I refer to the provisions together as the **"TNR dividend[36] code**".

11.12 TNR dividends: Definitions

Some common terminology is used throughout the TNR dividend code.

11.12.1 *"Participator"/"associate"*

These terms have their standard meanings. Section 408A(4) ITTOIA provides:

> For the purposes of subsection (3)—

[36] Where context permits, I use the word "dividends" loosely to include distributions.

> "associate" and "participator" have the same meanings as in Part 10 of CTA 2010 (see sections 448 and 454)

This only applies for s.408A, but the same definition is repeated throughout the TNR dividend code.[37]

See 104.6 (Associates); 104.22 (Definition of "Participator").

11.12.2 *"Material participator"*

Section 408A(4) ITTOIA adopts the definition in the close company participator loan rules:

> a "material participator" is a participator who has a material interest in the company, as defined in section 457 of that Act

This only applies for s.408A, but the same definition is repeated throughout the TNR dividend code.[38] So there are two conditions:

(1) a participator
(2) a material interest

11.12.3 *Material interest*

Our journey takes us to s.457(1) CTA 2010, for the definition of material interest:

> A person has a material interest in a company for the purposes of section 456 if condition A or B is met.

It is helpful to see these side by side:

s.457(2) CTA 2010: condition A	**s.457(3) CTA 2010: condition B**
Condition A is that	Condition B is that, in the case of a close company,
[i] the person (with or without one or more associates) or [ii] any associate of that person (with or without one or more other such associates)	[i] the person (with or without one or more associates) or [ii] any associate of that person (with or without one or more other such associates)
is— (a) the beneficial owner of, or	possesses or is entitled to acquire such rights as would—

[37] See s.401C(12), 689A(4)(a) ITTOIA.
[38] See s.401C(12) (with immaterial differences); 689A(4)(b) ITTOIA.

(b) directly or indirectly able to control,	(a) in the event of the winding up of the company, or (b) in any other circumstances, give an entitlement to receive
more than 5% of the ordinary share capital of the company.	more than 5% of the assets which would then be available for distribution among the participators.

The wording derives from the close company code:

Condition	**Derived from**	**See**
Condition A	s.452(1)(c) CTA 2010	104.27.2
Condition B	s.439(3) & s.450(3) CTA 2010	104.28; 104.3.10

Condition B does not apply to non-resident companies, as it only applies to a close (ie UK resident) company. Nevertheless, condition A is wide, so the net is cast widely, and perhaps wider than necessary to deal with tax avoidance by temporary non-residents;[39] but that often happens in avoidance provisions.

11.12.4 *"Relevant time"*

"Relevant time" matters for the participator-causation condition.[40] Section 408A(4) ITTOIA provides:

> In this section ...
> "relevant time" means—
> (i) any time in the year of departure or, if the year of departure is a split year as respects the individual, the UK part of that year, or
> (ii) any time in one or more of the 3 tax years preceding that year;

This only applies for s.408A, but the same definition is repeated throughout the TNR dividend code.[41]

11.13 Taxation of TNR dividends

For historical reasons there are separate provisions for foreign dividends/ distributions[42] but the rules are (more or less) identical.

[39] Contrast s.3 TCGA, which also started with a 5% de minimis limit, later increased to 10% and (following EU pressure) is now set at an appropriate 25%.

[40] See 11.14.3 (Participator-causation condition).

[41] See 401C(12), 689A(4)(c) ITTOIA.

[42] See 30.8.4 (Income-distribution: IT charge).

11.13.1 *TNR dividends taxed on return*

The rules are in s.408A/689A ITTOIA:

Foreign dividends: s.408A	**Foreign distributions: s.689A**
(1) This section applies if an individual is temporarily non-resident.	(1) [Identical]
(2) Dividends within subsection (3) [TNR dividends] are to be treated for the purposes of this Chapter [Chapter 4 Part 4] as if they were received by the individual, or as if the individual became entitled to them, in the period of return.	(2) Distributions within subsection (3) [TNR dividends] are to be treated for the purposes of this Chapter [Chapter 8 Part 5] as if they had been received by the individual, or as if the individual had become entitled to them, in the period of return.

11.13.2 *TNR dividends remitted*

Foreign dividends: s.408A(5)	**Foreign distributions: s.689A(5)**
If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year of return, any dividend within subsection (3) [TNR dividends] that was	If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year of return, any distribution within subsection (3) [TNR dividends] that is
	[i] relevant foreign income and
remitted to the UK in the temporary period of non-residence is to be treated as remitted to the UK in the period of return	[ii] is remitted to the UK in the temporary period of non-residence is to be treated as remitted to the UK in the period of return.

See 11.2.3 (TNR remittances).

The requirement in s.689A(5)[i] that the distribution must be RFI is otiose, as the distribution will always be RFI. Perhaps it is a mistake which was noticed and corrected in s.408A, but remained uncorrected in s.689A.

Section 408A(9) ITTOIA deals with interaction with the SIP regime; not discussed here.

11.14 "TNR dividends"

TNR dividend: s.408A(3)	**TNR distribution: s.689A(3)**
A dividend is within this subsection if—	A distribution is within this subsection if—

A set of four conditions then follow. I refer to these as **"TNR conditions (a)-(d)"**. A dividend which meets these conditions is a **"TNR dividend"**.

11.14.1 *TNR condition (a): Receipt*

TNR dividend: s.408A(3)(a)	**TNR distribution: s.689A(3)(a)**
A dividend is within this subsection if— (a) the individual receives or becomes entitled to it in the temporary period of non-residence	A distribution is within this subsection if— (a) [identical]

This is straightforward.

11.14.2 *TNR condition (b): Close co*

TNR dividend: s.408A(3)(b)	**TNR distribution: s.689A(3)(b)**
A dividend is within this subsection if ... (b) it is a dividend of a company that would be a close company if the company were UK resident	A distribution is within this subsection if ... (b) it is a distribution of a company [i] that is a close company or [ii] that would be a close company if the company were UK resident

The reference in s.689A(b)[i] to a distribution of a *close* company is odd. A distribution from a close company will never be a TNR dividend (within s.689A(3)) because the shareholder will be liable to tax in respect of the distribution[43] so the condition in (d)(i) will never be satisfied.[44] Perhaps it is a mistake which was noticed and corrected in s.408A, but remained uncorrected in s.689A.

[43] See 30.3 (UK dividend regime).

[44] See 11.14.4 (Condition (d): Liability).

11.14.3 *Participator-causation condition*

TNR dividend: s.408A(3)(c)	**TNR distribution: s.689A(3)(c)**
A dividend is within this subsection if ... (c) the individual receives or becomes entitled to it by virtue of being at a relevant time— (i) a material participator in the company, or (ii) an associate of a material participator in the company	A distribution is within this subsection if .. (c) the individual receives or becomes entitled to the distribution by virtue of being at a relevant time— (i) a material participator in the company, or (ii) an associate of a material participator in the company

I refer to this requirement (which comes in many places in the TNR dividend code) as the **"participator-causation condition"**.

There are two requirements to satisfy this condition:

(1) The individual is a material participator/associate in the company at a relevant time.[45] That is relatively straightforward. If an individual purchases shares after departure, TNR condition (c) is not satisfied.

(2) The dividend is made to the individual *by virtue of* being a material participator/associate at the relevant time.

Requirement (2) is a causation test, and causation is not straightforward. The textbook TCCR says:[46]

> Take the most obvious case: a shareholder in a close company departs from the UK in Year 1 ("the year of departure") for a period of temporary non-residence.
> In Year 2 (a year of non-residence) a dividend is declared and paid on the shares he owned in the year of departure and which he continues to own.
> The issue is whether the income arises to him because he was a material participator in the company at "a relevant time" namely, at a time in the year of departure. In fact the income arises to him because he owns the shares when the dividend is declared in Year 2.

It is correct that the dividend arises to the shareholder because they own

[45] See 11.12.4 (Relevant time).

[46] *Taxation of Companies and Company Reconstructions* (looseleaf) para E2.3.8 (Temporary non-residents: distributions from close companies).

shares in year 2 when the dividend is declared. But the reason they own shares in that year is that they held the shares in year 1 (the year of departure) and have retained them. The causation test must be applied in the context of the purpose of the provisions. So in the context it is suggested that the causation part of TNR condition (c) is satisfied. (If that were wrong, would the provisions ever apply?)

Similarly, if T holds shares before departure, and by a reorganisation becomes entitled to new shares, then a distribution on the new shares in principle meets TNR condition (c).

What if T holds shares before departure and T sells those shares when non-resident and T repurchases shares in the same company? It is suggested that the causation condition is met if there is an arrangement designed to avoid the rules.

At first sight, one might have expected TNR condition (c) to provide:

> *The dividend/distribution arises in respect of shares held by the individual/associate at any time in the relevant period.*

But that would be too wide: it would catch cases where the individual had bought and sold and later bought the same shares in the period of temporary non-residence. The work involved in keeping track could be considerable. At the cost of some uncertainty, the causation wording allows some innocent arrangements to escape, and catches some arrangements designed to avoid the rules.

What if T holds shares before departure and T transfers the shares to his spouse?

11.14.4 *Condition (d): Liability*

TNR dividend: s.408A(3)(d)	**TNR distribution: s.689A(3)(d)**
A dividend is within this subsection if ...	A distribution is within this subsection if ...
(d) ignoring this section, the individual—	(d) ignoring this section the individual—
(i) is not liable for tax under this Chapter [Chapter 4 Part 4] in respect of the dividend, but	(i) is not liable for tax under this Chapter [Chapter 8 Part 5] in respect of the distribution, but
(ii) would have been so liable if the individual had received the dividend, or become entitled to it, in the period of return.	(ii) would have been so liable if the individual had received the distribution, or become entitled to it, in the period of return.

Is it ever the case that the condition in s.408A(3) is not met? While it is possible that the condition in s.698A(3)(d)(i) may not be met,[47] it is difficult to think of a case where the condition in s.698A(3)(d)(ii) is also not met.[48]

For dividends, s.408A(4)(d) ITTOIA provides:

> For the purposes of subsection (3) ...
>
> (d) paragraph (d)(i) includes a case where the individual could be relieved of liability on the making of a claim under section 6 of TIOPA 2010 (double taxation relief), even if no claim is in fact made.[49]

Why is this needed?

11.14.5 *Dividend to settlor-interested trust*

Suppose:

(1) Dividends ("trust dividends") arise to a non-resident settlor-interested discretionary trust.

(2) The settlor ("S") is temporarily non-resident.

(3) The dividend is from a non-resident close company, and the trustees hold more than 5% of the company and so have a material interest.

The trust dividends are not TNR dividends and so do not form part of the income of S in the year of return. TNR condition (a) is not met: S does not receive the income.[50]

If the income is distributed to S, it is still not taxed in the year of return as the income of S consists of Annual Payments, not within the TNR dividend regime.

[47] See 11.14.2 (TNR condition (b): Close co).

[48] ToA raises a similar puzzle; see 49.20 (s.721 income chargeable to IT),

[49] For distributions, s.689A(4) ITTOIA is identical.

[50] For completeness: TNR condition (c) may not be met because:

(1) S may not be a participator in the company.

(2) If S was a participator (because S held some interest in the company directly), S is likely to be material participator but this is not necessarily so.

(3) Even if S was a material participator a distribution to the trustees is not treated as made to S because S was a material participator.

But it is not necessary to rely on that.

11.15 Non-resident IT relief

11.15.1 *Relief clawback on return*

Section 812A(1) ITA provides:

> This section applies if—
> (a) an individual is temporarily non-resident,
> (b) the individual's liability to income tax for a tax year is limited under section 811 [Non-resident IT relief],[51]
> (c) that tax year ("the non-resident year") falls within the temporary period of non-residence, and
> (d) the individual's income for that tax year includes relevant investment income.

Assuming these conditions are met, we move on to the rule in s.812A(2):

> The total income (see Step 1 of the calculation in section 23) on which the individual is charged to income tax for the year of return is to be increased by an amount equal to the amount of that relevant investment income.

11.15.2 *Relevant investment income*

Section 812A(4) ITA provides the definition:

> Income is "relevant investment income" if—
> (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies),
> (b) the distributing company is a close company, and
> (c) the income arises or is treated as arising to the individual because the individual was at a relevant time—
> (i) a material participator in that company, or
> (ii) an associate of a material participator in the company.

Para (c) is the participator-causation condition.[52]

11.15.3 *Credit for tax*

Section 812A(3) ITA provides:

> But the notional UK tax on that relevant investment income is to be

[51] See 45.1 (Non-residents IT relief: Introduction).

[52] See 11.14.3 (Participator-causation condition).

> allowed as a credit against the individual's liability to income tax for the year of return under Step 6 of the calculation in section 23.

Section 812A(7) ITA provides:

> The "notional UK tax" on relevant investment income is—
> (a) the total of any sums in respect of that income that were included within amount A in determining the limit under section 811, less
> (b) any credit for foreign tax paid in respect of that income that was allowed under Chapter 2 of Part 2 of TIOPA 2010 against the individual's liability to income tax for the non-resident year.

11.15.4 *DTA override: relief clawback*

Section 812A(9) ITA provides:

> Nothing in any double taxation arrangements is to be read as preventing the individual from being chargeable to income tax by virtue of this section (or as preventing a charge to that tax from arising as a result).

11.16 DTA override: UK dividend

11.16.1 *"Relevant distribution"*

Section 401C(6) ITTOIA provides:

> For the purposes of this section, a dividend or other distribution is a "relevant distribution" if—
> (a) it is a dividend or other distribution of a close company, and
> (b) it is made or treated as made to the individual because[53] the individual was at a relevant time—
> (i) a material participator in the company, or
> (ii) an associate of a material participator in the company.

Para (b) is the participator-causation condition.[54]

11.16.2 *UK dividends taxed on return*

In the absence of a specific rule, a relevant distribution may qualify for DT

[53] The drafter has used "because" where the s.408A/689A rules used "by virtue of ". I guess that the drafter started with more traditional legal language, and someone later remembered the plain legal English aspect, but did not reword the provisions consistently.

[54] See 11.14.3 (Participator-causation condition).

relief in the hands of a treaty user. Treaty relief is in art.10 OECD Model.[55] It is easier to follow if rewritten to specify which Contracting State is which. In outline, in the present context:

> 1. Dividends paid by a company which is a resident of a Contracting State [the UK] to a resident of the other [foreign] Contracting State may be taxed in that other [foreign] State.
> 2. However, dividends paid by a company which is a resident of a Contracting State [the UK] may also be taxed in that State [the UK] according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other [foreign] Contracting State, the tax so charged shall not exceed:
> a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company ... which holds directly at least 25 per cent of the capital of the company paying the dividends ...;
> b) 15 per cent of the gross amount of the dividends in all other cases.

Equipped with the definition of relevant distribution, and with this DT relief in mind, we can at last turn to the TNR rule itself. Section 401C(1) ITTOIA provides:

> This section applies if—
> (a) an individual is temporarily non-resident,
> (b) a relevant distribution is made or treated as made to the individual in the temporary period of non-residence,
> (c) the tax year in which it is made or treated as made ("the distribution year") is a tax year for which the individual is UK resident, and
> (d) the amount of income tax charged on the distribution under this Chapter [Chapter 4 Part 4] is less than it would have been if the existence of double taxation relief arrangements were disregarded.

If these conditions are satisfied, one moves on to the rules.

The rules distinguish between the year of return and earlier temporary non-resident years. For the earlier non-resident years, s.401C ITTOIA provides:

> (2) Subsections (3) and (4) have effect in cases where the distribution year is not the year of return.

[55] See 30.15 (DT relief: dividend income).

> (3) The total income (see Step 1 of the calculation in section 23 of ITA 2007) on which the individual is charged to income tax for the year of return is to be increased by an amount equal to the amount on which tax would be charged under this Chapter [Chapter 4 Part 4] in respect of the distribution disregarding any double taxation relief arrangements.
> (4) But the notional UK tax[56] on that distribution is to be allowed as a credit against the individual's liability to income tax for the year of return under Step 6 of the calculation in section 23.

For the year of return, s.401C(5) ITTOIA provides:

> If the distribution year is the year of return, the tax charged under this Chapter [Chapter 4 Part 4] in respect of the relevant distribution is to be charged and assessed without regard to the existence of double taxation relief arrangements.

11.17 Post-departure trade profits

The relief for post-departure trade profits is repeated four times, as follows:

Section	**Topic**	**Post-departure trade profit relief**
Foreign dividends		
408A ITTOIA	Foreign dividend	s.408A(6)
689A ITTOIA	Foreign distribution	*None*
UK dividends		
812A ITA	Non-resident IT relief	s.812A(5)
401C ITTOIA	DT relief	s.401C(7)
413A ITTOIA	Stock dividend	s.413A(7) *not discussed here*

There is no relief for a foreign distribution, under s.689A; I wonder if that is an oversight. The point will not often arise.

It is helpful to consider the statutory wording side by side:

s.408A(6) ITTOIA	**812A(5) ITA**	**s.401C(7) ITTOIA**
Foreign dividend	*Non-resident IT relief*	*DT relief*
This section does not apply to a dividend within subsection (3) to	But income within subsection (4) in the form of a cash or stock	But a dividend or other distribution within subsection (6) in the form

[56] Section 401C(10) ITTOIA provides: "The "notional UK tax" on the relevant distribution is so much of the income tax paid by the individual for the distribution year as is attributable on a just and reasonable basis to the relevant distribution." The tax is not "notional", it is payable.

the extent that it is paid in respect of post-departure trade profits.	dividend is not "relevant investment income" to the extent that the dividend is paid, or the share capital is issued, in respect of post-departure trade profits	of a cash dividend is not a "relevant distribution" to the extent that the dividend is paid in respect of post-departure trade profits.

The s.812A/401C reliefs apply only to a cash dividend. It is difficult to see why a dividend in specie should not qualify, but perhaps it will not often matter.

Suppose:

(1) A trading company is held by a holding company
(2) The trading company makes a distribution out of its Post-departure trade profits to the holding company; and
(3) The holding company makes a distribution of that sum to its shareholders.

It is considered that the distribution by the holding company is "in respect of" post-departure trade profits.[57]

The definitions of "post-departure trade profits" are slightly differently worded, but come to the same thing:

s.408A(7) ITTOIA *Foreign dividend*	**812A(6) ITA** *Non-resident IT relief*	**s.401C(8) ITTOIA** *DT relief*
"Post-departure trade profits" are—	"Post-departure trade profits" are—	"Post-departure trade profits" are—
(a) trade profits of the company arising in an accounting period that begins after the start of the temporary period of non-residence, and	(a) trade profits of the distributing company arising in an accounting period that begins after the start of the temporary period of non-residence, and	(a) trade profits of the close company arising in an accounting period that begins after the start of the temporary period of non-residence, and
(b) so much of any trade profits of the company arising in an accounting period that straddles the start of that temporary	(b) so much of any trade profits of the distributing company arising in an accounting period that straddles the start of that	(b) so much of any trade profits of the close company arising in an accounting period that straddles the start of that

[57] See App 2.4.1 (In respect of).

period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.	temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.	temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.

The definitions of "trade profits" are slightly differently worded, but the differences do not seem material:

s.408A ITTOIA	**812A ITA**	**s.401C ITTOIA**
Foreign dividend	*Non-resident IT relief*	*DT relief*
"trade profits of the company" means the profits of any trade carried on by the company, as they would be calculated in accordance with Part 3 of CTA 2009 (trading income) if the company were UK resident.	"trade profits of the distributing company" means the profits of any trade carried on by the distributing company, as calculated in accordance with Part 3 of CTA 2009 (trading income);	In this section... "trade profits of the close company" means the profits of any trade carried on by the close company, as calculated in accordance with Part 3 of CTA 2009 (trading income).

11.17.1 *Apportionment*

Section 408A(8) ITTOIA provides:

> The extent to which a dividend is paid in respect of post-departure trade profits is to be determined on a just and reasonable basis.

The same provision is found in s.401C(9) ITTOIA.

11.18 TNR: Life policies

11.18.1 *TNR chargeable-event gains*

Section 465B ITTOIA provides:

> (1) This section applies if an individual is temporarily non-resident.
> (2) The individual is liable for tax under this Chapter [Chapter 9 Part 4] for the year of return in respect of any gain that meets the conditions in subsection (3).
> (3) The conditions are—
> (a) the gain arose in the temporary period of non-residence,
> (b) it arose from a policy issued in respect of an insurance made, or

from a contract made, before the start of that period,[58]

(c) the chargeable event giving rise to it was neither
  [i] a death nor
  [ii] a chargeable event treated as occurring under section 525(2) [personal portfolio bond annual charge],

(d) no-one is liable under section 466 or 467 in respect of the gain, [personal representatives; UK trustees]

(e) no-one is liable by virtue of section 468 for either the year of return or an earlier tax year as a result of the gain, [transfer of asset rules] and

(f) the individual would have been liable under section 465 in respect of the gain, applying the assumptions in subsection (4).

(4) The assumptions are—

(a) the individual was UK resident for the tax year in which the gain arose, and

(b) that tax year was not a split year as respects the individual.

11.18.2 *CE gains taxed on return*

Section 465B ITTOIA provides:

(5) If the individual is liable by virtue of subsection (2) in respect of a gain—

(a) the amount of the gain in respect of which he or she is liable is the amount on which tax would have been charged under this Chapter [Chapter 9 Part 4] applying the assumptions in subsection (4), but

(b) in determining that amount, section 528 [non-resident period relief] must be applied ignoring those assumptions.

(6) That amount is treated as income of the individual for the year of return.

11.18.3 *Exception*

Section 465B(8) ITTOIA provides:

This section does not apply to a gain if—

(a) in relation to the policy or contract from which the gain arises,

[58] Section 465B(7) provides: "If the gain arises from a policy or contract treated under section 473A as a single policy or contract, the date, for the purposes of subsection (3)(b), on which the insurance or contract is made is the date on which the first insurance is made in respect of which the connected policies were issued or, as the case may be, the date on which the first of the connected contracts is made."

> a terminal event[59] occurs in the temporary period of non-residence or in the period of return,
> (b) the chargeable event giving rise to the gain occurred before that terminal event,
> (c) the chargeable event giving rise to the gain is one that is treated as occurring under section 509(1) as a result of the application of section 498(1)(a),
> (d) section 498(1)(a) applies other than by virtue of section 500, and
> (e) a person (whether or not the individual) is liable for tax under this Chapter [Chapter 9 Part 4] (including by virtue of this section) in respect of any gain resulting from the terminal event.

11.18.4 *DTA override: CE gains*

Section 465B(9) ITTOIA provides:

> Nothing in any double taxation relief arrangements is to be read as preventing the individual from being liable for tax under this Chapter [Chapter 9 Part 4] in respect of any gain in respect of which the individual is liable for tax by virtue of subsection (2) (or as preventing a charge to tax on that gain from arising under this Chapter).

11.19 TNR: Offshore funds

Regulation 23 OFTR provides:

> (1) This regulation applies where an individual (“the taxpayer”) is temporarily non-resident.
> (2) The taxpayer is chargeable to income tax as if offshore income gains within paragraph (3) were offshore income gains arising to the taxpayer in the period of return.

I refer to OIGs within (3) as **“TNR OIGs”**.

11.19.1 *TNR OIG*

Regulation 23 OFTR provides:

> (3) The offshore income gains within this paragraph are those that—
> (a) arise to the taxpayer in the temporary period of non-residence, and
> (b) would be treated under section 13 of TCGA 1992 (attribution of gains to members of non-resident companies) as it applies to

[59] Section 465B(11) ITTOIA provides a referential definition: In this section— “terminal event” means an event mentioned in section 499(3);...

> offshore income gains by virtue of regulation 24 as having arisen to the taxpayer in that period if the residence assumption were made.
>
> (4) The residence assumption is—
>
> (a) that the taxpayer had been resident in the UK for the tax year in which the offshore income gain arose to the company, or
>
> (b) if that tax year was a split year as respects the taxpayer, that offshore income gain had arisen to the company in the UK part of it.

This is the same as s.1M TCGA, except (consistently with the OIG regime) there is no relief for losses and no provision dealing with s.86.

11.19.2 *OIG taxed on arising basis*

Regulation 23(5) OFTR provides:

> But a gain is not within paragraph (3) if, ignoring this regulation, the taxpayer is chargeable to income tax in respect of it (and could not cease to be so chargeable by making a claim under section 6 of the Taxation (International and Other Provisions) Act 2010).

This sensibly disapplies the TNR rules where the temporarily non-resident individual is already subject to IT on the OIG. That may be:

(1) If the individual is tax-resident and treaty-resident in a state whose treaty does not have an article giving relief from OIGs.

(2) If the individual is tax non-resident but carrying on a trade in the UK through a branch or agency.[60]

11.19.3 *TNR OIG remitted*

Regulation 23(7) OFTR provides:

> If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, any offshore income gains to which regulation 19(2) applies falling within paragraph (3) of this regulation by virtue of sub-paragraph (a) of that paragraph that were remitted to the UK at any time in the temporary period of non-residence are to be treated as remitted to the UK in the period of return.

See 11.2.3 (TNR remittances).
What about gains within reg 23(3)(b)?

[60] This is only theoretical: see 67.9 (OIG non-residence defence).

11.19.4 *Post-departure acquisitions*

Regulation 23A(1) OFTR deals with post-departure acquisitions:

> (1) Regulation 23(2) does not apply to an offshore income gain accruing on the disposal by the taxpayer of an asset if –
>
> (a) the asset was acquired by the taxpayer in the temporary period of non-residence,
>
> (b) it was so acquired otherwise than by means of a relevant disposal[61] that by virtue of section 58, 73 or 258(4) TCGA 1992 is treated as having been a disposal on which neither a gain nor a loss accrued, and
>
> (c) the asset is not an interest created by or arising under a settlement.

See 11.7 (Post-departure acquisitions).

11.19.5 *DTA override: OIG*

Regulation 23A(2) OFTR provides the DTA override:

> Nothing in any double taxation relief arrangements is to be read as preventing the taxpayer from being chargeable to income tax in respect of any offshore income gains treated under regulation 23 as accruing to the taxpayer in the period of return (or as preventing a charge to that tax from arising as a result).

See 11.8 (DTA override: Gains).

11.19.6 *Time limit for assessment*

Regulation 23A(3) OFTR provides the (unnecessary) time extension for assessment:

> Nothing in any enactment imposing any limit on the time within which an assessment to income tax may be made prevents any assessment for the year of departure from being made in the taxpayer's case at any time before the end of the second anniversary of the 31 January next following the year of return.

See 11.19.6 (Time limit for assessment).

[61] Defined by reference in reg 23A(4) "In this regulation (a) "relevant disposal" has the meaning given in section 10AA(2) of TCGA 1992".

11.20 Pre-departure income remitted

Section 832A ITTOIA provides:

> (1) This section applies if an individual is temporarily non-resident.
> (2) Treat any of the individual's relevant foreign income within subsection (3) that is remitted to the UK in the temporary period of non-residence as remitted to the UK in the period of return.

See 11.2.3 (TNR remittances).

I refer to income within (3) as **"pre-departure RFI"**.

11.20.1 *Pre-departure RFI*

Section 832A(3) ITTOIA provides:

> Relevant foreign income is within this subsection if—
> (a) it is relevant foreign income for the UK part of the year of departure or an earlier tax year, and
> (b) section 832 applies to it.

So we need to refer back to s.832(1) ITTOIA:

> This section applies to an individual's relevant foreign income for a tax year ("the relevant foreign income") if section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

This is intended to apply to a temporary non-resident who is tax non-resident and remits pre-departure RFI[62] during the temporary period of non-residence.

It is not needed where a temporary non-resident is UK law UK resident treaty non-resident and remits pre-departure RFI during the temporary period of non-residence. Treaties do not provide relief in this situation, so tax planning of this kind was not possible. Nevertheless s.832A does apply in this case.

The drafter may perhaps have thought that this planning was possible, or may have introduced the rule unintentionally by copying across in s.832A the s.1M TCGA rules which were designed for a different situation.

[62] That is, RFI which:
(1) is taxed on a remittance basis, ie accruing to a remittance basis taxpayer while the individual was UK resident; and
(2) which was not remitted prior to departure (so was not subject to tax before departure).

Income arising after the year of departure is not caught by this section. What about pre-2005 income to which s.832 ITTOIA does not apply?

11.20.2 *Apportionment*

Section 832A(4) ITTOIA provides:

> Any apportionment required for the purposes of subsection (3)(a) is to be done on a just and reasonable basis.

11.20.3 *DTA override: RFI*

Section 832A(5) ITTOIA provides:

> Nothing in any double taxation relief arrangements is to be read as preventing the individual from being chargeable to income tax in respect of any relevant foreign income treated by virtue of this section as remitted to the UK in the period of return (or as preventing a charge to that tax from arising as a result).

This is based on a misconception that DT relief may apply in this case.

11.20.4 *HMRC examples*

RDRM gives a straightforward example:

> **RDRM12690: Residence: The SRT: Temporary non-residence: Remitted foreign income** [Mar 2020]
> **Example 46 (Marie)**
> M returned to the UK during the tax year 2018–19 after a period of residence abroad.
> She originally left the UK to become resident abroad on 2 September 2013 (end of period A) and so her year of departure was 2013–14. She had been resident in the UK for the seven years before her departure and claimed the remittance basis in those years.
> While M was resident abroad she remitted to the UK the following relevant foreign income (RFI):

RFI	**From**	**Remitted**
£15,000	2009–10	2014–15
£18,000	2010–11	2014–15
£18,000	2011–12	2015–16
£20,000	2012–13	2016–17
£71,000		

> As she was not resident in the UK, this income was not taxed when remitted here.

> On her return to the UK on 1 June 2018 (the beginning of the UK part of split year 2018-19), M is within the special [TNR] rules because her period of temporary non-residence was less than five years. She will be liable to UK tax on these earlier remittances which took place when she was temporarily non-resident. They will be chargeable to UK tax in 2018-19, the tax year of her return.

M should have been advised to remain outside the UK a little longer, so as to fall outside the TNR rules.

11.21 Pre-departure gains remitted

What is the position if a temporary non-resident remits pre-departure gains to the UK (ie gains which accrued when solely UK resident but which were (un)taxed on the remittance basis)?

11.21.1 *Position pre-2019 CGT rewrite*

Before 2019/20, s.12 TCGA provided:

> *(1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—*
> - *(a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and*
> - *(b) the individual is not domiciled in the UK in that year.*
>
> *(2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.*

The gains are deemed to accrue when remitted. This deeming then brought into effect the former s.10A TCGA:

> *(1) This section applies if an individual ("the taxpayer") is temporarily non-resident.*
>
> *(2) The taxpayer is chargeable to capital gains tax as if gains and losses within subsection (3) were chargeable gains ... accruing to the taxpayer in the period of return.*
>
> *(3) The gains and losses within this subsection are—*
> - *(a) chargeable gains ... that accrued to the taxpayer in the temporary period of non-residence,*

Pre-departure gains remitted when non-resident did not accrue to the taxpayer in the temporary period of non-residence, but they were deemed to have done so, so they were further deemed to accrue in the year of return.

11.21.2 *Position from 2019/20*

Sch 1 TCGA has replaced the former s.12. Para 1 sch 1 TCGA provides:

> (1) This paragraph applies in the case of an individual to whom the remittance basis[63] applies for a tax year if—
> (a) in that year the individual disposes of foreign assets,[64]
> (b) chargeable gains accrue to the individual on the disposal of those assets, and
> (c) the gains are not taken outside the charge to capital gains tax as a result of section 1G (cases where tax year is a split year).
> (2) The gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.

Section 1M(1) TCGA provides:

> If, in the case of the disposal of an asset by an individual who is temporarily non-resident—
> (a) a gain or loss accrues to the individual in the temporary period of non-residence, and
> (b) the asset is not excluded from this subsection by section 1N (certain assets acquired in that period),
> the gain or loss is treated instead as accruing to the individual in the period of return.

The deeming in sch 1 does not bring into effect s.1M(1) TCGA, as there is no disposal of an asset by an individual who is temporarily non-resident. So strictly there is no charge on remittance by a temporarily non-resident of pre-departure gains. But a purposive construction might possibly impose the charge. See 11.2.3 (TNR remittances).

11.22 Planning

It may be advantageous to arrange that temporary non-residents receive types of income not caught by the TNR rules while abroad. For instance:
(1) income payments from discretionary trusts
(2) payments of up front interest

[63] Para 5(2) sch 1 TCGA provides: “For the purposes of this Schedule any reference to "the remittance basis" applying to an individual for a tax year is to section 809B, 809D or 809E of ITA 2007 applying to the individual for the year.”

[64] Para 5(1) sch 1 TCGA provides: “For the purposes of this Schedule "foreign asset" means an asset situated outside the UK.”

Remittance basis taxpayers must take care not to mix foreign income/gains of the non-resident period with other sums which can be remitted tax free.

Careful timing is needed for gifts to charity: normally avoid gifts during the period of temporary non-residence, and defer them to the year of return. Likewise for other IT reliefs.

The conditions allow (indeed invite) tax planning by arranging that the period of non-residence is more than 5 years.

11.23 TNR rules: Critique

The TNR rules are aimed at taxpayers who deliberately accrue or remit income or gains in years of temporary non-residence.[65] But the rules apply regardless of whether the individual intended to reduce UK tax.

The TNR rules work unfairly in that they assign income and gains of up to *five* tax years into the year of return, so:

(1) Lower rate taxpayers may fall into the higher or additional rates of tax
(2) IT personal allowances of non-resident years are lost
(3) CGT annual exemptions of non-resident years are lost

Before 2013, this was unfair but perhaps not grievously so, as the amounts involved were not so significant, and bunching is always a possible downside of the remittance basis. Following the extension of the TNR rules in 2013, the unfairness has increased. A motive test would be difficult to operate and an averaging rule would be complicated. However the unfairness is not difficult to mitigate. The TNR rules should not apply to TNR income/gains if the rate of foreign tax is, say, at least 50% of the UK rate. If that exclusion does not apply, there should be a *de minimis* exclusion, say, twice the IT personal allowance/ CGT annual exemption for each year of non-residence. That would target the rules at those at whom they are aimed.

[65] See 11.2 (Purpose of the temporary non-residence rules).

CHAPTER TWELVE

EXIT TAXES

12.1 Exit taxes: Introduction
12.2 Hold-over clawback: Emigration of individual
12.2.1 Pre-emigration disposal
12.2.2 Time limit
12.2.3 Short term posting abroad
12.2.4 Liability of donor/trustee
12.2.5 Prevention of double charge
12.3 Clawback of EIS relief

Cross references

The following topics are considered elsewhere:
10.1 (Residence throughout tax year)
128.6 (Disclosure on trust emigration)
13.12 (Departure planning)

12.1 Exit taxes: Introduction

This chapter considers exit taxes, that is, taxes imposed on emigration from the UK. They are as follows:

(1) Emigration of individual:
(a) Clawback of hold-over relief

(b) Clawback of EIS relief

(2) Emigration of trust: deemed disposal charge[1]

(3) Emigration of persons carrying on a trade

Restrictions on CGT reorganisation relief are similar to an exit charge and need consideration if an individual who carries out a reorganisation is planning to leave the UK.[2]

I do not consider:

- Exit taxes on companies
- The anti tax avoidance directive (EU) 2016/1164 (which applies to taxpayers subject to corporate tax)[3]

In this chapter:

"Emigration" refers to a person becoming non UK tax-resident (eg an individual ceasing to be resident as defined in the SRT)

"Treaty-emigration" refers to a person becoming treaty-resident in a foreign state (ie a resident of a foreign State, as defined in a DTA)

12.2 Hold-over clawback: Emigration of individual

Section 168(1) TCGA provides a clawback of hold-over relief[4] where:

(1) A gift (or disposal) has been made to an individual ("the transferee").

(2) Hold-over relief is claimed.

(3) The transferee ceases to be UK resident.

Section 168(1) TCGA provides:

> If—
> (a) relief is given
> [i] under section 165 in respect of a disposal to an individual or
> [ii] under section 260 in respect of a disposal to an individual
> ("the relevant disposal"); and
> (aa) the transferee is resident in the UK at the time of that disposal; and
> (b) at a time when he has not disposed of the asset in question, the transferee ceases to be resident in the UK,
> then, subject to the following provisions of this section,

[1] Trust migration may also lose the benefit of transitional reliefs for s.86 TCGA; see 60.6 (Pre-1998 protected trusts); 60.8 (Pre-1991 protected trusts). But that is not an exit tax.

[2] See 58.6 (CGT reorganisation TAAR*)*.

[3] See 91.8.1 (Anti-tax avoidance directive).

[4] See 57.31 (Hold-over relief).

> [A] a chargeable gain shall be deemed to have accrued to the transferee immediately before that time, and
>
> [B] its amount shall be equal to the held-over gain (within the meaning of section 165 or 260) on the relevant disposal.

There is no charge if the individual becomes treaty non-resident but remains UK-law UK resident.

The gain accruing to the individual may qualify for DT relief.

An individual ceases to be resident in the UK at the end of a tax year, even if the year is a split year.[5]

12.2.1 *Pre-emigration disposal*

The clawback charge does not apply if the individual disposes of the asset before emigration. Section 168(2) TCGA provides an artificial definition of "disposal":

> For the purposes of subsection (1) above
>
> [a] the transferee shall be taken to have disposed of an asset before the time there referred to only if he has made a disposal or disposals in connection with which the whole of the held-over gain on the relevant disposal was represented by reductions made in accordance with section 165(4)(b) or 260(3)(b)
>
> [b] and where he has made a disposal in connection with which part of that gain was so represented, the amount of the chargeable gain deemed by virtue of this section to accrue to him shall be correspondingly reduced.

Where a transfer is made to a transferee who qualifies for 2017 CGT rebasing, and hold-over relief is claimed, the transferee could not make a disposal, under this definition, so remains exposed to a clawback for the full 6 years.

Section 168(3) TCGA provides that inter-spouse disposals are disregarded:

> [1] The disposals by the transferee that are to be taken into account under subsection (2) above shall not include any disposal to which section 58 applies[6];
>
> [2] but where any such disposal is made by the transferee, disposals by his spouse or civil partner shall be taken into account under

[5] See 10.1 (Residence throughout tax year).

[6] See 93.11 (CGT spouse exemption).

> subsection (2) above as if they had been made by him.

This is obviously right.

12.2.2 *Time limit*

Section 168(4) TCGA contains a time limit:

> Subsection (1) above shall not apply by reason of a person ceasing to be resident more than 6 years after the end of the year of assessment in which the relevant disposal was made.

12.2.3 *Short term posting abroad*

Section 168(5) TCGA contains a relief for short term postings abroad:

> Subsection (1) above shall not apply in relation to a disposal made to an individual if—
> (a) the reason for his ceasing to be resident in the UK is that he works in an employment or office all the duties of which are performed outside the UK, and
> (b) he again becomes resident in the UK within the period of 3 years from the time when he ceases to be so, without having meanwhile disposed of the asset in question;
> and accordingly no assessment shall be made by virtue of subsection (1) above before the end of that period in any case where the condition in para (a) above is, and the condition in para (b) above may be, satisfied.

Section 168(6) TCGA deals with part-disposals and inter-spouse disposals by the short term non-resident. The wording is based on s.168(2)(3) but its effect is different:

> For the purposes of subsection (5) above a person shall be taken to have disposed of an asset if he has made a disposal in connection with which the whole or part of the held-over gain on the relevant disposal would, had he been resident in the UK, have been represented by a reduction made in accordance with section 165(4)(b) or 260(3)(b) ...

This is a strict rule, since even a part-disposal loses the benefit of the relief for the entire asset. The subsection continues:

> and subsection (3) above shall have effect for the purposes of this subsection as it has effect for the purposes of subsection (2) above.

Thus there is no clawback charge on an asset if T goes non-resident, and gives the asset to the spouse, provided that T becomes UK resident again within 3 years and the spouse does not dispose of the asset during that period. It is irrelevant whether the spouse becomes UK resident.

12.2.4 *Liability of donor/trustee*

The exit charge tax may be collected from:
(1) the donor who gave the asset to the individual; or
(2) the trustee who transferred the asset to the individual.

