a subsequent edition.

The Manual passage continues:

> One consequence of this is, that notwithstanding that the partnership assets may include heritable property, nevertheless the partner's share in the partnership is

As in England, one might say that these are inconsistent views and only one can be right. However I prefer the view that both may be right: a Scots partnership may also have a dual nature, like an English partnership, as a matter of Scots partnership law. Or even if that is not a correct statement of Scots partnership law, it is considered that a dual nature analyses does at least apply for tax purposes, if the context so requires. In this way, and only in this way, the tax treatment of English and Scots partnerships can be aligned.

85.3.4 *Scots partnership: Legal personality*

Section 4(2) PA 1890 provides:

> In Scotland a firm is a legal person distinct from the partners of whom it is composed...

There is, at first sight, some tension between:

(1) The rule that a Scots partnership has legal personality.
(2) Other rules, to the effect that:
  (a) the partners carry on the business of a Scots partnership
  (b) income accrues to the partners
  (c) the partners may be said to "own" the business[23]

Underlying this point is some vagueness or ambiguity in what the concept of legal personality means or entails.[24] Scots partnership legal personality does not mean much more than that it can enter into contracts and be registered as owner of assets.

Avery Jones says:[25]

> Although normally in the common law system a partnership is not a legal person, and hence cannot have any legal capacity, because the common law equates the two, a Delaware RUPA [Revised Uniform

moveable for the purposes of succession. It is a mere right to a debt rather than an undivided right." It is also the case in English law that a partnership share is regarded as personalty, not real property.

[23] For instance for the purposes of IHT BPR. Section 106 IHTA provides: "Property is not relevant business property in relation to a transfer of value unless it was owned by the transferor throughout the two years immediately preceding the transfer." But no-one suggests that partners of a Scots partnership cannot meet this requirement.

[24] See App 2.6 (Person/legal personality).

[25] 'Characterisation of Other States' Partnerships for Income Tax' [2002] BTR 375. Some footnotes are omitted or abbreviated.

> Partnership Act] partnership and a Scots partnership are legal persons and accordingly have the capacity to carry on business themselves, although it is still the partners that carry on the business because that is the definition of partnership...
> In civil law, a partnership's capacity and name is more important than whether it is a legal person... This difference in legal capacity between civil law and common law is more a feature of the difference in the laws dealing with agency, than any real difference.

HMRC agree. The Partnership Manual provides:

> **PM131700** [Jul 2019]
> **Scottish partnerships**
> ... Unlike its English, Welsh or Northern Irish counterpart, a Scottish partnership is a legal person. This has very few consequences for tax purposes.
> Where the differing legal systems would produce different results as between Scotland and the rest of the UK, specific legislation has been enacted to preserve equality of treatment; for example assessment of partnership profits (see PM141000) and capital gains (see CG27000).[26]
> Where the tax legislation itself would produce different results, the courts have directed that:
>
> > '…it is desirable to adopt a construction of statutory words which avoids differences of interpretation of a technical character such as are calculated to produce inequalities in taxation as between citizens of the two countries.'[27]

85.3.5 *Who carries on partnership business?*

In the case of an English partnership, it is obvious that the *partners* carry on the partnership business. If one refers to the *partnership* carrying on the business, it might be objected that the expression is inaccurate, or at

[26] Author's footnote: It may be doubted whether these are good examples, but it is not necessary to pursue that here.

[27] *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.244. *BPP Holdings v HMRC* [2017] UKSC 55 at [23] expressed same sentiment in procedural matters: "it is highly desirable, particularly in a field where the law is the same throughout the United Kingdom (as in tax), that tribunals, or at any rate tribunals in the same field, apply the same, or (at least in some cases) even similar, rules in the same way throughout the UK. In these circumstances, all tribunals and appellate courts above the level of the UT should be wary of applying or relying on the procedural jurisprudence of the English and Welsh courts without also taking into account that of the Scottish and Northern Irish courts.

least loose, as only a person can carry on a business and an English partnership is not a person. But I think the objection would be pedantic, and in practice the expression is often found.

In the case of a Scots partnership, it is also the case that the partners carry on the partnership business, though one could also say that the partnership carries on the partnership business: both statements are true.[28]

85.3.6 *English/Scots partnership tax aligned*

The legal personality of a Scots partnership is not therefore as important for tax as might appear at first sight. On top of that, there is a strong presumption of parity and the courts have consistently preferred an analysis under which English/Scots partnerships are treated alike.

> I think it right to lay aside any preconceptions derived either from the law of England or from the law of Scotland as to the technical legal nature of a partnership. In Scotland a firm is "a legal person distinct from the partners of whom it is composed", but this is not so under English law. For the present purpose[29] this distinction should, in my opinion, be disregarded. The Income Tax Acts are ... equally applicable on both sides of the border and the language which they employ ought to be construed so as to have, as far as possible, uniform effect in England and in Scotland alike.[30]

85.4 Valuation of partnership share

A full discussion of valuation of a partnership share would need a chapter, and only some points of principle are addressed here.

After the introduction of 100% BPR, in 1992, valuation of partnership shares only arises occasionally, so it is a somewhat unexplored topic. But the question may arise if BPR does not apply, most commonly, for an investment partnership.

In *IRC v Gray,* Lady Fox was a partner with a 92.5% interest in a partnership which held a valuable tenancy:[31]

> It is this outside view [the co-ownership (transparent) analysis] which

[28] See 83.8 (Tiered partnership).

[29] The question was whether a partnership constituted "a person charged" within the meaning of Rule 9 of schedule D cases I and II, ITA 1918. There is no equivalent in current legislation, but that does not affect the point being made.

[30] *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.247.

[31] *IRC v Gray* [1994] STC 360 at p.377.

> identifies the nature of the property falling to be valued for the purpose of capital transfer tax [now IHT], although in accordance with the *Crossman* principle[32] the restrictions imposed by the partnership deed must be taken into account in assessing its value ... In my judgment, therefore, Lady Fox had for the purposes of [what is now s.160 IHTA[33]] a 92·5% interest in the tenancy which the Lands Tribunal had jurisdiction to value as an interest in land.

So one adopts the co-ownership (transparent) analysis, not the chose in action (opaque) analysis, for the purposes of:
(1) valuation generally and
(2) tribunal jurisdiction in particular[34]

The first of these is obviously the important point, though *Gray* actually concerned the somewhat niche jurisdiction issue. The IHT Manual provides:

> **IHTM25102 Valuing The Partnership Interest: Partnership Share**
> [May 2020]
> Following the judgement of Hoffmann LJ in the case of *Gray v IRC* [1994] STC 360, at p.377c, the valuation of an interest in a business carried on as a partnership should be by reference to the value of the appropriate share of each asset. The previous practice of allowing a discount for the costs of sale is effectively overturned by this decision. That earlier treatment had been based on the general law definition of a partnership share as a proportionate interest in the partnership assets after they have been converted into money, and all the partnership debts and liabilities have been paid and discharged.
> In the valuation of an interest in an agricultural tenancy held for the benefit of a farming partnership, the Lands Tribunal made no allowance or discount in calculating the value of a deceased partner's interest - *Walton v IRC* [1996] STC 68.

While there is no reduction in the valuation for notional costs of sale, what is valued is the partnership share. A one half share in a partnership is not worth one half of the partnership assets: where A and B own, say, land in

[32] As to which, further thought is needed, if there are restrictions on transfer of a partnership share, or if the partner receives, or is entitled to receive, a lump sum.

[33] This provides (so far as relevant): "the value ... of any property shall for the purposes of this Act be the price which the property might reasonably be expected to fetch if sold in the open market ...".

[34] Questions as to the value of land go to a different tribunal, not the FTT; s.222 IHTA.

equal shares, as co-owners but not as partners, everyone agrees that the valuation of the share is in principle less than half the value of the whole.

The same approach is applied in Scotland.

85.5 Partnership law primer

The Partnership Manual contains a general introduction to partnership law. This is broadly sound, though it has the defect that the cases cited are mostly tax cases. Insofar as the aim is to set out a primer of partnership law, this is a myopic approach, like trying to write a book without using the letter *e.* To be fair, it is inevitable that tax lawyers will focus on tax cases, which are their everyday reading, and the fact that it is possible at all does illustrate how often tax turns on issues of general (non-tax) law, in this case, partnership law. But one needs to be aware of the shortcomings of this approach.

Of course it is only a basic outline of a large topic. In this book I do not include a primer of trust or company law, but it may be useful to survey partnership law, as the questions often arise in a tax context, and the topic is not on the undergraduate law syllabus.

85.5.1 *"Business"*

The definition of partnership uses the word business.

Section 45 PA 1890 provides:

> In this Act, unless the contrary intention appears ...
> The expression "business" includes every trade, occupation, or profession.

This does not add much, if anything; everyone agrees that business is a wide word. Perhaps that was less clear in 1890.

The Partnership Manual cites the definition and continues:

> **PM120100 What is a partnership?** [Jul 2019]
> ... So 'business' is a very wide term, embracing almost every commercial activity, and is much wider than trade or profession alone.

Making and managing investments may constitute a business.[35] It follows that "business" for partnership law purposes has a different meaning from "business" (or "economic activity") for VAT purposes. It is not inconsistent to say that a partnership is carrying on a partnership business,

[35] See 85.12 (Investment partnership).

and so is a valid partnership, but is not carrying on a VAT business, and so is not subject to VAT.

85.5.2 *"View of profit"*

I discuss this phrase elsewhere.[36]

85.5.3 *Formation of partnership*

The Partnership Manual provides:

> **PM120100 What is a partnership?** [Jul 2019]
> ... Partnership is a relationship resulting from a contract or agreement, oral or written. The implementation of that agreement creates the partnership relationship. If it is not implemented, it is not effective (*Dickenson v Gross* [1927] 11 TC 614)...

The Partnership Manual provides:

> **PM134100 Partnerships - formation** [Jul 2019]
> A partnership may exist without a written agreement, on the basis that a later written agreement gives formal expression to an oral agreement already existing. The date of the formation of the partnership remains the date on which the terms of the oral agreement were implemented...

The Partnership Manual provides:

> **PM133000 Does a Partnership exist?** [Jul 2019]
> S2(3) Partnership Act 1890
> ...It is important that you establish all of the facts to determine the true relationship between the parties. This will include finding out what the intentions of the parties were. No single factor is likely to be conclusive on its own. You will need to form an overall view, based on all the facts and evidence.
> A declaration that a deed is to create a partnership relation, or is not to do so, is not conclusive on its own, though it may cast some light on the parties' intentions - see *Morden Rigg & Co v Monks* (1923) 8 TC 450. In that case, two companies purchased and sold cotton and shared profits. The agreement disclaimed that their relationship was one of partnership but it was nevertheless held to be one. In *Fenston v Johnstone* [1940) 23 TC 29 an agreement for joint purchase and development of land stated that it did not constitute a partnership but it was nevertheless held to be one.

[36] See App.5.3 (A view to profit).

A mere assertion that a partnership exists is not conclusive if there is no supporting evidence. In *CIR v Williamson* (1928) 14 TC 335 a father and sons worked a farm. There was no partnership deed, no evidence that profits were shared and the father conducted all financial arrangements. The court decided that there was not a partnership.

The fact that the parties did not intend to create the relationship of partnership is a factor to be taken into account in deciding whether a partnership exists but again is not conclusive - see *Horner v Hasted* (1995) 67 TC 439. A senior manager in an accountancy practice was given the status of partner within the firm and argued that he was a partner. The manager was paid as an employee though the salary was a share of profits. The intention of the firm was that he should not be a partner as this would be contrary to professional and statutory rules. The court decided that he was not a partner.

The receipt of a share of net profits is prima facie but not conclusive evidence of partnership. An agreement to share net losses in the sense of being obliged to make good those losses is an even stronger indication.

A partnership whose income is above the VAT registration limits is required to register on Form VAT 2 with HMRC. If a partnership fails to register that of itself does not mean that there is no partnership but it is a factor to be taken into account in deciding whether a partnership exists.

For a review of other factors which might be evidence of partnership, and earlier cases, see *Saywell (trading as Eaton Tractor Co) v Pope* (1979) 53 TC 40 (in which a partnership deed was held not to have retrospective effect) and *Alexander Bulloch & Co v CIR* (1976) 51 TC 563 (where it was held that persons claimed to be partners who were minors were not partners - see BIM82065).

85.5.4 *How work & profit shared*

Lineker v HMRC summarised the principles:[37]

> While a fixed remuneration does not preclude a finding of a partnership, it is in most cases a strongly negative indication of one.
>
> Although s 1(1) of the Partnership Act 1890 refers to the aim of making a profit, it ... abstains from reference to any necessity that it be shared. The partners are free to arrange for their remuneration in any manner they choose including by agreement that one partner should receive specific sums irrespective of profits.

[37] [2023] UKFTT 340 (TC) at [80].

> It is not necessary for all partners to make a profit earning contribution for there to be a partnership.
> It is not a prerequisite for a relationship of partnership to exist that one of the partners should be involved in the management of the partnership. It is well-established that a sleeping partner can be a partner.

85.5.5 *Date of commencement*

The Partnership Manual provides:

> **PM134100 Partnerships - formation** [Jul 2019]
> Partnership agreements were held not to have retrospective effect in *Ayrshire Pullman Motor Services & Ritchie v CIR* (1929) 14 TC 754, *Waddington v O'Callaghan* (1931) 16 TC 187, and *Saywell (trading as Eaton Tractor Co) v Pope* (1979) 53 TC 40.

85.5.6 *Partnership v joint venture*

The BI Manual provides:

> **BIM82010 Joint Venture** [Jun 2016]
> The contention is sometimes advanced that an association between persons for a business purpose falls short of partnership in some way. Such an association is often called a 'joint venture'.

"Joint venture" is an imprecise term, covering a wide variety of arrangements; but it is here used to mean some form of co-operation that falls short of a partnership.

> On close examination many of these associations prove to be partnerships, despite the name applied to them. A joint venture which is not a partnership is most likely to be found where parties already carrying on businesses of their own agree to co-operate in a single project but they do not agree to share net profits or losses. Where they do agree to share net profits or losses, it is likely that a partnership will result even where the parties are already engaged in their own businesses - see *Morden Rigg & Co v Monks* (1923) 8 TC 450 in which two companies purchased and sold cotton and shared profits. The agreement between them disclaimed that their relationship was one of partnership but the court decided that there was one. In *John Gardner & Bowring, Hardy & Co Ltd v CIR* (1930) 15 TC 602 coal merchants entered into temporary and informal arrangements during a strike for the purchase and sale of coal. Profits were divided equally and the court decided that the arrangements were partnerships. In *George Hall & Son*

> *v Platt* (1954) 35 TC 440 a farmer and an agricultural merchant entered into an agreement to grow carrots. Expenses were met out of gross proceeds and the balance of profit was divided equally. The arrangements were held to be a partnership.
> But for a partnership to exist there must be a business. And that business must be a business that is separate and distinct from any other business that the joint venturers may conduct on their own account. Such a situation occurs in a genuine share farming agreement where a landowner and farmer combine, sharing their resources, with each party meeting their own expenses and taking a share of the produce. In these circumstances the relationship will fall short of partnership.

85.5.7 *Dissolution*

The Partnership Manual provides:

> **PM134200 Dissolution** [Jul 2019]
> A partnership is the relationship between a particular combination of persons. Any change in those persons terminates that partnership and may result in the creation of another partnership, but in some circumstances could also terminate the partnership and not create a new one. Whether a new partnership is created depends on the facts and is different in every instance.

85.5.8 *Assignment of share*

The Partnership Manual provides:

> **PM134300 Death Or Retirement Of Partner** [Jul 2019]
> Partners may assign their interest in a partnership, or they may confer it on death or retirement to another person, but that does not automatically make the assignee a partner. A deliberate decision by the assignee and the surviving partners for the assignee to be made a partner is required.

85.5.9 *Death of partner*

The Partnership Manual provides:

> **PM134300 Death Or Retirement Of Partner** [Jul 2019]
> ... On the death of a partner, the estate of the deceased person is entitled, in the absence of any other agreement, at the option of their personal representatives, to the share of the profits made since death attributable to the use of their share of the partnership assets, or to interest at 5% per annum on their share, until their share of the partnership is paid out.

> Depending on the precise terms of the agreement between the surviving partners and the personal representatives, the sums payable in these circumstances may be interest or annual payments deductible in arriving at the trade profits of the partnership and chargeable as savings income on the recipients.

85.6 Partners

"Partners" in formal legal English means members of a partnership, not the colloquial meaning (cohabitees).

The Partnership Manual provides:

> **PM120100 Partnerships General Notes: Definition** [Jul 2019]
> The word 'persons' in this definition includes artificial as well as natural persons, so an individual, a body corporate or the trustee of a settlement may all be partners. This includes companies and Limited Liability Partnerships ...
> There is no limit on the number of partners a partnership may have.

The BI Manual provides:

> **BIM82005 Existence Of Partnership** [Jun 2016]
> *... Who is a Partner?*
> [The Manual refers to s.1(1) PA 1890 and continues:]
> In the case of *Tiffin v Lester Aldridge LLP* [2012] EWCA Civ 35 the Court of Appeal said that in looking at whether someone was a partner, it was important to look at the intention of the parties.
> Although some factors are seen as being indications that someone is, or is not a partner, their importance will vary depending on the facts of the case. In the case of *Williamson & Soden v JJ Briars* [2011] UKEAT 0611/10/DM, Briars received a share of the profits: although this is often an indication of being a partner, in this case it was outweighed by other facts and he was held to be an employee.
> In applying the test of whether someone is carrying on a business in common:
>
> - You have to look at all the facts of that case.
> - No single factor will be determinative.
> - The weighting of any factors depend on the facts of that case.
> - The intention of the parties is important.
> - Is the person really a principal; that is, someone who is part of the business or someone who is its servant?

85.6.1 *Capacity of partner*

The BI Manual provides:

> **BIM82020 Capacity Of Partners** [Jun 2016]
>
> It is not a requirement of partnership that each member is capable of performing the full range of the activities of the partnership business, but each must be capable of performing a part of the activities. The differing abilities of the parties may have made partnership desirable in the first place; see, for example, *Fenston v Johnstone* (1940) 23 TC 29. In that case arrangements for the joint purchase and development of land, with one party providing expertise and the other finance, were held to be a partnership. See also *Newstead v Frost* (1980) 53 TC 525 in which an entertainer entered into an agreement with a company to exploit his artistic talents and the court decided that there was a valid partnership.
>
> Some professions may only be carried on by qualified persons (for example solicitors, dentists, and patent agents) so a non-qualified person may not become a partner. Some professional bodies permit partnership between qualified and non-qualified persons but will not allow such partnerships to describe themselves as 'chartered' for example accountants and surveyors. Others permit such partnerships provided the non-qualified members do not lay claim to qualifications they do not have or perform services they are not qualified to do, for example insurance brokers and general practitioners.

The Partnership Manual provides:

> **PM132100 Types Of Partner** [Jul 2019]
>
> *General partner*
>
> An ordinary member of a general partnership within the meaning of the Partnership Act 1890 or a limited partnership regulated by the Limited Partnerships[38] Act 1907, who bears joint liability without limit for debts of the partnership.
>
> *Limited partner*
>
> A limited member of a limited partnership whose rights and liabilities to creditors are restricted - see PM131310.
>
> *Salaried partner*
>
> Either
>
> - an employee, not a partner at all, who is given the title for prestige and who may be remunerated in part by reference to the firm's profits. The employee's name may even appear on the firm's notepaper. But, if it does, the employee bears liability only to those who have advanced credit to the firm in the belief that they were a partner (S12 Partnership Act 1890), or

[38] The original erroneously reads "Limited Partnership Act 1907".

> - a partner who is entitled to a first share of profits, and who is in all other respects an ordinary partner
>
> You should determine the true status of the person concerned by a detailed examination of the facts. In deciding which side of the line a person falls, it is important to consider whether or not they are entitled to participate as principal in the general management and conduct of the business. That is not to say that the day to day management of the business might not be delegated to others. This is often the case, particularly in relation to partnerships with large numbers of partners. But it is inherent in the contract of partnership that a true partner (as opposed to an employee) is permitted, indeed has the right, to participate in the general management and administration of the firm. If you require further guidance on this issue please contact CTISA (Technical)...

85.6.2 *Spouse as partner*

The BI Manual provides:

> **BIM82065 Husbands, Wives, Civil Partners And Minor Children**
> [Jun 2016]
>
> A spouse or civil partner is sometimes taken into partnership wholly or mainly to maximise the benefit of the tax reliefs that are available.
>
> You cannot challenge the apportionment of profits, as you can a wage, by reference to the value of the partners' contribution to the firm's activity. It may be possible in these cases to challenge the spouse or civil partner's status as a partner, but such a challenge is often very difficult to sustain. It is sometimes overlooked that there is no need for the spouse or civil partner to contribute capital; or to participate in management; or, in a trading context at least, to be capable of performing the main activity of the business. Indeed to be a partner one need not take an active part in the business at all. Where the spouse or civil partner has signed a deed declaring an intention to carry on the business and the deed gives a right to share in the profits, and subsequently accounts of the business show that that person has been allocated a share of the profits, there will not usually be much chance of mounting a successful challenge.
>
> It is worth emphasising that a partnership is not a sham merely because it is set up to save tax, as indeed the spouse or civil partner who is deserted by a partner leaving them to meet the firm's liabilities may find to their cost. There will always of course be some cases which will be worth investigating and challenging, but these are more likely to be found among those where there is no current partnership deed, and

particularly where there is a clear attempt to antedate the setting up of a partnership by more than a few months. CTISA (Technical) will be happy to advise on worthwhile cases.

Difficult problems are posed where a taxpayer who is carrying on a profession or vocation (as opposed to a trade), which is dependent on their personal skills or qualifications, purports to take a spouse or civil partner (who does not possess a like skill or qualification) into partnership. Some professions have internal rules that preclude this; but this is not always the case. You could argue that in such a case a partnership between the spouses or civil partners to carry on the profession or vocation in question would not be possible, but in the light of the judgments in the case of *Newstead v Frost* (1980) 53 TC 525 (in which an entertainer entered into an agreement with a company to exploit his artistic talents and the court held that there was a valid partnership) that still leaves open the possibility that there might be a partnership between them to exploit the spouse or civil partner's talents for the benefit of both. The Frost case involved a partnership with a company, but the principle is the same.

Settlements legislation

However, even if it is considered that challenging the existence of a partnership would not be successful, it does not necessarily mean that this is the end of the matter. In certain circumstances the settlements legislation may apply - see TSEM4215.

85.6.3 *Minor child as partner*

The BI Manual provides:

BIM82065 Husbands, Wives, Civil Partners And Minor Children [Jun 2016]

... *Minor children*

Partnerships involving minor children appear to be comparatively rare and where found, for example, in farming cases, may not have been set up primarily for Income Tax purposes. Minors are not, by reason of minority alone, incapable of entering into partnership, although in general while under age they are not personally responsible for the debts of the firm. On the other hand it is much more likely in these cases that a partnership deed is not in practice being acted upon. See, for example, *Dickenson v Gross* (1927) 11 TC 614 in which a farmer entered into partnership agreement with sons but the court held that it was not acted upon and therefore there was no partnership. A common-sense approach is suggested. Given the nature of the business and the age of the child is it reasonable to assume that the child is capable of carrying on the business in common with the other partners? Is it likely that the relationship of agency exists between the child and the others, or that third parties look on the child as a principal? Indeed in the case of a young child is it likely that the child was capable of sufficient understanding to have entered into the relationship at all?

In the case of *Alexander Bulloch & Co v CIR* (1976) 51 TC 563 two schoolgirls aged 15 and 16 were claimed to be partners in the family off-licence business. The Court of Session held that the Commissioners were entitled to hold that for the relevant year (during which in any case there was no partnership deed) the essential proof of the existence of a partnership was lacking. It is clear from the stated case that the Commissioners based their decision in part on the immaturity of the children and it is probable that they were also influenced by the nature of the business. On the other hand in the case, for example, of a farming partnership, Commissioners might well be prepared to accept that a 15 or 16 years old person was capable of acting as a partner. CTISA (Technical) will be happy to advise on worthwhile cases. Again if it is considered that a partnership involving a minor (that is aged under 18 and unmarried) is artificial and its existence cannot be challenged you must refer it to HMRC Trusts and Estates to determine whether the Settlements legislation can be applied.

Settlements legislation

Where the child's share of the partnership was transferred from a parent, the settlements legislation applies to treat the income as that of the donor parent until the child reaches the age of 18, marries or enters into a civil partnership - see TSEM4300 onwards.

85.7 Nominee partner

85.7.1 *Terminology*

We begin as so often with terminology:

An **agent** (in the sense used here) is someone who (as a matter of contract law) has power to enter into a contract which binds his **principal**. As agent has a variety of meanings, one might describe the agent as a **contract-law agent**.

A **nominee** is someone who (as a matter of trust law) holds property as nominee (or bare trustee) for a **beneficial owner**.

A person may be:

(1) a nominee but not a contract-law agent

(2) a contract-law agent but not a nominee

(3) both contract-law agent and nominee; I refer to that as a **"nominee-agent"**

A nominee-agent is acting for the **beneficiary-principal** in two distinct capacities, or at least, a nominee-agent has two distinct sets of powers and duties.

85.7.2 *Partnership law background*

There are two possibilities:

(1) A contract-law agent may enter into a partnership agreement under which the principal becomes a partner of the partnership

(2) A nominee may enter into a partnership agreement under which:
(a) The beneficial owner is not a partner of the partnership
(b) The nominee is a partner, and holds its partnership interest on trust as nominee/bare trustee for the beneficial owner

The first question is to decide which of (1) or (2) is the case. This depends on what has been agreed. If the documentation is well drafted the answer will be clear. The drafter ought to consider who the partners are, and a partnership ought to know who its partners are! But documentation is not always well drafted, and then it is a matter of construing the documentation, in the light of the relevant facts and principles of partnership/contract law.[39]

85.7.3 *Nominee partner: Tax analysis*

If we have a nominee-partner, as a matter of partnership law, the next question is the tax analysis. We need to consider the position of the nominee and the beneficial owner. I first consider the simpler case where the beneficial owner is an individual or a company; the position where the nominee holds on trust for a partnership is considered separately below.

The PM discusses ordinary partnerships and LLPs separately, but its analysis is the same:

PM132200 [True partnerships, May 2022]	**PM131420** [LLPs, May 2022]
... Where a person admitted as partner is a nominee, acting under the instructions of a principal [beneficial owner], it is necessary to decide who is taxable on the profit share.	Where a person admitted as member is a nominee, acting under the instructions of a principal. It is necessary to decide who is taxable on the LLP profit share.

[39] For these principles, see *Lindley & Banks* (21st ed., 2022) para 4-37 to 4-41.

The person taxable on the profit share is the person who was admitted as a partner, whatever the context in which they have become a partner. [*Case 1*] If the other partners admitted the principal to the partnership ... the principal is taxable on the profit share. [*Case 2*] In other cases the nominee is taxable, as the nominee is the person admitted to the partnership.	The person taxable on the profit share is the LLP member, whatever the context in which they have become a member. The LLP member is the person who has entered into an agreement with the other members, either to form the LLP or to be admitted as a member and whom the LLP is required to register as a member of the LLP.

We are here considering case [2], ie where the nominee is the partner and the beneficial owner is not. HMRC say that *"the nominee is taxable, as the nominee is the person admitted to the partnership"*. HMRC do not expressly say that the beneficial owner is not taxable, but perhaps that should be implied. I refer to that as the HMRC Manual view.

For chargeable gains accruing to the partnership, the person taxable must be the beneficial owner, not the nominee. This follows from the bare-trust disregard[40] and applies for CGT and for CT on chargeable gains. It is not clear whether the Manual means to express the contrary view, but if it does it is wrong.

For income accruing to the partnership, one must consider IT and CGT separately.

(1) For IT on partnership income, ie assuming that the nominee is an individual, the Manual view is at least a very considerable simplification. An individual nominee could only be taxed at the basic rate, and even then not if the nominee mandates the income to the beneficial owner. The nominee could not be taxed as if it were the beneficial owner.[41]

(2) For CT on partnership income, ie assuming that the nominee is a company, the Manual view is supported by *BCM*, discussed below, but the decision is doubtful and not yet final.

[40] See 87.7.2 (Bare trust terminology).

[41] Further consideration is needed if the nominee acts as UK representative for a non-resident beneficial owner, but I ignore that here; see 124.2 (Tax collected from UK representative).

These Manual passages[42] were written before the enactment of s.848A ITTOIA/s.1258A CTA 2009. This provides:

> (1) This section applies if—
> (a) a partner in a firm is partner as trustee for a beneficiary who is absolutely entitled[43] to the partner's share of the profits of the firm, and
> (b) the beneficiary is chargeable to tax on those profits.
> (2) References in this Part [Part 9 ITTOIA/Part 17 CTA 2009] to a partner or member of the firm include references to the beneficiary.

I refer to this as the **"nominee-partner disregard"**.

Thus even if it were formerly the case that *"the nominee is taxable, as the nominee is the person admitted to the partnership"*, which I doubt, it is not the case now. Indeed, the purpose of the nominee-partner disregard is to reverse the HMRC Manual view.[44]

The drafting of the disregard is not ideal. It states that the beneficial owner is to be regarded as a partner or member; it does not say that the nominee is to be regarded as not being a partner; but I think that is implied. It assumes that (even in the absence of the provision) the beneficial owner would be chargeable, which is right, but I wonder if that is consistent with the HMRC Manual view.

So in the author's view, the nominee-partner disregard only states what was the position before, and it was not actually needed, except for the avoidance of doubt. As at present there would be doubts, it is a useful provision.

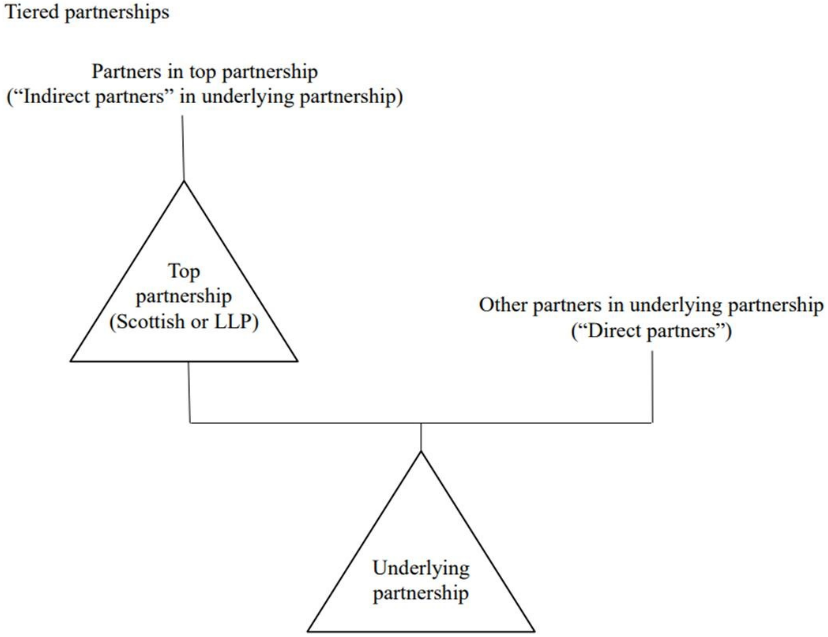
[42] PM132200 was formerly in BIM 82005.

[43] "Absolutely entitled" is not defined. But it is suggested that the standard CGT definition (at least, in general) represents the ordinary meaning, and so should be the starting point here; see 87.7.3 (Entitled against trustee).

[44] The background can be traced through shallow consultation and response papers. See HMRC, "Partnership taxation: proposals to clarify tax treatment" *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/544520/Partnership_taxation-proposals_to_clarify_tax_treatment.pdf* (2016)
HMRC, "Partnership taxation: proposals to clarify tax treatment Summary of Responses (2017)
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/601175/Partnership_taxation-proposals_to_clarify_tax_treatment_-_summary_of_responses.pdf
The papers are discussed in the 2017/18 edition of this work para 47.6 (Nominee partner).

85.8 Tiered partnership

I coin the term “tiered partnership” to describe the position where one partnership (“the top partnership”) is a direct member of another partnership (“the underlying partnership”). Diagrammatically:



Tiered partnerships
Partners in top partnership
(“Indirect partners” in underlying partnership)
Top partnership (Scottish or LLP)
Other partners in underlying partnership
(“Direct partners”)
Underlying partnership

85.8.1 *Tiers: Partnership law background*

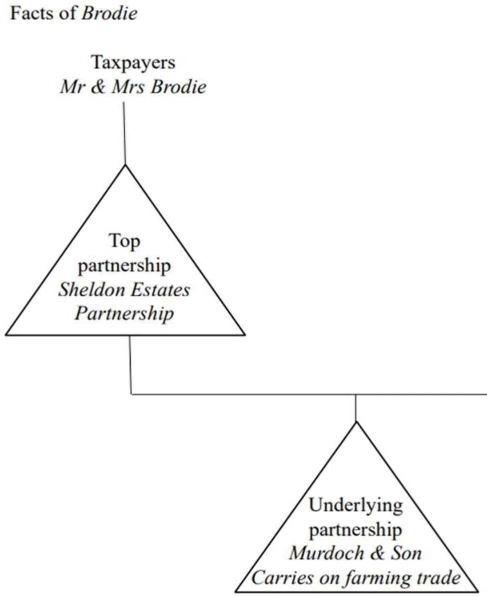
A note on the partnership law background: if the (purported) top partnership is an English law partnership, the situation in the diagram cannot happen. For the definition of partnership is that *persons* carry on business in common, and an English law partnership is not a person.[45] In short, English partnerships cannot tier. But Scottish partnerships and LLPs do have legal personality and so can be members of the underlying

[45] Well drafted documentation would recognise this and would not state that an English law partnership is to be a partner in another partnership.
If a document does state that an English law partnership is to be a partner in another partnership, *Lindley & Banks* (21st ed., 2022), para 4-42 states that the result would be to “constitute each of the members of that firm as a partner in his own right.” That is, what results is just a single partnership, whose partners are all the partners of the (purported) underlying partnership and the (purported) top partnership. The tax analysis then follows in a straightforward manner.

partnership.[46] So the structure set out above can exist as long as the top partnership is Scottish, or a LLP, or a foreign law partnership with legal personality.

85.8.2 *Tiers: Tax analysis*

If we have a tiered partnership structure, as a matter of partnership law, we need to consider the position of the partners in the top partnership. The analysis was discussed in *Major v Brodie*, which involved exactly this structure. The top partnership was a partner in an underlying partnership which carried on a farming trade. Both were Scots partnerships:



Facts of *Brodie*
Taxpayers
Mr & Mrs Brodie
Top
partnership
Sheldon Estates
Partnership
Direct partner
Henry Murdoch
Underlying
partnership
Murdoch & Son
Carries on farming trade

The taxpayers borrowed money and contributed it to the top partnership. They were entitled to interest relief if the *top* partnership carried on the farming trade which was carried on by the *underlying* partnership.[47] This

[46] This is self-evident, but if authority is needed, see *Lindley & Banks*, para 4-44 which continues:

> "The position is otherwise in Scotland, where the firm is a separate legal person and its ability to enter into the partnership relation is well recognised."

[47] The law is unchanged but now in s.398 ITA, which provides (so far as relevant):

> "(1) This section applies to a loan to an individual that is used in one or more of the ways specified in subsection (2).
> (2) The ways are ... (b) contributing money to a partnership ... that is used wholly

condition was met:[48]

> Leaving aside for a moment the special feature that a Scottish partnership has a legal personality of its own, a trade carried on by a partnership is a trade carried on by its members and by each of them.[49]
> ... The following two statements are not inconsistent with each other; on the contrary, they are two separate ways, each correct, of saying the same thing.
> (1) the top partnership carries on the trade of farming as a member of the underlying partnership.
> (2) the underlying partnership, a firm of which a member is top partnership, carries on the trade of farming.

The Scots law rule that a partnership has legal personality makes no difference:

> The argument ... was that the trade of farming carried on by the underlying partnership was not also carried on by the members of the underlying partnership, because the underlying partnership was a separate legal person distinct from its members and, therefore, only it could carry on its trade. [But] although s 4(2) [PA 1890] ascribes separate legal personality to a Scottish partnership, it remains the case that by virtue of ss 1(1) and 4(1) PA 1890 there are still persons carrying on business in common with a view of profit, and those persons are the partners.

All the judge had to decide was that the *top partnership* (the partner in the underlying partnership) was carrying on the trade of the underlying partnership. But further points can be made:

(1) the *partners* of the top partnership were carrying on the trade of the underlying partnership. In this respect, the partners in the top partnership are treated as partners in the underlying partnership.

(2) As the partners of the top partnership are also carrying on the business of the top partnership, they are carrying on two businesses:
(a) the business of the top partnership;[50] and

for the purposes of the trade ... carried on by the partnership,"

[48] 70 TC 576 at p.597. For clarity, I have replace the partnership names with my preferred labels.

[49] The judge referred to s 1(1) PA 1890 Act: "Partnership is the relation which subsists between persons carrying on business in common with a view of profit".

[50] The business of the top partnership is in principle (or will include) the business of holding an interest in the underlying partnership (an investment business).

(b) the business of the underlying partnership

The outcome would be the same had these been English law partnerships, though the partnership-law analysis would be somewhat different.[51]

A note on terminology. Section 847(4) ITTOIA describes a partner in the top partnership as an "indirect partner" in the underlying partnership.[52] This term is only used in s.852A and s.855A ITTOIA, dealing with basis periods for trading partnerships. Basis periods are not considered here, though I hope to in a future edition. But the terminology might be used more generally.

Also see 86.15 (Associated partnership).

85.9 Tiered partnership through nominee

I use the expression **"tiered partnership through a nominee"** to describe the position where:

(1) There are two partnerships in existence:
  (a) an "underlying partnership" and
  (b) a "top partnership"

(2) A person (the "nominee") is a partner in the underlying partnership, and so holds a partnership share in that partnership

(3) The partnership property of the top partnership is the nominee's partnership share in the underlying partnership. The nominee may typically be
  (a) a partner in the top partnership, and
  (b) the general partner, if the top partnership is a limited partnership
  But that is not necessary.

This structure may be considered as a combination of (1) the nominee structure, and (2) the tiered partnership structure considered above. It differs from the nominee structure considered above, as here the nominee holds for a partnership and not an individual or a company. It differs from the tiered partnership structure considered above, as here the

[51] at p.599.

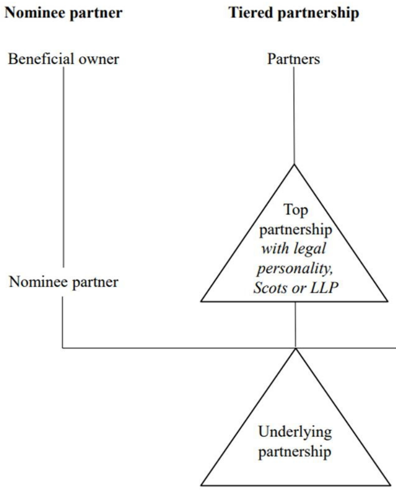
[52] This provides:

> "For the purposes of this Part [Part 9, partnerships], a person is an indirect partner in a partnership ("the underlying partnership") if the person is a partner in—
> (a) a partnership which is a partner in the underlying partnership, or
> (b) any partnership which is an indirect partner in the underlying partnership by virtue of the preceding application of this subsection."

There is no CT equivalent.

member of the underlying partnership is a nominee and not the top partnership itself.[53] Where the top partnership does not have legal personality, this is the way that a tier of partnerships has to be structured, as a partnership without legal personality cannot be a member of another partnership.

Diagrammatically:



Nominee partner
Tiered partnership
Tiered partnership through nominee
Beneficial owner
Partners
Partners
Top partnership
Top partnership *with legal personality, Scots or LLP*
Nominee partner
Nominee partner
Underlying partnership

[53] *Lindley & Banks* (21st Ed.) Section 8 (Sub-partnerships) uses the term "sub-partnership":

> An agreement to share profits only constitutes a partnership between the parties to the agreement. If, therefore,
> [1] several persons are partners and
> [2] one of them agrees to share the profits derived by him with a stranger,
> this agreement does not make the stranger a partner in the original firm. The result of such an agreement is to constitute what is called a sub-partnership, that is to say,
> [1] it makes the parties to it partners inter se; but
> [2] it in no way affects the other members of the principal firm.
> Thus, a sub-partnership is, conventionally, a partnership in a share of another partnership ...

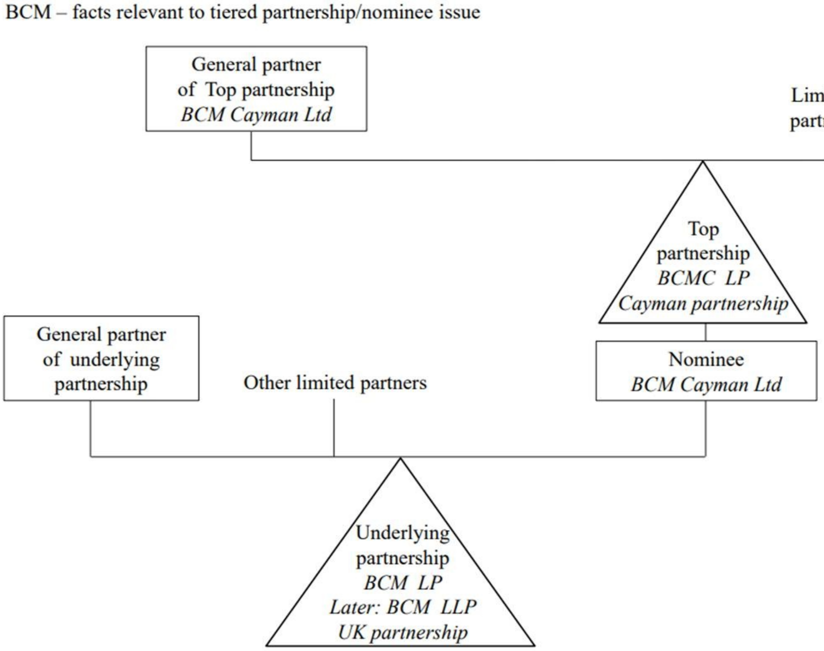
Lindley & Banks notes the commercial (partnership law) consequences of the structure:

> “It follows from the fact that a sub-partner will not become a partner in the head partnership that he will not be liable to the creditors of that firm; his indirect participation in the profits of the head partnership is naturally not sufficient to found any such liability. Moreover, the sub-partnership and the head partnership will, in the current editor's view, be distinct entities for the purposes of the insolvency legislation.”

But we are here considering the tax position.

85.9.1 *Tax analysis*

Assuming we have this structure, the next question is the tax analysis. The question arose in *BCM Cayman LP v HMRC* (*"BCM"*).[54] *BCM* raised many interesting issues, and quite complicated facts. But for present purposes it sufficient to say that there was a "tiered partnership through nominee" structure:



BCM – facts relevant to tiered partnership/nominee issue
General partner of Top partnership *BCM Cayman Ltd*
Limited partners
Top partnership *BCMC LP* *Cayman partnership*
General partner of underlying partnership
Other limited partners
Nominee *BCM Cayman Ltd*
Underlying partnership *BCM LP* *Later: BCM LLP* *UK partnership*

The nominee was carrying on a trade in the UK through a PE, because it was a partner in the underlying partnership. So it was subject to CT on the profits it received beneficially. But the UT held that the nominee was subject to CT on all the profits of its share in the underlying partnership, even though it held them on trust for the limited partners, and even though s.6(1) CTA 2009 states that a company is *not* chargeable to corporation tax on profits accruing to it in a fiduciary or representative capacity! This is an astonishing outcome. In the author's view it is wrong technically, wrong on the merits (tax ought to be paid by beneficial owners and not nominees[55]) and wrong administratively, raising difficulties as to the

[54] [2023] EWCA Civ 1179.

[55] This is the case everywhere else; see 15.8 (Receipt by nominee/trustee).

position of the other partners in the top partnership, which the judgment did not consider. CA decided the case on other grounds. But from 2018 the nominee-partner disregard ought to restore common sense to this area of law.[56]

85.10 Service company

The BI Manual provides:

> **BIM82070 Service Companies** [Jan 2019]
> Partnerships may use a company, owned by the partners, to provide services to the partnership. In such cases, the main issue is likely to be whether fees paid by the partnership to the company are allowable deductions in calculating profits of the partnership trade.
> Relevant factors to consider are:
> - what services the company provides to the partnership
> - the basis on which the company is remunerated for the services it provides
> - whether the company and partnership are connected persons.

The BI Manual provides:

> **BIM82070 Service Companies** [Jan 2019]
> ... In some cases the company providing services is also a partner in the partnership and receives a profit share. In this case the question is whether the company has a trade separate to the trade carried on in partnership. The company cannot claim expenses against the net profit allocated by the partnership. For further information on partners' expenses see BIM82075.

See 86.4 (Mixed partnerships code).

85.11 Limited partnership

The BI Manual provides an overview of limited partnership law:

> **BIM82101 Partnerships: Limited Partnership: Overview** [Jun 2016]
> A limited partnership is one in which at least one of the partners restricts their liability for the debts and obligations of the firm to a pre-determined sum, instead of bearing unlimited liability as a partner normally does.
> A limited partnership is governed by the Limited Partnerships Act

[56] *BCM* only concerned years up to 2013.

> 1907. In addition a limited partnership is subject to the Partnership Act 1890 and general partnership law except where these are overruled by the Limited Partnerships Act 1907.[57]
>
> The limited partnership must consist of at least one general partner who manages the business and bears unlimited liability to creditors, and at least one limited partner. The limited partner must contribute a specified amount of capital on joining the firm, which they cannot withdraw as long as they remain a limited partner. They cannot be made to bear any liability to creditors or their fellow partners in excess of that amount plus any undrawn profits. A limited partnership must register with the Registrar of Limited Partnerships in Cardiff, Edinburgh or Belfast as appropriate. Failure to register deprives it of its limited liability.
>
> The limited partner may not bind the firm and may not take part in the management of the firm's business. If they do, they lose their limited liability.
>
> Because they are bound by the partnership deed and because their general partners act as their agent, a limited partner does carry on the business of the firm despite the restrictions on their rights and powers.
>
> Limited partners, in the same way as other partners in the partnership are taxed on their share of the profit from a trade or profession carried on by the partnership as if it were derived from a 'notional' trade or profession that they carry on alone...

For tax purposes, a private fund limited partnership is treated the same way as a limited partnership.

85.12 Investment partnership

The BI Manual provides:

> **BIM82001 Partnerships General Notes: Definition** [Jun 2016]
>
> ...[Business] includes a business of making investments. Simply making an investment is not enough, there has to be sufficient organisation, continuity to make the activity a business.

85.12.1 *Partnership holding securities*

The CT Manual provides:

> **CTM36560 investment partnerships** [Feb 2018]
>
> There cannot be a partnership without a 'business'. Most partnerships

[57] The original erroneously reads "Limited Partnership Act 1907".

> carry on a trade or profession. But it is possible for an activity not to amount to a trade or profession and still be within the definition of 'business' in the Partnership Act 1890. Property and investment management, carried on as a commercial venture, may fall into this narrow category. Such partnerships are sometimes known as 'investment partnerships'...
>
> Limited partnerships have become more common since 1987, when the British Venture Capital Association (BVCA) published guidelines on how they might be used as investment funds. They are almost always company partnerships. ...

The CT Manual provides:

> **CTM36580 BVCA statement and guidelines** [Feb 2018]
>
> ...The Board of Inland Revenue has agreed with the Taxation Committee of the BVCA the tax treatment of partnerships established under the Limited Partnerships Act 1907 and used as vehicles for raising funds wholly or partly for equity investment in unquoted companies...
>
> **1) Taxation treatment of the partnership**
>
> 1.1) A limited partnership established for the purpose of raising funds for investment into companies will be regarded as carrying on a business and will represent a partnership within the definition in section 1 of the Partnership Act 1890 for the purposes of UK taxation.

85.12.2 *Partnership investing in land*

The PI Manual provides:

> **PIM1030 jointly owned property & partnerships** [Apr 2018]
>
> **Jointly owned property**
>
> Where property is owned jointly with one or more other persons the way the rental income is taxed depends on whether the letting is carried on in partnership. Joint letting does not, of itself, make the activity a partnership.
>
> Usually, there won't be a partnership and the customer's share from the jointly owned property will be included as part of their personal rental business profits.
>
> Less commonly, the joint letting may amount to a partnership. If this is the case the share of the profit or loss must be kept separate from any other letting income. A partnership loss can't be deducted from a personal rental profit and vice versa.
>
> The property income rules will not alter a customer's status. A partner will not cease to be a partner just because of the current rules. Equally,

if a customer was not a partner before, they will not become a partner just because of the current rules. See below for more about the cases where a partnership exists.

customers who have jointly owned property should know who is keeping the records and have access to them. They are personally responsible for including their share of the income in their own tax return even if they agree that someone else will keep the records.

Jointly owned property: no partnership

...

If a customer's only income from land and property in the UK comes from a jointly owned property, that share alone will form the rental business. If a customer has other income from land and property in the UK, whether in their name alone or owned jointly with other people, their share from the jointly owned property will form a part of their rental business along with the other income and expenses on any other properties which they own alone. Once again, however, shares held in a different capacity (partner, trustee, executor) must be kept separate.

Jointly owned property: partnership

A customer may jointly own properties which are let out as part of a partnership business. This might occur where:

- they are in a trading or professional partnership which also lets some of its land or buildings (but see BIM41015 about the inclusion of rents from the temporary letting of surplus business accommodation in the trading or professional profit), or
- more rarely, they are in a partnership which runs an investment business which does not amount to a trade and which includes, or consists of, the letting of property.

A partnership rental business of either type is treated as a separate business from any other rental business carried on by the individual partners on their own account. Each partner's share of the profits or losses arising from the partnership rental business can't be added to or subtracted from any individual rental business profits or losses. If customers are in more than one partnership, each is dealt with as a separate rental business and the profits of one can't be set against the losses of another....

When does a partnership exist?

Whether or not a customer is a member of a partnership depends on the facts. A partnership is unlikely to exist where the customer is one of a group of joint owners who merely let a property that they jointly own. On the other hand, there could be a partnership where the customer is one of a group of joint owners who:

- let the jointly owned property, and

- provide significant additional services in return for payment.

Much depends on the amount of business activity involved. The existence of a partnership depends on a degree of organisation similar to that required in an ordinary commercial business.

Bear in mind that the existence of a partnership can have important legal consequences quite apart from tax; the customer may be liable for partnership debts for example. ...

Legislation

You need to distinguish between:

- income derived from property held by a partnership (ITTOIA05/ S859 (2)). In this case the income does not belong to the individual partner in his personal capacity and is not part of his own rental business, and
- income derived from property which is jointly owned in circumstances which do not amount to partnership. In this case the individual joint owner does receive his share of the income in his personal capacity, and it does form part of his own rental business.

Merely holding property jointly does not constitute a partnership. An Officer of [HMRC] should see any case in which there is doubt as to whether a partnership exists and should consider it in the light of the guidance below.

When does a partnership exist? - more detail

[The Manual refers to s.1 Partnership Act 1890 and continues:] It is not enough to constitute a partnership that property is jointly owned or that the joint owners receive a share in the rents derived from it (Section 2 Partnership Act 1890). For there to be a partnership there must be a business. This is defined in Section 45 Partnership Act 1890 as including ‘every trade, occupation or profession’ and is a wider concept than ‘trade’. *Griffiths v Jackson* [1982] 56 TC 583 suggests that letting property may sometimes be a business.

Most cases of jointly owned property will fall short of the degree of business organisation needed to constitute a partnership. To accept that a partnership exists you would have to be satisfied that there is a similar degree of business organisation as in an ordinary commercial business. This means more than treating rental income as derived from a business of letting property - it must be business apart from that. See also the general guidance on the nature of partnerships at BIM72000 onwards.

On the other hand, where it has been accepted that a partnership already exists and has income from property belonging to the partnership, the presumption would normally be that the letting is part of the partnership business and there is more than mere joint

> ownership.
>
> Whether a case is partnership or only joint ownership could become material where there are losses involved in that or other lettings. If there is a partnership, the letting will be part of a separate rental business and it will not be pooled with profits or losses from properties held by the partners individually.

85.13 Partnership/co-ownership compared

This section considers the differences between an investment partnership and co-ownership. The issue may arise consciously, where a choice is made between the two arrangements. It may arise accidentally, where a purported investment partnership agreement does not constitute a valid partnership because, say, the "partners" are not carrying on a business.

General (non-tax) law differences include different rules for payment of partnership liabilities and for succession. However:

(1) A purported partnership agreement (which would more accurately be called a co-ownership agreement) would in principle still constitute a valid contract and govern the rights of the parties. The failure to constitute a valid partnership would not invalidate the agreement (just as a joint venture agreement which unintendedly creates a partnership is still a valid contract).

(2) In particular, the co-ownership agreement would determine who was entitled to income and gains from the property (and so who is taxable on that).

HMRC agree. The PI Manual provides:

> **PIM1030 jointly owned property & partnerships** [Apr 2018]
> ... Where there is no partnership, the share of any profit or loss arising from jointly owned property will normally be the same as the share owned in the property being let. But joint owners can agree a different division of profits and losses and so occasionally the share of the profits or losses will be different from the share in the property. The share for tax purposes must be the same as the share actually agreed...

Tax provisions which refer to partnerships will not apply to a co-ownership arrangement which is not a partnership. For instance:

[58] The Manual also supplies pre-rewrite (ICTA) references, but I omit these here.

(1) Different IHT situs rules apply.
(2) Different remittance rules apply.
(3) Different rules may apply to income losses.
(4) For completeness (the point is not likely to arise): Spouse partnership falls outside s.836 ITA (which applies to income arising from spouse co-ownership).[59]

But IT and CGT transparency will apply to a co-ownership arrangement, as the statutory rules relating to partnership transparency (in short) reflect what the position would be without statutory rules.

In general, accidental invalidity of a partnership is not likely to cause tax problems, though IHT situs and other specialist issues could arise. This is sensible as the relationship between partners is very similar to the relationship between co-owners who are not partners.

85.14 Partnership: person/body corporate

The next sections discuss:

(1) Whether a partnership is:
  (a) a person
  (b) a body corporate
  (c) a body
  (d) a body of persons
(2) Whether a partner holds an office

85.14.1 *Partnership: a person?*

The use of the word "person" requires some care.[60]

An English partnership is not a legal person in English law, that is to say, it is not a legal entity distinct from the partners, or a unit capable of rights or duties:

> As a strict proposition of English law, there is no doubt at all that a partnership is not, as such, a single juristic person. ... In English law a firm as such has no existence; partners carry on business both as principals and as agents for each other within the scope of the partnership business; the firm name is a mere expression, not a legal entity ... It is not correct to say that a firm carries on business; the

[59] See 94.7 (Property held jointly by spouses).
[60] See App 2.6 (Person/legal personality).

> members of a firm carry on business in partnership under the name or style of the firm.[61]

Context may show that the word "person" is used loosely, so as to include a partnership;[62] but in practice that is rare.

The rule that an English partnership is not a legal person could have been (more or less) undone by the Interpretation Act 1978 definition:

> "Person" includes a body of persons corporate or unincorporate.[63]

A partnership has been said to be a "body of persons" in the ordinary sense of that expression,[64] and it is "unincorporate". If that is right, an English partnership would seem to be a person in the Interpretation Act sense. But even if the position were that references to person in Acts of Parliament prima facie include an English partnership, the rule that English partnerships are not legal persons is deeply ingrained and in practice no-one usually takes notice of the Interpretation Act 1978

[61] *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.244.

[62] Eg *R v General Commissioners ex p. Gibbs* 24 TC 221 at p.419:

> "Having regard to the special vocabulary of the Income Tax legislation, I find no difficulty in interpreting the words "a person charged" in Rule 9 to include the case of several persons associated together in partnership for the purpose of carrying on a trade in common ..."

This should not be surprising, because in ordinary language, 'partnership' is a person word, just like 'company'. 'The land is owned by a partnership.' 'The partnership is liable for the debt.' Ordinary language is right.

[63] Sch 1 Interpretation Act 1978.

Of course, Scotland needs its own equivalent, for the interpretation of Acts of the Scottish Parliament and Scottish instruments (discussed below in relation to Scots partnerships). Northern Ireland also has a definition for the interpretation of Acts of the Parliament of Northern Ireland: s.34 Interpretation Act (Northern Ireland) 1954. But those definitions do not apply for general UK tax legislation, and (on the view taken here) they are substantially the same as the Interpretation Act 1978 definition (though more appropriately drafted).

[64] "A partnership is, as a matter of the ordinary use of English, plainly a body of persons"; *Padmore v IRC* 62 TC 352 at p.377. But this is in fact far from plain. We are looking at a legal term which is not ordinary English (and rarely used in modern legal English). The group of shareholders in company X is not a body of persons. The group of owners of this book is not a body of persons. So what is it which turns a group of persons with something in common into a "body of persons"? Even if the term has an ordinary fixed meaning, of course context may otherwise provide. For instance, it appears that a partnership is not a body of persons within the definition in s.989 ITA: see *Padmore* at p.377.

definition.[65] There are two ways to reach this conclusion:

(1) To say that "the context otherwise requires" .

(2) Or it may be that a partnership is not, in fact, a body of persons, at least within the meaning of the phrase used in the Interpretation Act.

These are two routes to the same destination. This definition is directed to 19th century organs of local government,[66] and was not intended to apply to partnerships.

The same applies to a partnership governed by the law of Northern Ireland.

85.14.2 *Is partnership a body corporate?*

An English partnership is clearly not a "body corporate".

A Scottish partnership is a legal person, though in practice that usually makes no difference for tax purposes.[67] But it is not a body corporate as it lacks perpetual succession, and is created by agreement and not by statutory authority.[68]

This view is supported by many sources. EN Companies Act 2006 refers to:

[65] Maitland agrees, "Trust and Corporation" (1904): "It would be easy ... to attach too much importance to the fact that since 1889 we have had upon our statute-book the following words: [Maitland sets out what is now the Interpretation Act 1978 definition of person and continues:] I can imagine a country in which a proposal to enact such a clause would give rise to vigorous controversy; but I feel safe in saying that there was nothing of the sort in England... It is not inconceivable that the above cited section of the Act of 1889 may do some work hereafter; but I have not heard of its having done any work as yet".
https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland_0242-03_EBk_v6.0.pdf
The statutory definition misled the author of the Partnership Manual, who said, wrongly: "PM120100 **What is a partnership** [Jul 2019]

> ...You should note that a partnership, although it may not be a legal person, is still a 'person' (!) for the purposes of the Taxes Acts, unless the contrary intention appears. A 'person' includes 'a body of persons corporate or unincorporate' and a partnership is a body of persons unincorporate."

[66] Maitland, "Trust and Corporation" (1904): "For some years past a similar statutory interpretation had been set upon the word "person" in various Acts of Parliament relating to local government. Some of our organs of local government, for example, the "boards of health" had not been definitely incorporated, and it was, I suppose, to meet their case that the word "person" was thus explained."

[67] See 85.3.3 (Scots partnership).

[68] See 90.9.3 (What is a body corporate?).

> partnerships that are legal persons but are not regarded as bodies corporate (as under Scots law).[69]

The Law Commission express the same view.[70] Likewise sch 1 Interpretation and Legislative Reform (Scotland) Act 2010:

> 'person' includes a body of persons corporate or unincorporated and a partnership constituted under the law of Scotland.

Likewise the CT Manual:

> **CTM00510: Meaning of company, profits and income** [Jun 2019] [The Manual considers the meaning of "body corporate" and continues] That excludes Scottish partnerships which have no perpetual succession and are formed by the partners, notwithstanding their legal personality.

The drafter of s.995 ITA also assumed that a partnership is not a body corporate:

> (2) In relation to a body corporate ... "control" means ...
> (3) In relation to a partnership, "control" means ...[71]

I set this out at length because some older Scots cases take the contrary view, though they might be explained on the basis that context showed the expression "body corporate" was used in a non-standard sense to include Scots partnerships. I think it is settled law that a Scots partnership is not a body corporate in the normal Scots law sense of that expression. The expression "body corporate" has the same meaning in England and in Scotland.

Does it matter? Probably not very much. If (contrary to the above) a Scots partnership were a body corporate, it would still not be a company

[69] Para 1488, commenting on s.1173(1) CA 2006:
"In the Companies Acts—
"body corporate" and "corporation" ... do not include ... a partnership that, whether or not a legal person, is not regarded as a body corporate under the law by which it is governed".

[70] Law Com 283, *Partnership Law* (2003) para 5.38: "Adopting an entity approach to partnership does not mean that a partnership becomes a body corporate". *http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf*

[71] Likewise s.14(1) Bribery Act 2010 referring to an offence "committed by a body corporate or a Scottish partnership".

within the standard tax definition (which excludes partnerships); but it would be a company within non-standard definitions (which say that any body corporate is a company and do not exclude partnerships).

85.14.3 *LLP: Person/body corporate*

An LLP is a legal person, and a body corporate,[72] but for tax purposes it is generally treated in the same way as an ordinary partnership.[73]

85.15 Partnership: Body/office

The word "body" is occasionally used in isolation. For instance, s.547 ITA refers to:

> A payment made, or to be made, to a body situated outside the UK...[74]

HMRC Guidance Note Annex ii takes a broad view of the meaning of body:

> 9.3 ... payment(s) to a body outside the UK ... include monetary payments sent outside the UK to charities, companies, agents, partners and individual persons outside the UK.[75]

Trustees have been described as a body.[76]

Section 86(1) IHTA (Employee benefit trusts) provides relief:

> Where settled property is held on trusts which... do not permit any of the settled property to be applied otherwise than for the benefit of—
> (a) persons of a class defined by reference to
> [i] employment in a particular trade or profession, or
> [ii] employment by, or office with, a body carrying on a trade, profession or undertaking ...

This raises the question whether a partnership is a body, and whether partners hold an office. Here HMRC seem to take a narrower view:

The IHT Manual provides:

[72] See 85.21 (Limited liability partnership).

[73] See 85.22.2 (Income tax treatment of LLP).

[74] For this provision, see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 6.6 (Foreign body rule) online version *https://www.taxationofcharities.co.uk*

[75] *https://www.gov.uk/government/publications/charities-detailed-guidance-notes/annex-ii-non-charitable-expenditure*

[76] See 63.1.1 (Separate sub-fund trustees).

> **IHTM42925: Employee benefit trusts: conditions for relief: partnerships** [Oct 2020]
> England, Wales and Northern Ireland
> A trust does not qualify under IHTA84/S86 if it is for the benefit only of a particular sole trader or partnership. This is because an individual sole trader or partner is not:
> - a 'body' within IHTA84/S86(1)(a), or
> - a class of people defined by a trade, profession or undertaking of the employer.
>
> The 'employees' of a partnership are the individual partners who carry on their trade, profession or undertaking in an association governed by their Articles so they are not employed by a 'body'.

It is suggested that a English partnership is a body: body is wider than "body corporate". A trust for partners does not qualify as an EBT because partners are not employees and do not hold an office.[77] But a trust for employees of a partnership may qualify as an EBT.

The Manual continues:

> **Scotland**
> In Scotland a partnership is a separate legal persona, so it could create an employee benefit trust within the terms of IHTA84/S86.

A trust for partners of a Scots partnership only qualifies as an EBT if the partners hold an office. That is a question of Scots law, but it seems doubtful. A trust for employees of a Scots partnership may qualify as an EBT.

This analysis avoids an anomaly between Scottish and other UK partnerships.

Likewise, members of a LLP do not hold an office but a trust for employees of an LLP could qualify as an EBT.

I note that the word "office" is not used to describe the status of a partner in either the Partnership Act 1890 or the LLPA 2000.

It would be better if statute did not use the word body, but clarified its intention with more precise terminology; but there it is.

85.16 Partnership transparency: IT/CT

85.16.1 *English partnership*

Partnerships are transparent for IT/CT, in the sense that partnership

[77] See 34.3.1 (Offices).

income/losses are regarded as income/losses of the partners and not of the partnership as such. In my terminology, IT adopts in this context the co-ownership (transparent) analysis of a partnership share.[78] That must be the right analysis, as an English partnership does not have legal personality, ie it is not itself a person. Unless partnership income arises to the partners, it would not arise to anyone, and partnership income must arise to some person or persons if it is to be taxed as it arises.

85.16.2 *Scots partnership*

Scots partnerships are likewise transparent in that sense. In *Memec v IRC*:[79]

> It is not difficult to see why an English partnership (including a limited partnership) is treated as transparent, the partners carrying on business (whether by themselves or by the other partners as their agents) in common and owning the business and having a beneficial interest in the partnership assets and profits.
>
> The justification for treating a Scottish partnership as transparent, though it may be less obvious because of the interposition of the partnership as a legal entity between the partners and the profits of the partnership, can be perceived in that in substance the position of the partners in relation to the profits is the same as in an English partnership:
>
> [1] those profits are earned by the partners carrying on business in common together and are shared in the same way and
>
> [2] the partners, whilst not directly owning the business and assets, indirectly do so and have an indirect interest in them...[80]

The Law Commission say:[81]

> The Inland Revenue justify their approach to UK partnerships[82] by reference to the following three characteristics:
>
> (1) the partners carry on the business of the partnership with a view to

[78] See 85.3 (Nature of partnership share).

[79] 71 TC 77 at p.113.

[80] This passage continues: "...which is capable of being arrested [ie seized] by the creditor of a partner". But what is seized is the debtor's partnership share, not the partnership property.

[81] Law Com 283, *Partnership Law* (2003) para 4.28.

[82] Footnote original: This covers both the English partnership and the Scots partnership notwithstanding that the former has no separate legal personality and the latter has separate legal personality.

> profit;
> (2) every partner is liable jointly or jointly and severally with the other partners for all the debts and obligations of the partnership; and
> (3) the partners own the business, each having at least an indirect share in the net assets of the partnership.

So the fact that a Scots partnership does have legal personality does not entail the conclusion that partnership income accrues to the partnership rather than the partners.

The courts' inclination to minimise tax differences between English and Scots partnerships must also have been an influence in reaching this conclusion.[83]

85.17 Entity-disregard rule

s. 848 ITTOIA	**s. 1258 CTA 2009**
Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for income tax purposes as an entity separate and distinct from the partners.	Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for corporation tax purposes as an entity separate and distinct from the partners.

I refer to this as the **"entity-disregard rule"**.

85.17.1 *Purpose of entity disregard*

In order to understand the entity-disregard rule, it is necessary to know its history.

Prior to the current statutory provision, partnership tax was governed by s.111 ICTA 1988. In its original form this provided:

> *Where a trade or profession is carried on by two or more persons jointly,*
> *[1] income tax in respect thereof*
> *[a] shall be computed and stated jointly, and in one sum, and*
> *[b] shall be separate and distinct from any other tax chargeable on those persons or any of them, and*
> *[2] a joint assessment shall be made in the partnership name.*

In short, there was a system of joint assessment. This became impossible

[83] See 85.3.6 (English/Scots partnership tax aligned).

after the introduction of self-assessment in 1994.[84] The entity-disregard rule abolished that system.

This history explains why:

(1) It says that a partnership is not an "entity" (rather than saying it is not a "person").

(2) The heading to s.848 is: "Assessment of partnerships" and the heading to s.1258 is, similarly, "Assessment of firms".

So the entity-disregard rule is concerned with the process of assessment.

EN ITTOIA provides:

> 1712. In the case of firms established under English law this provision [the entity-disregard rule] merely confirms their position under that law. But Scottish firms, for example, are legal entities [more correctly, legal persons]. This provision ensures that all firms are treated in the same way.

This suggests that the entity-disregard rule is the reason or basis for partnership transparency for Scots partnerships (though it is not strictly needed for English partnerships). That analysis is not correct: transparency follows from basic principles, not from the entity-disregard rule. That is clear for two reasons:

(1) The entity-disregard rule dates from 1994. However, IT transparency of partnerships has been settled law since the beginning of Income Tax.[85]

(2) The purpose of the rule relates to assessment procedures, not transparency.

The practical reader might ask impatiently whether it matters whether IT transparency follows from basic nature of a partnership, or from the entity-disregard rule. It does not matter so far as the settled rule is that partnership income arises to the partners. But I think the issue does matter, because a reader who studies the topic will identify the false reasoning and be left confused; and when other questions arise, identifying the nature of a partner's right to income may be a central issue, and misunderstanding the role of the entity-disregard rule may lead to the wrong result.[86]

[84] The entity-disregard rule derives from s.215 FA 1994.

[85] It was accepted without question as the background to the issue in *Dreyfus v IRC* 14 TC 560.

[86] See 18.49 (Partnerships).

For completeness: the entity-disregard rule might be relevant if one could envisage a foreign body which (1) was classified as a partnership within the meaning of the entity-disregard rule, but (2) under which income arose to the partnership and not to the partners; but I doubt if that could ever happen, because unless income arises to the partners, a body is not likely to be classified as a partnership.

85.18 "Trade"

The income taxation of partnerships is mostly in Part 9 ITTOIA/Part 17 CTA 2009. This uses an idiosyncratic definition of "trade":

s. 847 ITTOIA	**s.1257 CTA 2009**
(2) The provisions of this Part [Part 9 ITTOIA] which are expressed to apply to trades also apply, unless otherwise indicated (whether expressly or by implication)—	(2) This section and sections 1259 to 1266 are expressed to apply to trades, but unless otherwise indicated (whether expressly or by implication) also apply
(a) to professions, and (b) in the case of this section and sections 849, 850, 857 and 858 to businesses that are not trades or professions.	to businesses that are not trades.
(3) In those sections as applied by subsection (2)(b)—	(3) In those sections as applied by subsection (2)—
(a) references to a trade are references to a business, and (b) references to the profits of a trade are references to the income arising from a business.	[identical]

Thus the word "trade" in Part 9 ITTOIA always includes profession (it would be appropriate to simplify the law by a general rule that trade includes profession for all tax purposes).[87] That does not apply for CT on the basis that a company cannot carry on a profession.

[87] The taxation of trades and professions should be aligned. If (which I doubt) there are any points where different rules are needed, that should be dealt with by express provisions.

The word "trade" sometimes includes "business". Since it is not convenient to use the same word in two different senses, when trade is used in the wider sense, I refer to it as "**trade (including business)**".

85.19 Partnership income: Remittance basis

Section 857 ITTOIA provides:

> (1) This section applies if—
> (a) a firm carries on a trade [including business] wholly or partly outside the UK,[88]
> (b) the control and management of the trade [including business] is outside the UK, and
> (c) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to a partner for a tax year.
>
> (2) The partner's share of the profits of the trade [including business] arising in the UK is determined in accordance with sections 849 to 856.
> (3) The partner's share of the profits of the trade [including business] arising outside the UK is treated as relevant foreign income.

The main significance of s.857(3) – treating partnership income as RFI – is that the income can qualify for the remittance basis.

Normally a remittance basis taxpayer will want to argue that a partnership trade is controlled abroad, to qualify for the remittance basis, and HMRC will want to argue that control is here. However, if the partnership makes losses the boot may be on the other foot: UK partners may argue for control in the UK, to obtain more generous loss relief.

85.19.1 *Segregating partnership profit*

Suppose:

(1) profits of a partnership trade arise partly in and partly outside the UK; and
(2) a partner receives a share of those profits.

There is an apportionment to determine the profits arising in/outside the UK.[89] The profits that the partner receives constitute a mixed fund, partly RFI (mixed fund category (d)) and partly other income (mixed fund category (i)). A remittance from such a fund follows the mixed fund rule; later years before earlier, and RFI of a year before the other income of the

[88] Section 857(1)(a) appears to be otiose because if the condition in s.857(1)(b) is met the condition in s.857(1)(a) must be met. But it does not matter.

[89] See 21.21 (Trade partly in UK: Apportionment).

year.

On the other hand, suppose:

(1) profits of a partnership trade arise partly in and partly outside the UK; and
(2) a partner receives a share of profits arising outside the UK only.

In that case all the income that the partner receives is RFI. If a partnership includes partners who are remittance basis taxpayers, it may therefore be important for a partnership, if it can, to segregate the two parts of its trade so it can identify which parts of its profits arise in and which parts arise outside the UK.

85.19.2 *Control and management*

The question of partnership control and management matters for various purposes:

Topic	**See para**
Test for RFI in s.857	*Discussed here*
Partnership residence	85.23
Situs of partnership share for IHT	102.35

The test in s.857(1)(b) is control and management of the trade, not control and management of the partnership, but that will usually come to the same thing.

The former International Tax Handbook provided at para 1613:

> [Section 857 ITTOIA] refers simply to control and management being abroad and the view which we have, in general, adopted in determining whether the Section applies is that this means control etc must be wholly abroad. The strength of this view has never been tested in the Courts and the word 'wholly' does not appear in the Act. It is sometimes put to us that where control and management is partly abroad then [section 857] applies. On the other hand, we have argued that because the Section says 'is situated abroad' it means just that and if control is partly here then it is not abroad.

85.19.3 *What is control/management*

The expression "control and management" is of course derived from the company residence test, and it should be given the same meaning here. In *Mark Higgins Rallying v HMRC*:[90]

[90] [2011] UKFTT 340 (TC) at [51].

> We consider the appropriate test for the location of control and management of the business of a partnership is that adopted by the courts in relation to residence of companies.[91]

Thus company residence case law offers guidance.[92]

The former International Tax Handbook provided at para 1612:

> Generally speaking we follow the thinking on companies and look at the place of the highest level of management rather than day-to-day management. Outside textbooks follow the same line.
>
> In deciding the location of the control and management of a firm with both UK and overseas partners, we would usually regard as significant such factors as the comparative seniority of the partners in age and experience (a simple head count will not do of course), the extent of their interests in the firm, the source and control of the finance, the places of decision on policy and major transactions, the places and locations of partners' meetings and what was done at those meetings. The place of meetings incidentally is not a conclusive factor any more than it is – or ought to be – for companies. So the nature of the business done at the meeting is important. Is it really about control and management or just part of a facade to mislead us about the place of actual control and management?

85.19.4 *Where is control/management*

The Commissioners would normally adopt a broad approach, looking at the whole picture in order to identify one overall place of control where possible, and situations where control was located in the UK and abroad would be rare.

The place of control and management is distinct from:

(1) The place where the partners reside[93]

(2) The law of the partnership, which is not relevant

85.19.5 *Dual partnership arrangements*

The former International Tax Handbook provided:

[91] See 8.6 (Central management/control test).

[92] There was a discussion in the former International Tax Handbook at para 1614 as to whether "control and management" are two distinct tests with distinct meanings, or a composite phrase, but the latter is the better view, and that is the approach adopted for the purposes of company residence.

[93] There is no concept here of carrying on business by tacit oversight; contrast 21.4 (UK resident trader: IT).

1622. Normal professional partnership: foreign partnership treatment

In the *Frost* case[94] we tried to argue before the Commissioners that control and management was not abroad. That is our approach to any case where partnerships appear to have been set up for the purpose of avoidance and Case V [RFI] is of advantage...

1623. Foreign partnership treatment: artificial arrangements

But a common situation in professions such as engineers and accountants is one where

[1] there is a UK partnership and

[2] a separate partnership formed abroad with one or more non-UK resident partners in which some or all of the UK partnership partners are members.

Generally speaking where the non-resident partners are professionally qualified and the overseas partnership takes on work which is reasonably local to the place where the partnership is based, it is possible to take a fairly relaxed view and accept a claim to Section [857] treatment. That was so even when Case V was on the remittance basis. If, however, the prima facie evidence against this view were very strong, we would look much more closely.

It seems obvious that in these cases there will be some control in the UK – although proving that that is so is a different matter – but usually the UK resident partners will make visits to the overseas office and there is a case for saying that the management of the partnership is abroad. (This harks back to the Solicitor's Opinion considered in ITH1614.) It may be that some of the overseas partnership work is done in the UK by the UK partnership but this normally happens – or is said to happen – through the UK partnership acting as subcontractor for the overseas partnership.

1624. Foreign partnership treatment: income that of partnership?

If, however, one reaches the position that the ultimate control is in the UK and the bulk of the work is actually done here – albeit under subcontract – then that would be a case for a possible challenge. Cases have been seen where the arrangements were plainly offensive and amounted to no more than attempts to park UK-earned profits in a Section [857] partnership with the admitted intention of avoiding UK tax.

We would certainly want to attack these devices and argue, for example, that the work done in the UK by partners who were also members of the overseas firm was done in their capacity as members of that overseas firm. We could then establish that the profits from those activities could be assessed under Case II. Our Solicitor, on particular cases, has not been discouraging about the chances that we may succeed and in the days of the remittance basis there was some success in settling cases on Case II lines rather than Case V. However, these cases turn crucially on questions of fact and degree and there is the usual difficulty of obtaining information.

1625. Foreign partnership treatment: income that of partnership?

Sometimes we have had to consider whether there is in fact an overseas partnership and/or whether amounts claimed to be receipts of an overseas

[94] *Newstead v Frost* 53 TC 525.

> partnership are in fact receipts of the UK partnership which is seeking to avoid tax. We have had some success with the latter line under circumstances which gave grounds for quiet satisfaction. A firm of UK solicitors which had profited from its fees for advice about the setting up of a well-known tax avoidance scheme, sought to avoid tax on those fees by arranging to park them in a Channel Islands finance and brokerage partnership to which Section [857] was said to apply. This was insult added to injury with vengeance.
>
> Our Solicitor's advice was that we could not challenge the view that control and management was abroad. However, there was considerable artificiality in the arrangements which led ultimately to the fees landing in the accounts of the Jersey partnership. We argued that the amounts were in fact receipts of the UK solicitor's practice and we were aided in this by the fact that it was probably improper for a UK solicitor to enter into a partnership with a non-solicitor to do what they claimed to do in Jersey. This line was eventually conceded and we got tax on the Channel Island profits accruing to the UK partners.

85.20 Partnership transparency: CGT

Readers who find this topic difficult may take comfort from the OTS:

> No-one understands CGT in relation to partnerships.[95]

Section 59(1) TCGA provides:

> Where 2 or more persons carry on a trade or business in partnership—
> (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
> (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

Para (a) relates to the process of assessment (the metaphor sometimes used is machinery provision); it is drafted in the context of the former IT rule that income tax was assessed and charged on the partners jointly.[96] The rule for CGT has always been to assess and charge the partners separately (the IT rule was later aligned with this.)

That leaves para (b), which is somewhat scanty foundation for the CGT treatment of partnerships.[97] It is supplemented by SP D12:

[95] "Review of partnerships: interim report" (2014) para 6.1 *https://www.gov.uk/government/publications/partnerships-review*

[96] See 85.17.1 (Purpose of entity disregard).

[97] The Law Commission put the point more tactfully: "The working out of this concept [s.59 TCGA] in practice has not been easy, and has had to be regulated by

> **Disposals of assets by a partnership**
> 2.1. Where an asset is disposed of by a partnership to an outside party, each of the partners will be treated as disposing of his fractional share of the asset...
> **5. Contribution of an asset to a partnership**
> ... 5.2. Where an asset is transferred to a partnership by means of a capital contribution, the partner in question has made a part disposal of the asset equal to the fractional share that passes to the other partners. The market value rule applies if the transfer is between connected persons or is other than by a bargain at arm's length. Otherwise the consideration for the part disposal will be a proportion of the total amount given by the partnership for the asset. That proportion equals the fractional share of the asset passing to the other partners.
> 5.3. A sum credited to the partner's capital account represents consideration for the disposal of the asset to the partnership. Although this is similar to a change in partnership sharing ratios, it is not possible to calculate the disposal consideration on a capital contribution by reference to section 4, as the asset does not have a balance sheet value in the partnership accounts. In these circumstances HMRC accepts the apportionment of allowable costs on a fractional basis as provided for in section 4, rather than by reference to the statutory A/A+B formula.
> 5.4. A gain arises on a contribution of an asset where the disposal consideration, calculated according to the fractional proportion of the total consideration or, in appropriate cases, a proportion of the market value of the asset, exceeds the allowable costs, based on a fraction of the partner's capital gains base cost.

So partnerships are transparent for CGT, in the sense that gains/losses on disposals of partnership assets accrue to the partners (not to the partnership). For reasons similar to those discussed above for IT,[98] this result follows from first principles, and the statutory provision merely confirms that.

In determining whether gains are foreign chargeable gains (which may qualify for the remittance basis) one has regard to the situs of the partnership assets; the situs of the partnership share is irrelevant.[99]

The question then is to identify the fractional share of each partner, and

extra-statutory guidance;" Law Com 283, *Partnership Law* (2003) para 3.51. *http://www.lawcom.gov.uk/wp-content/uploads/2015/03/lc283_Partnership_Law.pdf*

[98] See 85.16 (Partnership transparency: IT/CT).

[99] See 103.3 (Co-owned assets).

that can be tricky as partners do not always have easily quantifiable fractional shares. For income, there are express provisions which deal with the point[100] but these do not apply for CGT. Instead SP D12 provides:

> In computing gains or losses the proceeds of disposal will be allocated between the partners in the ratio of their share in asset surpluses at the time of disposal. Where this is not specifically laid down, the allocation will follow the actual destination of the surplus as shown in the partnership accounts; regard will of course have to be paid to any agreement outside the accounts.
> 2.2. If the surplus is not allocated among the partners but, for example, put to a common reserve, regard will be had to the ordinary profit sharing ratio, which is likely to be indicative in the absence of a specified asset-surplus-sharing ratio.
> 2.3. Expenditure on the acquisition of assets by a partnership will be allocated between the partners according to the same principles at the time of the acquisition. This allocation may require adjustment if there is a subsequent change in the partnership sharing ratios see (section 4).

Assignments of partnership interests, and changes in partnership sharing ratios, are interesting topics, but they are not discussed here. The CG Manual has worked examples.

85.21 Limited liability partnership

85.21.1 *Definition and nature of LLP*

Section 1(2) Limited Liability Partnerships Act 2000 provides:

> [A] A limited liability partnership is a body corporate (with legal personality separate from that of its members) which is formed by being incorporated under this Act; and—
> [B] (a) in the following provisions of this Act (except in the phrase "oversea limited liability partnership"), and
> (b) in any other enactment (except where provision is made to the contrary or the context otherwise requires),
> references to a limited liability partnership are to such a body corporate.

So in UK legislation (including tax, and unless the context otherwise requires) the expression "LLP" means a UK LLP (one incorporated under

[100] See 86.3 (Partnership income: Attribution),

the LLPA 2000). "LLP" does not include a foreign LLP.[101] Occasionally the drafter overlooks the statutory definition, and states that LLP has the meaning given in s.1(2) LLPA.[102] But this is otiose.

An LLP (despite its name) is not a partnership in the strict sense of the word (which I call ordinary partnerships).[103] Where the distinction matters, one should not use the word partnership to refer to an LLP. But where the distinction does not matter, as is generally the case for tax, one might use the word partnership loosely to refer to LLPs as well as to ordinary partnerships.[104]

Likewise, in strictness, a LLP has "members" (not "partners"). But where the distinction does not matter, one might use the word partner loosely to include members of a LLP.

Similarly, one might use the word LLP to include foreign LLPs, when the distinction does not matter; but for tax this distinction does matter.

It would have been simpler if a LLP had been a type of partnership. Avery Jones explains why it is not:

> Presumably the reason for creation of this new type of corporate body is that its limited liability is more likely to be accepted in other countries, although this carries with it the corresponding disadvantage that if other states base their tax treatment on its non-tax law characteristics they are likely to classify it as a corporation.[105]

85.21.2 *LLP: View to profit*

Section 2(1) LLPA 2000 provides:

[101] See 90.37 (Foreign LLP).

[102] MLR 2017 is an example; see 131.18 (Beneficial owner: Partnership).

[103] This is clear from the definition in s.1(2) LLPA; this view is also supported by s.1(5) LLPA:

> "... except as far as otherwise provided by this Act or any other enactment, the law relating to partnerships does not apply to a limited liability partnership."

Likewise s.1(2) PA 1890:

> "But the relation between members of any company or association which is—
> (a) registered under the Companies Act 2006, or
> (b) formed or incorporated by or in pursuance of any other Act of Parliament ...

is not a partnership within the meaning of this Act."

The drafter assumed this in s.863(2) ITTOIA.

[104] This is self-evident, but if authority is needed, see *Sword Services v HMRC* [2016] EWHC 1473 (Admin) at [55] - [64].

[105] "Characterisation of other states' partnerships for income tax" [2002] BTR 375.

> For a limited liability partnership to be incorporated—
>
> (a) two or more persons associated for carrying on a lawful business with a view to profit must have subscribed their names to an incorporation document ...

Thus at the time of incorporation the members must have a view to profit. This is similar to an ordinary partnership. But a LLP continues to exist if it subsequently ceases to carry on business, or ceases to have a view to profit. In this respect an LLP is different from an ordinary partnership.

85.21.3 *LLP law background*

The BI Manual provides a basic summary:

> **BIM82110 Limited Liability Partnership: Overview** [Jun 2016]
> ... Except where specifically provided for in the LLP legislation, partnership law does not apply to LLPs. The way that LLPs are regulated is similar to that for companies and a number of provisions of the Companies Act 2006 also apply to LLPs.
>
> An LLP can be formed by two or more persons who are carrying on a partnership type business. The LLP has to be registered at Companies House.
>
> LLPs are seen as a flexible business model. As with partnerships, LLPs are governed by the agreement between the members. There are default positions set out in the LLP regulations however in most cases these will be overridden by the agreement between the members...
>
> *Members*
>
> A LLP must have at least two registered members.
>
> The first members are those who signed the document incorporating the LLP. Other people can be admitted by agreement with the existing members.
>
> Where a person becomes a member of a LLP or ceases to be a member of a LLP the LLP must give notice of this to the Registrar of Companies within 14 days.
>
> If a new member has, as a matter of fact, been admitted to the partnership by entering into an agreement with the other members, but the LLP failed to update their register of members, then the new member is still a member of the LLP and liable for tax on their share of the profits.
>
> Individuals, corporates (including other LLPs), and Scottish partnerships are eligible to be members of a UK LLP.
>
> No entity without a discrete, separate legal identity can be a member of an LLP. In particular, a firm such as an English partnership (or an

English Limited Partnership) cannot, itself, be a member of a UK LLP

Designated members

The term designated member is used in the LLP legislation. It simply means a member with additional duties under the LLP legislation. The term has no significance for tax purposes...

BIM82112 LLP Agreement [Jan 2019]

The UK LLP is a body corporate that is governed by an agreement, the 'LLP Agreement'.

There are default provisions on how an LLP will operate which are set out in the LLP Regulations, but these will rarely apply as in most cases they are overridden by what is set out in the LLP Agreement.

It is important to recognise that the LLP Agreement is not simply the document labelled 'LLP Agreement'.

The LLP Agreement is much wider than that document and includes not only written agreements but it also includes verbal or implied agreements.

The LLP Agreement includes any agreement that governs:

- The relationship between members of the LLP
- The relationship between the LLP and its members

It does not include agreements between the LLP and non members or between members and non members.

The document labelled 'LLP Agreement' may contain a clause saying that it is the entire agreement between the members. This may not be correct in all cases however, as that agreement can be amended by any subsequent agreement entered into.

For example, when a new member joins the LLP, there may be a specific agreement between the individual and the LLP, this is sometimes called the 'deed of adherence', and is part of the LLP Agreement.

When asking for a copy of the LLP Agreement it is worth making it clear that it is the agreement as defined in regulation 2 of the LLP Regulations 2001 and therefore that any side agreements and amendments ought to be disclosed as well. This might include minutes of meeting of the LLP or of boards and committees that regulate the conduct of the LLP or decide upon issues that govern the relationship of the LLP and its members, e.g. remuneration/ management committees, etc.

When looking at a particular member it is important to ask for a copy of any deed of adherence under which they became a member as well as any other written or oral agreements that they have entered into with the LLP.

85.22 Tax treatment of LLP

85.22.1 *LLP: Default rule*

An LLP is a body corporate. So an LLP is in principle classified as a company for tax purposes.[106] However this default position is subject to such wide exceptions that it hardly ever applies.

85.22.2 *LLP treated as partnership*

s.863(1) ITTOIA	**s. 1273(1) CTA 2009**
For income tax purposes, if a limited liability partnership carries on a trade, profession or business with a view to profit[107]—	For corporation tax purposes, if a limited liability partnership carries on a trade or business with a view to profit—
(a) all the activities[108] of the limited liability partnership are treated as carried on in partnership by its members (and not by the limited liability partnership as such),	[identical]
(b) anything done by, to or in relation to the limited liability partnership for the purposes of, or in connection with, any of its activities is treated as done by, to or in relation to the members as partners, and	[identical]
(c) the property of the limited liability partnership is treated as held by the members as partnership property.	[identical]

For CGT, s.59A(1) TCGA provides effectively the same rule. Section

[106] See 90.8 (Definition of "company").

[107] See App.5.3 (A view to profit).

[108] The last paragraph of s.863(1) provides:
"References in this subsection to the activities of the limited liability partnership are to anything that it does, whether or not in the course of carrying on a trade, profession or business with a view to profit."
The last para of s.1273(1) is identical except for the omission of the word "profession".

59A may be easier to follow if set alongside s.59(1) from which it derives:[109]

s.59A TCGA (LLP)	**s.59 TCGA (ordinary partnership)**
Where a limited liability partnership carries on a trade or business with a view to profit—	Where 2 or more persons carry on a trade or business in partnership—
(a) assets held by the limited liability partnership are treated for the purposes of tax in respect of chargeable gains as held by its members as partners, and	[No equivalent; none needed]
(b) any dealings by the limited liability partnership are treated for those purposes as dealings by its members in partnership (and not by the limited liability partnership as such);	(b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.[110]
[c] and tax in respect of chargeable gains accruing to the members of the limited liability partnership on the disposal of any of its assets shall be assessed and charged on them separately.	(a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately,

The default (corporate, non-transparent) treatment applies to:
(1) LLPs which do not carry on business with a view to profit[111]
(2) Hybrid LLPs[112]

85.22.3 *LLP: Partnership terms applied*

s.863(2) ITTOIA	**s.1273(2) CTA 2009**	**s.59A(2) TCGA**
For all purposes, except as otherwise	For all purposes, except as otherwise	For all purposes, except as otherwise

[109] See 85.20 (Partnership transparency: CGT).

[110] I have put para (a)(b) in reverse order to set them opposite the equivalents in s.59. Why was the order reversed?

[111] See 85.22.4 (Cessation of LLP business).

[112] Section 259GE TIOPA.

provided, in the Income Tax Acts—	provided, in the Corporation Tax Acts—	provided, in the enactments relating to tax in respect of chargeable gains—
(a) references to a firm or partnership include a limited liability partnership in relation to which subsection (1) applies,	[identical]	[identical]
(b) references to members or partners of a firm or partnership include members of such a limited liability partnership,	[identical]	[identical]

And conversely s.863(2) ITTOIA/s.1273(2) CTA 2009/s.59A(2) TCGA provide:

(c) references to a company do not include such a limited liability partnership,[113] and
(d) references to members of a company do not include members of such a limited liability partnership.

In short, an LLP is (generally, ie provided it is carrying on a business with a view to profit) regarded as a partnership and not a company.[114]

An LLP is nevertheless a person, and a body corporate, and so the starting point is that references in tax legislation to person/body corporate do include an LLP unless the context otherwise requires. The rule that references to a *company* do not include an LLP does not expressly extend to references to a person/body corporate. But given that a general partnership is not a person/body corporate, and references to a partnership

[113] Para (c) may be otiose, since standard tax definitions of "company" exclude partnerships; but perhaps it is for the avoidance of doubt; or perhaps it might apply to some non-standard definition of company.

[114] If authority is needed, see *HMRC v Vaines* [2018] EWCA Civ 45 at [15]: "For income tax purposes, however, limited liability partnerships are treated in the same way as an ordinary English partnership. This is achieved by s.863 ITTOIA ..."

do include an LLP, it is suggested that the inference can easily be made that references in IT/CGT/CT legislation to person/body corporate do not include an LLP; though this is (needless to say) subject to context.

In *Margott v HMRC*[115] the FTT noticed (which I confess I had not) that s.863(1) applies for *income tax purposes*, but s.863(2) applies for the *Income Tax Acts*; and the latter term, surprisingly, was said not include the TMA. The result was that penalty provisions dealing with partnerships did not apply to LLPs. This seems to have been corrected in *HMRC v Inverclyde Property Renovation LLP*.[116]

85.22.4 *Cessation of LLP business*

Section 863(1) ITTOIA only applies if the LLP carries on business[117] with a view to profit.

Section 863(3)(4) ITTOIA/s.1273(3)(4) CTA 2009/s.59A(3)(4) TCGA deal with the position where the LLP ceases to carry on business:

> (3) Subsection (1) continues to apply in relation to a limited liability partnership which no longer carries on any trade, profession or business with a view to profit—
> (a) if the cessation is only temporary, or
> (b) during a period of winding up following a permanent cessation, provided—
> (i) the winding up is not for reasons connected in whole or in part with the avoidance of tax, and
> (ii) the period of winding up is not unreasonably prolonged.
> This is subject to subsection (4).
> (4) Subsection (1) ceases to apply in relation to a limited liability partnership—
> (a) on the appointment of a liquidator or (if earlier) the making of a winding-up order by the court, or
> (b) on the occurrence of any event under the law of a territory outside the UK corresponding to an event specified in paragraph (a).[118]

It follows that (almost) any comment about the treatment of LLPs needs to be qualified by the word *generally*, as the position will be different for

[115] [2017] UKFTT 894 (TC).
[116] [2020] UKUT 161 (TCC).
[117] I use the word business to include a trade/profession.
[118] I have ignored trivial differences in the wording of the CGT provision.

an LLP not carrying on a business.

What is the reason for this rule?

Bayonet Ventures v HMRC concerned a dormant LLP (it had not begun to carry on a business). Accordingly, s.863(1) did not apply to it.[119] But that situation will not often arise.

For CGT, s.59A TCGA concludes with two provisions which have no IT/CT equivalent:

> (5) Where subsection (1) above ceases to apply in relation to a limited liability partnership with the effect that tax is assessed and charged—
> (a) on the limited liability partnership (as a company) in respect of chargeable gains accruing on the disposal of any of its assets, and
> (b) on the members in respect of chargeable gains accruing on the disposal of any of their capital interests in the limited liability partnership,
>
> it shall be assessed and charged on the limited liability partnership as if subsection (1) above had never applied in relation to it.
>
> (6) Neither the commencement of the application of subsection (1) above nor the cessation of its application in relation to a limited liability partnership shall be taken as giving rise to the disposal of any assets by it or any of its members.

Section 156A TCGA (not discussed here) provides for a clawback of roll-over relief on cessation of a LLP business.

85.22.5 *LLP CGT: HMRC practice*

SP D12 provides:

> TCGA92/S59A(1) complements TCGA92/S59 in treating any dealings in chargeable assets by a limited liability partnership as dealings by the individual members, as partners, for CGT purposes. Each member of a limited liability partnership to which TCGA92/S59A(1) applies has therefore to be regarded, like a partner in any other (non-corporate) partnership, as owning a fractional share of each of the partnership assets and not an interest in the partnership itself.

[119] [2018] UKFTT 262 (TC) at [33] -[46]. Fortunately for the taxpayer, HMRC (not represented by Counsel) did not think through the implications of this; the consequence would have been that the LLP was taxed as a company, and the loan from the LLP to a member would have given rise to a charge under the close company rules.

> This statement of practice was therefore extended to limited liability partnerships which meet the requirements of TCGA92/S59A(1), so that capital gains of a limited liability partnership fall to be charged on its members as partners. Accordingly, in the text of the statement of practice, all references to a ‘partnership’ or ‘firm’ include reference to limited liability partnerships to which TCGA92/S59A(1) applies, and all references to ‘partner’ include reference to a member of a limited liability partnership to which TCGA92/S59A(1) applies.
>
> For the avoidance of doubt, this statement of practice does not apply to the members of a limited liability partnership which ceases to be ‘fiscally transparent’ by reason of its not being, or it no longer being, within TCGA92/S59A(1).

85.22.6 *LLPs: IHT*

Section 267A IHTA provides:

> For the purposes of this Act and any other enactments relating to inheritance tax—
>
> (a) property to which a limited liability partnership is entitled, or which it occupies or uses, shall be treated as property to which its members are entitled, or which they occupy or use, as partners,
>
> (b) any business carried on by a limited liability partnership shall be treated as carried on in partnership by its members,
>
> (c) incorporation, change in membership or dissolution of a limited liability partnership shall be treated as formation, alteration or dissolution of a partnership, and
>
> (d) any transfer of value made by or to a limited liability partnership shall be treated as made by or to its members in partnership (and not by or to the limited liability partnership as such).

This is similar to the IT/CT/CGT rules, but the wording is not exactly the same.

Unlike those taxes, the IHT provision applies whether or not the LLP is carrying on a business with a view to profit. Presumably it was thought appropriate that IHT rules (such as situs rules) should apply equally to all LLPs, whether or not carrying on a business.[120]

[120] See 102.35.3 (Situs of LLP).

85.23 Residence of partnership

The residence of a partnership is not often important for tax, but it matters occasionally:

Topic	Reference	See para
DTR disallowance	Partnership resident outside UK	85.25
Chargeable overseas earnings	Partnership/employer resident outside UK	34.15
Treaty-residence	UK-law residence of a partnership	9.22[121]

Until 1995 the position was governed by s.112(1) ICTA 1988:

> *Where a trade or business is carried on by two or more persons in partnership, and the control and management of the trade or business is situated abroad, ... the partnership shall be deemed to reside outside the UK ...*

This was absent-mindedly repealed, and now there is no statutory definition of partnership residence; but it is considered that the test of partnership residence is still control and management. This is consistent with the general scheme of UK taxation of partnerships.[122] EN ITTOIA agrees, in the passage set out above ("For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed.")[123]

HMRC agree. The former International Tax Handbook provided:

> **1609. Residence**
> In English law a partnership is not a person and it has long been assumed that it cannot in fact have a residence. Although Scottish partnerships are persons we have not made any distinction. ... But there has been some nibbling away of the principle that a partnership does not have a residence. The concept of residence and partnerships appears in other Sections of the Taxes Acts. For example in [the definition of chargeable overseas earnings] there is the concept of a partnership, 'resident outside and not resident in the UK'. The transfer pricing provisions ... apply to partnerships but their effect may depend

[121] This is no longer relevant for UK tax because of the treaty override, but may be relevant for foreign tax.

[122] See 85.19.4 (Where is control/management).

[123] See 85.25 (DT relief: Partnership).

> on whether or not the buyer or seller is resident in the UK.[124] It is probable that if residence of a partnership in these contexts ever had to be put to the test the criterion of control and management would be used.
>
> More important is the case of *Padmore v IRC* 62 TC 352. This concerned the effect of the Double Taxation Agreement with Jersey on the liability of UK resident partners of a partnership controlled and managed in Jersey. Jersey law has a provision very similar to Section 112 [ICTA 1988]. Both the High Court and the Court of Appeal considered that it must be deduced from the respective Sections that both Jersey and UK law attach tax consequences to the residence of partnerships and that residence is determined by control and management.

85.24 Partnerships: Group reliefs

85.24.1 *The issues*

This section considers how partnerships are treated in the context of group reliefs.

There are many group reliefs:

Relief	**Provision**	**See para**
CG group reliefs		
UK-group	s.170-181 TCGA	64.27
Non-resident group	s.3F TCGA	64.31
Group loss relief	Pt 5, ss97-188 CTA 2010	*See below*
Stamp Duty group relief	s.42 FA 1930	*See below*
SDLT group relief	sch 7 FA 2003	*See below*

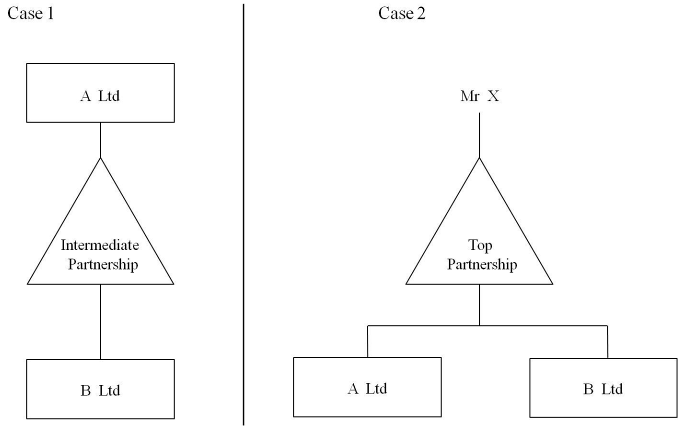
A feature of group reliefs is where they are expressed to apply to a company, they use that word with a non-standard definition:

Relief	**Definition of company**
CG group reliefs	Company means specified corporate bodies excluding LLPs[125]
Loss relief	Company means body corporate: s.188(1) CTA 2010
SDLT	Company means body corporate: para 1 sch 7 FA 2003

[124] Author’s footnote: This ceased to be the case when the transfer pricing rules were re-written in 1998.

[125] See 64.26.8 (“Company”).

Stamp Duty group relief is expressed to apply to a body corporate, not to a company, which is another route to the same destination.



The main questions which arise are:

(1) Does the intermediate partnership, in the middle of the structure, block a group: in case 1, are A & B a group?

(2) Does the top partnership create a group: in case 2, are A & B a group?

The partnership may be English, Scots or an LLP; and each relief must be considered separately. So there are many permutations.

One might paraphrase the question by saying, is a partnership transparent for group relief, but that does not make the question any easier, and it may add to the confusion, for transparency has many aspects.[126]

A third question is whether the partnership might itself claim a group relief, eg on a transfer from a company in the structure to the partnership, or vice versa; but the answer to that, unsurprisingly, turns out to be, no.

85.24.2 *Group loss relief*

CTM provides:

> **CTM80152 Groups: Group Relief And Partnerships** [Dec 2019]
> The group and consortium conditions (respectively CTA10/S131, and

[126] See 90.6.4 (Transparent/opaque: Caution).

> S132 with S133) establish that the group relief provisions can only apply to companies. CTA10/S188 defines a company for group relief purposes as any body corporate.
>
> General partnerships governed by the Partnership Act 1890 and Limited Partnerships registered under the Limited Partnerships[127] Act 1907 cannot claim or surrender group relief. They are not bodies corporate...
>
> A trading partnership in England, Wales or Northern Ireland has no legal personality and cannot own assets, so the assets of the partnership are treated as beneficially owned by the partners. This will generally be in proportion to the members' partnership shares, determined by the partnership agreement, but see BIM82058 for more details on the property of partnerships....
>
> Similar principles apply to groups for the purposes of chargeable gains.[128]
>
> A UK Limited Liability Partnership (LLP) is by statute a body corporate, but is specifically excluded from the definition of company by CTA09/1273 (2)(c), so an LLP cannot claim or surrender group relief.

That is clear: partnerships do not qualify for group loss reliefs. Since partnerships are transparent for IT/CT, in the sense that partnership income and losses accrue to the partners, that must obviously be the case.

Turning to the question of a structure with an intermediate partnership:

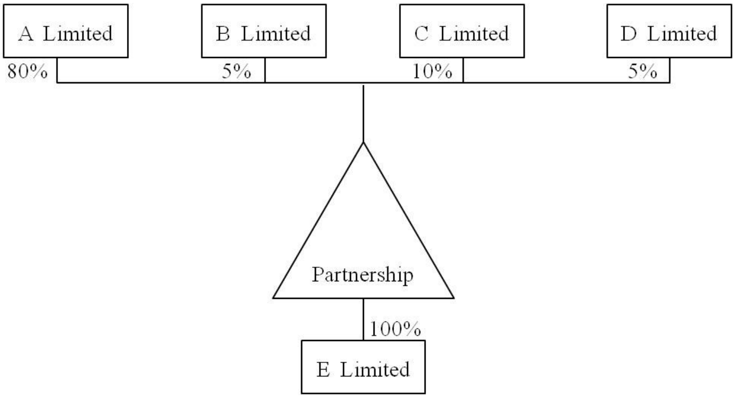
> CTA09/S1273 (1)(c)[129] treats the property of an LLP carrying on a trade or business with a view to profit as held by the members as partnership property. It follows that for group relief purposes any ordinary share capital held by an LLP is treated as beneficially owned by the LLP members in the proportion of each member's share in the LLP, and thus an LLP can be "looked through" to establish a group relationship...

Thus in case 1, A and B do form a group for group loss relief and CG relief: the intermediate partnership does not block the group. The CTM provides an example of a group with an intermediate partnership, which is essentially the same as my case 1:

[127] The original erroneously reads "Limited Partnership Act 1907".

[128] See 64.26 ("51/75/90% subsidiary").

[129] See 85.22.2 (LLP treated as partnership).



> The English general partnership owns 100% of the share capital in E Limited. A, B, C, and D Limited are members of the partnership and each own a proportion of the partnership assets as shown in the diagram.
> The beneficial ownership of the partnership assets is considered to belong to the members in proportion to their partnership shares. Hence A Limited will own (80% × 100%) = 80% of the ordinary share capital in E Limited.
> B and D Limited will each own 5%, and C will own 10%. This means that A and E will be in a group relationship because E is a 75% subsidiary of A (CTM80151).

While one might refer to the entity-disregard rule, I think this follows from adopting a co-ownership (transparent) analysis to the partnership.

85.24.3 *SD/SDLT: English partnership*

Stamp duty and SDLT are outside the scope of this book, but an HMRC statement ("**the SD Partnership statement**")[130] is of wider interest, as it illustrates the nature of a partnership share.

To follow this one needs to have in mind the basic requirements of the relief. I do not consider the (avoidance related) exceptions.

Section 42 FA 1930 provides SD group relief. In outline:

> (1) Stamp duty under Part I of Schedule 13 to the Finance Act 1999 (transfer on sale), shall not be chargeable on an instrument to which this section applies ...

[130] *https://www.gov.uk/government/publications/group-relief-for-stamp-duty-land-tax-and-stamp-duty-partnerships* (2014).

> (2) This section applies to any instrument as respects which it is shown to the satisfaction of the Commissioners that—
>
> (a) the effect of the instrument is to convey or transfer a beneficial interest in property from one body corporate ("the transferor") to another ("the transferee"), and
>
> (b) the bodies in question are associated at the time the instrument is executed ...

The key term is associated:

> (2A) For the purposes of this section bodies corporate are associated at a particular time if at that time
>
> [a] one is the parent of the other or
>
> [b] another body corporate is the parent of each.

Para 1 sch 7 FA 2003 provides SDLT group relief:

> (1) A transaction is exempt from charge if the vendor and purchaser are companies that at the effective date of the transaction are members of the same group.
>
> (2) For the purposes of group relief--
>
> (a) "company" means a body corporate, and

This is a non-standard definition of company.

> (b) companies are members of the same group if one is the 75% subsidiary of the other or both are 75% subsidiaries of a third company.

The SD/SDLT definitions of parent/75% subsidiary are essentially the same:

SD: s.42(2B) FA 1930	**SDLT: para 1 sch 7 FA 2003**
(2B) For the purposes of this section one body corporate is the parent of another at a particular time if at that time the first body—	(3) For the purposes of group relief a company ("company A") is the 75% subsidiary of another company ("company B") if company B–
(a) is beneficial owner of not less than 75 per cent of the ordinary share capital of the second body;	(a) is beneficial owner of not less than 75% of the ordinary share capital of company A,
(b) is beneficially entitled to not less than 75 per cent of any profits	(b) is beneficially entitled to not less than 75% of any profits

available for distribution to equity holders of the second body; and	available for distribution to equity holders of company A, and
(c) would be beneficially entitled to not less than 75 per cent of any assets of the second body available for distribution to its equity holders on a winding-up.[131]	(c) would be beneficially entitled to not less than 75% of any assets of company A available for distribution to its equity holders on a winding-up.[132]

85.24.4 *English partnerships*

The SD partnership statement applies the co-ownership (transparent) analysis for group relief:

> **English partnerships**
> As English limited and general partnerships do not have legal personalities separate from the persons who are the partners they must be 'looked through' when establishing bodies corporate that form a

[131] Section 42 continues with provisions not discussed here:
"(3) The ownership referred to in paragraph (a) of subsection (2B) is ownership either directly or through another body corporate or other bodies corporate, or partly directly and partly through another body corporate or other bodies corporate, and Part I of schedule 4 to the Finance Act 1938 (determination of amount of capital held through other bodies corporate) shall apply for the purposes of that paragraph.
(5) Chapter 6 of Part 5 of the Corporation Tax Act 2010 shall apply for the purposes of paragraphs (b) and (c) of subsection (2B) as it applies for the purposes of section 151(4)(a) and (b) of that Act; but this is subject to subsection (6).
(6) In determining for the purposes of this section whether a body corporate is the parent of the transferor, sections 171(1)(b) and (3), 173, 174 and 176 to 178 of the Corporation Tax Act 2010 shall not apply for the purposes of paragraph (b) or (c) of subsection (2B)."

[132] Para 1 continues with provisions not discussed here:
(4) The ownership referred to in sub-paragraph (3)(a) is ownership either directly or through another company or companies.
For the purposes of that provision the amount of ordinary share capital of company A owned by company B through another company or companies shall be determined in accordance with sections 1155 to 1157 of the Corporation Tax Act 2010....
(6) Chapter 6 of Part 5 of the Corporation Tax Act 2010 (group relief: equity holders and profits or assets available for distribution) applies for the purposes of sub-paragraphs (3)(b) and (c) above as it applies for the purposes of section 151(4)(a) and (b) of that Act.
6A In that Chapter as it applies for the purposes of subparagraphs (3)(b) and (c) above, sections 171(1)(b) and (3), 173, 174 and 176 to 178 of that Act are to be treated as omitted.

> group for Stamp Duty Land Tax and Stamp Duty purposes. As such the companies that are the partners of an English general or limited partnership can, depending upon the facts, be grouped with those companies that are below the partnership in the group structure.

Again, in case 1, A and B do form a group for SD/SDLT relief: the intermediate partnership does not block the group.

This is so even though there are no statutory deeming provisions such as might be said to support the conclusion for CG and CT group reliefs.

85.24.5 *SD/SDLT: Scots partnership*

According to HMRC, the position is different in Scotland:

> **Scottish partnerships**
> Both Scottish limited and general partnerships have legal personalities separate from the persons who are the partners. They cannot therefore be 'looked through' when establishing bodies corporate that form a group. But they are not bodies corporate and so cannot be the parent of a group of companies.

On the HMRC view, in case 1, if the intermediate partnership is a *Scots* partnership, A and B do not form a group for SD/SDLT relief: the partnership in the middle of the structure does block the group.

But the legal personality of a Scots partnership does not carry that implication;[133] and it is considered that the position for a Scots partnership is the same as an English one.

85.24.6 *SD/SDLT group relief: LLPs*

The SD Partnership statement provides:

> **Group relief for SDLT and Stamp Duty: partnerships**
> **Stamp Duty Land Tax - a change in HMRC's view of the law**
> [The statement summarises the group relief and continues]:
> A 'company' for group relief purposes is defined in Schedule 7 FA 2003 as a 'body corporate'. HMRC did not consider that a 'body corporate' for the purposes of Part 1 Schedule 7 FA 2003 included a Limited Liability Partnership incorporated under the Limited Liability Partnerships Act 2000 (LLP), so that LLPs were disregarded ('looked through') when considering whether a group relationship existed, the members of the LLP being treated as the beneficial owners of the LLP

[133] See 85.3.6 (English/Scots partnership tax aligned).

> assets.
> This view has recently been challenged. Following legal advice, HMRC now accepts that, for the purposes of SDLT group relief, a 'body corporate' does include an LLP. An LLP can therefore be the parent in a group structure.

This has the remarkable result that in my case 2, the effect of the top LLP is that the two companies A & B are grouped for SDLT (and SD) purposes; though that would not be the case for group loss relief or CG group relief. The reader may wonder if that can be right.

> However, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of other companies. This also means that any subsidiaries of the LLP cannot be grouped with the companies that are the corporate members of the LLP.
> ... An LLP cannot claim group relief itself because its chargeable interests in land are treated as held by or on behalf of the individual members (Paragraph 2 Schedule 15 FA 2003), and this position is unchanged. As such, in broad terms, an LLP continues to be disregarded if it is the vendor or purchaser in a transaction. In such a transaction group relief may be, in part at least, available if some or all of its members (which are incorporated companies) are themselves grouped.
> It also follows that if an LLP transfers land to a company that it owns, and that is within the LLP headed group, no group relief will be available as the land is deemed to be owned by the members of the LLP, and those members are not within the same group as the company owned by the LLP...

On the HMRC view, in case 1, if the intermediate partnership is a LLP, A and B do not form a group for SD/SDLT relief: the LLP in the middle of the structure does block the group.

The SD/SDLT provisions are essentially the same, so whatever is the analysis for one will govern the other. HMRC's SD analysis is therefore the same as their analysis for SDLT:

> **Stamp Duty**
> [The text summarises SD group relief and continues:] In general, HMRC has taken the view that an LLP, as a body corporate, can be the ultimate parent of a group for the purposes of Section 42 FA 1930. Furthermore, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of another company.
> Transfers of stock and marketable securities may be made to the parent

LLP from a subsidiary body corporate in the same group and qualify for group relief and vice versa. Group relief cannot be claimed on the transfer of stock and marketable securities from a body corporate parent of an LLP to the LLP or to a body corporate subsidiary of the LLP.

85.24.7 *Partnership block in group*

So does an intermediate partnership block a group? In summary, the answers are:

	English P'ship	**Scots P'ship**	**LLP**
CG reliefs	No	No	No
Loss reliefs	No	No	No
SDLT/SD	No	No: JK/Yes: HMRC	Yes

85.25 DT relief: Partnership

85.25.1 *Cross references*

For the question whether a partnership can be a treaty-resident for DTA purposes, see 9.22 (Treaty-residence: Partnerships).

See Avery Jones, "Partnerships and Double Taxation Agreement: Padmore v IRC" [1987] BTR 88.

OTS make some interesting comments on overlap relief and double taxation[134] which I hope to consider in a future edition.

85.25.2 *DT relief before 1987*

In order to understand the law it is helpful to know its history.

A partnership is commonly not a treaty-resident of a foreign state, because it is not liable to tax. However a partnership may be a treaty-resident if:

(1) The treaty has a non-standard definition of residence; or
(2) The partnership is foreign-law opaque (a hybrid entity)[135]

OECD Commentary provides:

> 6.1 ... Where a partnership is treated as a resident of a Contracting State, the provisions of the Convention that restrict the other

[134] OTS, "Review of partnerships: final report" (2015) para 4.32 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/396668/ots_partnerships_report_final.pdf*

[135] See 91.1 (Hybrid entities: Introduction).

> Contracting State's right to tax the partnership on its income do not apply to restrict that other State's right to tax the partners who are its own residents on their share of the income of the partnership.

But this does not represent the position, at least in UK law, for in *Padmore v IRC* UK-residents did qualify for treaty relief on partnership income of a partnership which was treaty-resident in Jersey.

85.25.3 *DT relief: Partnership income*

Section 858 ITTOIA disapplies DT relief on partnership income of UK residents. Section 858(1) ITTOIA/s.1266 CTA 2009 provides:

> This section applies if—
> (a) a UK resident ("the partner") is a member of a firm which—
> (i) resides outside the UK, or
> (ii) carries on a trade [including business] the control and management of which is outside the UK, and
> (b) by virtue of any arrangements having effect under section 2(1) of TIOPA 2010 ("the arrangements") any of the income of the firm is relieved from income tax in the UK.

EN ITTOIA explains the need for s.858(1)(a)(ii):

> 1777. For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed. But it is possible that, under foreign law, a firm may be considered to be resident elsewhere, for example, by reference to where the firm was established. So the section uses both the "control and management" test and the "resides" test.

s. 858(2) ITTOIA	**s.1266 CTA 2009**
The partner is liable to income tax on the partner's share of the income of the firm despite the arrangements.	The partner is liable to corporation tax on the partner's share of the income of the firm despite the arrangements.

This disapplies treaty relief.

EN ITTOIA provides:

> 1774. This section ensures that a UK resident partner's share of the income of a foreign firm remains liable to UK tax even though the income of the firm as a whole is exempt from UK tax in accordance with a double taxation agreement...
> 1775. The business profits article of the UK/Jersey double taxation

> arrangement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352, the Court of Appeal decided that the exemption extended to the share of the profits arising to a UK resident individual. The rules [now in s.858 ITTOIA] were enacted in 1987 to remove the exemption.
>
> 1776. Subsection (1) sets out the type of individual and firm with which the section is concerned. It goes on to identify the sort of exemption from tax that was considered in the *Padmore* case. ...
>
> 1778. Subsection (2) makes it clear that the section does no more than remove any exemption under a double taxation arrangement. It does not deny other reliefs, such as tax credit relief. See Change 145 in Annex 1.[136]

This provision dates back to 1987. Interestingly, in those days retrospective legislation and breach of treaty obligations were thought to require special justification.[137]

[136] Change 145 is as follows:

"This change enacts the Inland Revenue practice of giving a narrow interpretation to the word 'affect' in section 112(4) of ICTA.

The business profits article of the UK/Jersey double taxation agreement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352 the Court of Appeal decided that the exemption covered the share of the profits arising to a UK resident partner. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.

It was intended, in the case of income tax, that the 1987 legislation should do no more than remove the exemption claimed in the *Padmore* case. The words used in section 112(4) of ICTA are 'shall not affect any liability to tax'. On the face of it, these words could deny the partner any relief, including tax credit relief, under a double taxation treaty. Section 858(2) of this Act makes it clear that it is only the partner's chargeability to tax that is preserved, overriding any provision to the contrary in a double taxation treaty. No other effect of the treaty is overridden.

This change is in principle in taxpayers' favour but is expected to have no practical effect as it is in line with current practice."

[137] The former International Tax Handbook para 1660 provided:

"The retrospective nature of the legislation [in 1987] provoked comment in the professional press and in Parliament. The Government, and later the House, were persuaded as to the propriety of this action because the Section does no more than restore the general understanding of the law and retrospection prevents third parties suddenly deriving a substantial windfall benefit for six years. Although the Section protects from retrospection only those taxpayers who gained a Commissioners' or Court decision before 17 March 1987, similar treatment was allowed to a small number of other taxpayers who were told by the Revenue that their cases would follow the *Padmore* decision.

The provision survived an attack in *Padmore v IRC (No 2)* [2001] STC 280 and survived an EU-law challenge.[138] The same result would now be achieved under the OECD Savings Clause, if applicable.[139]

85.25.4 *"Members of a firm"*

Section 858 only applies to a "member of a firm" and assumed that partnership income could only accrue to the members. This gave rise to a simple avoidance scheme under which:

(1) Two IIP trusts were created.
(2) The trusts carried on business in partnership.

The trustees were members of the partnership, but partnership income accrued to the life tenants who were not members of the partnership and so outside s.858.[140]

Section 858(4) blocked this by giving a wider definition to "members of a firm":

> For the purposes of this section, the members of a firm include any person entitled to a share of income of the firm.

Section 58(4) FA 2008 provides:

> The amendments made by subsections (1) to (3) are treated as always having had effect.

Criticism was also made because the legislation is intended to override the effect of the Jersey Arrangement and any other treaty which the Courts might have found to have similar effect. This 'treaty override' was defended on similar grounds – that it merely puts into effect what was generally understood to be the position. It has not met with any objection from treaty partners."

[138] *Shiner (R, oao) v HMRC* [2011] STC 1878 raising free movement of capital issues.

[139] See 109.5.2 (OECD Model Savings Clause).

[140] The EN to the draft clause published 12 March 2008 provides a somewhat untechnical explanation:
"8. An avoidance scheme purports to exempt from UK tax income received by UK resident individuals by using certain provisions in the UK's bilateral Double Taxation Treaties.
9.This scheme involves the establishment of offshore trusts, (of which the UK individuals are both settlors and beneficiaries) and partnerships (of which the foreign trustees of those trusts are partners).
10. The partnerships acquire the rights to receive the UK individuals' income but the terms of the trusts are such that, as beneficiaries of the trust, the UK individuals retain beneficial entitlement to the income – with the trustees obliged to remit the income to the UK individuals as it arises."

Retrospective legislation without limit of time! The EN to the draft clause provided:

> 11. The users of the scheme claim that, under the terms of the relevant Double Taxation Treaty, the UK is not entitled to tax the partnership income of the foreign trustees. As that income is precisely the same income as that received by the UK individuals as beneficiaries of the trust, they argue that the UK is not entitled to tax the UK individuals on it.
> 12. Legislation was introduced in Finance (No 2) Act 1987, which provided that (as had almost universally been assumed to be the case until a High Court decision to the contrary,) a Double Taxation Treaty did not affect UK residents' liability to UK tax on their share of income or gains from a foreign partnership.
> This new avoidance scheme purports to get round that legislation by claiming that the foreign trustees are the partners rather than the UK individuals.
> 13. The Government believes that a partner for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of the partnership. As such, the UK individuals remain liable to UK tax despite the elaborate, artificial structure designed to exempt them. This clause will put it beyond doubt that the legislation has always had that effect.

As a matter of tax law, was it the case (before the retrospective legislation) that "member of a firm" for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of the partnership? The answer is, no.[141]

As a matter of fact, did the Government believe that to be the case? I think it is a safe bet that if HMRC received expert and impartial advice on the point, it would have been hedged with caveats such that the terms of EN para 13 would not represent a fair and accurate summary of the position.[142]

[141] Partner is a term of partnership law, and in the partnership law sense a person who is entitled to income or gains of a partnership is not as such a partner. HMRC would have to argue that "partner" in s.858 was not used in its partnership law sense, which is a difficult line to take (even in these times of purposive interpretation, though in a tax avoidance case nothing is impossible)+. This is confirmed in *Huitson (R, oao) v* HMRC [2010] STC 715 at [71]; the point was not considered by the CoA.

[142] In Parliament the statement was described as "disingenuous": Public Bill Cttee debate on Finance Bill, 22 May 2008 Hansard col 371. In *Huitson* HMRC wisely

A pressure group lobbied on the issue[143] but that did not produce more than a House of Commons paper on the topic.[144] In the 2013/14 edition of this work, I said:

> Even if the campaign is not successful in repealing s.58 FA 2008, it may have the effect of reducing government enthusiasm for future retrospective legislation.[145]

I doubt if this has proved to be the case.

85.25.5 *DT relief: Partnership gains*

Section 59 TCGA sets out the same rules for CGT:

> (2) Subsection (3) applies if—
>
> (a) a person resident in the UK ("the resident partner") is a member of a partnership which resides outside the UK or which carries on any trade, profession or business the control and management of which is situated outside the UK, and
>
> (b) by virtue of any arrangements that have effect under section 2(1) of TIOPA 2010 ("the arrangements") any of the capital gains of the partnership are relieved from capital gains tax or corporation tax in the UK.
>
> (3) The arrangements (so far as providing for that relief) do not affect any liability to capital gains tax or corporation tax in respect of the resident partner's share of any chargeable gains of the partnership.
>
> (4) For the purposes of subsections (2) and (3) the members of a partnership include any person entitled to a share of chargeable gains of the partnership.

claimed legal professional privilege: [2010] STC 715 at [71].

86.23 International structures

86.1 Partnership income: outline

MacKinlay v Arthur Young McClelland Moores explains the three-stage process for the assessment of partnership profits:[1]

[1] 62 TC 704 at 724.

> There are, in effect, three stages.
>
> [1] [*Computation of partnership income*] First, the profits of the firm for an appropriate basis period must be ascertained. What has to be ascertained is the profits of the firm and not of the individual partners....
>
> [2] [*Allocation of partnership income*] The income of the firm for the year is then treated as divided between the partners who were partners during the year to which the claim relates ... That is the second stage.
>
> [3] [*Computation of tax*] The tax payable is then calculated according to the circumstances of each partner—that is, after taking into account on the one hand any personal allowances, reliefs or deductions to which he is entitled and any higher rate of tax for which he is liable.

86.2 Partnership income: Computation

s.849 ITTOIA	**s.1259 CTA 2009**
(1) If— (a) a firm carries on a trade[2], and (b) any partner in the firm is chargeable to income tax,	(1) This section applies if a firm carries on a trade and any partner in the firm ("the partner") is a company within the charge to corporation tax.
the profits or losses of the trade are calculated on the basis set out in subsection (2) or (3), as the case may require.	(2) For any accounting period of the firm, the amount of the profits of the trade ("the amount of the firm's profits") is taken to be the amount determined, in relation to the partner, in accordance with subsection (3) or (4).
(2) For any period of account in which the partner is a UK resident	(3) If the partner is UK resident— (a) determine what would be the

[2] "Trade" includes business; and s.851 ITTOIA extends the general rule to non-trading income:

> (1) This section applies if—
>
> (a) sections 849 and 850 apply in relation to the profits or losses of a trade carried on by a firm, and
>
> (b) the firm has other income or losses.
>
> (2) Those sections also apply as if references to the profits or losses of the trade were references to the other income or losses.

individual, the profits or losses of the trade are calculated as if the firm were a UK resident individual.	amount of the profits of the trade chargeable to corporation tax for that period if a UK resident company carried on the trade, and (b) take that to be the amount of the firm's profits.
(3) For any period of account in which the partner is non-UK resident, the profits or losses of the trade are calculated as if the firm were a non-UK resident individual...	(4) If the partner is non-UK resident— (a) determine what would be the amount of the profits of the trade chargeable to corporation tax for that period if a non-UK resident company carried on the trade, and (b) take that to be the amount of the firm's profits.

Section 849(4) ITTOIA, which concerns losses, is not considered here. EN ITTOIA explains:

> 1714. If some of a firm's partners are resident in the UK and some are not, the profits of the firm's trade must be calculated on different bases. For the resident partners, the calculation includes profits arising outside the UK; for the non-resident partners, the calculation is restricted to profits arising in the UK...
> 1716. ... It is possible for a partner to be both resident (for one tax year) and non-resident (for another) within a single period of account. In such a case, the firm's profit has to be calculated twice to arrive at the partner's share of the profits.
> 1717. Subsection (2) sets out the normal basis for calculating the profits, for an individual resident in the UK. The profits are calculated as if the firm were an individual resident in the UK.
> 1718. Subsection (3) sets out an additional basis for calculating the profits. If the partner (who may be a non-resident company liable to income tax) is not resident in the UK the profits of the firm are calculated as if the firm were an individual not resident in the UK.

In *Vaines v HMRC*:[3]

> The trade in question is the actual trade of [the partnership], which section 863 (1) treats as carried on in partnership by its members. It is

[3] [2018] EWCA Civ 45 at [17].

> not a separate trade carried on by [the UK partner] alone, but the trade of [the partnership] carried on collectively by himself and his fellow partners

The BI Manual provides:

> **BIM72235 computation and assessment: individual, company and non-resident members** [Dec 2013]
> ... where one or more of the partners is a non-resident individual then the share of profits allocated to any such partner must be computed as if the partnership were a non-UK resident individual. In such case the partnership may need to submit an additional set of computations.
> ***Example*** (Mr Armstrong and Mrs Beeton)
> Mr A, a UK resident, and Mrs B, a non-resident, are in partnership. The partnership's world-wide trade profit amount to £10,000 and included in that sum is its UK profit of £7,500. Partnership profits are shared equally. Two tax computations are required on the following lines

Computation for resident partner

Step 1	Trade profits		£10,000
Step 2	Allocation	Mr A	£5,000
		Mrs B	£5,000
Step 3	Profit taxable on Mr A		£5,000

Computation for non-resident partner

Step 1	Trade profits		£7,500
Step 2	Allocation	Mr A	£3,750
		Mrs B	£3,750
Step 3	Profit taxable on Mrs B		£3,750

The BI Manual provides:

> **BIM82015 Separate Business For Tax Purposes** [May 2020]
> Where persons join in partnership, the business carried on by the partnership is a separate business and a separate source for Income Tax and Corporation Tax purposes.
> The business carried on by a partnership of X & Y is separate from any business carried on separately by either X or Y.

86.2.1 *Split years*

Section 849(3A) ITTOIA provides a split-year relief:

> For any tax year that is a split year as respects the partner, this section has effect as if the partner were non-UK resident in the overseas part of the year.

This is the same as the split year relief which applies to trading income; see 21.4.5 (Trading income of split year).

86.3 Partnership income: Attribution

The general rule is that the partners may share income as they wish, and the tax follows accordingly. Section 850 ITTOIA/s.1262 CTA 2009 provide:

s. 850 ITTOIA	**s.1262 CTA 2009**
(1) For any period of account a partner's share of a profit or loss of a trade carried on by a firm is determined for income tax purposes in accordance with the firm's profit-sharing arrangements during that period. This is subject to sections 850A to 850D [Allocation of losses; mixed partnership code].	(1) For any accounting period of a firm a partner's share of a profit or loss of a trade carried on by the firm is determined for corporation tax purposes in accordance with the firm's profit-sharing arrangements during that period. This is subject to sections 1263 to 1264A [allocation of losses; mixed partnership code adjustment for CT][4] and section 12ABZB of TMA 1970 (partnership return is conclusive).
(2) In this section and sections 850A and 850B	(4) In this section and sections 1263 and 1264
"profit-sharing arrangements" means the rights of the partners to share in the profits of the trade and the liabilities of the partners to share in the losses of the trade.	[identical]

The BI Manual provides:

> **BIM82055 Sharing Profits/Losses** [May 2020]
> Profits, losses or other income may be shared as the partners may mutually agree from time to time. The sharing ratio need not be in proportion to contributions of effort or capital. It is not necessary for the partners to share profits and losses in the same proportions, nor income from other sources in the same proportions as trading or professional

[4] See 86.16.3 (Adjustment for corporation tax).

> income. A partner's share of the income on which they are chargeable to tax is computed according to their entitlement in the partnership's period of account.
>
> The allocation of profits or losses for a period of account cannot be varied retrospectively after the end of that accounting period - see *Bucks v Bowers* [1969] 46 TC 267...

In *HMRC v BlueCrest Capital Management*:[5]

> [There is no] necessary correlation between the size of a partner's share and the nature or value of the partner's contribution to the business. In principle, it is open to the partners to agree the shares in which the profits will be divided between them, and tax law normally follows and respects such agreement.

In the same case, the UT said:[6]

> ... partners are taxed on their shares of the profits of the partnership for a particular accounting period and a partner's drawings (either in anticipation of, or on account of annual profits) or the withdrawal of partnership capital or property are not taxable income in his or her hands.

This work does not discuss:

Topic	**ITTOIA**	**CTA 2009**
Computation of losses		
Attribution of losses	s.850A, 850B	s.1263, 1264
Salaried members/disguised employment	s.863A-863L	

These topics would require chapters to themselves, though I hope to consider them in a future edition.

86.3.1 *Salary/Guaranteed profit share*

In *Mackinlay v Arthur Young Mcclelland Moores*:[7]

> A partner working in the business or undertaking of the partnership is in a very different position from an employee. He has no contract of employment .. If, with the agreement of his partners, he pays himself a "salary," this merely means that he receives an additional part of the profits before they fall to be divided between the partners in the

[5] [2023] EWCA Civ 1481 at [72].

[6] [2022] UKUT 200 (TCC) at[89]. The point was not questioned on appeal.

[7] [1990] 2 AC 239 at p.249

appropriate proportions. But the "salary" remains part of the profits.

The CT Manual provides:

> **CTM36560 investment partnerships** [May 2020]
> ...The business of [investment] partnerships is the making and managing of investments. Although they are partnerships and the taxation rules apply on that basis, the limited partners probably regard the scheme as a form of unit trust or other investment fund. They put up capital for investment in a number of unquoted companies on their behalf. They expect to pay to have the fund managed, so they let the general partner take a share of the income and gains in excess of their or its contribution of capital.
> If this were an ordinary investment fund, and not a partnership, the general partner would be the fund manager and its share of the partnership profits would be the annual percentage management fee. A feature of these partnerships is that in years when the profits are too low to meet the general partner's guaranteed profit share, the general partner will probably take an interest free loan from the capital accounts of the other partners. Such a loan is not regarded as taxable income in the hands of the general partner. The loan will be repaid out of its share of future partnership profits and the general partner will be taxed on it at that stage.

For fund managers, this is now caught by the disguised investment management fee code;[8] but the point would still apply to other partnerships.

86.4 Mixed partnership code

Sections 850C-E ITTOIA and s.1264A CTA 2009 provide a set of rules which I call **"the mixed partnership code"**. The PM uses the term "mixed membership partnerships".

In general:

(1) The use of a UK company to save the difference between IT and CT rates is not regarded as objectionable, even if the tax saving is boosted by providing services to the company at an undervalue.[9]

(2) Partners may attribute partnership income between the partners as they wish.[10]

[8] See 73.3 ("Disguised fee").

[9] See 47.3.2 (Underlying company income).

[10] See 86.3 (Partnership income: Attribution).

The mixed partnership code provides limited exceptions to these general rules.

The background can be found in consultation and response papers:[11]

- Partnerships: A review of two aspects of the tax rules (May 2013)
- Partnerships: A review of two aspects of the tax rules: Summary of Responses (Dec 2013)

These are now of historical interest only.

The main rule is in s.809C and this is supplemented by s.809D. The s.809D rule is restricted by tax-advantage purpose requirement, but the s.809C rule is not, so it may apply to wholly commercial arrangements without a tax advantage purpose.

86.5 s.850C application conditions

Section 850C(1) ITTOIA provides:

> Subsections (4) and (5) apply if—
> (a) for a period of account ("the relevant period of account")—
> (i) the calculation under section 849[12] in relation to an individual partner ("A") (see subsection (6)) produces a profit for the firm, and
> (ii) A's share of that profit determined under section 850[13] or 850A ("A's profit share") is a profit or is neither a profit nor a loss,
> (b) a non-individual partner ("B") (see subsection (6)) has a share of the profit for the firm mentioned in paragraph (a)(i) ("B's profit share") which is a profit (see subsection (7)), and
> (c) condition X or Y is met.

I refer to these conditions as **"s.850C application conditions"**.

In *Walewski v HMRC*:[14]

> Section 850C applies "for a period of account" (see subsection (1)(a)). Absent any words of limitation, it applies if the various conditions are met at any point in the period of account. As a matter of construction, there is no requirement that A be a partner for more than a moment of

[11] *https://www.gov.uk/government/consultations/a-review-of-two-aspects-of-the-tax-rules-on-partnerships*

[12] See 86.2 (Partnership income: Computation).

[13] See 86.3 (Partnership income: Attribution).

[14] [2021] UKUT 133 (TCC) at [32].

> time within the relevant period of account for the purposes of section 850C, so long as A receives a share of some profit (see subsection (1)(a)(ii)).

Our dramatis personae are A and B.[15] One might refer to them as

A: transferor/individual member
B: transferee/corporate member

(using the terms transferor/transferee loosely but not inappropriately).

86.5.1 *Individual/non individual*

Under s.850C application conditions (a) and (b):
(1) A (the transferor) must be an individual partner
(2) B (the transferee) must be a non-individual partner

Section 850C(6) ITTOIA provides:

> [a] A partner in a firm is an "individual partner" if the partner is an individual and "non-individual partner" is to be read accordingly;
> [b] but "non-individual partner" does not include the firm itself where it is treated as a partner under section 863I (allocation of profit to AIFM firm).[16]

This definition only applies for s.850C, so it has to be incorporated by reference into s.850D.[17]

86.6 Condition X: Deferred profit

Section 850C(2) ITTOIA provides:

> Condition X is that it is reasonable to suppose[18] that—
> (a) amounts representing A's deferred profit (see subsection (8)) are included in B's profit share, and
> (b) in consequence, both
> [i] A's profit share and
> [ii] the relevant tax amount (see subsection (9))
> are lower than they would otherwise have been.

[15] The drafter may have in mind the characters A and B in *Mikado* Act 2 ("See how the Fates their gifts allot").

[16] See 86.17 (Alternative investment fund manager).

[17] See s.850D(6) ITTOIA.

[18] See App. 2.24 (Reasonable-to-assume).

Condition X is a set of three conditions, which I call Condition X(a) and X(b)[i] and [ii].

If condition X(a) is met, conditions X(b)[i] is bound to be satisfied, and condition X(b)[ii] is highly likely to be satisfied.

HMRC refer to condition X cases as “deferred profit arrangements”.

86.6.1 *Deferred profit*

This is the key term for condition X. Section 850C(8) ITTOIA provides a wide definition:

> “A’s deferred profit”—
> (a) [i] is any remuneration or other benefits or returns the provision of which to A has been deferred
> [ii] (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise), and
> (b) [i] includes A’s share (as determined on a just and reasonable basis) of any remuneration or other benefits or returns the provision of which to A and one or more other persons, taken together, has been deferred
> [ii] (whether pending the meeting of any conditions (including conditions which may never be met) or otherwise).

This only applies for s.850C, so it has to be incorporated by reference into s.850D.[19]

The Partnerships consultation paper provides:

> 3.17 Such provisions are most commonly seen in employment contracts where a company wishes to incentivise long term performance of its employees. However, the same effects can be produced by partnership agreements. For example, a partnership that manages investments will make profits through fees paid to it by the funds. The partnership remuneration agreement may allot those profits to particular members but, in order to incentivise long-term performance, may require a proportion of those profits to be retained within the partnership until a deferral period expires. To reduce the upfront tax charge, such “retained” profits can, instead, be initially allocated to a company member in which the members of the partnership hold an equity stake. When the profits finally vest with the member, the company is dissolved and the proceeds are distributed to the member.
> ..

[19] See s.850D(11) ITTOIA.

> 3.19 In working capital arrangements, the partnership business model envisages that profits will be retained in the business, to be used as additional "working capital" to finance the growth of the business. The post-tax working capital can be maximised by allocating profits to a company member that pays tax at a rate lower than that of the individual members.

PM provides 2 straightforward examples:

> **PM218000 — Condition X** [July 2019]
>
> ...
>
> *Example 1 (Kate)*
>
> This example looks at a deferred remuneration scheme, where a bonus is initially allocated to a corporate member.
>
> K is a member of XYZ LLP. She is awarded a bonus that is conditional upon the successful outcome of a project she has been involved in. The bonus is initially allocated to XYZ Corporate Member Ltd.
>
> This is a deferred profit arrangement; the fact that it is conditional upon a future event does not alter this.
>
> The profit deferral arrangements may operate in relation to a class of members rather than a particular individual, as set out in the example below:
>
> *Example 2*
>
> Y LLP has 50 individual members and a corporate member N Ltd. The 50 individual members are the shareholders in N Ltd. Profits allocated to N Ltd are injected as capital contribution into Y LLP; they are not paid out, by dividend or otherwise to the shareholders. However Y LLP keeps a memorandum note which tracks the longer-term entitlement of each of the individual members to a respective portion of each year's N Ltd profit allocation based on the partnership's profit sharing arrangements in that year. When an individual member retires from the LLP, he is paid out that cumulative entitlement and he ceases to participate as a shareholder in N Ltd.
>
> The profit share of N Ltd is attributable to each of the individual members in proportion to the entitlements tracked within the memorandum note and which will be paid out to them on retirement. The amounts represent the deferred profits of each individual which will be reallocated under the excess profits allocation rules.
>
> If there were no separate memorandum, but the ultimate entitlement in relation to the profits allocated to N Ltd were to depend upon discussion at the time of the individual member's retirement, then each year's reallocation would be based on an assessment of how much of the total deferred profit allocated to N Ltd in that year is, on a just and

> reasonable basis, properly attributable to the individual. This would in practice mean that the total of N Ltd's profit for each year would have to be re-allocated amongst the individuals to whom the deferred profit arrangements were relevant. No profit would remain chargeable to corporation tax on N Ltd.

86.6.2 *"The relevant tax amount"*

This term matters for conditions X(b)[ii] and Y: the relevant tax amount must be lower than it would otherwise have been. Section 850C(9) ITTOIA provides the definition:

> "The relevant tax amount" is the total amount of tax which, apart from this section, would be chargeable in respect of A and B's income as partners in the firm.

86.7 Condition Y: Excess profit allocation

Section 850C(3) ITTOIA provides:

> Condition Y is that—
> (a) B's profit share exceeds the appropriate notional profit (see subsections (10) to (17)),
> (b) A has the power to enjoy B's profit share ("A's power to enjoy") (see subsections (18) to (21)), and
> (c) it is reasonable to suppose that—
> (i) the whole or any part of B's profit share is attributable to A's power to enjoy, and
> (ii) both A's profit share and the relevant tax amount (see subsection (9)) are lower than they would have been in the absence of A's power to enjoy.

Condition Y contains a set of 3 conditions, which I call Conditions Y(a), Y(b), and Y(c).

The PM refers to condition Y as "excess profit allocation rules".

86.8 Condition Y(a): Profit share excessive

Section 850C(3) ITTOIA provides:

> Condition Y is that—
> (a) B's profit share exceeds the appropriate notional profit

Under condition Y(a) we need to ascertain:
(1) The profit share of B (transferee) and
(2) B's appropriate notional profit

PM provides:

> **PM219000 - Condition Y** [July 2019]
> ... The fact that the Condition was not met in a particular period does not mean that it will not be met later even if the members of the partnership and ownership of the non-individual member remain the same.
> It is therefore important to check every period.

86.8.1 *B's profit share*

This term is defined twice in the excess profits code, but in effectively the same terms. It is convenient to set the definitions side by side:

s.850C(7) ITTOIA	**s.850D(7) ITTOIA**
B's profit share is to be determined by applying section 850 and, if relevant, section 850A in relation to B for the relevant period of account (whether or not B is chargeable to income tax) on the assumption that the calculation under section 849 in relation to B produces the profit for the firm mentioned in subsection (1)(a)(i).	B's profit share is to be determined by applying section 850 and, if relevant, section 850A in relation to B for the relevant period of account (whether or not B is chargeable to income tax) on the assumption that the calculation under section 849 in relation to B produces the profit for the firm mentioned in subsection (1)(b).

This only applies for s.850C/D, so it has to be incorporated by reference into s.850E.[20]

86.9 Appropriate notional profit

This is a key term for condition Y(a): B's profit share must exceed the appropriate notional profit. Section 850C(10) ITTOIA provides the definition:

> "The appropriate notional profit" is the sum of
> [a] the appropriate notional return on capital and
> [b] the appropriate notional consideration for services.

86.9.1 *Notional return on capital*

This is the first element of appropriate notional profit. Section 850C(11)

[20] See s.850E(3) ITTOIA.

ITTOIA provides:

> "The appropriate notional return on capital" is—
>
> (a) the return which B would receive for the relevant period of account in respect of B's contribution to the firm were the return to be calculated on the basis mentioned in subsection (12), less
>
> (b) any return actually received for the relevant period of account in respect of B's contribution to the firm which is not included in B's profit share.

86.9.2 *B's contribution to firm*

Section 850C ITTOIA provides:

> (13) For the purposes of subsections (11) and (12) B's contribution to the firm is amount A determined under section 108 of ITA 2007 (meaning of "contribution to the LLP").
>
> (14) That section is to be applied—
>
> (a) reading references to the individual as references to B and references to the LLP as references to the firm, and
>
> (b) with the omission of—
>
> (i) subsections (5)(b) and (9), and
>
> (ii) in subsection (6) the words from "but" to the end.

Amended as s.850C(14) directs, s.108 ITA provides:

(2) Amount A is the amount which ~~the individual~~ B has contributed to the ~~LLP~~ firm as capital less so much of that amount (if any) as is within subsection (5).

(3) In particular, ~~the individual~~ B's share of any profits of the ~~LLP~~ firm is to be included in the amount which ~~the individual~~ B has contributed to the ~~LLP~~ firm as capital so far as that share has been added to the ~~LLP~~ firm's capital.

(4) In subsection (3) the reference to profits is to profits calculated in accordance with generally accepted accounting practice (before any adjustment required or authorised by law in calculating profits for income tax purposes).

(5) An amount of capital is within this subsection if it is an amount which–

(a) ~~the individual~~ B has previously drawn out or received back,

~~(b) the individual draws out or receives back during the period of 5 years beginning with the relevant time,~~

(c) ~~the individual~~ B is or may be entitled to draw out or receive back at any time when ~~the individual~~ B is a member of the ~~LLP~~ firm, or

(d) ~~the individual~~ B is or may be entitled to require another person to reimburse to ~~the individual~~ B.

(6) In subsection (5) any reference to drawing out or receiving back an amount is to doing so directly or indirectly but does not include drawing out or receiving back an amount

which, because of its being drawn out or received back, is chargeable to income tax as profits of a trade.

(7) Amount B is the amount of ~~the individual~~ B's liability on a winding up of the ~~LLP~~ firm so far as that amount is not included in amount A.

(8) For the purposes of subsection (7) the amount of ~~the individual~~ B's liability on a winding up of the ~~LLP~~ firm is the amount which–

(a) ~~the individual~~ B is liable to contribute to the assets of the ~~LLP~~ firm in the event of its being wound up, and

(b) ~~the individual~~ B remains liable to contribute for the period of at least 5 years beginning with the relevant time (or until the ~~LLP~~ firm is wound up, if that happens before the end of that period).

~~(9) This section needs to be read with [section 113A and any regulations made under section 114 (exclusion of amounts]1 in calculating the individual's contribution to the LLP for the purposes of section 107).~~

PM provides:

> **PM221000 - The appropriate notional return on capital** [July 2019]
> ... The capital is the amount of money or other property that all the members have contributed, to the permanent endowment of the firm. If the member has contributed an asset, rather than money, then the capital contribution is the market value at the time of transfer.
>
> *Example 1*
> C Ltd transferred a property to the LLP. It had originally cost £100,000, but the market value at the time of transfer was £250,000. The capital account of C Ltd was credited with £100,000, the historic cost rather than the market value. The property is currently worth £500,000
> The capital contributed was the market value at the date that it was contributed, £250,000.
>
> **Capital is at risk**
> The capital contributed does not include sums that the member is entitled to withdraw, or sums that they do not really have at risk, because there are arrangements under which they will be reimbursed.
>
> **Current Account is not capital**
> In addition to their capital, a member is likely to have what is sometimes called a current account. This account reflects the member's day-to-day balance with the firm reflecting things such as their entitlement to a profit share, tax account and drawings. The current account balance is not capital contributed.
>
> **Undrawn Profits are not capital**
> An undrawn profit share is not capital, but the members can agree to convert it into capital just as they can agree to pay a further sum in as capital.

In *Walewski v HMRC*:[21]

> 177. the £10 million of unallocated, undrawn capital retained in AAM ... cannot be treated as "capital" for these purposes.
> 178. We say this for three reasons:
> (1) In order to constitute a "contribution" of capital, it must first belong to the entity (W Ltd) which is making the contribution. ... this £10 million had not been allocated to W Ltd and therefore did not belong to W Ltd. In accordance with AAM partnership agreement, profits had to be allocated by the management committee and unallocated profits were held in a retention account for the benefit of AAM. We do not see how the fact that W Ltd had paid tax on this amount under the specific tax code applying to LLPs alters this conclusion.
> (2) Even if we are wrong on this, we did not see any evidence that this £10 million had been properly characterised as "capital" by AAM, certainly not in the technical sense required by s 850C(3) and not in any other meaningful sense, such as in accordance with the relevant SORP.
> (3) Finally, Mr Walewski's interpretation, that the provision of any "capital like" funds which generated value for AAM should be taken account of as part of the notional consideration provided by W Ltd, however defined, is not tenable in the context of this legislation which has a specific provision dealing with returns on capital as defined.

86.9.3 *Rate of interest*

Section 850C(12) ITTOIA explains basis of the notional profit computation:

> The return mentioned in subsection (11)(a) is to be calculated on the basis that it is a return which is—
> (a) by reference to the time value of an amount of money equal to B's contribution to the firm, and
> (b) at a rate which (in all the circumstances) is a commercial rate of interest.

PM provides:

> **PM221000 - The appropriate notional return on capital** [July 2019]
> *Rate of Interest*
> The legislation does not set a specific rate. The rate will vary as the appropriate commercial rate will vary from case to case and from time to time:

[21] [2020] UKFTT 58 (TC).

- The commercial rate will reflect the level of risk involved.
- Where the level of capital varies during the relevant period of account, the notional return must be calculated on these varying amounts.

The rate however must be limited to a reasonable rate of interest. It is not relevant that an equity return on the same investment might have been much greater.

The rates charged by so-called "payday" lenders or on credit card debts are not appropriate commercial comparators.

If the member receives some other form of return on capital, other than a share of the profit (for example, a fee), then this is deducted in arriving at the limit on the notional return.

Example 2

This example shows that the notional return is based upon a commercial rate of interest.

B Ltd has invested £10,000 in ABC LLP. It receives no return on this other than its profit share.

ABC LLP is paying 2% on loans on the commercial market, reflecting its good credit rating. This represents a commercial rate, so B Ltd has an appropriate notional return on capital of £200.

86.9.4 *Notional consideration for services*

This is the second element of appropriate notional profit. Section 850C ITTOIA provides:

> (15) "The appropriate notional consideration for services" is—
>
> (a) the amount which B would receive in consideration for any services provided to the firm by B during the relevant period of account were the consideration to be calculated on the basis mentioned in subsection (16), less
>
> (b) any amount actually received in consideration for any such services which is not included in B's profit share.
>
> (16) The consideration mentioned in subsection (15)(a) is to be calculated on the basis that B is not a partner in the firm and is acting at arm's length from the firm.

PM provides:

> **PM222000 - The appropriate notional consideration for services**
> [July 2019]
>
> The appropriate notional consideration for services is the arm's length value of any services provided by that member for the period, less any other amount received for those services (for example, a service fee)

that is not part of the profit share.

In most cases, this notional consideration should be no more than the cost to the company in providing the services plus a modest mark-up. If any services provided involve other members of the partnership (including in particular all the individual members), then the value of these services is not included in arriving at the notional return, for further guidance on this see PM223000.

Example 1

This example shows that it is important to look at what service is actually being provided.

The members of Farm LLP are two individuals, A and B, and their company C Ltd. In addition to being a member of Farm LLP, C Ltd provides contractor services to farms in the area. C Ltd also leases equipment to farms, including Farm LLP.

Farm LLP is a mixed membership partnership. C Ltd is providing services to Farm LLP, so the question is what is the appropriate notional consideration for services?

C Ltd is being paid for contractor services on an arm's length basis directly by its customers. This is separate from any services that C Ltd provides to Farm LLP so is not taken into account under the mixed membership rules.

In addition, C Ltd is providing the use of its equipment to Farm LLP. The arm's length value of this, using the amounts it charges to other farms as a comparable, is £10,000.

C Ltd has an appropriate notional consideration for those services of £10,000. This is because it is providing equipment to Farm LLP.

Example 2

This example looks at where a corporate member provides the partnership with the use of an asset, such as land.

The members of Agri LLP are two individuals, H and J, and their company HJ Ltd. HJ Ltd owns some of the land farmed by Agri LLP, no rent is being charged by HJ Ltd.

Agri LLP is a mixed membership partnership. HJ Ltd is providing services to Agri LLP, so the question is what is the appropriate notional consideration for services?

The appropriate notional consideration for services is the arm's length rent for the land.

Example 3

This example looks at where the partnership is paying rent but the terms have not been reviewed.

The facts are the same as in example 6, except that a rent is being paid.

> This was set a number of years ago, and has not been reviewed.
> The appropriate notional consideration for services is the arm's length rent for the land less the rent paid.

86.9.5 *Disregard of partner services*

Section 850C(17) ITTOA provides:

> Any services, the provision of which involves any partner in the firm in addition to B, are to be ignored for the purposes of subsection (15).

PM provides:

> **PM223000 - The appropriate notional consideration for services: restriction** [July 2019]
> ... A purpose of the excess profit allocation rules is to ensure that the profits generated by an individual's work for the partnership are taxed on that individual rather than on a corporate partner at CT rates.
>
> - This includes where the individual carries out work for the partnership either as an employee or contractor to the corporate member.
> - It applies where there is a chain of intermediaries between the partnership and the individual, no matter how long the chain, nor how complex.
>
> This prevents arguments about whether the individual carries out some services as a partner other as employee of the corporate member. The legislation operates on the premise that the company is not to be entitled to any profit share for these services and as if any profit actually allocated to the company were treated for tax as reallocated to the individual member.

PM provides three straightforward examples:

> *Example 1*
> This example shows how there is no notional consideration for services when the services involve other partners.
> Continuing with example 3 at PM222000, B Ltd is a member of ABC LLP and provides advertising services for ABC LLP. The work is carried out for B Ltd by A, who is also a member of ABC LLP. B Ltd provides no other services to ABC LLP.
> B Ltd is treated as providing no services as the only service provided involves another member of the LLP. Therefore, the appropriate notional consideration for services is nil.
> As such, B Ltd has an appropriate notional profit of £200, consisting purely of its notional return on capital.

Example 2
This example looks at where the partners themselves are also working for the corporate member.
HED LLP has as members D, E, F, G and H together with a corporate member, HED Ltd. HED Ltd provides management services to the LLP which is carried out by H, E and D as directors of HED Ltd.
Whilst the work was carried out by the directors of the company, these directors are also members in their own right. As the work was done by members the appropriate notional consideration for services is NIL. That the work was done in their capacity as directors of the corporate member makes no difference.
Sometimes work may be done partly by other members and partly by non-members.

Example 3
This example looks at where people other than the partners themselves are working for the corporate member.
DHE LLP has as members D, E, F, and H together with a corporate member, DE Ltd. DE Ltd provides management services to the LLP which is carried out by three unconnected individuals and D and E as directors of DE Ltd.
The appropriate notional consideration for the work done by D and E, who are members of DHE LLP, services is NIL. That the work was done in their capacity as directors of the corporate member makes no difference.
If the work done by the three non-members can be distinguished from the work done by the members then the appropriate notional consideration for services is arm's length value of these services. If the work cannot be distinguished then the appropriate notional consideration is NIL.

Example 4
This example looks at where the services are provided by members via a chain of intermediaries.
The members of FM LLP are the individuals M, N & O and a corporate member X Ltd.
M, N and O are also employees of Y Ltd an offshore employer.
Y Ltd contracts with X Ltd to supply it with the services of M, N and O.
X Ltd is the managing member of FM LLP, with the work being done by M, N and O on secondment to X Ltd. X Ltd receives a profit share for acting as managing member.
The question is what is the appropriate notional consideration for

services?

The legislation looks at whether the work involves any member other than that corporate member. It does not look at the link between that member and the corporate member.

In this case, the work is actually done by individuals who are members of FM LLP. As a result the appropriate notional consideration for services is NIL.

Example 5

This example looks at how the test is whether the individual provides the services, not the nature of the services.

EHD LLP has as members D, E, F, G and H together with a corporate member EHD Ltd. Under the LLP agreement the management of the LLP is delegated to EHD Ltd, the individual members are specifically excluded from taking part. As members, the individuals D, E and H manage portfolios of investments. As directors of EHD Ltd, they manage the LLP.

The LLP is managed by the directors of the company, these directors are also members in their own right. As the work was done by members the appropriate notional consideration for services is NIL.

The fact that under the LLP agreement the individuals are not allowed to take part in the management of the LLP does not affect the position under the excess profits allocation rules. The services provided by the corporate member involved individual members, so no credit is given for the services provided.

86.10 Condition Y(b): Power to enjoy

Section 850C(3) ITTOIA provides:

> Condition Y is that ...
>
> (b) A has the power to enjoy B's profit share ("A's power to enjoy")...

Section 850C(18) ITTOIA provides:

> A has the power to enjoy B's profit share if—

There follow 3 sets of conditions, which I call **"PtoE conditions (a)(b)(c)"**.

I write Power to Enjoy with initial capitals, to indicate the technical nature of the term, but it is so wide as to justify using scare quotation marks.

The definition only applies for s.850C, so it has to be incorporated by reference into s.850D.[22]

86.10.1 *PtoE condition (c): Enjoyment conditions*

It is convenient first to consider PtoE condition (c).
Section 850C(18) ITTOIA provides:

> A has the power to enjoy B's profit share if ...
> (c) any of the enjoyment conditions (see subsection (20)) is met in relation to B's profit share or any part of B's profit share.

Section 850C(20) ITTOIA provides:

> The enjoyment conditions are—
> (a) B's profit share, or the part, is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of A, whether in the form of income or not;
> (b) the receipt or accrual of B's profit share, or the part, by or to B operates to increase the value to A of any assets held by, or for the benefit of, A;
> (c) A receives or is entitled to receive at any time any benefit provided or to be provided (directly or indirectly) out of B's profit share or the part;
> (d) A may become entitled to the beneficial enjoyment of B's profit share, or the part, if one or more powers are exercised or successively exercised by any person;
> (e) A is able in any manner to control (directly or indirectly) the application of B's profit share or the part.

This part of the definition of Power to Enjoy is based on power to enjoy in s.731.[23] But the scope is greatly increased by s.850C(21) ITTOIA:

> In subsection (20) references to A include any person connected with A apart from B.

PM provides:

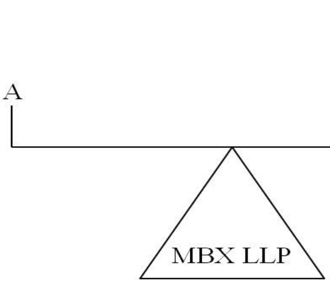
> **PM227000 Enjoyment Conditions** [July 2019]
> ... *Example 1*
> This is an example of a farming partnership where the landlord is represented by a corporate member.
> A farm in Scotland is run as a partnership between the tenant farmer

[22] See s.850D(13) ITTOIA.
[23] See 49.15 ("Power to enjoy").

and a limited company owned by the landlord, who is not connected to the tenant.
This is a mixed membership partnership, but none of the enjoyment conditions are met.
The tenant farmer has no connection with the corporate member other than that they are partners in running the farm. The excess profit allocation rules do not apply.

The excess profit allocation rules are about the "power to enjoy". The fact that the individual is not currently withdrawing any form of value from the non-individual does not alter the position.

Example 2
This example looks at where the enjoyment conditions are met but the profits are not currently being paid out.



A and his personal company A Ltd are both members of MBX LLP. Profits that can be withdrawn are allocated to A. The profits that A does not need to withdraw, for example as the LLP needs the money to finance expansion, are allocated to his personal company. In practice, A does not withdraw any money from A Ltd.
The excess profit allocation rules apply.
The key is that A Ltd is only getting the profit share because of A's power to enjoy and the relevant tax amount is lower as a result of the arrangements. That A chooses not to extract the profits allocated to A Ltd at that time does not alter the fact that he has the power to enjoy them.
It is also possible that Condition X (deferred profit arrangements) applies to this arrangement, see PM218000.[24]

86.10.2 *Condition (a): A connected with B*

Section 850C(18) ITTOIA provides:

[24] See 86.6 (Condition X: Deferred profit).

> A has the power to enjoy B's profit share if—
>
> (a) A is connected with B by virtue of a provision of section 993 of ITA 2007 (meaning of "connected" persons) other than subsection (4) of that section ...

This applies where A is connected with B but for this purpose the connection of being a partner (s.993(4)) does not count.[25] That rule is needed because otherwise A is always connected with B.

By contrast, in applying the connected person test for condition (c) (enjoyment conditions) A's partners (other than B) and their relatives do count as connected persons.

86.10.3 *PtoE condition (b): CT arrangements*

Section 850C(18) ITTOIA provides:

> A has the power to enjoy B's profit share if ...
>
> (b) A is a party to arrangements[26] the main purpose, or one of the main purposes, of which is to secure that an amount included in B's profit share—
>
> (i) is charged to corporation tax rather than income tax, or
>
> (ii) is otherwise subject to the provisions of the Corporation Tax Acts rather than the provisions of the Income Tax Acts ...

PM provides:

> **PM226000 - Arrangements to secure corporation tax rather than income tax treatment** [July 2019]
>
> [PM summarises s.850C(18)(b) and continues:] This may, for example, be the case because the corporate member is able to obtain relief under Corporation Tax rules for amounts that would not be deductible under Income Tax provisions.
>
> This rule applies even if there is no economic connection between the individual and the corporate member.
>
> The legislation applies both where the intention is to ensure that the sum is taxed at Corporation Tax rates, rather than Income Tax rates, and also where the aim is to access a relief that is only available for corporation tax payers.

[25] See 104.18 (Connected: Partners).

[26] Section 850C(19) provides the standard (unnecessary) IT definition of "arrangements"; see App.2.2.3 (Definitions of "arrangement").

86.11 PtoE condition Y(c): PtoE is cause

Section 850C(3) ITTOIA provides:

> Condition Y is that ...
> (c) it is reasonable to suppose[27] that—
> (i) the whole or any part of B's profit share is attributable to A's power to enjoy, and
> (ii) both
> [A] A's profit share and
> [B] the relevant tax amount (see subsection (9))
> are lower than they would have been in the absence of A's power to enjoy.

Condition Y(c) is itself a set of 2 conditions, which I call Y(c)(i) and Y(c)(ii), and Y(c)(ii) can itself be regarded as two conditions [A] and [B].

In short, the Power to Enjoy must be the driver of the arrangement.

A corporate partner may be used for technical reasons (because a LLP cannot have just one member) and only receive nominal profits. The nominal profits would not be attributable to A's power to enjoy and would not meet condition Y(c)(i).

HMRC guidance paraphrases the test in the following ways:

- *Influence:* Is the profit share influenced by the power to enjoy?
- *But-for test:* would B (the corporate member) not have received this profit but for A's power to enjoy? Would A allow profits to be allocated to B Ltd if A did not have the power to enjoy those profits?
- *Economic connection:* does the economic connection between A and B result in profit being shifted from A to B, the non-individual

These may be helpful paraphrases, though one must finally return to the words of the statute. The first two of these paraphrases are in this PM passage:[28]

> **PM228000 Is The Profit Share Influenced By The Power To Enjoy?**
> [July 2019]
> ...If one or more individual members own the corporate member, and the corporate member is allocated any residual profit, after the individuals have been allocated a share, then it is reasonable to suppose that the

[27] See App.2.24 (Reasonable-to-assume).

[28] For the economic consequences, see 86.18 (Business transferred to partnership).

corporate member would not have received this profit but for the power to enjoy.

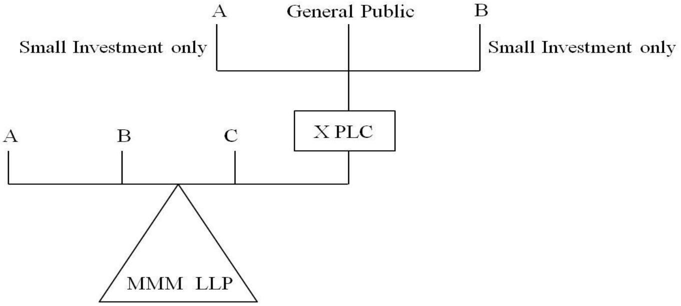
The individual may have an interest in the non-individual partner but this may be so small that it is clear that on a realistic view of the facts the profit share has not been affected.

Example 1

This example looks at where an individual member has a small investment in a corporate member such as a quoted company.

MMM LLP has members, A, B and C, together with X Plc, which is a listed on a major exchange.

A has a small investment in X Plc as part of a share portfolio. B has a small investment as she used to work for X Plc and received the shares under an incentive scheme. There are no other arrangements by which they can benefit from the profit share of X Plc



The HMRC analysis is as follows:

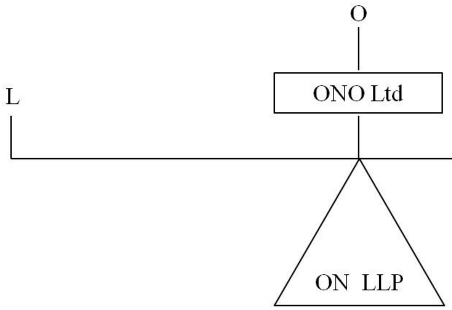
It would not be reasonable to suppose that the profit share of X Plc has been increased because A and B have shares. Their holdings are such that they could not have influenced the allocation of profits to X Plc.

The crucial factor for the mixed membership partnership legislation to apply is that there has been a diversion of profits from an individual to a non-individual member. Profits of a non-individual member can only be reallocated to an individual member to the extent that it is reasonable to suppose that those profits are attributable to the individual member’s power to enjoy them. This is to be determined on a just and reasonable basis.

Example 2

This example looks at where an individual assigns part of their interest in the LLP to their company.

O is a member of ON LLP. He sells part of his interest in the LLP to his company ONO Ltd, which becomes a member of ON LLP.



Following the sale, O's share of the profit is reduced, and what he terms an "equity profit" is allocated to ONO Ltd.

ON LLP is a mixed membership partnership. ON Ltd provides no services or capital to ON LLP so the appropriate notional profit is NIL.

It is reasonable to assume that ONO Ltd is receiving this profit because of O's power to enjoy and profits should be reallocated accordingly.

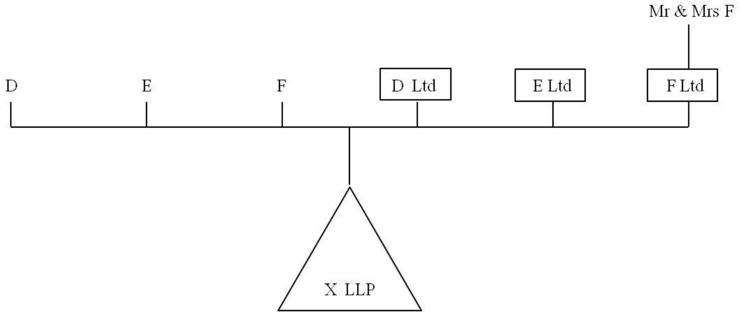
If O withdrew from the partnership to prevent the mixed membership rules from applying then he would continue to be taxed as a partner as a result of S850D ITTOIA 2005, with the excess allocation to the company then being treated as his profit share.

Example 3

This example looks at a situation where there are a number of corporate members.

X LLP has individual members D, E and F together with three companies D Ltd, E Ltd and F Ltd. D is the 100% shareholder of D Ltd. E is the 100% shareholder of E Ltd. The shareholders of F Ltd are F and his spouse.

Prior to the admission of the three corporate members D, E and F shared profits 60:20:20 and following the admission of the corporate members their individual profit share entitlements are each reduced by the amount allocated to their respective companies. D Ltd, E Ltd and F Ltd are not entitled to any profit share if D, E and F respectively cease to be LLP members.

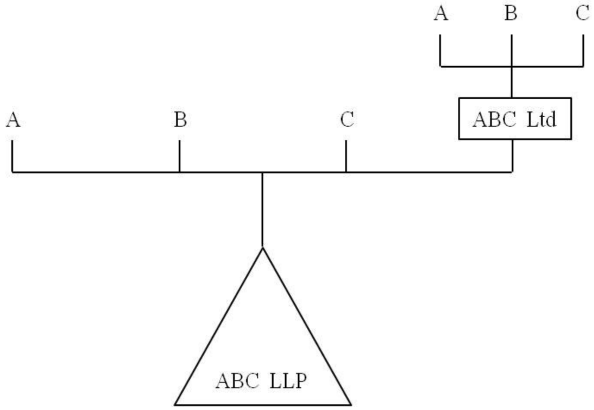


The profit shares of D Ltd, E Ltd and F Ltd are attributable to D, E and F respectively. It is reasonable to ascribe direct causal connection between the profit share allocated to D Ltd (for example) and D’s status as a member of X LLP and shareholder in D Ltd. It is also clear that D’s profit share (for example) is lower than it would have been had he not been shareholder in D Ltd with ability to access the profit share allocated to D Ltd.

Example 4

This is a general example looking at what happens under the new legislation when individuals use a corporate member to defer paying tax. The membership of ABC LLP consists of three individuals, A, B and C, who decide that they want to retain funds in the LLP for working capital. In order to avoid the retained profits being taxed at higher income tax rates, they introduce a corporate member, ABC Ltd, which is fully owned by A, B and C.

ABC Ltd does not provide any services and only a nominal amount of capital.



A, B and C work out what they wish to draw personally and allocate the balance of the profit to ABC Ltd. The profit share allocated is invested or retained in the partnership by the company member as additional partnership capital or advances.

The individual members meet the enjoyment conditions in relation to the sums allocated to their company.

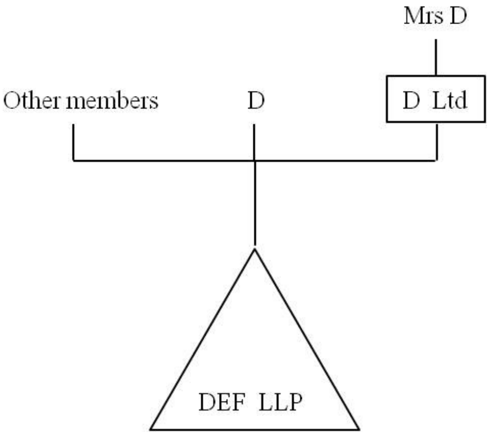
The three individual members are taxed on an additional profit, split on a just and reasonable basis, equal to the profit share allocated to ABC Ltd, less a sum that represents an appropriate notional return on the nominal amount of capital introduced by ABC Ltd.

It is also likely that this is an arrangement that has a main purpose of securing Corporation Tax treatment of the profit. It is also possible that

Condition X (profit deferral) applies see PM219000.[29]

The reader may wonder whether a policy which discourages re-investment of partnership profit is a wise one. But there it is.

Example 5
This is a further general example where an individual diverts profits through a company owned by a close relative.
D is a member of DEF LLP. All the members of the LLP agree to introduce D Ltd as a member. D Ltd is a company that is owned by his wife. D continues to be a member of the LLP, only now he does some work for the LLP through D Ltd. D Ltd provides only a nominal amount of capital.
The only change is that the profit share, previously allocated to D, is now allocated partly to D himself, but mainly to D Ltd.
D Ltd is owned by the wife of D, so a connected person is in a position to enjoy the profits of D.



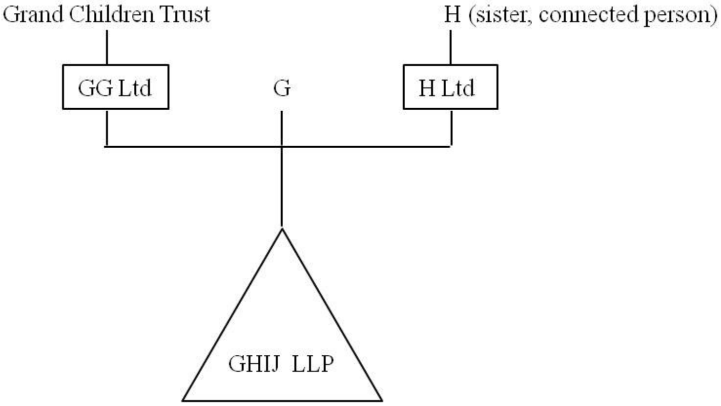
D is taxed on an additional profit equal to the profit share allocated to D Ltd. Whilst D Ltd is providing services to DEF LLP, the reality is that the work is such services as are being provided by D, another member. These services are ignored in determining the appropriate notional consideration for services. D Ltd provides no other services, so the appropriate notional consideration for services is nil.

Example 6
This example looks at the question of whether the profit share is

[29] See 86.6 (Condition X: Deferred profit).

influenced by the power to enjoy.

G is a member of GHIJ LLP. Since it was formed in 2007 there have been two corporate members. H Ltd is owned by, and provides the services of, H, the sister of G. H has never been a member. GG Ltd is owned by trustees on behalf of the grandchildren of G.



G has the power to enjoy for both H Ltd and GG Ltd. The question is whether the profit shares are influenced by the power to enjoy.

In the case of H Ltd, the facts show that H is working for the LLP and all profits allocated to H Ltd properly reflect that work. The profit share is not affected by the power to enjoy and the legislation does not apply to H Ltd's share of the profit.

In the case of GG Ltd, the profit share is influenced by the fact that G wants the money to pass to his grandchildren. The excess profit allocation rules apply to the profit share, and G will be taxed on the profit share, subject to any notional profit.

86.12 s.850C counteraction: Income reallocation

Assuming the s.850C application conditions are satisfied, we move on. Section 850C(4) ITTOIA provides:

> A's profit share is increased by so much of the amount of B's profit share as, it is reasonable to suppose[30], is attributable to—
> (a) A's deferred profit, or
> (b) A's power to enjoy,
> as determined on a just and reasonable basis. But any increase by virtue of paragraph (b) is not to exceed the amount of the excess mentioned in

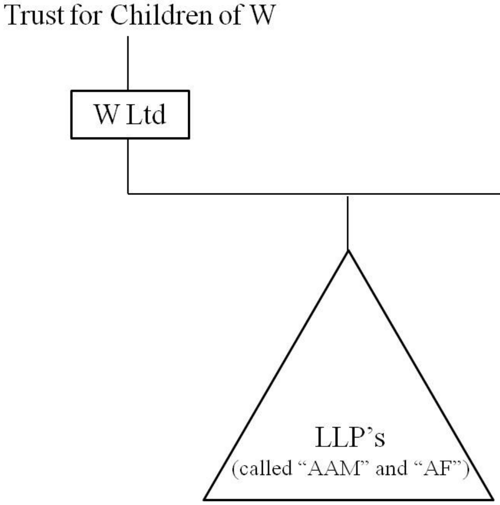
[30] See App.2.24 (Reasonable-to-assume).

subsection (3)(a) after deducting from that amount any increase by virtue of paragraph (a).

A does not have an indemnity against B for the tax, so if A has "Power to Enjoy" without any actual interest in the profits, the consequence may be very harsh.

86.12.1 *Attribution*

In *Walewski v HMRC*[31] the business structure, simplified, amounted to this:



Mr W had power to enjoy. He argued that he provided services to W Ltd, which W Ltd provided to the partnership, so W Ltd earned its profit share and none of it should be attributed to the power to enjoy.

If that is right then the mixed partnership code would be easy to avoid.

On the facts, the arrangement was not scrupulously carried out. Mr W kept no records or timesheets to show when he was acting on behalf of the W Ltd. He entered into contracts of employment with W Ltd and with another entity, both of which required full time work! Clients were unaware of the arrangement. But even if these facts had been better (which would not have been easy to arrange) the tribunal would not have accepted that he provided services via the company:

[31] [2020] UKFTT 58 (TC). In the appeal this was regarded as a matter of fact and unchallengeable: [2021] UKUT 133 (TCC) at [43]. The reader may be surprised that permission was given to appeal.

> 170 Mr Walewski's work for W Ltd, AAM and AF was fungible; it is not possible on the basis of any evidence which we saw, to separate his role into discrete components; his work for one was his work for each and all of those entities. [A witness] described Mr Walewski's roles for the three entities as "very interlinked", we think they were more than interlinked, we think Mr Walewski was essentially playing only a single role, but for the benefit of all three entities.
> 171. Mr Walewski was described as "wearing a number of hats", again, in our view this does not do justice to the truly fungible nature of his activities for these entities, all of whose decisions and strategies began and ended with Mr Walewski, as the only director and employee of W Ltd, as a member of AAM and only member of its management committee and as an employee and member of AF.
> 172. There was no commercial, physical or temporal separation of Mr Walewski's activities. ...
> 173. ... if W Ltd's profit allocation cannot be explained by Mr Walewski's earning power as its employee, what other alternative reasonable explanation can there be for the profits being allocated to W Ltd other than Mr Walewski's power to enjoy them ?
> 175. ... In our view the test which we must apply to determine whether W Ltd has earned its share of attributed profits is a test of substance and not just form.

This is a test which could never be met no matter how well the arrangement had been carried out. Once one disregards the employment with W Ltd, the result is inevitable:

> 191. On the contrary, our view is that the only reasonable explanation for the allocation of profit to W Ltd from AAM and AF is by reason of Mr Walewski's ability to enjoy those profits.
> 192. This conclusion is supported by the fact that:
> (1) The 2006 amended partnership agreement of AAM gave W Ltd a right to 99.9% of AAM's profits, independent of any services provided by Mr Walewski or the terms of any employment contract.
> (2) Mr Walewski's salary from W Ltd, while significant, was modest in terms of the industry in which he worked and the level of profit which was being generated in AAM and AF...
> (3) Mr Walewski did not take a bonus from W Ltd under his employment contract.
> (4) We find it hard to understand why someone in Mr Walewski's position would have been willing to give away such a large percentage of the profits which he had generated if there was not some benefit to

himself. In our view, the only reason he would do that is if he knows that he has the power to enjoy the profits of the company in some other way.
(5) Mr Walewski would be an unusual, if not unique, member of the finance industry if he not only failed to take the full amount of his contracted salary, but also did not claim any amount of bonus and allowed a company to take all of the fruits of his labour...
(6) At the relevant time there was a significant difference between the 45% income tax which Mr Walewski suffered on payments made directly to him and the 21% corporation tax suffered by W Ltd.
(7) It seems reasonable to conclude that changes made in the Alken group structure were made not for commercial reasons, but in response to the PWC advice given about ways to mitigate the impact of the mixed partnership rules and ensure that the tax differential between W Ltd and Mr Walewski could be retained.

86.13 A (transferor) not partner: s.850D

Section 850C ITTOIA only applies if A (the transferor/individual) is a partner, so it could be avoided by arranging that A is not a partner.

Section 850D(1) ITTOIA deals with this. It may be helpful to read this side by side with s.850C, to identify the differences:

s.850D(1) application conditions	**s.850C(1) application conditions**
Subsections (4) and (5) apply if—	Subsections (4) and (5) apply if—
(a) at a time during a period of account (“the relevant period of account”) in respect of a firm, an individual (“A”) personally performs services for the firm,	[No equivalent]
(b) if A had been a partner in the firm throughout the relevant period of account, the calculation under section 849 in relation to A for the relevant period of account would have produced a profit for the firm,	(a) for a period of account (“the relevant period of account”)— (i) the calculation under section 849 in relation to an individual partner (“A”) (see subsection (6)) produces a profit for the firm, and (ii) A’s share of that profit determined under section 850 or 850A (“A’s profit share”) is a profit or is neither a profit nor a loss,

(c) a non-individual partner (“B”) in the firm (see subsection (6)) has a share of that profit (“B’s profit share”) which is a profit (see subsection (7)),	(b) a non-individual partner ("B") (see subsection (6)) has a share of the profit for the firm mentioned in paragraph (a)(i) ("B's profit share") which is a profit (see subsection (7)), and
(d) it is reasonable to suppose[32] that A would have been a partner in the firm at a time during the relevant period of account or any earlier period of account but for the provision contained in section 850C (see also subsections (8) to (10)), and	[no equivalent]
(e) condition X or Y is met.	(c) condition X or Y is met.

I coin some terminology, and in the discussion below:
The conditions in para (e) are **“s.850D condition X/s.850D condition Y”**
The conditions in s.850C are the **“s.850C conditions X and Y”**.

86.13.1 *s.850D condition X*

Section 850D(2) ITTOIA provides:

> Condition X is that it is reasonable to suppose[33] that amounts representing A’s deferred profit (see subsection (11)) are included in B’s profit share.[34]

Section 850D condition X is the same as s.850C condition X(a): see 86.6 (Condition X: Deferred profit).

86.13.2 *s.850D condition Y*

Section 850D(3) ITTOIA provides:

> Condition Y is that—
> (a) B’s profit share exceeds the appropriate notional profit (see subsection (12)),

[32] See App.2.24 (Reasonable-to-assume).

[33] See App.2.24 (Reasonable-to-assume).

[34] See 86.8.1 (B’s profit share).

> (b) A has the power to enjoy B's profit share ("A's power to enjoy") (see subsection (13)),[35] and
>
> (c) it is reasonable to suppose[36] that the whole or any part of B's profit share is attributable to A's power to enjoy.

Section 850D condition Y contains 3 conditions, or sets of conditions, which I call Condition Y(a), (b) and (c).

Section 850D conditions Y(a)(b) and (c) are equivalent to s.850C conditions Y (a)(b) and (c)(i): see 86.7 (Condition Y: Excess profit allocation).

86.14 s.850D counteraction: deemed partner

Assuming s.850D conditions X or Y are satisfied, we move on. Section 850D(4) ITTOIA provides:

> A is to be treated on the following basis—
>
> (a) A is a partner in the firm throughout the relevant period of account (but not for the purposes of section 863I (allocation of profit to AIFM firm[37])),
>
> (b) A's share of the firm's profit for the relevant period of account is so much of the amount of B's profit share as, it is reasonable to suppose[38], is attributable to—
>
> (i) A's deferred profit, or
>
> (ii) A's power to enjoy,
>
> as determined on a just and reasonable basis, and
>
> (c) A's share of the firm's profit is chargeable to income tax under the applicable provisions of the Income Tax Acts for the tax year in which the relevant period of account ends.
>
> But A's share of the firm's profit by virtue of paragraph (b)(ii) is not to exceed the amount of the excess mentioned in subsection (3)(a) after deducting from that amount A's share of the firm's profit (if any) by virtue of paragraph (b)(i).

[35] Section 850D(13) provides:

> "Section 850C(10) to (17) applies for the purpose of determining "the appropriate notional profit"; and A is to be treated as a partner in the firm for the purposes of section 850C(17)."

See 86.9 (appropriate notional profit).

[36] See App.2.24 (Reasonable-to-assume).

[37] See 83.16 (Alternative investment fund manager).

[38] See App.2.24 (Reasonable-to-assume).

86.15 Associated partnership

Section 850D(1) provides:

> (1) Subsections (4) and (5) apply if...
> (d) it is reasonable to suppose that A would have been a partner in the firm at a time during the relevant period of account or any earlier period of account but for the provision contained in section 850C

Section 850D(8) ITTOIA provides:

> The requirement of subsection (1)(d) is to be assumed to be met if, at a time during the relevant period of account, A is a member of a partnership[39] which is associated with the firm.

86.15.1 *"Associated"*

Section 850D(9) ITTOIA provides:

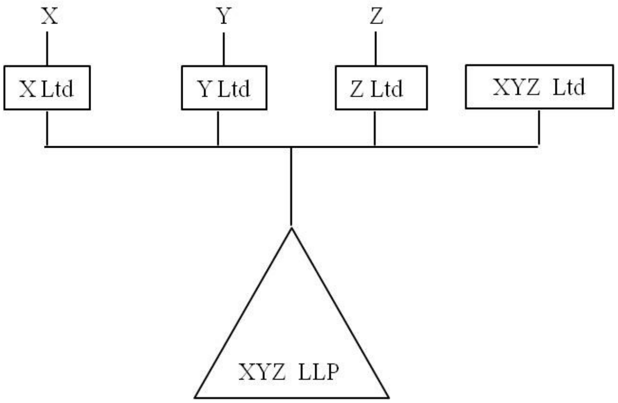
> A partnership is "associated" with the firm if—
> (a) it is a member of the firm, or
> (b) it is a member of a partnership which is associated with the firm (whether by virtue of paragraph (a) or this paragraph).

86.15.2 *HMRC examples*

PM provides:

> *Example 1*
> This example demonstrates the effect of the anti-avoidance rules where individual members resign and are replaced by personal service companies.
> X, Y, Z and XYZ Ltd are the members of XYZ LLP. In response to the new legislation, they decide that all the individual members should cease to be members of the LLP with effect from 6 December 2013 being replaced by their personal service companies.
> X, Y and Z continue to work for XYZ LLP, it is reasonable to suppose that they would have continued to be members but for the introduction of the legislation.

[39] Section 850D(10) ITTOIA provides:
"In subsections (8) and (9) "partnership" includes a limited liability partnership whether or not section 863(1) applies in relation to it."
But tt will be rare to have an LLP to which s.863 does not apply. See 85.22.2 (LLP treated as partnership).



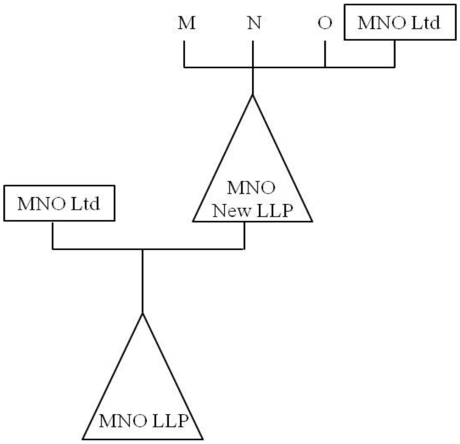
X, Y and Z are treated as members and the mixed membership partnership legislation applied accordingly.

Their share of the firm's profit, determined under the mixed membership rules, is chargeable to income tax for the tax year in which the relevant period of account ends...

Example 2

Example of the impact of the anti-avoidance rules.

M, N, O and MNO Ltd are the members of MNO LLP. In response to the new legislation, they decide that from 1 April 2014 all the individual members should become members of MNO New LLP. From 1 April 2014, the members of MNO LLP will be MNO Ltd and MNO New LLP. Whilst M, N and O are the members of MNO New LLP.



As MNO New LLP is an associated partnership it is assumed that M, N and O would have been members of MNO LLP. The mixed membership partnership legislation applies on the basis that they are deemed to have been members of MNO LLP.

Example 3
Example of where the anti-avoidance rules do not apply to events before 5 December 2013.
Firm A has only individual members. Before 5 December 2013, the individual partners decide to retire and transfer their interests in the partnership to limited companies which would become partners in their place. The actual transfer was carried out on 12 December 2013.
Although the change was not made until 12 December, there is clear evidence to show that the decision was made before 5 December so the partners could not be aware of the mixed membership partnership legisla-tion as at that time the new rules had not been published. As a result, the anti-avoidance provisions do not apply.
The excess profit allocation legislation came into force when it was announced on 5 December 2013. It cannot be inferred that an individual would have been a member but for the new rules if the individual withdrew from a partnership before that date.

86.16 Reliefs for B (transferee)

86.16.1 *Adjustment for B*

s.850C(5) ITTOIA	**s.850D(5) ITTOIA**
If B is chargeable to income tax, in applying sections 850[40] to 850B in relation to B for the relevant period of account, such adjustments are to be made as are just and reasonable to take account of the increase in A's profit share under subsection (4).	If B is chargeable to income tax, in applying sections 850 to 850B in relation to B for the relevant period of account, such adjustments are to be made as are just and reasonable to take account of A's share of the firm's profit under subsection (4).
(This subsection does not apply for the purposes of subsection (7) or section 850D(7).)	(This subsection does not apply for the purposes of subsection (7) or section 850C(7).)

This will not often apply, as B will normally be a company.

86.16.2 *Distribution relief*

Section 850E ITTOIA provides:

[40] See 86.3 (Allocation of profit to partners).

> (1) Subsection (2) applies in a case in which section 850C(4) or section 850D(4) applies if—
>
> (a) there is an agreement in place in relation to the excess part of B's profit share,
>
> (b) as a result of the agreement, B makes a payment to another person out of the excess part of B's profit share, and
>
> (c) the payment is not made under any arrangements[41] the main purpose, or one of the main purposes, of which is the obtaining of a tax advantage for any person.
>
> (2) For income tax purposes, the payment—
>
> (a) is not to be income of the recipient,
>
> (b) is not to be taken into account in calculating any profits or losses of B or otherwise deducted from any income of B, and
>
> (c) is not to be regarded as a distribution.
>
> (3) In this section—
>
> "the excess part of B's profit share" means so much of the amount of B's profit share as is represented by the amount of, as the case may be—
>
> (a) the increase under section 850C(4), or
>
> (b) A's share of the firm's profit under section 850D(4), and
>
> "tax advantage" has the meaning given by section 1139 of CTA 2010.