This may not be important for an individual donor because they may be prepared to take a view about the future actions of their donee. It is important for trustees who transfer assets to beneficiaries and claim hold-over relief to avoid a charge under s.71 TCGA, or to avoid s.1(3) amounts (trust gains).

Section 168(7) TCGA provides:

> Where an amount of tax assessed on a transferee by virtue of subsection (1) above is not paid within the period of 12 months beginning with the date when the tax becomes payable then, subject to subsection (8) below, the transferor may be assessed and charged (in the name of the transferee) to all or any part of that tax.

Section 168(8) TCGA sets out a time limit:

> No assessment shall be made under subsection (7) above more than 6 years after the end of the year of assessment in which the relevant disposal was made.

Thus a transferor who makes a claim for hold-over relief is at risk of a clawback if the donee emigrates within (approximately) 4 years of the transfer. Suppose:
(1) In 2011/12 D makes a gift to E.
(2) E emigrates in 2015/16.

The exit charge is payable on 31 January 2017.
E cannot be assessed until 12 months later, 31 January 2018. That is just within "6 years after the end of the year of assessment in which the relevant disposal was made". But if E had made the gift in 2010/11 it would have been too late for HMRC to collect the tax from E.
Thus:

Disposal	**No charge on migration from**	**Transferor not liable from**
2016/17	6 April 2023	6 April 2021
2017/18	6 April 2024	6 April 2022

2018/19	6 April 2025	6 April 2023
2019/20	6 April 2026	6 April 2024
2020/21	6 April 2027	6 April 2025
2021/22	6 April 2028	6 April 2026

Section 168(9) TCGA provides an indemnity (for what it may be worth):

> Where the transferor pays an amount of tax in pursuance of subsection (7) above, he shall be entitled to recover a corresponding sum from the transferee.

Trustees may protect themselves against the risk of liability in the following ways:

(1) Express indemnity. This would be easier to enforce in a foreign jurisdiction than the statutory indemnity but there is still a risk that the covenentor may be unable to pay. If more than one person can be found so as to give the trustees a joint indemnity, the risk is reduced.
(2) Retain trust assets as security for the four year period.
(3) Hold-over relief liability insurance.

12.2.5 *Prevention of double charge*

Section 168(10) TCGA provides:

> Gains on disposals made after a chargeable gain has under this section been deemed to accrue by reference to a held-over gain shall be computed without any reduction under section 165(4)(b) or 260(3)(b) in respect of that held-over gain.

This prevents double UK taxation (if the individual later makes a disposal within the charge to CGT, eg if they return to the UK). It does not prevent double taxation if the individual pays foreign tax on the same gain.

12.3 Clawback of EIS relief

There is a similar clawback of EIS relief if (in short) an individual becomes non-resident within three years of acquiring EIS shares: para 3 sch 5B TCGA.

12.4 Charge on emigration of trust

12.4.1 *Trust emigration: Navigation*

This section discusses the exit charge on appointment of non-resident trustees. For other issues see:

Topic	See para
Reporting trust emigration	128.6
Share matching/identification rules	56.12.4
Emigration/trust transfer compared	56.9.2

12.4.2 *The exit charge*

Section 80 TCGA provides an exit charge for trusts:

> (1) This section applies if the trustees of a settlement become at any time ("the relevant time") not resident in the UK.
> (2) The trustees shall be deemed for all purposes of this Act—
> (a) to have disposed of the defined assets immediately before the relevant time, and
> (b) immediately to have reacquired them,
> at their market value at that time.

Unlike the clawback of hold-over relief discussed above, this applies to all gains on the deemed disposal, not just held-over gains.

The deemed disposal takes place at the time that the trustees become non-resident, even though they continue to be chargeable on gains accruing after becoming non resident until the end of the tax year.[7]

12.4.3 *Defined assets*

"Defined assets" is a label which brings in two rules which limit the scope of the charge. Section 80(3) TCGA provides:

> Subject to subsections (4) and (5) below, the defined assets are all assets constituting settled property of the settlement immediately before the relevant time.

The exceptions are:

TCGA	Topic
s.80(4)	Trading assets
s.80(5)	Assets protected by DTA

12.4.4 *Assets of UK trade*

Section 80(4) TCGA brings in an exception for UK trading assets:

> If immediately after the relevant time—

[7] See 10.17 (Split year of trustees and PRs): 56.6 (CGT/CT: Territorial scope).

> (a) the trustees carry on a trade in the UK through a branch or agency, and
> (b) any assets are situated in the UK and either used in or for the purposes of the trade[8] or used or held for the purposes of the branch or agency,
>
> the assets falling within para (b) above shall not be defined assets.

An exit charge not appropriate as UK trading assets remain within the charge to CGT even after the emigration.

12.4.5 *DTA-exempt assets*

Section 80(5) TCGA brings in an exception for assets protected by DTAs:

> Assets shall not be defined assets if—
> (a) they are of a description specified in any double taxation relief arrangements, and
> (b) were the trustees to dispose of them immediately before the relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

An exit charge not appropriate as DTA-exempt assets were not within the charge to CGT even before the emigration.

12.4.6 *Restriction of roll-over relief*

Section 80 TCGA provides:

> (6) Section 152 shall not apply where the trustees—
> (a) have disposed of the old assets, or their interest in them, before the relevant time, and
> (b) acquire the new assets, or their interest in them, after that time,
>
> unless the new assets are excepted from this subsection by subsection (7) below.
>
> (7) If at the time when the new assets are acquired—
> (a) the trustees carry on a trade in the UK through a branch or agency, and
> (b) any new assets are situated in the UK and either used in or for the purposes of the trade[9] or used or held for the purposes of the branch or agency,

[8] See 56.7.3 (Used in/for purposes of trade).

[9] See 56.7.3 (Used in/for purposes of trade).

> the assets falling within para (b) above shall be excepted from subsection (6) above.
>
> (8) In this section "the old assets" and "the new assets" have the same meanings as in section 152.

Section 80(6) prevents roll-over relief under s.152 TCGA, from applying, so as to avoid the exit charge, where trustees:

(1) dispose of assets before becoming non-resident, and

(2) acquire new assets, outside the CGT charge, after becoming non-resident.

12.4.7 *Exit charge: UK land*

Section 80A TCGA provides:

> (1) This section applies if—
>
> (a) an interest in UK land[10] is deemed to have been disposed of under section 80(2) by trustees of a settlement at any time, and
>
> (b) the trustees make an election under this subsection.
>
> (2) The gain or loss that, but for this subsection, would have accrued to the trustees at that time is not to accrue at that time.
>
> (3) But, on a subsequent disposal by the trustees of the whole or part of the interest in UK land, the whole or a corresponding part of the gain or loss is treated as accruing on the subsequent disposal.
>
> (4) This gain or loss is in addition to any gain or loss that actually accrues on the subsequent disposal.

There is no exemption for land-rich assets, within the indirect disposal charge.

12.4.8 *Emigration on death of trustee*

Section 81(1) TCGA provides:

> Subsection (2) below applies where—
>
> (a) section 80 applies as a result of the death of a trustee of the settlement, and
>
> (b) within the period of 6 months beginning with the death, the trustees of the settlement become resident in the UK.

I refer to the period between the trustee death and the re-appointment of

[10] Section 80A(5) TCGA incorporates the s.1C TCGA definition: see App 2.21 (Interest in land/chargeable interest).

a UK resident trustee as the **"non-resident period"**.

The typical case is where a trust has a UK trustee and a foreign trustee, and the UK trustee dies, leaving it with a sole foreign trustee. There could be other cases.

Assuming this condition is met, we move on to the relief in s.81(2) TCGA:

> That section [s.80 trust emigration charge] shall apply as if the defined assets were restricted to such assets (if any) as—
> (a) would be defined assets apart from this section, and
> (b) fall within subsection (3) or (4) below.

In short, there is no exit charge apart from the exceptional cases of (3) and (4).

Section 81(3) TCGA provides:

> Assets fall within this subsection if they were disposed of by the trustees in the period which—
> (a) begins with the death, and
> (b) ends when the trustees become resident in the UK.

The trustees will be UK resident for the year of the death of the trustee[11] and in principle subject to CGT on the trust gains of the year.[12] If so s.81(3) will not usually make a great deal of difference, though it might alter the year in which the gain arises. But it is possible that during the non-resident period, the trustees dispose of assets and qualify for CGT DT relief. In that case s.81(3) effectively brings the gain (as at the time of migration) back into charge to CGT.

Section 81(4) TCGA provides:

> Assets fall within this subsection if—
> (a) they are of a description specified in any double taxation relief arrangements,
> (b) they constitute settled property of the settlement at the time immediately after the trustees become resident in the UK, and
> (c) were the trustees to dispose of them at that time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the

[11] If the non-resident period straddles two tax years, the trustees will be UK resident for both tax years.

[12] See 56.6 (CGT/CT: Territorial scope).

disposal.

Trustees will need to consider the relevant treaty and the facts of the case; but assuming the trust was treaty-resident in the UK before the death, it is likely to be treaty-resident in the UK at the end of the non-resident period.

12.4.9 *Immigration on death of trustee*

Section 81(5) TCGA provides relief where there has been an accidental immigration to the UK followed by prompt emigration:

> Subsection (6) below applies where—
> (a) at any time the trustees of a settlement become resident in the UK as a result of the death of a trustee of the settlement, and
> (b) section 80 applies as regards the trustees of the settlement in circumstances where the relevant time (within the meaning of that section) falls within the period of 6 months beginning with the death.

Assuming this condition is met, we read on to the relief in s.81(6) TCGA:

> That section [s.80 trust emigration charge] shall apply as if the defined assets were restricted to such assets (if any) as—
> (a) would be defined assets apart from this section, and
> (b) fall within subsection (7) below.

In short, there is no charge apart from the exceptional case of s.81(7) TCGA:

> Assets fall within this subsection if—
> (a) the trustees acquired them in the period beginning with the death and ending with the relevant time, and
> (b) they acquired them as a result of a disposal in respect of which relief is given under section 165 or in relation to which section 260(3) applies [hold-over relief[13]].

This is only a limited relief: it avoids the exit charge, but it does not avoid the CGT charge on actual disposals of assets by the trustees in the year during which they accidentally UK resident. In some cases CGT treaty relief might be available, even during the period that the trust has UK resident trustees, on the basis that the trust continued to be treaty resident in the treaty State.

[13] See 57.31 (Hold-over relief).

12.5 Liability for trust exit charge

The usual rule for CGT liability of trustees is in s.65(1) TCGA:

> Subject to subsection (3) below, capital gains tax chargeable in respect of chargeable gains accruing to the trustees of a settlement or capital gains tax due from the personal representatives of a deceased person may be assessed and charged on and in the name of any one or more of the relevant trustees ....[14]

Section 65(3) has an exemption for trustees who retired before an emigration before a proposal to emigrate first emerged:

> Where section 80 applies as regards the trustees of a settlement ("the migrating trustees"), nothing in subsection (1) above shall enable any person—
> (a) who ceased to be a trustee of the settlement before the end of the relevant period,[15] and
> (b) who shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might cease to be resident in the UK,
>
> to be assessed and charged to any capital gains tax which is payable by the migrating trustees by virtue of section 80(2).

It is not, strictly, necessary for the retiring trustee to know of the proposal. It is sufficient that a proposal exists. But in practice that is not likely to arise.

Section 82 TCGA provides:

> (1) This section applies where—
> (a) section 80 applies as regards the trustees of a settlement ("the migrating trustees"), and
> (b) any capital gains tax which is payable by the migrating trustees by virtue of section 80(2) is not paid within 6 months from the time when it became payable.
>
> (2) The Board may, at any time before the end of the period of 3 years

[14] Defined in s.65(4): "In this section ...
"the relevant trustees", in relation to any chargeable gains, means the trustees in the year of assessment in which the chargeable gains accrue and any subsequent trustees of the settlement..."

[15] Defined by reference in s.65(4): "In this section "the relevant period" has the same meaning as in section 82".

> beginning with the time when the amount of the tax is finally determined, serve on any person to whom subsection (3) below applies a notice—
>
> (a) stating particulars of the tax payable, the amount remaining unpaid and the date when it became payable;
>
> (b) stating particulars of any interest payable on the tax, any amount remaining unpaid and the date when it became payable;
>
> (c) requiring that person to pay the amount of the unpaid tax, or the aggregate amount of the unpaid tax and the unpaid interest, within 30 days of the service of the notice.
>
> (3) This subsection applies to any person who, at any time within the relevant period,[16] was a trustee of the settlement, except that it does not apply to any such person if—
>
> (a) he ceased to be a trustee of the settlement before the end of the relevant period, and
>
> (b) he shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might cease to be resident in the UK.
>
> (4) Any amount which a person is required to pay by a notice under this section may be recovered from him as if it were tax due and duly demanded of him; and he may recover any such amount paid by him from the migrating trustees.
>
> (5) A payment in pursuance of a notice under this section shall not be allowed as a deduction in computing any income, profits or losses for any tax purposes.

SP 5/82 sets out HMRC practice:

> 5 Payment can only be sought from former trustees where the Revenue is unable to obtain payment from current trustees. In the first instance, payment will generally be sought from those persons who resigned as trustees immediately before the trust migrated and then from earlier trustees. Each case will, however, need to be considered in the light of the relevant facts.

12.5.1 *The relevant period*

This term is defined in s.82(6) TCGA:

> For the purposes of this section—
>
> (a) [this is a spent transitional rule for 1991/92];

[16] See 12.5.1 (The relevant period).

> (b) in any other case, the relevant period is the period of 12 months ending with the relevant time.

Thus the relevant period is in effect one year.

12.5.2 *Critique*

In short, a trustee at the time of the emigration is liable, and a trustee who retired up to a year before is liable if aware of the proposal to migrate the trust. This may help HMRC (because they can go back to trustees in an earlier year) and it may help the trustees (if they can say that they were not aware of a migration). But it is not likely to make any difference either way. There is no good reason for special rules and s.82 and s.65(3) TCGA should be repealed, resulting in a small tax simplification. But it does not really matter.

12.6 Treaty-emigration of trust

Section 83(1) TCGA provides:

> This section applies if the trustees of a settlement, while continuing to be resident in the UK, become at any time ("the time concerned") trustees who fall to be regarded for the purposes of any double taxation relief arrangements —
> (a) as resident in a territory outside the UK, and
> (b) as not liable in the UK to tax on gains accruing on disposals of assets ("relevant assets") which
> [i] constitute settled property of the settlement and
> [ii] fall within descriptions specified in the arrangements.

This is looking at the situation where trustees become treaty-non resident under a DTA tiebreaker test. Strictly, trustees who are treaty-resident of a foreign State are still liable for UK tax unless they make a claim, but that is just administrative and for the purpose of the charge, it is assumed that a claim will be made if it can.

If a treaty has a mutual agreement tie-breaker (rather than place of effective management) the trustees will not know until agreement is reached where they are treaty-resident, but they must manage as best as they can.

It is possible that agreement of a new DTA with a new CG article might bring about a treaty-emigration.

Assuming the conditions of s.83(1) are met, one moves on to s.83(2) TCGA which imposes the charge:

> The trustees shall be deemed for all purposes of this Act—
> (a) to have disposed of their relevant assets immediately before the time concerned, and
> (b) immediately to have reacquired them,
> at their market value at that time.

The treaty-emigration charge does not contain the two exceptions applicable to the s.80 exit charge but they are not needed:

(1) There is no need for an exemption for UK trading assets, as these will not qualify for DTA relief and so will not be relevant assets.
(2) There is no need for the exemption for DTA-exempt assets, as if the assets are DTA exempt, the trust cannot normally "become" DTA exempt.

The treaty-emigration charge has no special rules for trustee liability, but none are needed.

The definition of "relevant assets" is the same as the definition of "protected assets" in the s.87 code which applies (in a slightly amended form) to dual-resident trusts; see 61.38 (Dual-Resident trust: s.88 TCGA)

12.6.1 *"DTR arrangements" for CGT*

Section 288(1) TCGA defines DTR arrangements for CGT purposes:

> "double taxation relief arrangements"—
> (a) in relation to a company[17] means arrangements that have effect under section 2(1) of TIOPA 2010 except so far as they have effect in relation to petroleum revenue tax, and
> (b) in relation to any other person means arrangements that have effect under section 2(1) of TIOPA 2010 but only so far as they have effect in relation to capital gains tax;

The treaty needs to have effect in relation to CGT, in short, to contain a capital gains article. Most treaties do have a CG article, following the OECD Model, but some do not. For instance, the Belize DTA does not count as "DTR arrangements" within this definition, because it applies for IT but not for CGT. Note that the same expression is often used with a wider definition.[18]

[17] Companies are not relevant to this chapter, but one needs to read para (a) in order to follow para (b).

[18] For an example, see the definition of "Treaty non-resident" set out in 11.3.2 (SRT/treaty residence).

12.6.2 *Restriction of roll-over relief*

Section 84 TCGA provides:

> (1) Section 152 shall not apply where—
> (a) the new assets[19] are, or the interest in them is, acquired by the trustees of a settlement,
> (b) at the time of the acquisition the trustees are resident in the UK and fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
> (c) the assets are of a description specified in the arrangements, and
> (d) were the trustees to dispose of the assets immediately after the acquisition, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

This is the equivalent of s.80(6) TCGA: see 12.4.6 (Restriction of roll-over relief).

12.7 Payment by instalments

Sch 3ZAA TMA (introduced 2019) allows payment of the CGT to be made by 6 annual instalments. Interest is payable. This is not a particularly generous relief.

It was introduced in order to satisfy EU law.[20] Some take the view that the 2019 reform is insufficient to make the UK legislation EU-law compliant. The relief only allows installments, with interest: there is still a dry tax charge.[21] But it seems unlikely that the point will ever be tested.

Paragraph 1 sch 3ZAA TMA provides:

> (1) This Schedule makes provision for certain persons who are liable to pay an exit charge under section 25 or 80 of the 1992 Act to agree with HMRC to pay the charge in instalments.
> (2) An agreement under this Schedule is called a "CGT exit charge payment plan".

12.7.1 *Eligibility*

The relief applies to charges under s.80 TCGA (trust emigration) and s.25

[19] Defined by reference in s.84(2): "In this section "the new assets" has the same meaning as in section 152."

[20] *Trustees of the P Panayi Accumulation & Maintenance Settlements v HMRC* C-646/15.

[21] See Bober, *CGT Exit Charges*, Tax Journal, 12 April 2019.

TCGA.[22] It is helpful to read para 2/3 sch 3ZAA TMA side by side:

Para 2 (s.25 charge)	**Para 3 (s.80 charge)**
(1) This paragraph applies where a person resident in an EEA state outside the UK is liable to pay an exit charge for a tax year by virtue of section 25(1) or (3) of the 1992 Act (deemed disposals by non-residents).	(1) This paragraph applies where the relevant trustees of a settlement are liable to pay an exit charge for a tax year by virtue of section 80 of the 1992 Act (charge on ceasing to be resident in the UK).
(2) The person is eligible to enter into a CGT exit charge payment plan in relation to any one or more of the assets to which the exit charge relates if—	(2) The relevant trustees are eligible to enter into a CGT exit charge payment plan in relation to any one or more of the assets to which the exit charge relates if—
(a) at the time of the event giving rise to the exit charge, the person had a right to freedom of establishment, or	(a) at the time the trustees of the settlement ceased to be resident in the UK for the purposes of that section, they had a right to freedom of establishment,[23]
	(b) immediately before that time, the trustees of the settlement used the asset or assets for an economically significant activity carried on in the UK,[24] and
(b) at any time after that event, the person carries on a trade in an EEA state other than the UK through a branch or agency and the asset or	(c) immediately after that time, those trustees— (i) become resident in another EEA state for the purposes of the 1992

[22] See 56.8 (Asset ceases to be chargeable). In practice s.25 rarely applies.

[23] Defined in para 10 sch 3ZAA TMA: "“right to freedom of establishment” means a right protected by—
(a) Article 49 of the Treaty on the Functioning of the European Union, or
(b) Article 31 of the EEA agreement”.

[24] Defined by reference in para 10 sch 3ZAA TMA: “economically significant activity” has the meaning given by section 13A(4) of the 1992 Act (reading references to a company as references to trustees)”. The drafter has overlooked the 2019 CGT rewrite; see 64.18 (Economically significant activity).

assets is or are—	Act, and
(i) used in or for the purposes of that trade,[25] or (ii) used or held for the purposes of the branch or agency.	(ii) use the asset or assets for an economically significant activity carried on there.

12.7.2 *Tax to which plan relates*

Paragraph 4 sch 3ZAA TMA provides:

> (1) A CGT exit charge payment plan may relate to—
>
> (a) the whole of the exit charge attributable to the asset or assets to which the plan relates (the "deferrable exit charge"), or
>
> (b) only part of the deferrable exit charge.
>
> (2) In this Schedule—
>
> "deferred exit charge" means the amount of the exit charge to which a plan relates;
>
> "taxpayer", in relation to a plan, means the person eligible under paragraph 2 or 3 to enter into the plan.
>
> (3) For the purposes of this Schedule the exit charge attributable to an asset is such proportion of the exit charge as any gain accruing to the taxpayer in respect of the asset by virtue of section 25(1) or (3) or 80 of the 1992 Act in the tax year bears to the total gains to which the exit charge relates.

12.7.3 *Payment by instalments*

Paragraph 5 sch 3ZAA TMA provides:

> A CGT exit charge payment plan must provide for the deferred exit charge to be payable in 6 equal instalments where—
>
> (a) the 1st instalment is due on the day on which payment of the exit charge is (apart from the plan) due and payable under section 59B, and
>
> (b) the other 5 instalments are due one on each of the first 5 anniversaries of that day.

12.7.4 *Application for plan*

Paragraph 6 sch 3ZAA TMA provides:

> (1) To enter into a CGT exit charge payment plan, the taxpayer must

[25] See 56.7.3 (Used in/for purposes of trade).

> apply to HMRC.
> (2) An application for a CGT exit charge payment plan must—
> (a) be made on or before the date specified in section 59B as the date by which the exit charge is payable, and
> (b) contain details of all the matters which are required by this Schedule to be specified in the plan.
> (3) A CGT exit charge payment plan is entered into when—
> (a) the taxpayer agrees to pay the deferred exit charge, and any interest on it, in accordance with the plan, and
> (b) an officer of Revenue and Customs agrees to accept payment of the deferred exit charge in accordance with the plan.
> (4) A CGT exit charge payment plan is void if—
> (a) an event giving rise to the exit charge is part of arrangements the main purpose of which, or one of the main purposes of which, is to defer the payment by the taxpayer of the exit charge, or
> (b) any information furnished by the taxpayer in connection with the plan does not fully and accurately disclose all facts and considerations material to the decision of the officer of Revenue and Customs to accept payment in accordance with the plan.

12.7.5 *Contents of plan*

Paragraph 7 sch 3ZAA TMA provides:

> (1) If the taxpayer is eligible under paragraph 2, a CGT exit charge payment plan must specify—
> (a) the EEA state in which the person entering into the plan is resident, and
> (b) if the person has ceased to carry on a trade in the UK through a branch or agency there, the date on which the person ceased to do so.
> (2) If the taxpayer is eligible under paragraph 3, a CGT exit charge payment plan must specify—
> (a) the date on which the trustees of the settlement became not resident in the UK for the purposes of section 80 of the 1992 Act, and
> (b) the EEA state in which those trustees became resident.
> (3) A CGT exit charge payment plan must specify—
> (a) the amount of the exit charge which, in the taxpayer's opinion, the taxpayer is liable to pay under section 25 or (as the case may be) section 80 of the 1992 Act in respect of the tax year, and
> (b) the amount of the deferred exit charge.

> (4) A CGT exit charge payment plan may contain appropriate provision regarding security for HMRC if an officer of Revenue and Customs considers that there would be a serious risk to collection of any amount of deferred exit charge without it.

12.7.6 *Effect of plan*

Paragraph 8 sch 3ZAA TMA provides:

> (1) This paragraph applies where a CGT exit charge payment plan is entered into by the taxpayer.
> (2) The deferred exit charge remains due and payable under section 59B (payment of income tax and capital gains tax: assessments other than simple assessments).
> (3) However, the Commissioners for Her Majesty's Revenue and Customs—
> (a) may not seek payment of any of the deferred exit charge otherwise than in accordance with the plan, and
> (b) may make repayments in respect of any of the deferred exit charge paid, or any amount paid on account of the deferred exit charge, before the plan is entered into.
> (4) The deferred exit charge carries interest in accordance with Part 9 as if the plan had not been entered into; and each time a payment is made under the plan, it is to be paid together with any interest payable on it.
> (5) The taxpayer is liable to penalties for late payment of the deferred exit charge only if the taxpayer fails to make payments in accordance with the plan (see item 3C of the Table at the end of paragraph 1 of Schedule 56 to the Finance Act 2009).
> (6) Any of the deferred exit charge which is for the time being unpaid may be paid at any time before it becomes payable under the plan together with interest payable on it to the date of payment.
> (7) If—
> (a) the taxpayer becomes bankrupt under the law of England and Wales or Northern Ireland or the taxpayer's estate is sequestrated under the law of Scotland,
> (b) an event corresponding to an event in paragraph (a) occurs under the law of an EEA state outside the UK, or
> (c) the taxpayer becomes resident in a country or territory that is not an EEA state,
>
> the outstanding balance of the deferred exit charge is payable on the date on which the next instalment would otherwise have been due under the plan.

12.7.7 *Definitions*

Sch 3ZAA TMA provides:

> 9 If, for the purposes of any double taxation arrangements, a person is treated at any time as resident in a territory other than an EEA state, the person is also to be treated as resident there at that time for the purposes of this Schedule.
>
> 10 In this Schedule—
>
> "double taxation arrangements" means arrangements made by two or more territories with a view to affording relief from double taxation;
>
> "exit charge" means—
>
> (a) for the purposes of paragraph 2, any amount of capital gains tax which a person is liable to pay for a tax year which the person would not be liable to pay if gains arising by virtue of section 25 of the 1992 Act in the tax year were ignored;
>
> (b) for the purposes of paragraph 3, any amount of capital gains tax which the relevant trustees are liable to pay for a tax year which they would not be liable to pay if gains arising by virtue of section 80 of the 1992 Act in the tax year were ignored;
>
> "trade" includes a profession or vocation.

12.7.8 *Pre-2019 emigration*

Para 7 sch 7 FA 2019 provides:

> The amendments made by paragraphs 1 and 2 [inserting sch 3ZAA TMA] have effect in relation to amounts of capital gains tax which a person is liable to pay by virtue of section 25(1) or (3) or 80 of TCGA 1992 in relation to events occurring on or after 6 April 2019.

What about an emigration before 6 April 2019? It was argued in the *Panayi* case that the exit charge was void! The FTT has rejected this somewhat claim, which would give a windfall benefit to pre-2019 migrations.[26]

12.8 Trader: Emigration/immigration

Section 17(1) ITTOIA provides:

[26] For some reason this is reported under the name *Trustees of the P Panayi Accummulation And Maintenance Trusts v HMRC* [2019] UKFTT 622. Normal practice (which is to be preferred) is to use the actual names of the trustees in the case title.

> (1) This section applies if—
> (a) an individual carries on a trade[27] otherwise than in partnership, and
> (b) there is a change of residence.

12.8.1 *"Change of residence"*

Section 17 ITTOIA provides:

> (1A) For the purposes of this section there is a "change of residence" if—
> (a) the individual becomes or ceases to be UK resident, or
> (b) a tax year is, as respects the individual, a split year.
> (1B) The change of residence occurs—
> (a) in a case falling within subsection (1A)(a), at the start of the tax year for which the individual becomes or ceases to be UK resident, and
> (b) in a case falling within subsection (1A)(b), at the start of whichever of the UK part or the overseas part of the tax year is the later part.

12.8.2 *Deemed cessation*

Section 17(2) ITTOIA provides:

> If this section applies and the individual does not actually cease permanently to carry on the trade immediately before the change of residence occurs, the individual is treated for income tax purposes—
> (a) as permanently ceasing to carry on the trade at the time of the change of residence, and
> (b) so far as the individual continues to carry on the trade, as starting to carry on a new trade immediately afterwards.

12.8.3 *Trading losses*

Section 17(3) ITTOIA provides:

> But subsection (2) does not prevent a loss made before the change of residence from being deducted under section 83 of ITA 2007 from profits arising after the change.

12.8.4 *Emigration of partner*

For the equivalent rules for partnerships, see s.852 ITTOIA:

[27] Section 17(4) ITTOIA provides:"This section applies to professions and vocations as it applies to trades."

> (6) If there is a change of residence, the partner is treated as permanently ceasing to carry on one notional trade when that change of residence occurs and starting to carry on another immediately afterwards...
> (8) Subsections (1A) and (1B) of section 17 apply for the purposes of subsection (6).

12.9 Exit taxes: DTAs

12.9.1 *Exit taxes/DTAs: Consistency*

OECD say that exit taxes are not prohibited by a DTA in OECD Model form:

> *Departure or exit taxes*
> 65. In a number of States, liability to tax on some types of income that have accrued for the benefit of a resident (whether an individual or a legal person) is triggered in the event that the resident ceases to be a resident of that State. Taxes levied in these circumstances are generally referred to as "departure taxes" or "exit taxes" and may apply, for example, to accrued pension rights and accrued capital gains.
> 66. To the extent that
> [a] the liability to such a tax arises when a person is still a resident of the State that applies the tax and
> [b] does not extend to income accruing after the cessation of residence,
> nothing in the [OECD Model] Convention, and in particular in Articles 13 [capital gains] and 18 [pensions], prevents the application of that form of taxation.
> Thus, tax treaties do not prevent the application of domestic tax rules according to which a person is considered to have realised pension income, or to have alienated property for capital gain tax purposes, immediately before ceasing to be a resident.
> The provisions of tax treaties do not govern when income is realised for domestic tax purposes (see, for example, paragraphs 3 and 7 to 9 of the Commentary on Article 13)[28]; also, since the provisions of tax treaties apply regardless of when tax is actually paid (see, for example, paragraph 12.1 of the Commentary on Article 15), it does not matter when such taxes become payable.[29]

[28] See 56.23.8 ("Alienation").

[29] OECD, BEPS Action 6: Final Report "Preventing the Granting of Treaty Benefits in Inappropriate Circumstances" (2015).

12.9.2 *Exit taxes: Double taxation*

The double taxation problem arises where:

(1) An individual pays an exit tax on income/gain on migration to a new state; and

(2) The new state later charges tax on the same income/gain.

OECD discuss the double taxation problem:

> 66 ... The application of [exit] taxes, however, creates risks of double taxation where the relevant person becomes a resident of another State which seeks to tax the same income at a different time, e.g. when pension income is actually received or when assets are sold to third parties. This problem, which is the result of that person being a resident of two States at different times and of these States levying tax upon the realisation of different events, is discussed in paragraphs 4.1 to 4.3 of the Commentary on Article 23 A and 23 B.[30]

To follow the commentary at para 4, it is necessary to begin at para 3:

> 3. International juridical double taxation may arise in three cases:
>
> a) where each Contracting State subjects the same person to tax on his worldwide income or capital (**concurrent full liability to tax**, see paragraph 4 below);
>
> b) where a person is a resident of a Contracting State (R)[31] and derives income from, or owns capital in, the other Contracting State (S or E) and both States impose tax on that income or capital (see paragraph 5 below);
>
> c) where each Contracting State subjects the same person, not being a resident of either Contracting State to tax on income derived from, or capital owned in, a Contracting State; this may result, for instance, in the case where a non-resident person has a permanent establishment in one Contracting State (E) through which he derives income from, or owns capital in, the other Contracting State (S) (**concurrent limited tax liability**, see paragraph 11 below).
>
> 4. The conflict in case a) is reduced to that of case b) by virtue of Article

[30] OECD, BEPS Action 6: Final Report "Preventing the Granting of Treaty Benefits in Inappropriate Circumstances" (2015).

[31] Footnote original: Throughout the Commentary on Articles 23 A and 23 B, the letter "R" stands for the State of residence within the meaning of the Convention, "S" for the State of source or situs, and "E" for the State where a permanent establishment is situated.

> 4 [treaty-residence]. This is because that Article defines the term "resident of a Contracting State" by reference to the liability to tax of a person under domestic law by reason of his domicile, residence, place of management or any other criterion of a similar nature (paragraph 1 of Article 4) and by providing special rules for the case of double residence to determine which of the two States is the State of residence (R) within the meaning of the Convention (paragraphs 2 and 3 of Article 4).
>
> 4.1 Article 4, however, only deals with cases of concurrent full liability to tax. The conflict in case a) may therefore not be solved if the same item of income is subject to the full liability to tax of two countries but at different times.
>
> The following example illustrates that problem.
>
> [a] Assume that a resident of State R1 derives a taxable benefit from an employee stock-option that is granted to that person. State R1 taxes that benefit when the option is granted.
>
> [b] The person subsequently becomes a resident of State R2, which taxes the benefit at the time of its subsequent exercise.
>
> In that case, the person is taxed by each State at a time when he is a resident of that State and Article 4 does not deal with the issue as there is no concurrent residence in the two States.

Where the source of the income is in the departure state, the source/residence conflict rules solve the problem.

> 4.2 The conflict in that situation will be reduced to that of case b) and solved accordingly to the extent that the employment services to which the option relates have been rendered in one of the Contracting States so as to be taxable by that State under Article 15 [Employment income] because it is the State where the relevant employment is exercised. Indeed, in such a case, the State in which the services have been rendered will be the State of source for purposes of elimination of double taxation by the other State. It does not matter that the first State does not levy tax at the same time (see paragraph 32.8). It also does not matter that that State considers that it levies tax as a State of residence as opposed to a State of source (see the last sentence of paragraph 8).

Although this is considering employment income, the same reasoning can apply to an exit charge on chargeable gains.

In other cases the only solution is by inter-state mutual agreement:

> 4.3 Where, however, the relevant employment services have not been rendered in either State, the conflict will not be one of source-residence double taxation and, as confirmed by the phrase "except to the extent

> that these provisions allow taxation by that other State solely because the income is also income derived by a resident of that State" found in paragraph 1 of Articles 23 A and 23 B, any resulting double taxation will be outside the scope of these Articles.
>
> The mutual agreement procedure provided for in paragraph 3 of Article 25 could be used to deal with such a case. One possible basis to solve the case would be for the competent authorities of the two States to agree that each State should provide relief as regards the residence-based tax that was levied by the other State on the part of the benefit that relates to services rendered during the period while the employee was a resident of that other State. Thus, in the above example, if the relevant services were rendered in a third State before the person became a resident of State R2, it would be logical for the competent authority of State R2 to agree to provide relief (either through the credit or exemption method) for the State R1 tax that has been levied on the part of the employment benefit that relates to services rendered in the third State since, at the time when these services were rendered, the taxpayer was a resident of State R1 and not of State R2 for purposes of the convention between these two States.

OECD BEPS action 6 (final report) cites the last paragraph, and continues:

> 67. Based on that approach, a possible basis for solving double taxation situations arising from the application of departure taxes would be for the competent authorities of the two States involved to agree, through the mutual agreement procedure, that each State should provide relief as regards the residence-based tax that was levied by the other State on the part of the income that accrued while the person was a resident of that other State. This would mean that the new State of residence would provide relief for the departure tax levied by the previous State of residence on income that accrued whilst the person was a resident of that other State, except to the extent that the new State of residence would have had source taxation rights at the time that income was taxed (i.e. as a result of paragraphs 2 or 4 of Article 13[32]). States wishing to provide expressly for that result in their tax treaties are free to include provisions to that effect.[33]

Some DTAs deal with this. For instance, art 13(10) Canada/UK DTA

[32] See 56.24 (DT CGT relief: Exceptions).

[33] OECD, BEPS Action 6: Final Report "Preventing the Granting of Treaty Benefits in Inappropriate Circumstances" (2015).

provides:

> 10 Where an individual ceases to be a resident of a Contracting State and by reason thereof is treated under the laws of that State as having alienated property before ceasing to be a resident of that State and is taxed in that State accordingly and at any time thereafter becomes a resident of the other Contracting State, the other Contracting State may tax gains in respect of the property only to the extent that such gains had not accrued while the individual was a resident of the first-mentioned State. However, this provision shall not apply to property, any gain from which that other State could have taxed in accordance with the provisions of this Article, other than this paragraph, if the individual had realized the gain before becoming a resident of that other State. The competent authorities of the Contracting States may consult to determine the application of this paragraph.

12.10 Exit charge on individuals?

Apart from the above, there is no general charge on the emigration of an individual. It is sometimes suggested that there should be.

There are issues if the asset is illiquid, though those can be addressed by allowing deferral until the asset is disposed of. There are issues of double taxation discussed above.

The consequence of an exit charge should logically be rebasing on arrival, though that would substantially reduce the tax yield of the reform.

An exit tax on individuals would be a (major) restriction on free movement of persons, and an assessment of the merits of an exit charge depends on the extent to which that freedom is regarded as an important human right. The 2022/23 edition of this work para 12.9 and 12.10 discussed EU restrictions on exit taxes, based on freedom of establishment; this is no longer directly relevant after Brexit, but the policy issues are related.

CHAPTER THIRTEEN

UK ARRIVAL OR DEPARTURE: TAX CHECKLIST

13.1 Review of residence status
13.2 Individual coming to UK; not TNR
13.2.1 Before start of split year
13.2.2 Before UK part of split year
13.3 Key dates to diarise
13.4 Temporary non-resident
13.5 Individual an employee
13.6 Trustee
13.7 Director/partner
13.8 Trusts
13.8.1 Protected/settlor-excluded trust
13.8.2 Settlor-interested non-protected trust
13.9 Company not held in trust
13.10 Pre-deemed-domicile planning
13.11 Pre-actual domicile planning
13.12 Departure planning

The position will have to be reviewed in the light of the proposed FIG/domicile reforms discussed in chap A1; this is not considered here.

13.1 Review of residence status

An individual needs residence status advice *before* the start of the tax year of arrival:

Issue	**Comment/See para**
Consider whether the individual is treaty-resident in a foreign state for part of the year of arrival, or generally; and whether anything can be done to improve the position	9.2 (Treaty/UK-law residence)
Consider whether the year of arrival is a split year; if so identify the dates of the UK/overseas parts of the split year and whether anything can be done to improve the position	10.4 (Definition of "split year")
What record keeping is needed	6.35 (Record keeping)
If not first time of UK residence:	If individual was formerly UK resident

Consider whether temporary non-resident; and whether anything can be done to improve the position	but TNR rules do not apply, consider remitting income and gains from earlier residence period to UK; see 34.35 (Remittance when non-resident)
Review domicile; consider whether steps are appropriate to manifest domicile intention	4.8 (Remaining non-dom)

Note that small and easy changes may make the difference between:
(1) Split year/non-split year
(2) Residence/ non-residence.

Residence/non-residence is important even if the year of arrival would otherwise be a split year, for instance, for another year of overseas workday relief (arrivers earnings relief).

13.2 Individual coming to UK; not TNR

13.2.1 *Before start of split year*

Even if the year is a split year, some steps still need to be taken before the start of the *tax year* ie before 6 April; (not before the start of the UK part of the year):

Issue	**Comment/See para**
Realise dividends when non-resident to qualify for tax credit	30.7 (Non-resident recipient)
Realise UK "disregarded income" when non-resident if non-resident's IT relief applies	45.1 (Non-residents IT relief: Introduction)
Take benefit from trust within s.731/643A	50.47 (s.731 income in split year)
Take capital payment before start of year of residence	61.18 (s.87 gains of split year)

Advisors may also need to consider the foreign tax implications of moving to the UK.

13.2.2 *Before UK part of split year*

If the tax year is a split year, the following may be done before the UK part of the year; but if the year is not a split year, it needs to be done before the start of the year.

Issue	**Comment/See para**
Realise foreign income when non-resident	
Realise gains when non-resident (pre-arrival rebasing) if assets may be disposed of when UK resident	56.10 (Date of disposal/ acquisition)
Postpone realising losses until resident	
Review securities portfolio: avoid UK securities to avoid IT/CGT on arising basis	
Cryptoassets: consider transfer to non-resident trust or company to make non-UK situate.	96.6.6 (Cryptoasset: Planning)
If individual is a sole trader: consider arrangements to ensure foreign part of trade qualifies for remittance basis	21.4.3 (UK resident trader: Planning)
Transfer UK situate property (other than UK land/land-rich assets) to a trust/company held by a trust, if gain may otherwise arise on a disposal when UK resident	Move from arising basis to s.87 basis
Arrangements to separate taxable income/gains from (clean) capital Remit capital for property purchase and anticipated expenses at outset	18.55 (Remittance basis planning)
Consider if existing debts are relevant debts; if so review banking arrangements	18.21 (Relevant debt); 18.24.6 (Income/gains from collateral)
Review life policies if a chargeable event gain may arise when UK resident; review personal portfolio bonds This applies to policies held personally or in a trust created by individual	70.5 (No remittance basis)
Home or chattels held in a company: consider steps to avoid this	39.1 (Home/chattels owned by company)
If individual within POA rules once resident, consider POA election (in practice this would be rare)	83.33 (POA election)
Review Will, particularly: if UK situate property is acquired if individual may acquire UK domicile of choice, or	

UK habitual residence, if domicile/habitual residence may be uncertain[1]	
Spouses holding income-producing property in unequal shares	Consider unequal ownership declaration; see 94.7.4

13.3 Key dates to diarise

Deemed domicile	Diarise date deemed domicile begins
Temporary non residence	Diarise date that individual falls within temporary non-residence rules under 4/7 years residence test; see 11.2.1 (TNR gains)

13.4 Temporary non-resident

Some of the above points will apply to temporary non-resident individuals. TNR gains and TNR income will come into charge on return to the UK. But there may be scope for realising income when non-resident which is not TNR income. See 10.2.2 (TNR income).

13.5 Individual an employee

Employee within overseas workday relief: Nominate qualifying account for OWR mixed fund rule Deadline: 31 January after year of nomination	34.24 (OWR: Qualifying account)
Employee within overseas workday relief or split year: Apply for s.690 direction	36.6 (PAYE clearance: s.690 direction)

PAYE81950 and PAYE manual appendices 4, 5, 6, 7A and 7B set out special PAYE and NIC arrangements for internationally mobile employees/short term business visitors:

PAYE81950 Short Term Business Visitors	UK Employers in countries not covered by a DTA or who have branches overseas. These employers would be obliged to operate PAYE on non-resident employees who come to the UK to work for them from overseas group companies or branches, but only for a short period of time. If the employees are eligible for personal allowances there may ultimately be no UK liability. See 36.12 (Short Term Business Visitor: < 30 days).

[1] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 18.31 (EU Succession Regulation).

EP Appendix 4

For individuals who are:

- Resident in a country with a DTA with an employment income article
- Coming to work in the UK for a UK company or the UK branch of an overseas company, or are
- Legally employed by a UK resident employer, but economically employed by a separate non-resident entity
- Expected to stay in the UK for 183 days or less in any twelve month period. See 36.13 (Short-term visitors: EP app 4).

EP Appendix 5

For employers required to deduct foreign tax in addition to UK PAYE from payments being made to employees sent to work abroad: provisional relief for double taxation to employees who must pay both UK tax and foreign tax from the same payments of earnings. See 36.14 (Foreign tax credit: EP app 5).

EP Appendix 6

For employees assigned to work in the UK from abroad who are tax equalised. Tax equalisation is an arrangement between an employer and a foreign national employee who comes to the UK to work. The employee will be entitled to a specified amount of net earnings and benefits and the employer meets their UK Tax liability. See 36.15 (Tax equalisation: EP app 6).

Two further arrangements deal with NIC:

EP Appendix 7A

For employees subject to an EP Appendix 6 agreement, who are assigned to work in the UK from abroad and have an employer or host employer in the UK liable for secondary UK NICs. The employee pays NICs on earnings in this employment above the annual upper earnings limit (UEL) for the year or on earnings at or above the UEL in each earnings period throughout the year

EP Appendix 7B

For employees employed by a UK employer who are assigned to work abroad for a period of limited duration, but for more than a complete tax year, who have an ongoing liability to UK NICs whilst abroad.
The employee will be paid above the upper earnings limit (UEL) in every earnings period throughout the tax year and will receive some earnings and benefits derived from the employment from sources other than the UK employer.
The employee will not be liable to UK tax on the earnings from employment

13.6 Trustee

If individual is a trustee, including trustee of a charitable trust and a bare trust (or US Grantor trust):

Review impact of change of individual residence on residence status of trust. May need to retire before tax year of residence (or by concession, during offshore part of a split year).	7.4 (Trust residence for IT/CGT) 10.17 (Split year of trustees and PRs)
Consider whether having a UK resident trustee requires the trust to register under TRS (even if the trust is not UK resident)	131.9.2 (Non-UK trust with UK trustee)

13.7 Director/partner

If individual a director/shadow director: review impact of individual's residence on company residence.	
If individual a partner, consider place of partnership control/management.	85.19.2 (Control and management)

13.8 Trusts

13.8.1 *Protected/settlor-excluded trust*

Distribution from trust within s.731 to remove relevant income?
Review securities portfolio: avoid UK securities to avoid IT on an arising basis (non-protected income)

13.8.2 *Settlor-interested non-protected trust*

Distribute trust income when settlor non-resident
Realise gains when settlor non-resident (not in overseas part of split year)

13.9 Company not held in trust

Company within s.3 TCGA: Realise company gains when individual non-resident; postpone realising losses until resident	
Company within s.720: realise income when non-resident	
Consider transferring to trust to avoid non-protected income/tax on UK gains on arising basis	92.14 (Protected s.720 company income)

13.10 Anticipating deemed domicile

Diarise possible date of acquiring deemed IHT domicile
In anticipation of becoming deemed domiciled:

Formerly domiciled resident: review trusts made by individual (including charitable trusts)	
Deemed domicile under 15-year rule: consider creating protected trust	
Review loans to/from trusts to preserve protected trust status	92.7 (Payments under loans)
Arrange foreign income/gains while remittance basis still applicable (similar issues to pre-residence planning)	

See too 5.12 (Deemed domicile: Planning).

13.11 Anticipating actual domicile

Consider above steps and further planning in view of fact that:

Protected trusts lose protected status	
2008 CGT transitional reliefs lost	61.53

13.12 Departure planning

Many of the above points apply in reverse.
For instance, realise losses before departure and postpone realising gains or income; review impact of departure on trust or corporate residence.
In addition consider:

Form P85 (Leaving the UK - getting your tax right)
Form NRL1 (Non resident landlord scheme: Application to receive UK rental income without deduction of UK tax)
Form R43 (Claim to personal allowances and tax repayment by an individual not resident in the UK)
Revoke gift aid declarations for charities which the individual may wish to continue to support.[2] Otherwise there could be a Gift Aid clawback charge if the

[2] This would only be necessary for ongoing gift aid declarations, ie those which cover present and future gifts, but that is the standard form.

individual makes a gift to the charity (even a non-UK charity) and does not pay sufficient UK tax to frank the gift.[3]

Tax position in country of arrival

[3] Section 424 ITA; see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 15.44.4 (Gift Aid clawback charge). Online version *https://www.taxationofcharities.co.uk*

CHAPTER FOURTEEN

INCOME AND ITS CATEGORISATION

14.1 Income: Introduction
14.2 Terminology: Income/gains/profit
14.3 Charges to IT/CGT
14.3.1 Charge to IT/CT
14.3.2 Tax year/financial year
14.3.3 Assessment periods
14.3.4 IT is an annual tax
14.4 Need for a source?
14.5 Income Tax: a tax on income?
14.5.1 What is income?
14.5.2 Tree and fruit
14.5.3 Fact or law?
14.6 Income categories
14.6.1 Pre-rewrite categorisation: Schedules/Cases
14.6.2 ITTOIA/CTA income categories
14.6.3 ITA income categories
14.7 Categorisation tie-breakers
14.7.1 No double taxation
14.7.2 Priority in charging provision
14.7.3 Property/trade income overlap
14.7.4 S&I/trade income
14.7.5 S&I/property income
14.7.6 Dividend /trade/property income
14.7.7 S & I Income/ITEPA income
14.7.8 S & I /chargeable event income
14.7.9 Part 5 ITTOIA/trade income
14.7.10 Other Part 5 overlaps
14.7.11 Trade /employment/ITEPA income
14.7.12 Dividend/employment income

14.1 Income: Introduction

I deal with the topic of income as follows.

This chapter deals with:

- The charge on income
- The concept of income
- Whether IT is a tax on income/an annual tax
- The categorisation of income for UK tax[1], and overlap rules for income falling into two categories

The next two chapters deal with:

- Territorial principles: location of income sources/the concept of RFI
- Income-recognition vocabulary

[1] DTAs operate a different scheme: see 107.9 (DTA income categorisation).

14.2 Terminology: Income/gains/profit

In modern terminology:

- "gains" is understood to mean capital gains
- "profits" (used for CT) means income and chargeable gains[2]

So in modern terminology we refer to:

Term	**Subject to**
Income	Income Tax/CT charge on income
Gains	CGT/CT charge on gains; sometimes IT (eg, offshore income gains)
Profits	Corporation Tax

"Profits or gains" is an archaic phrase formerly used to mean "income".[3] The Tax Law Rewrite took it out of the rewrite legislation, and it now survives only in dusty corners which the Tax Law Rewrite did not reach; and of course the old expression is preserved in the aspic of pre-rewrite case law.

14.3 Charges to IT/CGT

We begin with the charges to IT and CT. (For the charge to CGT, see 56.2).

14.3.1 *Charge to IT/CT*

s.4(1) ITA	**s.2(1) CTA 2009**
Income tax is charged for a year only if an Act so provides.	Corporation tax is charged on profits of companies for any financial year for which an Act so provides.
[No equivalent]	(2) In this Part [Part 2 CTA 2009] "profits" means income and chargeable gains, except in so far as the context otherwise requires.

That takes us to the F(no.2)A 2023:

[2] See 14.3.1 (Charge to IT/CT).

[3] See eg s.1 ICTA 1970 (derived from s.2 ITA 1853): Income tax "shall be charged ... in respect of all property, profits or gains respectively described or comprised in the Schedules ..."

s.1 F(no.2)A 2023

Income tax is charged for the tax year 2023-34.

s.5(1) F(no.2)A 2023

Corporation tax is charged for the financial year 2024.

14.3.2 *Tax year/financial year*

Section 4 ITA defines “tax year”:

> (2) A year for which income tax is charged is called a “tax year”.
> (3) A tax year begins on 6 April and ends on the following 5 April.
> (4) “The tax year 2007-08” means the tax year beginning on 6 April 2007 (and any corresponding expression in which two years are similarly mentioned is to be read in the same way).

Sch 1 Interpretation Act 1978 defines “financial year”:

> “Financial year” means, in relation to matters relating to the Consolidated Fund, the National Loans Fund, or moneys provided by Parliament, or to the Exchequer or to central taxes[4] or finance, the twelve months ending with 31st March.

14.3.3 *Assessment periods*

IT/CT differ on this point.
Section 4(5) ITA provides:

> Every assessment to income tax must be made for a tax year.[5]

Section 8 CTA 2009 provides:

> (1) Corporation tax for a financial year is charged on profits arising in the year.
> (2) Corporation tax is calculated and chargeable, and assessments to corporation tax are made, by reference to accounting periods.
> [I discuss ss(3)(4) at 15.2.2 (Arising: Quantum of charge)]
> (5) If a company's accounting period falls within more than one financial year, the amount of the profits arising in the accounting period that is chargeable to corporation tax must be apportioned between the financial years in which the accounting period falls.

[4] “Central taxes” is not defined but must include Corporation Tax.

[5] Section 4(6) ITA flags an exception to this rule:
“Subsection (5) is subject to Chapter 15 of Part 15 (by virtue of which an assessment may relate to a return period).”

14.3.4 *IT is an annual tax*

IT is often described as an annual tax. That label may describe two distinct (albeit related) rules:

(1) By longstanding tradition, each year's Finance Act imposes the tax for one tax year only, the tax being re-applied in each year.

(2) IT is usually computed, and assessments are usually made, by reference to a tax year.

Nothing turns on the first point. It would be possible for a Finance Act to impose IT for more than one year (as happens for CGT, and, occasionally, for CT). Nothing would change. Income tax does not lapse at the end of the year, and no-one expects it to.

The second point aptly describes a feature of income tax. It is also the case for CGT and CT.

But the saying that "income tax is an annual tax" is not a principle to be rigorously applied.[6]

CT, like IT, may be described as an annual tax, in the sense that:

(1) It is charged by reference to financial years.

(2) It is generally[7] imposed for a financial year only, the tax being re-applied in each year.

But nothing turns on that.

14.4 Need for a source?

In Walker *v Centaur Clothes Group*:[8]

> Income tax is traditionally a source-based annual tax, liability depending upon the existence of a source of income falling under one of the Schedules during the year of assessment...

There are two distinct rules here:

(1) Income tax was "traditionally" a source-based tax: it only applied to income from a source specified in one of the Schedules. So in the absence of a source there could be no income; or if it was said to be income, there would be no income tax on it

[6] See 16.6 (Need for a source?).

[7] That is not always the case, eg s.6(1) FA 2021 imposed CT for two successive years; it provided: "Corporation tax is charged for the financial years 2022 and 2023."

[8] *Walker v Centaur Clothes Group* [2000] UKHL 23 citing *Brown v National Provident Institution* 8 TC 57.

(2) Income tax was "traditionally" an "annual tax": it only applied if that source exists in the year of assessment.

The first rule was self-evident.[9] The second rule was decided in *Brown v National Provident Institution*.[10] But these rules have long ceased to apply:

> If the income tax had retained that ancient simplicity, it would be true to say that income could not be within the charge to tax unless there was a source within the charge ...
> It is, however, no longer true to say that liability to income tax depends upon the existence during the year of assessment of a source within the charge.
> [1] There are cases (such as post-cessation receipts) when liability depends upon the existence of income defined by reference to a source which does not exist within the year of assessment.[11]
> [2] Or liability may depend upon an event, such as a balancing charge on the sale of an asset which has attracted a capital allowance, or the receipt of a capital sum from a particular kind of transaction, which is deemed to be taxable income received in that year of assessment or sometimes spread over several years of assessment.[12]

[9] See s.1 ICTA 1970 (derived from s.2 ITA 1853): Income tax "shall be charged ... in respect of all property, profits or gains respectively described or comprised in the Schedules ..."

[10] 8 TC 57. The reader may think that the opposite view was better: ie, although there had to be a source within the schedules, there was no requirement that the source had to exist in the year of assessment. If so, the reader is in good company: that was the view of Rowlatt J and Lord Cave. One might therefore debate whether *Brown v NPI* was correctly decided, or whether it would be decided in the same way today. But it does not matter.

[11] [Author's footnote] For instance, under the ITA remittance basis, which applies from 2008, there is a tax charge on the remittance of income even though the source of income does not exist in the year of remittance.

[12] [2000] UKHL 23. The changes referred to can be seen by contrasting s.1 ICTA 1970 (derived from s.2 ITA 1853) and s.1 ICTA 1988:

s.1 ICTA 1970
Where any Act enacts that income tax shall be charged for any year at any rates, then, subject to the provisions of the Income Tax Acts, the tax at those rates shall be charged for that year in respect of all property, profits or gains respectively described or

s.1(1) ICTA 1988
Income tax shall be charged in accordance with the provisions of the Income Tax Acts in respect of all property, profits or gains respectively described or comprised in the Schedules, A, B, C, D, E and F, set out in sections 15 to 20 or which in accordance with the Income Tax Acts are

It continues to be the case that income is not taxed if it does not fall within one of the taxable categories (which have replaced the schedules). Most obviously, foreign source income of a non-resident is not taxable, not because of an exemption as such, but for lack of a charging provision.

For UK residents, the taxable categories are wide, as one would expect. Income falling outside them (other than under a specific exemption) is difficult to imagine, particularly as the category of Misc Sweep-up Income covers (more or less) all income not otherwise chargeable.

14.5 Income Tax: a tax on income?

"Income tax is a tax on income."[13] This witticism is less true now than when it was formulated in 1900, because (as noted just above) various receipts of a capital nature are now subject to income tax.[14] However there are contexts where this principle still applies, ie where an IT charge applies to receipts of an income nature, not to receipts of a capital nature, and the traditional income/capital distinction must be applied. Most notably, capital receipts are not trading receipts, capital expenditure is not deductible in computing trading income, and the distinction is related to the vexed question of the meaning of "trade".[15]

Examples relevant to this book are:

Topic	**See para**
Dividends from non-resident companies	30.9
Annual Payments	31.3
Misc Sweep up Income	33.2.1
Distributions from trusts	41.8

14.5.1 *What is income?*

To the extent that IT is a tax on income, we need to know what is income, or to put it another way, how to distinguish income/capital. The courts have found the capital/income border difficult to define and the reader may think the analysis is sometimes insufficiently rigorous.

The general trend in tax reform has been to abolish the distinction when

comprised in the Schedules contained in the following sections of this Act	to be brought into charge to tax under any of those Schedules or otherwise.

[13] *London County Council v Attorney General* 4 TC 265.

[14] There are too many to list, but examples (if needed) include offshore income gains, DDS gains, chargeable-event gains, and pre-owned assets.

[15] See App 2.23 (Trade).

possible (eg, the taxation of dividends from UK companies[16] and the trend has gone further for CT, eg loan relationships, intellectual property).

I think it is best to address the income/capital distinction in the context of the charging provision where it arises; but here make some general points which are more widely applicable.

14.5.2 *Tree and fruit*

In *Ryall v Hoare*:[17]

> "Profits or gains" [in modern terms, "income"[18]] mean something which is in the nature of interest or fruit, as opposed to principal or tree.

IRC v John Lewis Properties refers to the "hackneyed simile" and continues:[19]

> it may be more elucidatory in some contexts than in others. Sometimes, it merely begs the question: what is tree and what is fruit? I doubt whether the analogy is helpful in the present case. There is no doubt that if JLP had granted the bank, say, a 15 year lease of the properties for a premium, the premium would have been a capital payment.... But in what sense would that have been a disposal of the tree? And why would it be any more of a disposal of the tree than the mere assignment of the right to receive rents for 15 years? In both cases, JLP would retain its freehold interest intact, and in both cases the value of its reversion would be (temporarily) reduced by reason of the transaction.

In *Beard v HMRC*:[20]

> Many of the authorities referred to the well-worn analogy of the tree (for capital payments) and the fruit (for income payments). [HMRC] made the point that this analogy can only be taken so far. I agree.

The application of the analogy is sometimes risible. For instance, in *Courtaulds Investments v Fleming*:[21]

> the effect of building up a reserve of this character is to engraft on the tree of the shareholder's original investment in the form of paid-up share capital an additional member, not of the same provenance or of the same

[16] See 30.3.2 (Dividend of capital nature).

[17] 8 TC 521 at p.525.

[18] See 14.2 (Terminology: Income/gains/profit).

[19] [2002] EWCA Civ 1869 at [89].

[20] [2022] UKFTT 129 (TC) at [173].

[21] 46 TC 111 at p.125.

> original character as the tree itself, which must nevertheless be accepted as becoming part of the tree to the exclusion of any character it may previously have had as a fruit of the tree....The effect of the distribution ... was to lop from the tree part of the engrafted member consisting of a proportionate part of the share premium reserve. So the distribution did not, in my judgment, leave the foreign possession intact.

The metaphor works in easy cases when help is not needed. In difficult cases, anything can be called fruit or tree. What is needed is legal analysis. One might put it this way: if the analysis is not the fruit of the metaphor, the metaphor should not be grafted onto the analysis.

14.5.3 *Fact or law?*

In *Bluecrest v HMRC*:[22]

> Before us, neither side displayed any enthusiasm for investigating the further question whether the issue of the proper characterisation of the final PIP awards as being of a capital or an income nature was one of law or of fact, or a mixture of the two. Counsel said that an anthology of citations supporting almost any view on the topic could probably be found, and it would not be fruitful to spend time on it. Nevertheless, it seems to me that the question cannot be ignored, however difficult it may be to answer. My own view, which has not been tested in argument and which I therefore state with some diffidence, is that the question is in principle one of law, to which there can be only one correct answer in any given factual situation. It is not a question of evaluation, or of mixed fact and law, for the tribunal of fact...

BlueCrest cited *Beauchamp v F W Woolworth Plc* where the issue was whether a currency exchange loss was of an income or capital nature, and thus whether it was deductible in computing trading profits:[23]

> On principle, and in the light of the judicial pronouncements which I have cited, the question involved in the present case is one of law....

On the other hand, *BlueCrest* also said:[24]

[22] [2022] UKUT 200 (TCC). *Bluecrest* is one of a trio of what should turn out to be leading cases; the other two are *Odey Asset Management v HMRC* [2021] UKFTT 31 (TC); *HFFX v HMRC* [2021] UKFTT 36 (TC). But further discussion should wait until these decisions are final.

[23] [1990] 1 AC 478 at p.492G.

[24] at [114].

> Although the question is in my view ultimately one of law, I do attach some significance to the fact that in the present case both the expert tribunals have had little difficulty in concluding that the awards were of an income nature...

14.6 Income categories

Income must be categorised, (or classified) into categories, (or classes). Categorisation is necessary whenever different rules apply to different types of income, which often happens.

One might use the word "source" to describe what I here call categories, but the word "source" may be used in a more precise way. A bank account, (or a shareholding in a company), may be called a source of income, but the category of income is interest (or dividends). Source is where the income comes from; categorisation is the type of income. So in the present context, I prefer the word "category" to "source".

14.6.1 *Pre-rewrite categorisation: Schedules/Cases*

The pre-rewrite system categorised income into
(1) Schedules (broad categories or sets of categories)
(2) Schedules were divided into Cases (sub-categories).

In 1936 the IT Codification Committee reviewed the system and were not complimentary:[25]

> The existing classification of income cannot be defended on any logical ground, and was, no doubt, largely based on administrative convenience. On the one hand, it involves the distribution of income of the same nature among different Schedules and Cases ... On the other hand the existing classification brings together matters having no intelligible connection. ... In [Schedule D Case III] is there is grouped with interest ... income so dissimilar from it as the profits of dealers in cattle and sellers of milk.

For all these faults, this system survived another 80 years, until the tax law rewrite. Perhaps it shows that coherence is not an essential feature of a tax system; or a characteristically British pragmatism; or the weight of history and the difficulty of reform; or perhaps the criticism was exaggerated and minor reforms sufficed to improve matters; or perhaps all of the above. However that may be, the reader will acquire some familiarity with the

[25] (1936) Cmd 5131 at [43].

schedular system from pre-2005 case law, and of course it has influenced the post-rewrite system.

Abolition of the Schedules has not in fact made much difference.

In *Anson v HMRC*, CoA approved a comment from the HC in *Memec*:[26]

> The schedular character of income tax ... means that the court has always placed great importance on the concept of the source of taxable income ... The concept of source is a more or less coded subtext to income tax and corporation tax statutes.

CoA continued:

> The schedular character of income tax derives from the fact that historically the legislative approach was not to define income but to provide that income from sources specified in a number of schedules (Schedules A to F) to the legislation should be subject to income tax. If income could not be brought within the schedules, it was not taxable. Income tax is still imposed by reference to categories of income even though schedules are not generally used, and so the point made by Robert Walker J remains good.

But one does not need to look at the old law to see that sources of income (which I prefer to call characterisation of income) is fundamental to IT. While it is true that if income is not within the schedules, of their post-rewrite equivalents, it is not taxable, the rule has little if any application because income can (more or less) always within them.

14.6.2 *ITTOIA/CTA income categories*

ITTOIA/CTA 2009 classify income into:

(1) Categories (covered by a Part[27] of ITTOIA/CTA 2009)
(2) Sub-categories (covered by a Chapter of ITTOIA/CTA2009)

I refer to these as **"income categories"**. The main income categories are the following:

CATEGORY	**ITTOIA**	**CTA 2009**
	Part: *Chapter*	***Part:*** *Chapter*
Trading income	**2**	**3**
Trade profits	2: 2	3:2
Post-cessation receipts	2: 18	3:15

[26] *Anson v HMRC* [2013] EWCA Civ 63 at [33]; the point was not discussed on appeal.

[27] I adopt the style of the Taxes Acts, which write Part and Chapter with initial capitals, to reflect the technical nature of the words.

Property income	**3**	**4**
Property income	3: 3	4: 3
Mines, etc	3: 8	4: 7
Wayleaves	3: 9	4:8
Post-cessation receipts	3: 10	4:9
"Savings & Investment Income"	**4**	-
Interest	4:2	
Disguised interest	4: 2A	-
UK dividends	4: 3	-
Non-UK dividends	4: 4	-
Purchased life annuities	4:7	-
Deeply discounted securities	4: 8	-
Life policies: chargeable-event gains	4: 9	6:11[28]
"Part 5 ITTOIA Miscellaneous Income"	**5**	**10**
Royalties/intellectual property income	5: 2	-
Offshore receipts from intangible property	5: 2A	-
Settlor-interested trusts	5: 5	-
Estate in course of administration	5: 6	10:3
Annual-Payment income	5: 7	10: 7
Misc Sweep-up Income	5: 8	10: 8

CT has diverged from IT, in the following cases in particular:

Loan relationships/Deemed loan relationships	**5/6**
Derivatives	**7**
Intangible fixed assets/Intellectual property	**8/9**

A note on the naming of Parts of ITTOIA:
Parts 2/3: The names here (trading/property income) are straightforward.
Part 4: I describe this as **"Savings & Investment Income"** with initial capitals, to indicate that it is a technical term, meaning specifically income identified in the Chapters of Part 4 ITTOIA.
Part 5: "Miscellaneous income" as a label scarcely does justice to this set of income types, which have nothing in common except that they have been placed in Part 5, for lack of anywhere better. I refer to it as **"Part 5 ITTOIA Miscellaneous Income"** with initial capitals to reflect the technical meaning of my term.

14.6.3 *ITA income categories*

ITA 2007 deals with reliefs and rates, but it also creates income categories relating to avoidance, including:

[28] The correspondence between ITA and CTA is inexact.

CATEGORY	**ITA** ***Part:*** *Chapter*	**CTA 2010** ***Part:*** *Chapter*
Transactions in land	**9A**	**8ZB**
Accrued income profits	**12**	-
Tax Avoidance	**13**	
Transactions in securities	13: 1	**15**[29]
Transfer of assets abroad	13: 2	-
Transfer of income streams	13: 5A	16:1/1A/4
- ditto - through partnerships	13: 5AA/5D	
Loan or credit transactions	13: 5C	16: 3
Disguised investment management fees	13: 5E	
Income-based carried interest	13: 5F	

Most of these items have their own chapter in this work, except for ToA, which has five chapters.

The ITTOIA categorisation scheme is not exactly simple. It is influenced by the pre-rewrite system. The decision to rewrite CTAs 2009/2010 separately from ITTOIA/ITA doubled the number of provisions, and the reader may doubt whether that was worthwhile. But there it is.

The ITTOIA/CTA 2019 categorisations seem to make sense, just about; – at least, once the reader is familiar with them. The ITA/CTA 2010 categories of tax avoidance type income are entirely *ad hoc* and have no underlying general principles.

Could anything better be devised? Discuss.

14.7 Categorisation tie-breakers

There are statutory priority rules for income which fall into two categories.

These alter the pre-rewrite position under which HMRC had some choice how to assess income which fell within more than one Case of Schedule D.[30] Pre-2005 case law needs review in the light of the post-rewrite provisions, but the old cases are still important on some aspects.

14.7.1 *No double taxation*

It continues to be the case that:

(1) Income tax is regarded as one tax, not a set of taxes, notwithstanding that the different categories have different rules and methods of

[29] The correspondence between ITA and CTA is inexact.

[30] See *Liverpool and London and Globe Insurance v Bennett* 6 TC 327; ITTOIA EN Change 66.

computation and

(2) the same source of income cannot be taxed twice.[31]

14.7.2 *Priority in charging provision*

Sometimes priority is addressed in the charging provision. This is done in the charging provisions for Annual Payments/disguised interest/misc sweep-up income:

s.683 ITTOIA **Annual Payment**	**s.381A ITTOIA** **Disguised interest**	**s.687 ITTOIA** **Misc Sweep-up Income**
(1) Income tax is charged under this Chapter [Chapter 7 Part 5 ITTOIA] on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act.	(2) Income tax is charged on [a return which is economically equivalent to interest] return if the return is not charged to income tax under or as a result of any other provision of this Act or any other Act.	(1) Income tax is charged under this Chapter [Chapter 8 Part 5 ITTOIA] on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.
		(2) Subsection (1) does not apply to annual payments or to income falling within Chapter 2A of Part 4 [Disguised interest].
(2) Subsection (1) does not apply to annual payments that would be charged to income tax under or as a result of another provision but for an exemption.	(3) Subsection (2) does not apply to a return that would be charged to income tax under or as a result of another provision but for an exemption.	(3) Subsection (1) does not apply to income that would be charged to income tax under or as a result of another provision but for an exemption.

More often, there is a separate provision which addresses the issues of priority.

14.7.3 *Property/trade income overlap*

An activity may constitute both trading and a property business; and a receipt can be both a trading receipt and a receipt of a property business. The paradigm case is rent received by a property developer from

[31] *HMRC v PA Holdings* [2011] EWCA Civ 1414 at [28] - [30].

temporary letting of land awaiting development.

s.4(1) ITTOIA	**s.201(1) CTA 2009**
Any receipt or other credit item, so far as it falls within— (a) Chapter 2 of this Part (receipts of trade, profession or vocation), and (b) Chapter 3 of Part 3 so far as it relates to a UK property business, is dealt with under Part 3	Any receipt or other credit item, so far as it falls within— (a) Chapter 2 of this Part (receipts of trade), and (b) Chapter 3 of Part 4 so far as it relates to a UK property business, is dealt with under Chapter 3 of Part 4.
s.261 ITTOIA	**s.287 CTA 2009**
Any receipt or other credit item, so far as it falls within— (a) Chapter 3 of this Part so far as it relates to an overseas property business or Chapter 8 or 9 of this Part (rent receivable in connection with a UK section 12(4) concern or for UK electric-line wayleaves), and (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation), is dealt with under Part 2.	Any receipt or other credit item, so far as it falls within— (a) Chapter 3 of this Part so far as it relates to an overseas property business or Chapter 7 or 8 of this Part (rent receivable in connection with a UK section 39(4) concern or for UK electric-line wayleaves), and (b) Chapter 2 of Part 3 (receipts of a trade), is dealt with under Part 3.

EN ITTOIA explains:

> 1058. The priority rules ... make it clear that a charge under Part 3 of this Act as UK property income has priority over a charge under Part 2 as trading income. This reflects the rule in Schedule D Case I (section 18(3) of ICTA)...The rent is taxed as property income, even if it could properly be regarded as a trade receipt.
> 1059. In the case of a foreign trade and foreign property, the rule in section 65A(1)(b) of ICTA is the reverse of that in section 18(3) of ICTA. An overseas property business does not include "income to which section 65(3) of ICTA applies (income immediately derived from carrying on a trade)". So the priority rule in section 261 preserves this position.

Perhaps the reason for the anomaly is to maximise income classified as UK source. Under these rules, if UK property income is a receipt of a foreign trade, it is classified as UK property income (and so taxable even in circumstances where foreign trading income may not be); whereas if foreign property income is part of a UK trade it is treated as UK trading income (and similarly taxable).

14.7.4 *S&I/trade income*

A receipt can be both a trading receipt and Savings & Investment Income. The paradigm case is interest/dividends received by a bank/financial trader.

Section 366(1) ITTOIA provides:

> Any income, so far as it falls within–
> (a) any Chapter of this Part [Part 4, Savings & Investment Income], and
> (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
> is dealt with under Part 2.

14.7.5 *S&I/property income*

A receipt can be both a receipt of a property business and Savings & Investment Income. Section 366(2) ITTOIA provides:

> Any income, so far as it falls within–
> (a) any Chapter of this Part [Part 4, Savings & Investment Income], and
> (b) Chapter 3 of Part 3 so far as the Chapter relates to a UK property business,
> is dealt with under Part 3.

14.7.6 *Dividend /trade/property income*

Section 931W CTA2009 makes similar provision for CT:

> (1) Any income so far as it falls within—
> (a) this Part [Part 9A, company distributions], and
> (b) Chapter 2 of Part 3 (income taxed as trade profits),
> is dealt with under Part 3.
> (2) Any income so far as it falls within—
> (a) this Part, and
> (b) Chapter 3 of Part 4 (profits of property businesses) so far as the Chapter relates to a UK property business,
> is dealt with under Part 4.

14.7.7 *S & I Income/ITEPA income*

Section 366(3) ITTOIA provides:

> Any income, so far as it falls within–
> (a) any Chapter of this Part [Part 4, Savings & Investment Income] other than
> [ii] Chapter 3 [UK dividends] or
> [iii] [Chapter] 6 [release of close company loans], and
> (b) Part 2, 9 or 10 of ITEPA 2003 (employment income, pension income or social security income),
> is dealt with under the relevant Part of ITEPA 2003.

For instance, an annuity could be pension income in which case the ITEPA charge has priority over the annual payment charge in Part 4 ITTOIA. Conversely, the charge on dividends/release on close company loans appears to have priority over ITEPA.[32]

14.7.8 *S & I /chargeable event income*

Section 366(4) ITTOIA provides:

> Nothing in this section prevents amounts both–
> (a) being counted as income for the purposes of Chapter 9 of this Part (gains from contracts for life insurance etc.), and
> (b) being taken into account in calculating income, or counting as income, for the purposes of other Parts of this Act,
> but see section 527 (reduction for sums taken into account otherwise than under Chapter 9).

14.7.9 *Part 5 ITTOIA/trade income*

A receipt can be both a trading receipt and Part 5 ITTOIA Miscellaneous Income. The paradigm case is royalties received by an author.
Section 575(1) ITTOIA provides:

> Any income, so far as it falls within—
> (a) any Chapter of this Part [Part 5, Miscellaneous Income], and
> (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
> is dealt with under Part 2.

The charge on trading profits under Part 2 ITTOIA has priority over the charge on royalty income in Part 5 ITTOIA.

14.7.10 *Other Part 5 overlaps*

Section 575 ITTOIA provides:

[32] See *Esprit Logistics Management v HMRC* [2018] UKFTT 287 (TC) at [121] - [124].

> (2) Any income, so far as it falls within—
> (a) any Chapter of this Part [Part 5, Miscellaneous Income], and
> (b) Chapter 3 of Part 3 so far as the Chapter relates to a UK property business,
> is dealt with under Part 3.
> (3) Any income, so far as it falls within—
> (a) any Chapter of this Part [Part 5, Miscellaneous Income], and
> (b) Chapter 2 or 3 of Part 4 (interest and dividends etc. from UK resident companies etc.),
> is dealt with under the relevant Chapter of Part 4.
> (4) Any income, so far as it falls within—
> (a) any Chapter of this Part [Part 5, Miscellaneous Income], and
> (b) Part 2, 9 or 10 of ITEPA 2003 (employment income, pension income or social security income),
> is dealt with under the relevant Part of ITEPA 2003.

This does not oust the settlor-interested trust code in Chapter 5 of Part 5.[33]

14.7.11 *Trade /employment/ITEPA income*

IT/CT have different rules:

s.4(2) ITTIOA	**s.201(2) CTA 2009**
Any receipt or other credit item, so far as it falls within—	Any receipt or other credit item, so far as it falls within—
(a) this Part [Part 2, trading income], and	(a) this Part, and
(b) Part 2, 9 or 10 of ITEPA 2003 (employment income, pension income or social security income),	(b) Chapter 4 of Part 10 (income from holding an office),
is dealt with under the relevant Part of ITEPA 2003.	is dealt with under Chapter 4 of Part 10.

See 37.16.1 (Deemed non-employment) for some exceptions.

14.7.12 *Dividend/employment income*

I mention *PA Holdings v HMRC*[34] for completeness. This was an

[33] *Clipperton v HMRC* [2022] UKUT 351 (TCC) at [91]-[92]; the context shows that must be correct, as exclusion of Part 5 would have absurd consequences.

[34] [2011] EWCA Civ 1414.

avoidance scheme under which employees received remuneration in the form of dividends on alphabet shares. Section 20(2) ICTA stated, or seemed to, that the charge on dividends had priority. So the income had to be taxed as dividends (and at lower rates). The argument was baldly, if unconvincingly, rejected by the Court of Appeal.[35] The facts will not recur, as s.20(2) ICTA has no precise equivalent, not to mention disguised remuneration and the GAAR, so the case has limited contemporary relevance. But it is a striking illustration of the approach of the Courts, or at least, of some Courts, that avoidance of this nature will not be permitted to succeed.

CHAPTER FIFTEEN

INCOME RECOGNITION: RECEIVE/ENTITLED/ARISE/PAID

15.1 Income-recognition vocabulary
15.2 Paradigm contexts
15.2.1 Receipt/entitlement basis of liability
15.2.2 Arising: Quantum of charge
15.2.3 Payment: WHT, PAYE
15.2.4 Accruing: Gains
15.2.5 Profits of companies
15.3 Recognition/attribution: Analysis
15.4 Glosses and paraphrases
15.5 When is interest recognised
15.5.1 Pre-ITTOIA case law
15.5.2 Interest due, not paid
15.5.3 Credit to non-bank account
15.5.4 Interest capitalised
15.5.5 Credit to charged account
15.5.6 Uncashed interest cheque
15.5.7 Offset interest
15.5.8 HMRC examples
15.5.9 Investment management fees
15.5.10 Escrow arrangements
15.5.11 Payment in specie
15.5.12 Payment by issue of note
15.6 When are dividends recognised
15.6.1 The statutory provisions
15.6.2 When dividend due & payable
15.6.3 When is dividend actually paid
15.6.4 Payment to blocked account
15.6.5 Uncashed dividend cheque
15.6.6 When is a distribution made?
15.6.7 Offshore dividend regime
15.6.8 Planning: Early dividends
15.7 Waiver of interest/dividends
15.7.1 Waiver: Navigation
15.7.2 Waiver: Income recognition
15.8 Receipt by nominee/trustee
15.8.1 IIP/settlor-interested trust
15.8.2 Trustee of discretionary trust
15.8.3 Nominee/agent
15.8.4 Position of beneficial owner
15.9 Income recognition: Breach of trust
15.10 Retrospective acts/backdating
15.11 Income recognition in DTAs
15.11.1 "Deriving" income
15.11.2 "Paid" and "payment"
15.11.3 DTA recognition vocab compared

15.1 Income-recognition vocabulary

This chapter considers a cluster of related expressions or concepts:

- a person *receiving or entitled to* income[1]
- income *arising* to a person
- income *of* a person

[1] In this chapter, where the context permits, I abbreviate income/gains to income and leave gains to be understood.

- *payment/paid* to a person
- income *payable* or *due and payable* to a person
- a person *deriving* income
- gains *accruing* to a person

These are some of the most common words in tax legislation. I refer to this as **"income-recognition"** vocabulary.

Meaning depends of course on context. Payment has been described as: "an ordinary English word, ... not a term of art", with "a flexible meaning depending on the context in which it is used".[2] That is true of all income-recognition vocabulary. But there is a core meaning worth investigation.

"Payment" is often defined, and occasionally an attempt is made to define "receipt":

Expression	**Context**	**See para**
Earnings *received* in a tax year	Employment income	34.12
Benefit *received* by a beneficiary	s.731; s.87	50.5; 61.8

I do not discuss any definitions here: this chapter considers the general meaning of these terms when there is no (or no meaningful) definition.

The following topics are also related, but I consider them elsewhere:

Topic	**See para**
Transfer of income stream	54.2
Beneficial ownership/entitlement	App 6.2
Transparent/opaque	90.6

15.2 Paradigm contexts

The following are not the only the contexts in which income-recognition vocabulary is used, but they are paradigm cases, in which their meaning is most commonly discussed.

15.2.1 *Receipt/entitlement basis of liability*

ITTOIA generally imposes liability to income tax on the person "receiving or entitled" to the income. For instance, s.371 ITTOIA provides:

> The person liable for any tax charged under this Chapter is the person *receiving or entitled to* the interest.