PM manual provides:

> **PM232000 Payments By The Non-Individual Out Of Its Reallocated Profit Share** [July 2019]
>
> ... *Example 2*
>
> This example addresses two concepts, the first where a payment made to a person connected to the indi-vidual member does not attract additional taxation, and the second where the payments are made after passing through a holding company partly owned by an unconnected party.
>
> AA Ltd receives £150,000 as its share of the profit of AA LLP. Under the excess profit allocation rules A is taxed on £130,000 of this by virtue of their power to enjoy the sum allocated to A Ltd.
>
> The excess part of AA Ltd's profits share is £130,000.
>
> AA Ltd agrees to pay A £100,000. It pays £40,000 as a dividend to its parent company AABC Ltd.
>
> AABC Ltd pays a dividend to its shareholders, A, B and C, who each receive £10,000.

[41] Section 850E(3) provides the standard (unnecessary) IT definition of "arrangements"; see App.2.2.3 (Definitions of "arrangement").

The payment of £100,000 is made as part of an agreement in connection with AA Ltd's excess profit share. A is not taxable on this sum and it is not taken into account in arriving at the profits of AA Ltd.
The dividends received by A, B and C were not paid to them by AA Ltd and so fall outside the scope of the legislation.

86.16.3 *Adjustment for corporation tax*

Section 1264A CTA 2009 provides:

> (1) Subsection (2) applies in a case in which—
> (a) section 850C(4) or 850D(4) of ITTOIA 2005 applies for a period of account ("the relevant period of account"), and
> (b) the partner who is "B" for the purposes of section 850C or 850D of that Act (as the case may be) is a company.
> (2) In applying sections 1262 to 1264 in relation to the company—
> (a) for the accounting period of the firm which coincides with the relevant period of account, or
> (b) if no accounting period of the firm coincides with the relevant period of account, for accounting periods of the firm in which the relevant period of account falls,
> such adjustments are to be made as are just and reasonable to take account of the increase under section 850C(4) of ITTOIA 2005 or A's share of the firm's profit under section 850D(4) of that Act.
> (3) Sections 850C(23) and 850E(2) of ITTOIA 2005 apply for corporation tax purposes as they apply for income tax purposes.

86.17 Alternative investment fund manager

An AIFM firm is a partnership the business of which is managing one or more AIFs. AIFM firms are required to subject part of the "remuneration" of key individuals to performance conditions and to defer when those individuals can access that remuneration.[42]

A member of an AIFM firm (including an LLP), is chargeable on the profits of the partnership as they arise rather than when they are received.

The AIFM tax provisions allow the AIFM partnership to elect to be treated as a partner in itself in order to pay tax on a member's remuneration on behalf of the member. If it does so, the AIFM firm is treated as an individual member of the partnership, not as a non-individual member for the purposes of the mixed membership rules.

As part of EU-wide strategy for investor protection, members of

[42] Alternative Investment Fund Managers Directive (2011/61/EU).

partnerships that are Alternative Investment Fund Managers (AIFM) may have their access to their profit shares deferred for a period of time. The partnership may choose to allocate these deferred profits to a non-individual partner.

Section 850C ITTOIA provides:

> (22) Subsection (23) applies if—
> (a) the increase under subsection (4), or any part of it, is allocated by A to the firm itself under section 863I (allocation of profit to AIFM firm), and
> (b) B makes a payment to the firm representing any income tax for which the firm is liable by virtue of section 863I in respect of the amount of the increase allocated to it.
> (23) For income tax purposes, the payment—
> (a) is not to be income of any partner in the firm, and
> (b) is not to be taken into account in calculating any profits or losses of B or otherwise deducted from any income of B.

I do not consider the special rules for AIFM trades (see s.863H - 863L ITTOIA).

86.18 Business transferred to partnership

PM provides:

> **PM236000 Businesses Transferred To The Partnership** [July 2019]
> This section looks at the tax treatment of the transfer of a business to a partnership by a company, where:
> - the company and a shareholder of the company both become (or are) partners in the firm,
> - the consideration given for the transfer is in the form of an equity stake in the partnership.
>
> The question is whether the excess profit allocation rules apply because of the shareholders power to enjoy?
> *Appropriate notional return on capital*
> The position is that the transferor company has transferred the business to the LLP and in return has been credited with having contributed capital to the firm.
> For the purposes of the excess profit allocation rules the amount of capital contributed is the open market value of the assets transferred at the time of transfer, not the historic or book value.
> The fact that the transferor company has contributed assets rather than cash as capital makes no difference.
> If the transferor company can draw on the sum then it is not capital

contributed for the purposes of the excess profit allocation rules, see PM221000.

The appropriate notional profit for the transferor company includes an appropriate notional return on capital based on the open market value of the assets transferred as capital at the time of transfer.

The appropriate notional return on capital is calculated in line with a commercial rate of interest.

There is no higher "equity return" based on the fact that the transferor company transferred a business. The value of that business transferred has already been recognised in the value of the capital account.

Appropriate notional return for services;

If the transferor company retains assets which it makes available to the LLP then the appropriate notional profit includes an appropriate notional consideration for services (less any amount actually paid by the partnership for the use of the asset), see PM222000.

Profit share exceeds appropriate notional profit:

The legislation recognises the value of the business transferred.

If the profit share allocated to the transferor company exceeds the "appropriate notional profit" then the question is whether the transferor company has received that excess by reason of the ability of an individual member to enjoy the profit.

Where a shareholder continues to be involved in the business after the transfer, it will nearly always be reasonable to conclude that the excess allocation of profits to a company which they substantially own (whether or not with connected individuals) is attributable to their continuing involvement with the firm, with the result that any such profit allocated to the corporate member will be reallocated to the individual.

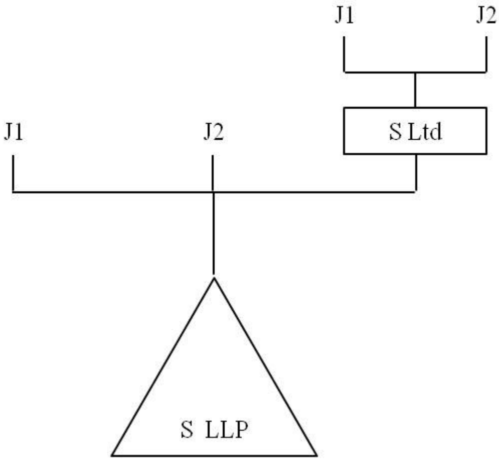
Cases where this is not the case will be exceptional. The most likely scenario is where the company is widely owned and there are a majority of shareholders unconnected with the partner, and who are not involved with the business but who get the benefit of the profits allocated to the company. In those circumstances it is very unlikely that the individual members are using the company member to alienate their income since the effect of allocating excess profits to the company would also be to give them away to third parties.

Examples of how the excess profit allocation rules apply to transfers of businesses can be found at PM237000

PM237000 Businesses Transferred To The Partnership: Examples
[July 2019]

This section sets out how the excess profit allocation rules, as set out at PM236000, apply to examples where a company transfers its business to an LLP.

Example 1 (John and Jane[43])
This example looks at the basic situation where a business is transferred from a company to an LLP.
J1 and J2 are shareholders in a company, S Ltd, which runs a securities trading business. J1 has 90% and J2 has 10%. Both are highly qualified and work in the business. The company transfers its business to a partnership, S LLP, and it, J1 and J2 become partners in the business. The partnership agreement provides that 50% of the profits of the firm are paid to the company indefinitely, and the individual partners share the rest of the profit equally (i.e. 25% each).



S Ltd will be entitled to be taxed on an appropriate notional return on capital (in this case, the value of the assets contributed by the firm[44]). The question is then whether any profits in excess of this allocated to S Ltd are attributable to J1 and J2's power to enjoy those profits. Given the nature of the business, and the fact that J2 and J1 are still as actively involved in it as they always were, HMRC would consider that all of the excess profit should be reallocated from S Ltd to J1 and J2. This is a 'people' business and the profits rely on J1 and J2's continuing involvement in the business. J2 and J1 control the profit allocation and it is not reasonable to suppose that they would allow profits to be allocated to S Ltd if they did not have the power to enjoy those profits.

[43] The Manual sometimes refers to Jane and sometimes to Janet

[44] Author's footnote: This should read: the value of the assets contributed to the LLP by the company S Ltd.

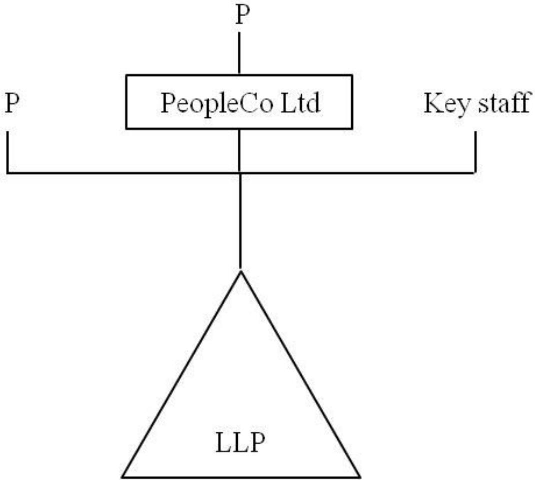
Example 2

This is another example of a transfer of a business from a company to an LLP.

PeopleCo Ltd is a professional firm that had been trading for many years. A few years ago P, the 100% owner of PeopleCo Ltd decided that he wanted to reorganise the business to motivate his key staff and give them an ownership interest. He was also considering succession of the business, when in due course he retires. Recognising that PeopleCo Ltd was a people business, he set up an LLP, whose members are P, PeopleCo Ltd and the key staff who he hopes will take over the business. PeopleCo Ltd transfers the business to the LLP.

PeopleCo Ltd receives the profit share agreed when the business was transferred to the LLP.

P remains a member of PeopleCo LLP and receives a personal profit share.



PeopleCo Ltd will be entitled to be taxed on an appropriate notional return on capital (again, the value of the assets contributed to the firm). The question is then whether any further profits allocated to PeopleCo Ltd in fact reflect the work done by P. As he is continuing to work in the business in the same way as he has done previously, it would be expected that the profits for periods after the transfer should be allocated to him and not to the company.

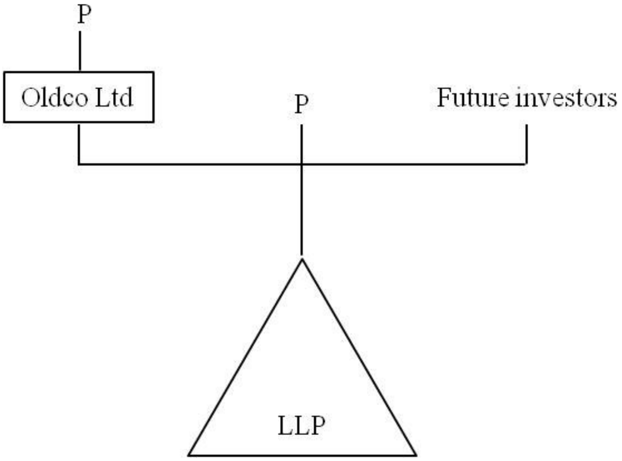
A helpful way to look at this is to ask whether the profit sharing arrangement between PeopleCo Ltd and the LLP is the same as it would have been had P actually retired, and whether P's own profit share is commensurate with the work done.

Example 3

This looks at an example of a transfer of a business from a company to an LLP where the founder is retiring.

Oldco Ltd had been trading for many years. A few years ago P, the owner of Oldco Ltd decided that he wanted to retire. He set up an LLP, whose members are P, Oldco Ltd and a number of individuals who he hoped would take over the business. The business is then transferred to the LLP and Oldco Ltd is credited with the value of the business as capital introduced. Oldco Ltd receives a profit share.

P is working a reduced number of hours in the business and receives a small personal profit share that is commensurate with the work he does.



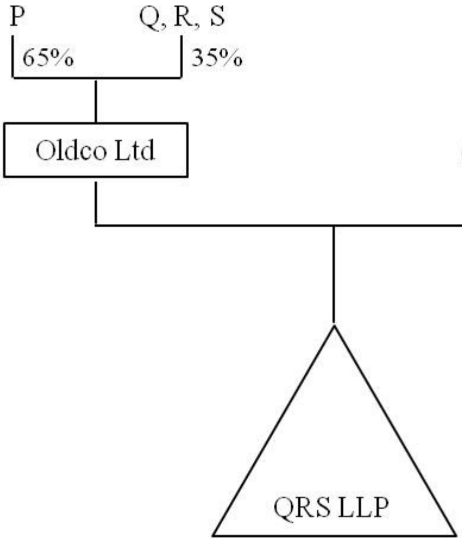
The first question is whether the profit share received by Oldco Ltd exceeds the appropriate notional profit. If the profit share is less than the appropriate notional profit then there is no reallocation.

Assuming that there is such an excess allocation the next question is whether this is by reason of the economic connection. It is likely that it is, but if the particular facts show that any economic connection between the individual and non-individual members does not result in profit being shifted from the individual partners to the non-individual, the mixed membership partnership legislation will not apply.

Example 4

This example looks at where a company transfers its business to an LLP some of whose members are minority shareholders in the company.

Oldco Ltd is a manufacturing firm that had been trading for many years. A few years ago P, the majority owner of Oldco Ltd decided that he wanted to retire. He set up QRS LLP, whose members are Oldco Ltd and a number of unconnected individuals whom he hoped would take over the business, three of whom, Q R and S, were minority shareholders in Oldco, holding 35% of the ordinary shares between them, P holding the remaining 65%.



Oldco Ltd receives the profit share agreed when the business was transferred to the LLP.

P retires at the time of the transfer of the business and subsequently provides no services to the LLP.

Q, R and S will potentially receive part of Oldco's profit shares in the form of dividends. The question is whether the share allocated to Oldco exceeds the notional profit because they are shareholders. The shares in Oldco all carry equal voting rights and rights to a dividend, and P, a non-member of the LLP, controls Oldco, holding 65% of the shares. In this case there is nothing to suggest that the connection Q, R and S have with Oldco has influenced the profit-sharing arrangements - in particular, most of the profits flow to an unconnected individual who is no longer a member. The position could be different if P, Q, R and S held different classes of shares with different rights.

86.19 Takeover of LLP

PM provides:

PM238000 Takeover Of The LLP [July 2019]

Although usually treated for UK tax purposes as a partnership, an UK LLP is a body corporate.

This section looks at where the LLP is subject to a takeover by another

> body corporate.
> The way that the excess profit allocation rules apply to takeovers will vary from case to case, depending on the facts of that case.
> It is worth remembering that the principle behind the excess profit allocation rules is that they apply where an individual, or individuals, divert all or part of their profit share to a non-individual member or members, usually a company or companies, in order to reduce tax on their profit share or as part of profit deferral arrangements.
> At the same time, the excess profit allocation rules do not apply to mixed membership partnerships in which the individual and non-individual partners are genuinely acting at arm's length and not intending to defer a profit share or secure a tax advantage.
>
> *Example 1*
> This example looks at whether a sum is deferred profit?
> XYZ PLC acquires an interest in ABC LLP from the existing members who continue to be involved in the LLP as members following the transfer. Prior to becoming a member of the LLP, XYZ PLC was unconnected to ABC LLP or its members.
> The sale price agreed is the open market value of that interest in ABC LLP as at that date. To protect the value of the business being bought, the terms of sale are that part of the consideration is deferred for two years. If the individuals leave in that time they will forfeit all or part of the consideration.

The HMRC analysis is as follows:

> XYZ PLC, an unconnected party, acquired an interest for the OMV [open market value] at the time. On a realistic view of the facts the sum deferred is a not a remuneration or benefit from the LLP. It is not linked to the profits made in the period in which XYZ PLC is a member of the LLP.
>
> This can be contrasted with:
> [Example 1B]
> XYZ PLC agrees that, if they remain members for three years, the individual members will receive an additional sum based upon the profits of ABC LLP over that period.

The HMRC analysis is as follows:

> This is a share of the profits that has been deferred and it is no different to any other case where a share of the profit is deferred. Condition X is satisfied.

Example 2

This example looks at a takeover where the previous members retain an equity stake after the takeover.

The new owners may want to ensure that the existing members remain with the business. This will particularly be true where it is a "people business".

RSTU LLP is a consultancy business. The ABC Corporation sees RSTU as a way of entering the UK market, however it sees it as important to retain the services of R, S, T and U, the existing members, and wants them to retain an interest in the LLP.

ABC buys a majority stake (80%) in RSTU LLP with each of the existing members retaining a 5% share.

It is recognised that R is looking to partially retire. It is agreed that in three years' time ABC will buy 20% of R's stake at the then OMV. It will buy a further 20% a year later and the balance when R decides to retire. The LLP Agreement provides that the individual partners must sell all their interests on retirement.

It is assumed that Condition Y is not satisfied as R does not have the power to enjoy the profit share allocated to the ABC Corporation.

The HMRC analysis is as follows:

The question is whether Condition X is satisfied? Is it reasonable to suppose that the purchase by the corporate member of R's interest in the LLP represents "remuneration or other benefits or returns" that have been deferred?

Reasonable to suppose means that you take a realistic view of the facts and use a balanced common sense approach.

Possible pointers include:

- The ABC Corporation is a large independent concern; it is not a money box retaining profits for the purpose of buying out interests.
- What are the profit sharing arrangements? Is there anything that looks as if it is money being held back from the individual members?
- Would the ABC Corporation have sufficient funds to buy the interest held by R regardless of the profitability of the LLP?
- How did R acquire the interest - was it acquired by purchase at arm's length or as an initial investor?

The question then is does it look as if the sum paid includes any profit held back, or does it look like the terms on which an independent party would buy that interest?

86.20 Private equity investment

PM provides:

PM239000 Private Equity Investment [July 2019]

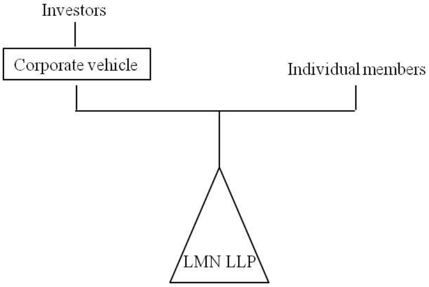
In some cases an outside investor, such as a private equity fund will become a partner, directly or indirectly and inject capital into the firm. If they chose to do so through a corporate vehicle then it may make the firm a mixed membership partnership.

In some cases the excess profit allocation rules will not apply as the individual members do not meet the power to enjoy requirement (see PM224000).

Example 1

Example looking at where capital is injected by external investors using a corporate vehicle.

LMN LLP has received an injection of capital from a group of external investors, none of whom are members of LMN LLP. The investors have chosen to invest through a limited company.



This is a mixed membership partnership but the legislation does not apply as the individual members do not benefit from the sums allocated to the company.

If one of the individual partners in the firm had a small stake in the private equity fund then the question is whether it is reasonable to suppose that part of the profit is allocated to the corporate partner as a result of that stake.

The way to approach the issue is to ask whether the power to enjoy condition is met, in which case the mixed membership partnership legislation will apply, unless it is not reasonable to suppose that any part of the corporate member's profit share can be attributed to the power to enjoy.

Example 2

This example looks at where the corporate member is jointly owned by the private equity fund and the individual members.

The question is whether it is reasonable to suppose that the corporate member's profits have been increased as a result (Condition Y at S850C

(3) see PM219000 for further guidance).

MNO LLP has received an injection of capital from a private equity fund via a corporate member, MNO Ltd, which is jointly owned by the fund and the individual members of MNO LLP.

This is a mixed membership partnership and the individual members are in a position to enjoy profits paid via the corporate member. However, that does not necessarily mean that the excess profit allocation rules apply. Is there any evidence that the profit share allocated has not been influenced by the power to enjoy?

[Example 2B]

Additional facts:

MNO Ltd has ordinary share capital and preference shares. All the preference shares are held by the private equity fund. The profit share allocated to MNO Ltd is calculated so that it is enough to pay the dividend on the preference shares only.

Condition Y is not satisfied as it is not reasonable to suppose that the profit share allocated to MNO Ltd is attributable to the fact that the individual members could benefit.

[Example 2C]

Alternatively:

MNO Ltd is jointly owned by the fund and the individual members of MNO LLP. MNO Ltd only has one class of shares, of which the fund holds 60%.

Why would the members choose to put money into their firm in this format? Is there, for example a tax advantage for them in so doing?

Example 3

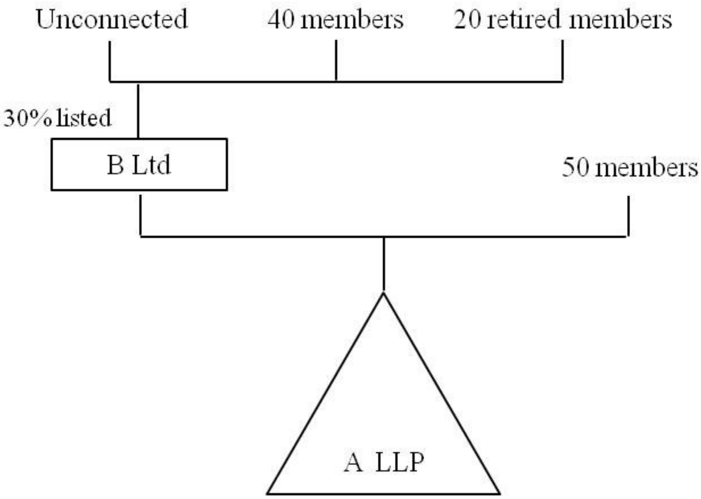
This is a more complex example:

A LLP has 50 individual members and a corporate member B Ltd with 100 issued ordinary shares. 30 of the shares of B Ltd are listed on AIM and owned by investors otherwise unconnected to the LLP or its individual members. The remainder of the shares are owned by 40 of the individual members together with 20 former LLP members (who no longer provide services of any form to the LLP).

So as to attract the initial investment on IPO and to retain the external investor appetite, B Ltd has 100% control of A LLP including control of any changes to the contractual profit share entitlements of the individual members which are determined entirely at its discretion and in accordance with market rate levels of remuneration.

Most of the Directors of B Ltd are also members of A LLP; they are subject to Directors fiduciary duties to ensure that every decision taken

> is in the best interests of the shareholders; that is as shareholders and not in their role as members.



The HMRC analysis is as follows:

> The answer to this example will turn upon the facts. It is, however, helpful to remember that the purpose of the excess profits allocation legislation is to prevent partners from obtaining tax advantages by using the mixed membership structure to alienate their personal income.
> A useful question to ask is would B Ltd would receive the same profit share if/when the member-shareholders were no longer members of the LLP and/or if/when they remain members but are no longer shareholders?

86.21 Share issue

PM provides:

> **PM240000 Share Issues** [July 2019]
> This section looks at the position where a partnership or LLP wishes to raise external finance and chooses to do so by setting up a company which issues shares that external investors can buy and sell on a stock exchange.
> In some cases the individual partners will have no interest in the corporate member, in which case the mixed membership partnership legislation will not apply.
>
> *Example 1*
> Example looking at where external investors invest through a corporate

> vehicle floated on a stock market.
>
> LMN LLP has set up a corporate member, LMN Ltd, which is floated on the AIM market. None of the individual members of LMN LLP are shareholders in LMN Ltd.
>
> This is a mixed membership partnership but the legislation does not apply as the individual members do not benefit from the sums allocated to the company.
>
> If the individual partners hold shares in the corporate partner then it is a question whether on the facts of that case the mixed membership partnership legislation applies.
>
> In cases where the shares are traded on a stock exchange, the question is likely to be whether on the facts of that case Condition Y applies. For further guidance on this, see PM219000.
>
> If an individual partner purchased shares as part of the Initial Public Offering or on the stock market and had no priority in buying those shares then Condition Y is unlikely to be satisfied as it is not reasonable to suppose that a part of the corporate partner's profits come from that member's power to enjoy.
>
> If an individual partner has invested in a collective investment scheme and that scheme buys shares in the corporate partner as part of its ordinary investment portfolio then Condition Y is unlikely to be satisfied as it is not reasonable to suppose that a part of the corporate partner's profits come from that member's power to enjoy.

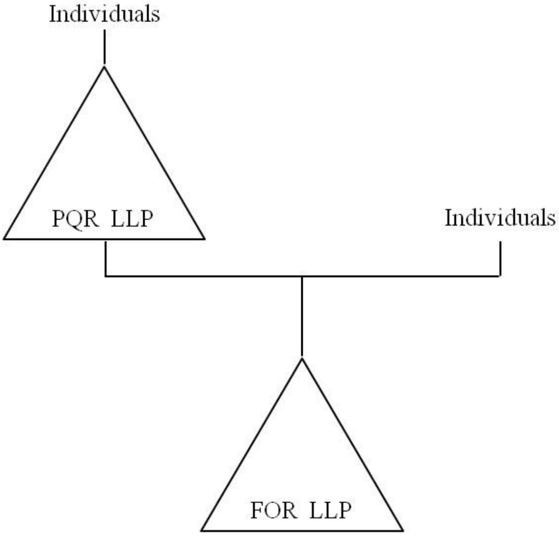
"Unlikely" seems something of an understatement. But HMRC do not with to give hostages to fortune.

86.22 International aspects

PM provides:

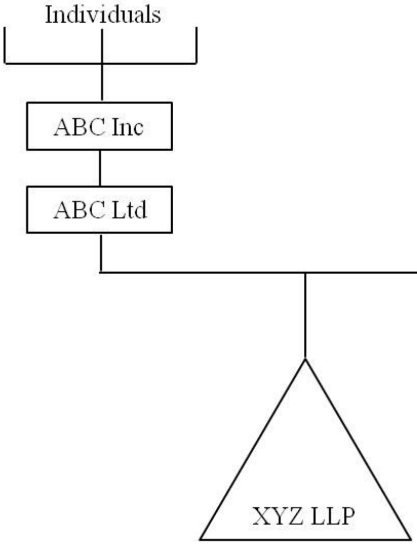
> **PM241000 Pseudo Share Schemes/Membership Benefit Schemes** [Jan 2020]
>
> This section looks at how the mixed membership partnership legislation applies to cases where partnerships, and in particular LLPs, form part of structures that cross international boundaries.
>
> *Example 1*
>
> This looks at a case where one member is a tax transparent entity.
>
> PQR LLP only has individuals as members, so it is not a mixed membership partnership.
>
> Rather than have a branch, the members decide to ring-fence a new business venture overseas. They set up FOR LLP, which is a UK LLP whose members are PQR LLP and those individual members of PQR

LLP involved in the project, a mixture of individuals resident in the UK and in the country where the firm operates.



Profits allocated by FOR LLP to PQR LLP are in turn allocated to the members of that firm all of whom are individuals resident in the UK.
FOR LLP is a mixed membership partnership as one of the members is an LLP, which is not an individual. As noted above, the fact that some individual members are non-UK resident does not make it a mixed membership partnership.
However the Mixed Membership Partnership legislation is unlikely to apply. All the profits are allocated to, and taxed upon individual members. In this case the relevant tax amount is not lower as a result of the structure.

Example 2
This example looks at where the UK firm is a subsidiary part of a wider global network.
XYZ LLP is the UK operation of ABC, a global business with substantial operations in a number of jurisdictions.
XYZ LLP has a number of individual members and ABC Ltd.
ABC Ltd is owned, via one or more intermediate entities, by ABC Inc, the ultimate parent of the global business.
ABC Inc is owned by an unconnected external corporate investor and a number of individuals several of whom are also individual members of XYZ LLP.



As the membership of XYZ LLP consists of individuals and ABC Ltd, XYZ LLP is a mixed membership partnership so that the excess profit allocation rules apply.

The question that needs to be considered is what part (if any) of the profit allocated to ABC Ltd can be said to be attributable to the fact that individual members of XYZ LLP are also amongst the ultimate owners of ABC Ltd?

If the members of XYZ LLP have a minority interest in ABC Inc (and assuming they receive only a corresponding minority benefit from ABC Inc's share of XYZ LLPs' profit) then this is a strong indicator that the profit allocation is not linked to the fact that the members of XYZ LLP are also members of ABC Inc.

If a member of XYZ LLP receives their profit share from ABC rather than XYZ UK LLP then that is an indicator that the excess profit allocation rules will apply.

If the members of XYZ LLP receive a priority distribution out of ABC then that is an indicator that the excess profit allocation rules will apply.

Example 3

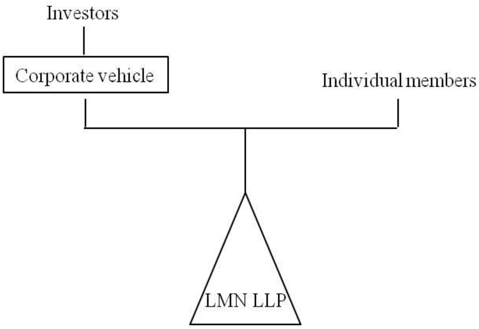
This example looks at where a member of the UK firm is rewarded from of an international network.

DEF LLP is the UK operation of DEF US.

The members of DEF LLP are individuals and a company owned by DEF US (DEF Ltd).

DEF Ltd receives a profit share from DEF LLP. This is paid by dividend

to DEF US.
A is a member of both DEF LLP and DEF US. He works in the UK for DEF LLP, but receives no profit share from DEF LLP, only from DEF US.
Under the agreement A receives a profit share from DEF US that is 75% of the profit share received from DEF LLP via DEF Ltd.



DEF LLP is a "mixed partnership" as it has both individual and a corporate member.
A is a member of DEF LLP, working in the UK for DEF LLP but he receives no profit share from that firm, only one from DEF US.
A works for DEF LLP and receives his profit share via the profit allocated to DEF Ltd. The legislation applies, with the result that A will be subject to increased profits under S850C(4).

86.23 International structures

PM provides:

PM242000 International Structures [Jul 2019]
This section looks at how the mixed membership partnership legislation applies to cases where partnerships, and in particular LLPs, form part of structures that cross international boundaries.

Example 1
This looks at a case where one member is a tax transparent entity.
PQR LLP only has individuals as members, so it is not a mixed membership partnership. Rather than have a branch, the members decide to ring-fence a new business venture overseas. They set up FOR LLP, which is a UK LLP whose members are PQR LLP and those individual members of PQR LLP involved in the project, a mixture of individuals resident in the UK and in the country where the firm operates.
Profits allocated by FOR LLP to PQR LLP are in turn allocated to the members of that firm all of whom are individuals resident in the UK.

FOR LLP is a mixed membership partnership as one of the members is an LLP, which is not an individual. As noted above, the fact that some individual members are non-UK resident does not make it a mixed membership partnership.

However the Mixed Membership Partnership legislation is unlikely to apply. All the profits are allocated to, and taxed upon individual members. In this case the relevant tax amount is not lower as a result of the structure.

Example 2

This example looks at where the UK firm is a subsidiary part of a wider global network.

XYZ LLP is the UK operation of ABC, a global business with substantial operations in a number of jurisdictions.

XYZ LLP has a number of individual members and ABC Ltd.

ABC Ltd is owned, via one or more intermediate entities, by ABC Inc, the ultimate parent of the global business.

ABC Inc is owned by an unconnected external corporate investor and a number of individuals several of whom are also individual members of XYZ LLP.

As the membership of XYZ LLP consists of individuals and ABC Ltd, XYZ LLP is a mixed membership partnership so that the excess profit allocation rules apply.

The question that needs to be considered is what part (if any) of the profit allocated to ABC Ltd can be said to be attributable to the fact that individual members of XYZ LLP are also amongst the ultimate owners of ABC Ltd?

- If the members of XYZ LLP have a minority interest in ABC Inc (and assuming they receive only a corresponding minority benefit from ABC Inc's share of XYZ LLPs' profit) then this is a strong indicator that the profit allocation is not linked to the fact that the members of XYZ LLP are also members of ABC Inc.
- If a member of XYZ LLP receives their profit share from ABC rather than XYZ UK LLP then that is an indicator that the excess profit allocation rules will apply.
- If the members of XYZ LLP receive a priority distribution out of ABC then that is an indicator that the excess profit allocation rules will apply

Example 3

This example looks at where a member of the UK firm is rewarded from of an international network.

DEF LLP is the UK operation of DEF US.

The members of DEF LLP are individuals and a company owned by DEF US (DEF Ltd).

DEF Ltd receives a profit share from DEF LLP. This is paid by dividend to DEF US.

A is a member of both DEF LLP and DEF US. He works in the UK for DEF LLP, but receives no profit share from DEF LLP, only from DEF US.

Under the agreement A receives a profit share from DEF US that is 75% of the profit share received from DEF LLP via DEF Ltd.

DEF LLP is a "mixed partnership" as it has both individual and a corporate member.

A is a member of DEF LLP, working in the UK for DEF LLP but he receives no profit share from that firm, only one from DEF US.

A works for DEF LLP and receives his profit share via the profit allocated to DEF Ltd. The legislation applies, with the result that A will be subject to increased profits under S850C(4).

CONTENTS AT A GLANCE

The chapters are organised thematically as follows:

Volume 1

Introduction and What's New
Obtaining further advice and disclaimer
A1 FIG Relief//Abolition of Domicile Rule

Non-dom policy & avoidance

1. Foreign Domicile: Tax Policy
2. Tax Avoidance
3. Targeted Anti-avoidance Rules (TAARs)

Domicile & residence

4. Domicile
5. Deemed Domicile
6. Residence of Individuals
7. Residence of Trustees

Volume 2

8. Residence of Companies
9. Treaty-Residence
10. Split Years
11. Temporary Non-residence
12. Exit Taxes
13. UK Arrival or Departure: Tax Checklist

Income tax: Principles & remittance basis

14. Income Categorisation
15. Income Recognition: Received /Entitled/Arise/Paid
16. Source/RFI/Territorial Principles
17. The Remittance Basis
18. The Meaning of Remittance
19. Remittance Reliefs
20. Mixed Funds

Income by category

21. Trading Income

Volume 3

22. Trading in Land
23. Performers
24. Property Income
25. Deduction of Interest from Property Income

26. Interest Income
27. Exempt Interest of Non-Residents
28. Accrued Income Profits
29. Deeply Discounted Securities
30. Dividend Income
31. Annual Payments
32. Intellectual Property Income
33. Misc Sweep-Up Income
34. Employment Income
35. Travel Expenses: Employment Income
36. PAYE
37. Employment Income: DT Relief

Volume 4

38. Pension and Annuity Income
39. Benefit in Kind: Family Home and Chattels
40. Benefit in Kind: Loans from Non-Resident Companies

IT: general

41. Discretionary Trusts: Income Tax
42. IIP Trusts: Income Tax
43. Rates of Income Tax: CGT
44. Personal Allowances
45. Non-Resident Income Tax Relief
46. National Insurance Contributions

IT avoidance codes

47. Settlor-Interested Trust Code
48. Transfer of Assets Abroad: Introduction
49. Transfer of Assets Abroad: Transferors
50. Transfer of Assets Abroad: Benefits
51. Transfer of Assets Abroad: Relief From Overlapping Charges
52. Transfer of Assets Abroad: Motive Defence
53. Profit Fragmentation

Volume 5

54. Transfer of Income Stream
55. Transactions in Securities

Capital Gains Tax

56. Chargeable Gains
57. UK Property held by Non-residents
58. Reorganisations
59. Residential Property: CGT
60. Gains of Non-resident Settlor-interested Trust: s.86
61. Capital Payments from Non-resident Trusts: s.87

62. Borrowing by Non-resident Trusts: Sch 4B
63. Sub-funds
64. Gains of Non-resident Companies
65. Capital Losses

Funds

66. FIG Relief - Abolition of Domicile Rule
67. Offshore Income Gains
68. Income from Offshore Funds
69. Unit Trusts

Volume 6

70. Life Policies and Contracts
71. Intermediated Securities
72. Investment Manager Exemptions
73. Investment Management Fees & Carried Interest

Inheritance Tax

74. IHT Terms and Concepts
75. Excluded Property: Definition
76. Excluded Property Exemptions
77. Wills and IOVs
78. Reservation of Benefit
79. Inter-trust Transfers: IHT
80. IHT Deduction for Debts
81. IHT Close-company Code
82. IHT Residential Property Code
83. Pe-owned Assets
84. Pension Schemes and IHT

Entities

85. Partnerships
86. Partnership Income Attribution

Volume 7

87. Settlement, Bare Trust and Associated Terminology
88. Estates of Deceased Persons: CGT
89. Estates of Deceased Persons: Income Tax
90. Foreign Entities
91. Hybrid Entities

Concepts & topics affecting more than one tax

92. Protected Trusts
93. Non-dom/Non-resident Spouse
94. Joint Accounts
95. Foreign Currency Issues
96. Cryptoassets

97. Unremittable Assets
98. ATED and SDLT
99. Who is the Settlor?
100. Multiple Settlors

Volume 8

101. Statutory Tax Indemnities
102. Situs of Assets for IHT
103. Situs of Assets for CGT
104. Control, Connected, Close and Related Expressions
105. Participation and % Interest Tests
106. Permanent Establishment and Branch/Agency

Double Taxation Agreements: IT/CGT

107. Double Taxation Arrangements: Introduction
108. DTA Anti-Abuse Rules
109. Third Party Relief/Savings Clause
110. Limitation on Benefits
111. Credit for Foreign Tax
112. Non-discrimination
113. Mutual Agreement Procedure

Double Taxation Agreements: IHT

114. IHT Double Taxation Treaties: Introduction
115. IHT DTAs: India, Pakistan, Italy, France
116. IHT DTA: Netherlands
117. IHT DTA: South Africa
118. IHT DTA: Switzerland
119. IHT DTA: USA
120. Credit for Foreign IHT

Administration

121. Reporting and Compliance
122. Tax Return Filing Position
123. Claims
124. Collection of Tax from UK Representatives

Volume 9

125. Reporting and Compliance: IHT
126. Penalties
127. Failure to Prevent Tax Evasion
128. Reporting Offshore Trusts
129. International Movement of Capital: Reports

CHAPTER EIGHTY SEVEN

SETTLEMENT, BARE TRUST, AND ASSOCIATED TERMINOLOGY

87.1 Definitions of "settlement"
87.1.1 Settlement terminology
87.2 Classic trust
87.3 Settlement: Standard IT/CGT definition
87.3.1 Property comprised in settlement
87.4 Settlement-arrangement definition
87.4.1 Non-trust arrangement
87.4.2 Trust + steps arrangement
87.4.3 Estate/trust on intestacy
87.5 Bounty requirement
87.5.1 "Bounty": Terminology
87.5.2 A judicial gloss
87.5.3 Bounty: Meaning
87.5.4 Applying bounty test
87.5.5 When to test bounty
87.5.6 Retesting bounty
87.5.7 Trust appointment: Filling blanks
87.5.8 No intention to benefit others
87.5.9 Bounty: Divorce settlement
87.6 Definition of "IHT-settlement"
87.6.1 Undistributed trust income
87.6.2 Limb (a): Persons in succession
87.6.3 Limb (b): Income powers
87.6.4 Limb (d): So held by UK law
87.6.5 Limb (e): Equivalent to a trust
87.7 Bare trust/nomineeship
87.7.1 "Bare trust" and related terms
87.7.2 Bare trust terminology
87.7.3 Entitled against trustee
87.7.4 Tax treatment of bare trust
87.7.5 Distribution of trust assets by bare trustee
87.7.6 Bare trusts: Navigation
87.8 Other trust terminology
87.8.1 Property comprised in settlement
87.8.2 Non-classic trust: Deemed trustee
87.9 3 ½ types of invalidity
87.9.1 Outline
87.9.2 When the issues arise
87.10 General power
87.10.1 General power: Terminology
87.10.2 General power/ownership distinction
87.10.3 Why general powers matter
87.10.4 Jointly held power
87.10.5 Validity of trust with general power
87.11 Illusory trust
87.11.1 Illusory: terminology
87.11.2 Test for illusory trust
87.11.3 Applying the test
87.12 Construction of trust: Comments
87.12.1 Worldly realism/Angoran cats
87.12.2 AQ Revocable trust
87.12.3 Pugachev
87.12.4 Clayton v Clayton
87.12.5 Webb v Webb
87.12.6 Law Society v Dua
87.12.7 Cooper v Piney
87.12.8 Summary
87.12.9 How far can the drafter go?
87.13 Testamentary disposition
87.13.1 Why testamentary matters
87.13.2 What is testamentary?
87.14 Sham
87.15 Invalidity rules compared
87.15.1 Apparent overlap
87.15.2 Illusory/testamentary rules
87.15.3 Sham/illusory trust

87.15.4 Illusory trust/general powers
87.16 Foreign applicable law
87.16.1 Foreign law sham
87.16.2 Foreign law illusory trust
87.16.3 Foreign law testamentary trust
87.17 Consent powers

87.1 Definitions of "settlement"

There are three tax definitions of "settlement", or of what amounts to a settlement. The definitions are different, and this has important consequences:

- One should not use the term settlement without specifying which definition applies (unless the context makes that clear).
- One should not ask if an entity is a settlement "for tax purposes". One must ask if it is a settlement for IT/CGT, or for IHT purposes, or if it is a settlement-arrangement (unless the context makes that clear). An entity may be a settlement within one, two, or all three definitions.

87.1.1 *Settlement terminology*

We need labels to distinguish the definitions, and I use the following terms:

Definition of settlement	**Application**	**See para**
Classic trust	Trust in the general (trust-law) sense	87.2
Standard IT/CGT definition	Default IT/CGT/CT/SDLT definition	87.3
Settlement-arrangement definition	Settlor-interested trust code, & more	87.4
IHT definition	Applies for IHT	87.6

In referring to a statutory provision it is generally best to use the statutory term, here, "settlement". But in this particular case, I generally prefer:

- "trust" for classic trusts and the standard IT/CGT definition of settlement
- "settlement-arrangement" for the settlement-arrangement definition of settlement

But in many contexts the terms settlement/trust are interchangeable.

87.2 Classic trust

A **"classic trust"** is a trust in the general (trust law) sense. This convenient term was first used in *Chinn v Collins*[1] and adopted in *Jones v Garnett*.[2]

[1] 54 TC 311 at p.339,

[2] [2007] UKHL 35 at [43].

A classic trust (other than a bare trust) will be a settlement under the IHT and standard IT/CGT definitions, and (if there is bounty, ie gratuitous intent, as is usually the case) it will be a settlement under the settlement-arrangement definition.

What amounts to a classic trust is a matter of trust law. *Lewin on Trusts* para 1.001 (Definition of trust) discusses four definitions. But normally we know whether or not an entity is a trust.

87.3 Settlement: Standard IT/CGT definition

It is convenient to read the IT/CGT/SDLT definitions side by side:

s.466 ITA	**s.68 TCGA**	**Para 1 sch 16 FA 2003**
(1) This section applies for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.[3]	In this Act, unless the context otherwise requires,	(1) In this Part [Part 4, SDLT]
(2) "Settled property" means any property held in trust other than property excluded by subsection (3).	"settled property" means any property held in trust other than property to which section 60 applies	"settlement" means a trust that is not a bare trust.

The sense is the same, though the wording is different.

The exception in s.466(3) ITA/s.60 TCGA relates to bare trusts.[4]

For CT, s.1169 CTA 2010 applies the IT definition by reference.[5] For ATED, s.95(4) FA 2013 applies the SDLT definition by reference.[6]

The IT/CGT provision is formally a definition of "settled property" not "settlement". But where the standard IT/CT definition of settled property applies, "settlement" is used to mean an entity which holds settled

[3] In some cases the context does "otherwise require" because the settlement-arrangement definition is applied. I cannot think of any other case where the context would "otherwise require".

[4] See 87.7 (Bare trust/nomineeship).

[5] "Chapter 2 of Part 9 of ITA 2007 (which relates to settlements and trustees) applies for the purposes of the Corporation Tax Acts as it applies for the purposes of the Income Tax Acts."

[6] "In this section "settlement" has the same meaning as in Part 4 of FA 2003 (see paragraph 1 of schedule 16 to that Act)."

property, ie it means a classic trust (other than a bare trust).[7] In other words, the definition of the term "settled property" also amounts to or implies a definition of the word "settlement".

I refer to this as the **"standard IT/CGT definition"** of settlement/settled property.[8]

87.3.1 *Property comprised in settlement*

s.466 ITA	**s.68 TCGA**
(1) This section applies for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.[9]	In this Act, unless the context otherwise requires,...
(4) References, however expressed, to property comprised in a settlement are references to settled property.	[identical]

I refer to this as the statutory IT/CGT definition. It seems a commonsense definition, but if "property comprised in a settlement" means "settled property" one might as well refer to "settled property" and not use the expression "property comprised in a settlement". It is unnecessary to have *two* expressions meaning the same thing.

In fact it is confusing or at least unhelpful, because the term "property comprised in a settlement" is used in contexts where the settlement-arrangement definition applies, ie where the context shows the statutory IT/CGT definition does not apply.[10]

Strictly, one should not use the expression "property comprised in a settlement" without specifying whether the statutory IT/CGT definition applies; but the context will generally make that clear. The term is only found in the protected-settlements code, and a few dusty corners, so it

[7] This is self-evident, but support, if needed, can be found in provisions such as:

Provision	**Wording (in short)**	**See**
s.466(4) ITA	Settled property is "property comprised in a settlement"	87.3.1
s.70 TCGA	Transfer into settlement is a disposal of the settled property	56.21.4

[8] This term is not wholly apt, as what I call the "standard IT/CGT" definition also applies for CT, SDLT and ATED; but it is convenient and reflects the focus of this work.

[9] In some cases the context does "otherwise require" because the settlement-arrangement definition is applied. I cannot think of any other case where the context would "otherwise require".

[10] See 47.3.1 (Property comprised in a settlement).

does not much matter.

87.4 Settlement-arrangement definition

Section 620(1) ITTOIA provides:

> In this Chapter [Chapter 5 Part 5, settlor-interested trust code]
> [a] "settlement" includes[11] any disposition, trust, covenant, agreement, arrangement or transfer of assets
> [b] (except that it does not include a charitable loan arrangement).[12]

I refer to this as the **"settlement-arrangement"** definition of settlement.[13] An intention to avoid tax is not required.[14]

87.4.1 *Non-trust arrangement*

The paradigm example of a settlement-arrangement is a classic trust made by a settlor for his family. However, a settlement-arrangement need not involve a classic trust. Examples include:

Settlement-arrangement	**See**
Outright gift[15]	
Outright gift to spouse	93.15

[11] The context shows this is an exhaustive definition, ie the word "includes" really means "means".

[12] The exemption for charitable loans is not discussed here. See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 20.2 (Settlor-interested trust code) online version *https://www.taxationofcharities.co.uk*

[13] A note on terminology: The term occasionally used is "statutory settlement".
In early editions of this work I called this the "IT definition" of settlement. But I do not use that term now as (1) it became inappropriate following the introduction of the standard IT/CGT definition in 2006; and (2) the settlement-arrangement definition is also used in CGT/CT.

[14] This is self-evident, but if authority is needed, see *Jones v Garnett* [2007] UKHL 35 at [48]:

> "An intention to avoid tax is not ... absolutely essential. It is possible to imagine that an arrangement planned for some other purpose (such as pre-empting the consequences of insolvency or divorce) could ... amount to an arrangement (and so to a settlement)."

There is likewise no avoidance requirement in the other definitions of settlement (the standard IT/CGT definition and the IHT definition).

[15] It seems self-evident that an outright gift is a settlement-arrangement, but presumably it was not always so, as there is a House of Lords decision on the point: *Thomas v Marshall* 34 TC 178.

Issue of shares:	
(a) at an undervalue	99.40.2
(b)at market value, intending to add value to the company later	87.5.5
Dividend waiver ("Dividend-waiver settlement")	99.19
Alphabet shares ("Alphabet share arrangement")	99.20
Partnership ("partnership-settlement")	99.21
Covenant to make Annual Payments	[16]
A gift subject to an option to reacquire the gifted property	47.6.8

I refer to this as a **"non-trust settlement-arrangement"**. In this case:

(1) The label "settlement" is inapt. The terms trust/settlement are usually synonymous, but not here. This should not be too confusing - as long as one bears the definition in mind. It is generally helpful to avoid the word "settlement" and instead say "settlement-arrangement", or use a clearer and more specific term, such as "partnership-settlement", or at least write "settlement" with scare quotation marks.

(2) The term "settlor" may be inapt; it is a little strange for a trust lawyer to use the word settlor where there is no classic trust. One refers to a "donor" of an outright gift, not a settlor; but no difficulty should arise.

(3) Other trust-vocabulary is likewise inapt or potentially confusing, because it is used in a different sense. In particular:

  (a) The term "trustee" may be used but there are no trustees in the trust-law sense; this is dealt with by the deemed-trustee rule.[17]

  (b) The term "property comprised in the settlement" may be used but:

    (i) There is no "settled property" (in the normal sense, or within the standard IT/CGT definition)

    (ii) There is no "property comprised in a settlement" (within the statutory IT/CGT definition where the term just means "settled property")

  Here the statutory IT/CGT definition does not apply. This term is elucidated in case law discussed at 47.3.1 (Property comprised in a settlement).

87.4.2 *Trust + steps arrangement*

A settlement-arrangement may involve a number of steps; the steps may

[16] Covenanted Annual Payments have ceased to matter now that Annual Payments by individuals are (more or less) taken out of tax: see 31.6 (Annual Payment exemption). But I include covenants in this list as the law reports include many old cases, some still important, where the settlement-arrangement consisted of a deed of covenant.

[17] See 87.8.2 (Non-classic trust: Deemed trustee).

include:
(1) a classic trust[18] *and*
(2) other steps (before or after the making of the classic trust)

Then the arrangement is not just the classic trust alone. I refer to that as a **"trust + steps arrangement"**.

The terms trust/ settlement are usually synonymous, but not here. So the use of the label "settlement" for this situation is confusing. One needs to distinguish:
(1) the classic trust and
(2) the "settlement" (ie the settlement-arrangement) of which the trust forms part

This distinction may[19] matter for the following purposes:
(1) The settlor (or settlors) of the settlement-arrangement may not be the same as the settlor of the classic trust
(2) The beneficiaries of the settlement-arrangement may not be the same as the beneficiaries of the classic trust
(3) The property comprised in the settlement-arrangement may not be the same as the trust property held in the classic trust
(4) The income arising under the settlement-arrangement may not be the same as the trust income arising under the classic trust

In this context it helps clarity of thought:
- to refer to the trust as a "classic trust"
- to avoid the word "settlement" and instead say "settlement-arrangement" (or at the very least, write "settlement" with scare quotation marks)

In these circumstances, the taxpayer has frequently argued that the arrangement is the trust alone, but the Courts have generally found that the arrangement includes other steps (preliminary to making the trust).

Fortunately, this situation, a "trust + steps arrangement", does not arise very often. The reported cases are mostly tax avoidance schemes which

[18] Or even more than one classic trust, but I do not consider that here.

[19] I stress the word "may" because more often than not, the settlor (etc) of the classic trust is the same as the settlor of the settlement-arrangement, and it makes no difference whether one identifies the arrangement as the classic trust alone, or as the classic trust and other steps.

failed, and should not be repeated.[20] But sometimes they are.

For the position of a trust-company structure, see 47.3.2 (Underlying company income).

87.4.3 *Estate/trust on intestacy*

Is an estate of a deceased person, or a trust under a will or intestacy, a settlement-arrangement? This question does not arise for the purposes of the settlor-interested trust code. Even if it is a settlement-arrangement, it is not settlor-interested,[21] and a deceased settlor cannot be subject to tax. The settlement-arrangement definition is used in other contexts where the issue does arise.[22]

87.5 Bounty requirement

The settlement-arrangement definition is an outstandingly bad definition, because, taken literally, it covers every conceivable transaction.[23] It has been left to the courts to define the term. In *Jones v Garnett*:[24]

> Not every transfer of property is a settlement for the purposes of [the settlement-arrangement definition]. There has to be an "element of bounty" in the transaction.[25]

By contrast, the standard IT/CGT and IHT definitions of "settlement" do not include a bounty requirement.[26]

Case law has also decided that bounty is an implied requirement for

[20] For an example, see App. 2.2.7 (Pre-arrangement steps).

[21] The settlor cannot benefit (being dead); the settlor's spouse cannot benefit because a widow is not a spouse.

[22] See 88.8.1 (Is estate a "settlement" for s.87).

[23] Tax is not the only context where the word "settlement" has been used loosely, to include more or less any arrangement, not just classic trusts. Another example is s.24 Matrimonial Causes Act 1973, see *Brooks v Brooks* [1996] AC 375 at p.392: "The authorities have consistently given a wide meaning to settlement in this context".

[24] [2007] UKHL 35 at [7].

[25] HMRC agree. The TSE Manual provides:
"**TSEM4110 scope of statutory definition of settlement** [Jul 2017]
The potential scope of the 'settlement' is extremely wide. Given the breadth of the unrestricted term the Courts have concluded that it is appropriate to impose some limitation on its scope. ... Settlement must include an element of bounty, as decided in the tax case of *CIR v Plummer* (54 TC 1)."

[26] This is self-evident, but if authority is needed, see *Nader v HMRC* [2018] UKFTT 0294 (TC) at [206] -[208].

"providing" property (which is the main part of the definition of settlor).[27]

87.5.1 *"Bounty": Terminology*

A note on terminology. In *Jones v Garnett*:[28]

> This old-fashioned phrase ["bounty"] ... conjuring up the image of Lady Bountiful in *The Beaux' Stratagem*, is perhaps not the happiest way of describing a provision for a spouse or minor children.

This is true, but "bounty" is likely to continue as the technical term. It is short, accurate, memorable if archaic, and a change in terminology comes at a cost in terms of inconvenience, complication and perhaps uncertainty.[29] But for clarity I prefer to use the expression **"bounty (gratuitous intent)"**. Statute, understandably, does not use the word bounty, but it does use the term gratuitous intent.[30] Some writers express unease by putting the word in scare quotation marks.

87.5.2 *A judicial gloss*

There is an important difference between statutory language and a judicial explanation or gloss on the statutory language. In *Chinn v Collins*:[31]

> ... the word "bounty" appears nowhere in the Statute. It is not a word of definition. It is a judicial gloss upon the Statute descriptive of those classes of cases which are caught by the section in contrast to those which are not. The courts must, I think, be extremely careful not to interpret this descriptive word too rigidly.[32]

[27] See 99.39.3 (Settlor of commercial trust: IT/CGT/IHT definitions).

[28] [2007] UKHL 35 at [7].

[29] This is self-evident but if authority is needed, see *Jones v Garnett* [2007] UKHL 35 at [76]:

"The word 'bounty' rings slightly uncomfortably, at least to my ears. … However, in the light of the judicial decisions on these provisions, it seems to me that the law is now tolerably clear and sensible, and, particularly given the need for clarity and the room for difficulties in this area, it would be inappropriate to risk introducing uncertainty or new complications by redefining the principles, even if only linguistically."

[30] Eg s.10 IHTA: see 74.13 (Arm's length disposal relief).

[31] 54 TC 311 at p.357.

[32] The passage cites an aphorism of Frankfurter J: "A phrase begins life as a literary expression; its felicity leads to its lazy repetition; and repetition soon establishes it as a legal formula, undiscriminatingly used to express different and sometimes contradictory ideas."

This is a point of general application. It applies for instance to the judicial gloss which limits s.720 to the "transferor".[33]

Similarly, the *Rangers* case comments on glosses intended to elucidate the concept of earnings "from" an employment:[34]

> ... the courts at the highest level have repeatedly warned of the need to focus on the words of the statute and not on judicial glosses, which may clarify or illustrate in a particular case but do not replace the statutory words. Thus in *Hochstrasser v Mayes*,[35] in which the House of Lords was considering whether an emolument could be said to arise "from" a taxpayer's employment or office, Lord Radcliffe cited various judicial statements and stated:
>
> > "These are all glosses, and they are all of value as illustrating the idea which is expressed by the words of the statute. But it is perhaps worth observing that they do not displace those words". [36]

87.5.3 *Bounty: Meaning*

What does bounty mean? In *Jones v Garnett*:[37]

> ... the general effect of the cases is that, under the arrangement [the settlement under the settlement-arrangement definition], the settlor must provide a benefit which would not have been provided in a transaction at arm's length.

In *Chinn v Collins*:[38]

> What the cases have sought to do is to distinguish between those cases where the recipient has in return for that benefit which he has received accepted some obligation which he has to perform, either before receiving the benefit or at some stated time thereafter, and those cases where the recipient benefits without any assumption by him of any correlative obligation

[33] See 49.4 (Who is the transferor).

[34] *RFC 2012 Plc v AG* [2017] UKSC 45 at [11].

[35] See 34.5 (Earnings causation tests).

[36] If further authority is needed, which I doubt, see *Laidler v Perry* [1966] AC 16:
"... various glosses on or paraphrases of the words in the Act appear in judicial opinions, including speeches in this House. No doubt they were helpful in the circumstances of the cases in which they were used, but in the end we must always return to the words in the statute …"

[37] [2007] UKHL 35 at [7].

[38] 54 TC 311 at p.357.

The TSE Manual provides:

> **TSEM4110 scope of statutory definition of settlement** [Jul 2017]
> ... Settlement must include an element of bounty... Bounty is the provision of value without any corresponding quid pro quo, usually a gift or a transfer at less than full value.
> Where a settlor enters into an arrangement that he or she would not have entered into with someone with whom the individual was acting at arm's length, the arrangement is susceptible to the legislation...

In short, bounty means gratuitous intent.

In a commercial transaction or arrangement there is no bounty. In *IRC v Levy*:[39] "a commercial transaction devoid of any element of bounty is not within the definition". In that case an interest-free loan to a company wholly owned by the lender was held to be a *simple case of a commercial transaction devoid of any element of bounty* and so not a settlement-arrangement. Bearing in mind that "commercial" is itself a somewhat vague concept, this may not take us very far. And the converse does not hold, ie a non-commercial arrangement may lack bounty.

87.5.4 *Applying bounty test*

At first sight bounty seems to be just another item in the arm's length/full consideration vocabulary cluster, which I consider elsewhere.[40] But there is a difference in that arm's length/full consideration are concepts that are usually applied to one-off transactions. Bounty is a concept that is applied to an arrangement, which may include a number of steps, and which may take place over time.

It seems necessary to identify the arrangement before applying the bounty test.[41] But identifying the arrangement is not usually crucial.

In *Jones v Garnett*[42] the steps were:

Step 1 Creation of company: Mr Jones and his wife acquired a new company; the formation agent sold them the two issued £1 shares for £1 each.

Step 2 Operation of company:

(a) The company entered into contracts with customers to provide the

[39] 56 TC 68 at p.87.

[40] See App 4.1 (Consideration/arm's length/full value).

[41] See App 2.2.4 (Identifying the arrangement).

[42] [2007] UKHL 35.

services of Mr Jones. These services generated the company's income.

(b) Mrs Jones did the bookkeeping. This took about 4 hours a week and she was paid market value, £3.6k (£16 per hour). Mr Jones took £6.5k as salary which was far less than market value.

(c) The company distributed most of its profits as dividends.

In short, Mr. Jones worked for a company held equally by himself and his wife. The advantages to Mr and Mrs Jones of receiving the company's earnings as dividends rather than salary were, in short, (1) a dividend paid to Mrs Jones was taxable at a lower rate than Mr Jones, and (2) avoiding NIC. So step 2 was contemplated from the outset.

If the arrangement consisted of steps 1 and 2, it clearly passed the bounty test. However the arrangement consisted of step 1 alone: the issue of shares to Mrs Jones at step 2 - the operation of the company - constituted post-arrangement step(s) which were not part of the arrangement:

> [HMRC argued] that the transfer of the share [to Mrs Jones] was not the whole of the arrangement, which included the provision of services by Mr Jones, the dividend policy and so forth. ... The transfer of the share was in my opinion the essence of the arrangement. The expectation of other future events [i.e. provision of services by Mr Jones and company profits distributed by dividend] gave that transfer the necessary element of bounty but the events themselves did not form part of the arrangement.[43]

So it did not matter that the arrangement consisted of step 1 alone, as step 1 alone had an element of bounty, the *expectation* of dividends for Mrs Jones. at step 2 This is right because the bounty test is a gloss which is to be applied broadly and not strictly. It is a sensible outcome because it is then not necessary to ask the question of exactly which steps are included in, or constitute the settlement-arrangement, which is imponderable.[44] So as far as the bounty test is concerned, it did not matter whether or not step 2 was not part of the arrangement.

[43] [2007] UKHL 35 at [29]. Lord Walker said the same at [54] stressing the absence of a contract of employment. But the contract would make no difference; see Lord Hoffmann at [20] (with whom 3 other judges agreed). It would be strange if a contract made a difference for tax, as in a family situation it makes no commercial difference and it is within the ability of the parties to choose to have a contract or not. If another example is needed, see at [22] discussing *Butler v Wildin*.

[44] See App 2.2.4 (Identifying the arrangement).

87.5.5 *When to test bounty*

One assesses bounty at the time of the arrangement, which if the later steps do not form part of the arrangement, means at the outset. It is sufficient if bounty is intended to come some time after the (perhaps) arm's length transaction which constitutes the settlement-arrangement:

> when considering whether there ... an arrangement, which involved an element of bounty, one should assess the position at the time that the alleged arrangement was made, but, in carrying out that exercise, one should not disregard what happened thereafter. In particular, if the parties intended an element of bounty to accrue, and that element of bounty does indeed eventuate, then, absent any other good reason to the contrary, there is indeed an "arrangement" within the meaning of [the settlement-arrangement definition].[45]

87.5.6 *Retesting bounty*

It seems that one does not assess (or retest) bounty on a year-by year basis. In *Jones v Garnett:*[46]

> the Revenue is anxious to catch only one of the following examples:
> (i) [Husband and wife] may expect that each will make a contribution to the company's earnings of roughly equal financial value;
> (ii) they may expect that each will make a contribution which is equal in terms of effort but ... unequal in terms of earnings for the company;
> (iii) they may expect that each will contribute what they can but that those contributions will vary over time ... or
> (iv) as here, they may expect that one will contribute the work which brings in the money from outside while the other will contribute the limited but necessary ancillary services to make that work possible but bring in no independent money from outside.
>
> There are many variations and permutations between these possibilities. I would have found it easier to understand the Revenue's case if it had adopted a year by year approach: looking at each tax year, has one of the spouses worked for a salary which is seriously less than his services are worth to the company in order to boost the company's profits which can then be distributed equally between the spouses as dividend? In other words, has there been a gratuitous transfer of income between husband and wife? ...

[45] *Jones v Garnett* [2007] UKHL 35 at [79].

[46] [2007] UKHL 35 at [67] - [69].

> But the Revenue has expressly eschewed that approach. It relies on the initial acquisition of the company's shares [by Mrs Jones] as the 'settlement'. It has also expressly eschewed the intention of catching any other type of arrangement than that in example (iv) above. It is not interested in picking apart genuinely co-operative family ventures, even if on analysis the contribution of one spouse is worth more than the contribution of another.

HMRC's view is that arrangements (i) to (iii) are "genuinely co-operative family ventures" but arrangement (iv) is not.

> Nor can it [HMRC] be interested in arrangements which start out as roughly equal ventures but ... become less equal as time goes by. On the Revenue's case, it is only a 'settlement' if a substantial element of 'bounty' - that is, gratuitous transfer - is contemplated at the outset. It must follow that unanticipated later events cannot transform the character of the initial transfer of property or arrangement.

And again:[47]

> a different approach would involve considering what transpired each year, when it was decided how much of the company's gross profit should be attributable to Mr and Mrs Jones' respective wages, and how much should be distributed by way of dividend. ...Neither [Counsel for the Revenue] (no doubt reflecting the Revenue's policy) nor [Counsel for the taxpayer] (as it would involve his clients losing on this issue) was prepared to adopt this approach. Although it appears to me to be logically attractive, it would be inconvenient in practice, in that it would be difficult to administer, and it might well produce unfair, even arbitrary, results.[48]

This approach should be followed, at least below the level of the Supreme Court. It derives from a concession by the parties which had less than enthusiastic support from the Supreme Court, but they appear to have accepted it.

A no-retesting rule helps the taxpayer when arrangements "start out as roughly equal ventures but become less equal as time goes by." But the

[47] at [89]. See too 99.25 (Provision of services).

[48] Annual retesting would clearly be difficult to administer. Lord Neuberger does not identify the "unfair" results which follow from an annual retesting approach. One problem would be this: On the year by year (retesting) approach, what if income was retained in the company and later distributed after circumstances had changed?

rule would help HMRC if it were the other way round, ie what starts as an unequal venture later becomes an equal one. Suppose after the Jones' company was set up there was a change so that:

(1) Mrs Jones' work generated half the company's profits; or
(2) Mrs Jones worked full time on administration, so making "a contribution which is equal in terms of effort but unequal in terms of earnings".

Would there still be a settlement? On the facts of *Jones v Garnett* that would not matter because the s.624 spouse exemption applied.[49] But that would not help if Mr and Mrs Jones had not been married, but (say) cohabitees.

It would be sensible if the issue of bounty could be revisited, in the event of a major unanticipated changes on the basis that a new arrangement has replaced the old one. That does not require the annual retesting which was rejected in *Jones v Garnett.*

87.5.7 *Trust appointment: Filling blanks*

Chinn v Collins[50] concerned an avoidance scheme (known as a "contingent interest scheme"). The object was to transfer the trust fund ("trust shares") from a trust, to UK beneficiaries ("the children"), without a CGT charge. The 3 scheme steps (all carried out on the same day) were, in short:

Step 1 appointment: Trustees of the non-resident trust (the "classic trust") appointed the trust shares to the children contingent on the children surviving 3 days (as in due course they did).

Step 2 sale of contingent interest: The children agreed to sell their contingent interest in the trust shares to a non-resident company for £352k.[51]

Step 3 purchase of trust assets: The children agreed to buy the trust shares back from the company for £355k (effectively funded by the sale proceeds at step 2).[52]

[49] See 93.15 (s.624 spouse exemption).

[50] 54 TC 311.

[51] Other than the interest under the contracts at step 2 and 3, the children had no interest in the company.

[52] A scheme of this kind would not work today. Among other issues, there would now be a CGT charge at step (2) on the disposal of an interest in a non-resident trust; see 56.21.3 (Non-resident trust interest). But the points from the case discussed here are

The object was that the children were not beneficiaries of the settlement after the sale at step 2, and so outside the scope of the predecessor to s.87. The children did indeed cease to be beneficiaries of the classic trust after they sold their contingent interest to the company. But the relevant definition of settlement was the settlement-arrangement definition. HMRC argued:

(1) the 3 steps constituted a settlement-arrangement
(2) the children were "beneficiaries" of the "settlement"[53] and as such taxable under the predecessor to s.87.

The 3 steps constituted an arrangement. But where was the bounty? It was found in the trust appointment at step 1:

> ... there was a very real "bounty" conferred when the trustees with the settlor's consent exercised the power of appointment in question [in favour of the children]. As [Counsel for the Crown] put it, when the power of appointment was exercised a blank was filled in the original settlement which left blank how the final distribution of the trust's assets was to be made.[54] That in my judgment was a clear act of "bounty".[55]

That was sufficient to get the Revenue home. But I would have thought that there was another, simpler, analysis: that the arrangement consisted of *four* steps: the original creation of the trust, along with the three scheme steps, all constituted one arrangement. The four steps have "sufficient unity" and it does not matter that the three scheme steps were not contemplated at the time of the original settlement. On that basis the bounty lay in the creation of the original settlement, not in filling in its blanks. But perhaps the filling-blanks analysis, which identified the

still import.
The analysis would be the same without step 3.

[53] The children were presumably beneficiaries of the settlement as they were entitled:
(1) to the £352k purchase price of the contingent interest, and/or
(2) to an interest in the trust assets (as a result of their agreement to purchase the trust assets).

[54] The idea that a trust appointment "fills in blanks" goes back to *Muir v Muir* [1943] AC 468 at p.483: "It is as though the settlor had left a blank in the settlement which B fills up for him if and when the power of appointment is exercised." The "filling-blanks analysis" arises in many tax contexts, such as the question of who is the settlor after a transfer between trusts; see eg 99.12 (Inter-trust transfer: IHT).

[55] 54 TC 311 at p.357. Likewise at p.351

bounty as the appointment at step 1, comes to the same thing.

There were other reasons that the contingent interest scheme failed, but our concern here is the light the case sheds on settlement-arrangements, and the bounty test, so I do not pursue that here.

87.5.8 *No intention to benefit others*

It often happens that a person creates a settlor-interested trust with only his own interest in mind. No-one ever suggested that this is not a settlement, or they are not the settlor, for lack of bounty. But now there is authority to confirm the point. In the *Clipperton/Dunsby* "dividend replacement strategy" cases[56] the appellants argued that they were not settlors because:

(1) They had no bounty (gratuitous intent)
(2) A person not providing bounty (gratuitous intent) could not be a settlor

This argument failed at point (1).[57] It is true that the shareholders did not intend to, and did not in fact, confer any substantial benefit on any other person. The large majority of the funds which C Ltd paid to Newco were received by the appellants, as always intended. However there is no *de minimis* threshold for bounty. When property is provided to a substantive trust, there must be an *element* of bounty because there are (and must be) other beneficiaries. Had there not been, there would have been no trust.[58]

87.5.9 *Bounty: Divorce settlement*

In *Harvey v Sivyer*[59] a separated husband made payments to his minor children under a separation agreement. The payments were not voluntary; they were pursuant to an obligation to maintain the children and contained no element of bounty (gratuitous intent).[60] The taxpayer argued that for this reason that there was no "settlement" within the settlement-arrangement definition. The argument was rejected and the taxpayer was held to be the settlor. The judge tentatively reconciled his decision with

[56] For these cases, see App. 2.2.7 (Pre-arrangement steps).

[57] For point (2), see 99.2.6 (Providing property: Bounty).

[58] [2022] UKUT 351 (TCC) at [133] - [134] reversing the FTT decision for precisely the reasons set out in the 2022/23 edition of this work. It is also relevant to note here that the bounty test is a non-statutory gloss. not to be applied rigidly; see 87.5.2 (A judicial gloss).

[59] 58 TC 569.

[60] 58 TC 569 at p.572.

the bounty requirement because:

> the natural relationship between parent and young child was one of such deep affection and concern that there must always be an element of bounty by the parent, even when the provision is on the face of things made under compulsion.[61]

This is romantic fiction. The better way to reach the decision is that the bounty requirement is a non-statutory gloss, and not to be applied rigidly.[62] The CoA noted in an earlier case, "if the legislature had set a limit to the extent to which a taxpayer may divest himself for tax purposes of income by voluntary means, I see no reason why the same principle should not be applied to income of which the taxpayer is compulsorarily divested".[63] So this is simply an exception or refinement to the bounty requirement. On this analysis, *Harvey v Sivyer* was correctly decided, though not for the right reasons. Does that matter? Probably not, but it is good to know what we are talking about.

87.6 Definition of "IHT-settlement"

Section 43(2) IHTA provides the IHT definition:

> "Settlement" means any disposition[64] or dispositions of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—
>
> (a) held in trust
> [i] for persons in succession or
> [ii] for any person subject to a contingency, or
> (b) held by trustees
> [i] on trust to accumulate the whole or part of any income of the property or
> [ii] with power to make payments out of that income at the discretion of the trustees or some other person, with or without power to accumulate surplus income, or
> (c) charged or burdened
> [i] (otherwise than for full consideration in money or money's worth paid for his own use or benefit to the person making the disposition)

[61] 58 TC 569 at p.577.

[62] See 87.5.2 (A judicial gloss).

[63] *Yates v Starkey* 32 TC 38 at p.53.

[64] See 74.4 (Disposition).

[ii] with the payment of any annuity or other periodical payment payable for a life or any other limited or terminable period,

[d] or would be so held or charged or burdened if the disposition or dispositions were regulated by the law of any part of the UK;

[e] or whereby, under the law of any other country, the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

The definition of "settlement" requires a combination of two things:

(1) a disposition (or dispositions) of property

(2) a state of affairs, or, I would say, an entity, brought about by the disposition(s), whereby the property is held in the ways specified in limbs (a) to [e][65]

In this section I consider point (2), whether the entity falls within what I call **"limbs (a) to [e]"** of the definition.[66]

Limbs [d] and [e] are unique to the IHT definition of "settlement" and are not found in other definitions.[67]

87.6.1 *Undistributed trust income*

Undistributed income of a discretionary trust is not "settled property" for IHT purposes. Even if it falls within the opening 3 lines of the definition, which is debatable, it does not fall within any of limbs (a) to [e]. It becomes settled property if it is accumulated (added to trust capital).[68]

87.6.2 *Limb (a): Persons in succession*

Limb (a) refers to property "held in trust" and limb (b) refers to property "held by trustees" but the meaning must be the same.

The expression "for persons in succession" has a history. It originated in the definition of settlement in the Settled Land Act 1882, which passed to the Settled Land Act 1925.[69] The Settled Land Act definitions were

[65] This is self-evident, but if authority is needed, see *Barclays Wealth Trustees v HMRC* [2017] EWCA Civ 1512 at [31].

[66] For point (1) and the first 3 lines of the definition, see 75.15 (Adding property: Change of domicile); 79.3 (One IHT-settlement or more).

[67] See 87.1 (Definitions of "settlement").

[68] This is recognised in the exit charge rules; see 76.7.2 (Undistributed trust income).

[69] There are minor differences in the wording of the definitions but they do not seem relevant for present purposes.

incorporated by reference into Estate Duty. There is a substantial case law, discussing whether Victorian jointures, portions and annuities constitute a settlement. Unsurprisingly, this does not shed much light on current issues; indeed it needs a legal historian to fully understand it. Some general comments are perhaps worth noting. In *Attorney-General v Owen*:

> 'By way of succession' seems to me to be a phrase to which one ought, in dealing with this Act, not to assign a narrow or strictly technical meaning, but to treat it as equivalent to 'successively upon death'.[70]

But this statement, while no doubt correct, does not take us very far.

More important is the rule that a gift to a trust for A for life, with remainder to A's PRs, operates as an absolute gift to A.[71] Such a gift is not a settlement, because it is not a trust for persons in succession. The successors have no interest in the property during the life of A.

For this reason a will is not an IHT-settlement. Likewise foreign law entities similar to a will.

87.6.3 *Limb (b): Income powers*

Where trustees hold property on trust for a minor absolutely, s.31 Trustee Act 1925 provides (so far as relevant):

> (1) ... the trustees may... pay to his parent or guardian, if any, or otherwise apply for or towards his maintenance, education, or benefit, the whole or such part, if any, of the income of that property as the trustees may think fit...
> (2) ... the trustees shall accumulate all the residue of that income ... and the trustees shall hold the accumulations in trust for such person absolutely.

The IHT Manual summarises:

> **IHTM16068 Absolute trusts for minors (England & Wales)** [Sep 2018]
> In relation to trusts for minors, the provisions of s.31 Trustee Act 1925

[70] [1899] 2 Q B 253. Similarly, *Mundy & Roper's Contract* [1899] 1 Ch 275 at p.290: "The words ["stands for the time being limited to or in trust for any persons by way of succession"] have no technical force. I see no sufficient reason for restricting their meaning".

[71] *Re Brooks* [1928] Ch 214.

> will usually apply during the minority of a beneficiary. This means that the trustees will have discretion to apply the income of a trust fund for the maintenance, education or benefit of a beneficiary. Under s.31 (2) Trustee Act 1925, any surplus income must be accumulated.
>
> This raises the question whether an absolute trust for a minor can be regarded as a 'settlement' for IHT purposes under s.43 (2) IHTA. ...

At first sight there appears to be an IHT-settlement within (b), either because there is a trust to accumulate income or because the trustees have power to make payments out of the income. However, a bare trust does not constitute an IHT settlement. This is for two reasons (or for one reason which can be put in two different ways):

(1) The provisions of s.31 (both the power to maintain and the trust to accumulate) are administrative and not dispositive.[72]

(2) The provision for accumulation does not constitute "accumulation" in the correct (trust law) sense of the word.[73]

HMRC agree. The Manual continues:

> In our view, an absolute trust of this kind is not a settlement for IHT purposes. S.31 Trustee Act, including s.31(2), contains provisions which are essentially administrative in nature rather than dispositive. The trustees' discretion in relation to an absolute trust is limited to deciding how much income they spend for the benefit of the beneficiary and how much they retain on the beneficiaries behalf.
>
> The express trusts in such a case will remain for the minor beneficiary absolutely - that is, the beneficiary has an immediate and absolute right to both capital and income, and only their minority will prevent them for requiring the trustees to convey the trust property to them. Any accumulations will be held for the beneficiary if they attain 18 or (by virtue of the original gift, not s.31 Trustee Act) for their estate if they die under that age. The trust property will form part of the beneficiary's estate for IHT purposes.

[72] For this terminology and its tax implications, see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 16.1 (Administrative, dispositive, beneficial: terminology).

[73] See *re Berkeley* [1968] Ch 744 at p.772: "Accumulation to my mind involves the addition of income to capital, thus increasing the estate in favour of those entitled to capital and against the interests of those entitled to income. The mere retention of income [to meet a possible liability] does not alter its nature: it remains income and will be paid out to the income beneficiaries when no longer required."

> As a result, a lifetime gift on trust for a minor absolutely, whether or not the provisions of s.31 Trustee Act are excluded, is a potentially exempt transfer.

87.6.4 *Limb (d): So held by UK law*

This limb provides:

> [d] or would be so held or charged or burdened if the disposition or dispositions were regulated by the law of any part of the UK;

Limb [d] is present for historical reasons. The former estate duty definition of "settlement" in s.22(1)(i) FA 1894 provided (so far as relevant):

> The expression 'settlement' means any instrument, whether relating to real property or personal property, which
> [A] is a settlement within the meaning of the Settled Land Act, 1925, or
> [B] if it related to real property would be a settlement within the meaning of that Act

Dick Taverne, then Financial Secretary to the Treasury, explained a problem with this definition:

> The definition is primarily by reference to the Settled Land Act 1925, but it brings in property other than settled land by references to instruments which if related to real properly in England and Wales would be a settlement within the meaning of the Act. We now see that it is arguable that we have done no more than equate an English settlement of personalty with one of realty and that we have not caught foreign settlements.[74]

Hence s.36(5) FA 1969 extended the definition:

> In the enactments relating to estate duty—
> (a) the expression 'settlement'— (i) for the avoidance of doubt is hereby declared to include ...
> (bb) any disposition regulated by the law of a territory outside Great Britain which would constitute a settlement within the meaning of section 22(1)(i) of the FA 1894 if it had been regulated by the law of England or, as the case may require, of Scotland;

[74] Hansard Standing Committee F, 24 June 1969, col 721.

The words in s.43(2)[d] IHTA derive from this. But now, the definition of settlement for IHT does not incorporate the SLA 1925 definition by reference, and applies to UK and foreign law trusts; so the words in (bb) were not needed. The drafter of the current definition possibly did not notice, but probably thought the words desirable to preclude an argument that "trust" in s.43(2) IHTA meant a trust governed by a UK law. That argument might have been weak, but given the history of the provisions it would not have been self-evidently wrong.

Limb (d) therefore has (more or less) no practical effect; but it does no harm.

In contemporary legal English one would refer to a disposition *governed* by UK law, rather than *regulated* by UK law, but the meaning is the same.

87.6.5 *Limb (e): Equivalent to a trust*

This limb provides:

> [e] or whereby, under the law of any other country [other than the UK], the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

The standard IT/CGT definition of settlement has no equivalent of s.43(2)[e]. So while the IT/CGT definition requires that property is held "in trust" it is sufficient for IHT that the administration of the property is governed by provisions equivalent in effect to those which would apply if the property was (in short):

(a) held in trust for persons in succession, or for a person subject to a contingency, (eg an IIP trust) or

(b) held by trustees on trust to accumulate the income of the property or with power to make income payments (eg a discretionary trust); or

(c) charged with payment of an annuity (in practice this is rare).

The statute refers to the *administration* of the property being governed by equivalent provisions. Trust law draws a distinction between administrative and dispositive provisions, but the context here shows that limb (e) is referring to all the provisions which govern the property, and not just administrative provisions in the strict sense.

Two difficulties lie in the short phrase "equivalent in effect":

(1) "Equivalent" no doubt requires effective (or substantive) rather than exact equivalence, but equivalence comes in degrees and ways: one cat might sound like another, but look slightly different. Where does one draw the line?

(2) A trust can have (more or less) the same effect as an entail, usufruct, will, company, partnership, charge by way of security over assets, power of attorney, and so on, though it is not any of those things. A trust is a flexible, protean institution which can have markedly different effects. Likewise companies, partnerships, and other entities can have quite different effects. Much depends on the drafting of the relevant documentation. However, difficulties arising from the amorphous nature of trusts and other entities are mitigated by two considerations:

   (a) The question is not whether a general type of entity is equivalent, (eg, if a Foundation is not a trust, is it at least equivalent to a trust?); the question is whether one particular entity (eg, is the specific Foundation made on [date]) equivalent?)

   (b) The question is not whether the particular entity is equivalent to a trust; it is whether it is equivalent to a trust for persons in succession (etc). In short, is it equivalent to an IIP or discretionary trust?

I abbreviate limb [e] to "equivalent to a trust" but that is a convenient shorthand, not a full statement of the statutory test. In deciding whether a foreign entity is equivalent to a trust, one should have regard to the context: is it appropriate in the scheme of IHT that an entity should be subject to IHT in the same manner as a trust?

Because of limb [e], it appears at first sight that an entity within the IHT-settlement definition need not be a classic trust. On the other hand references in a UK statute to a trust should include a foreign entity which is equivalent to a trust, applying the common-law resemblance test, even without limb [e]. So limb [e] could be regarded as a foreign-entity clause with little (if any) practical effect.[75] But it does not matter.

It appears from *Hansard* that limb [e] was drafted with Liechtenstein Foundations in mind.[76]

For discussion of whether specific entities are IHT-settlements, see:

[75] See 90.3.3 (Foreign-entity clauses).

[76] See 90.14.9 (Foundation an IHT-settlement).

Entity	**Para**
US revocable (grantor) trust	90.9
Foundation	90.14.9
Fideicommissum	90.20
Usufruct	90.25.3
Stichting Administratiekantoor (STAK)	90.40.2
Bewind	90.42

87.7 Bare trust/nomineeship

87.7.1 *"Bare trust" and related terms*

There are three tax definitions of bare trust, or of what amounts to a bare trust. These are intertwined with the definitions of settled property/ settlement, as follows:

Provision	**Defined term/concept**	**Applies for**
s.466(2) ITA	Settled property	IT/CT
s.466(3) ITA	Bare trust	IT/CT
s.68 TCGA	Settled property	CGT
s.60 TCGA	Bare trust	CGT
Para 1(1) sch 16 FA 2003	Settlement	SDLT
Para 1(2) sch 16 FA 2003	Bare trust	SDLT

It is convenient to read these side by side. The effect is the same, though the wording differs.

The statute begins with the definitions of settlement/settled property, set out at 87.1 (Definitions of "settlement"). With that text in mind we can turn to the tax definition of bare trust, or what amounts to a definition:

s.466 ITA	**s.60 TCGA**	**Para 1(2), 3(1) sch 16 FA 03**
(3) Property is excluded for the purposes of subsection (2) and so not "settled property" if—	(1) In relation to property	**Para 1(2)** In this Part a "bare trust" means a trust under which property is held by a person as trustee—
(a) it is held by a person as nominee for another person,	held by a person as nominee for another person,	[equivalent text is differently placed: see row 5 below]
(b) it is held by a person as trustee for another person who is absolutely entitled to the property as against the trustee, or	or as trustee for another person absolutely entitled as against the trustee,	(a) for a person who is absolutely entitled as against the trustee,

(c) it is held by a person as trustee for another person who would be absolutely entitled to the property as against the trustee if that other person were not an infant or otherwise lacking legal capacity.	or for any person who would be so entitled but for being an infant or other person under disability	or who would be so entitled but for being a minor[77] or other person under a disability, or
(6) References to a person who is or would be so entitled include references to two or more persons who are or would be jointly absolutely entitled as against the trustee.	(or for 2 or more persons who are or would be jointly so entitled),	(b) for two or more persons who are or would be jointly so entitled, and includes a case in which a person holds property as nominee for another.
	this Act shall apply as if the property were vested in, and the acts of the nominee or trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or trustee (acquisitions from or disposals to him by that person or persons being disregarded accordingly).	**Para 3(1)** Subject to sub-paragraph (2),[78] where a person acquires a chargeable interest or an interest in a partnership as bare trustee, this Part applies as if the interest were vested in, and the acts of the trustee in relation to it were the acts of, the person or persons for whom he is trustee.

For CT, s.1169 CTA 2010 applies the IT definition by reference.[79]

87.7.2 *Bare trust terminology*

The term "bare trust" is not used much in ITA, but is apt to describe trusts within s.466(3). The term "bare trust" is not used in TCGA, but s.60 is

[77] Sub-para (4) caters for Scots terminology: "In sub-paragraph (2) "minor", in relation to Scotland, means a person under legal disability by reason of nonage."

[78] This exception concerns the grant of a lease by a nominee; see 98.28.3 (Bare trust).

[79] "Chapter 2 of Part 9 of ITA 2007 (which relates to settlements and trustees) applies for the purposes of the Corporation Tax Acts as it applies for the purposes of the Income Tax Acts."

headed "Nominees and bare trustees", which is close.

I use the following terms:

"**Bare trust**" is a trust of property:

(1) within s.466(3) ITA/s.60 TCGA and so not a settlement for IT/CGT: (in short, someone is absolutely entitled as against the trustee); and
(2) not a settlement for IHT: (in short, not held on trust for persons in succession or governed by provisions equivalent in effect).[80]

The two definitions (IT/CGT, and IHT) are not quite identical, but in practice they usually amount to the same.

This has become standard usage among UK private client practitioners, in the context of UK taxation. But it needs to be kept in mind, especially outside UK tax contexts, that the expressions bare trust/ nominee may not necessarily be used in this sense.[81]

"*Substantive* trust" is a trust that is not a bare trust.[82]

The rule in s.60(1) TCGA[83] is the **"CGT bare-trust disregard"**.

The terms bare trustee/nominee, and bare trust/nomineeship, are generally used synonymously.

87.7.3 *Entitled against trustee*

s.466(5) ITA	**s.60(2) TCGA**	**Para 1(3) sch 16 FA 2003**
A person is absolutely entitled to property as against a trustee if[84]	It is hereby declared that references in this Act to any property held by a	In sub-paragraph (2)(a) and (b) the references to a person being absolutely

[80] See 87.6 (Definition of "IHT-settlement").

[81] The old cases, and a variety of different senses of these somewhat imprecise terms, are assembled in *Re Blandy Jenkins* [1917] 1 Ch 46. That is mainly of historical interest, but may still be relevant in considering the meaning of bare trust/nominee in, say, trust or other non-tax legislation. See too see *Herdegen v FCT* (1988) 84 ALR 271 at p.281-282.

There has also been some debate as to whether what I call a bare trust should necessarily be described a "trust"; but that generally makes no difference for tax purposes.

[82] A note on terminology. *Lewin on Trusts* describes non-bare trusts as "special trusts": 20th ed para 1-028 (Bare or simple trusts and special trusts). But "substantive trust" is clearer, and the term "special trust" is not used in this sense in practice, or at least, not nowadays.

[83] That is, in short, the rule that the TCGA applies as if the property were vested in, and the acts of the nominee/trustee were the acts of, the beneficial owner.

[84] The context suggests that this is an exclusive definition: "if" means "if and only if".

	person as trustee for another person absolutely entitled as against the trustee are references to a case where	entitled to property as against the trustee are references to a case where
the person has the exclusive right to direct how the property is to be dealt with (subject to the trustees' right to use the property for the payment of duty, taxes, costs or other outgoings).	that other person has the exclusive right, subject only to satisfying any outstanding charge, lien or other right of the trustees to resort to the property for payment of duty, taxes, costs or other outgoings, to direct how that property shall be dealt with.	the person has the exclusive right, subject only to satisfying any outstanding charge, lien or other right of the trustee, to resort to the property for payment of duty, taxes, costs or other outgoings or to direct how the property is to be dealt with.

The phrase “absolutely entitled as against the trustee” marks the border between bare/substantive trusts. It is not as simple as it seems.

The CG Manual provides:

> **CG37000: Absolute entitlement** [Nov 2023]
>
> The case of *Stephenson v Barclays Bank Trust Co Ltd*, 50 TC 374, illustrates the general principles for determining when absolute entitlement occurs.
>
> The facts (simplified) are as follows. Under the will of W, his daughters C D and E were entitled to annuities of £300 a year during widowhood. Subject to the annuities the property was to be held in trust for such of his grandchildren as should reach the age of 21. There were two grandchildren, A and B, who both reached 21 before CGT was introduced in 1965.
>
> In 1969 the trustees, the daughters and the grandchildren entered into a deed under which specific funds should be set aside to meet the annuities and the rest of the property should be paid over to the grandchildren. In fact however the trustees held onto this property.
>
> The Revenue argued that A and B became absolutely entitled when the deed was executed.
>
> The trustees’ arguments were
>
> i) that absolute entitlement had occurred before 1965, because the annuities were merely `outgoings’ under TCGA92/S60 (2), see CG34320. The judge rejected this argument. The annuities were interests under the settlement. The grandchildren were not then

absolutely entitled because there were other beneficiaries with different interests.

ii) that absolute entitlement would only occur when the assets were distributed. This was held to be incorrect because Section 60(2) is clearly referring to a time when the settled property is still in the trustees' hands. Therefore absolute entitlement must precede the actual transfer.

iii) that an individual grandchild had to be entitled to specific property. The judge considered that the two grandchildren together were entitled to the whole of the settled property. Therefore they were 'jointly' absolutely entitled as against the trustees when the deed was executed.

The case law is conveniently summarised in *McLaughlin v HMRC*[85] but it is not necessary to discuss this here.

In the TCGA the phrase is used on a number of occasions, so with an economy of drafting, s.60(2) TCGA provides a TCGA-wide definition, which I call the **"standard CGT definition"**. That definition is drafted with the s.60(2) context in mind, and is not altogether suitable for the other places where it is used. It may seem like a commonsense definition but it is not quite. Where a trustee/nominee holds on trust absolutely for a minor or other person under a legal disability, the beneficiary (although absolutely entitled in the general sense of the word) cannot "direct how the property is to be dealt with" so appears strictly not to be within the definition of "absolutely entitled as against the trustee". In the context of s.71 TCGA (trust termination), this is dealt with by extending the statutory CGT definition to cover this case.[86] In other contexts a purposive construction might be needed to reach the (obviously sensible) position that a beneficiary who is a minor or under a disability should still be said to be absolutely entitled. But in practice the issue will rarely if ever arise.

The phrase is also used in other income tax contexts, though only very occasionally, where the usual statutory definition has to be repeated; or else the phrase is left undefined and so should have its normal meaning, but the above is (more or less) the normal meaning.

87.7.4 *Tax treatment of bare trust*

I have generally preferred to deal with bare trust issues as they arise in the

[85] [2012] UKFTT 174 (TC) at [111].

[86] See 56.21.5 (Disposal on trust termination).

context of other topics; see below for navigation. This section considers aspects of bare trusts which are conveniently addressed in isolation.

In almost all cases a bare trust is transparent, ie ignored for tax purposes. In particular:

(1) A bare trust is transparent for CGT, and, generally, for IT/IHT.
(2) A bare trust is not a settlement in the standard IT/CGT sense.
(3) A bare trust is not an IHT-settlement.
(4) A bare trust may be a settlement-arrangement.[87]
(5) A share subscription by a bare trustee is regarded as made by the beneficial owner.[88]

But transparency is not an absolute rule. It occasionally happens that a bare trust is not disregarded, either because statutory provisions require that, or because rights of a beneficiary under a bare trust are different from the rights of a legal owner, and these differences can have tax as well as non-tax consequences, or because of unusual features of the bare trust.

87.7.5 *Distribution of trust assets by bare trustee*

The CG Manual provides:

> **CG37100 Absolute entitlement: effects: deemed disposal** [Nov 2023]
> Following the occasion of charge under Section 71(1), when beneficiaries become entitled to the whole of the trust assets, the trustees may distribute the assets to the beneficiaries under a scheme of division otherwise than in accordance with their proportionate shares. In this situation there are good grounds for saying that there is a chargeable disposal by each beneficiary by way of an exchange of assets.
> Similarly specific assets may be appropriated by trustees to a beneficiary who has become absolutely entitled to a proportion of the settled property. In this case the exchange is between the trustees and the beneficiary.
> It is however possible that the principles of *Warrington v Brown* may be applicable in these two situations, see CG37410+, so that there is no second disposal following shortly after the Section 71 (1) occasion. If

[87] In the case of a bare trust for the settlor, there is no bounty (gratuitous intent) and hence no settlement-arrangement. There is a settlement-arrangement where a settlor creates a bare trust for the benefit of another person. The position is the same where a settlor makes an outright gift to another person without a bare trust: the bare trust as such makes no difference.

[88] HMRC Brief 41/10; this was common ground in *McLocklin v HMRC* [2014] UKFTT 042 (TC).

> the trustees and beneficiaries seek to apply those principles, no objection should be made, although any attempt to treat a subsequent disposal of an asset on an inconsistent basis should be resisted.

87.7.6 *Bare trusts: Navigation*

For other aspects of bare trusts, see:

Topic	**See para**
Residence of bare trustees	7.21
Income taxation	15.8
Remittance investment relief	19.3.1
s.87	61.3.1
Nominee partner	85.7
IHT definition of settlement	87.6.3
ATED	98.28.3
Reporting & Compliance	121.5
TRS	131.5

87.8 Other trust terminology

87.8.1 *Property comprised in settlement*

Where the standard IT/CGT definition of settlement applies, the term "property comprised in a settlement" is not likely to cause difficulties, but for completeness, it is given a commonsense definition. Section 466(4) ITA/s.68 TCGA provide:

> References, however expressed, to property comprised in a settlement are references to settled property.

For this term where "settlement" has the settlement-arrangement definition, see 47.3.1 (Property comprised in a settlement).

87.8.2 *Non-classic trust: Deemed trustee*

A classic (trust-law) trust must have trustees. A settlement-arrangement, and an IHT settlement, may not be a classic trust. I refer here to such an arrangement as a "settlement" with scare quotation marks. The "settlement" will not have trustees in the usual (trust-law) sense. However one needs to identify trustees of the "settlement" for a number of purposes, in particular:

Purpose	**See para**
To ascertain trust residence for s.87	61.4

To ascertain s.1(3) amounts (trust gains)[89]	
For the definition of connected person	104.14.2
To ascertain who is liable for IHT	125.3.4

There is a standard-form definition which addresses this issue. The provisions are conveniently read side by side:

s.97(7A) TCGA	**s.286(3ZA)(b) TCGA**	**s.994(3) ITA/s.1123(3) CTA10**	**s.45 IHTA**
In this section, sections 86A to 96 and Schedule 4C	For the purpose of [s.286(3)]	For the purposes of section 993	In this Act
"trustee", in relation to a settlement [settlement-arrangement definition] in relation to which there would be no trustees apart from this subsection,	[identical to s.97(7A)]	[identical to s.97(7A)]	"trustee", in relation to a settlement [IHT definition] in relation to which there would be no trustees apart from this section,
means any person in whom the settled property or its management is for the time being vested ...[90]	[identical to s.97(7A)]	means any person— (a) in whom the property comprised in the settlement is for the time being vested, or (b) in whom the management of that property is for the time being vested.[91]	[identical to s.97(7A)]

These are effectively identical; the Tax Law Rewrite improved the

[89] These are the amounts on which "the trustees of the settlement" would be chargeable to CGT if UK resident.

[90] Section 97(7A) was introduced by para 15 sch 12 FA 2006. Para 15(3) provides:

> "This paragraph shall come into force on 6th April 2006 (in relation to settlements whenever created)."

This raises the interesting possibility that s.87 did not apply to a Foundation before 2006 as a Foundation has no "trustees" in the normal (trust law) sense. So pre-2006 gains would not be s.1(3) amounts (trust gains). It is suggested that the context shows that the word "trustee" should be construed widely enough to include a Foundation, before 2006, and the pre-2006 law was the same as now. But the question will not often arise.

[91] This continues: "Section 466(4) does not apply for the purposes of this subsection." That disapplies an inappropriate definition of "property comprised in the settlement".

drafting by adding paragraphing.

I refer to this as the **"deemed-trustee rule"**[92] and in this book:

A **"trust-law trustee"** is a trustee in the usual (trust-law) sense

A **"deemed trustee"** is a trustee in the extended sense (where there would be no trustees but for the deemed-trustee rule).

In practice this issue arises most commonly in a s.87 context.[93]

87.9 3 ½ types of invalidity

87.9.1 *Outline*

In classifying an entity as a substantive trust, four rules of trust law/ property law need consideration. In outline:

(1) *General powers or equivalent:* A general power is "tantamount to ownership", and the powerholder is treated as owner for some purposes but not for others:
   (a) The underlying trust property is available to satisfy involvency/ family law claims; for this purpose a general power is treated like simple ownership
   (b) A trust which confers a general power may be a valid, substantive trust; for this purpose a general power is not treated as simple ownership (which would be inconsistent with a trust).

(2) *Illusory trusts:* A trust which appears to take the form of a substantive trust, but which (on its true construction) has only one beneficiary, is an *illusory* trust.

(3) *Testamentary dispositions*: A testamentary disposition does not take effect during the life of the testator (purported settlor).

(4) *Sham*: the parties to the trust do not intend to follow its terms.

In cases (2)-(4), the (purported) trustees generally hold on bare trust for the (purported) settlor. There will be a bare trust, if the trust property is vested in trustees (nominees) and not the beneficial owner; but what matters is that there is no effective *substantive* trust. One might describe the trust as "ineffective" or "invalid". In the first case, general powers, the position is more nuanced. Hence the heading of this section is "3½ types of invalidity".

Much has been written on sham, and on illusory trusts, (rather less on

[92] The deemed-trustee rule also crops up by mistake in the definition of relevant person for remittance purposes; see 18.6 (Relevant person: Trusts).

[93] See 61.3 (Non-classic trust).

testamentary dispositions). That focuses on the general law position, and the recent cases have all been insolvency/family law cases. But the rules affect the tax position, in particular, whether an entity is a settlement within the standard IT/CGT and IHT definitions. In order to address that, one has to consider the topic generally.

87.9.2 *When the issues arise*

These issues have arisen in modern case law where a settlor desires:

(1) to obtain desirable consequences of a substantive trust, ie one or more of:
 (a) asset protection: trust fund not exposed to insolvency/family law claims
 (b) succession law treatment: trust property to pass under the terms of the trust and not under the rules which would apply to the settlor's free estate (will, forced heirship, or otherwise)
 (c) tax treatment: to create an effective settlement within the standard IT/ CGT or IHT definitions

and

(2) to avoid unwanted consequences of a trust, ie loss of ownership and control, and so to retain:
 (a) benefits or rights equivalent to beneficial ownership, and
 (b) control of trust property

Responses to this dilemma have included:

(1) Execute a discretionary trust in the common form, but administer the trust property as if it still belonged to the settlor. In short, the trust may be treated like a bank account. That takes us to the territory of sham.

(2) Give the settlor a general power of appointment (or a power of revocation, which is equivalent). That creates an effective settlement for tax purposes, but loses asset protection.

(3) Draft the trust:
 (a) to restrict the rights of beneficiaries other than the settlor;
 (b) (i) If the settlor is trustee, to increase the rights of the trustee.
  (ii) If the settlor is not trustee, to give him control over the trustee.

 That takes us to the territory of general powers, testamentary dispositions and illusory trusts.

These rules apply to trusts but not to other entities such as companies.

One of the intuitions underlying the these rules, though generally unexpressed, may be that a settlor should not "have his cake and eat it". But this overused metaphor does not help analysis. Perhaps it is not usual to analyse folk wisdom of this kind, but here we need to. It means that one cannot have two incompatible things, such as spending and saving. But it begs two questions:

(1) What exactly are the things which are said to be incompatible?
(2) Are they in fact incompatible?

Or to put it another way, it does not answer when a trust becomes illusory.

The old cases on testamentary dispositions prevent the carrying out of this intuition to its logical conclusion, as it is clear that the settlor may have both:

(1) power of revocation, or a general power, and
(2) a substantive trust.

But note in this case the settlor does not obtain the benefit of asset protection; if that is the desired cake, the settlor cannot have it as well as a general power.

87.10 General power

87.10.1 *General power: Terminology*

Powers are traditionally divided into:

(1) general powers or
(2) not general powers: the American term **"non-general"** is the clearest word. A traditional trust law term is "special power"; one sometimes sees "limited power".

In *Re Dilke*:[94]

> General powers are such as the donee can exercise in favour of such person or persons as he pleases, including himself.
> [Non-general powers] are such as the donee can exercise only in favour of certain specified persons or classes.

I refer to this as a general power **"in the strict sense"**.

In *TMSF*,[95] the settlor had a power of revocation. A power of revocation is not a general power in the strict sense, but it is equivalent to a general power in that it is:

[94] [1921] 1 Ch 34 at p.42 citing *Farwell on Powers* (3rd ed., 1916), p.8.
[95] *TMSF v Merrill Lynch Bank* [2011] UKPC 17.

(1) a right tantamount to ownership, and so
(2) a right which could be taken and used by his receivers in bankruptcy.[96]

I refer to any unrestricted power which the powerholder can use to transfer trust property to himself or herself (whether or not it can be used to transfer trust property directly to others) as a general power **"in the wide sense"**. In my terminology, a power of revocation exercisable by the settlor is a general power in the wide sense.

Whether a power is a general power ie tantamount to ownership, might be clear from the trust document; if not, it is a matter of construction.

I refer to the person who exercises a power of appointment as the "**powerholder**". The traditional trust law term is "donee" (that is, the person to whom the power is given).

I refer to the property over which the power is exercisable as the **"underlying property"**.

87.10.2 *General power/ownership distinction*

The traditional view is that power and property are distinct concepts:
(1) A power is not "property" (in the general sense of the word).
(2) The powerholder is not treated as owning the underlying property over which the power is exercisable.

One might refer to this as a technical view. *Re Armstrong* states this view with what seems to me an element of hyperbole:[97]

> No two ideas can well be more distinct the one from the other than those of 'property' and 'power' ... A 'power' is an individual personal capacity of the donee of the power to do something. That it may result in property becoming vested in him is immaterial; the general nature of the power does not make it property. The power of a person to appoint an estate to himself is, in my judgment, no more his "property" than the power to write a book or to sing a song. The exercise of any one of those three powers may result in property, but in no sense which the law recognises are they 'property.'

On the contrary:
(1) When defined, "property" is often given a wide definition to include general powers expressly, or to include "rights and interests" which

[96] See Russen, "The Reserved Powers Trust; when might Power be Property" [2013] JITTCP 239.

[97] (1886) 17 QBD 521 at p.531.

may be understood to include general powers. When undefined, context may show that property (undefined) includes general powers.

(2) When the distinction is drawn, the difference between owning a general power and owning the underlying property seems trivial. In *Re Churston*:[98]

> [the powerholder] was in substance the owner of the property, and consequently free to deal with it in any way she pleased. One must put in the words 'in substance' or 'practically,' because even a person having a general power of appointment is not quite in the same position as an owner. True, he can give it to anybody he likes inter vivos. True, he can dispose of the property by will without referring to the power at all provided that he makes a residuary gift, but he may make a will which contains no residuary gift, or more probably, he may make no will at all, and in those circumstances the property will go as in default of appointment. So, as I have said, it is not absolutely true that even a person having a common general power of appointment is in quite the same position as an owner. Still, I think that the basis of the doctrine [relating to the rule against perpetuity] is that he is treated as though he were for all practical purposes the owner.

The commercial reality is obviously that a general power is tantamount to ownership.

87.10.3 *Why general powers matter*

The concept of general powers matters in the following tax contexts:

Term	**Topic**	**See para**
General power of appointment	Who is settlor	99.14
General power over non-settled property	IHT joint accounts	94.3.1
General power over pension fund	Pension schemes	84.12
Settlement power	IHT settlement-power relief	74.10

These are niche topics.

The concept matters for trust law rules restricting to delegation of powers and the rule against perpetuities. These are again niche topics.

The concept matters for insolvency and family law (asset protection) rules. That is the context of the modern cases.

(1) The holder of a general power must use it to pay their debts before using it to benefit others.

[98] [1954] 1 Ch 334, at p.343.

(2) If an insolvent holder of a general power (which for this purpose includes a power of revocation) refuses to exercise the power in their own favour, the court will appoint a receiver who can exercise the power.[99]

87.10.4 *Jointly held power*

Churlston decided that a joint power (a power to appoint to whoever two persons jointly direct) is not a general power. That seems self evident.

The same conclusion was reached in *Law Society v Dua*.[100]

87.10.5 *Validity of trust with general power*

What matters for tax purposes is that a trust with a general power may be a substantive trust, ie it is not necessarily an illusory trust. But of course a trust with a general power may be illusory. An important point here is whether the power is vested in the trustee or a non-trustee:[101]

> ... a power vesting in a trustee without any effective accountability to the beneficiaries is anathema to a trust.

By contrast, if the settlor has a power of revocation, the trustee's fiduciary obligations may continue, and a settlement within the standard tax definitions may exist, unless and until the power of revocation is exercised.[102]

Perhaps for the power to vest in only one of the trustees is sufficient to make the trust illusory:

> In our view, if it could be said that Marcus [one of the trustees] holds a general power of appointment of the income and assets of the trust without such accountability, then it would necessarily follow that there is no valid trust.

87.11 Illusory trust

87.11.1 *Illusory: terminology*

The term "**illusory trust**" is not an established term of trust law.[103] I use

[99] *TMSF v Merrill Lynch Bank* [2011] UKPC 17.

[100] [2020] EWHC 3528 (Ch) at [157].

[101] at [116].

[102] *Clayton v Clayton* [2016] NZSC 29 at [125].

[103] The word illusory has a long legal history, but the concept of illusory trusts starts with Mowbray, "Shams, Pretences, Blackmail and Illusion" [2000] PCB 105.

it to describe a trust which:

(1) at first glance, seems to be a substantive trust but
(2) when carefully construed, confers rights only on the settlor

The terminology is currently controversial. In *Clayton v Clayton:*[104]

> we do not see any value in using the "illusory" label: if there is no valid trust, that is all that needs to be said.

Likewise in *Pugachev*:[105]

> One can see why someone might have described the trust in *Clayton v Clayton* as illusory because no doubt at first sight, the deed looks as though Mr Clayton has divested himself of control over the property whereas after careful consideration one reaches the conclusion that he has not. However the word is not helpful and I will only use it in this judgment as a label.

These objections are misplaced. We need labels and the term conveniently expresses a specific ground of invalidity. To describe a trust as "invalid" is not to say all that needs to be said. There are numerous reasons which may render a trust invalid and we need words to describe them. Strictly, perhaps, it is not the trust, but the interests of (purported) beneficiaries which are illusory, but it comes to the same thing. Perhaps there is a better term than illusory, but I cannot think of one. "Illusory" is a new way of describing an old rule (a valid trust requires beneficiaries who can enforce it) but it describes a new phenomenon, a new style of drafting (purported) trusts.

Webb v Webb proposed the term "objective nullity"[106] (objective, to distinguish the concept of sham, which depends on the parties' subjective intention). But that term is opaque and less precise. It would also be apt to describe a trust which is void for perpetuity, say, or void because the (purported) settlor lacked capacity. But those are different grounds for holding a (purported) substantive trust to be invalid.

In the trusts considered here, the settlor will be the principal beneficiary, and I refer to others as "secondary beneficiaries".

[104] [2016] NZSC 29 at [123].

[105] *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch) at [169].

[106] [2020] UKPC 22 at [73].

87.11.2 *Test for illusory trust*

Webb v Webb[107] puts the test this way:

> whether those powers were so extensive that Mr Webb can be said never to have disposed of any of the property purportedly settled on or acquired by the trusts.
> In this connection one might also ask whether the trusts lacked the irreducible core of obligations owed by trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust.[108]

Adopting *Webb's* wording, the test of an illusory trust is:

(1) whether the powers were so extensive that the settlor can be said not to have disposed of the property purportedly settled; or

(2) whether the trust lacks the irreducible core of obligations owed by trustees to secondary beneficiaries and enforceable by them.

These may be regarded different ways of saying the same thing. But the absence of a disposal is the consequence, not the test, of an illusory trust. A trust is not illusory because there is no disposal; there is no disposal because it is illusory. The test is whether the trust lacks the irreducible core of obligations. Another way to put the test, in legal terms, is whether secondary beneficiaries have any interest at all. Or to put it another way: could a secondary beneficiary sue for breach of trust? If not their interest can properly be called illusory.

This test requires one to ascertain what are the powers/interests of the beneficiaries. That is a matter of construction of the trust deed.

While a trust will normally be illusory (or not) from the outset, it is possible that a valid trust may become illusory (or an illusory trust may become valid) as a result of an exercise of trust powers which alters the

[107] [2020] UKPC 22 at [89].

[108] The reference is to *Armitage v Nurse* [1998] Ch 241 at p.253:

> "there is an irreducible core of obligations owed by the trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust. If the beneficiaries have no rights enforceable against the trustees there are no trusts."

Likewise Hague Convention art.2: "A trust has the following characteristics ... (c) the trustee has the power and the duty, *in respect of which he is accountable,* to manage, employ or dispose of the assets in accordance with the terms of the trust ...". The rule goes back to *Morice v The Bishop of Durham* (1804) 9 Ves Jun 399 at p.405: "There must be someone in whose favour the Court can decree performance."

terms of the trust.

Clayton v Clayton puts the test slightly differently:[109]

> The concept of "illusory trust" was described ... as a trust under which the trustee retains such control that the proper construction is that
> [1] he did not intend to give or part with control over the property sufficient to create a trust.
> [2] The essence of the concept appears to be that the trust as constituted has the attributes of a trust, including the imposition on the Trustee of the obligation to act honestly and in good faith; but the powers given to the Trustee and, we would add in this case, the Principal Family Member, given that Mr Clayton had both roles, are so broad that the Trustee can 'basically … do whatever he wants with the property'...
> The issue would be whether the powers held by Mr Clayton are so broad that what he intended to be a trust was not, in fact, a trust.

I do not think it is satisfactory to identify an illusory trust by asking whether the primary beneficiary can "basically do whatever he wants" as that language describes a general power which is consistent with a substantial (non-illusory) trust. "Control" is also a broad and imprecise term (which is why it is almost always given a definition).

87.11.3 *Applying the test*

I start with what is not necessarily inconsistent with a valid trust. Article 2 of the Hague Convention of the Law Applicable to Trusts[110] provides:

> The reservation by the settlor of certain rights and powers, and the fact that the trustee may himself have rights as a beneficiary, are not necessarily inconsistent with the existence of a trust.

The wording of s.70 TCGA[111] assumes that a trust is not necessarily invalid where:

(1) The trust is revocable
(2) The settlor has "some interest" as beneficiary
(3) The settlor is sole trustee

[109] Cited in *Pugachev* at [163], [135].

[110] The Convention is incorporated into UK law by the Recognition of Trusts Act 1987, and it is generally accepted that its definition of trust represents the UK law concept.

[111] Set out at 56.21.4 (Disposal on transfer into trust).

The wording of s.5(2) IHTA[112] assumes that a trust is not necessarily invalid where a person has a general power of appointment.

Case law shows that there may be a valid trust under which the settlor ("S") has both a power of revocation and a life interest. The trust is not classified as testamentary and having been upheld, it cannot be classified as illusory.[113]

It is not inconsistent with a valid trust that the interests of secondary beneficiaries have nil economic value.

While these features individually are consistent with a valid trust, one needs to look at the trust as a whole. There have been a few recent cases which offer examples.

87.12 Construction of trust: Comments

There have been six recent cases on the construction of trust deeds to determine whether the trust (1) was illusory or (2) conferred a general power:

Case	**General power**	**Illusory**
AQ Revocable Trust	-	Yes
Pugachev	-	Yes
Webb v Webb	Yes	Undecided
Clayton v Clayton	Yes	Undecided
Cooper v Pinney	No, but ongoing	No
Law Society v Dua	No	No

The focus of investigation in all these cases is whether the settlor's powers are constrained or unconstrained, ie:

(1) powers which the settlor could lawfully exercise in a selfish way in favour of himself and against the interests of the other Discretionary Beneficiaries; or

(2) powers which could only properly be exercised for the purpose of furthering the interests of the Discretionary Beneficiaries as a class on the other hand. One might refer to this as "fiduciary powers". The word fiduciary is vague and covers a variety of different obligations. but that does not matter here.[114] Or one might say that the duty is at least to act honestly but a requirement of honesty does suffice for a

[112] Set out at 94.3.1 (Account in both a/c holders estates).

[113] See 87.13.2 (What is testamentary?)

[114] See *Pugachev* at [186].

valid trust, as the settlor may be selfish and honest.

Each case turns on the wording of the trust. Trust deeds are long, a short summary can mislead, but a short table may be a useful starting point:

Feature	***AQ***	***Pugachev***	***Webb***	***Clayton***	***Cooper***	***Dua***
Sole trustee	Y	N	Y	Y	N	Joint trustee
Power to remove trustee		Y			Y	
Ditto without cause	Y	Y			Disputed	
Beneficiary	Y	Y	Y	Y	Y	Y
Exercisable in own favour		Y	Y	Y		
Other special feature	Y					
Outcome	Ill.	Illusory	GP	GP	Valid	Valid

87.12.1 *Worldly realism/Angoran cats*

The question should be addressed with "worldly realism".[115] *Pugachev* makes a similar point referring to Angoran cats:[116]

> Professor Mario Franzosi likens a patentee to an Angora cat. When validity is challenged, the patentee says his patent is very small: the cat with its fur smoothed down, cuddly and sleepy. But when the patentee goes on the attack, the fur bristles, the cat is twice the size with teeth bared and eyes ablaze...
>
> The problem can apply to any written instrument and this case provides another example in a different context. When the validity or effect of the trust is challenged, the trustee can put forward emollient submissions about Protector's powers being confined and narrow as a result of their

[115] *Clayton v Clayton* [2016] NZSC 29 at [79].

[116] at [438] - [441].

> fiduciary nature. That has happened in these proceedings. But in other circumstances, for example when Mr Pugachev needs collateral for a bank loan, a completely different stance can be taken in relation to the very same instrument. Mr Pugachev can be presented as the owner of the trust assets. This latter event has happened too... when a bank asked for collateral for a loan, Mr Pugachev's family office presented a trust asset ... as an asset owned by Mr Pugachev ...
> I do not believe this characteristic of the deeds in this case is accidental. ... the whole scheme always was in truth that the settlor would exercise covert control of the trustee and both settlor and trustee always intended that that would be so...

87.12.2 *AQ Revocable trust*

In *Re the AQ Revocable Trust* the facts were very strong:

(1) The settlor was sole trustee and a beneficiary.

(2) He was (importantly, and unusually) entitled to release trustees from liability.

The interests of beneficiaries (other than the settlor) during the settlor's lifetime were held to be illusory and the rest was testamentary:

> [29] ... the concatenation of rights and powers in the settlor, when coupled with the fact that he was the sole trustee at the time of the constitution of the trusts, rendered this trust illusory during his lifetime. ... the cumulative effect of the trust documents, when taken with the de facto situation, means that the settlor as trustee could not effectively be called to account during his lifetime. Crucial to this conclusion is art VIII H, which allows the settlor to absolve himself as trustee from any and all breaches of trust.

This clause provided:

> The written approval by the Donor [the settlor] of any trust transaction during his lifetime shall be a complete release of the Trustee (including the Donor) of any liability or responsibility of the Trustee to any person with respect to this transaction.

Palmer argues, I think correctly, that this clause alone is sufficient to show that the trust is illusory even if the settlor was not a trustee.[117] But the Court did not have to go that far because the settlor was sole trustee:

[117] Palmer, "Controlling the Trust" (2011) 12 Otago LR 473 *http://www.nzlii.org/nz/journals/OtaLawRw/2011/3.html*

> While it may be that I would not have come to that conclusion had art VIII H been coupled with a distinct and independent trustee, in this case it is the combination which pushes it over the top. Given that the trust agreements are constituted on their face with the settlor as sole trustee, and that no further appointment was made at the time, I consider that arts I and II were void on the face of the documents at the inception of the trust agreements, and that the remaining trusts created by the agreements were therefore testamentary in nature.[118]

I do not think that is contentious.

87.12.3 *Pugachev*

Pugachev is the first case in the English courts.[119]

(1) The settlor was protector and beneficiary.
(2) The trust provided that the protector may remove trustees without cause, and the trustees could not distribute without the consent of the protector.

The judge found that the powers were unconstrained, exercisable freely for the settlors's own benefit:[120]

> 268. The fundamental reason for why I reach this conclusion is having regard to the extensive nature of the Protector's powers combined with the fact that the First Protector is the settlor of all the trust assets and is also one of the named Discretionary Beneficiaries. If such extensive powers had been conferred on a third party as protector, with provisions barring that person from being a beneficiary, then I can see that a different result might follow but the fact it is a beneficiary on whom these powers are conferred militates against the idea of a limitation. One would expect a beneficiary ordinarily to be entitled to act in their own interests. Conversely if less extensive powers were conferred on a beneficiary/protector then again one might arrive at a different result but that is not this case.

[118] *Re the AQ Revocable Trust,* also reported under the name *BQ v DQ,* [2010] SC (Bda) 40 Civ.

[119] *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch). This concerned a New Zealand trust, but the parties agreed that English/New Zealand law were the same on this point; see at [112]. That is not binding in other cases. It is convenient that trust jurisdictions should adopt the same test, and likely though not inevitable that they will.

[120] at [267] to [275].

> 269. The fact that Mr Pugachev is also the settlor reinforces the conclusion....
> 272. The fact that the power of removal of trustees is expressed to be "with or without cause" is significant. In the context of all the other factors in this case, to go to the trouble of saying expressly that removal of a trustee may be without cause seems to me to negative any idea that the power is subject to a limitation of any kind ...
> 275. ... the provisions about the Protector being Under a Disability defined as to include a disability by operation of law support the same conclusion. The arrangements have been set up so that if the Protector is subject to a court order requiring him to do something he does not want to do, he ceases to be the Protector and his son Victor stands in his place. If required to act against his will Mr Pugachev can truly say to the court that he has none of the Protector's powers. If the Protector's powers under the deed were limited to acting only in the best interests of the Discretionary Beneficiaries as a class, rather than in his own selfish interests, then I doubt this provision would be necessary. What it does is allows Mr Pugachev's effective complete control of the trusts to cease to exist the moment he is compelled to do something he does not want to do, like hand over the assets to a creditor. It is an attempt to make the trust judgment proof and should not be accepted.

So the trust was held to be illusory. Trust practitioners have criticised *Pugachev* for its construction of the particular trust deed and for lack of clarity of analysis. But the decision also has its supporters and, I think, its merits.[121]

87.12.4 *Clayton v Clayton*

In *Clayton v Clayton* the powers of the settlor were again extensive. The settlor was sole trustee and a beneficiary, and his power to appoint the property to himself was unconstrained, because of the following provisions:
cl 14: Self benefit:

> A Trustee who is also a Beneficiary may exercise any power or

[121] Brightwell, "Mezhprom v Pugachev: bold new approach or illusory development?" [2018] Trusts & Trustees p. 398; Nitikman. "More about illusory trusts" [2021] Trusts & Trustees p.69; *Lewin on Trusts* 20th ed (2020) para 15-053 ("We consider this decision to be doubtful"). *Law Society v Dua* [2020] EWHC 3528 (Ch) described Lewin's criticism as "unfounded". In the first supplement to *Lewin* (2024) the discussion is rewritten but still describes *Pugachev* as doubtful; see para 5-035A.

> discretion vested in the Trustees in his, her or its favour.

cl 11: Unfettered discretion:

> notwithstanding anything in this deed or any rule of law which imposes upon the Trustees the duty to act impartially towards Beneficiaries, the Trustees shall have unfettered discretion as to the exercise of the powers and discretions conferred upon them by this deed even though:
>
> (a) the interests of all Beneficiaries are not considered by the Trustees;
>
> (b) the exercise would or might be contrary to the interests of any present or future Beneficiary ...

cl 13: Negation of conflict:

> A Trustee may act as such and exercise all of that Trustee's powers and discretions notwithstanding that ...
>
> (c) the interests or duty of that Trustee in any particular matter may conflict with the duty of that Trustee to the Trust Fund or any Beneficiary

The Supreme Court found that the powers were (in my terminology, general powers (the statutory term was "relationship property") ie tantamount to ownership[122]; and so available for the claims of the divorcing spouse. They left the issue of illusory trusts for another day.[123]

87.12.5 *Webb v Webb*

The next case is *Webb v Webb*[124]. The terms of the trust were again extreme:

(1) The settlor was sole trustee and a beneficiary.

(2) The settlor as trustee was permitted to exercise the trust's powers notwithstanding that his interests may conflict with his duties as trustee. The settlor had power to nominate himself as sole beneficiary in place of the existing beneficiaries. This power was not subject to any fiduciary duty.

[122] at [58].

[123] [2016] NZSC 29 at [127]: The issue was "a matter of some complexity on which the court does not have a concluded unanimous view. In light of that, we do not intend to determine the issue because the settlement of the proceedings makes it unnecessary to do so."

[124] [2020] UKPC 22.

(3) The settlor had power without giving reasons to remove trustees.

And so on. In short, the settlor had power to arrange that he alone would hold the trust property on trust for himself alone. In these circumstances:

> 89. ... the powers reserved to Mr Webb under the trust deeds may be analysed in two different ways.
> [1] One is to consider whether those powers were so extensive that Mr Webb can be said never to have disposed of any of the property purportedly settled on or acquired by the trusts. In this connection one might also ask whether the trusts lacked the irreducible core of obligations owed by trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust.
> [2] The other is to ask whether the powers reserved to Mr Webb were so extensive that in equity he can be regarded as having had rights which were tantamount to ownership. ...
> in this case it can make no difference to the outcome which of these two analytical routes is taken.

This is true of all asset protection cases.

> I will therefore confine myself to the substantive question whether Mr Webb's powers under each of the trust deeds were such that, in equity and in all of the circumstances of this case, he can be regarded as having had rights in the trust assets which were indistinguishable from ownership. In my view he plainly can... In my opinion ... the trust deeds failed to record an effective alienation by Mr Webb of any of the trust property. The bundle of rights which he retained is indistinguishable from ownership.

That seems self-evident, but it follows that in asset protection cases, the Court will never have to decide the illusory issue. For the terms which suggest that the settlor has a general power will be similar to those which suggest that the trust is illusory.

The important question for tax is the question which the Court chose not to decide. Was the trust:

(1) an illusory trust, taking effect as a bare trust; or
(2) a valid substantive trust with a general power, tantamount to ownership, and so making the trust property available to creditors?

The question will never have to be decided in ordinary trust litigation. One may argue for the latter. If so, the trust would be an settlement within the UK tax definitions. But I would not plan on that basis.

87.12.6 *Law Society v Dua*

The most recent English case is *Law Society v Dua*.[125] This was a trust in the form in my book *Drafting Trusts & Will Trusts*.

(1) The settlors were Mr and Mrs Dua.
(2) The settlors were trustees.
(3) They had power to add beneficiaries. It was assumed for the purposes of discussion that they had power to add themselves as beneficiaries.

However:

> [157] A conclusion by me that the powers reserved to Mr and Mrs Dua are tantamount to beneficial ownership would require me to treat:
> (1) the powers vested in Mr and Mrs Dua as trustees as free from any fiduciary responsibility, fetter or limitation, when that is not the case in this Deed;
> (2) the beneficiary's entitlement to be considered for appointment as if it did not exist, when such a proviso is not present; and
> (3) Mr and Mrs Dua as operating as one, when they are separate persons.
> In my judgment this is not open to me, or in any event goes too far

87.12.7 *Cooper v Piney*

Forthcoming we will have *Cooper v Pinney*[126] where:

(1) The principal beneficiary was one of the trustees and one of the beneficiaries.
(2) The principal beneficiary had power to remove a trustee without giving reasons. The Court was split over whether this was a beneficial power which the settlor could exercise for his own benefit, for instance, to appoint a corporate trustee which he controlled, thus giving himself full control.

The split on point (2) was the key to a split on the outcome of the the question of construction, holding 2:1 that the principal beneficiary did not have powers tantamount to ownership, because "he cannot unilaterally appoint income or property to himself".[127] That case concerned a more conventionally drafted discretionary trust, and the question was whether

[125] [2020] EWHC 3528 (Ch) at [157].
[126] [2023] NZCA 62.
[127] at [111].

the settlor had a general power or equivalent; CoA agreed it was not an illusory trust.

87.12.8 *Summary*

To summarise the case law: *AQ* is a clear case of invalidity, on wording not found (I think) outside US grantor trusts. *Clayton* and *Webb* are indecisive on the illusory trust question. *Pugachev* is the most far-reaching case of a trust found to be illusory, because it concerns trust wording of a type more often found. *Law Society v Dua* was a clear case of validity, because of the unusual fact that there were two settlors who were both trustees. It does not give us the answer if the same trust had one settlor who was sole trustee.

Powers vested in trustees are not likely to be construed to be general powers, as trustees cannot in principle use their powers as they please, to benefit themselves. Different considerations apply if the settlor is trustee.

Further clarification will have to wait for more case law. In *Cooper v Pinney*:[128]

> There is some ambiguity regarding illusory trusts: the debate extends to what is the irreducible core of a trust, whether a formal or contextual approach should be taken to analysis of a trust relationship, and what are the permissible limits of settlor or trustee control...
>
> There is some debate about the degree of accountability required to establish a valid trust. A conservative approach finds it sufficient that trustee powers are formally fiduciary in nature; in principle, the beneficiary in such a case can invoke the duty to administer the trust honestly, considering the interests of the beneficiary. A purposive approach holds that, having regard to the objects of the PRA, accountability must be meaningful or effective and a court may look beyond the form of the trust deed to the substance of the arrangement.

The point may be clearer when the New Zealand Supreme Court has given its decision.

87.12.9 *How far can the drafter go?*

In the 2016/17 edition of this work I said: “It would be wise for the trust drafter to keep a little distance from this still rather indeterminate boundary.” That seems confirmed by the decisions in *Pugachev* and

[128] [2023] NZCA 62 at [57], [66] and [81] (footnotes omitted).

Webb. I think that advice remains sound.

How far should the drafter go? The answer depends on whether the settlor wants (1) asset protection or (2) only the tax consequences of creating a settlement. The latter is easier to achieve, for instance, a revocable trust has the tax consequences desired, without providing asset protection. In general, it is suggested that if it is desired to have a trust which is valid for tax purposes, and asset protection is not required:

(1) The settlor should not be trustee or protector.
(2) The settlor should not have power (directly or indirectly) to control or replace the trustee or protector.
(3) The settlor may have power of revocation or a general power of appointment.

87.13 Testamentary disposition

87.13.1 *Why testamentary matters*

English law (and foreign laws which adopt common law principles) distinguish between:

(1) testamentary dispositions
(2) non-testamentary dispositions (which might be called "lifetime dispositions")

The distinction matters for many reasons including the following:

(1) *Formalities*: Stricter formalities apply for the validity of a testamentary disposition (eg 2 witnesses are usually required).
(2) *Rules of revocation*: A testamentary disposition is normally revoked by making a new will or by marriage. These events do not normally revoke a non-testamentary disposition.
(3) *Date disposition takes effect*: A testamentary disposition takes effect on death. A lifetime disposition normally takes effect when executed. If a disposition which creates a trust is a testamentary disposition, the trust must be a bare trust during the life of the settlor/testator.

Statute law recognises and indeed requires a testamentary/non-testamentary distinction but gives no guidance on where to draw the line.[129] The testamentary/non-testamentary distinction derives from 19th century case law, but it is being applied now in new contexts.

[129] Section 1 Wills Act 1837 states that the term "will" includes a testamentary disposition, but does not define "testamentary disposition".

87.13.2 *What is testamentary?*

A disposition is testamentary if it is the intention of the writer of the document "that death was the event that was to give effect to it".[130]

A disposition which confers a life interest on the settlor and also a power of revocation is in principle a valid lifetime substantive trust, not testamentary. In *Thompson v Browne*:[131]

> If there be anything in that decision [*Attorney-General v Jones*] to support the notion, that where a person by deed settles property to his own use during his life, and after his decease for the benefit of other persons, a power of revocation reserved in such a deed alters the character of the instrument, and renders it testamentary ... I can only say that, if this were law, a great number of transactions of which the validity has never been doubted would be liable to be impeached.

Likewise a trust may confer a general power of appointment. The remainder beneficiaries of a trust in this form have an equitable interest from the date of the gift, known as a present future interest. They could take proceedings in the event of a breach of trust. However in practice this may be a theoretical possibility only. The difference between a testamentary disposition and a trust of this kind is then one of form and not one of substance. There is no economic difference. Their interest has a nil economic value.

In cases of this kind it may be harder to construe the document and determine whether the intention of the writer is:

(1) to confer a present future interest or
(2) that death is the event which gives effect to the document.

Since it makes no practical (economic) difference, the writer of the document may not have formed a clear intention on the point, or even if they have, they may not have expressed that intention clearly in the document. In these cases the form of the document is an important guide to construction. If the document takes the form of a will, (ie describing

[130] *Milnes v Foden* (1890) 15 PD 105 at p.107; or (which comes to the same thing) "it is dependent on the death for its vigour and effect"; *Cock v Cooke* (1866) 1 P&D 241 at p.243. If the document calls itself a will, the intention is obvious, but it is not necessary to use the word "will". For instance, a conveyance "not to take effect until after my decease" is testamentary: *In the Goods of Morgan* (1866) 1 P&D 214.

[131] (1835) 3 My & K 32. The point is also stated in *Baird v Baird* [1990] 2 AC 548 at p.556.

itself as a will and executed with the formalities of a will) the intention of the writer must be that it is testamentary. If it takes the form of a lifetime settlement (ie describing itself as such and executed as a deed), the intention of the writer must be that it is a lifetime disposition. Of course the form of the document is not decisive. The context may show otherwise. However, the form certainly gives some indication of intention, and in the absence of contrary indications it should be determinative.

Thus in *Corlet v Isle of Man Bank Limited*[132] and *Anderson v Patton*[133] lifetime trusts conferred what one might regard as minimal future revocable interests on beneficiaries other than the settlor, but the trusts were not testamentary. The latter case concerned a document reciting:

> received from A $5,000 which I am to hold in trust for A and which I am to pay out as instructed to X and Y if anything should happen to A. The money will be returned if A should demand it.

The court held by a majority that even this was non-testamentary. The reader may prefer the minority view that this should have been construed as testamentary.

87.14 Sham

The sham rule is (in short) that a trust is invalid if the settlor (and trustees) lack the intention to create a substantive trust.

The word sham has a long legal history, though I do not think anyone thought much about sham trusts before *Rahman v Chase Bank (CI) Trust Co.*[134]

The *Pugachev* case comments on terminology:[135]

> Despite the frequent references to a “sham trust”, there is not really any such thing. What may or may not be a sham are the acts or documents which purport to set up the trust.

It seems to me that “sham trust” is a convenient term to describe what purports to be a trust, but is invalid under the sham rule: the objection is pedantic. I would say that the acts/documents which purport to set up the

[132] [1937] 3 DLR 163.

[133] [1948] 2 DLR 202.

[134] [1991] JLR 103.

[135] *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch) at [169].

trust, and the trust itself, should *both* be described as sham.

I do not consider sham further here, as the case law is extensive, and it has been extensively written up elsewhere.

87.15 Invalidity rules compared

87.15.1 *Apparent overlap*

The same provisions in a trust may tend to suggest that:
- a trust is illusory
- powers are general powers
- the trust is testamentary

So all three points may be argued, and rules which are conceptually distinct can seem to overlap.

87.15.2 *Illusory/testamentary rules*

A trust may be illusory but not testamentary. They are distinct concepts:

(1) In the case of an illusory trust, the question is whether a beneficiary other than the settlor has any rights.

(2) In the case of a testamentary trust, there would be someone who is intended to benefit after the death of settlor/testator, and the question is whether they are intended to have rights immediately or not until the death of the settlor.

87.15.3 *Sham/illusory trust*

The sham rule is distinct from the rules a trust may be classified as a testamentary disposition or an illusory trust. The difference is that:

(1) Sham depends on the (subjective) intention of the parties as, typically, shown by their conduct after the creation of the trust, which is a question of fact.

(2) The testamentary/illusory trust rules depend on the construction of the document, which is a question of law and an objective matter.[136]

In *Webb v Webb*:[137]

> 87. There is ... no inconsistency between
>
> [1] the finding by Potter J, upheld by the Court of Appeal, that

[136] See *Clayton v Clayton* [2015] NZCA 30 at [78]: “the two concepts [sham and illusory trust] are quite different and the distinction is important.”

[137] [2020] UKPC 22.

> the trusts are not shams and
>
> [2] a conclusion that Mr Webb's attempts to create the trusts have failed or are defeasible.
>
> Acceptance that Mr Webb intended to create trusts does not in any way preclude a finding that he reserved such broad powers to himself as settlor and beneficiary that he failed to make an effective disposition of the relevant property. ...

In fact a finding that a trust is illusory is logically inconsistent with a finding of sham. An illusory trust fulfils the settlor's intention which is to retain control and beneficial ownership. But the consequence - invalidity - is the same, so it does not generally matter for practical purposes.

87.15.4 *Illusory trust/general powers*

The distinction between an illusory trust, and valid trust conferring a general power, may be a fine one. But as *Cooper v Pinney* put it:[138]

> To find that the trustee's powers and entitlements amount to a general power of appointment is to accept that the trust relationship exists; that is to say, the settlor succeeded in creating a trust ... an illusory trust must be invalid for all purposes, not merely as between the parties to relationship property litigation. That need not be the case where trust powers (or assets) are classified as relationship or separate property for purposes of the PRA.

87.16 Foreign applicable law

Common law jurisdictions generally follow English law principles; indeed the cases cited above are drawn from multiple jurisdictions. But the terms of the statutory trust laws of tax haven jurisdictions would need consideration.

I would be interested to hear from Scottish readers if Scots law is the same.

In civil law jurisdictions it should not be assumed that common law principles apply.

87.16.1 *Foreign law sham*

The validity of a trust is a matter of the governing law, and UK tax must be applied on the basis that the trust has the effect it has under the

[138] at [77].

governing law. It may be that:
(1) a trust would be classified as sham under English trust law principles; but
(2) it is not classified as sham under its governing law, perhaps some civil law jurisdiction which recognises trusts or trust-like entities, but does not share our concept of sham.

87.16.2 *Foreign law illusory trust*

The question of what are the rights of the beneficiaries are a matter for the proper law; but after that, the tax analysis is a matter of UK law.

Most tax haven jurisdictions have legislation which states that giving specified powers to the settlor ("reserved powers") will not invalidate the trust. Details vary. A reserved powers law may merely declare the common law rules[139] in which case it makes no difference. But it is possible that there may be an entity or arrangement (to use a neutral word) which:
(1) the proper law regards as a substantial trust; but
(2) if UK law applied to the trust, it would be an illusory trust.

I refer to that as a **"reserved-power "trust" arrangement"**. What is the UK tax analysis? This is unexplored territory.

Suppose a reserved-power "trust" arrangement, where the settlor is sole trustee, ie, suppose a trust such as in the *AQ* case, but assume that the proper law contained a reserved-power rule under which the trust was effective. It is considered that in UK law, and so for UK tax purposes, there is no trust, and hence no settlement, under the standard IT/CGT or IHT definitions. A UK court is not bound to classify an arrangement (to use a neutral word) as a trust (for the purposes of the UK tax definitions of settlement) just because the foreign law says there is a trust.[140]

Suppose a straightforward bare trust to which (under the foreign law) the rule in *Saunders v Vautier* does not apply: the beneficiary is not entitled to call for the trust property from the trustees. It is suggested that the UK tax analysis is:

[139] In *Re the AQ Revocable Trust* also reported under the name *BQ v DQ,* [2010] SC (Bda) 40 Civ at [17] the court held that reserved power provisions in the then Bermudan trust legislation merely codified the common law rules (but the Bermudan law has since changed).

[140] See 90.4 (How terminology may mislead).

(1) This is *not* a settlement within the IHT definition, because the property is held on trust, but not on trust for persons in succession.[141]

(2) This *is* a settlement within the standard IT/CGT definition, because the property is held on trust, and the settlor is not entitled to direct the trustees how to deal with the trust property.

Suppose a reserved-power "trust" arrangement, where the settlor is not trustee, ie, suppose a trust such as in the *Pugachev* case but assume that the proper law contained a reserved-power rule under which the trust was effective. It is arguable that the UK tax analysis is the same as a bare trust to which *Saunders v Vautier* does not apply. But while this is not a settlement within the IHT definition, the better view is that this is also not a settlement within the IT/CGT definition, as the settlor is entitled to direct the trustees how to deal with the trust property (by exercising the powers conferred by the trust deed).

87.16.3 *Foreign law testamentary trust*

It may be that:

(1) a trust would be classified as testamentary under English law principles; but

(2) it is not classified as testamentary under its proper law.

English law may recognise the validity of the testamentary provision under the Wills Act 1963. If the disposition is void in English law but valid in foreign law, the applicable conflict of law principles must be applied to see which legal system has priority. The starting point is the domicile of the settlor and the situs of immovable property. Prior to the death, there is a bare trust, at least for UK tax purposes, just as for an illusory trust.

This particular conflict issue arises with American grantor trusts, see 90.10 (US grantor trust).

87.17 Consent powers

The question arises as to the classification of a power to appoint to whoever the powerholder directs, subject to the consent of a second person. I refer to that as "**a consent power**".

A consent power is not a general power. This was decided in *Re*

[141] Another possible analysis is that the settlor has a general power over non-settled property. A general power over non-settled property is property for IHT purposes; in particular, it is not a "settlement power" (which is disregarded for IHT purposes).

Churston and is clearly right on principle:

> the reason why a general power of appointment in the ordinary sense starts a new settlement, and has not got to be read back into the original settlement, is because the property is treated as vesting in the donee of the general power, though it is not quite strictly accurate to say that it does so; or, in other words, that the test really is: is there somebody who for all practical purposes can be treated as the owner? [142]

A consent power is not the equivalent of ownership.

Churston, it seems to me, successfully cleared up a confusion left by three earlier cases: *Watts*, *Dilke*, and *Philips*. For completeness I consider these cases to explain that confusion.

In *Re Watts*,[143] a consent power was also held not to be a general power. In this case however the court laid some stress on particular features of the power concerned:

(1) The consent power was conferred by a trust made in consideration of marriage.
(2) The consent power was exercisable during the lifetime of the consentor.
(3) The consentor had to consent both to the exercise of the power of revocation and to the exercise of the power of new appointment.

But as *Churston* pointed out, these features have no bearing on the central question of whether the power is equivalent to ownership.

> I cannot think that for the purpose of applying the rule against perpetuities a power to appoint as A thinks fit with the consent of B can have a different effect according to whether it is in a marriage settlement or in any other settlement.[144]

Quite so.

> a power to A to appoint to anybody he thinks fit during the life of B would be a general power of the common kind, though it could not be exercised after the death of B; by the terms of its creation it would thereupon cease to be a power at all. Likewise, a power to A to appoint to anybody he might think fit during a period of 21 years would appear to me to be a general power of the common kind, though obviously it

[142] [1954] Ch 334 at p.347.
[143] [1931] 2 Ch 302.
[144] [1954] Ch 334 at p.342.

> could not be exercised after the expiration of the term of 21 years...[145]

Quite so.

> Then he said that regard must also be had to the fact of "her consent in writing being given both to the exercise of the power of revocation and to the exercise of the power of new appointment." Again, I cannot appreciate the bearing of that. The two things are different things.[146]

So in conclusion:

> I therefore cannot say that I can see any real ground of distinction on those facts between *In re Watts* and *In re Dilke* and *In re Phillips*, neither of which, as far as I can make out, really throws any particular light on the present question.[147]

So the decision in *Watts* was correct; but not on the ground that its consent power was different from powers which *Dilke* and *Phillips* considered to be general powers; but on the ground that those cases were not relevant to the definition of "general power".

What were those two cases? *Re Dilke*[148] concerned a consent power which the powerholder exercised so as to confer a general testamentary power on herself, which did not require a consent.[149] The question was whether the consent power was validly exercised. This was a question of construction, and the exercise of the power was rightly held valid. The court described the power as "a general power of appointment to be exercised with certain consent". The question whether the consent power had to be categorised as a general power did not arise and I do not think that the court decided it.

Re Phillips[150] concerned the insolvent powerholder rule: the holder of a consent power exercised the power and then died insolvent. The question was whether the appointed funds were available for the disappointed creditor – and it was held that they were. The case could have been decided on the basis that the consent power was a general power; but it

[145] [1954] Ch 334 at p.342.

[146] [1954] Ch 334 at p.342

[147] [1954] Ch 334 at p.343

[148] [1921] 1 Ch 34.

[149] [1921] 1 Ch 34. It seems that this was done because of a concern that the donee may lose mental capacity. I suspect there were death duty implications; but it does not matter.

[150] [1931] 1 Ch 347.

could equally have been decided on the basis that the insolvent powerholder rule applied on the exercise of a consent power even though it was not a general power: "the equity of the creditors is as strong as if it were an unfettered general power which the testator could exercise without consent." The court did not clearly distinguish the two possible analyses, but the consent power was not held, or at least not clearly held, to be a general power.

Churlston was approved in *Re Triffitt's Settlement*, which again concerned a consent power:

> for the purposes of the rule against perpetuities, a power such as I have read must be treated as a special or limited power. That seems to be the effect of *In re Watts* and *In re Churston Settled Estates*.[151]

[151] [1958] Ch 852 at p.861. For completeness: the Judge continued: "... On the other hand, under the now obsolete Legacy Duty Act, 1796, it would seem that a power in these terms has the character of a general power: see *Platt v Routh* (1841) 3 Beav 257." But *Platt v Routh* did not concern a consent power, but a general testamentary power exercisable by will in favour of anyone in the world other than three named families; so this is not relevant here.
Re Churlston was also approved in *TMSF v Merrill Lynch Bank* [2011] UKPC 17.

CHAPTER EIGHTY EIGHT

ESTATES OF DECEASED PERSONS: CGT

88.1 Succession law background
88.1.1 Estate is not a trust
88.2 Period of administration
88.2.1 Executor's year
88.2.2 Importance of assent
88.3 PRs: Meaning for CGT/IT/CT
88.4 Residence of PRs for CGT
88.5 Acquisition by PRs
88.5.1 Rebasing on death
88.5.2 No disposal by deceased
88.5.3 Competent to dispose

Cross references

The following topics are considered elsewhere:
89.21 (Tax returns & registration)

88.1 Succession law background

On the death of a person domiciled in England (the "**deceased**"):

(1) Their property passes to their personal representatives ("**PRs**").[1] The

[1] Scots law is in this respect the same: *Cochrane's Executors v IRC* 49 TC 299. Further consideration is needed if a foreign law applies: see 88.14 (Succession under foreign law).

property is known as the "**deceased's estate**" or more formally, the estate of a deceased person in the course of administration. Where the context is clear this may be abbreviated to "**estate**".

(2) Provided that there are sufficient assets available, the PRs:
  (a) pay the deceased's debts, and taxes
  (b) pay pecuniary legacies
  (c) transfer property which the deceased has specifically gifted

(3) Finally, the PRs transfer the residue of the estate to the residuary legatees. Thus on completion of the administration, the residuary legatees become entitled to the assets of the estate, and any income which the PRs have not spent.

(4) It is possible for PRs to transfer specific assets to beneficiaries before completion of administration.[2]

When PRs transfer an asset to a beneficiary, the formal legal terminology is that they "assent to the vesting of the asset in the beneficiary",[3] which may be abbreviated to "**assent**". But outside formal legal contexts, I prefer the word "transfer". That seems clearer to readers unfamiliar with succession law terminology; there are differences between an assent and other types of transfer, but they are not relevant here.

88.1.1 *Estate is not a trust*

During the period of administration, the PRs alone are said to be entitled to the assets which are comprised in the estate. The beneficiaries of the estate have a chose in action, the right to compel due administration of the estate. But it is well settled that:

(1) Beneficiaries have no legal or equitable interest in the assets of the estate.[4]

(2) Property in the estate is not settled property, and an estate is not a trust or settlement, in the normal sense of those words or within the

[2] CG30920 raises the possibility that this is not the case in Scotland.

[3] See s.36 Administration of Estates Act 1925, set out at 89.5 (Income from specific legacy).

[4] *Sudeley v Attorney-General* [1897] AC 11; this principle was re-affirmed in *CSD v Livingston* [1965] AC 694. For a survey of the cases, see *Re Hemming* [2009] Ch 313. At first sight the principle seems rather odd, at least to an English lawyer; for an explanation and legal analysis of the nature of an estate, see Smith, "Scottish Trusts in the Common Law" (2013) 17(3) Edin LR 283 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 7 at p.133.

IT/CGT or IHT definitions.[5] This is so even if the will creates a trust.

Special tax rules apply during this period of administration. The rules produce some curious results where the deceased, or a beneficiary, is a remittance basis taxpayer or non-resident. There can sometimes be scope for tax planning.

This chapter considers CGT, and the following chapter income tax.

The starting point is that PRs are "persons" (though not "individuals") so they are in principle subject to IT and CGT. An estate, like a trust, is not itself a legal person.[6]

Similar issues arise where charities are beneficiaries of estates, as to which see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*.[7]

88.2 Period of administration

How long does the administration period last? This is a question of succession law, not tax law, but it often arises in tax contexts, including income tax, CGT, and IHT, and has given rise to a substantial case law.

In *Sudeley v Attorney-General*:[8]

> The thing that the legatee was entitled to was one-fourth share of a residuary estate, consisting, it may be, of many things; and I think it was fallacious on the part of [counsel] to say that the residue was very nearly ascertained, because the question is not only of amount – although I think that of itself would not be sufficient if it were only of amount – but it is a question of substance as well as a question of amount. It is uncertain until the residuary estate has been ascertained of what it will consist ...
>
> Until the thing has been ascertained, until the trust fund has been constituted, the thing of which the trustees are the trustees has not been ascertained. Whether you treat them, therefore, as trustees or executors, the same consideration arises. Now, if the only thing that the legatee is

[5] This rule is sometimes reversed by express statutory provisions.

[6] This is self-evident, but if authority is needed, see *Piggott v Aulton* [2003] EWCA 24. Although Arden LJ at [21] referred to an estate as "a person without legal personality" it would be more accurate to refer to it as an *entity* without legal personality.

[7] (14th ed., 2024-25), Ch's 33/34 (Estates of Deceased Persons: CGT/Income Tax) online version *https://www.taxationofcharities.co.uk*

[8] [1897] AC 11.

> entitled to is the fourth share of an ascertained residuary estate, I say that to my mind it is impossible to maintain that the character of any part of that estate can be ascertained so as to make it possess a specific locality until that has happened; it is a condition precedent to know what the residuary estate is, and until that has been ascertained you cannot tell of what it will "consist."

In *IRC v Aubrey Smith* the CoA cited this and said:

> .... until the fact is ascertained, or can or ought to be inferred, that the residue has become defined so that the aliquot portion passing to the beneficiary can also be defined, the beneficiary has not, until that time, a definite interest in the sum which will ultimately fall to him. ... it appears to me ... that it is largely a question of fact. ...
> What has to be determined here ... is: Is it clear that the portion of each of the sons is ascertained, or has been ascertained, or is capable of ascertainment, and that ascertainment has been assented to by the executor-trustees?[9]

The important points which emerge from the case law are that PRs continue to hold an asset as PRs until:

(1) they transfer an asset to a beneficiary; or
(2) the administration of the estate is complete (at which point there is an implied assent). For this purpose:
    (a) The estate must be completely ascertained. It remains in the course of administration even though this work is nearly done.
    (b) The fact that debts of the deceased remain unascertained or unpaid is a relevant factor but not decisive.
    (c) The fact that the PRs regard themselves as administering the estate (producing "estate accounts" and not trust accounts) is a relevant factor but not decisive.
    (d) In a marginal case the issue is classified as one of fact and there is a broad "grey area" in which the courts will not interfere with a decision of the first-tier tribunal.

The TSE Manual provides:

> **TSEM7360 Definition Of Period Of Administration** [Oct 2019]
> The period during which the personal representatives are settling the estate is called the period of administration. It starts on the day

[9] 15 TC 661 at p.672.

> following[10] the date of death of the deceased person and ends when the personal representatives have taken all the steps necessary to complete the administration of the estate.
>
> The question of when an administration period ends is essentially one of fact and will depend on individual circumstances. It may in some cases coincide with the date when the residue of the estate can be identified. Sometimes the date of issue of the Inheritance Tax clearance certificate is taken as the date the administration was completed.
>
> You should normally accept that the administration ended on the date the personal representatives tell you it did. ...

The CG Manual provides:

> **CG30700 Period of administration** [Jul 2019]
>
> The period during which the personal representatives are settling the estate is called a period of administration. The period starts with the death of the deceased person. The date on which it ends is a question of fact which is often difficult to resolve. During this period the liability for CGT on sales of assets from the estate falls on the personal representatives unless they have taken specific steps to vest the ownership of the assets involved in legatees in advance of the sale, see CG30900.
>
> When considering when administration is complete the Courts look for a construction of the law that leads to an early conclusion of administration. The leading case in this respect is *IRC v Aubrey Smith* 15 TC 661.
>
> In his judgement Lord Hanworth MR set out a principle of general application when he said, at the bottom of page 675, top of page 676
>
> > "The question is, in all cases: has the administration of the Estate reached a point of ripeness at which you can infer an assent, at which you can infer that the residuary estate has been ascertained and that it is outstanding and not handed over merely for some other reason."
>
> On this basis we would normally argue that the period of administration ends when residue has been ascertained, see CG30780+.
>
> **CG30710 Extended period of administration** [Jul 2019]
>
> There are some exceptional cases where all the figures are apparently available to enable residue to be ascertained but it has to be accepted that the period of administration is continuing.
>
> One example is where distributing shares in accordance with legatees' fractional entitlements to residue would result in one legatee receiving a majority shareholding whilst the other legatees would only receive minority holdings. Because of the disparity in values between majority and minority holdings it may be necessary for the personal representatives to apply the rule from *Lloyd's*

[10] Author's footnote: Whether period starts on the death, or on the day following the death, depends on rules relating to whether the law takes regard of parts of a day; but the issue is not likely to arise in practice.

Bank v Duker and others [1987] 3 All ER Ch D 193. This would require them to sell these shares rather than distributing them in specie.

The period of administration would continue in such a case until the shares were sold and the CGT liability arising to the personal representatives was quantified.

The rule referred to above is of fairly limited application. The fact that a majority shareholding would be broken into minority holdings on distribution should not be accepted as preventing distribution of shares and thus the ending of the period of administration. Nor should minor valuation differences between minority shareholdings passing to the legatees be accepted as covered by the rule in the *Duker* case.

The period of administration may also be extended where the distribution of the estate is being challenged. The personal representatives may be unable to distribute the estate pending the outcome of litigation.

CG30720 Confusion over terminology [Jul 2019]

Even where ascertainment of residue marks the end of the administration period for CGT purposes, assets may remain in the hands of the personal representatives after that date. They may have to carry out administrative acts regarding transfer of assets to legatees. In some cases they may sell assets. If so they will be doing this as bare trustees for the legatees. Personal representatives and their agents sometimes regard these acts as forming part of the period of administration. This may lead to confusion when references are made to the period of administration.

Because of the possible confusion it is important to establish precisely what is meant when a reference is made to a period of administration. From HMRC's side we can try to avoid this confusion for the majority of cases by referring to events as falling before or after residue has been ascertained rather than simply referring to the period of administration.

CG30780 Necessary to establish if residue ascertained [Jul 2019]

There are a number of circumstances where it is important to establish whether residue has been ascertained, see CG30700, because it significantly affects the amount of CGT payable. Depending on the circumstances, the personal representatives and legatees may be arguing for residue having been ascertained at an early date or, less commonly, at a late date.

CG30781 Early date [Jul 2019]

If there is a will the personal representatives and legatees may claim that administration has ceased and residue has been ascertained at an early date if:

- the legatees would be liable at a lower rate of CGT than the personal representatives on the disposal of assets in the estate
- have any unused annual exemption that could be used to cover the gains
- the legatee is a charity and any gain on the disposal would be exempt.

You will only see claims under the first two bullet points in cases of intestacy as a charity will not qualify as a legatee under the rules of intestacy.

Applying the rule that assets remain vested in the personal representatives until residue has been ascertained unless specific steps have been taken to vest the assets in advance of ascertainment of residue usually defeats unwarranted claims in this area.

CG30790 Late date [Jul 2019]

There may be cases where it will be to the taxpayers' advantage to argue that there has been an extended period of administration. For example, there may be a small advantage if the personal representatives have any unused annual exempt amount and the legatee doesn't or the personal representatives may have unused losses that will be lost.

Unless it is an exceptional case where there are good reasons for accepting that the period of administration must be extended beyond the date residue is ascertained, see CG30710, you should seek the full facts to enable you to determine when residue became ascertainable. You should then argue that the beneficial ownership of the assets vested in the legatees at that date. As stated in CG30700 the attitude of the Courts is to look for an interpretation that allows administration to be completed at an early date.

Unquantified debts

One claim that is sometimes met is that there is an unquantified debt preventing residue being ascertained. This may not be sufficient to prevent the administration period being treated as at an end. Such a situation was considered in *IRC v Aubrey Smith* 15 TC 661. Lord Hanworth commented at page 674

> 'For my own part I think the question of a mortgage debt or any other debt must take its proper place in perspective. It may be in some cases that that is a factor from which a strong inference may be drawn. It may be on the other hand that the device of leaving a debt unpaid is resorted to in order to pretend that the residue of the estate has not been ascertained and is not ascertainable. If such a device were resorted to in any case it ought to be held ineffective'.

When a Solicitor or other professional person is employed by the personal representatives to deal with the administration of the estate, his or her fees will be one of the estate's debts. Sometimes when personal representatives wish to extend the period of administration they arrange that the Solicitor, etc, does not submit a bill in respect of at least some part of his or her fees. They then argue that this has prevented ascertainment of residue and has caused the period of administration to be extended. Any such claim should be resisted on the basis of the above quotation. It should be contended that the information to quantify the bill must be in the Solicitor's records and that administration should therefore be considered to have ended.

CG30800 How residue is ascertained [Jul 2019]

In order to ascertain residue the personal representatives must identify all the assets and liabilities of the estate. They then need to quantify these.

In the case of taxation liabilities this process will start with settling any Income Tax and CGT liabilities to the date of death. If any income arises to the personal representatives or if they realise any chargeable gains during the period of administration they will also need to agree their own liabilities for this period.

As far as Inheritance Tax is concerned the personal representatives will need to inform HMRC - Trusts and Estates IHT whether any liability arises and if so in what amount. As part of the process of seeking a grant of probate or letters of administration (or, in Scotland, a confirmation) the personal representatives have to supply HMRC - Trusts and Estates IHT with a provisional computation of the Inheritance Tax due. HMRC - Trusts and Estates IHT will review this

> and, where necessary, check valuations. When the amount, if any, of Inheritance Tax payable has been quantified HMRC - Trusts and Estates IHT will issue clearance. We would not normally accept that residue had been ascertained at a date before the date of issue of a clearance. See IHTM05001+ for detailed guidance on the Inheritance Tax procedures.
>
> **CG30810 Providing funds** [Jul 2019]
>
> When the assets and liabilities have been quantified the personal representatives have to consider how they can pay
>
> - the estate's liabilities and
> - any pecuniary legacies provided for in the will.
>
> If they do not have sufficient liquid funds they will have to sell assets in order to raise funds. Occasionally they may agree with legatees entitled to pecuniary legacies that the legatee should accept an asset in satisfaction or part satisfaction of the pecuniary legacy.
>
> Disposing of assets may give rise to further CGT liabilities which have to be agreed before residue can be ascertained.
>
> Residue is only ascertained when the personal representatives have both established the net worth of the estate and provided the liquid funds to pay liabilities and pecuniary legacies. Once that point is reached residue is ascertained and it is irrelevant that the assets have not been distributed.

Administration is normally completed on approval of final estate accounts, unless the executors postpone making final accounts for some non-estate reason (eg to obtain a tax advantage); or if they decide not to produce final accounts (eg if they decide not to bother).

An application for an IHT certificate of discharge may have the effect of extending the administration period, which may be advantageous.[11]

88.2.1 *Executor's year*

Section 44 AEA 1925 provides:

> ...a personal representative is not bound to distribute the estate of the deceased before the expiration of one year from the death.

The CG Manual provides:

> **CG30820 Executor's year** [Jul 2019]
>
> [The Manual refers to s.44 AEA 1925 and continues:] This is commonly referred to as the executor's year.
>
> When dealing with a dispute about whether a disposal was by personal representatives in that capacity or in their capacity as bare trustees for legatees we would not normally contend that the disposal was on behalf of the legatees if it took place during the executor's year.

[11] See 125.17.9 (Informal IHT clearance).

> Although personal representatives cannot be compelled to distribute assets during the executor's year there is no bar to them doing so. In a simple estate they may have ascertained residue well before the year ends. If there is evidence that they have done and have then distributed assets to the legatees we can accept that the liability relating to disposals during that year but after the date assets were distributed does lie with legatees.
>
> *Scotland*
>
> In Scotland the rule is that the personal representatives are entitled to distribute the estate after six months from the deceased's death if they have provided funds for payment of all the estate debts and made reasonable enquiries for claims.

88.2.2 *Importance of assent*

PRs transfer assets to beneficiaries by means of an "assent". The assent is fundamental:

(1) A sale after an assent to a non-resident or a remittance basis taxpayer may in broad terms be free of CGT and a sale before assent may not.

(2) Conversely a sale by non-resident PRs or PRs with losses may be CGT free and a sale after an asset may be taxable.

An assent of land in England and Wales must be in writing. An assent of other property may be oral or implied by conduct. No formal written assent is required if (say) shares are simply transferred to the name of a beneficiary by stock transfer form. If shares are registered in the names of PRs (or their nominees), and the legatee wants them to be sold, it may be administratively convenient if an assent is made under which the PRs (or their nominees) become nominees for the legatee. Then the shares can be sold without CGT (assuming a non-resident legatee or if the remittance basis applies) without the formality of a transfer of legal title to the legatee.

88.3 PRs: Meaning for CGT/IT/CT

Section 1119 CTA 2010/s.989 ITA provide the same definition. For the purposes of the Corporation Tax/Income Tax Acts:

> "personal representatives", in relation to a person who has died, means—
>
> (a) in the UK, persons responsible for administering the estate of the deceased, and
>
> (b) in a territory outside the UK, those persons having functions

> under its law equivalent to those of administering the estate of the deceased.

Section 288 TCGA incorporates this definition for CGT:

> "personal representatives" has the same meaning as in the Corporation Tax Acts (see section 1119 of CTA 2010);

So the same definition applies for CGT/IT/CT.[12] This might be regarded as a commonsense definition.

88.4 Residence of PRs for CGT

PRs are a distinct taxable unit for CGT.[13]
Section 62(3) TCGA provides:

> In relation to property forming part of the estate of a deceased person
> [a] the PRs shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the PRs), and
> [b] that body shall be treated as having the deceased's residence and domicile at the date of death.

Section 62(3)[a] is similar to the distinct-person rule which applies to trustees.[14] The minor differences in wording[15] do not seem significant.

The definition of PRs' residence for CGT is different from the definition for IT.[16]

The residence and domicile of the PRs in their private capacity is irrelevant.

The reference to domicile is otiose, as there are no provisions where the domicile of PRs matters for CGT purposes; though there have been such provisions in the past.

88.5 Acquisition by PRs

88.5.1 *Rebasing on death*

Section 62(1) TCGA provides:

[12] But there is a different definition for IHT: see 125.2 (Meaning of "PRs" for IHT).

[13] See 7.3 (Trustees a distinct person).

[14] See 7.3 (Trustees a distinct person).

[15] Trustees are treated as a single person; PRs are treated as a single and continuing body of persons.

[16] See 89.3 (Residence of PRs for IT).

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
>
> (a) shall be deemed to be acquired on his death by
>
> [i] the personal representatives or
>
> [ii] other person on whom they devolve[17]
>
> for a consideration equal to their market value at the date of the death...

I refer to this as **"CGT rebasing on death"**; the terms "uplift/forgiveness on death" are also used.

Rebasing will also nullify a capital loss, although losses are less common, given that gains/losses are calculated without regard to inflation; and there may be scope for tax planning to avoid this.[18]

88.5.2 *No disposal by deceased*

Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose ...
>
> (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

88.5.3 *Competent to dispose*

Section .62(10) TCGA defines the expression "assets of which a deceased person was competent to dispose":

> In this section references to assets of which a deceased person was competent to dispose
>
> [a] are references to assets of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will, assuming that
>
> [i] all the assets were situated in England and,
>
> [ii] if he was not domiciled in the UK, that he was domiciled in England,
>
> [b] and include references to his severable share in any assets to which, immediately before his death, he was beneficially entitled as a joint tenant.

[17] See 88.14 (Succession under foreign law).

[18] See 65.12.2 (Unrealised loss at death).

88.5.4 *Legatee given share of assets*

The CG manual provides:

> **CG31140: acquisitions by legatees** [Jul 2019]
> ... Where a single asset passes to a legatee this is straightforward. Where divisible assets such as a holding of shares have to be shared out amongst legatees or where legatees become joint owners of an indivisible asset such as land, the acquisition cost of each legatee's share is an appropriate fraction of the market value of the holding or asset acquired by the personal representatives, see CG74244.
> **Example**
> On 31 December 2013 personal representatives acquire the deceased's shareholding of 600 shares in a company. This represents a 60% holding in that company and is valued at £60,000 or £100 per share. On the date of death a holding of 200 shares or 20% of the company would have been valued at £2,000 or £10 per share.
> When residue is ascertained each of the three legatees receives 200 shares from the personal representatives. They are each treated as having an acquisition cost of one-third of £60,000 (the personal representatives acquisition value). Their acquisition cost is thus £20,000 not the value of £2,000 that would have been placed on a 20% shareholding.
> In addition the personal representatives acquire the sole ownership of a parcel of land. This is valued at £100,000 at the date of death. On this date a 50% interest in the land would have been valued at £45,000.
> When residue is ascertained two legatees become equal joint owners of the land. They are each treated as having an acquisition cost of one-half × £100,000 (the personal representatives acquisition cost). Their acquisition cost is thus £50,000 for their 50% interest not the value of £45,000 that would otherwise have been placed on such a holding at the date of death.

88.5.5 *Rebasing on death: Planning*

CGT rebasing on death allows CGT avoidance which HMRC regard as acceptable, or at least, effective. The GAAR guidance provides two examples. This does not directly concern the themes of this book, but I discuss it as it sheds light on tax planning involving inter-spouse transfers, discussed elsewhere.

The first example concerns an inter-spouse gift made four months before death:

D19 Gifts between spouses: Mr and Mrs Jones

This example is intended to illustrate standard tax planning on gifts between spouses.

D19.1 ***Background***

D19.1.1 This example considers the CGT position on an arrangement involving a gift of shares between spouses, followed by death of the transferee.

D19.2 ***The facts***

D19.2.1 In January 2012 Mr and Mrs J are told that Mrs J is terminally ill.

In February Mr J gives his shares in an investment company,[19] which are standing at a significant gain, to his wife.

Under the terms of her Will as drafted at the date of the gift he will inherit those shares when she dies. Mrs J has full capacity at the time of the gift.

D19.2.2 Mrs J dies in June and the shares pass to Mr J under the terms of her Will.

Mrs J has not executed a new Will since the gift.[20] ...

D19.4 ***The taxpayer's tax analysis***

D19.4.1 The gift of the shares is a transfer between a husband and wife who are living together. This transaction is treated by s58 TCGA 1992 as taking place for such consideration as will give rise to neither a gain nor a loss.

D19.5 All the assets of the deceased which pass to his or her personal representatives are deemed to have been acquired by them at market value at the date of death under s62(1)(b) TCGA 1992. When beneficial ownership of any asset of the estate passes from the personal representatives to a legatee, S62(4)(a) TCGA 1992 provides that no chargeable gain shall accrue to the personal representatives.

D19.5.1 In summary, there is no chargeable gain on the gift of shares by Mr J to Mrs J and Mr J re-acquires the shares at market value at the date of his wife's death. In effect, the gain that has accrued during the earlier ownership of shares by Mr J has disappeared.

D19.6 ***What is the GAAR analysis under s.207(2) FA 2013?***

D19.6.1 The main purpose of the arrangement is to obtain a tax advantage. The gift of shares was made by Mr J in the hope of washing[21] out the gains on the understanding that his wife would leave them back to him.

D19.6.2 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?*

Yes. The principle of s58 TCGA 1992 is to allow assets to be transferred between spouses and between civil partners on the basis of no gain/no loss.

Assets passing on death to personal representatives are treated as taking place

[19] The nature of the company is not significant. Perhaps the point is that the company does not qualify for BPR, but nothing much follows from that.

[20] It can hardly make a difference if Mrs J changes her existing will (under which, we are told, the shares return to Mr J).

[21] I would hesitate to use the term "wash", but the GAAR guidance uses it in an apparently neutral non-pejorative sense.

> at market value and no gain is charged when the assets are passed to the legatees.
> D19.6.3 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*
> The means of achieving the tax results depend upon the gift, the death of Mrs J and her choosing to leave the shares to Mr J in her Will. There are no abnormal or contrived steps here; the transactions are normal arrangements between spouses or civil partners.
> D19.6.4 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*
> No.
> D19.6.5 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*
> Yes. HMRC sets out in its instruction manuals how these transactions are to be treated for CGT purposes.[22]
> D19.7 ***Conclusion***
> D19.7.1 These arrangements can reasonably be regarded as a reasonable course of action in relation to the tax provisions having regard to all the circumstances. The GAAR would not apply.

In the second example the gift is made on the day of death:

> D19.8 ***An alternative arrangement - What if the facts were the same as those above but the gift of shares was made on the day of Mrs J's death?***
> D19.8.1 HMRC's view is that so long as Mrs J was in full capacity at the time of the gift the analysis would be the same and that the GAAR would not apply. This assumes of course that the gift was validly completed prior to death.

The GAAR analysis is shallow. Guidance to the opposite effect in example 1 would read no less convincingly, and the acceptance of the scheme in the second example is surprising, at least at first glance. But if the first example is right, and the second is GAARable, it would be impossible to see where to draw the line between them. An advantage of the GAAR guidance view is that there is no need to draw that line.

Border demarcation issues still arise. For instance:

(1) If one accepts that the GAAR does applies in the case a gift to a spouse with no legal capacity made the day before the death, what about a gift made (say) four months before the death? Or 12 months? Or if the will made provision to a child, but either the property qualified for BPR or else there was an IoV back to Mr J?

[22] Is this correct? The guidance does not give a Manual reference. As far as I am aware, the avoidance scheme is not considered anywhere in the CG Manual.

(2) The example assumes that Mrs J has an extant will in favour of Mr J. What if she did not, but made a new Will?

(3) What if there was a sale to Mrs J with the purchase price left outstanding (in which case the terms of the will would not matter much)?

Some commentators say that experienced advisers approaching the question ‘Is this arrangement abusive?’ with an open mind “are likely to be able to reach a reasonably accurate assessment of the answer”.[23] Readers who grapple with these issues may find it hard to agree. But perhaps it depends on the nuance one gives to the word “likely”.

In practice perhaps this planning does not happen much, but I wonder about that. Some empirical research would be needed to find the answer.

88.5.6 *Rebasing on death: Critique*

Some commentators call for the abolition of CGT rebasing on death. Thus the IFS:

> This is highly distortionary: it encourages people to hold on to assets that have risen in value, even if in the absence of tax considerations they would prefer to sell them and use the proceeds in some other way. It also encourages people to buy assets that yield returns in the form of capital gains rather than income and to convert income into capital gains where possible, in order to escape income tax. There is a strong case for getting rid of this relief.[24]

The usual answer to the abolitionists is that this would give rise to double taxation: CGT and IHT on death.[25] That response is emotively and politically effective; though it is not true economic double taxation.

[23] For instance, Jolyon Maugham KC in his blog: *http://waitingfortax.com/2014/11/14/a-gaar-specific-penalties-regime-some-policy-choices-taxnerdery/* (2014).

[24] IFS Green Budget: October 2018 *https://www.ifs.org.uk/publications/13508*

[25] More radically, abolition of IHT and imposition of CGT on death would be a simplification. See Kessler, “The Quest for Fair Inheritance Taxation of Trusts” (2015)
https://www.kessler.co.uk/wp-content/uploads/2014/08/Kessler-The-Quest-for-Fair-Inheritance-Taxation-of-Trusts.pdf
OTS briefly float the idea, without conclusions: OTS, “Inheritance Tax Review – second report: Simplifying the design of Inheritance Tax” (July 2019) para 4.5ff. estimating a £1.6 billion loss to HMRC. It is a pity that the opportunity was lost to consider the point in depth.

OTS suggest replacing rebasing on death with a no gain/no loss transfer in situations where an IHT exemption applies. There is logic in that; though the proposal is the opposite of simplification.[26]

The law which allows the planning discussed above is hardly satisfactory. Assuming CGT rebasing on death remains, the solution, it seems to me, is to abolish the CGT spouse exemption. It might usefully be replaced by hold-over relief on divorce, where CGT hold-over relief *is* needed.[27]

88.6 Rebasing on death of life tenant

Although not strictly relating to the *estate* of a deceased person, this is a convenient place to consider the similar rebasing which applies on the death of a life tenant with an estate IIP. The drafting is clumsy, no doubt in part for historical reasons. The rules are set out in s.72/73 depending on whether the trust terminates/continues. It is convenient to consider these side by side:

s.72(1) TCGA (trust terminates)	**s.73(1) TCGA (trust continues)**
On the termination, on the death of the person entitled to it, of an interest in possession in all or any part of settled property	[i] Where, by virtue of section 71(1), the assets forming part of any settled property are deemed to be disposed of and reacquired by the trustee on the occasion when a person becomes (or would but for a disability become) absolutely entitled thereto as against the trustee,[28] [ii] then, if that occasion is the death of a person entitled to an interest in possession in the settled property

[26] OTS, "Inheritance Tax Review – second report: Simplifying the design of Inheritance Tax" (July 2019) para 4.27 ff. OTS ducks the technical challenges ("The government would need to consider how this could be done in a way which minimised valuation complexities where assets are only partially exempt from Inheritance Tax.") *https://www.gov.uk/government/publications/ots-inheritance-tax-review-simplifying-the-design-of-the-tax*

[27] The professional bodies have lobbied unsuccessfully for this over the decades. The CGT spouse exemption is not usually applicable on a divorce (because that exemption applies only in a year where spouses are living together; and by the time of the transfer, cohabitation is likely to have ceased).

[28] See 56.21.5 (Disposal on trust termination).

(a) the whole or a corresponding part of each of the assets forming part of the settled property and not ceasing at that time to be settled property shall be deemed for the purposes of this Act at that time to be disposed of and immediately reacquired by the trustee for a consideration equal to the whole or a corresponding part of the market value of the asset; but	
(b) no chargeable gain shall accrue on that disposal...	(a) no chargeable gain shall accrue on the disposal ...

Section 72(1A)/73(2A) restrict rebasing to estate interests in possession:

(1A) Where the interest in possession mentioned in subsection (1) above is one to which the person becomes entitled on or after 22nd March 2006, the first sentence of that subsection applies in relation to that interest only if (a) immediately before the person's death, the interest falls within subsection (1B) below, or (b) the person dies under the age of 18 years and, immediately before the person's death, section 71D of the Inheritance Tax Act 1984 (age 18-to-25 trusts) applies to the property in which the interest subsists.	(2A) Where the interest in possession referred to in subsection (1) above is one to which the person becomes entitled on or after 22nd March 2006, subsections (1) and (2) above apply in relation to that interest only if (a) immediately before the person's death, the interest falls within section 72(1B), or (b) [identical]

Section 72(1B) TCGA (which applies for both s.72/73) provides the standard concept of (what I call) an estate IIP:

> (1B) An interest falls within this subsection if
>
> (a) the interest is
>
> (i) an immediate post-death interest, within the meaning given by section 49A of the Inheritance Tax Act 1984,
>
> (ii) a transitional serial interest, within the meaning given by section 49B of that Act, or
>
> (iii) a disabled person's interest, within the meaning given by section 89B of that Act, or
>
> (b) section 71A of that Act (trusts for bereaved minors) applies to the property in which the interest subsists.

88.6.1 *Rules applicable to s.72 & s.73*

Section 73(3) TCGA provides:

> The last sentence of subsection (1) of section 72 and subsections (3) to (6) of that section shall apply for the purposes of this section as they apply for the purposes of section 72(1).

These provisions of s.72 are therefore apply equally to s.72/73. Section 72 TCGA provides:

> (1) ... For the purposes of this subsection an interest which is a right to part of the income of settled property shall be treated as an interest in a corresponding part of the settled property.

Next a set of rules for annuities (now never seen in practice):

> (3) This section shall apply on the death of the person entitled to any annuity payable out of, or charged on, settled property or the income of settled property as it applies on the death of a person whose interest in possession in the whole or any part of settled property terminates on his death.
>
> (4) Where, in the case of any entitlement to an annuity created by a settlement some of the settled property is appropriated by the trustees as a fund out of which the annuity is payable, and there is no right of recourse to, or to the income of, settled property not so appropriated, then without prejudice to subsection (5) below, the settled property so appropriated shall, while the annuity is payable, and on the occasion of the death of the person entitled to the annuity, be treated for the purposes of this section as being settled property under a separate settlement.
>
> (5) If there is an interest in a part of the settled property and, where that is an interest in income, there is no right of recourse to, or to the income of, the remainder of the settled property, the part of the settled property in which the interest subsists shall while it subsists be treated for the purposes of this section as being settled property under a separate settlement.

Lastly the specialist topic of disabled person’s interests:

> (6) An interest which is a disabled person's interest by virtue of section 89B(1)(a) or (b) of the Inheritance Tax Act 1984 is to be treated as an interest in possession for the purposes of this section.

88.6.2 *Rules applicable to s.73 only*

Section 73(1)(b) TCGA disapplies rebasing where the trust property reverts to the settlor:

> if on the death the property reverts to the disponer,
> [i] the disposal and reacquisition under that subsection shall be deemed to be for such consideration as to secure that neither a gain nor a loss accrues to the trustee, and
> [ii] shall, if the trustee had first acquired the property at a date earlier than 31 March 1982, be deemed to be at that earlier date.

For completeness: s.73(1A) TCGA deals with sub-fund settlements.[29] But since the sub-fund regime is dead-letter law (hardly ever found in practice) the point does not matter.[30]

Section 73(2) TCGA deals with interests in possession in part:

> Where the interest referred to in subsection (1) above is an interest in part only of the settled property to which section 71 applies, subsection (1)(a) above shall not apply but any chargeable gain accruing on the disposal shall be reduced by a proportion corresponding to that represented by the part.

88.6.3 *Rule applicable to s.72 only*

For completeness: s.72 TCGA deals with the death of a life tenant where the interest continues, for instance, if A is given property for the lifetime of B (in practice this does not happen outside the textbooks):

> (1C) Subsection (1A) above does not have effect in relation to the operation of subsection (1) above as applied by subsection (2) below (but see subsection (2A) below).
> (2) Subsection (1) above shall apply where the person entitled to an interest in possession in all or any part of settled property dies (although the interest does not then terminate) as it applies on the termination of such an interest.

[29] "Subsection (1)(b) above shall be treated as having effect in relation to a sub-fund settlement if the property does not revert to the trustees of the principal settlement in relation to that sub-fund settlement by reason only that
(a) a sub-fund election is or has been made in respect of another sub-fund of the principal settlement, and
(b) the property becomes comprised in that other sub-fund settlement on the death of the person entitled to the interest in possession."

[30] See 63.2 (Sub-Fund regime).

> (2A) Where the interest in possession mentioned in subsection (2) above is one to which the person becomes entitled on or after 22nd March 2006
> (a) subsection (2) above, and
> (b) the first sentence of subsection (1) above as applied by subsection (2) above,
>
> apply in relation to that interest only if, immediately before the person's death, the interest falls within subsection (1B)(a) above.

88.7 Transfer from PRs to beneficiaries

88.7.1 *Transfer from PRs to legatee*

Section 62(4) TCGA provides:

> On a person acquiring any asset as legatee (as defined in section 64)—
> (a) no chargeable gain shall accrue to the personal representatives, and
> (b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.

88.7.2 *"Legatee"*

The question whether a person acquires as legatee matters for 3 CGT purposes. In the case of an acquisition as legatee:

Rule	**Asset**	**See**
There is no disposal by PRs	Any	88.7.1
PRs expenditure deductible from legatee's gain on future disposal	Any	[31]
The legatee qualifies for CGT debt exemption on future disposal	Debt	56.22.1

Section 64(2) TCGA provides:

> In this Act, unless the context otherwise requires, "legatee" includes
> [a] any person taking under a testamentary disposition or on an

[31] Section 64(1) TCGA provides:

"In the case of a gain accruing to a person on the disposal of, or of a right or interest in or over, an asset held by another person as trustee, or as a personal representative of a deceased person, to which he became absolutely entitled as legatee or as against the trustee—

(a) any expenditure within section 38(2) incurred by him in relation to the transfer of the asset to him by the personal representative or trustee, and

(b) any such expenditure incurred in relation to the transfer of the asset by the personal representative or trustee,

shall be allowable as a deduction in the computation of the gain accruing to that person on the disposal."

> intestacy or partial intestacy, whether he takes beneficially or as trustee ...

Note this is an inclusive definition.

The definition is for the purposes of the TCGA, but similar wording is used elsewhere.

88.7.3 *Gift in anticipation of death*

Section 64(2) TCGA provides:

> In this Act, unless the context otherwise requires, "legatee" includes ...
>
> [b] a person taking under a donatio mortis causa [gift in anticipation of death] shall be treated (except for the purposes of section 62) as a legatee and his acquisition as made at the time of the donor's death.

Gift in anticipation of death is a specialist topic, as the arcane Latin tag suggests, but it does arise from time to time and also has some role in tax planning.[32]

The CG Manual provides:

> **CG30400: Donatio Mortis Causa** [Jul 2019]
>
> **Definition**
>
> A donatio mortis causa is a gift made in contemplation of the death of the donor which is intended to take effect only if the donor dies. If the donor recovers from his or her illness, etc., or if the donee dies first, then the gift is to have no effect i.e. it is void. If the gift is made in contemplation of death, it is presumed to be a donatio mortis causa even if the donor does not say that the gift is intended to be conditional on death occurring.
>
> Since the individual has given away these assets before his or her death, he or she is not able to dispose of them by will. They are therefore not `assets of which the deceased was competent to dispose'.
>
> **No gain /loss**
>
> For Capital Gains Tax purposes the practical effects of a donatio mortis causa are very similar to those for assets transferred on death. However the legislation arrives at this result in a different way. Instead of deeming there to be no disposal of the asset by the deceased, the legislation in TCGA92/S62 (5) says that no chargeable gain accrues to the person making the disposal. As allowable losses are to be computed

[32] See 67.5 (OIG charge on death).

in exactly the same way as gains, TCGA92/S16 (1), it also follows that no loss is allowable in respect of such a gift.

Position of donee

As TCGA92/S62 (5) merely removes the charge on the donee this means that for all other purposes the transfer by donatio mortis causa, being a gift, takes place at market value, TCGA92/S17 (1). Accordingly the donee is deemed to have acquired the asset at market value.

Donee: spouses or civil partners

Where a gift is made from one spouse or from one civil partner to the other, normally TCGA92/S58 (1) would say that the disposal should occur at such a figure as to give rise to no gain/no loss and TCGA92/S17 (1) would not apply. However, in the case of a donatio mortis causa this rule is disapplied by TCGA92/S58 (2). Thus all gifts by way of donatio mortis causa are dealt with in the same way.

Acquisition date for donee

A person acquiring an asset under a donatio mortis causa is treated as acquiring the asset at the time of the donor's death, TCGA92/S64 (2). In view of this the market value at which the asset is acquired is the market value at the date of death

CG31130: recipient under Donatio Mortis Causa is legatee [Dec 2018]

A person who receives a gift by way of donatio mortis causa, see CG30500+, is to be treated as a legatee for some limited purposes (TCGA92/S64 (2)). The person is not to be treated as a legatee for any of the purposes of TCGA92/S62 but is to be so treated for all other purposes of the Capital Gains Tax Acts. In particular this means that the provisions in TCGA92/S64 (1) allowing a deduction to a legatee for the cost of transferring an asset to that legatee, see CG31190, are to apply to such a recipient.

88.7.4 *Appropriation to legatee*

Section 64(3) TCGA provides:

[a] For the purposes of the definition of "legatee" above, and of any reference in this Act to a person acquiring an asset "as legatee",

[b] property taken under a testamentary disposition or on an intestacy or partial intestacy includes

[c] any asset appropriated by the personal representatives in or towards satisfaction of

  [i] a pecuniary legacy or

  [ii] any other interest or share in the property devolving under the disposition or intestacy.

In particular, if PRs appropriate assets in satisfaction of a pecuniary legacy, the beneficiary acquires as legatee. This is so even if the appropriation needs the consent of the beneficiary.[33]

If the PRs had no power of appropriation, then an "appropriation" could be authorised only on the basis that it was in fact a sale of the asset to a beneficiary coupled with payment of the legacy by way of set-off. In that case, the beneficiary may acquire as purchaser and not as legatee. In practice, PRs do generally have a power of appropriation,[34] so the issue does not often arise.

Further consideration is needed for foreign jurisdictions, especially civil law jurisdictions, where there may be no PRs in the UK law sense.[35]

Suppose:

(1) Under a civil law jurisdiction property passes on death to A and B in equal shares. A and B take as legatees.

(2) A and B then enter into a succession or partition agreement under which A takes some property and B takes other property (of equal value).

That agreement does not constitute a disposal for CGT purposes. In *Warrington v Brown* a division of land between co-owners (a partition

[33] Although for stamp duty purposes the transfer of the asset to a legatee constitutes a conveyance on sale, if the consent of the legatee is required: *Jopling v IRC* [1940] 2 KB 282.

For completeness: CCAB Statement June 1967 provided:

> "The Revenue stated that in their view [TCGA s.62(4)] does not apply in all cases where assets are transferred to beneficiaries in specie. Where assets are appointed by personal representatives to satisfy a legacy in circumstances where such appropriation requires the legatee's consent, ie where the personal representatives do not have (whether by the terms of the will or under the Administration of Estates Act 1925 s.41) powers of appropriation without consent, the Revenue are advised that the acquisition of the asset has a contractual basis and is not strictly an acquisition qua legatee. In practice, however, the disposal of appropriated assets by the personal representatives to a legatee in these circumstances is not treated as an occasion of charge on the personal representatives provided that both they and the legatee agree that the legatee should be treated as acquiring the assets concerned as legatee for the purposes of [TCGA s.62(4)]."

This was written before the enactment of what is now s.64(3) TCGA in 1969. This brought the law into line with what was formerly HMRC practice. So the CCAB Statement is obsolete.

[34] Section 41 Administration of Estates Act 1925.

[35] See 88.14 (Succession under foreign law).

agreement) was held not to constitute a disposal for CGT purposes:[36]

> Their interests in the mass precisely reflect the individual interests which they had before the deed was entered into. … one looks at the mass and not at the individual case in transactions such as the present, where property was put into a pool, and where that result is reached (that the interests in the mass precisely reflect the individual interests before the [division] deed was entered into) there is for capital gains tax purposes no disposal.

The reader may regard this as a surprising decision, but it is long established, not judicially doubted, and should be followed at least up to the level of the CoA. It should follow that A and B acquire their separate assets as legatees.

88.7.5 *Trustee as legatee*

CG Manual provides:

> **CG31110: who is a legatee: trustee as legatee** [Jul 2019]
> If a trust is created by the will or intestacy and does actually come into existence then the trustees of that trust are legatees in precisely the same way as, for example, an individual taking an absolute interest in an asset. This is confirmed by TCGA92/S64 (2). As a result the personal representatives are not liable to Capital Gains Tax for disposals after assets have vested in the trustees, see CG30760, and the trustees acquire the assets at market value, see CG31140.

88.7.6 *Trust ends during admin period*

CG Manual provides:

> **CG31110: who is a legatee: trustee as legatee** [Jul 2019]
> ...
> When assets pass to the remainderman of the will trust when it comes to an end, the remainderman does not receive the assets from the trust as legatee of the will but as a beneficiary of the trust. The transfer is therefore not exempted by reason of TCGA92/S62 (4), see CG31140. Unless any other exemption applies there will be a chargeable gain on the trustees at that time by reason of TCGA92/S71 (1), see CG37100+. This is in contrast to the position when a will or intestacy sets out to create a life interest trust but the life tenant dies during the period of

[36] Also called *Jenkins v Brown* 62 TC 226 at p.252.

> administration. In those circumstances no trust over specific assets ever comes into existence. The remainderman of the trust becomes the legatee under the will in place of the trustee. When the assets vest they vest directly in that remainderman. Accordingly the remainderman takes as legatee, there is no Capital Gains Tax charge at that time and the remainderman's acquisition cost is the market value at the date of death.

88.7.7 *Executors appoint to beneficiary*

Where executors exercise a power to appoint trust property to a beneficiary, that beneficiary takes under the appointment "as legatee". This follows from the trust law principle that, for the purposes of the rules relating to perpetuities, where trustees exercise a power of appointment, the deed of appointment is read back into the original trust instrument. It is treated as coming into operation at the date of the instrument that creates the power.[37]

Quite apart from that, the beneficiary would take as "legatee" in the general sense of the expression. The definition in s.64(2) is inclusive and not a comprehensive definition. The reason that the beneficiaries take as legatee is that they acquire under an assent. They acquire from the PRs acting in their capacity as PRs.

This conclusion is consistent with the general scheme of the TCGA. A person who acquires under an appropriation acquires "as legatee". It would be anomalous if a person who acquired under an appointment would not.[38]

HMRC agree. CG Manual provides:

> **CG31430 power to appoint** [Dec 2021]
> Where a deceased person's will directs that when assets of the estate vest they are to be held on trust, then the terms of that trust specified in the will may empower the trustees to appoint assets out of the trust to legatees. This is frequently because IHTA84/S144 (see IHTM35181) in specified cases treats the appointment, provided it is made within 2 years of death, for all IHT purposes as if it had been made in the will. There is no corresponding provision for CGT.
> The assets will normally vest in the trustees on the ascertainment of residue, see CG30940+. But, occasionally, specific steps may be taken

[37] See 87.5.7 (Trust appointment: Filling blanks).

[38] A power of appropriation is sometimes regarded as a dispositive power: *Re Freeston* [1978] Ch 741, though I would not regard that as essential to the argument.

> to vest assets in will trustees in advance of residue being ascertained see CG30900+. Where the trustees exercise their powers of appointment AFTER the assets have vested then the assets concerned will already have passed out of the estate and into the hands of the trustees. In these circumstances the exercise of the power of appointment so that a beneficiary becomes absolutely entitled amounts to a disposal for CGT purposes.
>
> Where the trustees exercise their powers of appointment before the assets have vested in them then the assets are still in the hands of the personal representatives at the time of the exercise. Even though these may be the same individuals as the trustees they are different bodies of persons for CGT purposes, see CG31110+. If, in these circumstances, the trustees make an appointment under the specific powers given to them in the will, then when the asset(s) vest they should be treated as passing direct to the appointee.
>
> The asset(s) appointed should be treated as never becoming subject to the trust. In effect, the appointment is read back into the will. It is treated as though the deceased had intended the assets concerned to pass directly to the legatee rather than into trust. The appointee then takes those asset(s) as legatee and therefore acquires the asset(s) at probate value by reason of TCGA92/S62 (4), see CG31140+. The time limits and procedures in TCGA92/S62(6) and (7) do not apply to this treatment.

88.7.8 *Beneficiary pays for asset*

The CG Manual provides:

> **CG31175: payments by legatees to PRs** [Jul 2019]
>
> If an estate has insufficient liquid assets to pay its liabilities and a legatee wishes to receive a particular asset rather than it being sold on the open market by the personal representatives the legatee may agree with the personal representatives that he will provide them with sufficient funds to settle the estate’s liabilities in return for them transferring the asset to him. Such an arrangement was considered in the case of *Passant v Jackson*, 59 TC 230. The Appeal Court held that the arrangement was a sale of the property. So in any case involving a similar arrangement it should not be accepted that there was merely a transfer of an asset to a legatee under cover of TCGA92/S64 (4).

88.7.9 *Transfer to will trust*

If the will appoints non-resident trustees, the PRs may transfer the assets to the trustees without a CGT charge.

If the will appoints UK resident trustees, the PRs may transfer the assets to the trustees but the trust will be within the charge to CGT. If non-resident trustees are subsequently appointed, there will in principle be an exit charge.

It should normally be possible to arrange that:

(1) The PRs appoint that the assets are to be transferred to trustees of a new non-resident trust.
(2) The PRs then transfer the assets to the non-resident trustees.

As long as this is done during the administration of the estate, the assets may then become held in a non-resident trust without a charge to CGT.

88.8 Deceased not UK resident

If the deceased was not UK resident at the time of their death (regardless of domicile) the PRs are in general outside the scope of CGT.[39]

88.8.1 *Is estate a "settlement" for s.87*

Is a deceased's estate a "settlement" for the purposes of s.87? The question matters, because if an estate were a "settlement" then:

(1) Gains accruing to non-resident PRs would be s.1(3) amounts (trust gains) for the purposes of s.87 TCGA; so
(2) Capital payments from the PRs to UK resident beneficiaries would in principle be subject to tax under s.87; and
(3) If the will created a will trust, or made a gift to a lifetime trust, unmatched s.1(3) amounts of the PRs might be transferred to the trust on completion of the administration of the estate.[40]

The word "settlement" is used with different definitions; in the terminology of this book:

(1) The **"standard IT/CGT definition"** (a classic settlement)
(2) The "**settlement-arrangement**" definition[41]

An estate is not a settlement in the standard IT/CGT sense. If the will creates a will trust, a settlement in the standard IT/CGT sense comes into existence when the administration is complete (or if property is transferred

[39] See 56.6.3 (Territorial scope: Summary).

[40] See 61.39 (Transfer between trusts). It might be said that s.90 TCGA does not apply because PRs do not "transfer" assets to beneficiaries. But if it is right that an estate is not a "settlement" for s.87, this issue does not arise.

[41] See 87.4 (Settlement-arrangement definition).

to the trustees sooner).[42] However, for the purposes of the s.87 charge, the settlement-arrangement definition applies,[43] so the question is whether an estate may be a settlement-arrangement.

One might have thought that an estate is a "settlement-arrangement". There is an element of bounty in that the deceased decides who should benefit (or by not making a will, decides that the intestacy rules should apply). However in *IRC v Buchanan* 37 TC 366 at p.374, Lord Goddard said:

> I do not think for a minute that a will of a testator comes within section 20[44] at all; it is not a settlement to which the Act applies.

Lord Goddard did not actually say that a will is not a settlement-arrangement and if that is what he meant, the comment is surprising. However, Lord Goddard's comment was loyally followed.[45] Accordingly CG Manual is right to provide:

> **CG14590 Connected persons: Trustees** [Jul 2019]
> ... a will trust cannot be a Settlement for these purposes [for the purposes of the settlement-arrangement definition].

For this reason an estate is not a "settlement" within s.87.

This is in fact the sensible result. The scheme of s.87 is designed with trusts in mind and would not work well if extended to estates:

(1) Suppose a will left legacies to (UK resident) legatees, and the residue on trust ("the will trust"). It would be odd if the legatees were subject to CGT under s.87 by reference to gains accruing to the estate, or, subsequently, to the will trust. But that would (almost[46]) necessarily follow, if the estate were a settlement-arrangement.

(2) Suppose a testator left their estate for such of their children as attain the age of 30, and one child reaches that age before death, or during the period of administration. The executors would transfer half of the estate to the older child and (on completion of administration) hold

[42] See 99.3 (Will trust or intestacy).

[43] This provides: "settlement" has the meaning given by s.620 of ITTOIA.

[44] Section 20 FA 1943, the predecessor of s.644 ITTOIA.

[45] *Willingale v Islington Green Investment* 48 TC 547 at p.556. (This point was not argued on appeal.)

[46] A possible way to avoid this unsatisfactory result might be to say that payment or assent of a legacy is not a "capital payment". But that is a stretch, given the definition that payment includes the transfer of an asset.

> the other half on trust for the younger child until it reached the vesting age. It would be odd if the older child were subject to CGT under s.87 by reference to gains accruing to estate, or to the younger child's will trust fund.

I have considered one possible argument to the contrary. Section 87(6) TCGA provides:

> For the purposes of this section a settlement arising under a will or intestacy shall be treated as made by the testator or intestate at the time of death.[47]

In order to understand this one needs to know the history. The s.87 code dates back to 1981. At that time, "settlement" was not expressly defined for the purposes of the s.87 code; so (what I call) the standard IT/CGT definition applied. (This was changed to the settlement-arrangement definition in 1984.[48]) So in 1981 it was clear that an estate was not a settlement, and that a will trust was a settlement. However there would be doubt as to whether the testator or intestate was the "settlor" of the will trust, and when that settlement was made. These matters are resolved by (what is now) s.87(6).[49] The provision is still needed: the identity of the settlor and domicile at the time of making the settlement are still relevant for s.87, though the relevance is now for transitional relief only.

The context shows that "settlement" in s.87(6) has the standard IT/CGT meaning. An effect of s.87(6) now is to make it clear that a will trust is a "settlement" for the purposes of s.87. But it does *not* deem an estate to be a settlement for s.87 purposes.

88.8.2 *Non-resident testator: Planning*

The estate of a non-resident testator is in principle a CGT free vehicle.

In principle, it would be desirable to arrange that gains accrue to PRs during the period of administration, and not to beneficiaries subsequently. If the PRs transfer assets to UK resident individuals who sell the assets, the gain on the sale is chargeable (in full or on the remittance basis). If the PRs transfer assets to non-resident trustees, who sell the assets, the gain

[47] The wording was previously in s.97(7) TCGA but moved in the 2006 reforms.

[48] Section 71 FA 1984.

[49] The same thinking is found in the drafting of Article 1 Trusts (Jersey) Law 1984: "'settlor' means a person who provides trust property or makes a testamentary disposition on trust or to a trust".

on the sale is a s.1(3) amount (trust gain). If the will creates a will trust, the trust comes into the scope of s.87 when administration of the estate is completed (or when property is transferred to the trust, if sooner).

By contrast, assets with losses should be transferred to beneficiaries of the estate *in specie*.

It may also be desirable to extend the administration period as long as possible.

If a will creates a will trust, it may be desirable that capital payments are made by the PRs, during the period of administration, not by trustees subsequently. If the trust fund is entirely distributed, no settlement ever comes into existence and s.87 does not operate.

Suppose:

(1) A will creates a will trust.
(2) The PRs exercise their powers[50] to make a distribution to a beneficiary during the administration period.

There is (at the time) no settlement and no s.87 charge. After the completion of administration, the capital payment is not matched to future s.1(3) amounts (trust gains) of the trust. It is considered that s.87(6) TCGA does not retrospectively alter the position. That is not the purpose of the deeming provision.

The position is different if:

(1) A will makes a gift to a separate trust ("the lifetime trust").
(2) The trustees of the lifetime trust exercise their powers to direct the PRs to make a distribution to a beneficiary during the administration period.

That is a capital payment from the trustees of the lifetime trust, which can be matched to trust gains of the lifetime trust and so give rise to a s.87 charge on the beneficiary. An Instrument of Variation may be appropriate.

88.9 Non-resident co held by non-resident PRs

Suppose:

(1) PRs hold a non-resident company.
(2) The company disposes of an asset and realises a gain, which I call "the company gain".

[50] It is assumed that the PRs have power to do this.

88.9.1 *Position of company and PRs*

The company is in principle not subject to tax on the company gain because it is not UK resident.

The PRs are participators. But if they are not UK resident, they are not treated as if the company gain had accrued to them. The condition in s.3(2) TCGA is not satisfied.

88.9.2 *Position of legatee*

Assume that under the terms of the will the shares pass to a legatee. Is it possible that the legatee should be treated as if the company gain accrued to the legatee, so that:

(1) a UK resident legatee would be subject to tax on the gain under s.3(2)(a) TCGA; or

(2) a non-resident trust legatee would be treated as receiving a s.1(3) amount (trust gain) under s.3(2)(b) TCGA?

88.9.3 *Legatee during administration*

The first question is whether, at the time the gain accrues to the company (while the estate is still in the course of administration) the legatee is a participator. Section 3B(1) TCGA provides:

> "Participator" has the meaning given by section 454 of CTA 2010."

A legatee is a participator under this definition.[51]

However s.3(3) TCGA (identifying the part of the chargeable gain which is deemed to accrue to the participator) provides:

> The proportion of the amount of the gain to be apportioned to each person corresponds to the extent of the person's *interest* in the company as a participator or indirect participator.

Residuary[52] beneficiaries of an estate have no legal or equitable interest in the assets of the estate.[53] They have the right to enforce its proper

[51] See 104.23.8 (PRs and beneficiaries of estates).

[52] There is however no difference between residuary beneficiaries and specific legatees. The origin of the principle that a residuary legatee has no "interest" in the estate is historical: until the mid 19th century, estates were administered in the ecclesiastical courts and not the Chancery courts. That reasoning would apply to a specific legatee as to a residuary legatee.

[53] See 88.1 (Succession law background).

administration but that right is not properly described as an “interest” in the assets. It is therefore considered that during the period of administration the legatee does not have an “interest” as a participator.[54] Thus it does not matter that they are participators because nothing can be attributed to them under s.3.

The context can show that the word “interest” is to be understood in a loose or non-technical sense, in which case it might include the rights of a beneficiary of an estate. But there is no reason here to say the word is used loosely or non-technically. My conclusion is supported by the fact that it is not clear what would be the “just and reasonable” apportionment of the gain as between UK resident PRs and legatees. Also if the will creates a will trust, the trust does not come into existence until completion of the administration of the estate.

88.9.4 *Legatee on transfer of shares*

That is not the end of the matter. Normally, on the completion of the administration of the estate the PRs will transfer the shares to the legatee. What is the position of the legatee then?

The legatee is treated as having acquired the shares on the death.[55] Does this deeming apply for the purposes of s.3 TCGA, so the legatee is retrospectively treated as if the company gain accrued to them?

I first consider the position of a residuary legatee, and consider a specific legatee separately below. For a residuary legatee, it is the old question of how far one carries the deeming.[56] In principle, one carries the deeming all the way and retrospectivity would then follow. However, several difficulties then arise:

(1) Suppose the PRs were UK resident. They would have been taxed in the first instance on the company gain under s.3 TCGA. There is nothing to give them relief on their subsequently transferring the shares to a legatee. (Section 62(4)(b) TCGA states that the *legatee* shall be treated as if the PRs acquisition had been theirs. It makes no

[54] See *Willingale v Islington Green Investment* 48 TC 547 at p.562D.
Section 3B(2) TCGA provides: “Any reference to a person's interest as a participator in a company is to the interest in it represented by all the factors by reference to which the person is a participator.” This does not turn a legatee’s right into an “interest” if it is not already an interest.

[55] See 88.7.1 (Transfer from PRs to legatee).

[56] See App 8.2 (Deeming provisions: Construction).

comment about the position of the PRs. Relief might perhaps be implied.)

(2) Another problem would arise if the PRs receive a dividend from the company, before distributing the shares to the legatee. The legatee would receive the shares but the company at that time may no longer hold funds representing the gain, so it would not be fair that the company gain should be treated as accruing to the legatee. Company distribution relief[57] would not work properly.

(3) There would be an anomalous distinction between:
   (a) an assent of the shares (s.3 applies to the legatee); and
   (b) sale (or liquidation) of the company and assent of the proceeds to the legatee (s.3 TCGA does not apply).

For these reasons it is suggested that the deeming of s.62(4)(b) TCGA does not extend to deem the legatee to receive the company gains under s.3. This construction is also consistent with the limited view of the deeming provision taken in *Marshall* v *Kerr* 67 TC 56.

The arguments are more finely balanced in the case of a specific legacy. In that case, the assent operates retrospectively, as a matter of general law, at least, unless the assent otherwise provides.[58] But it would be anomalous if there were a distinction between a specific legatee and a residuary legatee, and it is suggested that no distinction should be drawn between the two cases.

88.10 Capital payment from co in estate

Suppose:

(1) An estate holds shares in a non-resident company.[59]

(2) Under the will, the shares are pass to a non-resident trust ("the lifetime trust").

(3) The company makes a capital payment to a beneficiary. This may happen, for instance, if an interest free loan is left outstanding.

The capital payment may be provided directly or indirectly by the lifetime trust, in which case it is potentially subject to tax under s.87 like any other capital payment.

[57] See 64.20 (s.3 distribution relief).

[58] See 89.5 (Income from specific legacy).

[59] Similar issues could arise for a UK resident company, but in practice a payment from such a company is less likely to be a capital payment.

If that is not the case, the capital payment may be deemed to be provided by the lifetime trust, under s.96(1) TCGA.[60] That will be the case if the company is "controlled" by the trustees, in the defined sense.

88.11 Deceased UK resident

If the deceased was UK resident and domiciled, the PRs are UK resident and domiciled, and so subject to CGT on all chargeable gains (less losses).

88.11.1 *Deceased UK resident non-dom*

Suppose at the time of death the deceased was UK resident but foreign domiciled. The PRs are treated as UK resident but not UK domiciled. CG Manual provides:

> **CG30660 Remittance basis not in administration period** [Jul 2019]
> If the deceased was resident but not domiciled in the UK before his or her death, then on disposing of assets outside the UK he or she would have benefited from the application of the remittance basis in s.12 TCGA ... Although the PRs have the same residence and domicile status as the deceased had, if they realise chargeable gains from disposals of assets situated outside the UK but do not remit those gains to the UK immediately they cannot benefit from this treatment. This is because the remittance basis applies only to individuals but s.65(2) says that the body of PRs is not to be treated as an individual.

At first sight this seems surprising, but on reflection, it is not absurd to draw a distinction between:
(1) a UK resident foreign domiciled individual, taxed on the remittance basis, and
(2) the PRs of that individual, taxed on an arising basis.
A remittance basis makes less sense for PRs whose role is generally short term.[61]

Of course, if the PRs are actually outside the UK, especially if they are

[60] See 61.10 (Payment from close co: s.96(1)).

[61] It was formerly argued that the HMRC view is wrong. The argument was largely based on the supposed anomalous position of PRs. Following the 2008 reforms, the anomalies work the other way (for if the remittance basis applied, it would be anomalous that PRs did not pay the remittance basis claim charge). The argument would require the word "individual" in para 1 sch 1 TCGA to include PRs, which is contrary to general statutory usage. So I do not think the argument now merits serious attention (but readers can find further discussion in the 2008/09 edition of this work).

outside the EU, HMRC may not, in practice, be able to recover the tax.

DTR is in principle available to treaty non-resident PRs, which may solve this problem.

88.12 CGT planning for UK PRs

If PRs sell assets in the period of administration, then any gain will be subject to CGT, even though the net proceeds of sale will in due course pass to a remittance basis taxpayer. If, by contrast, PRs transfer an asset *in specie* to a legatee, then the PRs will not realise any chargeable gain but the base cost of the recipient beneficiary will be that of the PRs.[62] Where the legatee is a remittance basis taxpayer (or a non-UK resident, or a charity), they will often be able to dispose of the asset free of CGT.

It is thus a fundamental principle of CGT planning that PRs should generally avoid, wherever possible, making disposals of assets which pass under the will to remittance basis taxpayers, non-residents or charities, if a gain (less losses) arises on the disposal.

Suppose that a remittance basis taxpayer is entitled to a pecuniary legacy of £1m under a will. The estate holds a foreign situate asset which had a value of £600k at the date of the death of the deceased and which is now worth £1m. If the PRs sell the asset in order to pay the legacy, they will be liable to CGT. This liability can be avoided by the PRs agreeing to transfer the property to the legatee in satisfaction of their pecuniary legacy.

Suppose the PRs inherit an asset belonging to the deceased which is the subject matter of a specific gift in their will; that they then sell the asset, the sale giving rise to a charge to CGT, and that they subsequently transfer the whole or part of the proceeds of sale to the specific legatee.[63] So if there is such a sale, the PRs bear the CGT and transferring the proceeds of sale to the remittance basis taxpayer does not confer any exemption.

It may be necessary to sell some assets to pay liabilities of the PRs, and it may be that the assets available for sale will give rise to a chargeable gain.

[62] See 88.7 (Transfer from PRs to beneficiaries).

[63] Income tax sometimes applies the common law doctrine of relation back; see 89.5 (Income from specific legacy). But this does not apply here. This doctrine would operate only where an asset owned by the deceased is subsequently transferred to the legatee. In any case, the express provisions of the TCGA deal so comprehensively with the situation that any application of the doctrine of relation back to CGT is by necessary implication excluded.

One solution is as follows:

(1) The PRs transfer the asset to the beneficiary subject to a charge for their liabilities under s.36(10) Administration of Estates Act 1925.
(2) The beneficiary then sells the asset: any gain on the sale accrues to the beneficiary: s.26(2) TCGA.
(3) Under the charge the proceeds are used to pay the PRs' liability.

These principles are confirmed, if confirmation is needed, in *McLaughlin v HMRC*[64] where a marketed tax avoidance scheme involved bringing in a nondom beneficiary artificially. This survived a technical challenge; and (on its facts rather surprisingly) a *Ramsay*/realistic view challenge.

88.13 CGT planning by IoV

Where there is more than one residuary legatee and some are remittance basis taxpayers, non-residents or charities, it would often make sense for assets with inherent capital gains to be transferred to them rather than to UK resident and domiciled individuals. This can often be done by means of an appropriation under s.41 Administration of Estates Act 1925, but (depending on the terms of the will) an instrument of variation may be necessary. The variation must be made within two years of the death of the deceased.

In principle, the approach should be to redirect foreign assets of the estate with inherent capital gains to the remittance basis taxpayer. UK resident and domiciled beneficiaries would instead receive cash or assets without inherent gains. The remittance basis taxpayer might in due course realise the gains free of tax. There would be an overall tax saving, which could be shared between the remittance basis taxpayer and the other beneficiaries by negotiation, or which could be allowed to accrue entirely to the remittance basis taxpayer if the other beneficiaries were so minded.

88.14 Succession under foreign law

Further consideration is needed if the succession is governed by a foreign law. Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
>
> (a) shall be deemed to be acquired on his death by the personal

[64] [2012] UKFTT 174 (TC). The artificial planning in this case would now be caught by the GAAR.

> representatives *or other person on whom they devolve* for a consideration equal to their market value at the date of the death...[65]

In civil law jurisdictions, property devolves directly on the beneficiary without the intervention of PRs during an administration period. *Bentley v Pike* concerned the position under German law (the deceased died intestate owning a share of land in Germany). The evidence showed:

> ... the principle of *Universalsukzession* ... means that on the death of a person, his or her entire property passes immediately and automatically to his or her heirs. ... No distinction is made between movable and immovable property: on the death of the deceased person both types of property are automatically and without any interval in time or any further outward action of any kind vested in the heirs, whoever they may be, no matter whether they are known or whether it is necessary to take steps to ascertain their identity.[66]

In these circumstances, the ownership of the property passed to the beneficiary immediately on the death. The gain on the sale of the property after the death therefore accrued to the beneficiary, and not to the German (rough) equivalent of PRs.

However the position may be fact sensitive, and one should not assume that all civil law jurisdictions are the same. In Quebec, the executor's right of *saisine* [seizin, ie, possession] has priority over the legatee, and income and gains during the administration period accrue to the executor, not the legatee;[67] so it seems that for UK tax purposes, gains should be regarded as accruing to PRs and not the legatee.

[65] See 88.5 (Acquisition by PRs).

Cross references

The following topics are considered elsewhere:
  88.1 (Succession law background)

89.1 Income taxation of estates

This chapter considers the income taxation of personal representatives and beneficiaries of estates of deceased persons. A full discussion needs a book to itself. I try to focus on matters closest to the themes of this book, but that can only be done in the context of a more general discussion of the rules.

I do not consider the equivalent provisions applicable for corporation tax which would apply to corporate beneficiaries.

89.2 Meaning of "PRs" for IT

The same commonsense definition of PRs applies for IT/CGT/CT; it is discussed at 88.3 (PRs: meaning for CGT/IT/CT).

There is no rule for IT purposes that PRs are a single and continuing body distinct from the persons who are actually the PRs.[1] This is anomalous, for that rule applies to PRs for CGT[2] and a similar rule applies to trustees for both taxes. It is suggested that there should be a rule. However it may be implied[3] and it will not often matter.

89.3 Residence of PRs for IT

One must identify the PR's actual place of residence in their personal capacities, applying the statutory residence test to PRs who are individuals,[4] and the corporate residence test to corporate PRs.

PRs are UK resident for income tax if they are all UK resident in their personal capacity. They are non-resident if they are all non-resident in their personal capacity. HMRC agree. Form SA906 (Notes) 2023 (Notes on Trust and Estate Non-Residence 2022/23) provides:

> ***Deciding the personal representatives' residence status for Income Tax purposes***
> You can find out the personal representatives' residence status for Income Tax purposes by working through questions 4 to 6.
> 4. Were **all** the personal representatives resident in the UK for the year to 5 April 2023?
> If Yes, the personal representatives as a whole are resident in the UK

[1] For completeness: there is a rule for the purposes of the transactions in land code, see s.517P(4) ITA.

[2] See 88.4 (Residence of PRs for CGT).

[3] See 104.23.8 (PRs and beneficiaries of estate).

[4] See 6.3.1 (SRT: Application to trustees/PRs).

> for Income Tax purposes. Tick box 6.1 of the 'Trust and Estate Non-residence' pages [Resident in the UK for Income Tax purposes]. Go to question 7.
> If No, go to question 5.
> 5. Were **all** the personal representatives not resident in the UK for the year to 5 April 2023?
> If Yes, the personal representatives as a whole are not resident in the UK for Income Tax purposes. Tick box 6.2 of the 'Trust and Estate Non-residence' pages [Not resident in the UK for Income Tax purposes]. Please also complete boxes 6.7 to 6.12 as appropriate. Go to question 7.
> If No, go to question 6 [mixed resident PRs].[5]

The position where an estate has both resident and non-resident PRs is governed by s.834 ITA:

> (1) This section applies for income tax purposes if the personal representatives of a deceased person ("D") include one or more persons who are UK resident and one or more persons who are non-UK resident.
> (2) If the following condition is met, the person or persons who are non-UK resident are treated, in their capacity as personal representatives, as UK resident.
> (3) The condition is that when D died D was UK resident or domiciled[6] in the UK.
> (4) If that condition is not met, the person or persons who are UK resident are treated, in their capacity as personal representatives, as non-UK resident.

Thus it is possible to arrange that PRs are not UK resident for income tax purposes. All of the PRs must be non-resident in their private capacities, (except in the case of a non-resident non-domiciled testator where only one PR need be non-resident).

There are no statutory rules for domicile, but the domicile of PRs does not matter for IT purposes.

The definition of PRs' residence is different for CGT.[7]

[5] *https://www.gov.uk/government/publications/self-assessment-trust-and-estate-non-residence-sa906*

[6] Section 834(5) ITA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (3)." This is the standard wording to apply the deemed domicile rules.

[7] See 88.4 (Residence of PRs for CGT).

There is a transitional rule for death before 6 April 2013.[8]

89.4 Income taxation of PRs

PRs are "persons" and so pay income tax at the basic rate (or dividend ordinary rate) on the income of the estate if:
(1) the PRs are UK resident, or
(2) the income has a UK source.

Until 2016/17 that liability was usually be covered by deduction at source (or a tax credit), but that is no longer the case. PRs do not qualify for personal allowance or a dividend allowance or a savings rate band. HMRC provide a somewhat miserly exemption for interest up to £100 tax (equivalent to £500 interest).

> In 2016, HMRC introduced an interim arrangement so that trustees or personal representatives do not have to submit returns, or make payments under informal arrangements, where the only source of income is savings interest and the tax liability is below £100.The arrangement has been subsequently extended, see the Trust and Estate Newsletters April 2017 and August 2019. The arrangement has now been further extended to include the 2021 to 2022 and 2022 to 2023 tax years.HMRC will continue to review the situation longer term.[9]

89.4.1 *Foreign domiciled testator*

Form SA906 (Notes) 2023 (Notes on Trust and Estate Non-Residence 2022/23) provides under the heading "Personal representatives: application to Income Tax":

> [1] If the personal representatives are resident in the UK, their taxable income will depend on the domicile of the deceased, whose estate is being administered, at the date of death.
> [2] If the deceased was domiciled in the UK, then the personal representatives will be taxable in the normal way on both UK and overseas income.
> [3] If the deceased was domiciled outside the UK, they will be taxable only on UK income. In such circumstances, do not include overseas

[8] I discussed this in the 2021/22 edition of this work para 85.3.1 (Death before 2013) but omit the discussion now as the issue will not often arise.

[9] HMRC, Trusts and Estates Newsletter (May 2021) *https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters/hmrc-trusts-and-estates-newsletter-may-2021*

income. Please also tick box 6.6 of the 'Trust and Estate Non-residence' pages.[10]

Point [3] is not right as a matter of law. UK resident PRs are as a matter of law liable to income tax on foreign income regardless of the domicile of the deceased. (Domicile of the deceased is sometimes relevant to the separate question of whether PRs are UK resident, but it is possible for a foreign domiciled deceased to have UK resident PRs.)

One is nevertheless entitled (perhaps bound) to assume that HMRC mean what they say, in a document as formal as guidance notes to a tax return, unless it is clear that there has been a blunder, that is, if it is clear that they cannot mean what they say. HMRC clearly do mean what they say as they say it more than once and have said it for many years.[11]

There is therefore an informal concessionary practice. A concession is logical where the beneficiary of the estate is non-resident since income tax paid on foreign income would be reclaimed later when the income is paid to the beneficiary. The concession does raise a puzzle where the beneficiary is UK resident and the income is paid to the beneficiary: one might think that the foreign income should not be taken into account in computing the beneficiary's estate income, but that must be too good to be true. I think the effect of the concession should be to treat the PRs as non-resident for IT purposes and that should be followed through for payments made by the PRs (who therefore constitute a foreign estate). Thus a payment of the income to a UK resident beneficiary is taxable under the estate income regime, but a payment to a non-resident (or treaty non-resident) is not.

89.5 Income from specific legacy

This section considers the position where a testator by their Will gives specific assets to a beneficiary.

In the first instance, the PRs will acquire the assets and they will receive the income arising from them. If they do not need to use the assets or

[10] *https://www.gov.uk/government/publications/self-assessment-trust-and-estate-non-residence-sa906* The reference is to box 6.6 in form SA906 (Trust and Estate Non-Residence) which reads: "Tick box 6.6 if the deceased whose estate is being administered was domiciled outside the UK at the date of death".

[11] The point has been made in the equivalent notes going back at least to the 2005 notes. Similar wording is found in form SA904 (Notes) (Notes on Trust and Estate Foreign 2022/23) under the heading "Special circumstances – personal representatives."

income for the purpose of paying debts, taxes, etc., the PRs will in due course transfer the assets and income to the beneficiary (the formal legal terminology is that the PRs "assent to the vesting of the assets in the beneficiary").

In the first instance, the PRs usually pay tax at the basic rate (or dividend ordinary rate) on income arising from the assets. If the PRs asset and its income vesting in the beneficiary, something rather peculiar happens. The beneficiary is deemed to have been the owner of the asset since the death. The assent is said to "relate back" - that is, it operates retrospectively. For personal property this is a common law rule; for land, it is in s.36 Administration of Estates Act 1925 which provides:

> (1) A personal representative may assent to the vesting, in any person who (whether by devise, bequest, devolution, appropriation or otherwise) may be entitled thereto, either beneficially or as a trustee or personal representative, of any estate or interest in real estate to which the testator or intestate was entitled ....
> (2) The assent shall operate to vest in that person the estate or interest to which the assent relates, and, unless a contrary intention appears, the assent shall relate back to the death of the deceased.

This rule operates for income tax purposes: *IRC v Hawley* 13 TC 327. The beneficiary will, retrospectively, be treated as having received the income year by year as it arose and the PRs will be treated as if they had not received it. The PRs may have paid UK tax. This will retrospectively be treated as being paid by the PRs on behalf of the beneficiary. Thus a beneficiary who is a remittance basis taxpayer can reclaim tax paid by UK resident PRs on unremitted foreign income. A non-resident beneficiary can also reclaim tax (it is not necessary to rely on ESC A14).

TSE Manual provides:

> **TSEM7490 Beneficiaries of estates: legacies** [Aug 2019]
> **Tax rules for specific legacies.**
> A legacy may take the form of an asset that does not produce income – for example a picture or a piece of jewellery. The beneficiary does not receive income and has no tax liability in respect of the legacy.
> Other assets can produce income – for example a bank account, shareholding or land. The general rule is that the beneficiary is entitled to the income arising to that asset from the death of the deceased person. Sometimes however the personal representatives may by law be entitled to use the income for some other purpose.
> If the beneficiary gets the income it should be treated as his income for

the year in which it arises. The authority for this is *IRC v Hawley* 13 TC 327. The beneficiary cannot however be taxed on or given repayment on income that he did not receive.

89.6 Income from residuary estate

89.6.1 *Background law*

During the period of administration, the PRs alone are entitled to the assets in the residue of the estate and its income. On completion of the administration, the residuary legatee becomes entitled to the assets which at that time form part of the estate, and any income which the PRs have not expended in the course of administration. It is possible for PRs to transfer specific assets to a beneficiary before completion of administration.

89.6.2 *History*

In order to appreciate the income tax law it is helpful to understand its history. In *R v Special Commissioners, ex p. Dr Barnado's Homes* 7 TC 646, the residuary legatee was a charity. Income arose to the PRs during the period of administration on which the PRs paid income tax. The residuary legatee was not entitled to the income of the residuary estate as it arose during the period of administration, so it could not at that time reclaim income tax paid. Instead it sought to recover the tax when it actually received the income, on completion of administration. The House of Lords held that although the sum received by the charity represented (or was derived from) the PR's income, it was received by the charity as a capital receipt (like accumulated income of a trust). The payment on the completion of administration did not operate retrospectively, the PR's income could not be treated as arising to the residuary legatee. So income tax paid by the PRs could not be recovered by the charity. The rule that an assent of a specific legacy relates back to death was not extended to gifts of residue. The reader may think that the charity had the better argument.[12] But that is now of academic interest: the law is settled.

[12] See Nitikman, "The Forgotten Law of Assent" Trusts & Trustees, Vol. 18, No. 7, August 2012, p.672. Perhaps the House of Lords was motivated by the (unmentioned) policy argument that any other decision would be inconvenient to the point of unworkable in practice. If so they were right, as the tax rules which have replaced their decision do not work: see 89.22 (Income tax of estates: Critique).

That was a victory for the Revenue, who were no doubt unperturbed about the unfairness to the charity. But subsequently, predictably, individual residuary legatees successfully contended that they were not liable to super-tax (which became surtax in 1927 and is now higher rate tax) on the income of a residuary estate arising during the administration period.[13] The Revenue then realised they had made a rod for their own back. Legislation was therefore brought in which is now to be found in Chapter 6 Part 5 ITTOIA.

89.7 Types of interest in residue

The legislation distinguishes absolute/limited/discretionary interests in residue.

89.7.1 *Absolute interest in residue*

Section 650(1) ITTOIA provides a fairly commonsense definition:

> A person has an absolute interest in the whole or part of the residue of an estate for the purposes of this Chapter if—
> (a) the capital of the residue or that part is properly payable to the person, or
> (b) it would be so payable, if the residue had been ascertained.

89.7.2 *Limited interest in residue*

Section 650(2) ITTOIA provides a fairly commonsense definition:

> A person has a limited interest in the whole or part of the residue of an estate during any period for the purposes of this Chapter if—
> (a) the person does not have an absolute interest in it, and
> (b) the income from it would be properly payable to the person if the residue had been ascertained at the beginning of that period.

In practice the usual example of a limited interest is a life interest.

89.7.3 *Discretionary interest in residue*

Section 650(3) ITTOIA provides a fairly commonsense definition:

> A person has a discretionary interest in the whole or part of the residue of an estate for the purposes of this Chapter if—
> (a) a discretion may be exercised in the person's favour, and

[13] eg *Corbett v IRC* 21 TC 449. There are several income tax cases on the issue of whether administration was completed.

> (b) on its exercise in the person's favour any of the income of the residue during the whole or part of the administration period (see section 653) would be properly payable to the person if the residue had been ascertained at the beginning of that period.

Section 650(4), (6) ITTOIA defines "properly payable" and s.650(5) deals with the situation where PRs have an interest in another estate.

89.8 "UK estate" and "foreign estate"

The legislation distinguishes "UK estates" and "foreign estates". The distinction matters for two purposes:

(1) Computation of the basic amount.
(2) Source of income (relevant to remittance basis taxpayers and non-residents).

These terms are defined in s.651(1) ITTOIA:

> "UK estate", in relation to a tax year, means an estate[14] which meets conditions A and B, or condition C, for that year, and
> "foreign estate", in relation to a tax year, means an estate which is not a UK estate in relation to that year.

I refer below to "**estate conditions A to C**". Unfortunately these conditions are in a tangle.

An estate may be a UK estate in one year and a foreign estate in another year. The question must be addressed each year.

89.8.1 *Estate conditions A and B*

Section 651 ITTOIA provides:

> (2) Condition A is that all the income of the estate either—
> (a) has borne UK income tax by deduction, or
> (b) is income in respect of which the personal representatives are directly assessable to UK income tax for the tax year.
>
> (3) Condition B is that none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident.

[14] Section 649(2) ITTOIA provides a commonsense definition of "estate":
In this Chapter—
"estate" means the estate of a deceased person (whether a UK estate or a foreign estate).

89.8.2 *Disregarded income and estate condition C*

Section 651(4) ITTOIA provides:

> For the purposes of conditions A and B sums within section 680(3) or (4) (sums treated as bearing tax) are ignored.

The list of disregards in s.680 ITTOIA is as follows:

> (3) The following sums are treated as bearing income tax at the dividend ordinary rate—
> (a) a sum charged under Chapter 3 of Part 4 (dividends etc. from UK resident companies etc.), or
> (b) a sum that is part of the aggregate income of the estate because of falling within—
> (i) section 664(2)(c) (stock dividends), or
> (ii) section 664(2)(d) (release of loan to participator in close company where debt due from personal representatives).
> (4) A sum that is part of the aggregate income of the estate because of falling within section 664(2)(e) (gains from life insurance contracts etc) is treated as bearing income tax at the basic rate.

It is convenient to have a term to describe these categories of income, so I call it "**disregarded income**".

Why is this income disregarded? Prior to 1996, s.233(1) ICTA 1988 (repealed) provided:

> *Where in any year of assessment the income of any person, not being a company resident in the UK, includes a distribution in respect of which that person is not entitled to a tax credit*
> *(a) no assessment shall be made on that person in respect of income tax at the basic rate on the amount or value of the distribution*
> ...

Thus non-resident PRs who received dividend income would not be assessable and so would count as a foreign estate.

Section 651(5) ITTOIA provides:

> Condition C is that the aggregate income of the estate for the tax year consists only of sums within section 680(3) or (4).

89.8.3 *Examples*

If the PRs are UK resident:

(1) Estate condition A is satisfied (the PRs are directly assessable to IT).

(2) Estate condition B is satisfied[15]
so the estate is a UK estate.

If the PRs are UK resident but the testator was foreign domiciled, it appears that the estate is by concession treated as a foreign estate.[16]

If the PRs are non-resident, and have some foreign source income:
(1) Estate condition A is not satisfied (some of the PR's income is not taxable).
(2) It does not matter whether estate condition B is satisfied
(3) Estate condition C is not satisfied
so the estate is not a UK estate.

If the PRs are non-resident but have only UK source taxable income,
(1) estate condition A is satisfied (they are assessable)
(2) Estate condition B is satisfied (no foreign income) so the estate is a UK estate.

If the PRs are non resident and have some UK income which qualifies for exemption (eg gilts) the estate is a foreign estate.

It is easy to procure that an estate with non-resident PRs qualifies as a "foreign estate" by arranging that there is some foreign income or FOTRA securities.

89.9 Other definitions

89.9.1 *"Payment"*

The legislation uses the word "payment" but (like "capital payment" for s.87) this is widely defined. Section 681 ITTOIA provides:

> (1) For the purposes of this Chapter—

[15] It takes more than one reading to comprehend the triple negative in condition B (the source legislation was clearer before the ITTOIA rewrite). Suppose PRs are not UK resident and receive foreign source income. The position is that condition B is not satisfied because:
(1) The PRs are not liable to IT on that income
(2) The reason they are not liable is that they are not UK resident: had they been UK resident, they would have been liable.
(3) Thus it is not the case that "none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident".
The same applies if non resident PRs receive income from FOTRA securities.

[16] See 89.4.1 (Foreign domiciled testator).

> (a) a transfer of assets, or
> (b) the appropriation of assets by personal representatives to themselves,
>
> is treated as the payment of an amount equal to the assets' value at the date of transfer or appropriation.
>
> (2) The set off or release of a debt is treated for the purposes of this Chapter as the payment of an amount equal to it.
>
> (3) If at the end of the administration period—
> (a) there is an obligation to transfer assets to any person, or
> (b) personal representatives are entitled to appropriate assets to themselves,
>
> an amount equal to the assets' value at that time is treated as payable then for the purposes of this Chapter.
>
> (4) If at the end of the administration period—
> (a) there is an obligation to release or set off a debt owed by any person, or
> (b) personal representatives are entitled to release or set off a debt in their own favour,
>
> a sum equal to the debt is treated as payable then for the purposes of this Chapter.

89.9.2 *"Administration period"*

Section 653 ITTOIA provides:

> (1) In this Chapter "the administration period", in relation to the estate of a deceased person, means the period beginning with the deceased's death and ending with the completion of the administration of the estate.
>
> (2) In the application of subsection (1) to Scotland, the reference to the completion of the administration is to be taken as a reference to the date at which, after discharge of, or provision for, liabilities falling to be met out of the deceased's estate, the free balance held in trust for the residuary legatees or for the persons with the right to the intestate estate has been ascertained.

This is, I think, the ordinary meaning of the term; see 88.2 (Period of administration).

89.9.3 *"Final tax year"*

Section 653(3) ITTOIA provides:

> In this Chapter "the final tax year" means the tax year in which the administration period ends.

89.10 Charge to tax on estate income

Beneficiaries are subject to tax on estate income. There are essentially three parts to the legislation:

(1) The charge to tax on estate income.
(2) The definition of when estate income arises.
(3) The quantification of the amount of estate income.

Section 649(1) ITTOIA provides the charge to tax:

> Income tax is charged on estate income.

Section 659 ITTOIA identifies the person liable:

> (1) If the estate income is from a person's absolute interest or limited interest, that person is liable for any tax charged under section 649 unless subsection (3) or (4) provides that another person is liable.
> (2) If the estate income is from a discretionary interest, the person in whose favour the discretion is exercised in making the payment in question is liable for any tax charged under section 649.

Section 659(3)(4) (not set out here) deal with successive interests.

89.11 Estate income

Estate income is a label which brings in different sets of rules for the different types of interest in residue.

Section 649(2) ITTOIA provides:

> (2) In this Chapter—
> "estate income" means the income treated under this Chapter as arising from an absolute, limited or discretionary interest in the whole or part of the residue of an estate ...
> (3) Estate income is treated as income for income tax purposes.
> (4) If different parts of an estate are subject to different residuary dispositions, those parts are treated for the purposes of this Chapter as if they were separate estates.

The circumstances in which estate income is treated as arising depend on the type of interest in residue. These are set out in ss.652–655 ITTOIA. These provisions state *when* estate income is treated as arising. The question of the *amount* of estate income is addressed separately.

89.11.1 *When estate income arises: Absolute interest*

Section 652 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's absolute interest in the whole or part of the residue of an estate if—
>
> (a) the person has an assumed income entitlement for the tax year in respect of the interest (see sections 665 to 670), and
>
> (b) condition A or B is met.
>
> (2) Condition A is that a payment is made in respect of the interest in the tax year and before the end of the administration period (see section 653).
>
> (3) Condition B is that the tax year is the final tax year (see section 653).
>
> (4) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

The key term here is "assumed income entitlement;" see 89.14 (Assumed income entitlement).

89.11.2 *When estate income arises: Limited interest*

Section 654 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's limited interest in the whole or part of the residue of an estate in cases A, B and C.
>
> (2) Case A is where—
>
> (a) the interest has not ceased before the beginning of the tax year, and
>
> (b) a sum is paid in respect of the interest in that year and before the end of the administration period.
>
> (3) Case B is where—
>
> (a) the tax year is the final tax year,
>
> (b) the interest has not ceased before the beginning of that year, and
>
> (c) a sum remains payable in respect of the interest at the end of the administration period.
>
> (4) Case C is where—
>
> (a) the tax year is a year before the final tax year,
>
> (b) the interest ceases in the tax year, and
>
> (c) a sum is paid in respect of the interest in a later tax year but before the end of the administration period, or remains payable in respect of it at the end of that period. ...
>
> (6) Income treated as arising as a result of this section or section 674 is estate income for the purposes of this Chapter.

89.11.3 *When estate income arises: Discretionary interest*

Section 655 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's discretionary interest in the whole or part of the residue of an estate if a payment is made in the tax year in exercise of the discretion in that person's favour.
> (2) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

89.12 Amount of estate income

There are two aspects to the rules: quantifying the "basic amount", and grossing up.

89.12.1 *UK estate*

Section 656(1) ITTOIA provides:

> In the case of a UK estate, tax is charged under section 649 on the amount of estate income treated as arising in the tax year.

Section 656 defines the amount of estate income:

> (2) That amount is the basic amount of that income for the tax year (see subsection (4)) grossed up by reference to the applicable rate for that year (see section 663).
> (3) The gross amount is treated as having borne income tax at that rate.

The applicable rate is not discussed here. The key term is the "basic amount" of estate income.

89.12.2 *Foreign estate*

Section 657(1) ITTOIA provides:

> In the case of a foreign estate, tax is charged under section 649 on the full[17] amount of estate income treated as arising in the tax year.

The section goes on to specify the amount:

> (2) That amount depends on whether the estate income arising in the tax year is paid from sums within section 680(3) or (4) (sums treated as bearing income tax).
> (3) So far as the estate income is paid from such sums, that amount is the basic amount of that income for the tax year grossed up by reference to the applicable rate for that year (see section 663).

[17] Section 657 refers to the "full amount" and s.656 refers only to the "amount", but the word "full" is clearly otiose: there is no difference in meaning.

> (4) That gross amount is treated as having borne income tax at that rate.
> (5) So far as the estate income is not paid from sums within section 680(3) or (4), the amount of estate income treated as arising in the tax year is the basic amount of that income for that year.

The difference between UK and foreign estates is that in the latter case there is no grossing up.

We turn at last to the key concept "basic amount".

89.13 "Basic amount of estate income"

The quantum of the "basic amount of estate income" depends on the type of interest in residue, ie whether there is an absolute, limited or discretionary interest.

89.13.1 *Basic amount: Absolute interest*

Section 660 ITTOIA provides:

> (1) The basic amount of estate income relating to a person's absolute interest in the whole or part of the residue of an estate for a tax year before the final tax year is the lower of—
> (a) the total of all sums paid in the tax year in respect of that interest, and
> (b) the amount of the person's assumed income entitlement for the tax year in respect of it.
> (2) The basic amount for the final tax year is equal to the amount of the person's assumed income entitlement for that year in respect of that interest.

The next key term is "assumed income entitlement".

89.13.2 *Basic amount: Limited interest*

Section 661(1) ITTOIA provides:

> (1) The basic amount of estate income relating to a person's limited interest in the whole or part of the residue of an estate for a tax year is the total of the sums within section 654(2)(b), (3)(c) and (4)(c) for that year.

89.13.3 *Basic amount: Discretionary interest*

Section 662 ITTOIA provides:

> The basic amount of estate income relating to a person's discretionary interest in the whole or part of the residue of an estate for a tax year is

> the total of the payments made in the tax year in exercise of the discretion in favour of the person.

89.14 Assumed income entitlement

The key term "assumed income entitlement" is relevant to computation of the basic amount. For absolute interests, this is (in brief) calculated as follows.

89.14.1 *"Aggregate income of estate"*

First one calculates the "aggregate income of the estate". This has a broadly commonsense definition in s.664 ITTOIA:

> (1) For the purposes of this Chapter the aggregate income of the estate for a tax year is
> [a] the total of the income and amounts specified in subsection (2), but
> [b] excluding the income specified in subsection (5).
> (2) The income and amounts are—
> (a) the income of the deceased's personal representatives in that capacity which is charged to UK income tax for the tax year,
> (b) the income of the deceased's personal representatives in that capacity on which such tax would have been charged for the tax year if—
> (i) it was income of a UK resident, and
> (ii) it was income from a source in the UK,[18]

Paragraphs (c) to (e) deal with somewhat specialist topics:

> (c) any amount of income treated as arising to the personal representatives under section 410(4) (stock dividends) that would be charged to income tax under Chapter 5 of Part 4 if income arising to personal representatives were so charged (see section 411),
> (d) in a case where section 419(2) applies (release of loans to participator in close company: loans and advances to persons who die), the amount that would be charged to income tax under Chapter 6 of Part 4 apart from that section, and
> (e) any amount that would have been treated as income of the personal representatives in that capacity under section 466 if the condition in section 466(2) had been met (gains from contracts

[18] I cannot see the point in (ii). If it is income of a UK resident, why does the source matter?

for life insurance).

Section 664(3)(4) deal with deductions:

> (3) In calculating the amount of the income within subsection (2)(a), any allowable deductions are to be taken into account.
> (4) In calculating the amount of the income within subsection (2)(b), any deductions which would be allowable if the income had been charged to UK income tax are to be deducted from the full amount of the income actually arising in the tax year.

Section 664(5) identifies two categories of income not included in "estate income". The first is income from specific legacies:

> (5) The excluded income is—
> (a) income to which any person is or may become entitled under a specific disposition[19]

That is excluded from estate income as the income is deemed to accrue to the legatee.[20]

> (5) The excluded income is ...
> (b) income from property devolving on the personal representatives otherwise than as assets for payment of the deceased's debts.

That would include property which vests in the PRs under the obsolescent settled land act regime.

89.14.2 *"Residuary income of estate"*

Armed with the figure for "the aggregate income of the estate", one next computes "the residuary income of the estate". This brings in rules for "allowable estate deductions". Section 666(1) ITTOIA provides:

> For the purposes of this Chapter the residuary income of an estate for a tax year is

[19] Defined in subsection (6): "In subsection (5)(a) 'specific disposition' means a gift of specific property under a will, including—
(a) the disposition of personal chattels by section 46 of the Administration of Estates Act 1925 (succession on intestacy), and
(b) any disposition which under the law of another country has a similar effect to a gift of specific property by will under the law of England and Wales,
but excluding real property included in a residuary gift made by will by a specific or general description of it or, in Scotland, heritable estate included in such a gift."

[20] See 89.5 (Income from specific legacy).

> [1] the aggregate income of the estate for that year, less
> [2] the allowable estate deductions for that year.
>
> This is subject to section 669 (reduction in residuary income: inheritance tax on accrued income).[21]

There are four categories of deductions. Section 666(2) ITTOIA provides:

> The allowable estate deductions for a tax year are—
> (a) all interest paid in that year by the personal representatives in that capacity (but see section 233 of IHTA 1984: exclusion of interest on unpaid inheritance tax),
> (b) all annual payments for that year which are properly payable out of residue,[22]
> (c) all payments made in that year in respect of expenses incurred by the personal representatives in that capacity in the management of the assets of the estate,[23] and
> (d) any excess deductions from the previous tax year.[24]
>
> This is subject to subsections (3) to (5).

Subsections (3)(4) prevent double allowances:

> (3) No sum is to be treated as an allowable estate deduction if it is allowable in calculating the aggregate income of the estate.
> (4) No sum is to be counted twice as an allowable estate deduction.

89.14.3 *"Assumed income entitlement"*

Armed with the figure for the residuary income of the estate, we are at last in a position to compute the assumed income entitlement. Section 665 ITTOIA provides:

> (1) Whether a person has an assumed income entitlement for a tax year in respect of an absolute interest in the whole or part of the residue of an

[21] Section 669 ITTOIA is not considered here.

[22] Para (b) should be deleted, as Annual Payments are not now generally allowable; but it does no harm.

[23] Section 666(5) restricts this to income expenses: "Payments in respect of expenses are only allowable estate deductions if they are properly chargeable to income (ignoring any specific direction in a will)."

[24] This is defined in s.666(6):

> "In this section 'excess deductions from the previous tax year' means so much of the allowable deductions for the previous tax year as exceeded the aggregate income of the estate for that year."

This allows unused expenses to be carried forward.

> estate depends on the results of the following steps.
> *Step 1* Find the amount of the person's share of the residuary income of the estate that is attributable to that interest for that tax year and each previous tax year during which the person had that interest (see sections 666 to 669).
> *Step 2* If the estate is a UK estate in relation to any tax year for which an amount has been found under step 1, deduct from that amount income tax on that amount at the applicable rate for that year (see section 670).
> *Step 3* Add together the amounts found under step 1 after making any deductions necessary under step 2.
> *Step 4* Add together the basic amounts relating to the person's absolute interest in respect of which the person was liable for income tax for all previous tax years (or would have been so liable if the person had been a person liable for income tax for those years).
> (2) For the purposes of this Chapter the person has an assumed income entitlement for the tax year if the amount resulting from step 3 exceeds the amount resulting from step 4.
> (3) The assumed income entitlement is equal to the excess.
> (4) [This deals with successive interests].

89.15 Beneficiary a discretionary trust

Section 483 ITA provides:

> (1) This section applies if, during or at the end of the administration period for an estate—
> (a) the personal representatives pay the trustees of a settlement a sum representing[25] income of the personal representatives, and
> (b) if this Chapter had applied to personal representatives, income tax would have been charged on that income at the dividend trust rate or at the trust rate.
> (2) The sum is treated as—
> (a) being paid as income, and
> (b) having borne income tax at the applicable rate.

Lastly we have some definitions by reference (which would have been unnecessary had there been taxes-act-wide definitions):

> (3) In this section—
> "administration period" has the meaning given by section 653 of ITTOIA 2005, and
> "the applicable rate" means the rate referred to in section 663(1) of

[25] See App 2.9 ("Representing assets).

> ITTOIA 2005 (the applicable rate for grossing up basic amounts of estate income).

The drafter has failed to incorporate the extended definition of "payment" but perhaps that may be implied.

89.16 Estate income remittance basis

Section 658 ITTOIA brings in the remittance basis:

> (1) The charge to tax under section 649 on the amount of income arising in a tax year is subject to Part 8 (foreign income: special rules).
> (2) For the purposes of section 830(1) (meaning of "relevant foreign income") amounts charged to tax under section 649—
> (a) are treated as arising from a source outside the UK if the estate is a foreign estate, and
> (b) are treated as not arising from such a source if the estate is a UK estate.

The section uses the words "treated as" because the income (being fictional income) does not have a source.[26]

If a beneficiary is a remittance basis taxpayer, it is important to ensure that the estate is a "foreign estate" and not a "UK estate" because the remittance basis only applies to a foreign estate.

Since the estate income is deemed income, not real income, it cannot be remitted. There is no rule that the PRs income or the beneficiary's actual receipts are is deemed to be derived from the estate income.

89.17 Non-resident beneficiary of UK estate: DT relief

International Manual provides:

> **INTM367510 Claims by beneficiaries of a UK estate** [Sep 2021]
> A distribution made to a beneficiary of income received by a UK estate during its administration period is considered to be a source of income in its own right.[27]
> Where a beneficiary receives a distribution of income that has arisen during the administration of a UK estate, that beneficiary may be entitled to relief on the income under a Double Taxation treaty. Relief will be available in one of two ways:
> - Other Income article: where an other income article of a treaty does

[26] See 16.6 (No source/deemed source).

[27] Author's footnote: That is, the estate is not considered to be transparent.

> not exclude income paid out of a UK estate, that income is considered as other income. ...
>
> The beneficiary is entitled to full relief from the total tax deemed to have been paid on the income.
>
> - Extra Statutory Concession A14: where it is not possible to relieve the income under an other income article, Extra Statutory Concession A14 allows us to look through to the underlying sources of income received by an estate and allow relief as if the beneficiary owned the sources of income in their own right.[28] ...

International Manual para 367530 sets out a list of countries where relief is available under the Other Income article on distributions made by UK estates. For this list see 41.12.1 (Other Income article).

> **INTM367540 How to give relief by 'looking through'** [Sep 2021]
>
> A repayment claim will be supported by an R185 (Estate Income) (or an R185E) tax certificate prepared by the personal representative(s) showing the rate(s) at which the sources of income have been taxed.
>
> It should be possible to identify the sources of income from the R185 (Estate Income). If so, you should apply relief at the treaty rate for the type of income. It may not be possible to identify the sources of income on an R185E; if so you will need to find out what they are. Remember that you will have to open an SA enquiry to ask for the information you need. See INTM331200 for guidance on how to open an enquiry. You should ask the claimant or their representative for a breakdown of the underlying sources of income arising to the estate.
>
> (This content has been withheld because of exemptions in the Freedom of Information Act 2000)

89.18 Non-resident beneficiary of UK estate: Concessionary relief

ESC A14 provides:

> **Deceased person's estate: residuary income received during the administration period**
>
> A beneficiary who for a year of assessment is not resident or not ordinarily resident in the UK, and is deemed under ITTOIA ss.657, 658(2) and 830(1) to have received income from a UK estate in that year, may claim to have their tax liability on that income from the estate adjusted to what it would be if such income had arisen to them directly and as a result they—

[28] See 89.18 (Non-resident beneficiary of UK estate: concessionary relief).

> [1] could claim relief under TA 1988 s.278 (claim to personal reliefs by certain non residents); or
> [2] could claim entitlement to exemption in respect of FOTRA Securities issued in accordance with ITTOIA s.714; or
> [3] could claim relief under the terms of a double taxation agreement; or
> [4] would not have been chargeable to income tax.

The ESC goes on to specify the conditions for the relief.

> Relief or exemption, as appropriate, will be granted to the beneficiary only if the personal representatives of the estate—
> - have made estate returns for each and every year for which they are required, and
> - have paid all tax due and any interest, surcharges and penalties arising, and
> - keep available for inspection any relevant tax certificates, together with copies of the estate accounts for all years of the period of administration showing details of all sources of estate income and payments made to beneficiaries.
>
> Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary is deemed to have received the income.
>
> No tax will be repayable to the beneficiary in respect of income they are deemed to have received where the basic amount of estate income, if received by a UK resident beneficiary of an estate, is paid sums within ss.657(3), (4) and 680(3), (4) ITTOIA.

This is the equivalent of ESC B18 for trusts.[29]

89.19 Time limit for claim/assessment

Section 682 ITTOIA provides:

> (1) This subsection applies if after the administration period ends it is apparent that a person is liable for income tax on estate income for any tax year who previously appeared not to be so liable or to be liable for tax on a lesser amount.
> (2) If subsection (1) applies—
> (a) the person may be assessed and taxed for the tax year, and
> (b) any relief or additional relief to which the person may be entitled for the tax year is to be allowed if a claim is made.

[29] See 41.9 (Discretionary trust transparency: beneficiaries reliefs).

> (3) This subsection applies if after the administration period ends it is apparent that a person who previously appeared to be liable for income tax on estate income for any tax year is not so liable or is liable for tax on a lesser amount.
>
> (4) If subsection (3) applies—
>
> (a) all necessary adjustments and repayments of income tax for the tax year are to be made, and
>
> (b) if the person has been allowed relief which exceeds the relief that could have been given by reference to the amount actually charged for the tax year, income tax is charged on the person for that year under this subsection on the excess.
>
> (4A) The excess charged under subsection (4)(b) is treated as an amount of income for income tax purposes, except so far as it represents a tax reduction given effect at Step 6 of the calculation in section 23 of ITA 2007.
>
> (5) An assessment or adjustment made for the purposes of this Chapter or a claim made as a result of this Chapter may be made after the end of the period otherwise allowed if it is made on or before the third anniversary of the normal self-assessment filing date for the tax year in which the administration period ends.

International Manual provides:

> **INTM367560 Statutory time limit for claims by beneficiaries** [Sep 2021]
>
> It is possible that a beneficiary may receive a distribution from an estate which includes income received by the personal representative outside the normal statutory time limit. However, Section 700(3) ICTA 1988 allows beneficiaries until 3 years from 31 January following the year in which administration was completed to make their claims. This means that a beneficiary is not prevented from claiming relief from UK tax because of the time taken to complete the administration of the estate.
>
> For example, a death occurs during 1994/95. In the normal course of events, the time limit for a beneficiary to claim on administration period income arising in that year would have expired on 5 April 2001. However, if the administration of the estate is not completed until 2002/03 the time limit is extended and the beneficiary has until 31 January 2007 to make the claim.

89.20 HMRC practice: Conventional basis

The statutory rules are too complicated, and in practice no-one usually takes much notice of them. The TSE Manual first outlines the law:

> **TSEM7655. Statutory - conventional basis of taxation** [Mar 2018]
> **The statutory basis**
> The statutory basis is provided in ITTOIA/Ss654, 656 and 661 for non-corporate beneficiaries, and in CTA 2009/Ss939, 941 and 944 for corporate beneficiaries. This requires all sums paid during or payable on completion of the administration period to be taxed over the course of the administration period. The amounts are allocated to tax years as follows:-
> 1. where
>   - the interest has not ceased before the beginning of the tax year
>   - the administration period continues after the end of the tax year
>
> then the amount is the sum paid in the tax year
> 2. where
>   - the interest has not ceased before the beginning of the tax year
>   - the administration period ends in the tax year
>
>   then the amount is the total of
>   [a] any sum paid in the tax year before the end of the administration period plus
>   [b] any amount still due to the beneficiary at the end of the administration period...
>
> The amounts allocated to each year are then deemed to be the net income of the beneficiary for that year. The amount concerned is grossed at the applicable rate...

The TSE Manual then provides a concession:

> **The conventional basis**
> The beneficiary is treated as if he had been entitled to the income of the estate (or an appropriate part of the estate) as and when the income arose to the personal representatives. The basis applies for all purposes including repayments.
> It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis. If the beneficiary asks for the statutory basis to be applied, they should supply HMRC with a computation on that basis. If there are any problems with such a computation, advice should be requested from HMRC Administration of Estates Cardiff.

In other words, the estate is by concession treated as transparent for IT purposes. That will normally suit remittance basis taxpayers.

89.21 Tax returns & registration

89.21.1 *Simple estates*

HMRC Trusts and Estates Newsletter provides:[30]

> **Administration period of Deceased's Estates: IT and CGT Informal Payment Arrangements**
> The tax liability of most deceased's estates during the administration period is straightforward and can be dealt with by HMRC Pay As You Earn and Self-Assessment.
> Personal representatives (executors or administrators) provide HMRC with a calculation of the amount of tax due. HMRC will then provide a payment slip with a reference number, for this payment only, for the Personal Representative to then make a one-off informal payment of the total tax liability for the whole period of administering the deceased's estate, provided certain conditions are met.
> The main condition is that the total tax liability (Income Tax plus Capital Gains Tax) for the entire administration period is £10,000 or less. The other conditions are that the:
> [1] probate or confirmation value of the estate is not more than £2.5m
> [2] proceeds of assets sold by the personal representatives in any one tax year are
> [a] not more than £250,000, for deaths up to 5 April 2016 or
> [b] not more than £500,000 for deaths after 5 April 2016
> [3] estate is not regarded as complex, so it can be dealt with without the personal representatives having to complete a Self-Assessment return
> All informal payments made for the administration period, should include the reference number provided by HMRC for payment of the administration period tax due.
> Any payments made by cheque should include on the reverse the following information:
> - the name of the deceased
> - the last private address of the deceased
> - the deceased's National Insurance number or Self-Assessment UTR or reference which has been provided by HMRC for this payment
> - the reason for this payment indicating Administration Period
>
> The covering letter with the cheque for payment of the tax due should be sent to HMRC.

[30] *https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters/hmrc-trusts-and-estates-newsletter-august-2018*

89.21.2 *Complex estates*

HMRC Trusts and Estates Newsletter continues:

> HMRC Administration of Estates Cardiff is responsible for dealing with all aspects of the period of administration where the case is regarded as a complex case (subject to the exceptions at TSEM7366).
>
> An estate is considered complex if:
>
> [1] the probate or confirmation value of the estate is more than £2.5 million
>
> [2] tax due, Income Tax and, or Capital Gains Tax for the whole of the administration period exceeds £10,000
>
> [3] the proceeds of assets sold by the personal representative in any one tax year for date of deaths up to 5 April 2016 exceeds
>
> [a] £250,000 or
>
> [b] £500,000 for date of deaths after 5 April 2016
>
> If the estate does not fall into any of the above categories but it cannot easily be dealt with under the informal payments procedures, contact HMRC Administration of Estates Cardiff for advice on who should deal with the administration period liability.
>
> Estates are not part of the TRS requirements under the legislation that transposed 4MLD, but the method by which complex estates register with HMRC is through the same online process. Personal representatives of complex estates are required to use the TRS to obtain a UTR number for the estate they are administering. The register will ask for basic information, including the identification of the deceased and the personal representatives. For more information, read how to register an estate on TRS.
>
> If an estate is considered complex, Self-Assessment Trust & Estate tax return SA900 will be required for each year of the Administration period. Self-Assessment deadlines for the late submission of tax returns and penalties for late payment of tax apply.
>
> It should be evident when gathering assets and if dealing with the Inheritance Tax account if the probate or confirmation value of the estate is over £2.5m and the estate is therefore considered by HMRC as complex for the Income Tax and Capital Gains Tax of the administration period. Equally, the value of an asset will be required at date of death, which should give some indication if the value is likely to exceed £500,000 when the Executor is selling the asset.
>
> For Income Tax due over £10,000 the estate would be in receipt of gross income exceeding £50,000 during the whole of the administration period which could be from one or various sources: bank and building society interest, dividends, property related income and many more. Again, this

should be evident from assets held in the estate but may not be clear early in the administration period. The informal payment procedures can only be used once and only when the administration period has ended. If the £10,000 Income Tax due is exceeded HMRC should be notified as a Self-Assessment Trust & Estate tax return SA900 will be required to be submitted.

Only rarely, should an estate be reported as informal at the end of the administration period and then subsequently, a criterion for complex estate is triggered. This could be a previously unknown assets comes to light which exceeds the informal criterion values. In these circumstances, the estate should be registered on the TRS in order to request a UTR and a Self-Assessment Trust & Estate tax return SA900 will be required for each year of the administration period to declare all the income and, or capital gains information. Any payment previously made using the informal route will be transferred and used against the total tax now due and included in the Self Assessment statement of account.

89.21.3 *Reporting closure of estate*

HMRC refer to completion of administration as closure of an estate. ATT say:[31]

> In April 2020, the functionality of the TRS was increased, and in the August Trust and Estates newsletter, HMRC asked for personal representatives to make notifications of changes to the personal representative's details and notify the "closure" of the estate (i.e. the end of the administration period) via the TRS.
>
> Given that reporting the "closure" of an estate via the TRS effectively meant reporting the end of the administration period to HMRC twice (in addition to being very time-consuming to complete as it requires the executors to set up a Government Gateway and complete a digital handshake to authorise their agents), members asked on what basis HMRC were asking them to do this extra step.
>
> We raised these concerns with HMRC who have now confirmed to us (and other professional bodies) in email correspondence this month that, unlike for registered trusts where certain legal obligations apply regarding when details held on the Trust Register must be updated, estates are not similarly bound.
>
> HMRC have shared the following with us.
>
> "The requirement to update details on TRS applies only to taxable 'relevant' trusts which are registered for the purposes of the 4th Money

[31] *https://www.att.org.uk/technical/news/estates-trusts-registration-service* (Nov 2020)

> Laundering Directorate. The requirement does not extend to estates, which are registered to obtain a UTR for SA purposes. HMRC would prefer PRs and agents to use TRS to notify the closure of a registered estate but there is no obligation to do so. Notification can be made by letter or via a SA return if that is more convenient.
>
> "For registered estates where a closure notification has already been made by letter or in a SA return, HMRC does not expect PRs [Personal representatives] or agents to go back and update TRS as this will be done by HMRC staff.
>
> "TRS should be used to notify HMRC that the name or address of a PR has changed."[32]

If on completion of the administration a trust comes into effect, it is in principle necessary to report that trust under TRS.[33]

89.21.4 *Reporting estate distributions*

ICAEW say:

> **Distributions from estates in administration – completing self assessment tax returns and R40s**
>
> HMRC has provided the following clarification on how to report distributions from estates in administration on self assessment tax returns and R40 forms.
>
> When income from an estate in administration is paid out to beneficiaries the executors need to tell the beneficiaries:
>
> - How much income they are entitled to, and
> - How much of the entitlement is made up of dividends received before and after 6 April 2016, and
> - Whether there is any untaxed bank interest included in their entitlement
>
> **Untaxed bank interest**
>
> The R185 statement of estate income is not required where the only income is untaxed bank interest of less than £100 so in this situation the executors have to provide the beneficiaries with a breakdown of any untaxed bank interest on a separate sheet and the beneficiaries should declare the bank interest received in box 2 on page TR3 of the SA100. The R185 has a separate box for the pre April 2016 dividends, box 20,

[32] The TRS Manual makes similar points: see TRSM27010 - Types of trust that need to be registered: contents: registrable estates.

[33] Registration may not be required within 2 years of death; see 131.11 (Excluded trusts).

but the new instructions from HMRC appear to advocate ignoring that box. The instructions on the R185 for box 20 is to simply enter these dividends into the white space.

If the beneficiary is a taxpayer in self assessment, they will have to transfer the details in box 18 on the R185 estate income into box 18 on their SA107. They will then need to note in box 25, the white space, of the SA107 how much dividend income was received by the estate before 6 April 2016 but not paid out until after 6 April 2016. They need to do this so that the pre April 2016 tax credit can be taken into account and is not repaid.

By entering all the dividends onto the self assessment return then, provided the beneficiary is not in a tax repayment situation, it seems that the tax will be correctly calculated. If the beneficiary is in a repayment situation it may be necessary to do a manual calculation to ensure the non repayable dividend tax credit is excluded from any repayment.

If the beneficiary is a non-taxpayer, the beneficiary will instead have to transfer the details in box 18 on the R185 statement of estate income into box 4.11 or 6.1 on the R40 depending on whether the dividends were UK or foreign dividends. They need to do this because individuals are entitled to a dividend allowance and will be entitled to a tax rebate or credit against their tax charge of the tax paid on dividends received by the estate after 6 April 2016. There is no additional information box on the R40 so the beneficiary will have to tell HMRC on a separate sheet which dividends were received after 6 April 2016 so that the refund can be calculated.[34]

89.22 Income tax of estates: Critique

There could hardly be a stronger condemnation of the current rules than the statement in the Manual that *It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis*. The code needs to be rethought and replaced with something simpler. But that is outside the scope of this book.

90.60.3 Civil law comprehension gap

90.1 Foreign entities: Introduction

UK law recognises many types of entity:

(1) Entities which are legal persons, eg companies and Scots partnerships

(2) Entities which are not legal persons, eg English partnerships, trusts and estates (though partners/trustees/PRs are legal persons)

Three issues, or sets of issues, arise in relation to foreign entities:

(1) *Application of entity vocabulary:* Whether a foreign entity is a company, partnership, trust, person, etc, in the general sense of the word.

(a) If so, a statutory entity term such as company, partnership, trust, person, etc will (subject to context) include that foreign entity.

(b) If not, the statutory term (subject to context) will not include that entity.

For in general, references to companies, partnerships, trusts, etc are not restricted to UK entities.[1] I call this issue **"entity classification"**.

(2) *Application of other legal vocabulary*: Whether a right in a foreign entity constitutes "share capital", or an "interest in possession", or a "interest" in the entity, etc. Again:
   (a) If so, a statutory term such as share capital, or interest in, will (subject to context) include that foreign right.
   (b) If not, the statutory term (subject to context) will not include that right.

(3) *Transparency issues:* Whether a foreign entity is transparent (or opaque), in the sense that income/gains are regarded as arising to its members[2] (or to the entity itself), or in some other sense.

The answer to issue (1) (entity classification) may answer, or help to answer, issues (2) and (3) (other legal vocabulary/transparency). Conversely, the answer to issues (2) and (3) may help to answer issue (1). The issues strongly interlink, and discussion easily segues from one to the other, so that sometimes they are not regarded as different questions at all. However these are distinct issues, it is better, sometimes necessary, to consider them separately, and failure to do this can cause confusion.

Issue (1) is aptly called "entity classification". One might also refer to issues (2) and (3) as "classification" of entities, or of interests in entities. But for clarity of analysis I prefer not to use that term for those issues.

The issues raise more or less difficulty, depending on the similarity of the law of the entity, or country, to UK law.

Similar issues arise in the application of DTAs to foreign (and UK) entities, for instance, whether an entity is a "person" or a "body corporate" for the purpose of a DTA. Similar issues arise in non-tax contexts.

90.2 Roles of UK/foreign law

90.2.1 *Domestic law matters*

When UK court has to apply the provisions of an UK taxing statute to some transaction, arrangement or entity which is governed by UK law:

[1] LLP is an exception as this term is defined to mean a UK LLP; see 85.21.1 (Definition and nature of LLP).

[2] In the context of foreign entities, it is convenient to use the word "member" loosely, to include any person with an interest in any entity.

(1) The court will obviously apply general UK law principles in order to determine the nature and characteristics of the transaction, arrangement or entity.

(2) Having informed itself in this way, the court must then apply the taxing statute.

In *AC v DC*:[3]

> The law of tax is not an island entire of itself. Unless a taxing statute says to the contrary the right of the state to charge tax in relation to a given transaction is subject to the effect of that transaction as defined by the general law.

Other countries adopt the same approach:[4]

> 11. In most [OECD] Member countries, as a matter of principle, tax laws apply on the basis of the legal relationship deriving from other branches of the law. Thus the tax laws of these countries, when referring to partnerships, will, absent special tax definitions, refer to those entities that constitute partnerships according to domestic civil or commercial law.

90.2.2 *Foreign law matters*

Turning to foreign law matters, in *Memec v IRC*:[5]

> When an English tribunal has to apply the provisions of an UK taxing statute to some transaction, arrangement or entity which is governed by a foreign system of law,
>
> [1] the tribunal must take account of the rules of that foreign system (properly proved if not admitted) in order to determine the nature and characteristics of the transaction, arrangement or entity.
>
> [2] But having informed itself in this way, the tribunal must then apply the taxing statute as part of English law.[6]

[3] [2012] EWHC 2032 (Fam) at [31].

[4] OECD, "The Application of the OECD Model Tax Convention to Partnerships" (1999) available (at a small charge) from *http://www.oecd.org*

[5] 71 TC 77 (HC) at p.92, approved *Anson v HMRC* [2015] UKSC 44 at [51].

[6] If further authority is needed, which I doubt, see Rowlatt J in *Garland v Archer-Shee*: 15 TC 693 at p.711:

"...it is not a question of American law whether something is or is not within the Income Tax Acts. The question of the American law is, what are exactly the rights and duties of the parties under an American trust, and when you find what those rights and duties are, you see what category they come in, and the place they fill in

The only difference is that English law is regarded in English courts as law and foreign law is regarded as fact.[7]

Unsurprisingly, other countries adopt a similar approach. In *Biddle v Commissioner*[8] the issue was whether tax deducted at source on a dividend by a UK company[9] was regarded as income tax paid by a shareholder, for the purposes of a US statute[10]:

> At the outset it is to be observed that decision must turn on the precise meaning of the words in the statute which grants to the citizen taxpayer a credit for foreign "income taxes paid." The power to tax and to grant the credit resides in Congress, and it is the will of Congress which controls the application of the provisions for credit. The expression of its will in legislation must be taken to conform to its own criteria unless the statute, by express language or necessary implication, makes the meaning of the phrase "paid or accrued," and hence the operation of the statute in which it occurs, depend upon its characterization by the foreign statutes and by decisions under them. ...
>
> ... The phrase "income taxes paid," as used in our own revenue laws, has for most practical purposes a well understood meaning to be derived from an examination of the statutes which provide for the laying and collection of income taxes. It is that meaning which must be attributed to it as used in § 131.
>
> Hence the board's finding... that "the stockholder receiving the dividend is regarded in the English income tax acts as having paid 'by deduction or otherwise'[11] the tax 'appropriate' to the dividend" is not conclusive. At most it is but a factor to be considered in deciding whether the stockholder pays the tax within the meaning of our own statute. That must ultimately be determined by ascertaining from an examination of the manner in which the British tax is paid[12] and collected, what the stockholder has done in conformity to British law,

the scheme of the English Income Tax Acts which the courts here must construe." This passage has often been approved; see *Rae v Lazard* 41 TC 1 at p.31; *Memec v IRC* 71 TC 77 at p.111.

[7] See 90.60 (Ascertaining foreign law).

[8] 302 U.S. 573 (1938).

[9] Before the introduction of Corporation Tax.

[10] Section 131 [US] Revenue Act 1928, which allowed foreign tax credit relief in respect of "income … taxes paid or accrued during the taxable year to [a] foreign country".

[11] See App.2.3.2 (Bear tax by deduction or otherwise).

[12] I have corrected an apparent typo: the original reads "laid"; but it does not matter.

> and whether it is the substantial equivalent of payment of the tax as those terms are used in our own statute.

Other countries may adopt the same approach, or similar:[13]

> 12. Difficulties often arise, however, where income is derived by [arises to] an entity organised under the laws of another jurisdiction. In that case, the entity will have to be classified for purposes of the application of the tax laws of the country where the income is derived, regardless of whether or not that classification is compatible with the civil or commercial law system of the jurisdiction from which the entity derives its legal status.
> 13. For example, if the tax system of a country recognises only individuals, companies and partnerships (but not trusts) as taxpayers and provides for a different tax treatment for these three types of taxpayers, that country will have to 'force' foreign entities in one or the other of these categories (with more or less difficulty depending on the similarity of the civil and commercial law of the countries concerned) for purposes of applying its tax system to domestic income derived by these foreign entities.
> 14. In doing so, the practice of most countries is to adopt the same approach as the one they apply in a purely domestic context. They will therefore apply their domestic tax classification to foreign entities on the basis of the foreign law's legal characteristics of the entity. In the previous example, the country, for the purposes of taxing the domestic income of a trust established under the law of a foreign jurisdiction, will typically examine the legal characteristics of the trust as they derive from the trust law of the foreign jurisdiction in order to determine whom it should tax and whether that person should be taxed as an individual, company or partnership, which are the only categories recognised under its tax law.

So far as the topic raises issues of foreign law I necessarily rely on limited material available to an English lawyer. I would be interested to hear from readers with expertise on entities discussed in this chapter.

[13] OECD, "The Application of the OECD Model Tax Convention to Partnerships" (1999) available (at a small charge) from *http://www.oecd.org*
In Ireland this approach was adopted in *Quigley v Harris* [2008] IEHC 403. In that case the approach was said to derive from the principle of comity of nations, that is, that the courts of one jurisdiction recognise and give effect to rights and obligations relating to foreign entities, in accordance with the law of the state where the entity is established.

90.3 Entity classification test(s)

The question whether, in any particular statutory provision, a reference to (say) a trust or trustee includes some particular foreign entity or person, raises some fundamental questions:

(1) What is the definition, or determinative characteristic(s), of (say) a trust/trustee? a question of UK law

(2) Does the foreign entity or person have those characteristics? a question of the foreign law

There is an important distinction between well-defined and vaguely defined terms.

90.3.1 *Well-defined terms*

Sometimes a UK entity (or other legal term) has an authoritative statutory definition. This is the case, for instance, for a partnership: a partnership (in short) exists when persons carry on business in common, and if they do not carry on business (or not in common) a partnership does not exist.[14] So here, the entity classification question is a focussed one: whether the members of the entity carry on business in common.

Sometimes a UK entity has a reasonably clear non-statutory definition. This is the case, for instance, for "body corporate" (which is, importantly, usually a company for tax purposes). An entity is a body corporate if and only if it has legal personality, perpetual succession and state sanction.[15] So here, the entity classification question is also a focussed one: whether the entity has these three characteristics.

I refer to these as **"well-defined terms"**.

90.3.2 *Vaguely-defined terms*

Sometimes a UK entity (or other legal term) does not have an precise or authoritative definition. Definition(s) are more or less imprecise, or there is no definition at all. Textbooks may offer a variety of definitions, or none. Examples are perhaps the words "debenture", "security", "shares" and "trust"[16]. I refer to these as **"vaguely defined terms"**.In the absence of a sufficiently clear definition, the entity classification question must be

[14] See 85.2.1 (Definitions of "partnership").

[15] See 90.9.3 (What is a body corporate?); 90.8.4 (Company: undefined/general sense).

[16] See 87.2 (Classic trust).

less focussed; in determining whether a foreign entity is a trust, one might ask: does the entity have trust-like features, or sufficient trust-like features. There is a multi-factorial test. I refer to this way to classify an entity, as the **"entity-resemblance test"**. One could use the term "hallmarks test" and one could refer to tests, in the plural, as there is no single test which applies to all types of entity. These are vague tests, as first one has to identify the features (or hallmarks) of an entity, as a matter of UK law, and then one has to deal with the foreign-law problem of whether the foreign entity under consideration has those features, or sufficient of them. So if a reasonably appropriate definition can be found, that is the better way to address classification issues.

As always, these questions arise "subject to context" because definitions or determinative characteristics may vary according to the purposes we have in mind. An entity might be (say) a partnership or company for one purpose and not for another. But in practice I doubt if that happens much.[17]

90.3.3 *Foreign-entity clauses*

Statutes occasionally contain definitions to govern the meaning of foreign entities or terms. For instance these definitions of trust and partnership:[18]

> "trust" includes arrangements-
> (a) which have effect under the law of a country or territory outside the UK, and
> (b) under which persons acting in a fiduciary capacity hold and

[17] Except where statute expressly so provides.

[18] These definitions of trust and partnership are both to be found in:

Provision	Topic	See para
s.517N(4) ITA/s.356ON CTA 2010	Transactions in land	22.11.2
Para 11 sch 4 FA 2019	Profit fragmentation	53.19

The partnership foreign-entity clause is slightly more common, dating back to s.57 Pensions Act 2004. The trust foreign-entity clause derives from s.6B Building Societies Act 1986 (inserted 1997).

Foreign-entity clauses are also found in non-tax legislation, eg s.1208 Companies Act 2006:

> "partnership" means—
> (a) a partnership within the Partnership Act 1890, or
> (b) a limited partnership registered under the Limited Partnerships Act 1907,
> or a firm or entity of a similar character formed under the law of a country or territory outside the UK.

> administer property on behalf of other persons
>
> "partnership" includes an entity established under the law of a country or territory outside the UK of a similar character to a partnership

I refer to provisions of this kind as **"foreign-entity clauses"**.

Under the above definition of trust, a trust includes a foreign entity under which "persons acting in a fiduciary capacity hold and administer property on behalf of other persons". That is a fair definition of what a trust is. I cannot think of an entity which is not a trust in the normal sense of the word, which is a trust under this definition.

Under the above definition of partnership, a partnership includes a foreign entity "of a similar character to a partnership". The position here depends on the elastic word "similar". Perhaps one could find an entity which:

(1) is not a partnership (because its business is not carried on by the partners); but
(2) is similar to a partnership (because it has sufficient partnership-like features).

This is unexplored territory. Possible examples are:

(1) A foreign LLP
(2) An LLC

These are not partnerships, but might be regarded as similar. The answer would depend on which view better fits the context of the particular case. It is not possible to say any more on the issue in the absence of context.

Another example of this type of clause is para 4(6) sch 1B TCGA:

> In applying the domestic concepts of law mentioned in this paragraph to land outside the UK, this paragraph is to be read so as to produce the result most closely corresponding with that produced in relation to land in the UK.

I am not sure that clauses of this kind do much good, but they do no harm. Perhaps fortunately, they are not common.

90.3.4 *An entity spectrum?*

In *Anson* at first instance, the FTT said:[19]

[19] Reported under the pseudonym *Swift v HMRC* [2010] UKFTT 88 (TC) at [20]. The FTT decision was eventually upheld by the SC, and it is suggested that this passage

> There is a spectrum running from
> (1) the English partnership: not a legal person, with the partners owning the assets jointly and incurring the liabilities, carrying on the business, and being entitled to the profits; through
> (2) the Scots partnership: legal person ... owning the assets and incurring the liabilities with a secondary liability on the partners, with the partners nevertheless carrying on the business (since that is the definition of partnership) and being entitled to the profits; to
> (3) the UK company: legal person ... owning the assets and incurring the liabilities with no liability on the members (or a liability only on winding-up for an unlimited company) and carrying on its business with the members holding shares and being entitled to profits only after either payment by the directors or recommendation by the directors and a resolution to declare dividends by the members. ... the articles of a UK company could provide for automatic dividends.

The metaphor or image of a "spectrum" might be helpful up to a point; but I doubt it. It requires a simplification of facts which do not fit neatly on a straight line. I think it is no more than an attractive way of restating an entity-resemblance test.

90.4 How labels may mislead

90.4.1 *English language terminology*

The fact that a foreign entity is called, say, a trust or company under the foreign law does not entail that the entity is necessarily a trust or company in UK law, or for the purposes of UK tax. This is so even if the foreign country uses English and the same English term is used in both countries. In *HMRC v First Nationwide*:[20]

> The meaning of the word [dividend] in the tax legislation is a matter of English law not of Cayman law.
> Although Cayman law uses the word "dividend" to cover the distributions made in the present case ... it does not follow that the Preference Dividends are therefore "dividends" with the meaning of the

is correct.

[20] [2011] UKUT 174 (TCC) at [23]. Although the decision was reversed on appeal, this point was not doubted. Other examples:

Example	**See para**
US grantor trust not necessarily a trust for UK tax purposes	90.10
US limited liability company not necessarily a company for UK tax	90.40.1

UK tax legislation.

The use of scare quotation marks may be helpful here.

90.4.2 *Foreign language terminology*

Similarly, the fact that entities are described by the same foreign term in two countries does not entail that they are necessarily the same kind of entity. For instance a Fideicomiso in one jurisdiction may be a trust but a Fideicomiso in another jurisdiction may not.[21] Article 31(1) AMLD refers to

> types of legal arrangements, such as, inter alia, fiducie, certain types of Treuhand or fideicomiso, where such arrangements have a structure or functions similar to trusts[22]

The underlined words illustrate that the entities named are sometimes similar to trusts and sometimes not.

90.4.3 *Entity documentation*

One should not assume that two entities are classified the same way just because they are the same type of entity under foreign law. The drafting of the constitution of an entity may make a difference to its UK tax classification. For instance:

(1) a Foundation with Founder's Rights may be classified as a company and one without Founder's Rights may be classified as a trust

(2) a US grantor trust (or indeed a UK law trust) may be a substantive trust or a bare trust depending on the terms of the trust deed

90.5 Foreign law classification/treatment

Four types of questions may be distinguished:

(1) How does a foreign law classify or treat entities of its own jurisdiction, that is, entities governed by that foreign law, eg:
   (a) is a US LLC a corporation or a partnership (or something else) in US law?
   (b) is a US LLC transparent in US tax law?

(2) How does a foreign law classify or treat entities from other foreign jurisdictions, eg:
   (a) does Canadian law classify a Liechtenstein Foundation, or a US

[21] See 90.20 (Fideicomiso/Fideicommissum).

[22] See 131.3 (MLR: EU law background).

LLC, as a company?

(b) does Canadian tax law treat such entities as transparent?

The CTM provides:

> **CTM80152 Groups: Group Relief And Partnerships** [Dec 2019]
> ... Institutions organised outside the UK and considered to be partnerships in their home territory may be 'companies' for the purposes of group relief, depending on the facts and circumstances of the institution concerned. Classification under UK law does not necessarily follow treatment in the home territory. ...

Similarly, the INTM (discussing transparency) provides:

> **INTM180020 How HMRC arrives at a general view of foreign entities** [Dec 2023]
> How the entity is classified for tax purposes in any other country is not relevant.

So far as these issues are prescribed by foreign tax statutes, it will have little if any relevance in the UK. US tax law, for instance, has express entity classification rules.[23]

So far as entity classification is discussed in foreign case law, it should have some persuasive authority if the foreign law applies the same entity-classification test as the UK.

If the foreign tax law is sufficiently similar to UK law, it is considered that a foreign law classification as transparent/opaque ought to be relevant, though not of course decisive. An incidental attraction of this course is that it reduces the number of hybrid entities, which give rise to difficulties.[24] But in the event of a dispute, the question whether the foreign law is "sufficiently similar" is likely to be contested.[25] Indeed, I wonder if there is any jurisdiction which is sufficiently similar to the UK.

It has been said that in Canada, all legal persons (other than natural persons) are (or at least should be) classified as corporations.[26] That rule is different from the test which apply in the UK.[27] To the extent that

[23] Eg "check-the-box" rules; see 90.43.1 (LLC: US law background).

[24] See 91.1 (Hybrid entities).

[25] See too 90.4 (How terminology may mislead).

[26] See Welters, "Towards a Singular Concept of Legal Personality" , 2014 CanLIIDocs 142 *https://canlii.ca/t/28g3*

[27] It is a simpler test, though it still leaves the question of what amounts to legal personality, and whether any particular body has it.

Canada does adopt that rule, or is influenced by it, entity classification in Canadian case law should not be regarded as persuasive authority in the UK. I am not sure how far Canadian law actually adopts that rule.[28] That only goes to show how difficult it is to apply foreign case law in the UK. Perhaps it is better not to try.

90.5.1 *Foreign material: Conclusion*

In short, foreign law material (terminology, or statute or case law) needs to be carefully evaluated before it is relied on in the UK for issues of classification. This applies even to material from a common law jurisdiction such as Canada, whose trust and company law is in many respects similar to English law.

90.6 Transparency issues

90.6.1 *Transparent/opaque terminology*

UK tax law may categorise entities as "**transparent**" or "**opaque**".[29] The International Manual explains this terminology:

[28] Blanchard "The Tax Significance of Legal Personality: A U.S. View" (2015):

"In 2000, a Canadian government official discovered that a general partnership formed under Delaware's newly-revised version of RUPA possessed legal personality. In July of 2000, Canada announced that Delaware general partnerships would henceforth be treated as corporations, with the result that – because partnerships do not pay taxes at the entity level - treaty benefits would be denied to U.S. persons investing in Canada through such partnerships. Predictably, uproar ensued. It was pointed out that all U.S. partnerships, regardless of the state in which they were formed and regardless of whether they were general or limited partnerships, possessed legal personality in the sense "discovered" by Canada in 2000... Following this incident, Canada relented. In November of 2000, it was announced that henceforth Canada would not apply the legal personality criterion to partnerships."

https://www.law.nyu.edu/sites/default/files/upload_documents/Kimberly%20S.%20Blanchard2.pdf

What I think this story illustrates is that short statements of law will frequently mislead.

[29] The term sometimes used is "fiscally" transparent/opaque. In a tax context that is synonymous with transparent/opaque but the expression may be useful to distinguish:

(1) the tax concept, and
(2) non-tax uses of the term, where "transparency" refers to the values of openness, communication and accountability

The American legal English term "pass-through" is synonymous with transparent.

> **INTM180010 Foreign entity classification for UK tax purposes: Introduction** [Dec 2023]
> When we describe a foreign entity as "transparent" in INTM180000+, we mean that its members will generally be liable to UK tax on the profits, income or gains of the entity rather than only on any distributions from the entity. When an entity is described as "opaque", its members will generally be taxed only on the distributions made by the entity.

OECD discuss the term in the context of art 1(2) OECD Model and make the same point in another way:[30]

> The concept of "fiscally transparent" used in [OECD Model para 1(2)[31]] refers to situations where, under the domestic law of a Contracting State, the income ... of the entity or arrangement is not taxed at the level of the entity or the arrangement but at the level of the persons who have an interest in that entity or arrangement.

90.6.2 *Consequences of transparency*

OECD Commentary continues:

> This will normally be the case where
> [1] the amount of tax payable on a share of the income of an entity or arrangement is determined separately in relation to the personal characteristics of the person who is entitled to that share so that the tax will depend
> [a] on whether that person is taxable or not,
> [b] on the other income that the person has,
> [c] on the personal allowances to which the person is entitled and
> [d] on the tax rate applicable to that person;
> [2] also,
> [a] the character and source,
> [b] as well as the timing of the realisation,
> of the income for tax purposes will not be affected by the fact that it has been earned through the entity or arrangement.

One might regard that either as consequences or aspects or hallmarks of transparency, depending on one's perspective.

OECD identify a feature which does not amount to a hallmark of

[30] Commentary on OECD Model art 1(2), para 9.
[31] See 91.4 (OECD hybrid-entity rules).

transparency:

> The fact that the income is computed at the level of the entity or arrangement before the share is allocated to the person will not affect that result.[32]

The terminology is used similarly for CGT:

(1) In the case of a transparent entity, members are regarded as being entitled to the gains of the entity as they accrue.

(2) In the case of an opaque entity, members are in principle taxed only on distributions made by the entity; the entity itself is a taxable unit regarded as receiving the gains. For instance, partners are regarded as entitled to the gains of a partnership as they accrue, and are charged to CGT on that basis; so a partnership is said to be transparent for CGT.

90.6.3 *Further uses of the terminology*

The sense(s) explained above is the paradigm use of the terms transparent/opaque. However the terminology is used in an analogous way in many other contexts. For instance,

(1) A partnership or other entity may be said to be transparent in the sense that:

    (a) the entity's business is regarded as carried on by its members[33]

    (b) entity employees are regarded as employees of the members[34]

    (c) entity assets are regarded as held or owned by the members[35]

(2) A partnership may be said to be opaque (not transparent) for IHT situs rules, because the situs of a partner's interest in a partnership is not the situs of the partnership assets.[36]

One should not use the term transparent/opaque without identifying the

[32] An example is a UK partnership which is transparent even though income is comuted at a partnership level; see 86.1 (Partnership income: outline).
OECD here refer to OECD Partnerships Report para 37- 40; for the relevant text see 9.22.2 (Partnership "liable to tax").

[33] See 91.6.1 (Considered as income: Effect).

[34] See 37.15 (Employer a partnership).

[35] See 30.15.6 (Receipt via transparent entity).

[36] Another example: a partnership may be said to be opaque for the purposes of the ITA remittance basis, in the sense that property brought to the UK by the partnership is not regarded as remitted by the partners; see 18.49.1 (Partnership opaque for remittance basis).

provision or context involved, as an entity may be transparent for one purpose and not for another. For instance, a partnership is transparent for IT/CGT but not for IHT. Hence this section is headed "Transparency issues" (in the plural).

90.6.4 *Transparent/opaque: Caution*

Terms which can be used in so many senses, or which carry so many implications, need to be used with caution.

UK tax statutes do not generally use the term "transparent", though it is occasionally found in recent provisions.[37] Thus the person liable for income tax is generally the person receiving or entitled to the income.[38] The correct statutory question to ask here is therefore not whether the entity is transparent, but whether a member of an entity is a person receiving or entitled to the income. Similarly, the person chargeable to CGT is the person to whom gains accrue.[39] The correct statutory question to ask is therefore whether a gain accrues to the members or to the entity. For IHT situs, the correct statutory question to ask is, what is the situs of the partner's interest in the entity, not whether the entity is transparent. For remittances, the correct statutory question to ask should be framed in the terms of remittance condition A, and not in terms of transparency.

In other words, in cases where statute does not use the word "transparent":

(1) The labels transparent/opaque may be a convenient shorthand; but
(2) It is necessary to remember the words of the statute: if that is not done, the terminology may mislead.

In these cases the labels transparent/opaque are better used to summarise a conclusion rather than as the reason for reaching that conclusion.

The FTT has made this point:

> The issue is whether the UK tax is 'computed by reference to the same profits or income' ... Asking whether [the Delaware LLC] is transparent or opaque may be another way of asking the same question but we consider that it is preferable to apply the words of the Treaty.[40]

[37] For instance in the OFTR: see 67.24.1 ("Transparent fund").

[38] See 15.2.1 (Receipt/entitlement basis of liability).

[39] See 15.2.4 (Accruing: Gains).

[40] *Anson v HMRC* reported under the pseudonym *Swift v HMRC* [2010] UKFTT 88 (TC) at [18].

The Supreme Court agreed that questions of this kind should not be conflated:

> The issue in this case [*Anson*]
> [1] is not whether the receipts of the LLC from third parties are to be regarded as having been paid to the members of the LLC, but
> [2] whether the income on which Mr Anson paid tax in the US is the same[41] as the income on which he is liable to tax in the UK....
> That issue is different from the issue considered in *Memec*.[42] The answer to the question whether the receipts and expenditure of an entity are paid to and by its members does not necessarily determine whether, when a profit arises in a given accounting period, that profit constitutes the income of the members.[43]

It can only confuse the issue to describe both questions as whether an LLC is transparent, because they are (or may be) distinct questions. One may say, as the Supreme Court did in *Anson,* "transparent" *in the sense that*...[44]

This is especially important outside the paradigm context, but the same point arises even there. For instance, classification of an entity as transparent for IT, in the paradigm sense that the income is treated as the income of the members of the entity, may seem to entail that the entity itself is regarded as *not* entitled to the income. Thus a partnership is transparent, and income accrue to the partners and not to the partnership. But this is not always the case. For instance, an IIP trust is transparent, but the trustees may still be taxable on the trust income.[45] That seems illogical only if one fails to ask the correct, *statutory* question. Trustees of an IIP trust may be persons who receive trust income even if they are not persons who are entitled to the income, so they may be liable to income tax.[46]

HMRC agree. The INT Manual provides:

> **INTM180010 Foreign entity classification for UK tax purposes: Introduction** [Dec 2023]
> ... However, it is important to remember that "transparent" and "opaque" are not terms which are usually used in the legislation (an

[41] See 111.5 (Same income rule).

[42] The issue in *Memec* was whether a dividend received by a stille Gesellschaft was *paid to* the "silent partner"; see 90.30 (Stille Gesellschaft).

[43] [2015] UKSC 44 at [109].

[44] [2015] UKSC 44 at [43]. The quotation marks are original.

[45] Likewise a settlor-interested trust within s.624.

[46] See 42.2 (Taxation of IIP trustees).

example of an exception would be CTA09/S438).[47] Rather, they are informal labels which we use in this guidance to describe who is liable to UK tax on what profits, income or gains. As such, it will always be necessary to consider the particular UK taxation provision under which the matter must be considered.

For example, if you need to consider whether a UK resident individual member of a foreign entity is liable to UK tax on the trade profits, you will need to consider whether the member can be regarded as "receiving or entitled to the profits" for the purposes of ITTOIA05/S8.[48] If they can, the entity could be described as "transparent" in the sense that the member is liable to UK tax on the profits.

If the entity is a company (within the meaning of CTM00510) which is resident in the UK (INTM120000) or carrying on a trade in the UK through a permanent establishment (INTM260000), you may also need to consider whether the profits are "of" the company for the purpose of CTA09/S2.[49] If so, the entity could be described as "opaque" in the sense that the company is liable to UK tax on the profits.

90.7 How to determine transparency

90.7.1 *Statutory provisions*

Occasionally statute answers the question whether an entity is transparent or opaque. For instance, s.65(2) TCGA provides that trusts and estates are (generally) opaque for CGT:

> Subject to section 60 and any other express provision to the contrary,
> [1] chargeable gains accruing to the trustees of a settlement or to the personal representatives of a deceased person, and
> [2] capital gains tax chargeable on or in the name of such trustees or personal representatives,
> shall not be regarded for the purposes of this Act as accruing to, or chargeable on, any other person ...

Conversely, s.60 TCGA provides that a bare trust is transparent for CGT.[50]

90.7.2 *Transparency-factors test*

More often it is a matter of applying general principles.

[47] Section 438 CTA 2009 relates to the niche topic of european cross-border mergers, but for an example relevant to this work, see 66.24 (Transparent fund exemption).

[48] See 15.2.1 (Receipt/entitlement basis of liability).

[49] See 15.2.5 (Profits of companies).

[50] See 87.7 (Bare trust/nomineeship).

The International Manual provides (in the context of transparency)

> **INTM180020 How HMRC arrives at a general view of foreign entities** [Dec 2023]
> To reach a general view [as to whether bodies are transparant or opaque], we take into account the following factors:

I call this the **"transparency-factors test"**: HMRC give a list of six factors (**"transparency factors"**).[51] In short:

Factor		**Suggestive of**	
		Transparency	*Opacity*
1	Separate legal personality		
	(a) exists	n	y
	(b) does not exist	y	n
2	Share capital or something like it		
	(a) exists	n	y
	(b) does not exist	y	n
3	Who carries on the business:		
	(a) the entity	n	y
	(b) its members	y	n
4	Members entitled to profits		
	(a) as they arise	y	n
	(b) on subsequent distribution	n	y
5	Liability for debts:		
	(a) the entity	n	y
	(b) its members	y	n
6	Ownership of assets		
	(a) by entity	n	y
	(b) by the members	y	n

I consider these factors separately.

90.7.3 *Factor 1: Legal personality*

> Does the foreign entity have a legal existence separate from that of the persons who have an interest in it?

"Separate legal existence" means existence separate from the members of the entity. I think that must mean legal personality, in the UK law sense that the entity is capable of holding property, and it would be clearer to use

[51] This list of factors derives from HMRC Tax Bulletins 29 (1997) and 39 (1999) and obtains some support from *Dreyfus v IRC* 14 TC 560.

that term.

Assuming separate legal existence means legal personality, the question arises whether any particular foreign entity has it.[52]

In *Anson v HMRC*:[53]

> ... it would be unusual but not impossible for an entity with a separate legal personality, such as a company, to be tax transparent for English law purposes. One example would be the Scottish partnership where the partnership is a separate legal entity and holds the assets of the business, but the partners have an (indirect) interest in the assets and carry on business in common: this has been held by this court to be tax transparent and [HMRC] assured the court that nothing in [its] submissions was intended to undermine that position.

90.7.4 *Factor 2: Share capital/similar*

> Does the entity issue shares in
> [1] its capital or
> [2] something else which serves the same function as shares in capital (for these purposes, "shares" should be interpreted in line with CTA10/S1117(1) to include any other interest of a member in a company- see CTM00513 and below for further guidance)?

This can be problematic: what is share capital? when does something else serve its functions? what are the functions of share capital which is typically a nominal £1?[54] In practice this is likely to be contestable.

The INT Manual has further comments on this factor:

> **INTM180020 How HMRC arrives at a general view of foreign entities** [Dec 2023]
> Share capital in a UK-registered company is what the members contribute and under UK company law reflects a nominal value, although the shares may be issued at a premium. The shares issued will reflect members' proportionate interests in the share capital according to

[52] See App.2.6 (Person/legal personality). At first sight it is difficult to tax an entity which does not have legal capacity, so one might think that an entity without legal capacity cannot be opaque; in which case legal personality may be fundamental; but one might find persons who can be taxed on behalf of the entity (such as trustees, or the treasurer or board of an unincorporated association).

[53] *Anson v HMRC* [2013] EWCA Civ 63 at [63]. The decision was reversed on appeal, and the first sentence may now be doubted, but the second sentence stands good.

[54] See 90.55 (Ordinary share capital).

> nominal value (although the actual value of the shares will usually be different from the capital contributed as the actual value will usually reflect undistributed profits or the discounted value of the expected dividend stream rather than entitlement to assets in liquidation).
> However, the important point here is that the share capital concept reflects not UK company law formalities but members' ownership interests in what has been called the "corpus" of the company (see *Rae v Lazard* (1963) 41 TC 1).

I do not think the word "corpus" is helpful here.[55]

> When considering whether a foreign entity issues something similar to share capital in a UK-registered company, it is therefore important to remember that whilst foreign company law may be significantly different from UK company law (for example, there may be no nominal capital), it may still issue something that serves the same purpose of reflecting members' ownership interests in the "corpus" of the entity. See CTM00515-6 for further guidance.

Gerald Montagu questions this factor:[56]

> A focus on share capital becomes even more questionable in light of the recent developments relating to companies with no par value shares in a number of offshore jurisdictions and the related move from company law regimes based on the maintenance of capital to hybrid regimes in which solvency based tests come very much to the fore (and the vestige that remains of the maintenance of capital rules can seem to lack real substance).

90.7.5 *Factor 3: Who carries on business*

> Is the business carried on
> [a] by the entity itself or
> [b] jointly by the persons who have an interest in it that is separate and distinct from the entity?

This may be problematic. The answer may be both, as is the case for a Scots partnership.[57]

[55] See 30.9.2 (Corpus intact).

[56] "Anson and entity classification revisited in light of Brexit: can an LLC constitute a body corporate?" [2016] BTR 466.

[57] See 85.8.2 (Tiers: Tax analysis).

90.7.6 *Factor 4: Entitlement to profits*

[a] Are the persons who have an interest in the entity entitled to share in its profits as they arise; or

[b] does the amount of profits to which they are entitled depend on a decision of the entity in accordance with its constitution, usually made by its directors (or their equivalents), or members collectively, after the profits have been measured (a distribution)?

As a matter of partnership law, a partnership may (and often is) entitled to retain some partnership profits for capital growth. But that does not matter as for income tax purposes the partners are regarded as entitled to the profits.[58]

In *Anson v HMRC*:[59]

> [HMRC] submits that it is impossible for the profits of a business to belong to a person other than the person carrying on the business. I agree that it is difficult to think of examples where this would be the case, save perhaps in one case. That is the case of an agency company, that is, a company which carries on its own business so far as its dealings with the outside world are concerned but which in fact holds its assets as agent for another (usually another group company) and draws up its own accounts on that basis. But even in that example, the agency company may be little more than a nominee. There may be other cases.

As a matter of company law, a company normally falls within [b]: it makes a decision to distribute its profits (or not) by way of dividend. But it is possible for company articles to require automatic distribution of all its profits. Then factor 4 suggests transparency, but if it is the only factor, that would not be enough to alter the outcome, at least in the case of a UK company.[60]

[58] See 15.2.1 (Receipt/entitlement basis of liability).

[59] *Anson v HMRC* [2013] EWCA Civ 63 at [63]. This was not questioned on the appeal.

[60] If authority is needed, this view may be supported by a comment in *Dreyfus v IRC* 14 TC 560. Section 20(ii) ITA 1918 provided:

> The income of a partner from a partnership ... shall be deemed to be the share to which he is entitled during the year to which the claim relates.

Rowlatt J said at p.572:

> a small number of persons being members of an English private company, carrying on business with articles of association however much reproducing in their provisions the usual features of partnership articles ... could not be charged with

90.7.7 *Factor 5: Liability for debts*

> Who is responsible for debts incurred as a result of the carrying on of the business: the entity or the persons who have an interest in it?

The answer may not be a simple yes or no, as in the case of a limited partnership (some members liable, some not); or a Scots partnership (partnership primarily liable, partners secondarily liable); likewise an unlimited company.

90.7.8 *Factor 6: Ownership of assets*

> Do the assets used for carrying on the business belong beneficially to the entity or to the persons who have an interest in it?

This factor overlaps with factor 1, separate legal personality.

The answer to factor 6 may not be a simple yes or no, as in the case of an English partnership, where ownership of partnership assets is nuanced.

90.7.9 *Factors test: Discussion*

The 6 transparency factors may require a detailed enquiry into the constitution of the foreign entity and its governing law.

They are sometimes problematic or difficult to determine. The answer may be unclear or unanswerable, because (in the foreign jurisdiction) it may make no difference whether (say) the business is said to be carried on by the entity or by the members, so the applicable law need not and generally will not address the question. The questions may be arid and essentially meaningless in the foreign jurisdiction.

If any one individual factor is unanswerable, it may matter less, because no one of the transparency factors is determinative: if one does not know it, one can turn to the others.

The six factors should not be regarded as a comprehensive.

The problem may come that different factors point different ways.

The INT Manual provides:

> **INTM180020 How HMRC arrives at a general view of foreign entities** [Dec 2023]
> Note that the above factors may be relevant when coming to a definitive view on how a particular statutory provision applies in a particular

Super-tax under [s.20(ii)], by reason of the substantial character of their association.

> situation (as at INTM180040). However, the extent to which each factor may be relevant will depend on what exactly the statutory question to answer is.
>
> Some of those factors may point in one direction; others may point in another. An overall conclusion is reached from looking at all the factors together, though some have more significance than others.

The passage does not say which have more significance than others. An earlier version stated at this point: "Particular attention is paid to factors 3 [who carries on business] and 4 [entitlement to profits]". I wonder if the omission is deliberate or accidental.

> These factors overlap. For example, as part of considering factor 4 [entitlement to profits] it is useful to consider the extent to which the entity displays what some commentators call 'entity shielding', which refers to the protection of the entity assets from members and their creditors. If it displays strong entity shielding, that would indicate that the members are not entitled to the profits which correlate to the assets in the balance sheet as they arise.
>
> To shield assets in this manner, the entity will need a separate legal existence (factor 1) with the ability to carry on business as an entity distinct from the members jointly or in common (factor 3) . Business assets will generally belong to the entity (factor 6), supporting their shielding or partitioning away from members and their creditors. If the entity is responsible for the debts (factor 5), that would be a pointer that it carries on the business itself, and strong entity shielding will often be a feature associated with members' limited liability.
>
> A consequence of entity shielding is that members' interests are not directly in the assets of the entity, but in the entity itself. This interest in the entity is likely to serve the same function as share capital in a UK-registered company (factor 2).

Foreign law plays its usual role:[61]

> In considering the factors above it is also important to remember that we look at the foreign commercial law under which the entity is formed and at the internal constitution of the entity.

Applying the transparency-factors test, as best I can, to UK entities whose transparency status is uncontroversial:

[61] See 90.2 (Roles of UK/foreign law).

Entity	**Factors suggesting transparency:**							**Transparent for:**	
	1	**2**	**3**	**4**	**5**	**6**	**Total**	**Income**	**Gains**
UK company	n	n	n	n	n	n	0	no	no
LLP (not deemed p'ship)	n	y	n	y	n	n	2	no	no
General partnerships									
English partnership	y	y	y	y	y	y	6	yes	yes
Scots partnership	n	y	y	y	y	n	4	yes	yes
Limited partnerships									
English partnership	y	y	y	y	n	y	5	yes	yes
Scots partnership	n	y	y	y	n	n	3	yes	yes
IP trust	y	y	n	y	n	n	3	yes	no
Discretionary trust	y	y	n	n	n	n	2	no	no
Deceased's estate	y	y	n	n	n	n	2	no	no

90.7.10 *A question of "substance"?*

In *Memec v HMRC*:[62]

> ...technical differences in the nature of rights should not cause cases which are in substance identical to receive different UK tax treatment.

But the questions discussed in this chapter often turn on distinctions, such as contractual/proprietary rights (*in rem/in personam*), which could properly be described as technical. It would assist clarity of thought not to use the word "technical" here.[63] A search for underlying "substance" is not going to help.[64]

90.7.11 *Transparency/entity classification compared*

The expressions "transparent" and "opaque" are not interchangeable with "partnership" and "company" or "body corporate". A fiscally transparent entity is not necessarily a partnership. A fiscally opaque entity is not necessarily a "body corporate" or a "company" for UK tax purposes.[65]

Similarly, in *Memec*:

> the question was not whether the silent partnership was a partnership for English law purposes but whether the arrangements were tax transparent

[62] 71 TC 77 at p.113.

[63] See App.1.8 (Technical).

[64] This view is supported by the comment in *Dreyfus*, set out in a footnote in 90.7.6 (Factor 4: Entitlement to profits), rejecting reliance on the "substantial character" of the association.

[65] The point was formerly made in INTM180020 (Considerations when using the List of Classifications of Foreign Entities for UK tax purposes) [Dec 2019] and though it is not in the current version, the point remains valid.

> so as to make the source of M's share of the subsidiaries' profits the same as that of the profits distributed to the intermediate holding company.[66]

Although the expressions are not interchangeable, the issues overlap:

(1) A transparent entity is not necessarily a partnership[67] but *if* the entity is classified as a partnership, it must be transparent for IT/CT and CGT.[68] Conversely an opaque entity is not necessarily a company/ body corporate, but if the entity is classified as a company, it is (at least, usually) opaque for tax purposes.

(2) The transparency-factors test is similar to the test for the classification of entities, ie the factors which suggest an entity is opaque (in the sense that income arises to the members not to the entity) are (broadly speaking) the same or similar to the factors which suggest that an entity is (say) a company.

90.8 Definition of "company"

There are about a dozen definitions of company relevant to this book. They can be categorised as follows:

Definition	**See**
Standard tax definition of company	*Discussed here*
Non-standard tax definitions of company:	
CG group relief	64.25
SDLT/ATED	98.2.2
Transactions in securities	55.2.1
Sale of occupation income	s.789 ITA
Notice of accounting period	121.23.1
OECD Model definition of company	30.15.4
Company in general sense	*Discussed here*
Companies Act definition of company	*Discussed here*

Strictly, one should not use the word company without specifying which definition applies; but in practice the context will generally supply that; and references to company in this work generally mean a company in the standard tax sense.

[66] *Anson v HMRC* [2013] EWCA Civ 63 at [44]. Although the decision was reversed on appeal, this point was not doubted.

[67] For instance, an IIP trust is also transparent: see 42.9 (Life tenant: Source of Income).

[68] See 85.16 (Partnership transparency: IT/CT); 85.20 (Partnership transpa rency: CGT).

90.8.1 *Company: Standard tax sense*

It is helpful to set out the CT/IT/CGT/SDLT definitions side by side:

s.1121 CTA 2010	**s.992 ITA**	**s.288 TCGA**	**s.100(1) FA 2003**
(1) In the Corporation Tax Acts "company" means	(1) In the Income Tax Acts "company" means	In this Act, unless the context otherwise requires ... "company" includes [1]	In this Part [Part 4, SDLT] "company", except as otherwise expressly provided, means
[a] any body corporate or unincorporated association, but	any body corporate or unincorporated association, but	[a] any body corporate or unincorporated association but	any body corporate or unincorporated association, but
[b] does not include [i] a partnership,	does not include [i] a partnership,	[b] does not include a partnership,	does not include a partnership.
[ii] a co-ownership scheme (as defined by [s.235A FSMA])			
[iii] a local authority or a local authority association. [2]	[ii] a local authority or a local authority association.		
(2) Subsection (1) needs to be read with section 617 (under which the trustees of an authorised unit trust are treated for certain purposes as a UK resident company).	(2) Subsection (1) needs to be with read with section 617 of CTA 2010 (authorised unit trust treated as UK resident company).[3]	[c] and shall be construed in accordance with section 99.[4]	

1. Although the word here is "includes" it is difficult to envisage an entity which is a company in the general sense of the word but which is not a body corporate; so "includes" here means "means".
2. This is subject to some minor (unnecessarily complicated) exceptions not considered here.
3 See 69.4.2 (Income arising to AUT).

Section 993(3) ITA signposts 3 sets of exceptions:
(a) Part 6 ITA: venture capital trusts
(b) Chap 1,4 Pt 13: transactions in securities & sales of occupation income
(c) s.993/994 ITA: meaning of connected person
The exception in the transactions in land code was removed when that code was rewritten in 2016; the need to amend s.993(3) to remove this reference was overlooked.

4 Section 99 TCGA relates to unit trusts; see 69.8 (CGT: Deemed-company fiction).

I refer to these definitions individually as the CT/IT/CGT/SDLT definitions and together (ignoring small differences between them) as the **"standard tax definition"**; and a body within this definition is a company in the **"standard tax sense"**.

The standard tax definition expressly excludes partnerships. This does not seem strictly necessary. It might have been done for the avoidance of doubt:

(1) In case it was argued that a partnership was a company in some loose or archaic sense of the word
(2) In case it was argued that a partnership was a body corporate (and so a company within the standard tax definition). This may apply in particular to:
    (a) Some foreign law entities which are partnerships and are or might be argued to be bodies corporate; and
    (b) A Scots partnership: The IT/CT definition was drafted in 1965[69] and at that time it might have been argued that a Scots partnership was a body corporate.[70]

An LLP is a body corporate but is (generally) outside the standard tax definition of company for two reasons (either would suffice): an LLP counts as a partnership, and is also expressly excluded from the tax definition of company.[71]

A corporate trustee in its trustee capacity is a notional person, but that person is not a company in the standard tax sense.[72]

[69] Section 45 FA 1965.

[70] It is now generally thought that a Scots partnership is not a body corporate; see 85.14.2 (Partnership: a body corporate?). But perhaps the position was less clear in 1965.

[71] See 85.22.2 (Income tax treatment of LLP).

[72] See 7.3 (Trustees a distinct person). SDLT needs further consideration as (subject to context) the distinct-person rule does not apply; but I do not consider this here.

90.8.2 *Company: tax definitions compared*

The IT definition is wider than the CT definition as it may include a co-ownership scheme. But I am not sure if that matters.

The CGT definition is wider than the IT/CT definitions as it includes:
(1) unit trusts and
(2) local authorities[73]

The CTM provides:

> **CTM00510 Meaning of company, profits and income** [Jun 2019]
> [The Manual cites the CT definition, considers the history from 1799, and continues:] The nomenclature is highly confusing.
> "Company" is customarily used congruently with incorporated company but has a tax definition that largely for historical reasons goes wider but nevertheless excludes partnerships.
> "Company" is not always congruent with "legal person" either since in Scotland a partnership has legal personality. Moreover an unincorporated association (which is neither a legal person nor a partnership) is within the tax definition of company mentioned above.

It is correct that the standard tax sense of company is wider than the general sense, as it includes unincorporated associations. The full details are, admittedly, quite intricate; but one does not often need to consider them. That does not seem confusing, by the standards of tax legislation. Perhaps the passage was written before tax legislation reached its current level of complexity.

90.8.3 *Company: IHT sense*

IHTA does not provide a definition of "company"; but the definition of close company in the IHT close-company code incorporates the CT definition.[74]

In IHT law, and tax law generally, the concepts of partnership and company are mutually exclusive. So in an IHT context it is considered that "company" (where undefined) means companies formed under UK company law, and foreign entities similar to such companies; but it does

[73] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), Chapter 45 (Local Authorities)
online version *https://www.taxationofcharities.co.uk*

[74] See 81.1.1 ("Close company").

not include Scots law partnerships, or foreign entities similar to such partnerships.

90.8.4 *Company: undefined/general sense*

Where the word company is not defined, it should take its ordinary meaning, subject to context. But it is difficult to say what that ordinary meaning is.

One would not expect the word "company", an entity with a long and complex history, to have a short, comprehensive, and generally agreed definition. On the contrary: the word "has no strictly technical meaning".[75] But one might have expected at least some attempts to encapsulate the modern concept in a sentence or two. *Lewin on Trusts* para 1-001 is headed "definition of a trust" and discusses four of them. It notes that they contain "large (though incomplete) elements of mere description" but what is wrong with that? A definition which identifies the main features of an entity is a useful tool, provided its limitations are recognised. The reader of this chapter will be looking to see what distinguishes a company from a non-company such as a partnership. But UK company law textbooks do not offer much help. *Halsbury's Laws* para 1(1) states:

> The general sense of the word 'company' denotes an association of individuals formed together for some common purpose.

That was the way that the word was used in the distant past, but not used now, when simple partnerships are not regarded as companies and single member companies are permitted.

Company lawyers tend to use the word company to mean entities formed and registered under the Companies Acts, because that is the definition in s.1(1) Companies Act 2006, which applies for the purposes of the Companies Acts.[76] This, I think, is why *Halsbury's Laws* distinguishes body corporate and company:

> There are many bodies corporate which ... are not commonly described as companies. These fall broadly into two categories:
> (1) those incorporated pursuant to some general Act of Parliament permitting incorporation to be effected by any body of persons which fulfils specified conditions: of these the chief examples are building societies and ... co-operative societies and community benefit

[75] *Re Stanley* [1906] 1 Ch 131 at p.134.

[76] This provision is set out in 64.27.8 ("Company").

> societies;
>
> (2) those known as public corporations: these are created to fulfil in each case some special social or economic purpose, and are created either by royal charter or, more commonly, by statute ... examples include the British Broadcasting Corporation...

This recognises that these bodies corporate are, at least sometimes, described as companies, though not governed by the Companies Act 2006. Halsbury does not attempt to explain what is a body corporate.

The ordinary meaning of company is wide: the word company includes LLPs and, possibly, Scottish partnerships, or so it has been suggested.[77] On that basis, I think (contrary to *Halsbury's Laws,* or at least, in the context of tax) that body corporate and company (undefined) are generally used synonymously.

Likewise I think company and corporation are generally used synonymously. "Corporation" might perhaps be preferred for bodies incorporated by royal charter, or by statute, rather than under the Companies Act, as "corporation" carries more prestige. But even if that is the usage in company law, it is not a distinction which matters for tax which (apart from the reference to "corporation tax") always refers to companies, rather than corporations.

The meaning of company in an undefined/general sense is not usually an issue for tax, because we have the tax definitions. But it arises when discussing whether a foreign entity, such as a Foundation, is a company (or body corporate, if one distinguishes the two).

There is much to be said for the definition of the US professor Lewis Haney:[78]

> A company is an artificial person created by law, having separate entity, with a perpetual succession and common seal.[79]

This is followed in HMRC's definition of a body corporate[80] and has echoes in Blackstone's Commentaries.[81]

[77] *Glasgow City Council v Unison* [2014] CSIH 27 at [46].

[78] Business Organization and Combination, (1913) *https://socialsciences.mcmaster.ca/econ/ugcm/3ll3/haney/BusinessCombination.pdf*

[79] But a seal is not now required.

[80] See 90.9.3 (What is a body corporate?).

[81] Book 1 Chap 18: Of Corporations *https://avalon.law.yale.edu/18th_century/blackstone_bk1ch18.asp*

90.8.5 *EU company list*

Art 2(a) EU Parent/Subsidiary directive[82] provides:

> For the purposes of this Directive the following definitions shall apply:
> (a) 'company of a Member State' means any company which:
> (i) takes one of the forms listed in Annex I, Part A ...

The annex sets out a list of entities which it appears should be treated as companies (and as bodies corporate) for UK tax purposes (even post-Brexit):

EU entities
Societas Europea
Societas cooperativa Europaea
Austria
Companies known as
(1) Aktiengesellschaft
(2) Gesellschaft mit beschränkter Haftung
(3) Versicherungsvereine auf Gegenseitigkeit
(4) Erwerbs- und Wirtschaftsgenossenschaften
(5) Betriebe gewerblicher Art von Körperschaften des öffentlichen Rechts
(6) Sparkassen
Other companies constituted under Austrian law subject to Austrian corporate tax
Belgium
Companies known as
(1) société anonyme/naamloze vennootschap
(2) société en commandite par actions/commanditaire vennootschap op aandelen
(3) société privée à responsabilité limitée/besloten vennootschap met beperkte aansprakelijkheid

90.9 Body corporate

90.9.1 *Why body corporate matters*

The question whether an entity is a body corporate matters because:

(1) A body corporate is (subject to certain exceptions) a company in the standard tax sense.
(2) There are some specific rules which apply to a body corporate.[83]

[83] This may be done in a straightforward manner by referring expressly to a body corporate; or in a roundabout manner referring to a "company" but defining

Examples include:

Topic	**See para**
SD/SDLT group relief (eg for partnerships)	85.24
Definition of "51/75/90 % subsidiary" for group reliefs	64.26
Definition of mutual fund	66.15

90.9.2 *Company/body corporate compared*

There are 2 or 3 distinct concepts:

(1) Company in the tax sense (a defined term)

(2) Company (undefined, in the general sense) and body corporate (undefined, in the general sense) which I think have the same meaning, but a distinction is sometimes drawn between them.

They normally overlap, in that a company in the general sense is normally a company in the tax sense and a body corporate; but a body within one concept may not be within the others. A number of permutations are possible:

Entity	**Co**	**Co**	**Body corporate**	**See**
	tax sense	***general sense***		
Company	yes	yes	yes	
Unincorporated association	yes	no	no	
Foreign LLP[84]	yes	yes	yes	
UK LLP	no (usually)	yes	yes	85.21

None of this should cause confusion as long as one bears in mind that "company" does not have a single general meaning.

90.9.3 *What is a body corporate?*

How does one decide whether an entity is a body corporate? There is no definition in tax statutes. As the postpositive adjective[85] suggests, the term is ancient and somewhat archaic. A body corporate means a corporate (or incorporated) body. I think it is (more or less) synonymous with company in the general sense.[86] But that only takes us on to the

"company" to mean body corporate (overriding the standard tax definition of company).

[84] A Co-operative & mutual benefit society is also an example of this.

[85] Other examples in legal vocabulary are: court martial, fee simple, letters patent; see *https://en.wikipedia.org/wiki/Postpositive_adjective*

[86] Corporate/unincorporate are just archaic terms for incorporated/unincorporated. This is self-evident, but if necessary, and assuming general statutory definitions can shed

question of what is the meaning of company (in the general sense).

CT Manual provides:

> **CTM00510: Meaning of company, profits and income** [Jun 2019]
> Nor is there any definition of body corporate, though it appears to mean a legal person of full capacity distinct from its members with perpetual succession created by, or observing provisions required by, authority, whether Crown or Parliament.

This accords with the general concept of a company.[87] Thus there appear to be 3 requirements:
(1) legal personality
(2) perpetual succession
(3) created by Crown or statutory authority ("state sanction")

The term "body corporate" also assumes, or requires, that one or more persons have come together in the form of a single, distinct legal person.

"Perpetual succession" is a technical term. It means that there is no change in the ownership of property of the body corporate on the death of a member or on a transfer of shares. The US expressions "continuity of life" or "perpetual existence" seem better, but "perpetual succession" is too well established a term to change. It is possible for company articles to provide that a company must be wound up at a certain date. The entity still has "perpetual succession" and so is still a body corporate.

It is possible for an entity to have legal personality and lack perpetual succession and so not to be a body corporate. A Scots partnership is an example (it also lacks state sanction, so it fails of 2 of the 3 requirements).

It is possible for an entity to have perpetual succession and not legal personality. A trust might be an example: it may be said to have perpetual succession in the sense that it continues despite the deaths of trustees or beneficiaries (again, a trust also lacks state sanction, so it fails of 2 of the 3 requirements).

It may be possible for an entity to have legal personality and perpetual succession and still not to be a body corporate. A Foundation may be an

light on the general meaning of words, support might be had from:
(1) s.1173 Companies Act 2006, providing that "body corporate" includes a body incorporated outside the UK.
(2) Sch 1 Interpretation and Legislative Reform (Scotland) Act 2010, providing that 'person' includes a body of persons corporate or unincorporated.

[87] See 90.8.4 (Company: undefined/general sense).

example.

After discussing the position of trade unions, the Scottish Law Commission say:

> 2.26 There are other examples of statutory provisions which have been held to create what were described as "quasi-corporations",[88] that is, bodies created by statute with certain attributes of legal personality but without corporate status. By way of contrast, the case of *J H Rayner (Mincing Lane) Ltd v DTI*[89] concerned the International Tin Council which ... was created by an Order in Council which provided that the ITC "shall have the capacities of a body corporate". After the ITC became insolvent, the House of Lords rejected the argument of its creditors that a distinction could be drawn between a body corporate on the one hand and an entity with "the capacities of a body corporate" on the other, so as to impose liability on members in the latter case. Lord Oliver of Aylmerton observed:
>
> …the undoubted existence of capacities may lead and, in some circumstances, must lead to a necessary inference of the status of the person on whom they are conferred. Whether that is expressed… by saying that the status is the sum total of the capacities or that the status may be deduced from the capacities is really a question of purely academic interest and does not affect the ultimate result.[90]

Avery Jones comments:[91]

> The International Tin Council had legal personality under the treaty creating it, including the capacity to contract and acquire and dispose of movable and immovable property and to institute legal proceedings, but the UK legislation giving effect to the treaty in internal law, provided that it had the legal capacities of a body corporate, without making it a body corporate (which would have had the undesirable effect of making it, as an international body, subject to UK law on, for example, winding-up). This was held by the House of Lords in *J.H. Rayner v Department*

[88] Footnote original: Eg *IRC v Bew Estates Ltd* [1956] Ch 407 at p.415 (the War Damage Commission); *Knight and Searle v Dove* [1964] 2 QB 631 at p.643 (the London Trustee Savings Bank). The Scottish Law Commission may afford another example. For further discussion, see also Wedderburn, "Corporate personality and social policy: the problem of the quasi-corporation" (1965) 28 MLR 62.

[89] [1990] 2 AC 418.

[90] at p.504.

[91] Avery Jones et al, "Characterisation of Other States' Partnerships for Income Tax" [2002] BTR 375.

> *of Trade* to have created a separate legal person with the result that the members of it were not liable for its liabilities.[92]

UK law sometimes stipulates that an entity is a body corporate. For instance, s.16(2) CA 2006 provides:

> The subscribers to the memorandum, together with such other persons as may from time to time become members of the company, are a body corporate ...

There are similar provisions for the following:

Entity	**See**
Charitable incorporated organisation	s.205(1) CA 2011
Scottish charitable incorporated organisation	s.49(2) CTISA 2005
Co-operative & community benefit society	s.3 Co-operative & Community Benefit Societies & Credit Unions Act 2014

90.9.4 *Foreign law body corporate status*

Foreign law sometimes stipulates that an entity is (or is not) a body corporate; for instance:

Limited Partnerships (Guernsey) Law 1995	*Separate Ltd Partnerships (Jersey) Law 2011*
Art 9A(5) For the avoidance of doubt (!) ... a limited partnership with legal personality is a body corporate.[93]	**Art 3(5)** An SLP is a legal person but not a body corporate.

Foreign provisions of this kind do not necessarily mean that the entity is (or is not) a body corporate in UK law or, more accurately, for the purposes of any particular UK statutory provision using that expression.[94] What matters is whether the entity meets the criteria of a body corporate in UK law. The statutory provision should have some weight, but only if the position were otherwise unclear.

90.9.5 *Body corporate lists*

Here is a list of entities discussed elsewhere:

[92] See too 90.40.4 (Stichting a treaty-person).

[93] Similarly, s.1 Limited Liability Partnerships (Guernsey) Law 2013.

[94] See 90.4.1 (English language terminology).

Entity	**Body corporate**	**See**
Scots partnership	No	85.14.2
Unit trust	No	69.2
OEIC	Yes	66.3.4
Foundation	No (probably)	90.14.4
Limited liability company	Yes	90.45.2

A trustee is a notional person, but that person is not a body corporate.[95]

The former Stamp Taxes Manual also provided a list identifying foreign entities as body corporate or not:

> **6.124 Foreign Companies**
> Some foreign companies have been accepted as falling within the term 'body corporate' for the purposes of the intra group relief. The following is a list of examples of foreign bodies accepted by us as falling within the definition of "body corporate" for Section 42 [FA 1930] and Section 151 [FA 1995] purposes:–

Although the list is expressed to be for the purposes of two specific provisions, there is no specific definition of "body corporate" in those sections; if an entity is a body corporate for those purposes, it is in principle a body corporate in the general sense of the word, and a company in the standard tax sense.

Australia	Private companies which do not need to comply with certain requirements, are known as 'proprietary' companies. Such companies registered in New South Wales are bodies corporate.
Bahamas	Companies described as limited.
Belgium	Société de personnes à responsabilité limitée (descussocies).[96]
Bermuda	Companies described as limited.
BVI	A company described as limited and which is incorporated under the Companies Act 243.
Canada	Companies described as limited.
Cayman Islands	Companies described as Ltd.
Denmark	A company described as an A/S.
Finland	An 'Oy' (Osakeyhtiö) is a Finnish limited company which may be public or private.
France	Société Anonyme and Société en commandite par actions.
Germany	Aktiengesellschaft. Gesellschaft mit Beschränkte Haftung. Kommanditgesellschaft[97] auf Aktien.

[95] See 7.3 (Trustees a distinct person).

[96] "Descussocies" is a misprint but I do not know what is intended.

[97] HMRC text erroneously reads: Kommanditfellschaft.

Guernsey	A company constituted under the laws of Guernsey and registered before the Royal Court.
Holland	Naamloze Vennootschap. Besloten Vennootschap.
Hong Kong	Companies described as limited.
Irish Minister of State	An Irish minister may be accepted as a parent body corporate for S42 purposes
Italy	Societa per Azioni.
Liberia	Companies described as limited but note that we may require to see the Certificate of Incorporation.
Malaysia	A company which includes the word 'Berhad' as part of and at the end of its name.
Netherlands Antilles[98]	Naamloze Vennootschap.
Norway	Aksjeselskap (et) or Aktieselskap[99] (et).
Panama	Sociedad Anonima. 'Corp.' 'Inc.' Note that 'Ltd' is not conclusive.
Portugal	A body which is a Sociedade por Quotas.
Saudi Arabia	A company organised pursuant to the laws of the Kingdom of Saudi Arabia has been accepted although it did not have perpetual succession.
Singapore	Companies described as limited.
South Africa	A Company which is 'limited by shares'.
Spain	Sociedad Anonima and Sociedad de Responsabilidad Limitada.
Sweden	Aktiebolaget. Also The Kingdom of Sweden.
Switzerland	Société Anonyme, Société en commandite[100] par actions and Aktiengesellschaft. A verein.[101]
Trinidad	A company limited 'by shares'.
USA	Corporations (usually described as 'Corporation' 'Company' or 'Incorporated') organised under the laws of various states. Delaware Limited Liability Companies.
Venezuela	Corporations organised under the laws of Venezuela.

90.9.6 *Body corporate: Critique*

Why do some tax rules (such as group relief) refer to *body corporate* rather than *company*? It may be that the drafter intended the distinction (eg to exclude unincorporated associations and include LLPs). That is, it may be intended that:

(1) A partnership which is a body corporate (such as an LLP) may be the parent company of a group, though not a subsidiary (as it will not have ordinary share capital).

[98] Netherlands Antilles ceased to exist in 2010 and is now Curaçao and Sint Maarten. The law of the former Netherlands Antilles continues to apply unless and until amended.

[99] HMRC text erroneously reads: Aktieselscap.

[100] HMRC text erroneously reads: commandit.

[101] "A verein" is a misprint but I do not know what is intended.

(2) An unincorporated association, not a body corporate, cannot be a member of a group (even though it is subject to corporation tax).

It may be for historical reasons, particularly if the drafting dates back to before the introduction of the standard tax definition of company in 1965. Or it may be that the drafter gave no particular attention to the matter and regarded the terms as synonymous (as is nearly the case, but not quite).

There is scope for simplification here, though as always, reform would need consultation and thinking through. Except in the definition of company, the term "body corporate" need not and should not be used in UK tax law.

90.10 US revocable (grantor) trust

Revocable trusts are commonly used in the USA for estate planning.[102] With an American settlor these are almost always classified as grantor trusts (a US tax concept) and transparent for USA tax purposes as to income and capital gains, though with non-USA settlors they are only transparent in limited circumstances.

The classification of a US revocable trust turns on the nature of the rights conferred by the trust, which depends on the drafting and governing law of the trust.[103] Only general comments are possible here.

Under a common form grantor trust, the settlor (the synonymous terms grantor, trustor, creator or donor are also used) is sole trustee, the trust is revocable, and the income and capital is paid to the settlor on demand. Section 603 America Uniform Trust Code provides:[104]

[102] I am grateful to Ian Watson (of 3 Stone Buildings) for his comments on this section.

[103] Each USA state is a separate jurisdiction, with its own trust law, derived from English law but with statutory and case law variations.

[104] *https://www.uniformlaws.org/viewdocument/final-act-132?CommunityKey=193ff839-7955-4846-8f3c-ce74ac23938d&tab=librarydocuments*

The uniform code project is an attempt to standardise US law, but adoption of uniform codes is far from universal, and states may adopt them with variations. Some states (eg, s.15800 California Probate Code) impose rules almost identical in effect to s.603 UTC, but independently of the uniform code project. The general trend in American jurisprudence is towards uniformity even in the absence of express statutory provision.

The text of s.603 has been amended, but the changes do not seem relevant for present purposes.

Strictly it would be necessary to obtain foreign law tax advice on this issue, but that is not entirely straightforward, as US law does not use the UK concept of a bare

> (a) To the extent a trust is revocable by a settlor, a trustee may follow a direction of the settlor that is contrary to the terms of the trust. To the extent a trust is revocable by a settlor in conjunction with a person other than a trustee or person holding an adverse interest, the trustee may follow a direction from the settlor and the other person holding the power to revoke even if the direction is contrary to the terms of the trust.
>
> (b) To the extent a trust is revocable [and the settlor has capacity to revoke the trust],[105] rights of the beneficiaries are subject to the control of, and the duties of the trustee are owed exclusively to, the settlor.
>
> (c) During the period the power may be exercised, the holder of a power of withdrawal has the rights of a settlor of a revocable trust under this section to the extent of the property subject to the power.

A USA revocable trust of this kind is not a trust in the standard IT/CGT sense, as the property is not held "in trust". The trust is illusory.[106] This may seem paradoxical, but only if one forgets that "trust" in a foreign law may not have the same meaning as it has in a UK statute.[107] The US revocable trust may appear at first sight to grant rights to beneficiaries, but during the lifetime of the settlor (or at least while the settlor has mental capacity) the rights are unenforceable and under UK law do not amount to "rights" at all.

If the settlor is not the sole trustee, there is a trust; but if (in the words of the Uniform Trust Code) "the duties of the trustee are owed exclusively to the settlor" then the US revocable trust is a bare trust for UK tax purposes.

(1) For IT/CGT, the settlor is absolutely entitled as against the trustee.

(2) The trust is not an IHT-settlement, since:

  (a) The property is not held in trust for persons in succession.

  (b) The USA revocable trust is not equivalent to a trust for persons in succession. The element of succession is that of a will.

  (c) The USA revocable trust is not equivalent to a trust with power to make payments out of that income at the discretion of the trustees or some other person.

trust. It is sometimes possible to obtain legal advice that local law is the same as the UTC on the relevant point.

[105] Square brackets in original, as the wording is optional.

[106] See 87.11 (Illusory trust).

[107] See 90.4.1 (English language terminology); 90.4.3 (Entity documentation).

In short, a USA revocable trust of this kind is classified in UK tax law as a bare trust and a testamentary disposition.[108]

This view is supported by *Re the AQ Revocable Trust*.[109] Here a Bermuda law trust deed, drafted in US grantor trust form, executed by a Bermuda domiciled settlor, was held to be illusory and testamentary, and invalid (it originally took effect as a valid will, but was revoked by a subsequent marriage). Had the settlor been US domiciled, the trust would (I expect) not have been revoked by the subsequent marriage, and so would have taken effect on death as a testamentary disposition, recognised in English law; but it would not have constituted a substantive trust for UK tax purposes during the settlor's lifetime.

Depending on the drafting, a USA revocable trust of this kind may cease to be a bare trust, and become a settlement (for IHT and IT/CGT) if the settlor loses mental capacity. This could of course have significant UK tax consequences.

One could if desired draft a trust which meets the USA requirements to be a grantor trust and which is a settlement for IT/CGT and IHT purposes. It would need to be one where (during the lifetime of the settlor) the trustees owed duties to beneficiaries other than just the settlor.

It is understood that as at Dec 2020, HMRC were planning to take a case on the s.603 issue "in the near future (2 years)" and were unwilling to give rulings or indeed any comment to their customers, in the meantime. Perhaps, given the lapse of time, that case has settled. I would be grateful to any reader who knows the current position.

90.11 *Garland* trusts

The distinctive feature of *Garland* trusts (unlike English law trusts) is that beneficiaries have no interest in the trust property. Their right is *in personam* (against the trustees) not *in rem* (against the property). In other respects *Garland* trusts are like English trusts. A *Garland* trust is in principle a settlement within the standard IT/CGT and IHT definitions.

The approach of the tax code is to make some statutory provision in relation to Scotland, and otherwise to ignore the problems.

For the income taxation of *Garland* trusts, and the trust law background,

[108] See 87.7 (Bare trust/nomineeship). Underhill & Hayton agree at para 104.159 (Changing the governing law): *Law of Trusts & Trustees* (20th ed., 2022).

[109] See 87.11 (Illusory trusts).

see 42.9 (Life tenant: Source of Income); 42.11.3 (Garland trusts); 42.12 (Baker or Garland trust?). This section considers IHT and CGT.

90.11.1 *IIP in Garland trust*

The question arises whether a beneficiary of a *Garland* trust should be regarded as having an interest in possession in settled property. (This question does not often matter for IHT for trusts made after 2006.)

"Interest in possession" is a concept of English trust law which has no equivalent in Scots trust law, and maybe in other trust laws. But that does not prevent a beneficiary under a foreign law trust from having an interest which is an IIP within the meaning of a UK tax statute. A beneficiary under a Garland trust has an "interest" and if that interest gives an entitlement to income, it is an interest "in possession".

However under a *Garland* trust, a beneficiary does not have an interest *in settled property*. The beneficiary does not have an interest in trust property at all.

In relation to Scots law trusts, the IHT problem is resolved by statute. Section 46 IHTA provides:

> In the application of this Act to Scotland,
> [1] any reference to an interest in possession in settled property is
> [a] a reference to an interest of any kind under a settlement by virtue of which
> [i] the person in right of that interest is entitled to the enjoyment of the property or
> [ii] would be so entitled if the property were capable of enjoyment,
> [b] including an interest of an assignee under an assignation of an interest of any kind (other than a reversionary interest) in property subject to a proper liferent;
> [2] and the person in right of such an interest at any time shall be deemed to be entitled to a corresponding interest in the whole or any part of the property comprised in the settlement.

There is no equivalent provision for CGT (except for Scots proper liferents, which are not trusts). HMRC practice is to treat life tenants in *Garland* trusts as if they had an interest in possession in the settled property. The CG Manual provides:

> **CG31301 Scottish proper liferents** [Jul 2019]
> ... There are two ways in which a liferent [roughly, life interest] can be

> set up. In the first case, where the interest is known as an improper liferent, the property is vested in trustees who administer the property and pay the income to the liferenter. In general the trustees have the power to sell the property in question and replace it by other property, whether land and buildings or other assets.

An improper liferent is clearly a trust. HMRC continue:

> On the death of the liferenter the provisions of s.72, s.73 and s.74 TCGA apply as appropriate.

A court applying a purposive approach may well reject as too subtle a distinction between an interest in settled property and an interest under a settlement which is not an interest in settled property. Since this will usually suit taxpayers, it will not often be challenged.

90.11.2 *Reversionary interest: Garland trust*

Section 47 IHTA provides:

> In this Act "reversionary interest" means a future interest under a settlement, whether it is vested or contingent (including an interest expectant on the termination of an interest in possession which, by virtue of section 50 below, is treated as subsisting in part of any property)...

A beneficiary of a *Garland* trust may have a reversionary interest, within this definition, as although it is not strictly an interest in settled property, it is an interest under a settlement.

90.11.3 *Garland trust: SDLT*

Para 2 sch 16 FA 2003 addresses the issue for SDLT:

> Where property is held in trust under the law of Scotland, or of a country or territory outside the UK, on terms such that, if the trust had effect under the law of England and Wales, a beneficiary would be regarded as having an equitable interest in the trust property—
>
> (a) that beneficiary shall be treated for the purposes of this Part as having such an interest notwithstanding that no such interest is recognised by the law of Scotland or, as the case may be, the country or territory outside the UK, and
>
> (b) an acquisition of the interest of a beneficiary under the trust shall accordingly be treated as involving the acquisition of an interest in the trust property.

90.12 Liechtenstein: Introduction

Liechtenstein has 4 types of entity that may be used in wealth-holding arrangements:

Entity	Translation	See para
Stiftung	Foundation	90.14
Anstalt	Establishment	90.15
Treuunternehmen	Trust Enterprise	90.16
Treuhandschaft	Trust	90.17

I consider these separately, but here make some comments which apply to all these entities.

The law is in the Liechtenstein *Personen- und Gesellschaftsrecht*.[110]

Liechtenstein publishes English translations.[111] However these do not have official status, and are not updated with PGR amendments. The style of translation is very literal. I have not followed them exactly in my translations below.

HMRC expressed their views in the Liechtenstein disclosure facility.[112]

[110] *https://www.llv.li/files/rdr/pdf-llv-rdr-Gesamtdokument.pdf* (German).

[111] *http://www.icnl.org/research/library/files/Liechtenstein/liechcomp.pdf* (English)
Note that the following translations are not up to date:
Spitz & Clarke, Offshore Tax Service (looseleaf)
Glasson, "International Trust Laws" (looseleaf)

[112] See the Second Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters (2010)
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/387491/Second_joint_declaration_Memorandum_of_Understanding.pdf
The Second Joint Declaration replaced the First Joint Declaration (2009) but there are no significant changes in the passages quoted here, apart from strengthening the disclaimer. See
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/387490/Joint_decleration_Memorandum_of_Understanding.pdf
The Second Joint Declaration is subject to this disclaimer and qualification:

> "The Government of the Principality of Liechtenstein and HMRC have considered and agreed the following guidance on characterisation, recognition and treatment of certain legal entities and fiduciary relationships to assist taxpayers and financial intermediaries in meeting their obligations for the purposes of the MOU. This guidance is based on Liechtenstein and UK laws as of 1 January 2010. The parties may review and revise this guidance to reflect relevant changes in those laws in the future. Where a person has an interest in

Foundations are found in many jurisdictions, but Anstalt and Trust Enterprise are unique to Liechtenstein.

In the USA, a Foundation is classified as a trust for tax purposes, and an Anstalt and Trust Enterprise are classified as a company.[113] However the USA has express entity classification rules, which are different from UK tax law, so the USA material has no relevance in the UK.

90.13 Beneficiary rights

It has been argued that beneficiaries of a Foundation, in standard form,[114] have no enforceable rights; and likewise for other Liechtenstein entities. If correct, that would have certain UK tax advantages. (There would of course be a non-tax disadvantage that there would be nothing beneficiaries could do if the Foundation board decided to keep the trust fund for themselves or their friends). But the proposition seems absurd. What would be the point of any Foundation law if it conferred no enforceable rights?

For Liechtenstein, Art 2 PGR provides an answer:

Jedermann hat in der Ausübung seiner Rechte und in der Erfüllung seiner Pflichten nach Treu und Glauben zu handeln.	A person must act in good faith when exercising their rights or performing their duties.

> a type of entity that is not specified below, they must provide complete information about the entity to HMRC to enable a view to be given.
>
> For avoidance of doubt, nothing contained in this appendix is to affect the ability of affected persons to rely on UK law or practice permitting alternative characterisation, recognition and treatment. The parties further recognise that the ultimate UK taxation consequences for UK taxpayers will depend on the particular facts relating to specific entities or fiduciary relationships.
>
> Nothing in this appendix affects how those entities or relationships are treated for any purposes outside the MOU."

(The first Joint Declaration contained a similar disclaimer, but without the last sentence).

[113] IRS Memorandum AM2009-012, 2009, (Entity Classification of Liechtenstein Anstalts and Stiftungs) *http://www.irs.gov/pub/irs-utl/am2009012.pdf*
Michaels "US tax treatment of the Liechtenstein trust enterprise (Trust Reg.)" [2010] Trusts & Trustees 405.

[114] Beneficiaries' rights depend on the constitution of the entity, and no doubt express wording could confer rights, or confer them more clearly. But entities in more common form do not take this course, apart from those with Founder's Rights.

Likewise art 182 PGR:

b) Befugnisse und Pflichten aa) Im Allgemeinen	Powers and duties: General
1) Die Verwaltung hat alle Befugnisse und Pflichten, die nicht einem anderen Organ übertragen oder vorbehalten sind ... Sie hat insbesondere auch für die Erhaltung des Grundkapitals sowie für die Sicherstellung und den Erfolg des Unternehmens im Rahmen ihrer gesetzlichen Pflichten und der dargebotenen Möglichkeiten besorgt zu sein.	The Board [entity administrators] shall have all the powers and duties not transferred to or reserved for another body ... In particular, the Board are responsible for the preservation of Entity capital, and, in the context of their statutory duties and investment opportunities, with the safety and success of the undertaking.
2) Sie hat das Unternehmen der Verbandsperson mit Sorgfalt zu leiten und zu fördern und haftet für die Beobachtung der Grundsätze einer sorgfältigen Geschäftsführung und Vertretung. Ein Mitglied der Verwaltung handelt im Einklang mit diesen Grundsätzen, wenn es sich bei seiner unternehmerischen Entscheidung nicht von sachfremden Interessen leiten liess und vernünftigerweise annehmen durfte, auf der Grundlage angemessener Information zum Wohle der Verbandsperson zu handeln....	The Board shall promote the entity's undertaking with due care and shall observe the principles of prudent business management and agency. A member of the Board acts in accordance with these principles if it does not take into account extraneous interests, acts in the interest of the entity prudently, and is properly informed...
4) Die Verwaltung ist der Verbandsperson gegenüber verpflichtet, alle Beschränkungen einzuhalten, die durch Gesetz, Statuten, Beschluss des zuständigen Organes oder in anderer Weise festgesetzt sind.	The Board is responsible to the entity to observe all restrictions laid down by law, articles, resolutions of the competent body, or in any other manner.
5) Soweit es nicht anders bestimmt ist, kommen der Verwaltung einer Verbandsperson die gleichen Befugnisse und Pflichten zu, wie der Verwaltung bei eingetragenen Genossenschaften.	Subject to any provision to the contrary, the Board of an Entity has the same powers and responsibilities as the Board of a registered Association.

Biedermann explains:

Since, in most cases, the Liechtenstein foundation has legal personality,

> it is subject to the general provisions concerning legal persons and it has a corporate structure with a board of foundation. The *in rem* aspect of the beneficial rights under trusts, i.e. non-reachability of trust property by creditors of the trustee, is not necessary for foundations, since the foundation has its own personality. The beneficial rights under a foundation may be less strong, because there is no specific tracing possibility *vis-à-vis mala fide* purchasers and volunteers. However, this deficiency is overcome by the public faith principle, since anyone dealing with a foundation has to look at the objects and competence clause of a foundation in order to know whether a board of foundation is entitled to *e.g.* sell some specific foundation property.[115]

Similar points arise for other Liechtenstein entities: Trust Enterprise and Anstalt.

Similar points arise for Foundation laws in other jurisdictions. For instance, in Jersey, art 25(1) Foundations (Jersey) Law 2009 provides:

> A beneficiary under a foundation –
> (a) has no interest in the foundation's assets; and
> (b) is not owed by the foundation or by a person appointed under the regulations of the foundation a duty that is or is analogous to a fiduciary duty.[116]

Art 22 Foundations (Jersey) Law is the equivalent of art 182 PGR:

> (1) The members of the council of a foundation must conduct the

[115] Biedermann, "Foundations vs Trusts" [1993] PCB 283. The 2008 amendment to the law of Foundations does not affect art 2 PGR.

[116] A different rule applies when a beneficiary becomes entitled to a benefit. Art 25(2) Foundations (Jersey) Law provides: "However, if –
(a) a beneficiary under a foundation becomes entitled to a benefit under the foundation in accordance with the charter or the regulations of the foundation; and
(b) the benefit is not provided,
the beneficiary may seek an order of the Royal Court ordering the foundation to provide the benefit.
(3) Except as provided by paragraph (4), the beneficiary must seek the order within the period of 3 years from the time when the beneficiary became aware of his or her entitlement to the benefit.
(4) If the beneficiary has not attained the age of 18 years when he or she became aware of his or her entitlement to the benefit, the period referred to paragraph (3) begins to run on the day on which the beneficiary attains that age."
But it seems doubtful if that applies to a merely discretionary beneficiary.

foundation's affairs in accordance with its charter and regulations and this Law.

(2) The members of the council of a foundation must –

(a) act honestly and in good faith with a view to the best interests of the foundation; and

(b) exercise the care, diligence and skill that reasonably prudent persons would exercise in comparable circumstances.

The misconception may be due to ambiguity in the expression "no enforceable rights", compounded by problems of translation between civil law/common law jurisdictions. A discretionary beneficiary of a Foundation, Trust Enterprise or Anstalt may have no interest in the entity's property. But that is also broadly true of a beneficiary of a discretionary trust and under a *Garland* trust. It is also true of a shareholder in a company. That does not entail that they have no enforceable rights of any kind. In the event of a breach by a governing body, the remedy may be to petition the Court to replace the Board/Council members.[117]

90.13.1 *Founder's Rights*

The content of founder's rights strictly depends on the constitution of the entity.[118] But founder's rights typically confer power to decide distributions (to the founder or to others); and the entity has no duties to anyone other

[117] Thus the Australian and the Canadian analyses of a Foundation proceed on the basis that beneficiaries do have rights: see 90.14.5 (Australian law views); 90.14.8 (Canadian law views).

[118] For instance, art 18 Foundations (Jersey) Law 2009 provides:

(1) A founder of a foundation has such rights (if any) in respect of the foundation and its assets as are provided for in its charter and regulations.

(2) Any rights a founder of a foundation may have in respect of the foundation and its assets may be assigned to some other person if the charter or regulations of the foundation so provide.

(3) Where –

(a) a founder of a foundation has rights in respect of the foundation and its assets; or

(b) a person has been assigned any rights of a founder in respect of a foundation and its assets,

and the founder or person, as the case may be –

(c) dies; or

(d) in the case of a founder or a person that is not an individual, ceases to exist,

those rights vest in the guardian of the foundation unless its charter or regulations provide otherwise.

than the founder. I use the term Founder's Rights (with initial capitals) in that sense.[119]

An entity with Founder's Rights cannot be a settlement (under the IT/CGT and IHT definitions) because the only person who has any rights in relation to the entity is the founder.[120] An entity with Founder's Rights cannot be a settlement-arrangement, as there is no bounty. In these circumstances a Foundation and an Anstalt[121] should be classified as a company.[122]

If that is right, then termination of Founder's Rights (by an alteration of the constitution or by death of the founder) change the characterisation from company to trust. But there is no reason why that should not be so. It does not involve a disposal for CGT purposes, as the entity continues in existence: only its characterisation has changed.[123] But it may constitute an alteration in share capital for the IHT close-company code.[124]

90.14 Stiftung/Foundation

I here consider categorisation issues (ie, is a foundation a trust or a company?); for other aspects of foundations see:

Topic	**See para**
s.87 TCGA/Who are foundation trustees	61.3.3
s.3 TCGA	64.36
Trust registration	131.19.5

The classic Foundation jurisdictions are Liechtenstein, Austria and Panama. The latter two are based on the Liechtenstein model.

The Foundation is a civil law entity with a long history. The *Code Napoléon* 1804 abolished Foundations, as institutions intended to perpetuate wealth in the aristocracy. So jurisdictions which adopted that

[119] The Liechtenstein disclosure facility uses the term in this sense: "For avoidance of doubt, in case of an establishment with founder's rights as used above, the founder (settlor) with founder's rights has full powers to decide upon who the beneficiaries are and to change the beneficiaries, and such powers are transferable."
For the meaning of "Founder" see 90.14.3 (Definition of Founder). But the identity of the Founder does not matter for the purposes of categorisation.

[120] See 90.10 (US grantor trust).

[121] See 90.15 (Anstalt/Establishment).

[122] Founder's Rights are similar to shares. Unless the documentation otherwise provides, Founder's Rights can be assigned by a lifetime disposition or by will.

[123] See too 90.58 (Change of entity type).

[124] See 81.7 (Change in share capital/rights).

Code rejected Foundations, but some subsequently restored them. Foundations are now established by statute in most tax havens. Modern English language Foundation laws follow the civil law model: their purpose is to constitute an entity which civil lawyers will recognise and understand, for use in civil law jurisdictions which recognise Foundations but are not familiar with trusts.

While Foundation jurisdictions differ, I am not aware of differences which significantly affect UK tax categorisation issues, though that is possible. Foundations also differ in their drafting of their constitutions. But (apart from the special case of Founder's Rights), I am not aware of drafting points which should significantly affect UK tax categorisation issues, though that too is possible.

For the Foundation law background, see Panico, *Private Foundations Law and Practice* (1st ed, 2014).

90.14.1 *Foundation terminology*

The German term Stiftung is conventionally translated as "foundation". I expect that is because the French/Latin equivalents are foundation/ fundatio. The English word does not itself convey any information about the entity. If anything, it could be misleading. In the UK, the word "foundation" is used to refer to a nonprofit organisation,[125] and is most commonly found as a name for a charity (eg the British Heart Foundation). In the USA, "private foundation" is a technical term used to describe a specific category of charities and NPOs, in short, those which receive their funds from one person and which are regarded as donor-controlled.[126] These native English meanings of foundation are not relevant here.

I call it a Foundation, with an initial capital to reflect the technical nature of the word.

90.14.2 *Definitions of Foundation*

Gretton says:

[125] See Companies House Guidance, "Sensitive words and expressions specified in regulations that require the prior approval of the Secretary of State to use in a company or business name" *https://www.gov.uk/government/publications/incorporation-and-names/annex-a-sensitive-words-and-expressions-or-words-that-could-imply-a-connection-with-government*

[126] See US Internal Revenue Code § 509 (Private foundation defined).

> Eventually the civil law tradition came to recognise two sorts of juristic person: the *universitas personarum*, the corporation, and the *universitas rerum*, the foundation. (The common law tradition has not gone down this road, recognising only corporations.)[127]
> A foundation is a juristic person which is not a corporation. It has no members. It is an autonomous patrimony dedicated to a purpose - a *Zweckvermögen.* Some writers regarded the *Zweckvermögen* as having no owner at all. Others described it as owning itself. Others argued that it was "owned" by the "purpose" itself. Others again argued that notionally one could distinguish the juristic person (though memberless) from the estate which was owned: this latter is the dominant conception.[128]

Liechtenstein Foundations are governed by Part 5 PGR.[129] The law was revised in 2008, with effect from 1 April 2009.

Art 552(1) PGR provides a definition:

I. Begriff und Zweck 1. Umschreibung und Abgrenzung 1) Eine Stiftung im Sinne dieses Abschnittes ist ein rechtlich und wirtschaftlich verselbständigtes Zweckvermögen, welches als Verbandsperson (juristische Person) durch die einseitige Willenserklärung des Stifters errichtet wird.	**Concept and purpose** Description and definition A Foundation within the meaning of this Part is a legally and economically independent purpose fund [sometimes translated: dedicated patrimony] which is formed as a legal entity (legal person)[130] by a unilateral declaration of the founder.
Der Stifter widmet das bestimmt bezeichnete Stiftungsvermögen und legt den unmittelbar nach aussen gerichteten, bestimmt bezeichneten Stiftungszweck sowie Begünstigte fest.	The founder provides the specifically designated Foundation assets, specifies the purpose of the Foundation, entirely non-self-serving and specifically designated, and also specifies the beneficiaries.

[127] Author's footnote: I wonder if this is an over-generalisation. Where would a Scots partnership fit into this scheme?

[128] Gretton "Trusts Without Equity" (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5; footnotes omitted.

[129] See 90.12 (Liechtenstein: Introduction).

[130] A Foundation is a legal person, unlike a Trust Enterprise, which may be formed with or without legal personality.

2) Eine Stiftung darf ein nach kaufmännischer Art geführtes Gewerbe nur dann ausüben, wenn es der Erreichung ihres gemeinnützigen Zwecks unmittelbar dient oder aufgrund einer spezialgesetzlichen Grundlage zulässig ist. Soweit es die ordnungsgemässe Anlage und Verwaltung des Stiftungsvermögens erfordert, ist die Einrichtung eines kaufmännischen Betriebes auch bei privatnützigen Stiftungen zulässig.

A Foundation is only permitted to carry on a business activity if that is directly in furtherance of its charitable object or is expressly permitted by statute. So far the orderly investment and management of the Foundation assets require, a business activity is also permissible for private Foundations.

This may be compared to the definition in Austria. Article 1 Privatstiftungsgesetz 1993[131] provides the definition:

(1) Die Privatstiftung im Sinn dieses Bundesgesetzes ist ein Rechtsträger, dem vom Stifter ein Vermögen gewidmet ist, um durch dessen Nutzung, Verwaltung und Verwertung der Erfüllung eines erlaubten, vom Stifter bestimmten Zwecks zu dienen; sie genießt Rechtspersönlichkeit und muß ihren Sitz im Inland haben.

A private Foundation within the meaning of this law is a legal person, whose property is provided by the settlor, for its use, management and investment, for the purpose specified by the settlor; it possesses legal personality and must have its management [Seat] in Austria.

(2) Eine Privatstiftung darf nicht
1. eine gewerbsmäßige Tätigkeit, die über eine bloße Nebentätigkeit hinausgeht, ausüben;
2. die Geschäftsführung einer Handelsgesellschaft übernehmen;
3.unbeschränkt haftender Gesellschafter einer eingetragenen Personengesellschaft sein.

A private Foundation must not
1. carry on a commercial activity that is more than merely ancillary;
2. conduct the management of a trading company;
3. be a general partner of a registered partnership.

[131] *https://www.jusline.at/gesetz/psg*

90.14.3 *Definition of Founder*

Art 552(4) PGR provides:

1) Stifter können eine oder mehrere natürliche oder juristische Personen sein. Eine durch letztwillige Verfügung errichtete Stiftung kann nur einen Stifter haben.	Founders may be one or more natural persons or legal entities. A foundation established by testamentary disposition can only have one founder.
2) Hat eine Stiftung mehrere Stifter, so können die dem Stifter zustehenden oder vorbehaltenen Rechte nur von allen Stiftern gemeinsam ausgeübt werden, es sei denn, die Stiftungserklärung sieht etwas anderes vor. Fällt einer der Stifter weg, so erlöschen im Zweifel die vorgenannten Rechte.	If a foundation has several founders, the rights to which the founder is entitled or which are reserved to the founder may only be exercised jointly by all the founders, unless the foundation declaration provides otherwise. If one of the founders dies, then in case of doubt the aforementioned rights expire.
3) Wird die Stiftung durch einen indirekten Stellvertreter errichtet, so gilt der Geschäftsherr (Machtgeber) als Stifter. Handelt auch dieser als indirekter Stellvertreter für einen Dritten, so gilt dessen Geschäftsherr (Machtgeber) als Stifter. In jedem Fall ist der indirekte Stellvertreter verpflichtet, dem Stiftungsrat die Person des Stifters bekannt zu geben.	If the foundation is formed by an indirect representative, the principal (authoriser) shall be deemed to be the founder. If this person also acts as an indirect representative for a third party, then his principal (authoriser) is deemed to be the founder. In either case, the indirect representative must notify to the Foundation board the name of the founder.

90.14.4 *Foundation: IT/CGT trust*

A Foundation might be classified in one of three ways:
(1) A trust in the standard IT/CGT sense;[132] or
(2) A company in the standard tax sense;[133] or
(3) A legal person, but neither a trust nor a company in those senses

This work up to the 2018/19 edition took the view that property of a

[132] See 87.3 (Settlement: Standard IT/CGT definition).

[133] See 90.8 (Definition of "company")

Foundation was not held "in trust", and so a Foundation was not a trust in the standard IT/CGT sense. Instead it was a company:

> A characteristic of a trust is that "the assets constitute a separate fund and are not a part of the trustee's own estate".[134] A Foundation does not have this characteristic: A Foundation holds property, but there is only one fund, not a fund separate from the Foundation's own assets (as would be the case for a trustee). So it is not an IT/CGT settlement.
>
> There are of course other significant differences between a Foundation and a trust, in particular the beneficiaries of a Foundation have different and perhaps weaker rights. But the failure to meet what the Hague convention on the law applicable to trusts identifies as a defining characteristic is the most significant point.
>
> A Foundation is a body corporate. It is therefore a company for UK tax purposes. A Foundation is therefore subject to UK corporation tax on its income and gains if it is UK resident and in principle subject to income tax on UK source income at the basic rate if non-resident. The test of residence is the company test of central management and control.

But on further reflection I am inclined to think, with HMRC, that

(1) A Foundation is a trust within the standard IT/CGT definition, and
(2) A Foundation is not a company in the standard tax sense

The reasons are as follows:

(1) A Foundation is a trust in the standard IT/CGT sense because:
   (a) It must benefit others, not itself ("unmittelbar nach aussen gerichteten ... Stiftungszweck").
   (b) In applying statutory words (here, "Settled property" means any property held in trust ...") to a foreign law entity, a certain amount

[134] Footnote original: See Article 2 Hague Convention on the Law applicable to Trusts and on their Recognition. See too Hayton "Principles of European Trust Law" p.23 in *Modern International Developments in Trust Law* (1999) ed. Hayton: "While many mainland European jurisdictions have the functional equivalent of a charitable purpose trust in the guise of a foundation which has legal personality, we deliberately rejected extending our [conception of] trust to cover such functions. It is because a trust is not a company, not a corporate person, but a segregated fund owned by trustees, that different rules from those for companies developed for trusts."
It is hard to make any comment about trusts without qualification. Assets of a charitable trustee incorporated under s.251 Charities Act 2011 might not constitute a separate fund. But that is an anomalous and unusual case and perhaps itself not a "trust" in the ordinary sense.

> of flexibility is appropriate. Applying the entity-resemblance test, a Foundation is more like a trust than a company.

This is consistent with practice in Australia, which is well-reasoned.

The argument to the contrary was that:

(1) A foundation is a body corporate.

(2) Company (in the standard tax sense) is defined to include a body corporate; indeed body corporate is synonymous with company, in the general sense.

But it is suggested that a foundation is not a body corporate, or at least not in the relevant sense. The term "body corporate" assumes, or requires, that one or more persons have come together in the form of a single, distinct legal person.[135] Who is the "body", in the absence of shareholders or members? It can hardly be the Board of the Foundation. Gretton in the passage cited above states that a Foundation "is not a corporation".

Different legal systems describe Foundations in different ways. In Guernsey, "Foundations have legal personality but are not bodies corporate";[136] that adopts the view taken here.

On the other hand, Art 30 Foundations (Jersey) Law 2009 provides:

> **30 Corporate status**
> (1) A foundation is an incorporated body with the name specified in respect of it in the register.
> (2) ... a foundation, acting through its council, is capable of exercising all the functions of a body corporate.

It might be that Jersey Foundations should be classified differently from other Foundations. But it is suggested that even a Jersey Foundation is not a body corporate for UK tax law purposes, on the basis that it should be taken to follow the civil law model.[137]

[135] See 90.9.3 (What is a body corporate?).

[136] See States of Guernsey, "Consultation on the potential enactment of LLC legislation in Guernsey" p.8 (2019)
https://www.weareguernsey.com/media/6971/llc-consultation-report.pdf

[137] For completeness I should mention a sentence in the OECD Commentary. This is a comment on Art 3(1) OECD Model which provides:

> "a) the term "person" includes an individual, a company and any other body of persons;
> b) the term "company" means any body corporate or any entity that is treated as a body corporate for tax purposes"

The OECD Commentary on art 3, para 2, provides:

A Foundation does have legal personality but what that entails must be understood in the context of the applicable law's concept of legal personality, not English law.[138] It does not follow from foreign law legal personality that a Foundation is a body corporate in the UK law sense.[139]

Even if (contrary to the above) a Foundation is a body corporate, it does not matter because:

(1) It is a trustee, and so (except where the context otherwise requires), it is treated as a distinct notional person which is not a body corporate[140] or

(2) Context shows that it is not intended to be within the definition of company.

If (contrary to all the above) a Foundation is not a trust in the standard IT/CGT sense, it would *still* not be a company in the standard tax sense. If not a trust, a Foundation should be regarded as a legal person other than a company in the standard tax sense.

A Foundation is a settlement-arrangement[141] so it is a "settlement" for the purposes of s.87 TCGA.[142]

90.14.5 *Australian law view*

The Australian Taxation Office categorise a Liechtenstein Foundation as a trust, for the purposes of Australian tax law.

> "... the term 'person' includes any entity that, although not incorporated, is treated as a body corporate for tax purposes. Thus, e.g. a foundation (fondation, Stiftung) may fall within the meaning of the term 'person'."

This suggests that a Foundation is a person (as defined in the Model treaty) because (1) a Foundation is not incorporated and (2) it is treated as a body corporate for tax purposes. The proposition at (1) supports the view taken here. But I would not put much weight on such a short and unconsidered comment. The OECD reasoning rests on generalisations about foundations. Its analysis may be correct in some legal systems, but in others (1) a Foundation may be incorporated or (2) it may not be treated as a body corporate for tax purposes. I would say that a Foundation is a person in the general sense, so it is not necessary to rely on the Commentary's reasoning to support the conclusion that a Foundation is a person.

For these reasons, it seems to me that the comment in the Commentary does not shed any light on the question of how a Foundation should be classified in UK law.

[138] See App.2.7.2 (Legal person: Foreign law).

[139] See 90.9.3 (What is a body corporate?)

[140] See 7.3 (Trustees a distinct person).

[141] Assuming (as will generally be the case) that the bounty requirement is met.

[142] See 61.2 ("Settlement"/"settled property").

Status of a Liechtenstein Foundation
Question 1: Is the X Foundation, a Liechtenstein foundation, a trust estate for the purposes of Division 6 of Part III of the [Australia] Income Tax Assessment Act 1936 (ITAA 1936)?
Answer: Yes ...
Relevant facts:
The X Foundation
The X Foundation is a Liechtenstein foundation known as a Stiftung...

The ruling sets out a detailed description of the Foundation; but it is sufficient here to note that the Foundation was in common form, and did not confer Founder's Rights.

Reasons for decision:
... ***Nature of the foundation***
The Liechtenstein foundation is similar to a corporation in that it can enter into contracts, sue, be sued and hold bank accounts, in its own name. However, unlike the corporation, the foundation itself has no members or shareholders. Similarly, the founder has no ownership rights to the independent assets. The foundation has beneficiaries but they are not owners of the foundation.
The foundation above all constitutes a relationship of trust between persons. In practice, the founder authorises the foundation board to administer his personal assets, or a part thereof, in the interest of one or more beneficiaries.

90.14.6 *Trust concept in Australia*

The ATO statement continues:

... 'Trust estate' is not defined in the ITAA 1936 or the Income Tax Assessment Act 1997 (ITAA 1997) as no definition of a trust seems to have been accepted as comprehensive and exact. French J in *Harmer v FCT* (1989) 20 ATR 1461; 89 ATC 5180 (*Harmer Case*) stated that a trust is notably 'a definition of a relationship by reference to obligations'. As to what constitutes a 'trust relationship' should therefore be determined in accordance with guidance provided by the Courts.
The 7th edition of Jacobs' *Law of Trusts in Australia* (Chapter I paragraph 103)[143] defines a trust relationship as:

> '...the whole relationship which arises between the parties in respect of the property the subject of the trust, and the obligation of the trustee to the beneficiary, and the interest of the beneficiary in the property may be regarded as results flowing from the existence of that relationship.'

Following from the above definition, the four essential elements of a 'trust relationship' are identified in paragraph 104, Chapter I, of the previously stated edition of Jacobs' *Law of Trusts in Australia*. Those essential elements were quoted with approval in the *Harmer Case* at 89 ATC 5187, as follows:

[143] Paragraph 1-03, in the 8th edition (2016). The passage quoted is unchanged in the current edition.

- The existence of a trustee who holds a legal or equitable interest in the trust property,
- The existence of trust property which must be property capable of being held on trust and which includes a chose in action,
- The existence of one or more beneficiaries other than the trustee, and
- A personal obligation on the trustee to deal with the trust property for the benefit of the beneficiaries

[The ruling refers to ATO Interpretative decision ATO ID 2008/2 which concludes that a Dutch Stichting is a 'trust', and ATO ID 2008/62 which concludes that as the Stichting is created under Netherlands law and has a legal personality under Netherlands law, it should be recognised as a legal entity in Australia; see 90.40 (Dutch stichting/ Foundation).]

In regards to the creation of a 'trust' and the role of a trustee', the majority of the High Court in *The Registrar of the Accident Compensation Tribunal (Vic) v FCT* 93 ATC 4835 at 4842 clarified that:

> 'A trust may be created without use of the word "trust". And, unless there is something in the circumstances of the case to indicate otherwise, a person who has "the custody and administration of property on behalf of others" or who "has received, as and for the beneficial property of another, something which he is to hold, apply or account for specifically for this benefit" is a trustee in the ordinary sense.'

On the concept of a trust there is no difference between Australian and English law.

90.14.7 *Categorisation of Foundation*

The ATO statement continues:

The X Foundation has been established consistent with Article 552 §§ 1-41 of the PGR as a separate legal entity intended to serve private or personal purposes in accordance with its declaration of establishment.

The By-Laws of the X Foundation provide that it was formed by the trustee company, acting as the Founder. For the purposes of the PGR, the trustee company has the role of an indirect representative giving effect to the declared wishes of Mr. Y as the principal (authoriser). Mr. Y is therefore deemed to be the Founder of the X Foundation.

The underlying purpose of the Foundation, pursuant to the declaration establishment and the By-Laws, is to invest, manage and administer the foundation assets, in the nature of investment products for the support and/or benefit of all or any one or more of the beneficiaries of the Foundation.

The declaration of establishment and the By-Laws authorise the foundation board to determine the beneficiaries and make distributions of the foundation assets to designated beneficiaries in their entirety or in parts at any time and at the free discretion of the foundation board.

In summary, having regard to its declaration of establishment and By-Laws:

The X Foundation has legal ownership and possession of the foundation assets;

The foundation assets are capable of being held on trust;

The foundation board, in the role of a trustee, manages and administers the foundation assets for the benefit of beneficiaries of the Foundation;

The beneficiaries of the Foundation are expressly identified in the By-Laws; and

The terms of the declaration of establishment and the By-Laws impose on the foundation board, a personal obligation to deal with the foundation assets strictly for the benefit of the beneficiaries as the foundation board may in its absolute discretion think fit.

It is considered that, in respect of the X Foundation, all four essential elements identified in the *Harmer Case* as giving rise to a trust relationship exist between the Foundation, the foundation board and the persons entitled to benefits (the beneficiaries) from the foundation.

In *Mulherin v. CT* 2013 FCAFC 115 ('*the Mulherin Case*'), the Full Federal Court found that the AAT had correctly affirmed the Commissioner's decision to assess the taxpayer's income from a Liechtenstein Foundation established by the taxpayer. The premise of the assessments, as determined by the Commissioner and accepted by the taxpayer, was that the income represented the taxpayer's present entitlement in respect of a 'resident trust estate'.

In conclusion, based on the interpretation of the Liechtenstein Foundation Law and the views held by Australian Courts, it is considered that the X Foundation is a 'trust estate' for the purposes of Division 6 of Part III of the ITAA 1936 for the income years covered by this ruling.[144]

The same reasoning should apply in the UK.

A Guernsey consultation paper takes the same view:[145]

> Foundations have legal personality but are not bodies corporate.

90.14.8 *Canadian law view*

An Austrian Privatstiftung (non-charitable Foundation) has been categorised as a company, not a trust, for Canadian tax law:

> [39] ... the law of Austria does not recognize trusts as understood in Canadian law. However, it is evident that as a practical matter ... Herbert Sommerer may well have achieved many of the objectives that could have been achieved in a common law jurisdiction by settling a trust for Peter Sommerer, his spouse and their children. He did so by creating and endowing the Sommerer Private Foundation under the Austrian Private Foundations Act and naming Peter Sommerer, his spouse, and their children as beneficiaries and ultimate beneficiaries. But that does not mean as a matter of law that the creation and endowment of the Sommerer Private Foundation was the settlement of a trust...
>
> [40] As mentioned above, an Austrian private foundation is a juridical

[144] ATO "Status of a Liechtenstein Foundation" (2017) *https://www.ato.gov.au/law/view/view.htm?docid=EV/1051209890341&PiT=99991231235958*

[145] Consultation on the Potential Enactment of LLC Legislation in Guernsey (2021) para 5.2 *https://www.weareguernsey.com/media/6971/llc-consultation-report.pdf*

> person with the legal capacity to own property in its own right and to deal with its property on its own account. The legal right of an Austrian private foundation to deal with its own property is the same as the legal right of a Canadian corporation to deal with its own property. That is so despite the fact that the board of an Austrian private foundation must manage its affairs in furtherance of the purposes stipulated in its constating documents. The board of directors of a corporation is similarly constrained, in the sense that it must manage the affairs of the corporation in its best interests, subject to any terms and conditions in its constating documents.
>
> [41] A corporation does not hold its property in trust for its shareholders or members, except to the extent that a trust deed or an analogous legal instrument imposes the legal and equitable obligations of a trustee on the corporation with respect to specific corporate property. Assuming it is theoretically possible for an Austrian private foundation to hold its property in trust (that is, subject to conditions that are analogous to the legal and equitable obligations of a trustee in a common law jurisdiction), that possibility cannot be realized unless those conditions are formally established. Nothing in the constating documents of the Sommerer Private Foundation or the law of Austria ... supports the conclusion that the right of the Sommerer Private Foundation to deal with its property is constrained by any legal or equitable obligations analogous to those of a common law trustee.
>
> [42] Looking at the situation from another point of view, a shareholder or member of a corporation, as such, is not the beneficial owner of any property or the corporation, and has no legal or equitable claim to the corporate property ... a shareholder or member has only an inchoate right to receive distributions of corporate property from time to time at the discretion of the board of directors, and to share in the distribution of the corporate property upon its dissolution. The same can be said of the interest of a beneficiary or an ultimate beneficiary in the property of an Austrian private foundation. Nothing in the Austrian Private Foundations Act or the constating documents of the Sommerer Private Foundation gives Peter Sommerer a legal or equitable claim to the corporate property that is different from that of a shareholder or member of a corporation.
>
> [43] For these reasons, I doubt that the Sommerer Private Foundation holds any of its property in trust for Peter Sommerer.[146]

The Australian/Canadian positions could be reconciled on the basis that

[146] *Canada v Sommerer* [2012] FCA 207, 15 ITELR 426; *http://www.canlii.org*

Liechtenstein/Austrian Foundations are different,[147] so that one could be regarded as a trust and the other as a company. But Austrian Foundations are modelled on Liechtenstein.[148] The better analysis is to say that Australian/Canadian tax laws are different, so they can categorise the same entities in different ways.[149] If that is wrong, and they are incompatible, rival, analyses, it is considered that the Australian analysis is to be preferred in the UK.

90.14.9 *Foundation an IHT-settlement*

Foundation property is normally held for persons in succession or with power to make payments out of Foundation income.[150] The question then is (in short) whether a Foundation is a trust, or equivalent in effect to a trust.[151]

This raises a question as to the effect of a Foundation. For Liechtenstein, Lorenz says:

> It now appears that the Liechtenstein Supreme Court has used Liechtenstein trust law as a basis for the development of a coherent pattern of principles applicable to all types of Liechtenstein asset planning devices, in particular foundations and establishments, and not just the trust …
> … the internal design of foundations will increasingly come to resemble that of trusts, and that disputes relating to foundations will increasingly be resolved by applying principles of trust law.[152]

Biedermann says:

> Operationally speaking, there is no difference between a family foundation and a family trust.[153]

CRS guidance refers to Foundations as "functionally similar to trusts" and

[147] See 90.14.2 (Foundation definition).

[148] Panico, *Private Foundations Law and Practice* (1st ed, 2014) para 1.21.

[149] See 90.5 (Foreign law classification/treatment).

[150] See 87.6.3 (Limb (b): Income powers).

[151] See 87.6 (Definition of "IHT-settlement").

[152] *Disputes involving Trusts*, ed. Vogt, 1999, p.213.

[153] Biedermann, "Foundations vs Trusts" [1993] PCB 283. Noseda makes a similar point: "The Foundations (Jersey) Law 2009: A Civilian Perspective" [2010] The Jersey & Guernsey Law Review 48 at [13].

MLR describes a Foundation as "similar to a trust".[154]
The Liechtenstein disclosure facility[155] provides:

> a business activity is only allowed in the case of charitable foundations or private foundations where a respective law specifically permits it. In the case of family foundations, business activity ("*nach kaufmännischer Art geführtes Gewerbe*") is not permitted. Accordingly, while a foundation has its own legal personality, its essence and purpose, like those of a trust, is to preserve and maintain assets for the beneficiaries

Similarly in Ireland:

> Any entity which is similar in its effect to a discretionary trust (such as "foundations", the European equivalent of trusts) shall be treated as a discretionary trust irrespective of how it is described in the place where it is established.[156]

It is considered that a Foundation is an IHT-settlement on the basis that:
(1) it is a trust; or
(2) even if not a trust, it is at least equivalent to a trust[157]

This view is also supported by *Hansard*. Dr John Gilbert MP (then Financial Secretary to the Treasury) said:

> The words [para (e) of the IHT definition of settlement] are intended to widen the definition of a settlement so that it is capable of applying to entities such as family foundations which can be set up in some countries abroad. Although such an entity may enable property to be administered for the benefit of a family and produce the same practical effects as a

[154] See 130.27 (Controlling person: Foundation); 131.19.5 (Foundation/trust equivalent).

[155] See 90.12 (Liechtenstein: Introduction).

[156] Capital Acquisitions Tax Consolidation Act 2003: Notes for Guidance (2015) *https://www.revenue.ie/en/tax-professionals/documents/notes-for-guidance/cat/cat-act-guidance-notes-2015.pdf*

[157] This view has some support in *Hamilton v Hamilton* [2016] EWHC 1132 (Ch) at [20] ("... the assumption (which would have been hard to resist) that the establishment of [the Liechtenstein Foundation] created a settlement, within the very wide definition of that term in s.43(2) IHTA...").
The contrary argument would focus on the word "equivalent", and state that since there are undoubtedly some differences, the two are not equivalent. The statute is looking at the broad substance rather than absolute equivalence but where to draw the line is hard to tell. But if a Foundation *is* a trust the issue does not arise.

> settlement, it would fall outside the concept of a settlement as recognised by our law. This is why the words at the end of the definition are required.[158]

It has been argued that a Foundation cannot be an IHT-settlement because beneficiaries of the Foundation have no interest in Foundation property. But even if the premise is correct, the conclusion does not follow. Beneficiaries of a *Garland* trust have no interest in trust property. A charitable trust generally confers no rights on beneficiaries,[159] and a charitable trust is clearly an IHT-settlement. All that matters is that there is some legal mechanism which recognises their rights and prevents the board of a Foundation treating the Foundation property as their own.

It is considered that a charitable Foundation (as opposed to a private Foundation) is not an IHT-settlement. It is closer to a charitable company, and so should not regarded as equivalent in effect to a charitable trust.

90.14.10 *Founder's Rights: a company*

The position is different for a Foundation with Founder's Rights.[160] This cannot be a settlement or a settlement-arrangement. The choice is between a bare trust for the founder, and a company beneficially owned by the founder; a company seems the best analysis.

90.14.11 *HMRC view*

The Liechtenstein disclosure facility[161] provides:

> ... foundations ("Stiftungen") [are] to be characterised, recognised and

[158] Hansard, 17 February 1975 (Finance Bill, Standing Committee A) column 1736, referring at column 1737 specifically to Liechtenstein. John Pardoe MP concluded the debate with these words:

> "I suppose from now on [para [e] of the definition of IHT-settlement] will be called the Liechtenstein subparagraph in the history of constitutional law. I am not entirely satisfied that I know that the words mean anything important, or that the Financial Secretary knows that they mean anything important, but it is clear that the Revenue thinks that they mean something, so I suppose we had better leave it that way."

See *https://www.foreigndomiciliaries.co.uk/index.php/Documents_archive*

[159] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 12.5.1 ("Beneficiary" of charity).

[160] See 90.13.1 (Founder's Rights).

[161] See 90.12 (Liechtenstein: Introduction).

treated as trusts for UK tax purposes.[162]

The former TDSI Guidance Notes[163] provided:

> [1] ... Stiftungs are Liechtenstein business entities which are fiscally opaque. ...
> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor[164] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

Point [3] assumes that a Foundation can be transparent for IT which contradicts point [1].[165]

HMRC do not refer to statutory provisions but are clearly saying that in their view Foundations are trusts for all tax purposes.

It is true that HMRC recognise that there may be special circumstances, but in the absence of special circumstances, if it suits the Foundation to take the view that the Foundation is a trust for all tax purposes, including the IT/CGT definition, it can properly do so. That might be helpful, for instance, if the taxpayer wishes to argue that:

[162] The same point is made in the INT Manual:
INTM600380 Person abroad - examples [Jul 2023] "... Generally we treat ... a Stiftung like a discretionary trust."
Again, in the context of s.720 protected-trust relief, HMRC guidance states that "settlement" (here, the standard IT/CGT definition) includes "foreign entities that fall to be treated like trusts under the principle in *Memec plc v IRC* e.g. certain types of foundations"; See 92.13.2 (Condition (b): Settlement).

[163] HMRC, "Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 2.3.
https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions
TDSI was abolished in 2016, and the Guidance Notes withdrawn. But the general point made here remains relevant, and there is no reason to think that HMRC practice has changed.

[164] Author's footnote: It is assumed that the Foundation is a settlor-interested trust.

[165] HMRC classify Liechtenstein as a *Garland* jurisdiction: see 42.12 (Baker or Garland trust?).

- income of a company held by a Foundation is protected s.720 income[166]
- ESC B18 applies
- a Foundation is an IIP trust and transparent for income tax purposes
- ATED does not apply[167]

90.14.12 *Foundation: IIP trust?*

Since a Foundation is an IHT-settlement, the question may arise whether a beneficiary's interest under the settlement is an interest in possession. (This question does not often matter for IHT for Foundations made after 2006.)

This raises two issues:

(1) What is the test for an "interest in possession". This is a question of UK tax law; "interest in possession" is a technical term of English trust law, and (subject to any particular provisions in the tax statute concerned) it should have its English trust law meaning.

(2) Whether any particular interest meets those requirements; this is a matter of applying the governing law to the document in question.

An interest in possession is a current right to current income. If a Foundation confers such a right, the beneficiary has an interest in possession. Whether that should be regarded as an interest in possession *in settled property* is at first sight more doubtful.[168] However as "settlement" is given an extended meaning, it is suggested that the meaning of related expressions such as "interest in possession in settled property" should be given a comparable extended meaning. Thus a beneficiary has an IIP if they have the right to the income of the Foundation as it arises.[169]

Whether a beneficiary has the right to income as it arises depends on the drafting (construed in accordance with the governing law). At the borderline, the distinction between IIP and non-IIP trusts is one of form rather than substance, and not appropriate to a Foundation which is not even a trust, but merely equivalent in effect. In such cases one can only answer the question on the basis of "doing the best one can" and with the benefit of appropriate foreign law advice.

[166] See 92.14.1 (Cond. (c): Trustee participator).

[167] See 98.27 (Co. purchaser (non-natural person)).

[168] See 90.13 (Beneficiary rights).

[169] See 90.11.1 (IIP in Garland trust).

90.14.13 *Foundation: Income distributions*

This section considers the taxation of a UK resident beneficiary on a distribution from a Foundation.

If a Foundation is a trust, within the standard IT/CGT definition, and not transparent (ie there is no interest in possession), an income receipt from a Foundation is classified as an Annual Payment and not a distribution. (The same should apply if, contrary to the view taken in this book, a Foundation is an entity which is neither a company nor an trust). For arising basis taxpayers, this makes a difference as the rates of tax for Annual Payments and company distributions are different.

If that is right, the position depends on the drafting of the power which the Foundation uses to make or authorise the distribution.[170] If the receipt is classified as income, it is classified as an Annual Payment, like a trust distribution. If the receipt is classified as capital the usual s.731/s.87 rules will apply.

90.15 Anstalt/Establishment

The term Anstalt is conventionally translated as "establishment". I expect that is because the French equivalent is *établissement.* But the English word itself does not convey any information about the entity. One might call it an Establishment, with an initial capital to reflect the technical nature of the expression, but I prefer to use the word Anstalt. The term must not be confused with *Permanent Establishment* which is a different concept.

An Anstalt is governed by Part 5 PGR.[171] Art 534(1) PGR provides the definition:

A. Begriff und Abgrenzung	**Concept and definition**
Anstalt (Etablissement) im Sinne dieses Titels ist ein nach den folgenden Vorschriften rechtlich verselbständigtes und organisiertes, dauernden wirtschaftlichen oder anderen Zwecken gewidmetes, ins Öffentlichkeitsregister als Anstaltsregister eingetragenes	An Anstalt (Establishment) within the meaning of this Part [Part 5 PGR], and pursuant to the following regulations, is a legally independent and organised undertaking, dedicated to permanent economic or other objects, and entered in the Public Anstalt Register, which holds

[170] See 41.8 (Trust payment: Income/capital).

[171] See 90.12 (Liechtenstein: Introduction). See too "Half Trust, Half Company, All Anstalt" Bulletin for International Taxation, 1999 (Volume 53), No 8.

Unternehmen, das einen Bestand von sachlichen, allenfalls persönlichen Mitteln aufweist und nicht öffentlich-rechtlichen Charakter hat oder eine andere Form der Verbandsperson aufweist.	tangible or personal property, and is not a public law institution or any other type of legal entity.

The former TDSI Guidance Notes provided:

> **Anstalts & Stiftungs**
> Anstalts ... are Liechtenstein business entities which are fiscally opaque. The current HMRC view is that Anstalts should all be dealt with as if they are companies. For TDSI, this means that Anstalts should receive gross interest.[172]

Despite this statement, and classification in the HMRC transparent/opaque list as "opaque", HMRC practice has not always been consistent.[173] The Liechtenstein disclosure facility[174] takes a different approach:

> 1) An establishment ("Anstalt") in Liechtenstein to be characterised, recognised, and treated for UK tax purposes as follows:
> a) An establishment that according to its articles is permitted to undertake a business activity ("*nach kaufmännischer Art geführtes Gewerbe*"), and therefore is obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as a company.
> b) An establishment that according to its articles is *not* permitted to undertake a business activity ("*nach kaufmännischer Art geführtes Gewerbe*"), and therefore is *not* obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as follows:
> i) An establishment with founder's rights[175] or shares[176] to be characterised, recognised and treated as a company.