It would be convenient to coin a short name for this rule but I cannot think

[2] *Clark v HMRC* [2020] EWCA Civ 204 at [50]. Also see Proctor, *Mann and Proctor on the Law of Money* (8th ed, 2022) chap 7.

of one. In earlier editions I tried "standard person-liable rule" but that is opaque. I now refer to this rule as the **"receipt/entitlement basis of liability"**. A clumsy label but I cannot think of better.

Under this rule there are two bases of liability, which I call **"the receipts basis of liability"** and **"the entitlement basis of liability"**.

The rule is set out each time there is a charge on a category of income, about 20 times in all. It may be useful to set these out in a table:

ITTOIA	**TOPIC**		**ITTOIA**	**TOPIC**	
Section	*Part:Chapter*		*Section*	*Part:Chapter*	
8	**2:**2	Trading income	385[3]	**4:**3	UK dividends
230	**2:**17	Adjustment income	404	**4:**4	Non-UK dividends
245	**2:**18	Post-cessation receipts	425	**4:**7	Purchased life annuities
271	**3:**3	Property income	554	**4:**11	Transactions in deposits
332	**3:**7	Adjustment income	581	**5**:2	Intellectual property
352	**3:**10	Post-cessation receipts	611	**5**:3	Film & sound recording
371	**4:**2	Interest	685	**5**:7	Annual Payments
381C	**4:**2A	Disguised interest	689	**5**:8	Misc Sweep-up Income

Whether such repetition actually benefits the reader might be debated. Perhaps it depends on who is the reader. But that ship has sailed.

In *Anson v HMRC*:[4]

> ... taxpayers can be liable to tax in respect of income to which they are entitled without receiving payment of that income. Examples include the income of an interest-in-possession trust[5] or of a partnership[6].

Similarly, *HMRC v BlueCrest Capital Management*:[7]

> ... there is no requirement that the partners should have actually received their allocated shares. What matters is the partner's entitlement to it, even if (for example) the partner is contractually obliged to plough it back into the business.

The INTM provides:

> **INTM180040 How HMRC arrives at a definitive view of specific foreign entities** [Dec 2023]
> Whether a member will be treated as a person "receiving or entitled to"

[3] This is in a non-standard form; see 15.6 (When are dividends recognised).

[6] Citing *Reed v Young* [1986] STC 285 at p.289; *Padmore v IRC* [1987] STC 36 at p.51.

[7] [2023] EWCA Civ 1481 at [72].

> the profits or other income in question will depend on the respective rights of the entity and its members in relation to such profits or income, and therefore on the legal regime governing those rights (see *Anson v HMRC* [2015] UKSC 44 and *Khan v HMRC* [2021] EWCA Civ 624).
> In *Khan* and in *Good v HMRC* [2023] EWCA Civ 114, the Court of Appeal (CoA) examined the meaning of "receiving or entitled to" for the purpose of ITTOIA05/S385(1)(b) and ITTOIA05/S611 respectively.
> In *Khan*, the CoA said the phrase "the person receiving or entitled to" is used in many other provisions of ITTOIA and it must be given a consistent meaning when denoting the persons chargeable to Income Tax. In both cases, the CoA held that the focus of the respective statutory provisions must be on the transaction giving rise to the income in question, that either receipt or entitlement will be sufficient to come within the scope of those provisions and that to satisfy the "entitled to" leg, it is not a requirement for a person to be "beneficially entitled" to the income in the sense used in other statutory provisions.
> In *Good*, the CoA confirmed that the words "entitled to" should be given their ordinary meaning. Whilst Andrews LJ, in *Khan*, considered it appropriate to use the term "belong(s) to" in that case, Whipple LJ considered that the point at issue in *Good* was different and it was better to stick to the words of the statute in determining the issue in that case.
> HMRC has further guidance on what this phrase means in the context of trade profits, interest and distributions at BIM15015, SAIM2400-10 and SAIM5020.

It can happen that one person receives income and another is entitled to it; then both are liable, but the person entitled has credit for tax paid by the person receiving. The TSEM provides:

> **TSEM9310: receiving or entitled to** [Sep 2021]
> The 'receiving' basis enables you to tax the person in receipt of the income, even if you cannot trace the person entitled to it. But ultimately you want to tax the person who is entitled. For example, in an interest in possession trust (TSEM1105), the trustees are initially taxable on the trust income because they receive it. But the IIP beneficiary is ultimately taxable on the trust income because he or she is entitled to it. So you tax the beneficiary on the income on the 'entitled' basis, and give credit for any tax paid by the trustees who received it.
> In sum, for the purpose of taxation of income, you want to establish who is 'entitled to' the income.

15.2.2 *Arising: Quantum of charge*

ITTOIA generally provides that the charge is on the amount, or full amount, of income arising in the tax year. For instance, s.370 ITTOIA provides:

> Tax is charged under this Chapter on the full amount of the interest *arising* in the tax year.

This rule is also set out each time there is a charge on a category of income, in a section placed just before the person-liable rule.

Corporation tax is the same. Section 8 CTA 2009 provides:

> (1) Corporation tax for a financial year is charged on profits *arising* in the year...
> (3) Corporation tax which is assessed and charged for an accounting period of a company is assessed and charged on the full amount of profits arising in the accounting period.[8]

There are two distinct points here.
(1) The tax charge is on (or limited to) the income which "arises".
(2) The tax charge is on the "full amount" of the income.

I discuss the meaning of "arising" here. The question of what constitutes the amount/full amount, ie whether expenditure is deductible, is discussed in the chapters on the type of income concerned.[9]

Under this provision income must "arise" but it does specify to whom the income arises. But sometimes it is necessary to identify the person to whom income arises, or to whom income is paid.[10]

15.2.3 *Payment: WHT*, *PAYE*

Interest withholding tax applies:

> if a *payment* of yearly interest arising in the UK is made...

by or to certain persons.[11] PAYE and other withholding taxes also apply on making a "payment".[12]

A complication of the word "payment" is that it is used in two senses:
(1) A narrow sense, meaning payment of money only
(2) A wider sense, including transfer of assets (non-money payments)

[8] Section 8(4) CTA 2009 flags exceptions:
"Subsection (3) is subject to any contrary provision in the Corporation Tax Acts."

[9] See 26.8 (Interest: Charge to tax); 33.17 (Sweep-up income: Computation).

[10] See 21.5 (To whom trading income arises); 26.21 (To whom is interest paid).

[11] See 26.20 (Interest withholding tax).

[12] See 32.10 (IIP WHT conditions A&B); 36.2 (Relevant payment): PAYE.

The narrow sense (payment of money only) is the more natural, or strict, or default meaning; but if there is an inference to that effect it is a very weak one, and context may easily show that the wider meaning is applicable.[13]

15.2.4 *Accruing: Gains*

Section 1 TCGA provides:

> Capital gains tax is charged for a tax year on chargeable gains *accruing* in the year to a person on the disposal of assets.

The terminology of the Taxes Acts is that gains are said to *accrue*; but income is said to *arise*.

15.2.5 *Profits of companies*

Section 2(1) CTA 2009 provides:

> Corporation tax is charged on profits *of* companies...

Here the (deceptively) simple preposition *"of"* takes the place of arising/accruing. But s.8 CTA 2009 refers to "profits arising" (to a company)[14] and the meaning is clearly the same.

15.3 Recognition/attribution: Analysis

At first sight the different items of (what I call) income-recognition vocabulary seem to raise distinct questions:

- does income arise, and if so to whom
- is there a receipt/entitlement, if so by whom
- is income paid, and if so to whom? *etc*

The significance of these questions is that they decide **"recognition"** and **"attribution"** issues:

- In what circumstances/at what point is income *recognised* as existing
- Once recognised, to which person is the income (in principle[15])

[13] *Irving v HMRC* [2008] EWCA Civ 6 held that the natural meaning of "pays a sum" is payment of money; but context showed the phrase included transfer of an asset; see at [38]. By contrast, in *HMRC v Sippchoice* [2020] UKUT 149 (TCC) context showed that "contributions paid" meant paid in money.

[14] See 14.3.3 (Assessment periods).

[15] The common law (should one say, common sense?) attribution rules discussed in this chapter are of course subject to other rules, typically anti-avoidance rules, under

attributed[16]

Where the word "arising"or "payment" is used in isolation, it indicates a minimum level below which some item is not (or not yet) considered to constitute income at all. The issue is income recognition. That is, unless and until income "arises" there is no recognition of income.

Where the reference is to income arising (etc) *to a person*, it requires some connection between the income and the person to whom, in some sense, the income belongs. The issue is income attribution.

Wheeler proposes that varied expressions of income recognition should be seen as raising the same issues, or essentially the same issues, namely income recognition and attribution.[17] The varied terminology conceals the fact that the issues are essentially the same. There may be differences of context, and one should adopt the appropriate statutory terminology, but in practice these expressions cover (more or less) the same ground. So it is helpful and indeed necessary to consider them together.[18] It is also helpful to use one word to refer to income which is arising/received/entitled to/paid, and I call this **"recognising"** income, though one might use the term "taxable".

This approach goes against the lawyer's instinct that different words should have distinct meanings. But that is not a rule to apply strictly in tax legislation.

Tax legislation generally gives only a brief, seemingly commonsense, statement of recognition/attribution rules. In simple cases the position is clear. In other cases it has been left to the Courts to sort out. The borders of income recognition have proved difficult to identify, and much can depend on the drafting.

which what constitutes income/gains of one person for non-tax purposes is treated as income/gains of another person for tax purposes: eg s.624 ITTOIA, mixed partnership code, s.3 TCGA; and (putting aside the issue of whether what is allocated is technically the same income) s.720 ITA, and CFC rules.

[16] A note on terminology: in this context "attribution" and "allocation" are synonymous; I prefer "attribution".

[17] *The Missing Keystone of Income Tax Treaties* (2012) para 2.4 (Attribution of income) and Appendix 2.

[18] This was acknowledged in *Girvan v Orange Personal Communications* 70 TC 602 at p.621 where a case on whether interest was *paid* was relied on when the issue was receipt/entitlement (for the receipt/entitlement basis of liability).

15.4 Glosses and paraphrases

Although the statutory vocabulary seems more than rich enough, the temptation to explain it with a gloss or paraphrase is irresistible, and the cases disclose a large number:

Get the money: In *IRC v Whitworth Park*:[19]

> Traders pay tax on the balance of profits or gains and bring money owed to them into account in striking that balance, but ordinary individuals are not assessable and do not pay tax until they get the money because until then it is not part of their income.

That does not help much. In *Dunmore v McGowan*:[20]

> Of course, ... that remark, "individuals don't pay tax until they get the money" begs the question: for what is meant by the word "get"? Read in isolation it does not take one very much further because one doesn't know without reading the whole of the *Whitworth* case what precisely is meant by "get".

Exactly the same applies to other short paraphrases or slogans, such as:

- receivability without receipt is nothing: *Leigh*
- *actual* receipt and not *notional* receipt: *Parkside Leasing*
- the *swelling of a person's assets: Dunmore*
- in the *enjoyment* of a person: *Dewar*
- could a person *make use* of the money: *Dewar*
- placed *at the disposal* of a person: *Parkside Leasing*
- *practical control* over the disposal of the funds: *Aberdeen*
- money has *"come in"*, a test said to derive from the word *income*

Perhaps inevitably, we also have references to a "real" payment;[21] but references to reality do not help much, if at all.[22]

15.5 When is interest recognised

The area which has given rise to most discussion is the taxation of interest, but similar points arise in other areas. In this section I also discuss investment management fees, and in the next section, dividends.

[19] 38 TC 531 at p.573.

[20] 52 TC 307 at p.316.

[21] See 15.5.3 (Credit to non-bank account).

[22] See App.7.1 (What do we mean by "Real"?); App 7.9.2 (Cardinal principle reaffirmed).

15.5.1 *Pre-ITTOIA case law*

Pre-rewrite case law will continue to apply:

> 1512. As the phrase ["receiving or entitled to"] is well established in case law, it is retained in the rewritten legislation. It is not, however, considered appropriate to include any further explanation of the phrase because of its wide interpretation by the courts.[23]

15.5.2 *Interest due, not paid*

In *Dewar v IRC* the taxpayer was executor of an estate under which he was entitled to a pecuniary legacy and interest. He paid himself the legacy but not the interest. The interest was not recognised as received:[24]

> ... you must find something which is in the enjoyment of the subject. He could make use of the money which lies abroad to his use. It is in that sense in his enjoyment. At the present time, upon the present facts, there is no enjoyment by Mr. Dewar, there is no gain by him, he has derived no profit and there is nothing in his hands which will answer the test of what you mean by 'income'.
> … *Leigh v CIR* ... says this:[25]
>
> > 'It is to be remembered that for Income Tax purposes "receivability" without receipt is nothing. Before a good debt is paid there is no such thing as Income Tax upon it'...
>
> Now it is said, and said truly, that it has not been received by Mr. Dewar or placed at his disposal owing to his voluntary act or omission; that is to say the interest has not been paid, not because the debtor cannot pay it, but because Mr. Dewar has not thought fit to ask for payment, and further has intimated the possibility of his releasing the debtor altogether

[23] For completeness, the Tax Law Rewrite make this comment on receiving/entitled to, in the context of interest:

> "1511 The phrase "receiving or entitled to" has been considered at length by the courts, although no clear definition of it has emerged. In early cases the courts placed greater emphasis on the concept of receipt than on entitlement - see, for example, *Dewar v IRC* 19 TC 561. Later, equal importance was attached to each part of the phrase - see, for example, *Aplin v White* 49 TC 93. The most recent cases, such as *Macpherson v Bond* 58 TC 579, and *Peracha v Miley* 63 TC 444, have hinged on whether or not any benefit has accrued to the taxpayer."

Much of this is debatable; but it is not necessary to pursue that here.

[24] 19 TC 561.

[25] 11 TC 590 at p.77.

> from payment of that interest. But ... the question is what income the man has received, and not what income he has received or but for his wilful default might have received.

15.5.3 *Credit to non-bank account*

Everyone agrees that a credit to a bank account constitutes payment/ receipt. The question concerns non-bank accounts.

In *Girvan v Orange Personal Communications*:

> I consider that it would require very unusual circumstances indeed before the internal arrangements of the debtor, unknown to the creditor and not, at least on the face of it, giving any new rights to the creditor, could alter the liability of the creditor to tax. It is true that the sums paid quarterly into the suspense accounts by the bank could be said to be no more and no less "the property" of Orange than any payments of interest would have been if credited to the [bank] deposit accounts in the name of Orange. However, that appears to me to ignore commercial common sense and practice. In my judgment, payment of money into a person's bank account (although it may be said to involve nothing more than an entry into the bank's computer records) would be regarded in the commercial world as payment, in a way that payment into an account set up by the bank in its own name for internal accounting purposes would not.

In two cases a credit entry in a non-bank account was recognised as a payment:

In *IRC v Doncaster* the credit was to a directors loan account used for crediting directors fees, dividends and interest:[26]

> … it simply went into that loan account. I can conceive nothing more complete in the way of payment. It was simply putting it to the credit of what is equivalent to a banking account.

In *Garforth v Newsmith*,[27] a bonus credited to a director's loan account was similarly held to have been paid. Likewise in *Aberdeen Asset Management v HMRC*:[28]

> In considering what amounts to payment for the purposes of the PAYE

[26] 8 TC 623 at p. 631.

[27] 52 TC 522, approved *RFC 2012 Plc v AG* [2017] UKSC 4 (the *Rangers* case) at [52].

[28] [2014] SC 271 at [34] approved *RFC 2012 Plc v AG* [2017] UKSC 4 (the *Rangers* case) at [53].

> legislation, it is important in my opinion to bear in mind that money is a medium of exchange. In practical terms, therefore, the crucial question is whether funds have been placed in a position where as a practical matter they may be spent by the employee as he wishes; it is at that point that the employee can be said to obtain the benefit of those funds. If the PAYE legislation is construed purposively it is in my view obvious that it is such a benefit that is to be taxed. For this purpose it is not appropriate to deconstruct the precise legal nature of the employee's rights, drawing fine distinctions according to the methods that he must adopt in order to use the funds for his benefit. The fact that the employee has practical control over the disposal of the funds is sufficient to constitute a payment for the purposes of the legislation.

But it is not always the case that an entry in books of account crediting an amount as due to a payee will constitute payment. If, for instance, under the terms of a loan the creditor has the right to add arrears of interest to principal, an entry in the creditor's books showing that the interest has been added to the principal will not amount to payment of the interest. See *Paton (as Fenton's Trustee) v IRC* 21 TC 626. The taxpayer had loan accounts with two banks. Interest was debited and added to principal. The question was whether the interest had been paid:

> it may well be that in a question between a bank and its customer … the interest accruing annually may by the sanctioned method of accounting cease to be interest when it is accumulated with the principal, so that the bank can thereafter no longer sue for the interest as interest. ... But it is manifest that it is only by a legal fiction that the interest in such cases as the present can be said to have been paid. After, as before, the striking of the balance the same sum remains due, no longer, it may be, as interest,[29] but still due as part of the principal debt.
> … what the Income Tax Act requires as the condition of repayment of tax on interest is that the sum due as interest shall have been actually discharged, not merely constructively paid. To warrant repayment of tax there must have been a real payment of tax and a real payment of interest without deduction of tax.

In *Paton,* the entry adding the accrued interest to principal was an entry in

[29] The question whether interest accumulated in this way lost its character as interest was answered in *IRC v Oswald* 26 TC 435, which held that when the debtor paid the interest which had been added to capital, the payment was interest (and so subject to withholding tax).

the books of the lender. In *Minsham,* interest was credited to the loan account in the books of the borrower and in the books of the lender. It was suggested that there might at least be a payment if a lender agreed to increase his loan by an amount equal to the accrued interest: the increase in the amount of the loan would constitute payment of the accrued interest. But the judge disagreed even with that:

> I find it difficult to imagine circumstances in which a transaction would fall to be analysed in this way even if cheques for the loan and the accrued interest were circulated. The practical effect would be the same as if the accrued interest were added to the principal (as in Paton's case) save only that if the interest were yearly interest the borrower would be bound or entitled to deduct tax from the interest, a result which the taxpayer at least would be unlikely to contend for...
> I do not, however, find it necessary to consider whether this is a possible state of affairs. In my judgment it is quite plain on the facts of this case that all that happened was that accrued interest was added to principal with the result that it was compounded and thereafter bore interest.[30]

What is the difference between *Doncaster/Garforth*, where the entries in the account did constitute payment, and *Minsham/Fenton*, where the entries did not? The director became entitled to the money when the entry was made in the sense that the director had the right (without consent of the company) to draw on the loan account.[31] This is why the directors loan account was "the equivalent of a bank account".

Because of the difficulty, or impracticability, of opening bank accounts, the issue of whether inter-company or other book entries are recognised as payment has become more important than before.

15.5.4 *Interest capitalised*

In *Paton (as Fenton's Trustee) v IRC* 21 TC 626

> in the case of such a provision as is contained in the present deed, which enables the interest to be capitalized, the interest is not capitalized because it is in fact paid, but because it has in fact not been paid.

SAIM provides:

[30] 63 TC 570 at p.587.

[31] It might be that a different rule applies to directors loan accounts. Another difference is that the credit there made a difference. A debt came into existence. The credit of interest to a non-bank account of the debtor/creditor generally makes no difference, for the interest is due before and after the credit. But these are not the key points.

SAIM9100: Deduction of tax: yearly interest: capitalised interest [Jun 2020]

In cases of capitalised or compound interest, the amount to be added to the principal sum at any periodic rest should be the gross amount of the unpaid interest. The right and duty to deduct income tax arises only when the interest is paid, and capitalisation does not constitute payment (see *CIR v Oswald (Trustee of the Cosier Settlement)* 26 TC 435 and *Minsham Properties v Price* 63 TC 570).

Tax in respect of interest has to be accounted for only when payment of the interest is actually made, that is, at the final settlement and not at the periodic rests. Where the interest is added to the principal without deduction of tax, the tax to be accounted for is the tax at the savings rate in force at the time of the final payment on the amount of interest so calculated.

Example (Kirsty)

K is a director of, and owns 90% of the shares in, K Ltd. She makes a loan to the company of £10,000. The loan carries interest of 10% per annum, payable annually on 31 December, but under the terms of the loan, interest may be rolled up and added to the principal, whereupon it will itself bear interest. In years 1 - 3, the company's funds are fully committed in paying trade and bank creditors, and K is unable to draw on her loan account. The situation is therefore:

	Interest credited	**Loan principal**
31 December Year 1	£1,000	£11,000
31 December Year 2	£1,100	£12,100
31 December Year 3	£1,210	£13,310

On 1 January Year 4, the company makes a repayment of £5,000 to K. It is agreed between the parties that this should be allocated first of all to interest, with the remaining balance treated as repayment of the £10,000 capital.

The company therefore makes an interest payment of £3,310 on 1 January Year 4. It must deduct tax at the basic rate from this payment, and account for the tax to HMRC.

'Payment' of the interest also occurs on this date for other statutory purposes. K will only be taxable on the interest in the tax year in which she receives it (SAIM2440). And for the company, interest debits that have not been allowed on an accruals basis because of CTA09 S373 (CFM35810) will become deductible.

15.5.5 *Credit to charged account*

In *Dunmore v McGowan,* the taxpayer charged a bank account as security for a guarantee. Thus he could not withdraw interest credited to the account. The interest was nevertheless "received" and so taxable:[32]

> every penny of that interest inured to the Appellant's benefit in any event; it swelled the assets of the Appellant on that day. The reasoning is this. If the guarantee ended without the interest being resorted to under the terms of the [charge], then the £347 would be withdrawable by the Appellant from the account in due course. If the £347 was resorted to under the terms of the [charge], then it would pro tanto reduce the personal liability of the Appellant under the guarantee. In either event every penny of the interest inured immediately to the benefit of the Appellant and to the full extent of the £347. Admittedly the money was locked up in the deposit account while the guarantee subsisted, but it was locked up in such a way that it inured to the Appellant's benefit at once, either as money coming to his hands or reducing his liabilities. Whatever might be the ultimate destination of the £347, it was in my judgment received by the Appellant on the day when it was credited to the second deposit account.

Coxon v HMRC[33] is another example of a case where interest subject to a charge was taxable.

15.5.6 *Uncashed interest cheque*

In *Parkside Leasing v Smith*:[34]

> To regard the payment of money into the payee's bank account as equivalent to the payment of the money to the payee is one thing. It reflects the part that banking arrangements play in the manner in which people arrange their financial affairs. Money credited to a person's bank account in accordance with his instructions must, in common sense and in law, be regarded as money thereby received by that person. The money is thereby placed at the disposal of that person.
> But the receipt of a cheque seems to me to stand on a rather different footing. The receipt of a cheque does not of itself place the sum for which the cheque is made out or the proceeds of the cheque at the payee's disposal. It is not certain that the cheque will be honoured. It may be cancelled by the drawer before it is presented. It may be dishonoured by the bank on which it is drawn. The drawer may die before the cheque can be presented.[35] The bank may fail before the

[32] 52 TC 307 at p.315.

[33] For another aspect of this case see 97.3 ("Unremittable" income).

[34] 58 TC 282.

[35] Section 75 Bills of Exchange Act 1882 provides:
"The duty and authority of a banker to pay a cheque drawn on him by his customer

> cheque can be presented. All these contingencies, and there may be others, may intervene between the receipt by the payee of the cheque and the receipt by the payee of the proceeds of the cheque. If the proceeds of the cheque are not received by the payee I do not see how it can be said that the sum therein comprised was at the payee's disposal. And if the proceeds are received by the payee I do not see how it can be said that they were received at an earlier date than they were in fact received.

While it is not certain that a cheque will be honoured, these contingencies might have been dismissed as too unlikely to matter. On the other hand, the rule may be said to be attractive as the date of payment of a cheque will be known, and the date of receipt of a cheque may be less clear. However that may be, the point is decided, at High Court level, and as cheques are rarely used now, the point is not likely to arise. On the basis that a cheque would normally be cashed promptly, it does not make a great deal of difference.

15.5.7 *Offset interest*

If two pre-existing cross-demands for money immediately payable are set off against each other by agreement[36] without the formality of handing the money over and handing it back again, the set-off constitutes "payment".[37]

Coxon discusses offset mortgages (back-to-back loans):

> For an offset arrangement to have the desired tax effect requires that debit and credit balances owed to and from the bank are offset, with interest being charged or paid by reference to the net balance. It is not sufficient that interest is calculated separately on the debit and credit balances and then the two interest amounts are offset. In the former case the contract between customer and bank determines that only one amount of interest is due (usually from customer to bank). In the latter, there is both interest income and interest expense for the customer, albeit the amounts may be directly or indirectly netted against each other

are determined by—
(1) Countermand of payment:
(2) Notice of the customer's death."

[36] It is different if there is no agreement: *Mellham v Burton* [2003] STC 441.

[37] See *Coren v Keighley* 48 TC 370 at p.375. The same point is made in *Lowry v Consolidated African Selection Trust* 23 TC at p.288: "You need not pass cheques backwards and forwards across a table".

in the books of the bank.[38]

15.5.8 *HMRC examples*

The SAI Manual provides:

> **SAIM2440: when interest arises** [Feb 2020]
> Interest 'arises' when it is received or made available to the recipient. Interest has been made available if it is credited to an account on which the account holder is free to draw.

That is correct where the account is a bank account.

The SAI Manual gives 4 examples:

Example	Facts	Received
1	Credit to bank account; withdrawal requires 30 day notice	Yes
2a	Credit to bond account; penalty for early withdrawal	Yes
2b	No credit until bond matures	Not until maturity
3	Interest paid late	Not until paid

> **Example 1 (Jonathan)**
> J has a building society account, on which interest is credited every 31 December. He is free to make withdrawals from the account, at 30 days' notice, but has not withdrawn money for many years. On 31 December 2017 he receives interest of £524, he should return the interest as income of year ended 5 April 2018, even though he has not withdrawn it.
> Interest can in practice often be treated as arising when it becomes due and payable. However, if a taxpayer does not actually receive interest (or have it credited to an account) until a later date, it does not normally form part of his or her taxable income until it is received.
>
> **Example 2[a] (Sam)**
> S entered into a five year fixed-term bond on 6 April 2017. The bond credits interest to S's account annually on the 31 December. S can only gain access to both the annual interest and the principal in advance of 5 April 2022 if a penalty is paid for early access.
> Since the terms and conditions of the bond allow S to draw on the funds, although with a penalty, the interest arises and is taxable each year as it is credited.

I wonder if bonds of that kind exist. They are not likely to be popular with investors within IT. Perhaps the example is intended as tax planning

[38] On the documents of the case *Coxon* was on the wrong side of this line.

advice to bond issuers.

With whom does S have the account? A bank account credit would be taxable. A credit to an internal account of the bondholder should not be taxable.

> **[Example 2b (Sam)]**
> If the terms and conditions of the bond did not allow access until maturity, the interest would arise and be taxed at that point.
> **Example 3 (Jennifer)**
> In January 2017, J makes a loan of £5,000 to her cousin to help him set up a business. They agree that interest will be payable quarterly in arrears at a rate of 5% per annum. But the business initially struggles, and J does not receive any interest until June 2018 when, after she threatens legal action, her cousin repays the debt along with interest arrears of £875.[39]
> J is not required to pay any tax on the interest until 2018/19 when it arises. However, the whole £875 is taxable when she receives it. She cannot spread the arrears of interest over the years in which it accrued.
>
> Interest on a judicial award should normally be regarded as arising on the date on which it is paid...
> **Ponzi Schemes**
> Cases where there is the potential for a Ponzi (and Ponzi-type) schemes to be involved in the return of interest contact Financial Products team at BAI for advice.

15.5.9 *Investment management fees*

The IFM discusses when disguised investment management fees arise.[40] The rules changed in 2015, but the discussion of the pre-2015 rules is relevant to the meaning of the word "arise" when undefined. The IFM adopts the approach of the interest cases. There is nothing surprising to be found here, but I set out the passage for completeness:

> **IFM36351 sums arising on or after 6 April 2015 and before 22 Oct 2015 A management fee arising to the individual** [Oct 2020]
> ... Prior to 22 October 2015 a management fee had to arise directly or indirectly to an individual...
> **Has the management fee arisen to the individual?**
> ... Generally sums arise to an individual when they are allocated to that

[39] Author's footnote: The correct amount of interest is £375, but nothing turns on that.
[40] See 73.5 ("Disguised-fee condition (c): from investment scheme").

> individual and that individual actually has access to the sum allocated.
>
> *Example - allocation and access to management fees [Michelle]*
>
> M is a fund manager. She has two sums allocated to her as a reward for management services provided to an investment scheme. She has immediate access to the first sum and on receipt she chooses to reinvest the fee into the fund. The second sum is allocated to her but, at this stage, payment is to be deferred for a period of time, after which it will then become accessible.
>
> The first sum that M receives has been allocated to her and made accessible. The evidence therefore indicates that the sum has arisen to M. In considering if the sum has arisen to the individual it is irrelevant how the individual has chosen to apply the sum after it is made available (i.e. here it has been reinvested).
>
> The second sum that has been allocated to M has been deferred; the evidence therefore indicates that this sum has not yet arisen to her. It will arise to her at the point it is not only allocated, but also made available to her.
>
> The above example also applies where reinvestment of sums arising is mandatory or is otherwise automatically achieved by the agreements which govern the fund arrangements. The fee is being used to meet an obligation of the individual so sums applied in this way will be treated as arising to the individual at the point they are reinvested...
>
> Any application of sums that would otherwise be paid to the investment manager does not stop them having arisen to that individual. The DIMF rules cannot be circumvented in this way.
>
> **IFM36356 Fact dependent circumstances (sums arising on or after 6 April 2015 and before 22 October 2015)** [Oct 2020]
>
> ... *Transparent structures*
>
> Where an intermediate structure is transparent for tax purposes, such as a partnership, this will not be effective in taking sums arising to the manager out of the DIMF rules.

Similarly, trading income of a partnership has been held to be "payable" to the partners.[41]

15.5.10 *Escrow arrangements*

> **IFM36351 sums arising on or after 6 April 2015 and before 22 Oct 2015 A management fee arising to the individual** [Oct 2020]
>
> *Escrow arrangements*
>
> The exact analysis will depend on the terms of the arrangement.

[41] See 48.7.1 (Trading/partnership income).

> Generally, where an amount is placed into escrow and the fund manager cannot access the funds (or property representing the funds) that sum will not arise to the manager. Instead the fee will arise when the sum is released from escrow and the fund manager gains access to it. For this treatment to apply the arrangement must be a genuine escrow or deferral arrangement implemented for commercial reasons in agreement with the external investors to the fund.

If an example is needed, see *Hannah v HMRC*[42] where consideration held on trust for the buyer pending completion of a sale contract was not "paid or provided" to the seller.

15.5.11 *Payment in specie*

In *Cross v London & Provincial Trust Ltd*:[43]

> ... income can be in the form of money's worth.
> ... if the holder of a security, the contractual income from which is money, receives from the person liable to pay that money something of money's worth, namely goods, instead of the money, such goods are income arising from the security.[44]

15.5.12 *Payment by issue of note*

In *Cross v London & Provincial Trust Ltd*:[45]

> [1] ... where there is a mere substitution of a promise to pay at a later date for the obligation to make an interest payment presently due, the owner of the security cannot be said to have received income from it. In such a case in truth that is exactly what has not happened, since the payment has been postponed instead of being made on its due date.
> [2] Nor do I see how it can make any difference if upon the true reading of the transaction the original obligation is extinguished and the promise to pay at a later date is accepted in its place.

Point [2] is an example of substance over form.

This rule was reversed for Funding Bonds[46] but when the Funding Bond

[42] [2021] UKUT 22 (TCC) at [33]-[43].

[43] 21 TC 705 at p.716.

[44] *Cross* refers to *Scottish and Canadian General Investment Co v Easson* 8 TC 265 where interest due on bonds issued by an old company was satisfied by debentures of a new company

[45] 21 TC 705 at p.716.

[46] See 26.6 (Funding bonds).

rules do not apply, the old rule continues, for instance, on the issue of a funding bond to pay interest on a debt incurred by an individual or trust.

In *Associated Insulation Products v Golder*[47] a company resolution:

(1) declared a distribution "payable on 15 December 1936"
(2) resolved that the distribution should be "payable in scrip in the form of a certificate of indebtedness." The certificate recorded that it was "issued in payment of a distribution". It took the form of a promissory note, and could be described as a funding bond.

It was held that income did not arise on the issue of the note, but on payment under the note; in terms of the current provisions, the issue of the note was not a payment of a dividend. The reality or substance of the transaction was a declaration of a dividend payable at a future date. The reader may find that surprising, but there it is.

This rule may be reversed for UK companies by the extended definition of distribution, but it continues to apply non-resident companies.

15.6 When are dividends recognised

15.6.1 *The statutory provisions*

I here set out the provisions relating to UK resident companies (the UK dividend regime). I consider the position of non-resident companies (the offshore dividend regime) separately, below.[48]

Section 384 ITTOIA provides:

> Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year.

So dividends are recognised if they are *paid*[49] and other distributions if they are *made*.

Section 1168(1) CTA 2010 provides an artificial payment date:

> For the purposes of the Corporation Tax Acts dividends are to be treated as paid on the date when they become due and payable.

[47] 26 TC 231.

[48] See 15.6.7 (Offshore dividend regime). For these two regimes, see 30.1 (Dividends and distributions).

[49] Similarly, s.1000(1) CTA 2010 provides:
"In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs.
Any dividend *paid* by the company, including a capital dividend..."

In the following discussion:
The **"due date"** is the date that dividends are due and payable.
The **"actual payment date"** is the date that dividends are actually paid
The **"relating-back rule"** is the rule in s.1168(1): dividends may be said to relate back to the due date, on which they are deemed to be paid.

The relating-back rule applies to UK dividends but not to interest: interest is not treated as arising when due and payable, the tax charge on interest arises at the time that it is paid.

The relating-back rule is expressed to apply for the purposes of the Corporation Tax Acts.[50] But sch 1 Interpretation Act 1978 provides an artificially wide definition of this expression:

> "The Corporation Tax Acts" means the enactments relating to the taxation of the income and chargeable gains of companies and of company distributions (including provisions relating to income tax)

So the rule applies for income taxation of UK dividends as well as CT.[51]

The CT Manual discusses the relating-back rule:

> **CTM15205: dividends, distributions and company law** [Jun 2023]
> [The Manual refers to s.1000 and s.1168 CTA 2010 and continues:]
> What is meant by due and payable is discussed below but for present purposes it is sufficient to know that a dividend may become due and payable on an earlier date than the one on which it is actually paid.
> CTA10/S1000 (1) A and CTA10/S1168 (1) are interpreted as working together to deem a dividend as paid on the date it becomes due and payable. On this view the object of the predecessor of CTA10/S1168 (1) was to ensure that Advance Corporation Tax under the system abolished from 1999 was linked with the due and payable date even if actual payment of the dividend was not made until later. It is not interpreted as deeming as paid dividends that would not otherwise be paid but rather as fixing the date of payment by reference to the due and payable date once it is paid. It follows that a waived dividend is not regarded as paid.

If that is right, the questions are:
(1) When is a dividend due and payable

[50] If further authority is needed, see *Gould v HMRC* at [47].
A historical note: A similar rule applies to annual payments; see s.4, s.835 ICTA 1988; *IRC v Crawley* [1987] STC 147. However dividends ceased to classified as annual payments on the introduction of schedule F in 1965.

[51] See 30.4 ("Distribution").

(2) Has the dividend been paid:
   (a) If so, tax arises on the due date, if earlier,[52] (not the payment date)
   (b) If not there is no tax charge

Section 385(1) ITTOIA provides:

> The person liable for any tax charged under this Chapter [Chapter 3 Part 4, UK dividends] is—
> (a) the person to whom the distribution
> [i] is made or
> [ii] is treated as made (see Part 6 of ICTA and sections 386(3), 389(3) and 396A),[53] or
> (b) the person receiving or entitled to the distribution.

15.6.2 *When dividend due & payable*

"Due" and "payable" are synonyms; the expression is doublet which can be abbreviated to "due".[54]

When a dividend is due is a matter of company law, summarised in *Potel v CIR*:[55]

> *(1) Final dividend*
> (a) [under standard form articles] directors who recommend a final dividend have power at the same time to stipulate the date on which such dividend shall be paid.
> (b) If a final dividend is declared by a company without any stipulation as to the date for payment, the declaration of the dividend creates an immediate debt.

[52] It could theoretically happen that a dividend is paid before its due date, in which case it would also be treated as paid on the due date, not the payment date; but in practice that would only happen by accident.

[53] The reference to Part 6 ICTA is out of date; the other references concern specialist topics not discussed in this work:

s.386(3)	OEICs
s.389(3)	Authorised unit trusts
s.396A	Arrangements offering choice of capital or income return

The standard rule is extended in the case of deemed income, because no-one actually receives/is entitled to it. This is only for the avoidance of doubt: if a distribution is deemed to be made, it is not difficult to conclude that there is a deemed receipt/entitlement. But it does not matter.

[54] This is self-evident, but if authority is needed, see Garner, *Dictionary of Legal Usage* (3rd ed., 2011), entry under *Due.*

[55] 46 TC 658 at p.667.

> (c) If a final dividend is declared and is expressed as payable at a future date a shareholder has no right to enforce payment until the due date for payment arrives.

Thus:

> there is a difference between declaring a dividend and paying a dividend. The declaration of a dividend by a company in general meeting creates a debt enforceable immediately or in the future, according to whether the dividend is or is not expressed to be payable at a future date. The payment of the dividend is a different operation. It is an actual distribution of part of the assets of the company. The two processes, declaration and payment, are quite separate.

Different rules apply to an interim dividend:

> In the case of an interim dividend which a board has resolved to pay, it is open to the board at any time before payment to review its decision and resolve not to pay the dividend

In *Gould v HMRC*[56] a company declared an interim dividend, on terms that payments to the shareholders should be made on different dates.[57] As a matter of company law, the dividend became due on the specified dates (and the tax consequences followed accordingly).

Further consideration is needed if a company has non-standard form articles, or if it is governed by non-UK law.

The CT Manual provides:

> **CTM15205: dividends, distributions and company law** [Sep 2020]
> **When is a dividend due and payable?**
> ... a final dividend which has been properly declared and which does not specify a date for payment creates an immediately enforceable debt. If a final dividend is declared under the terms of a resolution that states that it is payable on a future date (a fairly common occurrence for quoted companies) then the debt is enforceable, and the dividend is due and payable, only on that later date. An interim dividend, on the other hand, may be varied or rescinded at any time before payment and may

[56] [2022] UKFTT 431 (TC).

[57] By way of background: One shareholder wanted his dividend paid in 2015/16, before the rates of tax on dividends increased; the other shareholder wanted his dividend paid in 2016/17 as he was then non-resident (and, no doubt, not temporarily non-resident). But the tax planning background was not relevant to the company law/tax law analysis.

> therefore only be regarded as due and payable when it is actually paid...[58]
>
> Where a final dividend is declared and the resolution fixes a later date for payment then the declaration creates a debt owing to the shareholder but the shareholder may take no steps to enforce payment until the due date of payment (or payments if by fixed instalments, see *Potel*). The due and payable date in such circumstances is the date fixed for payment and not the date of declaration.
>
> In many small private companies the directors and shareholders are identical and dividends are often credited to the directors' or shareholders' account with the company. In the case of a final dividend the dividend is due and payable on the date of the resolution unless some future date for payment is specified.

15.6.3 *When is dividend actually paid*

The CT Manual provides:

> **CTM15205: dividends, distributions and company law** [Sep 2020]
>
> **When is a dividend paid?**
>
> A dividend is not paid, and there is no distribution, unless and until
>
> [1] the shareholder receives money or
>
> [2] the distribution is otherwise unreservedly placed at the shareholder's disposal, for instance by being credited to a loan account on which the shareholder has power to draw. ...

This adopts the approach of the interest cases.[59]

> In the case of an interim dividend (which, see above, does not create an enforceable debt and which can be varied or rescinded prior to payment), payment is only made when the money is placed unreservedly at the disposal of the directors and shareholders as part of their current accounts with the company. Payment is not made until such a right to draw on the dividend exists, expected to be when the appropriate entries are made in the company's books.
>
> If such entries are not made until the annual audit, not uncommon in a small company, and this takes place after the end of the accounting period in which the directors resolved that an interim dividend be paid, then the due and payable date is in the later rather than the earlier accounting period.