[172] HMRC, "Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 2.3.
https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions
TDSI was abolished from 2016/17, and the Guidance Notes withdrawn. But the general point made here remains relevant.

[173] Private correspondence.

[174] See 90.12 (Liechtenstein: Introduction).

[175] For Founder's Rights (Gründerrechte) see 90.13.1 (Founder's Rights).

[176] Author's footnote: An Anstalt with shares (Anstaltsanteile) is possible but not common.

ii) An establishment with no founder's rights or shares to be characterised, recognised and treated as a trust.

Other Liechtenstein treaties also draw distinctions between Anstalts (and Trust Enterprises) carrying on commercial /non-commercial activity, and those with/without Founder's Rights. For instance, under Liechtenstein FATCA, an Anstalt with non-commercial objects is classified as a trust.[177]

An Anstalt with Founder's Rights cannot be a settlement under the IT/CGT or IHT definitions, or a settlement-arrangement.[178] The choice is between a bare trust for the founder, and a company beneficially owned by the founder; company seems the best analysis.

Article 545(2) PGR provides:

> Vom Anstaltsvermögen darf nur ein dem Überschuss des Reinvermögens über den statutarisch eingezahlten oder sonst gedeckten Anstaltsfonds entsprechender Betrag nach allfälligen Rücklagen in die durch die Statuten vorgesehenen Reservefonds, als verfügbarer Reingewinn entnommen werden.

> Only an amount corresponding to the surplus of net assets in excess of the establishment capital paid in pursuant to the articles or otherwise covered may be withdrawn from the Anstalt's assets as available net profit, after allowance has been made for anticipated reserves to be paid into the reserve fund provided for in the articles

[177] The full title is: Agreement between the Government of the United States of America and the Government of the Principality of Liechtenstein to Improve International Tax Compliance and to Implement FATCA. This provides:

> The term "Trust" shall include trusts, foundations and non-commercial establishments ("Anstalten") if the foundation or establishment is created for the primary purpose of protecting or conserving the property of the foundation or establishment on behalf of beneficiaries.

> Der Ausdruck "Trust" umfasst Trusts, Stiftungen und nicht kommerziell tätige Anstalten, sofern die Stiftung oder Anstalt für den vorrangigen Zweck errichtet wurde, das Eigentum der Stiftung oder Anstalt für die Begünstigten zu schützen oder zu erhalten.

https://home.treasury.gov/system/files/131/FATCA-Agreement-Liechtenstein-5-19-2014.pdf

https://www.gesetze.li/konso/pdf/2015005000?version=2

Similarly, I understand that under the Liechtenstein/Austria Tax Cooperation Agreement, a Trust Enterprise with no Founder's Rights and non-commercial objects is classified as a Foundation; but I have not seen the relevant treaty text.

[178] See 90.13.1 (Founder's Rights).

While not determinative, this does seem a very company-like feature of an Anstalt.

Matthews says that "the structure much more resembles a company than a trust" and goes on to say that the PGR envisages 3 kinds of Anstalt:[179]

> (i) the one-man Anstalt
> (ii) the trust-like Anstalt
> (iii) the company-like Anstalt
> The first is like a one-man company. The founder is the only beneficiary and controls everything that the Anstalt does.
> The second is where the founder gives control to a board of directors and the beneficiaries are other people.
> The third is where two or more founders create a structure to benefit themselves, retaining control in their hands.

It makes sense to treat type (i) and (iii) as a company and type (ii) as a trust.[180]

90.16 Treuunternehmen/Trust Enterprise

90.16.1 *Treuunternehmen terminology*

Treuunternehmen is literally and conventionally translated "trust enterprise" (sometimes "trust undertaking"). But the English expression does not itself convey much information about the entity. I call it a Trust Enterprise, with initial capitals to reflect the technical nature of the expression, though there is something to be said for using the German term.

The term Geschäftstreuhand is a synonym.[181] I translate this "Business

[179] "Some Alternatives to Trusts" [1995] OTPR 31.

[180] Though in practice there may be borderline cases. Matthews says: "Of course, it is possible to design and form an Anstalt which falls between these different types. For example, the founder might remain the principal beneficiary during his life, and retain control of the Anstalt activities as well, but on his death cede control to a board of directors and appoint third party beneficiaries. Or he might appoint third party beneficiaries straightaway, but retain control."

[181] Art 1032a PRG, amended 2010, provides:

> In der Firma oder in einem Zusatz muss "registriertes Treuunternehmen" stehen, oder eine ähnliche Bezeichnung, wie "registrierte Geschäftstreuhand",

> (A Trust Enterprise that does not carry on business must include in its name (or by its name) the words "registered Trust Enterprise" or a

Trust", again with initial capitals to indicate that it is a technical term.

It is sometimes called Trust reg. (reg for registered)[182]; that does not seem wholly apt but it might again be regarded as a technical expression.

A Trust Enterprise is governed by art 932a PGR.[183] Art 932a(1) PGR provides the definition:

a) Treuunternehmen ohne und mit Persönlichkeit	**Trust Enterprises with and without legal personality**
1) Treuunternehmen als eigentliche Geschäftstreuhand nach dem Gesetze ist ein auf Grund der Treusatzung von einem oder mehreren Treuhändern (als treuhänderischen Inhabern) unter eigenem Namen oder eigener Firma geführtes beziehungsweise weiter betriebenes, rechtlich verselbständigtes, organisiertes, wirtschaftlichen oder anderen Zwecken dienendes und mit eigenem Vermögen bewidmetes Unternehmen ohne Persönlichkeit, für dessen Verbindlichkeiten eine Haftung gemäss diesem Gesetze besteht ("Treuunternehmen ohne Persönlichkeit") und das weder öffentlich-rechtlichen Charakter hat noch eine andere privatrechtliche Rechtsform aufweist.	A Trust Enterprise which constitutes a true Business Trust according to the law, is an undertaking, managed or operated on the basis of the trust articles by one or more trustees (as fiduciary owners), under their own name or a firm name, which, legally autonomous and organised, pursues economic or other objects, and is endowed with its own assets, without legal personality, whose liabilities are governed by this law ("Trust Enterprise without legal personality") and that is not a public law institution or any other private law legal entity.
2) Wird unter sinngemässer Anwendung des vorausgehenden Absatzes ein Unternehmen in der nach den Vorschriften dieses Gesetzes aufgestellten Treusatzung (Errichtungsurkunde) ausdrücklich als Treuunternehmen mit Persönlichkeit errichtet, so finden auf dieses uneigentliche Treuunternehmen im übrigen die Bestimmungen über die eigentliche Geschäftstreuhand, insbesondere jene über	Where, by analogous application of the above paragraph, an undertaking is created as a Trust Enterprise with legal personality expressly stated in the trust articles (formation deed), which are drawn up pursuant to the provisions of this law, the provisions concerning a true Business Trust shall also apply to this quasi Trust Enterprise, in particular, those relating

"registrierte Salmannschaft", "registrierte Treustiftung", "registriertes Treuinstitut", bei einem Treuunternehmen, das kein nach kaufmännischer Art geführtes Gewerbe betreibt ...	similar expression such as registered Geschäftstreuhand [Business Trust]/Salmannschaft/Treustiftung/ Treuinstitut

[182] See above footnote.

[183] See 90.12 (Liechtenstein: Introduction).

die Haftung für die Verbindlichkeiten entsprechende Anwendung ("Treuunternehmen mit Persönlichkeit").	to liability ("Trust Enterprise with legal personality").

The Liechtenstein disclosure facility[184] records the HMRC view:

> A trust enterprise ("*Treuunternehmen*") in Liechtenstein is to be characterised, recognised, and treated for UK tax purposes in an analogous way to an establishment ("*Anstalt*").[185]

The Trust Enterprise was introduced in 1928.

It is said to be modelled on the US (or Massachusetts) business trust.[186] That does not take a UK practitioner very far, because

(1) The US business trust is an unfamiliar institution, (if indeed it is a clearly defined institution); and
(2) It is not clear how closely the Trust Enterprise follows that model.[187]

PGR describes Trust Enterprises with/without legal personality as *eigentliche/uneigentliche* Treuunternehmen, which might be translated as *true/quasi* Trust Enterprises. It is suggested that the distinction does not affect the entity classification for UK tax purposes, because (apart from legal personality, which should not be decisive by itself)[188] the same principles govern both; and the HMRC statement does not distinguish them. In practice, Trust Enterprise with legal personality is the standard form.

90.17 Treuhandschaft (trust)

PGR uses the term Treuhänderschaft, but the term Treuhandschaft is also used, and I think the meaning is the same. This is translated as "trust".

PGR devotes a chapter to the topic, articles 897-932. Spitz & Clarke say

[184] See 90.12 (Liechtenstein: Introduction).

[185] See 90.15 (Anstalt/Establishment).

[186] This explains why PGR treats the terms Treuunternehmen (Trust Enterprise) and Geschäftstreuhand (Business Trust) as synonyms.

[187] A Trust Enterprise seems quite different from the business trust considered by the Supreme Judicial Court of Massachusetts in *State Street Trust Co. v. Hall* 311 Mass. 299 (Mass. 1942).

For what it is worth, note that the Massachusetts business trust is classified as transparent in the HMRC transparent/opaque list: See 90.54 (HMRC transparent/opaque list).

[188] A Trust Enterprise which is a legal person is not a body corporate: the terms are not identical; see 90.9.3 (What is a body corporate?)

that the entity “is based to a great extent, but not exclusively, upon the common law model”.[189] Biedermann similarly states that "the Treuhänderschaft is based on the common law trust”.[190]

Art 897 PGR[191] provides a definition:

> Treuhänder (Trustee oder Salmann) im Sinne dieses Gesetzes ist diejenige Einzelperson, Firma oder Verbandsperson, welcher ein anderer (der Treugeber) bewegliches oder unbewegliches Vermögen oder ein Recht (als Treugut), welcher Art auch immer, mit der Verpflichtung zuwendet, dieses als Treugut im eigenen Namen als selbständiger Rechtsträger zu Gunsten eines oder mehrerer Dritter (Begünstigter) mit Wirkung gegen jedermann zu verwalten oder zu verwenden.

> Trustee (in German, Treuhänder or Salmann[192]) within the meaning of this law is an individual, firm or company to whom another (the settlor) transfers movable or immovable property or a right (trust property), of any kind, with the obligation to administer or use it, in his own name as an independent owner, for the benefit of one or more third parties (beneficiaries), with effect against all other persons.

This is a fair definition of a common law trust. On the basis of this, it is considered that a Treuhandschaft is a trust in the normal sense of the word, and a settlement under the standard IT/CGT definition (and in principle under the other tax definitions).

The Liechtenstein disclosure facility[193] provides:

> Trusts (“*Treuhandschaften*”) ... are to be characterised, recognised and treated as trusts for UK tax purposes.

90.18 Civil law trust equivalents

Honoré says:[194]

> The recent series of historical essays edited by Helmholz and Zimmermann[195] ... tend to undermine the idea put forward by Maitland

> in England and von Gierke in Germany that there is a great gulf fixed between the trust of Anglo-American law and the fiduciary institutions of European continental law[196]. There were fiduciary institutions in Roman law and have always been such institutions in the civil law systems influenced by Roman law and also in Germanic customary law. It is true that on the continent of Europe, unlike in English law, these did not give rise to separate courts of equity or to a distinction between legal and equitable title to property[197]. There was no exact equivalent of the English use or trust in the early historical record of continental law. But the history of fiducia and Treuhand presents more than a few parallels reflecting similar social conditions. They and institutions such as guardianship and curatorship provided and continue to provide a legal framework for the administration of the assets of another person, earmarked as separate, in the interest not of the administrator but of the owner or a third person or of an abstract purpose. Those who are charged with the administration - let us call them administrators - performed and still perform in civil law systems many of the functions that the trustee has traditionally fulfilled in Anglo-American systems.

If that is right, it would not be surprising to find that the civil law fiducie and the German /Austrian Treuhand may be classified as trusts.

In English trust law, the trustee has legal title (or at least the right to call for it) and beneficiaries have an equitable title, or equitable ownership. This arose because of the existence of separate courts of Equity, no longer exist in England or anywhere else. But this is not an essential feature of a trust.[198]

I am not sure just how important the Roman law background is to understanding civil law today, but it is always referred to, and no doubt informs the general understanding.

Art 31(10) AMLD requires Member States to identify "trusts and similar legal arrangements"[199] and a report has assessed whether they had done so. I refer to this as the MLR Trust Categorisation Report.[200]

90.19 Fiducie/fiducia

Fiducie is a common entity in Europe and Latin American countries. Fiducie originates in Roman law; the Latin term is fiducia.[201]

90.19.1 *France/Luxembourg/Romania*

Three countries identified their Fiducie as "similar to trusts" for MLR purposes:

Entity	**Country**	**Ref**
Fiducie	France	Art 2013 French Civil Code
Contrats fiduciaires	Luxembourg	Law of 27 July 2003
Fiducia	Romania	Arts 773-791 Romanian Civil Code

90.19.2 *Italy: Mandato fiduciario*

The MLR Trust Categorisation Report provides:

> In other cases, a similar arrangement is based on the general principle of the autonomy of the contracting parties, and is delimited by court judgements and doctrine. This is the case, for instance, of the fiduciary mandate (mandato fiduciario), notified by Italy. Although there are no national provisions regulating this type of contract, it customarily takes the form of a scheme that corresponds to that of a fiducie, with the same effects as regards the separation and transfer of assets to a fiduciary for the benefit of one or more beneficiaries.

90.19.3 *Spain: Fiducia*

The MLR Trust Categorisation Report provides:

> Like the Italian *mandato fiduciario*, the Spanish *fiducia* is also based on the autonomy of the contracting parties set out in Article 1255 of the Spanish Civil Code. Under this arrangement, the fiduciary holds a title to the assets, which does not transfer him the ownership but permits him to act as an owner regarding third parties, and to administer the property with full powers. This arrangement has not been notified by Spain as it considers that this type of contract cannot be considered similar to a trust, in that the fiduciary's ownership is only formal and there is no

subject to the obligations of Directive (EU) 2015/849 all trusts and similar legal arrangements governed under their laws" *https://ec.europa.eu/transparency/documents-register/detail?ref=COM(2020)560&lang=en*

[201] See Johnston, "Trusts and Trust-like Devices in Roman Law", in *Itinera Fiduciae. Trust and Treuhand in Historical Perspective* (ed. Helmholz and Zimmermann).

> transmission of property stricto sensu. However, this arrangement grants an effective, albeit limited, title to the property to the fiduciary, comparable to that of other trust-like arrangements analysed in this report. The lower degree of protection of the beneficiary's rights compared to a trust is also comparable to that of other trust-like arrangements analysed here. Moreover, the absence of a public form of notice of the existence of the fiduciary title will make the fiduciary appear as the sole owner of the assets in front of bona fide third parties. All these similarities suggest that the Spanish fiducia presents a similar function to that of a trust, which would have justified its notification under Article 31(10) of the AMLD...[202]

90.19.4 *Netherlands Fiducie*

The MLR Trust Categorisation Report provides:

> Another example where the literature considers that, unless prohibited by law, arrangements based on the Latin fiducia are similar to trusts is the Netherlands, which did not notify this arrangement either.[203]

90.19.5 *Hungary: bizalmi vagyonkezelõ*

The MLR Trust Categorisation Report provides:

> The category [Fiducie] could be further extended to include other legal arrangements recognised under national law, which present similar features despite some differences, for instance, in the nature of the bond established between the parties. With regard to this group, the *bizalmi vagyonkezelõ* [Fiduciary property management contract] notified by Hungary (Act V of 2013 on the Civil Code and Act XV of 2014 on trustees and the rules governing their activities) is a relevant example.23 Under this arrangement, the trustee has the duty to manage the property transferred into his ownership by the settlor in his own name, for the benefit of the beneficiary, for which the settlor is obliged to pay a fee.[204]

90.19.6 *Italy: Vincolo di destinazione*

The MLR Trust Categorisation Report provides:

[202] Footnote original: Martin, S."Trusts in American law and some of their substitutes in Spanish law: Part II", Trusts & Trustees, Vol. 13 p. 242-251 (2007) .

[203] Footnote original: van Veen and Duin,"Dutch Trusts and Trust-Like Arrangements", European Review of Private Law, 2016, p. 973–994.

[204] Sandor, "The legal institution of the trust in the economy and law of Eastern European countries", European Scientific Journal 2015 special edition p. 139-149.

> Another example [of arrangements which have a structure or function similar to trusts] is the vincolo di destinazione, notified by Italy (Article 2645-ter of the Italian Civil Code), which consists of a scheme where the owner of immovable property or assets registered in public registers establishes a bond over such property. By virtue of this bond, the assets can be managed and used only for serving a specific purpose identified by the owner.

90.20 Fideicomiso/Fideicommissum

Fideicomiso likewise originates in Roman law; the Latin term is fideicommissum.[205]

90.20.1 *Fideicomiso in Latin America*

The MLR Trust Categorisation Report provides:

> The *fideicomiso* is among the legal arrangements explicitly identified as being similar to trusts in both FATF standards and the AMLD. This arrangement is most common in Latin America, where it is equivalent to the *inter vivos* common law trust.

90.20.2 *Fideicommissum in Europe*

The MLR Trust Categorisation Report provides:

> Other legal arrangements in the EU share the same origin of the fideicomiso in the Latin *fideicommissum* (e.g. the *fideicommis, fedecommesso, familienfideikommis*). In most cases, these arrangements have either been abolished or only allow legal guardians to look after the assets of a minor or developmentally disabled person. Literature[206] recognises that these arrangements, where a testator identifies a guardian who will manage certain assets for the benefit of a beneficiary, present structural similarities with common law trusts. They should therefore fall under the scope of Article 31 [AMLD]. However, none of these arrangements has been notified by Member States.

90.20.3 *Substitution fidéicommissaire*

This entity is also known as residual fideicommissum or fideicommissum do residuo.

[205] See 90.18 (Civil law trust equivalents).

[206] Honoré "On Fitting Trusts into Civil Law Jurisdictions", University of Oxford Legal Research Paper Series, Paper No 27/2008 *https://papers.ssrn.com/sol3/papers.cfm?abstract_id=1270179*

The Swiss Civil Code[207] is divided into parts ("Titles"), sub-parts ("Chapters") and subchapters identified by letter and article number. The provisions dealing with substitutions fidéicommissaires are in Title 14 Chapter 3F. This is not lengthy so I set it out in full:

Titre quatorzième: Des dispositions pour cause de mort Chapitre III: Des modes de disposer F. Substitutions fidéicommissaires	Title Fourteen: Testamentary Dispositions Chapter Three: Types of Disposition F. Remaindermen
I. Désignation des appelés Art.488 1 Le disposant a la faculté de grever l'héritier institué de l'obligation de rendre la succession à un tiers, l'appelé. 2 La même charge ne peut être imposée à l'appelé. 3 Ces règles s'appliquent aux legs.	I. Designation of a remainderman Art 488 1 The testator is entitled in his or her dispositions to require the named heir, as provisional heir, to deliver the estate to a third party, as remainderman. 2 No such obligation may be imposed on the remainderman. 3 The same provisions apply to legacies.
II. Ouverture de la substitution Art. 489 1 La substitution s'ouvre, sauf disposition contraire, à la mort du grevé. 2 Lorsqu'un autre terme a été fixé et qu'il n'est pas échu au décès du grevé, la succession passe aux héritiers de celui-ci, à charge par eux de fournir des sûretés. 3 La succession est définitivement acquise aux héritiers du grevé dès le moment où, pour une cause quelconque, la dévolution ne peut plus s'accomplir en faveur de l'appelé.	II. Time of delivery Art. 489 1 Except where the disposition stipulates otherwise, the time of delivery is deemed to be the death of the provisional heir. 2 Where a different time is specified and that time has not yet occurred on the death of the provisional heir, the inheritance passes to his or her heirs against security. 3 If for whatever reason that time may no longer occur, the inheritance passes unreservedly to the heirs of the provisional heir.
III. Sûretés Art. 490 1 L'autorité compétente fait dresser inventaire de la succession échue au grevé.	III. Security Art. 490 1 In all cases in which remaindermen are designated, the competent authority must order an inventory to be

[207] The Swiss Civil Code is available in the four national languages of Switzerland, and English. The English translation has no legal force. See: https://www.fedlex.admin.ch/eli/cc/24/233_245_233/en

2 Sauf dispense expresse de la part du disposant, la succession n'est délivrée au grevé que s'il fournit des sûretés; lorsqu'elle comprend des immeubles, les sûretés peuvent consister dans l'annotation au registre foncier de la charge de restitution.

3 Il y a lieu de pourvoir à l'administration d'office de la succession, lorsque le grevé ne peut fournir des sûretés ou qu'il compromet les droits de l'appelé.

IV. Effets de la substitution
1. Envers le grevé
Art. 491
1 Le grevé acquiert la succession comme tout autre héritier institué.

2 Il devient propriétaire, à charge de restitution.

2. Envers l'appelé
Art. 492
1 La substitution s'ouvre en faveur de l'appelé, lorsqu'il est vivant à l'échéance de la charge de restitution.

2 En cas de prédécès de l'appelé, les biens substitués sont, sauf dispositions contraires, dévolus au grevé.

3 L'appelé succède au disposant, lorsque le grevé meurt avant ce dernier, est indigne ou répudie.

V. Descendants incapables de discernement
Art. 492a
1 Si un descendant est durablement incapable de discernement et qu'il ne

drawn up.
2 Delivery of the inheritance to the provisional heir is made only against security, except where the testator has expressly released him or her from such an obligation; in the case of immovable property, security may be provided by entering the delivery obligation under priority notice in the land register.
3 If the provisional heir is unable to provide security or jeopardises the remainderman's expectancy, the inheritance must be placed under probate administration.

IV. Legal status
1. Of the provisional heir
Art. 491
1 A provisional heir acquires the inheritance in the same manner as any named heir.
2 He or she becomes the owner of the inheritance with an obligation to deliver it.

2. Of the remainderman
Art. 492
1 The remainderman acquires the testator's bequest if he or she is alive at the stipulated delivery time.

2 If he or she dies before then, the inheritance passes to the provisional heir unless the testator has ordered otherwise.
3 If the provisional heir dies before the testator or is unworthy of inheritance or disclaims the inheritance, it passes to the remainderman.

V. Issue lacking capacity of judgement
Art. 492a[438]

1 If any issue permanently lacks capacity of judgement and if he or she

laisse ni descendant ni conjoint, le disposant peut ordonner une substitution fidéicommissaire pour le surplus.
2 La substitution s'éteint de plein droit si le descendant, contre toute attente, devient capable de discernement.

is not survived by issue or a spouse, the testator may designate a remainderman in respect of the residue.
2 The designation of the remainderman ceases to apply by law if the issue, contrary to expectation, becomes capable of judgement.

I understand that in Swizterland there are two types of substitution fidéicommissaire:

(1) *Substitution fidéicommissaire ordinaire*: the deceased bequeaths property to an heir (*héritier*), with the obligation that the heir bequeaths the property to a third party (l'appelé, the remainderman) on the death of the heir. An inventory is drawn up and the heir has to provide security (in the case of land, by an entry in the land register). The heir has to assign all the property to the remainderman. the heir cannot dispose of the property, or diminish its value, and must keep it in good condition.

(2) *Substitution fidéicommissaire réduite au solde*: Here the heir enjoys the property without restriction and without having to account for the use he has made of it. He does not have to provide security. The remainderman will only acquire what (if anything) is left at the time of the heir's death, and has no action against the heir if he receives nothing, subject only to a claim for abuse of rights if the heir acted fraudulently (eg deliberately destroying the assets).

The MLR Trust Categorisation Report considers the latter kind of substitution fidéicommissaire:

... dans le cas d'une substitution fidéicommissaire ou de constructions telles que le fidéicommis de residuo, le destinataire des actifs en est le seul propriétaire et les actifs (ou ce qu'il en reste) ne sont transférés à un bénéficiaire qu'au décès du premier. Dans ces cas, le gestionnaire des actifs peut jouir pleinement de leur propriété, sans les limites qui caractérisent habituellement un accord fiduciaire. Ainsi, une telle construction s'écarte à la fois de la structure et de la fonction d'une fiducie/d'un trust, à savoir

... in the case of fideicommissary substitution or arrangements such as the residual fideicommissum, the asset recipient is the sole proprietor, and the assets (or the remainder) are passed on to a beneficiary only upon his/her death. In these cases, the person managing the assets can benefit from their property in full, without the limitations that usually characterise a fiduciary agreement. Thus, such an arrangement fails to replicate either the structure or the function of the trust of separating title to, or management of, certain assets

> dissocier la propriété de certains actifs, ou leur gestion, du bénéficiaire effectif. Qu’un autre bénéficiaire obtienne (éventuellement) la propriété des actifs restants n’a aucun effet sur la construction, car elle ne devient effective qu’au décès du premier bénéficiaire. Par conséquent, comme l’ont fait observer plusieurs États membres, ces constructions ne doivent pas être considérées comme étant similaires à des fiducies/trusts.

> from their beneficial ownership. The (possible) residual title to the assets of a further beneficiary has no impact on the arrangement, as it takes effect only upon the first beneficiary’s death. Thus, as noted by several Member States, it appears that these arrangements should not be considered similar to trusts.

This kind of substitution fidéicommissaire is not a settlement within the standard IT/CGT definition. It is also not an IHT-settlement. The owner during their lifetime owes no fiduciary duty to any other person. There is an element of succession but that is more like a will than a trust. The position is unlike a normal English will in that it cannot be revoked, so the closest analogy is to the situation which arises under mutual wills (in English law) where an individual is not entitled to revoke their will; or to a forced heirship jurisdiction where the individual is unable to make a will. A mutual will does not create an IHT-settlement during the lifetime of the individual. There is a constructive trust of a somewhat unusual kind, which is said to float during the individual’s lifetime, and only crystallise (ie take effect) on their death. And no-one says that there is an IHT-settlement just because succession is governed by a forced heirship regime. A *substitution fidéicommissaire réduite au solde* is not within s.87 for two reasons (either would suffice):

(1) If made by will, it is not a settlement-arrangement, and so not a settlement for s.87 purposes,

(2) Gains on disposals of *substitution fidéicommissaire* property accrue to the heir, not to trustees or indeed anyone else; the gains are not s.1(3) amounts (trust gains) for s.87 purposes.

90.21 Treuhand: Austria/Germany

The MLR Trust Categorisation Report provides:[208]

> *Treuhand* are among the legal arrangements explicitly identified as being similar to trusts in both FATF standards and the AMLD. The *Treuhand*

[208] See 90.18 (Civil law trust equivalents).

is a legal arrangement without legal personality derived from the principle of the autonomy of the contracting parties, typical of the German and Austrian legal systems. According to this scheme, a person (*Treugeber*) transfers certain assets or ownership rights to another person (*Treuhänder*), who is authorised to manage such assets in accordance with the contract between the two parties. Such a contractual relationship can fulfil different functions. Most commonly, as also recognised by the OECD[209], it serves the purpose of an escrow agreement. This suggests that these types of *Treuhand* should not be considered similar to trusts. However, due to its flexibility, the *Treuhand* can also be structured in such a way as to play a function similar to a trust. This can be the case, for example, of a *Treuhand* used to transfer and manage company shares[210]. The OECD[211] confirmed the AML/CFT [counter-terrorist financing] relevance of this type of *Treuhand* and noted that it should be subject to transparency obligations as regards beneficial ownership.

The *Treuhand* was not notified by any Member State. Member States pointed to the lack of comparability between the *Treuhand* and a trust, especially given that the *Treuhänder* cannot keep the assets separate from its own patrimony and that the arrangements is most commonly used as an escrow relationship.

Literature indicates that the *Treuhand* presents features similar to trusts, even notwithstanding some structural differences intrinsic to the civil law origin of the *Treuhand*. The common use of *Treuhand* as escrow relationships is also acknowledged. Yet, as noted above, this does not appear the only function that a *Treuhand* can exercice, as it could also serve as for example a private wealth management mechanism.[212] The information above, alongside the fact that both Austria and Germany introduced the obligation for *Treuhand* holding company assets to

[209] OECD, Global Forum for Transparency and Exchange of Information for Tax Purposes – Peer Review Report on Exchange of Information on Request – Austria 2018.

[210] In these cases, both Austria and Germany inserted provisions under their national laws to provide for the disclosure of the parties to the Treuhand. For example, the Austrian beneficial ownership register for legal entities provides information on the Treugeber and the Treuhänder when Treuhand own more than 25% of a legal entity.

[211] OECD, Global Forum for Transparency and Exchange of Information for Tax Purposes – Peer Review Report on Exchange of Information on Request – Austria and Germany 2018

[212] Schmidt,"Trust as a Legislative Challenge: Bipolar Relation vs Quasi-Corporate Status? – Basic Trust Models in Legal Practice, Theory, and Legislation", European Review of Private Law (2016) p. 995–1010.

disclose their beneficial ownership, suggests that *Treuhände* should be considered legal arrangements similar to trusts.

90.22 AG/GmbH/SE

The Liechtenstein disclosure facility[213] provides:

> A European Union harmonised company form, such as
> [1] "Aktiengesellschaft" or "AG";
> [2] "Gesellschaft mit beschränkter Haftung" or "GmbH";
> [3] "Societas Europaea" or "SE"
> is to be characterised, recognised and treated as a company for UK tax purposes.

90.23 Proper liferent (Scotland)

90.23.1 *Scots law background*

The CG Manual explains the Scots law background:

> **CG31301 Scottish proper liferents** [Jul 2019]
> In Scotland the expression 'liferent' is used to describe the situation where the income from particular property is to be paid to a person, the liferenter, for a specified period, generally his or her lifetime. At the end of the period the property will generally pass to a person known as the fiar.
> There are two ways in which a liferent can be set up ... In the second case, the title to heritable property (land and/or buildings) is held by the liferenter. In this situation he or she is a proper liferenter. A proper liferenter cannot dispose of a greater title than his own. He cannot dispose of the property in his will. On his death the property passes to the fiar.
> Where property in Scotland passes to a person for life under a will, and there is no suggestion that it is to be held by trustees, he has a proper liferent.

A proper liferent is rare in practice.[214] I discuss it here because (aside from the intrinsic interest of the questions which arise) that sheds light on the

[213] See 90.12 (Liechtenstein: Introduction).

[214] See *Stronach's Exrs v Robertson* [2002] SC 540 at p.553: "Liferent and fee is a form of land tenure fairly infrequently used in the 21st century. We agree with the sheriff that its lack of popularity might well be attributable, at least in part, to the fiar's inability to control the actings of the liferenter during the currency of the liferent." Note that a trust is significantly different on this point.

treatment of civil-law usufructs.

A proper liferent is a Scottish version of the civil-law usufruct. Erskine states:

> The only one of these servitudes which has been received into our law, is usufruct; which is defined by the Romans, a right which one has to use and enjoy a subject during life, without destroying or wasting its substance;[215] which definition is well enough adapted to the nature of our liferents.[216]

90.23.2 *Proper liferent: CGT*

The CG Manual provides:

> **CG31301 Scottish proper liferents** [Jul 2019]
> ... A proper liferent does not make the relevant property settled property [for CGT].

That is correct: a proper liferent is not a trust within the standard IT/CGT definition,[217] as there is no property "held in trust".[218] The Manual continues:

> Section 43(4)(c) IHTA 1984 provides that it is settled property for IHT purposes. TCGA does not go so far, but Section 63 provides that the person entitled to possession on the death of a proper liferenter shall be deemed to have acquired all the assets forming part of the property at their market value at death.

Section 63 TCGA provides:

[215] See 90.25.1 (Usufruct law background).

[216] Institute II, Title IX, 39. Stair Memorial Encyclopaedia, Vol. 13, para. 1601 cites this passage from Erskine and says:

> "The historical development of liferents awaits examination. It is not clear whether the concept of liferent derived directly from the Civilian usufruct or was an indigenous - if analogous - concept which was subsequently identified by later writers as being the Civilian usufruct. The prevalence of the non-Civilian terminology of 'fee' and 'liferent' is perhaps evidence in favour of the latter possibility."

But for present purposes it does not much matter whether the Scots law concept derives directly from Roman law usufruct or was originally distinct but later identified as a usufruct.

[217] See 87.3 (Settlement: Standard IT/CGT definition).

[218] For the same reason a proper liferent was not regarded as settled property for Estate Duty: *Dymond's Death Duties* (15th ed., 1973) p.303-304.

> **63 Death: application of law in Scotland**
>
> (1) The provisions of this Act, so far as relating to the consequences of the death of a proper liferenter of any property, shall have effect subject to the provisions of this section.
>
> (2) On the death of any such liferenter the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as fiar[219] shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

This allows CGT rebasing on death[220] but it does not make the proper liferent a settlement for CGT purposes.

A sale of the underlying property involves a disposal by the liferenter and by the fiar of their respective interests. The CGT position is in short as follows:

(1) A gain on a disposal of the liferent is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests does not apply.[221]
  - (b) The liferenter can qualify for CGT private residence relief.[222]
  - (c) The liferent may be a wasting asset (expected life of less than 50 years). If so it would reduce the base cost and increase the gain.[223]

(2) A gain on a disposal of the interest of the fiar is in principle a chargeable gain:
  - (a) The relief for disposals of trust interests does not apply.
  - (b) The fiar will not qualify for CGT private residence relief (unless they occupy the property as their main residence, which would be unusual). The relief in s.225 TCGA will not apply.

In practice, if CGT private residence relief may apply, it is better to create a classic settlement and not a proper liferent, because then the property can be sold during the lifetime of the liferenter free of CGT.

[219] Some databases erroneously read "heir".

[220] See 88.5.1 (Rebasing on death). This applies even if the liferent is not an estate IIP: the drafter of the 2006 reforms overlooked Scottish liferents.

[221] See 56.21.2 (Trust interest not chargeable asset).

[222] HMRC agree. The CG Manual provides:

> "The disposal or termination of a proper liferent may qualify for private residence relief under section 222 TCGA as it is an interest in land."

[223] Section 46 TCGA.

90.23.3 *Proper liferent: IHT*

The IHT Manual provides:

> **IHT16071 Introduction** [Jun 2016]
> The original view was that a proper liferenter was beneficially entitled to the property which was the subject of the liferent and that a proper liferent was a "settlement" within the meaning of [s.43 IHTA 1984] with the result that the liferenter fell to be treated as beneficially entitled to the settled property.[224]
> However the Board were advised that a proper liferenter was beneficially entitled only to his right to the liferent and not to the property itself so that on the death of a proper liferenter the liferenter was beneficially entitled to the liferent and not to the capital in which it subsisted. It follows that on the death of the liferenter the value to be placed on the proper liferent was nil.
> **16072. IHT position** [Jun 2016]
> Section 93 FA 1980 [now s.43(4)(c) IHTA] brought proper liferents into line with the settled property regime of the [IHTA] ...

Section 43(4) IHTA provides:

> In relation to Scotland "settlement" also includes...
> (c) any deed[225] creating or reserving a proper liferent of any property whether heritable or moveable (the property from time to time subject to the proper liferent being treated as the property comprised in the settlement);

Section 46 IHTA provides that references to an interest in possession include a proper liferent.[226]

Section 47 IHTA provides:

> In this Act "reversionary interest" ... in relation to Scotland includes an interest in the fee of property subject to a proper liferent.

[224] This is considering a pre-2006 liferent, which would have conferred an estate interest in possession.

[225] Section 43(4) provides a definition: "for the purposes of this subsection "deed" includes any disposition, arrangement, contract, resolution, instrument or writing." That definition has no relation to the English law sense of the word "deed". But the word "deed" is used differently in Scots law: see 102.17 (Jurisdictions without "deeds").

[226] See 90.11.1 (IIP in Garland trust).

Lastly, s.142(7) IHTA provides that for the purposes of s.142 IHTA (deeds of variation):

> In the application of subsection (4) above[227] to Scotland, property which is subject to a proper liferent shall be deemed to be held in trust for the liferenter.

This is needed as while a proper liferent is an IHT-settlement, there is no property held "in trust".

90.24 Legal life interest (N. Ireland)

90.24.1 *NI law background*

A Northern Ireland legal life interest is rare in practice, except in home made wills. The CG Manual provides:

> **CG31303 Northern Ireland** [Mar 2017]
> The land law of Northern Ireland, except where there is specific legislation to the contrary, is basically the same as the pre-1925 law of England & Wales. Accordingly it is possible to have a legal interest 'limited for life'...

90.24.2 *Legal life interest: CGT*

Section 63A TCGA provides:

> (1) The provisions of this Act, so far as relating to the consequences of the death of a person to whom property in Northern Ireland stands limited for life ("the deceased"), shall have effect subject to the provisions of this section.
> (2) A person who acquires property in fee simple absolute or fee tail in possession as a consequence of the deceased's death shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

The CG Manual provides:

[227] Section 142(4) IHTA provides (so far as relevant): "Where a variation ... results in property being held *in trust* for a person for a period which ends not more than two years after the death, this Act shall apply as if the disposition of the property that takes effect at the end of the period had had effect from the beginning of the period..."

> **CG31303 Northern Ireland** [Mar 2017]
> Under Section 43(5) IHTA 1984 in such a situation the property is deemed to be settled property.
> There was no comparable provision for CGT until Section 63A TCGA 1992 was enacted in FA 2006 with effect from 6 April 2006. Under this provision where a person with a legal interest limited for life dies, a person who acquires in fee simple or fee tail in possession as a consequence of the former person's death is deemed to acquire all the assets forming part of the property at market value at death. This does not apply to land outside Northern Ireland.

Section 63A is modelled on s.63 TCGA.[228] It allows CGT rebasing on death[229] but does not make the legal life interest a settlement within the IT/CGT definition.

A sale of the underlying property involves a disposal by the life tenant and by the remainderman of their respective interests. The CGT position is in short as follows:

(1) A gain on a disposal of a legal life interest is in principle a chargeable gain:
   (a) The relief for disposals of trust interests[230] does not apply.
   (b) The life tenant can qualify for CGT private residence relief.
   (c) The legal life interest may be a wasting asset (expected life of less than 50 years). If so it would reduce the base cost and increase the gain.[231]

(2) A gain on a disposal of the reversionary interest is in principle a chargeable gain:
   (a) The relief for disposals of trust interests does not apply.
   (b) The reversionary interest will not qualify for CGT private residence relief (unless the remainderman occupies the property as their main residence, which would be unusual). The relief in s.225 TCGA will not apply.

In practice, if private residence relief may apply, it is better for CGT to create a classic settlement, not a legal life interest, because then the

[228] See 90.23.2 (Proper liferent: CGT).

[229] See 88.5.1 (Rebasing on death). This applies even if the life interest is not an estate IIP: the drafter of the 2006 reforms overlooked Northern Ireland life interests.

[230] See 56.21.2 (Trust interest not chargeable asset).

[231] Section 46 TCGA.

property can be sold during the lifetime of the life tenant free of CGT.

90.24.3 *Legal life interest: IHT*

Section 43(5) IHTA provides:

> In the application of this Act to Northern Ireland this section shall have effect as if references to property held in trust for persons included references to property standing limited to persons...

90.25 Usufructs

Usufruct jurisdictions differ. I am not aware of differences between jurisdictions which should significantly affect UK tax categorisation issues, though that is not impossible. Usufructs also differ in their drafting of their constitutions. But I am not aware of drafting points which should significantly affect UK tax categorisation issues, though that too is not impossible.

For an English language discussion, see Verbeke, Verdickt & Maasland, "The Many Faces of Usufruct".[232]

90.25.1 *Usufruct law background*

Article 578 French Code Civil provides a short definition:

L'usufruit est le droit de jouir des choses dont un autre a la propriété, comme le propriétaire lui-même, mais à la charge d'en conserver la substance.[233]	A usufruct is the right to enjoy property belonging to another, as if its owner, at the expense of preserving that property.

Similarly article 467 Spanish Código Civil:

El usufructo da derecho a disfrutar los bienes ajenos con la obligación de conservar su forma y sustancia, a no ser que el título de su	A usufruct gives the right to enjoy the property of others with the obligation to preserve its form and substance, unless the terms of its

[232] in Merwe & Verbeke (eds), Time Limited Interests in Land (2012) ("Verbeke") *https://www.researchgate.net/publication/322754722_2012_Many_faces_of_usufruct*

[233] The Code Civil in French is at *http://www.legifrance.gouv.fr* The definition derives from Roman law: *Usus fructus est ius alienis rebus utendi fruendi salva rerum substantia*. (Paul, Vitellius, book 3).

constitución o la ley autoricen otra cosa.[234]	constitution or the law otherwise provide.

Article 1439 Portuguese Código Civil:

Usufruto é o direito de gozar temporária e plenamente uma coisa ou direito alheio, sem alterar a sua forma ou substância.[235]	Usufruct is the right to enjoy temporarily and fully a thing or right of others, without changing its form or substance

The Swiss civil code does not provide a short definition, but its provisions on usufructs[236] cover these points.

In the following discussion:

The "**usufructuary**" is the owner of the right of enjoyment (the usufruct). The "**encumbered owner**" is the owner of the property subject to that right. (I think this is a clearer term than "bare owner" or "naked owner" which is a more literal translation of the French term *nu-propriétaire*).[237] The **"usufructuary property"** is the land or other asset under which the interests of the usufructuary and the encumbered owner subsist.

Verbeke says: "Usufruct is a real right, that is, a right on the property itself and not merely a right in relation to the property's profits." So the interest of the usufructuary is an interest in the usufructuary property, and situate where that property is situate. The interest of the usufructuary is immoveable property (assuming the usufructuary property is immoveable property).[238]

A usufruct may subsist over land or shares or other types of property.

The IHT Manual provides:

> **IHTM27054: usufruct** [Sep 2018]
> Usufruct is a civil law term referring to right of one individual to use and

[234] The code in Spanish is at *https://boe.es/buscar/act.php?id=BOE-A-1889-4763&p=20151006&tn=2*

[235] The code in Portuguese is at *https://www.pgdlisboa.pt/leis/lei_mostra_articulado.php?nid=775&tabela=leis&*

[236] Art 745 ff Swiss Civil Code. This is available in English at: *https://www.fedlex.admin.ch/eli/cc/24/233_245_233/en#art_745*

[237] Though in Louisiana, an English language civil law jurisdiction, the legislation uses the term "naked owner".

[238] This has been stated in relation to DTAs, see 24.7.1 ("Immovable property"); but I think it is true in other contexts also.

enjoy the property that is vested in another, provided the property concerned is neither impaired nor altered. The right of ownership gives the owner the ability to

- use the property, or live in it,
- receive the income from it, for example in the form of rent, and
- sell or otherwise dispose of the property.

The owner can split his ownership in two so that there is

- the usufruct; which is right to use the property and receive the income from it, and
- the bare ownership of the property, which includes the right to dispose of it.

The person who holds the right to use and enjoy the property is known as the usufructuary and the person who holds the right to dispose of the property is known as the bare owner – in French, the 'usufruitier' and the 'nu-propriétaire'

You may come across a usufruct where an estate includes land and buildings in EU or other foreign countries. It may be referred to as a usufruct or 'usufruit' in French, or given another name such as a 'Niessbrauch' in German.[239] But no matter how it is labelled, it is important to identify the underlying rights of the arrangements and understand the circumstances that apply to the usufruct in each case. For example, another means of providing an income for life in Germany is a 'Leibrente' – which may be closer to an annuity than the rights under a usufruct.

90.25.2 *Usufruct: CGT*

The CG Manual provides:

> **CG31305 Other interests** [Jul 2019]
> ... A usufruct governed by French law would be regarded as a non-trust arrangement as it is broadly similar to a Scottish proper liferent.

That is correct: a usufruct is not a settlement within the standard IT/CGT definition,[240] as there is no property held "in trust".[241]

[239] Author's footnote: The position in Germany is governed by art.100 and 1030 Bürgerliches Gesetzbuch.

[240] See 87.3 (Settlement: Standard IT/CGT definition).

[241] This is almost self-evident, but if authority is needed, see *Lewin on Trusts* (20th ed, 2020) para 1-001 (Definitions and descriptions) and 1-027 (Unique features stated in civilian terms).

In the past, however, HMRC have more than once expressed the view that a usufruct

A sale of the usufructuary property involves a disposal by the usufructuary and by the encumbered owner of their respective interests. The CGT position is in short as follows:

(1) A gain on a disposal of the interest of the usufructuary is in principle a chargeable gain:
   (a) The relief for disposals of trust interests[242] does not apply.
   (b) The usufructuary can qualify for CGT private residence relief.
   (c) The interest of the usufructuary may be a wasting asset (expected life of less than 50 years). If so it would reduce the base cost and increase the gain.[243]

(2) A gain on a disposal of the interest of the encumbered owner is in principle a chargeable gain:
   (a) The relief for disposals of trust interests does not apply.
   (b) The encumbered owner will not qualify for CGT private residence relief (unless they occupy the property as their main residence, which would be unusual). The relief in s.225 TCGA will not apply.

CGT rebasing does not apply on the death of the usufructuary.[244]

is a trust for CGT purposes. (Private correspondence).

[242] See 56.21.2 (Trust interest not chargeable asset).

[243] Section 46 TCGA.

[244] See 88.5.1 (Rebasing on death). A Scottish proper liferent qualifies for CGT rebasing on death: see s.63 TCGA. discussed at 90.23.2 (Proper liferent: CGT). However s.63 TCGA does not apply to a foreign law usufruct because:
(1) The expression "proper liferenter" is a technical Scots law term which is not apt to include a usufructuary under a non-Scots law usufruct.
(2) The heading to the section ("Death: application of law in Scotland") shows the intention to restrict the application to Scotland.
(3) The section in its original form provided (word repealed in 2006 are underlined):

> "(1) The provisions of this Act, so far as relating to the consequences of the death of an heir of entail in possession of any property in Scotland subject to an entail, whether sui juris or not, or of a proper liferenter of any property, shall have effect subject to the provisions of this section.
> (2) For the purposes of this Act, on the death of any such heir or liferenter the heir of entail next entitled to the entailed property under the entail or, as the case may be, the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as fiar shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date."

The underlined words contain references to Scotland which make it clear that the

The result is a CGT discrimination against usufructs, which might have breached EU law, though that matters less after Brexit.[245]

If an individual creates a usufruct under which they retain an interest, this is a part disposal for CGT purposes, as the rule for transfers into trust[246] does not apply.

A usufruct may be a settlement within the settlement-arrangement definition, but it is not within the scope of s.87.[247]

90.25.3 *Is usufruct an IHT-settlement*

The question discussed here is whether a usufruct constitutes a settlement within the IHT definition.[248]

The IHT Manual provides:

> **IHTM27054: usufruct** [Sep 2018]
> In HMRC's view, a usufruct should be treated as a settlement for IHT purposes given the closing words of IHTA84/S43(2), '….or would be so held charged or burdened if the disposition were regulated by the law of any part of the UK….'. This creates a fiction solely for the purposes of charging IHT and requires us to look at the outcome of the disposition and then consider how that outcome could be achieved under the law of any part of the UK. Bearing in mind the nature of the split in ownership that a usufruct achieves, the closest equivalent under UK law is a life interest settlement, with the bare owners holding the property for the benefit of the usufructuary (life tenant) with remainders to themselves.[249]

entire section is restricted to property in Scotland; and the repeal of those words was not intended to alter that.

I set this out at length because the contrary view has been suggested.

[245] This issue was raised in *Findlay v HMRC* which is reported at a preparatory stage: [2018] UKFTT 217 (TC). The case did not go to full trial.

[246] See 56.21.4 (Disposal on transfer into trust).

[247] See 61.3.2 (Usufruct: Deemed trustee).

[248] Strictly the term usufruct means the right of the usufructuary to enjoy the property; so the statutory question is whether the creation of a usufruct is a disposition whereby property is held on trust (etc) for persons in succession. Or to put it another way, the question is not whether a usufruct *constitutes* a settlement but whether it *entails* a settlement. But the question is conveniently abbreviated into asking whether a usufruct is a settlement. The usufruct is here regarded as an entity, and not (or not just) the usufructuary's right to enjoyment.

[249] HMRC practice has not always been consistent. HMRC, "Trusts and Estates newsletter" (Sep 2015) provides:

"... Since April 2013, HMRC has dealt with a small number of cases where the

HMRC's argument relies on s.43(2)[d].[250] It is not correct.

(1) Para [d] does not "require us to look at the outcome of the disposition and then consider how that outcome could be achieved under the law of any part of the UK":
    (a) The purpose of para [d] is to deem a foreign trust to be a UK law trust, to preclude an argument that the words "on trust" (or "in trust") in the definition apply to UK-law trusts and do not apply to foreign-law trusts.
    (b) According to HMRC, para [d] poses a hypothetical question: what would result if a foreign disposition creating, a usufruct, or, say, a Liechtenstein Treuunternehmen, were governed by a UK law. That is an impossible question as UK law has no such entity.
    (c) The HMRC view leaves no purpose for para [e].
(2) If, contrary to the above, para [d] did require one to ask whether the property would be held on trust if the disposition were regulated by the law of any part of the UK" HMRC's answer to that hypothetical question is wrong. It is not the case that "the closest equivalent under UK law is a life interest settlement":

> estate included a usufruct and in each case, the facts were less than straightforward. HMRC applied its approach to the facts of each case as it understood them to be, and in each case, the difference between the value reported by the taxpayer and the value that emerged following HMRC's approach was not sufficient to warrant pursuit. So in accordance with its Litigation and Settlement Strategy, HMRC adopted the value reported by the taxpayer.
>
> But HMRC remains of the view that, generally, a usufruct should be treated as giving rise to a settlement for IHT purposes and will pursue the collection of tax on that basis."

https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters/hmrc-trusts-and-estates-newsletter-september-2015

The IHT Manual provides an element of pragmatism:

> **IHTM27054: usufruct** [Sep 2018]
>
> The correct treatment of a usufruct for IHT purposes is not universally accepted. One leading commentator refers to it as a 'toss of a coin matter'; some accept HMRC's view, whilst others are strongly opposed to it. It is for this reason that any case where the taxpayer is not prepared to proceed along the lines above should, once the detailed facts have been ascertained, be referred to Technical to consider how to take the case forward. It is possible that the value for tax that emerges from applying HMRC's approach may not be (so) very different from the value offered by the taxpayer, particularly where there are encumbrances against the property; but each case will need to be considered on its own merits.

[250] See 87.6.4 (Limb (d): So held by UK law).

(a) There is no such thing as "UK law" (at least as far as property/trust law is concerned). The laws of Scotland/Northern Ireland/England are distinct.

(b) In fact Scots law does have a usufruct (by another name). If the disposition were regulated by Scots law, it should constitute a proper liferent, which is deemed to be an IHT- settlement, but is not deemed to constitute property held on trust,[251] so para [d] would not be met. Likewise if the disposition were regulated by the law of Northern Ireland, it would constitute a legal life interest.

(c) If one had to find the closest equivalent in English law, it would be a lease for life, which is not a trust.

HMRC do not argue in the Manual that a usufruct is a settlement under s.43(2)[e], ie, that under the law of the usufruct, the administration of the property is governed by provisions "equivalent in effect to those which would apply if the property were held on trust for persons in succession."[252] Note how the HMRC paraphrase ("how that outcome could be achieved under the law of any part of the UK") is an easier test to pass than the terms of para [e].

I think HMRC are right to take the view that para [e] is not satisfied. There is an element of succession, but that is not enough. The usufruct must be equivalent in effect to *a trust* for persons in succession. There are important differences between a usufruct and a trust:

(1) There is no settled property
(2) There are no actual trustees[253]
(3) The usufructuary has the right to enjoy the property in specie, unlike a beneficiary of a trust of land
(4) A sale of the usufructuary property in its entirety requires the consent of both the encumbered owner and the usufructuary

For all these reasons, a usufruct is more like a lease for life or a legal life interest than a classic settlement.

Overall a usufruct is sufficiently unlike a trust that it is suggested that the

[251] See 87.6.4 (Proper liferent: IHT).

[252] See 87.6.5 (Limb (e): Equivalent to a trust).

[253] If a usufruct were an IHT settlement, it is difficult even to identify deemed trustees: see 61.3 (Non-classic trust: Trustee). This also supports the view that a usufruct is not an IHT settlement.

two should not be regarded as equivalent, so it is not an IHT-settlement.[254]

It might be said that there would be an anomaly if:

(1) a usufruct is not an IHT-settlement; but
(2) a Scots proper liferent (which is a usufruct or usufruct-like entity) is an IHT-settlement.

But the boot is on the other foot: if a usufruct were an IHT-settlement, there would have been an anomaly between the introduction of CTT in 1975 and the enactment of (what is now) s.43(4)(c) IHTA, during which time a proper liferent was not an IHT-settlement. The enactment of a provision dealing with Scots law liferents should not affect the position of foreign law usufructs.

90.25.4 *IHT if usufruct is a settlement*

If a usufruct is an IHT-settlement, there would in principle be charges to IHT on the following occasions:

(1) On the creation of the usufruct
(2) On ten-year anniversaries[255]
(3) On the death of the usufructuary

The usufructuary property may qualify as excluded property, depending of course on the domicile of the settlor (and, if a spouse has an initial estate IIP, the domicile of the spouse).

DT relief will sometimes be available.

The IHT Manual provides:

> **IHTM27054: usufruct** [Sep 2018]
> On the footing that a usufruct should be treated as interest in possession settlement, the following consequences will flow.

Note that it is assumed throughout the Manual passage that a donor creates a usufruct by way of lifetime gift, and that the donor is UK domiciled. On that basis, the pre-2006 position was relatively straightforward:

> [1] Where the usufruct was created prior to 22 March 2006, it should be treated as an interest in possession created prior to that date. Consequently,

[254] This issue did not arise for proper liferents (Scotland) or legal life interests (Northern Ireland) since the para [e] of the definition (dealing with provisions "equivalent in effect") only applies to non-UK legal systems.

[255] Not for a usufruct created on death, which will qualify as an IPDI.

[a] if the donor gave a property to their children, retaining the usufruct, there will be no loss to their estate at that time; but the property, at the open market value, will remain part of their estate on death.

[b] If a husband gave his wife a usufruct over his property, the transfer will benefit from spouse or civil partner exemption and the property, at the open market value, will form part of the spouse's estate on her death.

[c] If a father gave a usufruct over his property to his children, the transfer will be a PET.

[d] In all cases, the bare ownership of the property should be treated as a reversionary interest and will normally be excluded property under IHTA84/S48(1).

The Manual then turns to consider the post-2006 position:

> [2] Where the usufruct is created on or after 22 March 2006,
>
> [a] the settlement will be a relevant property settlement.
>
> [b] On creation of a usufruct:
>
> [i] the donor will be making an immediately chargeable transfer of the full value of the property[256]
>
> [ii] [the property] will then be subject to relevant property charges.
>
> [iii] No spouse or civil partner exemption will be due.
>
> [c] If the donor has retained a usufruct over the property, they may well have reserved a benefit in the property,
>
> [d] but otherwise, no part of the property will form part of any person's estate.[257]

The author has not worked through the IHT issues here. One might have some sympathy, as the position is so complicated; but it is HMRC who are responsible for that.

A common case is where an owner of property ("S") creates a usufruct under which S is the usufructuary and a child is the encumbered owner. If the usufruct is an IHT-settlement, and S is UK domiciled, then:

(1) S makes a transfer of value equal to the value of the property.[258]

[256] Author's footnote: This is not necessarily correct, either as the donor may retain an interest (which reduces the value transferred) or as the gift may partly be a PET.

[257] Author's footnote: this is not correct, as the reversionary interest is in the estate of the encumbered owner.

[258] See s.3(1) IHTA; the value of the usufructuary's interest is disregarded as an interest in possession in settled property: s.5(1)(a)(ii) IHTA.

(2) The gift is a PET so far as attributable to the child's reversionary interest.[259]

That is so strange as to make one question whether the analysis that a usufruct is an IHT-settlement can be correct.

(3) In principle the creation of a usufruct is not a gift with reservation of benefit as the donor enjoys no benefit from the property given away (the reversion). But if the usufruct is created over land, then it will normally be deemed to be a GWR under s.102B FA 1986 (not discussed here).

(4) The pre-owned asset issues are wonderfully intricate. (Of course, no attention was given to usufructs when the legislation was enacted.) In outline:

 (a) If the gift is a GWR then POA does not apply.

 (b) If the gift is not a GWR (eg a usufruct over shares, or over land acquired more than 7 years before the gift) POA may apply; it is necessary to consider the POA land, chattel or intangible property charge as applicable.[260]

(5) The interest of the encumbered owner is a reversionary interest[261] and so in principle excluded property, which is advantageous if the encumbered owner is UK domiciled.

(6) The IHT spouse exemption would in principle be available on the creation of a usufruct on death.

Further consideration is needed if the creation of the usufruct is by way of sale and not by way of gift.

Depending on the circumstances it will sometimes be in the taxpayers' interest to accept the HMRC view (that a usufruct is an IHT-settlement), and sometimes to challenge it.

90.25.5 *Usufruct: Valuation*

It may be necessary to value:

(1) The interests of the usufructuary and the encumbered owner

[259] See s.3A(1)(c) and 3A(2)(a) IHTA. The interest of the encumbered owner (the child) is excluded property but nevertheless it forms part of their estate (except on death).

[260] See 83.1 (Pre-owned assets: Introduction).

[261] It is considered that the encumbered owner's interest is a "future interest" and so within the definition in s.47 IHTA, which is set out at 90.11.2 (Reversionary interest: Garland trust).

(2) The usufructuary property, which in the HMRC view is settled property.

Some foreign tax laws (eg France) have tax rules to value the interests of the usufructuary and the encumbered owner. Those rules do not apply for UK tax purposes, so the usual market value rules must be applied.[262]

Valuation of these interests should take into account the costs of possible IHT charges (which if due would in principle be borne out of the encumbered owner's interests), or the costs and risks of debating whether these IHT charges actually arise.

The IHT Manual provides:

> **IHTM27054: usufruct** [Sep 2018]
> ... The property over which the usufruct exists should be valued on the open market basis, without regard to the values that may be ascribed to the different rights by the relevant foreign law. The property is treated for IHT purposes as regulated by UK law – which does not recognise any other statutory regime for valuation – leaving us with the usual valuation approach under IHTA84/S160.
> But it is important to establish the detail of the circumstances surrounding the property because if the property is mortgaged, the mortgage is an incumbrance against the property which is very likely to be a valid deduction against the property under IHTA84/S162(4).
> If the property is subject to a lease, that too will reduce the value of the property depending on the terms of the lease. The terms of some overseas leases, particularly around renewal, may be quite onerous and have a significant impact on the value of the property.
> If the property is farmland in the European Economic Area, it may also qualify for agricultural relief in view of IHTA84/S115(5)(b).
> Shares and Assets Valuation are responsible for valuing overseas property and they should provide the open market value with vacant possession of the property. The question of any reduction in value to reflect the impact of a lease should be referred to Technical, once the open market value has been agreed, as should any case where the taxpayer does not accept the position outlined above.

90.25.6 *Usufructs: Critique*

There are two problems: (1) it is unclear whether a usufruct is an IHT-

[262] It may be that foreign valuation rules happen to produce the market value figure, but that is not necessarily (perhaps not even usually) the case.

settlement; and (2) if it is an IHT-settlement, the IHT treatment is absurd. The second problem cannot be solved unless one addresses the mess which is the Inheritance Taxation of trusts.[263] In the absence of wholescale reform, the second best course would be to solve the first problem (and avoid the second) by a provision (in my view confirming the existing law) that a civil-law usufruct is not an IHT-settlement. Then at least taxpayers would know where they stand. The problem of transitional rules for existing usufructs would need consideration.[264]

I suspect that only EC pressure could give sufficient impetus to yield reform on this point, and post-Brexit that seems unlikely.

The conclusion to draw for practical purposes is that UK domiciled individuals should not create a usufruct, except:

(1) by will; or
(2) possibly, if the value of the property falls within the general nil rate band(s) of the owner(s), or if DT relief is applicable.

90.26 Foreign partnership: Legal person

In discussing the question whether a foreign partnership/partnership-like entity has legal personality, bear in mind that this term can have different meanings in UK/foreign law,[265] and that it is possible for a body with legal personality to be a partnership.[266]

Avery Jones says:[267]

> In Germany, Switzerland and Italy partnerships are not legal persons because partnership is a personal relationship that does not survive changes in the partners (except in Italy), and the liability of at least one of the partners is unlimited. It follows that in those countries a formal partnership... can have partial legal capacity without being a legal person

[263] As to which, see Kessler, "The Quest for Fair Inheritance Taxation of Trusts" [2013] Trusts & Trustees 364 *https://www.kessler.co.uk/wp-content/uploads/2014/08/Kessler-The-Quest-for-Fair-Inheritance-Taxation-of-Trusts.pdf*

[264] Section 93(4) FA 1980 (turning Scottish proper liferents into IHT-settlements) offers a precedent.

[265] See App.2.6 (Person/legal personality).

[266] See 85.3.6 (English/Scots partnership tax aligned); 85.16 (Partnership transparency: IT/CT).

[267] 'Characterisation of Other States' Partnerships for Income Tax' [2002] BTR 375. Some footnotes are omitted or abbreviated.

> since it lacks the continuity necessary to be a legal person in their law. If a body identical to a German, Swiss or Italian formal partnership existed in most other civil law countries, its capacity would result in its being a legal person.
>
> In France on the other hand, partnerships formed under both the Commercial Code and Civil Code ... are legal persons following registration in spite of the partners being liable for the legal person's liabilities, but an unregistered, in our terms, informal, partnership is not a legal person. ...

90.27 German partnerships

I consider the partnerships governed by the following laws:

Country	**Business code**
Germany	Handelsgesetzbuch (HGV)[268]
Austria	Unternehmensgesetzbuch (UGB)[269]

Entity	**English**	**See para**	**HGB Book 2**	**UGB Book 2**
Offene Handelsgesellschaft	General partnership	90.28	Part 1 ss 105-	Part 1 ss 105-
Kommanditgesellschaft	"Ltd partnership"	90.29	Part 2 ss 161-[270]	Part 2 ss 161-
GmbH & Co KG		90.29		
Stille Gesellschaft	"Silent partnership"	90.30	Part 3 ss 230-	Part 3 ss 179-

A number of other countries have entities based on the German model.

90.28 Offene Handelsgesellschaft

Offene Handelsgesellschaft may approximately be translated as a general partnership; though it would be more precise to use the German term.

Section 105 HGB provides:

[268] *https://www.gesetze-im-internet.de/hgb* (German); Official English translation *http://www.gesetze-im-internet.de/englisch_hgb/englisch_hgb.html* but I have not followed this exactly.

[269] *https://www.ris.bka.gv.at/GeltendeFassung.wxe?Abfrage=Bundesnormen&Gesetzesnummer=10001702*

[270] Part 1 Book 2 is also applicable, so far as not altered by Part 2. Section 161(2) HGB provides:

Soweit nicht in diesem Abschnitt ein anderes vorgeschrieben ist, finden auf die Kommanditgesellschaft die für die offene Handelsgesellschaft geltenden Vorschriften Anwendung.	Unless this Part provides otherwise, the provisions applicable to a general partnership apply to a limited partnership.

Section 161(2) UGB is substantially the same.

(1) Eine Gesellschaft, deren Zweck auf den Betrieb eines Handelsgewerbes unter gemeinschaftlicher Firma gerichtet ist, ist eine offene Handelsgesellschaft, wenn bei keinem der Gesellschafter die Haftung gegenüber den Gesellschaftsgläubigern beschränkt ist.	(1) A partnership formed for the purpose of carrying on a commercial business under a joint business name is a general partnership if no partner's liability is limited vis-à-vis the partnership's creditors.
(2) Eine Gesellschaft, deren Gewerbebetrieb nicht schon nach § 1 Abs. 2 Handelsgewerbe ist oder die nur eigenes Vermögen verwaltet, ist offene Handelsgesellschaft, wenn die Firma des Unternehmens in das Handelsregister eingetragen ist. § 2 Satz 2 und 3 gilt entsprechend.	(2) A partnership, whose commercial enterprise is not a commercial business pursuant to Section 1(2), or which manages only its own assets, is a general partnership if the business name of the enterprise is registered in the Commercial Register. Section 2, second and third sentences, shall apply mutatis mutandis.

Section 124(1) HGB provides:

Die offene Handelsgesellschaft kann unter ihrer Firma Rechte erwerben und Verbindlichkeiten eingehen, Eigentum und andere dingliche Rechte an Grundstücken erwerben, vor Gericht klagen und verklagt werden.	A general partnership can, under its business name, acquire rights and enter into obligations, acquire ownership and other rights in rem in real property and sue and be sued in court.

Both general and limited partnerships have legal personality in the (English law) sense that they are capable of rights and duties. But German (and Swiss) partnerships do not survive a change in the partners,[271] so that they do not have legal personality in the (German law) sense.[272]

The HMRC transparent/opaque list classifies an Offene Handelsgesellschaft as transparent.

[271] Avery Jones et al, "Characterisation of Other States' Partnerships for Income Tax" [2002] BTR 375 (footnotes omitted).

[272] See 90.26 (Foreign partnerships: Legal capacity).

90.29 Kommanditgesellschaft

90.29.1 *German law background*

Art 161(1) HGB provides:

Eine Gesellschaft, deren Zweck auf den Betrieb eines Handelsgewerbes unter gemeinschaftlicher Firma gerichtet ist,	A partnership formed for the purpose of carrying on a commercial business under a joint business name
ist eine Kommanditgesellschaft, wenn bei einem oder bei einigen von den Gesellschaftern die Haftung gegenüber den Gesellschaftsgläubigern auf den Betrag einer bestimmten Vermögenseinlage beschränkt ist (Kommanditisten),	is a *Kommanditgesellschaft* (limited partnership) if the liability of one or more of the partners is limited vis-à-vis the partnership's creditors to the amount of a specific contribution of assets (limited partners),
während bei dem anderen Teil der Gesellschafter eine Beschränkung der Haftung nicht stattfindet (persönlich haftende Gesellschafter).	while the other partners have unlimited liability (general partners).

Kommanditgesellschaft may approximately be translated as limited partnership, though it would be more precise to use the German term. A partner with limited liability is a "Kommanditist" and a partner with unlimited liability is a "Komplementär".

Avery Jones et al state:[273]

> Limited partnerships are used extensively in Germany, particularly the type known by the name GmbH & Co KG where the general partner is a limited company (ie, a GmbH) often taking no share in the profits of the partnership and with its shares being held by the limited partners who can be authorised by the general partner by power of attorney to manage the partnership without losing their limited liability. In this way, the partners, either as limited partners or as shareholders in the limited company, all have limited liability, but the partnership is transparent for tax purposes.

[273] Avery Jones et al, "Characterisation of Other States' Partnerships for Income Tax" [2002] BTR 375 (footnotes omitted).

90.29.2 *Austrian law background*

Section 161 UGB provides:

Begriff, Anwendung der Vorschriften über die offene Gesellschaft § 161. (1) Eine Kommanditgesellschaft ist eine unter eigener Firma geführte Gesellschaft, bei der die Haftung gegenüber den Gesellschaftsgläubigern bei einem Teil der Gesellschafter auf einen bestimmten Betrag (Haftsumme) beschränkt ist (Kommanditisten), beim anderen Teil dagegen unbeschränkt ist (Komplementäre).	**Concept, and application of provisions applicable to general partnerships** A Kommanditgesellschaft is a partnership, operating under a firm name, under which the liability of some of the partners (Kommandististen) to the partnership creditors is limited to a specified contribution (Haftsumme), and the other partners (Komplementäre) have unlimited liability.

This is not the same as the HGB wording, but the differences are not material for present purposes. The Austrian KG is a "Gesellschaft", a category of partnership, and apart from the limited liability of the limited partners, the rules applicable to general partnerships generally apply.

90.29.3 *UK tax analysis*

The HMRC transparent/opaque list classifies as transparent:
(1) Kommanditgesellschaft in Germany, Austria and Switzerland
(2) GmbH & Co KG in Germany and Austria[274]

Similarly, the Liechtenstein disclosure facility[275] provides:

> 2) A business formed as "Kommanditgesellschaft" or "KG" or "Kollektivgesellschaft" is to be characterised, recognised and treated as a partnership for UK tax purposes.

90.30 Stille Gesellschaft

90.30.1 *German law background*

Section 230 HGB provides:

(1) Wer sich als stiller Gesellschafter an dem Handelsgewerbe, das ein anderer betreibt, mit einer	(1) A person who participates as a silent partner in a business carried on by another person, by means of a contribution of assets, shall arrange

[274] No doubt the omission of Switzerland is accidental, not deliberate.
[275] See 90.12 (Liechtenstein: Introduction).

Vermögenseinlage beteiligt, hat die Einlage so zu leisten, daß sie in das Vermögen des Inhabers des Handelsgeschäfts übergeht.	that the contribution is transferred to the assets of the owner of the business.
(2) Der Inhaber wird aus den in dem Betrieb geschlossenen Geschäften allein berechtigt und verpflichtet.	(2) The owner alone shall have the rights and obligations arising from transactions made in the course of the business.

"Stille Gesellschaft" is literally and conventionally translated "silent partnership". That expression conveys no information about the entity. It is better to use the German term. If English is used, it would be appropriate to write "silent partnership" and "silent partner" with scare quotation marks.

Memec v IRC summarised the essential characteristics of a stille Gesellschaft:[276]

> ... the silent partner (stille gesellschafter) makes a capital contribution to a commercial enterprise run by another person who is designated as the owner (inhaber).
>
> The owner remains the owner of the business assets, and of the income from those assets as it accrues. The silent partner has no proprietary interest in the assets but has a contractual right to payment of his share of the annual profits (if any) as shown by the partnership accounts, and can sue for damages in the event of any misappropriation.
>
> The owner runs the business, though the silent partner has access to information about it. The silent partner is not responsible for liabilities of the partnership beyond the amount of his contribution, but his share of any loss will be debited to his contribution, and must be made good out of his share of profits of alter years before any share of profits is distributed to him.
>
> On termination of the partnership the silent partner gets a return of his capital contribution, so far as it has not been lost.
>
> A silent partnership has no separate legal personality under German law. Its existence is often unknown to customers dealing with the owner.

90.30.2 *UK tax analysis*

The tax treatment of a stille Gesellschaft arose in *Memec v IRC*. In this

[276] 71 TC 77 at p.113.

case a stille Gesellschaft was inserted into a group structure; the business of the stille Gesellschaft was to hold group subsidiary companies and distribute their dividends to Memec PLC, thus:

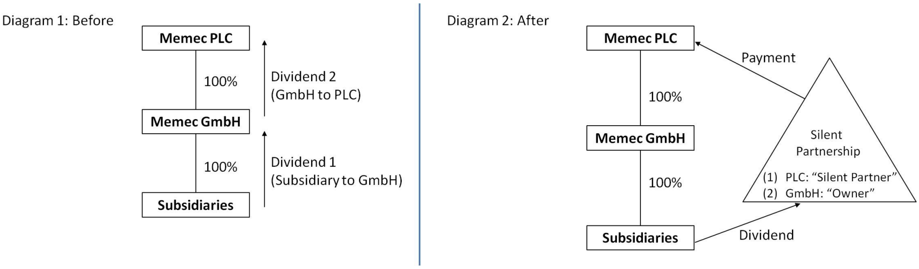

Diagram 1: Before
Memec PLC
100%
Dividend 2
(GmbH to PLC)
Memec GmbH
100%
Dividend 1
(Subsidiary to GmbH)
Subsidiaries
Diagram 2: After
Memec PLC
Payment
100%
Memec GmbH
Silent
Partnership
(1) PLC: "Silent Partner"
(2) GmbH: "Owner"
100%
Subsidiaries
Dividend

In *Memec v IRC*:[277]

> A silent partnership, whilst being similar to an English partnership in not being a separate legal entity, differs from both English and Scottish partnerships in a number of respects.

The Court identified two key differences:

(1) The "silent partner" has no proprietary right in the property of a Stille Gesellschaft.

(2) The "partners" of a Stille Gesellschaft do not carry on business in common.

Both points follow clearly from the HGB provision cited above.

It follows from the second point alone that a Stille Gesellschaft is not a partnership, because partnership is *defined* as carrying on business in common. That does not determine the actual question which arose in *Memec*, which was whether a dividend was "paid by the subsidiaries to PLC", for the purposes of the relevant DTA provision (credit for underlying tax), notwithstanding that the payment was made through the stille Gesellschaft.[278] This was paraphrased by asking whether the stille Gesellschaft was transparent, or whether the subsidiaries were the source of PLC's income. I think these paraphrases are appropriate, as long as one remembers that they are a paraphrase of the actual question. Nothing turns on the use of the specific word "paid".[279]

The Court decided firstly that the arrangement was not a partnership

[277] 71 TC 77 at p.113.

[278] See *Anson v HMRC* [2015] UKSC 44 at [104].

[279] See 15.3 (Recognition/attribution: Analysis).

under the entity-resemblance test:

> The position of plc [the "silent partner"] seems to me to be that of a purchaser who, for a consideration consisting of the contribution of a capital sum and an undertaking to contribute to losses of the owner of a business up to the amount of the contribution, purchases a right to income of a fluctuating amount calculated as a share of the annual profits of the business. Neither in English or Scottish law would that leave plc a partner with GmbH [the "owner"].

Next the Court correctly noted:

> That in itself is not determinative of transparency

But the arrangement was not transparent:

> But I see insufficient justification present in the circumstances of the silent partnership for treating the share of the profits of the GmbH business received by plc as the same as the profits of the subsidiaries or the dividends which were paid to GmbH alone as shareholder and not to plc. ...
> The [stille Gesellschaft] agreement was, in my judgment, the source of plc's share of the profits of the GmbH business, not the trading operations of the subsidiaries or the shares owned by GmbH in the subsidiaries producing the dividends paid to GmbH.[280]

A stille Gesellschaft is transparent for the owner, but not for the "silent partner", who is like a creditor of a debt with a profit-related return. In English law terms, the rights of a "silent partner" to partnership income are contractual rather than proprietary, *in personam* rather than *in rem*.[281] That is an important distinction for tax, even though it does not normally matter for the partners.

90.31 Société en nom collectif

The former International Tax Handbook provided:

> **304. Company and partnership distinguished**
> [The manual made some general comments on differences between

[280] The SC in *Anson* went out of its way to say its decision did not affect *Memec*. So the decision in *Memec* is binding at all levels below the Supreme Court.

[281] More accurately, that was the position of *this* stille Gesellschaft on the basis of the facts found. But there is no reason to think that another tribunal would find different facts.

> companies and partnerships, and continued:] Considerations of this sort are important when dealing with some unfamiliar European company cum partnership creations. The French Société Civile is one such body and the Société en nom Collectif is another. Broadly speaking we regard the first as a company the second as a partnership. Both have legal personality but in the former case the profits arise to the body itself and in the latter case we take the view that the profits arise to the partners. ...
>
> **1673. Establish facts**
>
> The first stage is one of factual enquiry and in relation to any appeal procedure is a matter for the Appeal Commissioners. It can be a difficult stage – even for trained Revenue lawyers. Experts have been known to differ and in a case about these bodies *Dreyfus v IRC* 14 TC 560 we think the Commissioners came to a wrong decision and we do not follow the Courts ruling. The case involved a French SNC and the Courts said it was a company, being guided by the Commissioners' finding of fact about foreign law. We – after listening to expert advice – think it analogous to a partnership...
>
> There are no hard and fast rules governing this question of foreign law; every association has to be considered separately and in the light of its Articles of Association or equivalent code. We look for indicators as to whether the Association carries on the business itself or whether the participators do so jointly; and whether the profits accrue directly to the participators or whether they accrue to the Association which then distributes them to the participators. These conclusions should then help us decide whether the members of the Association are carrying on a trade, profession or vocation solely or in partnerships and, if so, whether the income is immediately derived by the member from the carrying on of that trade.

Avery Jones discusses the issue at length and concludes wistfully:

> My preferred approach to the categorisation of a foreign entity would be to weigh up the degree of legal personality and, if this was significantly less than the absolute legal personality of a corporation, even one with unlimited liability, then the body should be categorised as a partnership (or transparent). This was more the approach in an even earlier case[282], which was not cited in the English *Dreyfus* case, that had decided that a French SNC could not be sued in the partnership name on the ground that it was a partnership and the rules of court only enabled an English partnership to be sued in the firm name. One of the judges said;

[282] *von Hellfeld v E Rechnitzer and Mayer Freres & Co* [1914] 1 Ch 748.

> According to our modern practice there are three classes who can sue, or appear to writs, - persons, corporations and firms.[283]

This was commented upon in a recent case concerning whether the partners of a Swiss SNC[284] could be sued in which a judge stated that in this quotation "corporations" was used in its correct sense as meaning legal persons wholly distinct from their individual members. Another judge, Mummery LJ, described the Swiss SNC as "not a corporation but is a separate entity with many of the characteristics of a corporation[285]." That seems neatly to encapsulate the whole problem of categorising other states' entities.[286]

90.32 Société civile

90.32.1 *French law background*

Frimston & Urquhart say:

> French *sociétés* are different from English companies. The word *'société'* can be used to describe either what we, in England, would call a company, firm, or partnership. French *sociétés* are divided into the following general categories:
>
> - *société commerciale* — a company that is formed for the purposes of trade;
> - *société civile* — an entity (company or partnership) that does not primarily trade;
> - *société de capitaux* — a company with limited liability and where subscribers or shareholders provide its capital;
> - *société de personnes* — an entity with unlimited liability which groups persons together rather than capital.
>
> Two main types of société civile (there are various other types) are:

[283] at p.754.

[284] *Oxnard Financing SA v Rahn and others* [1998] 1 WLR 1465. A Swiss SNC, in contrast to the French, is not a legal person, although that is more a difference in the meaning of corporation than the nature of the partnership; a partnership with the same capacity would be classified as a corporation in both France and the UK. ... The decision was that it could be sued in England in the names of the partners, making it clear that they were being sued in their capacity as partners, rather than in the partnership name. But it could equally well have been sued in the partnership name.

[285] At p.1470E.

[286] "The English Dreyfus Case, Categorisation of French SNC for Tax Purposes in the UK" in *Fiscalité et enterprise: politiques et pratiques, Mélanges en l'honneur de Jean-Pierre Le Gall* (2007), p.315.

- *société civile immobilière* — civil property holding entity;
- *société civile professionnelle* — civil professional partnership (used for law firms, etc.).

From the legal point of view, *sociétés civiles immobilières* are subject to the general laws governing *sociétés civiles* contained in the French Civil Code, although certain types of investment vehicles known as *sociétés civiles de placement immobilier* or *sociétés civiles* constituted for the purpose of building properties with a view to resale (*construction vente*) or *sociétés civiles d'attribution en jouissance à temps partagé* (timeshare companies) have specific regulations attaching to them.

A *société civile* is civil by its character when it:

- has a civil activity or business; and
- is not a *société* on which the law confers a commercial character by reason of its form or its objects.

Sociétés civiles are principally governed by Section IX of Book III of the French Civil Code, particularly Articles 1832 to 1873. Commercial companies (*société anonyme, société à responsabilité limitée*) are governed by the French Commercial Code.

Individual members of a *société civile immobilière* by virtue of its constitution usually have joint unlimited liability for its debts, but the unlimited nature of their liability is usually only in proportion to and to the extent of their holdings, i.e. it is not several. The usual constitution can however be varied to make the liability of the members expressly both joint and several.

A *société civile immobilière* is for legal purposes a separate legal entity from that of its members and therefore is capable of owning assets, which do not merge with the assets of each individual member.

The principal consequences usually attached to a separate legal entity, a *personnalité distincte de ses membres*, in French law are:

- it may own property;
- it may enter into contracts in its own name;
- it may sue and be sued;
- it will not be wound up by the death of one of its members.

However, in the case of a société civile immobilière, the consequences of being a separate legal entity from its members are not in French law as strong as for a trading company for the following reasons.

- *Sociétés civiles* (including a *société civile immobilière*), although separate entities from their members, are created by contract between the members and are therefore based on a relationship that is intuitus personae. This is to say that the personality, efforts and interests of each individual member have an important, perhaps essential, part to play in the formation, management and subsequent dissolution of sociétés civiles.

- A *société civile immobilière* is both a collective entity with a legal personality of its own and a contract between its various members. Article 1832 of the French Civil Code defines 'a société as a contract by which two or more persons agree to combine assets or contributions of work with a view to sharing profits or benefiting from the savings therefrom …'.
- A *société civile immobilière* must have at least two members (who may be husband and wife).
- A *société civile immobilière* does not (and cannot) have a board of directors nor any directors nor a chairman. It is managed on a day-to-day basis by the *gérant* (manager), appointed by the statuts which are the regulations or deed creating and governing the *société civile immobilière*. Since the vast majority of *société civile immobilière* companies are wholly passive, and do not trade in any sense, except for, perhaps, letting a property, the term 'management' should be tightly construed. The duties of the *gérant* generally consist of merely convening a routine annual general meeting and signing the accounts (if any).
- Although French commercial companies such as an 'SA' have their capital divided into shares called *actions*, the capital of the *sociétés civiles* (including *sociétés civiles immobilières*) is not divided into *actions* but into *parts d'intérêt*, (participation holdings), the transfer or assignment of which is restricted.

From the legal point of view, a *société civile immobilière* is a single purpose land holding vehicle whose only use is the purchasing and holding of property, land, and the like. Such a vehicle cannot be used for any other purpose.[287]

90.32.2 *Société civile immobilière*

The Employment Income Manual provides:

> **EIM11371 Homes outside the UK owned through a company: general background** [Jan 2018]
>
> ...Meaning of company
>
> [The Manual refers to the statutory definition of "company"[288] and continues:] This wide definition is not restricted to companies registered

[287] Frimston and Urquhart, "La Vie en France" Taxation Magazine, 13 June 2002, p.296.

[288] See 90.8 (Definition of "company").

> in the UK and includes a number of entities formed under foreign law through which individuals may acquire homes outside the UK. Such entities will generally be classified as opaque for UK tax purposes. Examples include the ownership of a home in France through a "Société Civile Immobiliere" (SCI) or in the United States through a Limited Liability Company.

The view that a SCI is a company for UK tax purposes is controversial.[289] A société civile is classified as a partnership in the UK/France IHT DTA.[290] The introduction of benefit in kind foreign homes relief and the France/UK DTA made the issue somewhat less important but it still matters.

The issue arose in *Joseph Carter v Baird* 72 TC 303 where a company sold land and purchased a SCI. The company claimed roll-over relief which only applied on a purchase of land. The company failed since it acquired an interest in the SCI and not land. Unfortunately the question of whether an SCI was transparent for CGT was not argued and the necessary expert evidence was not put to the general commissioners. (The litigant appeared in person and was not represented by counsel). The case therefore has no authority at all, and on another occasion there is nothing to stop a taxpayer putting forward the argument for transparency, properly supported by evidence.

90.33 Société en commandite par actions

Fraser says:[291]

> Société en Commandite par Actions (Luxembourg) ... seems to be a hybrid form, which does not occur in English law, that is essentially a limited partnership in which the limited partner interests are divided into freely transferable shares. This form of business association appears also to be found in the legal systems of France, Germany (Kommandit-gesellschaft auf Aktien), recognised by the Stamp Office as a body corporate and Spain (Sociedad comanditaria por acciones). Its classification as "opaque" in the direct tax list classification is in

[289] See Frimston and Urquhart, "La Vie en France" Taxation Magazine, 13 June 2002, p.296.

[290] See 115.10.2 (Treaty-situs: France/Italy). See too Avery Jones et al, "Characterisation of Other States' Partnerships for Income Tax", [2002] BTR at p.425.

[291] "Respectez les animaux etrangers! The Inland Revenue lists on entity classification" [2001] BTR 158.

> accordance with the EU directives and with [the OECD Partnerships Report].

This term is sometimes translated as "limited partnership with share capital"[292] and sometimes, though perhaps less often, as "company limited by shares"[293]. It is better to use the French term.

90.34 Commanditaire vennootschap (Netherlands)

Fraser says:[294]

> ... both "open" and "closed" forms are classified in the direct tax list as transparent. However, it appears from the [OECD Partnerships Report] that the "open" form has affinities with the French/Luxembourg société en commandite par actions.

90.35 Sociedad civil (Spain)

Fraser says:[295]

> ... although this is classified in the direct tax list as "opaque", its name is translated in [the OECD Partnerships Report] as "civil law partnership" and the other data on this form of business association in the report is suggestive of transparency.

90.36 Jersey partnerships

A Jersey general partnership is transparent.[296]

HMRC classify a Jersey limited partnership as transparent in the transparent/opaque list.[297]

[292] Eg para 1 OECD Commentary on art 10; see 30.15.7 ("Dividends"). Likewise the IATE database.

[293] The OECD Partnerships Report translates *Société en commandite par actions* as "Company limited by shares" in the list of Belgium entities, and as "Limited partnership with share capital" in the list of French entities. Is that just an accident, or does it reflect differences in French/Belgium law?

[294] "Respectez les animaux etrangers! The Inland Revenue lists on entity classification" [2001] BTR 158.

[295] See above fn.

[296] *Padmore v IRC* 62 TC 352; see Jersey Law Commission "The Jersey Law of Partnership" (consultation paper, 2008) para 21.12 ("Viewed as a whole, in fact the law of partnership of [England and Jersey is] essentially the same...") *https://www.jerseylawcommission.org.je/_files/ugd/f5ec37_0b83dbc3fc6740c79296c14b0c0582f0.pdf*

[297] See 90.54 (HMRC transparent/opaque list).

A Jersey separate limited partnership (SLP) is a legal person but not a body corporate.[298] In that respect it is like a Scots partnership. But art 12 Separate Limited Partnerships (Jersey) Law 2011 provides:

> (1) The property of a separate limited partnership shall be held for the benefit of the partners in accordance with the terms of the partnership agreement ...
> (2) The property of the SLP shall be so held in undivided shares, and –
> (a) as between the partners, no partner shall be entitled individually to exercise proprietary rights in respect of the property; and
> (b) in relation to third parties, the partners shall be collectively entitled to the property.

This is like an English partnership, not a Scots partnership (where the property belongs to the partnership and not the partners).[299] If one can imagine entities on a spectrum running from an English partnership, through the Scottish partnership, to a UK company, a SLP stands somewhere between an English and a Scottish partnership So it is clearly on the partnership side of the company/partnership dividing line, and should be classified and taxed as a partnership for UK tax law.

One difference between a SLP and UK partnerships is that a UK partnership must be carried on "with a view of profit", but a SLP may be formed for any lawful purpose. It could happen that a SLP is not carrying on business a view to profit. That might also happen with other foreign partnerships. Would a not-for-profit foreign partnership constitute be a partnership for UK tax purposes? Discuss. In practice the question will rarely (if ever) arise.

Crossley & Baldwin consider Jersey incorporated limited partnerships, and conclude these are transparent for IT/CGT;[300] though the position may depend on the drafting.

90.37 Foreign LLP

References to an LLP in UK legislation are references to UK incorporated

[298] Art 3(4) Separate Limited Partnerships (Jersey) Law 2011 states this expressly, but a SLP is in any event not a body corporate within the UK law meaning; see 90.9.3 (What is a body corporate?).

[299] See 85.3 (Nature of partnership share).

[300] *Taxation of Partnerships and LLPs* (1st ed, 2021) para 6.12, 6.13.

LLP (unless the context otherwise requires).[301] It is considered that the statutory rules which (generally) make a UK LLP transparent for tax purposes[302] do not apply to a foreign LLP.

HMRC agree. Business Income Manual provides:

> **BIM82145 Limited Liability Partnership: International aspects** [Jun 2016]
> **UK branches of overseas LLPs**
> The tax treatment of a UK branch of an overseas LLP, and the members of such a LLP, depends on how the foreign entity is regarded for the purposes of the UK taxation provisions. Where the foreign LLP is regarded as a 'body corporate' for the purposes of the UK Taxes Acts the profits of the UK branch will be chargeable to CT. On the other hand if it is regarded as a partnership then members are separately liable to Income Tax on their share of the branch's profits under the legislation for partnerships. The Limited Liability Partnerships Act 2000 only applies to UK registered LLPs.

This discrimination would be in breach of EU law but that matters rather less after Brexit.

HMRC classify a Jersey LLP as opaque in the transparent/opaque list. This is controversial.[303] However the issue seems unimportant because (partly as a result of the HMRC view and partly due to burdensome Jersey law requirements) the number of Jersey LLPs is small.[304]

90.38 European Economic Interest Grouping

90.38.1 *EEIG law background*

The BI Manual provides:

> **BIM82160 EEIGs: background information** [Jun 2016]
> A European Economic Interest Grouping (EEIG) is a form of business entity governed by EU regulation. The members of an EEIG may be companies, individuals or partnerships from two or more member states of the EU or the European Economic Area. ... An EEIG that has

[301] See 85.21.1 (Definition of LLP).

[302] See 85.21 (Limited liability partnership); 102.35.3 (Situs of LLP).

[303] Walker, "Limited Liability Partnerships: True Partnerships" [1998] JLR 1 argues that a Jersey LLP is a partnership in the ordinary sense of the word. In *R v IRC ex p. Bishopp* 72 TC 322 the court was asked but refused to decide the point.

[304] The number is 104 as at January 2020: *https://www.jerseyfsc.org/registry/documentsearch*

registered its official address in the UK is a body corporate with a legal personality.

See too App.2.7.2 (Legal person: Foreign law).

90.38.2 *EEIG tax treatment*

s.842 ITA	**s.990 CTA 2010**	**s.285A TCGA**
(1) The following rules about UK Economic Interest Groupings and European Economic Interest Groupings[305] apply for the purposes of charging income tax—	(1) The following rules about UK Economic Interest Groupings and European Economic Interest Groupings apply for the purposes of charging corporation tax in respect of income—	(1) The following rules about UK Economic Interest Groupings and European Economic Interest Groupings apply for the purposes of charging tax in respect of chargeable gains—
Rule 1 A grouping is treated as acting as the agent of its members.	[Identical]	[Identical]
Rule 2 The activities of a grouping are treated as those of its members acting jointly.	[Identical]	[Identical]
Rule 3 Each member of a grouping is treated as having a share of the grouping's property, rights and liabilities.	[Identical]	[Identical]
Rule 4 Any trade or profession carried on by the grouping is treated as carried on in partnership by the members of the grouping.	*Rule 4* Any trade carried on by the grouping is treated as carried on in partnership by the members of the grouping.	[Identical to ITA rule]
		Rule 5 A person is to be regarded as acquiring or

[305] Defined s.842(5) ITA/s.990(7) CTA 2010/s.285A(5) TCGA.

		disposing of a share of the assets of the grouping not only where there is an acquisition or disposal of assets by the grouping while he is a member of it, but also where he becomes or ceases to be a member of a grouping or there is a change in his share of the property of the grouping.
(2) For the purposes of Rule 3, a member's share of any property, rights or liabilities of a grouping is determined according to the contract under which the grouping is established.	(2) For the purposes of Rule 3, a member's share of any property, rights or liabilities of a grouping is determined in accordance with the contract under which the grouping is established.	[Identical to ITA rule]
(3) If the contract does not provide for this, the member's share is determined by reference to the share of the profits of the grouping to which the member is entitled under the contract.	[Identical]	[Identical]
(4) If the contract does not provide for this either, the members are treated as having equal shares of the property, rights and liabilities of the grouping.		

Section 990(5)(6) CTA 2010 addresses loan relationships aspects for CT purposes:

> (5) Part 5 of CTA 2009 (loan relationships) applies in relation to a grouping as it applies in relation to a firm.
> (6) For the purposes of subsection (5) see in particular the following provisions of Part 5 of CTA 2009—

> Chapter 9 (partnerships involving companies),
> section 467 (connections where partnerships involved),
> section 472 (meaning of "control"), and
> sections 473 and 474 (meaning of "major interest" etc).

The BI Manual provides:

> **BIM82160 EEIGs: background information** [Jun 2016]
> ...For the purposes of UK taxation of profits or losses an EEIG is fiscally transparent.

90.39 Common investment fund

The UK and the Netherlands have agreed the application of the Netherlands/UK DTA to UK pension scheme and charity investors in UK common investment funds ("CIFs"):

> A CIF is an arrangement whereby a number of registered pension schemes have pooled some or all of their investments into a common fund for investment purposes. The CIF must be no more than an investment agency for the assets of participating schemes. A CIF cannot be a registered pension scheme in its own right (See the HMRC Guidance).
>
> Charity CIFs are set up by Schemes made by the Charity Commission (the Commission) under [what is now] sections 96 to 99 of the Charities Act 2011. They operate as investment vehicles and are deemed by law to be charities themselves. They are therefore eligible for registration as charities in their own right.
>
> This Agreement applies to UK CIFs whose investors are:
>
> (a) Pension schemes which qualify for benefits under the above Convention;[306]
> (b) Charity organisations which qualify for benefits under the above Convention;[307] and
> (c) Other investors which qualify for benefits under a Convention for the avoidance of double taxation to which the Netherlands is a Contracting State.
>
> A CIF can act as a pooled investment vehicle for the assets of pension schemes or charities. The CIF invests these assets on behalf of those investors.

[306] Article 3, paragraph 1, letter l of the Convention and Article III, letter b of the Protocol.

[307] See Article 4, paragraph 2, letter b of the Convention.

The competent authorities of the Netherlands and the UK agree that a CIF is regarded as fiscally transparent in both countries. Since a CIF is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the CIF in proportion to their participations in the CIF.

Request for application of the benefits of a Convention on behalf of the participants

A CIF which is established in the UK and which derives income and gains arising in the Netherlands may itself, represented by its custodian, manager or depository, in lieu of and instead of the investors in the CIF, claim the benefits of an agreement for the avoidance of double taxation to which the Netherlands is a Contracting State and which is applicable to those investors, on behalf of those investors in the CIF and according to the conditions of such agreement.

Such claims may be subject to enquiry and, where requested, a custodian, manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim. A CIF may not make a claim for benefits on behalf of any investor in the CIF if the investor has itself made a claim for benefits in respect of the same income. If a CIF intends to make a claim for benefits on behalf of an investor, the custodian, manager or its depository should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.

90.40 Dutch stichting/Foundation

A note on terminology. The German word *Stiftung* and the Dutch word *Stichting* are both translated by the English word "foundation". However the entities are used in different ways, and do not necessarily have the same nature for UK tax purposes. Strictly, one should not use the word "foundation" without specifying the type of foundation referred to, but the context will generally make that clear. When referring to the Dutch entity, I use the word *Stichting* and prefer to avoid *foundation*.

90.40.1 *Stichting*

Article 2.285 of the Dutch Burgerlijk Wetboek (Civil Code) provides:[308]

1. Een stichting is een door een rechtshandeling in het leven	1. A stichting is a legal person formed by means of a juridical act,

[308] Dutch Civil Code, available in English on *http://www.dutchcivillaw.com*

geroepen rechtspersoon, welke geen leden kent en beoogt met behulp van een daartoe bestemd vermogen een in de statuten vermeld doel te verwezenlijken.

that has no members, and that intends to carry out an object, specified in its articles of incorporation, by using capital (property) which has been provided for this purpose....

3. Het doel van de stichting mag niet inhouden het doen van uitkeringen aan oprichters of aan hen die deel uitmaken van haar organen noch ook aan anderen, tenzij wat deze laatsten betreft de uitkeringen een ideëele of sociale strekking hebben.

3. The objects of a stichting may not include the making of distributions to its founders (incorporators) or to those who are participating in its bodies or to others, except, as regards the latter, when these distributions are made for charitable (philanthropic) or social purposes.

Para 1 is comparable to the definition of a Liechtenstein Foundation.

The Australian Taxation Office classifies a pension fund stichting as a trust:

> **Facts**
>
> An overseas pension fund is constituted as a Stichting that is a legal person under Dutch legal concepts.
>
> Under the bye-laws the purpose of the fund is to protect employees, former employees and their legal heirs from the consequences of old age, disablement and death in accordance with the pension regulations.
>
> The property of the pension fund consists of contributions by affiliated employers, investments and fund earnings.
>
> The pension fund is administered by a Board of trustees. The Board is authorised to undertake all actions relating to management and disposition within the framework of the objectives of the fund...
>
> **Reasons for Decision**
>
> [The ruling refers to the definition of "trust" in *Harmer v.FCT*; see 90.14.6 (Trust concept in Australia), and continues:]
>
> Having regard to the Bye-laws of the pension fund (the Stichting), all four elements are present so as to give rise to a trust relationship between the Stichting and those individuals entitled to benefits from the pension fund for the purposes of section 115-10 of the ITAA 1997.
>
> The Stichting has ownership and possession of the trust property and is the trustee. The trust property consists of the contributions made to the fund, investments and fund earnings. The beneficiaries are the

> employees, former employees and their legal heirs.
>
> The Bye-laws of the Stichting impose on it a personal obligation to deal with the trust property for the benefit of the beneficiaries.
>
> Having regard to the relationship between the Stichting, contributors, beneficiaries and potential beneficiaries and the express intention that the Stichting hold the property not exclusively for itself, but subject to an equitable obligation to deal with the property for the benefit of the beneficiaries the relationship constitutes a trust for the purposes of section 115-10 of the ITAA 1997.[309]

90.40.2 *Stichting Administratiekantoor*

de Vries explains:

> In the corporate environment, as a vehicle for orphan structures, foundations are used to hold the shares in financing bodies.
>
> In an estate planning environment or employee benefit scheme the foundation can be a vehicle to hold shares and exercise the voting rights or shares, whereas the economic rights related to the shares are transferred through depository receipts to the beneficiaries. This structure is a popular means to address the fact that the separation of voting rights from economic rights on shares in Dutch limited liability companies is not possible. In such cases the board of directors of the foundation are formed by independent persons (in estate planning structures usually persons trusted by the family) or, for example, the management board of other entities in the structure that holds a larger share of the entity which shares are partly transferred to the foundation. The foundation in these structures is usually referred to as a STAK (*stichting administratiekantoor*).
>
> In the field of estate planning, foundations are used to own and manage estates whereby the foundation can have a purpose incorporated in the articles of association comparable to a 'letter of wishes', which mandates the board of the foundation to make funds of the foundation available for certain designated purposes, such as funding the education for certain beneficiaries.
>
> ... a foundation is a separate legal entity under Dutch law, which is formed through the execution of a deed of incorporation by the civil law notary, and managed by its board of directors. The board of directors may consist of private individuals, but can also be legal entities, like other foundations or companies. Like other Dutch legal entities, a

[309] ATO Interpretative Decision ID 2008/2
https://www.ato.gov.au/law/view/document?locid=aid/aid20082

> foundation can hold assets in its own name, can enter into agreements etc. A foundation must have a specific objective (for example, the financing of the education of family members, the protection of the family wealth, and management of certain assets), to be specified in its articles of association.
>
> ...
>
> A further legal characteristic of a foundation is that it does not have members or shareholders, which is sometimes considered slightly odd by practitioners in common law jurisdictions, from the author's experience. The foundation can have beneficiaries, but the distribution prohibition (referred to above) establishes that the beneficiaries cannot be the same as the contributors or members of the board of the foundation (an important difference with the private foundation as indicated above regarding the distribution prohibition). A way to work around the distribution prohibition for a foundation may be to issue depositary receipts (*certificaten*) that give beneficial rights to assets that are legally owned by the foundation. It is common practice that through issuing depositary receipts the voting rights and economic rights of the assets (usually shares) are split: the voting rights of the shares remain with the foundation whereas the economic ownership of the assets rests with the holder of the depositary receipts. As referred to above, such a foundation is referred to as a STAK and is often used for asset protection or estate planning. Further a STAK may be used for employment benefit schemes. A STAK is in principle considered transparent for Dutch income tax purposes, and consequently the owners of the depository receipts will be taxed on income derived from the shares/assets held by the STAK. In the case of estate planning the board of the STAK will often be the parents whereas the depository receipts may be issued to the children. In such a way, the parents have control over the estate and can decide upon distributions to the children.[310]

Panico comments:

> the Dutch and Belgian practice of Stichting administratiekantoor (StAK) achieves a result that is functionally equivalent to an interest in possession trust. Under such an arrangement a foundation issues asset-backed notes or 'certificates' linked to some underlying assets (usually corporate shareholdings)so that the holders of such certificates are entitled to the income resulting from such underlying assets (eg dividends). The title to such assets vests in the foundation and the

[310] De Vries,"The Dutch Foundation" [2011] Journal of International Tax, Trust and Corporate Planning, p.299.

> functional outcome may be described as if the foundation held them on trust for the certificate holders. The Dutch expression reads that the assets are held by the foundation ten titel van beheer (literally 'by way of administration'),which is often rendered in English as 'on trust' for the certificate holders.
>
> The main defining element of the Dutch model foundation is its corporate nature as a legal person, as opposed to the Germanic and 'classic' reliance to the enforcement of the founder's 'unilateral declaration of will'. For this reason, Dutch foundations are often referred to as 'orphan corporate entities',ie ownerless incorporated legal persons, and as such they may be used in corporate arrangements such as securitization transactions, off-balance sheet collaterals, and top holding structures.[311]

A STAK is not an IHT-settlement as there is no element of succession. It is not an IT/CGT settlement as (if it is a trust) it is a bare trust. There is usually no element of bounty, in which case it is not a settlement-arrangement.

In the case of a STAK, the important question is what is the nature of the depositary receipt. It is tentatively suggested that the depositary receipt confers a proprietary interest on the holder and so is transparent.[312] The holder is treated for IT and CGT purposes as entitled to the dividends from the underlying assets held by the STAK. HMRC agree: they classify a Dutch stichting as transparent.[313] HMRC are presumably considering a STAK here, though that is not expressly stated.

90.40.3 *Stichting holds CCF*

The Australian Taxation Office discusses a Dutch pension fund stichting holding an Irish common contractual fund:

> **Issue**: Does Australia have the right to tax Australian sourced business profits that a Dutch Stichting (Stichting) receives as a unitholder in an Irish Common Contractual Fund (CCF), under Article 7 of Schedule 10 of the International Tax Agreements Act 1953 (the Netherlands Agreement)?
>
> **Decision**: No. Australia does not have the right to tax the Australian source business profits the Stichting receives as a unitholder in a CCF under Article 7 of the Netherlands Agreement.

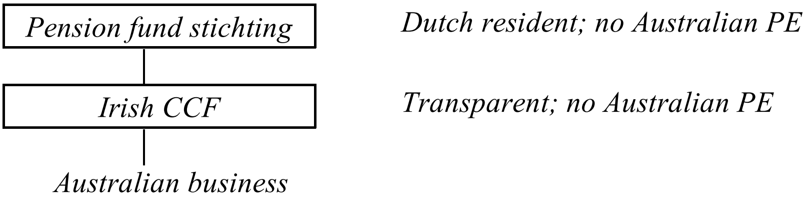
[311] Panico, "Private foundations and trusts: just the same but different?" [2016] Trusts & Trustees 132.

[312] See 71.2.6 (Denmark, Germany, Netherlands, Switzerland).

[313] See 90.54 (HMRC transparent/opaque list).

Facts
The Stichting is a legal entity incorporated in the Netherlands.
The Stichting is a pension fund whose sole purpose is to provide superannuation benefits for non-resident persons upon retirement or death.
The Stichting is exempt from income tax in the Netherlands under the tax laws of the Netherlands.
The Stichting has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes.
The Stichting is not a resident of Australia for the purposes of Australian tax.
The Stichting does not carry on business through a permanent establishment in Australia.
The Stichting is the only unitholder in an Irish CCF.
[The ruling refers to the definition of an Irish CCF; see 69.13 (Irish Common Contractual Fund).]
The CCF is not a resident of Ireland or Australia for the purposes of the tax treaty between Australia and Ireland.
The CCF receives Australian source business profits from investing the funds of the CCF.
The CCF does not carry on business through a permanent establishment in Australia.
The relationship between the manager and custodian of the CCF and the Stichting is considered a trust relationship for Australian tax purposes. The manager and custodian are the trustees, and the Stichting is the beneficiary.

I think the last sentence means that a CCF is transparent, which is also the HMRC view. Thus to summarise the structure:



Pension fund stichting
Dutch resident; no Australian PE
Irish CCF
Transparent; no Australian PE
Australian business

Reasons for Decision
[The statement sets out art. 7 (business profits), art. 3 (definition of 'enterprise of one of the States'; these are not set out here as they follow OECD Model form.]
Accordingly, for Article 7(1) of the Netherlands Agreement to apply to the Australian sourced business profits derived by the Stichting, the Stichting must be:

- a person
- a resident of the Netherlands, and
- an enterprise.

for the purposes of the Netherlands Agreement.

90.40.4 *Stichting a treaty-person*

The Australian Taxation Office say:

Is the Stichting a 'person' for the purposes of the Netherlands Agreement?
Article 3(1)(d) of the Netherlands Agreement defines the term 'person' to mean 'an individual, a company and any other body of persons'. The term 'company' is defined in

Article 3(1)(e) of the Netherlands Agreement to mean ‘any body corporate or any entity which is assimilated to a body corporate for tax purposes’. The term ‘body corporate’ is not defined for the purposes of the Netherlands Agreement, and in accordance with Article 3(3) of the Netherlands Agreement, the term takes its meaning from the tax laws of Australia unless the context otherwise requires.

As there is no definition of the term ‘body corporate’ under Australia’s domestic tax law provisions, the ordinary meaning of the term applies as per tax treaty interpretation principles contained in Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

The Butterworths Concise Australian Legal Dictionary 2nd ed. defines a body corporate as ‘an artificial legal entity having separate legal personality’.

[The statement sets out Article 285 of the Dutch Civil Law Code and continues:]

As the Stichting is created under Netherlands law and has a legal personality under Netherlands law, it should be recognised as a legal entity in Australia in accordance with the principle in *Chaff and Hay Acquisition Committee v Hemphill* (1947) 74 CLR 375 (Chaff’s Case).

In Chaff’s Case, it was found by the High Court that a committee constituted in South Australia under the Chaff and Hay (Acquisition) Act 1944 (SA) was a legal entity despite not being incorporated under South Australian law. Chief Justice Latham found that as the committee was a legal entity in South Australia as distinct from the legal personalities of the natural persons who constitute it, then it is by comity recognised as a legal entity elsewhere. His Honour went on to state (at 384-5) that the same principle applied to the recognition of bodies created by foreign law which have the rights and liabilities distinct from those of the natural persons who constitute them. Justice Starke J further stated (at 388) that ‘recognition is given in the case of companies or artificial persons which have come into existence in countries whose law of incorporation is based on principles different from those of England and Australia’.

This principle is also recognised in the Foreign Corporations (Application of Laws) Act 1989. This Act applies in determining a question arising under Australian law where it is necessary to determine the question by reference to a system of law other than Australian law. Section 7(2) provides that any question relating to whether a body or person has been validly incorporated in a place outside Australia is to be determined by reference to the law applied by the people in that place.[314]

As the Stichting is a legal entity created by legal authority in the Netherlands to achieve certain purposes, the Stichting has the features of a body corporate under the ordinary meaning of the term. As such, the Stichting is a ‘person’ for the purposes of the Netherlands Agreement.

90.40.5 *Is stichting treaty-resident*

The Australian Taxation Office say:

> **Is the Stichting a resident of the Netherlands for the purposes of the Netherlands Agreement?**

[314] The same applies in the UK: see Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 30R-009 (Status).

> [Article 4 of the Netherlands Agreement provides:
> "For the purposes of this Agreement, a person is a resident of one of the States ... (b) in the case of the Netherlands, if the person is a resident of the Netherlands for the purposes of Netherlands tax but not if he is liable to tax in the Netherlands in respect only of income from sources therein."]

The Australian Taxation Office treat this issue briefly:

> The Stichting here has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes. The Stichting therefore satisfies this requirement.

Article 4 of the Netherlands Agreement was not OECD Model form definition of residence, so the position may be different under UK tax law.

90.40.6 *Is stichting an enterprise*

The Australian Taxation Office say:

> **Is the Stichting an enterprise for the purposes of the Netherlands Agreement?**
> The High Court in *Thiel v FCT*[315] considered the meaning of the expression 'the profits of an enterprise of one of the contracting states' in the Business Profits Article of the tax treaty between Australia and Switzerland.
> Chief Justice Mason and Justices Brennan and Gaudron stated:
>
> > this statement recognises that an activity, as well as a framework within which activities are engaged in, may constitute an "enterprise" for the purposes of the Agreement.
> > ... an enterprise "may consist of an activity or activities and be comprised of one or more transactions provided they were entered into for business or commercial purposes".[316]
>
> In carrying out the activities of a pension fund, the Stichting is considered to constitute an enterprise as the activities it conducts are entered into for business or commercial purposes.
> **Conclusion**
> Accordingly all the necessary elements of Article 7(1) of the Netherlands Agreement are satisfied by the Stichting in order for the taxing rights of the Netherlands and Australia to be determined under Article 7(1) of the Netherlands Agreement.
> The Stichting does not have a permanent establishment in Australia and Article 7(1) of the Netherlands Agreement provides a residence-only taxing right to the Netherlands over the business profits of the Stichting. Accordingly, Australia, as the country of source of the business profits, does not have a right to tax the business profits under the Netherlands Agreement.[317]

[315] (1990) 171 CLR 338; (1990) 21 ATR 531; 90 ATC 4717.

[316] (1988) 21 FCR 122 at p.146.

[317] ATO ID 2008/62 (April 2008) *https://www.ato.gov.au/law/view/view.htm?docid=AID/AID200862/00001&PiT=99991231235958*

90.41 Fonds voor gemene rekening

The UK and the Netherlands have agreed the application of the Netherlands/UK DTA to *fonds voor gemene rekening* (closed funds for mutual account,[318] "closed FGR"):

> This Agreement applies to closed FGRs formed in conformity with the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. A closed FGR can act as a pooled investment vehicle for the assets of pension funds and other investors. The closed FGR invests these assets on behalf of those investors.
>
> The competent authorities of the Netherlands and the UK agree that a closed FGR is fiscally transparent.
>
> A closed FGR can also consist of several closed FGRs as described in par. 4 of the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. Such an umbrella fund is also fiscally transparent.
>
> Since a closed FGR is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the closed FGR in proportion to their participation in the fund.
>
> *Request for application of the benefits of a Convention on behalf of the participants*
>
> A closed FGR which is established in the Netherlands and which receives income arising in the UK may itself, represented by its fund manager or its depository, in lieu of and instead of the investors in the closed FGR, claim the benefits of an agreement for the avoidance of double taxation to which the UK is a party and which is applicable to those investors on behalf of those investors in the closed FGR.
>
> Such claims may be subject to enquiry and, where requested, a fund manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim.
>
> A closed FGR may not make a claim for benefits on behalf of any investor in the closed FGR if the investor has itself made a claim for benefits in respect of the same income. If a closed FGR intends to make a claim for benefits on behalf of an investor, the fund manager or its depositary should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.
>
> This Agreement shall be subject to regular review.

90.42 Bewind

Bewind is a distinctively Dutch institution, found only in Dutch law and in the Roman-Dutch system of South African law.

[318] This may also be translated as 'fund for mutual account' or 'fund for joint account'.

Bewind may be translated as fiduciary administration or administratorship. Under a bewind, a bewindvoerder (fiduciary administrator) has power to manage the assets of another person, the rechthebbende (literally, the person entitled; one might translate as "beneficiary" but that term is inapt if it is taken to suggest the existence of a trust).

A bewind may be made by will[319] or by lifetime gift.[320]

It may also be used to manage the assets of a person lacking capacity (the English law equivalent is a deputy appointed by the Court of Protection, or an attorney appointed by the individual under a lasting power of attorney).

Kortmann and Verhagen say:

> The *bewind* cannot be characterised as a trust in the sense of Article 1 of the Principles. A trust in the sense of the Principles only exists in situations where the trustee legally owns the assets to be managed, which is not so in the case of *bewind*. In the case of *bewind* the beneficiary is legal owner of the assets to be managed. There are, however, restrictions on the beneficiary's right to dispose of the assets placed under *bewind*. Either the legal owner cannot dispose of these assets at all, or he can only do so subject to the *bewind*. The *bewindvoerder*, as the administrator is usually called, acts in the case of *bewind* only as agent for the owner of the assets (the beneficiary). Because the assets to be managed are not legally owned by the *bewindvoerder*, the assets remain unaffected by the bankruptcy of the *bewindvoerder*.[321]

There is no close equivalent of a bewind in English or Scots law. It is similar in effect to an irrevocable power of attorney, a type of agency. In some ways it is similar in effect to bare trust: the administrator has power to manage the assets similar to a bare trustee; but it is irrevocable (in the sense that the owner cannot call for the assets and terminate the bewind) and it is not a trust in that the assets are not held in the name of the fiduciary administrator on trust.[322]

[319] A testamentair bewind, Dutch Civil Code Book 4 art 153-178.

[320] A schenkingsbewind, Dutch Civil Code Book 7 art 182.

[321] Hayton, Kortmann and Verhagen, *Principles of European Trust Law, Law of Business and Finance* Vol 1 (1999), p.199. Similarly Gretton "Trusts Without Equity" (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5: "Though it functions as a trust, the *bewind* is not a trust, for a simple reason: the location of legal title is the reverse of the trust."

[322] See 87.7 (Bare trust/nomineeship).

A bewind is not a settlement within the standard IT/CGT definition, as if it is a trust, if falls within the bare trust disregard. It is transparent for IT/CGT purposes.

A simple bewind is not an IHT-settlement as property is not held for persons in succession,[323] or to accumulate income, or with discretionary power over income.[324] It is transparent for IHT purposes.

Vruchtgebruikbewind (administration in respect of a usufruct) and tweetrapsmakingbewind (administration of fideicommissary disposition) raise different issues, and the question of whether they are equivalent to a trust for persons in succession would need further consideration.

It appears that the South Africa Bewind is similar to the Netherlands.[325]

90.43 Limited liability company

90.43.1 *LLC: US law background*

In UK law, the terms "company" and "corporation" are (more or less) synonymous.[326] But in US law, a corporation and a limited liability company are distinct types of entity.

Field explains the US law background:

> In 1977, in an effort to develop a vehicle that provided owners corporate-like protection from liability for the entity's debts while attempting to achieve pass-through tax treatment under the Kintner regulations,[327] the Wyoming legislature enacted the country's first legislation authorizing LLCs. LLCs combined very desirable characteristics: limited liability for all members, partnership features such as dissolution at will and lack of free transferability ...
>
> In 1988, the IRS finally resolved the issue of the tax classification of an LLC formed under Wyoming's LLC statute. In a published revenue ruling, the Service concluded that any LLC formed under Wyoming's LLC statute to carry on a business and divide the gains therefrom would necessarily (by virtue of the terms of the LLC statute itself) lack the corporate characteristics of continuity of life and free transferability of

[323] See 87.6.2 (Limb (a): persons in succession).

[324] See 87.6.3 (Limb (b): accumulation /power to make income payment).

> interests, and therefore would be classified as a partnership for federal tax purposes. The Service reached this conclusion despite the fact that neither the managers nor the members of the LLC are personally liable for the LLC's debts and obligations.
>
> After this IRS pronouncement clarifying the federal tax classification of LLCs, demand for LLCs grew rapidly, and states quickly began enacting their own LLC statutes. Some of these state statutes, like Wyoming's LLC statute, were "bullet-proof," causing any LLC formed thereunder to necessarily lack at least two corporate characteristics, thereby automatically resulting in partnership classification. Other state statutes were sufficiently flexible so as to allow the LLC to qualify as either a partnership or a corporation for federal tax purposes, depending on the terms of the specific LLC agreement.
>
> This flexibility afforded under some state LLC statutes highlighted the failure of the resemblance test. One commentator explained that, "practically speaking, there is no difference between a closely-held entity that is organized as an LLC and one that is organized as a corporation .... Left unchanged, two very different tax regimes will govern entities with almost identical management and perhaps even similar financial structures." The failure of the corporate resemblance test was also illustrated by professional corporations and limited partnerships, which are also business organizations that could be classified for tax purposes as partnerships under the corporate resemblance test while retaining significant corporate features like limited liability. Moreover, given the bright line rules set forth in the Kintner regulations and the flexibility afforded under the applicable state business statutes, practitioners were often able to create LLCs and other business entities with a carefully tailored set of rights and responsibilities so as to achieve tax classification as either a corporation or a partnership, as desired by the client, while retaining significant features of the other classification.[328]

A paper entitled "Choice of Business Entity" provides:[329]

[328] "Checking in on Check-the-Box" 42 Loy. L.A. L. Rev. 451 (2009) (footnotes omitted) *http://digitalcommons.lmu.edu/llr/vol42/iss2/4* Footnotes are omitted. For a history which traces LLCs back to 19th century US limited partnership associations, and to German law, see Gazur and Goff, "Assessing the Limited Liability Company" (1991) 41(2) Case Western Reserve Law Review 389; Gazur, "The Limited Liability Company experiment: unlimited flexibility, uncertain role" (1995) 58(2) Law and Contemporary Problems 135, 139 n.2.

[329] Joint Committee on Taxation, (2015) *https://www.jct.gov/publications.html?func=startdown&id=4765*

> LLCs are neither partnerships nor corporations under applicable State law, but they generally provide limited liability to their owners for obligations of the business. LLCs are generally treated as partnerships for Federal tax purposes, unless an election is made to be treated as a corporation. Specifically, under regulations promulgated in 1996, any domestic unincorporated entity with two or more members that is not publicly traded is treated as a partnership under the default rules but may elect to be treated as a corporation for Federal income tax purposes, and any single-member unincorporated entity is disregarded (*i.e.*, treated as not separate from its owner) for Federal income tax purposes under the default rules (though it may elect to be treated as a corporation). These regulations, known as the check-the-box regulations, were a response, in part, to the growth of LLCs.

To a UK reader, it may seem paradoxical to say that a limited liability *company* may be a partnership for US tax purposes, but:

(1) "Company" in foreign law may not have the same meaning as it has in UK law, or UK tax law.[330] It is no more paradoxical than to say:
    (a) An unincorporated association (which is not a company in the general sense) is a company for UK tax purposes.
    (b) A LLP (which is a body corporate) is a partnership for UK tax purposes

(2) In any case, a LLC is not actually a partnership or a corporation, for general US law purposes, but simply *treated* as one or the other for US tax purposes.

90.43.2 *Varieties of LLC*

There are differences between LLC laws in different US states. The INT Manual provides:

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> HMRC understand that the LLC law of other US states is substantially the same as that of Delaware and, as such, do not believe members of other US LLCs will generally receive or be entitled to profits either.

A number of tax haven jurisdictions have enacted LLC legislation, based on the Delaware model.

I focus on Delaware LLCs but occasionally refer to others. I am not aware of differences that matter for UK tax.

[330] See 90.4.1 (English language terminology)

90.44 Delaware LLC Act

Delaware LLCs are governed by the Delaware Limited Liability Company Act (LLCA), which is in chapter 18 Title 6 of the Delaware Code.[331] That is divided into 12 subchapters, numbered 18-101, 18-201, etc. I here set out the provisions of the LLCA which are most important for the UK tax analysis.

90.44.1 *LLC agreement/LLC interest*

Art 18-101(9) Delaware LLCA provides:

> "Limited liability company agreement" means any agreement (whether referred to as a limited liability company agreement, operating agreement or otherwise), written, oral or implied, of the member or members as to the affairs of a limited liability company and the conduct of its business. ... A limited liability company (including any protected series or registered series thereof) is not required to execute its limited liability company agreement. A limited liability company (including any protected series or registered series thereof) is bound by its limited liability company agreement whether or not the limited liability company (or any protected series or registered series thereof) executes the limited liability company agreement...

Art 18-101(10) Delaware LLCA provides:[332]

> "Limited liability company interest" means a member's share of the profits and losses of a limited liability company and a member's right to receive distributions of the limited liability company's assets.

90.44.2 *Legal personality*

Art 18-201(b) Delaware LLCA provides:

> A limited liability company formed under this chapter shall be a separate legal entity, the existence of which as a separate legal entity shall continue until cancellation of the limited liability company's certificate of formation.

That is, a LLC has legal personality.

90.44.3 *Perpetual succession*

Art 18-801(a) Delaware LLCA provides:

[331] *https://delcode.delaware.gov/title6/c018/index.html*

[332] Formerly Art 18-101(8) Delaware LLCA.

> (a) A limited liability company is dissolved and its affairs shall be wound up upon the first to occur of the following:
> (1) At the time specified in a limited liability company agreement, but if no such time is set forth in the limited liability company agreement, then the limited liability company shall have a perpetual existence;

That is, a LLC has perpetual succession.

90.44.4 *Who carries on LLC business*

Art 18-106(a) Delaware LLCA provides:

> A limited liability company may carry on any lawful business, purpose or activity ...

It seems clear that the business of a LLC is carried on by the LLC and not by its members.[333]

90.44.5 *Entitlement/distribution of LLC profit*

Art 18-503 Delaware LLCA provides:

> The profits and losses of a limited liability company shall be allocated among the members, and among classes or groups of members, in the manner provided in a limited liability company agreement. If the limited liability company agreement does not so provide, profits and losses shall be allocated on the basis of the agreed value (as stated in the records of the limited liability company) of the contributions made by each member to the extent they have been received by the limited liability company and have not been returned.

Art 18-601 Delaware LLCA provides:

> Except as provided in this subchapter, to the extent and at the times or upon the happening of the events specified in a limited liability company agreement, a member is entitled to receive from a limited liability company distributions before the member's resignation from the limited liability company and before the dissolution and winding up thereof.

Art 18-606 Delaware LLCA provides:

> Subject to §§ 18-607 and 18-804 of this title, and unless otherwise provided in a limited liability company agreement, at the time a member

[333] The FTT found as a fact that this was the case for Mr Anson's LLC, see *Swift v HMRC* [2010] UKFTT 88 (TC) at [6](1). I expect the same is true of every LLC.

> becomes entitled to receive a distribution, the member has the status of, and is entitled to all remedies available to, a creditor of a limited liability company with respect to the distribution. A limited liability company agreement may provide for the establishment of a record date with respect to allocations and distributions by a limited liability company.

Art 18-607 Delaware LLCA provides:

> (a) A limited liability company shall not make a distribution to a member to the extent that at the time of the distribution, after giving effect to the distribution, all liabilities of the limited liability company, ... exceed the fair value of the assets of the limited liability company

Art 18-804 Delaware LLCA provides:

> (a) Upon the winding up of a limited liability company, the assets shall be distributed as follows:
> (1) To creditors, including members and managers who are creditors, to the extent otherwise permitted by law, in satisfaction of liabilities of the limited liability company (whether by payment or the making of reasonable provision for payment thereof) ...
> (2) Unless otherwise provided in a limited liability company agreement, to members and former members in satisfaction of liabilities for distributions under § 18-601 or § 18-604 of this title...
> (b) A limited liability company which has dissolved:
> (1) Shall pay or make reasonable provision to pay all claims and obligations, including all contingent, conditional or unmatured contractual claims, known to the limited liability company;
> (2) Shall make such provision as will be reasonably likely to be sufficient to provide compensation for any claim against the limited liability company which is the subject of a pending action, suit or proceeding to which the limited liability company is a party; and
> (3) Shall make such provision as will be reasonably likely to be sufficient to provide compensation for claims that have not been made known to the limited liability company or that have not arisen but that, based on facts known to the limited liability company, are likely to arise or to become known to the limited liability company within 10 years after the date of dissolution...

90.44.6 *Liability for debts*

Art 18-303 Delaware LLCA provides:

> (a) Except as otherwise provided by this chapter, the debts, obligations and liabilities of a limited liability company, whether arising in contract,

> tort or otherwise, shall be solely the debts, obligations and liabilities of the limited liability company, and no member or manager of a limited liability company shall be obligated personally for any such debt, obligation or liability of the limited liability company solely by reason of being a member or acting as a manager of the limited liability company.[334]

Turning to the question of whether a LLC is liable for a member's debts:

> 18-703. Member's limited liability company interest subject to charging order.
> (a) On application by a judgment creditor of a member or of a member's assignee, a court having jurisdiction may charge the limited liability company interest of the judgment debtor to satisfy the judgment. To the extent so charged, the judgment creditor has only the right to receive any distribution or distributions to which the judgment debtor would otherwise have been entitled in respect of such limited liability company interest...
> (d) The entry of a charging order is the exclusive remedy by which a judgment creditor of a member or a member's assignee may satisfy a judgment out of the judgment debtor's limited liability company interest and attachment, garnishment, foreclosure or other legal or equitable remedies are not available to the judgment creditor, whether the limited liability company has 1 member or more than 1 member.
> (e) No creditor of a member or of a member's assignee shall have any right to obtain possession of, or otherwise exercise legal or equitable remedies with respect to, the property of the limited liability company.

90.44.7 *Ownership of assets*

Para 18.701 Delaware LLCA provides:

> A member has no interest in specific limited liability company property.

90.45 LLC: Entity categorisation

90.45.1 *LLC: Partnership?*

A LLC is not a partnership in US law. That does not mean that:

[334] For completeness, this continues:

> (b) Notwithstanding the provisions of subsection (a) of this section, under a limited liability company agreement or under another agreement, a member or manager may agree to be obligated personally for any or all of the debts, obligations and liabilities of the limited liability company.

But that must be true of all entities.

(1) It *cannot* be classified as a partnership in the general UK law sense; or

(2) References in a UK statute to a partnership cannot (in context) include an LLC.

In *Anson* the FTT seem to say that an LLC is (or more accurately, that Mr Anson's LLC was) a partnership in the UK law sense:[335]

> [1] [The LLC] stands somewhere between a Scots partnership and a UK company, having
>
> [a] the partnership characteristics of the members being entitled to profits as they arise and owning an interest comparable to that of a partnership interest, and
>
> [b] the corporate characteristics of carrying on its own business without liability on the members and there being some separation between Managing Members and other members falling short of the distinction between members and directors.
>
> [2] Since we have to put it on one side of that dividing line we consider that it is on the partnership side ...[336]

The FTT did not have to determine whether the LLC was a partnership, the question it had to decide was a different one.[337] None of the courts on appeal addressed this classification issue directly.

It is considered that an LLC is not to be classified as a partnership in UK law, because the *definition* of partnership in UK law requires that the partnership business is carried on by the partners; and that is not the case for an LLC.[338] An LLC may have partnership-like features, as the FTT found that it did, but it is still not classified as a partnership in UK law, if it does not meet the statutory definition.

[335] Reported under the pseudonym *Swift v HMRC* [2010] UKFTT 88 (TC) at [52]. The SC commented [2015] UKSC 44 at [37]:

> "given the points of similarity, the comparison made by the FTT between the LLC and a Scottish partnership was understandable".

This leaves the classification of entity question open.

[336] The FTT added "...particularly in relation to its income". But it is not possible that an entity is a partnership in relation to its income and not in relation to its capital gains.

[337] See 90.47.1 (LLC: Other tax issues).

[338] See 90.44.4 (Who carries on LLC business); 90.3 (Entity classification test(s)).

90.45.2 *LLC: Body corporate/company*

The Delaware LLCA does not use the term "body corporate"; perhaps this term is regarded as archaic and not much used in US domestic law. But a LLC is classified as a body corporate in UK law, as meets the requirements of a body corporate: it has legal personality, perpetual succession, and state sanction.[339]

A consultation paper on Guernsey LLCs provides:[340]

> An LLC may, most naturally, fall to be described as a body corporate with legal personality, notwithstanding that the intention is that it would not, by default, be taxed as a company.

The position is the same for a Bermuda LLC. Section 31(6) [Bermuda] LLCA 2016 provides that a Bermuda LLC is:

> a separate legal entity, the existence of which as a separate legal entity shall continue until the LLC is dissolved, and the LLC shall not be dissolved by reason only that the LLC has no members.

Section 9(3) [Cayman Islands] Limited Liability Companies Law 2016 expressly provides that a LLC is a body corporate:

> a limited liability company shall be a body corporate (with legal personality separate from that of its members from time to time)...[341]

On the basis that a LLC is a body corporate and not a partnership, it is a company within the standard tax definition.[342]

[339] See 90.44.2 (Legal personality); 90.44.3 (Perpetual succession); 90.9.3 (What is a body corporate?).
A Canadian court reached a similar conclusion in *Boliden Westmin v British Columbia* [2007] BCSC 351. A Nevada LLC had hallmarks of a corporation: limited liability, legal personality, shares of some sort though of a different name, right to deal with property, to contract, to sue, in its own name. The LLC was a corporation for Canadian tax purposes. The Court applied a resemblance test not quite the same as UK law; see too 90.5 (Foreign law classification/treatment) for possible differences between Canadian and UK entity classification.

[340] States of Guernsey, "Consultation on the potential enactment of LLC legislation in Guernsey" p.8 (2019).
https://www.wearguernsey.com/media/6971/llc-consultation-report.pdf

[341] The wording is derived from s.1(2) LLPA 2000.

[342] See 90.8 (Definition of "company").

90.45.3 *Jersey LLC: a body corporate?*

Jersey appears to be different. Section 2(2) Limited Liability Companies (Jersey) Law 2018 provides:

> A limited liability company has legal personality that is separate from that of its members but is not a body corporate.

The Guernsey consultation paper comments:[343]

> ... some jurisdictions have provided for an LLC to have legal personality, without being a body corporate. It is thought that this may be
> [1] to assist in determining domestic tax treatment and/or
> [2] to strengthen the argument that other jurisdictions should not treat LLCs (or at least those which have not elected to be taxed as companies) as companies for tax purposes in those jurisdictions.

Point [2] does not work, or at least, not in the UK, because whether an entity is a body corporate in the UK depends on whether it fits the UK criteria of a body corporate (which a Jersey LLC actually does). In other words, it is a matter for Jersey law to decide if a Jersey LLC is a body corporate in Jersey law, but it is a matter of UK law to decide if a Jersey LLC is a body corporate in UK law.[344] If it is desired "to strengthen the argument" that the UK should not treat a Jersey LLC as a company for UK tax purposes, that can only be achieved by altering the *characteristics* of a LLC, not by giving it a different label. "The manufacture of a five-pronged implement for manual digging results in a fork even if the manufacturer, unfamiliar with the English language, insists that he intended to make and has made a spade."[345]

I would be grateful for any reader who could identify discussion on the Jersey provision, but an unsympathetic commentator may regard it as no more than an attempt to pull the wool over the eyes of a foreign revenue.

90.46 LLC: US tax credit

This section considers the position of UK resident members of an LLC who do not qualify for the corporate US tax credit relief because:

[343] States of Guernsey, "Consultation on the potential enactment of LLC legislation in Guernsey" p.8 (2019) *https://www.weareguernsey.com/media/6971/llc-consultation-report.pdf*

[344] See 90.4.1 (English language terminology).

[345] *Street v Mountford* [1985] AC 809 at p.819.

(1) they are not companies, or
(2) they are companies but hold less than 10% of the votes in the LLC.[346]

In *Anson v HMRC* the taxpayer was a member of a Delaware LLC. For US tax purposes, the LLC was treated as a partnership, and transparent in the sense that the taxpayer was liable to US tax on his share of the LLC profits. Anson was a remittance basis taxpayer, but remitted the income (less US tax) to the UK, and so was liable to UK income tax on the amount remitted.

The taxpayer was an individual and so did not qualify for corporate tax credit. He claimed DTA Tax Credit under art 24(4)(a) USA/UK DTA[347] and Unilateral Tax Credit.[348] There was no material difference between these[349] and I refer to the current DTA.

So far as relevant, art 24(4)(a) USA/UK DTA provides:

> United States tax ... shall be allowed as a credit against any UK tax computed by reference to the same ... income ... by reference to which the United States tax is computed.[350]

SC held that this relief applied.

I think an unstated intuition underlying the SC (and FTT) decisions is that the US and UK taxes combined, then amounting to a 67% tax rate, would be egregious double taxation, and the DTA should be construed to prevent that.[351]

The FTT noted that its decision was limited to Anson's LLC and may not be of general application,[352] but it has been said that Anson's LLC did not have any particularly unusual features.[353]

[346] See 90.48 (LLC: Corporate tax credit).

[347] *Anson* also claimed relief under the previous DTA, but there was no material difference between them, so I refer only to the current DTA. For side by side comparison of these DTAs, see *https://www.foreigndomiciliaries.co.uk/index.php/Documents_archive*

[348] See 111.1 (Credit for foreign tax).

[349] *Anson v HMRC* [2015] UKSC 44 at [27].

[350] See 111.5 (Same income rule).

[351] See 107.4 (Co/shareholder double taxation).

[352] [2010] UKFTT 88 (TC) at [17].

[353] Sullivan & Cromwell LLP, "Recent Developments Regarding Entity Classification for UK Tax Purposes" (2013) *https://www.lexology.com/library/detail.aspx?g=7eee05e2-6afe-41c7-86a7-51842386586a*

90.46.1 *Anson: Findings of fact*

The key findings of fact were as follows. The FTT identified art 18-101(10) and art 18-503 Delaware LLCA as particularly important[354] and continued:[355]

> This means that the profits do not belong to the LLC in the first instance and then become the property of the members because there is no mechanism for any such change in ownership, analogous to the declaration of a dividend. It is true ... that the assets representing those profits do belong to the LLC until the distribution is actually made but we do not consider that this means that the profits do not belong to the members... Conceptually, profits and assets are different, as is demonstrated by the reference to both in the definition of "limited liability company interest" ... Accordingly, our finding of fact ... is that the members of [the LLC] have an interest in the profits of [the LLC] as they arise.

There was some debate about what the FTT actually found. The UT and CoA understood the FTT's finding that the profits belonged to the members as meaning the members had a proprietary entitlement to the profits. But the SC held that this was not the finding of fact:

> [38] ... It is clear from the FTT's decision that it understood that, as it said, "conceptually, profits and assets are different". It also understood that the assets of the business were the property of the LLC. It based its conclusion that "the profits belong as they arise to the members" not upon a confusion between profits and assets, but upon the expert evidence as to the combined effect under Delaware law of sections 18-101(8) and 18-503 of the LLC Act, which respectively defined a member's interest in an LLC as his share of profits and losses, and required the profits and losses to be allocated among the members in the manner provided in the LLC agreement, and article IV of the LLC agreement itself, which required all income and expenditure to be respectively credited and debited to the members' capital accounts in accordance with their profit shares. The natural reading of the FTT's decision, in those circumstances, is that when it described the profits as belonging to the members it was referring to a right *in personam* rather than a right *in rem*...
> [51] ...The questions whether the members had a right to the profits,

[354] See 90.44.5 (Members entitlement to LLC profit).

[355] [2010] UKFTT 88 (TC) at [10].

> and as to the nature of that right, were questions of non-tax law, governed by the law of Delaware. The FTT's conclusion, whether correctly construed
>
> [1] as a finding that Delaware law had the effect of conferring on the members of the LLC an automatic statutory (or contractual) entitlement to the profits of the LLC, or
>
> [2] as a finding that Delaware law vested the members with a proprietary right to the profits as they arose,
>
> was on either view a finding of fact. Secondly, domestic tax law - in this case, the relevant double taxation agreements as given effect in UK law - then fell to be applied to the facts as so found...
>
> [119] It is relevant to note, in the first place, that the rights of a member of the LLC were found to arise from the LLC Act, combined with the LLC agreement. Secondly, that agreement was not a contract between the LLC and its members: the LLC was not a party to it, but was brought into being by it, on the terms set out in it and in the provisions of the LLC Act. It was thus the constitutive document of the LLC. It was against that background that the FTT made findings which contradict the premise that the profits belong to the LLC in the first instance and are then transferred by it to the members. Their conclusion, on the contrary, was that, under the law of Delaware, the members automatically became entitled to their share of the profits generated by the business carried on by the LLC as they arose: prior to, and independently of, any subsequent distribution.
>
> [121] Mr Anson was entitled to the share of the profits allocated to him, rather than receiving a transfer of profits previously vested (in some sense) in the LLC, it follows that his "income arising" in the US was his share of the profits. That is therefore the income liable to tax under UK law, to the extent that it is remitted to the UK. There is no dispute as to the income which was taxed in the US: that was Mr Anson's share of the profits of the LLC. Mr Anson's liability to UK tax is therefore computed by reference to the same income as was taxed in the US. He accordingly qualifies for [Foreign Tax Credit relief under art 24(4)(a) USA/UK DTA].

The SC were therefore saying it didn't matter whether the FTT was describing a proprietary or non-proprietary contractual entitlement (if the non-proprietary entitlement here can be described as contractual).

If the members did have a proprietary entitlement to the profits, even the CoA would have agreed that the income on which Mr Anson was taxable in both countries was the same. But the SC said that it didn't matter whether they had a merely contractual entitlement. It was sufficient for the

FTT to find that Mr Anson was entitled to the profits and therefore the income he was liable to UK tax on was the same as in the US.

90.46.2 *HMRC ability to challenge facts*

HMRC revised their view in the INTM in December 2023. I refer to this as the HMRC post-2023 view.

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> The Supreme Court held that if Mr Anson was entitled to the share of profits allocated to him, rather than receiving a transfer of profits previously vested (in some sense) in the LLC, it followed that his "income arising" in the US was his share of profits. Based on the FTT's findings of fact, the Supreme Court held that Mr Anson was entitled to DTR as he was liable to UK and US taxes on his share of the profits.

The Manual continues:

> The Supreme Court held that the FTT's finding that the profits did not belong to the LLC in the first instance and that the members had an interest in the profits as they arose was a finding of fact on foreign law. As such, it is not binding in subsequent cases.

Of course courts do from time to time make wrong findings of foreign law, and foreign law is classified as fact, and so there are no binding precedents.[356]

90.46.3 *HMRC view of LLC law*

HMRC say:

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> ... In reaching this finding, the FTT regarded it as important
> [1] that Del s18-101(8) (now re-written to s18-101(10)) defined a LLC Interest as "a member's share of the profits and losses of a [LLC] and a member's right to receive distributions of the [LLC's] assets" and
> [2] that Del s18-503 provided a default rule for the allocation of profits and losses among the members, and noted the US tax returns showed that the whole of the book profits were allocated to the members' capital accounts.

[356] See 90.60 (Ascertaining foreign law).

> [3] The FTT considered that the terms of the LLC agreement in view of s18-503 meant that profits allocated to the members' capital accounts evidenced a liability to the members.
>
> Based on HMRC's understanding of Delaware LLC law (as at 06 December 2023), and contrary to the conclusion reached by the FTT in *HMRC v Anson (sub nom Swift)* [2010] UKFTT 88 (TC), HMRC continue to believe that the profits of an LLC will generally belong to the LLC in the first instance and that members will generally not be treated as "receiving or entitled to the profits" of an LLC (see INTM180040). HMRC consider the following provisions of the Delaware LLC Act in particular support this conclusion:
> a) The LLC will usually carry on the business (Del s18-106(a))[357], and incur the expenses and receive the income, which gives rise to the profits.

That is correct.

> It is the LLC which earns the profits rather than the members.
> b) LLCs are separate legal entities distinct from its members (Del s18-201(b)).[358] They are therefore capable of receiving and being entitled to profits.

That is correct as far as it goes.

> c) The LLC will usually own the assets which are used in carrying on the business. The members have no interest in specific property of the LLC (Del s18-701).
> d) The LLC will usually be responsible for the debts, obligations and liabilities of the LLC (Del s18-303). Any losses suffered are, like profits, those of the LLC.
> e) Members only achieve the status of a creditor to the LLC with regards to their economic interest in the LLC when they become entitled to a distribution (Del s18-606).
> f) A member is only entitled to receive an interim distribution to the extent provided by the LLC agreement (Del s18-601). Furthermore, the LLC would not be permitted to make a distribution to the extent that the LLC is insolvent or would make the LLC insolvent (Del s18-607).

Would a partnership be so permitted?

[357] See 90.44.4 (Who carries on LLC business).

[358] See 90.45.2 (LLC: Body corporate/company)?

> g) Creditors of members have no right to the property of the LLC. It is only where a court makes a charging order against a member's "LLC Interest" that a creditor will have a right to receive any distribution which the member would otherwise have been entitled in respect of such "LLC Interest" (Del s18-703).
>
> h) On a winding up of the LLC, assets have to be distributed to the creditors of the LLC ahead of members (Del s18-804)

HMRC say:

> i) The LLC is bound by the LLC agreement and is therefore party to it (Del s18-101(9) and *Seaport Village Ltd v Seaport Village Operating Company LLC* CA No 8841-VCL (Del Ct Ch 24 September 2014)). In HMRC's view, the LLC agreement along with the Delaware LLC Act provide the mechanism for the transfer of profits from the LLC to the members.

An LLC was clearly bound by an LLC agreement because that is what the Delaware LLC Act says; s18-101(9). But that does not mean that an LLC is *party* to the LLC agreement. It should be clear from the LLC agreement who are the parties: they are the persons named in the agreement and who are said to make or enter into it. Perhaps in practice LLCs are sometimes party to the agreement, but that was not the case in *Anson*.

> HMRC does not believe Del s18-101(10) or Del s18-503 are significantly relevant (as also indicated by the fact that neither appear in the in the Revised Uniform LLC Act (RULLCA) or the LLC Acts of many US states).

It is a question of US law, but I wonder whether RULLCA (or the LLC Acts of other States) is significantly relevant to Delaware law. The RULLCA might perhaps provide context, but I would have thought that you need to look at the LLC Act of the relevant State.

> HMRC understands that the purpose of Del s18-101(10) is to distinguish a member's transferrable economic interest in an LLC and other non-economic interests (such as the right to vote and inspect the records) which are transferrable only with consent - see Del s18-702 and s18-301 to s18-305. The RULLCA achieves the same result by including a definition of "transferrable interest", which refers solely to a member's right to a distribution, and confirming that a transfer of such an interest does not entitle the member to participate in the management of or have access to the records of the LLC (RULLCA s102(24) and s502(a)(3)). The fact that a member's economic interest in an LLC is transferrable

may compensate for the fact that they cannot withdraw assets unilaterally.

The Official Comment to RULLCA s404 "Sharing of and Right to Distributions before Dissolution" suggests the reason why it does not contain a provision equivalent to s18-503 is because "[c]apital accounts are maintained for one purpose, to determine how distributions will be made to members…If the statute has a simple default rule for how distributions are to be made to the members, providing an additional set of default profit and loss allocation provisions and capital account rules will be, at best, duplicative and, at worse, inconsistent with the distribution rules.".

HMRC also understands that the default rule in Del s18-503 (allocation of profits and losses), and indeed in Del s18-504 (allocation of distributions), is unlikely ever to apply in practice because if there is no agreement as to how the members will share in the capital and distributions of the LLC, it is unlikely that there would be the necessary agreement to be members in the first place. Furthermore, Del s18-503 itself states that the profits and losses are "of" the LLC which then have to be allocated amongst the members.

Contrary to the FTT's view, HMRC understands that an allocation of profits to a member's capital account does not evidence a liability to the member. Capital accounts are an equity concept and therefore appear in the equity, rather than the liability, section of the LLC's balance sheet. HMRC understands that a positive balance on a member's capital account does not provide a member with a right to a distribution. A member will only be entitled to a distribution to the extent provided by the LLC agreement and LLC Act, as above. Member creditors cannot seek recovery out of LLC assets merely by virtue of profits being allocated to a capital account. A member's capital account therefore represents the member's share of the net worth of the LLC and is fundamentally no different to a shareholder's net worth share of a corporation.

HMRC also understands that if an LLC were to elect to be treated as a corporation for US tax purposes, such capital accounts would not be expected to feature. It is usually only as a consequence of an LLC being treated as a partnership for US tax purposes that they are maintained. How the LLC elects to be treated for US tax purposes however does not fundamentally change the rights of the members to the profits of the LLC.

Whilst the FTT were correct to note that profits and assets are different concepts, there must be a correlation between the two (see

INTM180040).[359]

HMRC conclude:

> A member of a Delaware LLC will not therefore usually receive or be entitled to the profits of the LLC for the purposes of s8 ITTOIA because the LLC would normally carry on the business on its own behalf and earns the profits which belong to the LLC in the first instance. The fact that LLCs display 'strong entity shielding' such that its assets are protected from the members and creditors of members supports the conclusion that members are not entitled to the profits for the purposes of s8 ITTOIA (see INTM180020 and INTM180040). Whether the LLC is treated as a partnership (or is disregarded) or company for US tax purposes makes no difference to this analysis.

An assessment of the strength of the HMRC position requires expert US law advice. Unless US experts generally form the view that HMRC was right, a rerun of the *Anson* litigation seems very likely.

It might be that the availability of FTCR in *Anson* is further supported by provisions elsewhere in the 2001 DTA.[360]

90.47 LLC: Transparency

Needless to say, the transparency-factors test[361] does not answer the question of whether LLC's are transparent, in the sense that LLC income arises to the members, because key factors are disputed:

Factor	**Suggestive of**	**See**
1: Legal personality	Opacity	90.44.2
2: Share capital or something like it?	*Disputed; FTT say no*	90.55.13
3: Entity carries on the business	Opacity	90.44.4
4: Members entitled to profits as they arise?	*Disputed*; *FTT say yes*	90.44.5

[359] The relevant passage provides:
"Note that in *HMRC v Anson* [2010] UKFTT 88 (TC), the US expert appearing on behalf of Mr Anson made the point, accepted by the First Tier Tribunal, that profits and assets are different concepts. That is correct, but there must be a correlation between the two in the accounts. When profits are earned, the balance sheet will reflect a correlating increase in net assets. When profits are withdrawn or distributed, there will be a correlating decrease in net assets. It is therefore relevant to establish the rights of members to the assets when considering whether the correlating profits belong to them as they arise."

[360] See 111.8.1 (Treaty-source rules).

[361] See 90.7.2 (Transparency-factors test).

5: Liability for debts on the entity	Opacity	90.44.6
6: Ownership of assets by the entity	Opacity	90.44.7

The INT Manual provides:

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> For the reasons stated above,
> [1] HMRC generally regard members of Delaware LLCs as not being in receipt of or entitled to the profits of the LLC and
> [2] individual members will therefore only be liable to UK tax on any dividends or other distributions from the LLC (see SAIM5020 and SAIM5210 for guidance on the charge to tax on dividends and other distributions from UK and non-UK resident companies, and CTM15100 for general guidance on distributions). They will therefore be taxed at the dividend rate and entitled to dividend allowance (see SAIM1080). If the LLC is treated as a partnership or is disregarded for US tax purposes such that the member suffers US tax on their share of the profits, they will not be entitled to DTR (as the same profits, income or gains would not be taxed in both countries – see INTM161040). Nor will any deduction be available under TIOPA10/S112 in respect of such US tax.

The DTR Manual provides:

> **DT19853A US limited liability companies** [Jan 2020]
> Generally speaking, United States federal income tax is charged on the profits of United States LLCs on the basis that they are fiscally transparent, that is, tax is imposed on the members of the LLC and not on the LLC itself.
> However, for the purposes of UK tax we have taken the view in relation to those LLCs that we have so far considered that they should be regarded as taxable entities and not as fiscally transparent. Accordingly, we tax a UK member of an LLC by reference to distributions of profits made by the LLC and not by reference to the income of the LLC as it arises. ...

LLCs are said to be opaque on the HMRC transparent/opaque list.

90.47.1 *LLC: 1st ground of appeal*

The Supreme Court in *Anson* went to some length to distinguish two questions:

(1) The actual question in *Anson*: was UK tax “computed by reference to

the same income by reference to which the US tax was computed" (within the meaning of the DTA).[362]

(2) The actual question in *Memec*: were dividends paid by the company to a person, when the dividends were:
   (a) paid by the company but
   (b) received by person who was not a shareholder of the company, but a member of a stille Gesellschaft which was the shareholder[363]

The SC decided *Anson* on the narrowest possible basis. It decided foreign tax credit applied. It did not decide other questions. Most importantly, it did not decide whether Anson's income from the LLC should be regarded for UK tax purposes as:

(1) dividend income or
(2) the same income (trading income) as received by the LLC

In other words, was the source of the member's LLC income the LLC or the trade; ie was the LLC transparent in that sense?[364]

SC noted that "source" in art 24 had a different meaning from source in UK domestic tax.[365]

This question did not arise in *Anson*, though they obviously affect other taxpayers. Eg a UK domiciled taxpayer would need to know whether they received trading or dividend income, as different rates apply.

It is generally supposed, assuming *Anson* was correctly decided, that the answer to question (1) is that the LCC was transparent for UK tax purposes, in the sense that its members received trading income.

[362] at [109]: "The issue in this case is not whether the receipts of the LLC from third parties are to be regarded as having been paid to the members of the LLC, but whether the income on which Mr Anson paid tax in the US is the same as the income on which he is liable to tax in the UK."

[363] See 90.30.2 (UK tax analysis); 91.7.9 (Hybrids: art.24 tax credit).

[364] Other questions not decided in *Anson* are:
(1) Whether income of the LLC was "paid" by the LLC to the members so that it could qualify for a US tax credit under art. 24(4)(b) USA/UK DTA, ie, is the LLC transparent in that sense?
(2) If a member received capital gains accruing to the LLC, whether:
   (a) these should be regarded as the same gains, or indeed,
   (b) whether they should be regarded as gains (rather than income)?
(3) Whether the LLC was a partnership for UK tax purposes (though I think it is clear that it was not).

[365] [2015] UKSC 44 at [97] - [100].

But it seems to me equally consistent with *Anson* to say:

(1) The income of the member is "the same" as the income taxed in the US for the purposes of DT tax credit relief but:

(2) (a) The income is the income of the LLC

(b) What the member receives is a distribution (not income of the type which the LLC receives)

This is on the basis that the test of what is "the same" is loose and pragmatic, and need not be determined by reference to UK concepts of source. We are construing a DTA and not a UK tax statute.

Against this view is the fact that the SC rejected the first ground of appeal. The ground was that, "assuming that:

(1) US tax was charged on the profits of the LLC, and

(2) that Mr Anson was liable to UK tax only on distributions made out of those profits",

the US and UK tax were nevertheless charged on "the same profits or income", within the meaning of the DTA.[366]

SC said:

> In relation to the first ground of appeal, the argument advanced on behalf of Mr Anson focused on the provision made in article 23(2)(a) in respect of dividends. The argument runs as follows. When UK tax is payable on a dividend received from a US corporation, and US tax has been paid by the corporation on the profits out of which the dividend was paid, there can be no question of the UK tax being "computed by reference to the same profits or income" as the profits of the corporation, if the source of the income is identified on the basis of UK (or, indeed, US) tax law. A dividend is a paradigm case of income which does not have the same source, under UK or US tax law, as the profits out of which it is paid.

The argument went on to say that certain parts of the DTA showed that this rule did not apply, and that argument was rejected. It seems to me that this does not decide the question because it is not looking at the position of LLCs in particular, but at US corporations in general.

The LLC income and the member's income are *mathematically* equal. That alone is not enough. Suppose a person ("the lender") holds a contractual right such as a profit participating loan. The payment under the loan is not the same as the income of the borrower, even if it

[366] See at [53].

mathematically equal to the income. One might ask if they are the same in economic reality, but I do not think that references to reality help much if at all.[367] The key difference is that the LLC member's right arises *under the constitution* of the LLC; in the case of the profit related loan, the lender's right arises under a contract which is independent of the constitution of the borrower. On this basis *Anson* and *Memec* may be reconciled.

90.47.2 *Tax return disclosure*

A taxpayer may wish to argue against the HMRC view. It would be necessary to disclose the position taken in the tax return.[368]

The INT Manual provides:

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> If any customer requires confirmation of HMRC's view of whether a particular US LLC will be treated as transparent or opaque for the purposes of determining what profits, income or gains a member will be liable to UK tax on, they should contact the Base Protection Team following the guidance at INTM180060.

No-one would expect applications for clearance, as the HMRC view seems clear enough. Perhaps the point is to make it easier to criticise taxpayers who take a view on the transparency issue without disclosing it.

90.47.3 *Re-opening closed years*

HMRC Brief 15/2015 provided:

> *HMRC has after careful consideration concluded that the decision is specific to the facts found in the case.... Individuals claiming double tax relief and relying on the Anson v HMRC decision will be considered on a case by case basis.*[369]

"Considered on a case by case basis" was not exactly guidance, but I took

[367] See 7.1 (What do we mean by "Real"?); 7.9.2 (Cardinal principle affirmed).

[368] See 122.9 (When disclosure required).

[369] Brief 15/2015 "HMRC response to the Supreme Court decision in *Anson v HMRC*" *https://www.gov.uk/government/publications/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44*

the statement to mean that if the facts were the same as *Anson* (ie if the LLC agreement had the same effect as in *Anson*) then the same result would follow.

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> This guidance is to provide further clarification[370] of HMRC's view of LLCs following Anson with regards to who the profits belong to and the availability of DTR.

The HMRC 2023 view differs materially from the view expressed earlier, because previously the issue was to be considered on a case by case basis, but now there is a general rule. There is no discussion of transitional issues.

> If an individual member has claimed double taxation relief in respect of US tax on the profits, income or gains of a LLC, or any customer has otherwise self-assessed on the basis that the profits belong to the members rather than the LLC, HMRC will consider opening an enquiry or making a discovery assessment in accordance with its normal risk-based approach.
> (This content has been withheld because of exemptions in the Freedom of Information Act 2000)

In the 2023/24 edition of this work I said:

> UK resident members of an LLC should check that, as was held to be the case in *Anson*,[371] the LLC is under an obligation to distribute its profits as they arise, (ie it does not have power to retain its profits). I expect that is generally the case. Provided that is so, they should on the basis of *Anson* be entitled to foreign tax credit relief.

If HMRC seek to re-open closed years, the position is likely to turn on whether the tax return met the full-disclosure requirement.[372]

90.47.4 *LLC: Tax planning*

Where a LLC has a UK resident member, subject to US advice, solutions to the difficulties and uncertainties might be:

[370] See App 1.2 (Clarify/modernise/reform).

[371] though in *Anson* the LLC operating agreement was not as clear as it might have been.

[372] See 121.10 (Full-disclosure requirement). It is also possible that an established practice defence could be made out; see 121.9.3 (Prevailing practice defence).

(1) to arrange that the entity is transparent in both USA and UK, by converting it into a limited partnership
(2) to arrange that the entity is opaque in both USA and UK:
  (a) transfer the LLC (or the member's interest in it) to a holding company
  (b) convert the LLC into a corporation or
  (c) elect that the LLC is treated as a corporation for US tax purposes
(3) for a remittance basis taxpayer, not to remit the income

See too 26.31.3 (S corp/LLC lender); 90.58 (Change of entity type).

90.47.5 *UK source income of LLC*

The DTR Manual provides:

> **DT19853A USA: US limited liability companies** [Jan 2020]
> ... If an LLC derives income from the UK, the question arises of whether it is entitled to claim relief from UK tax under the agreement. A key issue is whether, under the conditions laid down in the agreement, which in this respect does not follow the approach of the OECD Model (DT153), the LLC can be said to be a resident of the United States. In our view an LLC cannot be said to be a resident of the United States within the terms of the agreement:
> [1] it is not a United States corporation,
> [2] nor is it a person resident in the United States for the purposes of United States tax (because the United States taxes the profits of an LLC not on the LLC itself but on its members).

HMRC may be right to say that the LLC is not a "resident of the USA" as defined in the USA/UK DTA. But HMRC do not take the point:

> However, we decided as a matter of practice that, in order to relieve double taxation under the agreement where tax would otherwise be imposed on the same income both in the UK and in the United States, we will accept claims to relief from UK tax under the agreement from an LLC, but only to the extent that the income in question is subject to United States tax in the hands of those members of the LLC who are residents of the United States. Subject to the same condition, we will pay a full tax credit to a United States LLC, less the 15% deduction provided for by Article 10(2)(a)(ii) of the agreement.
> Under the new [2001] Agreement, this practice is formalised by Article 1(8).[373]

[373] See 91.4.3 (USA hybrid-entity rule).

90.48 LLC: Corporate tax credit

Art. 24(4)(b) USA/UK DTA provides foreign tax credit for underlying tax paid by a company:

> in the case of a dividend
> [i] paid by a company[374] which is a resident of the United States
> [ii] to a company
> [a] which is a resident of the UK and
> [b] which controls directly or indirectly at least 10% of the voting power in the company paying the dividend ...

I refer to that as **"corporate tax credit"**. This will apply to an LLC if it elects to be treated as a US corporation (and so pays US tax).[375]

The INT Manual provides:

> **INTM180050 HMRC view of Delaware LLCs in light of Anson** [Dec 2023]
> However, if the LLC is treated as a company for US tax purposes, individual members will be entitled to credit in respect of US tax charged on any distributions from the LLC (subject to the amount the US could tax in accordance with Article 10 of the UK/US DTC and all other conditions being met) or a deduction under TIOPA10/S112 (see INTM161050).
> Likewise, HMRC do not believe corporate members would generally be regarded as being liable to UK tax on the profits of a Delaware LLC (the profits are "of" the LLC, not the corporate member – see CTA09/S2).
> A UK resident corporate member may be entitled to distribution exemption if the relevant conditions have been met (INTM650000).
> However, if the UK corporate member is a small company and the US LLC is treated as a partnership or is disregarded for US tax purposes, that may mean that such exemption will not be available as the US LLC would not be a resident of the US for the purpose of CTA09/S931B.
> If distribution exemption is not available, a UK resident corporate member may be entitled to DTR in respect of any US tax withheld on

[374] Art 3(a)(b) USA/UK DTA defines company in the same way as the OECD Model; see 30.15.4 (Company: DTA definition). An LLC is a company within this definition, for two reasons (either would suffice):
(1) It is a body corporate; or
(2) Assuming an appropriate election is made, it is treated as a body corporate for US tax.

[375] See 111.26 (Credit for underlying US co tax).

> the distributions (subject to the amount the US could tax in accordance with Article 10 of the UK/US DTC and all other conditions being met) and any US tax suffered on the profits (underlying tax) where the conditions of Article 24(4)(b) have been met (see DT19853).

The DTR Manual provides:

> **DT19853A USA: US limited liability companies** [Jan 2020]
> If tax is paid in the United States on the profits of the LLC, we regard that tax as underlying tax (INTM164010) and credit relief is available for it if the member is a UK company which controls, directly or indirectly, at least 10% of the voting power in the LLC.

90.49 US limited partnership

90.49.1 *US law background*

In the USA, most states have adopted the [US] Revised Uniform Partnership Act 2004. I focus on Delaware, but what I say here should apply generally.

A US limited partnership has been described as a hybrid business entity with partnership and company features, though it does not appear to be very different from a Scottish limited partnership.

Section 201(a) [US] Delaware Revised Uniform Partnership Act (DRUPLA) provides:

> A partnership is a separate legal entity which is an entity distinct from its partners unless otherwise provided in a statement of partnership existence or a statement of qualification and in a partnership agreement.

This applies to a limited partnership as well as to a general partnership, because s.202 (a) provides:

> A limited liability partnership is for all purposes a partnership.

A LP is treated as a partnership (and so is fiscally transparent) for US federal tax purposes and not as a taxable unit. US resident partners are subject to US tax on all income arising to a LP.

Blanchard comments:[376]

> Delaware did this to accommodate concerns of non-US investors needing an entity lacking legal personality. Whether this "presto change-o" provision is effective is unclear. ... this provision of Delaware

[376] Blanchard "The Tax Significance of Legal Personality: A U.S. View" (2015):

> law has never been used or tested in the courts. It may be simply window-dressing, intended to fool foreign countries into believing that there is such a thing as a Delaware general partnership that lacks legal personality.

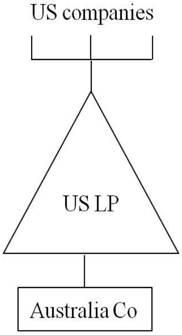
In the UK, legal personality (or not) of a US partnership should make no difference, but it might matter elsewhere.

90.49.2 *Australian analysis of US LP*

The Australian Taxation Office discuss whether a Delaware limited partnership is a "company" for the purposes of the Australia/US DTA:[377]

> **US Limited Partnership: whether it is a company for the purposes of Article 10 of the US Convention**
> **Issue**
> Is a United States limited partnership (US LP), which is treated as a partnership for US federal tax purposes, a company for the purposes of Article 10 of the [US/Australia DTA (1983)[378]] (the US Convention)?
> **Decision**: No...
> US LP is a limited partnership established under the Delaware Revised Uniform Limited Partnership Act (DRULPA). All partners are US resident corporations.
> US LP is not treated as a company by the US for tax treaty purposes because it is treated as a partnership for US federal tax purposes.
> US LP owns all the shares in an Australian resident company. During the income year the Australian resident company paid an unfranked dividend (not assessable income and not exempt income) to US LP, which was legally and beneficially entitled to that dividend.
> US LP would be taxed as a company under Australian domestic law (Division 5A of the Income Tax Assessment Act 1936, ITAA 1936) if it derived Australian source assessable income. US LP is not a resident of Australia under section 94T of Division 5A of the ITAA 1936.

Diagrammatically:



[377] ATO ID 2010/81, 9 April 2010, I have somewhat abbreviated the original text.
[378] *http://www.irs.gov/pub/irs-trty/aus.pdf*

Reasons for Decision

To qualify for benefits under the US Convention the claimant must first be a ‘person’ and a ‘resident’ for the purposes of the US Convention. In this case US LP, being a US domestic partnership, is both a ‘person’[379] and a US ‘resident’[380] according to the terms of the US Convention. Note that the US Convention is unusual in that it applies treaty benefits for income derived through fiscally transparent entities such as a partnership, at the level of the entity (in this instance US LP).

Article 10 of the US Convention provides that certain cross-border inter-corporate dividends flowing between Australia and the US are either:

- subject to a maximum of 5% rate of source country tax if the person beneficially entitled to those dividends is a company which holds directly at least 10% of the voting power in the company paying the dividends (Article 10(2)(a) of the US Convention); or
- exempt from source country tax where the person beneficially entitled to the dividends is a company that has owned shares representing 80% or more of the voting power of the company paying the dividends for a 12 month period ending on the date the dividend is declared, and satisfies certain other conditions (Article 10(3) of the US Convention).

For the reduced dividend withholding tax rates under Article 10(2)(a) or Article 10(3) of the US Convention to apply to an unfranked dividend paid by an Australian resident company, the person beneficially entitled to the dividend must be a ‘company’. Here, the ‘person’ beneficially entitled to the dividends paid by the Australian resident company is US LP.

The question which interests us is whether the US LP is a “company”.

Article 3(1)(b) of the US Convention defines ‘company’ for the purposes of the Convention ‘unless the context otherwise requires’, to mean ‘any body corporate or any entity which is treated as a company or body corporate for tax purposes’.[381]

Accordingly, for the purposes of our analysis, US LP will be a ‘company’ for the

[379] The DTA has US Model wording (unlike the OECD Model) under which “person” includes a partnership: see 9.4.1 (Person: Treaty definition).

[380] Article 4(1)(b)(ii) of the Australia/US DTA provides:

> b) a person is a resident of the United States if the person is:
>
> (i) a United States corporation; or
>
> (ii) any other person (except a corporation or unincorporated entity treated as a corporation for United States tax purposes) resident in the United States for purposes of its tax, provided that, in relation to any income derived by a partnership, an estate of a deceased individual or a trust, such person shall not be treated as a resident of the United States except to the extent that the income is subject to United States tax as the income of a resident, either in its hands or in the hands of a partner or beneficiary, or, if that income is exempt from United States tax, is exempt other than because such person, partner or beneficiary is not a United States person according to United States law relating to United States tax.

(The US/UK DTA is different here).

[381] This is also OECD Model form: see 30.15.4 (Company: DTA definition).

purposes of the US Convention if:

(a) it is a body corporate; or

(b) it is an entity that is treated as a company or body corporate for tax purposes - unless the context of the US Convention otherwise requires.

(a) Is US LP a 'company' for the purpose of the US Convention by virtue of being a 'body corporate' ?

US LP is not a 'company' for the purpose of the US Convention by virtue of being a 'body corporate' for Australian purposes.

The term 'body corporate' is not defined in the US Convention. Thus, in accordance with Article 3(2) of the US Convention, the term will generally take its meaning from the taxation laws of the country applying the tax treaty (being in this case Australia), 'unless the context otherwise requires'. As 'body corporate' is not defined in Australia's domestic income tax law legislation, the ordinary meaning of the term in Australia may then apply.[382]

The ruling then discusses the meaning of "body corporate" in Australia:

The *Butterworths Australian Legal Dictionary*, 1997 defines a 'body corporate' as 'an artificial legal entity having separate legal personality'. The Macquarie Dictionary, 4th ed., 2005 defines 'body corporate' in its legal context, as 'a person, association or group of persons legally incorporated in a corporation'. Generally a 'body corporate' is established under an Act of Parliament or under a statutory procedure of registration, such as the Corporations Act 2001 (refer to paragraphs 22-23 of Taxation Ruling IT 2634 and paragraphs 30-34 of Miscellaneous Taxation Ruling MT 2006/1).

As US LP is created under Delaware state law and has a legal personality under that law, it should be recognised as a legal entity in Australia.[383]

While US LP is a legal entity having legal personality, it is essentially quite different in character from the bodies which are incorporated under corporations law in Australia.

[1] For example, while a corporation continues in existence until it is dissolved notwithstanding changes in its membership or business, a limited partnership formed under the DRULPA is usually formed for a limited period of time and terminates in the same way as a partnership. A corporation in Australia has perpetual succession, a personality that is continuous and free transferability of interests. US LP does not.

[2] Further, the partners of US LP derive the profits made by US LP, [ie LP profits arise to the partners] and a partner's individual share of the profits in US LP is ascertained in accordance with its interest in US LP, rather than on the basis of distributions made.

Notwithstanding, as US LP is an artificial legal entity having a form of separate legal personality, it is prima facie a 'body corporate' under the ordinary meaning of the term in Australia. Although, generally a 'body corporate' has the 'ability to continue in existence indefinitely and to keep its identity regardless of changes to its membership' (see paragraph 30 of MT 2006/1) and US LP does not enjoy such a continued existence.

[382] See 107.12 (Undefined treaty terms).

[383] The ruling refers to *Chaff and Hay Acquisition Committee v Hemphill* which is considered at 90.40.4 (Stichting a treaty-person).

In UK law a Delaware LP is *not* a body corporate. The fact that a partnership has legal personality does not entail the conclusion that it is a body corporate.[384] That is, it seems that "body corporate" may have a different meaning in Australia, though Australian ruling is slightly tentative on the point ("prima facie"). But it turns out not to matter:

> But, as highlighted above, the requirement in Article 3(2) of the US Convention to in this case interpret an undefined term such as 'body corporate' in accordance with Australian taxation law, applies only if the 'context' does not require an alternative interpretation. [The statement makes some general observations on treaty interpretation[385] and continues:]
>
> Paragraph 12 of the OECD Commentary on Article 3 emphasises that the interpretation set out in the 'undefined terms' provision applies 'only if the context does not require an alternative interpretation'.[386] It adds that the 'context' is determined in particular by the intention of the Contracting States, as well as 'the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based)'. However, US federal tax law does not specifically define the term 'body corporate'.
>
> In this case, the OECD Commentary on the definition of 'company' is particularly relevant to the context of the term 'body corporate'. Paragraph 3 of the OECD Commentary on Article 3 provides the following:
>
> > 3. The term "company" means in the first place any body corporate. In addition, the term covers **any other taxable unit** that is treated **as a body corporate according to the tax laws** of the Contracting State in which it is **organised**. The definition is **drafted with special regard to the Article on dividends**.
>
> It follows from the OECD Commentary's statement that the second limb of the term covers any other taxable unit, that the first limb of the definition of 'company' is designed to deal only with entities which are bodies corporate under general law and also taxable units under tax law (which is a central consideration in applying the terms of Australia's tax treaties).
>
> While the requirement for the entity to also be a 'body corporate' for tax law purposes under the first limb is not explicit, treaties should be interpreted more 'liberally' than domestic legislation to smooth over the gaps, imprecision and ambiguities in the treaty text in a way that addresses the context and meets the object and purpose of the treaty. Where the context of a term allows a specific tax law meaning and a non-tax law meaning, the former should prevail (see paragraph 68 of TR 2001/13).
>
> In addition, it is clear from the OECD Commentary on Article 3 that the question of whether a dividend recipient is an entity 'treated as a body corporate' for tax purposes must be made by reference to 'the tax laws of the Contracting State in which it is organised' - and not the state of source. Thus, paragraph 3 of the OECD Commentary on

[384] See 90.9 (Body corporate).

[385] Referring to TR 2001/13; see 107.10 DTA interpretation principles) and following paragraphs.

[386] See 107.12 (Undefined treaty terms).

Article 3 provides with regard to the terms ‘company’ and ‘body corporate’ that the relevant taxation laws to consider are those of the country in which the entity was created (i.e. being the domestic laws that apply to the entity). The ‘context’ requires an examination of US taxation law and not Australian taxation law to determine whether a US entity is a ‘company’ for the purpose of qualifying for the reduced rate of withholding tax on inter-corporate dividends.

Hence, in determining whether an entity is treated as a ‘body corporate’ for tax treaty purposes, reference is not made to the tax law of the country applying the treaty (in this case Australia), unless the entity was organised there. Specifically, as indicated above, the ‘context’ surrounding the terms ‘company’ and ‘body corporate’ in the US Convention, for the purpose of US LP qualifying for the either of the reduced rates of withholding tax on the unfranked dividends paid by the Australian resident company, requires an examination of US taxation law.

Accordingly, to determine whether US LP is a ‘body corporate’ under the US Convention, the relevant consideration is where US LP was organised. US LP was not organised in Australia, but in the US. Hence, the potential Australian tax treatment of US LP (that is, that the entity can be treated as a company for Australian tax purposes by virtue of Division 5A of the ITAA 1936) is irrelevant. Rather, only the US tax treatment of US LP is relevant.

US LP is not a taxable unit and so is not treated and taxed as a ‘body corporate’ for US federal tax purposes - but is treated and taxed as a partnership.

Finally and importantly, paragraph 3 of the OECD Commentary on Article 3 emphasises that the definition of ‘company’ is ‘**drafted with special regard to the Article** on dividends’ and ‘the term “company” has a bearing only on that Article, paragraph 7 of Article 5, and Article 16.’

Paragraphs 10-11 of the OECD Commentary on Article 10 explains the rationale behind reduced taxation rates for inter-corporate dividends as follows:

> 10. On the other hand, a lower rate (5%) is expressly provided in respect of dividends paid by a subsidiary company to its parent company. If a **company** of one of the States owns directly a holding of at least 25% in a company of the other State, it is reasonable that **payments of profits by the subsidiary to the foreign parent company** should be taxed less heavily to avoid recurrent taxation and to facilitate international investment. The realisation of this intention depends on the **fiscal treatment of the dividends** in the State of which the **parent company is a resident**..
>
> 11. If a partnership is **treated as a body corporate under the domestic laws** applying to it, the two Contracting States may agree to modify sub-paragraph (a) of paragraph 2 in a way to give the benefits of the reduced rate provided for parent companies also to such partnership. (Emphasis added)

Paragraph 2 of Article 10 of the OECD Model Tax Convention is not materially different from paragraph 2 of Article 10 in the US Convention, with the exception of the differences in the percentage holding thresholds in the respective treaties.

Klaus Vogel on Double Tax Conventions[387], 1997, 3rd edn. makes the following statements (at pages 583-584 and 599) about paragraph 2 of Article 10 of the OECD

[387] See *Klaus Vogel on Double Taxation Conventions* (4th ed., 2015). The text of the current edition has changed somewhat.

Model Tax Convention:

> Art. 10 is still completely geared to the 'classical' system of company taxation. and is, consequently, based on the conception that it is appropriate to subject income derived by a company (within the meaning of Art. 3(1)(b)MC) to a tax of its own distinct and separate from the tax imposed on the distributions received by a company's shareholders
>
> . the maximum rates on inter-company dividends should differ from those on 'all other' dividends.. Such preferential treatment, however, applies only where direct investments are held by companies and does not apply where a substantial interest is held by an individual or a partnership..
>
> If, under the law of its State of residence, a partnership is considered a body corporate, but is not itself subjected to tax. There would be no justification for allowing it to benefit from the limited rate of 5%, because its interposition actually does not result in any double taxation.

It is apparent, from all of the above, that the intention of Article 10(2) of the OECD Model Tax Convention is to provide reduced rates of withholding tax for dividends derived by companies from direct investments on a reciprocal basis. It would be contrary to the intention of Article 10(2) if the reduced inter-corporate dividend withholding tax rate was to apply where the tax law of the resident country treated the beneficial owner of the dividends as a partnership.

Specifically, in the case of US LP, it would be inappropriate for a partnership formed under US state law and treated as a partnership for US tax purposes, to be able to access the inter-corporate rate of withholding tax for dividends under either Article 10(2) or Article 10(3) of the US Convention. The purpose behind Article 10(2) and 10(3) is to prevent multiple layers of taxation of corporate economic groups. Where the recipient does not have tax imposed (that is, because it is treated as a partnership in its state of residence), the rationale for granting the reduction in (or exemption from) withholding tax disappears.

The context of Article 10 and the OECD Commentary requires the implicit inclusion in the first limb of the definition of 'company', that a 'body corporate' is a taxable unit under the relevant taxation laws. Further, the relevant taxation laws are clearly the domestic laws affecting the entity - that is, those laws under which the entity is organised or created.

US LP is not a taxable unit and not a 'body corporate' for US tax purposes. Therefore, US LP does not satisfy the first limb of the meaning of the term 'company' in Article 3(1)(b) of the US Convention. It follows that US LP will not be a 'company' for the purposes of Article 10 of the US Convention by virtue of being a 'body corporate' for Australian purposes.

(b) Is US LP a 'company' for the purpose of the US Convention under the second limb of the meaning of the term 'company' - that Is to say, is US LP an entity that is treated as a 'company' or 'body corporate' for tax purposes ?

The OECD Commentary on the definition of 'company' (outlined above) makes it clear that, under the second limb of the definition, the determination is to be made by reference to the laws of the State in which the entity is **organised** (in this case US federal tax law). US LP is not taxed as a 'company' or 'body corporate' for US federal tax purposes. Rather it is treated and taxed as a partnership. This is essentially because, although US LP has a form of separate legal personality under Delaware state law, the US federal tax

position is that while state law attributes of an entity control various aspects of business relations, they are not controlling under US tax law (unless the tax law so provides).
[The ruling considers the US tax law and concludes:] US LP is taxed as a partnership unless it elects to be taxed as a corporation. As no such election was made by US LP, it is not a taxable unit and is not taxed as a corporation under the tax laws of the US.
Hence, US LP is not an 'entity that is treated as a company or body corporate for tax purposes' and so does not satisfy the second limb of the meaning of the term 'company' for the purposes of the US Convention.
Conclusion
For the purpose of the US Convention, US LP is neither a 'body corporate' nor an 'entity that is treated as a company or body corporate for tax purposes'. Consequently it is not a 'company' for the purpose of Article 10 of the US Convention, and does not qualify for either of the reduced rates for certain cross-border inter-corporate dividends flowing between Australia and the US.
This is consistent with the US position for tax treaty purposes which is that a US partnership which does not elect to be taxed as a corporation will not be a 'company' for US treaty purposes. The Issues in International Taxation No. 6 'The Application of the OECD Model Tax Convention to Partnerships' report includes the US response to the OECD Partnership Report at page 127. This response states that US partnerships (including limited partnerships such as Delaware limited partnerships, but also US LLCs and LLPs) not electing to be treated as corporations are not considered to be companies for the purposes of US tax treaties.

90.50 Cell companies

90.50.1 *Cells: Background law*

The GI Manual provides:

> **GIM11020 - Captive insurers: tax havens and local organisation** [Aug 2016]
> **Cell companies**
> These take two forms, protected cell companies (PCCs) and incorporated cell companies (ICCs). PCCs were originally developed in Guernsey in 1997, and now exist in other territories such as Jersey, Cayman Islands, Irish Republic and Bermuda. ICCs were developed more recently, in Guernsey and Jersey in 2006.
> The essential difference between them is that an ICC's cells are legal entities in their own right, unlike the cells of a PCC.

A variety of terminology is used. What the Manual here calls protected cells are also called unincorporated cells, which is a clearer term. The Irish Collective Asset-management Vehicle Act 2015 refers to an IVAC as having "sub-funds", but these sub-funds equate to cells of a cell company. We also have "divided company".

> The advantage of cell companies lies in the cost and regulatory time saving in the creation of new cells. Cells of ICCs, with legal personality, can more easily transact with third parties, and the ring fencing is stronger, which is an advantage in relation to use in securitisations and structured financial products. Each cell of the PCC or ICC has the same directors, secretary and registered office as the PCC/ICC but different shareholders.
>
> PCCs were originally developed to make the benefits of captive insurance available to smaller companies by reducing costs. Different classes of business can be written into different cells within one vehicle, with one set of formation costs, a single capital requirement and easier repeat transactions. This improved 'rent a captive' arrangements which formerly relied upon only a contractual separation of assets. ICCs take the separation a stage further.

The INT Manual provides:

> **INTM236500 Cell companies or similar entities and control** [Jun 2018]
>
> A protected cell company PCC can be thought of as being a standard limited company that has been separated into legally distinct portions i.e. cells. The income, assets and liabilities of each cell are kept separate from all other cells. Each cell has its own separate portion of the PCC's overall share capital, allowing shareholders to maintain sole ownership of an entire cell while owning only a small proportion of the PCC as a whole. Legally a PCC is a single company, but each shareholder/investor retains a separate interest in the company. Similar structures to the PCC include the incorporated cell company (ICC) where each cell is treated as a separate incorporated entity to provide greater protection still for the individual shareholder's assets and income.

Cell companies also exist in UK law.[388] Of course what is commercially the same outcome can be reached without cells, by an arrangement under which:

(1) A company holds subsidiaries, and
(2) Shareholders hold shares conferring rights over a specific subsidiary.

90.50.2 *Cells: Legal personality*

Dicey states:

> It is well established that a corporation duly created in a foreign country

[388] Part 4 Risk Transformation Regulations 2017.

> is to be recognised as a corporation in England.[389]

Land Registry practice guide 78 (Overseas companies & LLPs) provides:[390]

> **4.7 Protected cell companies and incorporated cell companies**
> Some jurisdictions provide for protected cell companies and incorporated cell companies. This enables various assets and liabilities of the company to be partitioned off into separate 'cells', which may or may not have a separate legal personality. The precise nature of a protected cell company or incorporated cell company will depend on the law in the territory of their creation. When an application is made to register a protected cell company or incorporated cell company as proprietor of an estate or charge we will need evidence as to the constitution and legal personality of the applicant.
>
> For example, under Guernsey law, a protected cell company is a single legal person and distinct cells within the protected cell company structure are not legal persons. A registered estate or registered charge can therefore be registered only in the name of the protected cell company whether or not the property belongs to the core of the protected cell company or only a cell. If the cell has its own trading name and a specific request is made in the application form or in a letter, then this will be included in the register entry.
>
> In view of the company structure, an application for registration of a protected cell company may be accompanied by an application for entry of a restriction.
>
> Unlike a protected cell company, if an incorporated cell company, under Guernsey law, creates a cell within its structure, each incorporated cell is a separate legal person.

The applicable foreign law governs the legal position elsewhere:

(1) A company with unincorporated cells (a PCC) is one legal person, and the cells are not separate legal persons[391]

(2) Where a company has incorporated cells, each cell is a legal person,

[389] See Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 30R-009 (Status). No doubt the same applies elsewhere.

[390] *https://www.gov.uk/government/publications/overseas-companies-and-limited-liability-partnerships-pg78* (Last updated 10 July 2023)

[391] For a UK Cell company, reg 12(7) Risk Transformation Regulations 2017 deals with the point expressly: " The core and the cells do not have legal personality distinct from the protected cell company, but are nevertheless segregated from each other ..."

and so is the company itself.

The same will apply for UK tax purposes unless the context or specific provision otherwise provides. HMRC agree.[392]

For some purposes the general law analysis is altered by statute:

(1) Offshore funds: see 66.17 (Umbrella arrangements)
(2) CFCs (see below)
(3) Insurance premium tax (see below)

I review these here as (although the topics are some way from the themes of this book) the legislation and Manual discussion confirm the view taken above.

90.50.3 *Cell co: CFCs*

Section 371VE(1) TIOPA provides:

> This Part [Part 9A, CFCs] applies in relation to unincorporated cells and incorporated cells as if they were non-UK resident companies.

Section 371VE TIOPA sets out its definition of unincorporated cell:

> (2) An "unincorporated cell" is an identifiable part (by whatever name known) of a non-UK resident company which meets the following condition.
> (3) The condition is that, under the law under which the non-UK resident company is incorporated or formed, under the articles of association or other document regulating the non-UK resident company or under any arrangement entered into by or in relation to the non-UK resident company—
> (a) assets and liabilities of the non-UK resident company may be wholly or mainly allocated to the part of the company in question,
> (b) liabilities so allocated are to be met wholly or mainly out of assets so allocated, and
> (c) there are members of the non-UK resident company who have rights in relation to the company's assets which cover only or mainly assets so allocated.
> (4) Subsection (1) does not affect the status of the non-UK resident company mentioned in subsection (2) as a company for the purposes of this Part; but its assets and liabilities are to be apportioned between it and the unincorporated cell (and any other unincorporated cells which

[392] See quote from IPT manual: "it is the PCC as a whole that is the corporate body". Also see McCarthy, "Protected Cell Companies and s.13 TCGA" [2009] PCB 316.

> are part of the company) on a just and reasonable basis.

Section 371VE TIOPA then sets out the definition of incorporated cell:

> (5) An "incorporated cell" is an entity (by whatever name known) established under the articles of association or other document regulating a non-UK resident company—
>
> (a) which, under the law under which the non-UK resident company is incorporated or formed, has a legal personality distinct from that of the non-UK resident company, but
>
> (b) which is not itself a company (ignoring this section).

But I would have thought that an incorporated cell would be a company within the standard tax definition.

> (6) Subsection (1) does not affect the status of the non-UK resident company mentioned in subsection (5) as a company for the purposes of this Part.

The INT Manual provides:

> **INTM236500 Cell companies or similar entities and control** [Jun 2018]
> ... [Cell] arrangements can be used to sidestep the CFC rules (including those on control) by allowing UK resident unconnected parties to run their insurance or investment activities alongside each other within the structure whilst only holding a minority of the total shares in the PCC/ICC and only being entitled to a small proportion of the total profits. The intention and effect is quite different to holding a small passive investment in a third party entity. These structures are replicating the effect of each shareholder controlling their own separate entity. Accordingly for the purposes of Part 9A and in particular the control rules each individual cell is be taken to be a non-UK resident company in its own right.
> [The Manual sets out the relevant definitions and continues]
> So in determining whether an individual cell should be taken to be a CFC for the purposes of Part 9A, the control rules will be applied to an individual cell as if it were a non-UK resident company in order to determine whether it is controlled by a UK person or persons under the legal and economic control tests ...
> However this does not affect the status of the host entity, either the PCC or ICC (or similar entities) irrespective of whether there are separate cells within those entities treated as CFCs. Regardless of the treatment of the individual cells within the companies, the PCC or ICC will also be treated as a non-UK resident company for the purposes of Part 9A. This means that the control rules will also apply to the company as a whole in determining whether it is controlled by a UK person or UK persons. In the case of a PCC or similar entity, where cells are unincorporated, assets and liabilities are to be apportioned between the cells and the company on a just and reasonable basis. In the case of an incorporated cell company the incorporated nature of the cells means that this further apportionment provision is not needed.

HMRC give the example of an unincorporated cell company:

> *Example*
> Company X is established by UK resident company Y in an overseas territory. X provides captive insurance facilities to unconnected UK resident companies A to J through ten unincorporated cells. X itself has "core" shares and "cell" shares. The core shares have voting rights and the right to appoint directors; the shares are wholly owned by Y. The cell shares are separate shares issued for each cell and are wholly owned by the unconnected UK resident companies A to J (so that A owns all the cell shares in the first cell, B owns all the shares in the second cell and so on).
> Each cell prepares its own accounts, and the assets of each cell are protected from the others. So if one cell makes a loss, it has no impact on the other cells. If a cell were to become insolvent, the creditors have no recourse to the assets held in other cells. However the cells cannot contract in their own name; contracts of insurance are entered into by X but the risks and benefits of the contract are specified to particular cells.
> X provides management and underwriting services for each of the ten cells and makes profits that are not included in any of the accounts prepared for the individual cells.
> Each separate cell is subject to a test of control and each cell is deemed to be a CFC of each of A to J respectively because of the legal control each has over their cell. The profits potentially subject to a CFC charge are the profits derived from the contracts of insurance (underwriting profits and investment profits).
> X is clearly controlled by Y given it owns all of the shares in X (i.e. has legal control) and so is a CFC. The profits potentially subject to a CFC charge are the profits derived from the management and underwriting services.

90.50.4 *Cell company: IPT*

Para 3A sch 6A FA 1994 provides (in short):

> (6) For the purposes of this paragraph-
> (a) a company is a "divided company" if under the law under which the company is formed, under the company's constitution or under arrangements entered into by or in relation to the company-
> (i) some or all of the assets of the company are available primarily, or only, to meet particular liabilities of the company, and
> (ii) some or all of the members of the company, and some or all of its creditors, have rights primarily, or only, in relation to particular assets of the company;
> (b) a "division" of such a company means an identifiable part of it (by whatever name known) that carries on distinct business activities and to which particular assets and liabilities of the company are primarily or wholly attributable.

> (7) ... the company shall be treated as connected with any person with whom a division of that company would be connected if it were a separate company.

The IPT Manual provides:

> **IPT04930 Higher rate of IPT: Protected cell companies** [Sep 2018]
> ... The defining feature of [PCCs] is that they have within them units that are usually called cells. These cells can be separately owned and they are segregated from one another's assets and liabilities. In effect a cell can be run as if it was a separate company although it remains part of the larger corporate body, the PCC, which itself is a single legal entity.
> Prior to the Budget measure, a PCC could be used to avoid the higher rate. Under the Taxes Act, a connected person, in the case of companies, is defined as one person having a controlling share of the company (normally this would be a 51% shareholding in the company). Because of the cellular structure of a PCC, it is possible for a person to wholly own a cell, but only have a minority shareholding in the PCC overall. Thus, a PCC could be set up in such a way that it would not be caught by the connected person definition and it could be used to avoid higher rate IPT.
> To close this loophole the Budget measure introduced a new paragraph 3A to schedule 6A of the Finance Act 1994, which extended the definition of connected persons in the higher rate IPT legislation. In practice this meant that to establish whether a PCC was connected for the purpose of the higher rate, you could look at the individual cells of the PCC and consider whether, if the cells were separate entities, they would meet the connected person test. If the answer to that question was yes, then the PCC was to be regarded as connected to the supplier...
> To ensure all PCC type companies are covered, by whatever name they are known, the legislation uses the term divided companies.

90.51 Hindu undivided property

The CG Manual provides:

> **CG31305 Other interests** [Jul 2019]
> ... a case involving Hindu Undivided Property would be regarded as a discretionary trust rather than an unincorporated association.

This entity is referred to as Hindu Undivided Family ('HUF'). Whether it is a trust or a company, and if a trust, whether a discretionary trust, requires further examination.

90.52 Tokkin (Japan)

HMRC regard a tokkin as transparent. The INTM provides:

> **355160 Claims by Japanese "Tokkin" funds** [May 2012]
> 'Tokkin' is an abbreviation of 'tokutei kinsen', and means 'designated monetary trust'.
> Cash or other assets for this type of fund are deposited by the investor(s) with a trustee who manages them on behalf of the investor(s), and in accordance with his/her/their instructions. The tokkin is set up and managed under the terms of a written agreement between the parties, drawn up under Law No 62 of 21/4/1922 of Japan.
> Because the Dividends and Interest Articles of the convention provide for relief **only to the beneficial owner** (INTM332000) of the income, claims in respect of income paid to tokkin funds **must** be made by the beneficial owner of the tokkin (the 'investor(s)'above), and **cannot** validly be made by the tokkin's manager.
> So if you see a claim or supporting voucher which makes any reference to tokkin, you should ensure that you consider only claims made by the beneficial owner, that is, the **original investor**, in respect of his/her/their share in the tokkin.
> There is no reason why a single investor should not own **all** the funds in a tokkin, but you should make certain that your claim has been made by the beneficial owner and not by the trustee, or an investment manager.
> The original investors/beneficial owners may be either individuals or companies.
> But it should be clear in either case that **no** relief can be due to the tokkin **itself**.

90.53 Hapja Hoesa (Korea)

The Australian Taxation Office have guidance on this:

Classification of a Korean Hapja Hoesa for Australian income tax purposes
Issue
Is the Korean Hapja Hoesa a company pursuant to the definition within section 995-1 of the Income Tax Assessment Act 1997 (ITAA 1997)?
Decision: Yes. The Korean Hapja Hoesa is a company within the meaning of section 995-1 of the ITAA 1997.
Facts
The Hapja Hoesa is a legal form of corporation, which may be established under the Korean Commercial Act (Commercial Act). The Hapja Hoesa is also a private equity fund which is regulated by the Korean Indirect Investment Asset Management Business Act (IIAMBA).
In essence, the Hapja Hoesa is an unlimited investment specialty vehicle that is

established for the purpose of investing the assets of the entity into the shares or equity of other entities - with the purpose of increasing the value of such entities through participation in the management of the entities or improving the business structure or control structure of the entities. The Hapja Hoesa may be used only for private equity investment purposes.

Currently under Korean legislation, a Hapja Hoesa has the following features:

- a Hapja Hoesa is in
corporated, and is formed by registering its incorporation (Article 144-5(2) of the IIAMBA; Article 172 of the Commercial Act);
- a Hapja Hoesa has a legal personality that is separate from the members (Article 171(1) of the Commercial Act);
- a Hapja Hoesa does not have partners, it has members (Article 268 of the Commercial Act);
- a Hapja Hoesa has members with limited liability and members with unlimited liability (Article 144-3 of the IIAMBA; Article 268 of the Commercial Act);
- a Hapja Hoesa has articles of incorporation (Article 144-5 of the IIAMBA; Article 178 of the Commercial Act);
- a Hapja Hoesa exists for a specific term, which must be specified in the articles of incorporation, but after the term expires, the Hapja Hoesa may continue with consent of all or some members (Article 144-5(1) of the IIAMBA; Article 229 of the Commercial Act);
- a member's interest in a Hapja Hoesa is referred to as a share (Article 197 of the Commercial Act);
- in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members (Article 197 of the Commercial Act);
- members can transact with the Hapja Hoesa (Articles 199 and 275 of the Commercial Act);
- subject to limitations for Limited Liability Members, members are jointly and severally liable if assets of the company are insufficient to satisfy its obligations (Articles 212 and 279(1) of the Commercial Act);
- distributions by the Hapja Hoesa are referred to as 'dividends' (Article 279(1) of the Commercial Act).

The articles of incorporation of this particular Hapja Hoesa include the following terms:

- a Limited Liability Member may not transfer any part of their interest in the Hapja Hoesa without the consent of all Unlimited Liability Members;
- an Unlimited Liability Member may not transfer any part of their interest without the consent of all members;
- a Limited Liability member may not withdraw from the Hapja Hoesa without transferring their interest, and the transfer of an interest requires the consent of all Unlimited Liability Members;
- a member does not have a right to a distribution of distributable cash. Instead, a resolution of members is required before any profits can be distributed;
- meetings of the Hapja Hoesa will be convened by the Manager or on request of members;
- a member has one vote per unit of their interest in the Hapja Hoesa;
- members may pass resolutions on dissolution of the Hapja Hoesa; extension or reduction in the term of the Hapja Hoesa; approval of distributions;

· business cannot be transacted at a meeting of the Hapja Hoesa unless a quorum is present;

· the Hapja Hoesa will be dissolved on expiration of its term; with a resolution of the Members; on bankruptcy or insolvency; on an order of the court; or if the Korean Financial Supervisory Commission denies or cancels registration.

Reasons for Decision

'Company' is defined in section 995-1 of the ITAA 1997 as:

(a) a body corporate; or

(b) any other unincorporated association or body of persons;

but does not include a partnership or a non-entity joint venture.[393]

As the term 'body corporate' is not defined in Australia's income tax legislation, the ordinary meaning of the term applies. The Butterworths Concise Australian Legal Dictionary 2nd ed., defines a body corporate as 'an artificial legal entity having separate legal personality'.

Being an entity that was created by registration, and that has separate legal personality, the Hapja Hoesa is a 'body corporate'. Consequently, it will be a company under paragraph (a) of the definition of 'company' in section 995-1 of the ITAA 1997, providing that it is not also a partnership.

Section 995-1 of the ITAA 1997 defines 'partnership' as:

(a) a body of persons (other than a company or limited partnership) carrying on business as partners or in receipt of ordinary income or statutory income jointly; or

(b) a limited partnership.

The Hapja Hoesa has some features commonly associated with a partnership, and some features associated with a company.

The following features favour characterisation of this particular Hapja Hoesa as a company.

· a resolution of members is required before profits can be distributed. This indicates that profits belong to the Hapja Hoesa, and that the members are not in receipt of income jointly;

· distributions are referred to in the Commercial Act as 'dividends' rather than as a share of profits;

· the Hapja Hoesa was formed by registration of its incorporation, whereas a partnership is generally formed by a partnership agreement between the partners;

· the Hapja Hoesa has members rather than partners;

· the Hapja Hoesa has articles of incorporation, and not a partnership agreement;

· the Hapja Hoesa has a form of perpetual succession. It will not terminate on the withdrawal of a member, as is the case with a partnership. Instead, it will continue until the occurrence of one of the events specified in its articles of incorporation.

The features which favour characterisation of this Hapja Hoesa as a partnership include:

· to withdraw from the Hapja Hoesa a Limited Liability Member in effect needs the consent of all Unlimited Liability Members;

· members' interests are not freely transferable; in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members.

The predominance of characteristics favours classification as a company rather than a

[393] The same applies in the UK; see 90.8 (Definition of "company").

partnership. Further, as the Hapja Hoesa does not have partners who carry on its business or who receive income jointly, it is not a partnership for the purpose of the definition of 'partnership' or 'company' in section 995-1 of the ITAA 1997.
As the Hapja Hoesa is a body corporate and not a partnership, it follows that it is a company within the meaning of section 995-1 of the ITAA 1997.[394]

It is considered that the same reasoning should apply in the UK.

90.54 HMRC transparent/opaque list

The International Manual provides:

> **INTM180040 How HMRC arrives at a definitive view of specific foreign entities** [Dec 2023]
> **General view**
> INTM180030 includes a list of foreign entities where we have provided a general view as to whether they can be described as "transparent" or "opaque" within the meaning explained at INTM180010. This list is intended to provide HMRC officers and customers with a general view as to whether the members will be liable to UK tax on the profits, income or gains of the entities or only on any distributions made by the entities. However, our view may vary depending on -
> - the specific terms of the UK taxation provision under which the matter must be considered;
> - the provisions of any legislation, articles of association, by-laws, agreement or other document governing the entity's creation, continued existence and management; and
> - the terms of any relevant double taxation agreement.

HMRC do not guarantee that the list is up to date:

> Our view of the entities shown on the list may also change if:
> - HMRC's view was given many years ago, and there have been significant changes in the relevant foreign law
> - there are any significant changes in foreign law after the publication of this guidance.
>
> Furthermore, whilst one type of foreign entity may share certain characteristics with another, it does not necessarily follow that HMRC would have the same general view as to whether they are "transparent" or "opaque" or that a specific UK taxation provision would apply to them in the same way. Each entity would need to be considered in accordance with its own characteristics.

[394] ATO ID 2010/27 (28 January 2010).

> The general view provided in the list may therefore help inform customers and HMRC officers when planning their affairs and risk assessing respectively. However, the UK tax treatment will depend on the facts of the case and the application of the specific UK tax provision to those facts. If any customer would like certainty to HMRC's view in a particular case, they can apply for a clearance in accordance with INTM180060.

I refer to this as the "**HMRC transparent/opaque list**" and set out the list below.[395]

I add an English translation, mainly from the IATE database.[396] There are no exact equivalents. A legal concept is not just a word: it is a vast theoretical construction, the world in a grain of sand. Some terms can be brought over into English easily; others require a long explanation. There is not often a single standard or correct translation: the IATE database usually offers choices. In cases where the foreign entity does not have a close English law equivalent, it is better to use the foreign language term rather than a potentially misleading English translation.

I mention in footnotes where OECD, "The Application of OECD Model Tax Convention to Partnerships" (1999) suggests that the tax treatment is different in the foreign state, which would result in a hybrid entity. In some cases the foreign tax treatment is more complex and the entity may be party hybrid, but that is too complex to address in a footnote.

90.54.1 *HMRC entity clearance*

The INT Manual provides:

> **INTM180060 Contacts and clearances** [Dec 2023]
> (This content has been withheld because of exemptions in the Freedom

[424] HMRC text erroneously reads: Civila.

[425] OECD, "The Application of the OECD Model Tax Convention to Partnerships" (1999) p.71 suggests this is treated as transparent in Spain.

[426] HMRC text erroneously reads: Comanditaria,

[427] The equivalent expression in German is: Einfache Gesellschaft.

[428] The equivalent expression in French is: Société à responsabilité limitée.

[429] The equivalent expression in French is: Société en commandite.

[430] This seems to refer to a partnership of Turkish Attorneys (ie, lawyers); I am not sure if it is actually a type of Turkish law entity as such.

> of Information Act 2000)
> **Contacts and Clearances**
> We will provide our view of whether we consider a particular foreign entity to be transparent or opaque in specific cases in line with our guidance on non-statutory clearances[431]
> Applications should be made in writing and include -
> - the name and address of the entity to be considered
> - why HMRC's view is being requested
> - consideration of factors 1 to 6 in INTM180020
> - if a view is required in respect of a particular source of income, your view of how that source is taxed in the UK
> - copies of any legislation, articles of association, by-laws, agreements or other documents governing the entity's creation, continued existence and management, including any amending documents
>
> Applications should be made by email to *entityclassification mailbox@hmrc.gov.uk* or by post to [specified address]

And again:

> The views expressed in the list are disclaimed as "general" views, and clearance applications are encouraged for a view on a specific case. Should a sufficient number of clearances be received HMRC will always look to update any relevant guidance.[432]

I would be interested to hear from readers who have obtained HMRC clearance on bodies not in the transparent/opaque list.

90.55 Ordinary share capital

The definitions of this term are as follows:

Provision	**Applies for**
s.989 ITA	Income Tax Acts
s.1119 CTA 2010	Corporation Tax Acts
s.42(4) FA 1930	SD group relief
Para 1 sch 7 FA 2003	SDLT group relief

[431] *http://www.gov.uk/guidance/non-statutory-clearance-service-guidance*

[432] HMRC "Taxing gains made by non-residents on UK immovable property Summary of Responses" (July 2018) para 3.16. *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722418/Taxing_gains_made_by_non-residents_on_UK_immovable_property_summary_of_responses.pdf*

The IT/CTA definitions are the same, and the SD/SDLT definitions are also the same except that they refer to a body corporate rather than a company. It may be helpful to set out the IT/SD provisions side by side:

s.989 ITA	**s.42(4) FA 1930**
The following definitions apply for the purposes of the Income Tax Acts...	In this section
"ordinary share capital", in relation to a company, means all the company's issued share capital (however described), other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the company's profits	"ordinary share capital", in relation to a *body corporate*, means all the issued share capital (by whatever name called) of the body corporate, other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the profits of the body corporate.

90.55.1 *Equity share capital compared*

For company law, s.548 Companies Act 2006 provides:

> In the Companies Acts "equity share capital", in relation to a company, means its issued share capital excluding any part of that capital that, neither as respects dividends nor as respects capital, carries any right to participate beyond a specified amount in a distribution.

The CT Manual comments:

> **CTM00511 meaning of ordinary share capital: general** [Dec 2021]
> ... The tax and company law definitions are quite similar in effect; "distribution" under company law is defined at CA06/S829 in terms that include "every description of distribution of a company's assets to its members, whether in cash or otherwise" but excludes capital operations such as bonus (capitalisation) issues, capital reductions, redemptions or purchases of shares out of capital and distributions in a winding-up.
> The Corporation Tax definition of "distribution" at CTA10/PART23 is somewhat broader. It reflects anti-avoidance provisions, aimed for example at certain interest payments which have the character of profit distributions, and covers some capital operations. But the tax definition [of ordinary share capital] focuses on "dividends".

90.55.2 *Significance of ordinary share capital*

The term is used very frequently in tax legislation and it is not practical to give a full list. It is used in particular in the definition of group for group reliefs.

90.55.3 *"However described"*

CTM provides:

> **CTM00511 meaning of ordinary share capital: general** [Dec 2021]
> **Types of share capital**
> The reference in the tax definition to "however described" reflects the fact that commercial practice employs a variety of descriptions of types of share capital which broadly describe their characteristics but are not definitive without reference to the articles or other constitutional documents of the issuing company. Examples are deferred ordinary shares; participating preferred ordinary shares; participating preference shares. Sometimes shares will be labelled "non-voting", "redeemable", "cumulative" or "convertible". These are helpful pointers, but the articles must always be consulted.

90.55.4 *"Share capital"*

We do not have a short authoritative definition of share capital in UK law. Section 545 CA 2006 provides:

> References in the Companies Acts to a company having a share capital are to a company that has power under its constitution to issue shares.

CTM refers to this and provides:

> **CTM00512 share capital** [Dec 2021]
> ... Share capital is the amount appearing in the balance sheet from the issue of shares and if shares are issued at a premium over their nominal value the premium is reflected in a share premium account separate from the nominal share capital, although for both company law purposes (CA06/S610 (4)) and tax law purposes (CTA10/S1025 (2)) the premium is treated as forming part of the share capital for the purposes of its "reduction" under company law and its "repayment" under tax law.
> This means that share capital reflects the equity (ownership) interests of the company members in their company and, in liquidation, the value of the interests (if any) after creditors have been repaid.

> Historically, share capital reflects shares in the "joint-stock" lying in the hold of a merchant adventurer trading vessel.

I am not sure that the history is relevant to the present law, though it explains the expression "joint stock company".

> Originally investors owned their own trading stock but as time went on it was held jointly and divided into shares. The important point in modern terms is that share capital, together with share premium, other reserves and undistributed profit, reflects company assets net of liabilities, and thus ownership (not creditor claims).

The Manual refers to s.1041 Companies Act 2006 which provides:

> (1) For the purposes of section 1040 (companies authorised to register under this Act) "joint stock company" means a company—
>
> (a) having a permanent paid-up or nominal share capital of fixed amount
>
> [i] divided into shares, also of fixed amount, or
>
> [ii] held and transferable as stock, or
>
> [iii] divided and held partly in one way and partly in the other, and
>
> (b) formed on the principle of having for its members the holders of those shares or that stock, and no other persons.
>
> (2) Such a company when registered with limited liability under this Act is deemed a company limited by shares.

The Manual continues:

> Members' liability in the case of a limited company is limited to the nominal amount of the share capital they hold. Limited companies are much the most common, for commercial reasons, but companies may be formed without a share capital and members' liability may be limited by guarantee. Companies limited by guarantee are generally formed by non-profit seeking members who nevertheless wish to operate via a corporate entity, and are commonly used for charities. Some companies limited by guarantee with a share capital still exist, but since 22 December 1980 (in Great Britain, but 1 July 1983 for Northern Ireland) may no longer be formed.
>
> Unlimited companies are fairly rare but continue to be formed due to their limited reporting requirements. Their members may choose whether or not to have a share capital.
>
> In 1999 the Special Commissioners considered the status of "founders' deposits" with a company limited by guarantee in the case *South Shore*

> *Mutual Insurance Co Ltd v Blair* 1999 STC (SCD) 296. The Special Commissioners came to the conclusion that the deposits were not issued share capital; the company did not, in fact, have any authorised share capital and, as a consequence, could not have issued share capital. Companies Act 2006 abolished the requirement for a company to have an authorised share capital with effect from 1 October 2009, but the case contains a useful review of authorities on share capital.

90.55.5 *"Shares"*

The CT Manual provides:

> **CTM00513 what is meant by "shares"** [Dec 2021]
> [The Manual makes some general comments companies and company shares, and continues;] Lord Millett gives a useful summary of the "juridical nature of a share" in *IRC v Laird Group plc* [2003] UKHL 54 at [37]. Shares are often described as a bundle (or "fasciculus") of rights and liabilities. See Lord Wright in *Lowry v Consolidated African Selection Trust Ltd* (1938-41) 23 TC 259 at 298.

90.55.6 *Issue/allotment of shares*

The IHT Manual continues:

> **Issue and allotment of shares**
> Possession of a share certificate is prima facie evidence of ownership of a share, CA06/S127. This does not, of itself, confirm ownership and certificates are not essential to demonstrate that share capital has been issued. However, in order to be a member of a company under the UK Companies Acts, a person must be entered in the company's register of members, CA06/S112. From 30 June 2016 certain private companies can report changes of membership to Companies House to be reflected in a public register rather than keeping their own. The issue of share capital is only complete when the processes of application, allotment and issue are complete: *National Westminster Bank plc v IRC* [1994] STC 580. Shares are allotted when a person acquires the unconditional right to be included in the company's register of members: CA06/S554. TCGA92/S288 (5) provides that, for chargeable gains purposes, shares are treated as issued if they are to be issued under the terms of an unconditional letter of allotment or similar instrument.

90.55.7 *Dividend at fixed rate*

The CT Manual provides:

CTM00514 how "ordinary" shares are distinguished [Dec 2021]

The general meaning of ordinary share capital (see CTM00511) depends on identifying and excluding capital to which the holders have a right to a dividend at a fixed rate but have no other right to share in a dividend. (There are, though, some slightly different definitions of ordinary shares or shares for specific purposes, see for example CTA10/S160 (group relief, CTM81010) and CTA09/S931U (distribution exemption, INTM653050)).

The concept of "ordinary capital" originated in the wartime Excess Profits Duty at F(2)A1915/SCH4/PART1/PARA6, for the purposes of applying the tax to a subsidiary as though it were a branch of the parent; the aim of that rule being to distinguish equity capital from loan capital for this purpose.

That distinction remains relevant today and is expressed in the current definition. The aim of the current tax legislation is to exclude instruments that are in legal terms shares but in effect represent perpetual debt, namely fixed rate preference shares. The definition appears fairly straightforward but has given rise to a number of issues, addressed in the following table.

Some of the issues are finely balanced, and the table is, except where authority is quoted, only a guide. If arrangements appear to reflect uncommercial elements designed to circumvent the purpose of the legislation in identifying ordinary share capital the principles will be applied accordingly.

Description	**Ordinary Share Capital**	**Comment**
Share with no dividend rights	Yes	CTA10/S1119 is silent on rights other than fixed rate of return
Fixed rate preference share with zero coupon	Yes	Right to nothing is not a right to something. See *McQuillan v HMRC* [2017] UKUT 344
Fixed rate preference share with small coupon	No-but see comment	Could be fact dependent, particularly where there are avoidance concerns
Fixed rate of 10% cumulative	No	Holder knows return is fixed even when profits not available
Fixed rate of 10% non-cumulative	Yes	Some years no dividend will be paid so is more like equity than debt
Preference share with right to "tiered"	Yes	Rate is not fixed as can change depending on tier. There is more than

dividends, meaning they increase on a pattern over time		one fixed rate, and in context this is not a case where the singular should include the plural
Right to greater of specified sum or dividend paid in respect of another class of shares	Yes	Rate is not fixed and similar analysis applies as for tiered dividends - there is right to a return at one of two fixed rates
Fixed rate preference share but with rights in liquidation	No - but this is finely balanced and may depend on facts of case	A distribution in liquidation is of surplus assets rather than of profits. But, depending on the circumstances, a purposive approach might point to a different conclusion
Preference share with 2 alternative fixed rates	Yes	No fixed rate but a rate that varies between two fixed levels. Similar analysis as for tiered dividends
Fixed rate preference share but with right to further dividend payment were certain events to occur (e.g. breach of banking covenants)	Yes	Right to further payment is another right to share in the profits. But conclusion might be different if circumstances very unlikely to materialise
Preference shares where coupon compounds over time or a preference share where a rate of interest is added if dividend is unpaid	Borderline – this is finely balanced and may depend on facts of case. See *Stephen Warshaw v HMRC*, an FTT case TC/2017/08674 which is of persuasive rather than precedent authority	If the rate is fixed and cumulative arguably the shares are not ordinary share capital as there is in the end nothing beyond a right to a return at a fixed rate, albeit that the coupon compounds. Where a further rate of interest is added if the dividend is unpaid, the issue is whether the additional interest is seen as a return on the original investment, which would support fixed rate. But if seen as a separate return on amounts outstanding there would be a right to two differing fixed rates, and the tiered dividends analysis would apply
Fixed rate of 10% cumulative but	Depends on whether	Third party involvement does not affect underlying right to income.

dividend only paid on regulator authorisation/fixed rate of 10% non-cumulative but dividend can only be paid if regulator authorises	cumulative or non-cumulative	There is an underlying fixed rate where it is cumulative and the regulator can only prevent payment.
LIBOR plus a fixed percentage	Yes	Rate is not fixed because LIBOR varies – doesn't matter that it is a fixed point of reference

90.55.8 *Permanent interest bearing shares*

HMRC say:

> HMRC has also concluded that building society permanent interest bearing shares (PIBS), which are in reality subordinated debt instruments, also should not have been accepted as 'shares' in capital.

90.55.9 *Swiss Participation Certificate*

HMRC say:

> However, Swiss Participation Certificates (with par value, as distinct from Profit Sharing Certificates) will qualify as shares in company capital.
> With immediate effect, the 'shares' which are not shares in company capital will no longer be accepted as meeting the ordinary shares requirement for Corporation Tax relief under Part 12, CTA 09, on employee share acquisitions.

90.55.10 *Foreign companies*

The difficulty is that foreign laws may not have the UK concept of share capital. We have to apply a resemblance test appropriate to vague terms. The CT Manual provides:

> **CTM00515: foreign registered companies** [Dec 2021]
> The UK tax rules are based on UK company law. This means that companies formed under foreign law will usually require analysis of at least some of their features by comparison and analogy with the UK Companies Acts.
> In *Ryall v The Du Bois Co Ltd* (1933) 18 TC 431, Lord Hanworth MR said, "a share in a foreign company may be something different from

and, indeed, is almost necessarily different from, a share as we know it in an incorporated company", and Slesser LJ said, "we have to consider what would be analogous to stocks and shares in Germany in dealing with what is a company, and allowing for differences of law in that country". Approach by analogy is applied generally in addressing foreign registered companies.

The key feature of issued share capital is that the issuing body has full legal personality separate and distinct from that of its members, able to carry on business and to own assets in its own right. This establishes proprietorial interest though the holding of issued share capital in the body in contrast to partnership interests. In UK partnership law partnership property is held and applied by the partners for the purposes of the partnership (PA1890/S20 (1)) and the partnership is the relation between the persons carrying on the business (PA1890/S1 (1)).

(In Scotland a firm is a legal person distinct from its members, PA1890/S4 (2), but S1 (1) and S20 (1) still apply. This is because, whether partnership property is held in the name of the firm, or in the name of partner or partners, the persons ultimately beneficially interested in it are the partners according to their partnership rights – per The Scottish Land Court SLC/248/04) following an examination of the authorities. Partnerships established under Continental civil law present similar challenges; their "legal personality" may mask what is under civil law known as intuitu personae, or originating in the persons).

Capital in this context means a contribution that provides the contributor with an equity interest in (i.e. part ownership of) the body, as reflected in the proportion and nature of shares held in the fixed capital. CA06/S5 (3), in considering the remaining class of companies limited by guarantee with a share capital (see CTM00512), observes that any provision that divides a company's undertaking into shares or interests is a provision for share capital.

This means dividing the company itself, its "corpus", as referred to in *Rae v Lazard Investment Co Ltd* (1961-64) 41 TC 1. An equity or ownership interest in a body is distinguished from a debt claim against it.

The Special Commissioners in the *South Shore Mutual Insurance* case (see CTM00512), identified characteristics of "incidents" of share capital, but these are pointers rather than absolute requirements. For instance, shares may be non-voting. Important incidents, in relation to members' interests are:

- whether they are like shares in share capital (a portion of the capital of the corporate body) or like debt (money owed by the body corporate to the members),

- what proprietary rights characteristic of shares attach to them, both economic and voting, and what responsibilities,
- how they are legally evidenced in accordance with local law,
- whether they are denominated in a stated fixed value,
- whether the members' interests compose a fixed and certain amount measuring the company's capital which creditors may look to as security, and
- whether the members' interests are capable of transfer and if so whether such a transfer would amount to transferring of a portion of the capital of the company, with attendant proprietary rights and responsibilities (rather than a claim as creditor).

90.55.11 *No nominal capital*

The CTM provides:

> **CTM00516 foreign registered companies: particular issues** [Dec 2021]
>
> **No nominal capital**
>
> Since the 1960s there has been an international move away from the "capital maintenance" approach still central to UK company law. Some US jurisdictions, the California Corporations Code for example, dispense with the concept of nominal capital and others, for example Delaware, allow the issue of shares with nil nominal value. A similar approach has been adopted in a number of other jurisdictions. Such shares may be referred to as "zero par" shares or simply "zeroes".
>
> An adaptable and pragmatic approach is adopted when dealing with overseas company law which does not straightforwardly align with that of the UK (although UK tax and company law are distinct, aspects of UK Corporation Tax law are unmistakably based on the company law capital maintenance principle, for example the distributions code at CTA10/PART23, see CTM00511).
>
> Where there is no nominal capital requirement under overseas law, an amount on the facts subscribed as fixed capital analogous to share premium over nil nominal value shares will be treated as share capital by analogy with CTA10/S1025 (2) for the purposes of determining repayment of share capital.

90.55.12 *SCA: Share capital*

The CTM provides:

> **CTM00516 foreign registered companies: particular issues** [Dec 2021]
> **Continental (civil law) "partnerships" with share capital**
> Such an institution as a French société en commandite par actions may often be translated as a "limited partnership with a share capital" into English. The word "société" is in fact indeterminate and cannot be definitively translated as company or partnership for the purposes of UK tax law, but the share capital aspect reflects its nature as a société de capitaux (in civil law generally, Latin intuitu pecuniae – compare the reference to intuitu personae at CTM00515). This is consistent with the classification of a French SCA as opaque at INTM180030.

90.55.13 *LLC: Share capital*

For LLCs generally, see 90.43 (Limited liability company). This section considers whether an LLC has share capital.

Art 18-702(c) Delaware LLCA provides:

> Unless otherwise provided in a limited liability company agreement, a member's interest in a limited liability company may be evidenced by a certificate of limited liability company interest issued by the limited liability company.

CG Manual formerly referred to this and said:

> **CG-APP11 Meaning of Ordinary Share Capital** [Nov 2018]
> If a DLLC issues "shares" in this way and the other factors relating to the company suggest that it has share capital then we will accept that these "shares" may be regarded as "ordinary share capital" for the purpose of [s.989 ITA/s.1119 CTA 2010].
> It should be noted that not all DLLCs issue share certificates but they may still have "ordinary share capital". Regard must be had to the particular terms of the agreement by which the LLC has been created.
> In any case of doubt or difficulty regarding the status of the share certificates HMRC will advise in particular cases in line with the non-statutory business clearances. Please send in any applications to [address]
> Other States within the United States of America have comparable legislation to Delaware. Where it can be shown that a particular State has legislation analogous to the Delaware legislation with which we are familiar, HMRC would expect to be able to provide advice in line with that for DLLCs.

Although that is not in the current Manual, there is no reason to think that the HMRC view has changed. The CTM provides:

> **CTM00516 foreign registered companies: particular issues** [Dec 2021]
> **Certificates**
> To take an example, a Limited Liability Company (LLC) organised under the law of a US state may issue transferrable interests analogous to shares in share capital but these will not necessarily be evidenced by a certificate of interest (see US Revised Uniform Limited Liability Company Act, Section 502(d)). If there are no certificates, this is not necessarily fatal to the conclusion that the members' interests are analogous to shares in ordinary share capital, provided (as would be expected to be the case) that the interests are clearly defined and recognisable as equity (ownership) interests in the entity.

The FTT has found as a fact that the membership interest in a Delaware LLC was not similar to share capital, but rather similar to partnership capital of an English partnership.[433] The membership interest would not have been ordinary share capital. But HMRC do not propose to follow that view:

> HMRC ... proposes to continue its existing approach to determining whether a US LLC should be regarded as issuing share capital.[434]

In practice this view will often favour the taxpayer, who will not complain. This also has the attraction of leaving the position as it was generally thought to be before *Anson*, and so not upsetting existing arrangements.

90.55.14 *Share capital: GmbH*

CG Manual formerly provided:

> **CG-APP11: Meaning of Ordinary Share Capital** [Nov 2018]
> A Gesellschaft mit beschränkter Haftung (GmbH) in Germany, literally

[433] *Anson v HMRC*, reported under the pseudonym *Swift v HMRC* [2010] UKFTT 88 (TC) at [7(1)]. There is no indication of whether the membership interest was certified, and no discussion of whether certification makes a difference.

[434] HMRC Brief 15/2015 "HMRC response to the Supreme Court decision in *Anson v HMRC*"
https://www.gov.uk/government/publications/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44/revenue-and-customs-brief-15-2015-hmrc-response-to-the-supreme-court-decision-in-george-anson-v-hmrc-2015-uksc-44
See 90.47.1 (LLC: Opaque).

> a ‘company with limited liability’, is an entity of a very similar kind to a UK private limited liability company. An Aktiengesellschaft (AG), sometimes called a “joint stock company” may be considered more akin to a UK public limited liability company (plc) as its stock may be listed. Under German law, the capital of a GmbH is not divided up into small units. However, a GmbH has a fixed amount of capital (Stammkapital) which corresponds to the maximum amount of share capital that the company may issue, similarly to a UK limited liability company’s “authorised share capital”. The amounts originally contributed (Stammeinlagen) by the members (Gesellschafter) will also be noted, just as in the UK the initial subscriber shares will be noted in the memorandum of a limited liability company.
>
> Article 5 of the German GmbH law sets out a minimum amount of Stammkapital (authorised share capital) as €25,000, and the minimum amount of Stammeinlage (original contribution/subscription) of each Gesellschafter (member) at €100.[435]
>
> Based upon GmbH cases HMRC has previously considered, the amounts of Stammeinlage subscribed by the members may normally be regarded as issued share capital for the purposes of the Taxes Acts.
>
> **Note**
>
> The above information has been set out in order to assist companies and their advisers understand HMRC’s present interpretation of [the definition of “ordinary share capital”] in the context of non-UK entities. The above note reflects our approach as taken in the context of a number of particular cases. Due to the particular facts that will be relevant in each individual case it is not possible for HMRC to offer a general advisory service in respect of other kinds of body throughout the world.

Fraser says:[436]

> *Ryall v Du Bois*[437] encourages a generous construction of the word “shares”. The issue in that case was whether the interest of a member in a German GmbH, which appeared not to be divided into fractional units (in the way that share capital is) or to be registered in a register, was “stocks” or “shares” within the meaning of the then Rule 1 applicable to Case V for Schedule D. The decision may not be

[435] Article 5 Gesetz betreffend die Gesellschaften mit beschränkter Haftung *https://www.gesetze-im-internet.de/gmbhg/__5.html*

[436] “Respectez les animaux etrangers! The Inland Revenue lists on entity classification” [2001] BTR 158.

[437] 17 TC 431.

absolutely conclusive that the interest of a member in a GmbH (or other overseas entity the ownership interests in which do not have the attributes of shares in an English company) is issued share capital, in that there may still be some room for distinguishing between "issued share capital" for the purposes of group relief from tax and "shares" within the meaning of Rule 1. Rule 1 appears to have been principally intended to distinguish between investment income on the one hand and income from active overseas businesses, on the other. Nevertheless, a conclusion that a GmbH does not have "issued share capital" would appear to be perverse in the extreme. The author would argue that these concepts no longer serve any useful purpose but they can, if strictly construed, create unnecessary hindrances to cross-border investment, where, for instance, a relevant company is incorporated in a jurisdiction where UK concepts of "issue" of shares are not in practice applied.

90.55.15 *Genußscheine/jouissance shares*

HMRC say:

> **Definition of ordinary share capital for employee share schemes**
> Certain tax advantaged share schemes have awarded interests in, or options over, particular types of instruments. As there is no direct English translation, these types of instruments are known as 'jouissance shares' ('actions de jouissance' in French and 'Genußscheine' in German) and HMRC has previously approved such schemes.
> Instruments of this type are generally issued by companies in Switzerland, Germany, Austria and France.
> After careful consideration HMRC has concluded that such instruments do not satisfy the ordinary share capital conditions as provided for in various parts of the employment related securities legislation in ITEPA 2003. While 'Genußscheine' and 'actions de jouissance' are frequently translated as shares, the better translation of 'scheine' and 'actions' is 'certificates'. The concept of ordinary share capital is used elsewhere in the taxes acts and will be interpreted accordingly.
> Share capital represents the ownership interest of members in the corpus or assets of a company reflected in its balance sheet after liabilities.
> Although 'Genußscheine' and 'actions de jouissance' carry an interest in dividends and in a winding-up to unpaid dividends, they do not carry an interest in company capital. This means they cannot be shares in share capital.
> HMRC will honour existing advantageous Income Tax treatment in relation to interests in or options over such certificates or 'shares'

> already granted, but from 6 April 2019 we will no longer accept these as satisfying the ordinary share capital condition and as such the requirements of the employment related securities legislation will also not be satisfied.

Similarly the CTM provides:

> **CTM00512 share capital** [Dec 2021]
> ... It follows that certificates that simply give rise to an interest in distributions of profit, an income stream, sometimes called "jouissance" shares, are not shares in share capital. The French term is used because there is no (common law) English equivalent. And the translation of "actions de jouissance" or in German "Genussscheine" is closer to "enjoyment certificates" than to "shares".

90.56 Capital contribution

90.56.1 *Company law background*

Capital contribution is a common method for Delaware companies to raise capital. The CG Manual explains the company law background:

> **CG43500 General** [Dec 2021]
> The company law provisions of some foreign jurisdictions, notably the USA, provide for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company, but is not made in exchange for shares issued to the contributor and it does not constitute a separate asset in its own right...
> An overseas company receiving a capital contribution may treat it in a number of ways, depending on the law of the foreign jurisdiction concerned and the conditions attaching to the payment. These may give the company a choice whether to designate the contribution as 'surplus' or as 'capital'. Amounts designated as 'surplus' may be available for distribution to shareholders, subject to solvency requirements. Amounts designated as 'capital' may only be repayable by way of a capital reduction. A company's balance sheet will generally show capital contributions made to it as an item of shareholders' funds separate from paid up share capital. Capital contributions may be described, for example, as 'additional paid in capital'.
> Capital contributions are not recognised under UK company law and if a payment is not made as part of the terms of issue of shares, it is possible it is either a loan or a gift. If a UK taxpayer contends that a sum paid to an overseas company is a capital contribution rather than a loan or gift, evidence to support that contention should be sought.

> For example if a UK company suggests a payment to an overseas affiliate is a capital contribution rather than a loan or gift there should be evidence of the appropriate treatment in the company accounts. If however there is a possibility that the money can be repaid, it is likely to be a debt within the loan relationships regime, see CFM30000. It is therefore necessary to examine all the circumstances surrounding the money transfer before coming to any conclusion as to what the nature of the payment is. If however agreement cannot be reached as to the nature of the payment and therefore the tax consequences (see CG43501 and CG43502 below), the decision lies with the Tribunals and the courts.

90.56.2 *Capital contribution to UK co*

The passage continues:

> Occasionally a capital contribution may be made to a UK company. As capital contributions are not a concept formally recognised within UK company law, a contribution received by a UK company should be reported within distributable reserves either as a gift or possibly a donation. If however it can be repaid in any circumstances it should be considered as a loan falling within the loan relationships regime.

The International Manual also makes some comments:

> **INTM502050 Issues affecting equity function cases** [Sep 2021]
> ... **Capital contributions**
> ... A capital contribution is ... not a loan and creates no obligation to transfer economic benefit to the maker of the contribution.
> In the UK there is no company law provision regarding capital contributions. If a UK company receives a capital contribution it will appear as such on the balance sheet within shareholders' funds. If the company makes a capital contribution, it will normally be included in the accounts as an added cost of investment in a subsidiary.
> If a UK company contends that a sum paid to an overseas affiliate is a capital contribution rather than a loan, HMRC can only accept the contention if there is clear evidence supporting it. For example, there should be a written agreement that a capital contribution has been made rather than a loan, and evidence of the appropriate treatment in the company accounts. If there is a possibility that the money can be repaid, it is a 'money debt' under the loan relationships legislation. It is necessary to examine all the circumstances surrounding the money transfer before making a decision. From HMRC's point of view, the amount contributed should not be distributable.

In *Fenston v HMRC* the position was explained as follows:

> ... assuming that at all relevant times the assets of the Company exceeded its liabilities ... as a result of the Contributions, the state of the Company's stock changed in the sense that the amount of funds distributable with respect to the Shares as a dividend or upon liquidation was increased by the amount of the Contributions.
>
> Under Delaware law, the funds available for payment of dividends, if and when declared by a corporation's board of directors, are payable out of "surplus". "Surplus" is defined in relation to "capital". "Capital" with respect to no par stock, such as the Shares, is defined as that portion of the consideration received by a corporation for the issued shares of its capital stock that the directors determine to be capital, or if no such determination is made, the amount of consideration received. The excess, if any, at any given time, of the net assets of the corporation over the amount so determined to be capital shall be "surplus". "Net assets" means the amount by which total assets exceed total liabilities. Therefore, the "surplus" of a corporation is an amount equal to the total assets of the corporation, minus the total liabilities of the corporation, minus the capital of corporation, minus the total liabilities of the corporation, minus the capital of the corporation (as just described). Here, the Contributions increased the Company's net assets, and thus its surplus, thus increasing the amount of funds the Company could lawfully have distributed to the trustees (as stockholders) as a dividend. With respect to entitlement to distributions on dissolution, when a corporation dissolves, its assets are held in trust for the benefit of creditors, and if creditors are paid in full, the stockholders. Accordingly, when a corporation dissolves it must first pay or provide for its creditors, both fixed and contingent, in full before any distribution can be made to stockholders. However, once creditors are paid or provided for, any residual assets are to be distributed to the corporation's stockholders. As described above, the Contributions increased the Company's total assets. If the Company had been dissolved immediately after such Contributions had been made ... then the amounts the trustees (as stockholders) would have been entitled to receive as stockholders upon dissolution with respect to the Shares would [have] been increased by the amount of the Contributions assuming, in each case, that amounts would remain for distribution to the stockholders following the payment in full of the Company's creditors.
>
> Therefore, the Contributions would have increased the amounts that could have been distributed with respect to the Shares either as a

dividend or as a liquidating distribution.[438]

90.56.3 *Capital contribution: CGT*

Section 38(1)(b) TCGA allows a deduction for:

> [I] the amount of any expenditure wholly and exclusively incurred
> [a] on the asset by him or on his behalf
> [b] for the purpose of enhancing the value of the asset,
> [c] being expenditure reflected in the state or nature of the asset at the time of the disposal

I refer below to **"CGT deduction conditions [a] - [c]"**.

> [II] and any expenditure wholly and exclusively incurred by him in establishing, preserving or defending his title to, or to a right over, the asset

The CG Manual provides:

> **CG43501 Made under terms of share issue** [Dec 2021]
> A shareholder may make a capital contribution to a company at the same time as the shareholder acquires shares in the company. If the capital contribution is made as part of the terms of issue of the shares, then the capital contribution should be accepted as consideration given wholly and exclusively for the acquisition of the shares within s.38(1)(a) TCGA.
> If a capital contribution is made as part of the terms of a share issue which is treated as a reorganisation for capital gains purposes, then the capital contribution should be accepted as consideration given for the new holding for the purposes of s.128(1) TCGA. The amount of the capital gains deduction will remain subject to the other general rules, such as s.17 TCGA and s.128(2) TCGA ...

So far so good. However the Manual continues:

> **CG43502. Other contributions not allowable** [Dec 2021]
> Where shares are disposed of in a company to which a capital contribution has been paid a claim may be made for a deduction in respect of that contribution in the capital gain computation. The claim will normally be for the contribution to be allowable as enhancement expenditure under s.38(1)(b) TCGA 1992.
> Although a capital contribution will typically affect the value of the

[438] [2007] UKSPC SPC00589 at [9]; I omit references to the Delaware General Corporation Law.

shares in the company to which the contribution is made, it does not represent either

[1] expenditure on the shares,[439] or

[2] expenditure reflected in the state or nature of the shares at the time of their disposal.

The Special Commissioners decision in the case of *The Trustees of the F. D. Fenston Will Trusts v HMRC* (SpC589/07) confirmed that a capital contribution which is not made as part of the terms for the issue of shares is not, in the absence of anything to indicate that the rights and privileges attaching to the shares have been enhanced, an allowable deduction within s.38 TCGA 1992 when shares in the company are disposed of. In particular, the capital contribution does not represent enhancement expenditure within s.38(1)(b) TCGA 1992.

In applying this decision it may be argued there are circumstances were the tax result will be distorted if the amount of tax payable takes account of value realised, directly or indirectly, by a shareholder from a capital contribution, but the capital contribution itself is not reflected in allowable expenditure for capital gains purposes. Below are some examples where such distortion may be alleged.[440]

[1] A capital contribution is returned by a company to its shareholders as a dividend or distribution and they are taxed on the distribution but the shareholder will have had no deduction for the contribution. Our view is that a dividend or distribution is paid out of the surplus of the company so therefore is not a direct return of the capital contribution paid by the shareholder (in which case it is probably a loan). The nature of the receipt is changed when a dividend or distribution is made in comparison with the time when the capital contribution was paid.

[2] A capital contribution is retained by the company at a time when there is a sale of shares in the company. The contribution may be reflected in an increased consideration for the disposal of the shares but a capital gains deduction will not be given.

[3] There is similar scope for distortions where a capital contribution is followed by a share exchange, reconstruction or amalgamation treated as a share reorganisation for capital gains purposes, see CG52500+. This is then followed by a disposal of the new holding for an amount which reflects the capital contribution made to the

[439] Author's footnote: Point [1] is wrong and directly contradicted by the decision in *Fenston* but it would be sufficient if HMRC are right on point [2].

[440] Author's footnote: "Distortion" is a euphemism for unfairness, and "alleged" is tendentious since the unfairness of [2] and [3] is obvious.

> company in which the original shares were held, and the capital contribution is not allowable expenditure on the original shares.
>
> In these last two cases, unless the capital contribution resulted in a change in the rights and privileges attaching to the shares, and that change is reflected in the nature of the shares at the time of their disposal, it is not an allowable deduction within s.38(1)(b) TCGA 1992 when those shares in the company, or replacement shares in that or a different company acquired by virtue of a share reorganisation are disposed of.

In *Fenston*, the Special Commissioners held that the capital contribution was expenditure "on the asset for the purpose of enhancing the value of the asset." So CGT deduction condition [a] was met. Unfortunately they held that the expenditure was not reflected in the state or nature of the asset at the time of the disposal so deduction condition [c] was not met

> 23 ... [1] Further, 'state and nature' for these purposes must be something other than merely the value of the asset—otherwise this phrase [CGT deduction condition [c]] would add nothing to the immediately preceding words.
>
> [2] In this case the capital contributions did not result in any increase in the number of shares in issue, or result in any change in the rights or restrictions attaching to the shares. The only effect of the capital contributions was to increase the surplus of the company—which would increase the amount available for distribution to shareholders, and therefore presumably the value of the shares. We do not consider this sufficient for the expenditure on the capital contributions to be reflected in the state and nature of the shares, either at the time the expenditure was incurred or at any time subsequently.

Point [1] is wrong[441] and point [2] is not convincing. However, the case was approved by the CoA in *Blackwell v HMRC,*[442] so the law is for most practical purposes settled. But it ought to be changed by extending allowable deductions to include capital contributions, and expenditure of the kind disallowed in *Blackwell*. The current law is an example of

[441] The words "reflected in the state or nature of the asset" are needed to cover this situation: suppose T spends £x on a kitchen in T's home. 15 years later that is replaced by a new kitchen. The £x was "incurred on the asset for the purpose of enhancing the value of the asset" but was not "reflected in the state or nature of the asset" at the time of disposal. In this case it is sensible to disallow the capital expenditure in a CGT computation.

[442] [2017] STC 1159 at [26].

egregious over-taxation.[443]

The CG Manual discusses the possibility of relief under s.38(1)(b)[II] TCGA which allows a deduction for expenditure "establishing, preserving or defending his title to, or to a right over, the asset:"

> There may also be cases where companies call on their shareholders to provide further capital to meet a specified purpose, in circumstances where a shareholder who fails to provide the additional funds may lose the entitlement to the shares held. In this situation, depending on the particular facts, the shareholder may be able to establish that the additional payment represents expenditure on preserving or defending the title to the shares within the terms of Section 38(1)(b) TCGA 1992.

90.56.4 *Planning*

Companies should in general be funded by share subscription or loan, and not by capital contribution, because the expense of the capital contribution will in general be disallowed for CGT purposes.

The HMRC view that "If there is a possibility that the money can be repaid, it is likely to be a debt" mitigates some of the unfairness of the treatment of capital contributions by reducing the number of occasions where a transaction is categorised as a capital contribution.

90.57 UK check-the-box rules?

Heather Field explains:[444]

> In 1995, the Service acknowledged that the flexibility afforded by applicable state laws undermined the theory of the corporate resemblance test and explained:
>
>> [M]any states recently have revised their statutes to provide that partnerships and other unincorporated organizations may possess characteristics that have traditionally been associated with corporations, thereby narrowing considerably the traditional distinctions between corporations and partnerships....
>>
>> One consequence of the narrowing of the differences under local law between corporations and partnerships is that taxpayers can achieve partnership tax classification for a non-publicly traded organization that, in all meaningful respects, is virtually

[443] See the discussion of egregious over-taxation at 2.5.4 (Pro-avoidance rationale).

[444] "Checking in on Check-the-Box" 42 Loy. L.A. L. Rev. 451 (2009) *http://digitalcommons.lmu.edu/llr/vol42/iss2/4*

> indistinguishable from a corporation. The Service and Treasury recognize that there is considerable flexibility under the current rules to effectively change the classification of an organization at will ....[445]

Accordingly, the preamble to the proposed CTB regulations explained that the "Treasury and the IRS believe[d] that it [was] appropriate to replace the increasingly formalistic rules under the [Kintner] regulations with a much simpler approach that generally is elective."[446] Moreover, the Service acknowledged that, under the Kintner regulations, "taxpayers and the IRS must expend considerable resources on classification issues."[447]... Presumably, taxpayers also incurred significant legal fees in obtaining advice on these classification issues. Further, the Service noted that small businesses could be particularly hard hit by the considerable costs of obtaining advice regarding how to structure business entities to obtain the most favourable combination of state law and tax treatment.[448] These additional cost, resource allocation, and distributive considerations contributed to the Service's decision to move to a simplified elective entity classification regime, where taxpayers could "elect to treat certain domestic unincorporated business organizations as partnerships or as associations for federal tax purposes,"[449] while still availing themselves of the local laws' flexibility for structuring unincorporated businesses.[450]

[447] Footnote original: *Id.*

[448] Footnote original: *Id.*; see also Garcia, "Treasury Officials Address Check-the-Box Entities", 67 TAX NOTES 1009 (1995) (A Treasury official explained: "It's a resource allocation question .... Too many resources have been wasted both by the IRS and the private sector in resolving classification issues, even though in the end the taxpayer gets the desired status .... Classification becomes a very intricate game that if you have counsel, you get out of the maze and you're home free.") (internal quotations omitted).

[449] Footnote original: I.R.S. Notice 95-14, 1995-14 I.R.B. 7

[450] Footnote original: Simplification of Entity Classification Rules, 61 Fed. Reg. at 21,990. This goal of increased flexibility in organizational choice actually dates back to the adoption of subchapter S, enacted to enable "certain corporations to opt out of the double tax system so as to maximize organizational choice for small business owners." Steven A. Bank, The Story of Double Taxation: A Clash over the Control of Corporate Earnings, in Bus. Tax Stories 153, 178 (Stephen A. Bank & Kirk J. Stark, eds., 2005) (citing S. Rep. No. 85-1983, at 87 (1958)).

provides:[451]

> From the 1950s to 1996, the determination of whether a business entity was a C corporation [non-transparent] or a partnership was governed by case law and by 1960 regulations[452] that set forth factors considered indicative of corporate status. These corporate characteristics are (1) continuity of life, (2) centralization of management, (3) limited liability for owners of the entity, and (4) free transferability of interests. An unincorporated entity was classified as a partnership if it lacked any two or more of the four corporate characteristics...
>
> In late 1996, the IRS adopted new entity classification regulations known as the check-the-box regulations.[453] These regulations allow tax classification as either a partnership or a corporation to be explicitly elective subject to minimal restrictions for any domestic nonpublicly traded unincorporated entity with two or more members. The check-the-box regulations also provide that a single-member unincorporated entity may be disregarded for Federal tax purposes, that is, treated as not separate from its owner.

The Institute of Directors argue for a similar regime in the UK:

> Trading companies should be allowed to opt out of corporation tax by electing for a 'tax transparent' treatment on a similar basis to the successful "S-Corporations" regime in the USA.[454]

This would be beneficial; though the development of the idea to a consultation stage would require some investment in time and resources. It may be objected that this proposal would increase the number of hybrid entities which can be used for avoidance; but the answer to that is a regime which deals with the problems of hybrid entities.

Ideally the issue would be dealt with at an EU or OECD level, but that is not likely to happen.

90.58 Change of entity type

It is possible for an entity to change to another type of entity, eg a Foundation may become an Anstalt; a charitable company may become

[451] (2015) *https://www.jct.gov/publications.html?func=startdown&id=4765*

[452] Footnote original: Former Treas. Reg. sec. 301.7701-2. These were known as the Kintner regulations because they were based on the analysis in *U.S. v Kintner*, 216 F.2d 418 (9th Cir. 1954). See also *Larson v Commissioner*, 66 TC 159 (1976), acq. 1979-2 C.B. 1.

[453] Treas. reg. secs. 301.7701-1 through 301.7701-3.

[454] Institute of Directors, "GE2015: The IoD's Key Priorities for Tax Reforms" (2015).

a CIO; an AG may become a GmbH; an ordinary company may become a cell company. If the applicable law regards the new entity as the same as the previous entity, UK law will follow that analysis,[455] so the change does not in principle involve a disposal and acquisition which would be a chargeable event for CGT.[456]

The CT Manual considers conversion between a company and a mutual benefit society, which illustrates the point:

> **CTM40550 conversion to a Companies Act company and vice versa**
> [Dec 2021]
> Where a registered society converts to a Companies Act company under CCBS14/S112, or a Companies Act company converts to a registered society under CCBS/S115, this does not cause one entity to cease and another to come into being. They are treated as the same legal entity both before and after the conversion. No change of UTR should be necessary.
> ... such conversions do not generally give rise to any deemed or actual disposal of chargeable assets or distributions and there is no cessation and recommencement of the business...
> Where a registered society is a principal member of a group, a conversion will not stop it being the principal member of that group. Furthermore, where the registered society had acquired an asset in an intra-group transaction, the conversion will not lead to an occasion of charge for CG purposes.

90.59 Redomiciliation

The term "redomiciliation" is used to describe two distinct types of arrangement.

90.59.1 *Redomiciliation in strict sense*

Some jurisdictions[457] allow a company to change its place of registration/

[455] See Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), section 2 (Status).

[456] I say "in principle". Suppose (say) a foreign partnership (with legal personality, but whose assets are regarded as vested in the partners for CGT) converted into a company (which would be beneficial owner of its assets). That might be regarded as involving a disposal by the partners, even if the partnership and the company were regarded as the same person by the foreign law. And likewise if a company converted into a partnership. This is unexplored territory.

[457] See for instance [Isle of Man] Companies (Transfer of Domicile) Act 1998.
It is proposed to allow this in the UK; see HMRC, "Corporate re-domiciliation: consultation" (2021); "Corporate re-domiciliation: summary of responses" (2022)

incorporation. Under legislation which recognises and regulates the procedure:

(1) The company is registered in a new jurisdiction.
(2) The company is struck off the register in its original jurisdiction of incorporation ("the old jurisdiction")

The process brings about a change in company domicile and place of registration/incorporation.

A key question is whether the company post-redomiciliation:

(1) is the same company despite the change (the position may be compared to an individual changing domicile and citizenship); or
(2) a separate company from the company pre-domiciliation

The intention is usually that the company remains the same. The view taken by third countries depends on the applicable conflict of law rules. But in principle if the old and new jurisdictions both consider the company continues despite the change, this should be accepted in third countries. The Land Registry agree. Practice guide 78 (Overseas companies & LLPs) provides:[458]

> **4.5 Change of domicile**
> Where an overseas company has changed its territory of incorporation we will require the following forms of evidence to be lodged:
> - a letter from a qualified lawyer practising in territory A (the original place of incorporation) that makes it clear whether the company will either:
>   - cease to be incorporated in that territory, or
>   - continue to be incorporated in that territory as well as in territory B
>
> The letter must also state that the law of territory A recognises the company incorporated in territory B as the same legal person as the company that is or was formerly incorporated in territory A, and:
> - a letter from a qualified lawyer practising in territory B (the new place of incorporation) that makes it clear that:
>   - the company has been incorporated in territory B (not just registered as a foreign company with a branch or place of business there), and:
>   - the law of territory B regards the company as the same legal

https://www.gov.uk/government/consultations/corporate-re-domiciliation

[458] *https://www.gov.uk/government/publications/overseas-companies-and-limited-liability-partnerships-pg78* (Last updated 10 July 2023) para 4.5.

> person as the company that is or was formerly incorporated in territory A, rather than as a new company, and:
> - either a duly completed certificate in Form 7 by a qualified lawyer practising in territory B or a certified copy of the charter, statute, rules, memorandum and articles of association or other document(s) reconstituting the company in territory B....
>
> Unless the laws of both territories treat the company registered in territory B as the same legal person as the company registered, or formerly registered, in territory A, the company in territory B must be regarded as a new and different legal person, in which case it cannot be entered in the register unless the estate or charge is transferred to it by the company incorporated in territory A, or its liquidator, in the usual way.

The INTM has an extract from the ITH:

> **ITH356 Company residence: incorporation rule**
> ... Under company law relating to the UK a company cannot move its place of incorporation or registered office out of the country in which it is domiciled whilst at the same time retaining its identity, except by Private Act of Parliament. Some countries - Switzerland and Spain are examples - have procedures whereby a foreign incorporated company can reincorporate in those countries and retain its identity although Switzerland may now require the procedure to be recognised by the company's country of origin. In English law an English company which uses those procedures and is struck off the English register ceases to exist. The company, now foreign incorporated, is considered to be a different company.

This assumes that UK company law does not regard the foreign company as having the same identity.. That would no doubt change with the proposed law reform.

90.59.2 *Redomiciliation by reorganisation*

The term redomiciliation is also used to describe a more traditional type of reorganisation, under which:

(1) Existing shares of a company ("Oldco") are cancelled.
(2) Oldco issues shares to a new company ("Newco") in a new jurisdiction.
(3) Newco issues shares to the former shareholders of Oldco.

In this procedure neither company actually changes its place of registration/domicile: instead shareholders effectively swap shares in a company for shares in another company incorporated in another jurisdiction. Strictly speaking, the term redomiciliation is used rather loosely here; but the usage is common[459] and it is pedantic to object.[460]

90.60 Ascertaining foreign law

As similar rules apply in England, Scotland and Northern Ireland, I refer in this section to "UK law".

90.60.1 *Foreign law a question of fact*

Foreign law is regarded as a question of fact, and so needs to be proved by evidence.

Dicey says:[461]

> In any case to which foreign law applies, that law must be pleaded and proved as a fact to the satisfaction of the judge by expert evidence or sometimes by certain other means.

A court may direct, in an appropriate case, that foreign law should be ascertained by Counsel's submissions, rather than by expert evidence.

As foreign law is a matter of fact, a UK court decision is not a binding precedent. In *Baker v Archer-Shee* and *Archer-Shee v Garland*, the taxpayer lost in the first case, and succeeded in the second case, because in the first case the taxpayer provided no evidence of New York law, and it was assumed that it was the same as English law; in the second case the taxpayer provided evidence that New York trust law was different from English trust law.[462]

HMRC are currently challenging the decision in *Anson* on the grounds that the FTT made a mistake as to the foreign law. This was not the same situation as in *Baker/Garland*: there was no evidence as to US law in Baker but there was in Garland, so the courts were looking at the factual position under US law afresh. HMRC have to say that on the evidence available to the FTT in *Anson*, they should have come to a different finding of fact. Therefore, whilst another FTT is not bound by the FTT's

[459] For an example, see *Randall & Quilter Investment Holdings* [2013] EWHC 4357 (Comm) at [2].

[460] See too 58.7 (Redomiciled (ex-UK) securities).

[461] Dicey, Morris & Collins, *The Conflict of Laws* (16th ed, 2022) para 3R-001 (1); cited *Hartogs v Sequent (Schweiz) AG* [2019] EWHC 1915 (Ch).

[462] See 42.9 (Life tenant: Source of income)

finding in *Anson* and HMRC can certainly challenge it, in practice HMRC needs clearer evidence to win than in *Garland*.

In *Dreyfus* the taxpayer did provide evidence of French law which was accepted by the Tribunal, but the decision is not binding as it concerns a question of fact, HMRC do not follow it, and in practice that seems to have been accepted.[463]

This raises the question of what constitutes "foreign law". The tax tribunals (FTT and UT) and the Supreme Court, have UK-wide jurisdiction, so Scots law (in England) and English law (in Scotland) are not regarded as foreign law, and are classified as questions of law and not of fact. That applies too in appeals from the tax tribunals to the CoA and Court of Session.[464] Thus, for instance, the English CoA expressed its view on issues of Scots partnership law, in *Memec.*

90.60.2 *UK law assumed to apply*

Dicey says:[465]

> In the absence of satisfactory evidence of foreign law, the court will apply English law to such a case.

That may of course suit the taxpayer. But a taxpayer who wrongly proceeds on the basis that foreign law is the same as English law would be subject to penalties if they know, or if a reasonably careful taxpayer would know, that the foreign law is different; and in legal proceedings, misleading the Tribunal by failure to bring relevant facts to its attention may constitute professional misconduct.

Similarly, in Scotland, the court will assume in the absence of evidence that Scots law applies.

90.60.3 *Civil law comprehension gap*

Questions of foreign law which arise in the context of UK tax are often difficult. Where the foreign law is a common law it will share basic concepts with English law and that eases things a little. If the foreign law is a civil law the chances of a communications gap developing between a foreign expert adviser and an English lawyer seeking their advice are greater.

[463] See 90.31 (Société en nom collectif).

91.1 Hybrid entities: Introduction

I use the following terminology.

A "**hybrid entity**" is an entity which is:

(1) transparent[1] in one State, in the sense that the entity's income is regarded as income of its members[2] and
(2) opaque in another State[3]

If an entity is transparent in (say) the USA, I call the entity **"USA-transparent"** and USA is the **"transparent State"**.

A **"non-hybrid"** entity is one which is not hybrid.

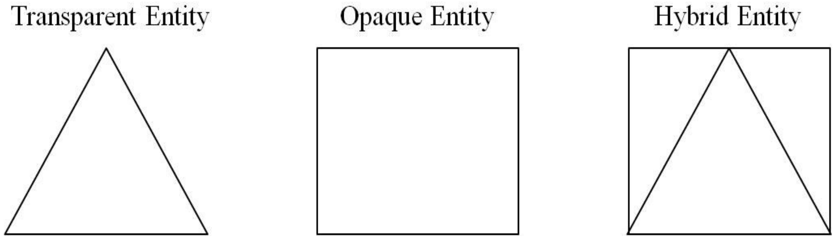
[1] See 90.6.1 (Transparent/opaque terminology).

[2] In the context of hybrid entities, it is convenient to use the word "member" loosely, to include any person with an interest in any entity. TIOPA uses the word "investor" and USA regulations use the term "interest holder". As "entity" covers a wide range, there is no one word which perfectly fits all the circumstances.

[3] For a more elaborate statutory definition, see 91.15 (Hybrid entity).

In structure diagrams in this chapter:

- a triangle represents a transparent non-hybrid (typically a partnership)
- a rectangle represents an opaque non-hybrid (typically a company)
- a combination of the two represents a hybrid entity



Strictly, one should not use the term hybrid/non-hybrid in the abstract. An entity can only be hybrid in relation to two particular States. But where the context is clear it is permissible simply to refer to an entity as hybrid (or not).

Hybrids may concern three distinct States:

My term	**Meaning**	**OECD Partnerships Report Term**
Source State	Where income arises	State S
Entity State	Where entity is established[4]	State P (for **P**artnership)
Member state	Where members are resident[5]	State R

Use of hybrid entities to produce double non-taxation has been called tax arbitrage; this unhelpful term was used as a heading in F(no.2)A 2005. But the current legislation in Part 6A TIOPA has adopted the better, if longer, heading "Hybrid and Other Mismatches".

Hybrids may also give rise to double taxation[6]; (so of course may non-hybrid companies, tax on the company and tax on a distribution).

In *Columbus Container Services* the advocate-general observed:

> International tax studies on the problem of the transparency of partnerships have highlighted the incredible complexity of this branch

[4] It is assumed that the entity is resident where established. BEPS Action 2 Report uses the term "establishment jurisdiction".
Further issues arise if different States apply different tests as to where a entity is established or resident (is it management and control, governing law, etc). But that is not pursued here.

[5] If members are resident in different States, each State needs to be considered separately.

[6] See *Anson v IRC* discussed 90.43 (Limited liability company).

> of law...[7]

But the topic is now much more complex, as a result of OECD model hybrid entity rules and ATAD/Part 6A TIOPA.

91.2 *Background and guidance*

For background to this topic, see:

DTA and *ATAD/TIOPA issues*
OECD, "Neutralising the Effects of Hybrid Mismatch Arrangements" (**"BEPS Action 2 Report"**)[8]

DTA hybrid issues
OECD, "The Application of OECD Model Tax Convention to Partnerships"("**OECD Partnerships Report**") (1999)
Nikolakakis *et al* "Some Reflections on the Proposed Revisions to the OECD Model and Commentaries, and on the Multilateral Instrument, with Respect to Fiscally Transparent Entities"[9]
Brabazon, "Holding Proteus: Emerging Treaty Practice on Hybrid and Fiscally Transparent Entities" [2020] BTR 670
Wheeler, ed *The Aftermath of BEPS* (2019)

ATAD/TIOPA issues
Brabazon, "BEPS Action 2: Trusts as Hybrid Entities" [2018] BTR 211

91.3 Hybrid categories

91.3.1 *Examples of hybrid entities*

Examples of (potentially) hybrid entities include:

Entity	**UK law**	**Foreign law**	**See para**
UK LLP	UK-transparent	Likely foreign-law opaque	85.21; 85.22
USA LLC	UK-opaque	US-transparent[10]	90.43; 91.7.1
USA S Corp	UK-opaque	US-transparent[11]	9.28.1
Unit trust/FCP	Sometimes opaque	Might be anything	69.7

[7] *Columbus Container Services v Finanzamt Bielefeld-Innenstadt* [2008] STC 2554 at [40].

[8] Final Report (2015) *http://www.oecd.org/ctp/neutralising-the-effects-of-hybrid-mismatch-arrangements-action-2-2015-final-report-9789264241138-en.htm*

[9] [2017] BTR 295 *https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3005860*

[10] Unless the LLC elects to be treated as a company for USA tax purposes.

[11] Assuming the Corporation elects to be treated as transparent for USA tax purposes.

91.3.2 *Hybrid: Avoidance attribution rules*

UK anti-avoidance provisions may turn an opaque entity (typically a discretionary trust or a company) into one which may be regarded as UK-law transparent, or effectively transparent:

Entity	**Anti-avoidance Rule**	**Provision**
Clearer examples		
Settlor-interested trust	Trust income treated as arising to settlor	s.624
Non-resident company	Gains treated as accruing to participator	s.3
Further examples		
Entity within s.720	Income treated as arising to transferor	s.720
Company subsidiary	Profits treated as accruing to parent	CFC rules

To regard entities within s.720/CFC as transparent requires one to overlook that s.720 and CFC income has been categorised as a different source of income, distinct from the income of the CFC/person abroad to which it relates.[12] But it is suggested that the DTA hybrid-entity rule should not be construed so technically.

Since a foreign state is likely[13] to view the trust/company as opaque, the UK anti-avoidance provisions create what may be regarded as a hybrid.

The same may apply the other way round for a foreign State if that State has comparable rules, and assuming the UK rules do not apply. An example is a USA grantor trust, which is US-transparent[14] but may be UK-opaque.

A comparable situation may arise when two States both agree that an entity is transparent, but take different views as to who is entitled to the income. An example is a settlor-interested IIP trust within s.624: in the UK trust income is treated as arising to the settlor, but in another State it may be regarded as arising to the life tenant (who may not be the settlor). For lack of a better term, I refer to that as a **"quasi-hybrid"**.

Do these types of hybrid count as hybrid within the scope of the DTA hybrid-entity rules? Under the USA/UK DTA the answer is, yes.[15] In other cases, the position has been doubted, but the object and purpose of the rule suggests that the answer ought to be the same.

[12] See 107.22 (Characterisation).

[13] If both countries apply similar anti-avoidance rules the entity may be regarded as a transparent non-hybrid.

[14] See 91.7.1 (US-transparent entities).

[15] See 91.7.8 (s.624/720 income; s.3/86 gain).

91.3.3 *Classic & Reverse hybrids*

In the case of a source State/member state DTA (which one may call the paradigm case) there are four permutations:

Entity category	**Source State**	**Member state**	**Model art 1(2)**
Non-hybrid			
Transparent	Transparent	Transparent	n/r
Opaque	Opaque	Opaque	n/r
Hybrid			
Classic[16]	Opaque	Transparent	Applies DT relief
Reverse	Transparent	Opaque	Denies DT relief

We are concerned with *Classic* and *Reverse* hybrids. Classic/Reverse hybrids are (if one may use the word) rather opaque terms; so I add *(member State transparent/opaque)* and use initial capitals. Strictly, one should not use the terms Classic/Reverse hybrid in the abstract. An entity can only be a Classic/Reverse hybrid in relation to a particular source State and a particular member state. But where the context is clear it is permissible simply to refer to an entity as a Classic/Reverse hybrid.

In the case of a hybrid, I note to the right of the diagram whether it is a Classic or a Reverse hybrid.

91.3.4 *Bilateral/triangular situations*

I have not found bilateral/triangular terminology to be helpful when grappling with the issues of hybrids. But I set it out because other writers use this terminology.

In a **"triangular"**[17] situation, three different States are involved: Source state, entity state and member state.

In a **"bilateral"** situation, only two States are involved. This obviously happens if two of the states are the same, ie:

Two states the same	**Third state different**
Member state & entity State	source State
Source State & entity State	member state
Source State & member state	entity State

But even if the 3 States are different, we may simply be concerned with

[16] Classic hybrid is my term; others refer to this as just a hybrid.

[17] The word "triangular" is conventional here, though "trilateral" would be more apt.

one treaty, made between two of the States, and for the purposes of that treaty the position under the law of the third State does not matter. We may be concerned with:

Treaty	**Topic: Taxation of**
Source/member states DTA	Income of members & of entity
Source/entity States DTA	Income of entity
Members/entity States DTA	Distribution by entity

In a triangular situation, the entity may be transparent or opaque, under the laws of (1) the member state (2) the entity State and (3) the source State. So there are eight permutations:

Case no.	**Source-State law**	**Entity-State law**	**Member-State law**
1	Transparent	Transparent	Transparent
2	Transparent	Transparent	Opaque
3	Transparent	Opaque	Transparent
4	Transparent	Opaque	Opaque
5	Opaque	Transparent	Transparent
6	Opaque	Transparent	Opaque
7	Opaque	Opaque	Transparent
8	Opaque	Opaque	Opaque

Cases 1 and 8 should raise no difficulties. We are concerned with 6 triangular cases, cases 2 - 7.

Triangular arrangements may concern 2 or even 3 DTAs:

(a) The source/member states DTA
(b) The source/entity States DTA
(c) The entity/member states DTA

It seems at first that this generates up to 18 permutations, ie it is necessary to consider the application of (up to) 3 DTAs to each of the 6 cases (no's 2-7). But it is not that complicated, because if we are looking at a treaty between any two States:

(1) It will not matter what is the law of the third State
(2) In some of the permutations, the two treaty States will agree that the entity is transparent, or may both agree that the entity is opaque, so in relation to those States, the entity is non-hybrid.

A triangular situation is just a combination of two bilateral situations. Thus:

Case no.	Source-State law	Entity-State law	Member-State law	*DTA status*[18]
2	Transparent	Transparent	Opaque	
	2a: application of source/member state DTA			*Reverse hybrid*
	2b: application of source/entity State DTA			*Non-hybrid*
3	Transparent	Opaque	Transparent	
	3a: application of source/member state DTA			*Non-hybrid*
	3b: application of source/entity State DTA			*Reverse hybrid*
4	Transparent	Opaque	Opaque	
	4a: application of source/member state DTA			*Reverse hybrid*
	4b: application of source/entity State DTA			*Reverse hybrid*
5	Opaque	Transparent	Transparent	
	5a: application of source/member state DTA			*Classic hybrid*
	5b: application of source/entity State DTA			*Classic hybrid*
6	Opaque	Transparent	Opaque	
	6a: application of source/member state DTA			*Non-hybrid*
	6b: application of source/entity State DTA			*Classic hybrid*
7	Opaque	Opaque	Transparent	
	7a: application of source/member state DTA			*Classic hybrid*
	7b: application of source/entity State DTA			*Non-hybrid*

91.4 DTA hybrid-entity rules

91.4.1 *Terminology*

There are (at least) 3 DTA hybrid-entity rules. I coin the following terminology:

Term	**Rule found in:**
OECD hybrid-entity rule(s):	
OECD Model hybrid-entity rule	art 1(2) OECD Model
BEPS MLI[19] hybrid-entity rule	art 3(1) BEPS MLI
USA hybrid-entity rule	art 1(8) USA/UK DTA; art 1(6) USA Model

Actual treaties vary in their wording, so it is necessary to check the treaty in each case.

91.4.2 *OECD hybrid-entity rules*

Art 1(2) OECD Model and art 3(1) BEPS MLI are effectively identical (with changes only to conform to MLI's terminology):

[18] That is, the status of the entity in relation to the two treaty States concerned.

[19] See 107.15 (BEPS MLI).

Art 1(2) OECD Model	**Art 3(1) BEPS MLI**
[a] For the purposes of this Convention, income derived[20] by or through an entity or arrangement[21] that is treated as wholly or partly fiscally transparent under the tax law of either Contracting State	[a] For the purposes of a Covered Tax Agreement, income derived by or through an entity or arrangement that is treated as wholly or partly fiscally transparent under the tax law of either Contracting Jurisdiction
shall be considered to be income of a resident of a Contracting State	shall be considered to be income of a resident of a Contracting Jurisdiction
[b] but only to the extent that the income is treated, for purposes of taxation by that State, as the income of a resident of that State.	[b] but only to the extent that the income is treated, for purposes of taxation by that Contracting Jurisdiction, as the income of a resident of that Contracting Jurisdiction.

It is essential to keep in mind which State is which; art 1(2) is easier to follow if it is expanded thus:

> For the purposes of this Convention, income derived by or through an entity or arrangement that is treated as wholly or partly fiscally transparent under the tax law of either Contracting State

[a] shall be considered to be income of a resident of [the UK]	[b] shall be considered to be income of a resident of [the foreign State]
but only to the extent that the income is treated, for purposes of	but only to the extent that the income is treated, for purposes of

[20] In British legal English, one would more idiomatically refer to:
(1) Income arising to/received by an opaque entity
(2) Income arising to/received by a member through a transparent entity
But the meaning is the same. See 15.11.1 ("Deriving" income).

[21] Is it possible to envisage an arrangement which is not an entity? The word "entity" is used widely, to include arrangements without legal personality, such as English partnerships and trusts, (ie not just legal persons). So the words "or arrangement" seem otiose, at least for the UK. But there may be jurisdictions where the point might otherwise have been unclear, and the OECD Model is intended to be used everywhere.

taxation by [the UK], as the income of a resident of [the UK]

taxation by [the foreign State], as the income of a resident of [the foreign State].

91.4.3 *USA hybrid-entity rule*

The version relevant to this work is that in the USA/UK DTA. Article 1(8) provides:

> An item of income, profit or gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered to be derived by a resident of a Contracting State to the extent that the item is treated for the purposes of the taxation law of such Contracting State as the income, profit or gain of a resident.[22]

It is essential to keep in mind which State is which; art 1(8) is easier to follow if it is expanded to read:

> An item of income/gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered
>
> [a] to be derived by [ie, arising to] a resident of [the UK] to the extent that the item is treated for the purposes of the taxation law of [the UK] as the income/gain of a resident of [the UK]
>
> [b] to be derived by [ie, arising to] a resident of [the USA] to the extent that the item is treated for the purposes of the taxation law of [the USA] as the income/gain of a resident of [the USA].

91.4.4 *OECD/US rules compared*

The OECD wording is derived from the USA DTA hybrid-entity rule, and the differences do not seem to be significant:

> [a] For the purposes of this Convention, ~~an item of income, profit or gain~~ income derived by or through ~~a person~~ an entity or arrangement that is treated as wholly or partly fiscally transparent under the ~~laws~~ tax law of either Contracting State shall be considered to be ~~derived by~~ income of a resident of a Contracting State

[22] This rule is in art 1(6) USA Model Income Tax Convention, from 1996, and is standard in USA treaties. See Wheeler, *The Missing Keystone of Income Tax Treaties* (2012) para 2.4.5 (Concluded treaties).
The current (2016) USA Model made minor changes to the wording but as the USA/UK DTA was made in 2001, this does not seem relevant to the UK.

> [b] but only to the extent that the ~~item~~ income is treated, for the purposes of ~~the taxation law of such Contracting State~~ taxation by that State, as the income~~, profit or gain~~ of a resident of that State.[23]

91.4.5 *Use of OECD Partnerships Report*

OECD Partnerships Report analysed partnership hybrid entities[24] under the OECD Model in its pre-2007 form (ie lacking art 1(2), the OECD hybrid-entity rule). This is important for older treaties if they lack a hybrid-entity rule (which may be the case if the foreign State has opted out of the MLR hybrid-entity rule). The Report also continues to be relevant to DTAs in post-2007 form. OECD Commentary provides:

> 2. [OECD Model art 1(2)] addresses the situation of the income of entities or arrangements that one or both Contracting States treat as wholly or partly fiscally transparent for tax purposes. The provisions of the paragraph ensure that income of such entities or arrangements is treated, for the purposes of the Convention, in accordance with the principles reflected in [the OECD Partnerships Report]. That report therefore provides guidance and examples on how the provision should be interpreted and applied in various situations.

The conclusions of the OECD Partnerships Report were later set out in the OECD Commentary, so may not be necessary to look back to the text of the Report itself.

91.5 MLI hybrid-entity rule: Application

This section considers how the MLI hybrid-entity rule is slotted into pre-2017 DTAs.

91.5.1 *Pre-2017 hybrid rules overridden*

Article 3(4) BEPS MLI provides:

> [Art 3(1), MLI hybrid rule] (as it may be modified by paragraph 3[25]) shall apply in place of or in the absence of provisions of a Covered Tax

[23] Where they differ, OECD wording is underlined and USA wording in strikeout.

[24] The OECD Commentary provides: "3. The [OECD Partnerships Report], however, dealt exclusively with partnerships and whilst the Committee recognised that many of the principles included in the report could also apply with respect to other non-corporate entities, it expressed the intention to examine the application of the Model Tax Convention to these other entities at a later stage..."

[25] See 82.5.4 (BEPS MLI Savings Clause).

> Agreement to the extent that they address whether income derived by or through entities or arrangements that are treated as fiscally transparent under the tax law of either Contracting Jurisdiction
> [a] (whether through a general rule
> [b] or by identifying in detail the treatment of specific fact patterns and types of entities or arrangements)
> shall be treated as income of a resident of a Contracting Jurisdiction.

In short, the BEPS MLI hybrid rule has priority over a treaty hybrid rule. MLI article 3 refers several times to "a provision described in para (4)", ie in art 3(4). I gloss that as a **"pre-2017 hybrid-entity rule"**.

91.5.2 *Art 3(1) MLI opt-outs*

Article 3(5) BEPS MLI provides a variety of options to opt-out of the art 3(1) BEPS MLI hybrid rule:

> A Party may reserve the right:
> a) for the entirety of this Article not to apply to its Covered Tax Agreements;
> b) for paragraph 1 [MLI hybrid-entity rule][26] not to apply to its Covered Tax Agreements that already contain a provision described in [art 3(4), pre-2017 hybrid-entity rule];
> c) for paragraph 1 not to apply to its Covered Tax Agreements that already contain a provision described in paragraph 4 which denies treaty benefits in the case of income derived by or through an entity or arrangement established in a third jurisdiction;
> d) for paragraph 1 not to apply to its Covered Tax Agreements that already contain a provision described in paragraph 4 which identifies in detail the treatment of specific fact patterns and types of entities or arrangements;
> e) for paragraph 1 not to apply to its Covered Tax Agreements that
> [i] already contain a provision described in paragraph 4 which identifies in detail the treatment of specific fact patterns and types of entities or arrangements and
> [ii] denies treaty benefits in the case of income derived by or through an entity or arrangement established in a third jurisdiction; ...[27]
> g) for paragraph 1 to apply only to its Covered Tax Agreements

[26] For art 3(1) see 91.4.2 (OECD hybrid-entity rules).

[27] I deal with para (f) in the next section.

> that already contain a provision described in paragraph 4 which identifies in detail the treatment of specific fact patterns and types of entities or arrangements.

The UK has not made these reservations.

91.5.3 *Art 3(2) MLI*

Article 3(5) BEPS MLI allows States to opt-out of art 3(2) BEPS MLI:

> A Party may reserve the right:
>
> f) for paragraph 2 not to apply to its Covered Tax Agreements;

The UK has reserved the right under para 3(5)(f) for art 3(2) not to apply; in short, it has adopted BEPS MLI art 3(1) but opted out of art 3(2).[28]

91.5.4 *BEPS MLI Savings Clause*

For completeness: art 3(3) BEPS MLI provides:

> With respect to Covered Tax Agreements for which one or more Parties has made the reservation described in subparagraph a) of paragraph 3 of Article 11 (Application of Tax Agreements to Restrict a Party's Right to Tax its Own Residents),[29] the following sentence will be added at the end of paragraph 1:
>
> "In no case shall the provisions of this paragraph be construed to affect a Contracting Jurisdiction's right to tax the residents of that Contracting Jurisdiction."

This applies a Savings Clause to the BEPS MLI hybrid-entity rule in cases where the Savings Clause is not more generally applicable.

The UK has not made the reservation described in art 11(3)(a),[30] ie it has not opted out of the BEPS MLI Savings Clause. So this would only be relevant if another jurisdiction has done so. But I wonder how often that

[28] For completeness, art 3(2) provides:

> "Provisions of a Covered Tax Agreement that require a Contracting Jurisdiction to exempt from income tax or provide a deduction or credit equal to the income tax paid with respect to income derived by a resident of that Contracting Jurisdiction which may be taxed in the other Contracting Jurisdiction according to the provisions of the Covered Tax Agreement shall not apply to the extent that such provisions allow taxation by that other Contracting Jurisdiction solely because the income is also income derived by a resident of that other Contracting Jurisdiction."

The reader may be relieved: this para does not yield its meaning on a first reading.

[29] See 109.5.4 (BEPS MLI Savings Clause).

[30] See 109.5.7 (Application of BEPS Savings Clause).

will happen.

91.5.5 *Notifications*

Article 3(6) BEPS MLI provides:

> [a] Each Party that has not made a reservation described in subparagraph a) or b) of paragraph 5 shall notify the Depositary of
>
> [i] whether each of its Covered Tax Agreements contains a provision described in paragraph 4 that is not subject to a reservation under subparagraphs c) through e) of paragraph 5,
>
> [ii] and if so, the article and paragraph number of each such provision.

That applies to the UK, which has published a list of 17 DTAs which contain a provision described in Article 3(4) that is not subject to a reservation under Article 3(5)(c) through (e).[31]

Article 3(6) BEPS MLI continues:

> [b] In the case of a Party that has made the reservation described in subparagraph g) of paragraph 5, the notification pursuant to the preceding sentence shall be limited to Covered Tax Agreements that are subject to that reservation.
>
> [c] Where all Contracting Jurisdictions have made such a notification with respect to a provision of a Covered Tax Agreement, that provision shall be replaced by the provisions of paragraph 1 (as it may be modified by paragraph 3) to the extent provided in paragraph 4.
>
> [d] In other cases, paragraph 1 (as it may be modified by paragraph 3) shall supersede the provisions of the Covered Tax Agreement only to the extent that those provisions are incompatible with paragraph 1 (as it may be modified by paragraph 3).

The UK has not opted in to MLI art 5 (Hybrid Mismatches: Methods for elimination of double taxation).

91.6 Hybrid-entity rule: Effect

Para 1(2) OECD Model (the OECD hybrid-entity rule) can be divided into its separate elements as follows:

[31] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

Text of rule	**Comment**
[a] For the purposes of this Convention,	Scope of rule
[b] income derived by or through an entity or arrangement [c] that is treated as wholly or partly fiscally transparent under the tax law of either Contracting State	Conditions for application of rule
[d] shall be considered to be income of a resident of a Contracting State [e] but only to the extent that the income is treated, for purposes of taxation by that State, as the income of a resident of that State.	Effect of rule

The effect of the rule is that:

(1) To the extent that the member State considers the income to arise to the member in that State:
    (a) Income arises to the member
    (b) Income does not arise to the entity

(2) To the extent that the member State does *not* consider the income to arise to the member:
    (a) Income arises to the entity
    (b) Income does not arise to the member

In short, the member State rules determine the issue of transparency /opacity and trump the source State rules. One might say that a Classic hybrid is deemed to be transparent, and a Reverse hybrid is deemed to be opaque. The consequence may be to apply or disapply DT relief:

Hybrid	**Treated as**	**DT relief**
Classic (member-State transparent)	Transparent non-hybrid	Applied
Reverse (member-State opaque)	Opaque non-hybrid	Disapplied

In short, the rule is to avoid double taxation as well as to avoid double non-taxation.

91.6.1 *Considered as income: Effect*

OECD Commentary provides:

> 12. By providing that the income to which it applies will be considered to be income of a resident of a Contracting State for the purposes of the Convention, [art 1(2)] ensures that the relevant income is attributed to

> that resident for the purposes of the application of the various allocative rules of the Convention [ie the rules allocating taxing rights to one or other State].
>
> Depending on the nature of the income, this will therefore allow the income to be considered, for example, as
> [1] "income derived by" for the purposes of Articles 6, 13 and 17,
> [2] "profits of an enterprise" for the purposes of Articles 7, 8 and 9 (see also paragraph 4 of the Commentary on Article 3[32]) or
> [3] dividends or interest "paid to" for the purposes of Arts 10 and 11.

These 3 expressions raise the same issue, or essentially the same issue, namely, when income/gains should be *recognised,* or *attributed to* a person.[33] So the rule applies in the same way to each.

> [4] The fact that the income is considered to be derived by a resident of a Contracting State for the purposes of the Convention also means that where the income constitutes a share of the income of an enterprise in which that resident holds a participation, such income shall be considered to be the income of an enterprise carried on by that resident (e.g. for the purposes of
> [a] the definition of enterprise of a Contracting State in Article 3[34] and
> [b] [art 21(2)[35]]).

I think the point is that the enterprise (business) of a Classic hybrid (member-State transparent) is deemed to be carried on by the members, not by the entity.

91.6.2 *Hybrid is nominee/agent*

In the case of a Classic hybrid, where the source State is required to consider the income to be the income of/paid to the members, it must normally be required to consider members to be beneficial owners of the income. Otherwise relief in articles 10/11/12 would never apply. That assumes of course that the members of the entity hold their interest in the entity beneficially.

OECD Commentary provides:

> 13. Whilst the paragraph ensures that the various allocative rules of the

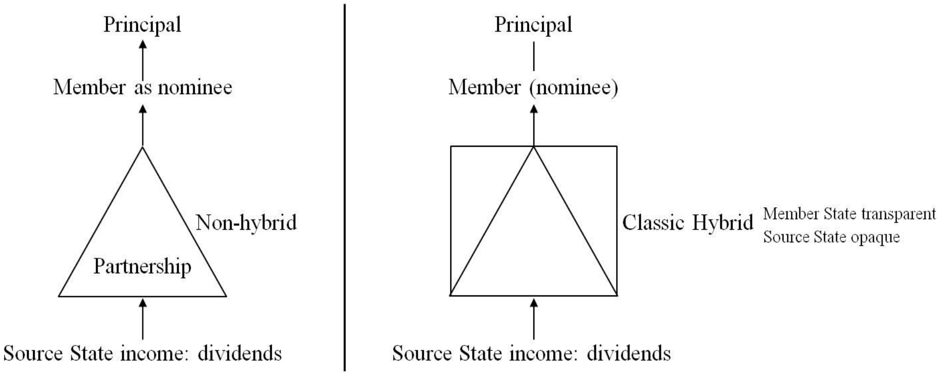
[32] See 21.23.2 ("Enterprise").
[33] See 15.11 (Income recognition in DTAs).
[34] See 21.23.2 ("Enterprise").
[35] See 107.9.2 (Income through PE).

> Convention are applied to the extent that income of fiscally transparent entities is treated, under domestic law, as income of a resident of a Contracting State, the paragraph does not prejudge the issue of whether the recipient is the beneficial owner of the relevant income.

The commentary gives an example:

> Where, for example, a fiscally transparent partnership receives dividends as an agent or nominee[36] for a person who is not a partner, the fact that the dividend may be considered as income of a resident of a Contracting State under the domestic law of that State will not preclude the State of source from considering that neither the partnership nor the partners are the beneficial owners of the dividend.

Diagrammatically:



Principal
Member as nominee
Non-hybrid
Partnership
Source State income: dividends
Principal
Member (nominee)
Classic Hybrid
Member State transparent
Source State opaque
Source State income: dividends

If the member state was the UK, the hybrid entity rule would not apply here, on the basis that para [e] is not met, ie assuming that the nominee is not resident in the UK, the income is not treated, for purposes of taxation by the UK, as the income of a resident of the UK. But maybe this observation is relevant in some other countries.

91.6.3 *Income derived by/through entity*

OECD Commentary provides:

> 7. The reference to "income derived by or through an entity or arrangement" has a broad meaning and covers any income that is earned by or through an entity or arrangement,
> [a] regardless of the view taken by each Contracting State as to who

[36] Author's footnote: The correct analysis in English law would be that the partners are nominees rather than the partnership. But nothing turns on that.

> derives that income for domestic tax purposes and
> [b] regardless of whether or not that entity or arrangement has legal personality or constitutes a person as defined in subparagraph 1 a) of Article 3.
>
> It would cover, for example, income of any partnership or trust that one or both of the Contracting States treats as wholly or partly fiscally transparent.

Note that the rule applies if *both* States consider the entity to be transparent. This would apply to what I call a quasi-hybrid entity (where both states agree the entity is transparent, but do not agree on who is regarded as receiving the income.[37]

91.6.4 *Gains*

The OECD hybrid-entity rule refers to income and does not mention gains, but the omission is not intended to be significant. OECD Commentary provides:

> 8. The word "income" must be given the wide meaning that it has for the purposes of the Convention and therefore applies to the various items of income that are covered by Chapter III of the Convention (Taxation of Income) [art 6-21], including, for example, profits of an enterprise and capital gains.

91.6.5 *Partly transparent*

OECD Commentary considers the situation where an entity is "partly treated as a taxable unit and partly disregarded for tax purposes":

> 4. [Art 1(2) OECD Model] addresses this particular situation by referring to entities that are "wholly or partly" treated as fiscally transparent. Thus, the paragraph not only serves to confirm the conclusions of the Partnership Report but also extends the application of these conclusions to situations that were not directly covered by the report ....
>
> 10. In the case of an entity or arrangement which is treated as partly fiscally transparent under the domestic law of one of the Contracting States, only part of the income of the entity or arrangement might be taxed at the level of the persons who have an interest in that entity or arrangement as described in the preceding paragraph whilst the rest would remain taxable at the level of the entity or arrangement.

[37] See 91.3.2 (Hybrid: Avoidance attribution rules).

That seems self-evident.

> This, for example, is how some trusts and limited liability partnerships are treated in some countries (i.e. in some countries,
> [1] the part of the income derived through a trust that is distributed to beneficiaries is taxed in the hands of these beneficiaries whilst
> [2] the part of that income that is accumulated is taxed in the hands of the trust or trustees;

This may have been the case for UK discretionary trusts before 1973, but that is not the case now.[38]

> similarly, in some countries, income derived through a limited partnership is taxed in the hands of the general partner as regards that partner's share of that income but is considered to be the income of the limited partnership as regards the limited partners' share of the income).

This is not the case for UK partnerships.

> To the extent that the entity or arrangement qualifies as a resident of a Contracting State, the paragraph will ensure that the benefits of the treaty also apply to the share of the income that is attributed to the entity or arrangement under the domestic law of that State (subject to any anti-abuse provision such as a limitation-on-benefits rule)...
> 11. As with other provisions of the Convention, the provision applies separately to each item of income of the entity or arrangement.
> Assume, for example, that the document that establishes a trust provides that all dividends received by the trust must be distributed to a beneficiary during the lifetime of that beneficiary but must be accumulated afterwards. If one of the Contracting States considers that, in such a case, the beneficiary is taxable on the dividends distributed to that beneficiary but that the trustees are taxable on the dividends that will be accumulated, the paragraph will apply differently to these two categories of dividends even if both types of dividends are received within the same month.

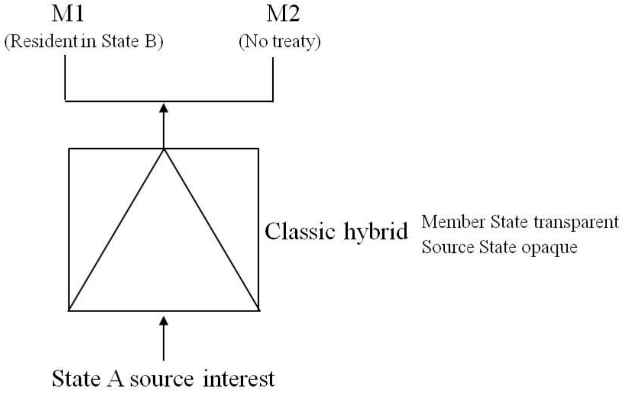
That seems self evident.

91.6.6 *OECD example: Classic hybrid*

OECD Commentary provides:

[38] See 41.3.1 (Source/categorisation of income). It could be the case if a trust held two sub-funds on distinct terms.

> 6. The following example illustrates the application of the paragraph:
> State A and State B have concluded a treaty identical to the Model Tax Convention.
> State A [the source State] considers that an entity established in State B is a company and taxes that entity on interest that it receives from a debtor resident in State A.
> Under the domestic law of State B, [the member state] however, the entity is treated as a partnership and the two members in that entity, who share equally all its income, are each taxed on half of the interest.
> One of the members ["M1"] is a resident of State B and the other [member "M2"] is a resident of a country with which States A and B do not have a treaty.



OECD analysis is:

> The paragraph provides that in such case, half of the interest shall be considered, for the purposes of Article 11 [interest article], to be income of a resident of State B.

In more detail, my analysis would be:

State A is the source State.
State B is the member state.
We are concerned with the State A/State B DTA (the source/member state DTA).

M1's share:
The entity is a Classic hybrid (member state transparent).
State A must apply the OECD hybrid-entity rule, so M1's income is deemed to arise to M1, the treaty-resident member of the entity, rather than

the entity itself.

As M1 is resident of State B, treaty relief applies.

M2's share:

As M2 is not resident of State B, the State A/B (source/member states) DTA does not apply.

The OECD Commentary provides:

> Also, as illustrated in example 2 of the [OECD Partnerships Report], it does not matter where the entity or arrangement is established: [art 1(2)] applies to an entity established in a third State to the extent that, under the domestic tax law of one of the Contracting States, the entity is treated as wholly or partly fiscally transparent and income of that entity is attributed to a resident of that State.

Regardless of where the entity is established, and regardless of the law of the entity State, the State A/State B DTA (the source/member states DTA) applies for M1's income but not for M2's income.

91.6.7 *Tax on entity: OECD Model*

OECD Commentary provides:

> 14. [Art 1(2)] applies for the purposes of the Convention and does not, therefore, require a Contracting State to change the way in which it attributes income or characterises entities for the purposes of its domestic law. In the example in paragraph 6 above,[39] whilst [art 1(2)] provides that half of the interest shall be considered, for the purposes of Article 11, to be income of a resident of State B, this will only affect the maximum amount of tax that State A will be able to collect on the interest and will not change the fact that State A's tax will be payable by the entity.
> Thus, assuming that the domestic law of State A provides for a 30% withholding tax on the interest, the effect of [art 1(2)] will simply (?) be
> [1] to reduce the amount of tax that State A will collect on the interest so that
> [a] half of the interest would be taxed at 30% [State A WHT rate]
> [b] and half at 10% under the treaty between States A and B)[40] and

[39] See 91.6.6 (Example: Classic hybrid).

[40] It is assumed the DTA is in Model form, which provides for a 10% cap on the source State's rate of tax on the interest..

[2] will not change the fact that the entity is the relevant taxpayer for the purposes of State A's domestic law.

Point [2] could be justified in two ways:

(1) From the point made here that art 1(2)] "applies for the purposes of the Convention"
(2) From the OECD Savings Clause[41]

Following through the example: suppose the entity received interest of £100. Ignoring tax in the residence/entity State, the position would be:

	Pre-tax profit	**Tax rate**	**Tax**	**Post-tax profit**
M1's share	£50	10%	£5	£45
M2's share	£50	30%	£15	£35
Total	£100	20%	£20	£80

Would the hybrid entity distribute the post-tax profit:

(1) to each member equally ignoring DT relief (£40 each), or
(2) to each member after DT relief (£45 to M1, £35 to M2)

In principle, route (2) seems fairer; but the answer depends on the entity's constitution and governing law.

91.7 USA hybrid-entity rule: Guidance

91.7.1 *US-transparent entities*

The USA/UK DTA Technical Explanation of para 1(8) identifies the following as US-transparent entities:[42]

(1) partnerships
(2) common investment trusts under s.584 USA Internal Revenue Code
(3) grantor trusts
(4) USA LLCs that are treated as partnerships for USA tax purposes

91.7.2 *IRS examples*

IRS give some examples. As the USA/UK wording is similar to the OECD Model, these should also be relevant to OECD Model DTAs.

[41] See 91.7.7 (Tax on entity: USA Model); 91.5.4 (BEPS MLI Savings Clause). This would be relevant if a DTA lacked the words "for the purposes of the Convention"; though only if the entity is resident in the source State.

[42] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

Examples 1 - 3 concern UK source income where the issue is whether UK relief is available under USA/UK DTA. In order to follow the examples, one needs to bear in mind that the USA/UK DTA provides that UK source interest which is beneficially owned by a USA resident is not taxed in the UK.[43] The question is whether DT relief applies when interest is "derived through a person that is fiscally transparent".

91.7.3 *USA example: Classic hybrid*

The first IRS example is equivalent to that in the OECD Commentary.[44] This concerns UK source interest paid to a US-transparent entity with USA members:

> [1] [a] For example, if a UK company pays interest to an entity that is treated as fiscally transparent for USA tax purposes, the interest will be considered derived [ie received] by a resident of the USA only to the extent that the taxation laws of the United States treats one or more USA residents (whose status as USA residents is determined, for this purpose, under USA tax law) as deriving [ie, receiving] the interest for USA tax purposes.[45]

In this example:
UK is the source State.
USA is the member state.
The entity is US-transparent.
We are not told if the entity is UK-transparent or UK-opaque.

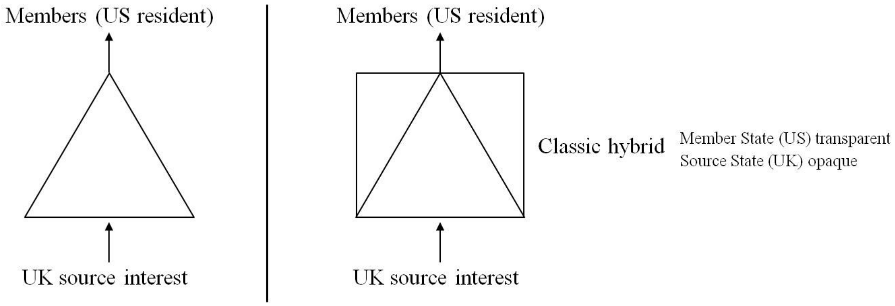
(a) If the entity is UK-transparent, then it is a transparent non-hybrid, and no difficulty arises.
(b) If the entity is UK-opaque, it is a Classic hybrid (member state transparent). The member state (USA) rules determine the issue of transparency and override the source state (UK) rules, so treaty relief applies.

Diagrammatically:

[43] See 26.27.2 (DTAs with 100% interest relief).

[44] See 91.6.6 (OECD example: Classic hybrid).

[45] The Technical Explanation continues: "In the case of a partnership, the persons who are, under USA tax laws, treated as partners of the entity would normally be the persons whom the USA tax laws would treat as deriving [receiving] the interest income through the partnership."
This is straightforward in the UK, as a partnership is also UK-transparent, so a partnership is a non-hybrid.



Example 2 is the same but with non-US resident partners:

> [2] Also, it follows that persons whom the United States treats as partners but who are not USA residents for USA tax purposes may not claim a benefit for the interest paid to the entity under the [USA/UK] Convention, because they are not residents of the United States for purposes of claiming this treaty benefit.

In this case the USA/UK DTA does not provide relief. But of course a member state/UK DTA could do so:

> If, however, the country in which they are treated as resident for tax purposes, as determined under the laws of that country, has an income tax convention with the UK, they may be entitled to claim a benefit under that convention.

91.7.4 *USA as entity State*

The next example concerns UK source interest arising to a US-opaque entity which is USA resident:

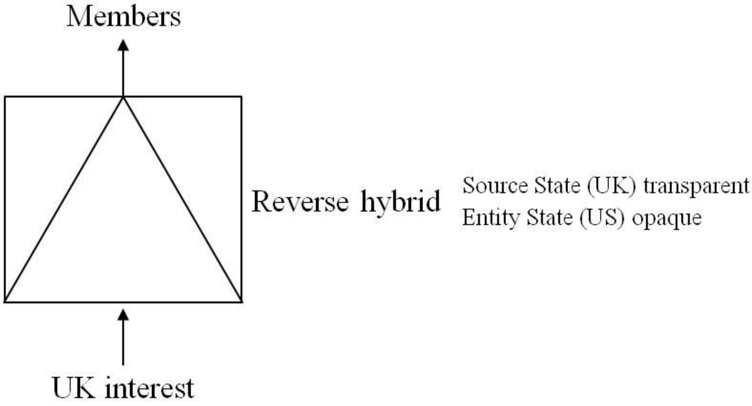
> In contrast, if, for example, an entity is organized under USA laws and is classified as a corporation for USA tax purposes, interest paid by a UK company to the USA entity will be considered derived by a resident of the United States since the USA corporation is treated under USA taxation laws as a resident of the United States and as deriving the income.

In this example:
UK is the source State.
USA is the entity State.
The entity is US-opaque.
Again, we are not told if the entity is UK-transparent or UK-opaque.

(a) If the entity is UK-opaque, then it is a non-hybrid, and no difficulty arises.

(b) If the entity is UK-transparent, it is a Reverse hybrid (member state opaque). The member state (USA) rules determine the issue of opacity and override the source state (UK) rules.

Diagrammatically:



Treaty relief applies.

The following factors do not matter:

(1) the UK tax classification as transparent/opaque

(2) a third State's tax classification as transparent/opaque

> [4] The same result obtains even if the entity were viewed differently under the tax laws of the UK (e.g., as not fiscally transparent in the first example above where the entity is treated as a partnership for USA tax purposes).
> Similarly, the characterization of the entity in a third country is also irrelevant, even if the entity is organized in that third country. The results follow regardless of whether the entity is disregarded as a separate entity under the laws of one jurisdiction but not the other, such as a single owner entity that is viewed as a branch for USA tax purposes and as a corporation for UK tax purposes. These results also obtain regardless of where the entity is organized (i.e., in the United States, in the UK, or, as noted above, in a third country).

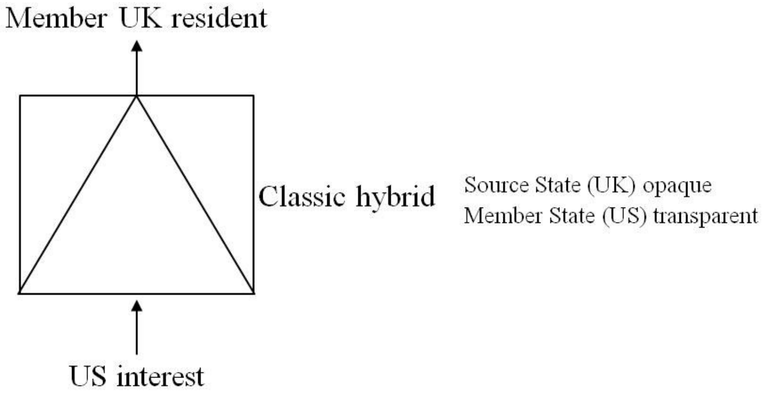
91.7.5 *Reverse hybrid*

The example given considers USA source income accruing to an entity which is UK-opaque.

> [5] For example, income from USA sources received by an entity

> organized under the laws of the United States, which is treated for UK tax purposes as a corporation and is owned by a UK shareholder who is a UK resident for UK tax purposes, is not considered derived by the shareholder of that corporation even if, under the tax laws of the United States, the entity is treated as fiscally transparent. Rather, for purposes of the treaty, the income is treated as derived by the USA entity.

Diagrammatically:



The UK member is not entitled to interest relief under the USA/UK DTA even if the income is distributed to them, though FTCR may apply.

91.7.6 *US-transparent trust*

> These principles also apply to trusts to the extent that they are fiscally transparent in either Contracting State.

The next example concerns a trust which is US-transparent:

> For example, if X, a resident of the UK, creates a revocable trust in the United States[46] and names persons resident in a third country as the beneficiaries of the trust, X would be treated under USA law as the beneficial owner of income derived from the United States. In that case, the trust's income would be regarded as being derived by a resident of the UK only to the extent that the laws of the UK treat X as deriving the income for UK tax purposes by application of the UK "settlor trust" rules.

If s.624 ITTIOA applies, the trust is UK-transparent and is a transparent

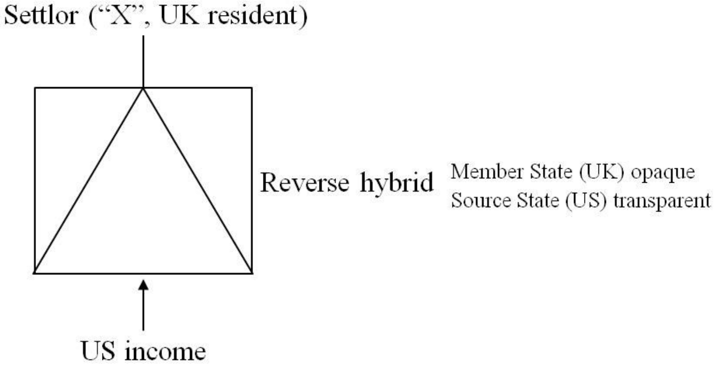
[46] I am not sure that it matters where the trust is established; but that is a matter of USA law.

non-hybrid, and no difficulty arises. But s.624 is not likely to arise, as the trust is likely be a protected trust (alternatively, possibly, the remittance basis may apply).

If the trust is discretionary in form, it is UK-opaque, it is a Reverse hybrid (member state opaque). The member state (UK) rules determine the issue of transparency and override the source state (USA) rules, so treaty relief does not apply.

The trust might be interest in possession in form, in which case it is actually UK transparent. But it may be regarded as a hybrid, or at least treated as one, because under USA law the income accrues to X (UK resident), but under UK law it accrues to the beneficiary (resident in a third country).

Diagrammatically:



91.7.7 *Tax on entity: USA Model*

An Exchange of Notes between the UK and USA discusses the taxation of the entity itself:

> *With reference to paragraph 8 of Article 1 [USA hybrid-entity rule]—*
> [1] it is understood that where an item of income, profit or gain is derived through a person which is a resident of a Contracting State the provisions of the paragraph shall not prevent that Contracting State from taxing the item as the income, profit or gain of that person.

The OECD commentary makes the same point.[47] The USA/UK DTA Technical Explanation[48] justifies the point by reference to the USA Savings

[47] See 91.6.7 (Tax on entity: OECD Model).

[48] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

Clause:[49]

> [7] [Art 1(8) USA/UK DTA, the USA hybrid entity rule] is not an exception to the saving clause of [art 1(4)]. Accordingly, the notes confirm that [art 1(8)] does not prevent a Contracting State from taxing an entity that is treated as a resident of that State under its tax law.
> For example, if a USA LLC with UK members elects to be taxed as a corporation for USA tax purposes, the United States will tax that LLC on its worldwide income on a net basis, without regard to whether the UK views the LLC as fiscally transparent.[50] The portion of the notes relating to Article 24 (Relief from Double Taxation)[51] provides rules for determining which Contracting State has the primary right to tax and which State must provide a credit in such circumstances.

The Exchange of Notes continues:

> [2] It is further understood that, where, by virtue of [art 1(8)],
> [a] an item of income, profit or gain is considered by a Contracting State to be derived by a person who is a resident of that Contracting State, and
> [b] the same item is considered by the other Contracting State to be derived [by that person or][52] by a person who is a resident of that other Contracting State,
>
> [art 1(8)] shall not prevent either Contracting State from taxing the item as the income, profit or gain of the person considered by that State to have derived the item of income, profit or gain.

It is essential to keep in mind which State is which; this paragraph is easier to follow if it is expanded to read:

It is further understood that, where, by virtue of art 1(8),

[a] an item of income, profit or gain is considered by the UK to be derived by a person who is a resident of the UK and	[a] an item of income, profit or gain is considered by the US to be derived by a person who is a resident of the US and
[b] the same item is considered by	[b] the same item is considered by

[49] See 109.5 (Savings Clause).

[50] Author's footnote: The UK will normally view a LLC as opaque, but it might be transparent if ToA rules apply.

[51] See 91.7.9 (Hybrids: art.24 tax credit).

[52] I do not understand the words in brackets and would be grateful to any reader who could explain.

the US to be derived [by that person or] by a person who is a resident of that the US,	the UK to be derived [by that person or] by a person who is a resident of that the UK,

[art 1(8)] shall not prevent the UK or the US from taxing the item as the income, profit or gain of the person considered by that State to have derived the item of income, profit or gain.

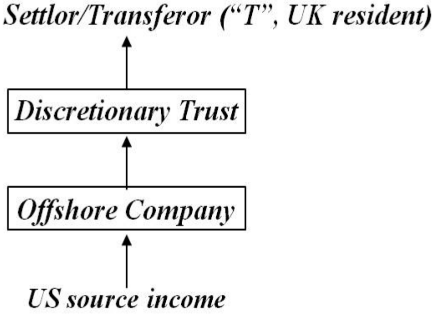
91.7.8 *s.624/720 income; s.3/86 gain*

The Exchange of Notes continues:

> [3] It is further understood that, in applying [para 1(8)], the UK shall, exceptionally, regard an item of income, profit or gain arising to a person as falling within the paragraph where another person is charged to UK tax in respect of that item of income, profit or gain—
> (a) under [what is now s.624 ITTOIA & s.720 ITA]; or
> (b) under section [77 or[53]] 86, TCGA 1992.
> [4] It is further understood that, in applying the paragraph, a person shall be regarded as fiscally transparent under the laws of the UK in relation to an item of income, profit or gain where a charge is made on another person on that item either—
> (a) by virtue of [what is now s.3 TCGA]; or
> (b) because that other person has (or, under [what is now s.464 ITA[54]], is treated as having) an equitable right in possession in a trust.

Thus trusts within s.624 and companies within s.720 are regarded as UK-transparent for IT; trusts within s.86 and companies within s.3 are regarded as UK-transparent for CGT.

Take a standard structure:



[53] Author's footnote: I add the brackets because s.77 is now repealed.

[54] See 42.9.4 (Scots trusts).

Suppose:

(1) T is UK-law UK resident but treaty-resident in the USA.
(2) The entities are US-transparent, so T regarded for USA purposes as receiving OC's income.
(3) Section 720 applies so T is taxed for UK tax purposes on OC's income

For USA/UK DTA purposes, T is treated as receiving OC's income. Thus for USA tax, USA should allow treaty relief even if in the USA the structure is opaque.[55]

91.7.9 *Hybrids: art.24 tax credit*

Foreign Tax Credit Relief is provided by art 24 USA/UK DTA.[56] The Exchange of Notes provides:

> *With reference to Article 24 (Relief from double taxation)—*
> [1] It is understood that, under paragraph 4 or 8 of Article 1 (General scope) [USA Savings Clause/US hybrid-entity rule], the provisions of the Convention
> [a] may permit the Contracting State of which a person is a resident (or, in the case of the United States, a citizen),[57] to tax an item of income, profit or gain derived through another person (the entity) which is fiscally transparent under the laws of either Contracting State, and
> [b] may permit the other Contracting State to tax
> (a) the same person [the entity member];
> (b) the entity; or
> (c) a third person
> with respect to that item.
> [2] Under such circumstances, the tax paid or accrued by the entity shall be treated as if it were paid or accrued by the first-mentioned person [the entity member] for the purposes of determining the relief from double taxation to be allowed by the State of which that first-mentioned person [the entity member] is a resident (or, in the case of the United States, a citizen),

As usual, it is essential to keep in mind which State is which; the text is easier to follow as it applies to the UK if it is expanded to read (in short):

[55] The transferor is entitled to the relief as a matter of UK law; see 49.30 (DT relief: s.720 income).

[56] See 111.2 (DTA/Unilateral Credit compared).

[57] The Exchange of Notes describes this person as "the first-mentioned person" but for clarity I gloss this as the "entity member".

> [1] .. the provisions of the Convention
> [a] ...permit [the UK] [the Contracting State of which [the member of the entity] is a resident ... [58] to tax an item of income, profit or gain derived through another person (the entity) which is fiscally transparent under the laws of either Contracting State, and
> [b] ... permit [the USA] [the other Contracting State] to tax
> (a) the same person [the UK resident entity member];
> (b) the entity; or
> (c) a third person
> with respect to that item.
> [2] Under such circumstances, the tax paid or accrued by the entity shall be treated as if it were paid or accrued by the first-mentioned person [the UK resident entity member] for the purposes of determining the relief from double taxation to be allowed by the State of which that first-mentioned person [the entity member] is a resident

The rule is modified in the case of land:

> [3] except that, in the case of
> [a] an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or
> [b] a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies,
> the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.

The Exchange of Notes continues:

> [4] [A] In the case where the same item of income, profit or gain derived through a trust is treated by each Contracting State as derived by different persons resident in either State, and
> (a) the person taxed by one State is the settlor or grantor of a trust; and
> (b) the person taxed by the other State is a beneficiary of that trust,
> the tax paid or accrued by the beneficiary shall be treated as if it were paid or accrued by the settlor or grantor for the purposes of determining the relief from double taxation to be allowed by the State of which that

[58] The Exchange of Notes describes this person as "the first-mentioned person" but for clarity I gloss this as the "entity member".

> settlor or grantor is a resident (or, in the case of the United States, a citizen),

The rule is again modified in the case of land:

> [4B] except that,
>
> [a] in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or
>
> [b] a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies,
>
> the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.
>
> [5] It is further understood that paragraphs 2 and 5 of Article 24 shall apply to such an item of income, profit or gain to the extent necessary to provide relief from double taxation.

In *Anson v HMRC,* US income arose to an LLC which was transparent for USA purposes. The CoA held the LLC was not transparent for UK purposes: it was a Reverse hybrid.

The income was distributed to a UK resident member. The taxpayer claimed credit relief for US tax, and sought to rely on the Exchange of Notes. Unfortunately the CoA refused to consider the point (on the grounds that the taxpayer raised it too late).[59] But it is not clear how the Exchange of Notes would help.

[59] [2013] EWCA Civ 63 at [92]:

> "There is clearly some dispute as to the mischief to which the exchange of notes is directed. There would have to be further evidence to resolve that dispute."

Presumably the reference to "evidence" is to such background material as is relevant to the construction of a DTA.

Perhaps it is better that the CoA did not address the point, as they did not seem sympathetic to the taxpayer:

> "Moreover, the words "with respect to that item", ... are, on the face of it, consistent with [counsel for HMRC's] principal submission that no change is made in the requirement for the profits taxed in each jurisdiction to be the same profits in order to qualify for DTR. If an alteration to article 23 [of the 1980 USA/UK DTA, now article 24 of the 2001 DTA] was intended, it is surprising that it was dealt with in this oblique way."

On appeal, SC held that FTCR applied for other reasons; see 111.5 (Same income rule).

91.8 Hybrid entities: Part 6A TIOPA

91.8.1 *Anti-tax avoidance directive*

Council Directive (EU) 2016/1164 (Anti-Tax Avoidance Directive, known as "ATAD") was adopted on 12 July 2016.

Council Directive (EU) 2017/952, sometimes called "ATAD 2", was adopted on 27 May 2017. It amended ATAD by introducing hybrid mismatch rules: articles 2, 9, 9a and 9b ATAD.

ATAD did not have direct effect. The rules in the UK are implemented by Part 6A TIOPA (Hybrid and other mismatches).

91.8.2 *Scope of ATAD*

Article 1 ATAD provides:

> This Directive applies to all taxpayers that are subject to corporate tax in one or more Member States, including permanent establishments in one or more Member States of entities resident for tax purposes in a third country.

In short, ATAD only applies to "corporate tax". So it applies to Corporation Tax; does it also apply to income tax when payable by companies? HMRC must have thought not, as the UK rules in Part 6A TIOPA apply to corporation tax, though it can affect LLPs not otherwise subject to CT.[60] But the issue is less important now that property income of non-resident companies has moved from IT to CT.

91.8.3 *TIOPA Part 6A: Navigation*

The numbering system of Part 6A is idiosyncratic.[61] Each Chapter is designated by a letter: A, B, etc, up to N for Chapter 14. Each section in a Chapter begins with 259, then the Chapter letter, and sections after the first are numbered A, B, etc; so the sections of Chapter 2 are numbered 259B, 259BA, etc up to 259BF. Sections introduced subsequently are slotted in with an additional letter, such as s.259NEA.

Chapter/Letter/Sections			Topic
1	A	259A	Overview
2	B	259B-259BF	Key definitions

[60] But see 91.22.5 (Charge to CT).

[61] See App.13.3 (Section numbering system).

Deduction/non-inclusion mismatches		
3 C	259C-259CE	Payments under financial instruments
4 D	259D-259DG	Repos/stock lending/ transfers of financial instruments
5 E	259E-259ED	Payments: payer a hybrid entity
6 F	259F-259FB	Internal transfer: from UK PE to where co is resident
7 G	259G-259GE	Payments: payee a hybrid entity
8 H	259H-259HC	Payments: payee a multinational company
Double deduction mismatches		
9 I	259I-259ID	Hybrid entity
10 J	259J-259JD	Dual resident company/multinational company
11 K	259K-259KD	Imported mismatches
12 L	259L-259LD	Adjustment where (a) supposition was mistaken (b) Deduction denied under Part 6A, & income arises later
12A	259ZM - s59ZMF	Groups
Supplemental provisions		
13 M	259M	Hybrid & mismatch TAAR
13A	259MA-MD	Transparent funds
14 N	259N-259NF	Definitions and interpretation

I here consider Chapter 7; I hope to consider some other Chapters in subsequent editions; others mainly concern corporate tax practitioners. I do not consider the rules relating to CFCs.

91.8.4 *Part 6A definitions: Navigation*

Part 6A TIOPA has a specialist technical vocabulary.

Chapter 2 contains a dozen "key" definitions; Chapter 14 has half a dozen or so definitions, and other terms are defined where they are used. In this work I only discuss terms employed in Chapter 7:

Term	**See para/section**
Control group	91.25
Equivalent provision	91.24.3
Financial instrument	s.259N
Hybrid entity	91.15
Investor	91.15.4
Investor jurisdiction	91.15.4
Mismatches	91.9
Ordinary income	91.14
-do- included in profits	s.259BC(8)
Partnership income	91.26
Payee	91.12; 91.11
Payer	91.10; 91.11
Payment	91.10
Permanent Establishment	s.259BF
Quasi-payment	91.11
Related person	s. 259NC
Relevant deduction	91.10
Relevant investment fund	s.259NA
Tax	91.24.1
Taxable period	91.24.4
50% / 25% investment	105.8

91.8.5 *Introduction to Part 6A*

This is a daunting topic. BEPS Action 2 Report, and HMRC hybrid guidance,[62] are each nearly 500 pages in length; and a full discussion would require more than one volume.

Changes were made to the rules in 2017, 2018, and in 2019 in the light of ATAD 2 and again in FA 2021. It is questionable whether the current law is stable.

The background to Part 6A TIOPA can be found in consultation papers in 2014 and December 2016, but these are now of historical importance only.

A further consultation paper was published in March 2020,[63] which is the background to the 2021 changes.

INTM provides this introduction:

> **INTM550020: Hybrids: Chapter 1 - Introduction: What is a hybrid or other mismatch?** [Dec 2019]
> Part 6A of Taxation (International and Other Provisions) Act 2010 (TIOPA 2010) addresses arrangements that give rise to hybrid mismatch outcomes leading to a tax mismatch.
> The legislation is based on the OECD recommendations in relation to Action 2 of the Base Erosion Profit Shifting (BEPS) project. The legislation is deliberately broader in scope than the OECD recommendations in some areas. Consequently, outcomes under this legislation may differ from those under the OECD recommendations.
> For example, the UK's hybrid mismatch legislation includes:
>
> - rules to deal with mismatches involving permanent establishments, and
> - rules that counter hybrid mismatches where a hybrid entity is in a territory with no corporate income tax.
>
> Mismatches can involve either double deductions for the same expense,

[62] See INTM850000 (Hybrid and other mismatches) published on *http://www.hmrc.gov.uk/gds/INTM/images/INTM850000_hybrids.pdf*
The text is not published online with the rest of the INTM, so it is missing in publishers tax databases.
CIOT expressed concern that the draft of this guidance was "used as a substitute for clear, well targeted legislation and that it conflicts with the wording of the legislation".

[63] HMRC "Hybrid and other Mismatches" *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/873562/Consultation_Hybrid_and_other_mismatches.pdf*

or deductions for an expense without the corresponding receipt being fully taxed.

Hybrid mismatch outcomes can arise from hybrid financial instruments and hybrid entities, and from arrangements involving permanent establishments. They can also arise from hybrid transfers and dual resident companies.

The legislation aims to neutralise the tax mismatch created under these arrangements by altering the tax treatment of either the deduction or the receipt, depending on the circumstances. The rules are designed to work whether both the countries affected by a cross-border arrangement have introduced rules based on the OECD recommendations, or just the UK.

This legislation follows the OECD recommendations in providing alternative responses to mismatches which fall within the scope of the legislation. These are described as a 'primary response' and a 'secondary response'.

In the case of deduction/non-inclusion, the primary response is generally to deny a deduction to the payer. If this does not occur, the secondary defensive response is to bring the receipt into charge for the payee.

In the case of double deductions the primary response is to deny a deduction to the parent or investor company. If this does not occur (because the tax law in the country in which the parent or investor company is resident does not provide for this), the secondary response is to deny the deduction to the hybrid entity or permanent establishment, as appropriate.

91.9 Mismatches

Part 6A TIOPA identifies two types of mismatch:

(1) a deduction/non-inclusion ("D/NI") mismatch

(2) a double deduction mismatch

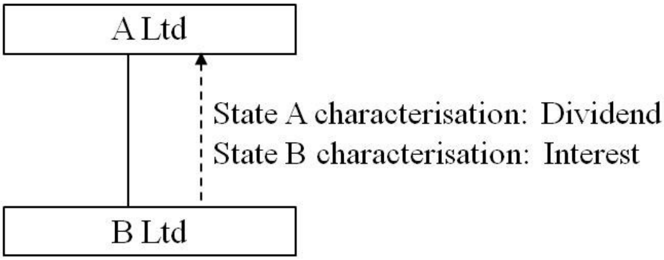
91.9.1 *Deduction/non-inclusion mismatch*

Section 259A(2) TIOPA provides:

> A deduction/non-inclusion mismatch arises where an amount is deductible from a person's income-
>
> (a) without a corresponding amount of ordinary income arising to another person, or
>
> (b) where an amount of ordinary income does arise to a person but is under taxed.

This can happen with a hybrid entity.

It also happens in other circumstances. A mismatch may happen if States characterise a payment in different ways, for example:



A Ltd
State A characterisation: Dividend
State B characterisation: Interest
B Ltd

State A may characterise the payment as dividend (perhaps not taxed)
State B may characterise the payment as interest (perhaps deductible)

A mismatch may happen if States differ on what constitutes a PE; for example State A may characterise the arrangement as a permanent establishment, whose profits are taxable in State B; and State B may not regard it as a PE, and regard the profits as taxable in State A. One might describe that as a "**hybrid PE**".

This chapter only considers the issues of hybrid entities.

91.9.2 *Double deduction mismatch*

Section 259A(3) TIOPA provides:

> A double deduction mismatch arises where-
> (a) an amount is deductible from more than one person's income, or
> (b) an amount is deductible from a person's income for the purposes of more than one tax.

This can happen with a hybrid.

It also happens in other circumstances, for instance, a company may make a gift to charity which qualifies for gift aid relief in the UK and a similar relief elsewhere. But I do not consider double deduction mismatches in this chapter.

91.9.3 *Other mismatches*

Mismatches are not caught unless they are of one of these kinds. Brabazon comments:

> It is difficult to see why the "D" element of a D/NI outcome should be required where arbitrage is based on differences in the tax treatment of a reverse hybrid trust. Arbitrage is successfully achieved if income, which might be derived from a stranger and may or may not be deductible to that person, is untaxed or lightly taxed at source and then

> escapes effective residence taxation in any jurisdiction. This might be called a NI/NI (double no-inclusion) outcome. There are plenty of investments, particularly passive ones, that produce cross-border income subject to zero or light source taxation. A trust is perfectly adapted to make such investments and, if it is a reverse hybrid, a NI/NI outcome is the obvious consequence.[64]

The rules were created by corporation tax practitioners with multinational groups in mind, and without much regard for private client aspects.

See too 111.9 (Tax in accordance with DTA).

91.10 Payment

Section 259BB(1) TIOPA provides:

> In this Part [Part 6A, hybrids/mismatches] "payment" means any transfer-
> (a) of money or money's worth directly or indirectly from one person ("the payer") to one or more other persons, and
> (b) in relation to which (disregarding this Part and any equivalent provision under the law of a territory outside the UK) an amount (a "relevant deduction") may be deducted from the payer's income for a taxable period (the "payment period") for the purposes of calculating the payer's taxable profits.

"Payment" has an artificial definition: it means a *deductible* payment. I write it with an initial capital to reflect the technical nature of the word.

How is the payee meant to know whether a Payment is deductible? It has to be "reasonable to suppose" a Payment; that recognises that the question is imponderable, but does not actually help.[65]

91.11 "Quasi-payment"

Section 259BB(2) TIOPA provides:

> For the purposes of this Part [Part 6A, hybrids/mismatches], there is a "quasi-payment", in relation to a taxable period (the "payment period") of a person ("the payer"), if (disregarding this Part and any equivalent provision under the law of a territory outside the UK)-

Two conditions then follow:

> (a) an amount (a "relevant deduction") may be deducted from the

[64] [2018] BTR at 225.

[65] See App.2.24 (Reasonable-to-assume).

payer's income for that period for the purposes of calculating the payer's taxable profits, and

This is the same condition as for "Payment".

(b) making the assumptions in subsection (4), it would be reasonable to expect an amount of ordinary income to arise to one or more other persons as a result of the circumstances giving rise to the relevant deduction.

> **INTM550540 Payment and quasi-payment, Securitisation companies** [Dec 2019]
> ...In most instances a payment will also fall within the definition of a quasi payment.
> A simple example of a quasi-payment would be an interest free convertible loan note being treated as issued at a discount that qualifies for finance relief (see example at INTM551280). The deduction arises from the terms of the loan note, which creates economic rights between the payer and payee.
> In contrast, a deduction granted by a territory for an amount of deemed interest on an interest free loan would not be a quasi-payment (see example at INTM551270). The deemed deduction does not arise from the terms of the existing loan nor from any amendment to it. It arises from the operation of the territory's tax rules.
> **Securitisation Companies**
> For the avoidance of doubt, payments or quasi-payments could arise to an entity which is charged to corporation tax under Regulation 14 of The Taxation of Securitisation Companies 2006 (SI 2006/3296). This could occur where transactions giving rise to the Retained Profit (on which the CT charge is calculated) represent an allowable deduction.

Section 259BB(5) TIOPA provides:

> In this Part [Part 6A, hybrids/mismatches]-
> (a) references to a quasi-payment include all the circumstances giving rise to the relevant deduction mentioned in subsection (2)(a), and
> (b) references to a quasi-payment being made are to those circumstances arising.

91.11.1 *Deemed income*

Section 259BB(3) TIOPA provides:

> But a quasi-payment does not arise under subsection (2) if-
> (a) the relevant deduction is an amount that is deemed, under the

> law of the payer jurisdiction, to arise for tax purposes, and
> (b) the circumstances giving rise to the relevant deduction do not include any economic rights, in substance, existing between the payer and a person mentioned in subsection (2)(b).

91.11.2 *Quasi-payment assumptions*

Section 259BB(4) TIOPA provides:

> The assumptions are that (so far as would not otherwise be the case)-
> (a) any question as to whether an entity is a distinct and separate person from the payer is determined in accordance with the law of the payer jurisdiction,
> (b) any persons to whom amounts arise, or potentially arise, as a result of the circumstances giving rise to the relevant deduction adopt the same approach to accounting for those circumstances as the payer, and
> (c) any persons to whom amounts arise, or potentially arise, as a result of those circumstances-
> (i) are, under the law of the payer jurisdiction, resident in that jurisdiction for tax purposes, and
> (ii) carry on a business, in connection with which those circumstances arise, in the payer jurisdiction.

91.12 Payer/Payee/Relevant deduction

91.12.1 *Payer/relevant deduction*

Definitions of payer and relevant deduction are found in the definitions of payment and quasi-payment set out above.

91.12.2 *Payee*

Section 259BB(6) TIOPA provides:

> In this Part [Part 6A, hybrids/mismatches] "payee" means-
> (a) in the case of a payment, any person-
> (i) to whom the transfer is made as mentioned in subsection (1)(a),[66] or
> (ii) to whom an amount of ordinary income arises as a result of the payment, and
> (b) in the case of a quasi-payment, any person-
> (i) to whom it would be reasonable to expect an amount of

[66] See 91.10 (Payment).

ordinary income to arise as mentioned in subsection (2)(b), or

(ii) to whom an amount of ordinary income arises as a result of the quasi-payment.

91.12.3 *Payer is also payee*

Section 259BB(7) TIOPA provides:

> For the purposes of this Part [Part 6A, hybrids/mismatches], in the case of a quasi-payment, the payer is "also a payee" if-
> (a) an entity is not a distinct and separate person from the payer for the purposes of a tax charged under the law of the UK,
> (b) that entity is a distinct and separate person from the payer for the purposes of a tax charged under the law of the payer jurisdiction, and
> (c) it would be reasonable to expect an amount of ordinary income to arise to that entity as mentioned in subsection (2)(b).

The INT Manual provides:

> **INTM550550 Payer and payee** [Dec 2019]
> ... **Payer is also payee**
> The payer can also be a payee where the entity is treated as the payer under UK law, but as a separate entity in the other jurisdiction.
> For example, a payment made by a partnership to one of the partners has the same payer and payee from a UK perspective.

91.13 "Payer/payee jurisdiction"

Section 259BB TIOPA provides:

> (8) In this section "payer jurisdiction" means the jurisdiction under the law of which the relevant deduction may (disregarding this Part [Part 6A, hybrids/mismatches] and any equivalent provision under the law of a territory outside the UK) be deducted.
> (9) In this Part [Part 6A, hybrids/mismatches] "payee jurisdiction", in relation to a payee, means a territory in which-
> (a) the payee is resident for tax purposes under the law of that territory, or
> (b) the payee has a permanent establishment.

91.14 "Ordinary Income"

"Ordinary income" matters for the definition of deduction/non-inclusion mismatch.

91.14.1 *Basic rule*

Section 259BC(1) TIOPA provides:

> This section has effect for the purposes of this Part [Part 6A, hybrids/mismatches].

The definition uses the term relevant tax.

Section 259BC(9) TIOPA provides:

> In this section "relevant tax" means a tax other than the CFC charge or a foreign CFC charge.

Armed with that definition, we can turn to the definition of ordinary income. Section 259BC(2) TIOPA provides:

> "Ordinary income" means income that is brought into account, before any deductions, for the purposes of calculating the income or profits on which a relevant tax is charged ("taxable profits").

In short: Ordinary Income means taxable income. I write it with initial capitals, to reflect the technical nature of the term.

91.14.2 *"Brought into account"*

Section 259BC(3) TIOPA provides:

> But an amount of income is not brought into account for those purposes to the extent that
> (a) it is charged to the relevant tax at a nil rate, or
> (b) it is excluded, reduced or offset by any exemption, exclusion, relief, or credit-
> (i) that applies specifically to all or part of the amount of income (as opposed to ordinary income generally), or
> (ii) that arises as a result of, or otherwise in connection with, a payment or quasi-payment that gives rise to the amount of income.

91.14.3 *Tax refunded*

Section 259BC TIOPA provides:

> (4) If all the relevant tax charged on taxable profits is, or falls to be, refunded, none of the income brought into account in calculating those taxable profits is "ordinary income".

> (5) If a proportion of the relevant tax charged on taxable profits is, or falls to be, refunded, the amount of any income brought into account in calculating those taxable profits that is "ordinary income" is proportionally reduced.
> (6) For the purposes of subsections (4) and (5) an amount of relevant tax is refunded if and to the extent that-
> (a) any repayment of relevant tax, or any payment in respect of a credit for relevant tax, is made to any person, and
> (b) that repayment or payment is directly or indirectly in respect of the whole or part of the amount of relevant tax,

91.14.4 *Loss relief*

Section 259BC(6) TIOPA concludes:

> but an amount refunded is to be ignored if and to the extent that it results from qualifying loss relief.

Section 259BC(7) TIOPA provides:

> In subsection (6) "qualifying loss relief" means-
> (a) any means by which a loss might be used for corporation tax or income tax purposes to reduce the amount in respect of which a person is liable to tax, or
> (b) any corresponding means by which a loss corresponding to a relevant tax loss might be used for the purposes of a relevant tax other than corporation tax or income tax to reduce the amount in respect of which a person is liable to tax,
> (and in paragraph (b) "relevant tax loss" means a loss that might be used as mentioned in paragraph (a)).

> **INTM550560 Ordinary income** [Dec 2019]
> [The Manual refers to the definition in s259BC(2) and continues:]
> Entities such as charities and many pension funds may not have ordinary income where the income received falls wholly within relevant exemptions. This is because that income is not brought into account in calculating profits on which a relevant tax is charged...
> A receipt may remain within the definition of ordinary income even where it has been characterised differently under the payee regime. For example, a finance return may be characterised as proceeds from a share sale by a share trader, but still be included within trading profits as income. In those circumstances the receipt is taxed at the same rate as a finance return would have been and so is ordinary income. See the example at INTM551380...
> A qualifying loss relief is a loss that might be used to reduce the amount

on which a person is liable to income tax or corporation tax on income in the UK, or a corresponding non-UK loss. This will include, for example, refunds arising from relief for or equivalent to

- UK group relief,
- UK loss carry back
- UK generic allowable expenditure incurred in earning the profits that exceeds the income received.

A full or partial refund of the relevant tax as a consequence of anything that is not a qualifying loss relief will result in the amounts being excluded from ordinary income. This may occur where it is a feature of the relevant jurisdiction's tax regime that the tax on income can be refunded, whether to the company or another person, without the application of a qualifying loss relief, but perhaps because it is income of a specified character..

91.15 Hybrid entity

91.15.1 *Hybrid entity*

Section 259BE(1) TIOPA provides:

> For the purposes of this Part [Part 6A, hybrids/mismatches], an entity is "hybrid" if it meets conditions A and B.

I refer to **"hybrid conditions A & B"**.

91.15.2 *Hybrid condition A: personality*

Section 259BE(2) TIOPA provides:

> Condition A is that the entity is regarded as being a person for tax purposes under the law of any territory.

The entity must be a person in at least one territory: if not, it cannot be hybrid. I refer to it as the **"entity-person"**.

91.15.3 *Hybrid condition B*

Section 259BE TIOPA provides:

> (3) Condition B is that-

There are two ways to satisfy Hybrid condition B, which I call condition B(a) and B(b). Condition B(a) is:

> (a) some or all of the entity's income or profits are treated (or would be if there were any) for the purposes of a tax charged under the law of any territory, as the income or profits of a person or persons other

than the person mentioned in subsection (2)

In short, in some territory the entity-person is not taxable on its profits. Condition B(b) is:

> (b) [i] under the law of a territory other than the one mentioned in subsection (2),
> [ii] the entity is not regarded as a distinct and separate person to an entity or entities that are distinct and separate persons under the law of the territory mentioned in that subsection.

In short, in some territory the entity-person lacks personality. But in that case it cannot be taxable on its profits: what does this add to condition B(a)? Perhaps the purpose is to facilitate the definition of "investor" set out below.

> **INTM550580 Hybrid entities, residence, investors and investor jurisdiction** [Dec 2019]
> ... For example, a UK company which has elected to be disregarded for USA tax purposes under the check the box regime will satisfy condition B.
> Hybrid entities within Part 6A will include -
> - those where applying the domestic law of two territories to the general characteristics of the entity leads to different outcomes as to whether the entity should be regarded as opaque or transparent for tax purposes.
> - those where a territory's domestic law treats an entity of a specific type in a certain manner for tax purposes and that treatment is not followed under the domestic law of other territories.
>   For example, the income and gains of a UK Limited Liability Partnership (LLP) that carries on a business are treated as transparent under UK tax law. Other territories may treat a UK LLP in line with its form, as a body corporate, and regard it a distinct taxable entity in its own right.
> - those where a territory's domestic law allows certain entities to determine whether they are to be treated as opaque or transparent for tax purposes.
>   For example the USA tax code allows entities to make an election to be treated as transparent or opaque for tax purposes under their check the box rules.

91.15.4 *Investor in hybrid*

Section 259BE(4) TIOPA provides:

> For the purposes of this Part [Part 6A, hybrids/mismatches]-
> (a) where subsection (3)(a) applies, a person who is treated as having the income or profits of the hybrid entity is an "investor" in it,
> (b) where subsection (3)(b) applies, an entity that-
> (i) is regarded as a distinct and separate person to the hybrid entity under the law of the territory mentioned in subsection (2), but
> (ii) is not regarded as a distinct and separate person to the hybrid entity under the law of another territory,
> is an "investor" in the hybrid entity...

In a case within para (a), the investor will normally be a member of the entity. In a para (b) case the entity itself is the "investor" in the entity.

91.15.5 *Investor jurisdiction*

Section 259BE TIOPA provides:

> (4) For the purposes of this Part [Part 6A, hybrids/mismatches] ...
> (c) any territory under the law of which an investor is within the charge to a tax is an "investor jurisdiction" in relation to that investor.

91.16 Chap 7 application conditions

Section 259GA contains the conditions that must be met for Chapter 7 to apply. Section 259GA(1) TIOPA provides:

> This Chapter [Chapter 7] applies if conditions A to E are met.

I refer to **"Chapter 7 conditions A to E"**.

91.16.1 *Chap 7 condition A: arrangement*

Section 259GA(2) TIOPA provides:

> Condition A is that a payment or quasi-payment is made under, or in connection with, an arrangement.

It is hard to see how there could not be an arrangement.

91.16.2 *Chap 7 condition B: hybrid payee*

Section 259GA(3) TIOPA provides:

> Condition B is that a payee is a hybrid entity (a "hybrid payee").

91.16.3 *Chap 7 condition C: CT payer/investor or LLP*

Section 259GA(4) TIOPA provides:

> Condition C is that-
> (a) the payer is within the charge to corporation tax for the payment period,
> (b) an investor in a hybrid payee is within the charge to corporation tax for an accounting period some or all of which falls within the payment period, or
> (c) a hybrid payee is a limited liability partnership.[67]

These are alternatives: only one need be satisfied.

91.17 Chap 7 condition D: D/NI mismatch

Section 259GA(5) TIOPA provides:

> Condition D is that it is reasonable to suppose[68] that, disregarding the provisions mentioned in subsection (6), there would be a hybrid payee deduction/non-inclusion mismatch in relation to the payment or quasi-payment (see section 259GB).

Section 259GA(6) TIOPA identifies the disregarded provisions:

> The provisions are-
> (a) This Chapter [Chapter 7] and Chapters 8 to 10, and
> (b) any equivalent provision under the law of a territory outside the UK.

91.17.1 *Hybrid payee D/NI mismatch*

"Hybrid payee deduction/non-inclusion mismatch" is a clumsy phrase, but it is difficult to think of a better one.

Section 259GB defines:

(1) hybrid payee deduction/non-inclusion mismatch and
(2) the amount of the mismatch

Section 259GB(1) TIOPA provides:

> There is a "hybrid payee deduction/non-inclusion mismatch", in relation to a payment or quasi-payment, if-
> (a) the relevant deduction exceeds the sum of the amounts of

[67] See 91.22 (Hybrid LLP payee).

[68] See App.2.24 (Reasonable-to-assume).

> ordinary income that, by reason of the payment or quasi-payment, arise to each payee for a permitted[69] taxable period, and
>
> (b) all or part of that excess arises by reason of one or more payees being hybrid entities.

91.17.2 *Amount of mismatch*

Section 259GB TIOPA provides:

> (2) The extent of the hybrid payee deduction/non-inclusion mismatch is equal to the excess that arises as mentioned in subsection (1)(b).
>
> (2A) No excess is to be taken to arise by reason of a hybrid payee being a hybrid entity for the purposes of subsection (1)(b) so far as it is attributable to a qualifying institutional investor based in a territory under the law of which—
>
> (a) the income or profits of the hybrid entity are not treated as income or profits of the investor, or
>
> (b) the hybrid entity is regarded as a distinct and separate person to the investor.
>
> (2B) Excess is attributable to such a qualifying institutional investor to the extent that ordinary income (arising by reason of the payment or quasi-payment) would fall to be brought into account by the investor if—
>
> (a) where subsection (2A)(a) applies, under the law of the territory the income or profits of the hybrid entity were treated as income or profits of the investor, and
>
> (b) where subsection (2A)(b) applies, under the law of the territory the hybrid entity were not regarded as a distinct and separate person to the investor.
>
> (2C) To determine if a "qualifying institutional investor" is "based" in a particular territory for the purposes of subsections (2A) and (2B) see section 259NDA.

[69] Defined in subsection (6): "A taxable period of a payee is "permitted" in relation to an amount of ordinary income that arises as a result of the payment or quasi-payment if-

(a) the period begins before the end of 12 months after the end of the payment period, or

(b) where the period begins after that-

(i) a claim has been made for the period to be a permitted period in relation to the amount of ordinary income, and

(ii) it is just and reasonable for the amount of ordinary income to arise for that taxable period rather than an earlier period."

91.17.3 *Deemed mismatch amount*

Section 259GB TIOPA provides:

> (3) A relevant amount of the excess is to be taken (so far as would not otherwise be the case) to arise as mentioned in subsection (1)(b) where-
>
> (a) a payee is a hybrid entity,
>
> (b) there is no territory-
>
> (i) where that payee is resident for the purposes of a tax charged at a higher rate than nil under the law of that territory, or
>
> (ii) under the law of which ordinary income arises to that payee, by reason of the payment or quasi-payment, for the purposes of a tax that is charged on that payee by virtue of that payee having a permanent establishment in that territory, and
>
> (c) no income arising to that payee, by reason of the payment or quasi-payment, is brought into account in calculating chargeable profits[70] for the purposes of the CFC charge or a foreign CFC charge.
>
> (4) For the purposes of subsection (3), the "relevant amount" of the excess is the lesser of-
>
> (a) the amount of the excess, and
>
> (b) an amount equal to the amount of ordinary income that it is reasonable to suppose[71] would, by reason of the payment or quasi-payment, arise to the payee for corporation tax purposes, if-
>
> (i) the payee were a company, and
>
> (ii) the payment or quasi-payment were made in connection with a trade carried on by the payee in the UK through a permanent establishment in the UK.

91.17.4 *Mismatch: partnership payee*

Section 259GB(4A) TIOPA provides:

> In applying subsection (4)(b) in a case where the payee is a partnership,[72]

[70] Defined in subsection (5): "In subsection (3)(c) "chargeable profits"-
(a) in relation to the CFC charge, has the same meaning as in Part 9A (see section 371VA), and
(b) in relation to a foreign CFC charge, means the concept (by whatever name known) corresponding to chargeable profits within the meaning of that Part."

[71] See App.2.24 (Reasonable-to-assume).

[72] Defined s.259GB(4B) TIOPA: "In subsection (4A) "partnership" has the meaning given by section 259NE(4)." See 91.26 (Partnership income).

> it is to be assumed that no amount of ordinary income arises to the payee, by reason of the payment or quasi-payment, if-
>
> (a) a partner in the partnership is entitled to the amount, and
>
> (b) having regard only to-
>
> (i) the law of the territory where the partnership is established, and
>
> (ii) the law of the territory where the partner is resident for tax purposes or, if the partner is not resident anywhere for tax purposes, where the partner is established,
>
> the payee would not be regarded as a hybrid entity.

For a worked example, see 91.27.2 (LLP example: Condition D).

Pibworth explains:

> Prior to a recent change to the Hybrid Rules (see below), in certain circumstances, the application of Part 6A Chapter 7 TIOPA potentially gave rise to odd outcomes where there was a partnership in the structure. Let us say that there are three corporate partners (each incorporated in different jurisdictions) each holding a 33.33% share in an English limited partnership, with the partnership holding 100% of the shares in a UK company. The limited partnership advances a loan to the UK company. The UK company is able to claim a deduction for UK corporation tax purposes in respect of interest payments on the loan. Under applicable law, each of the UK company debtor and two of the partners treat the English limited partnership as tax transparent but the third corporate partner treats the partnership as tax opaque.
>
> Given that the English partnership is treated as transparent by two of the partners but opaque by the other, the partnership is treated as a hybrid entity for the purposes of the Hybrid Rules, and so is a hybrid payee for the purposes of Part 6A Chapter 7 TIOPA. On one reading of Chapter 7 it was arguable that because one partner treated the partnership as opaque, then Chapter 7 had the effect of denying in full the deduction for the UK debtor on interest payments to the partnership even though, economically, there was only a deduction/non-inclusion mismatch in respect of 33.33% of any interest paid.
>
> The Hybrid Rules have now been amended to address this outcome where the hybrid payee is a partnership.26 The effect of this change is to apply Chapter 7 on a partner-by-partner basis which means that there should only be a counteraction under Chapter 7 to the extent of the actual deduction/non-inclusion mismatch. So, in the example above, 33.33% (rather than 100%) of the deduction claimed by the UK debtor would be counteracted under Chapter 7. Helpfully, the Guidance also includes an example addressing this specific scenario noting that the purpose is to

ensure that "any disallowance is proportionate".[73]

91.17.5 *Amortisation*

Section 259GB(1A) TIOPA provides:

> But there is no hybrid payee deduction/non-inclusion mismatch so far as the relevant deduction is-
> (a) a debit in respect of amortisation that is brought into account under section 729 or 731 of CTA 2009 (writing down the capitalised cost of an intangible fixed asset), or
> (b) an amount that is deductible in respect of amortisation under a provision of the law of a territory outside the UK that is equivalent to either of those sections.

91.18 Chap 7 condition E

Section 259GA(7) TIOPA provides:

> Condition E is that-
> (a) [i] it is a quasi-payment that is made as mentioned in subsection (2) and
> [ii] the payer is also a hybrid payee (see section 259BB(7)),
> (b) the payer and a hybrid payee or an investor in a hybrid payee are in the same control group (see section 259NB) at any time in the period-
> (i) beginning with the day on which the arrangement mentioned in subsection (2) is made, and
> (ii) ending with the last day of the payment period, or
> (c) that arrangement is a structured arrangement.

These are alternatives: only one need be satisfied.

91.18.1 *Structured arrangement*

This brings in a purpose test. Section 259GA TIOPA provides:

> (8) The arrangement is "structured" if it is reasonable to suppose[74] that-
> (a) the arrangement is designed to secure a hybrid payee deduction/non-inclusion mismatch, or
> (b) the terms of the arrangement share the economic benefit of the mismatch between the parties to the arrangement or otherwise reflect the fact that the mismatch is expected to arise.

[73] [2018] BTR 247.

[74] See App.2.24 (Reasonable-to-assume).

> (9) The arrangement may be designed to secure a hybrid payee deduction/non-inclusion mismatch despite also being designed to secure any commercial or other objective.

91.19 Chap 7 counteraction: Outline

Assuming the Chapter 7 application conditions are met, we move on. Chapter 7 counteracts D/NI mismatches in three ways. In order of priority:

Response	**Section**	**Condition**	**Counteraction**	**See para**
Primary	259GC	Payer within CT	Non-deduction	91.20
Secondary	259GD	Investor within CT	Charge on investor	91.21
Tertiary	259GE	Hybrid LLP	Treat LLP as corporate	91.22

91.20 Counteraction: Disallow deduction

Section 259GC counteracts the D/NI mismatch where the payer is within the charge to corporation tax.

Section 259GC TIOPA provides:

> (1) This section applies where the payer is within the charge to corporation tax for the payment period.
> (2) For corporation tax purposes, the relevant deduction that may be deducted from the payer's income for the payment period is reduced by an amount equal to the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5).

91.21 Counteraction: CT charge

Section 259GD counteracts the D/NI mismatch where:

(1) an investor in the payee is within the charge to corporation tax and
(2) the mismatch is not counteracted by s.259GC

Section 259GD(1) TIOPA provides:

> This section applies in relation to an investor in a hybrid payee where-
> (a) the investor is within the charge to corporation tax for an accounting period some or all of which falls within the payment period, and
> (b) it is reasonable to suppose[75] that-
> (i) neither section 259GC[76] nor any equivalent provision under the law of a territory outside the UK applies, or

[75] See App.2.24 (Reasonable-to-assume).

[76] See 91.21 (Counteraction: Payer within CT).

> (ii) a provision of the law of a territory outside the UK that is equivalent to section 259GC applies, but does not fully counteract[77] the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5).

91.21.1 *Relevant amount*

Section 259GD(3) TIOPA provides:

> In this section "the relevant amount" is-
> (a) in a case where subsection (1)(b)(i) applies, an amount equal to the hybrid payee deduction/non-inclusion mismatch, or
> (b) in a case where subsection (1)(b)(ii) applies, the lesser of-
> (i) the amount by which that mismatch exceeds the amount by which it is reasonable to suppose[78] the relevant deduction is reduced by a provision of the law of a territory outside the UK that is equivalent to section 259GC, and
> (ii) the amount of the relevant deduction that may still be deducted as mentioned in subsection (2)(b).

91.21.2 *Charge on investor*

Section 259GD TIOPA provides:

> (4) If the investor is the only investor in the hybrid payee, the appropriate proportion of the relevant amount is to be treated as income arising to the investor for the counteraction period.
> (5) If there is more than one investor in the hybrid payee, an amount equal to the investor's share of the appropriate proportion of the relevant amount is to be treated as income arising to the investor for the counteraction period...

The charge is under the miscellaneous income sweep up charge. Section 259GD(8) TIOPA provides:

> [a] An amount of income that is treated as arising under subsection (4)

[77] Defined in subsection (2): "A provision of the law of a territory outside the UK that is equivalent to section 259GC does not fully counteract that mismatch if (and only if)-
(a) it does not reduce the relevant deduction by the full amount of the mismatch, and
(b) the payer is still able to deduct some of the relevant deduction from income in calculating taxable profits."

[78] See App.2.24 (Reasonable-to-assume).

or (5) is chargeable under Chapter 8 of Part 10 of CTA 2009 (income not otherwise charged)[79]

[b] (despite section 979(2) of that Act).[80]

91.21.3 *Appropriate proportion*

Section 259GD TIOPA provides:

> (6) For the purposes of subsections (4) and (5) the "appropriate proportion of the relevant amount"-
> (a) if the hybrid payee is the only hybrid payee, is all of the relevant amount, or
> (b) if there is more than one hybrid payee, is the proportion of the relevant amount apportioned to the hybrid payee upon an apportionment of that amount between all the hybrid payees on a just and reasonable basis having regard (in particular) to-
> (i) any arrangements as to profit sharing that may exist between some or all of the payees, and
> (ii) the extent to which it is reasonable to suppose[81] that the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5) arises by reason of each hybrid payee being a hybrid entity.
>
> (7) The investor's share of the appropriate proportion of the relevant amount is to be determined by apportioning that proportion of that amount between all the investors in the hybrid payee on a just and reasonable basis, having regard (in particular) to any arrangements as to profit sharing that may exist between some or all of those investors.

91.21.4 *Counteraction period*

Section 259GD(9) TIOPA provides:

> The "counteraction period" means-
> (a) if an accounting period of the investor coincides with the payment period, that accounting period, or
> (b) otherwise, the first accounting period of the investor that is wholly or partly within the payment period.

[79] See 33.1 (Misc Sweep-up Income).

[80] Section 979(2) provides that deemed income is not within Chapter 8 Part 10, so it needs to be disapplied to tax the deemed income in this case. See 33.1.3 (Deemed income).

[81] See App.2.24 (Reasonable-to-assume).

91.22 Hybrid LLP payee

Section 259GE counteracts the mismatch where

(1) a payee is a hybrid entity and limited liability partnership and
(2) the mismatch is not otherwise counteracted

Section 259GE TIOPA provides:

> (1) This section applies in relation to a hybrid payee where
> [A] the hybrid payee is a limited liability partnership and
> [B] it is reasonable to suppose[82] that-
> (a) none of the following provisions applies-
> (i) section 259GC;
> (ii) section 259GD;
> (iii) any provision under the law of a territory outside the UK that is equivalent to either of those sections, or
> (b) [i] one or more of those provisions apply, but
> [ii] the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5) is not fully counteracted.

91.22.1 *Fully counteracted*

Section 259GE TIOPA provides:

> (2) The mismatch is not fully counteracted if (and only if), after the application of such of those provisions as apply-
> (a) the relevant deduction is not reduced by the full amount of the mismatch,
> (b) the payer is still able to deduct some of the relevant deduction from income in calculating taxable profits, and
> (c) the lesser of-
> (i) the difference between the amount of the mismatch and the amount by which it is reasonable to suppose the relevant deduction is reduced, and
> (ii) the amount of the relevant deduction that may still be deducted,
> exceeds the sum of any amounts of income treated as arising under section 259GD or any equivalent provision under the law of a territory outside the UK.

91.22.2 *"The relevant amount"*

Section 259GE(3) TIOPA provides:

[82] See App.2.24 (Reasonable-to-assume).

> In this section "the relevant amount" is-
> (a) in a case where subsection (1)(a) applies, an amount equal to the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5), or
> (b) in a case where subsection (1)(b) applies, an amount equal to the excess mentioned in subsection (2)(c).

91.22.3 *Charge on LLP*

Section 259GE(4) TIOPA provides:

> If the hybrid payee is the only hybrid payee, an amount equal to the relevant amount is to be treated as income arising to the hybrid payee on the last day of the payment period.

91.22.4 *Multiple hybrid payees*

Section 259GE TIOPA provides:

> (5) If there is more than one hybrid payee, an amount equal to the hybrid payee's share of the relevant amount is to be treated as income arising to the hybrid payee on the last day of the payment period.
> (6) The hybrid payee's share of the relevant amount is to be determined by apportioning that amount between all the hybrid payees on a just and reasonable basis, having regard (in particular) to-
> (a) any arrangements as to profit sharing that may exist between some or all of the payees, and
> (b) the extent to which it is reasonable to suppose[83] that the hybrid payee deduction/non-inclusion mismatch mentioned in section 259GA(5) arises by reason of each hybrid payee being a hybrid entity.

91.22.5 *Charge to CT*

Section 259GE(7) TIOPA provides:

> An amount of income that is treated as arising under subsection (4) or (5) is chargeable to corporation tax on the hybrid payee (as opposed to being chargeable to tax on any of its members) under Chapter 8 of Part 10 of CTA 2009 (income not otherwise charged) (despite section 979(2) of that Act).

This is the same as the charge on the investor in the hybrid; see 91.21.2 (Charge on investor).

[83] See App.2.24 (Reasonable-to-assume).

Section 259GE(8) TIOPA provides:

> [a] Section 863 of ITTOIA 2005 (treatment of certain limited liability partnerships for income tax purposes) and
> [b] section 1273 of CTA 2009 (treatment of certain limited liability partnerships for corporation tax purposes)[84]
> are disapplied in relation to the hybrid payee to the extent necessary for the purposes of subsection (7).

This switches off the usual LLP deemed partnership/transparency rule. But other transparent entities are not affected.

91.22.6 *Pt 6A chapters priority*

Section 259GE(9) TIOPA provides:

> This section is to be disregarded for the purposes of determining whether the hybrid payee is within the charge to corporation tax for the purposes of any other provision of this Part [Part 6A, hybrids/mismatches], except section 259M (anti-avoidance).

91.23 Hybrids TAAR

Section 259M(1) TIOPA provides:

> This section applies where-
> (a) relevant avoidance arrangements exist,
> (b) as a result of those arrangements, any person (whether party to the arrangements or not) would, apart from this section, obtain a relevant tax advantage, and
> (c) that person is-
> (i) within the charge to corporation tax at the time the person would obtain the relevant tax advantage, or
> (ii) would be within the charge to corporation tax at that time but for the relevant avoidance arrangements.

91.23.1 *Counteraction*

Section 259M TIOPA provides:

> (2) The relevant tax advantage is to be counteracted by making such adjustments to the person's treatment for corporation tax purposes as are just and reasonable.
> (3) Any adjustments required to be made under this section (whether or

[84] See 85.22.2 (LLP treated as partnership).

> not by an officer of Revenue and Customs) may be made by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

This is a counteraction-style TAAR.

91.23.2 *Relevant tax advantage*

Section 259M TIOPA provides:

> (4) A person obtains a "relevant tax advantage" if-
> (a) the person avoids, to any extent, any provision of this Part [Part 6A, hybrids/mismatches], or any equivalent provision of the law of a territory outside the UK, restricting whether or how that person may make a deduction from income for the purposes of calculating taxable profits, or
> (b) the person avoids, to any extent, an amount being treated as income of that person under any provision of this Part [Part 6A, hybrids/mismatches] or any equivalent provision of the law of a territory outside the UK, or
> (c) the person does anything which, to any extent, results in an amount being treated as dual inclusion income of that person under any provision of this Part.

91.23.3 *Relevant avoidance arrangements*

Section 259M(5) TIOPA provides:

> "Relevant avoidance arrangements" means arrangements the main purpose, or one of the main purposes, of which is to enable any person to obtain a relevant tax advantage.

So far this is standard "tax advantage" wording, but s.259M then brings in an avoidance test (already suggested by use of the word "avoids" in the definition of "relevant tax advantage"):

> (6) But arrangements are not "relevant avoidance arrangements" if the obtaining of the relevant tax advantage can reasonably be regarded as consistent with the principles on which the provisions of this Part [Part 6A, hybrids/mismatches], or the equivalent provisions under the law of a territory outside the UK, that are relevant to the arrangements are based (whether express or implied) and the policy objectives of those provisions.
> (7) For the purposes of determining the principles and policy objectives mentioned in subsection (6), regard may, where appropriate, be had to the Final Report on Neutralising the Effects of Hybrid Mismatch

> Arrangements published by the Organisation for Economic Cooperation and Development ("OECD") on 5 October 2015 or any replacement or supplementary publication.[85]

91.24 Minor definitions

91.24.1 *"Tax"*

Section 259B TIOPA provides:

> (1) In this Part [Part 6A, hybrids/mismatches] "tax" means-
> (a) income tax,
> (b) the charge to corporation tax on income,
> (c) diverted profits tax,
> (d) the CFC charge,
> (e) foreign tax, or
> (f) a foreign CFC charge.
> (2) In subsection (1) "foreign tax" means a tax chargeable under the law of a territory outside the UK so far as it-
> (a) is charged on income and corresponds to UK income tax, or
> (b) is charged on income and corresponds to the UK charge to corporation tax on income.
> (3) A tax is outside the scope of subsection (2) if it-
> (a) is chargeable under the law of a province, state or other part of a country, or
> (b) is levied by or on behalf of a municipality or other local body.
> (3A) The payment of any withholding tax in respect of any amount is to be ignored for the purposes of this Part [Part 6A, hybrids/mismatches].

CGT is not within the definition of tax; likewise CT on chargeable gains. So CGT mismatches are not caught.

The INT Manual provides:

> **INTM550520 Meaning of tax** [Dec 2019]
> ... For example, USA Federal taxes on income correspond to the UK taxes, being imposed at national level, and so are regarded as foreign tax within Part 6A. USA State taxes are not foreign tax within Part 6A - they do not correspond to UK taxes on income because they are not imposed at national level and there is another tax in the USA that is.
> Sales or turnover taxes are not foreign taxes that correspond to the UK

[85] Defined in s.259M(8) TIOPA: "In subsection (7) "replacement or supplementary publication" means any document that is approved and published by the OECD in place of, or to update or supplement, the report mentioned in that subsection (or any replacement of, or supplement to, it)."

income tax or charge to corporation tax on income in the UK. Withholding taxes are specifically excluded from Part 6A (259B(3A)).

91.24.2 *“Residence*”

Section 259B(5) TIOPA provides:

> In any case where-
> (a) a person is resident in a territory outside the UK generally for the purposes of the law of the territory or for particular purposes under that law, and
> (b) the law of the territory has no provision for a person to be resident for tax purposes under its law,
>
> any reference in Chapter 8 or 11 to a person’s residence for tax purposes in the territory is to be read as a reference to the person’s residence as mentioned in paragraph (a).

91.24.3 *Equivalent foreign provision*

Section 259BA TIOPA provides:

> (1) A reference in this Part [Part 6A, hybrids/mismatches] to provision under the law of a territory outside the UK that is equivalent to-
> (a) this Part [Part 6A, hybrids/mismatches], or
> (b) a provision of this Part,
>
> is to be read in accordance with subsection (2).
>
> (2) The reference is to provision under the law of a territory outside the UK that it is reasonable to suppose[86]-
> (a) is based on the Final Report on Neutralising the Effects of Hybrid Mismatch Arrangements published by the Organisation for Economic Cooperation and Development (“OECD”) on 5 October 2015 or any replacement or supplementary publication, and
> (b) has effect for the same, or similar, purposes to this Part or (as the case may be) the provision of this Part.
>
> (3) In paragraph (a) of subsection (2) “replacement or supplementary publication” means any document that is approved and published by the OECD in place of, or to update or supplement, the report mentioned in that paragraph (or any replacement of, or supplement to, it).

91.24.4 *“Taxable period”*

Section 259NF ITTOIA provides a commonsense definition:

[86] See App.2.24 (Reasonable-to-assume).

> "taxable period" means—
> (a) in relation to corporation tax, an accounting period,
> (b) in relation to income tax, a tax year,
> (c) in relation to the CFC charge, a relevant corporation tax accounting period (within the meaning given by section 371BC(3)),
> (d) in relation to a foreign CFC charge, a period (by whatever name known) that corresponds to a relevant corporation tax accounting period, and
> (e) in relation to any other tax, a period for which the tax is charged;

91.25 "Control group"

This matters for Chapter 7 Condition E, among other matters.

Section 259NB(1) TIOPA provides:

> A person ("A") is in the same control group as another person ("B")-
> (a) throughout any period for which they are consolidated for accounting purposes,
> (b) on any day on which the participation condition is met in relation to them, or
> (c) on any day on which the 50% investment condition is met in relation to them.

Thus there are three conditions, or sets of conditions, only one of which needs to be satisfied.

91.25.1 *Consolidated for accounting*

Section 259NB(2) TIOPA provides:

> A and B are consolidated for accounting purposes for a period if-
> (a) their financial results for the period are required to be comprised in group accounts,[87]
> (b) their financial results for the period would be required to be comprised in group accounts but for the application of an exemption, or
> (c) their financial results for the period are in fact comprised in group accounts.

[87] Defined in subsection (3): "In subsection (2), "group accounts" means accounts prepared under-
(a) section 399 of the Companies Act 2006, or
(b) any corresponding provision of the law of a territory outside the UK."

91.25.2 *Participation condition*

Section 259NB(4) TIOPA provides:

> The participation condition is met in relation to A and B ("the relevant parties") on a day if, within the period of 6 months beginning with the day-
> (a) one of the relevant parties directly or indirectly participates in the management, control or capital of the other, or
> (b) the same person or persons directly or indirectly participate in the management, control or capital of each of the relevant parties.

This brings in a wide and complex set of tests.[88]

91.25.3 *50% investment condition*

Section 259NB(6) TIOPA provides:

> The 50% investment condition is met in relation to A and B if-
> (a) A has a 50% investment in B, or
> (b) a third person has a 50% investment in each of A and B.

The definition of "50% investment" is in s.259ND TIOPA; see 105.8 (% investment tests).

91.25.4 *Acting together*

Section 259ND TIOPA provides:

> (6) For the purposes of subsections (3) and (4), in determining what percentage investment a person ("P") has in another person ("U"), where P acts together with a third person ("T") in relation to U, P is to be taken to have all of T's rights and interests in relation to U.
> (7) P is to be taken to "act together" with T in relation to U if (and only if) subsection (7A) or (7B) applies.
> (7A) This subsection applies if—
> (a) P and T are party to a partnership agreement that—
> (i) it is reasonable to suppose[89] is designed to affect the value of any of T's rights or interest in relation to U, or

[88] Section 259NB(5) provides a signpost: "For the interpretation of subsection (4), see sections 157(1), 158(4), 159(1) and 160(1) (which have the effect that references in subsection (4) to direct or indirect participation are to be read in accordance with provisions of Chapter 2 of Part 4)." See 105.1 (Participation).

[89] See App.2.24 (Reasonable-to-assume).

(ii) relates to the exercise of any of T's rights in relation to U, or

(b) the same person manages—

(i) some or all of P's rights or interests in relation to U, and

(ii) some or all of T's rights or interests in relation to U.

(7B) This subsection applies if P has a relevant investment in U and—

(a) P and T are connected (within the meaning given by section 163),

(b) for the purposes of influencing the conduct of U's affairs—

(i) P is able to secure that T acts in accordance with P's wishes,

(ii) T can reasonably be expected to act, or typically acts, in accordance with P's wishes,

(iii) T is able to secure that P acts in accordance with T's wishes, or

(iv) P can reasonably be expected to act, or typically acts, in accordance with T's wishes, or

(c) P and T are party to any arrangement that—

(i) it is reasonable to suppose is designed to affect the value of any of T's rights or interests in relation to U, or

(ii) relates to the exercise of any of T's rights in relation to U.

(7C) To determine whether P has a "relevant investment" in U at a particular time, subsections (3) and (4) apply but as if—

(a) for "an X%", in both places, there were substituted "a relevant", and

(b) for "X% or more", in each place, there were substituted "greater than 5%".

(7D) For that purpose—

(a) subsection (6) is to be ignored, and

(b) P's rights and interests are to be aggregated with the rights and interests of persons connected to P (within the meaning given by section 1122 of CTA 2010, ignoring subsection (4) of that section)."

(8) P does not "act together" with T in relation to U under paragraph (b) of subsection (7A) where-

(a) the person who manages the rights or interests of P mentioned in sub-paragraph (i) of that paragraph, does so as the operator of a collective investment scheme,[90]

(b) that person manages the rights or interests of T mentioned in

[90] Defined by reference in subsection (9): "In subsection (8) "collective investment scheme" and "operator" have the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see sections 235 and 237 of that Act)."

> sub-paragraph (ii) of that paragraph as the operator of a different collective investment scheme, and
>
> (c) the Commissioners are satisfied that the management of the schemes is not coordinated for the purpose of influencing the conduct of U's affairs.

91.26 Partnership income

Section 259NE TIOPA provides:

> (1) This section applies where a person is a member of a partnership.[91]
> (2) Any reference in this Part [Part 6A, hybrids/mismatches] to income, profits or an amount of the person includes a reference to the person's share of (as the case may be) income, profits or an amount of the partnership.

That seems self evident, since partnerships are transparent.

> (3) For this purpose "the person's share" of income, profits or an amount is determined by apportioning the income, profits or amount between the partners on a just and reasonable basis.

The INT Manual provides:

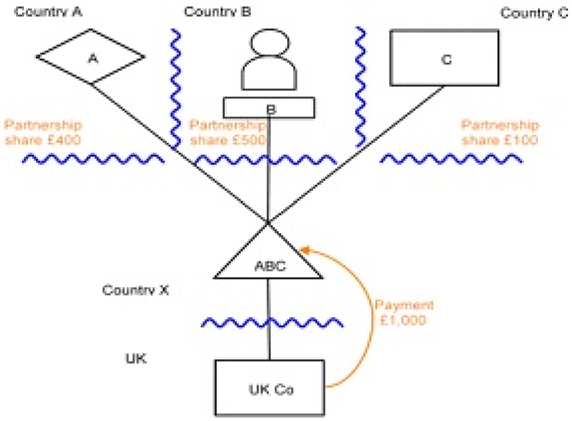
> **INTM550630 Partnership and partnership members** [Dec 2019]
> **Partnerships**
> There is no definition of a partnership for the purposes of Part 6A TIOPA 2010, so the term will take its usual meaning in UK law, that is, the relation between persons carrying on a business in common with a view to profit.
> 259NE considers partnerships and the treatment of a person who is a member of a partnership.
> A partnership is a person for the purposes of the hybrid mismatch rules.
> A partnership is regarded as transparent for UK tax purposes, with the result that the partnership's income, profits etc. are treated as the income, profits etc. of its partners. However, some partnerships may be treated as opaque under the tax laws of other territories, leading to potential hybrid mismatches.
> S259NE(4)(a) includes entities established under the law of a territory

[91] Section 259NE(4) TIOPA provides a foreign entity definition: " In this section-
(a) "partnership" includes an entity established under the law of a territory outside the UK of a similar character to a partnership, and
(b) "member" of a partnership is to be read accordingly."
This is unnecessary but harmless; see 90.3.3 (Foreign-entity clauses).

> outside the UK that are of a similar character to a UK partnership. An entity regarded as transparent is not necessarily of a similar character to a UK partnership and must be considered on the full facts and characteristics. This subsection is intended to ensure that the treatment of non-UK partnerships, for Part 6A purposes, is consistent with the treatment of UK partnerships and not to extend the definition of a partnership...

91.27 HMRC example: LLP

INTM555210 Calculating the mismatch where there are multiple payees [Dec 2019]



Background

- ABC Partnership is established in Country X, which regards it as transparent for tax purposes.
- ABC Partnership holds all the issued share capital in UK Co, which is resident in the UK and liable to tax there. The UK regards ABC Partnership as transparent for tax purposes.
- Trust A, which is established in Country A, is a partner in ABC Partnership. Country A regards ABC Partnership as transparent for tax purposes.
- Trust A is entitled to a 40% share of the profits etc. of ABC Partnership.
- Trust A is a tax exempt entity in Country A, and is not taxed on profits etc. derived from ABC Partnership.
- Individual B, who is resident in Country B, is a partner in ABC Partnership. Country B regards ABC Partnership as transparent for tax purposes.
- Individual B is entitled to a 50% share of the profits etc. of ABC Partnership.
- Individual B is liable to tax in Country B on the profits etc. derived from ABC Partnership.
- C Co, resident in Country C, is a partner in ABC Partnership. Country C regards ABC Partnership as opaque.
- C Co is entitled to a 10% share of the profits etc. of ABC Partnership.
- C Co is liable to tax on its own profits etc. in Country C, but is not liable to tax on

profits etc. derived from ABC Partnership.

- UK Co makes a payment of interest to ABC Partnership in respect of a loan from ABC Partnership.

Dramatis personae: State	**Taxed in home State**	**State view LLP**	**Payee**
LLP: State X	No (as transparent)	Transparent	
UK Co	Yes (subject to CT)	Transparent	Yes
Trust A: State A	No (as tax exempt)	Transparent	No
B: State B	Yes	Transparent	Yes
C Ltd: State C	No (as LLP opaque)	Opaque	No

91.27.1 *LLP: Chap 7 application conditions*

Analysis – Applying the tests in s259GA TIOPA 2010
Does the interest payment satisfy the relevant conditions and fall within the scope of the hybrid payee deduction/non-inclusion mismatch rules?

I think the chapter 7 application conditions are straightforward, apart from condition D.

Condition A: Is a payment made under, or in connection with, an arrangement?
There is a payment of interest by UK Co to ABC Partnership under the loan agreement. The loan agreement is an arrangement.
Condition A is satisfied.

Condition B: Is a payee a hybrid entity?
ABC Partnership is a hybrid entity because Country C regards it as a person for tax purposes, whilst Countries A, B, X and Z treat some or all of its income or profits as belonging to another person/persons for tax purposes.

[Who are Payees]
Trust A is not a payee because
[1] it is not a person to whom a transfer is made,[92] and
[2] as a tax-exempt entity, ordinary income is not brought into account for the purposes of calculating the profits on which a relevant tax is charged.

Company C is not a payee because
[1] it is not a person who whom a transfer is made, and
[2] because Country C regards ABC Partnership as opaque, so ordinary income does not arise on Company C as a result of the payment.

Condition B is satisfied.

Condition C: Is the payer or an investor within the charge to corporation tax for the relevant period, or is the hybrid payee a limited liability partnership?
The charge to corporation tax is the charge to corporation tax in the UK. UK Co, the payer, is liable to corporation tax in the UK.

[92] Author’s footnote: Point [2] is right but is point [1] right and does it matter?

Condition C is satisfied.

91.27.2 *LLP example: Condition D*

Condition D: Is it reasonable to suppose that there is, or will be, a hybrid payee deduction/non-inclusion mismatch in relation to the payment?

It is reasonable to suppose that UK Co will be permitted a deduction of £1,000 from income for the interest payment made (the relevant deduction) for a taxable period.

It is also reasonable to suppose that
- ABC Partnership does not have any ordinary income arising as a result of the payment,
- Individual B will have ordinary income of £500 representing 50% of the payment.
- Neither Trust A nor C Co have ordinary income arising as a result of the payment made by UK Co.

There is a hybrid payee deduction/non-inclusion mismatch under s259GB(1) if
- the relevant deduction exceeds the sum of ordinary income arising to each payee, and
- all or part of the excess arises by reason of one or more payees being hybrid.

In this case, the relevant deduction of £1,000 is matched by ordinary income of £500 arising to a payee (Individual B). The excess is therefore £500, representing the amounts attributable to Trust A and C Co by ABC Partnership.

The next step is to test whether that excess of £500 arises by reason of ABC Partnership being a hybrid entity. Part of the excess, the amount of £100 allocated to C Co, arises by reason of ABC Partnership being a hybrid entity. If Country C viewed ABC Partnership as transparent, then the amount allocated to C Co would be ordinary income of C Co and no mismatch would arise.
The £400 allocated to Trust A, does not arise by reason of ABC Partnership being a hybrid entity as both Country X and Country A view ABC Partnership as transparent. However, the provisions at section 259GB(3) that may apply to treat part of the excess as arising by reason of ABC Partnership being a hybrid entity (to the extent that is not already the case).

Section 259GB(3) treats a relevant amount of the excess to arise by reason of one on the payees being a hybrid entity where -
- a payee is a hybrid entity, and
- that payee is not resident for tax purposes in any territory,
- that payee does not have ordinary income from a permanent establishment in any territory as a consequence of the payment, and
- income arising to that payee is not brought into account in computing profits for a CFC charge.

Applying these tests to the facts given –
- ABC Partnership is a payee
- ABC Partnership is a hybrid entity,
- there is no territory where ABC Partnership is resident for the purposes of a tax charged under the law of that territory,
- there is no territory where ABC Partnership has ordinary income arising from a permanent establishment and

- no income arises to ABC Partnership which is brought into account for the purposes of a CFC charge.

As the conditions for s259GB(3) are met the next step is to establish what the relevant amount of the excess is that needs to be considered. The relevant amount is computed as set out in s259GB(4), as amended by s259GB(4A) in partnership cases.

Section 259GB(4) defines the relevant amount of the excess as the lower of –

- the amount of the excess, and
- an amount equal to the amount of ordinary income that it is reasonable to suppose would arise to the payee if the payee were a company trading in the UK through a UK permanent establishment and the payment was received in connection with that trade.

This amount of ordinary income to be used in this comparison is amended by s259GB(4A) where –

- the payee is a partnership,
- a partner in the partnership is entitled to an amount of the payment, and
- the partnership would not be regarded as a hybrid entity under the laws of the territories where the partnership and the relevant partner are tax resident/established.

If these conditions are met, it is assumed that no ordinary income arises to the payee for the amount of the payment to which the partner is entitled when carrying out the comparison at s259GB(4).

In this example, the conditions under s259GB(4A) are met in relation to Trust A as -

- ABC Partnership is a payee and is a partnership
- Trust A is entitled to £400 of the payment of £1,000 received by ABC Partnership
- ABC Partnership would not be regarded as a hybrid entity if only the laws of Country A and Country X applied.

Consequently, for the purposes of the comparison at s259GB(4) it is assumed that no ordinary income arises to the ABC Partnership to the extent of the amount of £400 to which Trust A is entitled.

The conditions under s259GB(4A) are also met in relation to Individual B as -

- ABC Partnership is the payee and is a partnership
- Individual B is entitled to £500 of the payment of £1,000 received by ABC Partnership
- ABC Partnership would not be regarded as a hybrid entity if only the laws of Country B and Country X applied.

Consequently, for the purposes of the comparison at s259GB(4) it is assumed that no ordinary income arises to the ABC Partnership to the extent of the amount of £500 to which Individual B is entitled.

The conditions under s259GB(4A) are not met in relation to C Co as ABC Partnership is regarded as a hybrid entity if the laws of Country C and the UK are applied.

Returning to comparison under s259GB(4) the relevant amount of the excess is £100, that is, the lower of–

- £500, the excess, and
- £100, the amount of ordinary income that would arise to ABC Partnership in respect of the payment of £1,000, as reduced in respect of Trust A and Individual B under s259GB(4A).

As the relevant amount of the excess is the £100 already identified as a hybrid payee deduction/non-inclusion mismatch under s259GB(1)(b), there is no need to deem a further

amount of the excess as arising by reason of the hybridity of ABC Partnership.
Condition D is satisfied, and the extent of the hybrid payee deduction/non-inclusion mismatch is £100.

Condition E: Are the payer and the hybrid payee or investor in the same control group or is there a structured arrangement?
UK Co (the payer) and ABC Partnership (the hybrid payee) are in the same control group as ABC Partnership owns 100% of the issued shares in UK Co.
UK Co (the payer) and Individual B (an investor in the hybrid payee) are in the same control group as Individual B has a 50% investment in UK Co.
Condition E is satisfied.
There is no indication that this is a structured arrangement.

Conclusion
All the relevant conditions are satisfied to characterise the arrangement as a hybrid payee deduction/non-inclusion mismatch, so the relevant counteractions will need to be considered.

91.27.3 *LLP example: Counteraction*

Counteraction where the UK is the payer jurisdiction
Primary Response
As the UK is the payer jurisdiction, s259GC applies to reduce the deduction available to UK Co by the extent of the hybrid payee deduction/non-inclusion mismatch.
In this instance, UK Co would be denied £100 of the £1,000 deduction.

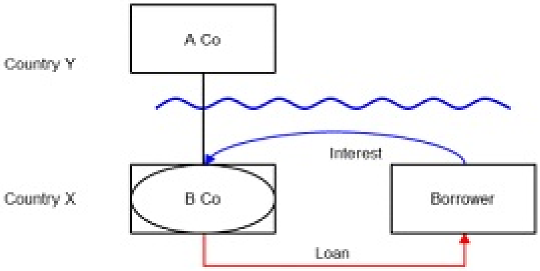
Counteraction where the UK is in the position of Country B (investor jurisdiction)
Secondary Response
If the UK were in the position of Country B, counteraction under s259GD should be considered to the extent that the mismatch is not countered under s259GC (or a non-UK equivalent provision).
In this instance, s259GD cannot apply as Individual B includes their share of the income from the partnership as ordinary income, and in any case an individual is not within the charge to corporation tax.
[If Individual B were a company (B Co), it did not include its 50% share of partnership income in ordinary income and there was no primary response to counter this mismatch, s259GD(4) would apply to treat the hybrid payee deduction/non-inclusion mismatch as income of B Co].

Counteraction where a hybrid payee is a UK Limited Liability Partnership (LLP) (UK is Country X)
Tertiary response
If ABC Partnership were a UK LLP then, to the extent that the hybrid payee deduction/non-inclusion mismatch has not already been fully counteracted under s259GC or s259GD (or non-UK equivalent provisions), s259GE applies.
Under s259GE(4) an amount equal to the hybrid payee deduction/non-inclusion mismatch (that is, £100 of the deduction claimed by UK Co) is treated as income of ABC Partnership arising on the last day of the payment period. This income is brought within the charge to corporation tax on ABC Partnership under Chapter 8 of Part 10 of CTA 2009.

S259GE(8) dis-applies s863 ITTOIA 2005 (treatment of certain limited liability partnerships for income tax purposes) and s1273 CTA 2009 (treatment of certain limited liability partnerships for corporation tax purposes) in relation to ABC Partnership to the extent needed to give effect to the counteraction under s259GD.

91.28 HMRC example: tax-exempt investor

INTM555220: Hybrids: Chapter 7 - Hybrid Payee: Example: investor is a tax-exempt entity [Dec 2019]



Background

Note: A reverse hybrid is any person that is treated as a separate entity by an investor and as transparent under the laws of the establishment jurisdiction. A deductible payment made to a reverse hybrid payee may give rise to a mismatch in tax outcomes, where that payment is not included in the ordinary income in the jurisdiction where the payee is established, or in the jurisdiction of any investor in that payee.

- A Co is a company resident in Country Y
- A Co is exempt from tax under Country Y law
- B Co is an entity incorporated in Country X and is wholly owned by A Co
- Country X treats B Co as transparent for X tax purposes, i.e. it is not a separate taxable person from A Co
- Country Y treats B Co as opaque, i.e. as a separate taxable person from A Co
- Borrower Co is a company resident in Country X, and is not connected to either A Co or B Co
- Borrower Co borrows money from B Co on arm’s length and standard commercial terms (the Loan)
- Country X allows Borrower Co a deduction for interest payments made on the loan
- Country X does not tax the interest receipt by B Co as it regards the income as belonging to A Co.
- Country Y does not tax the interest receipt as it regards the income as belonging to B Co (a company resident in Country X).
- The arrangements have been designed to secure a hybrid mismatch.

Analysis – Applying the tests in s259GA TIOPA 2010

Do the interest payments satisfy the relevant conditions and thus fall within the scope of the hybrid payee deduction/non-inclusion mismatch rules?

Condition A: Are payments made under, or in connection with, an arrangement?

Transactions took place resulting in a transfer of money (the interest payments) directly from Borrower Co (payer) to B Co (payee), which represents a payment.

There was an arrangement (the Loan agreement), and payments were made under that arrangement.

Condition A is therefore satisfied.

Condition B: Is the payee a hybrid entity?

B Co is the payee. Country X regards B Co as transparent for tax purposes, so the income or profits are treated by Country X as those of A Co. Country Y treats B Co as a taxable person separate from A Co, and regards the income as arising to B Co (a company resident in Country X).

B Co has the characteristics of a hybrid entity, and Condition B is met.

When a person (in this instance, B Co) is treated as a separate entity by an investor (A Co) and as transparent under the laws of the establishment jurisdiction (Country X), this is a reverse hybrid.

Condition C: Is the payer or investor within the charge to corporation tax for the relevant period, or is the hybrid payee a limited liability partnership?

The charge to corporation tax is the charge to corporation tax in the UK. In this example condition C will be satisfied if

- the UK is Country X, or
- the UK is Country Y, or
- the hybrid payee is a LLP

If none of these circumstances are satisfied then Condition C is not met, and it is not necessary to consider the remaining conditions.

Condition D: Is it reasonable to suppose that there is, or will be, a hybrid payee deduction/non-inclusion mismatch in relation to the payment?

Given the background above it is reasonable to suppose that if the hybrids legislation, or its foreign equivalent, did not apply

- Borrower Co would deduct an amount from income for the interest paid on the Loan (the relevant deduction), and
- Neither B Co nor A Co would include the interest received from Borrower Co in its ordinary income.

This mismatch arises as a consequence of the contrasting treatment of B Co for tax purposes in Country X and Country Y, so is directly attributable to the fact that B Co is a hybrid entity. If B Co had been recognised as an entity separate from A Co in Country X it is reasonable to suppose that B Co would have included the interest payments in its ordinary income.

Condition D is satisfied.

Condition E: Is the payer also a hybrid payee, are the payer and either the hybrid payee or the investor within the same control group or is there a structured arrangement?

This condition has three possible tests that can be met, so we must examine these in turn. If any of the three are met then this condition is met.

In this example, the payer (Borrower Co) is not a hybrid payee. Condition E is not met by this test.

The hybrid payee, B Co, is not in the same control group as Borrower Co. Condition E is not met by this test.

However, the arrangements were designed to secure the mismatch, so there is a structured arrangement.

Condition E is satisfied.

Amount of the mismatch

If conditions A to E are satisfied, the payment of interest by Borrower Co under the Loan is a hybrid payee deduction/non-inclusion mismatch, and UK counteraction must be considered.

The extent of the mismatch must be calculated by quantifying the excess, which in this example is given by

- the amount of Borrower's deduction from income for the interest paid, less
- the amount of that interest payment included as ordinary income of A Co and B Co.

How much of that amount arises because B Co is a hybrid entity is then considered. In this example, if B Co were not a hybrid entity then either B Co would be recognised by Country X as a separate taxable person or Country Y would recognise it as a transparent entity. In either scenario it would be reasonable to suppose that the amount of ordinary income, equal to the interest received, would be recognised, and that a mismatch would not arise.

The extent of the mismatch arising by reason of B Co being a hybrid entity is therefore the full amount of the interest.

Conclusion

Assuming all the relevant conditions are satisfied to characterise the arrangement as a 'hybrid payee deduction/non-inclusion mismatch', the relevant counteractions will need to be considered.

Counteraction

The counteraction applicable will depend upon whether the UK is in the position of Country X or Country Y or if B Co is an LLP.

Counteraction where the UK is in the position of Country X (payer jurisdiction)

Primary Response

The primary counteraction is against the payer.

If the UK is Country X (the payer jurisdiction) Borrower Co's deduction for interest payments to B Co is restricted (s259GC).

Counteraction where the UK is in the position of Country Y (investor jurisdiction)

Secondary Response

In this example, if the UK is Country Y and it is concluded that Country X has no provisions that apply to counteract the mismatch on the payer, then the UK legislation applies to treat the entire mismatch as income of A Co.

If it is concluded that Country X has provisions that apply but they do not fully counteract the mismatch then the UK provisions apply to treat part of the mismatch as income of A Co, to ensure the hybrid payee deduction/non-inclusion mismatch is fully counteracted.

Counteraction where B Co is an LLP

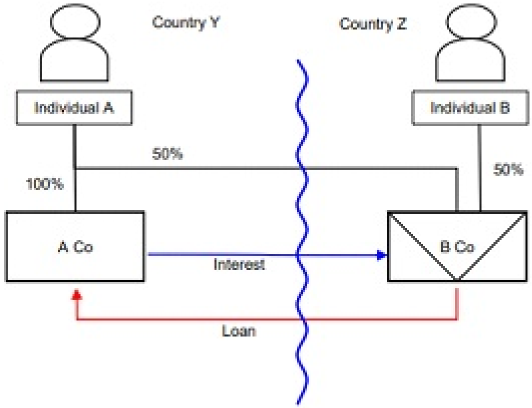
Tertiary Response

In this example the tertiary response (counteraction against a LLP that is a hybrid payee) is unlikely to apply - as both the payer and the hybrid payee are resident in the UK, the primary response applied against the payer takes priority, and will fully counteract the mismatch.

91.29 HMRC example: Reverse hybrid

INTM555230: Example: Payments to hybrid entity (reverse hybrid) partially

excluded [Dec 2019]



Background

- Two individuals, one resident in Country Y (Individual A) and one in Country Z (Individual B) agree to make a loan to A Co.
- Individual A wholly owns A Co.
- Individual A and Individual B each hold 50% of the voting power in B Co.
- B Co is incorporated in Country Z.
- B Co is treated by Country Z as transparent (i.e. its income or profits are treated in Country Z as those of Individual A and Individual B).
- Individuals A & B do not make the loan directly to A Co but make equal contributions of the relevant amount into B Co, which then loans this amount to A Co (the Loan).
- The Loan does not satisfy the conditions required to fall within the ‘hybrids and other mismatches from financial instruments’ rules. This is because the mismatch does not arise from a feature of the instrument but rather because of the presence of a hybrid entity.
- A Co pays interest on the Loan and may claim a deduction for that expense in Country Y.
- B Co attributes half the interest receivable to Individual A and half to Individual B.
- Individual B is subject to tax on his share of the interest receivable at the full marginal rate applicable to interest income in Country Z.
- Individual A does not include the interest receivable in his ordinary income in either Country Z or Country Y. Country Z does not tax foreign source income attributable to a non-resident person. Country Y recognises B Co as a separate person for tax purposes so Individual A is not subject to tax on income from B Co.