[58] The paragraph omitted here concerns cheques, considered below.

[59] *Parkside Leasing* does not use the word "unreservedly", but that does not add anything except emphasis.

15.6.4 *Payment to blocked account*

In *Jays v HMRC*[60] dividends were credited to a blocked account, in wording which varied slightly from one dividend to another. The key terms were:[61]

> (1) KJ's 2014 dividend was "credited to a blocked account and held in abeyance so that [she] would not be free to draw upon it or have it credited to her loan account until further notice."
> (2) MJ's 2015 dividend was "credited to a blocked directors' account and not paid to or available to the director until it is mutually agreed that it in in the interest of both parties that it should be."
> (3) Of KJ's 2015 dividend, part was paid, and the balance of £73k was "held in a blocked directors' account so that Mrs Jays would not be free to draw upon it until further notice."
> (4) Of KJ's 2016 dividend "in view of the illiquidity of the company" part was paid and the balance of £16k was "credited to a blocked account and held in abeyance so that Mrs Jays would not be free to draw upon it or have it credited to her loan account until further notice."

These were final dividends, not interim dividends. The result was the same in all cases: the dividends were not "paid":

> 34. ... in each case it is clear that the shareholder in question has no immediate right to enforce the identified part of the dividend at the point at which it is declared, and that payment was deferred "until further notice" in the case of all KJ's dividends and "until mutually agreed" in the case of MJ's dividend. ... the declaration of dividends [was] subject to stringent stipulations which, in the view of the Tribunal, had the legal effect of deferring the date on which the stated proportion of the dividends was payable. This conclusion is not, in the Tribunal's view, precluded because of the absence of a date to which payment is deferred, in each case there was a mechanism by reference to which the date was to be determined (on further notice or as mutually agreed).

The position of a charged account was different.

15.6.5 *Uncashed dividend cheque*

For some reason a cheque to pay a dividend is traditionally called a

[60] [2022] UKFTT 420 (TC).
[61] at [33]; emphasis added in the original judgment.

"dividend warrant", but nothing turns on the terminology.

> **CTM15205: dividends, distributions and company law** [Sep 2020]
> **... What is meant by payment of a dividend?**
> A cheque is a written order addressed by a person (the drawer) to a banker to pay money, generally to some third party (the payee) and constitutes a promise to pay on common law principles (*Marreco v Richardson* [1908] 2 KB 584). The issuing of a cheque or dividend warrant (in effect a cheque drawn by the company on its bank in favour of the shareholder concerned) renders a dividend paid at that time. If the company's Articles so authorise, the sending of a dividend warrant by post will constitute payment and the company's liability will be discharged (see *Thairwall v Great Western Railway* [1910] 2 KB 509).

The CT Manual provides:

> **CTM15205: dividends, distributions and company law** [Sep 2020]
> **Uncashed dividends**
> Prior to 6 April 1999, under the ACT system on declaring a final dividend the company assumed two liabilities; a liability to the shareholder for the dividend and a liability to the Revenue for the ACT. There was nothing in the legislation which absolved the company from meeting its liability simply because the shareholder had received the dividend warrant [ie cheque] but had decided for some reason not to pay it into their own bank account, or to endorse it to another. The shareholder had effectively assigned and not waived income...[62]
>
> Companies [after the relevant time limit] might write back uncashed dividends in their books. This does not mean that any ACT accounted for at the time of payment could be repaid.[63]

Parkside Leasing held that receipt of a cheque for interest is not receipt of the interest. HMRC say that receipt of a cheque for a dividend is payment of a dividend. They could both be right, but it would be surprising.[64] As cheques are not now used, I expect that the point will never be decided.

[62] The omitted passage briefly discusses time limits to recover dividends, but a reader researching that point should turn to company law textbooks.

[63] Author's footnote: A claim for repayment of ACT would normally be out of time, by the time that the limitation period had passed; but the point is now academic.

[64] In the days of ACT it would have been inconvenient if receipt of a cheque for a dividend was not payment of the dividend, because a company needed to know whether to pay the ACT; but a company does not now care whether or when its dividend is regarded as paid for tax purposes.

15.6.6 *When is a distribution made?*

> **CTM15205: dividends, distributions and company law** [Sep 2020]
> Other distributions, such as premiums on redemption of redeemable shares, are 'made' rather than 'paid' and the date of making the distribution needs to be determined on the facts.

"Needs to be determined on the facts" is not exactly guidance. It is considered that the principles which govern when a money dividend is actually paid ought in principle to govern when a distribution is made. In *Jays v HMRC*:[65]

> the making of a distribution [like payment of a dividend] also requires that the recipient has an enforceable right to the assets of the company.

15.6.7 *Offshore dividend regime*

A different set of provisions applies to non-resident companies ("the offshore dividend regime"). These take the standard form: IT is charged on dividends or distributions *arising*[66] and the person liable is the person *receiving or entitled* to the dividends. The relating-back rule does not apply. But apart from that, the same rules apply. As is generally the case, nothing much turns on the choice of income-recognition vocabulary.

15.6.8 *Planning: Early dividends*

It is sometimes advantageous to pay dividends sooner rather than later. Examples are:

(1) An individual is non-resident (and not temporarily non-resident) in year 1 but UK resident in year 2. UK or foreign source dividends in year 1 are free of income tax.
(2) An individual is a remittance basis taxpayer in year 1 but deemed domiciled in year 2. Foreign dividends of year 1 qualify for the remittance basis.
(3) Tax rates in year 2 are higher than in year 1.

If the company has available funds to make the distribution that is straightforward. A problem arise if the company does not have the cash or assets in specie to fund a distribution. If the individual is a director, a dividend credited to a director's loan account should suffice.[67] In *IRC v*

[65] [2022] UKFTT 420 (TC) at [37].
[66] See 30.8.1 (Dividend: IT charge); 30.8.4 (Income-distribution: IT charge).
[67] See 15.5.3 (Credit to non-bank account).

Doncaster:[68]

> [the Directors] would probably leave this sum in that loan account where it was bearing very good interest and was very well secured ... for a long time. Well, they may do or they may not. They were not under any obligation to do so. If it was the intention that they should do so, it was only an intention in the form of a probably very well grounded hope, and a situation of that kind does not seem to me to bear any affinity at all to the sort of situation which Lord Finlay ... meant when he spoke of the money not being received, because he was speaking of a case where the shareholder had not any right to receive it at all.

If the individual is not a director, it is considered that the sum could still count as paid (or received) but left outstanding as a loan, if properly documented.

15.7 Waiver of interest/dividends

15.7.1 *Waiver: Navigation*

Waiver of interest/dividends may raise many tax issues in addition to recognition of income:

Topic	**Concerns**	**See**
Validity of waiver	All waivers	99.18.1
Recognition of income	Interest & dividends	*Discussed here*
Loan or credit transaction	Interest	26.26
Settlement-arrangement/settlor	Usually, dividends	99.18 - 99.19
Benefit from trust	Interest	50.4.2
Transfer of value for IHT	Interest & dividends	99.18.2

15.7.2 *Waiver: Income recognition*

Interest is not recognised as paid/received if waived before payment, even if waiver is after the interest is due.[69]

The same applies to dividends. The CT Manual provides:

> **CTM15205: dividends, distributions and company law** [Sep 2020]
> **Dividend waivers**
> The waiver of a dividend is only possible before payment. An act that purports to be a waiver after payment is no more than an assignment or

[68] 8 TC 623 at p.631.

[69] *Dewar v IRC* 19 TC 561; *Girvan v Orange Personal Communications Services* 70 TC 602.

> transfer of income...
> As discussed above[70] ... Income Tax liability depends on whether a dividend is, or is not, actually paid.
> A waiver can be effective for all future dividends, or for any future period of time, or for specific dividends.

15.8 Receipt by nominee/trustee

Nominees/trustees raise two sets of questions: the position of the nominee/trustee, and the position of the beneficial owner.

15.8.1 *IIP/settlor-interested trust*

Trustees (generally) receive trust income (eg if it is paid to their bank account). This amounts to receipt, for the purposes of the person-liable rule, even if another person (the life tenant or settlor) is entitled to the income. Trustees of IIP trusts, and of settlor-interested trusts, are therefore (generally) liable under the receipts basis of liability.

15.8.2 *Trustee of discretionary trust*

Trustees of a discretionary trust are "entitled" to trust income[71], and so are liable under the entitlement basis of liability; (though this would only matter if they mandate the income to another person, and so are not liable under the receipts basis of liability).

15.8.3 *Nominee/agent*

SAIM provides:

> **SAIM2400 Taxation Of Interest: The Tax Charge** [Dec 2019]
> ... *A person 'receiving' interest*
> The 'receiving' leg of ITTOIA/S371 comes into play only where someone receives the interest as an agent or bare trustee for another person...

In *Aplin v White* an estate agent paid clients' money into a deposit account and received interest. The interest belonged beneficially to the clients.[72]

[70] See 15.6 (When are dividends recognised).

[71] They are not beneficially entitled, but they are entitled in the sense that they, and no-one else, has the right to call for the income. Though one should hesitate to draw support from the different concept of DTA beneficial ownership, it ay be relevant to note that the same rule applies there; see 108.10.4 (DTA meaning: General).

[72] Although the interest belonged to the clients, the estate agent kept it for himself and did not pay it to his clients! In the circumstances the estate agent's argument that he

The agent was taxable as the person receiving the interest:[73]

> ... the expression of "receiving or entitled to" in the alternative, enabled an assessment under Schedule D to be made upon a person who either received the income or was entitled to it. If he received some income to which be was entitled and also some income to which he was not entitled, in the sense that he was a trustee or other person who received it in a fiduciary capacity for others, it mattered not: he could be assessed under Schedule D on it all.

SAIM provides:

> **SAIM2400 Taxation Of Interest: The Tax Charge** [Dec 2019]
> ... In practice, it is only in exceptional circumstances that HMRC would argue that an agent or nominee is chargeable to tax on interest - see examples 1 and 3 at SAIM2410. In such a case, the person receives the income in a representative capacity and not because they are beneficially entitled to it. It is not their income as an individual and under ITA07/S11 tax is charged only at the basic (and not the higher) rate, and because the income is interest, the savings rate applies by virtue of ITA07/S12.

SAIM2410 formerly included this example, deleted 2019, concerning income from stolen/misappropriated property:

> *Example 3 (Keith)*
> K holds a power of attorney enabling him to manage the financial affairs of his elderly mother. He opens an offshore amount in her name, in which he invests part of her capital. Interest is paid gross on this account, but is not shown either on K's tax return or his mother's.
> HMRC open an enquiry into K's business, and the HMRC officer discovers that money introduced into the business comes from his mother's account. K admits that the money was not a loan, and he did not have his mother's consent to use her funds in this way.
> K is liable to tax on the interest earned on the account at the savings rate, but not at the higher rate. He is the person receiving the interest,

had not received the interest was more than slightly unmeritorious. If the estate agent had paid the interest on to its beneficial owner, HMRC would pursue the beneficial owner and not the agents for the tax; see 121.5 (Reporting bare trusts). The question whether HMRC could still claim the tax from the agent should not arise, but if it did, *Asplin v White* might, perhaps, be distinguished for pragmatic reasons.
(One hopes that estate agents nowadays are more closely regulated).

[73] 49 TC 93. The quoted words are from Counsel's submission, set out at p.97, which the judge accepted at p.98.

> even if he is not entitled to it. However, it is not part of K's income and higher rate tax only applies to K's income.

Perhaps HMRC have doubts about that analysis, but what else could it be? This is almost self-evident, and if there could be doubt, the correctness of the example is confirmed by *Asplin v White*.

15.8.4 *Position of beneficial owner*

The Manual gives this straightforward example of nominees:

> **SAIM2410 Interest: Taxation Of Interest: Person Chargeable: Examples** [Feb 2020]
> *Example 1 (Harriet: Nominee investment account)*
> H holds a portfolio of quoted company bonds through a nominee. Although the nominee's name appears on the companies' registers of bond-holders, H is the beneficial owner of the bonds and the person entitled to the interest arising from them. H is therefore chargeable to tax on the interest.

The question may arise as to who is the beneficial owner, or when they become beneficial owner:

> **SAIM2410 Interest: Taxation Of Interest: Person Chargeable: Examples** [Feb 2020]
> *Example 2 (Mehta and Ian: Court Order)*
> M and her former husband I, receive the decree absolute being granted on 29 December 2016. On 5 December 2016, a Court Order is made ordering M to transfer certain assets to I. These include a building society account in I's sole name. On 31 December, interest of £2,400 is credited to the building society account. On 2 January 2017, M writes to the building society asking them to change the account from her name to I's, and the building society acts on the request a week later.

The HMRC analysis is as follows:

> Beneficial ownership of the account is transferred when the Court Order is made on 5 December 2016, even though the name on the account is not changed until later. (See the guidance at CG22423 on when assets are transferred on divorce or dissolution of a civil partnership - although this applies for capital gains tax purposes, HMRC would take a similar view where entitlement to interest is concerned.)
> I is therefore the person who is entitled to, and taxable on, the interest that is paid on 31 December 2016. There is no question of apportioning the interest for her period of ownership of the account - see SAIM2420.

Transparent entities raise income attribution issues; see 90.6 (Transparency issues).

15.9 Income recognition: Breach of trust

If a trust/company distributes[74] an asset in breach of trust law/company law, it acquires in principle[75] two rights against the recipient:

(1) A claim *in personam* for an amount equal to the sum distributed; and
(2) A claim *in rem* for the asset transferred, which the recipient holds on constructive trust for trust/company (transferor).

In *Ridge Securities v IRC*,[76] a company made an unlawful distribution. The unlawful distribution was not a "payment" (or at least not a payment within the meaning of the provision in point[77]). The purported payment was "a nullity" which had "no legal operation".[78] In short, a distribution in breach of trust is not recognised as income.

CT Manual provides:

> **CTM15205: dividends, distributions and company law** [Sep 2020]
> **Ultra vires and illegal dividends**
> The question whether a dividend is unlawful or not is not a tax issue. It is rather the application of company law to the particular facts, and the tax consequences flow from those facts. This is a matter in the first case to be determined by the company ... so it will normally be the company or its advisers who first raise the point. Officers should not in general seek out cases in which it might be argued that dividends that have been paid are unlawful. An exception to this will be where the dividend is

[74] I use the word "distribute" loosely. Although there may be a transfer of the bare legal title, it would be more accurate to refer to a purported distribution, or to use scare quotation marks.

[75] Further thought may be needed if a foreign law applies.

[76] 44 TC 373.

[77] Section 169 ITA 1952 (not found in the current law).

[78] 44 TC 373 at p.395-396. HMRC apply this analysis in the context of Gift Aid; see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 9.7.5 (Unlawful distribution: Tax).
Likewise in *Russell Baker v HMRC* [2013] UKFTT 394 (TC) a company's purchase of its own shares in breach of company law was void, and the purported payment of the purchase price (held on constructive trust for the company) was not a distribution under the standard tax definition. Similarly, no chargeable gain would arise on a disposal (or purported disposal) in breach of trust because the transferee would hold the property on constructive trust for the transferor.
See too 50.4.11 ("Benefit" in breach of trust).

> paid as part of some avoidance scheme.
> There is a significant difference in the treatment of improperly paid dividends dependent upon the position of the recipient.

The Manual refers to s.847 Companies Act 2006:

> (1) This section applies where a distribution, or part of one, made by a company to one of its members is made in contravention of this Part.
> (2) If at the time of the distribution the member knows or has reasonable grounds for believing that it is so made, he is liable—
> (a) to repay it (or that part of it, as the case may be) to the company, or
> (b) in the case of a distribution made otherwise than in cash, to pay the company a sum equal to the value of the distribution (or part) at that time.

The Manual continues:

> No such liability exists in respect of a member who is an innocent recipient. The immunity of an innocent recipient shareholder is illustrated in *Re Denham & Co* [1883] 25 Ch D 752 and *Moxham v Grant* [1990] 1 QB 88. This principle relates mainly to the liability of a shareholder in a quoted company, who cannot be expected to have detailed knowledge of the day to day running of the company, but simply receives a reward for holding shares by way of dividend. When dealing with private companies controlled by directors who are shareholders, such a member ought to know the status of the dividend and it is expected that section 847 will apply in the majority of such cases.
> Where a dividend is paid and it is unlawful in whole or in part and the recipient knew or had reasonable grounds to believe that it was unlawful then that shareholder holds the dividend (or part) as constructive trustee in accordance with the principles stated by Dillon L J in *Precision Dippings Ltd v Precision Dippings Marketing Ltd* [1986] 1 Ch at page 457. Such a dividend (or part) is void for the purposes of both
> [1] the Income Tax charge on distributions under ITTOIA05/S383 and
> [2] the long abolished ACT charge under ICTA88/S14.
> The company has not made a distribution as a matter of company law, and so the dividend does not form part of the recipient's income for tax purposes. The company has not parted with title to the sum that it purported to distribute, which as a consequence remains part of its assets under a constructive trust (see also *Ridge Securities Ltd v CIR* (1964) 44 TC 373).
> Where the company concerned is a close company, it is regarded as

having made a loan to the shareholder by virtue of CTA10/S455(1), thereby triggering a charge under CTA10/S455(2).[79] Relief would however be available under CTA10/S458 where the dividend is repaid to the company. That repayment might be by cash or cheque, or by a suitable entry in the loan account.

A shareholder who had no knowledge of the illegality of the dividend and no reasonable grounds on which so to believe is not a constructive trustee and does not have to repay the sum, which will constitute a distribution under CTA10/S1000 (1) B.[80] If such a shareholder then repaid the company (although not liable to do so) this is simply a voluntary assignment or transfer of the shareholder's own income so that it does not affect the tax position. However, in practice it is desirable to consider all such cases on their particular facts and merits.

15.10 Retrospective acts/backdating

A related question is, could a receipt/entitlement/payment be nullified (or the other way round, could a non-receipt retrospectively become a receipt) as a result of:

(1) A court order, under a jurisdiction based on mistake, rectification, statutory divorce/insolvency powers etc

(2) Private powers:

Power	**See para**
Disclaimer/waiver	15.7
Assent	89.5
Set aside voidable transaction	*Not discussed*

I do not consider this in detail here, as I have considered it elsewhere.[81] In short, the issue is decided on an ad hoc basis; there is no general rule.

15.11 Income recognition in DTAs

Similar issues arise under the OECD Model, but the vocabulary is different.

15.11.1 *"Deriving" income*

OECD Model commonly refers to income "**derived by**" a person:[82]

[79] See 40.8 (Loan to participators).

[80] See 30.6.2 (Para B: Other distributions).

[81] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 10.6 (Backdating). The issue can arise in any area of tax, not just income recognition; eg see 62.11 (Loan to/from underlying co).

[82] This list is not comprehensive but includes the most common examples.

Art	**Outline of wording**
1	Income derived by or through a transparent entity
6	Income derived by a resident of a State from immovable property
10	A company derives profits or income from the other Contracting State
13	Gains derived by a resident from the alienation of immovable property
15	Remuneration derived by a resident in respect of an employment
16	Directors' fees derived by a resident in his capacity as a member of the board of directors

The usual UK tax terminology would be that the income (or gains) arise (or accrue) to the person from the property, or from a source in the other state, or the person receives/is entitled to it; but the meaning is the same.

The verb can be used transitively, as in "*a company derives profits or income*"[83], or *"persons deriving pensions"*[84]; where British English would say "receives/receiving".

This is not a neologism, nor is it restricted to OECD English. For instance, s. 6(1) [Australia] Income Tax Assessment Act 1936 provides:

> taxpayer means a person deriving income or deriving profits or gains of a capital nature.[85]

In British legal English, "derive" is commonly used in the context of property deriving from other property, ie property representing property.[86] It is not used as a synonym of income arising from property. The transitive usage seems particularly unidiomatic. But no practical difficulty should arise.

15.11.2 *"Paid" and "payment"*

In other places, the OECD Model uses other vocabulary, such as income of/arising to/paid:

Art	**Wording (in outline)**
	Income of
1	Income of a resident of a State
7	Profits of an enterprise of a State
21	Items of income of a resident of a State

[83] Article 10 OECD.

[84] From OECD Model Commentary on art 15.

[85] Likewise s.38(2) [New Zealand] Income Tax Act 1976, which provides for the payment of income tax "by every person on all income derived by him during the year".

[86] See App.2.9.3 (Derive from/represent compared).

Paid

10 Dividends paid by a company to a resident of the other Contracting State
15 Remuneration paid by an employer
18 Pensions paid to a resident of a State
19 Remuneration paid by a State

Arising

11 Interest arising in one State and paid to a resident of the other State
12 Royalties arising in one State, beneficially owned by a resident of the other State

Beneficial owner/owned

10,11,12 Beneficial owner[87]
–[88] Profits, income and gains owned by a resident of a State

The OECD Commentary provides:

> The term "paid" has a very wide meaning, since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom.[89]

This is the same as the English law approach to the word.[90]

15.11.3 *DTA recognition vocab compared*

The OECD Model expressions "derived" or "paid to" do not bring with them any specific requirement, or technical meaning. They are just more items in the vocabulary cluster used to describe the recognition and attribution of income, equivalent to UK domestic law received/ entitled to/arising, etc.

For instance, art 11(1) has *Gains derived from* and art 11(2) has *Gains from ...* Clearly the concept is the same. Thus the OECD Model makes no attempt to be consistent in its income-recognition vocabulary, and it does not use the words in any technical sense.

[87] See 108.10 (DTA beneficial owner rule).

[88] This form is not in the OECD Model but it is standard in UK Foreign Tax Credit articles; see 111.8.1 (Treaty-source rules). In this context "owned" is just another word in the income-recognition vocabulary cluster.
In the OECD Model, "owned" is used for capital but not for income, eg ("income derived or capital owned by a resident of a State"); except in the expression "beneficial owner", which has acquired a technical meaning of its own.

[89] Commentary on art 10 (dividends) para 7; on art 11 (interest) para 5; on art 12 (royalties) para 8.3.

[90] See 15.2.3 (Payment: WHT, PAYE).

CHAPTER SIXTEEN

SOURCE/RFI/TERRITORIAL PRINCIPLES

16.1 Source/RFI: Introduction
16.2 Source: IT territorial limit
16.2.1 UK IT territorial limit
16.2.2 Foreign IT territorial limits
16.2.3 Source in UK tax law
16.2.4 Source in DTAs
16.2.5 Source: terminology
16.3 Approach to locating source
16.4 Do sources have a location?
16.5 Formal/substantive source rules
16.6 No source/deemed source
16.7 Source of gains
16.8 Non-UK cases on source
16.9 Relevant foreign income
16.9.1 Why RFI matters
16.9.2 "Relevant foreign income"
16.9.3 RFI of non-resident
16.9.4 Definition of RFI: Critique
16.10 RFI collection costs
16.11 General territorial principle
16.12 Territorial principle: Application
16.12.1 Application in tax cases
16.12.2 Application in non-tax cases

16.1 Source/RFI: Introduction

The topics of this chapter are:

(1) Two concepts central to the territorial limit of IT:
   (a) Source of income
   (b) Relevant foreign income

(2) General territorial principles of UK taxation

16.2 Source: IT territorial limit

All UK taxes, and indeed all foreign taxes, have some territorial limits ("territoriality").

16.2.1 *UK IT territorial limit*

There is no single section which sets out a territorial limit for IT (or indeed for any other tax). Indeed, there is no single rule for territorial limits, though the rules share some common themes.

Section 368/577 ITTOIA provide:

> (1) Income arising to a UK resident is chargeable to tax under this Part [Part 4, Savings & Investment Income/Part 5, Miscellaneous Income] whether or not it is from a source in the UK.

> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.

For categories of income within Parts 4 and 5, the test is one of source. IT is not charged on foreign source income of a non-resident. One might abbreviate "foreign source income" to "foreign income".

There are similar rules, though not in quite the same terms, for Part 2 ITTOIA (trading income), Part 3 ITTOIA (property income), and their CT equivalents.[1]

In *Colquhoun v Brooks*:

> The Income Tax Acts ... themselves impose a territorial limit,
> [1] either that from which the taxable income is derived must be situate in the UK
> [2] or the person whose income is to be taxed must be resident there.[2]

This is a statement of the territorial limits of IT in 1889.[3] It was reaffirmed in 1936 when the IT Codification Committee said:[4]

> ... a broad distinction between
> [1] UK income (which, generally speaking, renders the owner, whoever he may be, chargeable with tax) and
> [2] foreign income (which renders the owners chargeable only if he is a person residing in the UK).
> Although in the existing [Income Tax] Acts this is expressly stated only in relation to Schedule D, the universality of the principle has been recognised by the Courts.[5] It seems to us to be a fundamental principle of the [Income] tax...

In 1982 it was still "broadly correct".[6]

[1] See 21.4 (IT territorial limit: Trading); 21.6 (CT territorial limit: Trading); 24.3 (Territorial limits: Property income).

[2] 2 TC 490 at p.498.

[3] The passage can also been seen as stating, or at least illustrating, a more general principle of territoriality in taxation, see 16.11 (General territorial principle).

[4] (1936) Cmd 5131 para [44].

[5] The Committee refer to: *Whitney v IRC* 10 TC at p.112; *Marchioness of Ormonde v Brown* 17 TC 333 at p.344. Similarly, see *Perry v Aston* 19 TC 255 at p.280: "... the necessary limitation which is inherent in all our Income Tax legislation, namely, that what is taxed under or by virtue of this provision can only be either (1) income which is here, or (2) income of a person resident here." (This passage is in a dissenting judgment, but the majority did not disagree on this point).

[6] *Clark v Oceanic Contractors* 56 TC 183 at p.227.

One can say the same today; but with more emphasis on the qualification "broadly"; or a wider reading of the imprecise words at [1] (that there must be some kind of source in the UK).[7] For the general trend of recent years has been a gradual extension of the territorial scope of UK taxation.[8]

16.2.2 *Foreign IT territorial limits*

Most other countries adopt a similar approach, and it might be regarded as a general principle of international income tax law (if such a thing exists) that a state will not tax non-residents on foreign income.[9]

The UN says:

> International income taxation revolves around two main concepts—the concept of source and the concept of residence. Under their domestic tax law, countries will assert the right to tax income arising (or sourced) in their jurisdiction, and most countries will seek to tax residents on their income wherever arising.[10]

A tax on income from sources in and outside a country is best described as tax on **"worldwide income"**. In EU terminology the term used is limited/unlimited tax liability.

Originally, many, perhaps most, states taxed their residents only on income from sources within that state. The UK was not far from that position until 1914, when all foreign income was taxed on the remittance basis.[11] The general trend has been to extend income tax on residents from income from sources within the residence state to include worldwide income. Even now, some states continue to tax their residents on income only from sources within the state. The UK does not tax non-residents on gains from UK situate property, other than land or land-rich assets, and it

[7] See for instance 16.6 (No source/deemed source). *Colquhoun* is also authority for a general principle of construction relating to territorial limits in tax statutes: See App. 16.11 (Territorial principle).

[8] Examples are (1) Diverted Profits Tax; (2) Offshore Receipts in respect of Intangible Property; see 32.17 (Offshore receipts from IP); (3) Nonresidents holding UK land/land-rich assets.

[9] America is an exception, imposing worldwide taxation on its citizens even if non-resident.

[10] Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries (2019) para 15 *https://financing.desa.un.org/sites/default/files/2023-03/manual-bilateral-tax-treaties-update-2019.pdf*

[11] See 17.2 (History of remittance basis).

does not always tax non-residents on UK source income.

16.2.3 *Source in UK tax law*

So, for Parts 4 and 5 ITTOIA, and for some other UK tax purposes:
(1) Income has a source.
(2) Every source has a geographical location.

There is no statutory definition of "source". The word has been paraphrased as "origin"[12] and "chief" or "originating" cause;[13] but these paraphrases are of no practical assistance. It has also been explained as either property or an activity (such as a trade, or services falling short of a trade but within the scope of misc sweep-up income); and it is certainly difficult to imagine a source which was not property or an activity.[14] I am not sure that that takes us much further.

The location of a source matters for various purposes, in particular:

Topic	**See para**
Taxation of non-residents	16.2.1
Definition of RFI	16.9.2
Withholding tax	26.22

16.2.4 *Source in DTAs*

The location of a source is also important for double tax treaties. DTAs sometimes lay down their own rules for locating a source (for treaty purposes) so it may be necessary to distinguish between UK domestic law source location and treaty-source location.[15]

16.2.5 *Source: terminology*

A note on terminology: UK tax statutes formerly used a variety of expressions[16] but now the standard phrases are:

[12] *Hart v Sangster* 37 TC 231 at p.235.

[13] *IRC v Philips' Gloeilampenfabrieken* [1955] NZLR 868. *https://www.kessler.co.uk/wp-content/uploads/2012/04/CIRvPhilips.pdf*
I discuss *Philips* in detail in the 14th edition of this work para 18.9.1 (IRC v Philips).

[14] *Spritebeam v HMRC* [2015] UKUT 75 (TCC) at [72]: "we cannot think of a source that could not be categorised as either property or activity.

[15] See 111.8.1 (Treaty-source rules).

[16] e.g. in section 65 ICTA 1988 (repealed) the test was whether a possession or security was "out of the UK", but that came to be understood to mean "having a source out of the UK"; see 26.11 (Rejection of situs approach).

(1) "income arising from a source in/outside the UK"; and
(2) "income arising in/outside the UK"

These expressions are synonymous.[17]

Similarly in the OECD Model, the phrases used are:

Expression	Article	Topic
Income from sources in a state	4	Residence
Payment arising from sources outside a State	20	Students
Income arising in a State	10/11/12	Dividends/interest/royalties

Again, the expressions *income arising from sources in/income arising in* are synonymous.

16.3 Approach to locating source

Different considerations naturally apply to different categories of income. This is discussed in the chapter on the specific income category concerned:

Type of income	See para
Trading	21.4.4
Interest	26.8
Royalties/intellectual property	32.4
Misc sweep-up income	33.19
Income from discretionary trust	41.3.1

This chapter makes general points about source which apply to more than one category of income.

Location is generally governed by case law, though occasionally statute chips in.

The IT rules for the location of an income source are different from the situs of asset rules for IHT/private international law.[18] It would aid clarity of thinking not to use the same word in both contexts, so in this book:

[17] An argument that there was a distinction between the source of income and the place where the income arose was rejected in *Bayfine v HMRC* [2011] STC 717 at [63]. This is also the view in Hong Kong: see 16.8 (Non-UK cases on source). The suggestion to the contrary in *Perrin v IRC* [2014] UKFTT 223 (TC) at [24] is *per incuriam.*

I have wondered if there might be a difference in that "income arising in a state" is more apt when referring to income which does not have a source; but I doubt if there is such a thing as income without a source: See 11.6 (No source/deemed source).

[18] See 102.1 (Concepts of situs).

(1) I use the term "**location**" of a source of income (abbreviated to location of income)
(2) I keep *situs* for IHT/international law concepts and CGT.

But the usage of "situs" in an income tax context is too well established to alter easily, and no difficulty ought to arise as long as one bears in mind that IHT/international law situs of assets, and IT location of source of income, may be different (though the rules often overlap).

It is considered that a source of income should be regarded as located in only one jurisdiction. This rule is necessary if source rules in tax law are to achieve the object of avoiding double taxation.

16.4 Do sources have a location?

The concept of the location of a source of income is sometimes said to be misconceived:

> Income itself does not have a geographical location.[19]

This is not an accurate statement of tax law. Every source of income has a location. In most cases it is easy to identify the location, as the same passage goes on to state:

> By long standing convention,[20] however, income is assigned a geographical location by reference to the location of the assets and activities that are used to generate the income. When all of those assets and activities are located in one State, that State may be considered to be the unambiguous source of the income.

The problem is how to identify the location in harder cases. The passage gives the example of trading income, the hardest case to locate a source:

> ... When some of the assets or activities generating income are located in more than one State, the source of the income is less clear. For example, business profits derived from the manufacture of goods in State A and their sale in State B have a significant relationship to State A and to State B. In these circumstances, some rules for determining source are needed.

[19] United Nations, Note on the Revision of the Manual for Negotiation of Bilateral Tax Treaties (2011) Para 2.

[20] Contrast the (misconceived) view that situs of intangible property is fictional: see 102.1 (Concepts of situs).

An American scholar makes the same point:

> ... the source of income is difficult to define. In fact, many public finance economists would claim that the concept lacks meaning in the majority of cases... the problem has been partially solved by arbitrary rules. ... Economists argue that defining the true economic source is almost impossible, because income has contributions from many countries.[21]

In cases where 2 or more states are involved, it is correct that there may be no "true" location of source of income in *economic* terms. However this is simply one of many cases where economists and tax lawyers reach different conclusions for the purposes of their different disciplines. Tax law must somehow choose connecting factor(s) to link a source to a state. There are many possible connecting factors, and the selection of the determining factor(s) must to some extent be arbitrary. It may matter so much what the rule is, as long as there is some rule and its application is clear.

16.5 Formal/substantive source rules

An American scholar draws an interesting distinction for rules which determine the location of a source of income: formal and substantive. This is helpful in identifying the policy issues which lie behind location of source rules:

> Source rules fall into two basic categories. The first category comprises formal rules. These rules do not attempt to trace the economic source of the income, but rather seek to achieve administrative ease and certainty. ... Consider the following example demonstrating the formal rule: Suppose a foreign corporation exists and all of its income is earned in the United States - it has no other business activity.[22] From an economic perspective, it is clear that a dividend paid by this foreign corporation to its shareholders is US-source. But it is foreign-source under the dividend rule, because the payor is a foreign corporation. Notice also that this means that the source of dividend income is under the control of the taxpayer ... The main reason behind this rule is that it is administratively hard to tax a dividend from a foreign corporation to foreign shareholders, but easy to tax a dividend from a US corporation.

[21] Avi-Yonah, *International Tax as International Law* (2007), p.27, 38.

[22] Author's footnote: A foreign corporation is non-resident for US tax purposes: there is no central management and control test for corporate residence.

> The rule for interest is also a formal rule, and it is the same as the rule for dividends ... This is fortunate because of the difficulty of distinguishing debt from equity in many cases; at least the source rule is the same. ...
>
> The other kind of source rule is the substantive rule, which attempts to trace the economic source of the income. The first one of these is the rule for royalties ... No universal consensus exists about what the source rule for royalties should be. Many countries have a source rule for royalties that focuses on the residence country; the place of ownership of the underlying copyright or the place of production (research and development). The American rule is a place of use rule, meaning that it focuses on where the copyright or patent is utilised. ...
>
> There are other categories in which a substantive rule applies. In services, for example, the place of delivery of service controls. ...
>
> The basic difference between formal rules and substantive rules is that the formal rules require one single determination (residence of the payor, residence of the seller, or passage of title), whereas substantive rules attempt to trace the economics of the transaction. Formal rules are generally relatively easy to administer, from both the IRS perspective and the taxpayer's perspective, whereas substantive rules may involve much more difficult determinations. For example, in the case of patents and copyrights, the rule requires determination of the location of use, which may be difficult to determine if it is used in many countries: it may be difficult to break up the income into where the service was actually delivered. Not all substantive rules are difficult to administer: real estate is relatively easy because the location of real estate governs residency, and location is simply to determine in real estate. Most of the important applications of substantive rules, however, are difficult to administer and are more difficult for the taxpayer to avoid because the formal rules are much more under the taxpayer's control.[23]

16.6 No source/deemed source

EN ITTOIA Vol II para 1639 notes that:

> Such chargeable amounts [capital receipts subject to income tax] could not therefore be said to derive from a "source" in the traditional sense.

Some provisions (such as s.830 ITTOIA, the definition of RFI) refer to income which arises from a source outside the UK. Other provisions (such as s.368/577, territorial limitation for Parts 4/5 ITTOIA) refer to

[23] Avi-Yonah, *International Tax as International Law* (2007), p.42.

income from a source in the UK. Income with no source raises an obvious difficulty here.

If no source exists, a source can be invested. One solution to this issue is to deem a source to exist, and to deem that source to be a UK or a foreign source. There are (at least) 2 provisions which adopt this technique, for the purposes of s.830 ITTOIA (definition of RFI). EN ITTOIA explains:

> 1640. Although the definition [of RFI] uses "income which arises from a source" in respect of all income within the definition, specific rules have been added, in view of [the comment in *Centaur Clothes Group s*et out above], in
> [a] sections 428(3) ITTOIA (deeply discounted securities)[24] and
> [b] 658(2) ITTOIA (... income from estates in administration),[25]
> to attribute a foreign source to the income in question to ensure that there is no doubt that the definition [of RFI] applies to these provisions.

These rules deem the income concerned to have a source out of the UK, so this part of the definition of RFT is met. An alternative solution would simply be to deem the income to be RFI, ie to bypass the definition. There are many routes to the same destination.

Two deemed source rules apply for s.368/577 (territorial limitation for Parts 4/5 ITTOIA). Section 368(3)/s.577(3) ITTOIA provide:

> References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.

EN ITTOIA Vol II explains:

> 34. However, while the term "source" may apply to the majority of receipts chargeable to income tax it does not apply to all such receipts. "Source" is something from which income arises and not all sums charged to income tax are by nature income. "Source" may not be the appropriate term where the amount charged to tax represents a profit on a transaction which is not by nature income and would not be charged to income tax without a specific charge. Indeed, the chargeable profit may arise on the disposal of an income source.....
> 35. It has therefore been necessary to consider how to express the territorial scope in cases where there is no natural source of income.

[24] See 29.11 (DDS remittance basis).
[25] See 89.16 (Estate income remittance basis).

> 36. [Section 368(3) ITTOIA] is broadly worded to catch such income. Where the connection such income has to the UK is comparable to the connection that income with a source in the UK has to the UK, then it is treated for the purposes of this section as income from a source in the UK.

It may be that this concern was unjustified, but these statutory provision do no harm. They only apply for s.368/577 (and so for Parts 4/5 ITTOIA); they do not apply elsewhere, eg they do not apply for the definition of RFI.

16.7 Source of gains

UK domestic tax legislation does not use the word source in connection with gains of a capital nature, whether chargeable to CGT or IT. For instance:

- Foreign tax credit relief refers to gains *accruing in* a territory[26]
- CGT remittance basis applies to gains on a disposal of assets *situated outside* the UK

Although the word "source" is not used, it would not be an inappropriate term if it were used. The terminology itself does not matter.

In international tax law, capital gains are often said to have a source, which is taken to be the state where the asset is situate.

16.8 Non-UK cases on source

There are many Commonwealth cases, which ought to be helpful. It is of course necessary to consider whether the relevant Commonwealth legislation is differently worded from the relevant UK provision. This arises particularly for cases on the source of trading income.

A Southern Rhodesia statute imposed a charge on the amount:

> received by ... any person ... *from any source within the Territory* ...

In *Rhodesia Metals v CT*, the Privy Council said of this provision:

> ... numerous cases founded on the various Income Tax Acts, English, Australian, New Zealand and South African, were cited ...
> Their Lordships have no criticisms to make of any of those decisions, but they desire to point out that
> [1] decisions on the words of one statute are seldom of value in deciding on different words in another statute, and that

[26] See 111.8 (Foreign source rule).

> [2] different business operations may give rise to different taxing results.