Note: In practice the background above may not be easily obtained from the relevant tax return. If standard information requests to the relevant company do not address concerns it may be necessary to consider other powers available, such as 3rd party information notices or potential cross-country information requests (through JITSIC). Your local International Tax Specialist may have further information on how certain entities are characterised for tax purposes under foreign tax regimes.

Analysis – Applying the tests in s259GA TIOPA 2010

Do the interest payments satisfy the relevant conditions and thus fall within the scope of the hybrid payee deduction/non-inclusion mismatch rules?

Condition A: Are payments made under, or in connection with, an arrangement?

Transactions took place resulting in a transfer of money (the interest payments) from A Co. (payer) to B Co (payee), which represents a payment.

There was an arrangement encompassing the contributions to B Co, the Loan agreement with A Co, and the allocation of that interest to Individual A and Individual B.

Condition A is satisfied.

Condition B: Is a payee a hybrid entity?

The payees are B Co (the person receiving the interest payment), and Individual B (who has ordinary income arising as a result of the payment).

Country Y regards B Co as a separate taxable person to Individual A. Country Z regards B Co. as transparent so treats B Co's interest receipts as ordinary income of Individual A and Individual B. .

B Co has the characteristics of a hybrid entity, and Condition B is met. A reverse hybrid is any person that is treated as a separate entity by an investor and as transparent under the laws of the establishment jurisdiction.

Individual B is not a hybrid entity, as he is regarded as a person under the laws of both Country Z and Country Y.

Condition C: Is the payer or an investor within the charge to corporation tax for the relevant period, or is the hybrid payee a limited liability partnership?

The charge to corporation tax is the charge to corporation tax in the UK. In this example condition C can be satisfied if

- the UK is Country Y (the payer jurisdiction), or
- the UK is Country Z and the hybrid payee is a LLP.

If the UK is neither Country Y nor Country Z condition C is not met, and it is not necessary to consider the remaining conditions.

If that is the case, and the mismatch is not countered by another territory, the imported mismatch rules at Chapter 11 should be considered.

Condition D: Is it reasonable to suppose that there is, or will be, a hybrid payee deduction/non-inclusion mismatch in relation to the payment?

It is reasonable to suppose that A Co will be permitted a deduction against its ordinary income for the interest payments made under the Loan (the relevant deduction) for a taxable period.

It is also reasonable to suppose that neither B Co nor Individual A will be charged to tax on the interest receipts attributable to Individual A.

Consequently, this mismatch is attributable to the contrasting treatment of B Co for tax purposes in Country Y and Country Z, and so results from the fact that B Co is a hybrid entity. If either:

- B Co had been recognised as an entity separate from Individual A in Country Z, or
- B Co had not been recognised as an entity separate from Individual A in Country Y

then it is reasonable to suppose that either B Co (in the former situation) or Individual A (in the latter situation) would have included the interest payments in its ordinary income. It therefore arises by reason of B Co (a payee) being a hybrid entity.

Condition D is therefore satisfied.

To the extent that the amounts attributable to Individual B have been subject to tax in Country Z, there will be no hybrid payee deduction/non-inclusion mismatch arising from those payments.

The extent of the hybrid payee deduction/non-inclusion mismatch is equal to the payments attributable to Individual A.

Condition E: Are the payer and the hybrid payee or investor in the same control group or is there a structured arrangement?

A Co (payer) and B Co (reverse hybrid) are all part of the same control group, as defined under s259NB, as Individual A, who holds at least 50% of the voting power both companies.

(Even if Individual A were to hold less than 50% of the voting power in B Co, the facts suggest that the arrangement was designed to secure a hybrid payee deduction/non-inclusion mismatch, and therefore it may qualify as a structured arrangement).

Condition E is met.

Conclusion

As all the relevant conditions are satisfied to characterise the arrangement as a hybrid payee deduction/non-inclusion mismatch, the extent of the mismatch and counteractions need to be considered.

Counteraction

As all of the conditions are met the mismatch should be counteracted under Chapter 7.

Counteraction where the UK is in the position of Country Y (payer and investor jurisdiction)

Primary Response

Where the UK is in the position of Country Y, then A Co will be denied a deduction to the extent of the hybrid payee deduction/non-inclusion mismatch, which in this instance would be the full amount of the hybrid payee deduction/non-inclusion mismatch (being 50% of the payments).

Secondary Response

If the UK is the investor jurisdiction, there is no secondary response under s259GD as Individual A is not within the charge to corporation tax.

Counteraction where a hybrid payee is a UK Limited Liability Partnership (LLP)

Where B Co is an LLP the UK then, to the extent that the hybrid payee deduction/ non-inclusion mismatch has not already been fully counteracted in Country Y, then the remaining amount of the mismatch (i.e. the amount attributable to Individual A) will be treated as income arising to B Co on the last day of the payment period. If no counteraction has been applied, then the counteraction under s259GE TIOPA 2010 will apply to the full amount attributed to Individual A.

This income will be brought within the charge to corporation tax on B Co under Chapter 8 of Part 10 of CTA 2009.

Section 863 ITTOIA 2005 (treatment of certain limited liability partnerships for income tax purposes) and section 1273 of CTA 2009 (treatment of certain limited liability partnerships for corporation tax purposes) may apply to allocate the income of an LLP to its members where that LLP is carrying on a trade, business or (if income tax) profession with a view to profit. For the purposes of these rules, s259GE(8) will dis-apply those sections for the purposes of bringing this income into charge on B Co.

91.30 Interaction with other provisions

Between Pt. 6A Chapters

Section 259A TIOPA provides:

> (19) Each of Chapters 3 to 10 contains provision specifying that some or all of this Part [Part 6A, hybrids/mismatches] (and any corresponding provision under the law of a territory outside the UK) is to be disregarded when determining whether a mismatch arises for the purposes of that Chapter and, if so, in what amount, see-
> (a) section 259CA(4) and (5),
> (b) section 259DA(5),
> (c) section 259EA(5) and (6),
> (d) section 259FA(4), (5) and (6),
> (e) section 259GA(5) and (6),
> (f) section 259HA(6) and (7),
> (g) section 259IA(2) and (3), and
> (h) section 259JA(5).
> (20) The effect of the provisions mentioned in subsection (19) is that Chapters 3 to 10 (or any corresponding provision under the law of a territory outside the UK) have effect in the following sequence-
> (a) Chapter 4,
> (b) Chapter 3,
> (c) Chapter 5,
> (d) Chapter 6,
> (e) Chapter 7,
> (f) Chapter 8,
> (g) Chapter 9, and
> (h) Chapter 10.

Why the non-numerical order?

91.30.1 *Corporate interest restriction*

Section 259NEA TIOPA provides:

> For the purposes of this Part [Part 6A, hybrids/mismatches], the provisions of Part 10 (corporate interest restriction) are to be treated as of no effect.

I do not discuss s.259NEB - 259NEF.

91.30.2 *Interaction with other legislation*

INTM550080: Hybrids: Chapter 1 – Introduction: Interaction with other legislation [Dec 2019]

Counteraction under Part 6A TIOPA 2010 should be considered alongside the UK's other domestic rules. Examples of the type of rules that might be applicable are

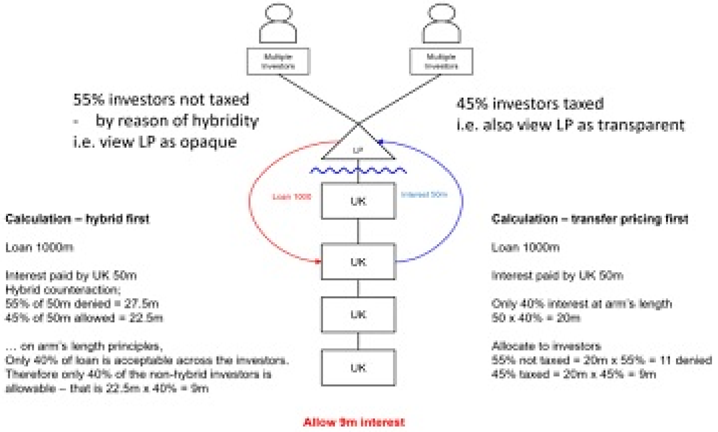
[1] distribution exemption,
[2] transfer pricing
[3] group mismatch legislation [Part 21B CTA 2010] and
[4] unallowable purpose for loan relationships.[93]

We would expect to apply the hybrids mismatch legislation in priority to the corporate interest restriction rules.

Although there is no statutory provision requiring it to be considered in priority, the distribution exemption provisions may also be considered before applying the hybrid mismatch rules – see INTM551170.

The hybrid mismatch rules do not contain a priority order for considering the application of other legislation. This means that customers will need to consider all relevant rules as part of their self-assessment. In general the hybrid rules will need to be considered whenever a mismatch within scope of Part 6A arises, unless the application of other rules removes the mismatch entirely.

Interaction with Transfer Pricing



55% investors not taxed
- by reason of hybridity
i.e. view LP as opaque

45% investors taxed
i.e. also view LP as transparent

Calculation – hybrid first

Loan 1000m

Interest paid by UK 50m
Hybrid counteraction;
55% of 50m denied = 27.5m
45% of 50m allowed = 22.5m

... on arm's length principles,
Only 40% of loan is acceptable across the investors.
Therefore only 40% of the non-hybrid investors is allowable – that is 22.5m x 40% = 9m

Calculation – transfer pricing first

Loan 1000m

Interest paid by UK 50m

Only 40% interest at arm's length
50 x 40% = 20m

Allocate to investors
55% not taxed = 20m x 55% = 11 denied
45% taxed = 20m x 45% = 9m

Allow 9m interest

For example, a customer may need to consider both transfer pricing and Part 6A in relation to a deduction arising in connection with a hybrid financial instrument. If a transfer pricing adjustment reduced the

[93] See 3.19.6 (Loan relationship TAAR guidance).

allowable deduction to the point where there was no mismatch in connection with the hybrid financial instrument, then Part 6A would not apply. If there were still a mismatch after the transfer pricing adjustment was made, Part 6A would apply to the extent of the remaining mismatch. A similar result would be expected if Part 6A were considered in priority to transfer pricing. If the deduction after adjusting for the mismatch under Part 6A were still in excess of the arm's length price, then the transfer pricing rules would apply to further reduce the deduction to the arm's length price.

In the same circumstances, the transfer pricing and Part 6A rules may have to be applied to different amounts within the same deduction, where the deduction includes a number of payments/quasi-payments in connection with more than one financial instrument.

92.19 Tax return: Protected income/gain

92.1 Protected-trust regime

This chapter contains:
(1) An outline of the protected-trust regime
(2) The definitions of "protected foreign-source income"
(3) Protected-trust reliefs

The general scheme is that:
(1) UK resident foreign domiciliaries qualify for the remittance basis on their own income/gains until they become deemed domiciled.
(2) Trusts made by foreign domiciliaries have a protected status, both before and after the settlor becomes deemed domiciled.[1] In short:
    (a) Trust income/gains are not taxed on the usual settlor-interested trust rules (s.624, s.720, s.86)
    (b) The income/gains are taxed on distribution/receipt of benefits:
        (a) on general principles; or
        (b) under special provisions which only apply to protected trusts

It is helpful to coin some terminology, and in this book:
– I refer to these rules as the **"protected-trust regime"**
– A trust within the regime is a **"protected trust"**

There are four parts to the regime:
(1) **Protected-trust reliefs**, which prevent charges on the settlor under s.86, 624, 720, and associated provisions
(2) **Close-family/settlor charges** which apply to benefits from protected trusts to close-family/settlors
(3) **Settlor-attribution rules** which attribute income/gains of close-family to the settlor
(4) **Onward-gift rules**

It is best to consider these as separate topics. However the rules interact, and the resulting picture is a complex one.

The protected-trust reliefs are as follows:

Charge	**Relief**	**Tax**	**Topic**
s.86 TCGA	para 5A sch 5 TCGA	CGT	Settlor-interested trust
s.624 ITTOIA	s.628A ITTOIA	IT	Settlor-interested trust

[1] Protected-trust relief does not apply to formerly-domiciled residents. References in this chapter to deemed domicile are references to deemed domicile under the 15-year rule only.

s.629 ITTOIA	s.630A ITTOIA	IT	Payment to child of settlor
s.633 ITTOIA	s.635(2) ITTOIA	IT	Capital payment to settlor
s.720 ITA	s.721(3B) rule 2	IT	ToA transferor charge
s.727 ITA	s.728(1A) rule 2	IT	ToA capital sum charge

I refer to all these as reliefs, though in some cases they are expressed in the form of a relief (eg “The rule in s.624 does not apply...”) and in other cases the rule slots in the relevant provisions and is not expressed in the style of a relief.[2] It comes to the same thing.

The close-family/settlor charges are:

Section	**Name of charge**	**See para**
s.643A(1) ITTOIA	s.643A close-family benefit charge	47.19
s.731(1A)/s.732(1)(d) ITA	s.731 extended to transferor	50.16

These charges are not closely aligned, because there was already a ToA charge on benefits, s.731; but the scope of the s.731 charge has been extended to include transferors and some benefits to non-resident beneficiaries.

There is no CGT equivalent because there was already a charge on benefits, which included benefits conferred on the settlor.

The settlor-attribution rules are:

Section	**Name (my terminology)**	**See para**
s.87G, 87H TCGA	s.87 settlor-attribution rule	61.29
s.643A(3)(4), E, ITTOIA	s.643A settlor-attribution rule	47.28
s.733A, 735B ITA	s.731 settlor-attribution rule	50.48

The onward gift rules are:

Section	**Name (my terminology)**	**See para**
s.87 I - M TCGA	s.87 onward gift rule	61.30
s.643 I - N ITTOIA	s.643A onward gift rule	47.31
s.733B - E ITA	s.731 onward gift rule	50.52

92.1.1 *Protected-trust guidance*

Guidance (my terminology)	**Date**	**ICAEW ref**	**Issued by**
HMRC protected-trust guidance[3]	2018	-	HMRC

[2] Eg s.720 relief is in s.721(3B) rule 2; s.633 relief slots in the definition of “available income”, see 47.14.1 (“Available income”).

[3] *https://www.gov.uk/government/publications/trust-protections-and-capital-gains-tax-changes*

Protected-trust Q&As[4]	2018	Taxguide 07/18	Professional bodies
Protected-trust Note[5]	2020	Taxguide 02/21	Professional bodies

HMRC protected-trust guidance was lengthy but rudimentary.

The Protected-trust Q&As asked 18 pages of questions, with suggested answers. It would have been interesting to see the answers, but HMRC did not provide them. Perhaps it was filed as too difficult.

In 2020, as it was clear that HMRC were not going to answer the Protected-trust Q&As, the professional bodies issued the Protected-trust Note. This (broadly) restates views expressed as suggested answers in the 2018 Q&As, but some material in the 2018 Q&As was not restated in the Protected-trust Note, or the matter is dealt with differently, so the 2018 [6]

Background can be found in a series of papers listed at 5.1 (Deemed domicile: Introduction), but that is now of historical interest only.[7]

92.2 Protected trusts: Policy

In the absence of protected-trust reliefs of some kind, wealthy foreign

[4] The full title is "Deemed domicile changes – trust protections" (2018). See: *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2018/taxguide-0718-deemed-domicile-changes--trust-protections.ashx*
This document is not to be confused with (what I call) the Protected-trust Note (2020), which has the same title (see the next footnote).

[5] The full title is "Deemed Domicile Changes - Trust Protections - Notes on practical points and areas of uncertainty" (2020). See:
https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/764d01e8-989d-404c-aa90-af0168a87dd2/DeemedChanges.pdf or
https://www.step.org/sites/default/files/2020-12/deemed_domicile_changes_trust_protections_note_041220.pdf
This document is not to be confused with (what I call) Protected-trust Q&As, which has the same title (see the previous footnote). Needless to say, the Note contains the usual disclaimers.

[6] To make life more difficult, there are also changes in the order of questions and headings. For assistance on navigation around the two sets of guidance, a comparative index is available in the TFD Resource Archive
https://foreigndomiciliaries.co.uk/index.php/Documents_archive

[7] Draft provisions were published in December 2016. They were intended for the FA 2017, but dropped because they were not ready in time: HMRC, "Guidance - Non-domicile taxation: technical briefing on overseas trusts" (March 2017)
https://www.gov.uk/government/publications/non-domicile-taxation-technical-briefing-on-overseas-trusts/non-domicile-taxation-technical-briefing-on-overseas-trusts
But the drafts of December 2016 and September 2017, like the background papers, are now of historical interest only.

domiciliaries would have a strong incentive to leave the UK, before becoming deemed domiciled under the 15-year rule, at which point all their income/gains (including income/gains of settlor-interested trusts) would become taxable on an arising basis. The regime represents a new solution to an old problem, namely, how much can HMRC squeeze out of the UK's foreign domiciled long-term residents, before they leave? or more precisely, before the loss due to leavers exceed the gain from those who stay. The 2017 regime aims to collect more from those who chose to stay, but does not charge tax so far as income/gains accumulate in non-resident trusts.

On the Conservatives' view:

> It is vital that these changes [deemed domicile for IT/CGT] are not introduced in a way that would drive non-doms out of the UK altogether.[8]

Of course the current rules are not satisfactory to those who believe there should be no distinction between deemed domiciliaries and UK domiciliaries:

> The changes in the [F(no.2)A 2017] are superficial ... and designed to give the impression that the Government are seriously clamping down on tax avoidance. Why else would an exemption be built into the measures for offshore trusts? ... those are things that the architect of the measures would do if they were of a mind to completely undermine the measures' effectiveness...
> What we want is genuinely not unrealistic or far removed from the observations of most members of the public, which is, in short, the removal of the exemption for offshore trusts...[9]

Some settlors will be better off under the protected-trust regime, as they do not have to pay the remittance basis charge in order to qualify for protected-trust reliefs. By and large, tax liabilities will increase. So it is dispiriting to read the Labour claim (the relief will "completely undermine

[8] Mel Stride (Paymaster General) Hansard, 19 Oct 2017 *https://hansard.parliament.uk/commons/2017-10-19/debates/f87da5ea-33a7-4a01-b497-1f3aaa15830e/FinanceBill(FourthSitting)*

[9] Peter Dowd (Labour Shadow Chief Secretary to the Treasury) Hansard, 19 Oct 2017 *https://hansard.parliament.uk/commons/2017-10-19/debates/f87da5ea-33a7-4a01-b497-1f3aaa15830e/FinanceBill(FourthSitting)*

the measures' effectiveness"[10]) and the Government's counter-claim:

> The changes ... will bring an end to permanent non-domicile tax status. When people live in the UK permanently, it is right that they should pay the same tax as everyone else.[11]

Were the speakers ill-informed, exaggerating, misleading or dishonest? Discuss.

The rules were introduced in 2017 and 2018. The changes went far beyond what was necessary to accommodate the 2017 deemed domicile rules: HMRC took the opportunity for a wide-ranging reform of offshore trust taxation.[12]

92.3 s.86 protected-trust relief

The s.86 charge does not apply to a foreign domiciled settlor.[13] The following is therefore relevant to a deemed-domiciled settlor.

Para 5A(1) sch 5 TCGA provides:

> Section 86 does not apply in relation to a year ("the particular year") if Conditions A to D are met.

I refer to these as **"s.86 protected-trust conditions".**

92.3.1 *Condition A: 2017/18 or later*

Para 5A(2) sch 5 TCGA provides:

> Condition A is that the particular year is—
> (a) the tax year 2017-18, or
> (b) a later tax year.

This is just a commencement provision and (read with para 5A(1)) it is also a roundabout way of defining "particular year".

[10] Peter Dowd (Shadow Chief Secretary to the Treasury) Hansard, 19 Oct 2017 *https://hansard.parliament.uk/commons/2017-10-19/debates/aea0b4b1-dc6c-4153-a24f-09fb6be7d155/FinanceBill(FourthSitting)*

[11] Mel Stride (Paymaster General) Hansard, 19 Oct 2017 *https://hansard.parliament.uk/commons/2017-10-19/debates/f87da5ea-33a7-4a01-b497-1f3aaa15830e/FinanceBill(FourthSitting)*
The wording (coincidentally?) echoes that of Miliband speaking for Labour, two years previously; see 1.5.2 (Are non-dom reliefs fair).

[12] See too 1.10.5 (2017 enactment process).

[13] See 60.10 (Settlor residence/domicile conditions).

92.3.2 *Conditions B/C: Non-dom settlor*

Para 5A(3) sch 5 TCGA provides:

> Condition B is that when the settlement is created the settlor—
> (a) is not [actually] domiciled in the UK, and
> (b) if the settlement is created on or after 6 April 2017, is not deemed domiciled in the UK.
>
> (4) Condition C is that there is no time in the particular year when the settlor is—
> (a) [actually] domiciled in the UK, or
> (b) deemed domiciled in the UK by virtue of Condition A in section 835BA of ITA 2007 [formerly-domiciled resident[14]].

That is:

(1) s.86 protected-trust relief ceases to apply to those who become actually UK domiciled

(2) The relief does not apply to formerly-domiciled residents

92.4 Condition D: Tainting

The next condition concerns adding to the trust. Para 5A(5) sch 5 TCGA provides:

> Condition D is that
> [A] no property or income is provided directly or indirectly for the purposes of the settlement
> [B] by
> [i] the settlor, or
> [ii] the trustees of any other settlement of which the settlor is a beneficiary or settlor,
> [C] at a time in the relevant period[15] when the settlor is—
> (a) [actually] domiciled in the UK, or
> (b) deemed domiciled[16] in the UK.

[14] See 5.4.2 (IT/CGT formerly-dom resident rule).

[15] Defined para 5A(6): "In sub-paragraph (5) "relevant period" means the period—
(a) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
(b) ending with the end of the particular year."
Tainting during the year removes protected status for the entire year. Split year rules do not apply.

[16] Para 5A(9) provides the expected definition: "In this paragraph "deemed domiciled" means regarded for the purposes of section 86(1)(c) as domiciled in the UK as a result

The wording is based on 1998/1991 transitional reliefs for s.86.[17] SP 5/92 gave extensive guidance on the 1991 s.86 transitional relief. I discuss this material here, as this is the context in which it now arises. There are some differences of wording between the 1991 transitional relief and 2017 protected-trust relief; but most of the guidance is still applicable.

Condition D applies if property is provided by:

(1) the settlor, or
(2) a settlor-connected trust (trust where the settlor is a beneficiary or settlor)

I refer to a person who is not within (1) or (2) as a **"third party"**.

What if property is provided to a trust by a third party? That does not affect protected trust-relief. (Though the third party may be taxed as joint settlor on gains attributable to the addition). In this respect the 2017 tainting rule is more sensible than the 1998/1991 transitional reliefs for s.86.

92.4.1 *Inter-trust tainting*

The condition is (in short) that:

> [A] no property or income is provided directly or indirectly for the purposes of the settlement by ... the trustees of any other settlement of which the settlor is a beneficiary or settlor

I refer to this as **"inter-trust tainting"** and use the following terms:

Term	**Meaning**
Transferor trust	Trust providing property
Transferee trust	Trust to which property is provided (which may be tainted)
Settlor-connected trust	Settlor of transferee is settlor/beneficiary of transferor trust

I would have said that the trustees of the transferor trust do not "provide" property, as they are only fiduciaries. But the context shows that for tainting purposes, it is possible for one trust to provide property to another. Providing property includes gratuitous transfer and transactions at an undervalue.

Suppose property is provided to a protected trust by another *protected* trust. If the provision is construed literally, the transferee trust may

of section 835BA of ITA 2007 having effect."

[17] See 60.6.1 (Trigger 1: Providing property); 99.6 (Tainting).

become tainted and lose protected status. There is no good reason to penalise inter-trust transfers of this kind, and it could be argued that on a purposive construction this is not caught. Perhaps this issue does not often arise.

92.4.2 *Meaning of "Beneficiary"*

"Beneficiary" matters because the inter-trust tainting rule applies if the settlor of the transferee trust is a beneficiary of the transferor trust. The word is not defined. Para 3 Protected-trust Note provides:

> Most settlements contain a wide power of addition so virtually any settlement from which the settlor is not specifically excluded enable the settlor to be added as a beneficiary even if that person is not currently a beneficiary. But, unless and until someone is added, they are not in fact a beneficiary, and the trustees do not need to consider whether to confer any benefits on them.
> It is therefore considered that a 'beneficiary' in this context means someone who is currently a beneficiary of the settlement. Until a person is added as a member of the class of beneficiaries that person is not a beneficiary.

This is correct if it is true as a matter of trust law to say that "unless and until someone is added, they are not in fact a beneficiary, and the trustees do not need to consider whether to confer any benefits on them." But if English trust law principles apply, is that really so?[18] It would not be wise to rely on this view.

92.4.3 *Adding value*

Para 5A(7) sch 5 TCGA provides:

> For the purposes of Condition D, the addition of value to property comprised in the settlement is to be treated as the direct provision of property for the purposes of the settlement.

I refer to this as the **"adding-value rule"**. Anyone who provides property (and so is a settlor) has also added value. But perhaps it is possible to add value without providing property. Examples are perhaps:

(1) Failure to exercise a right of reimbursement[19]

[18] See 78.6.1 (Gift to settlor-interested trust).

[19] See 101.5.1 (Settlor/tainting issues).

(2) Providing services to a trust, or an underlying company, at less than market remuneration[20]

(3) A person who provides property which ceases to be comprised in a settlement ceases to be a settlor, under the IT/CGT definition,[21] but may be caught by the adding-value rule.

Whether these were actually the purpose of the adding-value rule is speculation; more likely, I think, the drafter had some inchoate concern that the traditional wording ("providing property") might possibly leave a gap which an adding-value rule might possibly fill.

Para 1 Protected-trust Note provides:

> The words 'provided …for the purposes of the settlement' connote an intention on the part of the provider to confer some bounty on the settlement or its beneficiaries...[22] Under the tainting rules an addition of value to the property comprised in the settlement is deemed to be a provision without regard to intention, but the basic requirement that bounty be intended is preserved by the rule requiring the provision of property or income to be ignored if there is no intention to confer gratuitous benefit [in my terminology, disregard (b)].

I would have thought that adding value, like providing property, required or implied some mental element. However that may be, it was clearly not the purpose of the adding-value rule to remove the "bounty" requirement, because disregard (b) restores or restates it.[23]

The general question of what amounts to tainting is discussed in 99.6 (Tainting), but this chapter deals with the statutory provisions specifically applicable to protected trusts.

92.5 The 7 disregards

Para 5B sch 5 TCGA provides:

> (1) This paragraph applies for the purposes of Condition D in paragraph 5A.
> (2) Ignore—

A set of 7 items then follow, which I call "**disregards (a) - (g)**". Some of

[20] See 99.25 (Provision of services).
[21] See 99.2.12 (Ceasing to be settlor).
[22] See 99.2.6 (Providing property: bounty).
[23] See 92.5.1 (Gratuitous intent: Disregards (a)(b)).

these derive from 1998/1991 transitional reliefs for s.86, in sch 5 TCGA:[24]

Disregard: Topic	**1998 relief: sch 5**	**1991 relief: sch 5**	**See**
(a): Arm's length transaction	Para 2A(2)(a)	Para 9(3)(a)	92.5.1
(b): Gratuitous intent	-	-	92.5.1
(c)-(e): Loans	-	-	92.7
(f): Pre-2017 liability	Para 2A(2)(b)	Para 9(3)(b)	92.5.2
(g): Expenses	Para 2A(3)	Para 9(3) proviso	92.5.3

The 1998/1991 transitional reliefs are not now important, but guidance in SP 5/92 on the 1991 relief is relevant to protected trusts, so references to para 9(3) sch 5 TCGA are still common. It would be helpful if SP 5/92 could be reissued to refer expressly to the current protected-trust code; but that does not seem likely to happen: *Autres temps, autres mœurs*.

92.5.1 *Gratuitous intent: Disregards (a)(b)*

The first two disregards are conveniently read side by side:

Disregard (a): arm's length transaction	**Disregard (b): gratuitous intent**
property or income provided under a transaction, other than a loan,	property or income provided, otherwise than under a loan,
where the transaction is entered into on arm's length terms,	without any intention by the person providing it to confer a gratuitous benefit on any person

Disregard (a) seems otiose because a case within disregard (a) must fall within disregard (b).[25]

Disregard (b) is otiose because "providing property" requires an element of bounty (gratuitous intent), but it might be needed (if only for the avoidance of doubt) to restrict the adding-value rule.

However that may be, these two disregards do no harm.

A transaction between connected persons is treated for CGT as "otherwise than by way of a *bargain* made at arm's length".[26] But apparently it may still be a *"transaction* entered into on arm's length terms" for the purpose of disregard (a). SP 5/92 provides:

> 12. ... This [disregard (a)] applies irrespective of whether the parties to

[24] See 60.6.1 (Trigger 1: provide property); 60.8.2 (Trigger 1: Providing property).

[25] See App.4.10 (Arm's length).

[26] See App.4.10.9 (Deemed non-arm's length).

> the transaction are connected persons under TCGA 1992 s 286.[27]

That leads to the sensible result that the protected-trust rules are the same for IT and CGT, even though IT does not have the CGT connected person rule.[28] But if it is right to say that disregard (a) is otiose, then this is not important.

For the purposes of disregards (a) and (b), there is no difference between a transaction with the trustees and a transaction with a company held by the trust.

HMRC protected-trust guidance provides:

> 5.5 ... Where the valuation of benefit rules in section 6 apply and the reimbursement to the trustees is at the level of the benefit that would otherwise arise, this will not be regarded as tainting the trust. An exception would be where acquisition costs have been intentionally inflated over the current value of the property.
>
> For example, the settlor has the use of an asset which the new benefit valuation rules require her to pay £15,750 per annum so as not to have a benefit. And on the other hand the commercial rental value of said asset is £14,000. This would prima facie constitute tainting. HMRC however will not enforce the law in this scenario if the settlor pays the £15,750. However, if there is evidence that trustees are themselves renting assets from a third party for £14,000 so they can rent them to the settlor for £15,750 so as to add property to the trust, HMRC will treat this as a tainting event.

92.5.2 *Pre-2017 liability: Disregard (f)*

Para 5B sch 5 TCGA provides:

> (2) Ignore ...
>
> (f) property or income provided in pursuance of a liability incurred by any person before 6 April 2017

This relief may be overridden by the tainting-loan rules.

Para 1 Protected-trust Note provides:

> If property is transferred to the trust in pursuance of a liability incurred before an individual becomes deemed domiciled, it is not considered

[27] See too 61.7.8 (Arm's length relief).

[28] An alternative argument would be to say that context shows that the deeming in s.17 TCGA does not apply in the context of tainting. That is another route to the same destination .

tainting occurs as the provision is made when the obligation to provide the property is incurred. The disregard in TCGA 1992 Schedule 5 paragraph 5B(2)(f) and the equivalent income tax provisions might indicate that property is provided when it is transferred to the trust not when the liability is incurred. It is however considered that the specific disregard in Schedule 5 paragraph 5B(2)(f) is for the avoidance of doubt. But the liability must be legally binding prior to the settlor becoming deemed domiciled even if it is conditional on certain events occurring.

92.5.3 *Expenses: Disregard (g)*

Para 5B sch 5 TCGA provides:

> (2) Ignore ...
> (g) where the settlement's expenses relating to taxation and administration for a tax year exceed its income for that year, property or income provided towards meeting that excess if the value of any such property and income is not greater than the amount of—
> (i) the excess, or
> (ii) if greater, the amount by which such expenses exceed the amount of such expenses which may be paid out of the settlement's income.

SP 5/92 provides:

> 26 The following items are not regarded as "expenses relating to administration" within the terms of the proviso ...—
> – loan interest (other than interest on a loan taken out to meet expenses of administration within the terms of the proviso);
> – the costs of acquiring, enhancing or disposing of an asset;
> – expenses incurred in connection with a particular trust asset to the extent that such expenditure can be set against income arising from that asset. For the purpose of the proviso ... , the measure of the gross income from such a source is net of expenses.
>
> 27 The term "expenses relating to… taxation" ... is regarded as encompassing UK or foreign taxes to which the trustees are liable, along with any interest and penalties due on that tax. It could also include certain costs incurred by the trustees under the terms of the trust in obtaining information regarding the beneficiaries' tax liabilities. One example might be where the trustees, in order to ensure they were acting in a beneficiary's best interests, had to ascertain the tax implications for the beneficiary in adopting a particular course of action.

> 28 It is only the settlement's expenses relating to administration or taxation which are within the terms of the proviso ... Expenses of, for example, a company wholly owned by the trustees fall outside its scope....
>
> 30 Normally the specific date on which the liability to an expense relating to administration or taxation was incurred determines the year into which it falls for the purpose of applying the proviso ... Where, however, the expense is incurred for a period rather than on a specific date, the basis of allocating expenses adopted by the trustees in preparing trust accounts or returns is, generally, regarded as acceptable provided that this basis is consistently adopted and is in accordance with conventional trust accounting practice.
>
> 31 Additions to meet the difference between expenses relating to administration and taxation and any income arising to the trust do not have to be made by 5 April in the relevant year of assessment. There must, however, be a clear connection between the amount added and the computed shortfall. Additions should, therefore, be made as soon as the relevant figures are available.
>
> 32 Income, for the purposes of the proviso ... is the total income which arises to the trustees in the relevant year, rather than the income which is (or would be if the trust were resident in the UK) subject to UK tax. Usually, items of income will need to be allocated to the year in which they arise for the purposes of the proviso, but, in practice, income arising from a trade carried on by the trustees may be apportioned on a time basis, provided that this basis is consistently followed.

92.6 Sale for instalments of capital

An individual might consider selling an asset to a trust for a series of instalments of capital.

In order for the payments received by the seller to constitute capital and not income, the payments should be fixed and should continue to fall due notwithstanding the death of the seller.

The total value of the instalments would, of course, be greater than the current market value, to compensate the seller for delay in payment. In calculating the price for the asset, the parties and their advisers would take into account interest rates for the relevant period. It is important, however, that the documentation is in terms of instalments of capital. Otherwise, each payment may consist of partly capital and partly interest.[29]

[29] See *IRC v Church Commissioners* 50 TC 516.

If the instalments are due over a very long period, part of the payment may constitute interest even if it is described as capital in the documentation.[30] If instalments are index-linked, the indexation should not be interest; but this is contentious.[31]

In the case of a sale for instalments of capital the consideration is deemed to be the total amount receivable without a discount for postponement of the right to receive it.[32] This rule could throw up an artificial capital gain. Fortunately, if the sale is to a connected person, the transaction would be deemed to be for market value of the asset and not the total amount of the capital payments.[33]

92.7 Payments under loans

92.7.1 *Loan payments: Introduction*

Loans typically involve three types of payments:

(1) Money ("principal") lent from lender to borrower
(2) Interest paid from borrower to lender
(3) Money ("principal") repaid from borrower to lender

Each of these payments may constitute providing property. If this property is provided from the settlor (or a settlor-connected trust) to a protected trust, the protected trust may be tainted. Of course, tainting difficulty only arises if the property is provided (1) to a protected trust (2) by the settlor or a settlor-connected trust. In summary:

Type of payment	**Payor**	**Payee**	**Matters only if**:	
			Borrower	*Lender*
Payment of principal	Lender	Borrower	Protected trust	Settlor/con^{d} trust
Payment of interest	Borrower	Lender	Settlor/con^{d} trust	Protect^{d} trust
Repayment of principal	Borrower	Lender	Settlor/con^{d} trust	Protect^{d} trust

These rules concern loans to or from a trust where the parties to the loan (whether as lender or borrower) are:

(1) the trust and
(2) the settlor or a settlor-connected trust (a trust of which the settlor is beneficiary/settlor)

[30] See 26.2.5 (Sum indivisible or dissected?)

[31] See 26.4 (Premium).

[32] Section 48 TCGA. HMRC have some discretion to allow payment of tax by instalments.

[33] See App.4.8 (CGT market value rule).

The tainting rules do not apply to a loan made by or to a third party.

Para 5B sch 5 TCGA provides that one should ignore:

> (a) property or income provided under a transaction, other than a loan, where the transaction is entered into on arm's length terms,
>
> (b) property or income provided, otherwise than under a loan, without any intention by the person providing it to confer a gratuitous benefit on any person

So disregards (a) and (b) do not apply to loans.

Para 5B has 3 express disregards of payments relating to certain loans if the Arm's Length condition is met. In summary:

Loan	**Disregard**	**Para 5B(2)**	**See para**
to trust	Lender paying principal to trust borrower	(c)	92.7.3
from trust	Borrower paying interest to trust lender	(d)	92.7.4
from trust	Borrower repaying principal to trust lender	(e)	92.7.5

Para 5B identifies 2 circumstances in relation to loan to a trust where property is deemed to be provided (so the trust may become tainted):

Loan	**Deemed provision**	**Provision**	**See para**
to trust	Non-payment of interest/variation	5B(3)(4)	92.7.3
to trust	Pre-deemed-dom loan left outstanding	5B(5)-(7)	92.7.8; 92.7.13

"Loan" is not defined, so in all these provisions it bears its strict meaning: loan of money.[34]

92.7.2 *Arm's-Length & other loans*

Para 5B(8) sch 5 TCGA provides two definitions of the expression "Arm's Length Loan". It is convenient to read these side by side:

> For the purposes of this paragraph a loan is on "arm's length terms"—

(a) in the case of a loan made to the trustees of a settlement,	(b) in the case of a loan made by the trustees of a settlement,
only if interest at the official rate[35]	only if any interest payable under

[34] See App.2.5 (Loan).

[35] Defined by reference in para 5B(9):

> "official rate", in relation to interest, means the rate of interest applicable from time to time under section 178 of the Finance Act 1989 for the purposes of Chapter 7 of Part 3 of ITEPA 2003.

See 40.5 (Official rate of interest).

or more is payable at least annually under the loan;	the loan is payable at no more than the official rate

This is not the normal meaning of "arm's length terms": it is an artificial definition. I write it with initial capitals, to reflect the technical nature of the expression, some may prefer scare quotation marks. In this section **"Arm's-Length Loan"** is a loan on "Arm's Length Terms".

The definition does have the advantage that it is easy to see whether a loan is on Arm's Length Terms, as it is not necessary to consider what would be market rates.

What if a loan is made to trustees of one trust (the borrower) by the trustees of another trust (the lender)? The loan is within para (a) *and* para (b) but these offer different definitions! The context shows that:

(a) In considering the application of the rules to the borrower-trust (whether the borrower-trust is tainted by the payment of the principal to the borrower) one applies definition (a).

(b) In considering the application of the rules to the lender-trust (whether the lender-trust is tainted by the payment of interest to the lender) one applies definition (b).

Tax normally distinguishes between loans with:

(1) commercial terms

(2) beneficial terms (beneficial to borrower, eg interest-free)

(3) onerous terms (onerous to borrower, eg above market interest; in practice this is rare)

A commercial loan confers no benefit (or at least no valuable benefit) on anyone. A beneficial loan (eg interest free) benefits the borrower. An onerous loan (eg high interest) benefits the lender.

In the present context there are potentially six types of loan:

(1) "Arm's-Length Loan" which may be on:
   (a) commercial terms
   (b) beneficial terms
   (c) onerous terms

In practice, perhaps, "Arm's Length Terms" will generally amount to commercial terms.

(2) "Non-Arm's-Length Loan" which may be on:
   (a) commercial terms
   (b) beneficial terms

(c) onerous terms

92.7.3 *Loan **to** trust: Disregard (c): Principal*

Para 5B sch 5 TCGA provides:

> (2) Ignore ...
> (c) the principal of a loan which is made to the trustees of the settlement on arm's length terms

Para 5B(3) sch 5 TCGA provides for a deemed provision of property (which may cause a trust to become tainted):

> Where—
> (a) a loan is made to the trustees of the settlement by
> [i] the settlor or
> [ii] the trustees of a settlement connected with the settlor, and
> (b) the loan is on arm's length terms, but
> (c) a relevant event occurs,
> the principal of the loan is to be regarded as having been provided to the trustees at the time of that event (despite sub-paragraph (2)[36]).

There are 3 types of relevant event. Para 5B(4) sch 5 TCGA provides:

> In sub-paragraph (3) "relevant event" means—
> (a) capitalisation of interest payable under the loan,
> (b) any other failure to pay interest in accordance with the terms of the loan,

HMRC protected-trust guidance provides:

> HMRC will not seek to apply the tainting provisions for a minor failure to pay interest on time i.e. as per the first example below where the payment was ten days late.

The guidance gives 3 examples:

> *Example* (Maria)
> M remains in the UK, and the facts are the same as those in paragraph 5.3.[37] In May 2021 the trustees pay the quarterly interest due on the loan ten days late, due to an administrative oversight. This would not

[36] Subpara (2) contains the 7 disregards, so the tainting-loan rules override the usual disregard for pre-2017 liabilities.

[37] I think this is a reference to the example in para 5.5 of the guidance, which is set out in 92.7.9 (Change in official rate).

> be regarded as a failure to pay interest in accordance with the terms of the loan. The settlement would not be tainted and the foreign-source income would remain protected.
>
> *Example*
>
> M remains in the UK, and the facts are the same as those in paragraph 5.3. From February 2022 the trustees do not pay the quarterly interest due on the loan on time. Payments are made between a week and several months late. This would be regarded as a failure to pay interest in accordance with the terms of the loan. The settlement would be tainted and the foreign-source income would cease to be protected with effect from February 2022.
>
> *Example*
>
> M remains in the UK, and the facts are the same as those in paragraph 5.3. The trustees initially pay the interest in accordance with the terms of the loan but in June 2023 they request that the interest is made payable annually with immediate effect. M accedes to the request and the terms of the loan are varied accordingly. It is necessary to consider whether there has been a relevant event. There has been no capitalisation of the interest payable and no failure to pay it in accordance with the terms of the loan, but there has been a variation in the terms of the loan. Have the terms ceased to be on arm's length? The interest rate of the loan has not changed at June 2023 and the interest is payable annually. The official rate of interest rose to 3.25% from April 2022. This did not cause the tainting of the trust at that time, but the loan as varied carries interest at below the official rate from June 2023. The principal of the loan is therefore treated as having been provided to the trustees in June 2023. The settlement is tainted and condition F is no longer met. The foreign-source income ceases to be protected.

The third type of relevant event is:

> (c) variation of the terms of the loan such that they cease to be arm's length terms.

Suppose:

(1) a payment of principal under a loan from the settlor or settlor-connected trust to a protected trust

(2) the loan is on commercial terms but not Arm's Length Terms

One might have thought that lending money (paying the principal to the borrower/trustees) on commercial terms is not providing property, even if it is not on "Arm's Length Terms". But the context of:

(1) the relevant event rule, and
(2) the rule for pre-deemed dom loans (see below)
suggests that payment of the principal on such a loan is the provision of property, even though the loan is on commercial terms, if it is not on "Arm's Length Terms".

Disregards (a) and (b) exclude loans, so the payment of principal under a loan does not benefit from those disregards.

92.7.4 *Loan **from** trust: Disregard (d) (interest)*

Para 5B sch 5 TCGA provides:

> (2) Ignore ...
> (d) the payment of interest to the trustees of the settlement under a loan made by them on arm's length terms

Suppose:
(1) A payment of interest under a loan made from the settlor or settlor-connected trust to a protected trust
(2) The loan is on commercial terms but not Arm's Length Terms?

One might have thought that paying interest under a loan on commercial terms is not providing property, even if it is not on "Arm's Length Terms". But the context of:
(1) disregard (d), and
(2) the rule for pre-deemed dom loans (see below)
suggests that payment of the interest is the provision of property, even if it is on commercial terms, if it is not on "Arm's Length Terms".

Disregards (a) and (b) exclude loans, so the payment of interest does not benefit from those disregards.

92.7.5 *Loan repayment: Disregard (e)*

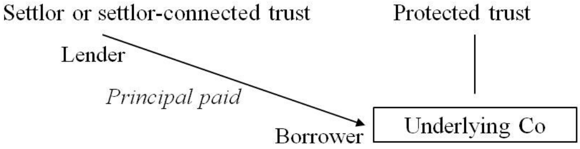
Para 5B sch 5 TCGA provides:

> (2) Ignore ...
> (e) repayment to the trustees of the settlement of the principal of a loan made by them

In the case of repayment, it does not matter whether the loan is on "Arm's Length Terms".

92.7.6 *Principal paid to underlying co*

Suppose principal is paid under a loan from the settlor or a settlor-connected trust to an underlying company held by a protected trust.



The payment of principal is not within disregard (c) (even if the loan is on "Arm's Length Terms"). It is considered the payment is providing property if the loan is on beneficial terms, but not if it is on commercial or onerous terms.

Para 16 Protected-trust Note provides:

> The provisions regarding arm's length loans are expressed in terms of loans to or interest paid to the trustees of the settlement. It is not considered this prescriptive language extends to loans to or interest paid to underlying companies. On a literal view at least the exclusion of transactions at arm's length or not intended to confer gratuitous benefit do not cover these loans either. However such loans would only constitute tainting if property has been provided to the settlement or value added to it. It is therefore considered loans on arm's length terms do not amount to tainting. Strictly the requirement that interest be paid as distinct from compounded would not be in point, but it is considered that to run an argument on these lines would be provocative.[38]

[38] The passage continues:

> HMRC's published guidance indicates that in HMRC's view loans to and interest paid to underlying companies should be treated in the same way as loans to and interest paid to the settlement.

I think this refers to HMRC protected-trust guidance para 5.5

> ... although reference is made in the following example to additions being made to trusts, it is considered that the same consequences will arise where additions are made to companies owned by the non-resident trustees. The tainting rules are not avoided by making additions to such underlying companies rather than to the trusts that own them.

As a general proposition that is correct. But this passage is not considering the case of commercial loans, which raise special considerations.

Para 16 Protected-trust Note concludes:

> Should interest at the official rate differ from the arm's length it will be a matter of judgement as to whether to rely on apparent HMRC practice.

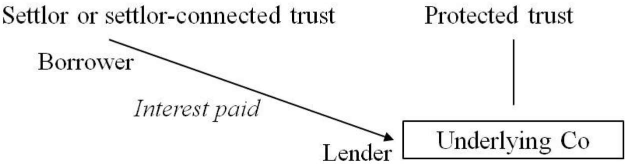
The last sentence while true is not exactly guidance. Perhaps it is intended as a tactful warning that it is not safe to rely on HMRC guidance.

One cannot ignore the underlying company (pierce the corporate veil) and treat the matter as if the loan was made to the trustees of the protected trust.[39]

Could the context show that the payment of principal here is to be regarded as provision of property (as in the simple case where the payment is made to the trustees and not to the underlying company)? It is considered the answer is no. The contextual argument in the simple case is based on disregard (c) and the rule for pre-deemed-dom date loan.[40] These rules do not apply here.

92.7.7 *Interest paid to underlying co*

Suppose interest is paid under a loan to an underlying company held by a protected trust from the settlor or a settlor-connected trust.



The interest paid is not within disregard (d) (even if the loan is on "Arm's Length Terms"). It is considered the payment is providing property if the loan is on onerous terms (high interest rate), but not if it is on commercial or beneficial terms (low interest rate).

This is consistent with the position on payment of the principal of a loan, see above. Could the context show that the payment of interest here is to be regarded as provision of property (as in the simple case where the interest is paid to the trustees and not to the underlying company)? It is considered the answer is, no. The contextual argument in the simple case is based on disregard (d). That rule does not apply here.

92.7.8 *Loan pre-deemed-dom date*

A loan from the settlor to a trust made at a time when the settlor is not UK domiciled (or deemed domiciled) does not in principle matter, as the tainting rule only applies if property is provided by a settlor (or settlor-connected trust) at a time when the settlor is UK domiciled (or deemed

[39] See App.7.12 (Pierce corporate veil/ facade).

[40] See 92.7.8 (Loan pre-deemed dom date).

domiciled).[41] So the loan need not be on Arm's Length Terms. However para 5B sch 5 TCGA provides:

> (5) Sub-paragraph (6) applies (subject to sub-paragraph (7))[42] where—
> (a) the settlor becomes deemed domiciled in the UK on or after 6 April 2017,
> (b) before the date on which the settlor becomes deemed domiciled in the UK ("the deemed domicile date"), a loan has been made to the trustees of the settlement by—
> (i) the settlor, or
> (ii) the trustees of a settlement connected with the settlor,
> (c) the loan is not entered into on arm's length terms, and
> (d) any amount that is outstanding under the loan on the deemed domicile date ("the outstanding amount") is payable or repayable[43] on demand on or after that date.
> (6) Where this sub-paragraph applies, the outstanding amount is to be regarded as property directly provided on the deemed domicile date by the lender for the purposes of the settlement (despite sub-paragraph (2)[44]).

92.7.9 *Change in official rate*

HMRC protected trust guidance para 5.5 gives examples (relating to "Maria"):

> In February 2020 M lends the trustees of the M 2019 Discretionary Settlement €250,000, repayable in quarterly instalments over ten years. The loan carries interest at 3% per annum, payable quarterly in arrears. The capital and interest are repaid in accordance with the terms of the loan. The loan principal can be ignored and does not taint the settlement, as the loan is made on arm's length terms, for these purposes, by M, the interest rate being the official rate in February 2020 and the interest being payable at least annually.
> In 2022-23 the official rate rises, but a change in the official rate of interest does not mean that the trust will become tainted.
> In May 2020 the trustees of the M 2019 Discretionary Settlement lend M US$20,000. The loan carries interest at 3.0% per annum, payable

[41] See 92.4 (Condition D: Tainting).

[42] See 92.7.13 (Pre-2017 loan).

[43] "Payable or repayable" is a somewhat pedantic phrase, and either "payable" or "repayable" would have been sufficient; but nothing turns on that.

[44] Subpara (2) contains the 7 disregards, so the tainting-loan rules override the usual disregard for pre-2017 liabilities.

> six-monthly. This is no more than the official rate in May 2020 and so the payment of the loan interest can be ignored, as the loan is made on arm's length terms, for these purposes, by the trustees. It does not taint the settlement.
>
> In April 2021 the official rate falls to 2.5%. There is no need for the interest rate on the loan to be reduced (unless a relevant event occurs) because the loan was entered into on terms which were arm's length at that time.

Protected-trust Q&As Question 21 provides:

> HMRC's guidance indicates that a loan is on arm's length terms if the interest rate is equal to the official rate at the date the loan is entered into ... It is not however clear whether:
>
> a. it makes any difference whether the loans are for a fixed term or whether they are repayable on demand; or
> b. HMRC will also accept that the loans are on arm's length terms if, in fact, the terms of the loans provided for the interest rate to be varied so as to track the official rate from time to time.
>
> *Suggested answer:*
>
> 1. Provided that the interest rate is equal to the official rate at the date of the loan, it makes no difference whether the loan is for a fixed term or repayable on demand.
>
> 2. HMRC also accepts that the loan is on arm's length terms if the interest rate is at the official rate at the date the loan is entered into and the loan agreement provides that thereafter the interest rate will track the official rate from time to time.[45]

Point 2 is correct but point 1 is not clear.

92.7.10 *Borrower funds interest payment*

Para 20 Protected-trust Note provides:

> It is not considered tainting occurs if interest is paid using further funds provided by the lender, provided the provision is itself a loan on arm's length terms as required by the legislation

92.7.11 *Swiss franc/Japanese yen loan*

Para 19 Protected-trust Note provides:

> There are different official rates for loans denominated in Swiss francs and Japanese yen subject to certain conditions. It is not considered that

[45] The same point is made in para 18 Protected-trusts Note.

> these separate rates must be used in respect of loans denominated in these currencies as they apply only to loans made by reason of employment to individuals who normally live in Switzerland or Japan.[46]

92.7.12 *Fixed term loan: IHT*

Para 23 Protected-trust Note provides:

> For example, trustees may make a ten year fixed term loan to a UK resident settlor at a rate that does not exceed the official rate of interest in circumstances where a bank would charge interest at a rate that exceeds the official rate of interest. The settlor cannot pay a higher rate without tainting the settlement. It is considered that the provisions of IHTA 1984 section 10[47] would apply because paying interest at no more than the official rate
> [1] is not intended to confer a benefit on any person[48] and
> [2] is required under the capital gains tax and income tax rules for the purpose of ensuring that the loan is deemed to be on arm's length terms.

However, the loan may be (and usually is) made repayable on demand, so this IHT issue does not usually arise.

92.7.13 *Pre-2017 loan*

Para 5B(7) sch 5 TCGA provided a one year's grace to put a pre-2017 loan on "Arm's Length Terms", where the individual became deemed domiciled on 6 April 2017. The relief is not just of historical interest, because its application affects the question of whether a trust is a protected trust, which will continue to matter for the lifetime of the settlor, (or at least, for as long as the protected-trust regime continues). But I omit it here, as by now it will not often need to be considered.[49]

92.8 Protected income: Terminology

"Protected foreign-source income" is one of three distinct terms with almost identical labels:[50]

[46] See 40.5.1 (Foreign currency loan).

[47] See 74.13 (Arm's length disposal relief).

[48] Author's footnote: but this depends on the facts of the case.

[49] See the 2021/22 edition of this work para 88.7.10 (2017 domicile: transitional relief).

[50] In addition statute uses the term "Transitionally protected income" but it is not necessary to consider that here; see 92.15.3 (Pre-2017 s.720 income).

Term	**Use**	**See para**
Protected foreign-source income	Throughout protected-trust code	*Discussed here*
Protected Income	s.731 protected-trust close-family/settlor charges	50.48
PFSI	s.643A protected-trust close-family/settlor charges	47.22.1

The term "protected foreign-source income" itself has *three* distinct definitions. It is necessary to distinguish them. Statute refers to:

> protected foreign-source income for the purposes of section 628A(1)
> protected foreign-source income as defined by section 721A
> protected foreign-source income as defined by section 729A

Or else statute applies one of the definitions by reference:

> Sections 628A(2) to (12) and 628B (meaning of "protected foreign-source income") have effect also for this purpose.

I coin the following terms to describe the different types of protected foreign-source income:

My terminology	**Definition**
Protected s.624 income	s.628A ITTOIA
Protected s.720 income	s.721A ITA
Protected s.720 trust income	s.721A(3) ITA
Protected s.720 company income	s.721A(4) ITA
Protected s.727 income	s.729A ITA
Protected s.727 trust income	s.729A(3) ITA
Protected s.727 company income	s.729A(4) ITA

To describe the statutory terminology as clumsy or bad drafting scarcely does it justice. Perhaps the Parliamentary Counsel Office held an internal competition for the most unhelpfully labelled set of definitions; by that measure the drafter has excelled. But the reader will simply have to bear in mind that statute distinguishes about a dozen concepts, and describes them with labels using slight variants of the words "protected income"; and it then becomes possible to proceed.

There is no comparable definition of "protected gains" for the purposes of CGT protected-trust relief, as all gains are protected, (ie all gains of non-resident trusts qualify for s.86 protected-trust relief), whether UK source or not.

92.8.1 *Why protected foreign-source income matters*

The term "protected foreign-source income" is used in the following contexts:

(1) Protected-trust reliefs:
   (a) s.624 (and s.629) protected-trust relief
   (b) s.720 protected-trust relief
   (c) s.727 protected-trust relief
   (d) Transitional reliefs for pre-2007 s.624/s.720 income
(2) Protected-trust close-family/settlor charges:
   (a) The definition of "Protected Income" for s.731[51]
   (b) The definition of PFSI for s.643A[52]

92.9 Protected s.624 income

Protected s.624 income matters because:
(1) It qualifies for s.624 protected-trust relief and so is not taxed under s.624 on the arising or remittance basis.
(2) It is potentially taxable under the s.643A close-family charge.

Section 628A(2) ITTOIA provides the definition of "protected foreign-source income", which I call **"protected s.624 income"**:

> For this purpose, income arising under a settlement in a tax year is "protected foreign-source income" for the tax year if Conditions A to F are met.

I refer to these as **"s.624 protected-trust conditions"**.

For the related term "protected s.720 income" see 92.12 (Protected s.720 income).

For this purpose, s.628A(13) contains the standard form to disapply the artificial s.624 remittance basis timing rule.[53]

The definition is said to be for the purpose of s.628A (which I call s.624 protected-trust relief); but it applies more widely, as it is incorporated by reference elsewhere.[54]

92.9.1 *Condition A: RFI*

Section 628A(3) ITTOIA provides:

> Condition A is that the income would be relevant foreign income if it were income of a UK resident individual.

[51] See 50.44 ("Protected Income").
[52] See 47.22.1 (PFSI).
[53] See 47.8.4 (Remittance basis timing rule).
[54] The list includes: s.633C(3)(c) ITTOIA.

I call this the **"RFI condition"**.

The drafting is based on the wording of the s.720 remittance basis,[55] and there is a similar requirement in the s.624 remittance basis.[56]

92.9.2 *Originating from settlor*

Section 628A(4) ITTOIA provides:

> Condition B is that the income is from property originating from the settlor (see section 645).

This deals with the issue of multiple settlors.[57]

92.9.3 *Cond. C/D: non-dom settlor*

Section 628A ITTOIA provides:

> (5) Condition C is that when the settlement is created the settlor—
> (a) is not [actually] domiciled in the UK, and
> (b) if the settlement is created on or after 6 April 2017, is not deemed domiciled in the UK.
> (6) Condition D is that there is no time in the tax year when the settlor is—
> (a) [actually] domiciled in the UK, or
> (b) deemed domiciled in the UK by virtue of Condition A in section 835BA of ITA 2007 [formerly-domiciled resident[58]].

This is the equivalent of s.86 protected-trust conditions B and C.[59] The difference in the wording (particular year has become tax year) does not seem material.

Conditions C/D are satisfied for the tax year even if the settlor dies during the year.

92.9.4 *Non-resident trustees*

Section 628A(7) ITTOIA provides:

> Condition E is that the trustees of the settlement are not UK resident for the tax year.

[55] See 49.26 (s.720 remittance basis). For the reason for the wording ("would be RFI if it were the individual's"), see 16.9.3 (Relevant foreign income).

[56] See 47.8.2 (Remittance basis rule).

[57] See 100.1.2 (Multiple settlor provisions).

[58] See 5.4.2 (IT/CGT formerly-dom resident rule).

[59] See 92.3.2 (Conditions B/C: Non-dom settlor).

Individuals are resident (or not) *for* a tax year.[60] That is not the case for trustees: the drafter has used the wrong phrase. But it does not matter. In context, the meaning is that trustees must be non-resident throughout the tax year.

92.9.5 *Condition F: Tainting*

Section 628A(8) ITTOIA provides:

> Condition F is that no property or income is provided directly or indirectly for the purposes of the settlement by the settlor, or by the trustees of any other settlement of which the settlor is a beneficiary or settlor, at a time in the relevant period[61] when the settlor is—
> (a) [actually] domiciled in the UK, or
> (b) deemed domiciled in the UK.[62]

This is the equivalent of s.86 protected-trust condition D.[63]

Section 628A(10) and s.628B ITTOIA are the equivalent of the CGT tainting rules in para 5A(7) and para 5B sch 5A.[64] The wording is identical, so these provisions need not be set out again here.

92.10 s.624 protected-trust relief

Armed with the definition of protected s.624 income, we can turn to the s.624 protected-trust relief.

S.624 protected-trust relief is not like s.86 protected-trust relief, because the s.86 relief applies to all trust gains, but s.624 relief applies only to protected s.624 income.

Section 624 provides the general rule that income of a settlor-interested

[60] See 10.1 (Residence throughout tax year).

[61] Defined s.628A(9) ITTOIA: "In subsection (8) "relevant period" means the period—
(a) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
(b) ending with the end of the tax year."

[62] Section 628A(12) ITTOIA defines deemed domicile in a clumsy fashion: "In this section "deemed domiciled" means regarded for the purposes of section 809(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect."

[63] See 92.4 (Condition D: Tainting).

[64] See 92.4.3 (Adding value) ff, Although the wording is the same, there is a difference in that the word "settlement" in the settlor-interested trust rules has the settlement-arrangement meaning and not the standard IT/CGT meaning. But in practice that does not usually matter; see 47.3.1 (Property comprised in settlement).

trust is treated as income of the settlor.

Section 628A(1) ITTOIA provides the relief:

> The rule in section 624(1) does not apply to income which arises under a settlement if it is [s.624] protected foreign-source income for a tax year.

Section 624 protected-trust relief is better than the s.624 remittance basis, which applies to a remittance basis settlor in the absence of protected-trust relief, because:

(1) To obtain protected-trust relief it is not necessary to claim the remittance basis (which involves losing personal allowances as well as the remittance basis claim charge).

(2) Protected s.624 income is not subject to income tax even if remitted to the UK.

92.10.1 *Pre-2017 income: Outline*

There are two reliefs for pre-2017 income. In outline:

Charging section	**Statutory term**	**Relief**	**See para**
s.624	Transitional trust income	s.628C ITTOIA	92.10.2
s.720	Transitionally protected income	s.726(6)(7) ITA	92.15.3

It is a pity that these two reliefs are not better aligned.[65] But there it is.

92.10.2 *Pre-2017 s.624 income*

Section 624 income arising before 2017/18 did not qualify for s.624 protected-trust relief, but it could qualify for the s.624 remittance basis.

Section 628C(1) ITTOIA provides:

> For the purposes of applying section 809L of ITA 2007 (meaning of remitted to the UK) in relation to transitional trust income, “relevant person” in that section does not include the trustees of the settlement concerned.

[65] CIOT commented on the draft legislation: "Given the significant overlap in the scope of the settlements code and the transfer of assets provisions, we strongly urge a consistent approach in terms of drafting." See CIOT, “Deemed domicile: Income and Capital Gains Tax – draft clauses published 13 July 2017: Response by the Chartered Institute of Taxation” (2017). But no-one took any notice, and this is now of historical interest only.

Section 628C(2) ITTOIA provides the definition of "transitional trust income":

> "Transitional trust income" means income—

Four conditions then follow:

> "Transitional trust income" means income—
> (a) that arises under a settlement in the period
> [i] beginning with the tax year 2008-09[66] and
> [ii] ending with the tax year 2016-17 ("the protection period"),

I refer to income within that period as "2008-2017 income".[67]

> "Transitional trust income" means income ...
> (b) that would be protected foreign-source income[68] for the purposes of section 628A(1) if section 628A(2)—
> (i) had effect for the protection period, and
> (ii) so had effect with a reference to conditions A to E (instead of A to F),

Para (b)(ii) disapplies condition F.[69] The point is that additions to a trust, which (post-2017) would taint the trust and lose s.624 protected-trust relief, do not affect the transitional relief for 2008-2017 income.

> "Transitional trust income" means income ...
> (c) that prior to 6 April 2017 has neither been
> [i] distributed by the trustees of the settlement nor
> [ii] treated under section 624(1) as income of the settlor,[70] and
> (d) that would for the tax year in which it arose under the settlement have been treated under section 624(1) as income of the settlor if the settlor had been domiciled in the UK for that year.

So a receipt in the UK of 2008-2017 trust income by trustees of a settlor-interested trust does not constitute a taxable remittance. This is of limited importance, though it might facilitate UK investment by the trust.

[66] The reason for this start date is that pre-2008 income qualified for a different transitional relief: see 47.8.5 (Pre-2008 income: Transitional).

[67] There is a separate relief for pre-2008 income; see 47.8.5 (Pre-2008 income: Transitional).

[68] See 92.9 (Protected s.624 income).

[69] See 92.9.5 (Condition F: Tainting).

[70] Para [ii] is otiose: it would only arise if the s.624 income was remitted pre-2017.

For this purpose, s.628C(3) ITTOIA contains the standard form to disapply the artificial s.624 remittance basis timing rule.[71]

Protected-trust guidance provides:

> Importantly this provision only removes trustees from the definition of "relevant person" in s809L ITA 2007. Underlying companies etc. will all remain relevant persons. Hence a loan of unremitted trustee income from, say, 2010 to an underlying company would trigger a taxable remittance upon subsequent use by the company in the UK. This will also include investing funds in the UK save where Business Investment Relief is applicable.[72]

That is strange, perhaps absurd, because the same relief for s.720 is more generous; but it appears to have been a deliberate decision. In practice, UK investment by the trustees (ie at trust level rather than underlying company level) is likely to be ruled out for IHT reasons. The reader may wonder whether this has been properly thought through.

It would be sensible if the restriction on the concept of "relevant person" applied generally, as the definition is too wide;[73] in that respect, this particular transitional rule might be viewed as a timid step in the right direction.

Protected-trust guidance provides:

> The rules on transitional trust income apply only to income that would for the tax year it arose have been treated as that of the settlor under S624(1) if the settlor had been domiciled in the UK. The transitional provisions do not extend to income treated as that of the settlor under S629(1) or S633.

But this will not often be important.

92.10.3 *Planning: Segregate income*

In the following discussion **"unprotected income"** is income of a settlor-interest trust which is not protected s.624 income. This will normally

[71] Section 628C(3) sets out the standard form which disapplies the artificial remittance basis timing provision; "Section 648(3) to (5) (relevant foreign income treated as arising under settlement only if and when remitted), and corresponding earlier enactments, do not apply for the purposes of subsection (2)(a) and (d)." See 47.8.4 (Remittance basis timing rule).

[72] Para 2.19.

[73] See 18.12 (Relevant person: Critique).

constitute pre-2017 trust income.[74]

There are now two different regimes for foreign income of a settlor-interested trust:

(1) Protected s.624 income: not taxed if remitted to the UK
(2) Unprotected income: taxed if remitted to the UK

It may be advantageous to segregate the two types of income, so trustees can use one or the other as desired. If the two are brought together, there is a mixed fund and mixed fund rules apply.

It may be advantageous to segregate UK source income, as that can be distributed without a further tax charge.

92.11 s.629 protected-trust relief

Section 629 ITTOIA provides the general rule that (in short) income of a minor child of the settlor is treated as income of the settlor.[75]

Section 628A(1) ITTOIA provides the protected-trust relief:

> The rule in section 629(1) does not apply to income which arises under a settlement if it is [s.624] protected foreign-source income[76] for a tax year.

Section 630A(3) ITTOIA contains the standard form to disapply the artificial remittance basis timing rule.[77]

92.12 Protected s.720 income

Protected s.720 income matters because:

(1) It qualifies for s.720 protected-trust relief, and so is not taxed under s.720 on the arising or the remittance basis.
(2) The transferor is potentially taxable on it under s.731 close-family rules.
(3) The s.731 onward gift rule applies only if s.731 income is matched to protected s.720 income.

Section 721A ITA provides the definition of "protected foreign-source

[74] For periods during which the settlor is UK resident; I simplify the discussion by assuming that the settlor is UK resident throughout.

[75] See 47.15 (Payment to settlor's child).

[76] Section 631A(2) ITTOIA provides the definition by reference: "Sections 628A(2) to (12) and 628B (meaning of "protected foreign source income") have effect also for this purpose." See 92.9 (Protected s.624 income).

[77] See 47.8.4 (Remittance basis timing rule).

income" (which I call **"protected s.720 income")**.[78]

Section 721A(1) ITA provides:

> This section has effect for the purposes of rule 2 of section 721(3B)[79] (cases where the individual [transferor] is not UK domiciled and is not deemed domiciled by virtue of Condition A in section 835BA [formerly-domiciled resident[80]]).

The definition is said to be for the purpose of s.721(3B) rule 2 (which I call s.720 protected-trust relief); but it applies more widely, as it is incorporated by reference elsewhere.[81]

Section 721A(2) ITA provides:

> The income of the person abroad is "protected foreign-source income" so far as it is within subsection (3) or (4).

So there are two types of protected s.720 income:

Type of income (my terminology)	**ITA**	**See para**
Protected s.720 trust income	s,721A(3)	92.13
Protected s.720 company income	s.721A(4)	92.14

92.13 Protected s.720 trust income

Section 721A ITA provides:

> (2) The income of the person abroad is "protected foreign-source income" so far as it is within subsection (3) or (4).
> (3) Income is within this subsection if—

A set of 5 conditions then follow, which I call **"s.720 protected-trust conditions"**.

92.13.1 *Condition (a): RFI*

Section 721A ITA provides:

> (3) Income is within this subsection if—
> (a) it would be relevant foreign income if it were the individual's

This is similar to s.624 protected-trust condition A, but not quite the

[78] See 92.8 (Protected income: Terminology).

[79] See 92.15.2 (Transferor not UK domiciled).

[80] See 5.4.2 (IT/CGT formerly-dom resident rule).

[81] The list includes: s.731(1A) ITA: see 50.45 (Non-resident receives benefit); s.733A(1)(b(i) (s.731 close-family charge); s.733B(1).

same.[82] I call it the **"RFI condition"**.

If the individual (ie, the transferor) is non-resident, the income does not meet this requirement,[83] so it is not protected s.720 income. Similarly if the individual has died, the income is not protected s.720 income.[84]

The individual (the transferor) will normally be the settlor, but that need not necessarily be the case.

For whether offshore income gains/accrued income profits constitute protected s.720 income, see 67.12.2 (OIG: Protected s.720 income?); 28.15 (AIP: Protected-trust reliefs).

92.13.2 *Condition (b): Settlement*

Section 721A ITA provides:

> (3) Income is within this subsection if ...
>
> (b) the person abroad is the trustees of a settlement

Trust-protection guidance notes that for this purpose, "settlement" includes "foreign entities that fall to be treated like trusts under the principle in *Memec plc v IRC* e.g. certain types of foundations".

Company income does not meet this condition: it may instead come within s.721A(4) discussed below.

92.13.3 *Cond. (c): Non-resident trust*

Section 721A ITA provides:

> (3) Income is within this subsection if ...
>
> (c) the trustees are non-UK resident for the tax year

Condition (c) is the equivalent of s.624 protected-trust condition E.[85]

[82] See 92.9.1 (Condition A: RFI). For the reason for the wording ("would be RFI if it were the individual's"), see 16.9.2 (Relevant foreign income).

[83] See 17.4.1 ("Relevant foreign income").

[84] This is also the view of the professional bodies in their paper "Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty" (Mar 2019): "The transfer of assets onward gift rules can only apply if the original benefit is matched against "protected foreign source income". This requires the income to have arisen after 5 April 2017 at a time when the settlor is UK resident."
https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-03-19-fa-2018-section-35.ashx

[85] Se 92.9.4 (Non-resident trustees).

92.13.4 *Cond. (d): Non-dom transferor*

Section 721A ITA provides:

> (3) Income is within this subsection if ...
> (d) when the settlement is created, the individual [transferor] is—
> (i) not [actually] domiciled in the UK, and
> (ii) if the settlement is created on or after 6 April 2017, not deemed domiciled[86] in the UK

The individual will usually be the settlor as well as the transferor, but that is not necessarily the case, and is not required.

92.13.5 *Condition (e): Tainting*

Section 721A ITA provides:

> (3) Income is within this subsection if ...
> (e) no property or income is provided directly or indirectly for the purposes of the settlement by the individual [transferor], or by the trustees of any other settlement of which the individual is a beneficiary or settlor, at a time in the period—
> (i) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
> (ii) ending with the end of the tax year,
> when the individual [transferor] is domiciled or deemed domiciled in the UK.

Condition (e) is the tainting rule which applies for all the protected-trust reliefs.[87] The wording here is different from the TCGA and ITTOIA equivalents, but there is no difference in meaning.

Section 721B (tainting) is the equivalent of the rule in para 5B sch 5A TCGA. The wording here is identical, so these provisions need not be discussed again here.

92.13.6 *s.624/s.720 compared*

It may be helpful to set out the definitions of protected s.624 income/ protected s.720 trust income, side by side, for comparison:

[86] Section 721A(7) ITA provides the standard IT definition.

[87] See 92.4 (Condition D: Tainting).

s.628A: protected s.624 income	**s.721A(3): s.720 prot’d trust income**
(3) Condition A is that the income would be relevant foreign income if it were income of a UK resident individual.	(3) Income is within this subsection if— (a) it would be relevant foreign income if it were the individual’s [the transferor’s],
[No equivalent as s.624 requires income arising under a settlement]	(b) the person abroad is the trustees of a settlement,
(4) Condition B is that the income is from property originating from the settlor (see section 645).	
(5) Condition C is that when the settlement is created the settlor— (a) is not domiciled in the UK, and (b) if the settlement is created on or after 6 April 2017, is not deemed domiciled in the UK.	(d) when the settlement is created, the individual [the transferor] is— (i) not domiciled in the UK, and (ii) if the settlement is created on or after 6 April 2017, not deemed domiciled in the UK, and
(6) Condition D is that there is no time in the tax year when the settlor is— (a) domiciled in the UK, or (b) deemed domiciled in the UK by virtue of Condition A in section 835BA of ITA 2007.	
(7) Condition E is that the trustees of the settlement are not UK resident for the tax year.	(c) the trustees are non-UK resident for the tax year,
(8) Condition F is that no property or income is provided directly or indirectly for the purposes of the settlement by the settlor, or by the trustees of any other settlement of which the settlor is a beneficiary or settlor, at a time in the relevant period when the settlor is— (a) domiciled in the UK, or (b) deemed domiciled in the UK.	(e) no property or income is provided directly or indirectly for the purposes of the settlement by the individual [transferor], or by the trustees of any other settlement of which the individual is a beneficiary or settlor,

(9) In subsection (8) "relevant period" means the period—	at a time in the period—
(a) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and	(i) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and
(b) ending with the end of the tax year.	(ii) ending with the end of the tax year,
	when the individual is domiciled or deemed domiciled in the UK.

92.14 Protected s.720 company income

Section 721A ITA provides:

> (2) The income of the person abroad is "protected foreign-source income" so far as it is within subsection (3) or (4)...
> (4) Income is within this subsection if—

A set of 7 conditions then follow, which I call **"s.720 protected-company conditions"**. These are (more or less) the same as the five s.720 protected-trust conditions, except:

(1) Para (b) requires that the person abroad is a company (rather than a trust); and
(2) Paras (c)(d) are added.

92.14.1 *Cond. (c): need for trust*

Section 721A ITA provides:

> (4) Income is within this subsection if...
> (c) the trustees of a settlement—
> (i) are participators[88] in the person abroad
> (ii) are participators in the first in a chain of two or more companies
> [A] where the last company in the chain is the person abroad and
> [B] where each company in the chain (except the last) is a participator in the next company in the chain,

Company income is not protected s.720 income unless trustees are

[88] Section 721A(7) ITA provides the standard definition: "In this section "participator", in relation to a company, has the meaning given by section 454 of CTA 2010".

participators. If the transferor holds a company directly, without a trust, there is no s.720 protected-trust relief. In short, condition (c) (bolstered by (d), considered below) requires that the company is held in a trust.

That seems surprising, but the rule is deliberate.[89] No reason has been given. I infer the reason is that allowing protected-trust relief to a structure is part of a package which also includes the application of s.731 to funds extracted from the structure. In the absence of condition (c) a transferor holding a company absolutely could:

(1) obtain the benefit of s.720 protected-trust relief
(2) enjoy that benefit without the burden of an income tax charge on extracting funds from the structure (eg by calling in a debt owed to the transferor).

If a company within s.720 is transferred to a trust, income arising after the transfer will meet condition (c) and can qualify as protected s.727 company income.

92.14.2 *Chains of companies*

Section 721A ITA provides:

> (4) Income is within this subsection if...
> (c) the trustees of a settlement ...
> (ii) are participators in the first in a chain of two or more companies
> [A] where the last company in the chain is the person abroad and
> [B] where each company in the chain (except the last) is a participator in the next company in the chain

Para 12 Protected-trust Note considers chains of companies:

> Read literally, this could mean income arising to intermediate companies in the chain cannot be PFSI. However, a purposive construction avoids this result, if ‘the last company in the chain’ is taken to be the company which has received the income, even if that company may have direct or indirect subsidiaries. It is considered this purposive construction must be correct.

[89] HM Treasury, “Reforms to the taxation of non-domiciles: response to further consultation” (Dec 2016) para 2.3.3. *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf*

This is correct, but it does not require a particularly loose or purposive construction to reach that conclusion.

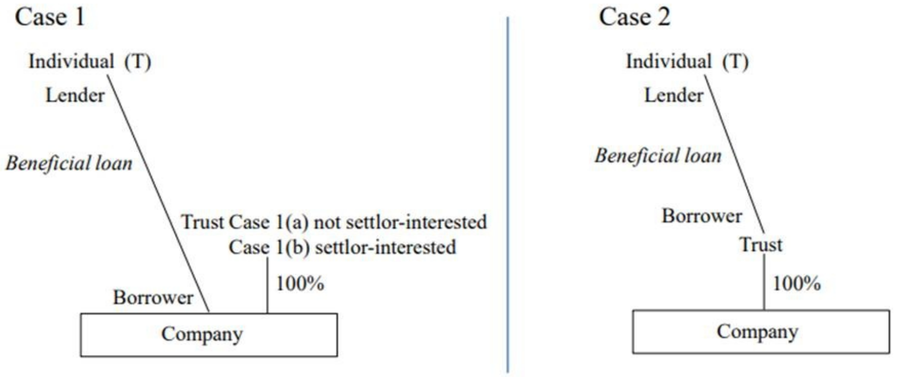
92.14.3 *Condition (d): interest outside trust*

Section 721A ITA provides:

> (4) Income is within this subsection if...
>
> (d) the individual's power to enjoy the income results from the trustees being participators as mentioned in paragraph (c)(i) or (ii)

"Results from" is the language of causation, and causation often causes intractable legal puzzles.

Suppose this structure:



Case 1
Individual (T)
Lender
Beneficial loan
Trust Case 1(a) not settlor-interested
Case 1(b) settlor-interested
100%
Borrower
Company
Case 2
Individual (T)
Lender
Beneficial loan
Borrower
Trust
100%
Company

Suppose for simplicity that all the company income arises directly or indirectly from the loan. That is, the company has no significant assets other than funds derived (directly or indirectly) from the loan.

Case 1(a): the trust excludes T and T's spouse. In this case T in principle has power to enjoy the company's income.[90] T has that power as a result of the loan, not as a result of the trustees being participators, so the company income is not s.720 protected income.

Case 1(b): T is a beneficiary of the trust. In this case the individual in principle has power to enjoy the company's income for two reasons, either of which would suffice:

(1) the trust's shareholding *and*

(2) the benefit of the loan.

[90] See 49.18.1 (Power to enjoy: Loans).

In this case does the power to enjoy result from the trustees being participators? In philosophical terms, where either A or B are sufficient to cause a result, the result is said to be overdetermined. Can one say that A caused the result? In legal terms the answer depends on the context.

Condition (d) does not say expressly whether or not the individual's power to enjoy must result *only* from the trustees being participators. In this situation one should ask what solution makes more sense having regard to the object of the rule. The protected trust regime allows protected-trust relief to a structure but only as part of a package which also includes the application of s.731 to funds extracted from the structure. The object of condition (d) is to prevent avoidance of that charge. In the absence of condition (d), under the structure in Case 1(b), the transferor could:

(1) obtain the benefit of s.720 protected-trust relief and
(2) enjoy that benefit without the burden of an income tax charge on extracting funds from the structure (by calling in the loan).

If that is right then the company income in case 1(b) should not be protected income. The analogy with case 1(a) also supports the view that the income is not protected.

Section 727 also needs consideration, as the capital receipt conditions are likely to be met.[91] The s.727 analysis provides further support for the view that the income is not s.720 protected income.

In practice the solution may be for T to transfer the loan to the trust.

Case 2: Again, T has power to enjoy the income of the company for two reasons, either of which would suffice:

(1) as beneficiary of the trust (if T is a beneficiary); and
(2) as holder of the loan[92] (whether or not T is a beneficiary)

But in either case the individual has power to enjoy the income of the company only because the trustees own the company and so are participators in it. So condition (d) is met, and the company income is s.720 protected income.

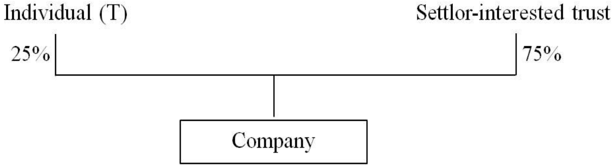
The position is more complicated if the company has assets in addition to the loaned funds. In that case there would have been other significant transfers of assets, a transfer to the trust and a transfer to the company:

[91] See 92.16 (s.727 protected-trust relief).
[92] See 49.18.1 (Power to enjoy: Loans).

(1) Who are the transferors in relation to each transfer? The analysis is simpler if T made all the transfers, but that need not be the case.
(2) What is the income arising to the company (the person abroad) as a result of each of those transfers? It would then be necessary to consider:
   (a) "Company loan income": income arising to the company as a result of the loan
   (b) Company non-loan income: other income of the company

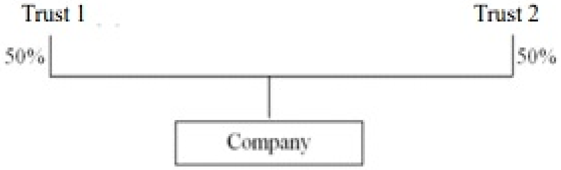
I do not pursue these permutations here.

Suppose:



T's power to enjoy 25% of the company's income results from his or her shareholding, and power to enjoy 75% of the income results from the trustees being participators. It is suggested one can apportion and 75% of the company's income is protected s.720 company income. But it would be better to avoid this problem.

Suppose one company is held by two settlor-interested trusts:



It is suggested that the company income can be protected s.720 income, as the singular includes the plural.

92.14.4 *Protected trust/co income compared*

It may be helpful to set out the definitions of protected s.720 trust/co income side by side for comparison:

Protected s.720 *trust* income	**Protected s.720 *company* income**
(3) Income is within this subsection if— (a) it would be relevant foreign income if it were the individual's,	(4) [identical]

(b) the person abroad is the trustees of a settlement,	(b) the person abroad is a company,
[No equivalent]	(c) the trustees of a settlement— (i) are participators in the person abroad, or (ii) are participators in the first in a chain of two or more companies where the last company in the chain is the person abroad and where each company in the chain (except the last) is a participator in the next company in the chain,
[No equivalent]	(d) the individual's power to enjoy the income results from the trustees being participators as mentioned in paragraph (c)(i) or (ii),
(c) the trustees are non-UK resident for the tax year,	(e) [identical to (c)]
(d) when the settlement is created, the individual is— (i) not domiciled in the UK, and (ii) if the settlement is created on or after 6 April 2017, not deemed domiciled in the UK, and	(f) [identical to (d)]
(e) no property or income is provided directly or indirectly for the purposes of the settlement by the individual, or by the trustees of any other settlement of which the individual is a beneficiary or settlor, at a time in the period— (i) beginning with the start of 6 April 2017 or, if later, the creation of the settlement, and (ii) ending with the end of the tax year, when the individual is domiciled or deemed domiciled in the UK.	(g) [identical to (e)]

92.15 s.720: Protected-trust relief

Armed with the definition of "protected s.720 income" we can turn to the s.720 protected-trust relief.

Section 721(3B) ITA provides:

> The amount of the income treated as arising under subsection (1) [the amount of s.720 income] is (subject to sections 724 and 725[93]) given by the following rules-

92.15.1 *Transferor UK domiciled*

Section 721(3B) ITA provides:

> *Rule 1*
> The amount is equal to the amount of the income of the person abroad if the individual [transferor]-
> (a) is [actually] domiciled in the UK at any time in the tax year, or
> (b) is at any time in the tax year regarded for the purposes of section 718(1)(b) as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly-domiciled resident[94]].

In para (b) the words *for the purposes of section 718(1)(b)* are not apt. That section defines the expression "person abroad".[95] We are concerned here with the (deemed) domicile of the transferor, not the person abroad. The words should be disregarded under the slip rule, or para (b) cannot be applied at all.

92.15.2 *Transferor not UK domiciled*

Section 721(3B) ITA continues:

> *Rule 2*
> In any other case ...

That is, if the transferor is not actually UK domiciled, and not a formerly-domiciled resident (this requirement is the effective equivalent of s.86 protected-trust condition C[96]):

> ... the amount is equal to so much of the income of the person abroad as is not protected foreign-source income (see section 721A).

In short, protected foreign-source income (which I call protected s.720

[93] The exceptions referred to in brackets will rarely if ever apply. For s.724, see 49.22.3 (Amount of charge: enjoyment condition C). s.725 concerns interaction with CFC rules.

[94] See 5.4.2 (IT/CGT formerly-dom resident rule).

[95] See 48.5 ("Person abroad").

[96] See 92.3.2 (Conditions B/C: Non-dom settlor).

income) is not subject to the s.720 charge. The wording seems exceptionally clumsy, but it works.

I refer to this rule as **"s.720 protected-trust relief"** though it is not expressed in the form of a relief.

Section 720 protected-trust relief is better than the s.720 remittance basis, which applies to remittance basis transferors in the absence of protected-trust relief, because:

(1) To obtain protected-trust relief it is not necessary to claim the remittance basis (which involves losing personal allowances as well as the remittance basis claim charge)

(2) s.720 protected-trust income is not subject to income tax even if remitted to the UK.

92.15.3 *Pre-2017 s.720 income*

Section 720 income arising before 2017/18 did not qualify for s.720 protected-trust relief, but it could qualify for the s.720 remittance basis.

There is a relief for this income.[97] Section 726(6) ITA provides:

> In addition,[98] where the tax year in which any foreign deemed income [foreign source s.720 income] arises is earlier than the tax year 2017-18, section 832 of ITTOIA 2005 does not apply to the foreign deemed income so far as it—
>
> (a) is remitted to the UK[99] in the tax year 2017-18 or a later tax year, and
>
> (b) is transitionally protected income.

Section 726(7) ITA provides the definition of "transitionally protected income":

> In subsection (6) ...
>
> "transitionally protected income" means any foreign deemed income where the income mentioned in section 721(2 [that is, the income of the person abroad])—
>
> (a) arises in a tax year earlier than the tax year 2017-18,
>
> (b) would be protected foreign-source income as defined by section 721A[100] if section 721A—
>
> (i) had effect for tax years earlier than the tax year 2017-18,

[97] There is a similar relief for s.624 income; see 92.10.1 (Pre-2017 income: Outline).

[98] The words "In addition" are otiose; but it does not matter.

[99] See 18.1 (ITA remittance basis).

[100] See 92.12 (Protected s.720 income).

and

(ii) so had effect with the omission of its subsections (3)(e), (4)(g), (5) and (6) [tainting rule], and

(c) has not prior to 6 April 2017 been distributed by the trustees of the settlement concerned.

The conditions in para (a) to (c) are similar to s.624 transitional relief for pre-2017 income,[101] but the relief is wider:

(1) In this case, s.832 is disapplied so there is no charge on remittance.[102]

(2) The relief applies to all pre-2017 income (not just income in the period 2008 - 2017).

That seems generous, but it makes sense because the transferor is (from 2017/18) within the scope of s.731 in relation to pre-2017 s.720 income (which is relevant income); that is a retrospective extension of the scope of the charge.[103]

Remittance of the income of the person abroad is also relevant for the s.731 remittance basis.

92.16 s.727 protected-trust relief

Section 729A ITA sets out the definition of protected foreign-source income (which I call **"protected s.727 income"**)[104] for the purposes of s.727 protected-trust relief.

Just as for protected s.720 income, there are two types of protected s.727 income:

Type of income (my terminology)	**ITA**
Protected s.727 trust income	s.729A(3)
Protected s.727 company income	s.729A(4)

I need not discuss this definition in full, because it mostly follows the definition of protected s.720 income.[105] There are however two differences between the definitions of s.720/727 protected company income:

(1) Para (d) of the definition is worded differently for s.727/s.720

[101] See 92.10.2 (Pre-2017 s.624 income).

[102] See 17.13 (Charge on remitted RFI).

[103] See 50.15.3 (Transferor not relevantly domiciled).

[104] See 92.8 (Protected income: Terminology).

[105] See 92.12 (Protected s.720 income).

(2) Para (e) of the definition is added

This is easier to follow if the definitions are set out side by side, and para (d) needs to be read with para (c):

***s.720* protected co income: S.721A(4)**	***s.727* protected co income: s.729A(4)**
(c) the trustees of a settlement— (i) are participators in the person abroad, or (ii) are participators in the first in a chain of two or more companies where the last company in the chain is the person abroad and where each company in the chain (except the last) is a participator in the next company in the chain,	(c) [identical]
(d) the individual's power to enjoy the income results from the trustees being participators as mentioned in paragraph (c)(i) or (ii)	(d) the condition in paragraph (c) is met as a result of a relevant transaction (whether or not it is also met otherwise than as a result of a relevant transaction)
[No equivalent]	(e) the income has become the income of the person abroad as a result of that relevant transaction

Protected-trust Q&As Question 15 provides:

> Read literally, [conditions (d) and (e)] could mean that there are many circumstances where the income of such a company would not be PFSI [in my terminology, s.727 protected company income] for the purposes of the capital sum rules [s.727].

The first example concerns an outright transfer of funds to a company which subsequently becomes held in a trust:

> For example, if
> [1] a settlor establishes an overseas investment company and transfers £10 million to that company before
> [2] subsequently transferring the shares in the company to a trust,
> the trustees become participators as a result of the transfer of the shares to the trustees but the income arises in the company as a result of the

> original transfer of the £10 million to the company – these are different relevant transactions.
>
> Is it accepted that, in these circumstances, the income of the company is PFSI within ITA 2007 s.729A(4) (assuming the other conditions are satisfied)?
>
> *Suggested answer:* the intention is that the income of an underlying company in these circumstances should be PFSI for the purposes of the capital sum rules to the extent of the trustees' interest in the company as a participator.
>
> Therefore, if the company is wholly owned by the trustees and there are no external interests, it is accepted that the income qualifies as PFSI. This is on the basis of a purposive construction of s.729A(4)(e) so that the condition is treated as being satisfied as long as the income arises as a result of any 'relevant transaction' rather than the income having to arise as a result of exactly the same relevant transaction by which the trustees became participators in the company.[106]

The answer is correct, but does not require a particularly loose or purposive construction. The condition in para (e) refers to that "relevant transaction", not that "transfer of assets". Relevant transaction includes associated operations.[107] In the example, the transfer of cash to the company, and the transfer of the shares to the trust, are in principle associated operations. So the company income can in principle meet condition (e) and can be protected s.727 income.

If there were a problem, a solution may be to wind up the company so the assets are held directly by the trust.

The second example concerns a loan to a company held in a trust:

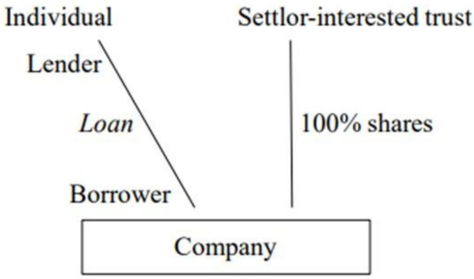
> The position would however be different if, for example,
>
> [1] the settlor had made a loan to the company as a result of which income arose to the company and
>
> [2] the settlor retained the benefit of the loan [and
>
> [3] the settlor transferred the shares to the trust[108]].

Diagrammatically:

[106] Para 13 Protected-trust Note makes the same point.

[107] See 48.12 (Why associated operations matter).

[108] It must be envisaged that the shares are held by the trust. It is not stated in the example whether the shares became held in the trust before or after the loan was made to the company; it probably makes no difference.



> In these circumstances, the income of the company which was attributable to the loan would not be PFSI for the purposes of the capital sum rules.
> This is because the series of 'relevant transactions' giving rise to the trustees' participation in the company is completely separate to the chain of 'relevant transactions' which results in income from the proceeds of the loan being received by the company. There is therefore no link between the relevant transaction resulting in the trustees becoming participators in the company and the relevant transaction giving rise to the income.

But s.727 does not matter, because in this situation the income would not be protected s.720 company income: HMRC need not rely on s.727.[109]

92.17 Protected-trust conditions: Navigation

It may help navigation to summarise the protected-trust conditions in 3 tables:

s.86 protected-trust conditions

Condition	*sch 5 para*	*Rule*	*See para*
A	5A(2)	2017/8 or later (commencement)	92.3.1
B	5A(3)	Settlor non-dom when trust made	92.3.2
C	5A(4)	Settlor non-dom in year	92.3.2
D	5A(5)	Tainting	92.4

s.624 protected-trust conditions

Condition	*Section*	*Rule*	*See para*
A	628A(3)	Foreign income	92.9.1
B	628A(4)	Multiple settlor rule	92.9.2

[109] See 92.14.3 (Condition (d): interest outside trust).

C	628A(5)	Settlor non-dom when trust made	92.9.3
D	628A(6)	Settlor non-dom in year	92.9.3
E	628A(7)	Non-resident trust	92.9.4
F	628A(8)	Tainting	92.9.5

s.720 protected-trust conditions and s.624/87 equivalents

Company	***Trust***	***Rule***	***Equivalent:* s.624**	**s.86**
721A(4)(a)	721A(3)(a)	Foreign income	A	–
721A(4)(b)	721A(3)(b)	Person abroad is co/trust	–	–
721A(4)(c)	–	Need for trust	–	–
721A(4)(d)	–	No interest outside trust	–	–
721A(4)(e)	721A(3)(c)	Non-resident trust	E	–
721A(4)(f)	721A(3)(d)	Settlor non-dom when trust made	C	B
721A(4)(g)	721A(3)(e)	Tainting	F	D
721(3B) Rule 2[110]	*ditto*	Settlor non-dom in year	D	C

It would have been better if the wording was more closely aligned; but there it is.

92.18 Protected-trusts: Commencement

Para 39 sch 8 F(no.2)A 2017 provides:

> The amendments made by paragraphs 19 to 38 have effect for the tax year 2017-18 and subsequent tax years.

Paras 19-38 include all the ITTOIA and ITA protected-trust provisions, including the settlor-interested trust rules in s.628A-C ITTOIA, and the ToA rules in s.721A-B, s.733A, 735B ITA.

Pre-2017 income is not protected s.624/s.720 income.[111]

For CGT commencement, see 92.3.1 (Condition A: 2017/18 or later).

[110] This is not expressed as part of the definition of "protected s.720 income" but it is effectively a condition of s.720 protected-trust relief.

[111] The professional bodies agree. Para 24 Protected-Trust Note provides:

> "relevant income cannot be PFSI unless it arose after 5 April 2017 as the changes only apply for the tax year 2017/18 onwards. Income before that date cannot be PFSI. The amendments made to section 726 introducing sub-sections (6) and (7) refer specifically to PFSI and earlier years thereby providing further confirmation."

For this document, see 92.1.1 (Protected-trust guidance); for s.726(6)(7) see 92.15.3 (Pre-2017 s.720 income).

92.19 Tax return: Protected income/gain

Protected income/gains is not taxable. No formal claim is required and tax returns do not require full details. Form SA106 (2022/23) boxes 10/12 ask about income received by a person abroad, but SA106 (notes) 2022/23 provides:

> If the income received by the person abroad is 'protected foreign income', do not enter details of protected foreign income in boxes 10 to 13.2.

However disclosure is required by Box 23 in form SA109 (2022/2023). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for 2022–23, put 'X' in the box. Please explain in box 40 [Any other information] how your domicile is relevant to your Income Tax or Capital Gains Tax liability* Further information relating to domicile is then required in boxes 24-27. Form SA109 Notes 2022–23 provides:

> Box 23 refers to your domicile status in general or common law. So if you're domiciled outside the UK and it is relevant to your UK tax liability, tick the box. If you're deemed domiciled and so chargeable on the arising basis there should be:
> - 'X' in box 23
> - followed by 'X' in either 23.1 or 23.2
> - then complete boxes 23.3 to 27 if you're taking advantage of the trust protections so that you would only be taxed on the benefits that you derived from a protected trust, rather than on the income and gains in the trust as they arise

CHAPTER NINETY THREE

NON-DOM/NON-RESIDENT SPOUSE

Cross references

Joint bank accounts are considered elsewhere:
94.3 (Joint account: IHT)
94.6 (Remittance from joint account)

93.1 Non-dom/non-resident spouse

This chapter considers tax issues which arise where:

(1) a UK domiciliary has a foreign domiciled spouse[1]

(2) a UK resident has a non-resident spouse[2]

FA 1988 abolished the former rule that income/gains of a married women

[1] "Spouse" here includes a civil partner; see App 3.2 ("Spouse"); App 3.3 ("Civil partner").

[2] I do not consider the temporary non-residence rules in this chapter.

were deemed to accrue to her husband, and established the general principle of independent taxation of husband and wife. The rules must be understood in that context, and in the light of conflicting policy considerations:

(1) Tax should be marriage-neutral: marriage should not impose additional tax or give a tax advantage
(2) To facilitate inter-spouse transfers by reliefs for tax charges which arise on other transfers
(3) (a) To prevent avoidance;
    (b) More fundamentally, to determine what in this context constitutes avoidance, and what is acceptable tax planning[3]

CGT/IT/IHT raise (more or less) the same policy issues but the solutions are all different, so each tax need to be considered separately. Such is the patchwork nature of UK taxation.

93.2 Restricted IHT spouse exemption

93.2.1 *The restriction*

The IHT spouse exemption normally provides complete exemption for transfers between spouses.[4] Section 18(2) IHTA provides an important exception:

> If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed
> [a] the exemption limit at the time of the transfer,
> [b] less any amount previously taken into account for the purposes of the exemption conferred by this section.

So where:
(1) the transferor is UK domiciled (or deemed UK domiciled), and
(2) the transferee (the spouse of the transferor) is foreign domiciled
the exemption is in principle restricted to the specified amount. I refer to this as the "**restricted IHT spouse exemption**".

This restriction does not apply the other way round, where the foreign

[3] See 2.5.9 (Views of non-tax practitioners) under the heading *Spouses sharing income.*

[4] For the IHT spouse exemption generally, see 76.5.1 (Spouse exemption: Introduction); see too 78.10 (GWR spouse exemption).

domiciled individual makes a transfer to their UK domiciled spouse. That makes sense because such a transfer brings assets which would have been outside the scope of IHT within its scope.

The restriction does not apply where neither spouse is domiciled in the UK.

The transferee spouse may elect to be treated as UK domiciled so as to avoid the restriction.[5]

The restriction is modified by some IHT DTAs:

Treaty	**See para**
Switzerland	118.9
USA	119.12

Transfers which do not qualify for the IHT spouse exemption will be PETs unless some other exemption is in point.

93.2.2 *Amount of restricted relief*

Where the IHT spouse exemption is restricted, s.18 provides that the amount of relief is:

> [a] the exemption limit at the time of the transfer,
> [b] less any amount previously taken into account for the purposes of the exemption conferred by this section.

The exemption limit is defined in s.18(2A) IHTA:

> For the purposes of subsection (2), the exemption limit is the amount shown in the second column of the first row of the Table in Schedule 1 (upper limit of portion of value charged at rate of nil per cent).

That is the nil-rate band amount, which is fixed at £325k until end 2020/2021.[6]

An inter-spouse gift within the limit of the restricted spouse exemption is *not* a PET. Section 3A(1A)(b) IHTA provides that a PET is a transfer of value "which, apart from this section, would be a chargeable transfer".[7] So if one spouse makes a gift to the other, that gift uses up the exemption limit even though the gift is made more than seven years from the death

[5] See 5.14 (Spouse election domicile).

[6] Section 10 F(no.2)A 2015.

[7] Transfers before 22 March 2006 are governed by s.3A(1) IHTA but the wording on this point is the same.

and would otherwise qualify as an exempt transfer, as a PET.

The position is different for a gift of excluded property.[8] Such a gift is not a transfer of value at all and therefore it is not a transfer which qualifies for the spouse exemption and does not use up the exemption limit.

The position is less clear for a transfer (outside s.11) which qualifies for the annual or normal expenditure exemptions. Such a transfer is an exempt transfer under those exemptions: does it also use up the limit for inter-spouse gifts? There is no clear answer in the legislation but it is suggested that these transfers do not use up the limit. That would better fit the scheme of the legislation.

The IHT Manual provides:

> **IHTM11033. Spouse or civil partner domiciled outside UK** [Jan 2017]
>
> ... The restriction applies to
>
> - the value before grossing (IHTM26121)
> - the cumulative total of all transfers to a spouse or civil partner. So you must take into account the amounts allowed under earlier transfers to a spouse or civil partner whether or not they were domiciled or treated as domiciled in the UK at the time in considering whether the restriction is exceeded, and
> - since the exemption applies to transfers made by a individual, if that person has been married or in civil partnership with more than person, the restriction applies to the cumulative total of all transfers to all spouses or civil partners.
>
> Where the appropriate limit is exceeded, you should allocate the exemption in the way which is most favourable to the spouse or civil partner. Factors you should bear in mind include which assets bear the tax and whether business relief (IHTM25131), agricultural relief (IHTM24001) or any other reliefs are available.
>
> ***Example 1** (Mr and Mrs Allsop)*
>
> In May 2012, Mr A, who was domiciled in the UK transferred £200,000 to Mrs A, who was not domiciled in the UK.
>
> Of this transfer, £55,000 is exempt under IHTA1984/S18(2), and £145,000 is a PET (IHTM04057) and assumed to be exempt.
>
> Mr A dies in 2020 and leaves all his property to his wife, who remains domiciled outside the UK.
>
> On Mr A's death, the limited exemption under IHTA1984/S18(2) has

[8] Likewise a gift within s.11 IHTA; see 93.4 (Disposition for maintenance of spouse).

increased to £325,000, so that exemption of
£270,000 (£325,000 - £55,000)
is now available on his death.

Example 2 *(Mr and Mrs Costa)*

In January 2013 Mr C transfers a UK property worth £200,000 to Mrs C. Both are domiciled outside the UK. Exemption under IHTA1984/S18 (1) is available in full.

In June 2013 Mr C is deemed to be domiciled in the UK and gives another UK property worth £300,000 to his wife, who remains domiciled outside the UK. The restriction on the exemption under IHTA1984/S18 (2) applies at this point.

At the time of the transfer that triggered the restriction, the spouse exemption available to Mr C was £325,000. He has already made a gift to Mrs C that qualified for exemption under IHTA84/S18 of £200,000, so the exemption available against this transfer is £125,000. This is because IHTA84/S18(2) reduces the amount of the limited exemption available by 'any amount previously taken into account for the purposes of the exemption conferred by this section'. This means that £175,000 of the transfer will be a PET to Mrs C and chargeable to tax if Mr C dies before July 2020.

93.3 Settlor spouse/widow: trust receipt

The termination of an estate interest in possession (during the life of the life tenant) is a transfer of value under s.52 IHTA.[9] Section 53(4) IHTA provides:

> Tax shall not be chargeable under s.52 above if on the occasion when the interest comes to an end—
> (a) the settlor's spouse or civil partner, or
> (b) where the settlor has died less than two years earlier, the settlor's widow or widower or surviving civil partner,
>
> becomes beneficially entitled to the settled property and is domiciled in the UK.[10]

This relief only applies if the spouse is UK domiciled (or has made a spouse election). The restriction on s.53(4) relief is broadly consistent with the restriction to the spouse exemption considered above.

Section 54(2) IHTA sets out similar rules for the termination of an estate interest in possession on the death of the life tenant.

[9] See 76.10 (Termination of estate IIP).

[10] Section 53 goes on to set out some exceptions not discussed here.

93.4 Disposition for maintenance of spouse

Where the IHT spouse exemption does not apply, another exemption may sometimes fill the gap. An inter-spouse gift may qualify for relief under s.11(1) IHTA:

> A disposition is not a transfer of value if it is made by one party to a marriage[11] or civil partnership in favour of the other party ... and is—
>
> (a) for the maintenance of the other party ...[12]

This should normally[13] apply, in particular, to the common case where an individual gives a half share in the family home to their spouse. The most basic requirement of "maintenance" is to have a secure roof over one's head.[14] In *Phizackerley v IRC*[15] the Special Commissioners correctly stated that the normal reason for such a gift is to give the donee spouse security in her own home. Unfortunately he concluded that it was not "for the maintenance" of the other party, it was to give the other party security. With respect, this can hardly be right, because "security" and "maintenance" are not alternatives. It is because the gift gives the spouse security that it is for her maintenance. But it will now be necessary to appeal to the Upper Tribunal to establish this point.

A gift which is within s.11 IHTA (Disposition for family maintenance) is outside the scope of the GWR rules. For such a disposition is not a transfer of value; so it is deemed not to reduce the transferor's estate: s.3 IHTA. So by implication it must be treated as not being a "disposal by way of gift". (Any other conclusion would lead to absurd results. For a disposition between spouses within s.11 is not a transfer of value, and so not within the IHT spouse exemption, and so would come within the

[11] "Marriage" is defined to include a former marriage in certain cases: s.11(6) IHTA.

[12] I mention for completeness the further relief in s.11(3) which overlaps with s.11(1). In practice an inter-spouse gift which qualifies under s.11(3) will also qualify under s.11(1).

[13] It would be different if the purpose of the gift was not to provide for the spouse but some other purpose, such as IHT planning.

[14] Lump sum payments can constitute "maintenance". Contrast s.2(1)(b) Inheritance (Provision for Family and Dependants) Act 1975 (formerly s.1(4) Inheritance (Family Provision) Act 1938) which states that lump sum payments may constitute "maintenance" for the purpose of the Act. This is also assumed in sch 15 para 10(1)(d) FA 2004 (which takes gifts within s.11 out of the pre-owned assets rules).

[15] [2007] STC (SCD) 328.

GWR rules even if both spouses were UK domiciled.)[16]

The normal expenditure exemption (s.21 IHTA) may also be in point. Gifts which qualify for this exemption are still within the reservation of benefit rule.

93.5 Transferable nil-rate band

93.5.1 *The two nil-rate bands*

For deaths from 6 April 2017, we have two distinct nil-rate bands:
(1) The General Nil-rate band (GNRB)
(2) The Residence Nil-rate band (RNRB)

See too 114.8 (Nil-rate band and DTAs).

93.5.2 *General nil-rate band*

Section 8A(1) IHTA provides:

> This section applies where—
> (a) immediately before the death of a person (a "deceased person"), the deceased person had a spouse or civil partner ("the survivor"), and
> (b) the deceased person had unused nil-rate band on death.

Section 8A(2) IHTA defines "unused nil-rate band on death":

> A person has unused nil-rate band on death if M > VT where—
> M is the maximum amount that could be transferred by a chargeable transfer made (under section 4 above) on the person's death if it were to be wholly chargeable to tax at the rate of nil per cent. (assuming, if necessary, that the value of the person's estate were sufficient but otherwise having regard to the circumstances of the person); and
> VT is the value actually transferred by the chargeable transfer so made (or nil if no chargeable transfer is so made).

The amount of the unused nil-rate band depends on the amount of the chargeable transfer on the death of the first spouse. If there is no chargeable transfer, the full nil-rate band is unused and is transferable.[17]

[16] If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR, because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

[17] Section 8A(3)(4) IHTA.

93.5.3 *Transfer of GNRB non-dom spouse*

The IHT Manual provides:

> **IHTM43042 Domicile of first spouse or civil partner to die** [Sep 2018]
> Every person, UK domiciled or not, is entitled to the full nil rate band to be set against their estate that is subject to IHT.
> The availability of TRNB on the estate of the first to die of a non domiciled spouse or civil partner is calculated only by reference to property that is potentially subject to an UK IHT charge. For a non domiciled spouse or civil partner, **VT** [IHTM43020] will be calculated only by reference to their estate in the UK. Assets held outside the UK, by a person not domiciled, or deemed domiciled in the UK, regardless of the devolution of those assets are not taken into account when calculating the available unused nil rate band.
> Thus where the survivor dies in the UK and their spouse or civil partner, who held no UK assets, died domiciled abroad leaving all their overseas assets to their children, none of the nil rate band was used on the first death. The personal representatives of the survivor may claim to transfer 100% of the nil rate band to the estate of the survivor.
> *Example*[18] (Abdul, Soroya and Jamil)
> A [died] domiciled abroad.
> His only asset situated in the UK was a US dollar account containing US$250,000.
> He left this and the remainder of his estate to his son, J who lives in the UK.[19] After the death, his wife, S, moved to the UK to live with J and died domiciled in the UK.[20]
> The assets situated outside the UK are not liable to IHT.
> The US dollar account is left out of account [IHTM04380] in determining A's estate at death.[21]
> So although the whole estate passed to J, no property was chargeable to IHT, leaving the nil rate available for transfer in full on S's death..

The next section needs to be amended to reflect the increase in the limit

[18] The HMRC example, as is the current trend, contains several facts which are wholly irrelevant to the tax position which makes it harder to identify the relevant points. The following footnotes identify these.

[19] Where the son lives, and where he is domiciled (which may not be the same) are irrelevant to the example.

[20] Where the widow lives and where she dies domiciled, are irrelevant to the example.

[21] See 76.13 (Foreign currency account). It must be assumed that A is non-resident as well as non-domiciled at the time of his death.

for the restricted spouse exemption and the possibility of an IHT spouse election; but it still illustrates relevant points.

> **IHTM43043 calculation where the domicile of the survivor at the first death is outside the UK** [Sep 2018]
>
> On the death of a first spouse or civil partner who was domiciled in the UK, exemption for assets passing to the surviving spouse or civil partner will be limited by IHTA84/S18(2) to £55,000 for transfers before 6 April 2013, and the applicable nil-rate band for transfers on or after this date, if the surviving spouse or civil partner was not domiciled or deemed domiciled in the UK. (IHTM11033)
>
> If the entire estate passed to the surviving spouse or civil partner, anything over the S18(2) limit is a chargeable legacy. Where the net estate is above the nil rate band plus the S18(2) limited exemption there will be no nil rate band to transfer, as illustrated below.
>
> **Example**
>
> Susan died on 1 June 2008, domiciled in the UK. She left an estate worth £450,000 all to her husband Lars who is domiciled in Sweden.
>
> **Unused nil rate band calculation**
>
> **M** = £312,000
>
> **VT** = £395,000 (Estate of £450,000 less limited spouse exemption of £55,000)
>
> **M** is not greater than **VT**, so there is nothing to transfer.
>
> Where the net estate is less than the nil rate band plus the S18(2) limit, there will still be an amount of nil rate band available to transfer. The following example shows how both the amount that the net estate is below the nil rate band, and limited spouse exemption, combine to produce the amount of nil rate band available to transfer.
>
> **Example**
>
> Charles died on 1 October 2014, domiciled in the UK. He left an estate worth £520,000 all to his wife Helga who is domiciled in Sweden.
>
> **Unused nil rate band calculation**
>
> **M** = £325,000
>
> **VT** = £195,000 (Estate of £520,000 less limited spouse exemption of £325,000)
>
> **M** is greater than **VT** by £130,000
>
> **Transferable nil rate band calculation**
>
> **E** =£130,000
>
> **NRBMD** = £325,000 so
>
> (130,000 ÷ 325,000) × 100 = 40.0000%
>
> On Helga's death, the nil rate band on her death would be uprated by 40%. This approach will be appropriate on the death of the survivor

when either

- they remain domiciled abroad and their UK assets exceed the single nil rate band, or
- between the first death and their own, they became domiciled or deemed domiciled in the UK.

However, if Helga elects to be treated as if she is domiciled in the UK (IHTM13040) under the provisions of IHTA84/S267ZA and S267ZB from a date before Charles's death, the limit on the amount of spouse exemption will not apply and the nil rate band on her death would then be uprated by 100%.

93.6 Residence Nil-rate Band

93.6.1 *Tapered withdrawal of RNRB*

There is a tapered withdrawal of the residence nil-rate band for estates over £2 million. The withdrawal rate of £1 for every £2 over this threshold.

Section 8D(5) IHTA provides:

> (g) the person's "adjusted allowance" is—
> (i) the person's default allowance, less
> (ii) the amount given by—
> (E −TT) ÷ 2
> but is nil if that amount is greater than the person's default allowance.

The key terms are E (**E**state) and TT (**T**aper **T**hreshold).

TT is a fixed sum: £2m (+ indexation): s.8D(5)(b)(c) IHTA.

Section 8D(5)(d) IHTA provides:

> E is the value of the person's estate immediately before the person's death.

Excluded property is not part of a person's estate immediately before death[22] so does not reduce the the RNRB.

93.6.2 *Withdrawal of transferable RNRB*

Section 8G(5) IHTA provides for taper of transferable RNRB

> If the value ("RPE") of the related person's estate immediately before the related person's death is greater than £2,000,000, the amount treated under subsection (4)(a) as available for carry-forward is reduced (but not

[22] 1See 74.2 ("Estate").

> below nil) by—
> (RPE – £2,000,000) ÷ 2

For the same reason, excluded property will not reduce the transferable RNRB.

93.7 Gift of BPR/APR property to spouse

This section considers a gift of property qualifying for 100% business or agricultural property relief from a UK domiciled individual to their non-UK domiciled spouse. It is necessary to consider IHT on the gift and the gift with reservation rules. For convenience I refer to business property but similar rules govern agricultural property.

93.7.1 *IHT on gift*

In the normal case of a gift of property qualifying for 100% BPR, the value transferred by the gift is nil. However, s.113A IHTA provides:

> **Transfers within seven years before death of transferor**
> (1) Where any part of the value transferred by a potentially exempt transfer which proves to be a chargeable transfer would (apart from this section) be reduced in accordance with the preceding provisions of this Chapter, it shall not be so reduced unless the conditions in subsection (3) are satisfied.

The conditions which must be satisfied are set out in subsection (3):

> The conditions referred to in subsections (1) and (2) above are—
> (a) that the original property was owned by the transferee throughout the period beginning with the date of the chargeable transfer and ending with the death of the transferor; and
> (b) except to the extent that the original property consists of shares or securities to which subsection (3A) below applies that, in relation to a notional transfer of value made by the transferee immediately before the death, the original property would (apart from s.106 above) be relevant business property.

In brief, BPR is lost unless the property is retained by the donee for seven years. (There is an exception for replacement property which is not discussed here.)

93.7.2 *GWR if donor survives 7 years*

What about GWR? The position varies according to whether or not the donor survives seven years from the gift.

If the donor does survive seven years then s.113A has no application. By subsection (1) it applies to a PET *which proves to be a chargeable transfer*. If the donor survives seven years then the PET does not "prove to be a chargeable transfer". Accordingly the value transferred by the gift remains at nil. The gift therefore normally qualifies as an exempt transfer under:

(1) s.20 IHTA (small gifts); or
(2) s.18 IHTA (IHT spouse exemption).

The gift therefore falls outside the scope of the GWR rules by virtue of s.102(5) FA 1986.

The principle applies to:

(1) outright gifts of 100% BPR property whether or not to spouses;
(2) gifts to trusts under which the spouse has an interest in possession even if such gifts are not "outright gifts" (but consider s.102(5A)).

It does not matter that the property is sold or disposed of by the donee within the seven years as long as the donor has survived seven years. Section 113A(7A) IHTA provides:

> The provisions of this Chapter for the reduction of value transferred shall be disregarded in any determination for the purposes of this section of whether there is a potentially exempt or chargeable transfer in any case.

This is irrelevant because the disregard is only for the purposes of s.113A, not for the purposes of ss.18, 20 IHTA and s.102 FA 1986.

93.7.3 *GWR if donor dies in 7 years*

The position is different if the donor dies within seven years. Suppose:

(1) H (UK domiciled) gives 100% BPR property to W (foreign domiciled);
(2) H dies within seven years;
(3) The conditions in s.113A(3) are not satisfied (for instance the property has been sold[23] or disposed of by the donee).

In that case the value transferred is *not* reduced: s.113A(1). It is considered that the disallowance of BPR applies for all purposes of IHT. So the gift falls outside the protection of ss.18 and 20 IHTA (assuming the

[23] Though there is a possibility of reinvestment relief in this case: see s.113B IHTA.

value transferred exceeds the nil-rate band limit and £250 respectively) and the GWR provisions can in principle apply.

It is impossible to believe anybody actually thought through these rules at the time the legislation was enacted. But these are the consequences of the words used and the result, if a little complicated, is relatively sensible.

93.8 Divorce settlement

Suppose:

(1) H transfers assets to W in order to settle a divorce claim, and
(2) The disposition falls outside the IHT spouse exemption.[24]

No IHT charge arises. First, the disposition is not a transfer of value, if made under court order.[25] Secondly, s.10 IHTA provides:

> **Dispositions not intended to confer gratuitous benefit**
> (1) A disposition is not a transfer of value if it is shown that it was not intended, and was not made in a transaction intended, to confer any gratuitous benefit on any person and either—
> (a) that it was made in a transaction at arm's length between persons not connected with each other, or
> (b) that it was such as might be expected to be made in a transaction at arm's length between persons not connected with each other.

H does not normally intend to confer any "gratuitous benefit" on W. (Assume the divorce settlement is negotiated at arm's length.) Accordingly the disposition falls within s.10 IHTA and is not a transfer of value for IHT purposes.

There is a theoretical HMRC argument that the condition in s.10(1)(b) IHTA is not satisfied. The argument would be that a divorce settlement cannot be "such as might be expected to be made in a transaction at arm's length between persons not connected with each other" since persons not connected with each other would not be in a divorce situation. In my view this argument is not correct. It is the old question of how far one carries the deeming.[26] The argument carries it too far because it reaches a

[24] This may be because H is UK domiciled and W is not; or because the transfer is made after the marriage is dissolved.

[25] See *McCutcheon on IHT* (7th ed., 2017), para 2.35. Relief may also be available under s.11 IHTA; see 93.4 (Disposition for maintenance of spouse).

[26] See App 8.2 (Deeming provisions: Construction).

conclusion which does not fit in with the scheme of the IHTA. IHT Manual (while not explicit) suggests that HMRC do not take the point.[27]

93.9 Spouse gift: Associated operations

For the background law, see 74.16.1 (Channelling). The IHT manual provides:

> **IHTM14833 Gifts between spouses or civil partner** [Sep 2018]
> Where property
> - given unconditionally by one spouse or civil partner (IHTM11032) to the other is
> - subsequently transferred by the latter to a third party,
>
> you cannot use the associated operations provisions to attribute the transfer to the first spouse or civil partner.
> The Chief Secretary to the Treasury assured Parliament that this would be HMRC's practice,[28] and it was publicised in a Press Release dated 8

[27] IHTM04165 [September 2008]: "Dispositions made on divorce or dissolution of a civil partnership for the benefit of a former spouse or civil partner, whether under a Court Order or as a result of arm's length negotiations, are normally within s.10 IHTA 1984."

[28] Lord Barnett, then Chief Secretary to the Treasury, said (Hansard HC Deb, 10 Mar 1975, vol 888 col 56):

> "... it is reasonable for a husband to share capital with his wife when she has no means of her own. If she chooses to make gifts out of the money she has received from her husband, there will be no question of using the associated operation provisions to treat them as gifts made by the husband and taxable as such.
> In a blatant case, where a transfer by a husband to a wife was made on condition that the wife should at once use the money to make gifts to others, a charge on a gift by the husband might arise under the clause..."

But the conditional gift would not qualify for the IHT spouse exemption.

> "I want to give an example of certain circumstances that could mean the clause having to be invoked. There are complex situations involving transactions between husband and wife and others where, for example, a controlling shareholder with a 60% holding in a company wished to transfer his holding to his son. If he gave half to his son, having first transferred half to his wife, and later his wife transferred her half share to the son, the effect would be to pass a controlling shareholding from father to son. The Revenue would then use the associated operations provisions to ensure that the value of a controlling holding was taxed."

But this overlooks s.161 IHTA (related property).

> "There are ordinary, perfectly innocent transfers between husband and wife. For example, where a husband has the money and the wife has no money—or the other way round, which happens from time to time—and the one with the money gives something to the other to enable the spouse to make a gift to a son or a daughter on

April 1975.[29]

93.10 Non-dom spouse: IHT planning

93.10.1 *Gift to non-dom spouse*

A simple short- and medium-term course is:

(1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely;

(2) the foreign domiciled spouse keeps the assets in a form where remain excluded property (in short, non UK situate).

The gift may be a PET but that may not in practice be a serious concern. If the reservation of benefits rule applies, however, this effectively neutralises any tax saving. Indeed it may make the position worse. See 78.19 (GWR on death: Spouse exemption). This often makes simple gifts impractical.

93.10.2 *Gift to spouse + gift to trust*

A longer term approach may be:

(1) the UK domiciled spouse gives assets to their foreign domiciled spouse; and

(2) the foreign domiciled spouse subsequently gives the assets to a settlement.

In principle the property in the settlement may be excluded property. One advantage of this is if the donee spouse later becomes UK domiciled. [30]

> marriage, that transaction would not be caught by the clause. It would be a reasonable thing to do."

But there is no mention of reasonableness in the associated operations rules, and the IHT Manual does not seek to read it in.

This illustrates one of the difficulties in relying on Hansard: the author was not familiar with the newly introduced CTT rules, and his answer would not have reached a pass standard in the CTA examination. However one can collect from the earliest times a strong inclination not to apply associated operations to inter-spouse transfers

[29] [1975] STI 191: "Section [286] is not seen as affecting the ordinary case where a gift between husband and wife is followed by a gift from the recipient spouse to a third party, unless it was a condition of the first gift that the second should be made. It may, however, be apt to apply in more complex situations where a transfer between husband and wife forms part of a series of associated operations, the effect of which as a whole are merely the means whereby one of them makes a disposition in favour of a third party."

[30] See 76.17.2 (Anticipation of UK domicile).

Another advantage is CGT planning. A third advantage is that this should avoid the gifts with reservation rule.[31] This arrangement only works if the UK domiciled spouse is not a settlor.[32]

93.11 CGT spouse exemption

Section 58 (1A) TCGA provides:

> If an individual ("A") disposes of an asset to another individual ("B") in circumstances where any of subsections (1B) to (1D) applies, A and B are to be treated as if B acquired the asset from A for a consideration of such amount as would secure that on the disposal neither a gain nor a loss would accrue to A.

I refer to this as the "**CGT spouse exemption**".

There are three circumstances where the spouse exemption applies. The first concerns spouses living together:

> (1B) This subsection applies where the disposal is made while A and B—
>
> (a) are married to, or are civil partners of, each other, and
>
> (b) are living together.[33]

FA 2023 has extended the exemption to cases of separation and divorce:[34]

> (1C) This subsection applies where the disposal is made—
>
> (a) while A and B are married to, or are civil partners of, each other,
>
> (b) at a time when A and B have ceased to live together, and
>
> (c) before the earlier of—
>
> (i) the last day of the third tax year after the tax year in which A and B ceased to live together, or
>
> (ii) the day on which a court grants an order or decree for A and B's divorce, the annulment of their marriage, the dissolution or annulment of their civil partnership, their judicial separation or, as the case may be, their separation in accordance with a separation order.

[31] See 78.16 (Gift to non-dom who creates trust).

[32] See 99.41 (Planning to create excluded property trust).

[33] See App 3.4.3 (Living together: married couple).

[34] This followed an OTS recommendation; see *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1037446/FINAL_FST_response_to_OTS.pdf*
It is not in fact a simplification, but it is an improvement, so one should not quibble.

> (1D) This subsection applies where—
> (a) 5A and B have ceased to be, or are in the process of ceasing to be, married to, or civil partners of, each other, and
> (b) the disposal of the asset is in accordance with an agreement or order within subsection (2)(a) or (b) of section 225B (disposals in connection with divorce etc).

The CGT spouse exemption applies regardless of the domicile of the spouses. It applies to sales at market value as well as gifts.

The relief does not apply to:

(1) Unmarried couples
(2) Married couples living apart after 3 years of separation

Section 58(2) TCGA provides two exceptions:

> This section shall not apply—
> (a) if until the disposal the asset formed part of trading stock of a trade carried on by the one making the disposal, or if the asset is acquired as trading stock for the purposes of a trade carried on by the one acquiring the asset, or
> (b) if the disposal is by way of donatio mortis causa [gift in anticipation of death][35]

Section 58(2) TCGA provides:

> ... but this section shall have effect notwithstanding the provisions of section 18[36] or 161 [appropriation to trading stock], or of any other provisions of this Act fixing the amount of the consideration deemed to be given on a disposal or acquisition.

93.12 Non-dom spouse: CGT

Suppose the UK domiciled spouse owns an asset which will give rise to a gain on a disposal. A simple course is:

(1) The UK domiciled spouse transfers[37] the asset to their foreign domiciled spouse.
(2) The foreign domiciled spouse may be in a position to sell the asset

[35] See 88.7.3 (Gift in anticipation of death).

[36] See App 4.10.9 (Deemed non-arm's length).

[37] The transfer may be a gift or a sale at market value. The latter avoids the IHT problems discussed at 93.2 (Restricted IHT spouse exemption) and 78.10 (GWR spouse exemption) but take care on implementation, especially s.58(2) TCGA. In the case of a sale the transferee spouse will need independent legal advice.

without CGT.[38]

The same may apply if one spouse claims the remittance basis and the other does not.

The same applies the other way if the asset will give rise to a loss on a disposal.

93.13 Non-resident spouse: CGT

Section 282 ICTA 1988, which also applied for CGT purposes, formerly provided (so far as relevant):

> *(1) A married woman shall be treated for income tax purposes as living with her husband unless ...*
>
> *(b) they are in fact separated in such circumstances that the separation is likely to be permanent.*
>
> *(2) Where a married woman is living with her husband and ...*
>
> *(a) one of them is, and the other is not, resident in the UK for a year of assessment ...*
>
> *the same consequences shall follow for income tax purposes as would have followed if, throughout that year of assessment, they had been in fact separated in such circumstances that the separation was likely to be permanent.*

The effect was that the CGT spouse exemption did not apply where one spouse was non-resident. This had two consequences:

(1) On a gift from a non-resident spouse to a UK resident spouse, the UK resident took the asset at its market value, which was (likely to be) an advantage

(2) On a gift from a UK resident spouse to a non-resident, the disposal was at market value which was (likely to) give rise to a charge to tax.

However s.282(2) was repealed in 1988, as part of the introduction of separate taxation for husband and wife. So now the CGT spouse exemption applies regardless of residence, provided they are "living together" or (in short) recently separated.

The CG Manual provides:

> **CG22300 NR spouse or NR civil partner** [Dec 2021]
>
> ... There is no longer any authority to treat a non-resident spouse as separated from a resident spouse merely because of their residence

[38] See 56.6 (Territorial scope of CGT).

> status. Similarly a non-resident civil partner may not be treated as separated from a resident civil partner merely because of their residence status.

The point is repeated in CG26060.

It follows that CGT planning by a transfer to non-resident spouses is not tax avoidance, in the strict sense: by repealing s.282(2) Parliament has accepted it.[39]

The temporary non-residence rules need to be considered.[40]

93.13.1 *CGT spouse exemption: Critique*

There is something to be said stopping CGT planning by a transfer from a UK resident to a non-resident spouse. There are various ways this may be done. The basic idea would be a rule that an inter-spouse gift should not qualify for the CGT spouse exemption if:

(1) The donor spouse ("H") was UK resident; and
(2) The donee spouse ("W") was non-resident

The IHT spouse exemption may be regarded as a precedent (ignoring the complication of spouse-election domicile).

One might supplement that with a further rule which also prevented the CGT spouse exemption if the gift was to W when UK resident but

(1) the gift was made in anticipation of W becoming non-resident; or
(2) a clawback if W becomes non-resident within (say) 6 years (a more objective rule, following the precedent of hold-over relief[41]).

[39] The position was different before 1988 when s.282(2) was in force. The pre-1988 law is of historic interest only, but the question of when use of non-resident status constitutes tax avoidance is as current as ever. On this point the pre-1988 case of *R v IRC ex p. Fulford-Dobson* 60 TC 168 remains of interest. The facts were:
(1) In 1980, W made a gift to H when he was UK resident (so the CGT spouse exemption applied)
(2) H became non resident and disposed of the gifted asset. Had H waited until the next tax year the planning would have succeeded. But the sale took place in the same tax year as the migration. H had to rely on ESC D2 (prior to the current split year rules, this concession provides CGT relief on a disposal during a non-resident part of a split year.)

The concession did not apply in cases of avoidance. And it was "plain as a pikestaff upon the facts that this was tax avoidance"; see p.179.

[40] In particular, the usual CGT relief for post-departure acquisitions does not apply. See 11.7 (Post-departure acquisitions).

[41] See 12.2 (Hold-over clawback: Emigration of individual).

As always, the trade-off rests between complexity and efficacy. But there is no reason to think this reform will happen.

93.14 Non-dom/non-resident spouse: IT

A simple course is:

(1) The UK domiciled spouse ("donor spouse") may give assets to their foreign domiciled spouse absolutely; and
(2) The foreign domiciled spouse may invest in foreign property giving rise to foreign investment income which is not remitted.

Similarly:

(1) A UK resident spouse ("donor spouse") may give assets to their non-resident spouse absolutely; and
(2) The non-resident spouse invests in property whose income is not subject to IT (foreign source or within the non-residents income tax exemption).

93.15 s.624 spouse exemption

An inter-spouse gift is a settlement-arrangement,[42] and in principle the settlor would be taxed under s.624 ITTOIA. However, s.626(1) ITTOIA provides relief:

> The rule in s.624(1) does not apply in respect of an outright gift—
> (a) of property from which income arises[43],
> (b) made by one spouse to the other or one civil partner to the other, and
> (c) meeting conditions A and B.

I refer to this as the **"s.624 spouse exemption"**.

There are (in short) three main conditions: outright gift, condition A and condition B.

This relief applies regardless of the residence and domicile of the spouses.

93.15.1 *Outright gift*

Section 626(4) ITTOIA provides:

[42] See 87.4 (Settlement-arrangement definition).

[43] The words "from which income arises" seems otiose, because if no income arises, s.624 cannot operate. But it explains the reference to "the income" in condition A.

> A gift is not an outright gift for the purposes of this section if—
> (a) it is subject to conditions, or
> (b) there are any circumstances in which the property, or any related property[44]—
> (i) is payable to the giver,
> (ii) is applicable for the benefit of the giver, or
> (iii) will, or may become, so payable or applicable.

In *Young v Pearce* the issue of shares at an undervalue was an outright gift:

> If the creation and allotment of the preference shares constituted a settlement, the subject-matter of which was the preference shares allotted to the wife of each of the taxpayers, it must follow that the allotment of the preference shares taken by each wife was an outright gift from which income (the dividends paid on the preference shares) arose.[45]

In *Jones v Garnett* the purchase of shares of an "off the shelf" company was an outright gift:[46]

> The Revenue say ... there was no gift of the share by Mr Jones to Mrs Jones. He never owned the share which she took. It belonged to the formation agents and Mrs Jones bought it from them for £1.
> It was Mr Jones's consent to the transfer of a share with expectations of dividend to Mrs Jones for £1 which gave the transfer the "element of bounty" for the purposes of [the settlor-interested trust code]. By the same token, I think it made the transfer a "gift" for the purposes of [what is now s.626(4)]. And there is no dispute that, if it was a gift, it was outright.

And again:

> Mr Jones did not actually make a transfer by way of gift to his wife of one of the two issued shares in Arctic. She bought it at par from the company formation agents. But it was not the sort of arrangement that would have been made between strangers dealing with each other at

[44] s.626(5) ITTOIA provides a referential definition: 'Related property' has the same meaning in this section as in s.625. See 47.6.2 ("Settlor-interested" for s.624").

[45] 70 TC 331 at p.345.

[46] [2007] UKHL 35 at [27] and [53]. For other aspects of this case, see App.2.2.6 (Identifying the arrangement).

> arm's length. Arctic was the chosen vehicle through which Mr Jones was to offer his valuable services as an IT consultant, and it was an act of bounty on his part to permit his wife to acquire half its equity for the nominal sum of £1. In my opinion that amounted to an outright gift of the share within the meaning of [what is now s.626(4)].

In strictness, I would have thought that a purchase of the share was an arm’s length transaction between Mrs Jones and the company formation agent vendors; and it was not “made by one spouse to the other”. The reader may think that both these cases have adopted a loose and generous reading. But it is purposive and sensible, avoids anomalies,[47] and the law is settled.

A dividend waiver is not an outright gift of property from which income arises.[48]

93.15.2 *Subject to conditions*

TSEM provides a straightforward example:

> **TSEM4205 outright gifts between spouses or civil partners** [Jul 2017]
>
> ...
>
> **Example 4 - outright gift**
>
> X owns a property that is let at a commercial rent to an unconnected third party. X transfers the property by outright gift to his spouse Y who then receives the rents. X has no further interest in or rights over the property. The rents that Y receives are not subject to the settlements legislation. They are Y’s income for tax purposes.

That is self-evident. The point is to set the scene for the next example.

> **Example 4a - no outright gift**
>
> The facts are as in example 4 but the gift is subject to an agreement under which X can require his spouse to return the property to him at a future date. This is a gift with conditions and there are circumstances in which the gifted property may return to the giver so it is not an outright gift. The rents that Y receives are subject to the settlements legislation.

[47] Mr Jones could have subscribed for the 2 shares himself, and then given one to his wife. Indeed, if he had been better advised, that is what he would have done. That would have more clearly been an outright gift made by one spouse to the other. But the end result is the same.

[48] This is self-evident, but if authority is needed, see *Donovan v HMRC* [2014] UKFTT 048 (TC) discussed at 99.19 (Dividend-waiver settlement).

They are X's income for tax purposes.

93.15.3 *Condition A*

Section 626(2) ITTOIA provides:

> Condition A is that the gift carries a right to the whole of the income.

This is otiose, as if the gift does not carry the right to the whole of the income, it is surely not an outright gift.

93.15.4 *Condition B*

Section 626(3) ITTOIA provides:

> Condition B is that the property is not wholly or substantially a right to income.

In *Young v Pearce*[49] a company owned jointly by A & B issued preference shares to the spouses of A and B, for a nominal £50.

The preference shareholders were entitled to:

(1) 30% of the dividends (if dividends were declared)
(2) on liquidation, repayment of the £50 subscribed for the shares
(3) to speak but not to vote at shareholder meetings

So apart from the right to income, the only rights were to repayment of the nominal £50 paid on the issue of the shares, to attend but not vote at shareholder meetings, and general shareholder rights such as the right not to be unfairly prejudiced. The rights attached to the preference shares were not wholly a right to income. But the rights were "substantially" a right to income.

Contrast an ordinary share. In *Jones v Garnett*:[50]

> ... the revenue say that the property given, i.e. the share, was "wholly or substantially a right to income". It is true that the value in the share arose from the expectation that it would generate income. But that is true of many shares, even in quoted companies. The share was not wholly or even substantially a right to income. It was an ordinary share conferring a right to vote, to participate in the distribution of assets on a winding up, to block a special resolution, to complain under [what is now s.994 CA 2006]. These are all rights over and above the right to income. The ordinary share is different from the preference shares in

[49] 70 TC 331.
[50] [2007] UKHL 35 at [30].

> *Young v Pearce*, which conferred nothing except the right to 30% of the net profits before distribution of any other dividend and repayment on winding up of the nominal amount subscribed for their shares. Those shares were substantially a right to share in the income of the company.

I would have said the Revenue argument was almost hopeless, but one judge found the point "rather difficult".[51]

See too 99.21.1 (Partnership with spouse).

93.16 Gift to spouse: s.720

A non-resident or non-domiciled individual is a "person abroad". A gift to a non-resident or non-dom spouse is (at least at first sight) a relevant transfer.[52] The transferor has "power to enjoy" the income of the "person abroad".[53] So (at least at first sight) the transferor (the donor spouse) is in principle taxed under s.720 ITA.

However RI 201 states that HMRC do not take this point:

> Unless transactions are part of a wider arrangement, Revenue practice is not to seek to assess a UK domiciled individual on the income of a non-UK domiciled spouse,[54] where that income
> [1] arises from a transfer of assets by that spouse and
> [2] would be outside the charge to tax under [s.720 ITA] by virtue of the provisions of [s.726 ITA, ToA remittance basis].

The INT Manual cites this and continues:

> **INTM600460 General Conditions: The Individual** [Jul 2023]
> In general (unless there are wider arrangements), HMRC will not use the transfer of assets legislation to charge tax on one spouse or civil partner in respect of the income arising to the other, where
> [1] that spouse or civil partner has made a transfer of assets
> [2] but is, for example, outside the charge because they are a remittance basis user.[55]

[51] at [56].

[52] See 48.3 ("Relevant transfer") and 48.5 ("Person abroad").

[53] See 48.18 (Spouses of individuals).

[54] Tax Bulletin 81 states (obviously) that the same practice applies to civil partners.

[55] For completeness, the INT Manual continues:

"In effect the general approach will be to apply the word individual (where the individual has a spouse or civil partner) in a way that is consistent with the individual who has the power to enjoy income of a person abroad, entitlement to a capital sum, or who receives a benefit as a result of relevant transactions. But it may

This confirms the practice in RI 201. RI 201 does not consider the case of a transfer to a non-resident donee spouse, but the same principle must apply, and that is also suggested by the words "for example" in the INT Manual.

Is this law or concession? The transferor may not mind if they are untaxed by law or concession, but the issue might arise:

(1) If HMRC change their practice, or argue that it does not apply in a particular case.

(2) Before a tribunal, which will apply the law and not a concession.[56]

It is considered that the practice is correct in law. An inter-spouse transfer is not a transfer of assets, for the purposes of the ToA rules, and so not a relevant transfer. References to an individual include the spouse,[57] and one cannot transfer an asset to oneself. This is consistent with the purpose of the deeming provision: In the age of independent taxation, it is not likely to be the intention of parliament to tax the donor spouse on a straightforward inter-spouse transfer.

be equally valid in this context to use the term in a way that is consistent with an individual who, by means of relevant transactions, seeks to avoid a liability to income tax.

Where spouses or civil partners are in some way connected with relevant transactions and the results of such transactions, regard will be had to the particular facts where the extended meaning of individual may impact upon the potential charge.

Example

Mrs A is UK resident but not UK domiciled and is also a remittance basis user. She is married to Mr A, who is both UK resident and domiciled.

Mrs A has owned foreign investments for a number of years and she decides to transfer these investments to an overseas company in exchange for shares in the offshore company. Mrs A is a remittance basis user who, although potentially liable to tax on the income of the overseas company under ITA07/S720, will not be liable unless the income of the company is remitted to the UK.

As the relevant transfer is not part of a wider arrangement and Mr A does not have the power to enjoy the income of the overseas company, HMRC would not seek to assess him under ITA07/S720 as the spouse of Mrs A."

[56] The motive defence may also be in point, but no-one expects the transferor to claim the motive defence in their tax return.
This issue might arise in the context of divorce, where the spouses would need to ascertain their potential tax liabilities, as both transferor and transferee are potentially liable, if the ToA rules apply; but in practice the issue is not likely to cause concern.

[57] See 48.18 (Spouse of transferor).

93.17 Gifts to spouse: GAAR

GAAR example D19[58] is not is not precisely on-topic, but it does support the view that inter-spouse transfers discussed in this chapter are not within the scope of the GAAR.

[58] See 88.5.5 (Rebasing on death: Planning).

CHAPTER NINETY FOUR

JOINT ACCOUNTS

94.1 Introduction
94.2 Property law background
94.3 Joint account: IHT
94.3.1 Account in both a/c holders estates
94.3.2 Account holder pays into joint a/c
94.3.3 Death of account holder
94.3.4 IHT spouse exemption on death of a/c holder
94.3.5 One a/c holder pays in, other withdraws
94.3.6 IHT spouse exemption on withdrawal
94.3.7 One a/c holder pays in & withdraws
94.3.8 Third party pays in
94.3.9 Gift from account
94.4 Trust from joint account: Who is settlor
94.5 Scottish joint account
94.6 Remittance from joint account
94.6.1 One account holder remittance basis user
94.6.2 Both account holders remittance basis users
94.7 Property held jointly by spouses
94.7.1 Settlor-interested trust
94.7.2 Remittance basis and spouses joint accounts
94.8 Planning for joint account

94.1 Introduction

This chapter considers a joint bank or building society account held by two account holders. I refer to money in the account as “account money”.

I consider the following topics:

(1) IHT on payments in and out of the account
(2) Who is the settlor on a payment from the account to a trust
(3) Taxation of income arising from the account
(4) Remittances from the account

94.2 Property law background

First one must ascertain the rights of the account holders. It would need a chapter to analyse the relevant case law.[1]

[1] For a summary see *Dymond’s Capital Taxes* (looseleaf), para 10.400; Law Commission, “Cohabitation: the financial consequences of relationship breakdown” Law Com No 307 (2007), para A.46

There is an important distinction between:

(1) an account on which a transfer can be made by either account holder
(2) an account on which a transfer needs the approval of both account holders

This chapter only considers the first type of account.

In outline, three distinct questions arise:

(1) *Beneficial ownership of the account money while in the account*. The possibilities are:
    (a) Entitlement in equal shares (the most common case)
    (b) Entitlement in proportion to contributions and withdrawals[2]
    (c) One account holder beneficially entitled to the whole
(2) *Beneficial ownership of money withdrawn from the account* (or assets purchased with that money). The possibilities are:
    (a) Individual who withdraws funds becomes beneficial owner (the most common case)[3] or

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/228881/7182.pdf
Further consideration is needed for an account not governed by English law; but an English court will assume English law principles apply in the absence of evidence to the contrary, see 90.60.2 (UK law assumed to apply). I expect English law/common law principles apply in most common law jurisdictions; eg in Ireland, Lynch v Burke ITR Vol 5, p.271.

[2] In practice the court will assume this is not the case unless there is evidence, such as appropriate records kept by the account holders. *Sillars v IRC* [2004] STC (SCD) 180 at [11] gives cogent reasons for rejecting this analysis for the parent/child account.

[3] See *Re Bishop* [1965] Ch 450 at p.456:

> “Where a husband and wife open a joint account at a bank on terms that cheques may be drawn on the account by either of them, then, in my judgment, in the absence of facts or circumstances which indicate that the account was intended, or was kept, for some specific or limited purpose, each spouse can draw upon it not only for the benefit of both spouses but for his or her own benefit. Each spouse, in drawing money out of the account, is to be treated as doing so with the authority of the other and, in my judgment, if one of the spouses purchases a chattel for his own benefit or an investment in his or her own name, that chattel or investment belongs to the person in whose name it is purchased or invested: for in such a case there is, in my judgment, no equity in the other spouse to displace the legal ownership of the one in whose name the investment is purchased. What is purchased is not to be regarded as purchased out of a fund belonging to the spouses in the proportions in which they contribute to the account or in equal proportions, but out of a pool or fund of which they were, at law and in equity, joint tenants. It also follows that if one of the

   (b) Same as beneficial ownership of the account money (as to which see above)
(3) *Beneficial ownership of account money after death of an account holder.* The possibilities are:
   (a) The survivor is beneficially entitled by survivorship
   (b) The deceased owner's share (as to which see (1) above) passes under their will or intestacy

The answer to one of these questions does not determine the answers to the others. For instance, account money may belong beneficially to one of the account holders, eg H and W may hold as nominees for H. Such an account may be held on terms that:
(a) on the death of H, the account money passes to W by survivorship;[4] or
(b) the account money may pass under the will of H.

The permutations are almost endless. Note that joint tenancy/tenancy in common is not a comprehensive categorisation since those two terms alone are insufficient to determine the answers to the three questions which may arise.

The property law position depend on the account documentation. That should answer the question, but if it does not, the position depends on the intention of the account holders.[5] In practice spouses and cohabitees generally operate joint accounts without giving any consideration to the ownership of the money; there is just a general desire to pool resources. A search for intention is unrealistic.

Account documentation can vary, as can the intentions of account holders, but the usual position is that:
(1) Account money is beneficially owned in equal shares
(2) Withdrawals belong to the account holder who withdraws the funds
(3) Beneficial ownership passes by survivorship

spouses draws on the account to make a purchase in the joint names of the spouses, the property purchased, since it is purchased in joint names, is, prima facie, joint property and there is no equity to displace the joint legal ownership. There is, in my judgment, no room for any presumption which would constitute the joint holders as trustees for the parties in equal or some other shares."

[4] As in the parent/child joint account *O'Neill v IRC* 1998 STC (SCD) 110; the apparent breach of the Wills Act 1837, and the possibility that this is a settlement for IHT, are tacitly ignored.

[5] *Whitlock v Moree* [2017] UKPC 44.

I refer to this as a "**common form account**".

The circumstances in which parent/child joint accounts arise are different so the rights of the account holders tend to be different. For instance, the terms of the account may be that:

(a) One account holder ("P") may withdraw up to the whole amount of P's benefit and the others may make no withdrawal at all during P's lifetime.

(b) The balance may pass to the survivor by survivorship.[6]

In this case the fund is in the estate of P for IHT purposes. The funds are not in the estate of the other account holder during the life of P: their rights have no substantial value.

The following analysis applies to a common form account.

Further consideration is needed if one account holder has lost legal capacity.[7]

94.3 Joint account: IHT

94.3.1 *Account in both a/c holders estates*

In strict law the *whole* of the account money is in the estate of *both* account holders, under s.5(2) IHTA which provides:

> A person who has a general power which enables him... to dispose of any property other than settled property, ... shall be treated as beneficially entitled to the property ... and for this purpose "general power" means a power or authority enabling the person by whom it is exercisable to appoint or dispose of property as he thinks fit.[8]

[6] This was found to be the case on the facts in *Sillars v IRC* [2004] STC (SCD) 180.

[7] Office of the Public Guardian, "Manage a bank account for someone else" provides:
"If one joint account holder loses mental capacity, banks and building societies can decide whether or not to temporarily restrict the use of the account to essential transactions only (for example, living expenses and medical or residential-care bills) until a deputy has been appointed or a power of attorney registered."
https://www.gov.uk/government/publications/deputy-and-attorney-guidance-dealing-with-banks/manage-a-bank-account-for-someone-else-web-version (May 2023)
I find that somewhat surprising, but it may depend on the documentation of the account.

[8] This was accepted without discussion in *IRC v Melville* EWCA Civ 1247 at [36]:
"... the inheritance tax regime produces instances of double taxation ... A clear example is one falling within s 5(2) of the Act, the very common case of a joint bank account which permits any holder to draw on that account. The same property, the

Beneficial ownership is therefore irrelevant for IHT and GWR is irrelevant on death of an account holder.

94.3.2 *Account holder pays into joint a/c*

Payment into the joint account by an account holder is not a transfer of value because the estate of the payor is not decreased by the payment. HMRC agree. The IHT Manual provides:

> **IHTM15043 Lifetime gifts arising out of a transfer of an account into joint names** [May 2020]
> If A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account. ...

Payment into the joint account by an account holder is not a GWR. HMRC do not accept that[9] but in practice GWR does not often matter.

94.3.3 *Death of account holder*

Each account holder is strictly subject to IHT on death on the whole of the account money (subject to exemptions such as the spouse exemption). This rule would result in double taxation but that is undone by concession.

moneys in the account, is under s 5(2) taxable on the death of each holder. The Revenue in practice do not strictly enforce that provision and treat each holder as beneficially entitled only to the proportion of monies in the account which he has contributed."

[9] The IHT Manual is garbled; so far as relevant it provides:

> **"IHTM15061 Gifts with reservation** [May 2020]
> An example of a joint ownership arrangements involving a GWR is ... if ... A transfers ... a joint money account into joint beneficial ownership of himself and his son, and then A either
> - receives (or has the right to receive) all the ... interest for his own benefit or
> - has the right to withdraw all the money in the joint account for his own benefit."

Possibly the Manual means to say that there is a GWR if A transfers *his money* into a joint account and has the right to withdraw all the money. This view is supported by *Sillars v IRC* [2004] STC (SCD) 180 (where the taxpayer was not represented by counsel). But it is considered that a payment into an account of this kind is not a disposal by way of gift. If it were a GWR, many difficulties arise which the Tribunal did not consider in *Sillars*. On the death of A, however, since the property is in the estate of the individual, it does not matter whether payment into the account was a GWR.

The IHT Manual provides:

> **IHTM15042 Joint money accounts** [Dec 2021]
> Applying the Inheritance Tax provisions (IHTM15012) to joint accounts can be particularly difficult. In practice:
>
> - You should normally regard each account holder as beneficially entitled (IHTM15011) to the proportion of the account which is attributable to their contributions. So - if the deceased provided the whole of the money, the whole of the account at death should be included in the IHT400 (IHTM10021)
> - When calculating this proportion you should assume that any money withdrawn by each person should be set as far as possible against their own contributions, despite the rule in *Clayton's Case* [1816] 1 Mer 572
> - You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.
> - In most cases each joint owner has an unrestricted right to withdraw any part of the amount in credit in the account and keep the funds for their own use (for example, see *Re Bishop* [1965] Ch 450). *You should not use the fact that this right exists to argue that tax is due (for example, by referring to the definition of 'property' in IHTA84/S272 or the 'general power' provision in IHTA84/S5(2)) on a share of the account that is greater than the share provided by the joint owner.*
> - When establishing the share based on the deceased's contributions you should note that the true legal position is far from clear so it is important to establish the facts and obtain any relevant documents, such as application forms, withdrawal mandates, passbooks, terms and conditions of account before considering the legal and equitable rules...

94.3.4 *IHT spouse exemption on death of a/c holder*

This section considers the IHT spouse exemption on the death of an account holder. For the IHT spouse exemption generally see 76.5.1 (IHT spouse exemption).

There are two possibilities:

(1) The account holders may not qualify for the spouse exemption because:

(a) They are married but one is, and one is not, UK domiciled.[10] (This scenario is closest to the themes of this book, but one cannot examine it in isolation from the others.)
(b) They are cohabitees.
(c) There is some other unmarried relationship, such as parent and child.

(2) The account holders may qualify for the IHT spouse exemption.

In the second case, the IHT spouse exemption applies to the transfer of value on the death of an account holder. HMRC agree. The IHT Manual passage continues:

> Refer to TG (IHTM01081) any case in which the parties dispute the claim. However, there is no need to refer if the deceased's interest passes to an exempt beneficiary, such as a surviving spouse or civil partner (IHTM11032). You should also avoid questions and arguments on this subject unless the amount of tax at stake is substantial.

This is correct, though it needs a slightly purposive construction to say that property "becomes comprised" in the estate of the surviving spouse when the property is already in that estate.

94.3.5 *One a/c holder pays in, other withdraws*

Suppose:
(1) A transfers A's money into the joint account held by A and B and
(2) B withdraws that money into B's own name.

A's estate is reduced at stage (2).

A does not make a transfer of value at stage (2) within the normal definition, in s.3(1) IHTA, as that requires a disposition.[11] A does not make a disposition.

One might think that A makes a transfer of value by omission under s.3(3) IHTA.[12] This provides:

> Where the value of a person's estate is diminished, and the value—
> (a) of another person's estate ...
> is increased by the first-mentioned person's omission to exercise a right,

[10] In this section I ignore the limited IHT spouse exemption and spouse election rules.

[11] See 74.3 (Transfer of value/value transferred).

[12] See 74.5 (Omission: Deemed disposition).

> he shall be treated for the purposes of this section as having made a disposition at the time (or latest time) when he could have exercised the right ... .

But the value of the estate of B, the account holder who withdraws the funds, is not increased, so s.3(3) does not apply.

However, s.272 IHTA provides an extended definition of "disposition":

> "disposition" includes a disposition effected by associated operations;

It is considered that A makes a disposition (and hence a transfer of value) by associated operations at stage (2). The associated operations are:
(1) A's payment into the account
(2) B's withdrawal from the account[13]

HMRC agree. The IHT Manual provides:

> **IHTM15043 Lifetime gifts arising out of a transfer of an account into joint names** [May 2020]
> If A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account. But if any part is subsequently withdrawn for the benefit of B, the other joint owner, there may be a transfer at that time.
> Refer to Technical any case where
> - a withdrawal of this kind has been made
> - it is claimed that there was an immediate gift when the money was paid into the joint account
> - there is evidence that an immediate gift was intended, or
> - the position is more complicated - for example where withdrawals need both signatures
>
> **(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**
> **IHTM15042 Joint money accounts** [May 2020]
> ...You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.....

[13] See 74.11 ("Associated operation") and 74.16 (Transfer of value by 2 operations). It might be argued that the associated operation is A's omission to withdraw from the account; it makes no difference if this is the case.

94.3.6 *IHT spouse exemption on withdrawal*

The IHT spouse exemption may apply to the transfer of value on the lifetime withdrawal by an account holder. Since HMRC accept the application of the spouse exemption on death, they must also accept its application during the lifetime of the account holders.

The exemption does not of course apply when one spouse is and the other is not UK domiciled because the IHT spouse exemption is restricted. The transfer of value takes place when the funds are withdrawn from the account so that is the point where the conditions for the spouse exemption need to be satisfied. For instance if:

(1) Year 1: H makes a payment into the joint account
(2) Year 2: W makes a payment from the joint account

The IHT spouse exemption applies if the conditions for the exemption are satisfied in Year 2. It does not matter whether or not they are satisfied in Year 1.

94.3.7 *One a/c holder pays in & withdraws*

Suppose:
(1) A transfers A's money into the joint account held by A and B.
(2) A withdraws that money into A's own name.

A does not make a transfer of value. What about B? B's estate is reduced at stage (2). But it is considered that B makes no transfer of value. Section 3(3) IHTA does not apply.[14] It might be said that B makes a transfer of value by associated operations, but although B makes an omission, which is an associated operation, B does not make a transfer of value by associated operations, since he does not make a disposition. That is consistent with the policy of s.3(3) IHTA.

94.3.8 *Third party pays in*

The discussion above assumes that the account money is provided by one or both account holders.

Suppose:
(1) A third party ("C") transfers C's money into a joint account held by A and B.
(2) A dies.

[14] See 94.3.5 (1account holder pays in and other withdraws).

In strictness A is taxed on the whole account, but by concession it appears that A is taxed on half. The IHT Manual provides:

> **IHTM15042 Joint money accounts** [May 2020]
> *Example*
> A, B and C share a joint account. They all contribute to it. A dies and his proportion of the account passes by survivorship to B and C. After A's death, the entitlement of B and C should take into account A's contributions.
> **(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

Presumably this means that after A's death, B and C are each regarded as entitled to (1) their own contributions to the account and (2) half of the contribution of A.

Suppose:

(1) A third party transfers their money into a joint account held by A and B and
(2) A withdraws that money into A's own name.

It is considered that B does not make a transfer of value; see 94.3.7 (One a/c holder pays in, other withdraws).

94.3.9 *Gift from account*

If B draws on the account to make a gift to a third party donee, B makes a transfer of value.

If A had paid the account money into the joint account A has also made a transfer of value by associated operations at the time of B's withdrawal.[15] But that is not the case if B, or a third party, has provided the funds. Thus the gift by B gives rise to two transfers of value, a transfer of value by A and a transfer of value by B. It may be in practice HMRC would allow some concession.

94.4 Trust from joint account: Who is settlor

If a trust is created by a payment from a joint account, it is considered that the account holder who writes the cheque or makes the transfer is the settlor. The other account holder is only the settlor if they have provided

[15] A does not make a transfer of value under s.3(3) IHTA because although the estate of the third party donee is increased, it is not increased by any failure to exercise a right. But A does make a transfer of value by associated operations.

the property indirectly for the settlement, which requires some element of arrangement; see 99.7 (A gives to B, B gives to trust).

But STEP CRS guidance provides:

> 1.4 ... an alternative scenario where (C) and (D) are joint settlors. For example, it may not be uncommon for a husband and wife to make a transfer of assets to a trust for their children and wider family. If, in these circumstances, C and D contribute assets to the trust from assets that they hold jointly, then it would be fair to regard both parties as 'joint' settlors for CRS purposes.[16]

This seems a common sense view, but it does not take full account of the nature of the joint account. In practice the issue may not often arise.

94.5 Scottish joint account

The IHT Manual provides:

> **IHTM15050. Special destinations and proof of donation** [May 2020]
> If two or more people purchase an asset jointly there may be a contractual agreement between them which determines how the property passes on death. If the title is just in their joint names, such as to A and B, they own an equal share which passes to their executors (IHTM05012) on their deaths and is part of their free estate.
> But if the title is to A and B and the survivor and they have paid equally for the asset, the survivor will be entitled to the whole on the death of the first to die (*Perrett's Trs v Perrett* [1909] 46 SLR 453). This is known as special (or survivorship) destination.
> Both parties do, however, have the right to dispose of their shares in life (*Steele v Caldwell* [1979] SLT 228), which will defeat the operation of the special destination.
> If the price was not provided equally the question of whether the donor has conferred an immediate beneficial interest (IHTM15011) on the other party will depend on their intention. Such a donor can revoke the survivorship destination, explicitly, by Will (IHTM12047) under s.30 Succession (Scotland) Act 1964. But the donee may not do the same to defeat the donor's right to the whole of the asset.
> If the whole of a joint asset was provided by one person they retain ownership of the whole until they put title into joint names, or, by some other act, show they intend to make an immediate gift to the other joint owner.
>
> - Proof of gift requires evidence of both intention and delivery. Evidence of intention does not need to be in writing and oral evidence is acceptable.
> - Delivery may be:
>   - actual, for example, physically handing over the asset to the donee, or

[16] For the CRS consequences, see 121.23.3 (Joint settlors).

- constructive, for example, handing over one book from a collection.

If there is no immediate gift (by intention and delivery) the asset remains part of the provider's estate and will only pass to the other under the survivorship destination on their death, unless the Will contains a clause that explicitly revokes it and conforms to s.30 Succession (Scotland) Act 1964....

IHTM15051. Joint money accounts [May 2020]

The fact that a bank account is held in joint names and that receipts for deposits into it are issued in joint names does not necessarily mean it is held in equal shares. Neither does it mean there is survivorship destination. The extent of each owner's interest will be a question of fact depending on

- the extent of their identifiable contributions, and
- if contributions are unequal whether there can successfully be established donation (IHTM15050) by the greater contributor to the other, or alternatively, whether the asset was held in joint names merely for administrative convenience

You should resist any suggestion by the taxpayer or agent that the terms in which the account is held can effect either a lifetime gift - or pass the property to a survivor, unless there is other supporting evidence. Any cases of difficulty should be referred to Technical.

IHTM15052. Land [May 2020]

The title to heritage is proof of its ownership, and the owners interests in it – unless there is evidence to the contrary, normally by way of written document.

If there is no special destination (IHTM15050) and there is equal provision of the price, each co-owner can dispose of his own share as part of his estate and there is no accretion among them.

If spouses or civil partners (IHTM11032) are the joint owners you should keep the 'related property' (IHTM09731) provisions in view (S.161 IHTA 1984).

If it is claimed the beneficial interests (IHTM15011) vary from those indicated by the title and the absence of gift is claimed, strong proof is required of the parties intentions such as a contemporaneous writing. In cases of difficulty refer to Technical.

IHTM15053. Which law to apply to joint investments owned by someone domiciled in Scotland [May 2020]

Scottish law applies to shares of a company registered in Scotland. If the IHT400 (IHTM10021) or other account does not indicate whether a company is Scottish or not, you should be able to find this information on the Internet. If the taxpayer is of Scots domicile (IHTM13000) a joint holding in Government Stock may be regarded as subject to Scots law (*Cunningham's Trs v Cunningham* [1924] SLT 502).

IHTM15054. Joint money accounts and special destination May 2020]

Under Scots Law, where Bank or Building Society Accounts are held in joint names the special (or survivorship) destination (IHTM15050) does not by itself pass the ownership of the money in the account to the survivor.

An account with a Bank or Building Society is not a document of title as it is not a Deed of Trust in terms of the Bank Bonds and Trusts Act 1696. It is a contract between the Bank and the customer which regulates the conditions on which the account is to be operated and is for administrative convenience only. See for

> example *Cairns v Davidson* 1913 SC 1054.
>
> For this reason the ownership of the funds in the account is determined according to the ordinary principles of ownership. The owner of the funds in the account remains the owner unless and until some transfer of ownership occurs.
>
> Example
>
> James and Lucy (who are married) open an account, governed by Scots law, in their joint names and James has provided all the funds. James dies and is survived by his wife, Lucy. On his death:
>
> • In the absence of any act of transfer of ownership to Lucy (for example, a separate Deed of Gift) the whole account should be included in the IHT400.
>
> •If the account passes to (say) the children under the terms of James' Will then the asset will be chargeable to Inheritance Tax
>
> • If the account passes to Lucy under the terms of the will (IHTM11032) then exemption under IHTA84/S18 will apply/
>
> This applies to all Bank/Building Society accounts governed by Scots Law. So it will apply to taxpayers living in England, Wales and Northern Ireland who have an account which is governed by Scots Law.

For the Scots law position see Meston, "Survivorship destinations and bank accounts" 1996 SLPQ 315; Kerrigan, "Special destinations – survivorship and bank accounts revisited" 2011 SLT 5; the Trusts Discussion Forum (May 2007) under the thread "Scottish bank accounts".[17]

94.6 Remittance from joint account

This section considers remittance aspects of joint accounts.

The RDR Manual provides:

> **RDRM33510 Joint Accounts** [Jan 2022]
>
> ... **Analysing the account**
>
> Where an individual has a 'joint account' with someone else and one or both of them chooses to be taxed on the remittance basis, it is necessary to fully analyse the account (with due regard being given to the 'exceptions' identified above). You will need to do this in order to apply Step 1 ITA07/s809Q(3) (refer to RDRM35200: Mixed funds), which deals with transfers from mixed funds and requires you to find each of the categories of the remittance basis user's income and gains in the mixed fund. A joint account will almost certainly be a mixed fund.
>
> Such an analysis will also be required if a decision is made to cleanse the account, under the mixed fund cleansing provisions. (Refer to RDRM35600 onwards for further details).
>
> Analyse the account by putting each credit to the account into separate columns,

[17] *http://www.trustsdiscussionforum.co.uk*

divided between each individual, for each year.
Likewise with the debits; transfers out of the account that are clearly made by or for one or other of the individuals and intended to be made out of "their" share of the income should be debited "under" their column.
"Joint" expenses, for example items such mortgage payments where the debt is held jointly, or council tax bills and so on may, if appropriate, be split equally between each individual. Alternatively, such debits may be fully appropriated to just one of the account holders if that reflects the reality of their joint financial arrangements; for example it may be that only one partner is working and contributes most of the "credits" to the account in the form of their income. In such circumstances it may be more appropriate to attribute all expenditure to that partner in so far as the overall balance of the account permits. When separating the account in this way it is important that the overall balance remains consistent. In practice you should try to take the most pragmatic approach that best reflects the reality of both individuals' situations.

94.6.1 *One account holder remittance basis user*

The RDR Manual provides:

RDRM33510 Joint Accounts [Jan 2022]
...Individuals who are not using the remittance basis are liable to tax on the arising basis, so they will, where appropriate, have paid UK tax in respect of their share of the income and gains that have been credited to the joint account in the tax year. Because UK tax has been (or will be) paid by that individual he or she may bring to the UK or otherwise use their share of the funds that are in the account in any way they wish without triggering an additional tax charge.
However, if at any time during the year they bring to the UK or otherwise use amounts in excess of their share of the funds in the joint account at that point in time then they will be regarded as using their partner's income or gains instead.
Example[18]
An offshore bank account was opened on 20 June. It is held jointly by A and B, who are civil partners. A claims the remittance basis in this year. The account shows:

Date	**Credit (Debit)**	**Balance**	**Attributable to**
		£0	Opening Balance
20 June	£2,000	£2,000	A – foreign earnings
27 June	£1,000	£3,000	A – relevant foreign income
1 July	(£800)	£2,200	B – cash taken out in London
27 July	£90	£2,290[19]	B – UK rental income

In analysing the account you need to look at what was in the account i**mmediately before** each debit. In this case, the cash withdrawn by B in London

[18] I have slightly changed the format of the example for clarity

[19] I have corrected an arithmetical mistake in the original. The figures in this line do not matter for the example (but would be relevant if there is a further transfer).

on 1 July can only be attributed to A's income credits and, as B is a relevant person, A will be regarded as having remitted that £800. ...

Remember that in most cases the account holders are likely to be relevant persons in relation to each other, so even transfers from the non-remittance basis using individual may be a taxable remittance on the other partner if it is regarded as consisting of or deriving from the other partner's foreign income or gains.

94.6.2 *Both account holders remittance basis users*

The RDR Manual provides:

RDRM33510 Joint Accounts [Jan 2022]

You will still need to analyse the account in order to determine which transfers from the mixed fund are taxable remittances, and to determine which account holder is liable to pay any tax due. Again, you should try to take the most pragmatic approach that best reflects the reality of the situation.

Once the account has been split between the individual account holders, any taxable remittances of the foreign income or gains that are the property of the remittance basis user are subject to the normal "ordering" rules that apply to remittances from a "mixed fund".

The example at RDRM33515 demonstrates the principles of analysing a joint account and then determining whether the "transfers" are a taxable remittance from a mixed fund. You will also need to refer to RDRM35230 Remittances from mixed funds.[20]

RDRM33515 Joint Accounts - example [May 2020]

(*Erica ("W") and John ("H"*)

W and H have been married for several years, and currently live in the UK. H is domiciled within the UK. W is not domiciled in the UK. W decides to claim the remittance basis for this year.

Both W and H have employment income that is credited to the account. For most of the year W works in the UK but she also has a separate part-time employment with a foreign employer outside of the UK for part of the year.

W and H have a joint bank account in the Isle of Man. Into this account is paid both of their salaries, and some bank interest. They use the account to pay their household bills, including the mortgage on their jointly owned UK home.

Table to show the amounts credited to the account[21]

Date		**Income of**	**Credit (Debit)**	**Balance**
	Opening Balance			£0
30 April	UK salary	W	£3,000	£3,000
30 April	UK salary	H	£2,000	£5,000
30 April	Overseas salary[22]	W	£2,000	£7,000
30 April	Bank interest not taxed	Both	£200	£7,200

[20] See 20.2.3 (When are funds mixed).

[21] I have slightly altered the format for clarity

[22] The example adds: *not subject to foreign tax*.

1 May	Direct debit - UK energy co		(£200)	£7,000
5 May	Cash withdrawal (UK)		(£1,000)	£6,000
10 May	Cash withdrawal (UK)		(£1,000)	£5,000
17 May	Direct debit - mortgage		(£3,000)	£2,000
31 May	UK salary	W	£3,000	£5,000
31 May	UK salary	H	£2,000	£7,000
31 May	Overseas salary	W	£800	£7,800
1 June	Direct debit - UK energy co		(£200)	£7,600
5 June	Cash withdrawal (UK)		(£1,000)	£6,600
10 June	Cash withdrawal (UK)		(£800)	£5,800
17 June	Direct debit - mortgage		(£3,000)	£2,800

The credits and the debits account can be analysed between W and H with the following results:

		W Credit	**W Balance**	**H Credit**	**H Balance**	**Joint a/c Balance**	**Note**
30 Apr	UK salary	£3,000	£3,000			£3,000	1
30 Apr	UK salary			£2,000	£2,000	£5,000	1
30 Apr	Overseas salary	£2,000	£5,000			£7,000	
30 Apr	Bank interest	£100	£5,100	£100	£2,100	£7,200	2
1 May	Debit to UK co	(£100)	£5,000	(£100)	£2,000	£7,000	
5 May	Cash to UK	(£1,000)	£4,000			£6,000	3
10 May	Cash to UK			(£1,000)	£1,000	£5,000	3
17 May	Mortgage pay't	(£2,000)	£2,000	(£1,000)	£nil	£2,000	4
31 May	UK salary	£3,000	£5,000			£5,000	
31 May	UK salary			£2,000	£2,000	£7,000	
31 May	Overseas salary	£800	£5,800			£7,800	
1 Jun	Debit to UK co	(£100)	£5,700	(£100)	£1,900	£7,600	
5 Jun	Cash to UK	(£1,000)	£4,700			£6,600	
10 Jun	Cash to UK			(£800)	£1,100	£5,800	
17 Jun	Mortgate pay't	(£1,900)	£2,800	(£1,100)	Nil	£2,800	4

Note 1: Earned income is attributed to the employee only.

Note 2: Because this is a joint account, the interest arising on it is split equally between W and H.

Note 3: This money is withdrawn in the UK by H and W to meet their own personal expenditure, for example travel, meals and so on.

In this example H's "personal expenditure" can be attributed to his "income" credits into the account.

If instead the withdrawals by H were regarded as coming from W's "portion" of the pot, because H is a relevant person and money has been brought into the UK by a relevant person (so Condition A of s.809L(2)(a) ITA 2007 is met) there might still be a taxable remittance, with the tax due payable by W (see below).

Note 4: The mortgage payment is made to a UK bank. The mortgage is held on H and W's UK home and is a joint debt of W and H, and each contributes half of the cost. To the extent that H has money in the account it can be accepted that he has used his taxed income to pay his share of the mortgage.

Money has been brought into the UK to pay this mortgage, so Condition A of s.809L(2)(a) ITA 2007 is met and there is a "transfer" from a mixed fund.

Because this is a mixed fund s.809Q(2) ITA 2007 is in point. So in order to determine whether this money is regarded as consisting of, or deriving from, a remittance basis users' foreign income or gains (such that there is a taxable remittance under Condition B of s.809L(2)(a) ITA 2007) it is necessary to look at the composition of the fund immediately before the "transfer".

This shows that £2,000 of the mortgage payment made on 17 May must be attributable to W's income or gains in the mixed fund. Similarly, £1,900 of the mortgage payment of 17 June is attributable to W's income in the mixed fund.

So far as W is concerned, her share of the account shows (for the purposes of calculating if and to what extent she has made a taxable remittance of her overseas income) is as follows:

W's share of the account		**Credit (Debit)**	**W's balance**	**Category**
30 April	UK salary	£3,000	£3,000	(a)
30 April	Overseas salary[23]	£2,000	£5,000	(b)
30 April	Bank interest	£100	£5,100	(d)
1 May	Direct Debit (energy co)	(£100)	£5,000	
10 May	Cash	(£1,000)	£4,000	
17 May	Direct Debit (mortgage)	(£2,000)	£2,000	
31 May	UK salary	£3,000	£5,000	(a)
31 May	Overseas salary	£800	£5,800	(b)
1 June	Direct Debit (energy)	(£100)	£5,700	
5 June	Cash	(£1,000)	£4,700	
17 June	Direct Debit (mortgage)	(£1,900)	£2,800	

Applying the rules at s809Q ITA 2007 to the first "transfer" to the UK, which is the payment to the energy company on 1 May. Remember the mixed fund rules require the account to be analysed before every "transfer"

Step 1 – Identify the "amount of transfer" in the relevant year		**£100**
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	**Para (a)** Employment income (UK employment income)	£3,000
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100
Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	**Para (a)**	£3,000

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer treat the whole of the remaining amount of the transfer as coming from that item of income or gain

> So W's transfer of £100 is treated as coming from her UK employment income; it is not thus a "taxable" remittance when brought to the UK.

[23] The example adds: *not subject to foreign tax*.

Then apply the rules at s.809Q ITA 2007 to the next "transfer" to the UK, which is the cash withdrawal.

Apply the rules at s.809Q ITA 2007 to the next "transfer" to the UK, which is the cash withdrawal

Step 1 – Identify the "amount of transfer" in the relevant year		**£1,000**
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	**Para (a)** Employment income (UK employment income)	£2,900
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100
Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	**Para (a)**	£1,900

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So W's transfer of £1,000 is treated as coming from her UK employment income; it is not thus a "taxable" remittance when brought to the UK.
Then apply the rules at s809Q ITA 2007 to the next "transfer" to the UK, which is the mortgage payment.

Then apply the rules at s809Q ITA 2007 to the next "transfer" to the UK, which is the mortgage payment

Step 1 – Identify the "amount of transfer" in the relevant year		**£2,000**
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	**Para (a)** Employment income (UK employment income)	£1,900
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100
Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund	**Para (a)**	£1,900
Step 3 Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.		£2,000 -£1,900 £100
Step 4 - Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.		
Step 2 - repeated	**Para (b)**	£100

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as

coming from that item of income or gain

> £1,900 of the transfer is treated as coming from W's UK employment income; it is not thus a "taxable" remittance when brought to the UK. The remaining £100 is treated as a remittance of £100 of W's untaxed overseas earnings.

The HMRC analysis stops here. There are in fact three more debits to analyse, but the reader will have the idea. Note that the incomplete analysis of a bank account with only 15 entries has taken 5 pages. It seems safe to say that these are rules which never have, never can and never will be applied in practice. I expect HMRC will accept any reasonable approximation.

In practice it is imperative for remittance-basis taxpayers to avoid joint accounts, and best to avoid mixed accounts.

94.7 Property held jointly by spouses

Section 836 ITA provides:

> (1) This section applies if income arises from property held in the names of individuals—
> (a) who are married to, or are civil partners of, each other, and
> (b) who live together.
> (2) The individuals are treated for income tax purposes as beneficially entitled to the income in equal shares.

Section 836(3) sets out 7 exceptions, numbered non-numerically. The first two are the most important:

> But this treatment does not apply in relation to any income within any of the following exceptions.
> *Exception*[24]
> *A* Income to which neither of the individuals is beneficially entitled.
> *B* Income in relation to which a declaration by the individuals under section 837 has effect (unequal beneficial interests).
> *C* Income to which Part 9 of ITTOIA 2005 applies (partnerships).
> *D* and *DA* *[These related to furnished holiday accommodation. Spring Budget 2024 announced the abolition of the Furnished Holiday Lettings tax regime, so presumably this will cease to be the case. The legislation was not in the Finance (no.2) Bill 2024, but is promised to follow in due course.]*
> *E* Income consisting of a distribution arising from property consisting

[24] I have altered the layout here for clarity.

of—

(a) shares in or securities of a close company to which one of the individuals is beneficially entitled to the exclusion of the other, or

(b) such shares or securities to which the individuals are beneficially entitled in equal or unequal shares...[25]

F Income to which one of the individuals is beneficially entitled so far as it is treated as a result of any other provision of the Income Tax Acts as—

(a) the income of the other individual, or

(b) the income of a third party.

94.7.1 *Settlor-interested trust*

The income taxation of joint accounts has been thrown into disarray by the decision in *Bingham v HMRC*.[26] In this case, Mr Bingham ("H") transferred money into an account in the joint names of himself, his wife and his adult children. The object was to ensure that the wife and children had income within their personal allowances. The tribunal held that H remained beneficial owner of the money. H, a solicitor, should have paid more attention to documentation (to declare that his children had the desired interest) and implementation (the children did not hold chequebooks so they could not draw out what was said to be their money from the account). So far this is straightforward.

More intriguingly, even if the children held money in the account beneficially, the tribunal would "likely"[27] have held that H was *still* taxable on all the income under s.624, on the grounds that:

(1) The account was a "settlement" (that is clearly right); and

(2) H had an interest since he could withdraw the funds.

It seems to me that point (2) is wrong. If H draws out money for his own benefit, he only does so with the authority of the joint account holders, and the possibility that a donee may give funds back to the donee does not constitute an interest.[28]

[25] Exception E goes on to incorporate the standard distribution code definition of shares and securities: "Shares" and "securities" have the same meaning as in section 1117 of CTA 2010. See App. 2.13 (Security: 5 statutory definitions).

[26] [2013] UKFTT 110 (TC).

[27] at [62]

[28] *Glyn v IRC* 30 TC 321 at p.329; *West v Trennery* [2003] EWHC 676 (Ch) at [51] (point not discussed on appeal).

I think it is safe to say that no account has ever been dealt with that way in the history of taxation, and the practical difficulties would be immense. In *Bingham* there was clearly a settlement as H provided all the funds. What if the joint account owners provide funds, but unequally? What if a couple shares an account for ordinary domestic purposes?

The problems would attach to husband and wife accounts: the settlor-interested trust provisions take priority over s.836 ITA. The s.624 spouse exemption would not apply.[29] If *Bingham* were right, a payment into a joint account would not be an outright gift under the definition in s.626(4) ITTOIA.

These arguments were not put to the Tribunal.

94.7.2 *Remittance basis and spouses joint accounts*

How does this interrelate with the remittance basis? Suppose:

(1) Property is held in the names of H and W, but belongs in equity to H alone.
(2) Section 836 applies so that half the income is deemed to be the income of W.
(3) W is a remittance basis taxpayer.

Income of W arising before 2008/09, being merely deemed income, could not be remitted and could not be subject to tax. But income arising from 2008/09 counts as remitted if it is remitted by H, since H is a relevant person in relation to W.

94.8 Planning for joint account

The best way to avoid the IHT difficulties discussed in this chapter is that substantial sums should not be put in joint accounts (except where the account holders qualify for the full IHT spouse exemption).

Joint accounts may be useful as a means of probate planning, as the funds in a joint account should be immediately available to the survivor; by contrast, funds in a sole account are not available until probate is obtained, which will involve delay and, often, cost as IHT must be paid upfront in order to obtain probate. In this case, the parties should specify the terms on which the account is held, and (if appropriate) keep a record of who provided the funds so the IHT position is clear.

It is recommended that remittance basis taxpayers do not use foreign

[29] See 93.15 (s.624 spouse exemption).

joint accounts, if the remittance tracing problems discussed above will arise. There will be no problem if:

(1) no substantial interest arises to the account
(2) no remittance is made from the account to the UK
(3) interest is paid to a separate account from which no remittance is made to the UK or
(4) interest is paid to separate account of each account holder in equal shares.

Unremittable assset relief	97.9
Foreign currency bank account: IHT excluded property	76.13

The position of UK resident companies is not considered.

95.1 Foreign currency: Introduction

It is generally accepted that UK tax is assessed in sterling. For instance, the RDR Manual provides:

> **RDRM31190 Exchange Rates** [Jan 2019]
> All entries on the SA Return should be in pounds sterling.

Foreign currency must be translated into sterling. For this purpose it is necessary to identify the date on which the exchange rate is determined ("**currency conversion date**").

HMRC put their views in a technical note dated 12 October 2009 (the "**HMRC currency technical note**").

Once one has identified the currency conversion date, one needs to ascertain the exchange rate on that date. HMRC publish:

- Spot currency exchange rates. Spot rates are published on 31st March and 31st December every year. It reflects the exchange rate at midday of that day.[1]
- Monthly currency exchange rates. Monthly rates are published on the penultimate Thursday of every month. They represent the exchange rate as of midday the day before publication and are intended to apply to the following calendar month.[2]
- Average rates on 31st March and 31st December. This reflects the mean average of all exchange rates which have been present in all Monthly exchange rate files for the 12 month period leading up to the given Average rate publication.[3]

Daily rates can be found on commercial websites. These no doubt use different criteria, and disagree slightly among themselves, but in practice any published rate is acceptable.[4]

HMRC say:

[1] *https://www.trade-tariff.service.gov.uk/exchange_rates/spot*

[2] *https://www.trade-tariff.service.gov.uk/exchange_rates*

[3] *https://www.trade-tariff.service.gov.uk/exchange_rates/average*

[4] The SAI Manual provides:

> "**SAIM4310. Special calculations: Foreign currency securities** [Dec 2019]
> ...Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently."

Similarly, International Manual provides:

> "**INTM162620. Rate of exchange to use** [Dec 2019]
> ... Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the customer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted."

Where the official rate of exchange is different, it is considered that one should use commercial (black market) rates; this view is adopted in the USA: *Cinelli v Commissioner of Internal Revenue* (1974) 502 F2d 695 US Court of Appeals, Sixth Circuit.

> HMRC publishes average monthly exchange rates as a guide but customers and their advisors are welcome to use actual daily rates were appropriate for transactions. HMRC may however challenge customers on the rates used and so it would be prudent to keep a record of the rates and dates involved should evidence be required.[5]

95.2 CGT: Currency conversion date

There are two possible ways to compute the gain where an asset is purchased and sold in a foreign currency.

Method 1:

(a) Compute the gain in foreign currency. For instance, suppose an asset is purchased for $100 and sold for $200; the gain is the $ sale price less the $ acquisition price = $100.

(b) Then convert that foreign currency gain to sterling at the date of disposal.

Method 2:

(a) Compute the sale price converted to sterling at the rate on the date of disposal

(b) Then deduct allowable expenditure, in short:

  (i) The acquisition cost converted to sterling at the rate on the date of acquisition

  (ii) Any improvement costs converted to sterling at the rate on the date the costs were paid

For CGT it is settled that method (2) is correct. In *Bentley v Pike* 53 TC 590 the taxpayer inherited German property when it was worth DM132k, and later sold it for DM152k. She argued that the gain was the difference between the two Deutschmark values, ie DM30k, and the currency conversion date was the date of disposal. The court held that the gain was the sterling value of the DM proceeds (currency conversion date at the date of disposal) less the sterling value of the property at the time of acquisition. This decision was approved in *Capcount Trading v Evans* 65 TC 545 where the issue was argued more fully before the CoA. In short, the taxpayer acquired shares for $85m and sold them for $50m. The taxpayer argued that they made a loss of $35m. That was rejected. The

[5] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

gain/loss was calculated as the value of the proceeds (converted into sterling at the date of disposal) less the acquisition cost (converted into sterling at the dates of acquisition).[6]

The CG Manual provides:

> **CG25391 Remittance basis: gains to be computed in Sterling** [Nov 2019]
> Sterling is the currency in which capital gains computations are carried out (see *Bentley v Pike*, (53 TC 590) and *Capcount Trading v Evans* (65 TC 545)). You should therefore carry out a computation of the gain arising on the disposal of the foreign assets in sterling. Where transactions take place in foreign currency you should convert each separate entry for the computation into sterling using the spot rate applying at the date that part of the transaction occurred.

In *Goodbrand v Loffland Brothers North Sea Inc*:[7]

> The legislation does not in terms prescribe that the tax computation must be carried out in sterling, but it has been held that sterling is "the only permissible unit of account" for capital gains tax purposes... For the purposes of capital gains tax, foreign currency is not "money" but "money's worth".

This method of computation is used whether the gain is taxed on an arising or the remittance basis. The RDR Manual provides:

> **RDRM31190 Exchange Rates** [May 2020]
> *Foreign Chargeable Gains*
> Foreign chargeable gains are calculated using sterling translations at the date of acquisition and the date of disposal. So the consideration received will be translated into sterling using the exchange rate at the time of disposal and allowable deductions will be translated using the exchange rate(s) at the time the expenditure was incurred (for example, when the asset was acquired). Thus the gain will be denoted in pounds sterling and will be the same whether taxed on the arising or the remittance basis.

[6] If the law were otherwise, further difficulties would arise. What would the position be if an asset was purchased in one currency and sold for a different currency? Would the basis of computation depend on the situs, bearing in mind that situs is itself a somewhat artificial concept? But as the law is settled, it is not necessary to pursue this.

[7] 71 TC 57 at p.70.

The Manual continues:

> If the gain is held as foreign currency, the taxable sterling amount of the gain will not change, but separate gains or losses may accrue if the foreign currency gains or loses value with respect to sterling before the gain is remitted...

This sentence is more than a decade out of date: it represents the law before 2012.[8]

See too 56.3.4 (Deferred foreign currency consideration).

95.3 Trading and property income

The position for trading income subject to income tax is governed by SP 2/02 (Exchange rate fluctuations); this is not discussed here.

Property income is computed on accountancy principles, like trading income, so the same practice applies. Likewise Misc Sweep-up Income.

95.4 Arising basis: Conversion date

The RDR Manual 31190 provides:

> **RDRM31190 Exchange Rates** [Jan 2019]
> *Foreign Income*
> Foreign income taxed on the arising basis is converted to pounds sterling at the exchange rate applicable on the day that it arose overseas.

Similarly, the EI Manual provides:

> **EIM40033 Earnings paid in foreign currency** [Nov 2019]
> **General earnings taxable when received**
> General earnings that are taxable when received by virtue of the charging provisions in Sections 15 or 27 ITEPA ... will be chargeable whether paid or payable in foreign currency. It is simply necessary to quantify the amount chargeable in pounds sterling.
> The amount chargeable is strictly the sterling equivalent at the date the employee becomes entitled to be paid the earnings or, if earlier, the date they are paid. This can be calculated using the relevant exchange rates in operation at the time.
> No deduction can be given for costs of converting currency or for losses incurred on the exchange.

This is not controversial. HMRC accept the use of the average rate for a

[8] See 95.10 (Foreign currency bank account: CGT).

tax year where income arises regularly through the year.[9]

95.5 Income converted to foreign currency

The HMRC currency technical note provides:

> 6. Income that is regarded as 'foreign income' may be received offshore in sterling. It may later be converted into a foreign currency, for example if paid into a non-sterling account. In such cases the amount of a remittance basis user's foreign taxable income will be the amount actually due and originally received in sterling. It is of no relevance whether the eventual 'taxable remittance' that is, or that is derived from, that income is made in a foreign currency or is converted back into sterling before being remitted.

This is not controversial.

95.6 Remittance basis: Conversion date

Where income is taxed on the remittance basis, there are two possible views:

(1) The currency conversion date is the date of remittance. I refer to this as the "**HMRC view**".

(2) The currency conversion date is the date that the income arises. I refer to this as the "**practitioners view**" since it is adopted by ICAEW and the great majority of practitioners.

An intermediate, pragmatic view would allow either approach as long as it is adopted consistently.

95.6.1 *HMRC view*

The RDR Manual 31190 provides:

> **RDRM31190 Exchange Rates** [Jan 2019]
> *Foreign Income*
> ... Foreign income taxed on the remittance basis ... is subject to UK tax only when it is remitted to the UK. This remitted income should be translated into sterling at the exchange rate prevailing on the date of remittance.

The Manual gives a straightforward example.[10]

[9] Private correspondence.

[10] "*Example (remittance) - Christophe*
C is a remittance basis user and has €8,000 income paid into his French bank account

Similarly, the EI Manual provides:

> **EIM40033 Earnings paid in foreign currency** [Nov 2019]
> **... General earnings taxable when remitted to the UK**
> For earnings that are taxable when remitted to the UK the conversion should be made at the date they were remitted.

95.6.2 *Basis of HMRC view*

The HMRC currency technical note sets out HMRC's arguments in support of the view that the currency conversion date is the date of remittance and not the date of receipt.

> 5. [1] Remittance basis users may receive income offshore in a foreign currency.
> [2] Such foreign income and earnings which are chargeable to tax on the remittance basis only become chargeable to UK tax when they are remitted to the UK. The remittance to the UK is the event that triggers the UK tax charge.
> [3] It is only at this point that it is necessary to ascertain the taxable amount (in sterling) remitted to the UK that is taxable as foreign income.
> [4] It follows that it is the date on which that amount is treated as remitted to the UK that the translation to sterling should occur.

Para 5[2] is not correct. RFI is chargeable whether or not remitted, though the amount on which tax is charged is limited to what is remitted.[11] The same applies for RFE.[12]

Para 5[3] is correct but [4] does not follow from it. For CGT it is likewise only necessary to ascertain the taxable amount when there is a remittance but no-one suggests that gains are converted at the date of remittance.

The HMRC currency technical note contains a lengthy discussion of case law, but there are no cases which address the issue, and analogies from

in June 2011 when the exchange rate is €0.705 to the pound, the equivalent of £5,642. He remits all €8,000 of this foreign income on 1 May 2013 when the exchange rate was €0.681.
He uses this 1 May exchange rate to convert this amount, giving a remitted amount of foreign income of £5,453; this is the amount he is taxed on."