Point [2] is obviously correct but we are here concerned with point [1]. The Privy Council continue:

> [3] If the charging words of the English statute are looked at,
>
> > "annual profits or gains arising to any person ... (ii.) residing in the UK from any trade wherever carried on, and (iii.) whether resident in the UK from any trade exercised within the UK";[27]
>
> they are obviously different from the Southern Rhodesian charging words,
>
> > total amount [other than capital] received by ... any person ... from any source within the Territory.
>
> [4] It is desirable, also, to point out that, at any rate for different taxing systems, income can quite plainly be derived from more than one source even where the source is business. For instance, in the case of the business of a railway company whose railway is situate abroad, as in *San Paulo (Brazilian) Railway v Carter*,[28] while the English company may be assessed in England on the whole of its profits because it carries on part of its business there, yet it could not be doubted that so much of the profits of the business as were in fact earned from running the railway in Brazil were derived from exercising a business in Brazil; and still less could it be doubted that the sums received by the company in Brazil were received from a source in Brazil.[29]

Lord Atkin correctly states at [4] that the Commonwealth legalisation and case law has no relevance to the (artificially wide) test of location of source of trading income for UK residents.[30] It is considered that the Commonwealth legislation does apply the same test as s.6(2) ITTOIA (trading income of non-resident). For this purpose the Commonwealth cases *are* persuasive authorities in the UK. For the object of the rules for non-residents is to avoid double taxation and ensure that income is taxed in one and only one jurisdiction. That object can only be achieved if there is an international "common law" on the subject. In practice this is the

[27] I have corrected a minor misprint in the law report. This is only a rough summary of the statutory wording, later s.18 ICTA, now rewritten in ITTOIA.

[28] 3 TC 407.

[29] [1940] AC 774 at p.788–9.

[30] See 21.4 (UK resident trader: IT).

view taken. For instance, the former International Tax Handbook referred to *Kirk*.[31]

The same applies to Hong Kong, where the charge is on profits "arising in or derived from Hong Kong".[32] *Smidth* is the basis of the Hong Kong case law.[33] The Hong Kong Revenue have issued useful guidance the **"Hong Kong guidance note"**. It is suggested that its status in an English court should be the same as that of a textbook. The Hong Kong guidance note provides:

> 4. Though the word "source" is not used in section 14, it has always been accepted by the courts that the words "arising in or derived from" raised the concept of source. Cases from other common law jurisdictions with legislation using the specific word "source" are therefore relevant and have been used in assisting the interpretation of the words used in section 14. In *IRC v Philips Gloeilampenfabrieken* [1955] NZLR 868, Barrowclough CJ at 874 said that the concept of derivation seems necessarily to imply the concept of a source.[34]

In an Indian statute, the charge was on profits "accruing or arising in British India". This was held to be substantially the same as in Hong Kong.

> This authority can only be distinguished from the instant case if the words in s 14 'derived from' are given a much wider meaning that the words 'arising in'. Whilst it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases, their Lordships do not accept that it can possibly be sufficient to bear the weight sought to be put on it in distinguishing *Mehta's* case.[35]

16.9 Relevant foreign income

16.9.1 *Why RFI matters*

The expression RFI is used so often in tax that it is not possible to provide a complete list. In particular:

[31] See ITH826.

[32] Section 14 Hong Kong Inland Revenue Ordinance.

[33] *IRC v HK-TVB* [1992] STC 723 at p.728.

[34] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No. 21 (Revised) Locality of Profits December 2012, *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

[35] *IRC v Hang Seng Bank* [1990] STC 733 at p.739.

(1) RFI is a requirement for:
  (a) the remittance basis
  (b) protected-trust reliefs
(2) There are special deductions for RFI collection costs[36]
(3) There is a relief for RFI of consular officials[37]

16.9.2 *"Relevant foreign income"*

Section 830(1) ITTOIA provides the definition of "RFI":

> In this Act[38] "relevant foreign income" means income which
> (a) arises from a source outside the UK, and
> (b) is chargeable under any of the provisions specified in subs.(2) (or would be so chargeable if s.832 [remittance basis] did not apply to it).

Section 830(2) ITTOIA sets out 15 categories of RFI:[39]

Chapter/s.	**Part**	**Topic**
Chap 2, 17	2	Trading income, Trading adjustment income
Chap 3	3	Property income
Chap 2	4	Interest
Chap 4	4	Dividend from non-UK resident company
Chap 7	4	Purchased life annuity
Chap 8	4	Deeply discounted securities
Chap 13	4	Sale of foreign dividend coupon
s.579		Royalties
Chap 3	5	Film/sound recording
Chap 4	5	Telecommunication rights
s.649		Estate income
Chap 7	5	Annual Payments not otherwise charged

[36] See 16.10 (RFI collection costs).

[37] Section 771 ITTOIA.

[38] The s.830 ITTOIA definition of RFI only applies for ITTOIA, but s.989 ITA extends it to the Income Tax Acts:

> "The following definitions apply for the purposes of the Income Tax Acts ... "relevant foreign income"
> [a] has the meaning given by section 830(1) to (3) of ITTOIA 2005
> [b] but also includes, for any purpose mentioned in any provision listed in section 830(4) of that Act, income treated as relevant foreign income for that purpose by that provision".

[39] For the sake of clarity, I set this out in table format, and substitute my terminology for the statutory section headings.

Chap 8	5	Misc sweep-up income

Section 830(3) ITTOIA makes two rather specialist exceptions:

> But "relevant foreign income" does not include income chargeable as a result of—
>
> (a) section 844 (unremittable income: income charged on withdrawal of relief after source ceases),[40] or
>
> (b) section 517C or 517E of ITA 2007 (profits on certain disposals concerned with land in the UK treated as trading profits).[41]

Section 830(4) ITTOIA signposts 10 provisions which direct that income is treated as RFI:[42]
For a further exception, see 58.7 (Redomiciled (ex-UK) securities).

For the treatment of other income as relevant foreign income, see—

Section	**Topic**	**See para**
s.857(3) ITTOIA	Partnership income	85.19
reg 19 OFTR	Offshore income gains	67.7
para 6(3) sch 3	Commonwealth Development Corporation Act 1999[43]	
s.575(3) ITEPA	Foreign pension	38.5.2
s.613(4) ITEPA	Foreign annuity	
s.631(3) ITEPA	Pre-1973 pension under Overseas Pensions Act 1973	
s.635(4) ITEPA	Foreign voluntary annual payment	
s.679(2) ITEPA	Taxable social security income: foreign benefit	
s.670A ITA	Accrued income profit	28.9
ss.726/730/735 ITA	Transfer of assets abroad: s.720/s.731 income	50.39

I coin the following terminology:
Actual RFI: RFI within the definition in s.830(1)(2)
Deemed RFI: income treated as RFI under another statutory provision

Section 830(4) ITTOIA is just an index of deemed RFI, intended to help the reader to navigate the legislation, in accordance with the principles of plain English drafting. In fact it is not quite a comprehensive index, as there are further provisions which deem income to be RFI and which are

[40] See 97.8 (Clawback of unremittable assets relief).

[41] See 22.5 (Transactions in land: Introduction).

[42] For clarity, I again set this out in table format, and substitute my terminology for the statutory section headings.

[43] The Commonwealth Development Corporation, now called CDC Group Plc, is deemed non-resident and its distributions are treated as RFI.

omitted from the s.830(4) list,[44] but it does not matter.

As far as I can see, it makes no practical difference whether income is actual RFI or deemed RFI. But there is a theoretical difference that:

(1) For actual RFI, it is a requirement under s.830(1)(2) that the income arises from a source outside the UK (and so that the income has a source).

(2) Deemed RFI includes categories of income which have no source. (This may be because the income is deemed income which does not exist and has no source; or because the income is a capital gain, treated as income, which is not regarded as having a source).

There are about 25 categories of RFI altogether. The categories includes almost all foreign income (other than employment income); in particular, they include trading income, property income, interest and dividends.

"Relevant foreign income" is a slightly narrower concept than "foreign income" because some types of foreign income are not "relevant foreign income." The most important category is chargeable-event gains.[45]

16.9.3 *RFI of non-resident*

Foreign income arising to a non-resident is not "chargeable"; so it is not actual RFI, because it does not meet the condition in s.830(1)(b).[46]

The rule that foreign income of a non-resident is not RFI is not wanted when applying RFI-type exemptions to provisions which may tax a UK resident on income of a non-resident (such as s.720/731, and s.624). In these cases, statute reverses the rule by a clumsy (but effective) formula, referring to:[47]

Settlor-interested trust: s.628A(3) ITTOIA	**ToA: s.726/721A(3)/735(2)/735A(4) ITA**
income which would be relevant foreign income if it were income of a UK	[income which] would be relevant foreign income if it were the

[44] Reg 16 and 97 OFTR; see 68.4 (Taxation of reporting-fund income); 68.7 (Non-reporting fund holds reporting fund)..

[45] See 70.5 (No remittance basis). That may be the only example of foreign income which is not RFI. I would be interested if readers can identify other examples of foreign income that is not RFI.

[46] Unless the temporary non-residence rules apply. It could be that some types of deemed RFI count as RFI even if payable to a non-resident.

[47] See 49.26 (s.720 remittance basis); 50.39 (s.731 remittance basis); 50.42.4 (Place relevant income in order); 92.9.1 (Condition A: RFI); 92.13.1 (Condition (a): RFI).

resident individual	individual's

The reason for the slightly divergent wording is that:

(1) In the case of settlor-interested trusts, the settlor may be resident or non-resident, because s.624 can apply to both.

(2) in the ToA cases, the transferor must be UK resident because s.720 only applies to UK residents.

The drafter sometimes uses the term "foreign income" to describe such income; in that case "foreign income" is used in a somewhat technical sense, which is not quite the natural sense. It should perhaps be written with initial capitals or scare quotation marks.

16.9.4 *Definition of RFI: Critique*

"Relevant foreign income" is not a helpful label, but no short label could do justice to the complexities.

It is suggested that "RFI" should be extended to include all income arising outside the UK.[48] All foreign income should qualify for the treatment currently given to RFI.

This is a simplification. The amount of tax involved is small because properly advised remittance basis taxpayers will not invest in foreign income which is taxed on an arising basis. The law is simply laying traps.

If, contrary to that view, there must continue to be special cases of foreign income which does not qualify for the remittance basis, they should be specified as express exemptions from the definition of RFI. We should not specify the categories of RFI: RFI should be all foreign income with specified exceptions.

The term RFI could then be replaced by the more transparent label, "foreign investment income" or "foreign income"; but terminology is perhaps a secondary issue.

16.10 RFI collection costs

Section 838(1) ITTOIA provides:

> In calculating the amount of relevant foreign income to be charged to income tax for a tax year, a deduction is allowed for expenses incurred outside the UK that are attributable to the collection or payment of the income.

[48] Except employment income, which has a separate code.

EN ITTOIA provides:

> This includes, for example, banking costs involved in the collection and forwarding of dividends...
> The deductions that are allowed are those solely concerned with the costs of handling the income. There is nothing in the legislation that confines those costs to costs involved in sending the money to the UK, so no such restriction has been imposed....
> ... the costs attributable to the collection or payment of income from a foreign trade are deductible.

Section 838(2) ITTOIA provides:

> Subsection (1) does not apply to income charged for the tax year in accordance with section 832 (relevant foreign income charged on the remittance basis).

No deduction is needed when the remittance basis applies, as income used in payment of the expenses will not be remitted.

It is suggested that s.838 should be repealed. This would be a simplification. The relief made some sense when introduced in 1914, as a sop to the newly imposed restriction on the remittance basis for foreign income,[49] and because the collection costs then may have been more substantial. But the amount of allowable costs now will not usually be significant.

16.11 General territorial principle

In *Colquhoun v Brooks*:

> ... Schedule D.... impose[s] the tax upon the annual profits or gains arising or accruing to any person residing in the UK from any trade, whether carried on in the UK or elsewhere. The Respondent does reside in the UK, profits did arise or accrue to him from a business carried on elsewhere than in the UK; therefore, say the learned counsel for the Crown, the case is within the very terms of the Act, and he must be held liable to assessment. ...
> It is urged, however, on behalf of the Respondent, that if this construction be adopted a foreigner residing for a short time only in this country would be subjected to taxation here in respect of the whole of

[49] See 17.2 (History of remittance basis).

> his business earnings in his own country or elsewhere,[50] that so to tax him would be opposed to international comity, and that a construction which would involve such a consequence cannot be correct.
>
> I think the learned counsel for the Respondent are right in saying that the result which they point out would follow in the case of a foreigner, but I do not feel satisfied that it would involve a violation of international law, and that the construction contended for by the Crown ought on that ground to be summarily rejected.
>
> Reliance was placed upon the decisions under the Legacy and Succession Duty Acts, which have imposed a limit upon the broad language of the enactments, subjecting legacies and successions to taxation. But it must be remembered that it was necessary to put some limit upon these general terms in order to bring the matters dealt with within our territorial jurisdiction. Without such a limitation the Legacy Duty Act, for example, would have been applicable although neither the testator nor the legatee, nor the property devised or bequeathed, was within or had any relation to the British dominions. A construction leading to this result was obviously inadmissible.
>
> The Income Tax Acts, however, themselves impose a territorial limit,
>
> [1] either that from which the taxable income is derived must be situate in the UK
>
> [2] or the person whose income is to be taxed must be resident there.
>
> If the latter condition be fulfilled, I think it is competent for the Legislature to determine the measure of taxation to be applied in the case of a person so resident.[51]

There are 2 distinct points here.

Firstly, *Colquhoun* is a *description of the territorial limits of IT* in 1889.[52] Secondly, *Colquhoun* is authority for *a general principle of territoriality,* or *a rule or principle of construction for tax statutes* (not just IT, as the reference to succession and legacy duty shows).[53] I here discuss the second aspect.

In *Clark v Oceanic* the general territorial principle was summarised thus:

[50] Author's footnote: It appears to have been accepted that the income (from a trade carried on abroad by a partnership of which the taxpayer was a partner) did not qualify for the remittance basis.

[51] 2 TC 490 at p.498.

[52] For the current rules, see 16.2 (Source: IT territorial limit).

[53] This principle of construction of tax statutes is in turn part of a broader principle of construction applicable to all statutes: subject to context, an enactment is taken as not applying outside the UK.

> ... the general principle ... is simply that, unless the contrary is expressly enacted or so plainly implied that the Courts must give effect to it, UK legislation is applicable only to British subjects or to foreigners who by coming to the UK, whether for a short or a long time, have made themselves subject to British jurisdiction. Two points would seem to be clear: first, that the principle is a rule of construction only, and secondly, that it contemplates mere presence within the jurisdiction as sufficient to attract the application of British legislation. Certainly there is no general principle that the legislation of the UK is applicable only to British subjects or persons resident here. Merely to state such a proposition is to manifest its absurdity. Presence, not residence, is the test.[54]

If territorial requirements are totally absent in a statute, some requirements will be implied. If territorial requirements in the statute are insufficient, some further requirements will be implied. However, as befits a principle of construction, the question of what requirement or further requirement may be implied is context-sensitive: there is no fixed, absolute, universal or prescriptive rule.

It is easy to say that UK tax must have territorial limits, and hard to say what those limits must be in any particular case. International comity is a high level principle which does not help much in practice, and context only takes one so far. But illustrations from case law offer the guidance as to the Court's approach in applying a general territorial principle.

16.12 Territorial principle: Application

16.12.1 *Application in tax cases*

The outcome in *Colquhoun* now seems self-evident.[55] The Income Tax Act set out what are now seen as internationally accepted territorial limitations of IT, and nothing further needed to be implied by applying the general principle of territoriality.

Clark v Oceanic concerned the territorial limit of PAYE: was a non-resident employer required to deduct tax under PAYE?[56] PAYE already had the territorial requirement of the ITEPA charge on earnings. Two of

[54] 56 TC 183 at p.221; the passage was approved in *Jimenez (R, oao) v FTT* [2019] EWCA Civ 51 at [14].

[55] Presumably the position seemed less clear in 1889.

[56] See 36.4 (Duty to deduct PAYE).

the five judges were "attracted" to the view that no more need be implied by the general territorial principle. But in order to reach a 3:2 decision, and leave the law in a reasonably workable state, they adopted the compromise view that a little more was needed: the employer had to have what was called "tax presence". That (novel) requirement was satisfied by the fact that the employer had a place of business and address for service in the UK. (The minority adopted the view that the territorial principle restricted PAYE to employers who were UK resident; but that is not the law).

Agassi v Robinson concerned the territorial limit of the entertainers/ sportspeople code: on payment of a sponsorship fee from one non-resident (Nike) to another non-resident (Agassi Inc), was the payor subject to UK withholding tax?[57] The code already had a tenuous territorial requirement,[58] but that fell far short of the "tax presence" requirement judged the minimum sufficient for PAYE. However it was held (this time by 4:1, but reversing the CA) that the territorial requirement of the Entertainers/Sportspeople code was sufficient. Nothing further was to be implied:

> (1) I am impressed by the Revenue's point that, if Mr Agassi is right, the ease with which the tax liability imposed by [the entertainers/ sportspeople code] could be avoided simply by ensuring that the potentially taxable payments were made by foreign entities with no residence or trading presence in this country would render payment of the tax to all intents voluntary. That cannot, in my opinion, have been Parliament's intention...
>
> (3) ... The whole point of [the code] is to subject foreign entertainers or

[57] For completeness: The appellant was Mr Agassi, not Nike, and the issue was whether Mr Agassi was subject to income tax, not whether Nike was subject to withholding tax. But the two questions were the same question, because the then legislation only imposed a tax charge on the individual if the withholding tax applied. So the individual taxpayer (Mr Agassi) could succeed in the argument that the implied territorial limit exonerated the payor (Nike) from withholding tax, he would win because that in turn exonerated him from the personal tax charge.

The legislation was subsequently amended on this point; see 23.3 (Charge independent of withholding tax). Had that been done sooner, then Mr Agassi could not have appealed the tax liability, and Nike might have had a stronger case on withholding tax. But that change does not alter the rule that the withholding tax under the entertainers/sportspeople code does not require a "tax presence".

[58] See 23.2.2 (Relevant (taxable) activity); 23.5 (Connected payment/transfer).

> sportsmen to a charge to tax on profits on gains obtained in connection with their commercial activities in the UK. Payments to foreign companies controlled by them are to be treated as payments to them. The infrequent or sporadic nature of their commercial activities and presence in the UK and the difficulty of collecting from them the section 556 tax on their profits and gains from those activities was one of the reasons why the new collection regime was introduced .... To read into the statutory provisions a limitation preventing the collection regime from applying where the payer is a foreign entity with no UK presence and thereby relieving the foreign entertainer/sportsman from the charge to tax cannot, in my opinion, possibly be justified on the basis of a presumed legislative intention. I would hold that on the true construction of these sections the territorial limitation cannot be implied and that the statutory language should be given its natural meaning.[59]

It seems to me that *Agassi* constitutes a change in approach from *Clark v Oceanic* (as reflected in one dissenting judgment).

Jimenez (R, oao) v FTT[60] concerned the territorial limit of an information notice under sch 36 FA 2008. According to CA, the power to issue a notice already had one territorial requirement: the power is only exercisable on someone who is or may be liable for tax in the UK and so has at least that identifiable relationship with the UK.[61] The notice was served on a non-resident. CoA held (unanimously, but reversing the Court below) that no further territorial requirement should be implied: the power to issue an information notice is (more or less) a worldwide power:

> ... there are a number of factors which point towards HMRC being authorised by paragraph 1 to give a taxpayer's notice to someone outside the UK. The first is the subject-matter and purpose of the legislation. ... The prevention of tax evasion which will often have a cross-border aspect to it serves an important public purpose in maintaining public revenue. ... A paragraph 1 notice can only be given to someone who is or may be a UK taxpayer and it is this status rather than his place of residence which is key to availability and operation of the power.[62]

[59] 77 TC 686 at [17].

[60] [2019] STC 746.

[61] Different considerations might apply if the information notice was issued by HMRC at the request of a foreign revenue authority, as there would be no UK link.

[62] At [39]. The second reason which follows (based on the terms of sch36) does not seem persuasive, to say the least; but I omit discussion of that because it has limited relevance in other cases.

Other powers in sch 36 are more territorially constrained. For instance, it was implied that the power in para 10 sch 36 for an officer to enter business premises did not apply to premises abroad.[63]

These 3 cases concern withholding tax and information powers, the administrative side of tax. There are no modern cases on implied territorial requirements which focus on substantive charges to tax.

Of course each decision was rooted in detailed statutory provisions, which makes it hard to see the wood for the trees.[64] However in the light of *Agassi* and *Jimenez,* it is considered that *Clark v Oceanic* would not be decided the same way today. Under the doctrine of precedent the territorial requirements of PAYE are fixed at all levels below the supreme court, but the modern cases show that the *Clark v Oceanic* concept of "tax presence" (whatever that means) is not a principle of wide application. In the language of the doctrine of precedent: *Clark* is not (yet) overruled, but it may be "restricted to its facts"; which comes to more or less the same thing. We will not hear much more of "tax presence"; instead there is a firm reluctance to imply additional territorial requirements to a statutory provision unless that seems essential.

The reason for the change of approach may be that globalisation makes a stricter territorial principle of construction inappropriate; or that judges are more sympathetic than before to the needs of HMRC to collect tax, and to prevent avoidance or evasion. In the 2020/21 edition of this work I said:

> If that is right, the change of approach is permanent and the pendulum will not swing again. It will need a very strong case for the Courts to imply a territorial limitation beyond that (if any) set out in a tax statute.

This was now confirmed when SC approved the *Jimenez* decision in *KBR (R, oao) v Director of the Serious Fraud Office:*[65]

> In *R (Jimenez) v FTT* the Court of Appeal held that para 1 sch 36 FA

[63] at [33].

[64] This is self-evident, but if authority is needed see *KBR (R, oao) v Director of the Serious Fraud Office* [2021] UKSC 2 at [46]: "Judicial decisions concerning the effect of different statutory provisions may be instructive by way of analogy but they need to be approached with some caution because they are concerned with entirely different statutory schemes, often enacted for different purposes and operating in different contexts."

[65] [2021] UKSC 2 at [48/]

> 2008 empowered HMRC to issue a notice requiring a UK taxpayer resident outside the UK to provide information for the purpose of checking his tax position. Patten LJ identified two factors in particular which led him to that conclusion. The first ... was the subject matter and purpose of the legislation. The court was not concerned with the facilitation of private litigation but with the prevention of tax evasion which often has a cross-border aspect to it and which serves an important public purpose in maintaining public revenue. The second (at para 40) was that the strong policy objectives of conferring effective investigatory powers on HMRC were bolstered by the language of Schedule 36 itself. However, it is clear that in coming to his conclusion he was strongly influenced by two further factors... The first of these is that the powers conferred were expressly limited for the purpose of checking the taxpayer's tax position and this therefore meant that the powers were necessarily and only exercisable in relation to someone who is or may be liable for tax in the UK and who, to that extent, had an identifiable relationship with the UK. Accordingly, a notice under paragraph 1 could only be given to someone who was or might be a UK taxpayer and it was that status rather than his place of residence which was the key to the availability and operation of the power. ... Secondly, in Jimenez non-compliance with a notice was not made a criminal offence and so the presumption that a statute should not be construed as making conduct abroad a criminal offence had no application. ... Both Patten LJ and Leggatt LJ considered that the sending of an information notice to a UK taxpayer in a foreign State requiring him to produce information that was reasonably required for the purpose of checking his tax position in the UK did not violate the principle of State sovereignty or contravene any international obligation of the UK.

16.12.2 *Application in non-tax cases*

The general principle of territoriality in tax is part of a wider general principle of territoriality:

> In resisting the interpretation ... that the Human Rights Act has extra-territorial application, the Secretary of State places heavy reliance on what he describes as 'a general and well established principle of statutory construction'. This is ... that Unless the contrary intention appears, Parliament is taken to intend an Act to extend to each territory of the UK but not to any territory outside the UK... Unless the contrary intention appears … an enactment applies to all persons and matters within the territory to which it extends, but not to any other persons and matters. ...

> In the absence of an intention clearly expressed or to be inferred either from its language, or from the object or subject matter or history of the enactment, the presumption is that Parliament does not design its statutes to operate on its subjects beyond the territorial limits of the UK. ... That there is such a presumption is not, I think, in doubt. It appears ... to have become stronger over the years.[66]

[66] *Al-Skeini) (R, oao) v Secretary of State for Defence* [2007] UKHL 26 followed in *KBR (R, oao) v Director of the Serious Fraud Office* [2021] UKSC 2 at [21]. Note that all the recent tax cases were cited in this non-tax case.

CHAPTER SEVENTEEN

THE REMITTANCE BASIS

17.1 Remittance basis: Introduction
17.2 History of remittance basis
17.3 HMRC guidance

Cross references

I deal with this subject in four chapters:
(1) This chapter considers:
    (a) who qualifies for the remittance basis
    (b) the remittance basis claim charge
(2) Chapter 18.1: what counts as a remittance
(3) Chapter 19.1: remittance reliefs
(4) Chapter 20.1: mixed funds

The remittance basis as it applies to particular anti-avoidance rules is discussed in the chapter on those rules; see

Topic	See para
s.624 remittance basis	47.8
s.720 remittance basis	49.26
s.731 remittance basis	50.39
s.87 remittance basis	61.19

The following topics are considered elsewhere:

Topic	See para
Life tenant remittance basis user	42.5
Dividends: Remittance basis	43.10.3
Interest under remittance basis	43.9.4

17.1 Remittance basis: Introduction

Income tax and CGT employ two types or bases of assessment:

Basis	Rule
Arising basis	Tax charged all income/gains
Remittance basis	Tax charged income/gains received in the UK

The remittance basis applies (in short) when a foreign domiciliary receives:
(1) Foreign income/gains
(2) Deemed income/gains under the settlor-interested trust code, the ToA provisions and s.87 TCGA.

I use the following self-explanatory terminology:
"ITA remittance basis": applicable from 2008/09 for all tax purposes
"Pre-2008 remittance basis": applicable until 2008/2009; there were different rules for different types of income/gain, so one might specifically refer to **"pre-2008 RFI/CGT remittance bases"**.

17.2 History of remittance basis

It is not necessary for a practitioner to know the history of the remittance basis, but it makes an interesting story.[1]

Until 1914 all foreign income was taxed on a remittance basis.[2] Since then the remittance basis has been withdrawn, in stages, except for foreign domiciliaries.

In 1914 income from "securities, stocks, shares, or rents in any place out of the UK" was brought onto an arising basis.[3] This did not apply to foreign domiciliaries and non-ordinarily residents. Even those who were domiciled and ordinarily resident in the UK retained the remittance basis for foreign source income other than income from securities and rents. Hence the litigation to decide whether trust income was to be regarded as income arising from securities or from the trust.[4]

In 1940 the general remittance basis was further restricted, to (a) income from offshore trades, professions or vocations, and (b) income from offshore offices, employments or pensions.[5]

The same rules applied to companies as to individuals, until the introduction of corporation tax in 1965, which put UK resident companies onto an arising basis.

In 1974 the general remittance basis was finally abolished.[6] One driver[7] of the reform was an aspect of the Lonrho scandal, in which Duncan Sandys (a cabinet minister) was found to have received director's remuneration amounting to £130k. The amount itself was thought to be outrageous, but for good measure the sum was received in the Cayman Islands, and (presumably) claimed to be (un)taxed on the remittance

[2] Section 100 Income Tax Act 1842.

[3] Section 5 FA 1914.

[4] See 42.9 (Life tenant: Source of Income).

[5] Section 19 FA 1940.

[6] Sections 22, 23 FA 1974.

[7] There may have been others. The exception was intended, perhaps, to encourage foreign trade. The pre-1974 law also allowed tax planning by splitting a single mixed UK and foreign based trade into separate UK and foreign source trades, the latter qualifying for the remittance basis. An arrangement of this kind was held to be successful in *Newstead v Frost* 53 TC 525.

basis.[8]

FA 2008 introduced the ITA remittance basis (new rules of what constituted a remittance) and the remittance basis claim charge.[9]

17.3 HMRC guidance

Most of the HMRC guidance is to be found in the vast RDR Manual.

The RDR Manual frequently makes its point by examples. In some cases the examples are straightforward and might have been better omitted in the interest of brevity.[10] In almost all cases the examples are padded out with irrelevant facts. I formerly thought that was intended, in the spirit of *Pooh-Bah*, "to give artistic verisimilitude to an otherwise bald narrative". But in fact the aim seems to be that the Manual should have a reading age of 11.[11] However that may be, this is an unhelpful method of explaining statutory provisions to grown-ups. The consequence is to make it quite unnecessarily difficult to identify the important points from the examples. I try to deal with this by editing or rewriting the example to identify the relevant point; I set the original text of the Manual in a footnote, so that the reader can see the source of what I have done.

The RDR Manual is updated from time to time, but no guidance can ever be up to date as long as tax reform continues at its present frenetic pace.

Earlier guidance was in the form of Q&As.[12] Most of the Q&As are superseded by the RDR Manual (published 2010) but some are still relevant.

17.4 "Foreign income and gains"

Section 809Z7(1) ITA provides:

> This section applies for the purposes of this Chapter [Chapter A1 Part 14, remittance basis].

[8] Whether the Inland Revenue accepted that claim is not in the public domain.

[9] See 1.9 (2008 reform: Assessment).

[10] But for the sake of completeness, and just in case some readers should find them helpful, I sometimes set them out.

[11] See App 1.9 ("Technical note").

[12] I refer to these as "**December 2008 Q&As**"; "**January 2009 Q&As**"; and "**March 2009 Q&As**". HMRC have removed the Q&As from their website but they are on
https://www.kessler.co.uk/wp-content/uploads/2012/07/December-2008-QandAs.pdf
https://www.kessler.co.uk/wp-content/uploads/2012/05/Jan2009QsAndAs.pdf
https://www.kessler.co.uk/wp-content/uploads/2012/07/March-2009-QandAs.pdf

So s.809Z7 gives chapter-wide definitions. In accordance with the principles of Plain English drafting, the Chapter contains occasional (strictly unnecessary) pointers to the definitions.[13]

Section 809Z7(2) ITA provides:

> An individual's "foreign income and gains" for a tax year are—
> (a) the individual's relevant foreign earnings for that year,
> (b) the individual's foreign specific employment income for that year,
> (c) the individual's relevant foreign income for that year, and
> (d) the individual's foreign chargeable gains for that year.

For the definition of RFI, see 16.9.2 ("Relevant foreign income").

17.4.1 *Relevant foreign earnings*

Section 809Z7(3) ITA provides the definition of RFE:

> An individual's "relevant foreign earnings" for a tax year are—
> (a) if the individual does not meet the requirement of section 26A of ITEPA 2003 [Overseas Workday Relief] for that year, the individual's chargeable overseas earnings[14] for that year, and
> (b) otherwise, the individual's general earnings within s.26(1) of ITEPA 2003 for that year (non-UK earnings).

17.4.2 *Foreign specific employment income*

Section 809Z7(4) ITA provides:

> An individual's "foreign specific employment income" for a tax year ("the relevant tax year") consists of the income (if any) within subsections (4A) and (4B).

These subsections concern (1) employment-related securities and (2) disguised remuneration:

> (4A) The income within this subsection is the individual's specific employment income for the relevant tax year so far as it consists of foreign securities income for the purposes of section 41F of ITEPA

[13] Eg s.809C(6) ITA: "See s.809Z7 for the meaning of an individual's foreign income and gains for a tax year".

[14] Section 809Z7(6) provides: "In subs.(3)(a) 'chargeable overseas earnings' has the same meaning as in s.22 of ITEPA 2003 (see s.23 of that Act)." See 34.14 (Chargeable overseas earnings).

> 2003.
> (4B) The income within this subsection is any income, or any part of any income, of the individual—
> (a) to which section 554Z9(2) or 554Z10(2) of ITEPA 2003 applies, and
> (b) which consists of the value of a relevant step, or a part of the value of a relevant step, which is "for" the relevant tax year as determined under section 554Z4 of ITEPA 2003.

These are specialist topics, not discussed in this book, though I hope to cover them in a future edition.

17.4.3 *Foreign chargeable gains*

Section 809Z7(5) ITA provides:

> An individual's "foreign chargeable gains" for a tax year are the chargeable gains accruing to the individual in that year on the disposal of foreign assets (within the meaning of Schedule 1 to TCGA 1992).[15]

TCGA formerly used the defined term "foreign chargeable gains" but this is not used after the 2019 CGT re-write, which now refers to gains on the disposal of foreign assets (defined as assets situated outside the UK). The reader may think the previous terminology was satisfactory; but there it is.

17.5 "Clean capital" and income/capital

A sum which can be received in the UK without a taxable remittance is referred to as **"clean capital"**; (the expression might be misunderstood, but I adopt this terminology as it is used in the RDR Manual[16] and FA 2017 refers to "cleansing").

The most common examples of clean capital are:

(1) Funds which are not income/gains: inheritance, borrowed money
(2) Income/gains not taxable in the UK: income/gains of an individual who is non-resident at the time that the income/gains arise
(3) UK source income/UK gains: the remittance basis only applies to foreign income/gains
(4) Foreign income/gains which have been remitted to the UK

A sum which is taxable if remitted may be described as foreign income/gains (sometimes abbreviated to FIG).

[15] See 56.17 (CGT remittance basis).
[16] See 20.2.3 (When are funds mixed); 20.6.8 (Example 2).

The conventional capital/income distinction is not applicable in the context of the remittance basis. One might describe items (2)-(4) in this list as income, but they are "clean capital". Conversely, suppose a remittance basis taxpayer accumulates income offshore for many years; the accumulated fund might be said to be their "capital" in the normal sense of the word.[17] Yet for the purposes of the remittance basis, it is taxable if remitted.

17.6 Remittance basis: Who qualifies

After the traditional overview, in accordance with the principles of plain English drafting,[18] s.809B, 809D and 809E ITA set out three categories of individuals to whom the remittance basis applies:

ITA	My term	Requirement (in outline)
s.809B	Remittance basis claimant	Remittance basis claim
s.809D	Sub-£2k taxpayer	Unremitted foreign income/gains under £2k
s.809E	Non-taxpayer	No UK income/gains & do not remit foreign income/gains

The advantages of being in one of the two de minimis categories are:

(1) No claim is needed, so the taxpayer may not need to submit a tax return.

(2) The remittance basis claim charge does not apply, personal allowances remain available,[19] and the individual is not forced to make a CGT loss election.[20]

I refer to the three groups together as "**remittance basis taxpayers**".

HMRC prefer the term "remittance basis user" (HMRC do not like to use the word "taxpayer"[21]). I did not originally favour this neologism: we

[17] This is self-evident, but if authority is needed, see *Walsh v Randall* 23 TC 55:

> "... the accumulated income which he had derived from the drawings of the firm of which he was a sleeping partner. I have no doubt that he had come to regard this sum of money as capital. It was invested savings and it was in that sense capital ... That, however, is not, for Income Tax purposes, the test. To the Crown the [unremitted] income of a person residing in the UK is, as I gather, always income until it is taxed."

[18] Section 809A ITA provides: "This Chapter provides for an alternative basis for charge in the case of individuals who are not domiciled in the UK".

[19] See 44.6 (Allowances: remittance basis user).

[20] See 65.16 (Loss of remittance basis taxpayer).

[21] See App.1.5 ("Customers" of HMRC). HMRC do occasionally lapse and use the expression "remittance basis taxpayer".

do not (or at least, formerly, did not) refer to an "arising basis user" or a "herd basis user". But language evolves, parliament used the term in 2012 (see table below), and it has now become familiar and no longer seems strange. I still prefer to refer to "remittance basis taxpayers"; except in headings, where space considerations override, but either term must be regarded as acceptable.[22]

Statute generally uses a clumsy formula. For a remittance basis taxpayer:

> If the individual is UK resident and one of sections 809B, 809D and 809E of ITA 2007 applies to the individual ...

For an arising basis taxpayer:

> If the individual is UK resident and none of sections 809B, 809D and 809E apply to the individual ...

Just occasionally one sees more transparent terminology:

Term	**Used in**	**Introduced**
Remittance basis user	s.809Y - 809Z10 ITA	2012
Individual to whom the remittance basis applies	Sch 1 TCGA	2019
Remittance-basis individual	s.8C TCGA	2019

All these expressions are defined.

17.7 Remittance-basis claim: s.809B

17.7.1 *Entitlement to claim*

Section 809B ITA provides:

> (1) This section applies to an individual for a tax year if the individual-
> (a) is UK resident in that year,
> (b) is not domiciled[23] in the UK for that year, and
> (c) makes a claim under this section for that year.

I refer to the claim as a **"remittance-basis claim"**.

17.7.2 *Is a claim worthwhile?*

A claim gives the advantages of the remittance basis but has the following

[22] See *https://en.wikipedia.org/wiki/Headlinese*

[23] Section 809B(1A) ITA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b)." This is the standard wording to apply the deemed domicile rules.

drawbacks:

(1) Loss of personal allowances:[24]
   - (a) CGT annual exemption
   - (b) IT personal allowance (only a concern for those with taxable income up to about £100k as otherwise there is no personal allowance to lose[25])

(2) The need to make a CGT loss election

(3) Remitted dividends taxed at a higher rate than dividends taxed on an arising basis

(4) For long-term residents: the remittance basis claim charge

The effect of the remittance basis claim charge is to withdraw the remittance basis from long-term residents except the most wealthy, since a claim is not likely to be worthwhile for individuals whose income is much less than £150,000 in the year in question, though the position varies a great deal from one case to another.

For short-term residents, ie those not subject to the remittance basis claim charge, a claim is likely to be worthwhile as long as they expect to have foreign income in excess of the IT personal allowance (if available).

17.7.3 *Minimising cost of claim*

Basic tax planning for spouses will be to arrange that foreign income/gains accrue only to one of them, so only one spouse has to pay the remittance basis claim charge.

Basic planning for individuals who do not wish to pay the remittance basis claim charge every year is to time disposals and accruals so far as possible that foreign income/gains accrue:

(1) before the 8th year of residence, and

(2) only once every few years subsequently (so a claim is only needed once every few years).

Indeed this may be worthwhile even in the first 8 years, in order to mitigate the other drawbacks of a remittance-basis claim.

This is possible as a claim can be made in one year but not in another year. In 2015 HMRC proposed that an election for the remittance basis should last for a minimum of 3 years. But the idea was dropped, sensibly,

[24] See 17.7.2 (Is a claim worthwhile?).

[25] See 44.5 (IT allowances: high earners). For completeness: in rare cases the allowance may be saved by a DTA: see 44.8.2 (Remittance basis claimants).

in the light of the 15-year deemed domicile rule.[26]

17.7.4 *Remit. basis claim: US taxpayer*

Bober states:

> Generally, the ability to claim double tax relief will mean that an adult US citizen (or green- card holder) who is a long-term UK resident will achieve a better overall tax result (meaning that less tax will be payable overall) by being subject to UK tax on the arising basis. This is because the individual will generally be subject to US tax on a worldwide basis anyway. For many, while UK tax rates are in excess of US tax rates, the additional UK tax that will be payable on the arising basis will not be in excess of the £30,000 RBC payable if the remittance basis claim is made. This will not always be the case, though, as:
>
> - the individual may have specific issues meaning that some of their foreign income or gains are sheltered from the US tax net, and/or
> - the individual might be sufficiently wealthy that the difference between the higher UK tax rates and the US tax rate will mean that paying the £30,000 is worthwhile.
>
> In addition, some US citizens (or green-card holders) may prefer to pay tax on the remittance basis in the UK rather than try to determine the UK tax treatment with respect to some of the offshore investments they have, and make the necessary disclosure. Since the US and the UK tax systems are different the fact that an individual has to submit a US tax return showing worldwide income and gains will not necessarily mean he or she is in a position to complete a UK return without incurring significant additional compliance costs. Paying the RBC will avoid the need for this work and may result in privacy gains.[27]

17.8 Remittance basis claim: Procedure

The standard claim procedure rules apply, except that is not necessary for a remittance-basis claim to be quantified (ie to specify the amount of

[26] HM Treasury, "Summary of responses on minimum claim period consultation" (July 2015) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/446552/Summary_of_responses_to_minimum_claim_period_consultation__July_2015_.pdf*

[27] Bober "The remittance basis charge – US issues" (2011) 9 TQR p.8 *https://www.step.org/step-journal/step-journal-january-2011/remittance-basis-charge-us-issues#:~:text=RBC%20is%20the%20name%20given,basis%20for%20the%20tax%20year*

unremitted foreign income/gains).[28]

A claim is made by ticking the relevant boxes in a tax return:

- Box 28 in form SA109 (Residence, remittance basis etc) 2022/23. The caption by this box reads: *If you are making a claim for the remittance basis for 2022–23, put 'X' in the box*
- Box 23 in form SA109 (2022/2023). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for 2022–23, put 'X' in the box. Please explain in box 40 [Any other information] how your domicile is relevant to your Income Tax or Capital Gains Tax liability*

Further information relating to domicile is then required in boxes 24-27.

- Box 8 in form SA100 (2022/23). The caption by this box states: *Were you, for all or part of the year to 5 April 2023, one or more of the following: not resident / not domiciled in the UK and claiming the remittance basis / dual resident in the UK and another country?*

17.9 Sub-£2k taxpayer: s.809D

Section 809D ITA provides:

> (1) This section applies to an individual for a tax year if-
> (a) the individual is UK resident for that year,
> (b) the individual is not [actually] domiciled[29] in the UK in that year, and
> (c) the individual's unremitted[30] foreign income and gains for that year are less than £2,000.
>
> unless condition A or condition B is met.
>
> (1A) Condition A is that conditions A to F in section 828B are met.[31]
>
> (1B) Condition B is that the individual gives notice in a return under section 8 of TMA 1970 that this section is not to apply in relation to the

[28] See 123.2.4 (Remittance-basis claims).

[29] The deemed domicile rules do not apply: see 5.3.1 (Scope of IT/CGT deemed-dom).

[30] Section 809D(2) provides a commonsense definition of "unremitted":

> "The amount of an individual's "unremitted" foreign income and gains for a tax year is—
> (a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus
> (b) the total amount of those income and gains that are remitted to the UK in that year."

[31] This relates to lower-paid employees see 34.42 (Lower-paid employee exemption). I do not understand the reason for condition A.

individual for that year.

Why should anyone wish to give a notice under s.809D(1B) ITA, and move from the remittance basis to the arising basis? The reason may be that the remittance basis (for modest incomes) involves too much trouble and expense: it may be more cost effective to pay tax on an arising basis. Another reason might be to facilitate double taxation relief.

17.9.1 *£2k limit in split year*

Foreign income arising in the overseas part of a split year is not subject to UK tax. However in considering whether the £2,000 threshold limit applies, the foreign income/gains for the entire tax year must be taken into account.

This is straightforward, but the RDR Manual gives an example to drive the point home:[32]

> **RDRM32120 Below £2,000 threshold users: Years of arrival and departure - interaction with ESC A11** [Jan 2019]
>
> ...
>
> *Example (Ferdinand)*
>
> F enters the UK on 20 October 2010, and is resident for the tax year 2010-11. He claims[33] split-year treatment under ESC A11.
>
> F's RFI is as follows:
>
> | | |
> |---|---|
> | 6 April to 19 October 2010 | £2,200 |
> | 20 October 2010 to 5 April 2011 | £1,300 |
> | Total | £3,500 |
>
> F remits £1,000 to the UK in that year.
>
> At the end of the year his total unremitted foreign income is £2,500.

The HMRC analysis is as follows:

> Even though F has claimed split-year treatment for 2010-11, he still has to include any foreign income that arose before he entered the UK.
>
> As F's unremitted foreign income is above the £2k threshold he cannot use the remittance basis under s809D. If he wishes to use the remittance basis he will need to claim under ITA07/s809B, and will lose his personal allowances and the annual exempt amount.

[32] I have slightly altered the wording of the example for enhanced clarity.

[33] It would be more accurate to say F "qualifies" for split-year treatment since the former concession A11 did not need a claim, and neither do the current split-year rules. But nothing turns on that.

The example needs to be updated, as the former ESC A11 was replaced by the statutory split year rules in 2013; but as far as the s.809D £2k threshold is concerned, the position remains the same.

In practice, F (if well advised) would not make a claim for the remittance basis but could save a few pounds of tax by remitting £1,500.01 to the UK instead of £1,000.

The same applies for chargeable gains and RDRM32130 sets out an example. But in practice it hardly matters.

17.9.2 *How to claim: s.809D*

There is no formal claim or election for s.809D to apply. However it is necessary to tick the relevant boxes in the tax return:

- Box 29 in the SA109 form (2022/23). The caption by the box reads: *If your unremitted income and capital gains for 2022–23 is less than £2,000, put 'X' in the box*
- Box 23 in the SA109 form (2022/23). The caption by this box reads: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for* 2022-23*, put 'X' in the box. Please explain in box 40 how your domicile is relevant to your Income Tax or Capital Gains Tax liability* (There are further relevant boxes if this is the first domicile claim.)
- Box 8 in the SA100 form (2022/23). The caption by this box reads: ***Residence, remittance basis etc.*** *Were you, for all or part of the year to 5 April 2023, one or more of the following – not resident, not domiciled in the UK and claiming the remittance basis, or dual resident in the UK and another country?*

17.9.3 *Concession: Sub-£2k taxpayer*

HMRC Brief 17/09 provides:

> **Remittance basis users whose foreign income and gains is less than £2,000**
> Individuals making use of section 809D are still taxable on any foreign income or gains remitted to the UK. ...
> It is recognised that some individuals, in particular those on low income, may make small cash remittances to the UK, out of foreign income or gains, and as a result have to complete a Self Assessment tax return possibly to pay only a small amount of tax. This is particularly the case where foreign tax has already been paid on the income or gains. Where an individual who is making use of section 809D remits less than a total of £500 in cash, which arises from foreign income or gains, into the UK

> during the tax year, then HMRC will accept that such an individual does not need to make a Self Assessment Tax return simply to pay the tax on those cash remittances. However where such an individual is required to complete a Self Assessment tax return for any other reason, or HMRC serves them with a notice to make a return, then they will need to include those remittances on the return and pay the tax due. This practice will apply for 2008-09 and subsequent years.

This is a concession (the word concession is not used, perhaps because HMRC are not now supposed to issue concessions). A concession which only applies if HMRC choose not to require an SA return is a new development in tax, and setting the limit at £500 is difficult to defend, but the manner of introduction of the concession precluded any possibility of debate on it.

17.9.4 *£2k limit: indexation*

The £2k limit has not changed since 2008.[34]

In 2011 HMRC rejected lobbying to increase the £2k limit:

> ... the Government will not look further at the following:
> *Simplification* Increasing the £2,000 de minimis limit to align with the income tax personal allowance
> *Government response* The Government considers that this would be likely to have a material Exchequer cost. It would also restore the income tax personal allowance and CGT Annual Exempt Amount to some individuals with a significant level of income or capital gains and the Government does not think that this can be justified.[35]

The paper does not mention that the decision not to increase the limit since 2008 amounts to a reduction in real terms. Lobbying continues.[36]

17.10 Non-taxpayer: s.809E

Section 809E(1) ITA provides:

[34] See 43.19 (Inflation/fiscal drag).

[35] HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (2011) para 2.127 *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

[36] Low Incomes Tax Reform Group, Response to (HMT) consultation document "Reforms to the taxation of non-domiciles" (2015) *http://www.litrg.org.uk/sites/default/files/files/151109-LITRG-response-non-dom-FINAL.pdf*

> This section applies to an individual for a tax year if—
> (a) the individual is UK resident for that year,
> (b) the individual is not domiciled[37] in the UK in that year,
> (c) for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.
> (d) no relevant income or gains are remitted to the UK in that year, and
> (e) either—
> (i) the individual has been UK resident in not more than 6 of the 9 tax years immediately preceding that year, or
> (ii) the individual is under 18 throughout that year.
> unless the individual gives notice in a return under s.8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

I refer to a person within s.809E as **"a non-taxpayer"**. Thus there are five requirements which must all be met. Requirements (a), (b) and (e) do not need comment.

17.10.1 *(Almost) no UK income/gains*

The requirement in s.809E(1)(c) ITA is:

> for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.

Section 809E(2) ITA provides a commonsense definition:

> For the purposes of subs.(1)(c) the individual's "UK income and gains" for the tax year are the individual's income and chargeable gains for that year other than what would (if this section applied) be the individual's foreign income and gains for that year.

HMRC say:

> (25.2) If a non-UK domiciled, UK resident individual has
> [1] total UK source savings income for the tax year of less than £1,000,[38] and/or
> [2] total UK source dividend income for the tax year of less than

[37] Section 809E(1A) ITA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b)." This is the standard wording to apply the deemed domicile rules.

[38] ie, the income qualifies for the savings nil rate; see 43.9 (Savings nil rate).

> £5,000,[39]
>
> can HMRC confirm that income be ignored for the purpose of the test at ss809E(1)(c) ITA?
>
> **Answer**
>
> (25.2) We can confirm that this income can be ignored for the purposes of S809E(1)(c) ITA.[40]

This is concessionary but sensible.

Section 809E(1)(c) ITA allows a paltry£100 "taxed investment income". This term is defined in s.809E(2A) ITA:

> For the purposes of subsection (1)(c) "taxed investment income" means UK income or gains consisting of payments within s.946 from which a sum representing income tax has been deducted.

Now that UK bank interest is generally paid gross, it no longer counts as taxed investment income, so a trivial amount of bank interest would, strictly, forfeit the statutory exemption. But in view of the HMRC practice above, this does not matter.

17.10.2 *No income/gains remitted*

The requirement in s.809E(1)(d) is:

> (d) no relevant income or gains are remitted to the UK in that year

Section 809E(3) ITA provides the definition:

> For the purposes of subs.(1)(d) "relevant" income and gains are—
>
> (a) what would (if this section applied) be the individual's foreign income and gains for the tax year mentioned in subs.(1), and
>
> (b) the individual's foreign income and gains for every other tax year for which s.809B or 809D or this section applies to the individual.

Para 85 sch 7 FA 2008 contains transitional provisions for pre-2008 income/gains:

> (1) In s.809E(3)(b) of ITA 2007, the reference to a tax year for which

[39] ie the income qualifies for the dividend nil rate. From 2018/19 the figure of £2,000 replaces the figure of £5,000. See 43.10.2 (Dividend nil rate).

[40] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

> s.809B, 809D or 809E of that Act applies to an individual includes a tax year (not later than the tax year 2007-08) in which the individual—
>
> (a) was UK resident, but
>
> (b) was not domiciled in the UK or was not ordinarily UK resident.
>
> (2) In relation to such a tax year, the reference there to the individual's foreign income and gains includes the individual's relevant foreign income if (and only if)—
>
> (a) the individual made a claim under s.831 of ITTOIA 2005 for the year, or
>
> (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the year.

Foreign income arising in the overseas part of a split year is not subject to UK tax. However in considering whether the s.809E exemption applies, the foreign income/gains for the entire tax year must be taken into account.

17.10.3 *Purpose of s.809E*

EN FB 2008 provides:

> Individuals entitled to claim the remittance basis who have no UK income or gains, and who don't remit any foreign income or gains, won't have to claim the remittance basis in years they are not liable to the RBC. This avoids them having to complete a self assessment return only so they can claim the remittance basis and then have no tax to pay.

There will not be many non-taxpayers within s.809E – mainly spouses accompanying their partners, children and some students, perhaps.

17.11 Time of foreign domicile

Section 809B(1) ITA requires (in short) that the foreign domiciliary is not domiciled in the UK in the year that the income arises.

It is an interesting question what is the position if a person changes domicile during a year.

17.12 Remittance basis claim charge

17.12.1 *7 & 12-year residence tests*

Section 809H(1) ITA provides:

> This section applies if—
>
> (a) s.809B (claim for remittance basis to apply) applies to an

individual for a tax year ("the relevant tax year"),

(b) the individual is aged 18 or over in the relevant tax year, and

(c) the individual meets the 12-year residence test or the 7-year residence test for the relevant tax year.

That takes us to s.809C ITA which provides:

> (1A) An individual meets the 12-year residence test for a tax year if the individual–
>
> (b)[41] has been UK resident in at least 12 of the 14 tax years immediately preceding that year.
>
> (1B) An individual meets the 7-year residence test for a tax year if the individual–
>
> (a) does not meet the 12-year residence test for that year, but
>
> (b) has been UK resident in at least 7 of the 9 tax years immediately preceding that year.

In the following discussion:

(1) The tests are the **"7/12 year residence tests"**

(2) Adopting the statutory terminology, individuals who meet the 7/12 year residence tests are "**long-term residents**".

The period of residence might be continuous or broken.

While an individual is under 18:

(1) they are not subject to the remittance basis charge; but

(2) any UK resident years do count for the 7/12 year residence tests.

In the year a long-term resident attains 18, the charge is payable in full. The RDR Manual provides a straightforward example of a case involving a minor.[42]

[41] Para (a) has been deleted.

[42] **RDRM32230 Counting years of UK residence - Minors** [Mar 2022]

> ...
>
> *Example (Pranav)*
>
> "P was born on 23 October 1991. He came to the UK as a school boarder in August 2001 (tax year 01-02). He is domiciled outside the UK. He has stayed in education in the UK for every tax year since.
>
> 99-00 Not Resident
> 00-01 Not Resident
> 01-02 Resident
> 02-03 Resident
> 03-04 Resident
> 04-05 Resident
> 05-06 Resident
> 06-07 Resident
> 07-08 Resident
> 08-09 Resident
> 09-10 Resident

A split year counts as a full year of residence in determining whether an individual meets the 7/12 year residence tests.[43] The RDR Manual offers a straightforward example of a case involving a split year.[44]

> In 08-09 P has foreign income of £300,000 and he claims to use the remittance basis in that year. He is a long-term resident in the UK as he has been UK resident for eight years, but as he is under 18 he may use the remittance basis in 08-09 without paying the remittance basis charge.
>
> In October 2009 (tax year 2009-10) P turns 18. He has foreign income of £400,000. If he wishes to claim the remittance basis for that tax year he will be liable to the remittance basis charge."

The (implausibly large) income specified is of course strictly irrelevant to the application of the remittance basis charge: the position is the same whatever is P's income.

[43] See 10.1 (Residence throughout tax year).

[44] **RDRM32220 Counting years of UK residence (seven out of nine)** [May 2022]

> ... *Example (Ralph)*
>
> R, a non-dom, is resident in the UK for the tax year 2019-2020.
>
> R came to the UK on 10 May 2006 (2006-2007 tax year)
>
> He left to live in Spain on 2 January 2008 (2007-2008 tax year)
>
> He returned to the UK on 12 October 2010 (2010-2011 tax year)
>
> He left to work in the Republic of Ireland on 29 April 2012 (2012-2013 tax year)
>
> He then returned to the UK on 16 May 2014 (2014-2015 tax year) and has been resident here since
>
> R is tax resident in the UK for the current tax year (2019-2020). He has chargeable overseas earnings of £150,000 in that year, paid into his Spanish bank account and he does not remit anything. For the last 14 tax years he has been resident/not resident as follows:

Count	Year	Residence status
1	2005-2006	Non-resident as did not come to the UK until 10 May 2006
2	2006-2007	Resident
3	2007-2008	Resident (the year he went to Spain)
4	2008-2009	Non-resident
5	2009-2010	Non-resident
6	2010-2011	Resident
7	2011-2012	Resident
8	2012-2013	Resident (the year he went to Ireland)
9	2013-2014	Non-resident
10	2014-2015	Resident
11	2015-2016	Resident
12	2016-2017	Resident
13	2017-2018	Resident
14	2018-2019	Resident

> Having calculated the number of years he has been resident in the UK R determines that in 2019-2020 he has not been resident in 12 out of the previous 14 tax years; so,

It may be useful to set out an aide memoire for when the 7/12 year tests begin to apply. Assuming a continuous period of UK residence:

UK residence from	**7-year test met**	**12-year test met**
2008/09	2015/16	2020/21
2009/10	2016/17	2021/22
2010/11	2017/18	2022/23
2011/12	2018/19	2023/24
2012/13	2019/20	2024/25
2013/14	2020/21	2025/26
2014/15	2021/22	2026/27
2015/16	2022/23	2027/28
2016/17	2023/24	2028/29
2017/18	2024/25	2029/30
2018/19	2025/26	2030/31
2019/20	2026/27	2031/32
2020/21	2027/28	2032/33
2021/22	2028/29	2033/34
2022/23	2029/30	2034/35

A 17-year residence test (and £90k remittance basis charge) was introduced in 2015, but lasted only 2 years as it was made redundant by the introduction of the 15-year deemed domicile rule in 2017. I previously discussed some policy considerations here,[45] but omit that now as the point is of historical interest only.

In *Radice v HMRC*[46] the taxpayer's advisers ticked the box in the 2015/16 tax return stating that he had been UK resident for 12 or more of the preceding 14 tax years. However, they should have ticked the box indicating that he was resident in the UK for 17 out of 20 tax years. Also, the date of entry to the UK in box 27 of the return was not completed. Accordingly, Mr Radice paid a remittance basis charge of £60k instead of £90k. But he had not been careless (and so was not subject to a penalty):

> In a situation such as this, it is the action of a reasonable and prudent taxpayer to obtain advice on the basis for and computation of charges to

if he claims the remittance basis in 2019-2020, he will not be liable to the higher remittance basis charge of £60,000. He has however been resident in 7 of the previous 9 tax years, so would have to pay the lower remittance basis charge of £30,000.

[45] See the 2018/19 edition of this work, para 11.12 (Remittance Basis Charge).

[46] [2021] UKFTT 227 (TC) at [18].

> tax under the complex "remittance" rules applicable to non-UK domiciled person and, accordingly, it is reasonable for the taxpayer to rely on that advice. In the context of this understandable and good sense reliance and the difficulties for taxpayers in understanding and keeping up to date with such rules, we do not consider that Mr Radice was careless in failing to spot that an error had been made in his return which lead to an underpayment of tax. ... Mr Radice reviewed the return. He would have seen the statement in box 31 that he had been resident for 12 out of the last 14 tax years which, on its own terms, was correct. We do not consider that he could reasonably have been expected to realise that other boxes in that section of his return needed to be filled in (or what the significance of the information required in the other boxes is) when his advisers, on whom he reasonably relied, had selected box 31 and he knew that the information in it was correct.

But SA109 box 23.3 (2022/23) now requires the taxpayer to enter "the number of years you've been resident in the UK in the previous 20 years", so this particular mistake is not likely to recur.

17.12.2 *Duty to nominate income/gains*

Section 809C(1) ITA provides:

> This section applies to an individual for a tax year if the individual-
> (a) is aged 18 or over in that year, and
> (b) meets the 12-year residence test or the 7-year residence test for that year.

Assuming this condition is met, we move on. Section 809C(1) ITA provides:

> A claim under s.809B by the individual for that year must contain a nomination of the income or chargeable gains of the individual for that year to which s.809H(2) is to apply.

Following the statutory terminology,[47] I refer to the income/gains so nominated as "**nominated income/gains**".

Section 809C(3) ITA provides:

[47] Section 809H(3) ITA provides: "'Nominated' income or chargeable gains means income or chargeable gains nominated under s.809C in the individual's claim under s.809C for the relevant tax year." The definition is repeated in s.809I(3) and s.809J(3) ITA. (If a chapter-wide definition had been used the repetition would have been unnecessary.)

> The income or chargeable gains nominated must be part (or all) of the individual's foreign income and gains for that year.

The legislation does not say what happens if an individual fails to nominate any income/gains but one can infer that the remittance basis claim is invalid. HMRC agree. The RDR Manual provides:

> **RDRM32310 Nomination of foreign income and gains - overview** [Jan 2019]
> The individual may nominate either foreign income or foreign chargeable gains or a combination of the two. Both the claim and the nomination should be viewed as component parts of the same claims process and should not be separated. Any claim that does not include a nomination is not valid.

17.12.3 *How to nominate*

The RDR Manual provides:

> **RDRM32380 Completing the SA Return - How is this done in practice?** [Jan 2019]
> SA109 'Residence, remittance basis etc' is the supplementary page to the SA100 main tax return for remittance basis users to complete under Self Assessment.
> There is a box to claim the remittance basis on the SA109 and two boxes where the 'amount of nominated income' and the 'amount of nominated capital gains' must be entered. The amount nominated can be either income or gains or a combination of the two. The source(s) of the amount nominated is the individual's personal choice.
> When either or both of these boxes are completed the SA109 notes say that details of the nominations are to be shown in the "Any other information" box.
> The required information is:
>
> - the precise amounts of income and gains that have been nominated, (this should include the country of origin and the type and source of the income)
> - the computation of the gain (if applicable)
> - the exchange rates used[48]

[48] See 95.8 (Nominated income/gains: Currency conversion date).

- the calculation of the tax due in relation to the nominated income and gains.

Also if there have been deductions for expenses or losses from either foreign income or foreign gains in arriving at the final taxable amount, full details of the amounts and nature of those expenses or losses must also be provided.

All of this information is required to validate the nomination or nominations that have been made.

March 2009 Q&As provides:

> **Q3:** HMRC have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of "tainting" every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?
>
> **A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the "nominated" account. That might be the entire account number, or the account "name", or some other unique identifying feature of the account.

17.12.4 *Cap on nominated income/gains*

Section 809C(4) ITA provides:

> The income and chargeable gains nominated must be such that the relevant tax increase does not exceed
>
> (a) for an individual who meets the 12-year residence test for that year, £60,000;
>
> (b) for an individual who meets the 7-year residence test for that year, £30,000.

Section 809C(5) ITA provides a commonsense definition of "the relevant tax increase":

> "The relevant tax increase" is-
> (a) the total amount of income tax and capital gains tax payable by the individual for that year, minus
> (b) the total amount of income tax and capital gains tax that would be payable by the individual for that year apart from s.809H(2).

EN Amendments to the Remittance Basis Charge explains the reason for the cap in s.809C(4):

> This stops an individual from nominating too much income and gains and as a result paying a remittance basis charge of more than £30,000 [now the applicable amount].

The legislation does not say what happens if an individual nominates too much income/gains so the relevant tax increase exceeds the applicable amount. Perhaps the nomination is scaled back proportionately.

17.12.5 *HMRC example*

The following example from the RDR Manual shows how complicated this can be:

> **RDRM32350 Relevant tax increase - Example 2** [Apr 2019]
> Relevant tax increase: Example 2 (Lorna)
> L, a non domiciled long-term UK resident makes a claim to use the remittance basis in 2011 and must pay the £30,000 remittance basis charge (RBC). She is a higher rate taxpayer paying tax at 40%, with UK source employment income of £80,000.
> She also has £150,000 of interest (relevant foreign income) from an overseas investment in Country X paid to her.
> Because nominated income is taxed on the "arising basis", a remittance basis user is in the same position as any other UK resident person and is, subject to the ordinary rules that apply in such cases (s.18 TIOPA 2010), entitled to credit against UK tax for certain amounts of overseas tax that is payable on that same income.
> Under the domestic law of Country X in which the investment was made, the interest was paid after deduction of 15% withholding tax. The Double Taxation Agreement between the UK and Country X provides that tax on this interest may be retained in the "source" country at the rate of 15%.
> L is therefore entitled to a credit, which she takes in the form of foreign tax credit relief (FTCR), against UK tax for the tax withheld in the other country. ...
>
> *Foreign tax credit relief calculation – general principles*
> Ignoring the remittance basis issue for the moment:
> L has received foreign interest of £150,000, on which Country X's tax of

£22,500 (15% as provided for in the DT treaty) has been deducted.
L's income is chargeable to tax at 40%. The UK tax charge is respect of this £150,000 would be £60,000 (40%×£150,000).
If she claims foreign tax credit relief her net liability to UK tax after the foreign tax credit relief will be:
£60,000 minus £22,500 = £37,500

Relevant tax increase including FTCR
Foreign tax credit relief is only due to the extent that the foreign income on which it is given is brought into the UK tax charge. So for remittance basis users, relief for foreign tax paid on foreign income chargeable on the remittance basis is given when that income is remitted.
However for remittance basis charge payers like L, any foreign income which she nominates is chargeable on the arising basis so foreign tax credit relief can be given in relation to that nominated income.
Because the "relevant tax increase" must be £30,000, L will need to nominate £120,000 of her foreign interest if she wishes to create an overall remittance basis charge of £30,000.

FTCR calculation

Foreign tax that relates to the £120,000 nominated (at 15%)	−£18,000
UK tax on £120,000 (at 40%)	£48,000
Net liability to UK tax after the FTCR (£48,000 minus £18,000)	£30,000
	(refer to note 2 below)

Relevant tax increase calculation
To determine the relevant tax increase we must complete two calculations.
The first calculation (a) is of the total amount of L's income tax and capital gains tax actually payable in the year, as a remittance basis user and RBC payer.
The second calculation (b) is the total amount of L's income tax and capital gains tax that would be payable by L in the year as a remittance basis user less the tax charged on the nominated foreign income or foreign gains.
The relevant tax increase is the total of calculation (a) minus calculation (b)

			Calculation (a)			Calculation (b)
Non-savings income						
20%[1] on	£34,800	=	£6,960	£34,800	=	£6,960
40% on	£45,200	=	£18,080	£458,135	=	£18,080
	£80,000		£25,040	£40,000		£25,040
Savings						
40% on	£120,000[2]	=	£30,000	Note 4		
Total Income Tax Due			£55,040[3]			£25,040[4]

Notes

[1] Rates and thresholds used here for the purposes of this example only; use the rates applying in the relevant tax year.

[2] This is the foreign income that is nominated, and charged to tax on the arising basis in the year. FTCR is given, which has reduced the tax to £30,000.

[3] As a remittance basis user, L has no personal allowances due.

[4] L is a remittance basis user so would not be subject to tax on her unremitted foreign income, nor would any FTCR be due.

Relevant Tax Increase is	Total (a)		£55,040
less	Total (b)		£25,040
		Total	£30,000

17.12.6 *Charge on nominated income*

Section 809H(2) ITA provides:

> Income tax is charged on nominated income, and capital gains tax is charged on nominated chargeable gains, as if s.809B did not apply to the individual for the relevant tax year (and neither did s.809D).

This disapplies the remittance basis, so nominated income/gains are taxed on the arising basis. I refer to this as the "**nominated income charge**". (The label is not wholly apt, as the charge may be on nominated gains, but "nominated income/gains charge" is a clumsy expression.)

EN FB 2008 provides:

> 14. This charge is in addition to the tax liability for the year in question on any income and gains remitted to the UK, and any UK income or gains taxed on the arising basis. The £30,000 [now the applicable amount] will be paid on nominated income and gains not remitted to the UK in the year. (These income and gains are called "nominated" income and gains because the taxpayer is free to nominate the income and gains not remitted to the UK in the year on which tax of £30,000 is payable. For example, this could be £75,000 of unremitted foreign deposit interest on which UK tax was due at 40 per cent, so leading to an income tax charge of £30,000.)

17.12.7 *Deficit charge*

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax for various reasons. The individual might under-nominate, ie, they might not nominate enough income/gains. There is no requirement to nominate enough to give rise to a IT or CGT charge of the applicable amount. Indeed, it is not always possible to know how much that would be. One could nominate just £1, as long as what is nominated is foreign income/gains. HMRC agree. The RDR Manual provides:

> **RDRM32320 Making a Nomination** [Jan 2019]
> *Insufficient nomination*
> Although an individual may choose to make an insufficient nomination RDRM32360 they must have foreign income and/or foreign chargeable gains from the tax year such that they can nominate something, even if only £1. This fulfils the mandatory requirement that a nomination **must** be made when making the claim.
> *Completing the self-assessment return*
> All claims and nominations are made on the individual's self assessment tax return. The minimum amount that can be nominated **is** £1 of foreign income or gains for the claim to be valid. Where a claim to the remittance basis is made under s809B but no nomination of either foreign income or capital gains is made the claim is invalid. ...[49]

According to EN Amendments to the Remittance Basis Charge, this was done to enhance confidentiality:

> 7. The legislation provides the option for those who can claim the remittance basis not to disclose anything about their unremitted income or gains as they can make a claim with a nominal £1 amount and do not have to specify what further foreign income or gains remain unremitted.

But it may not be in the interest of the taxpayer to under-nominate, and the confidentiality is limited because HMRC are entitled to make further enquiries to check a taxpayer's tax position.

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax where the individual has some tax reliefs (eg loss relief, interest relief, DTRs, etc).

Section 809H(4) ITA goes on to ensure that HMRC will receive their desired amount of tax:

> If the relevant tax increase would otherwise be less than the applicable

[49] Similarly March 2009 Q&As provides:

> "**Q7:** The question has arisen whether less than £1 (ie pence) can be nominated income. Given current interest rates there is concern that accounts specifically set up to generate nominated income may not generate £1 before 6 April 2009. The concern expressed is that because pence are rounded down on tax returns, it might be your view that there is no nominated income?
> **A:** The minimum nomination of income or gains required to calculate the relevant tax increase is £1. This is the minimum figure to be declared on the relevant supplementary page of the Tax Return."

But where is the statutory authority for HMRC to disregard figures under £1?

> amount,[50] subsection (2) has effect as if—
>
> (a) in addition to the income and gains actually nominated under s.809C in the individual's claim under s.809B for the relevant tax year, an amount of income had been nominated so as to make the relevant tax increase[51] equal to the applicable amount, and
>
> (b) the individual's income for that year were such that such a nomination could have been made (if that is not the case).

I refer to s.809H(4) as the "**deficit charge**". The deficit charge is a tax on deemed income (deemed nominated income) and not on any actual income of the taxpayer (if indeed the taxpayer has other income). Section 809H(6) ITA makes this clear (if necessary):

> Nothing in subs.(4) affects what is regarded, for the purposes of s.809I or 809J, as nominated under s.809C.

I use the term "**remittance basis claim charge**" to mean the two distinct (albeit related) charges:

Charge	**Section**	**See para**
Nominated income charge	s.809H(2)	17.12.6
Deficit charge	s.809H(4)	*Discussed here*

It might be more accurate to refer to remittance basis claim *charges* (in the plural). However for many purposes it does not matter that there may be two charges rather than one, (especially since in practice the second

[50] Section 809H(5B) ITA provides: "The applicable amount" is–
(a) if the individual meets the 12-year residence test for the relevant tax year, £60,000;
(b) if the individual meets the 7-year residence test for the relevant tax year, £30,000.

[51] Section 809H(5)(5B) ITA repeats the definition of "the relevant tax increase" from s.809C(5) (5A):
"'The relevant tax increase' is—
(a) the total amount of income tax and capital gains tax payable by the individual for the relevant tax year, minus
(b) the total amount of income tax and capital gains tax that would be payable by the individual for the relevant tax year apart from subsection (2).
(5A) The references to income tax in subsection (5) do not include income tax under s.424 (gift aid)."
If there had been a chapter-wide definition the repetition would have been unnecessary.

may not often arise) and it is convenient to use the singular label for them both.

17.12.8 *Interaction with Gift Aid*

Tax paid under the remittance basis deficit charge may be used to frank a gift aid payment. The RDR Manual provides:

> **RDRM32450. Charitable Donations and Gift Aid** [Nov 2015]
> Chapter 2 of Part 8 ITA 2007 provides relief from tax for some gifts of money to charities that are made by individuals. This is known as 'Gift Aid'. One part of the Gift Aid rules is that the donor must pay at least as much UK income tax and/or capital gains tax in the tax year as the amount that is repayable to the charity...
> **The Remittance Basis Charge**
> In exactly the same way as any other amount of income tax or capital gains tax, amounts of tax that are paid to satisfy the Remittance Basis Charge can be used to frank Gift Aid donations. That is because the remittance basis charge is 'income tax charged' or 'capital gains tax charged' on nominated income and/or gains [for the purposes of s.424(2) ITA]. ...

Tax paid under s.424 ITA does not count towards the remittance basis claim charge. Section 809H(5A) ITA provides:

> The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).

The RDR Manual provides:

> **RDRM32450. Charitable Donations and Gift Aid** [Jan 2019]
> ...
> - Section 414(2)(a) ITA 2007 treats a qualifying donation as if it had been made after deduction of basic rate income tax.
> - If the donor has not paid enough UK income tax and capital gains tax to 'frank' the gift aid donations in a tax year, a further amount of income tax is charged to make up the shortfall (s.424 ITA 2007).
>
> ... However, where the individual has:
> - chosen to use the remittance basis, and
> - claimed Gift Aid tax relief
>
> any income tax that is charged under s. 424 ITA 2007 is not taken into account when calculating the 'relevant tax increase' (see RDRM32330) that is required to produce the remittance basis charge (s.809C(5A) ITA 2007 and s.809H(5A)).

> **Effect**
> No matter how it is calculated, the Remittance Basis Charge is always £30,000 [or, in certain circumstances, from 6 April 2012, £50,000] – see RDRM32300.

For s.424 ITA, see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 15.44 (Tax to cover Gift Aid).[52]

17.12.9 *How much to nominate?*

It is important not to remit nominated funds to the UK. From that point of view it is convenient to under-nominate, ie nominate a nominal £1 only.

On the other hand, taxpayers who want to offset the remittance basis charge against foreign tax will want to nominate income/gains on which the foreign tax is at least equal to the applicable amount, or as close to the figure as possible; that requires a full nomination and some care in the choice of income/gains which are nominated.

17.12.10 *Claim if residence in doubt*

A person may be unsure whether or not they are UK resident in a year but know that they would be a long-term resident if they are UK resident in that year. That person may if appropriate make a remittance-basis claim in that year, for the avoidance of doubt, and argue the residence position at leisure; if they are eventually held to be UK resident the remittance basis claim charge is due, but if non-resident the sum is not due. Nothing is lost by making the claim.[53] Section 809B does not apply unless the individual meets the conditions of s.809B(1)(a) and (b) in the year.

Alternatively a person may know that they are UK resident in a year but not know if they are a long-term UK resident in that year (because they are unsure whether they were resident in earlier years). That person should make a remittance-basis claim but not nominate any income/gains. The claim is valid if they are not long-term UK resident. The claim is invalid if they are long-term UK resident, so the remittance basis claim charge is not due (unless they proceed to make a new election and

[52] Online version *https://www.taxationofcharities.co.uk*

[53] Similar points arise if a person is unsure about their domicile in a year, but in practice that would be less common because domicile is generally ascertainable.

nomination).

On the other hand a remittance-basis claim is effective (and the remittance basis charge payable) even if the individual has less than £2k unremitted income/gains, and so would qualify as a sub-£2k taxpayer. That may be an expensive box to tick in error!

17.12.11 *Claim charge: Foreign tax credit*

EN FB 2008 provides:

> 17. As the RBC consists of income tax or CGT paid on the arising basis ... the tax should be recognised as tax (on income or capital gains, as the case may be) for the purposes of our double taxation agreements.

The proposal in the Draft Clauses published January 2008 was for a simple charge of a fixed amount. This would not have qualified as a credit against foreign tax because it was not a tax on income or gains. HMRC presumably agreed, as the provisions were then recast in order that:

(1) The provisions took the form (so far as possible) of a charge on income or gains but
(2) the provisions had the effect (so far as possible) of a fixed charge.[54]

Article 24(1) UK/USA DTA provides:

> In accordance with the provisions and subject to the limitations of the law of the United States (as it may be amended from time to time without changing the general principle hereof), the United States shall allow to a resident or citizen of the United States as a credit against the United States tax on income
>
> (a) the income tax paid or accrued to the UK by or on behalf of such citizen or resident ...

It is suggested that the *nominated income/gains charge* can in principle be set against foreign tax since it is an income tax or CGT. However the remittance basis *deficit* charge is not a charge on actual income, and cannot be set against foreign tax. HMRC agree. EN Amendments to the Remittance Basis Charge provides:

> 16. The individual claiming the remittance basis might decide to nominate only £50,000 of bank interest under s.[809C(2)] and pay

[54] See too 17.12.13 (Claim charge: Split year).

> £20,000 of the £30,000 under s.[809H(2)] (assuming higher rate tax is due on all the £50,000). Section [809H(4)] would then apply with the effect that further income of £25,000 is treated as nominated to bring a further £10,000 of income tax into charge. However if the individual intended claiming credit for all or part of the £30,000 under a DTA then DTA relief will only be due on the income or gains actually nominated under s.[809C(2)] – £50,000 of income and £20,000 of income tax in this example. The income tax paid on income treated as nominated under s.[809H(4)] = £25,000 of income and £10,000 of income tax in this example, will not qualify for relief under DTAs as it is not tax on specific nominated income.

It follows that a careful choice of what income/gains to nominate is important, because (if foreign tax allows credit for the UK tax) that can make up to £90k difference to the foreign tax liability.

The RBC might have been regarded as a fixed levy, merely disguised as an income tax by sleight of hand, but in America, the IRS have after some delay[55] accepted the HMRC view. The question is of course one for foreign law, not UK law. The US ruling made August 2011 provides:

Rev. Rul. 2011-19
ISSUE
Whether a credit is allowable under section 901 of the Internal Revenue Code for the Remittance Basis Charge (RBC) of £30,000.[56]
[The ruling outlined the UK tax rules and continues]
LAW AND ANALYSIS
Section 901 generally allows a credit for the amount of any income, war profits and excess profits tax (collectively, an income tax) paid or accrued during the taxable year to any foreign country or to any possession of the United States. A foreign levy is an income tax if and only if (i) it is a tax and (ii) the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1).
A. Single Levy or Separate Levies
Each levy must be analysed separately to determine if it is an income tax under section 901. §1.901-2(d)(1). For purposes of section 901, whether a single levy or separate levies are imposed by a foreign country depends on US principles and not on whether foreign law imposes the levy or levies in a single or separate statutes. Where the base of a levy is different in kind, and not merely in degree, for different classes of persons subject to

[55] One would like to know what discussions took place behind the publication of this statement. Perhaps in 2041 the relevant files will be made public.
For HMRC's opening shot in this debate see BN 107 [2008] STI (20 March 2008) annex

[56] Author's footnote: The increase in the remittance basis charge in 2012 will not affect the reasoning.

the levy, the levy is considered for purposes of section 901 to impose separate levies for such classes of persons. For example, regardless of whether they are contained in a single or separate foreign statutes, a foreign levy identical to the tax imposed under section 871(b) on a US nonresident alien individual's income that is effectively connected with the conduct of a US trade or business is a separate levy from a foreign levy identical to the tax imposed by section 1 on the income of a US citizen or resident, as the tax on nonresidents has a more limited scope and therefore is different in kind from the tax on the worldwide income of US citizens and residents.

Where foreign law imposes a levy that is the sum of two or more separately computed amounts, and each such amount is computed by reference to a separate base, separate levies are considered, for purposes of section 901, to be imposed. Amounts are not separately computed if they are computed separately merely for purposes of a preliminary computation and are then combined as a single base. §1.901-2(d)(1). For example, where excess deductible expenses allocated to one type of income are applied to reduce other types of income, a single levy exists, since despite a separate preliminary computation the bases are combined before computing the tax due. See §1.901-2(d)(3), Examples (3), (4), and (5).

1. The Remittance Basis and the Arising Basis of Taxation Are Separate Levies

Under both the arising basis and the remittance basis of taxation, a non-domiciliary is subject to tax on UK-source and non-UK-source income and gains. However, under the arising basis, a non-domiciliary is subject to tax on worldwide income and gains that arise or accrue in a particular taxable year; while under the remittance basis, a non-domiciliary is subject to tax only on UK-source income and gains and on non-UK-source income or gains that are remitted in a particular taxable year, whether the non-UK-source income or gains arise or accrue in the year remitted or in an earlier year. Thus, the bases of these levies are different in kind, and not merely in degree; therefore, the arising basis and remittance basis of taxation are considered for purposes of section 901 to impose separate levies.

2. The RBC, in Combination with the Remittance Basis of Taxation, is a Single Levy that is a Separate Levy

All non-domiciliaries who elect the remittance basis of taxation are subject to tax on their UK-source and remitted non-UK-source income and gains. In addition, long-term non-domiciliaries must pay the RBC on nominated but unremitted non-UK-source income and gains (and, if the amount nominated generates a tax charge of less than £30,000, on income or gains realized but not nominated and on imputed income such that the tax charge equals £30,000). Losses and deductions allocated to UK-source income or gains, remitted non-UK-source income or gains, or nominated but unremitted non-UK-source income or gains may offset income or gains in another category in determining the amount of the long-term non-domiciliary's taxable income. Therefore, under §1.901-2(d)(1), despite a separate preliminary computation, the long-term non-domiciliary's UK-source income or gains, remitted non-UK-source income or gains, and unremitted non-UK-source income or gains giving rise to the RBC are combined in determining the long-term non-domiciliary's taxable income; therefore, the tax imposed on the sum of the long-term non-domiciliary's three separately computed amounts of income constitute a single levy (the Long-Term Non-Domiciliary (LTND) Levy).