[11] See 2.3.1 (Unremitted RFI "chargeable").

[12] Chargeable gains actually are chargeable on remittance but HMRC do not say that gains are converted at the date of remittance.

CGT and IT cases in other contexts are not decisive. HMRC say:

> 15. There is little case law that addresses this point directly. Some early case law from the 1920s and 1930s deals with the taxation of companies and whether foreign exchange gains or losses should be regarded as capital or investment items, or form part of the company's trade. It is possible to draw only tentative principles from this, especially as in many cases the issue of arising or remittance basis was not in point.
>
> 16. The 1933 case of *Magraw v Lewis* (18 TC 222) concerned a pension of 229 South African pounds, paid to a UK resident, which had been awarded by the Government of the Union of South Africa and was paid by them through the High Commissioner of the Union Government in London. At the time such foreign income was chargeable when received in the UK. The case concerned certain deductions made by the SA Government from the pension, but during the case the issue of how much should be taxed in British pound sterling was raised. In *Magraw*, the *pension was actually paid to the appellant in the UK in sterling,* so the exchange issue was a little different.[13] In the course of his judgement at the High Court Finlay J said, at page 225,
>
>> What happened was this. The Appellant was paid a particular sum in UK pounds and by reason of the state of the exchange, the amount which he was paid in UK pounds was larger-a greater number of pounds-than the pension awarded to him in South Africa reckoned in South African pounds.
>>
>> He says that he ought not to pay Income Tax upon the amount which he has received in this country. I am bound to say that in regard to that the law appears to be as plain as in the other case...It is clear that the Income Tax authorities can have regard only to what is paid. What is paid is a pension of a particular amount in UK pounds, £268 I think it is -but the exact amount does not matter- that is paid to the Appellant.
>>
>> That is what he has to pay tax upon, and he has to pay on that in the appropriate number of pounds in British currency. As I say, about that point there does not appear to be any legal difficulty-indeed, I do not think there is any legal difficulty about either point...I cannot myself see that any one, even a layman, could conceive that there was any grievance when he gets a particular income in UK pounds, in paying tax in UK pounds at the appropriate rate upon that income.
>
> 17. In *Thomson v Moyse* 39 TC 291, whilst addressing a point about whether a remittance required a transmission from abroad, at the House of Lords Lord Reid said at p329 (bold emphasis added)
>
>> Before considering these authorities, I think it well to see what the effect would be if this view were right. I take a case which no one has ever even suggested would not be within the scope of these provisions - the case of a bank acting as a collecting agent. If a customer hands to an English bank for collection a cheque drawn on a foreign bank, the English bank will send the

[13] [Author's note] Since the pension was paid in sterling, the exchange issue did not arise at all.

> cheque abroad for collection and, when notified that the money has been collected, it will give to the customer in this country the equivalent in sterling **at the current rate of exchange**.

18. References to other case law have been made to HMRC with regard to this issue.

Bentley v Pike [1981] STC 360 and *Capcount Trading v Evans* [1993] STC 11 - these concern Capital Gains Tax on chargeable gains accruing on the disposal of an asset, and therefore have no bearing on the issue of overseas income. They state that where there is an acquisition and disposal in a foreign currency the taxable capital gain is calculated by deducting the sterling value of the acquisition at the time of acquisition from the sterling value of the sale proceeds at the time of sale.

Pattison v Marine Midland 57 TC 219 related to tax on trading profits and the House of Lords upheld the decision of the Court of Appeal rejecting HMRC's contention that, with respect to a loan made by a company, the difference in sterling terms between the value of the dollars at the time of the loan and the time of the repayment represented a taxable trading profit of the company.

In *Capcount* the Court of Appeal specifically distinguished *Marine Midland* on the basis that it was concerned with trading profits whereas *Capcount* was concerned with capital gains. Nolan LJ states:

> "Against that background I do not find it surprising that, in the case of trading companies operating abroad the commercial accounting procedures which, it seems, commonly result in the profit being first computed in the particular overseas currency and then translated into sterling for tax purposes should be adopted and accepted by the Revenue...the income tax legislation, unlike the capital gains tax legislation, is not generally concerned with the measurement of a gain or loss on a single disposal but with a balance at the year end and computed on accounting principles."

19. The calculation of gains arising on non-sterling acquisitions and/or disposals in sterling is different from the calculation of the amount of taxable income in sterling; it is clear from *Bentley v Pike* that the sterling translation must be made using the exchange rate in force at the dates of the transaction (i.e. date of acquisition for acquisition cost, and disposal for disposal proceeds) and the calculation completed in sterling. This is understandable for CG calculation purposes, as CG is fundamentally a transaction-based tax.

20. Apart from the £2,000 threshold (see below), this note only concerns remittances of foreign income. *Bentley* and *Capcount* concern capital gains, not income, and are therefore not relevant. *Marine Midland* supports the approach taken by HMRC in the guidance. *Marine Midland* concerned trading profits rather than income but an individual's income is more on a par with the profits of a business than with capital gains because neither an individual's income nor the profits of a business require individual disposals. Consequently, there is no conflict between the principles established in *Marine Midland* and HMRC's position on the treatment of an individual's income.

For completeness, the HMRC currency technical note also states:

> 7. In all cases HMRC will tax the individual's foreign income as income; the question is simply what sterling value to give that income, and more importantly, when is it necessary to calculate that value. HMRC will never tax an amount greater than the income received; for example, if $50,000 US dollars are received then only $50,000 US dollars will ever be subject to tax - that is, the sterling equivalent of that $50,000 for income tax purposes at the time at which the UK tax liability occurs.
> 8. For a remittance basis user whose foreign income is received offshore in, say, dollars, there is no requirement to value the dollars twice (that is on date of receipt offshore and on the date an amount becomes taxable by virtue of being remitted to the UK). In other words, for income tax purposes, in order to tax the income received in dollars the conversion into sterling should only be made once, namely on the occasion that the income comes into charge...
> 12. This approach is in the remittance basis user's favour. This is because, whether the exchange rate on the date the income arises or the date it is remitted is used to translate the foreign income into sterling, there has to be consistency between the two - it has to be one or the other. An individual has an element of control over the date of remittance and can choose to remit income when the exchange rate is in his favour or not to remit income when the exchange rate is not in his favour. An individual does not generally have similar control over the date on which foreign income arises.

These are not arguments, or at least not arguments to be taken seriously.

95.6.3 *Conversion date: correct view*

Since there is no statutory guidance, and no clear guidance from the case law, the right answer is that which best suits the scheme of the provisions. It is considered that the correct view is that the currency conversion date is the time the income arises, not the date of remittance. I call this the practitioners view.

The HMRC view gives rise to many anomalies. Firstly, contrast the arising basis where the currency conversion date is the date income arises. Secondly, contrast the CGT remittance basis where the currency conversion date is (in short) when the gain arises. The anomaly is more striking when one bears in mind that offshore income gains are computed on CGT principles but subject to income tax on remittance. Thirdly, contrast the IT remittance basis where income is received in sterling and immediately converted into a foreign currency.[14] Fourthly, contrast tax credits in a foreign currency where the currency conversion date is the date

[14] The HMRC view assumes that one always knows what currency income is received, but in the case of deemed income that is not the case, and in the case of trading income it may depends on arbitrary choice of accounting practice.

the income arises, or near that date.[15]

The HMRC view does not work in cases of double representation, ie where there are two distinct assets which both represent the same income/gains.[16]

The next set of problems arises on the HMRC view if a remittance basis taxpayer receives foreign currency income and converts it into another asset, rather than paying it directly into a bank account. In these circumstances HMRC appear to have accepted (inconsistently) that their view does not apply.[17]

Suppose T receives income in euros, converts the euros into sterling, and remits the sterling.

(1) Does T adopt the euro rate at the time of conversion into sterling? Then tax depends on administrative acts such as how the receipt is dealt with.

(2) Does T then adopt the euro rate at the time of remittance? That would be absurd and also gives rise to this further problem: Suppose T receives equal amounts of (a) foreign interest in euros and (b) foreign interest in sterling; T converts the euros to sterling and pays all the interest into one foreign sterling account, and later remits one half of the account to the UK. If one converts at the time of remittance T needs to decide whether T has remitted the sterling interest or the (former) euro interest. The answer is far from clear. On the practitioners view this tracing problem does not arise.

Section 731 raises further problems on the HMRC view. If relevant income arises in a foreign currency, when does one convert that to sterling? If one converts at the time the income arises there is a further anomaly between s.731 and ordinary income. If one converts at the time there is a benefit, then a currency conversion may have to be done every time a benefit is conferred, which is unworkable.

95.6.4 *Foreign currency depreciates*

HMRC say that their view (currency conversion date is the date of remittance) produces the right result where foreign currency depreciates against sterling, whereas the practitioners view causes an additional tax

[15] See 95.9 (Foreign tax credit: currency conversion date).

[16] See 18.18.9 (Double representation).

[17] See 56.16.10 (Rebasing: currency fluctuation).

charge for taxpayers which HMRC are anxious to avoid. The HMRC currency technical note provides:

> 13. ... Compare two taxpayers: Mr A is taxed on the arising basic. Mrs R on the remittance basis. Both receive RFE:
>
> *Exchange rates:*

1 May	Year 1	$1 = £1.20
1 May	Year 2	$1 = £1.10
1 May	Year 3	$1 = £1.50

> Mr A and Mrs R receive $100,000 on 1 May in Year 1.
>
> Mr A will have to pay tax on £120,000 in Year 1. Whether he brings the $100,000 in to the UK on 1 May in Year 1 when it is worth £120,000, or on 1 May in Year 2 when it is worth £110,000, or on 1 May in Year 3, when it is worth £150,000, has no impact on Mr A's income tax liabilities.

That is correct.

> If Mrs R, on the other hand, translates her foreign income into sterling on 1 May Year 1 she will, on [the practitioners view], be said to have taxable RFE of £120,000.
>
> - In Year 2, she could remit every one of the $100,000 dollars received, which would translate only to £110,000 and yet still pay tax on £120,000 - which would appear that we are taxing an additional $9090,[18] or we are applying a tax rate of c.43.5%.
>
> 14. ...Theoretically, given large fluctuations in currency exchange rates, or with changes in higher tax rates, a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK ...

It is indeed unfair for a remittance basis taxpayer to be taxed on an amount larger than the sum which they remit to the UK. But this observation does not much support the HMRC view. This is in the HMRC view the position on the remittance of an asset derived from foreign income/gains, if the asset has fallen in value. In this case, HMRC appear to have no compunction in taxing a larger amount than remitted. In the HMRC view "a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK."[19]

95.6.5 *Pragmatic approach*

Cleansing Q&As[20] Question 1 provides:

[18] The correct figure appears to be $10,000.

[19] See 18.35.2 (Change in property value).

[20] For this document, see 20.12 (Cleansing mixed funds).

Foreign domiciliaries will often have foreign currency bank accounts. As such, mixed fund analysis of foreign currency accounts will often need to be carried out. The HMRC Manuals deal will some very simplified examples and suggest that the analysis should take place in the foreign currency with the conversion to sterling only occurring when the remittance takes place.

There is no legislation covering the issue and no specific case law.

Case law is definitive about the need for chargeable gains to be computed in sterling. In addition, from a practical perspective it is difficult to see how anything other than a sterling analysis can (without extreme complexity) work where there are multiple transfers (in some cases hundreds if not thousands) between accounts in multiple currencies. To add to the difficulties in such situations you can have numerous instances of investments acquired using funds from one currency, where the investment is denominated in a separate currency and the sale proceeds go into a third account in another currency.

Since the area is not covered by any legislation there should be a pragmatic position taken. Provided the individual is consistent year on year when the analysis is prepared for a foreign currency account he or she should be able to carry out the mixed fund analysis in either the foreign currency or in sterling. Does HMRC agree?

Suggested answer: Provided a consistent year on year approach is taken for each specific foreign currency account a mixed fund analysis can be carried out in either the foreign currency or in sterling.

Example (Clara)

C is a UK resident foreign domiciliary. She meets the criteria such that she can cleanse her mixed fund accounts. She has:

- a Swiss franc account with QRS Offshore Bank; and
- five different foreign currency accounts with LMS Offshore Bank (Swiss francs, US dollars, Euros, Australian dollars and Canadian dollars) as well as a sterling account and an active trading portfolio (buying and selling investments in various different currencies often with the currency used for the purchase not being the same as the currency the investment is denominated in and with the sale proceeds being in a different currency and going to a different account). Various transfers are made between the different currency accounts.

The account with QRS Offshore bank is analysed in Swiss francs.

The complexity of the issues with respect to the accounts with LMS Offshore Bank means that all those foreign currency accounts are analysed in sterling.

In both cases a consistent year on year approach is taken with respect to the mixed fund analysis, so both the analysis for the QRS Offshore bank

> and the accounts with LMS Offshore Bank are acceptable.

This would be sensible, if extra-statutory, but the HMRC response was negative:

> **HMRC Comments**
> - Analyse in currency held in the account as per current guidance[21], converted to sterling if/when remitted to the UK. Strictly this isn't a cleansing question.
> - You can cleanse in any currency as long as there is a consistent approach (see also response to question 50).

Also see 56.16.10 (Rebasing: currency fluctuation).

95.6.6 *Conclusion*

Cleansing Q&As provides:

> It should be noted that we think that the HMRC view is not the better technical interpretation so, it is our view that, provided disclosure is made there are good grounds for not filing on that basis. This issue was discussed with HMRC in 2012 and 2013. The conclusion of these discussions was an agreement to differ in our technical opinions.[22]

It is considered that the HMRC view is clearly wrong, so that a tax return could properly be made on that basis even without disclosure, though full disclosure would be required if it was desired to achieve finality by the end of the enquiry period, ie to prevent a discovery assessment.[23]

95.7 Sub-£2k taxpayer: Currency conversion date

The RDR Manual provides:

> **RDRM31190 Exchange Rates** [Jan 2019]
> *Remittance basis users below the "£2,000 threshold"*
> ... For the purposes of determining whether the amount of an individual's foreign income which is "not remitted" in a tax year is below £2,000 they obviously cannot apply [what HMRC regard as] the usual principle for remittance basis users of using the exchange rate at the time of

[21] Footnote original: That is for foreign currency bank accounts, the HMRC Guidance says perform the mixed fund analysis in the currency concerned with the conversion to sterling only occurring when the remittance takes place.

[22] "Cleansing of mixed funds – professional bodies Q&As" (version 3) question 2 *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-02-19--cleansing-of-mixed-funds.ashx*

[23] See 121.10 (Full-disclosure requirement).

> remittance. Instead the balance of the unremitted foreign income is converted to pounds sterling *at the rate of exchange prevailing on the last day of the tax year*.
>
> ITA07/s809D(2) provides that the amount of an individual's "unremitted" foreign income and gains for a tax year is-
>
> (a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus
>
> (b) the total amount of those income and gains that are remitted to the UK in that year.
>
> So the above formula may be carried out in the foreign currency, looking at total income received and total income remitted, per currency, during the tax year. The balance which is left is the "unremitted foreign income". This is translated into sterling using the exchange on the last day of the tax year (5 April) to ascertain whether the 'unremitted foreign income' is below the £2,000 limit.

Thus the currency conversion date is that on 5th April of each year. I refer to this as the "**5 April conversion view**". This practice only applied for the purposes of the £2k test and only for income, not for gains:

> This practice applies for the purposes of deciding whether ITA07/s809D applies ONLY. All of the individual's foreign income amounts for a tax year must be taken into account.
>
> *Example: Michaela*
>
> M received foreign income on 10 April of $5,000 when the exchange rate was (£1=$2).
>
> She remitted $1,500 to the UK on 15 May when the exchange rate was £1=$1.50 She will pay tax on the sterling amount of £1,000.
>
> At the end of the tax year, M's 'unremitted foreign income' will be calculated using the exchange rate at the end of the tax year, which is £1=$1.80.
>
> This is calculated as follows:

Total foreign income and gains for that year	$5,000
less	
Amount of that foreign income remitted during year	($1,500)
Unremitted foreign income	$3,500

> $3,500 is £1,944 using the exchange rate at the end of the tax year; she may use s809D if she wishes to use the remittance basis.
>
> If the exchange rate at the end of the year was £1=$1.50 then the $3,500 unremitted foreign income would be £2,333, which is above the threshold. ...

The HMRC currency technical note provides the reason for the 5 April conversion view:

> 29. On further consideration of the wording of s809D, HMRC took the view that for foreign income, this calculation can only be made on the last day of the tax year, as that is the only date an individual's total and unremitted foreign income for a tax year can be ascertained. Consequently the foreign currency should be translated into sterling on that date also, for both the total foreign income and the remitted foreign income for the purposes of s.809D only.
> 30. Although UK income tax is charged on sterling amounts, it does not follow that the calculations to get to an income threshold such as this in s809D necessarily have to be made in sterling. Consequently the formula of deducting the remitted income from the total income can be carried out in the foreign currency on the last day of the tax year and then the balance which is left namely the "unremitted foreign income" can be translated into sterling on that date to ascertain whether it is below the £2,000 limit.

Thus the basis for the 5 April conversion view is the (erroneous) HMRC view that the currency conversion date for remitted income is the date of remittance. If the practitioners view is accepted, that the currency conversion date is the date that the income arises, s.809D does not raise any problem, as obviously the same approach should apply there also.

95.8 Nominated income/gains: Currency conversion date

The RDR Manual provides:

> **RDRM31190 Exchange Rates** [Jan 2019]
> *Nominated income and gains*
> Nominated income and gains are charged to UK tax on the arising basis... This means that any foreign income that is nominated for the purpose of the Remittance Basis Charge is converted to pounds sterling at the exchange rate that applied on the date the income arose.
> Foreign chargeable gains are always calculated in pounds sterling at the rate of exchange that applied on the date the gain is realised.

The Manual gives a straightforward example.[24]

95.9 Foreign tax credit: Currency conversion date

International Manual provides:

[24] "*Example (Francoise)*
F is a non-domiciled individual who is subject to the Remittance Basis Charge. She decides to nominate €20,000 of foreign income. The exchange rate on the date the income arose was €0.744 to the pound. She uses this rate to calculate the equivalent nominated amount of foreign income in sterling, which is £14,880."

> **INTM162620. Rate of exchange to use** [Dec 2019]
>
> For the purpose of computing tax credit relief, foreign tax, payable directly or by deduction, should be converted into sterling at the rate of exchange obtaining on the date when the foreign tax for which credit is to be allowed becomes payable.
>
> *In practice*
>
> 1. Officers need not make enquiries in all cases in order to establish the precise date on which the foreign tax became payable under the foreign country's laws. Where the date is not known, the date of payment of the tax can normally be taken as the payable date. Where the foreign tax has been deducted at source from income, for example, from dividends, interest or royalties, the payable date will normally be the same date as the date on which the income is paid. If, however, the customer objects, or a substantial amount of tax is involved, the actual payable date should be determined. In many cases the date can be obtained from the demand note, provided that there has been no appeal against the foreign charge. If any difficulty arises in determining the payable date, in a case where such date is material, or if the customer objects to this basis, the case should be submitted to the Business, Assets & International, Assets Residence & Valuation in the case of individuals and to CSTD, Business Assets & International, Base Protection Policy Team in all other cases. See, however, INTM167190 in the case of interest on a loan relationship.
>
> Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the customer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted.

The Manual does not distinguish between an arising basis taxpayer and a remittance basis taxpayer. So on the HMRC view, the currency conversion date for remitted income is the date of remittance, but the currency conversion date for the tax credit on the same income is the date that the tax was paid, which may not even be close. That is yet another anomaly arising from the HMRC view that the currency conversion date is the date of remittance.

See *Greig v Ashton* 36 TC 581.

95.10 Foreign currency bank account: CGT

The TCGA deals separately with foreign currency bank accounts and foreign currency not in a bank account (banknotes and coins).[25] But bank accounts are the usual way to hold money, so that is the more important area.

A bank account is a debt, and a chargeable gain does not usually arise from a debt, because of the CGT debt exemption in s.251(1) TCGA.[26]

Section 252(1) TCGA provides:

> [A] Section 251(1) does not apply in relation to a gain accruing to a person on a disposal of a foreign currency debt (or an interest in such a debt)
> [B] unless that person is--
> (a) an individual,
> (b) the trustees of a settlement, or
> (c) the personal representatives of a deceased person.

Section 252(2) TCGA defines "foreign currency debt":

> A "foreign currency debt" is a debt–
> (a) owed by a bank[27] in a currency other than sterling, and
> (b) represented by a sum standing to the credit of an account holder in an account in that bank.[28]

The label "foreign currency debt" is not apt; "foreign currency bank account debt" would be better; but there it is. Adopting the terminology of s.252(1)[A], it notionally disapplies CGT debt exemption, in the case of a "foreign currency debt". But then para [B] then adds an exception so large that the exemption is (more or less) restored.

The relief in para [B] does not apply to companies, but that does not matter, as:

(1) UK companies are governed by the loan relationship rules (not discussed here).
(2) Foreign currency debts of non-resident companies are essentially outside the scope of CGT.[29]

[25] See 95.11 (Foreign banknotes/coins).

[26] See 56.22.1 (CGT debt exemption).

[27] "Bank" is not defined, but it does not matter.

[28] CG Manual 78330 formerly provided: "Foreign currency certificates of deposit in bearer form are not within TCGA 1992, s.252." The passage was deleted in 2010. One is left to speculate as to whether HMRC have changed their view. The issue would require an examination of the nature of certificates of deposit.

[29] See 64.4 (Computing gains: CT rules).
HMRC say: "There is no need to include companies in the exemption because

It would have been simpler to apply CGT debt exemption to all persons, ie to repeal the whole of s.252 TCGA; but there it is.

There could be a chargeable gain on a foreign currency debt (even a bank account debt), if s.251 relief did not apply, such as a secondhand debt or a debt on a security. But it is not necessary to consider the topic here.[30]

95.11 Foreign banknotes/coins

Foreign banknotes/coins are assets on which a gain may accrue.[31]

CG Manual provides:

> **CG78316 Identification of disposals with acquisitions** [Jul 2019]
> Foreign currency is subject to the same rules of identification and pooling as unquoted shares and securities. See CG50500+.

The share pooling/matching rules apply.[32]

95.11.1 *Foreign currency for personal expenditure*

There is an exemption for foreign currency needed for personal expenditure abroad. This is not likely to affect remittance basis taxpayers, as gains on disposals of this kind are not likely to be remitted, but it is important for others. Section 269 TCGA provides:

> A gain shall not be a chargeable gain if accruing on the disposal by an individual of currency of any description acquired by him for the personal expenditure outside the UK of himself or his family or dependants (including expenditure on the provision or maintenance of any residence outside the UK).

Cryptoassets (such as bitcoin) are not currency[33] and so outside this exemption. But the point is not likely to arise.

companies' returns from FCBAs [foreign currency bank accounts] are not liable to tax on capital gains." Reform of the taxation of non-domiciled individuals: summary of responses to consultation (2011) para 2.102
http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

[30] See the 2011/12 edition of this work chap 49 (Foreign currency issues).

[31] See 56.3.2 ("Assets")

[32] See 56.12 (Share pooling and matching).

[33] See 96.5 (Cryptoassets: Currency/money?).

95.11.2 *Critique*

The taxation of foreign banknotes/coins should be the same as foreign currency bank accounts, and the relief in s.251 should be extended. However in practice this is not so important as it would be unusual for a person to hold substantial foreign currency outside a bank account (except perhaps as trading receipts outside CGT).

95.12 Interaction with mixed fund rules: HMRC examples

The CG Manual provides examples of the following:
(1) Remittance of part of FC account holding capital gain (Fatima)
(2) Ditto with previous offshore transfer (example 2)
(3) Remittance of part of FC account holding income & gain (example 3)
The RDR Manual provides examples of the following:
(4) Remittance of part of FC account holding income (Julius).
(5) Remittance of part of FC account holding RFI and RFE (Tom)
(6) Ditto with previous offshore transfer (Gelda)

The examples are discussed in the 2011/12 of this work, but this is not set out here as it is overtaken by the 2012 reforms.

95.13 Foreign currency issues: Critique

The 2012 reform, which was advocated in the 2011/12 edition of this book, genuinely deserves the title of simplification. The problems which remain could be solved as follows.

Annual exchange rate averaging The problem (for arising basis and remittance basis taxpayers) is the general impracticability when there are a significant number of transactions of converting foreign currency to sterling at a variety of moments during the year: the moment that income arises, the moment that gains arise, and the moment that capital expenditure is incurred. The solution is in the HMRC practice to allow use of an annual average rate in any currency during the year and to average out acquisitions and disposals. HMRC should publish rates each year for every currency. Provided taxpayers are not allowed to switch adventitiously between accurate and average exchange rates, this would have no significant cost implications.

Currency conversion date The second set of problems (for remittance basis taxpayers) arise from HMRC's mistaken view that the currency conversion date for income of a remittance basis taxpayer is the date of remittance. The solution is to recognise the existing law, or (if that is not accepted) to amend the law to the practitioners view. This would have no cost implications.

Consultation paper ("the HMRC staking paper") (2023)
Call for evidence outcome (2023)

HMRC guidance is in the Cryptoasset Manual.

I go beyond the themes of this book and address the topic as a whole, but do not consider Corporation Tax or VAT.

96.2 Cryptoasset terminology

96.2.1 *"Cryptoasset"*

Cryptoasset does not have a widely agreed definition. A variety of definitions have been proposed, and different definitions may be appropriate in different contexts.

Regulation 14A(3) MLR 2017 adopts this definition:

> For the purposes of this regulation—
> (a) "cryptoasset" means
> [i] a cryptographically secured digital representation of value or contractual rights
> [ii] that uses a form of distributed ledger[7] technology and
> [iii] can be transferred, stored or traded electronically; ...
> (c) in sub-paragraphs (a), (b) and (c) of paragraph (1), "cryptoasset" includes a right to, or interest in, the cryptoasset.[8]

The Crypto Manual also adopts this definition:

[6] *https://www.gov.uk/government/consultations/the-taxation-of-decentralised-finance-involving-the-lending-and-staking-of-cryptoassets*
https://www.gov.uk/government/calls-for-evidence/call-for-evidence-the-taxation-of-decentralised-finance-involving-the-lending-and-staking-of-cryptoassets/the-taxation-of-decentralised-finance-involving-the-lending-and-staking-of-cryptoassets-call-for-evidence

[7] The glossary to the Law Commission crypto paper provides:
Distributed ledger A digital store of information or data. A distributed ledger is shared (that is, distributed) among a network of computers (known as nodes) and may be available to other participants. Participants approve and eventually synchronise additions to the ledger through an agreed consensus mechanism.

[8] This wording is based on the Taskforce Report para 2.2. It is copied in later statutory instruments regulating cryptoassets, eg the Sanctions (EU Exit) (Miscellaneous Amendments) Regulations 2022 and the Sanctions (EU Exit) (Miscellaneous Amendments) (No.2) Regulations 2022. Perhaps it will become the standard definition.

> **CRYPTO10100: what are cryptoassets** [Apr 2021]
> Cryptoassets (also referred to as 'tokens' or 'cryptocurrency') are cryptographically secured digital representations of value or contractual rights that can be transferred/stored/traded electronically
> While all cryptoassets use some form of Distributed Ledger Technology (DLT) not all applications of DLT involve cryptoassets.

I refer to that as the MLR/HMRC definition of cryptoasset, and that is the definition used in this chapter.[9]

There are not (yet) any statutory definitions of cryptoasset for tax, for there are not (yet) any statutory tax provisions which deal with cryptoassets; but that is just a matter of time.

Cryptoasset may be abbreviated to crypto, which may in the future become the usual word; but in this work I only use that term in headings where space is short.

"Stablecoins" are crypto-tokens with a value that is intended to be pegged, or tied, to a currency, commodity or financial instrument. But it makes no difference for tax whether a cryptoasset has stablecoin status.

96.2.2 *Law Commission terminology*

The Law Commission Report uses different terminology:

Digital asset, defined as:

> Any asset that is represented digitally or electronically. There are many different types of digital assets, not all of which will be capable of being

[9] The HMT paper "Cryptoasset promotions: Consultation response" would tweak the definition:

"4.17 The government has reassessed the necessity of specifying the type of underlying technology a cryptoasset uses in a legal definition. While most cryptoassets currently use DLT, it might be that this changes as the technology and industry evolve. Therefore, the government proposes to remove the reference to DLT from the definition of qualifying cryptoassets. This will future-proof the definition for innovations in the underlying technology that cryptoassets utilise. This technology-agnostic definition is in line with the definition proposed by the government in its consultation on the regulatory treatment of stablecoins.

4.18 In line with the policy set out here, the government intends to define the scope of 'qualifying cryptoasset' as any cryptographically secured digital representation of value or contractual rights which is fungible and transferable."

See *https://www.gov.uk/government/consultations/cryptoasset-promotions*

I do not think that change fundamentally alters the concept.

> things to which personal property rights can relate. In this report, we use the term in a broad sense."

Crypto-token defined as:

> A crypto-token exists as a notional quantity unit manifested by the combination of the active operation of software by a network of participants and network-instantiated data. For more detail, see Chapter 4 (Third thing in practice).

The Law Commission Report uses a different definition of Cryptoasset:

> A cryptoasset, in the sense we use it in this report, refers to a crypto-token which has been "linked" or "stapled" to a legal right or interest in another thing. Linking or stapling refers to a legal mechanism whereby the holder of a legal right or interest in a thing is identified by reference to a crypto-token. For more detail, see Chapter 8 (Collateral arrangements).

But in this chapter I use the term cryptoasset in the MLR/HMRC sense.

96.2.3 *Types of cryptoasset*

The Taskforce report provides:

> 2.11 The Taskforce considers there to be three broad types of cryptoassets:
> A. **Exchange tokens** – which are often referred to as 'cryptocurrencies' such as Bitcoin, Litecoin and equivalents. They utilise a DLT platform and are not issued or backed by a central bank or other central body. They do not provide the types of rights or access provided by security or utility tokens, but are used as a means of exchange or for investment.
> B. **Security tokens** – which amount to a 'specified investment' as set out in the Financial Services and Markets Act (2000) (Regulated Activities) Order. These may provide rights such as ownership, repayment of a specific sum of money, or entitlement to a share in future profits. They may also be transferable securities or financial instruments under the EU's Markets in Financial Instruments Directive II (MiFID II).
> C. **Utility tokens** – which can be redeemed for access to a specific product or service that is typically provided using a DLT platform.

This chapter is concerned with exchange tokens. The tax treatment of security tokens is different. It would aid clarity of thought not to use the word cryptoasset to describe both exchange tokens and security tokens.

96.3 Assets which are not cryptoassets

96.3.1 *Underlying non-crypto asset*

The Crypto Manual provides:

> **CRYPTO22600: location of exchange tokens** [Feb 2022]
> ...**Underlying Asset**
> ... Where the cryptoasset is simply a digital representation of an underlying asset then the location of the underlying asset will determine the location of the cryptoasset.
> **Example**
>
> > ABC Ltd buys and sells gold bullion on behalf of clients. ABC Ltd issues the GoldABC Coin where each token represents the beneficial interest in one gold bar. The GoldABC Coin is a digital representation of a physical asset – the gold bar – and we 'look through' the GoldABC Coin and establish the location of the GoldABC Coin by reference to the underlying asset, being gold bar.
> > It is possible for a cryptoasset to be a digital representation of another intangible asset, such as share capital or debt, and the relevant rule for determining the location of the underlying asset would determine the location of the cryptoasset.

I think it is not helpful to call this a cryptoasset. The "cryptoasset" is an entry in a ledger which is merely evidence of ownership of the underlying asset.[10] If the term crypto is used here, it should be borne in mind that this is a different use of the word.

The Law Commission paper terminology makes the distinction by referring to: (1) crypto- token (the code or register) and (2) cryptoasset (a separate asset to which the token relates).[11] Perhaps that will catch on.

The same applies to a "non-fungible token" which is a crypto-token that has an individual identification number (hence, not fungible) and evidences ownership of an asset, (a digital asset, eg digital art, or a physical asset); or which may be used to certify that a physical asset such as an item of clothing is genuine.

96.3.2 *Cryptoasset derivative*

The Crypto Manual provides:

[10] UK Jurisdiction Taskforce agree: Legal Statement on Cryptoassets and Smart Contracts para 95.

[11] Para 14.3 ff.

> **CRYPTO10150: Derivatives over cryptoassets** [Feb 2022]
> A derivative is a financial instrument where the performance is based on the movement of the price of the underlying asset. Under a derivative the holder does not hold the underlying asset. Some businesses offer the ability for individuals and companies to gain exposure to the movements in the cryptoasset market by using a derivative.
> The nature of a derivative is typically very different to directly holding a cryptoasset. In particular, a derivative will give rise to contractual rights and obligations between the two parties. As a result, where a cryptoasset derivative has been entered into the guidance in this manual will not generally apply.
> Where a company enters into a derivative over a cryptoasset this will typically constitute a 'derivative contract' within Part 7 of CTA09...

In short, a cryptoasset derivative is not a cryptoasset, just as a gold derivative is not gold.

96.4 Cryptoassets: Property

Everyone agrees that:

(1) Cryptoassets are property, of a somewhat novel kind.[12]

(2) Cryptoassets are property for IHT purposes, and assets for CGT purposes, and so within IHT/CGT.[13]

96.5 Cryptoassets: Currency/money?

96.5.1 *Terminology: Currency/money*

Statute uses the terms money/currency/cash. These are used (more or less) synonymously, though when discussing statutory provisions it is best to use the same term as the statute, and not a synonym.

There is generally no statutory definition so (subject to context) the words have their normal meaning. But of course the words have a range of meanings. Mann and Proctor on the Law of Money[14] states that

[12] Law Commission Report para 3.40 ff. Underlying the statement that cryptoassets are property are deep questions as to the meaning of property. See the Law Commission Crypto paper chapter 2, especially 2.10:

> "This consultation paper endorses an understanding of property as 'a socially approved power-relationship in respect of socially valued assets, things or resources'."

[13] There are of course wide definitions; see 56.3.2 ("Assets"); 74.2.1 ("Property"). But it is not necessary to rely on them here.

[14] Proctor, *Mann and Proctor on the Law of Money* (8th ed, 2022), chap 1.

economists define money by reference to some of its functions, namely:
(1) a medium of exchange
(2) a measure of value
(3) a store of wealth
(4) a unit of account

There is no single widely agreed legal definition of money, and no reason why economists and lawyers should use the same definition, but to simplify a long discussion, these functions, especially the first, may be regarded as indicia of money in the legal sense. As it is a question of fact whether (or to what extent) an asset fulfills these functions, the question of whether an asset is money is a mixed question of fact and law.

96.5.2 *Cryptoassets not currency/money*

It is generally agreed that cryptoassets are not currency/money. The Taskforce Report provides:

> 2.13 While cryptoassets can be used as a means of exchange, they are not considered to be a currency or money... They are too volatile to be a good store of value, they are not widely-accepted as means of exchange, and they are not used as a unit of account.

The Crypto Manual provides:

> **CRYPTO22550 Currency** [Feb 2022]
> HMRC does not consider cryptoassets to be currency or money.

The Law Commission Report provides:[15]

> 6.71 The characterisation of crypto-tokens as money or otherwise is outside the scope of this report. However, we make three observations on the point. First, the debate on whether a crypto-token is "money" has largely focused on a specific sub-set of crypto-tokens over the last few years (that is, those that are intended to function in a similar way to money), rather than on crypto-tokens in general. However, other crypto-tokens are not designed to replicate the functionality or characteristics of money. So the special defence applicable to money would remain inapplicable to those types ofcrypto-token.
> 6.72 Second, whether a crypto-token (or specific crypto-token) is

[15] Original footnotes omitted.

> characterised as money is likely to depend on the law of the particular jurisdiction in question and this characterisation might be different across different jurisdictions. Indeed, some crypto-tokens are already recognised as legal tender in some jurisdictions. It is also possible that some jurisdictions will adopt central bank digital currencies, which might be given "monetary" status by legislation.
>
> 6.73 Third,”the property regime applying to money is just one of a number of legal devices by which the state can support the efficiency of monetary functions”. It is therefore less accurate to ask “are crypto-tokens money?” than to ask the specific question as to whether the law is able to characterise crypto-tokens as something that should enjoy a privileged proprietary status which other kinds of assets or things do not enjoy. This question can be asked separately for each distinct "legal device" by which the state can support the efficiency of monetary functions...

In other words, it is better not to have to ask whether cryptoassets are money. But when statutes use the word money/currency, the question cannot be avoided.

In 2021 El Salvador (population 6m, GDP 25 billion USD, in 2020) recognised Bitcoin as “legal tender”. But in assessing whether that turns Bitcoin into money, one needs to look beyond the label. National Bureau of Economic Research reports:[16]

> Although the law requires all firms to accept bitcoin, in reality only 20% do so. Roughly 5% of all sales have been paid in bitcoin through Chivo Wallet, and just as most households using Chivo prefer to keep their money in cash rather than in bitcoin, 88% of firms convert their bitcoin into dollars.

In the UK, the Foreign Office advise:

> British Nationals considering using Bitcoin should ensure that they understand the processes and risks involved, and that they have access to US dollars if they need them.[17]

In 2022, the Central African Republic (population 5m, GDP 2 billion

[16] Alvarez, Argente & Patten, “Are Cryptocurrencies Currencies? Bitcoin as Legal Tender in El Salvador” NBER Working Paper 29968 (2022) *https://www.nber.org/papers/w29968*

[17] *https://www.gov.uk/foreign-travel-advice/el-salvador/money*

USD, in 2020) also made Bitcoin legal tender, or at least so it said. Though BBC report that “There has certainly not been a sudden explosion in the capital, Bangui, of businesses such as shops or cafes accepting Bitcoin as a means of payment.”

The change of asset status from not being currency/money to being currency/money would have profound implications for tax and, even more, I suspect, for non-tax purposes. So the change should not be inferred lightly, eg from legal constructs in small and remote developing countries, and particularly where the legal theory is not reflected in actual practice.

Closer to home, the UK Government considers that stablecoins linked to currency:

- share characteristics with e-money; and
- have the potential to develop into a widespread means of payment and store of money[18]

The government intends “to legislate to bring stablecoins – where used as a means of payment – within the payments regulatory perimeter”.[19] If that happens, it is possible that these stablecoins may become currency/money; though that change would only affect a small proportion of the totality of cryptoassets.

96.5.3 *Non-money status: Tax consequences*

It follows that statutory references to money/currency do not in principle apply to cryptoassets. (Context could of course show that the term currency is used widely, or loosely, and includes cryptoassets. That is the case for VAT.[20])

References to “money” in tax provisions do not apply to cryptoassets,

[18] HM Treasury, “UK regulatory approach to cryptoassets, stablecoins, and distributed ledger technology in financial markets: Response to the consultation and call for evidence” (April 2022) para 1.5; 2.30; 2.42. But this will not apply to unbacked stablecoins that seek to maintain a stable value by using algorithms, or those linked to assets other than currency. These are said to be unlikely to meet the requirements for retail payments: para 2.46; 2.53.
https://www.gov.uk/government/consultations/uk-regulatory-approach-to-cryptoassets-and-stablecoins-consultation-and-call-for-evidence

[19] Press release, 4 April 2022
https://www.gov.uk/government/news/government-sets-out-plan-to-make-uk-a-global-cryptoasset-technology-hub

[20] *Skatteverket v David Hedqvist* C-264/14.

with the following consequences:[21]

(1) Payment for use of cryptoassets is not interest (defined as payment by time for the use of money)
(2) An obligation to transfer cryptoassets is not a loan relationship (the definition requires a money debt)[22]
(3) Giving cryptoassets to charity does not qualify for Gift Aid relief, (which requires a gift of a sum of money)

The word "payment" (or "paid") when used in its strict sense means payment of money, and when used in that sense does not include a transfer of cryptoassets. For instance, a transfer of cryptoassets to a registered pension scheme does not qualify for relief, as pension contributions must be paid in money.[23]

References to "currency" in tax provisions, which do not apply cryptoassets, include the CGT relief for personal expenditure.[24] But as that relief is limited to personal expenditure, the point is not likely to arise, except, perhaps, for visitors to El Savador and Central African Republic.

References to "cash" in tax provisions, which do not apply cryptoassets, include CGT incorporation relief, which requires assets other than cash to be transferred.

A debt in its natural sense means an obligation to pay money so an obligation to transfer cryptoassets (**"a cryptoasset obligation"**) is not a debt. References to debt in statutory provisions, which do not include a cryptoasset obligation, include the CGT exemption for debts and foreign currency bank accounts.[25]

If cryptoassets become money, then:

(1) An cryptoasset obligation will be a debt and may be a loan relationship; but
(2) Directly held cryptoassets would not be a debt, or a loan relationship.

That would be anomalous.

In the (perhaps unlikely) event that regulatory reforms give cryptoassets

[21] Of course this list is not comprehensive. Some minor remittance basis provisions refer to money; see 18.13.1 (Property" and "money").

[22] See 64.5.1 ("Loan relationship").

[23] See 15.2.3 (Payment: WHT, PAYE).

[24] See 95.11.1 (Foreign currency for personal expenditure).

[25] See 56.22.1 (CGT debt exemption). The relief would still apply if the debt were a foreign currency debt (as defined); see 95.10 (Foreign currency bank account: CGT).

the status of money, these issues would need to be considered further.

96.6 Cryptoasset situs

96.6.1 *Case law and HMRC view*

In *Fetch AI Ltd v Persons Unknown*:[26]

> It was submitted that [cryptocurrency] was property located in England because that was, in essence, the country where the owners of the assets concerned were located. In that regard, I adopt, with respect, the conclusions reached by Butcher J in *Ion Science v Persons Unknown*[27] ...
>
> > ...lex situs of a cryptoasset is the place where the person or company who owns it is domiciled.

It is considered that the test of situs adopted here is residence of the owner. The judgment cites Prof Dickinson (see below) who refers (in short) to residence. In the *Fetch AI* judgment we have the words "located" and "domiciled". But the context shows that "domicile" is not a reference to common law domicile, but has a sense similar to that in CJJA 1982 which amounts to jurisdiction-residence.[28] That may be the definition of domicile which first comes to the mind of a practitioner in private international law. And "located" must be read in the same sense. This view is now supported by *Tulip Trading Ltd v Bitcoin Association For BSV*.[29]

[26] [2021] EWHC 2254 (Comm) at [14]. This was an application attended by one party only. Such a judgment is not citable in court, unless it contains an express statement that it purports to establish a new principle or to extend the present law. But that requirement appears to be met. See Practice Direction (Citation of Authorities) [2001] 1 WLR 1001.
https://webarchive.nationalarchives.gov.uk/ukgwa/20110204002153/http://www.hmcourts-service.gov.uk/cms/814.htm
For completeness: The comment was again cited and approved in *Danisz v Persons Unknown* [2022] EWHC 280 at [17], another application attended by one party only. But that does not add anything.

[27] Unreported, 21 December 2020 at [13]; I have not seen a copy of this judgment.

[28] Section 41 CJJA 1982 provides: "An individual is domiciled in the UK if and only if—
(a) he is resident in the UK; and
(b) the nature and circumstances of his residence indicate that he has a substantial connection with the UK."

[29] [2022] EWHC 667 (Ch) [142] - [148]; the question of situs was not discussed on the appeal.

HMRC (more or less) agree. The Crypto Manual provides:

> **CRYPTO22600: location of exchange tokens** [Feb 2022]
> **... No Underlying Asset**
> Where the cryptoasset is an asset distinct from any underlying asset then HMRC's view is that none of the statutory rules in the TCGA 1992 apply...
> For Inheritance Tax, common law is relevant to the extent that Double Taxation Agreements do not determine the location.[30]

So the common law rules situs apply to CGT and IHT.

> Instead it is HMRC's view that:
> - exchange tokens have an economic value as they can be 'turned to account' - for example, exchanging them for goods, services, fiat currency or other tokens;
> - exchange tokens are a new type of intangible asset (different to other types of intangible assets, such as shares or debentures); and
> - the only identifiable party to consider is the beneficial owner of the exchange token,
>
> such that the location of the cryptoasset will be determined by the residency of the beneficial owner
> Using the residency of the beneficial owner of the exchange tokens to determine the location gives a clear, logical, predictable and objective rule which can be easily applied. This means that a person who holds exchanges tokens is liable to pay UK tax if they are a UK resident (as determined by the Statutory Residence Test, see RDRM11000) and carry out a transaction with their tokens which is subject to UK tax...

96.6.2 *Which residence test?*

The Manual agrees with *Fetch AI* that the test of situs is residence of the beneficial owner. The difference, if such it be, is that HMRC say the test of residence should be the SRT. The SRT is the definition of residence which first comes to the mind of a tax practitioner. But the SRT cannot be the applicable test of residence for situs, because:

(1) Situs is a general law concept.
(2) The SRT applies for limited tax purposes. For instance, it does not apply to companies or to trusts.
(3) What matters for situs is the situs at any particular moment, whereas the SRT determines residence for a tax year, and it may not be

[30] Author's footnote: Existing DTAs do not determine the location of cryptoassets.

determined until well after the end of the year.

It is clear that the residence test should be the same as for debts, ie residence here means jurisdiction-residence.[31]

For individual owners, that will generally give the same result as the SRT, so the point will rarely if ever arise in practice. Perhaps HMRC only mean to say that the SRT is a convenient rule of thumb which they use to identify jurisdiction-residence.

Where the individual is dual-resident a tie-breaker test of chief residence would be appropriate.

Similarly for companies, the test is jurisdiction-residence, but that will generally give the same result as the corporate tax residence tests.

Where cryptoassets are held by a trust, the test is the jurisdiction-residence of the trustees (not the IT/CGT trustee residence test). Some tiebreaker rule must be applied if the trust has trustees resident in different jurisdictions, but the issue will not often arise, except, perhaps, by accident.

96.6.3 *Prof Dickinson's view*

Fetch.AI and *Ion Science* refer to Dickinson's essay in *Cryptocurrencies in Public and Private Law*:[32]

> 5.109 ... the benefits accruing to a person who is a participant[33] in a cryptocurrency system such as Bitcoin or Ripple (i) are a species of intangible property in the English conflict of laws, which (ii) arises from the participation of an individual or entity in the cryptocurrency system, and (iii) is appropriately governed by the law of the place of residence or business of the participant with which that participation is most closely connected.
>
> Rather than deciding a fictional situs, the choice of law rule can be more straightforwardly, and appropriately, expressed in the terms that the

[31] See 102.14.2 ("Jurisdiction-residence"). STEP crypto guidance agrees: "residence must surely be tested by reference to relevant common-law principles and not by reference to the tax definition contained in the statutory residence test. The reason for this is that, as explained above, the location of an asset is a general common law concept and is relevant for purposes which go beyond taxation."

[32] Chapter 5, "Cryptocurrencies and the Conflict of Laws"; Ed Fox & Green, (1st ed, 2019) para 5.106-5.112; footnotes are omitted.

[33] Author's footnote: Dickinson does not define "participant" but the context shows the meaning is "owner", which is word used in *Fetch AI*.

> proprietary effects outside the cryptocurrency system of a transaction relating to cryptocurrency shall in general be governed by the law of the country where the participant resides or carries on business at the relevant time or, if the participant resides or carries on business in more than one place at that time, by the law of the place of residence or business of the participant with which the participation that is the object of the transaction is most closely connected.

At first sight this passage is not relevant to the question of cryptoasset situs. The author does not say that the situs of a cryptoasset is the place of residence or business. He says that (for the purpose of ascertaining what is the law applicable to a dispute) private international law should reject a situs test.[34] He proposes a place of residence/business without using the word or concept of situs. He prefers to avoid what he calls a fictional situs (though I would use the softer word "technical"[35]). However that may be, *Fetch.AI* regarded the passage as supporting a place of residence/business test for situs, and when situs has to be determined, it seems sensible to have regard to the relevant private international law rule, even if that rule is formulated without using the word *situs*.

96.6.4 *STEP view*

The STEP crypto note floats another view:

> a case could be made for allocating the location of cryptocurrency to the place where it can effectively be dealt with

"A case could be made" is somewhat tentative guidance.[36] But adopting that test, where can cryptoassets be dealt with?

> it can only be dealt with by the use of the private key and, arguably, its location should therefore be linked to the location
> [1] of the private key or
> [2] of the person who has control of the private key (who may or may not be the beneficial owner).

As to [1], the private key is a code or number, which does not have a physical location, even if it is held on a hard drive which has a physical

[34] This is a widely held view; see 102.1.1 (Situs in tax/private international law).

[35] See 102.2.1 (Is situs fictional?).

[36] "Arguably" in the passage which follows emphasises the tentative nature of the guidance.

location. The hard drive is not the code: it is merely a record of the code.[37]

As to [2], in principle the owner will have control of the key. So that takes us back to what STEP call the location (meaning, I assume, residence) of the owner.

Amy Held rejects the STEP suggestion:[38]

> ... the UK Financial Markets Law Committee has identified a potential solution emphasising the private key.[39] Two possibilities for an artificial situs stem from such premise:
>
> (i) the place where the private key is situate; or
>
> (ii) the place where the system participant transferring the crypto asset – using the private key – is resident, or has its centre of main interests, or is domiciled.
>
> The primary difficulty with this approach lies in the nature of the private key itself as a large and unique number generated according to cryptographic standards of randomness. Private keys are, thus, in themselves just as much an intangible concept as the crypto asset itself. Accordingly, any proposed solution to the problem of localising a crypto asset based on the private key merely defers consideration of the issue: where then is the private key situate for the purpose of proposal (i) above? In addition, the ease with which infinite copies of a private key,

[37] Dickinson agrees, at 5.89:

> "It is important to distinguish the proprietary aspect of a cryptocurrency from questions of title to any computer or other device on which the information relating to a cryptocurrency (including, for example, a private key or a copy of the blockchain) is held."

Likewise the Law Commission crypto paper 10.34:

> "a private key, which is not an instantiated data structure in itself, should simply be conceptualised as information that is not capable of attracting property rights."

The UKJT Statement made this point forcefully:

> "[A private key] is no more than an item of pure information and, like a password or a telephone number, it cannot itself be treated as property."

[38] Amy Held,, "Crypto Assets and Decentralised Ledgers: Does Situs Actually Matter" (2023) *https://brill.com/edcollchap-oa/book/9789004514850/BP000017.xml?body=pdf-60830*

See too, Amy Held, "Cryptoassets as property under English law Pt II: ownership, situs and the circular question of jurisdiction" (2023) 4 Journal of International Banking and Financial Law 236.

[39] Financial Markets Law Committee, "Issues of Legal Uncertainty Arising in the Context of Virtual Currencies" (2016), para 6.21 ff *http://fmlc.org/report-virtual-currencies-18-july-2016/*

> once generated, may be made poses significant difficulties for identifying which copy is definitive for the purpose of a legally valid transfer. In the absence of a definitive register linking private keys with users, the difficulty in identifying who in fact used a private key to propose a change in state within an unpermissioned network – and whether the law considers that they were entitled to do so – renders proposal (ii) above untenable.

It may be possible to arrange that use or access to the key is constrained. For example, some 'closed-systems' require the key to be inputted from a certain physical location. If that requirement could not be altered, that location might be the situs. That is where the asset must be dealt with. But I wonder if the requirement could actually be made unalterable.

This takes us to the topic of "cold wallets". A cold wallet is a piece of hardware such that a transfer of cryptoassets to which it relates requires the physical use of the cold wallet. It might be said that the cold wallet contains the cryptoassets, but it may be more accurate to say it contains the key to the intangible cryptoassets. Still, some argue,[40] the location of the cold wallet is the situs for the cryptoassets to which it relates. Alternatively it might be said that the situs of the cold wallet is where the cryptoassets are dealt with. This analysis would allow taxpayers, through the use of cold wallets, to arrange cryptoassets to have non-UK situs for UK tax purposes. That is an attractive outcome for taxpayers, but not for HMRC. In a tax appeal, at least, the courts are not likely to be sympathetic to a taxpayer who has used a cold wallet for tax reasons of tax planning (which a court may regard as tax avoidance). In practice cold wallets may however be preferred for non-tax reasons, as they are more secure. Even then, a court may still prefer a rule which does not permit taxpayers to chose the situs.

If there were a single place where the register or record is kept, that should be the situs. But as I understand the technology, there need not be, and generally will not be, any single place where the register or record is kept, so this is not a workable test.[41]

There is no requirement that the test of situs is the same for all cryptoassets. Suppose one could identify a class of cryptoassets where there is a clear place where:

[40] See Brockhurst, *Cryptoassets for Private Clients: A Practitioner's Guide* (1st ed, 2023).

[41] See 102.6.3 (Dematerialised register).

(1) the register or record is kept, or
(2) the cryptoasset can be dealt with.

Then one might say that place is the situs of for that class, with a different rule (residence of the owner) for other types of cryptoassets.[42] But I wonder if one can identify any class of cryptoassets where there is a clear place where the register or record is kept, or where the cryptoassets can be dealt with, except perhaps by the technique of cold wallets, which are manipulable and easily reversible.

Law Commission, "Digital assets and ETDs in private international law; Call for Evidence" considers a range of other proposals.[43]

96.6.5 *Cryptoasset co-ownership*

In cases of simple co-ownership, situs of each co-owner's interest depends on that co-owner's residence. HMRC agree:

> **CRYPTO22600: location of exchange tokens** [Feb 2022]
> If an exchange token is co-owned between two or more beneficial owners, then section 275C TCGA 1992 applies (for Capital Gains Tax).[44] Each beneficial owner's interest in the asset will be where that beneficial owner is resident. If one or more of the co-owners are UK resident, this will not affect the location for those co-owners who are not UK residents.

In cases of intermediated ownership, the IHT/CGT situs rules differ. Situs for IHT is governed by the common law rules which govern intermediated securities.[45] These rules do not apply for CGT.[46]

Of course, if co-ownership takes the form of a unit trust, then unit trust rules apply.[47]

96.6.6 *Cryptoasset situs planning*

To avoid UK situs for IHT and CGT purposes, a UK resident foreign

[42] Shares offer an analogy, with the distinct rules that registered shares are situate where registered, and bearer shares (which by definition have no register) are situate where the physical bearer certificate is located.

[43] See p.234 (Potential solutions to the lex situs rule).

[44] See 103.3 (Co-owned assets).

[45] See 71.3 (Transparent intermediated security: Situs for IHT/IT).

[46] See 71.4 (Proprietary intermediated security: Situs for CGT). Insofar as it suggests the contrary, the STEP crypto note should not be followed.

[47] See 69.10 (Situs of unit).

domiciliary may hold cryptoassets through a non-resident trust, company, or trust/company structure.

The cost of sheltering a gain is that it would restrict the use of a loss, if a loss accrues on a disposal, a company to a greater extent than a trust.

A foreign partnership would avoid UK situs for IHT though not for CGT purposes.

96.7 Crypto activity: Trading?

This section considers whether various activities involving cryptoassets constitute trading.

Cryptoassets are not securities, but they are in some ways analogous to financial products. The question whether cryptoasset activities are trading is governed by the same principles as for other financial products.[48]

96.7.1 *Buying/selling crypto: Trading*

The Crypto Manual provides:

> **CRYPTO10450 Why HMRC Does Not Consider Buying And Selling Cryptoassets To Be Gambling** [Apr 2022]
> HMRC does not consider the buying and selling of cryptoassets to be the same as gambling.

This is clearly not gambling in the strict sense of betting/wagering.[49]

> **CRYPTO20250: What is trading** [Apr 2021]
> Only in exceptional circumstances would HMRC expect individuals to buy and sell exchange tokens with such frequency, level of organisation and sophistication that the activity amounts to a financial trade in itself...
> As with any activity, the question whether cryptoasset activities amount to trading depends on a number of factors and the individual circumstances. Whether an individual is engaged in a financial trade through the activity of buying and selling tokens will ultimately be a question of fact...
> A trade in exchange tokens would be similar in nature to a trade in shares, securities and other financial products. The approach to be taken in determining whether a trade is being conducted or not would also be similar, and guidance can be drawn from the existing case law on trading in shares and securities.

[48] See 72.15 (What is a financial trade?).

[49] See 72.15.4 ("Gambling").

The Crypto Manual takes the same view for companies:

> **CRYPTO40150 Trading In Exchange Tokens** [Apr 2021]
> Only in exceptional circumstances would HMRC expect businesses to buy and sell exchange tokens with such frequency, level of organisation and sophistication that the activity amounts to a financial trade in itself.

But it is possible for individuals to trade, and if transactions are very numerous, say, many thousands of transactions each year, then trading is likely; and companies may trade more easily than individuals. See 70.15 (What is a financial trade?).

96.7.2 *Is lending a trade*

The Crypto Manual provides:

> **CRYPTO61211 Making A Defi Loan: Introduction** [Feb 2022]
> ... Much like when a person buys and sells cryptoassets, HMRC expects that individuals will only be carrying on a trade involving the making of DeFi loans in exceptional circumstances (see CRYPTO20250).
> The relevant factors for consideration when determining whether an individual has a trade involving the making of DeFi loans would be similar to those applied to transactions in shares, securities and other financial products, the guidance for which can be found at BIM56800.

The Crypto Manual provides:[50]

> **CRYPTO21200 Staking** [Feb 2022]
> ... Whether [staking] amounts to a taxable trade (with the tokens as trade receipts) depends on a range of factors such as: degree of activity/organisation/risk/commerciality

There is not much guidance there, but perhaps it is the best that can be done. I would have thought that the test of what is trading should be the same for lending and for staking, but what matters is not what the activity is called but what the activity involves.

96.7.3 *Mining: Trading*

The Crypto Manual uses the same text as for staking:[51]

> **CRYPTO21150 Income Tax: Mining Transactions** [Apr 2021]
> ... Whether [mining] amounts to a taxable trade (with the tokens as trade

[50] The text is repeated in relation to companies: CRYPTO40250 (Staking).

[51] The text is repeated in relation to companies: CRYPTO40200 (Mining Transactions).

receipts) depends on a range of factors such as: degree of activity/organisation/risk/commerciality

96.8 Lending/staking cryptoassets

96.8.1 *Staking/lending terminology*

The glossary to the Law Commission crypto paper provides:

> The term staking derives from its use within the "proof-of stake" type of consensus mechanism used by certain blockchains or crypto-token systems to achieve distributed consensus. Under proof-of-stake consensus mechanisms, validators transfer or "stake" capital or value into a smart contract within the system. This staked value then acts as collateral that can be destroyed if the validator behaves in certain, pre-agreed ways which are considered to be negative for the overall consensus mechanism or system security (such as acting dishonestly or lazily). The validator is then responsible for checking that new blocks propagated over the network are valid and occasionally creating and propagating new blocks themselves. The validator is rewarded (often with new crypto-tokens) for undertaking this process (and contributing to the overall security of the consensus model) and penalised by the destruction of some or all of its staked collateral if it behaves in certain negative ways.
>
> The term staking has recently been used by market participants in a broader, less specific way, simply to refer to transferring or locking certain capital or value to smart contracts in return for a reward, even where no positive contribution is made by the staker and/or where the staked capital or value is not at risk.

The Crypto Manual uses the term in the second of these two senses:

> **CRYPTO61120 Meaning Of 'Loan' And 'Staking'** [Feb 2022]
>
> [*Lending:*] A person ("lender") transfers the control of tokens to another person ("borrower"). At the time that transfer occurs, the lender acquires a right to demand that the borrower transfers to the lender the control of an equivalent quantity of tokens at a time in the future to satisfy the loan.
>
> [*Staking:*] A person ("liquidity provider") transfers the control of tokens to a DeFi lending platform.[52] This type of transaction may be termed

[52] The Law Commission crypto paper glossary provides:
Decentralised finance (DeFi): A general term for automated and purportedly decentralised and/or disintermediated applications providing financial services on a

> "staking" or "providing liquidity". At the time when the transfer occurs, the DeFi lending platform transfers control of one or more different tokens to the liquidity provider.
> The DeFi lending platform has the ability to transfer the control of tokens provided to it by the liquidity provider to other persons ("borrowers"). It will normally do so on terms that mean the borrower has to provide a return to the DeFi lending platform in excess of the quantity of tokens that the borrower initially received. This return, or a part of it, will be passed onto the liquidity provider as their compensation for providing the liquidity to the DeFi lending platform.

The parties to a loan of cryptoassets (**"a crypto-loan"**) are the lender and the borrower.

HMRC refer to the parties to staking as (1) "the liquidity provider" and (2) "the DeFi lending platform", and they refer to the transaction as "providing liquidity". It might be easier to refer to the parties as (1) the **"staker"** and (2) the **"stakee"**.

The difference is that:

(1) Lending constitutes a transfer of ownership (and so a disposal) by the lender.

(2) Staking does not, or may not, do so.

However (assuming the solvency of the stakee!) the economic effect is the same, so I prefer use the term loan to include staking, and lender/borrower includes parties to staking. After all, these are all broad terms covering a wide range of transactions. At present, there are no precise terms or definitions.

96.8.2 *Position if trading*

The Crypto Manual makes the obvious points:

> **CRYPTO61211 Making A Defi Loan: Introduction** [Feb 2022]
> **Treatment where a trade is carried on**
> ... If an individual is considered to be carrying on a trade involving the making of DeFi loans/staking, then the activity that falls within the scope of that trade will be subject to Income Tax under Section 5 ITTOIA 2005. Income Tax will take priority over Capital Gains Tax and apply to the profits (or losses) of the trade.

(generally decentralised and often blockchain-based) settlement layer, including payments, lending, trading, investments, insurance, and asset management.

If there is a trade involving cryptoassets, those assets may potentially be held as either trading stock or as investment assets outside of the trade. Consideration will need to be given as to whether there have been any appropriations to or from trading stock.

96.8.3 *Position if not trading*

The Crypto Manual makes the obvious points:

Treatment where a trade is not carried on
If a trade is not carried on by an individual, or the activity which generates the return falls outside the scope of any trade, then the making of a DeFi loan/staking may give rise to a disposal of a chargeable asset (see CRYPTO61600). Where this is the case, Capital Gains Tax will apply to the disposal.
However, in exchange for making a DeFi loan/staking, the lender/liquidity provider will sometimes receive a reward for providing those services. For example, a lender of tokens may charge the borrower an agreed rate of return for the period of the lending. This return may be subject to Income Tax rather than Capital Gains Tax.
CRYPTO61212 Making A Defi Loan: Taxing Provisions [Feb 2022]
Capital Receipt
If the return has the nature of capital, then the return will not be chargeable to Income Tax and will instead be within the scope of Capital Gains Tax (see CRYPTO61630).
Revenue Receipt
If the return has the nature of income, then it will be within the scope of Income Tax. On the assumption that the transactions are not part of a trade carried on by the customer, the receipt will be within the scope of the miscellaneous income provisions (Part 5 ITTOIA 2005)...[53]
CRYPTO61213 Making A Defi Loan: Amount Chargeable To Income Tax [Feb 2022]
The miscellaneous income sweep-up provisions will only subject the return (see CRYPTO61130) received by the lender/liquidity provider and not the repayment of the principal to Income Tax. The repayment of the principal will be a capital transaction (see CRYPTO61620).
The return earned by the lender/liquidity provider will be a non-cash receipt. The amount to be charged under sections 687-689 ITTOIA 2005 is the money's worth of the receipt (see BIM100150). This will be the pound sterling value of the tokens received by the lender.

[53] The Manual makes some basic comments on Misc Sweep-up Income, which I omit; see 33.1 (Misc Sweep-up Income).

In some cases, the trading and miscellaneous income allowance may apply.

96.8.4 *Income or capital receipt*

The Crypto Manual provides:

CRYPTO61214 Making A Defi Loan: Nature Of The Return [Feb 2022]
...You will need to determine whether the return has the nature of income in the hands of the lender/liquidity provider or whether the return has the nature of capital. That is, was the return earned by the lender/liquidity provider by providing a service to the borrower/DeFi lending platform, or was the return realised from the capital growth of an asset owned by the lender/liquidity provider?

Due to the various operating models, the answer may not always be clear. Below is a list of factors which will help determine the nature of the return:

- Whether the return to be received by the lender/liquidity provider is known at the time the agreement is made. If the return to be received has been agreed, for example 5% per annum, this would indicate a revenue receipt. If the return to be received is unknown and speculative (and could result in a loss from the activity), this would indicate a capital receipt.
- If the return is realised through the disposal of a capital asset, this would indicate a capital receipt. If the return is paid by the borrower/DeFi lending platform to the lender/liquidity provider, this would indicate a revenue receipt.
- Whether the return is paid periodically throughout the period of the lending/staking or whether it is paid upon repayment of the principal. A one-off payment is more likely to have the nature of capital while a recurring payment is more likely to have the nature of income.
- Whether the period of the lending is fixed or indefinite, short-term or long-term.

This list is by no means exhaustive, and no single factor is determinative.

When the return may have the nature of revenue

In some cases, the return will be received by the lender/liquidity provider in return for the service of lending the tokens to the borrower/staking tokens with a DeFi lending platform. This may be compared to interest which is received by a lender in exchange for the service of lending of money (despite the return paid for the service of lending tokens not being considered, for tax purposes, as interest).

For example, a borrower may agree to pay 5% per annum of the principal to the lender over the period of the borrowing. In this case, the return is received by the lender in exchange for the provision of a service. If interest can be defined, in summary, as compensation for the use of money, then by analogy the return received by the lender/liquidity provider may similarly be thought of as compensation for the use of the tokens. As a result, in such circumstances it is

expected that the return will, disregarding that it is not paid in respect of money or currency (CRYPTO61110), have a similar nature to interest.
[The Manual cites *Ryall v Hoare*, see 33.2 (General principles: Income), and continues:]
Using the above analogies, interest earned from the lending of money is the "interest or fruit" while the money advanced is the "principal or tree". In circumstances where the return can be considered remuneration for the provision of a service of lending/staking tokens, the return is the "interest or fruit" while the tokens are the "principal or tree": the return will therefore be a revenue receipt.
It will generally be expected that where it can be demonstrated that the return is paid to remunerate the lender/liquidity provider for the provision of a service of lending/staking tokens, the return received by the lender/liquidity provider will have the same nature as interest and so be considered to be an income (revenue) receipt...

96.8.5 *Return is not interest*

The Crypto Manual provides:

> **CRYPTO61110 Introduction** [Feb 2022]
> The return received by a lender may be described or referred to as 'interest' by individuals or companies entering into these types of transactions. HMRC does not consider the return received by the lender to be interest for tax purposes.

That follows from the fact that cryptoassets are not money.[54] I refer to this as **"crypto-rent"**.

Crypto-rent is not within the disguised interest code[55] for two reasons (either would suffice):

(1) it is not "economically equivalent to interest" (as defined), again because cryptoassets are not money
(2) the charge to Misc Sweep-up Income has priority

96.9 Computation of income

The Crypto Manual provides:

> **CRYPTO21200: Cryptoassets for individuals: Income Tax: staking** [Feb 2022]
> If the activity does not amount to a trade, the pound sterling value (at the

[54] See 26.2 (Definition of interest).
[55] See 26.25 (Disguised interest).

> time of receipt) of any tokens awarded will be taxable as income (miscellaneous income) with any appropriate expenses reducing the amount chargeable.

This leads to the risk that when earned the cryptoasset is worth significantly more than when that taxpayer comes to calculate tax due. Given the fluctuations in certain cryptoassets, for example see the collapse of Luna, tax liabilities could exceed the total value of the assets received. Computations may also be difficult, if the activity has many receipts at different times. For traders subject to IT, SP 2/02 (Exchange rate fluctuations) deals with this (in short) creating a pooling system for assets and liabilities. It is suggested that the same principles apply to the computation of Misc Sweep-up Income, which is likewise computed on accountancy principles.

96.10 Capital receipt

The Crypto Manual provides:

CRYPTO61214 Making A Defi Loan: Nature Of The Return [Feb 2022]
When the return may have the nature of capital
There may be cases where the return received by the lender/liquidity provider is not comparable to interest, or a reward for the provision of a service, but rather is considered to be a capital return. This will be the case where the lender/liquidity provider is not rewarded by the borrower or the DeFi platform for providing their services, but rather the lender/liquidity provider seeks to benefit from their activities through the growth in value of a capital asset.
For example, it may be the case that the lender realises their return through disposing of a capital asset, which represents their lending and where the disposal proceeds are uncertain and speculative, rather than receiving an agreed rate of return from the borrower. Depending on the specific facts, it may be considered that the lender has realised their return from the increase in value of a capital asset and it will therefore be considered a capital receipt.
If, however, the disposal proceeds of the capital asset which represents the tokens lent/staked by the lender/liquidity provider is agreed when the tokens are advanced, then the return may have the nature of income rather than capital as the lender/liquidity provider will be providing a service for an agreed reward. This highlights the need to obtain all the facts of a transaction before reaching a conclusion as to the nature of the return.
It should be noted that the above examples are demonstrative only. In a real-world example there would be additional factors to consider which may change the conclusion reached.
If you encounter difficulty with determining the nature of the return then please

refer the case for advice, following the guidance at CRYPTO100500.

96.10.1 *Disposal on making loan?*

The Crypto Manual provides:

> **CRYPTO61620 Making A Defi Loan** [Feb 2022]
> It is important to consider whether the lender/liquidity provider actually transfers their beneficial ownership of the tokens to the borrower/DeFi lending platform. This will require an examination of the contract/terms and conditions. Where the recipient of the tokens has the ability to deal with the tokens received as they want then this will be a strong indicator that the recipient has acquired the beneficial ownership of those tokens. Conversely if the recipient is specifically restricted from dealing with the tokens received, this will be a strong indicator that the recipient does not have beneficial ownership of the tokens received.

Well drafted documentation will make it clear whether there is a transfer of beneficial ownership. It would be naive to hope that documentation would always be well drafted.

Similar issues arise for loans of securities, which are important for general law purposes, but not for CGT, as the repo code applies.[56]

> Where the making of a loan/staking (as described at CRYPTO61120) results in the lender/liquidity provider transferring their beneficial ownership of the tokens to the borrower/DeFi lending platform, this will give rise to a disposal of the loaned/staked tokens. The disposal will occur at the time that the lender/liquidity provider transfers the beneficial ownership of their tokens to the borrower/DeFi lending platform...

Actually, the disposal is at the time of the contract, but I expect in practice contract and transfer are simultaneous.

96.11 Computation of gain

The Crypto Manual provides:

> **CRYPTO61620 Making A Defi Loan** [Feb 2022]
> **Lender transfers control of tokens to a borrower**
> A lender makes a disposal of tokens for a right to receive a future quantity of tokens. This right represents deferred consideration (see CG14850P). The Chargeable Gains (CG) treatment of deferred consideration depends on whether the quantity of tokens to be received

[56] See 71.2 (Transparent/contract-based securities).

> in the future is ascertainable or unascertainable. Where the consideration is in "money's worth", such as a quantity of foreign currency or shares, then it is necessary to consider if the quantity of that asset that is to be received in the future is known. This approach was confirmed by the Court of Appeal in *Goodbrand v Loffland Bros North Sea Inc* (71 TC 57). Although the facts of that case related to sale proceeds in a currency other than sterling, Millett L.J. also considered the same analysis would apply to proceeds which consisted of assets (such as shares).

The position depends on whether the consideration is known or unknown, and whether it is income or capital.

96.11.1 *Fixed consideration*

The Crypto Manual provides:

> **CRYPTO61620 Making A Defi Loan** [Feb 2022]
>
> Where the quantity of tokens to be received in the future is known then section 48(1) TCGA 1992 will apply. The lender should value the quantity of tokens to be received in the future at their sterling value at the time the loan is made.
>
> Where there is no agreed return (see CRYPTO61130), then the borrower will be obliged to transfer to the lender the same quantity of tokens as they have borrowed. In such a case, section 48(1) TCGA 1992 should always apply.[57]
>
> For an example of a CG computation where section 48(1) TCGA 1992 applies, see CRYPTO61671.
>
> The treatment of a loan that includes a return to the lender can be more complicated. The position will depend on whether the return means that the future quantity of tokens that will be received by the lender is ascertainable or unascertainable.
>
> Where the quantity of tokens that the borrower will need to transfer to the lender, including the return, is known or can be calculated then the total quantity of tokens that the lender will receive is ascertainable (see CG14881). However, if the sterling value of the tokens that represent the return will be taxed as income when they are finally received then section 37 TCGA 1992 will apply (see CG14300). Section 37 TCGA 1992 excludes from the consideration the sterling amount that is being taxed as income. This is to prevent double taxation.
>
> For an example of a CG computation where section 37 TCGA 1992 applies, see CRYPTO61672.

[57] See 56.4.2 (Deferred consideration)

96.11.2 *Consideration not fixed*

The Crypto Manual provides:

> **CRYPTO61620 Making A Defi Loan** [Feb 2022]
> Where the quantity of tokens to be received in the future is unknown then the lender holds a right to receive unascertainable deferred consideration. In the House of Lords case of *Marren v Ingles* (54 TC 76) this type of right was found to be an asset for CG purposes (see CG14990). The lender's consideration will be the market value of that right at the time it is received. For further guidance on obtaining a valuation of a '*Marren v Ingles* right' see CG14950.
> It will be unusual for the total quantity of tokens to be given to the lender to be unknown. This is because the loan will be for a known quantity of tokens (the principal), so the lender will know the quantity of tokens to be returned to satisfy the principal of the loan. It will be the return only that can be unknown. In that situation you would treat the principal as a known quantity of tokens to which section 48(1) TCGA 1992 applies. Only the right to the return on the loan would represent a '*Marren v Ingles* right'.
> For an example of a CG computation involving a *'Marren v Ingles* right', see CRYPTO61673.
> Section 37 TCGA 1992 is not capable of applying to exclude any of the value of the '*Marren v Ingles* right' from the CG computation. This is because none of the value of the right will be subject to Income Tax. This means that a loss may arise on the disposal of the right when the loan is satisfied by the borrower (see CRYPTO61650). It may be possible to elect to set that loss against any gain that arose on the making of the loan. For more information about this election see CG15080 onwards.

96.11.3 *Crypto for crypto exchange*

The Crypto Manual provides:

> **CRYPTO61620 Making A Defi Loan** [Feb 2022]
> **Liquidity provider transfers the control of tokens to a DeFi lending platform in return for the DeFi lending platform transferring the control of one or more tokens**
> This is an exchange of one token for another token. The consideration for the disposal will be the market value in sterling of the token received from the DeFi lending platform. The acquisition price of the token received from the DeFi lending platform will be the market value in sterling of the token transferred to the DeFi lending platform.

> Where the liquidity provider needs to transfer more than one type of token to the DeFi lending platform to receive a token from the DeFi lending platform, the value of the token received from the DeFi lending platform should be apportioned between the disposals of the tokens on a just and reasonable basis.
>
> For an example of a CG computation where tokens are exchanged for a liquidity token, see CRYPTO61674.

96.12 Borrowing

The Crypto Manual provides:

> **CRYPTO61630 Borrowing** [Feb 2022]
>
> Where a person borrows tokens, they are making an acquisition. When a borrower enters into a loan agreement, they are giving a promise to the lender that they will do something: they will transfer a quantity of tokens to the lender in the future. In the High Court case of *Chaney v Watkis* (58 TC 707), it was found that an obligation to do something was "money's worth" and capable of being expenditure. This means that the value of the borrower's obligation to transfer a quantity of tokens to the lender in the future will be the acquisition cost of the tokens borrowed. For further guidance about allowable costs see CRYPTO22150. For guidance about the pooling of tokens and their associated allowable costs see CRYPTO22200.

96.13 Collateral

96.13.1 *Giving collateral: a disposal?*

The Crypto Manual provides:

> **CRYPTO61640 Collateral** [Feb 2022]
>
> Many DeFi lending platforms require a borrower to provide collateral before they are allowed to borrow from the DeFi lending platform. It will be necessary to consider the terms and conditions of the DeFi lending platform to understand whether the giving of collateral is a disposal.
>
> Where, under their terms and conditions, a DeFi lending platform is allowed to deal as it wishes with the tokens received as collateral, this will be a strong indicator that the DeFi lending platform has acquired the beneficial ownership of those tokens. If the DeFi lending platform has acquired the beneficial ownership of the tokens then the borrower will have disposed of their beneficial ownership of those tokens.

That arrangement is not aptly described as collateral; but never mind.

> Conversely if the DeFi lending platform is specifically restricted from dealing with the tokens received as collateral, this will be a strong indicator that the DeFi lending platform has not acquired beneficial ownership of those tokens. Therefore the borrower has retained beneficial ownership of the tokens and has not made a disposal.

96.13.2 *Consequences of disposal*

The Crypto Manual provides:

> **CRYPTO61640 Collateral** [Feb 2022]
>
> Where the facts show that a disposal has occurred, the consideration for the disposal will be the market value in sterling of the tokens given. The gain or loss will then be computed as normal.
>
> When the collateral is withdrawn from the DeFi lending platform then this will be an acquisition. The acquisition cost of the tokens will be the market value in sterling of the tokens received.
>
> If the borrower's position becomes liquidated by the DeFi lending platform then this won't have any Chargeable Gains (CG) consequences. This is because the borrower will have already disposed of the tokens when they were transferred to the DeFi lending platform.

96.13.3 *Position if no disposal*

The Crypto Manual provides:

> **CRYPTO61640 Collateral** [Feb 2022]
>
> Where the facts show that a disposal has not occurred, section 26 TCGA 1992 will apply.
>
> When the collateral is withdrawn from the DeFi lending platform then this has no CG consequences. This is because the borrower has retained the beneficial ownership of the tokens while they were in the control of the DeFi lending platform.
>
> If a borrower's position needs to be liquidated by the DeFi lending platform then section 26(2) TCGA 1992 will apply. The DeFi lending platform is treated as a nominee for the borrower, so that the dealings of the DeFi lending platform with the collateral/security are, for CG purposes, dealings of the borrower. Consequently any gain or loss on a disposal of the tokens held as collateral by the DeFi lending platform is deemed to be the gain or loss of the borrower. The tokens disposed of to settle the borrower's position are treated as disposed of at their market value in sterling.
>
> When a liquidation of a borrower's position occurs, it is common for the DeFi lending platform to offer the position to third parties, referred to

as liquidators. The liquidator takes on the borrower's obligation to repay some or all of the loan to the DeFi lending platform. As an incentive to the liquidators for doing this, the DeFi lending platform may take an extra proportion of the borrower's collateral as a penalty and then provide that quantity of tokens to the liquidator as a bonus.

Tokens taken from the borrower as a penalty will not satisfy section 38 TCGA 1992 meaning that the market value of those tokens will not be an allowable deduction in calculating any gain or loss for CG purposes. Section 38 TCGA 1992 is a restrictive provision, only allowing a deduction for expenditure that satisfies one of the subsections. The tokens taken as the penalty can't be said to be expenditure to acquire or provide an asset, expenditure to enhance an asset, expenditure to establish, preserve or defend the person's rights to an asset, or incidental costs of acquiring or disposing of an asset as per the list in section 38(2) TCGA 1992.

For an example of a CG computation where the borrower's collateral is liquidated, see CRYPTO61675.

96.14 Satisfaction of loan

The Crypto Manual provides:

> **CRYPTO61650 Satisfaction Of A Defi Loan And Withdrawal Of A Stake** [Feb 2022]
>
> When a loan/stake is satisfied there will be tax consequences for both the borrower and the lender/liquidity provider. 'Satisfaction' in this context means either:
>
> - the borrower transfers tokens to the lender to meet the borrower's obligations under the terms of the loan agreement, or
> - the liquidity provider withdraws their staked tokens from the liquidity pool of a DeFi lending platform

96.14.1 *Position of borrower*

The Crypto Manual continues:

> When the borrower satisfies the loan, the borrower transfers the beneficial ownership of tokens to the lender. This is a disposal of those tokens by the borrower.
>
> To compute the gain or loss arising from this disposal, the Chargeable Gains (CG) computation needs to use the market value in sterling of the tokens given as their consideration. This includes any tokens given to the lender as a return on the loan.
>
> The borrower will be able to deduct allowable costs when computing any gain or loss arising on their disposal to the lender. For further

guidance about allowable costs see CRYPTO22150.
For an example of a CG computation where the borrower satisfies the loan, see CRYPTO61676.

96.14.2 *Position of lender*

The Crypto Manual continues:

> The position for the lender at the satisfaction of the loan depends on how the making of the loan was treated for CG purposes (see CRYPTO61620).
>
> Lender originally transferred the control of tokens to the borrower
>
> There are different treatments of the lender depending on how the original disposal was treated.
>
> Where the lender treated the future quantity of tokens to be received as ascertainable (see CG14881) then the lender should have applied section 48(1) TCGA 1992. The sterling value of the tokens at the time the loan was made should have been included in the CG computation of the disposal by way of the loan being made.
>
> When the lender enters into the loan agreement, they received a right to receive a future quantity of tokens. When the borrower satisfies the loan then the tokens received by the lender are a capital sum derived from that right. This results in a disposal by the lender under section 22(1) TCGA 1992. This approach was confirmed by the Court of Appeal in *Goodbrand v Loffland Bros North Sea Inc* (71 TC 57). Millett L.J. said:
>
>> "But the example demonstrates that, in any case where an asset is sold for a deferred consideration in money's worth, there are at least two, and maybe three, separate disposals each of which has its own tax consequence. There is first the disposal of the original asset. The chargeable gain or allowable loss is computed in accordance with [section 48(1) TCGA 1992], which produces a sterling value for the disposal consideration and therefore the acquisition cost of the right to receive it. The second disposal occurs when the deferred consideration is received and a new asset, in the form of the actual consideration, is received in satisfaction of the right to receive it (see [section 22(1) TCGA 1992])."
>
> The acquisition price of the right to receive a future quantity of tokens will be the sterling value that the lender included in the CG computation of the disposal by way of the loan being made. The disposal by the lender on the receipt of the tokens from the borrower will effectively reflect any change in value of the tokens during the term of the loan. If the tokens increased in value during the term of the loan, then the lender will realise a further gain. If the tokens decreased in value during the

term of the loan, then the lender will realise a loss.

If section 37(1) TCGA 1992 applied to that first CG computation, then the sterling value of those tokens will also be excluded in this second CG computation.

For examples of CG computations where the loan of an ascertainable quantity of tokens is satisfied, see CRYPTO61677 and CRYPTO61678.

Where the lender treated the future quantity of tokens to be received as unascertainable then the lender will have acquired a '*Marren v Ingles* right' (see CG14990). The lender should have included the value of the '*Marren v Ingles* right' in the CG computation of the disposal by way of the loan being made.

When the borrower satisfies the loan then the tokens received by the lender are a capital sum derived from the '*Marren v Ingles* right'. This results in a disposal by the lender under section 22(1) TCGA 1992. The acquisition price of the '*Marren v Ingles* right' will be the value of the right that the lender included in the CG computation of the disposal by way of the loan being made.

Where the disposal of the '*Marren v Ingles* right' gives rise to a loss, it may be possible to elect to set that loss against any gain that arose on the making of the loan. For more information about this election see CG15080 onwards.

For an example of a CG computation where the loan of an unascertainable quantity of tokens is satisfied, see CRYPTO61679.

96.14.3 *Disposal of staked tokens*

The Crypto Manual provides:

> **CRYPTO61640 Collateral** [Feb 2022]
>
> **Liquidity provider originally transferred the control of tokens to a DeFi lending platform in return for the DeFi lending platform transferring the control of one or more tokens**
>
> When the liquidity provider wishes to withdraw their staked tokens from the DeFi lending platform, the liquidity provider will dispose of the tokens originally received from the DeFi lending platform. In return they will receive tokens from the DeFi lending platform. This is an exchange of one token for another token and so is a disposal by the liquidity provider. The liquidity provider's consideration for the disposal will be the market value in sterling of the tokens received from the DeFi lending platform.

96.15 Transfer between ledgers

The Crypto Manual provides:

CRYPTO22110 Transferring Tokens Between Distributed Ledgers
Transferring tokens between distributed ledgers [Feb 2022]
Tokens cannot simply be transferred from the distributed ledger for one cryptoasset to the distributed ledger for a different cryptoasset. For example, a bitcoin cannot exist on the Ethereum blockchain. An effect comparable to a 'swap' can be achieved using a smart contract and secure public address. The holder of the tokens uses a smart contract to transfer tokens to a public address that they don't control. An equivalent amount of tokens of the second cryptoasset are transferred from a secure public address to a public address controlled by the person.

The question that arises is whether this type of transactions results in a disposal for CGT purposes (for guidance on the general interpretation of disposal see CRYPTO22100. HMRC's view is that the answer will depend on the facts.

'One-way' transfers

Some transfers can only go in one direction, meaning that once the transfer has been made it cannot be undone or transferred back at a future date.

An example of this can be seen with the Ethereum blockchain. Currently ether are on the Ethereum 'mainnet' (short for main network, the main public Ethereum blockchain). Holders of ether can choose to transfer their tokens from the mainnet to a different blockchain called the 'Beacon Chain'. The Beacon Chain blockchain is where Ethereum's 'Proof of Stake' will be implemented (for more information on Proof of Stake see CRYPTO10300. It will be impossible to transfer ether from the Beacon Chain to the mainnet, making transfers a one-way process only.

HMRC's view is that TCGA92/S43 applies to this type of transaction. The allowable costs in respect of the first cryptoasset are attributed in full to the second cryptoasset. A gain or loss will accrue as normal on a subsequent disposal of the second cryptoasset.

96.16 CGT allowable expenses

The Crypto Manual provides:

CRYPTO22150 Allowable Expenses [Feb 2022]
When a person calculates their gains/losses from the disposal of tokens, not all costs are allowable as a deduction.

Section 38 of the TCGA 1992 provides for the types of costs which can be deducted. HMRC's view is that these include:

- the consideration (in pound sterling) originally paid for the asset
- transaction fees paid for having the transaction included on the distributed

ledger

- advertising for a purchaser or a vendor
- professional costs to draw up a contract for the acquisition or disposal of the tokens
- costs of making a valuation or apportionment to be able to calculate gains or losses

Any costs deducted against profits for Income Tax, see CG10260, are not allowable as a deduction for Capital Gains Tax.

Exchange Fees

It is common for people to use an exchange to perform transactions, as explained at CRYPTO10250. Some fees charged by exchanges are allowable, but not all of them. Below is a list of common fees charged by exchanges and whether they satisfy section 38 TCGA 1992:

Situation in which an exchange fee may be incurred	**Treatment of fee for section 38 TCGA 1992**
Exchange (swap) sterling for a fiat currency other than sterling	Section 38(1)(a) - allowable as a cost of acquiring the fiat currency other than sterling
Exchange (swap) fiat currency other than sterling for sterling	Section 38(1)(c) - allowable as an incidental cost of disposing of the fiat currency other than sterling
Deposit sterling with an exchange	Sterling isn't an asset for CGT purposes so not an allowable cost
Deposit fiat currency other than sterling with an exchange	The depositor retains beneficial ownership of the fiat currency other than sterling so there's no acquisition or disposal that the costs can be attributed to
Use sterling to purchase tokens	Section 38(1)(a) - allowable as a cost of acquiring the tokens
Use fiat currency other than sterling to purchase tokens	Section 38(1)(a) - allowable as a cost of acquiring the tokens
Exchange (swap) token A for token B	See below
Dispose of tokens for sterling	Section 38(1)(c) - allowable as an incidental cost of disposing of the tokens

Dispose of tokens for fiat currency other than sterling	Section 38(1)(c) - allowable as an incidental cost of disposing of the tokens
Withdraw sterling from the exchange	Sterling isn't an asset for CGT purposes so not an allowable cost
Withdraw fiat currency other than sterling from the exchange	The withdrawer retains beneficial ownership of the fiat currency other than sterling so there's no acquisition or disposal that the costs can be attributed to

Exchange (swap) token A for token B: the fee paid is in relation to the whole of the transaction, that is for a disposal of one asset and the acquisition of another asset. This means that the fee is attributable to both assets. HMRC's view is that this fee would be allowable as a deduction in computing the disposal in respect of token A under section 38(1)(c), and that it would be allowable as a deduction in computing the eventual disposal of token B under section 38(1)(a). TCGA92/S52(1) makes it clear that a sum may be allowed as a deduction only once in computing a disposal.

Where an allowable cost relates to more than one asset, the cost should be apportioned between those assets on a just and reasonable basis (TCGA92/S52(4)). You can accept that apportioning this type of fee equally between the assets disposed of and the assets acquired (that is a 50/50 split) is just and reasonable in these circumstances. If the customer chooses to apply a different approach, then this can be considered on a case by case basis.

Mining

Costs for mining activities (for example equipment and electricity) do not count toward allowable costs in respect of tokens because they're not wholly and exclusively to acquire the tokens, and so cannot satisfy the requirements of section 38(1)(a) TCGA 1992. It may be possible to deduct some of these costs against profits for Income Tax purposes. The costs incurred to acquire equipment used for mining may be allowable as a deduction in a disposal of that equipment subject to relevant provisions such as the chattels exemption and the wasting assets exemption.

If the mining amounts to a trade for tax purposes the tokens will initially form part of trading stock. If these tokens are transferred out of trading stock, the business will be treated as if they bought them at the value used in trading accounts. Businesses should use this value as an allowable cost in calculations when they dispose of the tokens. More information can be found in CG69220.

96.17 HMRC Examples

The Crypto Manual provides 10 examples. I lightly amend the text for clarity. In accordance with the casual Manual style, the examples use personal names; but when the transaction involves a loan, I refer to the borrower and lender as B and L. The Manual here refers to tokens rather than cryptoassets, but it means the same thing.

In each example it is assumed that B and L are not trading, so the transaction is within CGT. That will usually be the case for individual lenders; though in practice I expect that the borrower is likely to be a DeFi platform, and carrying on a trade.

I set out the examples in the following order:

No.	**Facts**
Making crypto loan: position of lender	
1	Fixed-term rent-free loan
2	Fixed-term loan + crypto-rent
3	On-demand loan + crypto-rent
5	L sells B's collateral
Repayment of crypto loan	
6	Fixed-term loan repaid + crypto-rent
7	Fixed-term loan repaid from pool
8	Fixed-term loan repaid + crypto-rent
9	On-demand loan repaid + crypto-rent
Crypto for crypto exchange	
4	Crypto for crypto exchange
10	Crypto for crypto exchange

96.18 Borrowing/lending examples

96.18.1 *Eg 1: Fixed-term rent-free loan*

We first consider the taxation of the lender of cryptoassets ("L").

> **CRYPTO61671 Example 1: Loan of tokens** [Feb 2022]
> *[Bruce ("L") & Terri-Jay ("B")]*
> L holds 100 tokens with a total acquisition cost of £200.
> L enters into an agreement with B to loan her the 100 tokens for 12 months.
> At the time the loan is made, the tokens have a sterling value of £1.50 each.

The HMRC analysis is as follows:

> L's disposal is for a right to receive a future quantity of tokens. The

future quantity of tokens is 100 so the future quantity of tokens is known. This means that section 48(1) TCGA will apply. Section 48(1) TCGA brings the full quantity of tokens into the CG computation straight away.

The tokens will need to be brought into the CG computation at their sterling value at the time of the disposal. The consideration in the computation will therefore be 100 tokens multiplied by £1.50 to give total consideration of £150.

L's CG computation will be as follows:

		£
Consideration	s.48 TCGA: 100 × £1.50	150
Allowable costs		-200
Loss		-50

The facts are artificial, and L's disposal is not on arm's length terms. But the purpose is to set the scene for the examples which follow.

96.18.2 *Eg 2: Fixed-term loan + crypto-rent*

The next example is the same, except the lender receives a crypto-rent.

CRYPTO61672 Example 2: Loan of tokens with a return on the loan [Feb 2022]

[Keri ("L") and Chris ("B")]

L holds 100 tokens with a total acquisition cost of £200.

L enters into an agreement with B to loan them the 100 tokens for 12 months.

The loan agreement includes that B will pay a return of 5% [of the tokens] at the end of the loan.

At the time the loan is made, the tokens have a sterling value of £1.50 each.

The HMRC analysis is as follows:

When the loan is satisfied by B, L will treat[58] the tokens received as the 5% rate of return on the loan [crypto-rent] as miscellaneous income that will be subject to tax on income.

L's disposal is for a right to receive a future quantity of tokens. The future quantity of tokens is 105 so the future quantity of tokens is known. This means that section 48(1) TCGA will apply. Section 48(1) TCGA brings the full quantity of tokens into the CG computation straight away.

The tokens will need to be brought into the CG computation at their sterling value at the time of the disposal. The consideration in the computation will

[58] The wording here (and in the examples below) would suggest that B has a choice in the matter, but that cannot be intended.

therefore be 105 tokens multiplied by £1.50 to give total consideration of £150. Section 37(1) TCGA excludes from the computation an amount which is chargeable to tax on income. The sterling value of the 5 tokens representing the 5% rate of return on the loan [crypto-rent] is therefore excluded from the CG computation.
L's CG computation will be as follows:

		£
Consideration	s.48 TCGA: 105 × £1.50	157.5
	less s.37 TCGA: 5 × £1.50	-7.5
		150
Allowable costs		-200
Loss		-50

In this computation, the crypto-rent is added in and then subtracted. It might as well be ignored. So it comes down to a simple market value disposal and the outcome is the same as example 1.

96.18.3 *Eg 3: On-demand loan + crypto-rent*

The next example is the same except the crypto-loan is repayable on demand, not a fixed term loan.

CRYPTO61673 Example 3: Loan of tokens where the quantity of tokens is unascertainable [Feb 2022]
[Beverley ("L") and Alex ("B")]
L holds 100 tokens with a total acquisition cost of £200.
L enters into an agreement with B to loan him the 100 tokens with no fixed end date to the loan. L can make a demand for the loan to be satisfied or at any time before that B can choose to satisfy the loan.
They agree an annual percentage rate of 5% on the quantity of tokens loaned [crypto-rent].
At the time the loan is made, the tokens have a sterling value of £1.50 each.

The HMRC analysis is as follows.

L's disposal is for a right to receive a future quantity of tokens. L knows that she will receive 100 tokens to satisfy the principal of the loan. This means that section 48(1) TCGA 1992 will apply to those 100 tokens. Section 48(1) TCGA 1992 brings the 100 tokens into the CG computation straight away.
L also has a right to receive a 5% return per annum over an unknown period of time. It won't be possible to establish the quantity of tokens until the loan is satisfied, as that will fix the date for which that rate of return is applied up to. This means that L also has acquired a right which is an asset for CG purposes.

L will need to establish the market value of that right and include that value in the CG computation. L establishes the market value of that right to be £15. The value of that right won't be taxed as income, so section 37(1) TCGA won't apply.

L's CG computation is as follows:

		£
Consideration	Tokens to be received 100 × £1.50	150
	plus market value of right	15
Total consideration		165
Allowable costs		-200
Loss		-35

L suffers double taxation here, ie CGT on the right to income and income tax on the income (though on the posited values , the double taxation is masked by the fact that a loss arises). (Conversely, B would get a double deduction, for CGT, but B is likely to be a platform, and trading). The moral is that L should not enter into arrangements of this kind.

But there is an error in the example, because the market value of the right to income [crypto-rent] must be nil, not £15. No-one would pay for the right, as they could (and probably would) receive nothing as immediately after they acquired it, L can make a demand for the loan to be satisfied or B can choose to satisfy the loan. The right would have a value if there were a minimum term to the loan.

In the future, the proposed repo loan reforms may solve this problem.[59]

96.18.4 *Eg 5: L sells B's collateral*

CRYPTO61675 Example 5: disposal when a borrower's collateral is liquidated (Lucas) [Feb 2022]

L holds 100 tokens with a total acquisition cost of £500.

L provides the 100 tokens as collateral to a DeFi lending platform and then takes out a loan.[60]

During the term of the loan, the market price of the borrowed tokens falls. On 01/07/20XX the price of the borrowed tokens falls to the point where a liquidation of some of L's collateral occurs. 10 of the tokens given by L to the DeFi lending platform as collateral get transferred to a liquidator, along with 1 additional token as the penalty. The tokens have a market value of £6 each at the time of the liquidation.

[59] See 96.23 (Lending: repo treatment).

[60] The following sentence shows that L borrows tokens ("the borrowed tokens"). L does not borrow money. But it does not matter what L borrows.

The HMRC analysis is as follows.

L's CG computation of this disposal will be as follows:

		£
Consideration	11 × £6	66
Allowable costs	s.104 pool £500 × 11 / 100	-55
Gain .		11

L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	100	500
01/07/20XX	-11	-55
Closing balance	89	445

96.18.5 *Eg 6: Fixed-term loan repaid + crypto-rent*

This example has essentially the same material facts as example 2, but we are now looking at the taxation of the borrower on repayment of the crypto-loan and payment of the crypto-rent.

CRYPTO61676 Example 6: Borrower satisfies the loan [Feb 2022]
[Paula ("L") & Glyn ("B")]
L loaned 500 tokens to B for 12 months.
The loan agreement included that L would receive a 5% rate of return on the loan [crypto-rent].
On 20/05/20XX, B transferred 525 tokens to L to satisfy the terms of the loan.
The tokens had a pooled acquisition cost of £5,250.
At that time of the transfer to satisfy the loan, the tokens had a market value of £12 each.

The HMRC analysis is as follows.

B's CG computation will be as follows:

		£
Consideration	525 × £12	6,300
Allowable costs	s.104: £5,250 × 525 / 525	-5,250
Gain		1,050

In short, a market value disposal.

B's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	525	5,250
20/05/20XX	-525	-5,250
Closing balance	0	0

96.18.6 *Eg 7: Fixed-term loan repaid from pool*

This example is materially the same as example 6 with the complication of a part disposal of a s.104 pool.

CRYPTO61677 Example 7: lender's loan of an ascertainable quantity of tokens is satisfied, the value of the tokens increased (Lorraine ("L") & Martin) ("B") [Feb 2022]
L holds 1,000 tokens with a total acquisition cost of £1,500.
On 30/09/20XX, L enters into an agreement with B to loan B 100 tokens for 12 months.
The loan agreement includes that B will pay a return of 5% [crypto-rent] at the end of the loan.
At the time the loan is made, the tokens have a sterling value of £1.50 each.

The HMRC analysis first considers the position of the lender.

When the loan is satisfied by B, L will treat the tokens received as the 5% rate of return on the loan [crypto-rent] as miscellaneous income that will be subject to tax on income.
L's disposal is for a right to receive a future quantity of tokens. The future quantity of tokens is 105 so the future quantity of tokens is known. This means that section 48(1) TCGA will apply. Section 48(1) TCGA brings the full quantity of tokens into the CG computation straight away.
The tokens will need to be brought into the CG computation at their sterling value at the time of the disposal. The consideration in the computation will therefore be 105 tokens multiplied by £1.50 to give total consideration of £150.
Section 37(1) TCGA excludes from the computation an amount which is chargeable to tax on income. The sterling value of the 5 tokens representing the 5% rate of return on the loan is therefore excluded from the CG computation.
L's CG computation of the initial disposal will be as follows:

		£
Consideration	s.48 TCGA: 105 × £1.50	157.5
	less s.37 TCGA: 5 × £1.50	- 7.5
		150
Allowable costs	s.104 - £1,500 × 100 / 1,000	-150
Gain		0

L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	1,000	1,500
30/09/20XX	-100	-150
Closing balance	900	1,350

So far, nothing new. We then turn to consider the position of the borrower.

On 29/09/20XX, B satisfies the loan with a transfer of 105 tokens to L.
At the time the loan is satisfied, each token is worth £1.60.

The HMRC analysis is as follows.

L treats the receipt of 5 of the tokens as miscellaneous income for tax purposes. This means that 5 tokens × £1.60 = £8.00 is subject to tax on income.
The sterling value of the remaining 100 tokens will be a capital sum that is derived from L's right to receive a future quantity of tokens. L's CG computation of the disposal of her right is as follows:

		£
Consideration	105 × £1.60;	168
	less s.37 TCGA: 5 × £1.60	-8
		160
Allowable costs	Value of right to receive a future quantity of tokens	-150
Gain		10

L receives 5 tokens which are treated as miscellaneous income, so they are acquired at £1.60 each. L also receives 100 tokens derived from her right to receive a future quantity of tokens, which are also acquired at £1.60 each. L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	900	1,350
29/09/20XX	+5	+8
	+100	+160
Closing balance	1,005	1,518

Overall L pays tax on her income of 5 tokens at £1.60 each, and tax on her chargeable gain of £10, which is the value by which her 100 tokens had increased by the time the loan was satisfied by B.
L's s.104 pool also reflects the increased token value of £18 (5 tokens × £1.60 = £8, 100 tokens × £0.10 = £10) for any future disposals that she may make.

96.18.7 *Eg 8 : Fixed-term loan repaid + crypto-rent*

CRYPTO61678 Example 8: Lender's loan of an ascertainable quantity of tokens is satisfied, the value of the tokens decreased (Chris ("L") & Amy ("B")) [Feb 2022]
L holds 1,000 tokens with a total acquisition cost of £1,500.
On 30/09/20XX, L enters into an agreement with B to loan B 100 tokens for 12 months. The loan agreement includes that B will pay a return of 5% at the end

of the loan.
At the time the loan is made, the tokens have a sterling value of £1.50 each.

The HMRC analysis is as follows.

When the loan is satisfied by B, L will treat the tokens received as the 5% rate of return on the loan [crypto-rent] as miscellaneous income that will be subject to tax on income .
L's disposal is for a right to receive a future quantity of tokens. The future quantity of tokens is 105 so the future quantity of tokens is known. This means that section 48(1) TCGA will apply. Section 48(1) TCGA brings the full quantity of tokens into the CG computation straight away.
The tokens will need to be brought into the CG computation at their sterling value at the time of the disposal. The consideration in the computation will therefore be 105 tokens multiplied by £1.50 to give total consideration of £150.
Section 37(1) TCGA excludes from the computation an amount which is chargeable to tax on income. The sterling value of the 5 tokens representing the 5% rate of return on the loan is therefore excluded from the CG computation.
L's CG computation of the initial disposal will be as follows:

		£
Consideration	s.48 TCGA: 105 × £1.50	157.5
	less s.37 TCGA: 5 × £1.50	- 7.5
		150
Allowable costs	s.104 - £1,500 × 100 / 1,000	-150
Gain		0

L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	1,000	1,500
30/09/20XX	-100	-150
Closing balance	900	1,350

On 29/09/20XX, B satisfies the loan with a transfer of 105 tokens to L.
At the time the loan is satisfied, each token is worth £1.20.
L treats the receipt of 5 of the tokens as miscellaneous income for tax purposes.
This means that 5 tokens × £1.20 = £6.00 is subject to tax on income.
The sterling value of the remaining 100 tokens will be a capital sum that is derived from L's right to receive a future quantity of tokens. L's CG computation of the disposal of his right is as follows:

		£
Consideration	105 × £1.20; less s.37 TCGA: 5 × £1.20	120
Allowable costs	Value of right to receive a future quantity of tokens	-150
Loss		-30

L receives 5 tokens which are treated as miscellaneous income, so they are acquired at £1.20 each. L also receives 100 tokens derived from his right to receive a future quantity of tokens, which are also acquired at £1.20 each. L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	900	1,350
29/09/20XX	+5	+6
	+100	+120
Closing balance	1,005	1,476

Overall L pays tax on income on his receipt of 5 tokens at £1.20 each, and realises a loss of £30, which is the value by which his 100 tokens had decreased by the time the loan was satisfied by B.

L's s.104 pool also reflects the decreased token value of (£24) (5 tokens × £1.20 = £6,100 tokens × £0.30 = (£30)) for any future disposals that he may make.

96.18.8 *Eg 9: On-demand loan repaid + crypto-rent*

CRYPTO61679 Example 9: Lender's loan of an unascertainable quantity of tokens is satisfied (Robert ("L") & Samantha ("B")) [Feb 2022]

L holds 4,000 tokens with a total acquisition cost of £2,000.

On 15/04/20XX, L enters into an agreement with B to loan B 1,000 tokens with no fixed end date to the loan. L can make a demand for the loan to be satisfied or at any time before that B can choose to satisfy the loan.

They agree an annual percentage rate of 5% on the quantity of tokens loaned [crypto-rent].

At the time the loan is made, the tokens have a sterling value of £1.00 each.

L's disposal is for a right to receive a future quantity of tokens. L knows that he will receive 1,000 tokens to satisfy the principal of the loan. This means that section 48(1) TCGA will apply to those 1,000 tokens. Section 48(1) TCGA brings the 1,000 tokens into the CG computation straight away.

L also has a right to receive a 5% return per annum over an unknown period of time. It won't be possible to establish the quantity of tokens until the loan is satisfied, as that will fix the date for which that rate of return is applied up to. This means that L also has acquired a right which is an asset for CG purposes. L will need to establish the market value of that right and include that value in the CG computation. L establishes the market value of that right to be £100. The value of that right will not be taxed as income, so section 37(1) TCGA will not apply.

L's CG computation is as follows:

		£
Consideration	s.48 TCGA: 1,000 × £1.00	1,000
	plus market value of right - £100	100
		1,100
Allowable costs	s.104 - £2,000 × 1,000 / 4,000	-500
Gain		600

As in example 3, there is an error in the example, because the market value of the right to income must be nil, not £100. No-one would pay for the right, as they could (and probably would) receive nothing as immediately after they acquired it, L can make a demand for the loan to be satisfied or B can choose to satisfy the loan. The right would have a value if there were a minimum term to the loan, though I wonder if that happens in practice.

L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	4,000	2,000
15/04/20XX	-1,000	-500
Closing balance	3,000	1,500

On 14/04/20X3, B satisfies the loan with a transfer of 1,150 tokens to L. At the time the loan is satisfied, each token is worth £0.85.

L treats the receipt of 150 of the tokens as miscellaneous income for tax purposes. This means that 150 tokens × £0.85 = £127.50 is subject to tax on income.

The sterling value of the remaining 1,000 tokens will be a capital sum that is derived from L's right to receive a future quantity of tokens. L's CG computation of the disposal of his right is as follows:

		£
Consideration	1,000 × £0.85	850
Allowable costs	Value of right to receive a future quantity of tokens	-1,000
Loss	.	-150

L's CG computation of the disposal of his '*Marren v Ingles* right' is as follows:

		£
Consideration	150 × £0.85; less s.37 TCGA: 150 × £0.85	0
Allowable costs	Value of '*Marren v Ingles* right'	-100
Loss	.	-100

L receives 150 tokens which are treated as miscellaneous income, so they are acquired at £0.85 each. L also receives 1,000 tokens derived from his right to receive a future quantity of tokens, which are also acquired at £0.85 each. L's s.104 pool will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	3,000	1,500
14/04/20X3	+150	+128
	+1,000	+850
Closing balance	4,150	2,478

96.19 HMRC examples: Token exchange

96.19.1 *Eg 4: Token exchange*

The next example is not a loan, but a token for token exchange, with the complication of a part disposal from a s.104 pool

CRYPTO61674 Example 4: Loan of tokens to a platform in exchange for liquidity tokens [Feb 2022]
[Jack ("J")]
J wishes to provide liquidity to a DeFi lending platform. He holds:

- 100 token A. These are in a s.104 pool with a total acquisition cost of £100.
- 100 token B. These are in a s.104 pool with a total acquisition cost of £50.

On 01/06/20XX, J transfers 10 token A and 5 token B to the DeFi lending platform. The DeFi lending platform transfers a liquidity token to J.
At the time of this exchange:

Token	**Value**
token A	£1.00 each
token B	£0.60 each.
liquidity token	£15.00 each.

J decides (?) that a just and reasonable basis for apportioning the value of the liquidity token is in proportion to the market value of the tokens he disposes of. The total market value of the tokens he disposes of is
£10 (10 token A × £1 each) plus £3 (5 token B × £0.60 each) equals £13.

The transaction is assumed to be a disposal at arm's length between unconnected persons. Though it is a strange deal where J disposes of assets worth £13 for an asset worth £15.
The HMRC analysis is as follows.

Disposal of token A
J's CG computation of his disposal of his token A is as follows:

Consideration	Liquidity token - £15 × 10 / 13	12
Allowable costs	s.104 pool - £100 × 10 / 100	-10
Gain		2

J's s.104 pool for token A will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	100	100
01/06/20XX	-10	-10
Closing balance	90	90

Disposal of token B

J's CG computation of his disposal of his token B is as follows:

		£
Consideration	Liquidity token: £15 × 3 / 13	3
Allowable costs	s.104 pool £50 × 5 / 100	3
Gain		0

J's s.104 pool for token B will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	100	50
01/06/20XX	-5	-3
Closing balance	95	47

J will be treated as having acquired the liquidity token for the total market value of the token A and token B that J transfers to the DeFi lending platform. This is £10 (10 token A × £1 each) plus £3 (5 token B × £0.60 each) equals £13.

96.19.2 *Eg 10: Token exchange*

CRYPTO61680 Example 10: Exchange of liquidity provider tokens for tokens (Georgia) [Feb 2022]

G wishes to provide liquidity to a DeFi lending platform. She holds:

Asset in s.104 pool	**Total acquisition cost of pool**
1,000 token A	£1,000.
1,000 token B	£500.

On 11/11/20XX, G transfers 50 token A and 100 token B to the DeFi lending platform. The DeFi lending platform transfers 10 liquidity tokens to G.

At the time of this exchange:

Token	**Value**
token A	1.20 each
token B	£0.60 each
liquidity pool token	£12.00 each

The HMRC analysis is as follows.

G decides (?) that a just and reasonable basis for apportioning the value of the liquidity pool token is in proportion to the market value of the tokens she disposes of.

The total market value of the tokens she disposes of is

50 token A × £1.20 each	60
plus(100 token B × £0.60 each	60
	£120

G's CG computation of her disposal of her token A is as follows:

		£
Consideration	Liquidity pool token - £120 × 60 / 120	60
Allowable costs	s.104 pool - £1,000 × 50 / 1,000	- 50
Gain	.	10

G's s.104 pool for token A will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	1,000	1,000
11/11/20XX	-50	-50
Closing balance	950	950

G's CG computation of his disposal of her token B is as follows:

		£
Consideration	Liquidity pool token - £120 × 60 / 120	60
Allowable costs	s.104 pool - £500 × 100 / 1,000	- 50
Gain		10

G's s.104 pool for token B will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	1,000	500
11/11/20XX	-100	-50
Closing balance	900	450

G will be treated as having acquired the liquidity token for the total market value of the token A and token B that G transfers to the DeFi lending platform. This is £60 (50 token A × £1.20 each) plus £60 (50 token B × £0.60 each) equals £120. This will go into a new s.104 pool:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	0	0
11/11/20XX	+10	+120
Closing balance	10	120

Next there is a disposal of some liquidity tokens.

On 24/05/20X1, G decides to withdraw half of her stake in the liquidity pool. She transfers 5 liquidity pool tokens to the DeFi lending platform.

At that time the balance of tokens in the liquidity pool has changed so that each liquidity pool token represents 5 token A and 20 token B. In return for the 5 liquidity pool tokens, the DeFi lending platform transfers 25 token A and 100 token B to G.
At the time of this exchange

Token	**Value**
token A	£1.50 each
token B	£0.50 each
liquidity tokens	£17.50 each

G decides that a just and reasonable basis for apportioning the value of the liquidity token is in proportion to the market value of the tokens she receives. The total market value of the tokens she receives is £37.50 (25 token A × £1.50 each) plus £50 (100 token B × £0.50 each) equals £87.50.

G's CG computation of her disposal of her liquidity pool tokens is as follows:

		£
Consideration	Token A: 25 × £1.50;	37.5
	plus Token B: 100 × £0.50	50
		87.50
Allowable costs	s.104 pool - £120 × 5 / 10	-60
Gain		27.50

G's s.104 pool for her liquidity pool tokens will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	10	120
24/05/20X1	-5	-60
Closing balance	5	60

G will be treated as having acquired the token A for an appropriate proportion of the market value of the liquidity pool tokens she transferred to the DeFi lending platform. This is £37.50 (£87.50 × 37.50 / 87.50). G's s.104 pool for token B will be adjusted as follows:

Date	**Quantity of tokens**	**Allowable costs (£)**
Opening balance	950	950.00
24/05/20X1	+25	+37.50
Closing balance	975	987.50

G will be treated as having acquired the token B for an appropriate proportion of the market value of the liquidity pool tokens she transferred to the DeFi lending platform. This is £50.00 (£87.50 × 50.00 / 87.50). G's s.104 pool for token B will be adjusted as follows:

Date	Quantity of tokens	Allowable costs (£)
Opening balance	900	450
24/05/20X1	+100	+50
Closing balance	1,000	500

96.20 Lending: Repo treatment

96.20.1 *The repo code*

The HMRC staking paper summarises the repo regime:

Overview of the Repo regime
A repo is a financing arrangement which is structured as a sale and repurchase of securities. The original owner of securities 'borrows' cash by selling securities to the other party of the transaction. At the end of the arrangement, the original owner repurchases the securities from the other party. The repurchase price is generally higher than the sale price as it includes the 'interest' element of the transaction.
In a repo transaction there is an actual sale of securities, with the beneficial ownership in those securities being disposed of by the original owner. However, economically a repo is not a true sale of securities but is in effect a financing transaction. The tax legislation has therefore been amended to treat repos as loans and not as sales of securities.
This is achieved by disregarding the sale (and subsequent repurchase) from Capital Gains Tax (s263A(1) TCGA) and by taxing as interest the return paid by the other party to the original owner (under Part 4 Chapter 2A ITTOIA 2005).
Overview of the Stock Lending regime
Stock Lending enables market makers and other securities dealers to obtain securities to meet deliveries on sales of those securities. This could be the case for example when dealers borrow securities to settle 'short' sales (selling securities they do not own) and hope to profit by buying equivalent securities at a lower price to return to the lender when the loan matures.
The transfers under a stock lending agreement are not sales, but, despite their name, they are not loans. Full beneficial and legal ownership is transferred, so that if the borrower wishes it can on-lend the securities or sell them, purchasing replacement securities at a later date to fulfil its obligation to return equivalent securities when the stock loan matures.
The lender, despite transferring the beneficial ownership in the securities, retains all the risks and benefits arising from the movements in the price of the securities. As the lender retains these risks economically, the tax legislation disregards the disposal of securities for Capital Gains Tax (under s263B(2) TCGA).
Further, any payments made by the borrower to the lender based on any income generated by the securities while they were lent (such as dividends for shares or interest for debt securities) will be taxed as manufactured payments. In general, the tax legislation ensures that a manufactured payment is taxed on the lender as if the lender had received that payment directly. For example, manufactured dividends received by the lender of shares from the borrower will be taxed on the lender as if the lender had received the dividends directly.

96.20.2 *Crypto outside repo regime*

The Crypto Manual provides:

> **CRYPTO61610 Defi Lending And Repos** [Feb 2022]
> [The Manual refers to the definition of "securities" for the repo code,[61] and continues:]
> It will be a question of fact whether the tokens being loaned and borrowed or staked (as applicable) can satisfy this definition to be securities for the purposes of sections 263A or 263B TCGA 1992. Generally tokens will not be securities for this purpose.
> If you come across a case where the customer is arguing that section 263A or 263B TCGA 1992 applies then you should refer the case for advice, following the guidance at CRYPTO100500.

But it seems obvious that cryptoassets (in the normal sense of the term) are not securities.

96.20.3 *The future*

The HMRC staking paper proposes (in short) that the repo and stock lending regimes apply to transfers of securities, or similar rules, should be applied to cryptoassets.

96.21 Mining cryptoassets

96.21.1 *What is mining*

> **CRYPTO10300: proof of work and proof of stake** [Apr 2021]
> Many cryptoasset networks are not controlled by a single body or person. Typically, the network of users of a specific token play a role in verifying transactions or making technological changes.
> This mechanism is often referred to as a 'consensus' because a sufficient proportion of the network must agree to a transaction or technological change before it can go ahead.
> For example, if A wishes to send 500 tokens to B, it must first be verified that A does indeed hold that many tokens. If the network agrees that this is the case, the transaction is added to the distributed ledger.
> **Proof of Work**
> The most well-known consensus system is Proof of Work, which is used by Bitcoin (amongst others). Here, the right to add a new entry to the distributed ledger is only available to the first person to solve a randomly generated complex cryptographic puzzle. That person then

[61] See App. 2.13 (Security: 5 statutory definitions).

> creates the new entry and it is shared with all holders of the distributed ledger. The time and energy required to solve the puzzle is the proof of work, the right to add the entry is the primary reward. The person with that right will be entitled to any fees available for including transactions in that entry and they will be allocated with a quantity of new tokens that are released into circulation. This process is known as 'mining' and serves to maintain the network of a given cryptoasset.
>
> **Proof of Stake**
>
> This has developed as an alternative to Proof of Work due to the significant amount of energy and computing power that system requires. Under Proof of Stake, the ability to create a new entry is determined by a user's wealth in the cryptoasset (or 'stake') rather than them having the computer power to solve a puzzle before anyone else does. Here, those verifying transactions are rewarded with fees for facilitating the transaction instead of any new tokens.

96.21.2 *Mining: Tax analysis*

The Crypto Manual makes the obvious points:[62]

> **CRYPTO21150 Income Tax: Mining Transactions** [Apr 2021]
>
> If the mining activity does not amount to a trade, the pound sterling value (at the time of receipt) of any tokens awarded will be taxable as income (miscellaneous income) with any appropriate expenses reducing the amount chargeable.[63]
>
> If the individual keeps the awarded assets, they may have to pay Capital Gains Tax when they later dispose of them.

96.22 Blockchain forks

The Crypto Manual provides:

> **CRYPTO22300: Blockchain forks** [Feb 2021]
>
> Some cryptoassets are not controlled by a central body or person but operate by consensus amongst that cryptoasset's community. When a significant minority of the community want to do something different, they may create a 'fork' in the distributed ledger.
>
> There are two types of forks, a soft fork and a hard fork. A soft fork updates the protocol and is intended to be adopted by all. No new tokens, or distributed ledger, are expected to be created. A hard fork is different and can result in new tokens coming into existence. Before the fork

[62] The text is repeated in relation to companies: CRYPTO40200 (Mining Transactions).

[63] See 33.17 (Sweep-up income: Computation).

> occurs there is a single distributed ledger. Usually, at the point of the hard fork a second branch (and therefore a new cryptoasset) is created. The distributed ledger for the original and the new cryptoassets have a shared history up to the fork. If an individual held tokens of the cryptoasset on the original distributed ledger they will, usually, hold an equal numbers of tokens on both distributed ledgers after the fork.

I expect this does not happen often. The HMRC analysis is as follows:

> The value of the new tokens is derived from the original tokens already held by the individual. This means that section 43 TCGA 1992 will apply.[64]
> After the fork the new tokens need to go into their own s.104 pool. Any allowable costs in the s.104 pool of the original cryptoassets are split between the two s.104 pools for the original tokens and the new tokens.
> If an individual holds their tokens through an exchange, the exchange will make a choice whether to recognise the new tokens created by the fork.
> Costs must be split on a just and reasonable basis under section 52(4) TCGA 1992. HMRC does not prescribe any particular apportionment method. HMRC has the power to enquire into an apportionment method that it believes is not just and reasonable.
> The new tokens can only be disposed of if the exchange recognises the new tokens. If the exchange chooses not to recognise the new tokens then the individual may seek to apportion all of the allowable costs to the original tokens. You will need to decide whether this is just and reasonable in the circumstances. The individual may instead apportion the costs but seek to make a negligible value claim in respect of the new tokens. You will need to consider whether the conditions for making a negligible value claim have all been satisfied. In cases of difficulty you should seek technical advice using the process for your business area.

96.23 Airdrops

The glossary in the Law Commission crypto paper provides:

> Airdrop: A distribution of an allocation of crypto-tokens, often unsolicited and normally for free.

The Crypto Manual provides:

> **CRYPTO22350 Airdrops** [Feb 2022]
> An airdrop is when an individual receives an allocation of tokens. For

[64] See 56.4.10 (Asset derived from asset).

> example, tokens that are given as part of a marketing or advertising campaign.
>
> The cryptoasset using the airdrop typically has its own infrastructure (which may include a smart contract, blockchain or other form of distributed ledger technology) that operates independently of the infrastructure for an existing cryptoasset.
>
> The airdropped tokens will need to go into their own s.104 pool unless the recipient already holds tokens of that cryptoasset, in which case the airdropped tokens will go into the existing s.104 pool. The value of the airdropped cryptoasset does not derive from existing tokens held by the individual, so section 43 TCGA 1992 does not apply.[65]

I suspect this is a rather broad analysis of complex arrangements which would need further examination in order to determine the tax analysis.

96.24 Loss of cryptoassets

96.24.1 *Negligible value claims*

The Crypto Manual provides:

> **CRYPTO22500 S24 And Negligible Value** [Feb 2022]
>
> As with other types of assets, individuals can crystallise losses for tokens that they still own if they become worthless or of 'negligible value' while owned.
>
> A negligible value claim treats the tokens as being disposed of and immediately re-acquired at an amount stated in the claim. As tokens are pooled, the negligible value claim needs to be made in respect of the whole s.104 pool, not the individual tokens.
>
> The negligible value claim will need to state the:
>
> - asset which is the subject of the claim
> - amount the asset should be treated as disposed of (which may be £nil)
> - date that the asset should be treated as being disposed of and immediately reacquired
>
> The disposal produces a loss that needs to be reported to HMRC. Negligible value claims can be made to HMRC at the same time as reporting the loss.

96.24.2 *Loss of key*

The Crypto Manual provides:

[65] See 56.4.10 (Asset derived from asset).

> **CRYPTO22400: Losing private keys** [Feb 2022]
>
> If an individual misplaces their private key (for example throwing away the piece of paper it is printed on), they will not be able to access their tokens. The private key still exists as part of the cryptography, albeit it is not known to the owner any more. Similarly the tokens will still exist in the distributed ledger. This means that misplacing the key does not count as a disposal for Capital Gains Tax purposes. More information can be found in CG13155.
>
> If it can be shown there is no prospect of recovering the private key or accessing the tokens, a negligible value claim could be made. If HMRC accepts the negligible value claim, the individual will be treated as having disposed of and re-acquiring the tokens they cannot access so that they can crystallise a loss.

96.24.3 *Theft of cryptoasset*

The Crypto Manual provides:

> **CRYPTO22450: Being defrauded** [Feb 2022]
>
> HMRC does not consider theft to be a disposal, as the individual still owns the stolen asset and has a right to recover it. This means victims of theft cannot claim a loss for Capital Gains Tax.
>
> Individuals who contract to acquire tokens but then do not receive the tokens they have paid for may not be able to claim a capital loss.
>
> Individuals who contract to acquire tokens and do actually receive tokens, may be able to make a negligible value claim to HMRC if those tokens become worthless. If the tokens are worthless when acquired then a negligible value claim won't be allowed. This won't affect the ability of the individual to dispose of the tokens by other means to crystallise the capital loss.

96.25 Stamp duty/SDRT

The Crypto Manual provides:

> **CRYPTO24000 Stamp Duty, Stamp Duty Reserve Tax And Stamp Duty Land Tax** [Apr 2021]
>
> **Stamp Duty and Stamp Duty Reserve Tax**
>
> **...Transfer of exchange tokens**
>
> For the transfers of exchange tokens to fall within the scope of Stamp Duty or SDRT, they would need to meet the definition of 'stock or marketable securities' or 'chargeable securities' respectively.
>
> This will be considered on a case-by-case basis, dependent on the characteristics and nature of the cryptoasset, rather than any labels

attached to them.

However, as of the original date of publication of this paper, HMRC's view is that existing exchange tokens would not be likely to meet the definition of 'stock or marketable securities' or 'chargeable securities'.

Exchange tokens given as consideration

Exchange tokens could be given as consideration for purchases of 'stock or marketable securities' and/or 'chargeable securities'.

For Stamp Duty, chargeable consideration is 'money', 'stock or marketable securities' or 'debt'. For SDRT it is defined as 'money or money's worth'.

If exchange tokens are given as consideration, this would count as 'money's worth' and so be chargeable for SDRT purposes. Tax will be due based on the pound sterling value of the exchange tokens at the relevant date.

HMRC does not consider exchange tokens to be currency or money, so they do not meet the definition of 'money' for Stamp Duty consideration purposes. They will also generally not count as 'stock or marketable securities'.

Broadly, 'debt' counts as chargeable consideration for Stamp Duty in the following scenarios:

- release of a debt - The seller has an outstanding debt to the purchaser (which could be in the form of exchange tokens). The seller transfers shares to the purchaser, and in consideration the purchaser releases the seller from the debt.
- debt is assumed - A third party has an outstanding debt to the purchaser (which could be in the form of exchange tokens). The seller transfers shares to the purchaser, and in consideration the seller is assigned the right to the debt from the third party.

Stamp Duty Land Tax

... Transfer of exchange tokens

HMRC does not consider transfers of exchange tokens to be land transactions. This means that SDLT will not be payable on such transfers.

Exchange tokens given as consideration

Chargeable consideration for the purposes of SDLT comprises anything given for the transaction that is 'money or money's worth'. As a general rule, any non-monetary consideration should be valued at its market value on the effective date of the transaction.

Accordingly, if exchange tokens are given as consideration for a land transaction, these would fall within the definition of 'money or money's worth' and so be chargeable to SDLT.

CHAPTER NINETY SEVEN

UNREMITTABLE ASSETS

97.1 Unremittable assets: Introduction
97.2 Unremittable asset relief
97.3 "Unremittable" income
97.3.1 Cond. A: Cannot transfer to UK
97.3.2 Cond. B: Remittable funds
97.4 The relief
97.5 ECGD payment
97.5.1 Payment before claim
97.6 Claims
97.7 Remittance basis claimant
97.8 Clawback of unremittable income relief
97.8.1 Clawback: after ECGD payment
97.8.2 Clawback: after source ceased
97.8.3 Remittance basis taxpayer
97.8.4 Clawback: Non-resident
97.8.5 Death before relief withdrawn
97.8.6 Clawback: Income computation
97.8.7 Prevention of double charge
97.9 Position if no relief claim made
97.10 Unremittable trading/property income
97.11 Unremittable accrued income profits
97.12 Interaction with anti-avoidance rules
97.12.1 Unremittable s.3 gains
97.12.2 s.624/720 income or benefit

97.1 Unremittable assets: Introduction

There are five reliefs for receipts which cannot be brought to the UK, typically due to exchange control:

Provision	**Relief for:**
s. 842 ITTOIA	Foreign income
Chap 13 pt 2 ITTOIA	Trading receipts
s.668, 669 ITA	Accrued income profits
s.279 TCGA	Foreign gains
s.1275 CTA 2009	CT

In this chapter I focus on the reliefs for foreign income/gains, which I call "**unremittable income/gains relief**".

The SAIM provides:

> **SAIM1150 unremittable income** [Feb 2020]
> Some countries impose exchange controls to regulate the flow of money. Where a person has income arising in one of these countries, it may be impossible to bring the income into the UK either because it is not permitted by the authorities in that country or because it is difficult to

> obtain foreign currency there. In these circumstances, tax could become due on income that was not available to pay the tax bill and hardship could result. Special rules in Chapter 4 Part 8 of ITTOIA 05 allow an individual or trustee to claim that unremittable income should not be brought into charge when it arises.
> The most common example is that of a UK resident who has a bank account in a country that imposes restrictions on the movement of currency...

It might be noted that although the legislation (e.g. s841(3)(c) ITA 2007) refers to the "impossibility" of obtaining currency, HMRC's guidance is more lenient, referring to "difficult to obtain" A current example might be Zimbabwe where a monthly auction of foreign currency is always oversubscribed and, in reality, it is a lottery whether foreign currency can be obtained.

97.2 Unremittable asset relief

For foreign income, s.841(1) ITTOIA provides:

> This Chapter applies if—
> (a) a person is liable for income tax on income arising in a territory outside the UK, and
> (b) the income is unremittable.

The CGT equivalent is s.279(1) TCGA which provides:

> Subsection (2) below applies where—
> (a) chargeable gains accrue from the disposal of assets situated outside the UK, and
> (b) the person charged or chargeable makes a claim, and
> (c) the conditions set out in subsection (3) below are, so far as applicable, satisfied as respects those gains ("the qualifying gains");...[1]

What is the interaction of these provisions - for instance where only a limited amount of foreign currency is available but an individual has both unremittable income and unremittable capital gains? In the absence of any statutory provisions, it is assumed that the pre-2008 mixed-fund rules - see 20.17 (Pre-2008 mixed fund rules) - will apply.

[1] For completeness: s.279(1) concludes with provision for pre-TCGA 1992 claims (which will now be very rare): "... and subsection (2)(b) also applies where a claim has been made under section 13 of the 1979 Act."

97.3 "Unremittable" income

Section 841(2) ITTOIA provides:

> For the purposes of this Chapter, income is unremittable if conditions A and B are met.

I refer to "**unremittable income conditions A and B**".

97.3.1 *Cond. A: Cannot transfer to UK*

For foreign income, s.841(3) ITTOIA provides:

> Condition A is that the income cannot be transferred to the UK by the person who is liable for income tax in respect of the income because of—
> (a) the laws of the territory where the income arises,
> (b) executive action of its government, or
> (c) the impossibility of obtaining there currency that could be transferred to the UK.

For CGT, s.279(3) TCGA provides:

> (3) The conditions are—
> (a) that the claimant was unable to transfer the qualifying gains to the UK, and
> (b) that the inability was due to the laws of the territory where the assets were situated at the time of the disposal, or to the executive action of its government, or to the impossibility of obtaining foreign currency in that territory, and
> (c) that the inability was not due to any want of reasonable endeavours on the part of the claimant.

The predecessor provision in ICTA included a requirement that the income was unremittable notwithstanding the taxpayer's reasonable endeavours. This remains for CGT but was omitted in the ITTOIA rewrite, as it added little if anything to the general rule that the income cannot be transferred. That condition is not met if reasonable endeavours could procure a transfer. EN ITTOIA provides:

> The condition contained in section 585(1)(c) of ICTA and the similar words about "reasonable endeavours" in section 584(2) of ICTA are not rewritten in [ITTOIA]. They are regarded as adding little to the requirements of sections 584(1)(a) and 585(1)(a) and (b) of ICTA. If, by reasonable endeavours, the taxpayer could transfer the income to the United Kingdom, the test in section 584(1)(a) of ICTA of his being prevented from transferring it and the similar tests in section 585(1)(a)

> of ICTA about being unable to transfer the income or remit the proceeds of transfer must not be met, and there would then be no inability to transfer because of local law, government action or the impossibility of obtaining foreign currency as required under section 585(1)(b) of ICTA.

The SAIM provides:

> **SAIM1150 unremittable income** [Feb 2019]
> ... The earlier [ICTA] rules also required that the income should not be unremittable due to 'want of reasonable efforts' on the taxpayer's part, but this requirement was omitted from ITTOIA05 and should not be interpreted harshly for 2004-05 and earlier years.
> Example (*Laura*)
> L has a bank account in another country where money is deposited from her mother's estate. She cannot bring the money back to the UK because of strict exchange controls. She has the option of putting the money into low yield government bonds in that country, and income from these bonds can be remitted to the UK. HMRC will accept that it is not reasonable for L to have to put the money in low yield bonds, and that the interest on the account is unremittable.

Although in origin a comment on the "reasonable endeavours" requirement (still applicable to CGT but not now to IT) the example is also relevant to the question of whether unremittable income condition A is met, ie whether it is the case that the income "cannot" be transferred.

In *Coxon v HRMC* the taxpayer purchased a property in Cyprus "off plan", that is, the property was not then constructed but the vendor developer undertook to build the property. The taxpayer transferred funds to a Cyprus bank account in his name. The funds could not be transferred to the UK because:

(1) Under the contract with the developer, they were to be released to the developer in installments as the development proceeded, an arrangement known as an escrow account.
(2) The funds were also charged for a debt to the bank.

Interest on the funds could not be transferred to the UK. But this was because of the contracts the taxpayer had chosen to make, and not because of the laws of Cyprus (even though the contracts were governed by Cyprus law):

> We do not consider that s 841(3)(a) [ITA] assists Mr Coxon. We consider that provision applies to overseas legislation such as foreign exchange control restrictions, or blocked funds accounts arising from

> trading boycott sanctions. It is not sufficient to cover an inability to transfer funds to the UK because of a contractual provision restricting one party's ability to deal with those funds (here, the bank's security charge over the Escrow Account). [The taxpayer's representative] made reference to Cypriot banking laws but, at least in the absence of further detail, we conclude that a contractual restriction, albeit one legally enforceable under Cypriot law, is insufficient to bring s 841(3)(a) into play.[2]

97.3.2 *Cond. B: Remittable funds*

Section 841(4) ITTOIA provides:

> Condition B is that the person who is liable for income tax in respect of the income has not realised it outside that territory for an amount in sterling or in another currency which the person is not prevented from transferring to the UK.

It is difficult to see what this adds to unremittable income condition A; but it does not matter.

97.4 The relief

For foreign income, s.842(1) ITTOIA provides:

> If a person liable for income tax on unremittable income makes a claim for relief under this section in respect of that income, it is not taken into account for income tax purposes.

The CGT equivalent is s.279(2)(a) TCGA which provides:

> For the purposes of capital gains tax—
> (a) the amount of the qualifying gains shall be deducted from the amounts on which the claimant is assessed to capital gains tax for the year in which the qualifying gains accrued to the claimant.

97.5 ECGD payment

97.5.1 *Payment before claim*

For foreign income, s.842 ITTOIA provides:

> (3) No claim under this section may be made in respect of any income so

[2] [2013] UKFTT 112(TC) at [19].

> far as an ECGD payment has been made in relation to it.
> (4) In subsection (3) "ECGD payment" means a payment made by the Export Credit Guarantee Department under an agreement entered into as a result of arrangements made under—
> (a) section 2 of the Export and Investment Guarantees Act 1991 (insurance in connection with overseas investment), or
> (b) section 11 of the Export Guarantees and Overseas Investment Act 1978.[3]

The CGT equivalent is s.279(4) TCGA which provides:

> Where under an agreement entered into under arrangements made by the Secretary of State in pursuance of
> [a] section 1 of the Overseas Investment and Export Guarantees Act 1972[4] or
> [b] section 11 of the Export Guarantees and Overseas Investment Act 1978[5]
> any payment is made by the Exports Credits Guarantee Department in respect of any gains which cannot be transferred to the UK, then, to the extent of the payment, the gains shall be treated as gains with respect to which the conditions mentioned in subsection (3) above are not satisfied (and accordingly cannot cease to be satisfied).

97.6 Claims

Both CGT and IT require a claim.

The claim for foreign income is made by ticking box 1 of form SA106 (Foreign) 2022/23 The rubric to the box reads:

> **Unremittable income If you were unable to transfer any of your overseas income to the UK, put 'X' in the box** – and give details in the 'Any other information' box on your tax return or on a separate sheet

Section 842(5) ITTOIA provides:

> A claim under this section must be made on or before the first anniversary of the normal self-assessment filing date for the tax year for which the income would be charged to tax if no claim were made.

[3] This Act was repealed by the Export and Investment Guarantees Act 1991but the need to update was overlooked.

[4] This Act was repealed by the Overseas Development and Co-operation Act 1980 but unfortunately the need to update the reference was overlooked.

[5] This Act was repealed by the Export and Investment Guarantees Act 1991 but unfortunately the need to update the reference was overlooked.

EN ITTOIA provides:

> The time limit is tied to the tax year for which the income would otherwise be chargeable, rather than to the tax year in which the income arises (as in the source legislation). This brings the time limit into line with the normal time limit for claims. See Change 140 in Annex 1.

But following the abolition of the preceding year basis, there are not many cases where income arises in one year and is chargeable in another. Perhaps the remittance basis offers an example.

The SAIM provides:

> **SAIM1160 unremittable income: claims** [Jan 2020]
> ... A claim under ITTOIA/S842 does not mean that the income can be omitted from the tax return. The income must still be declared on the tax return but it will not be brought into charge if the claim is valid. This ensures that the amount of the income for each year is known so it can be assessed when the income becomes remittable.

That follows from s.42(1A) TMA: see 123.3 (Quantification of claim).

The CGT time limit is different. Section 279(5) TCGA provides:

> No claim under this section in respect of a chargeable gain shall be made—
> (a) in the case of a claim for the purposes of capital gains tax, at any time not more than 4 years after the end of the year of assessment in which the gain accrues; or
> (b) in the case of a claim for the purposes of corporation tax, more than 4 years after the end of the accounting period in which the gain accrues.

For gains, the claim is made in form SA108 (2022/23) box 54 (Any other information). HMRC, "Capital Gains Tax summary notes" (2022/23) provides:

> Please put any additional information in this box. For example ... any gains out of your computations, such as foreign gains that you are unable to bring into the UK

97.7 Remittance basis claimant

EN ITTOIA provides:

> The relief [in chapter 4] applies only to income charged on the arising

basis so does not apply to income charged on the remittance basis.[6]

This was the case in the pre-ITTOIA legislation. The former s.584 ICTA1988 applied:

> *Where a person is chargeable to tax by reference to the amount of any income arising in a territory outside the UK ...*

That relief only applied to arising basis taxpayers.[7] Now it is considered that an individual who is a remittance basis taxpayer at the time the unremittable income arises may also qualify for unremittable income relief; but that issue only arises in circumstances where the income is:

(1) unremittable (for the purposes of unremittable income relief) but
(2) treated as remitted under the ITA remittance basis (so a claim is needed for unremittable income relief).

That would not happen before the extension of the remittance basis in 2008 and even now will rarely happen. If it did, there is no good reason for not applying the relief, and that would be consistent with the position for unremittable gains relief.

97.8 Clawback of unremittable income relief

For foreign income, s.843(1) ITTOIA provides:

> This section applies if—
> (a) a claim under section 842[8] has been made in relation to any income, and
> (b) either—
> (i) the income ceases to be unremittable, or
> (ii) an ECGD payment is made in relation to it.

If these conditions are satisfied, the relief is withdrawn. Section 843(3)

[6] The same point was made in the former HMRC6 para 12.27 (Unremittable income): "Unremittable income should not be confused with unremitted foreign income and gains which is relevant only if you use the remittance basis.
Having unremittable income is relevant to your tax affairs only if you use the arising basis."

[7] Contrast the former s.585 ICTA 1988 which applied if: "A person charged or chargeable for any year of assessment in respect of income from any source with tax which (apart from this section) falls to be computed ... on the amount of income received in the UK..."

[8] This will include a claim made under the pre-2005 legislation, if the income ceases to be unremittable after 2005.

ITTOIA provides:

> If income ceases to be unremittable, the income is treated as arising on the date on which it ceases to be unremittable.

For gains, s.279(2)(b) TCGA provides for withdrawal of the relief:

> (b) the amount so deducted shall be assessed to capital gains tax on the claimant (or his personal representatives) as if it were an amount of chargeable gains accruing in the year of assessment in which the conditions set out in subsection (3) below cease to be satisfied.

The remittance basis may apply on a clawback of the relief.

If the individual (or the PRs) are non-resident in the year the gain accrues, there is no charge to CGT.[9]

CG Manual gives this example:

> **CG78408 - Foreign currency: example** [Jul 2019]
> In 1983, Ms A who is both resident and domiciled[10] in the UK buys a property overseas for foreign currency, which she acquired for £50,000 on the date of purchase of the property ....
> In 1986-87 she sells the property for 3,000,000 units of the foreign currency at a time when the exchange rate is 40 to £1. The sterling equivalent of the currency so obtained is therefore £75,000.
> The chargeable gain (subject to expenses) is £75,000 less £50,000 equals £25,000, before indexation, and this is assessable for 1986-87.
> Ms A makes a claim under TCGA92/S279 and establishes that she is unable to transfer any of the sale proceeds to the UK because of the foreign country's currency regulations. The gain of £25,000 less indexation is no longer assessable for 1986-87, and any assessment which may have been made should be adjusted accordingly.
> In 1991-92, the foreign country relaxes its currency regulations and Ms A is then able to transfer the sale proceeds to the UK. She becomes assessable for that year (whether or not she remits the sale proceeds to the UK) on £25,000 less indexation (that is, the amount by which the assessment for 1986-87 was reduced) ...

The SAIM provides:

> **SAIM1160 unremittable income: claims** [Jan 2020]
> ...Relief continues until the income becomes remittable. Exchange

[9] Except for NRCGT?

[10] The point of mentioning domicile is that Ms A is an arising basis taxpayer.

controls do change so anyone who makes a claim must check that the conditions for relief continue to be satisfied each year.

Withdrawal of relief

The income is assessable at the time it becomes possible to remit the income to the UK (ITTOIA05/S843). There is no requirement that the income must actually be remitted in order for the charge to arise. If the source has ceased, the income is taxed as if the source had not ceased (ITTOIA05/S844).

97.8.1 *Clawback: after ECGD payment*

Section 843(4) ITTOIA provides:

> If an ECGD payment[11] is made in relation to income, the income is treated, to the extent of the payment, as arising on the date on which the ECGD payment is made.

97.8.2 *Clawback: after source ceased*

Section 844 ITTOIA provides:

> (1) This section applies if—
> (a) income is treated as arising as a result of section 843, and
> (b) at the time it is so treated the person who would have become liable for income tax as a result of that section—
> (i) has permanently ceased to carry on the trade, profession, vocation or property business from which the income arises, or
> (ii) in the case of income from another source, has ceased to possess that source.
> (2) In the case of income from a trade, profession or vocation—
> (a) the income is treated as a post-cessation receipt for the purposes of Chapter 18 of Part 2 (trading income: post-cessation receipts), but
> (b) in the application of that Chapter to that income, section 243 (extent of charge to tax) is omitted.
> (3) In the case of income from a property business—
> (a) the income is treated as a post-cessation receipt from a UK property business for the purposes of Chapter 10 of Part 3 (property income: post-cessation receipts), but
> (b) in the application of that Chapter to that income, section 350

[11] Defined by reference in s.832(2) ITTOIA: “In this section “ECGD payment” has the meaning given by section 842(4).”

> (extent of charge to tax) is omitted.
> (4) In the case of income from another source, the income is taxed as if the person continued to possess that source.

97.8.3 *Remittance basis taxpayer*

The rules here are odd. The position depends on whether or not the source of income exists at the time that the relief is withdrawn. If it does, then the income is relevant foreign income and if the individual is a remittance basis taxpayer at the time the income arises, the remittance basis will apply.

If the source has ceased, however, the income is within s.844 ITTOIA, and s.830(3) ITTOIA provides:

> But "relevant foreign income" does not include income chargeable as a result of section 844 (unremittable income: income charged on withdrawal of relief after source ceases).

The surprising consequence is that the remittance basis does not apply to income deemed to arise on a withdrawal of relief after the source of the income has ceased.[12]

The reason for this is historical. EN ITTOIA provides:

> Income charged by virtue of [section 844] is not "relevant foreign income", as defined in section 830 (see subsection (3) of that section). In the source legislation, the charge is under Schedule D Case VI (rather than Schedule D Cases IV or V). The potential relevance of such income to relief under section 392 of ICTA (Case VI losses) has been preserved by the appropriate entry in section 836B of ICTA (introduced by paragraph 340 of Schedule 1 to this Act).

It is obvious that s.830(3) serves no useful purpose, and should be repealed, if only for the sake of simplification; in practice I expect the point will rarely arise; if it does, it would often be overlooked.

97.8.4 *Clawback: Non-resident*

As the income is foreign source income, there is no tax charge if the taxpayer is then non-resident. In appropriate cases, split-year rules, temporary non-resident rules and DT relief need to be considered.

[12] The law ought to be simplified by repealing s.830(3): see 16.9.4 (RFI definition: Critique).

97.8.5 *Death before relief withdrawn*

For foreign income, s.843(7) ITTOIA provides:

> If a person who would have become liable for income tax as a result of this section has died—
> (a) the personal representatives are liable for the tax instead, and
> (b) the tax is a debt due from and payable out of the estate.

The PRs tax liability is on the basis that the income is treated as accruing to the estate when it becomes remittable. That seems reasonable as the PRs should receive the (formerly unremittable) income.

In the case of a remittance basis taxpayer, it could work unfairly if the PRs do not qualify for the remittance basis. But a remittance basis taxpayer will not normally claim unremittable income relief.

If the PRs are non-resident, they will not be taxable.

The CGT equivalent is s.279(6) TCGA which provides:

> The personal representatives of a deceased person may make any claim which he might have made under this section if he had not died.

Why was this thought to be necessary?

97.8.6 *Clawback: Income computation*

Section 843(5) ITTOIA provides:

> The income treated as arising under subsection (3) or (4), and any tax payable in respect of it under the law of the territory where it arises, are taken into account for income tax purposes at their value at the date on which the income is treated as arising.

The SAIM provides:

> **SAIM1160 unremittable income: claims** [Jan 2020]
> ... The income is treated as arising on the date on which the qualifying conditions cease to be satisfied. The foreign currency amount is translated into sterling at the market rate on that date, or if there is no market in the currency, the official exchange rate for the country concerned (ITTOIA05/S845).
> *Example (Martin)*
> M has income from an interest-bearing account in Ruritania. Ruritania has exchange controls, and he cannot remit the income to the UK. The income first arises in 2002/03, when the account earns interest of 1,000 Ruritanian doubloons (RUD). RUD 1,250 arises in 2003/04, and RUD

> 1,600 in 2004/05. In March 2005, M travels to Ruritania, closes the account and spends the money.
> On 1 January 2008, Ruritania lifts the exchange controls and the income becomes remittable.

The HMRC analysis is as follows:

> M has validly claimed relief under ITTOIA/S842 (1). But in 2007/08, the income is brought back into charge under ITTOIA/S843. It does not matter that he no longer possesses the source of income (ITTOIA05/S844 (4)). M must include total income of RUD 3,850 (1,000 + 1,250 + 1,600), translated into sterling at the exchange rate prevailing on 1 January 2008, in his 2007/08 self-assessment.

97.8.7 *Prevention of double charge*

Section 843(6) ITTOIA provides:

> Subsections (3) to (5) do not apply so far as the income has already been treated as arising as a result of this section.

EN ITTOIA provides:

> For example, if relief has been withdrawn because an ECGD payment is received, there is no further charge under this section – to the extent of that payment – if the income itself subsequently becomes remittable.

97.9 Position if no relief claim made

A claim should normally be made, but it may occasionally be better not to claim, to avoid clawback issues when unremittable income will subsequently become remittable:

(1) Bunching income and bringing it into a higher rate.
(2) If it is anticipated that the foreign currency may appreciate against sterling.
(3) A remittance basis taxpayer at the time the income arises does not usually need the relief.

If no claim is made for the relief, an arising basis taxpayer will be chargeable, but on what amount? Section 845 ITTOIA provides:

> (1) If no claim is made under section 842 in relation to unremittable income arising in a territory outside the UK, the amount of the income to be taken into account for income tax purposes is determined as follows.

> (2) If the currency in which the income is denominated has a generally recognised market value in the UK, the amount is determined by reference to that value.
> (3) In any other case, the amount is determined according to the official rate of exchange of the territory where the income arises.

97.10 Unremittable trading/property income

The former ESC B38 explains the limits of s.841 unremittable income relief:

> 1. A person resident in the UK who carries on a trade partly overseas and partly in the UK is normally liable to UK income or corporation tax on all the profits from that trade. For this purpose the calculation of profits will include, in respect of overseas transactions–
> (i) amounts paid to the trader which are not remittable to the UK
> (ii) amounts owed to the trader which temporarily cannot be paid, and
> (iii) amounts owed to the trader which even when paid will not be remittable to the UK.
> solely as a consequence of local foreign exchange control restrictions.
> 2. Relief from tax is not available for such amounts under [s.841 unremittable income relief] ... because the profits of the trader of which they are a component part do not arise outside the UK. Nor does the fact that the amounts are unremittable to the UK entitle the trader to relief under [s.35 ITTOIA] (bad and doubtful debts).

Instead, Chapter 13 Part 2 ITA 2007 provides relief. Section 272 ITTOIA applies that Chapter for the purposes of Part 3 of ITTOIA (property income). This is too specialist a topic to consider here.

97.11 Unremittable accrued income profits

Section 841 would not apply to accrued income profits as the proceeds of the sale of accrued income securities are not the income. But in any event, s.841(5) ITTOIA provides:

> This Chapter does not apply to accrued income profits which a person is treated as making under Chapter 2 of Part 12 of ITA 2007, but see sections 668 and 669 of that Act (which make similar provision).

Instead, ss 668, 669 ITA provide relief. This is too specialist a topic to consider here.

97.12 Interaction with anti-avoidance rules

Interactions of unremittable income relief and various anti-avoidance provisions raise a fine set of puzzles.

97.12.1 *Unremittable s.3 gains*

Van-Arkadie v Plunket concerned a minority shareholder in a company resident in Rhodesia. The company realised a gain, part of which was treated as accruing to to the shareholder under s.3 TCGA. The company could not transfer its gain to the UK. The claim for unremittable gains relief was refused:

> Section [279 TCGA] is concerned only with the case where a chargeable gain accruing on an actual or deemed disposal is represented by something, money or money's worth, which comes into the hands of the taxpayer. It is only in respect of that money or money's worth that it can be sensibly asked whether the taxpayer was unable to transfer it to the UK, and if he was whether the inability was due to the laws of the territory where the gain accrued and whether, if it was, that inability was due to any want of reasonable endeavours on his part. That last requirement seems to me in itself conclusive against the Respondent's case. In this case the Respondent's inability to remit the gain on which he is chargeable was not due to any want of reasonable endeavours to remit moneys to the UK; it was due to the fact that the company did not distribute and that he could not as a minority shareholder compel it to distribute the gain.[13]

This was an unfair result, but in practice the restrictions on s.3 introduced in 2013 reduce the problem significantly.

A shareholder with a majority of the company could compel the company to distribute, and in those circumstances unremittable gain relief should be available.

97.12.2 *s.624/720 income or benefit*

If the income is unremittable income of a settlor-interested trust, it is suggested that unremittable income relief is available if the income is actually received by the settlor who is unable to remit it.

If a transferor receives s.720 income, it is suggested that unremittable income relief does not apply, though the contrary view is arguable.

[13] 56 TC 310 at p.316. Although there was a DTA with Rhodesia, it did not cover CGT.

If a beneficiary receives a benefit within s.731/s.643A/s.87, and is unable to remit the benefit, it is suggested that unremittable income or gain relief applies, but in any event, the benefit must be valued taking into account the restriction on remittance, so it may not have much value.

CHAPTER NINETY EIGHT

ATED AND SDLT

98.1 ATED regime
98.2 ATED terminology
98.2.1 "Partnership" for ATED/SDLT
98.2.2 "Company" for ATED/SDLT
98.2.3 "Collective investment scheme"
98.2.4 "Connected person"
98.2.5 "Non-natural person"
98.2.6 Enveloping/De-enveloping
98.3 "Chargeable interest"
98.4 Annual tax on enveloped dwellings
98.5 Corporate ownership condition
98.5.1 "Entitled"
98.5.2 Co in liquidation not beneficial owner
98.5.3 Joint ownership
98.6 Chargeable person
98.6.1 Chargeable person: Company
98.6.2 Chargeable person: Partnership
98.6.3 Joint owners
98.6.4 Chargeable person: CIS owner
98.6.5 More than 1 chargeable person
98.7 Rates of ATED
98.7.1 "Annual chargeable amount"
98.7.2 Indexation of ATED rates
98.8 Change of ownership
98.8.1 Position of purchaser
98.8.2 "Relevant day"
98.8.3 "Relevant fraction"
98.8.4 Relief for vendor
98.8.5 "Initial charged amount"
98.8.6 Adjusted chargeable amount
98.9 Taxable value
98.9.1 Ascertaining market value
98.9.2 "Valuation date"
98.9.3 Revaluation on disposal
98.9.4 "Disposal" and "acquisition"
98.10 Valuation for ATED
98.10.1 Valuation practice
98.10.2 Is expert valuation needed
98.10.3 HMRC valuation service
98.11 "Chargeable period"
98.12 "Single-dwelling interest"
98.12.1 The general rule
98.12.2 Interest in multiple dwellings
98.12.3 Interest in dwelling+ other land
98.12.4 "Dwelling"
98.13 Different interests in 1 dwelling
98.14 Interests of connected person
98.14.1 Exemptions for individuals
98.14.2 Collective investment scheme
98.14.3 Interaction with reliefs
98.14.4 Flat management company
98.15 Partnerships
98.15.1 ATED treatment of partnership
98.15.2 Administration
98.16 Tax consequences of paying ATED
98.16.1 ATED deduction for CGT
98.17 ATED reliefs
98.17.1 DT relief
98.18 ATED rental relief
98.18.1 "Property rental business"
98.18.2 "Qualifying" rental business
98.18.3 Relief for property business
98.18.4 Property for sale or conversion
98.18.5 Rental relief conditions
98.18.6 "Without undue delay"
98.18.7 Non-qualifying occupier
98.18.8 Disapplication of future relief
98.18.9 Disapplication of past relief
98.19 Non-qualifying individual
98.19.1 "Non-qualifying individual"
98.19.2 Supplemental definitions

98.20 Farmhouses
98.20.1 "Farm worker"
98.20.2 Former farm worker
98.21 "Chargeable", "within the charge"
98.22 ATED returns
98.23 SDLT: Introduction
98.23.1 Charge to SDLT
98.23.2 "Land transaction"
98.23.3 "Chargeable transaction"
98.24 Ordinary SDLT rates
98.24.1 Residential property
98.24.2 Non-residential property
98.24.3 "Relevant land/consideration"
98.24.4 "Chargeable consideration"
98.25 ATED-SDLT rate
98.26 "High-value" transaction
98.26.1 Appurtenant rights

98.54 Trust purchaser
98.55 Alternative property finance
98.56 SDLT surcharge: administration

98.56.1 Individual becomes UK resident
98.57 Dwelling
98.58 Surcharge: Commencement

98.1 ATED regime

This chapter considers:

(1) Annual Tax on Enveloped Dwellings (“**ATED**”)
(2) Aspects of SDLT:
    (a) 15% SDLT rate on acquisition within ATED (“**ATED-SDLT**”)
    (b) SDLT surcharge on acquisition by non-residents

The focus of this chapter is ATED. I deal with the SDLT topics, which are in part related, but in less detail. I do not consider LBTT/LTT (the Scots/Welsh equivalents of SDLT) though I hope to do so in a future edition.

A third part of the former ATED regime, CGT on property within ATED (“ATED-CGT”), has long gone: that is now superseded by the general charge on UK property of non-residents.

A full discussion of ATED would require a book to itself and SDLT would need several volumes. I focus on the aspects most important to the themes of this book, but include a general discussion, as it is necessary to view the rules in the round.

HMRC have published over 100 pages of guidance (“**HMRC ATED guidance**”).[1]

The development of the law can be traced from:

(1) A consultation document tendentiously entitled “Ensuring the fair taxation of residential property transactions”.[2] I refer to it as the “**Residential Property Consultation Document**”.
(2) A consultation response document, which I call the “**Residential Property Consultation response**”.[3]

[1] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/375750/ated-tech-guide.pdf* supplemented by guidance on completing the ATED return *https://www.gov.uk/government/publications/stld-annual-tax-on-enveloped-dwellings-ated*

[2] *https://assets.publishing.service.gov.uk/media/5a798f7b40f0b63d72fc6c87/consult_ensuring_fair_taxation_residential_property_transactions.pdf* (May 2012).

[3] HMRC, “Ensuring the fair taxation of residential property transactions: summary of responses” (December 2012) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/19*

These are now of historical interest only.

The ATED/ATED-SDLT legislation is found in two distinct places:

(1) ATED is in FA 2013
(2) ATED-SDLT is in sch 4A FA 2003

ATED and ATED-SDLT share a common framework and common terminology, even though the common definitions are written out twice. Brevity and simplicity were not material considerations in the ATED regime.

98.2 ATED terminology

98.2.1 *"Partnership" for ATED/SDLT*

"Partnership" matters for the following purposes for ATED/SDLT:

(1) ATED applies if residential property is held by a partnership including a company.
(2) ATED-SDLT applies if residential property is acquired by a partnership including a company.

For SDLT, para 1 sch 15 FA 2003 provides a definition:

> In this Part of this Act a "partnership" means—
> (a) a partnership within the Partnership Act 1890,
> (b) a limited partnership registered under the Limited Partnerships Act 1907, or
> (c) a limited liability partnership formed under the Limited Liability Partnerships Act 2000 or the Limited Liability Partnerships Act (Northern Ireland) 2002,
> [d] or a firm or entity of a similar character to any of those mentioned above formed under the law of a country or territory outside the UK.

Para [d] brings in foreign law LLPs, which are not classified as partnerships for other tax purposes, so this definition is wider than the normal tax sense of the word.

Section 167 FA 2013 provides the identical definition for ATED.[4] So I refer to this as the **"ATED/SDLT definition of partnership"**.

0256/summary_of_responses_ensuring_fair_taxation_of_residential_property_transactions.pdf

[4] Except that s.167(1)(a) erroneously reads "Partnerships Act 1890", which is a surprising error, as the Act was correctly named in the FA 2003.

98.2.2 *"Company" for ATED/SDLT*

The ATED and ATED-SDLT definitions are similar, and conveniently read side by side:

s.166(1) FA 2013: ATED

> In this Part "company" means a body corporate[5] but does not include—
> (a) a corporation sole,[6] or
> (b) any partnership (see section 167(1)).

Para 9 sch 4A FA 2003: ATED-SDLT

> In this Schedule—
> "company" means a body corporate other than a partnership.

The rules apply to UK and non-UK resident companies.

This is narrower than the standard tax definition (which classifies an unincorporated association as a company).[7]

98.2.3 *"Collective investment scheme"*

The FSMA definition applies: see para 9 sch 4A FA 2003 (for ATED-SDLT) and s.174 FA 2013 (for ATED).[8]

98.2.4 *"Connected person"*

Section 172(1) FA 2013 incorporates the standard definition[9] by reference:

> Section 1122 of the Corporation Tax Act 2010 (connected persons) has effect for the purposes of this Part (except where otherwise stated).

Section 172 goes on to provide a definition of "connected" in relation to a collective investment scheme, which is not discussed here.

98.2.5 *"Non-natural person"*

HMRC use the term "**non-natural**" person as label for a body which is a company, a partnership with a company partner, or a CIS. The term is inapt and tends to conceal the complex and arbitrary nature of the concept(s) to which it refers. However it is useful to have a label, and no short label could correctly describe this disparate group of entities. It is

[5] See 90.9 (Body corporate).

[6] Corporation sole is a very specialist topic, of mainly ecclesiastical interest.

[7] See 90.8 (Definition of "company").

[8] See App 66.3 (Mutual fund/CIS/OIEC).

[9] See 98.2.4 ("Connected person").

also convenient to adopt a consistent usage. In order to keep in mind the artificiality of the expression I refer to "non-natural persons" using scare quotation marks.

The following do not count as "non-natural persons" and so are not within the scope of ATED or ATED-SDLT:

Trustees
Personal representatives
Clubs and unincorporated associations[10]

98.2.6 *Enveloping/De-enveloping*

Budget 2012 referred to acquisition of a residence by companies as "**enveloping**". At the time, I half balked at that neologism: it is a simplistic reification which hinders clarity of thought. In 2013 it was put into the name of the tax, ATED, and since then we have become familiar with it. It is now perhaps too pointed to put scare quotation marks around the word but its arbitrary nature should be kept in mind.

Winding up the company is called **"de-enveloping"**. I did not originally favour this neologism, particularly when we have the established term "disincorporation" (or indeed liquidation); but language evolves and now it has become familiar it seems an acceptable shorthand.

98.3 "Chargeable interest"

For this term see App 2.21 (Interest in land/chargeable interest).

Section 107(2) FA 2013 provides:

> Where two or more persons are jointly entitled to a chargeable interest the chargeable interest is not regarded, for the purposes of this Part [Part 3 FA 2013, ATED], as consisting of separate interests corresponding to the shares (if any) that those persons have by virtue of their joint entitlement.

98.4 Annual tax on enveloped dwellings

Section 94(1) FA 2013 provides the charge to ATED:

> A tax (called "annual tax on enveloped dwellings") is to be charged in accordance with this Part.

A note on terminology: Budget 2012 proposed the term"Annual Residential Property Tax". That changed to ATED in 2013. No reason

[10] See 98.2.2 ("Company" for SDLT/ATED).

was given for the change, but "ATED" is more focussed, and was probably thought to sound less threatening to taxpayers worried about wider reaching residential property taxation. Names are important in politics; contrast community charge/poll tax, and bedroom tax/ under-occupancy penalty, in the context of housing benefit. But the extension of CGT to non-residents in 2019 shows that taxpayers would have been right to be concerned.

Section 94(2) FA 2013 provides the charge to ATED:

> Tax is charged in respect of a chargeable interest[11] if on one or more days in a chargeable period–
>
> (a) the interest is a single-dwelling interest and has a taxable value of more than £500,000, and
>
> (b) a company, partnership or collective investment scheme meets the ownership condition with respect to the interest.

SDLT is a tax on acquisition of a chargeable interest, so it is charged once, on acquisition. ATED is a tax on ownership, and is charged annually.

98.5 Corporate ownership condition

Section 94(2)(b) FA 2013 provides that ATED is charged if:

> a company, partnership or collective investment scheme meets the ownership condition with respect to the interest.

There has to be a company, partnership or CIS, ie a "non-natural" person. ATED-SDLT is the same.[12]

Section 94 FA 2013 provides:

> (4) A company meets the ownership condition with respect to a single-dwelling interest on any day on which the company is entitled to the interest (otherwise than as a member of a partnership or for the purposes of a collective investment scheme).
>
> (5) A partnership meets the ownership condition with respect to a single-dwelling interest on any day on which a member of the partnership that is a company is entitled to the interest (as a member of the partnership).
>
> (6) A collective investment scheme meets the ownership condition with respect to a single-dwelling interest on any day on which the interest is held for the purposes of the scheme.

[11] See 98.3 ("Chargeable interest").

[12] See 98.27 (Co purchaser (non-natural person))

I refer to this as the "**ATED corporate ownership condition**". It is the ATED equivalent of ATED-SDLT corporate purchaser condition.

98.5.1 *"Entitled"*

Section 95(1) FA 2013 provides:

> In this Part [Part 3 FA 2013, ATED] "entitled" means beneficially entitled—
> (a) whether solely or jointly with another person, and
> (b) whether as a member of a partnership or otherwise.
> This is subject to subsection (2).

Section 95(2) FA 2013 provides 3 exceptions:

> References in this Part to entitlement to a single-dwelling interest (or any other chargeable interest) do not include—
> (a) entitlement in the capacity of a trustee[13] or personal representative, or
> (b) entitlement as a beneficiary under a settlement[14].
> (3) Subsection (1)(b) does not apply where the contrary is specified.

A corporate trustee does not meet the ATED corporate ownership condition as it is not "beneficially" entitled to the interest.

98.5.2 *Co in liquidation not beneficial owner*

The CT Manual provides:

> **CTM36125 company winding up etc: beneficial ownership of shares** [Jun 2016]
> When winding-up begins, a company loses beneficial interest in and ownership of its assets, although retaining legal title to and possession of them. Assets include shares owned in other companies (see *Ayerst v C and K (Construction) Ltd* (1974) 50 TC 651). The effect is that, where the provisions of the Taxes Acts depend on such shareholdings, they can no longer be taken into account when the company owning the shares commences winding-up.

Does the charge to ATED cease when winding up commences?
Further consideration is needed if the company is governed by foreign law.

[13] The reference to trustee is otiose, since a trustee is not beneficially entitled.

[14] See 87.3 (Settlement: Standard IT/CGT definition).

98.5.3 *Joint ownership*

Section 94(7) FA 2013 provides:

> If a company is jointly entitled[15] to a chargeable interest (as a member of a partnership or otherwise), then regardless of whether the company is entitled as a joint tenant or tenant in common (or, in Scotland, as a joint owner or owner in common) the ownership condition is regarded as met in relation to the whole chargeable interest.

This is an unfair rule, but the provisions are intended to be penal. The same rule applies for ATED-SDLT.[16]

98.6 Chargeable person

Section 96(1) FA 2013 provides:

> The chargeable person is liable to pay tax charged under this Part [Part 3 FA 2013, ATED].

The definition of chargeable person is broadly what one would expect.

98.6.1 *Chargeable person: Company*

Section 96(2) FA 2013 provides:

> "The chargeable person" means–
> (a) in relation to tax charged by virtue of section 94(4), the company;

98.6.2 *Chargeable person: Partnership*

Section 96(2) FA 2013 provides:

> "The chargeable person" means ...
> (b) in relation to tax charged by virtue of section 94(5), the responsible partners.[17]

[15] Section 174 FA 2013 provides a commonsense definition:
"jointly entitled" means–
(a) in England and Wales, beneficially entitled as joint tenants or tenants in common,
(b) in Scotland, entitled as joint owners or owners in common,
(c) in Northern Ireland, beneficially entitled as joint tenants, tenants in common or coparceners.

[16] See 98.27.1 (Joint purchasers).

[17] Section 95(5) FA 2013 provides the definition: "The reference in this section to "the responsible partners" are to all the persons who are members of the partnership

Section 96(4) FA 2013 provides:

> The liability of the responsible partners to pay tax charged on them under this Part [Part 3 FA 2013, ATED] is joint and several.

98.6.3 *Joint owners*

Section 97 FA 2013 provides:

> (1) Subsection (2) applies if
> (a) a company is within the charge for a chargeable period with respect to a single-dwelling interest by virtue of section 96(2)(a) and
> (b) one or more other persons are jointly entitled to the interest on the first day in that period on which the company is within the charge with respect to it.
> (2) The company and the other person or persons are jointly and severally liable for the tax charged for that period with respect to the interest (whether or not those other persons are also within the charge with respect to the interest on the day in question).

Presumably a right of reimbursement is implied.

98.6.4 *Chargeable person: CIS owner*

Section 96(3) FA 2013 provides:

> In relation to tax charged by virtue of section 94(6) "the chargeable person" means–
> (a) if the collective investment scheme is a unit trust scheme, the trustee of the scheme;
> (b) if the collective investment scheme is an open-ended investment company, the body corporate referred to in section 236(2) of the Financial Services and Markets Act 2000;
> (c) in relation to an EEA UCITS which is not an open-ended investment company or unit trust scheme, the management company for that UCITS;
> (d) in any other case, the person who has day-to-day control over the management of the property subject to the scheme.

98.6.5 *More than 1 chargeable person*

There may be more than one chargeable person where:

concerned on the first day in the chargeable period on which the partnership meets the ownership condition with respect to the single-dwelling interest."

(1) property is owned by a partnership
(2) property is owned jointly

Section 104 FA 2013 prevents a double charge:

> Tax in respect of a given single-dwelling interest is charged only once for any chargeable day even if more than one person is "the chargeable person" with respect to the tax charged

98.7 Rates of ATED

Section 99 FA 2013 provides:

> (1) The amount of tax charged for a chargeable period with respect to a single-dwelling interest is stated in subsection (2) or (3).
> (2) If the chargeable person is within the charge with respect to the single-dwelling interest on the first day of the chargeable period, the amount of tax charged is equal to the annual chargeable amount.

This is straightforward unless there is a change of ownership during the chargeable period.

98.7.1 *"Annual chargeable amount"*

For the year to 31/3/24, s.99(4) FA 2013 provides:

The annual chargeable amount for a single-dwelling interest and a chargeable period is determined in accordance with the following table, by reference to the taxable value of the interest on the relevant day.

Annual chargeable amount	*Taxable value of the interest on the relevant day*	
	More than	*but not more than*
£4,500	£500,000	£1 million
£9,000	£1 million	£2 million
£30,550	£2 million	£5 million
£71,500	£5 million	£10 million
£143,550	£10 million	£20 million
£287,500	£20 million	

Rather than charging a straightforward percentage of market value, ATED uses a banding system. The consequence is that:

(1) The lower value properties in each range pay the highest rate of tax (computed as a proportion of property value).
(2) Striking results as the value tips over to the next band:
   (a) Residential property worth £500k will not attract ATED, but if it is worth 1p more then ATED of £4.5k p/a is payable.
   (b) Residential property worth £2m will pay ATED of £9,000 p/a, but

if it is worth 1p more the rate will be £30k; etc.

This may be pejoratively described as a "cliff-edge" system, but it does have the merit of avoiding the necessity for more exact valuations.[18] In the early days of ATED, I thought banding was the better solution, despite the anomalies, but the subsequent increases in ATED rates have increased the unfairness. But there it is.

The unfairness at the margins might in theory be mitigated by planning: perhaps renovate the kitchen leaving work outstanding on the valuation date; the ATED saving may be more than fund the renovation. But valuation is not an exact science.

98.7.2 *Indexation of ATED rates*

Section 101 FA 2013 provides for indexation of the rates:

> (1) If the consumer prices index for September in 2013 or any later year ("the later year") is higher than it was for the previous September, section 99(4) applies in relation to chargeable periods beginning on or after 1 April in the year after the later year with the following amendments.
> (2) For each of the annual chargeable amounts stated in the table in section 99(4) (as it applies in relation to chargeable periods beginning in the previous 12 months) there is substituted the indexed amount.
> (3) "The indexed amount" is found by–
> (a) increasing the previous amount by the same percentage increase as the percentage increase in the consumer prices index, and
> (b) rounding down the result to the nearest multiple of £50.
> (4) In this section "consumer prices index" means the all items consumer prices index published by the Statistics Board.
> (5) The Treasury must, before 1 April 2014 and before each subsequent 1 April, make an order stating the amounts that by virtue of this section are to be the annual chargeable amounts for chargeable periods beginning on or after that date.

Indexation is by reference to CPI, not RPI.[19] But the bands (as opposed

[18] Unlike SDLT, where valuations are not usually needed. So for SDLT, the banding system (abolished for residential property but still in force for non-residential property) has no practical advantage to set against the unfairness.

[19] CPI and RPI are similar. The precise weight attached to individual items differs and the RPI includes items representing owner-occupier housing costs, such as mortgage interest and depreciation, which are excluded from the CPI. See

to the rates) are not index-linked, so over time properties will gradually come to fall within a higher band.

98.8 Change of ownership

It is necessary to consider the position of the previous owner and the new owner (for convenience here called vendor and purchaser, though the rules do not require a sale).

98.8.1 *Position of purchaser*

The rule is commonsense expressed in a complex way.

The starting point is s.99(3) FA 2013. One needs to read (3) with (2) to follow the sense:

> (2) If the chargeable person is within the charge with respect to the single-dwelling interest on the first day of the chargeable period, the amount of tax charged is equal to the annual chargeable amount.
> (3) Otherwise, the amount of tax charged is equal to the relevant fraction of the annual chargeable amount.

98.8.2 *"Relevant day"*

The definition of relevant fraction uses the term relevant day.

Section 99(5) FA 2013 provides:

> The "relevant day" is ...
> (b) for the purposes of subsection (3), the first day in the chargeable period on which the chargeable person is within the charge with respect to the interest.

98.8.3 *"Relevant fraction"*

Section 99(6) FA 2013 provides:

> The relevant fraction is (N ÷ Y) where–
> "N" is the number of days from (and including) the relevant day to the end of the chargeable period;
> "Y" is the number of days in the chargeable period.

http://www.ons.gov.uk/ons/rel/cpi/cpi-rpi-basket/2012/index.html
Parliament decided about 2012 to use the CPI instead of the RPI, CPI is said to be a more appropriate measure of price levels, a more accurate reflection of consumer shopping patterns, and more consistent with international indices. It is the basis of the Bank of England's inflation target.

98.8.4 *Relief for vendor*

The vendor is in the first instance charged for the entire chargeable period, even if there is a disposal during the period.

Section 106 FA 2013 provides the relief:

> (1) Where
>
> [a] tax is charged for a chargeable period with respect to a single-dwelling interest and
>
> [b] the adjusted chargeable amount is greater than the initial charged amount,
>
> the amount of tax charged is taken to be increased to the adjusted chargeable amount...
>
> (3) Subsection (4) applies where–
>
> (a) tax is charged for a chargeable period with respect to a single-dwelling interest,
>
> (b) the adjusted chargeable amount is less than the initial charged amount, and
>
> (c) a claim for relief is made under this subsection.
>
> (4) The amount of tax charged for the period with respect to the interest is taken to be reduced (at the end of the chargeable period) to the adjusted chargeable amount.
>
> (5) Relief under subsection (3) must be claimed–
>
> (a) in an ATED return, or
>
> (b) by amending an ATED return.
>
> (6) The claim must be delivered by the end of the chargeable period following the one to which the claim relates.
>
> (7) Relief under subsection (3) may be given by repayment of tax or otherwise.

98.8.5 *"Initial charged amount"*

Section 106(2) FA 2013 provides:

> In this section "the initial charged amount" means the amount of tax charged under section 99 for the period in respect of the interest.

98.8.6 *Adjusted chargeable amount*

Section 105 FA 2013 provides:

> (1) In relation to a person on whom tax is charged for a chargeable period with respect to a single-dwelling interest, the "adjusted chargeable amount" is the total of the daily amounts for all the days in the period on which the chargeable person is within the charge with

> respect to the interest.
>
> (2) The daily amount for any such day ("the actual day") is–
>
> (1 ÷ Y) × A

That could be written more simply as (A ÷ Y)

> where–
>
> "Y" is the number of days in the chargeable period;
>
> "A" is the annual chargeable amount for the single-dwelling interest, determined (under section 99(4)) on the basis that the actual day is the relevant day.

98.9 Taxable value

Section 102(1) FA 2013 provides:

> The taxable value of a single-dwelling interest on any day ("the relevant day") is equal to its market value at the end of the latest day that–
>
> (a) falls on or before that day, and
>
> (b) is a valuation date in the case of that interest.

Valuation is on the "valuation date".

98.9.1 *Ascertaining market value*

CGT rules apply for determining market value. Section 98(8) FA 2013 provides:

> For the purposes of this Part [Part 3 FA 2013, ATED] "market value" is to be determined as for the purposes of the TCGA 1992 (see, particularly, section 272 of that Act).

One is valuing the interest held by the chargeable person, not the land as such. The Residential Property Consultation Document provides:

> 2.32 Where there is a freehold interest and one or more subordinate leasehold interests in the same dwelling, and each is owned by unconnected persons within the charge, each will need to value their distinct interest and each may be liable to the annual charge based on those valuations. So, for example, when a property is purchased on a lease but the freehold is owned by a separate company, then both the freehold and the leasehold will be valued and the annual charge applied separately to the freehold (if valued over £2 million) and the leasehold (if valued over £2 million if also owned by a non-natural person).

There is no deduction for a mortgage, as CGT principles apply: see s.26(3) TCGA:

> An asset shall be treated as having been acquired free of any interest or right by way of security subsisting at the time of any acquisition of it, and as being disposed of free of any such interest or right subsisting at the time of the disposal...

It is considered that this rule is implied by applying CGT valuation principles.

The Residential Property Consultation Document provides:

> 2.44 ... 'Market value' will be defined in similar terms to the definitions used for capital gains tax, as described in the Royal Institution of Chartered Surveyors Valuation Standards UKGN3 and the VOA Guidance Manuals: *http://www.voa.gov.uk/*

98.9.2 *"Valuation date"*

Section 102 FA 2013 provides:

> (2) Each of the following is a valuation date in the case of any single-dwelling interest–
> (a) 1 April 2012;
> (b) each 1 April falling 5 years, or a multiple of 5 years, after 1 April 2012.
> (2A) But a day that is a valuation date only because of subsection (2)(b) (a "5-yearly valuation date") is to be treated as if it were not a valuation date for the purpose of determining the taxable value of a single-dwelling interest on any day in the chargeable period beginning with that 5-yearly valuation date.

In short, we revalue every 5 years, so 1 April 2022 is the valuation date for chargeable periods from 1 April 2023.

98.9.3 *Revaluation on disposal*

Section 102 FA 2013 provides:

> (3) The following are also valuation dates in the case of any single-dwelling interest to which a company is entitled on the relevant day (otherwise than as a member of a partnership)–
> (a) the effective date of any substantial acquisition by the company of a chargeable interest in or over the dwelling concerned;
> (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

Section 102 FA 2013 provides equivalent rules for a corporate partnership and a CIS:

> (4) The following are also valuation dates in the case of any single-dwelling interest to which a company is entitled on the relevant day as a member of a partnership–
>
> (a) the effective date of any substantial acquisition as a result of which a chargeable interest in or over the dwelling concerned became an asset of the partnership,
>
> (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.
>
> (5) The following are also valuation dates in the case of any single-dwelling interest that is on the relevant day held for the purposes of a collective investment scheme–
>
> (a) the effective date of any substantial acquisition, made for the purposes of the scheme, of a chargeable interest in or over the dwelling concerned;
>
> (b) the effective date of any substantial disposal of part (but not the whole) of the single-dwelling interest.

98.9.4 *"Disposal" and "acquisition"*

Section 102 FA 2013 provides:

> (6) In this section references to a disposal of part of a single-dwelling interest include the grant of a chargeable interest out of the single-dwelling interest.
>
> (7) The grant of an option does not count as the grant of a chargeable interest for the purposes of subsection (6).

98.10 Valuation for ATED

Valuation is needed to identify the applicable ATED band.

98.10.1 *Valuation practice*

The Residential Property Consultation Document provides:

> 2.37 Property valuations for the annual charge will be self-assessed by the persons liable to the charge and submitted to HMRC as part of their annual charge tax return. HMRC will have powers to enquire into returns and also to make assessments so that non-compliance can be effectively challenged.

98.10.2 *Is expert valuation needed*

The Residential Property Consultation Document provides:

> 2.39 HMRC guidance will set out that a valuation provided to a

> taxpayer by a suitably qualified valuer of real estate would normally protect the taxpayer from possible penalties should it be subsequently established that their property has been significantly undervalued. A self valuation would bear a higher risk of not providing such protection.

That depends on the facts and will not be true in all cases.

> 2.40 Non-natural persons who believe they own a residential dwelling below, but in the region of, [the ATED threshold] may be liable to penalties if they fail to take proper care to establish a correct valuation on the appropriate date, and the property interest is in fact worth more than [the threshold]....
> 2.42 The valuation should provide a point valuation (i.e. a specific price)...

There is no need for a point valuation, but it would help HMRC identify borderline cases, and it is required for an HMRC pre-return banding check.

> 2.43 Valuations submitted to HMRC will be subject to checking by the Valuation Office Agency (VOA).

HMRC offer inconsistent advice on the issue of whether an independent valuation is needed:

> 3.49 HMRC will not routinely expect taxpayers to commission a professional valuation of their property, which may be expensive. It will seek to use information it already possesses or can readily access to check a customer's declaration.
> 3.50 Just like for any other tax, the taxpayer must make an honest self appraisal of its liability, or lack of liability, and provide a reasonable valuation of the dwelling.
> 3.51 HMRC is not specifying any particular requirements for this: it is up to the taxpayer to decide what is appropriate in particular circumstances, taking into account when the property was bought and what comparisons can be made from local sales and purchases.

98.10.3 *HMRC valuation service*

HMRC say:

> **Pre-return banding checks**
> In certain circumstances, you can ask HMRC to carry out a check on your property details and valuation to see if you need to pay ATED. This is called having a 'pre-return banding check' (PRBC).

When to ask for a PRBC

Customers might want to contact HMRC where a property is valued at an amount close to one of the band thresholds. This is so they can agree which ATED band the property falls into, or whether it falls outside the tax as it is deemed to be under the ... threshold. This is called having a PRBC and is available to customers who meet the following:

- you are not due a relief that will reduce the ATED charge to nil
- the value you have placed on the property falls within 10 per cent of a banding threshold

If your property is valued between the thresholds shown below you may be able to apply for a PRBC using the form that will be available on the HMRC website from 1 June 2013.

When they receive your PRBC application form, HMRC will send you an acknowledgement and provide you with a reference number. They aim to provide a response to your application within 30 working days of receiving it.

HMRC will only confirm that they agree to the banding you propose, and not the specific valuation of the property. You can't use this confirmation for any other taxation purposes.

HMRC will either:

- agree that the band that you have chosen is appropriate based on the information you have provided
- ask for further information from you to help them make a decision about whether you have chosen the correct band
- tell you that they don't agree with the valuation band you have chosen

If you decide you need a PRBC, it's important that you apply at least 30 working days before the date on which you need to send your return - the earlier the better. This means HMRC can tell you their decision - particularly if they need more information before giving that decision - in time for you to use it when sending your return.

In some cases, the inside of the building might need to be inspected as part of the check. HMRC will normally be able to accept valuations prepared by a professional property valuer but they reserve the right to:

- enquire into any subsequent ATED returns
- challenge valuations included in those returns where they consider there is a risk that the return or valuation is wrong

What to do if you don't receive your PRBC in time

If you didn't leave enough time for HMRC to give you a PRBC decision, or they have asked you for more information, you might not get their decision in time for the date you need to send your ATED return. If you think you might need to pay ATED then you should send the return along with the appropriate payment of tax. That way you can

> avoid accruing interest or becoming liable for a penalty for sending the return late.
>
> You should base your ATED return on the banding you think is most appropriate. HMRC may decide to open an enquiry into your return to enable them to continue considering the appropriate banding for your property.
>
> You must include your PRBC reference number on any return or correspondence that you sent to HMRC.
>
> Remember that if you don't complete and send HMRC a return or payment, or you send it late or make a mistake on it, you may have to pay a penalty and interest.
>
> If, after you've sent your return and payment, HMRC tells you that they don't agree with your valuation and you have underpaid, you should complete an amended return and send it, with the additional payment, as soon as you can.
>
> Interest will be payable on any ATED paid late, but HMRC won't charge a penalty if you were waiting for a PRBC decision when your return was due.
>
> If HMRC tells you that they don't agree with your valuation and you've overpaid then you need to send an amended return with a claim for repayment. HMRC will repay you any ATED you've overpaid, and you might be able to claim interest.
>
> **If you don't agree with HMRC's decision**
>
> You should send your return based on your best estimate of the value of your property. HMRC may decide to open an enquiry into your return to enable them to look in more detail at the appropriate banding for your property.
>
> Where you believe that your property is worth £2 million[now £500k] or less and that a return is not due, HMRC may issue a 'determination' to you based on the banding that they believe to be correct. A 'determination' is where HMRC makes a 'best estimate' of the ATED that you owe based on their valuation of your property and issues a demand for payment. You can appeal against this determination if you don't agree with it.
>
> You should include your PRBC reference number on any return or correspondence that you send to HMRC.[20]

The disadvantage of a PRBC may be a greater likelihood of a valuation dispute.

[20] *https://www.gov.uk/annual-tax-on-enveloped-dwellings-pre-return-banding-checks*

98.11 "Chargeable period"

This term matters because ATED is charged by reference to chargeable periods.

Section 94 FA 2013 provides:

> (3) The tax is charged for the chargeable period concerned...
> (8) The chargeable periods are–
> (a) the period beginning with 1 April 2013 and ending with 31 March 2014, and
> (b) each subsequent period of 12 months beginning with 1 April.

98.12 "Single-dwelling interest"

This term matters as ATED only applies if the chargeable interest is a single-dwelling interest.

98.12.1 *The general rule*

Section 108 FA 2013 provides the general rule:

> (1) References in this Part [Part 3 FA 2013, ATED] to a "single-dwelling interest" are to be read in accordance with this section.
> (2) A chargeable interest that is exclusively in or over land consisting (on any day) of a single dwelling is a single-dwelling interest (on that day).

Section 108 FA 2013 defines "in":

> (5) A single dwelling interest is referred to as a single-dwelling interest "in" the dwelling concerned.
> (6) A single-dwelling interest in one dwelling is distinct from any single-dwelling interest in another dwelling, even if the dwellings stand successively on the same land.

Is this looking at the position if a building is knocked down and rebuilt?

98.12.2 *Interest in multiple dwellings*

Section 108(3) FA 2013 deals with a single interest in multiple dwellings:

> Where a person is entitled to a chargeable interest that is exclusively in or over land consisting (on any day) of two or more single dwellings–
> (a) provisions referring to a "single-dwelling interest" operate as if the person had (on that day) a separate chargeable interest in or over each dwelling, and

> (b) the chargeable interest in or over each dwelling is therefore a single-dwelling interest.

This would arise in relation to flat management companies.[21]

98.12.3 *Interest in dwelling+ other land*

Section 108(4) FA 2013 deals with a single interest in a dwelling and other land (eg a farm or estate including one or more dwellings):

> Where a person is entitled to a chargeable interest in or over land that on any day consists of one or more single dwellings and non-residential[22] land–
>
> (a) provisions referring to a "single-dwelling interest" operate as if the person had (on that day) a separate chargeable interest in or over each dwelling and a further separate chargeable interest in or over the non-residential land, and
>
> (b) the chargeable interest in or over each dwelling is therefore a single-dwelling interest.

98.12.4 *"Dwelling"*

See App 2.22 (Dwelling/residential property).

Section 108(7) FA 2013 provides:

> In this section ...
>
> (b) references to a dwelling include a part of a dwelling.

Unlike ATED-SDLT, ATED provides for the amalgamation of property interests in some circumstances so that a 'dwelling' for the purposes of ATED may encompass a number of single dwellings in a building or which stand in the same grounds, if there is private access between them.

98.13 Different interests in 1 dwelling

Section 109 FA 2013 provides:

> (1) Subsection (2) applies if on one or more days in a chargeable period–
>
> (a) a company is entitled to two or more single-dwelling interests in the same dwelling, or

[21] See 98.14.4 (Flat management company).

[22] Section 108(7) FA 2013 provides a commonsense definition of non-residential land:
"In this section–
(a) "non-residential land" means land that is not a dwelling or part of a dwelling."

> (b) two or more single-dwelling interests in the same dwelling are held for the purposes of the same collective investment scheme.
>
> (2) This Part [Part 3 FA 2013, ATED] has effect with respect to that chargeable period as if those separate interests constituted just one single-dwelling interest, the taxable value of which on any day is the sum of the taxable values of the separate interests.

Why is this needed?

Section 109(3) FA 2013 deals with valuation of multiple interests:

> In calculating the taxable values of the separate interests for the purposes of subsection (2), the market value of each interest is determined, under the provisions of TCGA 1992 applied by section 98(8), on the assumption that the other interest or interests are placed on the open market with that interest (on the valuation date appropriate to that interest).

98.14 Interests of connected person

The rule that the taxable value is the value of the interest held by the chargeable person would give rise for scope for tax planning by splitting interests and arranging them to be held by different persons.

Section 110(1) FA 2013 deals with this:

> (1) If on any day ("the relevant day")
>
> [i] a company ("C") is entitled to a single-dwelling interest in a dwelling and
>
> [ii] another person ("P") who is connected[23] with C is entitled to a different single-dwelling interest in the same dwelling,
>
> this Part [Part 3 FA 2013, ATED] has effect–
>
> (a) in relation to C as if C were on that day entitled to P's single-dwelling interest as well as C's single-dwelling interest, and
>
> (b) (if P is a company) in relation to P as if P were on that day entitled to C's single-dwelling interest as well as P's single-dwelling interest.

I refer to this as the "**aggregation rule**".

See 98.6.3 (Joint owners).

98.14.1 *Exemptions for individuals*

There are exceptions to the aggregation rule where P is an individual.

[23] See 98.2.4 ("Connected person").

Prior to 2015, the position was simple. Section 110(2) FA provided:

> *...Where P is an individual, C is not treated on the day in question as entitled to P's single-dwelling interest unless on that day C is entitled to a single-dwelling interest in the dwelling that is a freehold or leasehold interest with a taxable value of more than £500,000.*

There are now two narrower exceptions.

Section 110(2) FA 2013 provides:

> This subsection provides for an exception to subsection (1).
> Where P is an individual, C is not treated as entitled to P's single-dwelling interest on the relevant day unless on that day C is entitled to a single-dwelling interest in the dwelling that is a freehold or leasehold interest[24] with a taxable value of more than £250,000.

This disapplies the aggregation rule where C's interest is worth up to £250k.

Section 110 FA 2013 provides:

> (2A) Subsection (2B) applies in any case where—
> (a) C would (without subsection (2B)) be treated, as a result of subsection (1) (read with section 109),[25] as entitled to a single-dwelling interest with a taxable value (on the relevant day) of more than £2 million, but
> (b) C would not be so treated if the value specified in subsection (2) were £500,000 (instead of £250,000).
> (2B) Subsection (2) has effect as if the value specified in it were £500,000 (instead of £250,000).

This disapplies the aggregation rule where C's interest is worth up to £500k, but only if the aggregate of P and C's interests exceeds £2m. It is hard to make sense of that. EN FB 2015 says something different. First it correct summarises the pre-2015 rule:

> 4. The ATED legislation contains a rule which provides that where two or more chargeable interests are held in the same dwelling by connected persons, then those interests must be aggregated and ATED paid on the aggregate amount, where that amount falls within the ATED entry threshold. However, the legislation provides for an exception to this rule

[24] Section 110(7) FA 2013 provides the appropriate definitions of freehold and leasehold interests for land in Scotland.

[25] See 98.13 (Different interests in 1 dwelling).

> where the connected person is an individual. In this case the company's interest must be more than £500,000 for the aggregation rule to apply.

Then it explains the intention of subsections (2A) and (2B):

> 5. Following the lowering of the ATED entry threshold from properties valued at more than £2 million to properties valued at more than £500,000, an additional limit of £250,000 is introduced for interests valued up to £2 million. The changes have effect for chargeable periods beginning on or after 1 April 2015.

Perhaps that is how HMRC will apply the legislation in practice.

98.14.2 *Collective investment scheme*

Section 110 FA 2013 goes on to provide an aggregation rule for a CIS. This is not discussed here.

98.14.3 *Interaction with reliefs*

Section 111(1)(2) FA 2013 (in short) disapplies the aggregation rule where an interest is held by charities, public bodies, or qualifies for IHT conditional exemption. These specialist exemptions are not discussed here.

Section 111 FA 2013 continues:

> (3) Subsection (4) applies where the separate interests (the "relevant interests") that under section 110 (or that section and section 109) are treated as constituting, on a day, just one single-dwelling interest ("the combined interest") include—
> (a) a freehold or leasehold interest,[26] and
> (b) a leasehold interest ("the inferior interest") granted out of that interest.
> (4) If the inferior interest is the most inferior relevant interest, the combined interest, and the dwelling itself (where relevant), are regarded for the purposes of the relevant relieving provisions as being exploited, on the day mentioned in subsection (3), in the way the inferior interest is exploited on that day.
> (5) If the inferior interest is an interest in part only ("the sub-let part")

[26] Subsection (8) provides: "In this section the reference to a leasehold interest includes the interest of a lessee under an agreement for a lease." Subsection (9) provides the appropriate definitions of freehold/leasehold/agreement for a lease, for land in Scotland.

> of the land that is the subject-matter of the combined interest, subsection (4) has effect in relation to the combined interest only so far as that interest relates to the sublet part.
> (6) In this section "the relevant relieving provisions" means sections 132 to 150.
> (7) The inferior interest counts as "the most inferior relevant interest" if no relevant interest (see subsection (3)) is a leasehold interest granted out of it.

In particular, in order to decide whether the property rental business exemption applies,[27] one must look at whether the inferior interest is being exploited in a property business (not the company's interest).

98.14.4 *Flat management company*

A common arrangement is that:

(1) A flat management company owns the freehold (or superior lease) of a block of flats.

(2) The tenants (who hold long leases of the flats) own the company and are directors.

The company would be within ATED (even without the aggregation rule) if its interest was above the ATED minimum threshold. But that would not arise for a normal flat management company. One looks at the value for each individual dwelling, not the total value of the interest.[28]

The company would be within ATED if:

(1) the aggregation rule applies to aggregate the value of the company's interest and that of the tenants or some of them and

(2) the aggregate value exceeds the ATED minimum threshold.

The issue is whether the tenants are connected with the company. This subdivides.

A tenant is connected with the company if they personally have control over the company owner but in practice that would not be the case for a flat management company.

A tenant is connected with the company if the tenant and persons connected with them has control of the company. That could happen (eg in a block of 3 flats of which 2 are held by relatives) but in practice it would be rare, for a flat management company.

[27] See 98.18.3 (Relief for property business).

[28] See 98.12.2 (Interest in multiple dwellings).

Tenants are connected with the company if they act together to exercise control of the company but HMRC say this is not normally the case.[29]

If the company's interest exceeded the ATED band, the last question would be whether the property rental business exemption would apply. This depends on use by the tenant, not use by the company, and in practice exemption would not generally apply.[30]

As CIOT note, whatever may be the purpose of ATED, it is not to catch flat management companies. If, exceptionally, cases are caught, I expect the point will be overlooked or ignored by noncompliant taxpayers, and HMRC may not spot it or turn a blind eye.

98.15 Partnerships

98.15.1 *ATED treatment of partnership*

Section 167(2) FA 2013 provides:

> This Part [Part 3 FA 2013, ATED] has effect as follows in relation to a partnership (for instance, a limited liability partnership formed as mentioned in subsection (1)(c)) that is itself capable of being entitled to, or of acquiring or disposing of, a chargeable interest–

An English partnership is not capable of being beneficially entitled to any interest. But this would apply to an LLP (which the drafter had in mind with the words in brackets) and a Scots partnership.

Section 167(2) continues:

> (a) transactions entered into on behalf of the partnership are treated as entered into by or on behalf of the partners;
> (b) where the partnership is entitled to a single-dwelling interest, this Part has effect as if the partners were jointly entitled to the interest (and the partnership had no entitlement to it).

This makes partnerships transparent for ATED. It is the rough equivalent of the LLP provisions governing IT, CGT and IHT.[31]

> (3) For the purposes of this Part a partnership is treated as the same partnership despite a change in membership if any person who was a member before the change remains a member after the change.
> (4) For the purposes of this Part—

[29] See 104.15.8 (Acting together to control).

[30] See 98.14.3 (Interaction with reliefs).

[31] See 85.21 (Limited liability partnership); 102.35.3 (Situs of LLP).

> (a) a collective investment scheme is not regarded as a partnership, and
>
> (b) accordingly, a member of a partnership by or on whose behalf a single-dwelling interest is held for the purposes of a collective investment scheme is not regarded as entitled to the interest as a member of the partnership.

98.15.2 *Administration*

Section 167 FA 2013 provides:

> (5) Anything required or authorised by this Part [Part 3 FA 2013, ATED] to be done by or in relation to the responsible partners for a partnership may instead be done by or in relation to any representative partner or partners.
> (6) A representative partner means a partner nominated by a majority of the partners to act as the representative of the partnership for the purposes of this Part of this Act.
> (7) Any such nomination, or the revocation of such a nomination, has effect only after notice of the nomination, or revocation, has been given to an officer of Revenue and Customs.

98.16 Tax consequences of paying ATED

Where the property is owned by a company which is owned by a settlement, the payment of tax by a beneficiary could be a transfer of value for IHT but the normal expenditure exemption will often apply. Does it make the beneficiary a settlor? Probably not.[32]

Bringing funds into the UK to pay the ATED may be a taxable remittance of the funds.

98.16.1 *ATED deduction for CGT*

CIOT ask:

> 2.12 Where it is not possible to fall within a relief from ATED (for example due to the connection conditions and definition of non-qualifying persons), but nevertheless the property is used for business purposes (for example a property letting business) please can you confirm that the ATED would be deductible for corporation tax (or income tax in the case of a non-resident landlord company) purposes in computing the profits assessable to UK tax.

[32] See 99.29 (Payment of admin expenses).

In principle a deduction should be available.

98.17 ATED reliefs

Section 132 FA 2013 provides:

> (1) Subsection (2) applies where tax is charged, in respect of a single-dwelling interest, for a chargeable period that includes one or more days that are relievable as a result of any of the provisions listed in subsection (3) (or for more than one such period).
> (2) For any such period, the adjusted chargeable amount is to be calculated on the basis that the chargeable person is not within the charge with respect to the interest on any relievable day.

Section 132(3) FA 2013 sets out 12 reliefs:

The provisions are—[33]

Topic	**FA 2013**	**See para**
Property rental business	s.133	98.18
Rental property: preparation for sale	s.134	
Dwellings opened to the public	s.137	
Property developers	s.138	
Property developers: exchange of dwellings	s.139	
Property traders	s.141	
Financial institution acquiring in course of lending	s.143	
Regulated home reversion plans	s.144A	
Occupation by employee/partner of qualifying trade/rental business	s.145	
Caretaker flat owned by management company	s.147A	
Farmhouses	s.148	98.20
Social housing	s.150	

The only reliefs discussed in this work are ATED rental relief and farmhouse relief

98.17.1 *DT relief*

ATED is not a tax similar to IT or CGT, so it will not fall within DTAs in OECD Model form.

98.18 ATED rental relief

It is convenient to start with some definitions:

[33] For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

98.18.1 *"Property rental business"*

Section 133(4) FA 2013 puts (I think) a commonsense definition in convoluted drafting:

> A business is a "property rental business" for the purposes of subsection (3) if it is a property business as defined in Chapter 2 of Part 4 of CTA 2009, but–
>
> (a) the question whether or not a business is a property rental business for the purposes of subsection (3) is determined without reference to whether or not any profits of the business are chargeable to corporation tax (and section 204(2) of CTA 2009 is therefore disregarded), and
>
> (b) for the purposes of this subsection the "rents or other receipts" referred to in section 207(1) of CTA 2009 are taken not to include excluded rents.

The definition incorporates the CTA 2009 definition with amendments.[34]

Para (a) makes sense: s.204(2) CTA 2009 would restrict the term to property business within the scope of corporation tax; that is disapplied, so the ATED definition extends to a property business of a non-resident company, which falls within the scope of income tax.

One disregards "excluded rents". Section 133(6) FA 2013 provides:

> In this Part [Part 3 FA 2013, ATED] "excluded rents" means rents within any of classes 2 to 6 in the table in section 605(2) of CTA 2010.

So we turn to s.605(2) CTA 2010:

> Class 2 Rent in respect of an electric-line wayleave.
> Class 3 Rent in respect of the siting of a pipeline for gas.
> Class 4 Rent in respect of the siting of a pipeline for oil.
> Class 5 Rent in respect of the siting of a mast or similar structure designed for use in a mobile telephone network or other system of electronic communication.
> Class 6 Rent in respect of the siting of a wind turbine.

I would be grateful for any reader who could suggest why this is needed.

98.18.2 *"Qualifying" rental business*

Section 133(3) FA 2013 provides:

[34] For that definition, see 24.2 ("Property business": Terminology).

> In this Part "qualifying property rental business" means a property rental business that is run on a commercial basis and with a view to profit.[35]

98.18.3 *Relief for property business*

Armed with these definitions, we can turn to the relief. Section 133(1) FA 2013 provides:

> A day in a chargeable period is relievable in relation to a single-dwelling interest if on that day the interest–
> (a) is being exploited as a source of rents or other receipts (other than excluded rents) in the course of a qualifying property rental business carried on by a person entitled to the interest, or
> (b) steps are being taken to secure that the interest will, without undue delay, be so exploited in the course of a qualifying property rental business that is being carried on, or is to be carried on, by a person entitled to the interest.

I refer to this as "**ATED rental relief**".

98.18.4 *Property for sale or conversion*

The relief in s.133(1) would not apply if the property is for sale or being converted. Section 134(1) FA 2013 provides a further relief:

> A day ("day X") on which a person ("P") is entitled to a single-dwelling interest is relievable in relation to that interest if–
> (a) on day X the dwelling is unoccupied and any of the first to fourth conditions is met (see below),

I refer to "**rental relief conditions 1-4**"

> (b) day X is preceded by one or more days ("qualifying days") that are relievable under section 133 in relation to the interest and on which P, or a relevant partner,[36] was entitled to the interest, and
> (c) the days (if any) between day X and the last of the qualifying days to precede day X are all relievable under this section.

98.18.5 *Rental relief conditions*

Section 134(1) FA 2013 continues:

[35] See App 5.1 (Commercial basis/view to profit).

[36] Defined in s.134(3) FA 2013: "relevant partner", where P is (on day X) entitled to the interest as a member of a partnership, means a person who was at the time in question carrying on the qualifying rental property business concerned as a member of that partnership.

> *First condition* [property for sale]
> The first condition is that steps are being taken to secure that the interest will be sold without undue delay.
> *Second condition* [demolition]
> The second condition is that–
> (a) steps are being taken to secure that the dwelling will be demolished without undue delay, and
> (b) if it is intended that a new dwelling will be constructed on the site of the existing dwelling, the intention is that it will be used in a relievable way.
> *Third condition* [conversion]
> The third condition is that–
> (a) steps are being taken to secure that the dwelling will be converted into a different dwelling without undue delay, and
> (b) it is intended that the new dwelling will be used in a relievable way.
> *Fourth condition* [conversion]
> The fourth condition is that steps are being taken to secure that the dwelling will be converted into a building other than a dwelling without undue delay.
> (2) A dwelling is "used in a relievable way" for the purposes of subsection (1) if the single-dwelling interest in question is exploited in such a way, or held in such a way and for such purposes, (or, as the case requires, the dwelling itself is exploited or used in such a way) that a day of such exploitation, ownership or use would be relievable under any of sections 133, 137, 145 and 148.

98.18.6 *"Without undue delay"*

Section 133(5) FA 2013 tries to define "undue delay":

> "In subsection (1)(b)
> "without undue delay" means without delay except so far as delay is justified by commercial considerations or cannot be avoided."

Since this definition (if it can be called such) only applies for s.133, it is repeated verbatim in s.134(3).

98.18.7 *Non-qualifying occupier*

Section 133(2) FA 2013 provides:

> A day is not relievable by virtue of subsection (1) or section 134 in the case of a single-dwelling interest if on that day a non-qualifying individual is permitted to occupy the dwelling.

98.18.8 *Disapplication of future relief*

Section 135 FA 2013 provides:

> (1) Subsection (2) applies if on a day in a chargeable period ("the day of non-qualifying occupation")–
>
> (a) a single-dwelling interest to which a person ("the landlord") is entitled is being exploited as mentioned in section 133(1)(a) or steps are being taken to secure that the interest will be so exploited, as mentioned in section 133(1)(b), and
>
> (b) a non-qualifying individual is permitted to occupy the dwelling.
>
> If this condition is satisfied, s.135(2) disapplies rental property relief (in short) for the next 3 years:
>
> (2) No subsequent day in that chargeable period, or in any of the subsequent 3 chargeable periods, that meets the continuity of ownership condition and would (in the absence of this subsection) be relievable by virtue of section 133(1)(b) is treated as relievable by virtue of that provision unless a day of qualifying use falls between that day and the day of non-qualifying occupation.
>
> (3) A day meets the continuity of ownership condition if on that day—
>
> (a) the landlord is entitled to the single-dwelling interest, or
>
> (b) if the landlord carried on or (as the case requires) intended to carry on the property rental business in partnership, another member of the partnership is entitled to the interest.

98.18.9 *Disapplication of past relief*

Section 135(4) FA 2013 provides:

> Subsection (5) applies if a person who is a non-qualifying individual in relation to a single-dwelling interest occupies the dwelling on a day in a chargeable period ("the day of non-qualifying occupation").

If that condition is satisfied, s.135 disapplies past relief for the present and preceding year:

> (5) An earlier day in that or the preceding chargeable period ("the earlier day") is not relievable by virtue of section 133(1)(b) or 134 if a relevant person is entitled to the single-dwelling interest on that day.
>
> (6) In subsection (5) "relevant person" means—
>
> (a) a person who is entitled to the single-dwelling interest on the day of non-qualifying occupation, or
>
> (b) if a person falling within paragraph (a) is or has been a member of a partnership whose members have at any time exploited the single-dwelling interest as a source of rents and receipts in a

> property rental business, any other member of that partnership.
>
> (7) Subsection (5) does not apply in relation to the earlier day if a day that is relievable by virtue of section 133(1)(a) falls between that earlier day and the day of non-qualifying occupation.
>
> (8) For the purposes of this section—
>
> (a) "day of qualifying use", in relation to a single-dwelling interest, means a day that is relievable in the case of the interest by virtue of section 133(1)(a);
>
> (b) occupation of any part of a dwelling is regarded as occupation of the dwelling.

98.19 Non-qualifying individual

98.19.1 *"Non-qualifying individual"*

Section 136 FA 2013 provides about the widest definition that the drafter could devise:

> (1) In sections 133 and 135 "non-qualifying individual", in relation to a single-dwelling interest, means any of the following–
>
> (a) an individual who is entitled to the interest (otherwise than as a member of a partnership),
>
> (b) an individual ("a connected person") who is connected with a person entitled to the interest,
>
> (c) if a person is entitled to the interest as a member of a partnership, an individual who is, or is connected with, a qualifying member of that partnership,
>
> (d) an individual ("a relevant settlor") who is the settlor in relation to a settlement[37] of which a trustee[38] is (in the capacity of trustee) connected with a person who is entitled to the interest,
>
> (e) the spouse or civil partner
>
> [i] of a connected person or
>
> [ii] of a relevant settlor,
>
> (f) [i] a relative[39]
>
> [A] of a connected person or

[37] Defined by reference in s.136(7) FA 2013: In this section ... "settlement" and "settlor" have the same meaning as in Chapter 5 of Part 5 of ITTOIA 2005 (see section 620 of that Act).

[38] Defined by reference in s.136(8): In subsection 1(d) "trustee" is to be read in accordance with section 1123(3) of CTA 2010 ("connected persons": supplementary).

[39] Defined in s.136(7): (7) In this section ... "relative" means brother, sister, ancestor or lineal descendant.

[B] of a relevant settlor,

[ii] or the spouse or civil partner

[A] of a relevant of a connected person or

[B] of a relevant settlor,

Thus an uncle or aunt of T is not a connected person; but they are non-qualifying individuals because they are "relatives" (defined to include brother or sister) of a connected person (the parent of T). But the nephew or niece of T is a qualifying individual, as they are not "relatives" (as defined) of any connected person.

(g) a relative of the spouse or civil partner of a connected person or of a relevant settlor,

(h) the spouse or civil partner of a person falling within paragraph (g), or

(i) an individual who is

[i] a major participant in a relevant collective investment scheme or

[ii] is connected with a major participant in a relevant collective investment scheme.

98.19.2 *Supplemental definitions*

Section 136 FA 2013 provides supplemental definitions:

> (2) In subsection 1(c) "qualifying member", in relation to a partnership, means an member of the partnership who is entitled to a 50% or greater share–
>
> (a) in the income profits of the partnership, or
>
> (b) in the partnership's assets.
>
> (3) In subsection (1)(i) "relevant collective investment scheme", in relation to a single-dwelling interest, means a collective investment scheme that meets the ownership condition with respect to the interest.
>
> (4) A person who participates in a collective investment scheme is a "major participant" in the scheme if the person–
>
> (a) is entitled to a share of at least 50% either of all the profits or income arising from the scheme or of any profits or income arising from the scheme that may be distributed to participants, or
>
> (b) would in the event of the winding up of the scheme be entitled to 50% or more of the assets of the scheme that would then be available for distribution among the participants.
>
> (5) The reference in subsection (4)(a) to profits or income arising from the scheme is to profits or income arising from the acquisition, holding, management or disposal of the property subject to the scheme.

Lastly, s.136(6) tinkers with the usual definition of "connected person":

> For the purpose of subsection (1), section 1122 of CTA 2010 (as applied by section 172)[40] has effect as if subsections (7) and (8) of that section (application of rules about connected persons to partnerships) were omitted.

98.20 Farmhouses

Section 148 FA 2013 provides:

> (1) This section applies where on a day in a chargeable period—
> (a) a dwelling ("the farmhouse") forms part of land occupied for the purposes of a qualifying trade[41] of farming,[42] and
> (b) a person carrying on the trade is entitled to, or connected with a person who is entitled to, a single-dwelling interest in the farmhouse.
>
> (2) That day is relievable in relation to the single-dwelling interest if on that day the farmhouse is occupied—
> (a) by a farm worker who occupies[43] it for the purposes of the trade, or
> (b) by a former long-serving farm worker, or the surviving spouse or civil partner of a former farm worker.

This is different from the IHT agricultural property relief rules.

98.20.1 *"Farm worker"*

Farm worker is defined in s.149 FA 2013:

> (1) An individual is a "farm worker" in relation to the qualifying trade of farming mentioned in section 148(1) at any time when the individual has a substantial involvement in—

[40] See 98.2.4 ("Connected person").

[41] Defined in s.148(3) FA 2013: A trade of farming is a "qualifying trade of farming" only if it is carried on—
(a) on a commercial basis, and
(b) with a view to profit.

[42] Defined in s.148(4) FA 2013: In this section—
"farming" has the same meaning as in the Corporation Tax Acts (see section 1125 of CTA 2010), except that in this section "farming" includes market gardening;
"market gardening" has the same meaning as in the Corporation Tax Acts (see section 1125(5) of CTA 2010).

[43] Defined in s.149(4) FA 2013: "A person occupying part of a dwelling is regarded as occupying the dwelling for the purposes of this section and section 148."

> (a) the day-to-day work of the trade, or
> (b) the direction and control of the conduct of the trade.

98.20.2 *Former farm worker*

Former long-serving farm worker is elaborately defined in s.149 FA 2013:

> (2) Where section 148 applies, an individual occupying the farmhouse on the day mentioned in section 148(1) is a "former long-serving farm worker" if the individual had, before that day, been a farm worker in relation to the qualifying trade of farming for—
> (a) a qualifying period of 3 or more years, or
> (b) qualifying periods together amounting to 3 or more years within a 5 year period.
>
> (3) In subsection (2) "qualifying period" means a period throughout which—
> (a) the individual occupied the farmhouse for the purposes of the trade,
> (b) the land of which the farmhouse forms part was occupied for the purposes of the trade,
> (c) the trade was carried on by—
> (i) a person who is entitled to the single-dwelling interest in the farmhouse on the day mentioned in section 148(1), or
> (ii) a person connected with such a person, and
> (d) a person who is entitled to the single-dwelling interest in the farmhouse on the day mentioned in section 148(1) was entitled to that interest.

98.21 "Chargeable", "within the charge"

Section 170 FA 2013 provides:

> (1) Any day on which the conditions in section 94(2) are met with respect to a single-dwelling interest is a "chargeable day" for that interest;
>
> (2) Where a day is a chargeable day as a result of subjection (1), the chargeable person is "within the charge" with respect to a single-dwelling interest on that day.

98.22 ATED returns

Returns are governed by the Annual Tax on Enveloped Dwellings (Returns) Regulations 2013, which is not considered here.

98.23 SDLT: Introduction

A full discussion of SDLT would require many volumes. A brief outline is needed in order to see ATED-SDLT in its context.

98.23.1 *Charge to SDLT*

Section 42 FA 2003 provides the charge to SDLT:

> (1) A tax (to be known as "stamp duty land tax") shall be charged in accordance with this Part on land transactions.
> (2) The tax is chargeable—
> (a) whether or not there is any instrument effecting the transaction,
> (b) if there is such an instrument, whether or not it is executed in the UK, and
> (c) whether or not any party to the transaction is present, or resident, in the UK.

98.23.2 *"Land transaction"*

Section 43(1) FA 2003 provides:

> In this Part a "land transaction" means any acquisition of a chargeable interest.

98.23.3 *"Chargeable transaction"*

Section 49(1) FA 2003 provides:

> A land transaction is a chargeable transaction if it is not a transaction that is exempt from charge.

98.24 Ordinary SDLT rates

98.24.1 *Residential property*

Section 55 FA 2003 sets out the usual SDLT rates:

> (1) The amount of tax chargeable in respect of a chargeable transaction to which this section applies is determined in accordance with subsections (1B) and (1C).
> (1A) This section applies to any chargeable transaction other than a transaction to which paragraph 3 of Schedule 4A or step 4 of section 74(1A) (higher rate for certain transactions) applies.
> (1B) If the transaction is not one of a number of linked transactions, the amount of tax chargeable is determined as follows—

Step 1
Apply the rates specified in the second column of the appropriate table below to the parts of the relevant consideration specified in the first column of the appropriate table.
The "appropriate table" is—
(a) Table A, if the relevant land consists entirely of residential property, and
(b) Table B, if the relevant land consists of or includes land that is not residential property.

Step 2
Add together the amounts calculated at Step 1 (if there are two or more such amounts).

Table A: Residential

Relevant consideration	*Percentage*
So much as does not exceed £125,000	0%
So much as exceeds £125,000 but does not exceed £250,000	2%
So much as exceeds £250,000 but does not exceed £925,000	5%
So much as exceeds £925,000 but does not exceed £1,500,000	10%
The remainder (if any)	12%

98.24.2 *Non-residential property*

We are not concerned with non-residential property in this chapter, but for completeness, s.55 FA 2003 provides:

Table B: Non-residential or mixed

Relevant consideration	*Percentage*
So much as does not exceed £150,000	0%
So much as exceeds £150,000 but does not exceed £250,000	2%
The remainder (if any)	5%

98.24.3 *"Relevant land/consideration"*

Section 55(3) FA 2003 provides:

> For the purposes of subsection (1B)
> (a) the relevant land is the land an interest in which is the main subject-matter of the transaction, and
> (b) the relevant consideration is the chargeable consideration for the transaction.

98.24.4 *"Chargeable consideration"*

Para 1(1) sch 4 FA 2003 defines "chargeable consideration":

> The chargeable consideration for a transaction is, except as otherwise expressly provided, any consideration in money or money's worth given for the subject-matter of the transaction, directly or indirectly, by the purchaser or a person connected[44] with him.

See App 4.2 (Consideration).

98.25 ATED-SDLT rate

ATED-SDLT overrides the rates set out above. Para 3 sch 4A FA 2003 provides:

> (1) Where this paragraph applies to a chargeable transaction—
> (a) the amount of tax chargeable in respect of the transaction is 15% of the chargeable consideration for the transaction ...
> (2) This paragraph applies to a chargeable transaction if—
> (a) the transaction is a high-value residential transaction, and
> (b) the condition in sub-paragraph (3) is met.

98.26 "High-value" transaction

There is the usual cascade of definitions.

98.26.1 *Appurtenant rights*

First para 1(1) sch 4A FA 2003 provides a commonsense definition:

> In this paragraph "interest in a single dwelling" means so much of the subject-matter of a chargeable transaction as consists of a chargeable interest in or over a single dwelling (together with appurtenant rights).

"Appurtenant rights" are aggregated with the dwelling so:

(1) Their value is taken into account in determining whether market value passes the SDLT threshold.
(2) Appurtenant rights are charged at ATED-SDLT.

Para 9 sch 4A FA 2003 provides a commonsense definition:

> In this Schedule—
> "appurtenant rights", in relation to a chargeable interest that is, or is part of, the subject-matter of a transaction, means any rights or interests appurtenant or pertaining to the chargeable interest that are acquired

[44] Defined para 1(2) sch 4 FA 2003: "Section 1122 of the CTA 2010 (connected persons) applies for the purposes of sub-paragraph (1)."

> with it.

Where will one draw the limit of gardens and grounds? CGT private residence cases may be helpful, though without the limit to the "permitted area" of (in short) half a hectare.

98.26.2 *"Higher threshold interest"*

Para 1(2) sch 4A FA 2003 defines "higher threshold interest":

> An interest in a single dwelling is a higher threshold interest for the purposes of this Schedule if chargeable consideration of more than £500,000 is attributable[45] to that interest.

98.26.3 *High-value residential transaction*

Para 2 sch 4A FA 2003 defines "high-value residential transaction":

> (1) Sub-paragraphs (2) to (8) apply to a chargeable transaction whose subject-matter consists of or includes a higher threshold interest.
> (2) If the main subject-matter of the transaction consists entirely of higher threshold interests, the transaction is a high-value residential transaction for the purposes of paragraph 3.

In 2013, when the ATED threshold was £2m, the expression "high-value" residential transaction was apt. Now it is reduced to £500k it is no longer apt. When discussing the statutory provision, it may be easier to continue to apply the statutory terminology, but scare quotation marks would be appropriate.

98.27 Co. purchaser (non-natural person)

ATED-SDLT applies if the condition in para 3(3) sch 4A FA 2003 is satisfied. This provides:

> The condition is that—
> (a) the purchaser is a company,
> (b) the acquisition is made by or on behalf of the members of a partnership one or more of whose members is a company, or
> (c) the acquisition is made for the purposes of a collective investment scheme.

I refer to the condition in para 3(3) as the "**ATED-SDLT corporate**

[45] The drafter attempts to define "attributable" in para 9 sch 4A FA 2003: "attributable" means attributable on a just and reasonable basis.

purchaser condition".

HMRC appear to have anticipated that the corporate purchaser condition may not be well drafted. Para 3(10) sch 4A FA 2003 provides power to amend by statutory instrument:

> The Treasury may by order amend this paragraph for the purpose of limiting the circumstances in which the condition in subparagraph (3) is to be treated as met.

98.27.1 *Joint purchasers*

Para 3(5) sch 4A FA 2003 deals with joint purchasers:

> If there are two or more purchasers acting jointly, the condition in sub-paragraph (3) [the corporate purchaser condition] is treated as met if it is met in relation to at least one of those purchasers.

This is not fair, but the provision is intended to be penal.

98.28 Trusts

98.28.1 *Trustee purchaser*

Para 3(4) sch 4A FA 2003 excludes corporate trustees:

> References in sub-paragraph (3) corporate purchaser condition] to a company do not include a company acting in its capacity as trustee of a settlement.

This is needed as SDLT does not have the IT/CGT rule that trustees are deemed to be a distinct person.[46]

98.28.2 *Beneficiary purchaser*

A purchaser of an equitable interest may be caught by ATED-SDLT as they may acquire a chargeable interest.

98.28.3 *Bare trust*

Para 3(8) sch 4A FA 2003 provides:

> For the purposes of sub-paragraph (3), paragraph 3 of Schedule 16 (bare trustees) applies as if sub-paragraphs (2) and (3) of that paragraph were omitted.

[46] See 7.3 (Trustees a distinct person).

To follow this one needs to set out para 3 sch 16, amended as para 3(8) directs:

> (1) Subject to sub-paragraph (2), where a person acquires a chargeable interest or an interest in a partnership as bare trustee, this Part applies as if the interest were vested in, and the acts of the trustee in relation to it were the acts of, the person or persons for whom he is trustee.
> ~~(2) Sub-paragraph (1) does not apply in relation to the grant of a lease.~~
> ~~(3) Where a lease is granted to a person as bare trustee, he is treated for the purposes of this Part, as it applies in relation to the grant of the lease, as purchaser of the whole of the interest acquired.~~
> (4) Where a lease is granted by a person as bare trustee, he is to be treated for the purposes of this Part, as it applies in relation to the grant of the lease, as vendor of the whole of the interest disposed of.

Para 3(1) is the commonsense rule that a bare trust is transparent for SDLT.

The exception in para 3(2)(3) is to block an avoidance scheme under which a rack rent lease was granted to a nominee of the vendor, and then assigned for no value to the tenant.

Para 3(2)(3) sch 16 FA 2003 is excluded for ATED because otherwise a company purchaser might avoid the ATED-SDLT rate by arranging for the vendor to grant a lease to a non-corporate nominee for the purchaser.[47]

The reason for the exception in para 3(4) is unclear but as the charge is paid by the purchaser, not the vendor, it may not matter.

98.29 Linked transactions

Para 4 sch 4A FA 2003 provides:

> (1) Sub-paragraphs (2) and (3) apply if—
> (a) the subject-matter of a chargeable transaction includes a chargeable interest in or over a dwelling,
> (b) one or more land transactions, the subject-matter of each of which includes a chargeable interest in or over the dwelling, are linked to that chargeable transaction, and
> (c) the total consideration attributable to the interests mentioned in paragraphs (a) and (b) (and to any appurtenant rights, but disregarding any rent) is more than £500,000.
>
> (2) Each of those chargeable interests is treated as a higher threshold interest for the purposes of this Schedule.

[47] I am grateful to Justin Bryant for his comments on this provision.

> (3) If the condition in paragraph 3(3) is met in the case of the transaction mentioned in sub-paragraph (1)(a), it is also treated as met in the case of each transaction mentioned in sub-paragraph (1)(b) that is a chargeable transaction.

98.30 ATED-SDLT reliefs

ATED-SDLT has the following reliefs:

Relief	**Sch 4A**
Letting, trading or redeveloping properties	para 5
Dwelling available to the public	para 5B
Financial institution acquiring dwelling in course of lending	para 5C
Dwellings for occupation by employees/partners	para 5D
Farmhouses	para 5F

I hope to consider these in a future edition.

98.31 SDLT on winding up company

In the course of winding up a company holding a UK residence, the company (acting by its liquidator) will normally transfer the property to the shareholders. I refer to this as the "**transfer on liquidation**". This section considers whether the transfer is subject to SDLT.

A transfer on liquidation is a land transaction.

The transfer on liquidation is a chargeable transaction.

The amount of SDLT depends on the amount of the chargeable consideration. If there is no chargeable consideration there is no SDLT. A transfer on liquidation is in principle not made for consideration, and so is in principle not subject to SDLT.[48]

98.31.1 *Transfer to co. shareholder*

Further consideration is needed when the transferee is a company.

Section 53 FA 2003 provides:

> (1) This section applies where the purchaser [ie, transferor] is a company and—
>
> (a) the vendor is connected with the purchaser...
>
> (1A) The chargeable consideration for the transaction shall be taken to be not less than—
>
> (a) the market value of the subject-matter of the transaction as at the effective date of the transaction...

[48] See App 4.5 (Transfer on liquidation).

However in the case of a transfer on liquidation, s.54 FA 2003 will normally provide relief:

> (1) Section 53 (chargeable consideration: transaction with connected company) does not apply in the following cases.
> In the following provisions "the company" means the company that is the purchaser in relation to the transaction in question...

Where the transfer is to a corporate trustee, relief is in principle available under case 2:

> (3) Case 2 is where—
> (a) immediately after the transaction the company holds the property as trustee, and
> (b) the vendor is connected with the company only because of section 1122(6) of the Corporation Tax Act 2010.[49]

If case 2 does not apply (ie if the company purchaser is not a trustee) relief is in principle available under case 3:

> (4) Case 3 is where—
> (a) the vendor is a company and the transaction is, or is part of, a distribution of the assets of that company (whether or not in connection with its winding up), and
> (b) it is not the case that—
> (i) the subject-matter of the transaction, or
> (ii) an interest from which that interest is derived,
> has, within the period of three years immediately preceding the effective date of the transaction, been the subject of a transaction in respect of which group relief was claimed by the vendor.

It is possible to envisage circumstances where relief does not apply, but that will rarely happen in practice.

98.32 Company in liquidation owes debt

Suppose the company owes a debt. This typically arises if the company has borrowed to purchase the property and owes money to a bank. The company cannot transfer the property to the shareholders and simply leave the debt outstanding, at least if the debt is to non-shareholders.

Para 8(1) sch 4 FA 2003 provides:

[49] See 104.14 (Connected: Trustees).

> Where the chargeable consideration for a land transaction consists in whole or in part of—
> (a) the satisfaction or release of debt[50] due to the purchaser or owed by the vendor, or
> (b) the assumption of existing debt[51] by the purchaser,
> the amount[52] of debt satisfied, released or assumed shall be taken to be the whole or, as the case may be, part of the chargeable consideration for the transaction.

This applies only if the release or assumption of the debt is consideration for the transaction. The point is that the consideration for SDLT purposes is deemed to be the face value of the debt (the amount owed), instead of its market value (which may be less).

Para 8(2) sch 4 FA 2003 provides a cap on the charge:

> If the effect of this paragraph would be that the amount of the chargeable consideration for the transaction exceeded the market value of the subject-matter of the transaction, the amount of the chargeable consideration is treated as limited to that value.

Thus there is a SDLT charge if there is an arrangement under which the shareholders undertake to pay (in the statutory terminology, assume) the company's debt, in consideration for the transfer. In contract law terminology, the arrangement is known as a novation. The charge is on the lower of the amount of the debt and the market value of the land.

Para 8(1A) sch 4 FA 2003 provides:

> Where—
> (a) debt is secured on the subject-matter of a land transaction immediately before and immediately after the transaction, and
> (b) the rights or liabilities in relation to that debt of any party to the transaction are changed as a result of or in connection with the

[50] Para 8(3) sch 4 FA 2003 provides a commonsense definition: "In this paragraph–
(a) "debt" means an obligation, whether certain or contingent, to pay a sum of money either immediately or at a future date".

[51] Para 8(3) sch 4 FA 2003 provides a commonsense definition: "In this paragraph ...
(b) "existing debt", in relation to a transaction, means debt created or arising before the effective date of, and otherwise than in connection with, the transaction".

[52] Para 8(3) sch 4 FA 2003 provides a commonsense definition: "In this paragraph ...
(c) references to the amount of a debt are to the principal amount payable or, as the case may be, the total of the principal amounts payable, together with the amount of any interest that has accrued due on or before the effective date of the transaction."

> transaction,
>
> then for the purposes of this paragraph there is an assumption of that debt by the purchaser, and that assumption of debt constitutes chargeable consideration for the transaction.

This will not apply if the debt is unsecured, before or after the transaction.

98.32.1 *Joint vendors/purchasers*

Para 8 continues with provisions dealing with apportionment in the case of joint vendors or joint purchasers. This is less likely to arise but I cover it for completeness:

> (1B) Where in a case in which sub-paragraph (1)(b) applies—
>
> (a) the debt assumed is or includes debt secured on the property forming the subject-matter of the transaction, and
>
> (b) immediately before the transaction
>
> [i] there were two or more persons each holding an undivided share of that property, or
>
> [ii] there are two or more such persons immediately afterwards,
>
> the amount of secured debt assumed shall be determined as if the amount of that debt owed by each of those persons at a given time were the proportion of it corresponding to his undivided share of the property at that time.
>
> (1C) For the purposes of sub-paragraph (1B), in England and Wales and Northern Ireland each joint tenant of property is treated as holding an equal undivided share of it.

The SDLT Manual comments on the apportionment provisions:

> **SDLTM04040A Assumption or release of a debt: Examples** [Nov 2019]
>
> **Example 1**
>
> A property is transferred by V into the ownership of V and P in equal shares subject to a subsisting mortgage.
>
> P assumes liability for all or part of the debt.
>
> Notwithstanding P's actual liability, which is probably for all of the debt, P is treated as assuming debt equal to 50% of the amount owing. This is because he is treated as owing none before the transaction and 50% after it.
>
> **Example 2**
>
> A property is owned by V and P in 70:30 shares.
>
> It is transferred to the sole ownership of P subject to a subsisting mortgage.

> Assuming V is released from the debt or P agrees to indemnify V there is an assumption of debt by P.
> P is treated as assuming debt equal to 70% of the amount owning.
> This is because P is treated as owing 30% before the transfer and 100% after it.

98.32.2 *Company debt to shareholders*

Suppose the company owes a debt to its shareholders. This typically arises if the shareholders have lent funds to purchase the property.
The SDLT Manual provides:

> **SDLTM04043 Transfer of property on winding up - loan from shareowners** [Nov 2019]
> ... We would not seek to argue that the dividend in specie should bear SDLT in a situation for example where A owns the shares of B Ltd. A lends money to the company to buy property, the loan being secured by mortgage on the property.
> Later B Ltd is wound up and there is a transfer to A as beneficial owner of the equity. That is the reason for the Transfer. The loan is not released etc, but obviously the mortgage will be taken off as the lender also owns the property because of the liquidation.
> Clearly (?) in this scenario A has not assumed any liability or given any other form of consideration.

The position does not seem so clear to me, but HMRC do not take the point.

98.32.3 *Co. debt to non-shareholders*

The SDLT Manual continues:

> **SDLTM04042 SDLT on de-enveloping transactions** [Feb 2020]
> ...However, where there is a third party (non-shareholder) loan secured on the property when the company is liquidated, the transfer of the property by the company on a distribution will attract SDLT under paragraphs 1 and 8 of Schedule 4 FA 2003 where there is an assumption by the shareholder(s) of liability for the debt. ...

Suppose:

(1) Shareholders subscribe for new share capital.
(2) The company uses the proceeds of the share subscription to repay the debt.
(3) The company is put into liquidation.

This is not caught by para 8(1) as the satisfaction of the debt is not consideration for the land transaction; it is not caught by para 8(1A) as the debt will not be secured at the time of the transaction. The question is whether it is caught by s.75A FA 2003 (anti-avoidance).

98.33 Section 75A: Anti-avoidance

98.33.1 *Basic requirements*

Section 75A(1) FA 2003 sets out the basic requirements:

> This section applies where—
>
> (a) [i] one person (V) disposes of a chargeable interest and
> [ii] another person (P) acquires either it or a chargeable interest deriving from it,
>
> (b) a number of transactions (including the disposal and acquisition) are involved in connection with the disposal and acquisition ("the scheme transactions"), and
>
> (c) the sum of the amounts of stamp duty land tax payable in respect of the scheme transactions is less than the amount that would be payable on a notional land transaction effecting the acquisition of V's chargeable interest by P on its disposal by V.

In *Project Blue v HMRC:*

> It is clear from (i) subsection (1)(a), which refers to P acquiring either V's chargeable interest "or a chargeable interest deriving from it", and (ii) subsection (3)(a), which refers to "the acquisition by P of a lease deriving from a freehold owned *or formerly owned* by V" (emphasis added), that the section may operate not only when P acquires the chargeable interest directly from V but also when P acquires a chargeable interest, such as a lease, which is derived from a chargeable interest which V formerly owned. Thus the section can cover a series of transactions by which V disposes of its chargeable interest which comes to be acquired by another person and P ultimately acquires a chargeable interest derived from it from that other person.[53]

98.33.2 *"Transaction"*

Section 75A(2) FA 2003 provides just about the widest definition the author could devise:

> In subsection (1) "transaction" includes, in particular—

[53] [2018] UKSC 30 at [45].

> (a) a non-land transaction,
> (b) an agreement, offer or undertaking not to take specified action,
> (c) any kind of arrangement whether or not it could otherwise be described as a transaction, and
> (d) a transaction which takes place after the acquisition by P of the chargeable interest.

98.33.3 *"Scheme transaction"*

Scheme transactions are the transactions (including the disposal and acquisition) "involved in connection with the disposal and acquisition". Section 75A(3) FA 2003 provides:

> The scheme transactions may include, for example—
> (a) the acquisition by P of a lease deriving from a freehold owned or formerly owned by V;
> (b) a sub-sale to a third person;
> (c) the grant of a lease to a third person subject to a right to terminate;
> (d) the exercise of a right to terminate a lease or to take some other action;
> (e) an agreement not to exercise a right to terminate a lease or to take some other action;
> (f) the variation of a right to terminate a lease or to take some other action.

In *Project Blue v HMRC* in the Upper Tribunal:

> The scheme transactions are not necessarily confined to those transactions which took place between the disposal by V and the acquisition by P. Paragraphs (b) and (c) of section 75A(3) plainly contemplate that the scheme transactions can involve persons in addition to V and P. Section 75A(2)(d) shows that a transaction which takes place after the acquisition by P can be relevant; this is subject to the other parts of section 75A and 75B which require that a scheme transaction is "involved in connection with" the acquisition. Section 75B(3)(c) shows that a transaction for the purposes of funding an acquisition can be part of the scheme.[54]

The first-tier tribunal made some general comments on the phrase "in connection with"[55] and said:

[54] [2014] UKUT 564 (TCC) at [64].

[55] See App 2.4.2 (In connection with).

> 250. ... in section 75A the phrase "in connection with" is deliberately used in conjunction with the word "involved." In our view, the word "involved" must be intended to qualify the phrase "in connection with." The word "involved" denotes some form of participation (i.e. involvement). Thus, a transaction which is part of a series of transactions will not be "involved" with other transactions simply because it is part of a series or sequence of successive conveyancing transactions. The linkage must be more than merely being a party in a chain of transactions and the test must be more than a "but for" test ... otherwise the word "involved" would be deprived of significant meaning.[56]

98.34 Notional land transaction

Section 75A(4) FA 2003 provides:

> Where this section applies—
> (a) any of the scheme transactions which is a land transaction shall be disregarded for the purposes of this Part, but
> (b) there shall be a notional land transaction for the purposes of this Part effecting the acquisition of V's chargeable interest by P on its disposal by V.

Section 75C(10) FA 2003 provides:

> Stamp duty land tax paid in respect of a land transaction which is to be disregarded by virtue of section 75A(4)(a) is taken to have been paid in respect of the notional transaction by virtue of section 75A(4)(b).

98.34.1 *Notional consideration*

Section 75A(5) FA 2003 defines the notional chargeable consideration:

> The chargeable consideration on the notional transaction mentioned in subsections (1)(c) and (4)(b) is the largest amount[57] (or aggregate amount)—
> (a) given by or on behalf of any one person by way of consideration for the scheme transactions, or
> (b) received by or on behalf of V (or a person connected with V within the meaning of section 1122 of the Corporation Tax Act 2010) by way of consideration for the scheme transactions.

[56] [2013] UKFTT 378 (TC).

[57] Section 75C(9) FA 2003 provides: "For the purposes of section 75A a reference to an amount of consideration includes a reference to the value of consideration given as money's worth."

98.34.2 *Notional effective date*

Section 75A(6) FA 2003 defines the effective date:

> The effective date of the notional transaction is—
> (a) the last date of completion for the scheme transactions, or
> (b) if earlier, the last date on which a contract in respect of the scheme transactions is substantially performed.

98.34.3 *Incidental transactions*

Section 75B(1) FA 2003 provides a relief for incidental transactions:

> In calculating the chargeable consideration on the notional transaction for the purposes of section 75A(5), consideration for a transaction shall be ignored if or in so far as the transaction is merely incidental to the transfer of the chargeable interest from V to P.

This overlaps with the definition of scheme transaction, as if a transaction is merely incidental, then it may not be involved in connection with the disposal and acquisition (within the meaning of the section).

"Incidental" is undefinable, but s.75B FA 2003 seeks to define it. Section 75B(2) FA 2003 identifies some non-incidental transactions:

> A transaction is not incidental to the transfer[58] of the chargeable interest from V to P—
> (a) if or in so far as it forms part of a process, or series of transactions, by which the transfer is effected,
> (b) if the transfer of the chargeable interest is conditional on the completion of the transaction, or
> (c) if it is of a kind specified in section 75A(3).[59]

Section 75B(3) FA 2003 then suggests some incidental transactions:

> A transaction may, in particular, be incidental if or in so far as it is undertaken only for a purpose relating to—
> (a) the construction of a building on property to which the chargeable interest relates,
> (b) the sale or supply of anything other than land, or
> (c) a loan to P secured by a mortgage, or any other provision of finance to enable P, or another person, to pay for part of a

[58] Section 75B(6) FA 2003 defines transfer: "In this section a reference to the transfer of a chargeable interest from V to P includes a reference to a disposal by V of an interest acquired by P."

[59] See 98.33.2 ("Transaction").

> process, or series of transactions, by which the chargeable interest transfers from V to P.
>
> (4) In subsection (3)—
>
> (a) paragraph (a) is subject to subsection (2)(a) to (c),
>
> (b) paragraph (b) is subject to subsection (2)(a) and (c), and
>
> (c) paragraph (c) is subject to subsection (2)(a) to (c).

This only goes so far as to say that the transaction *may* be incidental, though one may infer that the transaction would be incidental unless there are some special circumstances.

Section 75B(5) FA 2003 deals with cases of partial relief:

> The exclusion required by subsection (1) shall be effected by way of just and reasonable apportionment if necessary.

98.34.4 *Transfer of securities*

Section 75C(1) FA 2003 provides:

> A transfer of shares or securities shall be ignored for the purposes of section 75A if but for this subsection it would be the first of a series of scheme transactions.

98.34.5 *Reliefs and other interactions*

Section 75C FA 2003 provides:

> (2) The notional transaction under section 75A attracts any relief under this Part which it would attract if it were an actual transaction (subject to the terms and restrictions of the relief).
>
> (3) The notional transaction under section 75A is a land transaction entered into for the purposes of or in connection with the transfer of an undertaking or part for the purposes of paragraphs 7 and 8 of Schedule 7, if any of the scheme transactions is entered into for the purposes of or in connection with the transfer of the undertaking or part.
>
> (4) In the application of section 75A(5) no account shall be taken of any amount paid by way of consideration in respect of a transaction to which any of sections 60, 61, 63, 64, 65, 66, 67, 69, 71, and 74, or a provision of Schedule 6A or 8, applies.

These provisions are not relevant here. They concern:

Section	**Topic**
s.60, 61	Compulsory purchase/Compliance with planning obligations
s.63, 64	Demutualisation of insurance company/building society
s.65	Incorporation of LLP

s.66, 67	Public bodies/parliamentary constituencies
s.69, 71	National Bodies/Registered social landlords
s.74	Collective rights of tenants of flats

> (5) In the application of section 75A(5) an amount given or received partly in respect of the chargeable interest acquired by P and partly in respect of another chargeable interest shall be subjected to just and reasonable apportionment.
> (6) Section 53 applies to the notional transaction under section 75A.[60]
> (7) Paragraph 5 of Schedule 4 [exchanges] applies to the notional transaction under section 75A.
> (8) For the purposes of section 75A—
> (a) an interest in a property-investment partnership (within the meaning of paragraph 14 of Schedule 15) is a chargeable interest in so far as it concerns land owned by the partnership,[61]
> (8A) Nothing in Part 3 of Schedule 15 [transactions involving partnerships] applies to the notional transaction under section 75A.

98.34.6 *Minor exceptions*

Section 75A(7) FA 2003 provides:

> This section does not apply where subsection (1)(c)[62] is satisfied only by reason of—
> (a) sections 71A to 73, or
> (b) a provision of Schedule 9.

These exceptions are not relevant here. They concern:
71A-73: Alternative property finance (Sharia finance)
sch 9: Tenants right to buy and similar transactions

98.34.7 *Avoidance not required*

The SDLT Manual provides:

> **SDLTM09175 Section 75A FA 2003, Overall approach** [Nov 2019]
> Section 75A is an anti-avoidance provision. HMRC therefore takes the view that it applies only where there is avoidance of tax.

This view does not bear much examination, as the Supreme Court observed:

[60] See 98.31.1 (Transfer to co. shareholder).

[61] Subsection 8(b) has been repealed.

[62] See 98.33.1 (Basic requirements).

> The heading of the section, "Anti-avoidance", is the only indication in the section which could support [the taxpayer's] contention. The heading is relevant to assist an understanding as to the mischief which the provision addresses, but it says nothing as to the motives of the parties to the scheme transactions. There is nothing in the body of the section which expressly or inferentially refers to motivation. The provision was enacted to counter tax avoidance which resulted from the use of a number of transactions to effect the disposal and acquisition of a chargeable interest. It is sufficient for the operation of the section that tax avoidance, in the sense of a reduced liability or no liability to SDLT, resulted from the series of transactions which the parties put in place, whatever their motive for transacting in that manner. This is clear (?) from subsection (1)(c) which compares the amount of SDLT payable in respect of the actual transactions against what would be payable under the notional land transaction in section 75A(4), by which P acquired V's chargeable interest on its disposal by V.[63]

The Manual will need to be rewritten.

98.34.8 *Application on liquidation*

The SDLT Manual provides:

> **SDLTM04042 SDLT on de-enveloping transactions** [Feb 2020]
> ... There may be situations where a company had a third party debt that has been repaid as a result of shareholder action (either through the subscription for more issued share capital or by replacing the third party debt with shareholder debt), prior to its liquidation. In such cases it is possible that on distribution of the property there will be no charge to SDLT as it will be a distribution in similar circumstances to the first two situations outlined above.
> However, section 75A FA 2003 could apply where the shareholder of a company provides funds to the company to allow it to discharge its debt, before acquiring the property from the company if those actions are involved in connection with that disposal or acquisition. Whether section 75A applies will depend on the facts of each case.
> There will be cases where discharging the debt has not occurred as part of the arrangements for the transfer of the property from the company to the shareholders. Equally, there will be cases where the discharge of the debt was one of a number of transactions involved in connection with the disposal and acquisition of the property.

[63] *Project Blue v HMRC* [2018] UKSC 30 at [42].

> ... In a straightforward de-enveloping situation, the company should be 'V' and the shareholder(s) 'P'. ...

CIOT say:

> 2.2 In our view, the capitalisation of debt should not comprise a 'scheme transaction' for the purposes of Section 75A. Ownership of shares is clearly a pre-requisite to distributing the property out by way of liquidation but this could be by virtue of its existing shareholding. There is no need for the capitalisation to establish the shareholding necessary for the distribution. The capitalisation will clearly be a step in the transfer of the property, but it does not affect the nature or interest of the property which is being transferred on the liquidation.
> 2.3 We therefore do not believe that Section 75A should apply, since the capitalisation is not a scheme transaction and consequently the only transaction which takes place is the real transaction, namely the transfer of the property from the company to the individual or trustee.[64]

98.35 Charities and ATED taxes

A charitable trust does not fall within ATED as it is not a "non-natural" person. A charitable company would fall within ATED. Relief is available under s.151 FA 2013.[65]

Similarly a charity purchaser should not be subject to ATED-SDLT, as the usual charity SDLT exemption should apply.

98.36 ATED in Scotland\Wales

ATED applies to a chargeable interest, defined as an interest in land in the UK, so it applies in Scotland and Wales.

Section 80I Scotland Act 1998 provides:

> (1) A tax charged on any of the following transactions is a devolved tax—
>
> (a) the acquisition of an estate, interest, right or power in or over land in Scotland;

[64] CIOT, "Removing barriers to de-enveloping residential property" (Jun 2016). *https://www.step.org/sites/default/files/2021-11/de-enveloping-22-june-2016.pdf*

[65] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 39.14 (Annual tax on enveloped dwellings) online version *https://www.taxationofcharities.co.uk*

(b) the acquisition of the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power.[66]

ATED is not a tax charged on acquisition, so it is not a devolved tax. By contrast, LBTT/LTT (the Scots/Welsh equivalents of SDLT) are devolved taxes. If the object of ATED is the prevention of avoidance of SDLT/LBTT/LTT, then ATED ought to be a devolved tax also. Perhaps no-one noticed, or cared, or perhaps it was thought too difficult. Perhaps a UK-wide tax was thought to be simpler; but simplicity is not compatible with devolution.

98.37 De-enveloping

Where a property is held in a company, the question is whether to wind up or retain.

Advantages of retention: In return for paying ATED, a shareholder may have the advantages of being able to sell the company rather than the land:

(1) SDLT advantage of being able selling shares in the company free of SDLT. It takes between 4 and 30 years for ATED to equal the SDLT on a non-corporate sale, about 15 years on average;[67] but ATED is payable sooner and will be index-linked (at least). It will not be cost-effective to continue to pay ATED, just for the SDLT saving, unless a fairly prompt sale of the company is expected.

(2) A purchaser who will be within ATED (in short, intending to use the property as a home) may prefer to purchase the property, not the company or may want a discount to reflect the disadvantages of holding through a company. On the other hand, a purchaser for investment, who can qualify for ATED rental relief,[68] and who is prepared to undertake corporate due diligence, is likely to prefer to purchase the company.

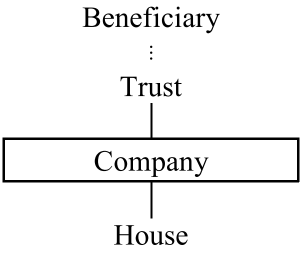
98.38 Methods of de-enveloping

This section considers some methods of de-enveloping where (as is common) the house is held in a company held in a trust made by a foreign domiciled settlor. Diagrammatically:

[66] See s. 15 Wales Act 2014 for the Welsh equivalent.

[67] See 98.7 (Rates of ATED).

[68] See 98.18 (ATED rental relief).



In the following discussion:
The "**house value**" is the market value of the house.
The **"2015 rebased gain"** is the gain allowing for 2015 rebasing.
The "**house gain**" is the gain on the disposal of the house: the amount by which the house has risen in value since acquisition.
The "**company share value**" is the market value of the company shares. This is likely to be less than the value of the house (the company's asset).[69]

It is assumed (to avoid having to cover some less likely permutations) that:

(1) There is at least some house gain. (At the higher end of the market this may not be the case).
(2) The trust has no trust gains (other than those which accrue on disposals discussed below) and no trust losses.
(3) The beneficiary is UK resident.
(4) The settlor was not UK domiciled when the trust was made.

SDLT issues are discussed elsewhere; see 98.31 (SDLT on winding up company).

98.38.1 *Trust winds up co*

One straightforward proposal is:

(1) the trustees wind up the company and
(2) the trustees transfer the house to a beneficiary.[70]

The tax implications of the trustees winding up the company are:

(1) A gain (the 2015 rebased gain) will accrue to the company on the disposal of the house. That gain will be subject to corporation tax.

[69] See 82.20 (Co holds residence: valuation).

[70] There could be two transfers: (1) the liquidator transfers the house to the trustees (2) the trustees transfer the house to the beneficiary. In practice the trustees may direct the liquidator to transfer the house directly to the beneficiary, but that is just a matter of conveyancing.

(2) A gain will accrue to the trustees on the disposal of the shares, on the liquidation ("the trustee shareholder gain")
   (a) The gain is computed by reference to the value of what the trustees receive (the house less the CT charge paid by the company)
   (b) This gain will be a s.1(3) amount (trust gain).

The tax implications of the trustees transferring the house to the beneficiary will be:

(1) The transfer will be a capital payment.
   (a) The amount of the capital payment is equal to the value of what the beneficiary receives (which may be the house less the CT charge).
   (b) The capital payment will be matched to trust gains so there will be a s.87 charge.
   (c) The capital payment will not qualify for the remittance basis as the benefit is received in the UK.
(2) There may also be a small IHT exit charge.[71]

98.38.2 *Trust transfers co to beneficiary*

Another straightforward proposal is:

(1) The trustees transfer the shares in the company to the beneficiary.
(2) The beneficiary winds up the company.

The tax implications of the transfer of the company shares from the trust to the beneficiary will be:

(1) A gain will accrue to the trustees on the disposal of the shares, on the transfer ("the trustee shareholder's gain").
   (a) This gain is computed by reference to the market value of the shares (which will be less than the house value, to reflect the drawbacks of corporate ownership).
   (b) This gain will be a s.1(3) amount (trust gain).
   (c) This gain will not be immediately charged to tax.
(2) The transfer of the shares to the beneficiary will be a capital payment.
   (a) The amount of the capital payment will be equal to the market value of the shares.
   (b) The capital payment will be matched to the trust gains.
   (c) If the beneficiary is a remittance basis taxpayer, the s.87 charge

[71] See 76.9.2 (Excluded property time apportionment).

will in the first instance qualify for the remittance basis as the benefit is received outside the UK.

(3) There may be a small IHT exit charge.

The tax implications of the beneficiary winding up the company are:

(1) A gain (the 2015 rebased gain) will accrue to the company on the disposal of the house. That gain will be subject to corporation tax.
(2) A gain may accrue to the individual on the disposal of the shares, on the liquidation ("the liquidation gain").
    (a) The liquidation gain will not qualify for the remittance basis as the proceeds of the liquidation are received in the UK.
    (b) The amount of the liquidation gain will in principle be small, or nil, as the shares are acquired at market value.[72]
(3) If the remittance basis applied to the capital payment, it now comes into charge, as the beneficiary receives the benefit (the house) in the UK.

The trustee shareholders gain could qualify for hold-over relief, in which case there would be no trust gain to match to the capital payment, but that is matched by a larger gain on the liquidation.

An option may be to transfer the property to a non-resident beneficiary, if there is someone suitable, but the onward gift rules would need consideration.

98.38.3 *Non-tax aspects of unwinding*

The beneficiary who acquires the property will need to review their will, as the property will pass under the will rather than under the terms of the settlement. A new UK-law will may be needed for this purpose.

98.38.4 *De-enveloping mistakes*

The Court has set aside a de-enveloping transaction by way of distribution where the parties overlooked a "very significant risk" of SDLT liability.[73]

98.39 ATED regime: Critique

ATED and ATED-SDLT share rules and objectives; they should be evaluated together.

[72] If there is a gain, company distribution relief avoids a double CGT charge (on the liquidation gain and the s.3 gain); see 64.20 (s.3 distribution relief).

[73] *Representation of Crestbridge Trustees re Avocado Trust* [2021] JRC 171.

98.39.1 *Number of homes held by co*

It is relevant to consider how many homes are currently held by companies within ATED. In summary, for 2018/19 the figures are[74]

Properties held by companies				**ATED**
Property band	**no properties**	**% of total**	**ATED rate**	**receipts £m**
£500k-£1m	1880	30%	£3k	6
£1m-£2m	1860[75]	29%	£7k	12
£2m – £5m	1660	26%	£25k	37
£5m – £10m	590	9%	£59k	31
£10m - £20m	200	3%	£118k	21
£20m -	150	2%	£237k	32
Total	6340	100%		139

Relief declarations	
Rental relief	15260
Development relief	2730
Other reliefs	1690
Total	19670

I noted in 2015 that "One would expect the figure to diminish as in many cases the companies would be unwound if possible" and that has proved to be correct. There may be additional cases of accidental or deliberate non-notification, though how many is a matter of speculation.

A consultation paper[76] gave the figure of properties registered in the names of foreign companies as "up to 100,000 titles"![77] (The words "up to" are revealing.) But the number (whatever it actually was) will include non-residential property, and residential property held by

(1) corporate trustees
(2) nominees

[74] HMRC, "ATED Statistics 2018/19" (Mar 2020) *https://www.gov.uk/government/statistics/uk-ated-statistics*

[75] In 2015, I guessed that "the number of properties under £2m may not be large (was it worth using a company for relatively small value properties?) and the yield is likely to be limited."

[76] Department for Business Innovation & Skills, "Beneficial Ownership Transparency" (2016) para 44 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/512333/bis-16-161-beneficial-ownership-transparency.pdf*

[77] The statistic was misreported in the press as meaning that 100,000 (The Guardian), or "more than 100,000" (The FT), properties are owned by foreign companies. But that is just sloppy journalism.

(3) diversely held entities (outside the scope of ATED)
(4) sovereign bodies (outside the scope of taxation)

So the figure of properties registered in the names of foreign companies, whatever it may be, gives little if any indication of how many companies fall within ATED or the IHT residential-property code.

98.39.2 *Objections to ATED*

There are so many objections to ATED that it is hard to know where to begin.

Reasonable to use companies to hold land: There are non-tax reasons why it may be desired to hold a residence in a company.[78]

Most offshore trusts used foreign companies to hold land, as a matter of routine, regardless of tax, because of issues relating to:

(1) Limited liability
(2) Conflict of laws; the validity of a disposition of immovable property may but need not necessarily be determined by the law of the State where the property is situated.
(3) Segregation of a trustees assets.

This is recognised in the relief given to companies holding non-UK properties.[79]

Complexity and administrative burden: ATED extends to 80 sections and 3 schedules. There are very few tax problems to which 100 pages of legislation is the best answer. The House of Lords Economic Affairs Committee agreed:

> We share our witnesses' concern about whether the problem the legislation seeks to address justifies its length and complexity, particularly in view of the Government's commitment (!) to a simpler tax system. In line with our earlier recommendation on better consultation, we think that there were probably simpler and more

[78] I think this is self-evident to practitioners. But this is confirmed (if that were necessary) by HMRC Research Report 384 "Views and behaviours in relation to ATED" (2015) section 5 (why are properties enveloped), citing privacy, foreign succession law, and asset protection among non-tax reasons for use of companies. *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/457946/HMRC_Research_Report_384_-_Views_and_behaviours_in_relation_to_the_Annual_Tax_on_Enveloped_Dwellings.pdf*

[79] See 39.28 (Foreign homes relief).

> effective ways of achieving the Government's objectives.[80]

Uncertainty and instability: There is the uncertainties of the statutory rules, which contain about the same level of uncertainty as any other 100 pages of tax legislation. Now that ATED has been around for a decade or so, it seems to have settled down, though there was an initial period of instability.

98.39.3 *ATED purpose at outset*

The Residential Property Consultation Response Document provides:

> 1.8 One of the sources of property tax avoidance ...is the way some people avoid the stamp duty the rest of the population pays including by using companies to buy expensive residential property.
> 1.9 To address this form of avoidance, and to ensure the owners of high value residential property pay their fair share of tax, the Chancellor announced a threefold approach [ATED, ATED-SDLT and the former ATED-CGT].

The reason for the introduction of the ATED regime in 2013 was to prevent SDLT avoidance by corporate ownership of land. No other object was mentioned.

While views on the priority of preventing avoidance may differ, it seems to me that very few of those who actually have to grapple with the provisions would consider SDLT saving an adequate benefit to set against the objections to the ATED regime outlined above.

In any event SDLT was not a major driver in the use of companies. The 2015 IHT residential-property paper belatedly acknowledges that mistake:

> 19. Properties held in companies or other envelopes can be 'sold' by transferring the shares of that company. Such a transaction is not subject to any SDLT. ATED was introduced in FA 2013 to ensure that people enveloping residential property in corporate vehicles pay a price for that privilege by a higher SDLT rate on entry into the corporate structure and ATED. ATED is targeted only at residential property held through a company where it is occupied rather than let out to an unconnected

[80] House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (2013) para 213
http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf
The passage concluded: " We recommend that the lessons from the development of these measures should be learned and applied to the design of future tax policies."
But of course no-one took any notice of that.

> person. Properties let to unconnected parties qualify for relief and are therefore exempt from the ATED charge.
>
> 20. HMRC's research suggests that the most common reason for enveloping properties is IHT planning undertaken by non-doms.

HMRC research states what every practitioner knew.[81] It follows that the ATED regime was misconceived, insofar as it was aimed at SDLT planning or avoidance.[82]

In this context it is worth noting that the ATED regime was introduced in breach of the Tax Consultation Framework.[83] The ATED regime was the rabbit out of a hat approach to tax reform which the Tax Consultation Framework tried, not very successfully, to abolish.[84]

Readers may think it pointless to cry "foul" in a game which has no referee, and whose result has been declared. But I think the story deserves to be noted, not just as a lesson in how not to legislate, for which tax provides so many, but because this history supports the case that the case for ATED and ATED-SDLT needs to be thought through: there was no such thinking when it was introduced.

98.39.4 *Role of ATED today*

The starting point is that ATED is not a tax of a conventional kind, but:

(1) a penalty (the principal element in a set of penalties) for entering into certain arrangements or for not unwinding them; or

[81] This is confirmed (if that were necessary) by HMRC Research Report 384 "Views and behaviours in relation to ATED" (2015) para 5.18: "... avoiding SDLT was not often mentioned by agents as a main driver for enveloping a property" and citing an interviewee as saying (rightly) "the scale of the stamp duty avoidance was vastly exaggerated."
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/457946/HMRC_Research_Report_384_-_Views_and_behaviours_in_relation_to_the_Annual_Tax_on_Enveloped_Dwellings.pdf

[82] One might infer from an absence of comment in the HMRC announcements that those who introduced the ATED regime were unaware of any IHT implications until they were pointed out in the consultation process. The chutzpah of the Residential Property Response Document deserves to be recorded:
"3.71 ...The likelihood that the measures would impact on non-domiciled individuals more than UK citizens was also raised as a concern.
Government Response
3.72 The Government has taken on board comments raised through this question."

[83] See 1.12 (State of UK tax reform).

[84] The ATED regime was also a breach of the promise of stability on foreign domicile taxation. See 1.11 (The promise of stability).

(2) a charge for certain tax privileges (avoidance of SDLT)

This is not itself a criticism. It may be sensible to have such a charge and there are precedents.[85] But it does follow that an assessment of the ATED regime requires an analysis of the tax advantages and disadvantages of corporate ownership. These changed in 2015 (NRCGT) and again in 2017 (IHT residential-property code) and again in 2019 (CGT on sale of land-rich companies). So fresh assessment is needed.

The advantage today is a possible SDLT saving by a sale of the company rather than a sale of property. The advantage has increased following the 2015 increase of SDLT residential property rates.

"Possible" avoidance of SDLT raises the question: How much SDLT has been or would be avoided in this way? Back in 2013, not much.[86] Subsequent increases in SDLT residential property rates increase the benefit of this SDLT planning, perhaps to the point where it becomes attractive.

Assessing the advantage one has to allow for the fact that UK resident and domiciled purchasers (certainly the large majority by number) are likely to prefer to purchase the property, not the company.

98.39.5 *The way forward*

A rational reform would be as follows:

(1) Abolish ATED-SDLT:[87] there is little point in extravagantly complex rules which (in short) only raise the marginal SDLT rate by 0%-3%

(2) Make ATED avoidable by an election (irrevocable once made) that the company should be regarded as transparent for SDLT. The election out of the POA charge is a precedent.[88] That would allow the use of companies for non-tax reasons to continue. It avoids the

[85] In this respect ATED is like the pre-owned asset tax; see 83.39 (Critique).
One might say that ATED, despite its name, is not a tax at all. But the border between taxation and non-tax disincentives is fraught, and the general question whether ATED is correctly described as a tax is best avoided (except in contexts where the distinction makes a practical difference).

[86] See 98.39.3 (ATED purpose at outset).

[87] A more radical reform would be the repeal of SDLT, in accordance with Mirrlees recommendations ("a strong contender for the UK's worst-designed tax") and replace it with a form of rates. See IFS Green Budget 2013
https://ifs.org.uk/sites/default/files/output_url_files/gb2013.pdf

[88] See 83.33 (POA election). The US tick the box regime is another precedent. Double taxation aspects would need consideration but would not be insoluble.

unfairness that ATED is a fixed charge for potential tax advantages the benefit of which (if any) varies considerably from one case to another. It also allows effective unwinding of existing structures.

(3) Set ATED rates to broadly match the tax advantages of corporate status. This would result in an increase which compensates (or if desired, may more than compensate) for the loss of tax in points (1) and (2).

The result would, I think, be reasonably satisfactory and a considerable simplification on the current position.

A further reform still would be to abolish the IHT residential-property code and set ATED rates to collect the IHT saved by use of companies.[89]

An important question is why the ATED regime should be restricted to residential property, or whether it should be extended to non-residential property. Holding land through companies allows SDLT saving (though the rates are much lower) and IHT saving, similar to residential property. Perhaps the policy here is governed by economic considerations: not to affect the commercial property market, while accepting, or perhaps welcoming, the effects on the residential property market. Perhaps the current rules reflect an unexamined assumption that tax planning involving residential properties is more objectionable than other tax planning. But this is speculation as the policy reasons have never been discussed.

98.39.6 *A new unwinding relief*

The absence of relief for unwinding existing structures means that in many, perhaps most, cases, unwinding companies is prohibitively expensive. If an object of the reforms is to encourage winding up companies, that object has not been and will not be achieved. Instead the owners bear the brunt of ATED in an arbitrary and unfair way. The House of Lords Economic Affairs Committee made this point:

> We recommend that the Government should consider whether more could be done, possibly deferring the charge on any gain, to help those affected to de-envelope their properties without incurring high tax costs.[90]

[89] See 82.22.2 (Replace residence-code with ATED).

[90] House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (2013) para 196

The 2015 IHT residential-property paper provided hope for optimism.[91] But the 2016 consultation paper rejected the idea:

> At the 2015 Summer Budget, the government said that it would consider the cost associated with de-enveloping of properties. However, while the government can see there might be a case for encouraging de-enveloping, it does not think it would be appropriate to provide any incentive to encourage individuals to exit from their enveloped structures at this time.
>
> **Question 9**: Are there any hard cases or unintended consequences that will arise as a result of there not being any tax relief for those who want to exit their enveloped structures?

The answer to the question seems to be that:

(1) There are hard cases; but
(2) They are not unintended.

98.40 SDLT non-resident surcharge

The background can be found in HMRC consultation papers:

SDLT: non-UK resident surcharge consultation (2019)
Non-UK Resident SDLT Surcharge Summary of Responses (2020) ("the surcharge response paper")[92]

The surcharge response paper provides:

> 4.6 The government does not propose altering the application of the surcharge in relation to collective enfranchisement arrangements or first-time buyers' relief.[93]

http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf

[91] "21. ... some non-doms and trusts may wish to remove the envelope and move into a simpler more straightforward structure outside the scope of future ATED charges, ATED reporting or ATED-related CGT. If the property is mortgaged or has increased in value since 2013 there may (?) however, be significant costs in de-enveloping.
22. The government will consider the costs associated with de-enveloping and any other concerns stakeholders may have during the course of the consultation regarding de-enveloping."

[92] *https://www.gov.uk/government/consultations/stamp-duty-land-tax-non-uk-resident-surcharge-consultation*

[93] The surcharge consultation paper at 5.4 states: Non-UK residents who meet the criteria for first time buyers' relief (FTBR) will pay the surcharge at 1% on the chargeable consideration between £0 - £300,000 and 6% (5% + the 1% surcharge)

> 4.7 Changing the rules to exempt purchasers where first-time buyers' relief is claimed would place additional pressures on HMRC to establish if an individual benefitting from relief plans to use the property as his/her main residence. All first-time buyers will be able to benefit from a refund of the surcharge under the refund rules set out above.

The term surcharge was used in the consultation and response papers, but the FA chose the more anodyne term "additional rate".

98.41 Non-resident surcharge

Section 75ZA FA 2003 provides:

> (1) In its application for the purpose of determining the amount of tax chargeable in respect of a chargeable transaction that is a non-resident transaction, this Part has effect as if 2% were added to each rate specified in the rate-specifying provisions.
> (2) The "rate-specifying provisions" are—
> (a) in section 55(1B), Table A;
> (b) in Schedule 4ZA, in paragraph 1(2), Table A;
> (c) in Schedule 4A, paragraph 3(1)(a);
> (d) in Schedule 5, in paragraph 2(3), Table A;
> (e) in Schedule 6ZA, in paragraph 4, Table A;
> (f) in section 74(1A), Step 4.

SDLT reliefs such as group relief and charities relief[94] will in principle apply.

98.42 "Non-resident transaction"

Para 2 sch 9A FA 2003 provides:

> (1) A chargeable transaction is a "non-resident transaction" for the purposes of this Part of this Act if—

A set of 4 conditions follows.

98.42.1 *Non-resident purchaser*

Para 2 sch 9A FA 2003 provides:

on any portion between £300,000 - £500,000. (The proposed 1% surcharge rate has become 2%).

[94] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 39.7.3 (Non-residents surcharge).
online version *https://www.taxationofcharities.co.uk*

> (1) A chargeable transaction is a "non-resident transaction" for the purposes of this Part of this Act if—
>
> (a) the purchaser is, or (if there is more than one) the purchasers include, a person who is non-resident in relation to the transaction

98.42.2 *Major interest in dwelling*

Para 2 sch 9A FA 2003 provides:

> (1) A chargeable transaction is a "non-resident transaction" for the purposes of this Part of this Act if ...
>
> (b) the main subject-matter of the transaction consists of—
>
> (i) a major interest in one or more dwellings, or
>
> (ii) a major interest in one or more dwellings and other property,
>
> (c) that major interest, at the beginning of the effective date of the transaction, is not a term of years absolute or leasehold estate that has 7 years or less to run

Para 2(2) sch 9A FA 2003 provides:

> A reference in sub-paragraph (1)(b) or (c) to a major interest in a dwelling includes an undivided share in a major interest in a dwelling.

98.42.3 *De minimis test*

Para 2 sch 9A FA 2003 provides:

> (1) A chargeable transaction is a "non-resident transaction" for the purposes of this Part of this Act if ...
>
> (d) the de minimis threshold is exceeded.

The threshold is set low:

> (3) For the purposes of sub-paragraph (1)(d), the de minimis threshold is exceeded if—
>
> (a) in a case in which the chargeable consideration for the transaction does not consist of or include rent, the chargeable consideration for the transaction is £40,000 or more;
>
> (b) in a case in which the chargeable consideration for the transaction consists of or includes rent—
>
> (i) the chargeable consideration other than rent is £40,000 or more, or
>
> (ii) the annual rent is £1,000 or more.
>
> (4) In sub-paragraph (3) "annual rent" in relation to a transaction, means the average annual rent over the term of the lease to which the

> transaction relates or, if—
> (a) different amounts of rents are payable for different parts of the term, and
> (b) those amounts (or any of them) are ascertainable at the effective date of the transaction,
>
> the average annual rent over the period for which the highest ascertainable rent is payable.

98.43 SDLT residence test

Para 3 sch 9A FA 2003 provides:

> For the purposes of this Schedule, an individual is "non-resident" in relation to a chargeable transaction if the individual is not UK resident in relation to the transaction (see paragraphs 4 and 5).

So we move on to para 4 sch 9A FA 2003. Para 4(1) provides the basic rule:

> For the purposes of this Schedule, an individual is "UK resident" in relation to a chargeable transaction if the individual is present in the UK on at least 183 days during any continuous period of 365 days that falls within the relevant period.

Presence is decided by the usual midnight test. Para 4(4) sch 9A FA 2003 provides:

> References in this paragraph to an individual being present in the UK on a day are to the individual being present in the UK at the end of that day.

As this definition only applies for the purposes of para 4, it has to be repeated verbatim in para 5.

Although SDLT is only payable on land in England and Northern Ireland, for the purposes of the SDLT residence test it is days spent in the whole of the UK that count, not just days spent in England or Northern Ireland.

98.43.1 *Relevant period*

Para 4(2) sch 9A FA 2003 provides:

> "The relevant period" means the period that—
> (a) begins with the day 364 days before the effective date of the chargeable transaction, and
> (b) ends with the day 365 days after the effective date of the chargeable transaction.

So it may not be clear whether an individual meets the UK resident requirement until a year after the transaction. SDLT is then paid upfront, and reclaimed if appropriate.

98.43.2 *Residence: Policy issues*

The SDLT surcharge does not adopt the SRT definition of residence, because that was so complicated. HMRC give themselves a pat on the back for that. The surcharge response paper provides:

> many respondents spoke positively of the government's decision to favour simplicity, where possible, in designing the surcharge

The reader studying the 20 pages of text on this topic may think it is complicated. The weasel words are "where possible".
The surcharge response paper provides:

> 1.8 In recognition that most stakeholders welcomed the government's proposal for a simple test of an individual's residence for the purposes of the surcharge, the government will legislate the SDLT residence test for individuals as set out in the consultation.
> 1.9 While the government has considered whether special provisions are needed to allow for exceptional circumstances to be taken into account, on balance it believes that the residence test and the proposed approach to refunds as detailed in Chapter 3 provide sufficient flexibility for the vast majority of customers.
> 1.10 The government will not use the SRT to determine the residence status of an individual for the purposes of the surcharge. Using the SRT, a test based on a tax year is ill suited for a transaction tax like SDLT and would be complicated as individuals would have to judge their residence under the SRT in almost all cases before the tax year has ended. This would create burdens for HMRC to check taxpayers' declarations whilst also complicating the surcharge as taxpayers who do not routinely assess their tax residence could be forced to engage with the SRT rather than the more straightforward SDLT test.

98.44 When post-acquisition period ignored

Para 5 sch 9A FA 2003 provides:

> (1) For the purposes of this Schedule, an individual is "UK resident" in relation to a chargeable transaction to which this paragraph applies if the individual is present in the UK on at least 183 days during the period that—
>
> (a) begins with the day 364 days before the effective date of the chargeable transaction, and

> (b) ends with the effective date of the chargeable transaction.
>
> (2) This paragraph applies to a chargeable transaction if any of conditions A to C is met in relation to the transaction.

98.44.1 *Company purchaser*

Para 5 sch 9A FA 2003 provides:

> (3) Condition A is that the purchaser is, or (if there is more than one) the purchasers include—
>
> (a) a company, or
>
> (b) a person acting as a trustee of a unit trust scheme.

98.44.2 *Partnership purchaser*

Para 5 sch 9A FA 2003 provides:

> (4) Condition B is that the purchaser is, or (if there is more than one) the purchasers include, an individual who is treated as entering into the transaction by virtue of paragraph 2 of Schedule 15 (transaction entered into for the purposes of a partnership treated as entered into by partners).

The surcharge response paper provides:

> 2.12 ... for SDLT purposes partnerships are treated as if the partners are joint purchasers of partnership property.[95] In line with this, the government proposed that the surcharge would apply where any one of the partners was non-UK resident as defined by the relevant residence tests for individuals and non-natural persons set out in the consultation.
>
> 2.13 As was also set out in the consultation, there are special rules that apply to partnership transactions involving the transfer of property. The government proposed that where, under these rules, the partnership is treated as the purchaser, the above rules will apply. Where conversely, the purchaser is or includes a partner, former partner or person connected with either a partner or former partner, the residence status of the purchaser alone will determine whether the surcharge applies.
>
> 2.14 A number of respondents expressed concern that the proposed treatment of partnerships would be unfair and disproportionate for the residence status of one partner to render the entire partnership liable to the surcharge, with several questioning the policy rationale of deeming purchases by a partnership comprising wholly of UK residents as preferable to those of a partnership comprising a single non-UK resident.

[95] Para 2 sch 15 FA 2003.

> 2.15 Some commented that it would be onerous for large partnerships and complex fund structures to establish the residence of every partner for the purposes of the surcharge using a test other than the existing SRT.
> 2.16 A significant number of respondents advocated in favour of a threshold, under which minor non-UK resident interests would be disregarded for the purposes of the surcharge. A smaller number were in favour an apportionment test that would restrict the amount of the surcharge payable to reflect the proportion of nonUK resident interests in the partnership. Government response
> 2.17 The government will legislate for the surcharge to apply to partnerships as set out in the consultation. It is usual practice within SDLT to treat partners as joint purchasers of a property and for joint purchaser rules to apply irrespective of the relative interests being purchased by different partners.

98.44.3 *Trust purchaser*

Para 5 sch 9A FA 2003 provides:

> (5) Condition C is that—
> (a) the purchaser is, or (if there is more than one) the purchasers include, an individual who is acting as a trustee of a settlement, and
> (b) under the terms of the settlement no beneficiary is entitled—
> (i) to occupy the dwelling or dwellings for life, or
> (ii) to income earned in respect of the dwelling or dwellings.

The consultation response paper provides:

> 2.23... the residence status of a trustee is determined using the relevant SDLT residence test (depending on whether the trustee is an individual or company). Where there are multiple trustees, the trust will be UK-resident only if all the trustees are UK-resident under the SDLT tests.

98.45 Crown employees

Para 6 sch 9A FA 2003 provides:

> (1) For the purposes of paragraphs 4 and 5, an individual is (subject to sub-paragraph (3)) treated as present in the UK at the end of a day if at that time the individual—
> (a) is in Crown employment, and
> (b) is present in a country or territory outside the UK for the purpose of performing activities in the course of that

> employment.
>
> (2) For the purposes of paragraphs 4 and 5, an individual is (subject to sub-paragraph (3)) treated as present in the UK at the end of a day if at that time the individual—
>
> (a) is the spouse or civil partner of an individual who is treated as present in the UK at the end of that day under sub-paragraph (1), and
>
> (b) is living with[96] that spouse or civil partner. (3) Sub-paragraph (1) or (2) applies in relation to an individual only if a claim that it should so apply is included in a land transaction return or an amendment of such a return.
>
> (4) "Crown employment" means employment under the Crown—
>
> (a) which is of a public nature, and
>
> (b) the earnings from which are payable out of the public revenue of the UK or of Northern Ireland.

There is no relief for other employees seconded abroad. The Surcharge response paper provides:

> 3.6 ... The application of the Income Tax legislation for crown employees places them in a materially different position to other Income Tax payers, making it appropriate for the government to provide a relief for this category of taxpayer.

98.46 Non-resident company

Para 7 sch 9A FA 2003 provides:

> (1) For the purposes of this Schedule a company is "non-resident" in relation to a chargeable transaction if either of the following conditions is met.
>
> (2) The first condition is that, on the effective date of the chargeable transaction, the company is not UK resident for the purposes of the Corporation Tax Acts (see Chapter 3 of Part 2 of CTA 2009).

98.47 Foreign-controlled company

The surcharge response paper provides:

> 2.4 For UK resident close companies, the government proposed looking through to the residence of participators and apply the surcharge where control could be directly or indirectly exercised by one or more non-UK

[96] Para 6(5) incorporates the standard tax definition of "living together": see App 3.4.3 (Living together: Married couple).

> resident person(s). The residence status of the participators will be determined as if they were direct purchasers of the property acquired by the close company using the SDLT residence test set out in this document. This treatment was proposed to prevent non-UK residents using UK resident companies to circumvent the surcharge.

Anyone using a UK resident company to avoid the surcharge would need their head examined. But there it is.

Para 7 sch 9A FA 2003 provides:

> (1) For the purposes of this Schedule a company is "non-resident" in relation to a chargeable transaction if either of the following conditions is met...
> (3) The second condition is that, on the effective date of the chargeable transaction, the company (though UK resident for the purposes of the Corporation Tax Acts)—
> (a) is a close company (see paragraph 8),
> (b) meets the non-UK control test in relation to the transaction (see paragraphs 9 and 10), and
> (c) is not an excluded company (see paragraph 11).

98.47.1 *"Close company"*

Para 8 sch 9A FA 2003 tinkers with the standard definition:

> (1) For the purposes of this Schedule, a company is a "close company" if it is a close company within the meaning given by Chapter 2 of Part 10 of CTA 2010 (basic definitions), applying that Chapter subject to the following modifications.
> (2) Section 444 (companies involved with close companies) applies as if condition A in that section were omitted.
> (3) Section 446 (particular types of quoted company not treated as close) is treated as omitted.

This brings certain open companies into the scope of the SDLT surcharge: see 104.31 (Open company exemption); 104.33 (Quoted company exemption).

98.48 *Non-UK control*

Para 9 sch 9A FA 2003 provides:

> (1) For the purposes of this Schedule, a company meets the "non-UK control test" in relation to a chargeable transaction if it is a close company within the meaning given by Chapter 2 of Part 10 of CTA 2010 (basic definitions), applying that Chapter subject to the following

> modifications.
> (2) Section 439 (“close company”) applies as if—
> (a) references to a participator were to a relevant participator, and
> (b) references to five or fewer participators were to any number of relevant participators.

Amended as para 9(2) requires, s.439 CTA 2010 provides:

> (1) For the purposes of the Corporation Tax Acts, a “close company” is a company in relation to which condition A or B is met.
> (2) Condition A is that the company is under the control—
> (a) of 5 or fewer relevant participators, or
> (b) of relevant participators who are directors.
> (3) Condition B is that 5 or fewer relevant participators, or relevant participators who are directors, together possess or are entitled to acquire—
> (a) such rights as would, in the event of the winding up of the company (“the relevant company”) on the basis set out in section 440, entitle them to receive the greater part of the assets of the relevant company which would then be available for distribution among the participators, or
> (b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).

Para 9(4)(5) extend the concept of close co by repeating verbatim the rules set out in para 8; see 98.47.1 (“Close company”).

98.48.1 *Relevant participator*

Para 9 sch 9A FA 2003 provides:

> (3) In sub-paragraph (2), “relevant participator” means a participator (within the meaning given by Chapter 2 of Part 10 of CTA 2010) who—
> (a) is non-resident in relation to the chargeable transaction (within the meaning of this Schedule), and
> (b) is not a general partner in a limited partnership.[97]

[97] Para 9(7) sch 9A FA 2003 provides: “The reference in sub-paragraph (3)(b) to a general partner does not include a general partner who possesses, or is entitled to acquire, rights that entitle the general partner, in the event of the winding up of the company or in any other circumstances, to receive more than 1% of the assets of the company which would then be available for distribution among its members.”

98.49 Attribution of rights and powers

Para 9 sch 9A FA 2003 provides:

> (6) Section 451 (attribution of rights and powers) has effect subject to the limitations set out in paragraph 10.

So we move on to para 10 sch 9A FA 2003, which tinkers with the Associate-attribution rule[98]:

> (1) This paragraph sets out limitations on the rights and powers of a person (A) that, apart from this paragraph, would be capable of being attributed to another person (B) under section 451(4) of CTA 2010, as that provision applies for the purposes of paragraph 9(1).

98.49.1 *Attribution: Partners*

Para 10 sch 9A FA 2003 provides:

> (2) Where A and B are partners in a partnership, no rights and powers of A may be attributed to B under paragraph (c) or (d) of section 451(4) of CTA 2010 by virtue of that fact.

98.49.2 *Attribution: Spouse*

Para 10 sch 9A FA 2003 provides:

> (3) Where—
> (a) A and B are spouses or civil partners of each other,
> (b) A and B are living together,[99] and
> (c) A is UK resident in relation to the chargeable transaction,
> no rights and powers of A may be attributed to B under paragraph (c) or (d) of section 451(4) of CTA 2010 by virtue of the fact mentioned in paragraph (a).

98.49.3 *Attribution: De minimis rule*

Para 10 sch 9A FA 2003 provides:

> (4) Where A's interest in a company is de minimis, no rights and powers of A in relation to the company may be attributed to B under any of paragraphs (a) to (d) of section 451(4) of CTA 2010.
> (5) For this purpose, A's interest in a company is "de minimis" if—

[98] See 104.7 (Associate-attribution rule).

[99] Para 10(7) incorporates the standard tax definition of "living together": see App 3.4.3 (Living together: Married couple).

> (a) the proportion of the share capital or issued share capital in the company that A possesses or is entitled to acquire is less than 5%,
> (b) the proportion of the voting rights in the company that A possesses or is entitled to acquire is less than 5%,
> (c) the issued share capital in the company that A possesses or is entitled to acquire would, on the assumption that the whole of the income of the company were distributed among the participators, entitle A to receive less than 5% of the income so distributed, and
> (d) A's rights in the company entitle A, in the event of the winding up of the company or in any other circumstances, to less than 5% of the assets of the company which would then be available for distribution among the participators.
>
> (6) Any rights A has as a loan creditor are to be disregarded for the purposes of the assumption in sub-paragraph (5)(c).

98.50 Funds

98.50.1 *Excluded companies*

REITs are generally required to be open companies, but can under certain exemptions be close.

Para 11 sch 9A FA 2003 provides:

> (1) A company is an "excluded company" for the purposes of paragraph 7(3)(c) if it is any of the following—
> (a) a PAIF [property authorised investment fund];
> (b) a body corporate that is a 51% subsidiary of PAIF;
> (c) a company UK REIT;
> (d) a company that is a member of a group UK REIT.
>
> (2) In this paragraph—
> (a) "PAIF" means a body corporate that is a property AIF for the purposes of Schedule 7A to this Act by virtue of paragraph 2(2) of that Schedule;
> (b) "51% subsidiary" has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010);[100]
> (c) "company UK REIT" has the same meaning as in Part 12 of CTA 2010 (see section 524(5) of that Act);
> (d) "group UK REIT" has the same meaning as in Part 12 of CTA 2010 (see section 523(5) of that Act).

[100] See 64.26 ("51/75/90 % subsidiary").

98.51 *Co-ownership contractual scheme*

Para 15 sch 9A FA 2003 provides:

> (1) Subject to sub-paragraph (2), a co-ownership authorised contractual scheme is not "non-resident" in relation to any chargeable transaction.
> (2) A collective investment scheme that is a co-ownership authorised contractual scheme by virtue of section 102A(7) (EEA schemes) is "non-resident" in relation to all chargeable transactions.

The surcharge response paper provides:

> 2.3 The consultation also set out how entities regarded as companies for SDLT purposes would be treated. Where the entity is a unit trust, residence will be based upon the SDLT residence principles as related to trusts. Where the entity is a co-ownership authorised contractual scheme (CoACS), the scheme will be treated as non-UK resident if it is constituted by arrangements that create rights in the nature of co-ownership where the arrangements take effect as a result of the law of a territory outside of the UK

98.52 Spouses

Para 12 sch 9A FA 2003 provides:

> (1) This paragraph applies where—
> (a) there are two or more purchasers in relation to a chargeable transaction who are or will be jointly entitled to the interest acquired, and
> (b) the following conditions are met in relation to those purchasers.
> (2) The conditions are—
> (a) that, on the effective date of the transaction, the purchasers, or (if there are more than two) two of them, are spouses or civil partners of each other;
> (b) that, on the effective date of the transaction, those spouses or civil partners are living together;[101]
> (c) that one of those spouses or civil partners is UK resident in relation to the chargeable transaction;
> (d) that (apart from this paragraph) one of those spouses or civil partners is non-resident in relation to the chargeable transaction;
> (e) that neither of the spouses or civil partners is acting as a trustee of a settlement.

[101] Para 12(4) incorporates the standard tax definition of "living together": see App 3.4.3 (Living together: Married couple).

> (3) For the purposes of this Schedule, the spouse or civil partner mentioned in sub-paragraph (2)(d) is UK resident in relation to the chargeable transaction.

98.53 Bare trust acquiring lease

Para 13 sch 9A FA 2003 provides:

> (1) Sub-paragraph (2) applies to a chargeable transaction if—
> (a) the purchaser is, or (if there is more than one) the purchasers include, a person (P) who is acting as a trustee of a bare trust, and
> (b) paragraph 3(3) of Schedule 16 (trustee of bare trust granted a lease treated as purchaser of the whole of the interest acquired) applies in relation to P.
>
> (2) In determining for the purposes of this Part of this Act whether the chargeable transaction is a "non-resident transaction", paragraph 2(1)(a) (condition that purchaser be non-resident) has effect as if a reference to the purchaser or purchasers—
> (a) included the beneficiary or beneficiaries of the bare trust, and
> (b) did not include P.

98.54 Trust purchaser

Para 14 sch 9A FA 2003 provides:

> (1) Sub-paragraph (2) applies to a chargeable transaction if—
> (a) the purchaser is, or (if there is more than one) the purchasers include, a person (P) who is acting as a trustee of a settlement,[102] and
> (b) under the terms of the settlement a beneficiary is entitled—
> (i) to occupy the dwelling or dwellings for life, or
> (ii) to income earned in respect of the dwelling or dwellings.
>
> (2) In determining for the purposes of this Part of this Act whether the chargeable transaction is a "non-resident transaction", paragraph 2(1)(a) (condition that purchaser be non-resident) has effect as if a reference to the purchaser or purchasers—
> (a) included the beneficiary or beneficiaries of the settlement, and
> (b) did not include P.

98.55 Alternative property finance

Para 16 sch 9A FA 2003 deals with alternative property finance (Sharia

[102] For completeness: para 14(3) provides: "In this paragraph "settlement" does not include a settlement under a unit trust scheme." Was it necessary to say this?

finance) and is not discussed here.

98.56 SDLT surcharge: administration

The Stamp Duty Land Tax (Administration) (Amendment) Regulations 2021 amended the return form.

Para 18 sch 9A FA 2003 provides:

> (1) Sub-paragraph (2) applies in relation to a land transaction return in respect of a chargeable transaction if—
> (a) in order to determine whether the chargeable transaction is a non-resident transaction, it is necessary to determine whether one or more individuals are UK resident in relation to the transaction under paragraph 4(1), and
> (b) that individual or any of those individuals, at the beginning of the day on which the land transaction return is delivered, has not yet met the condition in that provision (but might turn out to do so depending on their residence during the remainder of the relevant period).
> (2) The land transaction return must be prepared on the assumption that the individual or (as the case may be) each of the individuals is resident outside the UK throughout the period—
> (a) beginning with the day on which the land transaction return is delivered, and
> (b) ending at the end of the relevant period.
> (3) In this paragraph "the relevant period" has the same meaning as in paragraph 4(1).

98.56.1 *Individual becomes UK resident*

Para 19 sch 9A FA 2003 provides:

> (1) Sub-paragraph (2) applies where—
> (a) a land transaction return in respect of a chargeable transaction is prepared on the assumption mentioned in paragraph 18(2), and
> (b) the individual or (as the case may be) each of the individuals in respect of whom the assumption was made subsequently meets the condition in paragraph 4(1) (with the result that the transaction is not a non-resident transaction).
> (2) The land transaction return may be amended, at any time before the end of the period of 2 years beginning with the day after the effective date of the transaction, to take account of the fact that the transaction is not a non-resident transaction.
> (3) Where a land transaction return is amended under sub-paragraph (2),

> paragraph 6(2A) of Schedule 10 (notice of amendment of return to be accompanied by the contract for the transaction etc) does not apply in relation to the amendment.

98.57 Dwelling

Para 20 sch 9A FA 2003 provides:

> (1) This paragraph sets out rules for determining what counts as a dwelling for the purposes of this Schedule.
> (2) A building or part of a building counts as a dwelling if—
> (a) it is used or suitable for use as a single dwelling, or
> (b) it is in the process of being constructed or adapted for such use.
> (3) Land that is, or is to be, occupied or enjoyed with a dwelling as a garden or grounds (including any building or structure on that land) is taken to be part of that dwelling.
> (4) Land that subsists, or is to subsist, for the benefit of a dwelling is taken to be part of that dwelling.
> (5) The main subject-matter of a transaction is also taken to consist of or include an interest in a dwelling if—
> (a) substantial performance of a contract constitutes the effective date of that transaction by virtue of a relevant deeming provision,
> (b) the main subject-matter of the transaction consists of or includes an interest in a building, or a part of a building, that is to be constructed or adapted under the contract for use as a single dwelling, and
> (c) construction or adaptation of the building, or part of a building, has not begun by the time the contract is substantially performed.
> (6) In sub-paragraph (5)—
> "contract" includes any agreement;
> "relevant deeming provision" means any of sections 44 to 45A or paragraph 5(1) or (2) of Schedule 2A or paragraph 12A of Schedule 17A;
> "substantially performed" has the same meaning as in section 44.
> (7) A building or part of a building used for a purpose specified in section 116(2) or (3) is not used as a dwelling for the purposes of sub-paragraph (2) or (5).
> (8) Where a building or part of a building is used for a purpose mentioned in sub-paragraph (7), no account is to be taken for the purposes of sub-paragraph (2) of its suitability for any other use.

98.58 Surcharge: Commencement

Para 6 sch 16 FA 2021 provides:

> 6 (1) The amendments made by this Schedule have effect in relation to any land transaction of which the effective date is, or is after, the commencement date.
>
> (2) But those amendments do not have effect in relation to—
>
> (a) a transaction effected in pursuance of a contract entered into and substantially performed before the commencement date, or
>
> (b) a transaction that—
>
> (i) is entered into pursuant to a contract entered into before 11 March 2020, and
>
> (ii) is not excluded for the purposes of this paragraph.
>
> (3) A transaction is excluded for the purposes of paragraph (b) of subparagraph (2) if—
>
> (a) there is any variation of the contract, or assignment of rights under the contract, on or after 11 March 2020,
>
> (b) the transaction is effected in consequence of the exercise on or after that date of any option, right of pre-emption or similar right, or
>
> (c) on or after that date there is an assignment, subsale or other transaction relating to the whole or part of the subject-matter of the contract as a result of which a person other than the purchaser under the contract becomes entitled to call for a conveyance.
>
> (4) In this paragraph "the commencement date" means 1 April 2021.

Para 17 sch 9A FA 2003 provides:

> In a case within section 44(8) (contract substantially performed and subsequently completed by a conveyance) the later of the notifiable transactions mentioned in that provision is a "nonresident transaction" for the purposes of this Part if and only if the earlier of those notifiable transactions is a non-resident transaction for the purposes of this Part.

Failure to claim right of reimbursement	101.5

99.1 Why settlors matter

This chapter discusses:

(1) The definition(s) of settlor

(2) Subsidiary questions:

- If a settlement has two settlors, what property has each settlor provided

- Whether a settlor provides additional property
- When a settlor provides property
- The concept of adding property (if different from providing property)

The identity of the settlor(s) of a settlement is important for many tax purposes. It is not practical to compile a full list, but the rules include:

Topic	**See**
Taxing settlor on trust income/gains	47.1 (Trust income); 60.3 (Trust gains)
IHT taxation of trusts	75.1 (Excluded property)
Connected person rules	104.14 (Connected: Trustees)
Reverter to settlor IHT exemption	s.54 IHTA

Residence/domicile of the settlor are appropriate connecting factors for taxation of settlors, trustees and beneficiaries. So the question of the identity of the settlor often arises in matters concerning foreign domiciliaries.

The identity of the settlor also matters for non-tax purposes. For instance, a settlor is a "controlling person" whose details need to be disclosed under CRS, and a "beneficial owner" whose details need to be disclosed under TRS.[1] The identity of the settlor may be relevant to the construction of the trust deed[2] and to the administration of the trust.

The focus of this chapter is identifying settlors; but it is sometimes convenient to address other aspects of a topic together with settlor questions.

99.2 Definitions of "settlor"

99.2.1 *Terminology*

There are three tax definitions of settlement.[3] For the purposes of this chapter (who is the settlor), the differences between them do not usually matter.

There are five tax definitions of "settlor". We need labels to distinguish them, and I use the following terms:

Definition of settlor	**Application**
Standard IT/CGT definition(s)	Default definition(s) for IT/CGT/CT
Settlement-arrangement definition	Settlor-interested trust code, & more

[1] See 130.23 (Controlling Person: Trust); 131.19 (Beneficial owner: Trust).

[2] See 87.12.3 (*Pugachev).*

[3] See 87.1 (Definitions of "settlement").

CGT s.86 definition	Applies for s.86 TCGA
IHT definition	Applies for IHT

Equipped with this terminology we can now consider the various definitions of settlor.

99.2.2 *The 5 tax definitions*

Armed with this terminology, we can turn to the definitions. It is helpful to see them side by side:

IT definition	**CGT definition**	**Settlement-arrangement**	**IHT definition**	**CGT s.86 def'n**
s.467 ITA	**s.68A TCGA**	**s.620 ITTOIA**	**s.44(1) IHTA**	**sch 5 TCGA**
(1) In the Income Tax Acts (except where the context otherwise requires)	(1) In this Act, unless the context otherwise requires—	(1) In this Chapter [Chapter 5 Part 5 ITTOIA]—	(1) In this Act	**7** For the purposes of section 86 and this Schedule,
"settlor", in relation to a settlement, means	(a) "settlor" in relation to a settlement means	"settlor", in relation to a settlement, means	"settlor", in relation to a settlement, includes	a person is a settlor in relation to a settlement if
the person, or any of the persons, who has made the settlement.	the person, or any of the persons, who has made, or is treated for the purposes of this Act as having made, the settlement ... [*note 1*]	any person by whom the settlement was made.	any person by whom the settlement was made directly or indirectly,	the settled property consists of or includes property originating from him.
(3) A person ("S") is treated for the purposes of the Income Tax Acts as having made a settlement if—. Income Tax Acts as having made a settlement if—	of this Act as having made a settlement if—	settlement if the person—		property originating from a person are references to—
(a) S has provided property for the purposes of the settlement (directly or indirectly), or	(a) he has provided property directly or indirectly for the purposes of the settlement, or	(a) has provided funds directly or indirectly for the purpose of the settlement,	any person who has provided funds directly or indirectly for the purpose of or in connection with the settlement	(a) property provided by that person; [*note 3*]
(b) S has undertaken to do that.	(b) he has undertaken to provide property directly or indirectly for the purposes of the settlement.	(b) has undertaken to provide funds directly or indirectly for the purpose of the settlement		

Notes

1 For s.68A(1)(b) TCGA see 99.2.12 (Property of which S is settlor)

2 For s.467(3)(b) and (4) ITA/s.68A(2)(b) TCGA, see 99.2.11 (Will trust or intestacy)

3 Para 8(1) sch 5 TCGA continues with provisions dealing with "representing" assets,[4] and para 8(7) provides:

> For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.

For the provisions dealing with reciprocal arrangements, see 99.4 (Reciprocal arrangements).

The standard IT definition is incorporated by reference for CT.[5]

The settlement-arrangement definition originated in 1936 and is the ancestor of the other definitions.

99.2.3 *Definitions: General comments*

The first four definitions are mostly the same, and the CGT s.86 definition is only slightly different. So case law, and guidance, in the context of one definition is generally relevant to them all.

The common theme to all 5 definitions is that the settlor is the person who provides funds/property. (Two of the definitions use the word

[4] See 100.1.3 (Originating).

[5] Section 1169 CTA 2010.

"funds" where others use the word "property" but the words are synonymous; I just use the word property.) Property includes both income and capital.

The legislation sometimes refers to purpose of the settlement (in the singular) and sometimes purposes (in the plural) but there is no distinction.[6]

In most cases, the same person, the person providing funds, is the settlor under all 5 definitions and in the general sense.

Unpacking definitions 1-4, a person is a settlor if, directly or indirectly, they provide funds or:

(1) Made/enter into the settlement
(2) Undertake to provide funds

But points (1) and (2) are only relevant to a person who does not provide funds; if they provide funds, it does not matter whether they also make/enter into the settlement, or undertake to provide funds.

99.2.4 *Guidance*

Para 9(3) sch 5 TCGA refers to "providing property" for the purposes of a settlement;[7] this is the wording at the heart of the tax definitions of settlor. **SP 5/92** gives guidance on para 9(3) which is therefore relevant to all the definitions of settlor.

Similar wording is found in the definition of protected trusts. Guidance in the **Protected-trust Note**[8] is therefore also relevant.

I also refer to STEP guidance on the concept of settlor for CRS (**"STEP CRS guidance"**).[9]

99.2.5 *Are the definitions exclusive?*

The IT/CGT definitions apply "unless the context otherwise requires". This acknowledges that in some cases the settlement-arrangement or the CGT s.86 definitions may apply instead. I cannot think of any other case

[6] This is self-evident, but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at p.507: "The statute seems to me to use the word 'purpose' and 'purposes' indiscriminately".

[7] See 60.8.2 (Trigger 1: Providing property).

[8] See 92.1.1 (Protected-trust guidance).

[9] CRS and Trusts (March 2017) *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

where the context would "otherwise require".

The IT/CGT/Settlement definitions use the word "means" which is the term used for an exhaustive definition. The context shows that the words "is treated as" in the later part of these definitions also constitute an exhaustive (not inclusive) definition.[10]

The IHT definition (unlike the other definitions) uses the non-exhaustive term, "includes". The drafter of the IHT provision must have had in mind the possibility that a person might be the settlor of a settlement in the natural sense of the word, but was not within the IHT definition. It is difficult to think of such a case, but it is also difficult to say it could not happen. However that may be, for practical purposes at least, "includes" here means "means".

99.2.6 *Providing property: Bounty*

The concept of bounty (gratuitous intent) is a requirement of:

(1) the settlement-arrangement of settlement[11]

(2) providing property for the purposes of a settlement, which is part of the definition of settlor.

So cases discussing settlement-arrangement/bounty can also be relevant to the question of who is the settlor; and vice versa.[12] The common theme to the definitions is that the settlor is the person who provides property, and providing property requires an element of bounty (gratuitous intent).

The CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> Basically under S68A(1) to (3) [TCGA] a person is a settlor if ... he has provided property for the purposes of the settlement. On the basis of *IRC v Leiner* 41 TC 589 these words are regarded as applying only where there is 'bounty'.

Similarly, Para 1 Protected-trust Note[13] provides:

[10] See App 8.4 (Deemed/treated misused).

[11] See 87.4 (Settlement-arrangement definition).

[12] See *Jones v Garnett* [2007] UKHL 35 at [83]:

> "... the definition of settlement ... and of the settlor [both in s.620 ITTOIA] are closely connected, and it appears to me to be perfectly proper to rely upon observations as to what can be taken into account when considering who is a settlor, when deciding whether there is a settlement."

[13] For the Protected-trust Note, see 99.2.4 (Guidance).

> The words 'provided …for the purposes of the settlement' connote an intention on the part of the provider to confer some bounty on the settlement or its beneficiaries (see *IRC v Leiner* (1964) 41 TC 589).

For completeness: This issue was floated in *Clipperton v HMRC*:[14]

> Where an arrangement has been found to be a settlement, which means that it involves the necessary element of bounty, we are not persuaded that a person can only be a settlor if they provide an element of bounty to that settlement. ... However, we do not need to determine this issue, and it is appropriate to leave it to a case where it is dispositive.

I do not think any inference should be drawn from a comment such as this, not just because the issue was left for another time, but because there is so much to say which the Court does not begin to consider. There are different parts to the definition of settlor. It is considered that there must be an element of bounty in order to "provide" property, and so to be a settlor under that part of the definition; any other decision would throw well established law into confusion and uncertainty. But an element of bounty is not necessary in order to make or enter into a settlement, and so to be a settlor under that part of the definition.[15]

99.2.7 *Make/enter into settlement*

A person is a settlor under three of the definitions if they make/enter into a settlement directly or indirectly. It is not obvious how one can make/enter into a settlement indirectly, but the words do show that "make/ enter into" is not to be narrowly understood.

The words "enter into" are not found in the IHT definition of "settlor". That does not make any difference. Perhaps the drafter thought that make/enter into are synonymous and there was no need for both. Or perhaps the reason is that:

(1) In the context of the settlement-arrangement definition, the word "settlement" includes not just a trust, but also an agreement or arrangement. One makes a trust. One "enters into" an agreement or arrangement.

(2) The IHT definition does not include an agreement or arrangement.

If that is right, the drafter of the standard IT/CGT definitions did not

[14] [2022] UKUT 00351 (TCC) at [129]. But the case is not yet final.

[15] See 99.39.2 (Commercial trust: Settlor).

realise it, so those definitions include the words "enter into", I think infelicitously; but no harm is done.

99.2.8 *Settlor: settlement-arrangement*

The definition of settlor for the purposes of the settlement-arrangement definition is worded (more or less) identically to the standard IT/CGT definition. But the definitions are different because although each definition uses the same word, "settlement", the word here has a different definition: it means settlement-arrangement. Where a settlement-arrangement involves a trust and other steps, it is possible that the settlor of the trust (who is the settlor under the standard IT/CGT definition) may not be the same as the settlor of the arrangement. Though in practice this has not happened. The point has been argued in the actor cases, and in the *Clipperton/Dunsby* "dividend replacement strategy" cases.[16] In *Dunsby v HMRC*:[17]

> 100. Given our conclusion as to the scope of the settlement, there is no real doubt as to the identity of the settlor – the settlor was Mr Dunsby and not G.

Why?

> ... Mr Dunsby put in place the entire arrangement that constituted the Scheme. He (as the sole shareholder of the Company) passed the resolutions that created the S share, following which (as shareholder and sole director) he permitted G to acquire the S share at its nominal value. G subsequently put that share in the Trust pursuant to arrangements again put in place by, and directed by, Mr Dunsby. The Company's board of directors, with Mr Dunsby as sole director, then resolved to pay the dividend of £200,000 in respect of the S share, which gave rise to the direct payment to him of £195,400 as we have described above.

What about G?

> 101. G was, as the FTT held at [126], "little more than a functionary" in that process. She did not have any independent role; rather she simply carried out the steps required of her under the Scheme established by Mr Dunsby, effectively as Mr Dunsby's agent or nominee.

[16] For these cases, see App. 2.2.7 (Pre-arrangement steps).

[17] For the facts see App.2.2.7 (Pre-arrangement steps).

The word “effectively” does a lot of work here.

> Nor, as the FTT noted, did she provide funds to the settlement. Her initial subscription of £100 for the S share was (in effect) refunded through the payment to her of that sum when the Company’s dividend was declared; thereafter she stood to receive 1.5% of any dividend declared by way of remuneration for her role in the Scheme. The funds settled on the Trust came entirely from the decision of the Company, with Mr Dunsby as sole director, to declare a dividend on the S share. In those circumstances we do not think that, on any realistic view, G can be described as having either “made” or “entered into” the settlement for the purposes of s 620(2) ITTOIA.

The word “realistic” does a lot of work here, as it often does. But the settlor is the same even if one looks at the classic trust alone:

> 102. We would, moreover, reach the same conclusion even if we had concluded that the settlement should be narrowly drawn by reference solely to the creation of the Trust of the S share. For the reasons set out at [100] and [101] above, we consider that the settlor of that Trust would on that hypothesis still be Mr Dunsby and not G.

One might reached the same conclusion in an easier way by saying Mr Dunsby was the settlor on the grounds that he provided that property indirectly, or that G acted at his behest.[18] There are many routes to the same destination.

99.2.9 *Undertaking to provide*

The IT/CGT and settlement-arrangement definitions provide that a person is a settlor if they undertake to provide funds directly or indirectly for the purpose of the settlement. The IHT and CGT s.86 definitions omit the reference to undertakings, but that should make no difference. An undertaking to provide is provision of property, namely, a chose in action (the undertaking).

TSE Manual formerly provided at TSEM4120:

> *In practice if someone has undertaken to provide funds, but actually does not, we would not seek to apply s.624 or s.629 ITTOIA.*

The passage was deleted in 2007, though there is no reason to think that HMRC practice has changed. It is difficult to see how s.624/629 could

[18] See 99.8 (B makes trust at A’s request).

apply, as no income arises from an undertaking (unless and until followed up by a payment).

Undertakings to provide funds are rarely found in practice so this has limited practical importance. See too 99.27 (Indemnities and guarantees).

99.2.10 *Settlor: IHT definition*

The IHT definition (only) provides that a person is settlor if they provide funds"for the purpose of or in connection with the settlement". It is considered that the additional (underlined) words make no or no significant difference, for if something is provided "in connection with" a settlement it must be provided "for the purpose of" the settlement; bearing in mind that "purpose" does not need to be a very focussed or intense purpose.[19] The attraction of this view is that it makes the "who is the settlor" area of tax law more coherent if (so far as possible) the same test applies for all the taxes.[20]

There are specific IHT provisions which may affect the identity of the settlement and settlor for IHT.[21] So sometimes a person who is the actual settlor in the general sense is not regarded as the settlor for IHT. This chapter considers the general sense of settlor.

99.2.11 *Settlor: CGT s.86 definition*

The wording is derived from the provisions dealing with multiple settlors.[22]

There are two differences between the CGT s.86 definition and the other definitions of settlor, which can be important.

The CGT definition does not have the words "make/enter into a

[19] See 99.32 (Purpose: Inattentive settlor).

[20] Why did the drafter use a different form of words, if they wanted the same result? Perhaps the reason is that "settlement" for IHT is somewhat narrower than settlement-arrangement. The drafter may have considered cases where it may have been argued that A is a settlor of a settlement-arrangement (providing property for the purpose of the *arrangement*) but A is not a settlor for IHT purposes (not providing for the purposes of the IHT-settlement). For instance in *Crossland v Hawkins* 39 TC 493 the taxpayer accepted that (if there were an arrangement) he would be the settlor of the settlement-arrangement; but he argued (unsuccessfully) that he was not the settlor of the classic settlement. To anticipate such arguments, perhaps, the drafter added the words "or in connection with".

[21] See 79.2 (Addition/transfer to trust); 75.13 (Initial interest of settlor/spouse).

[22] See 100.1.2 (Multiple settlor provisions).

settlement". This is deliberate, to exclude from s.86 an employer who makes a pension or other commercial trust.

Under the CGT s.86 definition, the settlor must provide "settled property". Under the other definitions, the settlor must provide property "for the purposes of the settlement". The s.86 definition is slightly narrower. Providing property for a company held by a trust is the provision of property for the purposes of the settlement, but it is not the provision of settled property.[23]

99.2.12 *Ceasing to be settlor*

IT definition: s.469 ITA	**CGT definition: s.68A(6) TCGA**
(1) A person ("S") who is a settlor in relation to a settlement ceases to be so when the following condition is met.	A person who has been a settlor in relation to a settlement shall be treated for the purposes of this Act as having ceased to be a settlor in relation to the settlement if—
(2) The condition is that—	
(a) no property of which S is the settlor[24] is comprised in the settlement,	(a) no property of which he is a settlor is comprised in the settlement,
(b) S has not undertaken to provide property (directly or indirectly) for the purposes of the settlement in the future, and	(b) he has not undertaken to provide property directly or indirectly for the purposes of the settlement in the future, and
(c) S has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.	(c) he has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.

The CG Manual provides a straightforward example:

> **CG33245 Settlor: from 6 April 2006: Basic principles** [Jul 2019] [The Manual paraphrases s.68A(6) TCGA and continues:] For example A and B execute a deed of variation under which property left to them by their father's will is resettled on behalf of their children. Broadly speaking half the income and capital is held for the children of A and the other half for the children of B. From the time the variation is made,

[23] See 99.24 (Property provided to co in a trust).

[24] See 99.2.13 (Property of which S is settlor).

> A and B are settlors of the settlement (see CG 33248).
> In due course the share relating to A's children has been wholly distributed. In this case we should say that A was no longer a settlor.

This rule does not apply for the settlement-arrangement definition of settlor.[25] That would not matter for the purposes of s.624, as if property is not comprised in the settlement, no income can arise from it; but it would matter for the definition of connected person. On the facts of the example in the CG Manual above, A would continue to be connected with the trustees even after the share relating to his children had been distributed, because the settlement-arrangement definition of settlor applies here. It is possible to envisage circumstances where this has important consequences, but that would not be common.

There is no equivalent in the IHT definition of "settlor", but if it mattered, the separate-settlement fiction would have a similar effect.[26]

99.2.13 *Property of which S is settlor*

This expression is used in two (relatively unimportant) provisions:

Topic	**Section**	**See**
Ceasing to be settlor	s.469 ITA/68A(6) TCGA	99.2.12
Instruments of variation		99.37

IT definition: s.467(2) ITA	**CGT definition: s.68A(1) TCGA**
In the Income Tax Acts (except where the context otherwise requires) a person is a settlor of property if—	In this Act, unless the context otherwise requires ... (b) a person is a settlor of property which—
(a) the property is settled property because of—	(i) is settled property by reason of
(i) the person's having made the settlement, or	his having made the settlement
(ii) an event which leads to the person being treated by this Chapter	(or by reason of an event which causes him to be treated under this

[25] Section 467(8) ITA provides: "This section and sections 469 to 473 do not apply for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (amounts treated as income of settlors)."

[26] See 79.5 (Separate-settlement fiction).

[Chapter 2 Part 9 ITA] as having made the settlement, or	Act as having made the settlement), or
(b) the property derives from settled property within paragraph (a).	(ii) derives from property to which sub-paragraph (i) applies.

99.2.14 *"Derives"*

"Derive" is used in the definition of settlor in s.467 ITA/68A TCGA; s.471 ITA/68B TCGA (inter-trust transfer) and the IoV settlor provisions.

IT definition s.465(7) ITA	**CGT definition s.68A(7) TCGA**
For the purposes of this Chapter [Chapter 2 Part 9 ITA] property is derived from other property if—	(7) For the purpose of this section and sections 68B and 68C property is derived from other property—
(a) it derives (directly or indirectly and wholly or partly) from that other property or any part of that other property, and	(a) if it derives (directly or indirectly and wholly or partly) from that property or any part of it, and
(b) in particular, if it derives (directly or indirectly and wholly or partly) from income from that other property or any part of that other property.	(b) in particular, if it derives (directly or indirectly and wholly or partly) from income from that property or any part of it.

99.2.15 *Settlor definitions: Critique*

Three definitions of "settlement" seems complicated, but there are material differences between them, and each definition is appropriate in its own context. However, five definitions of "settlor" is extravagant, as four of them are (more or less) identical, and the CGT s.86 definition has only small differences (and needs even fewer).

A rational tax system would have one standard definition of settlor, which would apply generally, subject to specific amendment where needed.[27] We live in bad times for UK tax policy, but eventually, perhaps,

[27] The s.86 definition needs to be different in one respect only.
Of course the definitions of settlor developed piecemeal as the tax system evolved. The FA 2006 introduced the standard IT/CGT definition but only applied it for some (not all) purposes of IT and CGT. It therefore increased the number of definitions of "settlor" and made a complex situation rather more complex. This is curious because

someone will tidy up this mess. It should not be so hard.

99.2.16 *Settlor: Non-tax definitions*

Outside tax, the word "settlor" is often used with no definition, for instance in MLR 2007.[28] Subject to context, it has its normal meaning. It is considered that means, a person who provides property for the purposes of a trust.[29] The CRS definition is (more or less) the same.[30]

99.3 Will trust or intestacy

IT definition: s.467 ITA	**CGT definition: s.68A TCGA**
(3) A person ("S") is treated for the purposes of the Income Tax Acts as having made a settlement if ... (b) the settled property, or property from which the settled property derives, is or includes property within subsection (4)	(2) A person is treated for the purposes of this Act as having made a settlement if ...
(4) Property is within this subsection if—	
(a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and (b) immediately before S's death, the property was property of S— (i) which was disposable property (see section 468), or (ii) which represented S's severable share in any property to which S was beneficially entitled as joint tenant.	(b) [i] the settled property, or property from which the settled property is derived, is or includes property of which he was competent to dispose immediately before his death, and [ii] the settlement arose on his death, whether by will, on his intestacy, or otherwise.
	(5) In subsection (2)(b) "property of which he was competent to dispose immediately before his death" shall be

the authors of the 2006 reforms were emphatic that the two formerly distinct definitions of trustee residence (CGT and IT definitions) should be replaced by a single definition. But this is now of historical interest only.

[28] See 131.19 (Beneficial owner: trusts).

[29] For completeness: Art 1 Trusts (Jersey) Law 1984 provides:

> "settlor" means a person who provides trust property or makes a testamentary disposition on trust or to a trust.

This definition is (more or less) the same as the natural meaning.

[30] See 130.23.2 (Settlor).

	construed in accordance with section 62(10) (reading each reference to “assets” as a reference to “property”).

Disposable property/competent to dispose is defined as follows:

s.468 ITA	**s.62(10) TCGA as amended by s.68A(5)**
(1) This section applies for the purposes of section 467(4)(b)(i).	In this section
(2) Property is disposable if S could have disposed of it by S's will. (3) In working out whether any property could have been so disposed of— (a) make the assumptions mentioned in subsection (4), and (b) ignore the powers mentioned in subsection (5).	references to ~~assets~~ property of which a deceased person was competent to dispose are references to ~~assets~~ property of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will,
(4) Assume that— (a) S is of full age and capacity,	[words *full age & capacity* already included, see above]
(b) the property is situated in England and Wales, and	assuming that all the ~~assets~~ property were situated in England
(c) if S is not domiciled in the UK, S is domiciled in England and Wales.	and, if he was not domiciled in the UK, that he was domiciled in England,
(5) The powers to be ignored are— (a) any power of appointment giving S the right to dispose of the property, and (b) any testamentary power conferred by statute to dispose of entailed interests.	and include references to his severable share in any ~~assets~~ property to which, immediately before his death, he was beneficially entitled as a joint tenant.

One might have thought that this was not needed. An intestate does not make/enter into a trust arising on intestacy; and it might perhaps be argued that a testator does not make/enter into a trust arising under their will. One might have thought that a testator or intestate provided property for the purposes of the settlement. But the cases do not support that view,[31] so express provision is needed.

This rule does not apply for the settlement-arrangement definition of

[31] See 88.8.1 (Is estate a “settlement” for s.87).

settlor.[32]

99.4 Reciprocal arrangements

A reciprocal settlement is just another way of providing property indirectly, but it is dealt with expressly in each of the five definitions:

s.467(6) ITA	**s.68A(4) TCGA**	**s.620(3) ITTOIA**	**s.44(1) IHTA**	**p.8(3) sch 5 TCGA**
If a person (“A”) makes or enters into a settlement in accordance with reciprocal arrangements with another person (“B”)—	Where one person (A) makes or enters into a settlement in accordance with reciprocal arrangements with another person (B), for the purposes of this Act—	A person is, in particular, treated as having made a settlement if the person ...	In this Act “settlor”, in relation to a settlement ... includes any person who ...	Where a person who is a settlor in relation to a settlement makes reciprocal arrangements with another person for the provision of property or income, for the purposes of this paragraph—
(a) B is treated for the purposes of the Income Tax Acts as having made the settlement, and	(a) B shall be treated as having made the settlement, and	(c) has made a reciprocal arrangement with another person for the other person to make or enter into the settlement.	has made with any other person a reciprocal arrangement for that other person to make the settlement	(a) property or income provided by the other person in pursuance of the arrangements shall be treated as provided by the settlor, but
(b) A is not to be treated for the purposes of the Income Tax Acts as having made the settlement just because of the reciprocal arrangements.	(b) A shall not be treated as having made the settlement by reason only of the reciprocal arrangements.			(b) property or income provided by the settlor in pursuance of the arrangements shall be treated as provided by the other person (and not by the settlor).

It is considered that the differences in wording do not matter.

Three of the definitions say expressly that each party is be treated as only

[32] Section 467(8) ITA provides: “This section and sections 469 to 473 do not apply for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (amounts treated as income of settlors).”

having made one settlement, not both; but that should be implied for the other two.

It sometimes happens that spouses (or other members of one family) make trusts at the same time, and each settlor may benefit under the other's trust. It is considered that these are not "reciprocal settlements" unless one trust is specifically made in return for the other.[33] The mere knowledge the two settlements are being made at the same time is not enough.

99.5 Nominal settlor

The document which creates a trust (the trust deed[34]) is typically made between two parties:
(1) a person described in the trust deed as "the settlor" and
(2) the original trustees

Sometimes the person named as settlor provides only a nominal amount of trust property (eg £10).[35] Such a person is a settlor under the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition. This is for two reasons (either one would suffice):
(1) They make/enter into the settlement
(2) They provide property (even though only a nominal amount)

Such a person is called a nominal settlor. The nominal settlor is not usually the only settlor, for there will be another person who provides more substantial trust property. Practitioners sometimes express the distinction by using the term "economic settlor" to describe the person who provides the substantial trust property.[36]

[33] There is an interesting discussion of reciprocity from a sociological perspective in Bauman, *Postmodern Ethics* (1st ed, 1993), pp. 56-58.
https://www.kessler.co.uk/wp-content/uploads/2012/04/Bauman_Postmodern_Ethics.pdf
Bauman rightly observes that the essential element of reciprocity is that it affects motive. The distinction is between (1) disinterested generosity and (2) conduct inspired by considerations of self-interest. Reciprocity (like so much in life) offers shades of grey, matters of fact and degree, which the tax system must resolve into black or white.

[34] If the document is not made by deed, the correct term is "trust instrument".

[35] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 10.14 (Nominal settlor), where this style of drafting is discouraged.

[36] See App 7.7.1 (Economic terms with antonym).

The fact that the nominal settlor has provided a nominal sum, and is a settlor within the tax definitions, does not normally matter for tax. It does not normally matter for trust/property law purposes.[37] But it matters for CRS. STEP CRS guidance provides:

> **'nominal' and joint settlors**
> There may be trusts in existence where an individual (X) acts as the named settlor of the trust and contributes a nominal amount on its creation but where another individual (Y) then makes the substantive contribution of assets to the trust. In circumstances where trustees satisfy themselves that X has only made a nominal contribution to trust assets and that Y has made the substantive contribution, then applying AML/KYC [anti-money laundering/know your client] principles, Y should be regarded as the settlor of the trust for CRS purposes rather than X. However, in accordance with CRS and FATF recommendations, HMRC consider that it is also necessary to identify and disclose X as a settlor and that the full value of the trust assets should be reported with respect to both X and Y notwithstanding the fact that X had added only a nominal amount.[38]

Sometimes the person named as settlor may not provide any property at all. The trust documentation typically says or suggests that they have, but in practice I suspect it is often not done. In these cases it is suggested that:

(1) The nominal settlor is not a settlor for CRS purposes as they have not provided any property.

(2) The nominal settlor is still a settlor under those three (wider) tax definitions, because they make/enter into the settlement by signing the trust deed and assuming such powers and position as the trust deed may provide.

Sometimes the nominal sum provided by the nominal settlor is spent. The nominal settlor then ceases to be a settlor for IT/CGT purposes but

[37] *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch) at [214]: "At times the defendants made submissions about the intentions of the "settlor", by which they meant the trust companies. I reject that approach. It is true that these deeds are drafted so that the declaration of trust is over a nominal sum and so from that perspective the trust company could be called a settlor. However this is unreal. The real settlor of these trusts is Mr Pugachev."

[38] CRS and Trusts (2017) para 1.3 *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

continues to be a settlor under the settlement-arrangement definition.[39]

A nominal settlor is typically the "settlor" for the purposes of the trust deed, as the term settlor is defined that way. That definition does not determine who is (and who is not) the settlor within the various tax definitions but some aspects of the general sense of settlor may seep into the statutory definitions. This may explain why no-one suggests that the original trustees are settlors, though they are parties to the trust deed. Likewise the protector is not a settlor, though the protector is sometimes a party to the trust deed.

99.6 Tainting

It does not generally matter if someone provides a trivial amount of property to a trust. But sometimes important tax consequences follow if anything is provided, even if very little. This is known as "**tainting**" a trust.[40] This may be the case whether the funds are provided by the settlor or by someone who was not the settlor.

In particular, provision of trivial funds may lose the benefit of the following reliefs:

Relief	**See para**
Protected-trust reliefs (for s.86, s.624, s.720)	92.4; 92.9.5; 92.13.5
Various transitional reliefs:	
1991 and 1998 transitional reliefs for s.86	60.6; 60.8
1998 transitional relief for s.87	61.41
Trust residence for mixed resident trustees	7.7

Unfortunately the statutory drafting is different in each of these reliefs. This does make a coherent explanation more difficult, but such is the patchwork nature of UK tax.

Para 2 Protected-trust Note[41] comments on trivial additions:

> HMRC has given no indication they would be willing to apply a de minimis disregard even though it would obviate the administrative burden of establishing evidence of intent or inadvertency. It follows that even a minimal addition can taint a settlement. However, in practice many minimal additions are unintentional and here absence of gratuitous intent would prevent tainting.

[39] See 99.2.12 (Ceasing to be settlor).

[40] This term was adopted by Parliament in F(no.2)A 2017.

[41] For the Protected-trust Note, see 99.2.4 (Guidance).

Provision of trivial funds in principle makes the provider a settlor and so a connected person.

In these cases, the question of when funds are provided may also arise.

For the position where a lender leaves a loan outstanding, see 99.26 (Loans).

99.7 A gives to B, B gives to trust

Suppose:

(1) A gives property to B unconditionally;[42] and
(2) B gives the same[43] property to a trust.

Two "settlor" questions arise:[44]

(1) In what circumstances does one say that A is the settlor of the trust, having provided the property indirectly? That is, what is the meaning of "providing indirectly"?
(2) If A is the settlor (having provided property indirectly), can one say that B is not a settlor, perhaps on the grounds that A is the "real" settlor?

One might expect to find guidance to these questions in *Hatton v IRC*.[45] The facts were as follows:

(1) Mrs Cole ("the mother") made a settlement ("the first settlement")

[42] The position is different if:
(1) The gift from A to B is made on terms which require B to transfer the property to the trust, or
(2) B holds on trust for A (which seems unlikely but that was the case in *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2017] EWHC 2426 (Ch), see at [205])

In these cases, clearly:
(1) A would be the settlor,
(2) B would not be a settlor.

It is also different if the gift from A to B is made by instrument of variation: see 99.37 (Trust made by deed of variation).

[43] Similar points arise if B gives other property (not the property given by A) if this is part of an arrangement between A and B.

[44] Other issues may also arise. If A is a beneficiary of the trust, A's gift to B may become a gift with reservation: see 78.6.3 (A gives to B, B gives to trust). Note that even if A is a settlor of the discretionary trust, A has not made a chargeable transfer and no IHT is payable by A on the gift to the trust by B.

[45] 67 TC 759. For another aspect of this decision see 99.33 (Purpose: Settlor's adviser/agent).

conferring on Mrs Hatton ("the daughter") a valuable equitable interest.

(2) The daughter transferred her interest to a new settlement ("the second settlement").

So this was a case of a gift to B followed by gift to trust by B.
It is important to note the background facts:

> Once the first settlement had been executed ... it was a virtual certainty that the second would be made on the following day provided that [the mother] was then still living.[46]

99.7.1 *Is A an indirect settlor?*

The Special Commissioners held:

> [the mother] was a settlor of the second settlement having directly or indirectly provided the only funds which were subjected to it.[47]

The judge held:

> The Special Commissioners ... held that [the mother] was properly to be treated as a settlor of the second settlement on the ground that, by making the first settlement, [the mother] was a person who had provided funds directly or indirectly for the purpose of or in connection with the second settlement; and so, in relation to the second settlement, fell within the definition [of settlor]. In my view, they were entitled to reach that conclusion on the facts.[48]

Hatton is a clear case of providing funds indirectly because the two gifts (from A to B, and from B to the trust) were part of an arrangement and it was a "virtual certainty" that the second gift would follow the first. Are these essential requirements? Unfortunately the Special Commissioners, and the court, did not address this point.

It is clearly not sufficient that B's funds are historically derived from A.[49]

[46] 67 TC at p.771. The Special Commissioners added:

> [The daughter] was content to leave the details to [the mother's advisers]. There was no real likelihood that she would reject the suggestion that she should make the second settlement when Mr Willcox [her adviser] put it to her.

But nothing turns on that.

[47] At p.768G.

[48] 67 TC at p.789.

[49] This is self-evident; but if authority is needed, see the quote from *Fitzwilliam* at 99.9 (Trust appoints to B, B gives to new trust).

Something more is required, but what? It might be said that all paraphrases are suspect and the court must return to the words of the statute. But when the words are so vague, some gloss is necessary to avoid hopeless uncertainty. At first sight, the concept of a "clean break" seems a useful one for determining whether property is provided indirectly. That is, if there is a clean break between A's gift to B, and B's gift to the trust, A has not provided property indirectly. But "clean break" is only a metaphor which itself needs elucidation. It is not much more than a colourful label. It is suggested that A is a settlor (having provided property indirectly) if and only if (like *Hatton*) there is an arrangement under which:

(1) A makes a gift of property to B, and intends that B should promptly make the gift to the trust.
(2) B gives the property to a trust in fulfilment of the wishes of A.
(3) It is virtually certain that B's gift will be made.

Of course, this formulation will not solve all problems, since the factual questions may arise as to whether there is an "arrangement", what is A's intention and whether B makes a gift in fulfilment of A's wishes. But this is probably the best that can be done. It is consistent with the "conscious association" comments in *Fitzwilliam*.[50] It might be said that this is too narrow a test and it favours the taxpayer as it allows tax planning of the kind considered in 99.41 (Planning to create excluded property trust). However, the planning is not all that easy! No looser test can be applied without considerable uncertainty. Moreover (see below), the consequences of A being an indirect settlor is that B is not a settlor; this suggests a narrower test is appropriate, for if B is a genuinely independent agent B should be the settlor.

99.7.2 *Is B also a settlor?*

In *Hatton* the Special Commissioners held that the daughter did not provide the funds for the second settlement.[51] The reason was, it appears, that the mother had provided the funds indirectly and this excluded the possibility that the daughter had provided them.

[50] See 99.9 (Trust appoints to B, B gives to new trust).

[51] at p.768H. Confusingly, the Special Commissioners also say that the daughter *was* a settlor within the IHT definition. The reason, presumably, is that, although she did not provide property, she was a person by whom the second settlement was made. But nothing turns on that.

The judge held on the appeal that it was immaterial (for the purposes of the IHT provisions being considered) whether the daughter was also a settlor of the settlement.[52] The judge did suggest that the daughter might also be a settlor.[53]

Approaching the matter as one of principle, untrammelled by authority, it is suggested that the Special Commissioners' approach is to be preferred. As a matter of logic it is possible for A to provide property indirectly, and B to provide it directly, but the legislation is framed on the basis that trust property can have only one "provider". This is clearly the case for the IT and CGT settlor-interested trust provisions.[54] It is suggested that the IHT definition should be construed in the same way. If property is provided indirectly by A, it should not be regarded as provided by B.

A similar issue arises in the definition of capital payment (receipt of a benefit directly or indirectly from the trustees) where a similar analysis applies.[55]

99.7.3 *HMRC views*

The TSE Manual provides:

> **TSEM4300 settlement for unmarried minor child** [Sep 2021]
> **Indirect gift of shares from parent**
> Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but *shortly afterwards* she gifted them to her grandchildren. The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*). ...

This is essentially a case of:

(1) A gift from Mr J to the grandmother; and
(2) A gift from the grandmother to the grandchildren.

[52] at p.791B.

[53] The conclusion that the mother was a settlor "did not lead, necessarily, to the further conclusion that [the daughter] was not also a settlor". See p.791B.

[54] See 100.2.1 (Direct and indirect settlors).

[55] See 61.8.1 (Indirect receipt from trust).

The Manual's tax analysis is as follows:

> The true settlor here is Mr J *rather than the children's grandmother*. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

The words in italics suggest that HMRC accept the view set out above: if J is the settlor then the grandmother is not.

Similarly Helpsheet 270 (Trusts and settlements – income treated as the settlor's) (2016, updated 2021):

> **Example 1** (Sue and Roger)
> S gives £1,000 to her brother R to put into trust for her children. R sets up a trust with this money and although he is the named settlor in the trust deed, S is treated as the real settlor because it was she who indirectly provided (or settled) the funds.

It is implied that R is not the settlor.

99.8 B makes trust at A's request

In *Mills v IRC*:[56]

> Suppose
> [1] that a man owing a debt of honour or of gratitude to a friend, without any legal obligation proposed to discharge it by paying £1,000 to the friend, and
> [2] that the latter asks that the sum be paid not to him but to the trustees of a settlement, which is done.
>
> The payment of the money to the trustees would obviously be a provision of funds for the settlement. On a purely objective view the payer could be said to have made that provision, but I think that the friend should properly be regarded as the person making this provision. It would be just as if the money had been first paid to him and then paid by him to the trustees. *The payer would have acted at his behest*. ... the payer of the £1,000 would not have been actuated by any desire to benefit the persons interested under the trusts. Although in this instance his action would not have been self regarding, it would not have been related to any motive connected with the settlement.

In this scenario there are two persons involved, who I call the payer and

[56] 49 TC 367 at p.387 (CoA). Note that while the friend is the settlor, the friend does not make a transfer of value for IHT: only the payer makes a transfer of value.

the friend.

The comment in *Mills* is right if (as is assumed) the payer agrees (albeit without legal obligation) to make the payment at the direction of the friend so that the friend has *de facto* (though not *de jure*) power of disposition of the funds. But in practice this is not likely to arise very much. The facts have to be unusual.

The position is different if a parent proposed to make a gift to a child, and the child merely *asks* that the sum be paid to trustees of a settlement for themselves and their family. For a parent will feel moral obligations to his grandchildren as well as to the child; the parent has no (even non-binding) obligation to make a payment to the child; the child has no *de facto* power of disposition over the funds; in such circumstances the parent (not the child) is the settlor. The child has not provided funds even indirectly.

The position is different if the friend explains to the payer that the gift to the trust is the best way to benefit the friend, for then the decision to make the gift to the trust is that of the payer, not the friend.

Suppose:

(1) A asks B to transfer a nominal sum as an initial trust fund, and
(2) B does so, not because B wishes to benefit the beneficiaries by the payment, but because A has asked B to, as a favour to A

Applying the principle from *Mills*, A is the (indirect) settlor of the nominal sum. But in practice that is not likely to matter.

99.9 Trust appoints to B, B gives to new trust

Fitzwilliam v IRC concerned an arrangement under which:

(1) Trustees of a will trust exercised their power of appointment ("step 3") to confer a valuable equitable interest on a beneficiary.
(2) After a short interval,[57] the beneficiary ("B") transferred this interest to a new trust ("step 5").

So this was in essence a case of an appointment from a trust to B,

[57] Steps 3/5 took place on 14 Jan/7 Feb, so the time gap was 24 days. (The taxpayer's advisers described this a "respectable interval"). During this time the beneficiary received separate legal advice. But the decision did not turn on those facts.
The outcome would have been different if the beneficiary had been under an obligation to create the settlement at step 5 (though this possibility did not arise on the facts and was not discussed.)

followed by a gift to a new trust by B (though in the context of two artificial IHT avoidance schemes). One question was: who was the settlor of the new trust: the beneficiary or the testator of the will trust (or both). Lord Keith said:

> The argument for the Crown is that, by virtue of the appointment contained in step 3, property was provided to [B] directly or indirectly for the purpose of or in connection with the settlement which [B] later made under step 5. The person who provided that property is said to be [the testator], because the appointment by the trustees falls to be read back into his will, under the principle ... that for the purposes of the Scottish rule against successive liferents and the English rule against perpetuities the exercise of a power of appointment must be written into the instrument creating the power.[58]

This argument was rejected:

> [The testator] is, therefore, to be treated as the settlor so far as concerns the trust purposes contained in the appointment made by his trustees under step 3, but he cannot reasonably be regarded as having provided property directly or indirectly for the purpose of or in connection with the settlement made by [B] under step 5.
>
> The words "for the purpose of or in connection with" connote that there must *at least be a conscious association of the provider of the funds* with the settlement in question. It is clearly not sufficient that the settled funds should historically have been derived from the provider of them. If it were otherwise anyone who gave funds unconditionally to another which that other later settled would fall to be treated as the settlor or as a settlor of the funds. It is clear that in the present situation there cannot possibly have been any conscious association of [the testator] with [B's] settlement.[59]

It seems therefore that if:

(1) A trust ("trust 1") exists and A is its settlor
(2) There is an arrangement under which:
  (a) the trustees of trust 1 appoint trust property unconditionally to B
  (b) B gives the property to a separate trust ("trust 2")

then B will be the settlor of trust 2, and A will not be a settlor, unless the creation of trust 2 is envisaged by A at the time that trust 1 is made.

[58] See 87.5.7 (Trust appointment: Filling blanks).

[59] *Fitzwilliam v IRC* (1993) 67 TC 614 at p.732, emphasis added. HL split 3:2 on the main issue (the *Ramsay* doctrine) but the minority did not dissent on this point.

The "conscious association" test is an understandable and generally helpful paraphrase of the statutory words, though it does not solve much as:

(1) The question may arise as to what is a "conscious association".
(2) Lord Keith said there must *at least* be a conscious association, suggesting that it is a necessary, but may not be a sufficient, condition.

STEP CRS guidance adopts this approach:

> **settlors following absolute appointments**
> There will be circumstances where
> [1] trust assets are appointed from an existing trust (Trust 1) settled by A outright to B.
> [2] B then, in due course,[60] transfers some of those assets to a new trust, Trust 2.
>
> In this scenario, B should be regarded as the settlor of Trust 2 under AML/KYC principles because he has become the outright owner of assets that have then subsequently been contributed to a new trust arrangement. In these circumstances, only B should be reported as the settlor for CRS purposes.[61]

The application of the conscious association test in the context of an appointment followed by a gift is surprising, but the House of Lords have spoken. In editions of this work up to the 2021/21 edition I said "The matter is for most practical purposes ended – unless and until the Supreme Court speaks again". But time has moved on, and perhaps that exaggerates the doctrine of precedent. I do not think anyone should be surprised if the decision is narrowly interpreted, distinguished perhaps on the basis that it is a question of fact in each case, and finally, reversed.

This has implications for tax planning, see 99.41 (Planning to create excluded property trust).

99.10 Inter-trust transfer: Trust law background

A note on terminology: A transfer from one trust to another may be described as a resettlement, but I prefer to use the more transparent term

[60] Author's footnote: I think the words *in due course* suggest a fact pattern similar to *Fitzwilliam*, ie a short time gap but no obligation on B to make the transfer to trust 2.

[61] CRS and Trusts (2017) para 1.9 *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

"**inter-trust transfer**".

99.10.1 *Role of trust law principles*

There are trust law rules which determine for trust law purposes:

(1) Whether one trust exists, or whether two (or more) distinct and separate trusts exist

(2) If two distinct trusts exist, whether trust property can be transferred, or has been transferred, from one to the other

Subject to context, and specific tax rules, these rules apply for tax purposes. That is, in the absence of specific context or rules, these questions are governed by trust law principles. These are sometimes called "general trust law" rules, meaning, I think, non-tax law rules.

There are of course differences in the trust laws of different jurisdictions. But as far as I am aware, there are no differences which might affect the question of what constitutes a separate trust for UK tax purposes, and what constitutes a transfer between trusts. In addition, in the absence of evidence to the contrary, an English court would in any event assume that English trust law principles apply.

99.10.2 *Inter-trust transfers*

There are (at least) 4 ways by which property can move between trusts (without a person becoming beneficially entitled to the property in the meantime):

(1) Trustees may exercise a power to transfer trust property to another trust. This is in practice the most common way.[62]

(2) A beneficiary with a power of appointment (typically a general power) may exercise it so as to transfer property to another trust.

(3) (a) A beneficiary who is entitled to a contingent or reversionary interest in the capital of the trust fund of trust 1 may assign that interest to trust 2; and
(b) the trustees of trust 2 in due course become absolutely entitled to the trust fund of trust 1.

(4) Beneficiaries absolutely entitled to trust property may direct the transfer of the property to another trust.[63]

[62] See 99.22 (Resettlement by beneficiaries).

[63] Further consideration is needed if the trust is not governed by English law or English law principles. In Scotland, for instance, a beneficiary with an alimentary liferent

A transfer to a separate trust needs to be distinguished from the situation where steps take place which vary the trust, but without giving rise to a transfer to another trust.

Where there is a transfer from trust 1 to trust 2, the question discussed here is who is the settlor of trust 2. Is it the settlor of trust 1 or the person(s) who brought about the transfer?

99.11 Inter-trust transfer: Appointment

99.11.1 *Trust law background*

Trustees may have power:

(1) to vary the terms of the trust ("a variation")[64]; or

(2) to transfer trust property to a distinct trust ("an inter-trust transfer").

In *Roome v Edwards*, after some general comments on the distinction,[65] the House of Lords comment in the context of trustees powers:[66]

> It is established doctrine that the trusts declared by a document exercising a special power of appointment[67] are to be read into the original settlement... If such a power is exercised, whether or not separate trustees are appointed, I do not think that it would be natural ... to say that a separate settlement had been created: still less so if it were found that provisions of the original settlement continued to apply to the appointed fund, or that the appointed fund were liable, in certain events, to fall back into the rest of the settled property.
>
> On the other hand, there may be a power to appoint and appropriate a part or portion of the trust property to beneficiaries and to settle it for their benefit.[68] If such a power is exercised, the natural conclusion might be that a separate settlement was created, all the more so if a complete new set of trusts were declared as to the appropriated property, and if it

cannot dispose of his interest in this way.

[64] One might emphasise the distinction by referring to a *mere* variation. "Appointment" is a broader term, referring to an exercise of trustees powers which may be a mere variation of the trust or an inter-trust transfer.

[65] See 99.22.2 (Variation or resettlement?).

[66] 54 TC 359 at p.390.

[67] A special power is one which is not a general power; see 87.10.1 (General power: Terminology).

[68] Modern trusts do not usually include a power in these terms, but they confer an express power to transfer to a new trust, where it is clear that the effect is an inter-trust transfer.

> could be said that the trusts of the original settlement ceased to apply to it.

These are easy cases. The passage continues:

> There can be many variations on these cases each of which will have to be judged on its facts.

See too SP 7/84.

A general power of appointment may similarly be used:

(1) in a manner which creates a new trust, or
(2) in a manner which merely varies an existing trust.

In case (2) it is considered that the powerholder is not in principle the settlor.[69]

99.11.2 *Appointment rule conditions*

There are IT/CGT rules to address trust transfers. The rules are set out twice, once for IT[70] and again for CGT.

s.470(1) ITA	**s.68B(1) TCGA**
Section 471 applies in relation to a transfer of property from the trustees of one settlement ("settlement 1") to the trustees of another settlement ("settlement 2") if the transfer—	This section applies in relation to a transfer of property from the trustees of one settlement ("Settlement 1") to the trustees of another ("Settlement 2") otherwise than—
(a) is not for full consideration,	(a) for full consideration, or
(b) is not by way of a bargain made at arm's length, and	(b) by way of a bargain made at arm's length.
(c) is not excluded by subsection (2).	

The expression "transfer of property" is widely defined:

s.470 ITA	**s.68B(2) TCGA**
(3) In this section 'transfer of property' means—	[identical]
(a) a disposal of property by the trustees of settlement 1,	

[69] The position is analogous to 99.22 (Resettlement by beneficiaries).
[70] The IT rules are incorporated by reference for CT: s.1169 CTA 2010.

and
(b) the acquisition by the trustees of settlement 2 of—
(i) property disposed of by the trustees of settlement 1, or
(ii) property created by the disposal.

and a reference to transferred property is a reference to property acquired by the trustees of Settlement 2 on the disposal.

(4) For the purposes of subsection (3) there is an acquisition or disposal of property if there would be an acquisition or disposal of property for the purposes of TCGA 1992.

Thus the grant of a lease, for example, is a "transfer" of property.

At first sight s.470 seems wide enough to cover every transfer between trusts. But the exclusions in s.470(2) are also wide,[71] and in practice s.471 usually applies on a transfer between trusts by exercise of a power of appointment. So I refer to the rules in s.470, 471 (and the CGT equivalent) as the "**IT/CGT appointment rule**". That label does not encapsulate all the circumstances where s.471 may apply, but no short label could do that.

The CG Manual explains the need for para (a) and (b):

> **CG33220: Basic terms** [Dec 2021]
> ... The reason for having these two alternatives is to allow for the possibility that S1 and S2 are connected persons (so that any transaction between them is not at arm's length by virtue of TCGA92/S18), and S1 sells an asset to S2 for its full market value. In such a case we do not want section 18 to cause section 68B to apply...

99.11.3 *IT/CGT appointment rule*

Assuming the conditions for the IT/CGT appointment rule are satisfied, we journey on:

[71] See 99.17.1 (Beneficiary assigns to trust); 99.14 (Inter-trust transfer: General power); 99.37.3 (IT/CGT: IoV post-2006).

s.470(1) ITA	**s.68B(3) TCGA**
If there is a transfer of property in relation to which this section applies, then the following subsections apply for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.	For the purposes of this Act, except where the context otherwise requires–

Although the drafter includes the words "except where the context otherwise requires", I cannot think of a case where the context would "otherwise require". Perhaps the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.[72] But perhaps a case of this kind might happen.

s.470(2) ITA	**s.68B(1) TCGA**
The settlor (or each settlor) of the property disposed of by the trustees of settlement 1 ("the disposed property") is treated from the time of the disposal as having made settlement 2.	(a) the settlor (or each settlor) of the property disposed of by the trustees of Settlement 1 shall be treated from the time of the disposal as having made Settlement 2, and

In short, the settlor of trust 1 is the settlor of trust 2.

The IT/CGT appointment rule applies for the standard IT/CGT definition, the settlement-arrangement definition, and the CGT s.86 definition.[73]

s.470 ITA	**s.68B TCGA**
(3) If there is more than one settlor of the disposed property, each of them is treated in relation to settlement 2 as the settlor of a proportionate part of the property	(b) if there is more than one settlor of the property disposed of by the trustees of Settlement 1, each settlor shall be treated in relation to Settlement 2 as the settlor of a

[72] See 99.2.1 (Terminology).

[73] For completeness: the IT/CGT appointment rule would not apply on a transfer to or from an entity which was not a settlement within the standard IT/CGT definition. A Liechtenstein Stiftung (Foundation) might perhaps be an example. But the common law rules discussed below in relation to IHT would normally give the same result; though that may depend on the terms of the Stiftung.

acquired by the trustees of settlement 2 on the disposal.	proportionate part of the transferred property.
(4) So far as the disposed property— (a) was provided for the purposes of settlement 1, or (b) was derived from property so provided, the property acquired by the trustees of settlement 2 on the disposal is treated from the time of the disposal as having been provided for the purposes of settlement 2.	(4) For the purposes of this Act, except where the context otherwise requires, if and to the extent that the property disposed of by the trustees of Settlement 1 was provided for the purposes of Settlement 1, or is derived from property provided for the purposes of Settlement 1, the transferred property shall be treated from the time of the disposal as having been provided for the purposes of Settlement 2.
(5) If as a result of subsection (4), property ("the transferred property") is treated as having been provided for the purposes of settlement 2— (a) the person who provided the disposed property, or the property from which it was derived, for the purposes of settlement 1 is treated as having provided the transferred property for the purposes of settlement 2, and (b) if more than one person provided the disposed property, or the property from which it was derived, for the purposes of settlement 1, each of them is treated as having provided a proportionate part of the transferred property for the purposes of settlement 2.	(5) If transferred property is treated by virtue of subsection (4) as having been provided for the purposes of Settlement 2— (a) the person who provided the property disposed of by the trustees of Settlement 1, or property from which it was derived, for the purposes of Settlement 1 shall be treated as having provided the transferred property, and (b) if more than one person provided the property disposed of by the trustees of Settlement 1, or property from which it was derived, for the purposes of Settlement 1, each of them shall be treated as having provided a proportionate part of the transferred property.

This could have been expressed more concisely, but it works.[74]

[74] Trust law questions also arise: whether a power can be exercised to transfer to another trust, and restrictions on perpetuity/accumulation periods. This is not discussed here.

99.11.4 *Inter-trust value shift*

The IT/CGT appointment rule only applies on a transfer of property from the trustees of trust 1 to the trustees of trust 2. So it does not apply on a transfer from a company held by trust 1; or on a transfer to a company held by trust 2. But in these cases the common law rules apply, and in principle the settlor of trust 1 becomes the (or a) settlor of trust 2.

The IT/CGT appointment rule does not apply to a transfer for full consideration, so it does not apply to an interest free loan from trust 1 to trust 2. But again, the common law rules will apply so that the settlor of trust 1 may become a settlor of trust 2.

99.12 Inter-trust transfer: IHT

The IT/CGT appointment rule only applies for IT/CGT and CT purposes. IHT has no statutory equivalent. But the IT/CGT appointment rule only codifies the general law position, which I call the "common law rules"; so the same principles apply for IHT.[75] If there is a transfer from trust 1 to trust 2, by exercise of a power of appointment, the settlor of trust 1 is in principle[76], to the extent of the transferred property, the settlor of trust 2 for IHT purposes.

HMRC agree. The CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> ... It is not unusual for trustees to appoint or advance assets to a newly created trust. See for example *Hart v Briscoe* 52 TC 53. Courts have said, see for example *Chinn v Collins* 54 TC 311, that the trustees in such a situation are perfecting the settlor's original gift in settlement.[77] Therefore in such a case section 68B has the effect that it is the original settlor of S1 who is the settlor of S2. The property is treated as having been provided for the purposes of S2.
> [The Manual notes the 3 exceptions in s.470(2) and continues:]
> It is not considered that section 68B effected any change in the law.

Likewise, STEP CRS guidance provides:

[75] This explains why the statutory provisions (which originated in the FA 2006) were backdated and apply even if the transfer between trusts was made before 2006.

[76] This section considers the general sense of settlor for IHT purposes. Some special IHT rules apply in particular circumstances: see 79.2 (Addition/transfer to trust).

[77] Author's footnote: For the passage referred to, see App 87.5 (Providing property/bounty).

> **trust to trust appointment**
> In some cases, trusts are not established directly by a transfer of assets from an individual but by a transfer from an existing trust or similar entity such as a foundation. In these circumstances, applying AML/KYC principles, it would be necessary for a trustee of the receiving trust (Trust 2) to make enquiries of the appointing trust (Trust 1) as to who its economic settlor was when it was created. In the absence of any 'break in continuity' (for instance where the assets pass to an individual and become that individual's personal property), it will normally be safe to assume that the settlor of Trust 1 should also be regarded for CRS purposes as the settlor of Trust 2.[78]

99.12.1 *Transfer: A's trust to B's trust*

Suppose:

(1) A transfers property ("A's fund") to a trust ("trust 1"). The trustees have the standard power to transfer property to another trust.
(2) B transfers property ("B's fund") to a separate trust ("trust 2").
(3) The trustees of trust A transfer A's fund to trust 2.[79]

Trust 2 now has two settlors: A has provided A's fund indirectly, and B has provided B's fund directly. The issue was settled in CGT cases before the IT/CGT appointment rule was enacted. In *Eilbeck v Rawling*:[80]

(1) A Gibraltar trust ("Trust 1") made by A held £600k.
(2) A Jersey trust ("Trust 2") made by B held £100.
(3) £315k was transferred from Trust 1 to Trust 2 by exercise of the trustee's powers.

Buckley LJ summarised the trust law background:

> When [the donee of a special power of appointment] exercises that discretion in making an appointment, he acts as the delegate of the settlor. What the donee does in exercise of a special power of appointment is done vicariously by the settlor.

[78] CRS and Trusts (2017) para 1.2 *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

[79] If there is an arrangement under which (1) A transfers to trust 1 and (2) the trustees transfer to trust 2, ie the transfer to Trust 2 is in contemplation at the outset, then A is the settlor of Trust 2. It is here assumed that the transfer was not in contemplation at the time of the creation of Trust A.

[80] 54 TC 101.

The answer is then clear:

> If one asks who was the settlor of the £315,000 appointed by the appointment ... the only possible answer is [A,] the settlor of the £600,000 comprised in [Trust 1]. [B] did not settle[81] the £315,000; he settled only £100. The [trustee of Trust 1] did not settle the £315,000; it was not the ... trustee's to settle, and making the appointment the ... trustee was only exercising a fiduciary power conferred on him by the settlor [A], whose delegate he was as donee of the power. The exercise of the power had, in my opinion, precisely the same effect as if the [trustee of Trust 1] had appointed the £315,000 in favour of the [trustee of Trust 2] to be held upon trusts identical with the trusts of [Trust 2] but set out in extenso in the appointment without reference to [Trust 2]. If the appointment had taken that form, there could, I think, be no doubt that the trusts so appointed would be trusts taking effect under [Trust 1].

The House of Lords approved this reasoning on appeal.[82]

HMRC agree. The CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> ... Where trustees exercise a special power of appointment, or power of advancement, in such a way as to create a new settlement, see CG33800+, the settlor of the new settlement is the person who was the settlor of the old one. See, for example, *Pilkington v IRC*, 40 TC 416, p.442[83] and *Chinn v Collins*, 54 TC 311, p.351H.[84]

It is considered that the same applies to a transfer for less than full

[81] Buckley is using the word "settle" as a paraphrase of the statutory word "provide".

[82] It may be objected that this is not consistent with *Fitzwilliam*: see 99.9 (Trust appoints to B, B gives to new trust). There is no "conscious association" between A and Trust 2. However, *Fitzwilliam* was a case where the court found that an individual beneficiary who assigned an asset to the new trust was the "settlor". The beneficiary displaced the testator from being a settlor by their independent act. There is no equivalent here.
The alternative conclusion that Trust 2 has no settlor for general tax purposes would have the result, attractive to taxpayers but absurd, that the property in Trust 2 could be excluded property, as one could not say that "the settlor" was domiciled in the UK at the time that the trust was made! That can hardly be right.
If (which is doubtful) further authority is needed, see *Trennary v West* [2005] UKHL 5 at [49].

[83] Author's footnote: See 99.13 (Inter-trust transfer: Advancement) where this passage is set out.

[84] The same point is made again at CG Manual 34802.

consideration made in exercise of trustees dispositive powers, and to an interest-free loan from trust 1 to trust 2.

99.12.2 *Transfer to new trust*

Suppose:

(1) Trustees of a trust made by A ("trust 1") have power to transfer to a new trust.

(2) The trustees transfer the trust fund to new trustees to hold on the terms of a newly created trust, trust 2. All the funds of trust 2 are derived from trust 1.

Who is the settlor (in the general sense) of Trust 2? The trustees of Trust 1 cannot be the settlor as they have merely exercised a fiduciary power. So either A is the settlor or there is no settlor. The answer is that A is the settlor of Trust 2.

99.12.3 *Appointment rules: Critique*

It was not necessary to enact the IT/CGT appointment rule. But at present we have statutory rules for IT/CGT/CT and case law rules for IHT, the worst of both worlds. It would have been better if the IT/CGT appointment rule had not been enacted. Now we have it, a small simplification would be to extend the statutory rule to IHT so the three taxes are aligned. This would not change the law, but it would make its explanation slightly easier. But the change is more trouble than it is worth, unless it is part of a wider reform of aligning the various definitions of settlor.[85]

99.13 Inter-trust transfer: Advancement

Suppose:

(1) Trustees of trust 1 have a power of advancement (that is, a power to apply trust property for the benefit of a beneficiary).

(2) They use that power to transfer trust property to a new trust ("trust 2").[86]

The position for IT/CGT is covered by the IT/CGT appointment rule: the settlor of trust 1 is also the settlor of trust 2.

[85] See 99.2.15 (Definitions of "settlor": Critique).

[86] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 11.7 (Power of advancement used to create new trusts).

The same applies for IHT. The consent of the beneficiary is not needed and therefore the beneficiary is not the settlor of the new trust.

Pilkington v IRC concerned a proposal to transfer property to a new trust by exercise of a power of advancement in favour of a Miss Penelope:

> When one asks what person can be regarded as the settlor of Miss Penelope's proposed settlement, I do not see how it is possible to say that she is herself or that the trustees are. She is the passive recipient of the benefit extracted for her from the original trusts; the trustees are merely exercising a fiduciary power in arranging for the desired limitations. It is not their property that constitutes the funds of Miss Penelope's settlement: it is the property subject to trusts by the will of the testator and passed over into the new settlement through the instrumentality of a power which by Statute is made appendant to those trusts.[87]

HMRC agree: see CG33241 set out in 99.12.1 (Transfer: A's trust to B's trust).

If the power of advancement is used to alter the terms of an existing trust, without a transfer to a new trust, then *a fortiori* neither the trustees nor the object of the power are settlors.

In short, as far as the identity of the settlor is concerned, there is no difference between a power of appointment and a power of advancement.

The position is probably different if trust 1 is a bare trust. The beneficiary of a bare trust has in a sense provided property taken from the bare trust to trust 2, for it belonged wholly to the beneficiary before the power of appointment was exercised.

99.14 Inter-trust transfer: General power

Section 470(2) ITA/s.68B(6) TCGA set out three exceptions to the IT/CGT appointment rule. The second is:

s.470(2)ITA	**s.68B(6) TCGA**
A transfer of property is excluded for the purposes of subsection (1) if ... (b) it occurs only because of the exercise of a general power of appointment	But subsections (3) and (4) do not apply in relation to a transfer of property ... (b) which occurs by reason only of the exercise of a general power of appointment

[87] *Pilkington v IRC* 40 TC 416 at p.442.

This excludes the operation of (what I call) the IT/CGT appointment rule. It does not expressly say who is the settlor: general principles apply. The answer is clear enough.

The CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> ... However there are three specific cases which are excluded...
> [2] Under the terms of S1 D may have a general power of appointment. If so D is the settlor (or additional settlor) of S2.

For the meaning of general power, see 87.10.1 (General power: Terminology).

99.15 Power of revocation

HMRC say:[88]

> [1] Certain trusts require the settlor to have the power to revoke the trust to safeguard the position of beneficiaries.
> [2] HMRC will not regard the failure to exercise such a power the same as an addition of property or value to the trust and therefore it will not cause the trust to lose its protection [protected trust status].

Point [1] may be a reference to US tax law, under which a power of revocation may be required for a trust to qualify as a grantor trust.[89] But the proposition at [2] must apply to all revocable trusts. It gives a sensible result. It is consistent with the rules for disclaimer.[90] It applies for IT, CGT and IHT.[91]

It is considered that waiver or non-exercise of the power does not make the powerholder a settlor or constitute a transfer of assets for ToA purposes.

[88] Open letter from HMRC to CIOT, 14 Feb 2017, posted on Trusts Discussion Forum. The same point is made in HMRC protected-trust guidance:

> 5.9 In relation to what would constitute the addition of value or property to the settlement or any underlying entity the failure of a settlor to exercise a power of revocation in respect of the settlement will not be considered as an addition of value and therefore will not taint the trust.

[89] See 90.10 (US grantor trust).

[90] See 99.18 (Disclaimer).

[91] In relation to IHT the principle could also be justified by settlement-power relief; see 74.10 (Settlement power). But it is not necessary to rely on that.

Assuming this is right, why could there be a provision of property in the case of a failure to exercise other rights, such as a right to indemnity or a right to call in a loan?[92] The difference is that a power of revocation arises under the terms of the settlement, and the other rights arise outside the settlement.

99.16 Consent to exercise power

A trust sometimes provides that the trustees can only exercise a power of appointment with the consent of a particular beneficiary (typically the life tenant). If the power of consent is wholly personal (ie proprietary),[93] this raises some intriguing questions. A concise exposition is difficult because of the variety of possible circumstances and taxes. In outline the position is as follows:

(1) A gratuitous consent to an appointment which terminates the consentor's interest in trust income probably makes the consentor the settlor, for the purposes of the settlement-arrangement definition. The consentor has provided income for the purpose of the settlement-arrangement because they have effectively given up their right to the income by their consent.[94]

[92] See 100.5 (failure to claim indemnity); 98.26.2 (On-demand loan left unpaid),

[93] On this terminology and powers of consent generally see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 7.35 (Nature and scope of protector's power and duties).

[94] The position is analogous to an assignment or surrender of a life interest. The analogy is not exact. In one case the arrangement consists of the assignment/ surrender alone. In the other case the arrangement consists of the consent and the exercise of the trustees' power of appointment. So in a sense there is an arrangement with two settlors: (i) the consentor and (ii) the (actual) settlor of the classic settlement who conferred the power of appointment on the trustees. But HMRC (or the actual settlor) may plausibly argue that the consentor (not the actual settlor) is the settlor for the purposes of s.624. They may take support from *Braybrooke v AG* 9 HLC 149 at p.165 at *http://www.commonlii.org* (A case on the Succession Duty Act 1853 whose provisions are analogous to current definitions of settlor. Since Succession Duty was only abolished in 1949, the drafter of the original settlor-interested trust code doubtless had it in mind.) The ground of the decision in *Braybrooke* was:

> "that, although the estate of the son arose under a joint power of appointment made by his father and himself, and although therefore the father was in a sense one of the settlors, yet he was not a settlor from whom the interest or any part of the interest of the son, in his character of successor, was derived. And the decision shews that, in order to ascertain who is the settlor 'from whom the interest of the successor is derived,' we must inquire, not who are the parties by whose

(2) For similar reasons a gratuitous consent to an appointment which terminates the consentor's contingent interest in trust capital probably makes the consentor the settlor, for the purposes of standard IT/CGT and IHT[95] definitions, from the time that the contingency is satisfied. The consentor has provided capital for the purposes of the settlement because they have effectively given up their right to the capital by virtue of their consent.

(3) By contrast, the giving of the consent to an appointment does not make the consentor a settlor (for any purpose) if:
   (a) the consentor had no interest in the trust immediately before giving the consent; or
   (b) the appointment leaves the interest of the consentor in the trust unaffected.[96]

   In these cases the consentor has not provided any property by their consent.

(4) The giving of a consent is probably not a disposal for CGT[97] of:
   (a) the right to consent (even if it is extinguished); or
   (b) the consentor's interest in the trust (even if that is extinguished).

   The contrary is arguable but it would not normally matter.[98]

(5) The power to consent is not an asset in the estate of the consentor

conveyance the estate has been created, but who is the conveying party out of whose estate the interest in question has been derived." See *Att-Gen. v Charlton* (1877) 2 Ex D 398 at p.417.

[95] It is arguable that the consentor is not a settlor for IHT because the power of consent is a settlement power and so not property for IHT purposes. It is the old question of how far one carries the deeming. See App 8.2 (Deeming provisions: Construction). The better view is that the deeming does not carry that implication.

[96] This is fairly clear from first principles, but some support can be found in two cases. In *Braybrooke* (see fn above) a tenant in tail exercised his power to dispose of the lands entailed, with the consent of the protector. The protector was not the creator of the disposition: "It cannot be argued that a person whose consent is apparently necessary to a disposition, makes that disposition." In *Mills v IRC* the father's consent was apparently thought necessary for the daughter (Hayley Mills) to enter into the arrangements: see 49 TC 367 at p.403. This did not prevent Hayley being a settlor.

[97] Under general principles or by virtue of s.24 TCGA (extinction of an asset constituting a disposal).

[98] It will matter if the usual CGT exemption on the disposal of an equitable interest does not apply (eg offshore trusts). It could matter if the conditions of TCGA Sch 4A are satisfied, but that would be unusual.

because:

(a) it is not property in the general sense, or

(b) if it is property in the general sense, it is a “settlement power” and so not property for IHT.[99]

(6) The giving of the consent does not give rise to a gift with reservation since:

(a) A consent is probably not a “disposal” for the purposes of the gift with reservation rule.[100]

(b) In any event, a consent is not a disposal of property: see above.

(7) Waiver or non-exercise of the power does not make the powerholder a settlor or constitute a transfer of assets for ToA purposes.

HMRC do not appear to take any of these points at present; but cautious advisers may think that it is in principle better not to make a power of appointment subject to the consent of the life tenant (or any other beneficiary).

99.17 Beneficiary assigns interest

99.17.1 *Beneficiary assigns to trust*

Section 470(2) ITA/s.68B(6) TCGA set out three exceptions to the IT/CGT appointment rule. The first is:

s.470(2) ITA	**s.68B(6) TCGA**
A transfer of property is excluded for the purposes of subsection (1) if— (a) it occurs only because of the assignment by a beneficiary under settlement 1 of an interest in that settlement to the trustees of settlement 2	But subsections (3) and (4) do not apply in relation to a transfer of property— (a) which occurs by reason only of the assignment or assignation by a beneficiary under Settlement 1 of an interest in that settlement to the trustees of Settlement 2,

[99] See 74.10 (Settlement power).

[100] See *Baird v Baird* [1990] 2 AC 548 at 557 [the exercise of a power of appointment] “disposes of no property of the appointor”. HMRC agreed. The former CTO Advanced Instruction Manual E.91 provided:

> “Nor should you regard the giving of a consent by a limited owner to the exercise of the power of advancement as the making of a disposition.”

This passage does is not in the current IHT Manual. But there is no reason to think that HMRC have changed their view.

This excludes the operation of (what I call) the IT/CGT appointment rule. It does not expressly say who is the settlor: general principles apply. The answer is clear enough. The CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> ... However there are three specific cases which are excluded.
> [1] A beneficiary, B, of S1 may transfer to S2 his interest in S1. In this case it is B who is the settlor (or an additional settlor) of S2.

A person who assigns an equitable interest under Trust 1 to Trust 2 is the settlor of Trust 2 but does not of course become the settlor of Trust 1.

99.17.2 *B assigns to individual*

If a person ("the assignor") assigns an equitable interest under Trust 1 to another individual there is no "Trust 2".

If the assignment is for no consideration:

(1) the assignor is the settlor for the settlement-arrangement definition[101] so far as they have provided income, but
(2) the assignor is not a settlor of Trust 1 for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition.

HMRC agree: CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> ... Normally the same person was the settlor for both Income Tax and Capital Gains Tax. But this was not the case where a person had assigned a right to income. Such an assignment could not have affected the identity of the settlor for Capital Gains Tax purposes.

The CG Manual also provides:

> **CG34801. Meaning of settlor** [Jul 2019]
> In general if HMRC Trusts Head Office Bootle or Edinburgh, or their predecessors Financial Intermediaries and Claims Office or Claims Branch have advised or ruled that a person is the settlor for ... Part 5 Chapter 5 ITTOIA 2005 purposes then the same person should be regarded as the settlor for the purposes of these provisions. In exceptional cases, eg the assignment of a life interest, a person may have settled a right to income under an existing settlement without thereby creating a new settlement for CGT purposes. Although the Income Tax Settlements Legislation may apply as regards that income, that person is

[101] *IRC v Buchanan* 37 TC 362.

> not thereby a settlor of the main settlement. ...

The position is similar to a variation of trust by beneficiaries; see below.

If the assignment is for full consideration, the assignor is not the settlor.

Nader v HMRC concerned a tax avoidance scheme whose facts are perhaps unlikely to recur, but I mention it for completeness. There was an arrangement under which, in short:

(1) £1m was transferred (the details are not entirely clear) to a new trust under which a life tenant had an equitable interest ("the trust").

(2) D purchased the equitable interest for £1m.[102]

D was held to be the settlor of the trust. That is right, because D provided property for the purposes of the trust (looking at the arrangement as a whole); or because D provided property in connection with the trust.[103]

99.17.3 *Beneficiary surrenders interest*

If a person ("the surrenderor") surrenders an equitable interest under Trust 1 there is no "Trust 2". In that case:

(1) the surrenderor is the settlor for the settlement-arrangement definition[104] so far as they have provided income, but

(2) the surrenderor is not a settlor of Trust 1 for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition.

That is, as far as the identity of the settlor is concerned, there is no difference between a surrender and an assignment.

99.18 Disclaimer

99.18.1 *Disclaimer/waiver: Terminology*

One should distinguish between waiver and disclaimer. One usually refers to:

- **waiver** (or release) of a right which exists, eg a debt, whether payable immediately or in the future; or rent; or dividends declared but not yet

[102] The interest was in fact worthless, though in the event the trust fund passed to Miss D's family, as intended. But that makes no difference as far as the "who is a settlor" issue is concerned.

[103] [2018] UKFTT 0294 (TC). This is not quite the way that the Tribunal put the point, and there are some gaps in the Tribunal's analysis; but the Tribunal dealt with the matter very briefly, as the scheme had already failed for two other reasons.

[104] *IRC v Buchanan* 37 TC 362.

paid, or fixed dividends
- waiver of future dividends which have not been declared (where no right to the dividends exists until the dividends are declared.) I think the word disclaimer may also be apt here.
- **disclaimer** of a gift that has been made but not accepted

The words are not wholly interchangeable. One might perhaps refer to the disclaimer of a gift as a waiver; but I think it is clearer to keep the word disclaimer for this case.

99.18.2 *Disclaimer/waiver: General law*

In *Re Paradise Motor Co Ltd*:[105]

> a disclaimer operates by way of avoidance, and not by way of disposition.

TSEM provides a brief outline:

> **TSEM1840 Deed of disclaimer** [Sep 2021]
> A person uses a true disclaimer to refuse a gift due under a trust. Effectively the person steps aside. This allows subsequent provisions of the trust to take effect.
> A disclaimer can relate to
> • capital
> • income
> • both.
> A disclaimer has retrospective effect. It applies from the date that the entitlement arose. There may be a lapse of time between the entitlement arising and the disclaimer. This is not conclusive evidence that the deed cannot be a true disclaimer...
> The person making a disclaimer may still benefit from another part of the trust income or capital. This is irrelevant. If that person seeks to impose new trusts, the deed is not a disclaimer. It is an assignment (TSEM1845).
>
> **IHTM16180: Settled property: disclaimers** [Mar 2022]
> ... A disclaimer need not be made in writing. Disclaimer by action is possible although, apart from writing, an oral message to the trustees might be more common.
> Disclaimer cannot be made if the interest has been accepted, i.e. if any

[105] [1968] 1 WLR 1125 at p.1143 followed *Allied Dunbar v Fowle* [1994] BCC 422.

> benefit has been taken under it. However, where an interest in possession has vested the beneficiary can validly disclaim before any benefit has been accepted...
> Under a true disclaimer, the beneficiary in question falls out of the picture and the trusts of the will or settlement take effect ignoring that beneficiary. It follows that the beneficiary cannot purport to disclaim and redirect the benefit to someone else...

A disclaimer, if possible, may be preferable to a surrender or assignment. The distinction between disclaimer and surrender/assignment is therefore important.

In English law, there are no formal requirements for disclaimer of a gift. Waiver of a dividend usually requires a notice in writing.[106] Waiver of other rights or claims usually requires a deed to be valid. Further consideration is needed if foreign law applies.

For income tax, validity of a waiver may not matter much, as if interest/dividends are purportedly waived, the sum is not likely to be paid, even if the waiver is invalid; and income tax depends on payment. Validity could matter for other purposes.

99.18.3 *Disclaimer: IHT consequences*

There are a number of IHT provisions which say, in short, that waivers and disclaimers operate retrospectively for IHT purposes, or are to be ignored for IHT purposes.

Section 93 IHTA deals with disclaimer of an equitable interest:

> Where a person becomes entitled to an interest in settled property but disclaims the interest, then, if the disclaimer is not made for a consideration in money or money's worth, this Act shall apply as if he had not become entitled to the interest.[107]

The IHTM provides:

[106] Article 35 Model Articles for Private Companies Limited by Shares provides: "Distribution recipients may waive their entitlement to a dividend or other distribution payable in respect of a share by giving the company notice in writing to that effect...".

[107] See IHTM16180: Settled property: disclaimers [May 2020]: "The interest capable of being disclaimed need not be an interest in possession. It can be a reversionary interest, or a right under a non-interest in possession settlement. S93 says 'interest' and in the case of a NIIP [non-IIP] settlement the object has the right to be considered; which is his 'interest'."

> **IHTM16180: Settled property: disclaimers** [Mar 2022]
> ... There is no time limit within which the person may disclaim [under s.93]. This is a necessary provision because the person taking the (unwanted) benefit might do so as a result of an unexpected contingency, and many years after the trusts began.

Section 17 IHTA deals with instruments of variation:

> None of the following is a transfer of value—
> (a) a variation or disclaimer to which section 142(1) below [instruments of variation] applies ...

Section 15 IHTA deals with the waiver of dividends:

> A person who waives any dividend on shares of a company within twelve months before any right to the dividend has accrued does not by reason of the waiver make a transfer of value.

This may be otiose, on the basis that a waiver of a dividend before the right to the dividend has accrued is not a disposition, and so cannot be a transfer of value. But the point is not likely to arise.

The IHT Manual provides:

> **IHTM04220: Waiver of dividends** [Jul 2020]
> IHTA84/S15 applies only to the waiver of a dividend on shares in a company. It does not apply to the waiver or release of any other form of income, such as rent or interest on any form of debt, including debentures and loans.
> IHTA84/S15 provides only that a person does not make a transfer of value 'by reason of the waiver'. You need to be careful if the situation you are concerned with
> • is not a straightforward waiver, but
> • appears to be part of a series of operations aimed at achieving a transfer of value not related solely to the dividend waived.
> In such a situation, you should not comment on the application of IHTA84/S15 but simply obtain the facts and, when you have received them, refer the case to Technical.

99.18.4 *Disclaimer: Other tax consequences*

As a matter of property law, a disclaimer operates retrospectively between the parties to a disposition: their position is as if the disclaimed disposition had not been made. For tax law, absent a statutory provision to that effect, it is a matter of looking at the applicable provisions. There is no general principle that a disclaimer operates retrospectively for tax purposes.[108]

What if an individual disclaims a gift (lifetime gift or under a will) which is not an interest in settled property? Section 93 IHTA does not apply, but it is not needed. A disclaimer is not a disposition, so it is not a transfer of value.[109] A disclaimer is likewise not a disposal, so GWR does not apply.[110] A disclaimer may be a disposal for CGT, on the basis that it amounts to the entire loss, destruction, dissipation or extinction of an asset.[111] But a disclaimer promptly on acquisition is not likely to give rise to a gain.

It is considered that a disclaimer is not a transfer of assets for ToA purposes.

For waivers, see 15.7.1 (Waiver: Navigation).

99.18.5 *Person disclaiming: a settlor?*

TSEM provides:

> **TSEM1840 Deed of disclaimer** [Sep 2021]
> ...The person disclaiming is not a "settlor" within [the settlement-arrangement definition]. Subsequent trusts that result from the disclaimer retain their original settlor.

This is right for IHT, either as a disclaimer is not a disposition, and so not an IHT settlement; or because of s.93 IHTA discussed above. It is right for CGT.[112]

It is not clear that the TSEM statement is correct for the settlor-arrangement definition; but taxpayers will not often wish to argue the contrary, and the amounts involved are not likely to be very great.

99.18.6 *Partial disclaimer*

IHTM provides:

> **IHTM16180: Settled property: disclaimers** [May 2022]
> At English law a partial disclaimer is not possible so that the whole of the interest must be disclaimed (this however is subject to the terms of the trust)...

[108] *Re Stratton's disclaimer* [1958] Ch 42.

[109] See 74.3 (Transfer of value/value transferred).

[110] See 78.5 (Disposal by way of gift).

[111] See 56.3.1 ("Disposal").

[112] See 99.17.2 (B assigns to individual).

SP E18 provides:

> **Partial disclaimers of residue**
> Under Scots law there are certain circumstances in which a residuary legatee can make a partial disclaimer. Where this is possible the Commissioners for HMRC accept that the provisions of IHTA 1984 s 142 which deal with disclaimers, apply.

More analytically, a partial disclaimer (if possible) is a disclaimer in the ordinary sense of the word, so references to disclaimer in statutory provisions in principle include a partial disclaimer.

99.18.7 *Foreign law disclaimer*

Where the disposition is governed by foreign law, the disclaimer/ assignment distinction may be more difficult to draw.

For instance, art 10A Jersey (Trusts) Law 1984 provides:

> (1) Despite the terms of the trust, a beneficiary may disclaim, either permanently or for such period as he or she may specify, the whole or any part of his or her interest under a trust if he or she does so in writing.
> (2) Paragraph (1) applies whether or not the beneficiary has received any benefit from the interest.
> (3) Subject to the terms of the trust, if the disclaimer so provides it may be revoked in accordance with its terms.

If so, it is suggested that an act (to use a neutral term) which Jersey law describes as a "disclaimer" is not a disclaimer in the UK law sense, and in particular, is not within s.93 IHTA, if:

(1) If a beneficiary keeps a benefit; or
(2) The disclaimer is revocable (though I wonder if that ever happens in practice)

Of course the fact that Jersey law calls an act a "disclaimer" does not make it so in UK law.[113] In English law it may be an assignment or perhaps a surrender. The drafting of the legal document is likely to be very important here.

99.19 Dividend-waiver settlement

There have been two dividend-waiver cases.[114] Simplifying to bare

[113] See 90.4.1 (English language terminology).

[114] *Donovan v HMRC* [2014] UKFTT 48 (TC); *Buck v HMRC* [2008] UKSPC SPC00716.

essentials: in *Donovan,* shares were held by H (80%) and W (20%).[115] In *Buck* the disparity was more extreme as H had 999 shares and W had 1 share. In both cases, H waived dividends, so that W received dividends (and the object was that these should be taxable at W's lower rate).

Running through the s.624 issue list:[116]

(1) The waiver is a settlement-arrangement. I refer to this as a **"dividend-waiver settlement"**.
(2) H (the waiving shareholder) is the settlor.
(3) The income arising under the settlement is the additional dividend received by W (the dividend recipient) as a result of the waiver (the **"waiver-enhanced dividend"**).
(4) The property from which that income arose is:[117]
    (a) W's shares; or arguably
    (b) H's shares
    Either way this is property in which the settlor (H) had an interest.[118]
(5) The s.624 spouse exemption did not apply.[119]

Accordingly, in both cases, H is taxed on the waiver-enhanced dividend under s.624.

In the reported cases the amounts involved were modest, and the tribunal did not have the benefit of full argument by Counsel for each side. These cases did not explore two issues which might arise with waivers:

- How does one ascertain the amount of the waiver-enhanced dividend? In both reported cases dividends could not have been declared in the absence of the waivers because there were insufficient profits available for distribution. Is that essential?
- What is the property from which the waiver-enhanced dividend arises? It arises directly from W's shares, but indirectly from H's shares (which provided the waiver which allowed the waiver-enhanced dividend to be received by W).

TSEM provides:

[115] In point of detail, the company was held by two individuals and their spouses, in the proportion 80% (husbands) and 20% (spouses). But nothing turns on that.

[116] See 47.5 (Settlor-interested trust). See too 15.7 (Waiver of interest/dividends).

[117] See 47.3.1 (Property comprised in a settlement).

[118] See 47.6.2 ("Settlor-interested" for s.624).

[119] Because the arrangement is not an outright gift; see 93.15 (s.624 spouse exemption). If H had given the shares to W outright, this exemption would have applied.

> **TSEM4220: about dividend waivers** [Sep 2021]
> Where a close company declares a dividend and one or more of the shareholders waives the dividend in circumstances where other shareholders may benefit, there may be an arrangement where the settlements legislation could apply.
> In such cases, we argue that the person making the waiver has indirectly provided funds for an 'arrangement' or 'settlement' by giving up a sum to which he or she is, or may become, entitled.
> The bounty will be represented by the enhanced part of the dividend that the non-waiving shareholders received.
> Such a dividend waiver is a settlement of income and where the person benefiting under the arrangement is a spouse or civil partner the settlor will have retained an interest and ITTOIA/S624 will apply. Where the person benefiting under the arrangement is a minor child of the settlor ITTOIA/S629 will apply.

99.19.1 *Donee not spouse/minor child*

What about a dividend waiver where the dividend recipient (the non-waiving shareholder) is not a spouse/minor child of the waiving shareholder, but, say, an adult child or cohabitee? TSEM continues:

> Where the person benefiting under the arrangement is not a spouse, civil partner or minor child the settlements legislation will not apply unless there are arrangements under which the money will be paid, or used to benefit the settlor (or spouse etc).

The income arising under the settlement is the waiver-enhanced dividend. The HMRC analysis assumes, I think generously, that the property from which that income arises is the shares held by the dividend recipient (the non-waiving shareholder). Adopting the "broad and realistic" approach, which *Jones v Garnett* commends, the better view that the property from which waiver-enhanced dividend arises is or includes the settlor's shares which made the waiver possible. If that is right, then s.624 will apply even if the dividend recipient under the waiver-settlement is not a spouse or minor child. Perhaps the issue will not arise very often.

The waiver would also be caught by the income-stream code.[120]

99.19.2 *Amount of enhanced dividend*

TSEM provides:

[120] See 54.6 ("Transfer"). This was not discussed in *Donovan* and *Buck*, because they were before the income-stream code was enacted.

> **TSEM4225 dividend waiver: when settlements legislation may apply** [Sep 2021]
> Not all dividend waivers are vulnerable to challenge ...You should look out for the following factors, which would indicate that the settlements legislation is likely to apply.
> [1] The level of retained profits, including the retained profits of subsidiary companies, is insufficient to allow the same rate of dividend to be paid on all issued share capital.
> [2] Although there are sufficient retained profits to pay the same rate of dividend per share for the year in question, there has been a succession of waivers over several years where the total dividends payable in the absence of the waivers exceed accumulated realised profits.
> [3] There is any other evidence, which suggests that the same rate would not have been paid on all the issued shares in the absence of the waiver.
> [4] The non-waiving shareholders are persons whom the waiving shareholder can reasonably be regarded as wishing to benefit by the waiver.
> [5] The non-waiving shareholder would pay less tax on the dividend than the waiving shareholder...
>
> **Example 12 - dividend waivers**
> Mrs H owns 80 ordinary shares in H Limited. Mr H owns 20 shares.
> In 2020, the company made a profit of £25,000.
> Mrs H waived her right to any dividend. The company then declared a dividend of £1,000 per share, and Mr H, who had no other income, received a dividend of £20,000.

The HMRC analysis is as follows:

> No property has been transferred so the settlement is one of income. As such, the exemption for outright gifts to spouses is not in point

This is correct.

> and we would apply the settlements legislation in these circumstances. Clearly a dividend of this amount could not have been paid from the company's profits on all the shares,