A. The LTND Levy Is a Tax in the US Sense

A foreign levy is an income tax if and only if it is a tax and the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1). A foreign levy is a tax if it requires a compulsory payment pursuant to the authority of a foreign country to levy taxes. §1.901-2(a)(2)(i). The LTND Levy is a tax because it is required to be paid pursuant to the authority of the government of the UK to levy taxes.

A. The Predominant Character of the LTND Levy Is that of an Income Tax in the US Sense

The predominant character of a foreign tax is that of an income tax in the US sense if the tax is likely to reach net gain in the normal circumstances in which it applies, and liability for the tax is not dependent, by its terms or otherwise, on the availability of a credit for the tax against income tax liability to another country. §1.9012(a)(3). Liability for the LTND Levy is not dependent on the availability of a credit for the LTND Levy against income tax liability to another country.

Thus, whether the LTND Levy has the predominant character of an income tax depends on whether it is likely to reach net gain in the normal circumstances in which it applies. A foreign tax is likely to reach net gain in the normal circumstances in which it applies if and only if the tax, judged on the basis of its predominant character, satisfies each of the realization, gross receipts, and net income requirements set forth in §1.9012(b)(2), (b)(3), and (b)(4), respectively.

1. Realization

A foreign tax satisfies the realization requirement if, judged on the basis of its predominant character, it is imposed upon or subsequent to the occurrence of events that would result in the realization of income under the income tax provisions of the Code. §1.901-2(b)(2)(i)(A). A foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization or pre-realization events described in §1.901-2(b)(2)(i) satisfies the realization requirement even if it is also imposed in some situations upon the occurrence of events not described in that paragraph. For example, a foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization events satisfies the realization requirement even though the base of that tax also includes imputed rental income from a personal residence used by the owner. §1.901-2(b)(2)(i).

The UK-source and remitted non-UK-source income and gains of a long-term non-domiciliary electing the remittance basis of taxation generally are computed on the basis of amounts that satisfy the realization requirement. In addition, the income or gains nominated for purposes of the RBC must be part (or all) of the non-UK-source income and gains arising or accruing in that taxable year. Income tax is charged on nominated income, and capital gains tax is charged on nominated gains, as if the arising basis applied for the relevant taxable year. In other words, the nominated income and gains are subject to tax, even though they have not been remitted in the taxable year. Thus, the RBC is imposed on nominated income or nominated gains that have been realized or accrued in the taxable year.

If the long-term non-domiciliary realizes or accrues, but fails to nominate, sufficient income or gains, with the result that the tax charge on nominated income would be less than £30,000, an amount of income or gains is deemed to be nominated so as to make the tax charge equal £30,000. Thus, income or gains that have been realized or accrued but not nominated will be subject to the RBC. If a long-term non-domiciliary elects the remittance basis but does not have sufficient realized or accrued income or gains to make the tax charge equal £30,000, the long-term non-domiciliary is deemed to have sufficient realized or accrued income or gains and to have nominated such imputed income or gains to make the tax charge equal £30,000.

Section 1.901-2(b)(2)(i) states that, as provided in §1.901-2(a)(1), a tax either is or is not an income tax, in its entirety, for all persons subject to the tax; therefore, a foreign tax on a base that includes imputed rental income will satisfy the realization requirement even though some persons subject to the tax will on some occasions not be subject to the tax except with respect to such imputed income. However, a foreign tax based only or predominantly on such imputed income would not satisfy the realization requirement. Although it is possible for a long-term non-domiciliary to elect the remittance basis without having sufficient non-UK-source income or gains to support a £30,000 tax charge, in which case the base of the tax would include imputed income or gains, it is highly unlikely that substantial numbers of long-term non-domiciliaries in this situation would elect to be taxed on the remittance basis. Accordingly, it is reasonable to conclude that the RBC is not based only or predominantly on such imputed income or gains. The RBC in general is imposed on realized income or gains, whether nominated by the long-term non-domiciliary or considered by the UK statute to have been nominated. Thus, judged on its predominant character, the LTND Levy meets the realization test.

1. Gross Receipts

A foreign tax satisfies the gross receipts requirement if, judged on the basis of its predominant character, it is imposed on the basis of gross receipts or gross receipts computed under a method that is likely to produce an amount that is not greater than fair market value. §1.901-2(b)(3)(i). A foreign tax that, judged on the basis of its predominant character, is imposed on the basis of amounts described in §1.9012(b)(3)(i) satisfies the gross receipts requirement even if it is also imposed on the basis of some amounts not described in that paragraph. As is the case with income and gains that are taxed under either the arising basis or the remittance basis, nominated income and gains subject to the RBC generally are based on gross receipts. Therefore, the LTND Levy meets the gross receipts test.

1. Net Income

A foreign tax satisfies the net income requirement if, judged on the basis of its predominant character, the base of the tax is computed by reducing gross receipts to permit recovery of the significant costs and expenses (including significant capital expenditures) attributable, under reasonable principles, to such gross receipts; or recovery of such significant costs and expenses computed under a method that is likely to produce an amount that approximates, or is greater than, recovery of such significant costs and expenses. §1.901-2(b)(4)(i). Since the LTND Levy is imposed on UK-source income and gains, remitted non-UK-source income and gains, and nominated but unremitted non-UK-source income and gains, all of which consist of gross receipts less costs and expenses, the LTND Levy satisfies the net income requirement.

1. Conclusion

Because the LTND Levy is likely to reach net gain in the normal circumstances in which it applies, it has the predominant character of an income tax in the US sense.

HOLDING

Because the LTND Levy is a tax (within the meaning of §1.901-2(a)(2)), and its predominant character is that of an income tax in the US sense, the LTND Levy, including the Remittance Basis Charge (RBC) of £30,000, is an income tax for which a credit is allowable under section 901. However, a credit for the LTND Levy will be available only if the other legal requirements for obtaining a foreign tax credit are satisfied. For example, an amount paid is treated as a compulsory payment of income tax only to the extent the taxpayer applies the substantive and procedural provisions of foreign law, including elective provisions such as those available under UK law relating to the LTND Levy, in such a way as to reduce, over time, the taxpayer's reasonably expected liability under foreign law for income tax. §1.901-2(e)(5).

Taxpayers generally may rely upon revenue rulings to determine the tax treatment of their own transactions and need not request a ruling that would apply the principles of a published revenue ruling to the facts of their own particular cases. However, because each revenue ruling represents the conclusion of the Internal Revenue Service (IRS) as to the application of the law to the specific facts involved, taxpayers, IRS personnel, and others concerned are cautioned against reaching the same conclusion in other cases unless those cases present facts and circumstances that are substantially the same as those in the revenue ruling. §601.601(d)(2)(v)(e). Accordingly, because the provisions of UK law described in this revenue ruling are facts on which this revenue ruling bases its holding, a taxpayer may not rely on the revenue ruling if the relevant provisions have been amended in any material respect, and the taxpayer is responsible for determining whether any such modification has occurred.[57]

The US ruling concludes with a paragraph which one would not find in the UK:

> **DRAFTING INFORMATION**
> The principal author of this revenue ruling is Teresa Burridge Hughes of the Office of Associate Chief Counsel (International). For further information regarding this revenue ruling, contact Ms. Hughes at (202) 622-3850 (not a toll-free call).

What a good thing it would be if HMRC statements and regulations similarly identified a principal author who would take responsibility - both credit for the good and blame for mistakes![58]

17.12.12 *Individual treaty non-resident*

The RDR Manual provides:

> **RDRM32250 Dual residents - treaty non-resident** [Jan 2019]
> It is possible for individuals to be resident both in the UK and in another country or countries in a tax year. In such a case we look to the provisions of existing Double Taxation Agreements (DTAs) to determine in which country the individual is resident for treaty purposes. So a person may be resident in the UK under UK law, but regarded as

[57] *http://www.legalbitstream.com*

[58] Contrast the rule that a senior accounting officer of large companies must take a personal responsibility for the company's tax returns.

> 'treaty resident' elsewhere and consequently treated for tax purposes as 'not resident' in the UK.
>
> An individual who is, under the terms of a DTA, resident in the other country or territory but is also a long-term resident RDRM32200 in the UK (that is someone who has been resident in the UK in at least seven out of the previous nine tax years) and claims the remittance basis is, if their un-remitted foreign income and gains is £2,000 or more, liable to pay the £30,000 remittance basis charge, or for 2012/13 or later the £30,000 or £50,000 remittance basis charge.

It is considered that DT relief is in principle available against the nominated income/gains charge, but not against the remittance basis deficit charge. The effect of claiming DT relief against nominated income/gains is to reduce the remittance basis claim charge on the nominated income/gains, but to increase the deficit charge by the same amount.

This defeats the spirit of any DTA. It may also breach the DTA itself. But the intention of parliament is clear, and parliament may breach DTAs.[59] In practice treaty partners seem to have accepted this..

The RDR Manual continues:

> **RDRM32250 Dual residents - treaty non-resident** [Jan 2019]
>
> ...
>
> In determining the number of years in which an individual has been resident in the UK for the purposes of the long-term resident provisions, you count all years where the individual is resident in the UK under UK domestic law even if the individual was treaty resident in another territory in some or all of those years.

This is correct.[60] The RDR Manual continues with some tax planning advice:

> In most cases, an individual resident both in the UK and in another country and who under the Double Taxation Agreement with the other country is treated as resident in that other country (for the purpose of applying the provisions of the DTA) will be chargeable to tax in the other country on income and gains that originate in that other country and not in the UK. The treatment of any income and gains that originate in third countries (not the UK or the country of treaty residence) will depend upon the terms of the DTA between the UK and the country of

[59] See *Padmore v IRC (No.2)* [2000] STC (SCD) 356.

[60] See 9.2 (Treaty/UK-law residence).

> residence.
> Where, exceptionally, an individual is chargeable to tax in the UK on such income or gains, they will need to consider whether a claim for the remittance basis of taxation is in their best interests or if, instead, they should pay tax on the arising basis and in the usual way, claim a credit for the tax charged in the other territory.

17.12.13 *Claim charge: Split year*[61]

There is no split-year rule, so the remittance basis claim charge is payable in full if the remittance basis is claimed, even in split years.[62]

What is the reason for that rule? If the remittance basis claim charge is a tax on the nominated income/gains, the split-year rule should logically apply. The reason is that the charge is intended only to take the form of a tax on the nominated income/gains, and it is intended to have the effect of a fixed charge.

17.12.14 *Claim charge administration*

The RDR Manual provides:

> **RDRM32210 Long-term residents and the remittance basis charge - overview** [Jan 2019]
> The remittance basis charge is payable through and collected by the SA regime, and an SA tax return must be filed. The SA109 'Residence, remittance basis etc' supplementary return should be completed and filed for this purpose. Also refer to RDRM32020 'Making a claim'.

So a long-term resident who wishes to claim the remittance basis will need to file an SA tax return in order to pay the remittance basis charge.

Of course the charge could not be collected through PAYE. For one thing, the charge might be a charge to CGT and even if it is income tax it need not be a charge on employment income. Also the claim on which the charge depends will be made in the tax return some time after PAYE is due. HMRC Brief 17/09 provides:

> The rules for nominating income and gains upon which the £30,000 is paid, and the rules for identifying what is taxed if those nominated income or gains are later remitted to the UK, can be complex. To help ensure individuals who pay the £30,000 get the right level of customer

[61] For the distinct issue of the interaction of split-year reliefs and the definition of "long-term UK resident" see 17.12.1 (7 & 12 year residence tests).

[62] See 10.1 (Residence throughout tax year).

support [!] from HMRC, we have decided that most individuals who pay the £30,000, or have paid it in the past, will have their tax affairs dealt with in one HMRC office from 2009-10. This will be the CAR Residency office in Castle Meadow, Nottingham.

Customers who are sent a self assessment return by a different office should make the return to the office issuing that return. Once the return has been received by HMRC we will arrange for the individual's tax records to be transferred to the CAR Residency office in Nottingham and advise the individual and any agent, accordingly. Until such time as individuals or their agents receive such a notification they should continue to deal with their current tax office.

17.12.15 *IT payment on account*

The RDR Manual provides:

> **RDRM32390 Payments on account - interaction with the remittance basis charge** [Jan 2019]
>
> The remittance basis charge is tax on nominated income or nominated gains, (or a mixture of the two) ...
>
> To the extent that the remittance basis charge consists of income tax, the payment on account position for those paying the charge is the same as that for any other SA taxpayer. This means their payments on account are based on their income tax liability for the previous year (TMA1970/s59A(1)).
>
> The SA109 'Residence, remittance basis etc' supplementary pages to the SA tax return must be completed to both claim the remittance basis and nominate income or gains and pay the remittance basis charge.
>
> *Effect and treatment of income*
>
> If paying part or all of the remittance basis charge in respect of nominated income, then income tax will be due. The amount which has been nominated from income and produced income tax will need to be taken into account and included in the overall calculation of payments on account for the following year.
>
> If an insufficient nomination is made to produce the remittance basis charge of either £30,000 or £50,000 (ITA07/s809H(4)) the additional amount treated as nominated will always produce income tax. This also has a bearing on the payments on account position, even though the additional nominated amount is from an unidentified and unspecified amount of income. The additional amount nominated from income will automatically produce income tax that will become part of the individual's payment on account calculation for the following year.
>
> *Effect and treatment of capital gains*
>
> Capital gains tax is not included in computing payments on account, so any of the remittance basis charge that is constituted of nominated capital gains tax will not form any part of the following year's payments on account.
>
> *Example (Ricardo)*
>
> R, a non-domiciled long-term resident has an income tax liability of £200,000

for tax year 2007-08. Subsequently he makes payments of £100,000 on 31 January 2009 and on 31 July 2009 on account of his liability for 2008-09.

His tax liability for 2008-09 is £250,000, which includes for the first time the £30,000 remittance basis charge. The remaining £220,000 is income tax on UK sources. R nominated only £21,000 of his foreign income which led to a charge of £8,400 income tax; he also nominated £120,000 foreign chargeable gains which led to a capital gains tax of charge £21,600. Together these amounts make up his £30,000 remittance basis tax charge.

R's payments on account for 2009-10 will be calculated using the £220,000 income tax paid on UK income sources in 2008-09, plus the £8,400 income tax element of the remittance basis charge. This means that he will make payments on account of £114,200 on 31 January 2010 and on 31 July 2010 on account of liability for 2009-10. ...

RDRM32400 Payments on account – nominations involving chargeable gains [Jan 2019]

Capital gains tax included in the calculation of liability for a year is not included in computing payments on account for the next year. Any part of the remittance basis charge that is tax on nominated foreign gains will not form part of the following year's payments on account.

There is an additional box to complete on the SA109, if a nomination of capital gains is made to ensure that the capital gains tax forming part of the remittance basis charge for a year is ignored for the purpose of calculating the next year's payments on account..

This box is called 'Adjustments to payments on account for capital gains' and must be completed if any nomination of capital gains is made.

This box is not completed if a nomination of income only has been made, as any amount nominated from income will be taken into account in computing the overall payments on account liability for the following year.

The amount entered in the 'Adjustment to payments on account for capital gains' box on the SA109 is required in order for the payments on account to be calculated correctly for subsequent years:

- where a taxpayer calculates their own liability to tax, the amount for capital gains tax entered in the box to adjust payments on account, should be excluded in their calculation of payments on account
- if the tax calculation summary page is used the first payment on account for the following year will not include any part of the amount entered for capital gains tax in the adjustment to payments on account box.

Example involving an amount of capital gains in the 'Adjustment to payments on account for capital gains' box:

R, claims the remittance basis in 2008-09 and nominates both foreign income and foreign gains to pay the £30,000 remittance basis charge.

He nominates as follows:

£21,000 of relevant foreign income	@40%	£8,400
£120,000 of foreign chargeable gains	@18%	£21,600
		£30,000

The amount of £21,600 for capital gains tax should be entered in the 'Adjustment to payments on account for capital gains' box as this amount is excluded in calculating payments on account for the following year. Only the £8,400 tax that is chargeable on nominated income is taken into account when calculating the amount due as payments on account.

If the entire amount nominated to pay the remittance basis charge comes from capital gains then the capital gains tax element of the remittance basis charge is not included in the calculation of the payments of account. In this case the full £30,000 from nominated gains will be entered in the 'Adjustment to payments on account for capital gains' box.

RDRM32410 Payments on account - first-year of paying RBC [Jan 2019]

The remittance basis charge is only payable from tax years 2008-09 onwards by long-term residents making a claim to use the remittance basis.

For example, if a remittance basis claim is made in 2008-09 and the remittance basis charge is due, then the first year that any payments on account can be considered in relation to the remittance basis charge is 2009-10 unless there is a claim to reduce ...

The fact that their tax liability for 2008-09 will be increased for those paying the remittance basis charge has no effect on the payments on account position for 2008-09 (unless there is a claim to reduce them) but, to the extent that the remittance basis charge is income tax, it will be taken into account when calculating payments on account for 2009-10.

The remittance basis charge for 2008-09 is not due for payment until 31 January 2010 when it can be paid as part of any balancing payment for the year

The same principle applies to the payment on account position in relation to the remittance basis charge for any first year that a claim to the remittance basis is made, and the remittance basis charge is due. Payments on account will not generally be affected until after the first year in which they pay the remittance basis charge (TMA70/s59A(2)).

RDRM**32420 Payments on account: no remittance basis charge due in following year** [Jan 2019]

When the remittance basis of taxation is **not** claimed in a year following one where the remittance basis has been claimed and the remittance basis charge was paid, the amount of income used to pay part or all of the remittance basis charge may be excluded from the calculations of payment on account.

To allow this to happen, a claim to reduce payments on account may be made on form SA303. Further information on the rules and the time-limits for making a claim to adjust payments on account can be found in the Self Assessment Manual under SAM1110.

RDRM32430 Claim to reduce Payments on Account (PoA) [Jan 2019]

The payment on account (PoA) position in relation to the remittance basis charge will be affected by any claims to reduce payments on account.

Where the RBC is paid in the previous year on nominated income, the amount feeds through to the individual's payments on account (PoA) for the next year, unless the individual makes a claim to reduce their PoAs on the grounds that their income tax liability for that year will be less than the sum of the two PoAs. For example this could be because they will not claim the remittance basis for the following year. If they subsequently do claim the remittance basis and pay the remittance basis charge in the following year and the income tax due for that year exceeds the sum of the PoAs made we will charge interest on the reduction in the PoA.

This is shown in the example below:

Stage 1

The return shows liability to income tax, which includes the RBC, partly or fully paid in respect of nominated income. The payments on account due on 31 January and 31 July are half of the relevant amount of income tax (TMA70/s59A).

For example, Marie-Clare's 2008-09 income tax liability is £55,000, of which £25,000 related to tax on UK source income, and the remainder is the £30,000 RBC (all in respect of nominated foreign income). Nothing is taxed at source. Her payments on account for 2009-10, payable on 31 January 2010 and 31 July 2010 will each be £27,500.

Stage 2

If the individual does not intend to use the remittance basis for the following year, and so they will not be subject to the remittance basis charge, they can claim to reduce the PoAs.

In the Marie-Clare example, if she does not think she will claim the remittance basis and so will not need to pay the remittance basis charge for 2009-10 she could reduce her payments on account for 2009-10 to £12,500 each, that is 50% of her 2008-09 income tax liability of £25,000 (if the remittance basis charge is excluded). She will of course still have to consider her other income sources and overall expected income tax liability for the year in making this decision.

Stage 3

If the individual subsequently decides to claim the remittance basis and to pay the £30,000 remittance basis charge and a claim to reduce payments on account has been made which resulted in insufficient PoAs being made, then interest will be charged from the due date for the payments on account until a claim to increase payments on account is made or payment is made for the year is paid to stop interest accruing (TMA70/s86).

In the Marie-Clare example, she has claimed to reduce her payments on account to omit the remittance basis charge, so she only makes payments on account of £25,000 (two lots of £12,500). When she files her 2009-10 self-assessment return her UK income has remained, as expected, at £25,000. However she now decides to claim the remittance basis and so she has to pay the remittance basis charge. As she has erroneously claimed to reduce her payments on account in the year, she will be charged interest on the payments that she should have made, that is, on £15,000 from 31 January 2010 and £15,000 from 31 July 2010 until the date these amounts are paid.

Refer to Self-Assessment Manual – Legal Framework SALF303 for further information on claims to reduce payments on account.

Example 1 (Eva)

- E claimed the remittance basis and paid the remittance basis charge in 2008-09, and her income tax liability produces two payments on account for 2009-10 of £120,000 each.
- E has decided that she will not be claiming the remittance basis in 2009-10 so will not pay the remittance basis charge. E makes a claim to reduce the

amount due on account of her tax liability to £200,000 due to a drop in income and because she will not pay the remittance basis charge in 2009-10. When E files her 2009-10 return in September 2010 it shows that the tax due on income is £200,000, but these are provisional figures as E is awaiting some details from her foreign bankers in relation to some foreign transactions.

- The two £100,000 payments on account appear "correct" at this stage. In November 2010 E receives the information from her foreign bankers and decides to amend her return and to claim the remittance basis. She nominates some foreign income and has to pay the remittance basis charge of £30,000, all constituting income tax, bringing her total liability to £230,000.
- E will be charged interest on the £30,000 reduction in her payments on account on the grounds that E should not have reduced them.

Example 2 (Vali)

- V had no foreign income or gains arising in 2008-09, so he did not claim the remittance basis and so he did not need to pay a remittance basis charge in 2008-09.
- V's income tax liability for 2008-09 produces two payments on account of £200,000 for 2009-10. No claim is made to reduce the payments on accounts.
- When V begins to prepare his 2009-10 return he has a liability of £420,000 income tax on UK sources, so his £400,000 payments on account were correct, based on V's previous year's income tax liability.
- V has foreign income arising in 2009-10 and he decides to claim the remittance basis in his 2009-10 return. As a long-term but non-domiciled resident V has to pay the remittance basis charge of £30,000 bringing his total liability to £450,000. Interest will not be charged on the additional £50,000 tax due, as long as this is paid by the proper due date.[63]

17.12.16 *Scottish/Welsh taxpayer*

HMRC say:

> Long-term UK residents who are not domiciled here can pay an annual charge to be taxed under the remittance basis ... This will not be affected by the introduction of the Scottish rate of income tax. Payments of the charge due from Scottish taxpayers will continue to be paid direct to the UK Exchequer.[64]

The rules are in s.809H ITA(3A)(3B) and it is easiest to read them side by side:

[63] See too March 2009 Q&As Q18.

[64] HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012) para 61.

Section 809H(3A) ITA	**Section 809H(3B) ITA**
If the individual is a Scottish taxpayer for the relevant tax year, the individual is to be treated for the purpose of calculating income tax charged by virtue of subsection (2) as if the individual were not a Scottish taxpayer for that year.	If the individual is a Welsh taxpayer for the relevant tax year, the individual is to be treated for the purpose of calculating income tax charged by virtue of subsection (2) as if the individual were not a Welsh taxpayer for that year.

17.12.17 *Critique*

The rules set out in this section can only be described as bizarre. Their purpose is to ensure the deduction of the RBC for foreign (in particular, US) tax. HMRC openly acknowledge this:

> 2.99 The Government sees no case for more fundamental simplification of the nominated income rules. The identification rules ensure that non-domiciles cannot gain a tax advantage by remitting their nominated income or capital gains to the UK before other income and capital gains on which they would be taxed. Removing the nominated income rules would call into question the creditability of the RBC for US tax purposes. Therefore, wider simplification of these rules would carry an unacceptable risk.[65]

17.13 Charge on remitted RFI

Section 809F(1) ITA provides:

> This section applies if s.809B, 809D or 809E applies to an individual for a tax year.

That is, the section applies to remittance basis taxpayers. Section 809F(3) ITA provides:

> The individual's relevant foreign income for that year is charged in accordance with s.832 of ITTOIA 2005.

So we turn to s.832(1) ITTOIA which provides somewhat repetitively:

> This section applies to an individual's relevant foreign income for a tax

[65] HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (2011) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

> year ("the relevant foreign income") if s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

We find the rule at last in s.832(2) ITTOIA:

> For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the UK—
> (a) in that year...

17.13.1 *Remittance in split year*

Section 832(2) ITTOIA provides:

> For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the UK ...
> (b) in the UK part of that year, if that year is a split year as respects the individual.

Para (b) provides the split-year rule.

Where the drafter wishes to disapply the split-year rule (so that remittances in the overseas part of a split year are taxable) this is done by the opaque (but effective) formula:

> In the application of section 832 of ITTOIA 2005 to [specified income], subsection (2) of that section has effect with the omission of paragraph (b).[66]

17.14 Charge on remitted gains

Section 809F ITA provides:

> (1) This section applies if s.809B, 809D or 809E applies to an individual for a tax year...
> (4) The individual's foreign chargeable gains for that year are charged in accordance with paragraph 1 of Schedule 1 to TCGA 1992.

So we turn to para 1 sch 1 TCGA which provides (somewhat repetitively):

> (1) This paragraph applies in the case of an individual to whom the

[66] For examples, see s.726(5) ITA discussed 49.26.3 (Remittance in split year); s.733(5) ITA discussed 50.39.3 (Remittance in split year); s.735B(4) ITA discussed 50.51 (s.731 settlor-attribution remittance-basis); s.643F(3) ITTOIA discussed 47.24 (s.643A remittance basis).

> remittance basis applies for a tax year if—
> (a) in that year the individual disposes of foreign assets,
> (b) chargeable gains accrue to the individual on the disposal of those assets, and
> (c) the gains are not taken outside the charge to capital gains tax as a result of section 1G (cases where tax year is a split year).
>
> (2) The gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.
>
> (3) The amount treated as accruing is equal to the full amount remitted to the UK at that time.

For further discussion see 58.9 (CGT remittance basis). Unlike RFI, foreign gains are not chargeable to tax.

17.15 Remittance after income/gains arise

Suppose:

(1) Foreign income/gains accrue to T (a remittance basis taxpayer) on or after 2008/09 and
(2) The sum is remitted in a subsequent year (in which T is still resident).

The income/gains are taxable in the year of remittance. There is no time limit so income/gains may be taxed many decades after they arise.

17.15.1 *Pre-2008 income/gains*

Suppose:

(1) RFI accrues to T before 2008/09 and
(2) The RFI is remitted in 2008/09 or later (when T is still resident).

In the absence of a transitional rule, the income would not be taxable under s.832 ITTOIA because the condition in s.832(1) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 83 sch 7 FA 2008 fills that gap for RFI:

> (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if—
> (a) the individual made a claim under s.831 of ITTOIA 2005 for the relevant tax year, or
> (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year.
>
> (2) Section 832 of ITTOIA 2005 (as amended by this Part of this

> Schedule) applies in relation to the relevant foreign income as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

Thus pre-2008 RFI is taxed under s.832(2) if remitted from 2008/09 (as one would expect).

The same applies to gains. In the absence of a transitional rule, pre-2008 gains would not be taxable on remittance after 6 April 2008 because:

Year of remittance	**Reason there would be no charge on remittance**
2008/09 - 2012/13	Requirement in former s.12(1)(a) TCGA not met
2013/14 - 2017/18	Requirement in former s.12(1) TCGA not met
2019/20 -	Requirement in paras 1 and 5(2) sch 1 TCGA not met

The wording has changed 3 times, but the requirement in all cases was that s.809B ITA applied to the individual in the year of disposal.

Para 84 sch 7 FA 2008 filled that gap:

> (1) This paragraph applies if s.12 of TCGA 1992 (or any corresponding superseded enactment) applied in relation to a gain accruing to an individual in the tax year 2007-08 or any earlier tax year ("the relevant tax year").
> (2) Section 12 of TCGA 1992 (as amended by this Part of this Schedule) applies in relation to that gain as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

The 2019 CGT rewrite should have amended para 84 to refer to the current legislation in sch 1 TCGA, which replaces s.12. But the continuity provisions fill that gap, so it continues to be the position that a remittance of a gain accruing on a pre-2008/89 disposal is chargeable. The reader may think it would have been easier in the absence of the 2019 CGT rewrite; but there it is.

17.15.2 *Income pre-2005/06 remitted pre-2007/08*

Para 150 sch 2 ITTOIA provided:

> A claim may be made under s.831 (claim for relevant foreign income to be charged on the remittance basis) for relevant foreign income to be charged in accordance with s.832 for the tax year 2005–06 or any later tax year, despite that income having arisen in a tax year before the tax year 2005–06; and ss.832 to 834 apply accordingly.

EN ITTOIA Vol 3 para 347 explains:

> This paragraph ensures that Chapter 2 of Part 8 of this Act is not restricted in its operation to income that arose after the tax year 2004–05 (whenever the earlier income is remitted).

Para 150 was not aptly worded, but what it meant was this: if a s.831 claim is made in 2005/06, 2006/07 or 2007/08, pre-ITTOIA income (which was not taxed on receipt because a claim was made under the former s.65 ICTA) is taxed under s.832 ITTOIA if remitted in that year.

17.15.3 *Income pre-2005/06 remitted post-2008/09*

EN FD Draft Clauses 2008 provided:

> 121. Para 47 deletes paras 150 and 151 of Schedule 2 (transitional provisions), which set out transitional arrangements for the application of the remittance basis to certain relevant foreign income arising before the tax year 2005-06. These are now considered obsolete in light of the amendments in this Schedule.[67]

17.16 Remittance when UK domiciled

Suppose:
(1) RFI/gains accrue to T (a remittance basis taxpayer).
(2) T acquires a UK domicile and for that reason ceases to be a remittance basis taxpayer. T remains UK resident.
(3) T subsequently remits the sum.

This is taxable under the ITA remittance code.

17.16.1 *Pre-2008 RFI/gains*

The rule for the pre-2008 RFI remittance basis was that there was no IT charge on a remittance after acquisition of a UK domicile. It is considered that the same applied for the pre-2008 CGT remittance basis, though HMRC did not accept that.
Suppose:
(1) RFI/gains arose to T before 2008/09.
(2) T became UK domiciled before 2008/09.
(3) The income/gains are remitted from 2008/09.

T is taxable on the remitted income under s.832(2) ITTOIA. The tax

[67] The equivalent passage in EN FB 2008 para 380 is less informative.

charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

What is the position if an individual acquired a UK domicile before 6/4/2008 and remitted the income/gains before then? It is suggested that there is no charge because of the cap on the amount remitted; see 18.42 (Cap on amount remitted).

17.17 Arising basis taxpayer remittance

Suppose:

(1) RFI accrues to T from 2008/09 in a year in which T is a remittance basis taxpayer.

(2) T subsequently remits the income in a year in which T is not a remittance basis taxpayer (because T's foreign income/gains exceed the £2k limit and T does not claim the remittance basis).

T is taxable on the remitted income under s.832(2) ITTOIA.

17.17.1 *Pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance in a year in which no claim was made for the RFI remittance basis. HMRC accepted that (at least for years when ITTOIA applied). The new rule applies to pre-2008 RFI remitted from 2008/09. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

If RFI was remitted before 2008/09, it is considered that there is no charge because of the cap on the amount remitted; see 18.42 (Cap on amount remitted).

17.18 Remittance when non-resident

Suppose:

(1) RFI/gains arise to T (a remittance basis taxpayer).

(2) T remits the sum to the UK in a year when non-resident.

RFI is not taxable in the year of remittance, because the condition in s.832(2) ITTOIA is not met.[68] Gains are not taxable in the year of remittance because although the conditions of sch 1 TCGA are satisfied (remitted gains are treated as accruing when remitted) the individual

[68] See 17.13 (Charge on remitted RFI).

(being non-resident) is not subject to tax on chargeable gains treated as accruing to them.

There is a planning point here. If income arises in a UK resident year, and is remitted in a later UK resident year, there is a taxable remittance, even if the individual has in the meantime been non-resident. So it may be better to remit in a non-resident year. If income is remitted to the UK in a non-resident year, without a tax charge, it cannot be remitted again and so cannot become taxable in a later year when the individual is UK resident.[69]

The temporary non-residence rules will apply if the individual is merely temporarily non-resident. This indicates that the planning by a person who is outside the scope of those rules does not in principle constitute tax avoidance. But it would be different if there were an arrangement under which income/gains are remitted to the UK for a short time and then taken out of the UK again.

For employment income, see 34.36 (Receipt/remittance after death). For relevant debts where the borrowed money is remitted when non-resident, see 18.21 (Relevant debt).

17.19 Remittance after death

Suppose:

(1) RFI or gains accrue to T (a remittance basis taxpayer).
(2) T dies, and the sum is received in the UK after the death.

In the following discussion,

"The year of death" is the tax year in which T dies.
"Post-death year" means a subsequent tax year.

If RFI is received in the UK in a post-death year, no IT charge arises because the requirement in s.832(2) ITTOIA is not met: the year of remittance is not one "for which the individual is UK resident".

If gains are received in the UK in a post-death year, no CGT charge arises. Even if para 1(2) sch 1 TCGA operates to treat gains as accruing to the individual who has died, the gains do not accrue to a UK resident.

There is no taxable remittance if funds are received in the UK after the death but in the year of death. Property cannot be received in the UK by T (who is dead) or by a relevant person (there are no relevant persons in

[69] See 18.42 (Cap on amount remitted).

relation to a dead person); so remittance condition A cannot be satisfied.

For employment income, see 34.36 (Receipt/remittance after death).

17.20 Remittance after source ceased

Section 832(3) ITTOIA provides:

> Subsection (2) applies whether or not the source of the income exists when the income is remitted.

17.20.1 *Pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance from a source in a year after the source has ceased. Suppose:

(1) RFI accrued to T before 2008/09.
(2) The source of the RFI ceased before 2008/09.
(3) The RFI is remitted from 2008/09.

Is T taxable on the remitted income under s.832(2) ITTOIA? Yes, the tax charge is retrospective in that pre-2008/09 income previously outside the scope of tax has now fallen within the scope of tax. It does not matter when the income arose or the source ceased: income arising in the 1950s could now come into charge, though all records relating to it would have been long discarded.

STEP rightly comment:

> It appears that any source ceased funds, whenever the source ceased will be caught by the new rules. The effect of this is to retrospectively change the nature of these funds and this is unfair. If this is to be the case then taxpayers who have used this technique may have placed the funds in capital accounts which will, as a consequence of the changes to the rules, now be classified as mixed accounts. Not only do the mixed account rules fail to take into account the change in nature of these funds which were capital on 5 April 2008 and income on 6 April 2008, but there does not seem to be any clear way to separate out these funds now as the mixed account rules only apply to remittances to the UK. Whilst STEP does not object to the change in these rules for the future, we do feel that it is unfair to impose additional tax and reporting burdens on taxpayers who used a technique in the past which HMRC recognised and accepted when they used it.[70]

[70] STEP Representations on the FB 2008.

What if the source ceased and T remitted the income before 2008/09? Even if the transitional rule does not provide relief, it is considered that there is no charge because of the cap on the amount remitted; see 18.42 (Cap on amount remitted).

HMRC accept that there is no charge on pre-2008 deemed gains.[71] The same reasoning must apply here so it is considered that pre-2008 source-ceased income, which was remitted to the UK prior to 6 April 2008, remains non-taxable.

17.21 RFI/gains of non-resident, remitted when resident

Suppose:

(1) A non-resident individual receives RFI or gains. The income/gains are not taxed as they arise.

(2) The individual becomes UK resident, and subsequently remits that sum when taxable under the remittance basis.

RFI remitted is not taxed on remittance as the condition in s.832(1) ITTOIA is not met. Gains remitted are not taxed on remittance because the condition in para 1(1) sch 1 TCGA is not met.

FAQ Remittances (April 2008) correctly states:

> **Where a non-domiciled individual not resident in the UK, has purchased assets abroad out of income that has not been taxed in the UK, then moves to the UK and becomes resident, will the importation of those assets in the first year be taxed as a remittance?**
> No. As the untaxed income arose while the individual was not UK resident, there is no charge unless the proposed new s.832A [ITTOIA][72] applies (temporary foreign residence).

17.22 RFI from Ireland

17.22.1 *Income from 2008/09*

The position for income from 2008/09 is straightforward. The ITA remittance basis treats Irish source income in the same way as any other foreign income. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively[73])

[71] See 18.45.2 (Remittance of deemed gain).

[72] The original erroneously refers to ITA 2007.

[73] The point is discussed in the 6th edition of this work para 9.51 and the 2012/13 edition para 9.19 (RFI from Ireland).

that Irish income was taxed on an arising basis.

The UK/Ireland DTA also needs to be considered but that aspect is not discussed here. Similar points arise in relation to earnings: see 34.37 (Earnings from Ireland).

17.22.2 *Pre-2008 Irish income*

This change raised the problem of transition. Para 83 sch 7 FA 2008 provides:

> (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007-08 or any earlier tax year ("the relevant tax year") if—
> (a) the individual made a claim under section 831 of ITTOIA 2005 for the relevant tax year, or
> (b) section 65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year. ...
> (3) But nothing in section 832 of ITTOIA 2005 applies in relation to any of the relevant foreign income that arose in the Republic of Ireland.

EN FB 2008 provides:

> 399. Sub-paragraph(3) provides that the new section 832 does not apply to relevant foreign income that arose in the Republic of Ireland. This ensures that no double charge can arise in relation to those tax years during which it was not possible to claim the remittance basis for such income. (This might be relevant for example where income arose in one of those years and was charged on an arising basis but was not remitted to the UK until on or after 6th April 2008.)

Para 83(3) disapplies the remittance basis charge for pre-2008 Irish income. In short, if:
(1) Irish source income arose before 2008/09; and
(2) The income is remitted on or after 2008/09
there is no tax charge on remittance.

This applies even if taxpayers successfully argue that pre-2008 Irish income should as a matter of EU law have been taxed on the remittance basis. But that point will not now often arise.

17.23 Remittance basis for trustees: Pre-2007 transitional rules

From 2007/08 the remittance basis applies only to individuals, so trustees do not qualify.

Before that time, UK resident foreign domiciled trustees did qualify for the remittance basis on RFI[74] (though I am not sure how widely that was appreciated or used). Pre-2007 income of trustees which qualified for the remittance basis when it arose, is not taxable on remittance after 5/4/2007, because s.832 ITTOIA now applies to individuals. This could be something of a windfall for trustees who qualified for the RFI remittance basis before 2007. But the point will not often arise.

17.24 Forward tax agreements

Details of this arrangement were made public in an article by Malcolm Gunn in *Taxation*, 17 May 2001, under the revealing name "subscription rate method of taxation". The taxpayers involved were very wealthy UK resident non-domiciled individuals.

HMRC required disclosure of the taxpayer's worldwide assets. The taxpayer then offered to settle the tax liability on foreign sources for a fixed sum. A starting position was that one estimated the taxpayer's UK living expenses; deducted from that the amount of UK income; the balance then represented funds which would be required annually from overseas, on which tax was expected. The forward tax agreement related to foreign income/gains. UK source income remained taxable in the normal way. Malcolm Gunn explained:

> One may be able to negotiate the annual fixed payment downwards on the starting point figure. ... So in the final analysis, it is down to negotiating a deal which both the taxpayer and the Revenue feel they can live happily with.[75]

In the first edition of this book I said:

> It is likely that publication will stop the practice completely. Those who believe that tax should be governed by law will add: Quite right too.

Since then the courts have tried to stop these agreements by holding them to be *ultra vires*.[76] Where such agreements have been made in the past,

[74] See the 2012/13 edition of this work para 9.21 (Remittance basis for trustees).;

[75] Transition from taxation by agreement to taxation by law raises additional problems discussed in Malcolm Gunn's article.

[76] *Al Fayed v Advocate General* 77 TC 273. *Fayed*-style bargaining is however the basis of taxation of wealthy foreigners in many countries, including, I understand, Switzerland, France and Austria. Even in the UK after *Fayed* the temptation is ever

a taxpayer should have a defence to an assessment if they can show they have suffered prejudice. It is an interesting question how these agreements should deal with transitional issues such as the introduction of the remittance basis claim charge.

17.25 Divorce: Remittance liabilities

In *SA v PA*:[77]

> The husband seeks to include a CGT and/or income tax liability of £240,000 should he remit his Dutch funds here to buy a house. [Counsel for the wife] says:-
>
> > "... this is the usual story – H says this is what his CGT liability would be if he brought all his assets onshore (he is a tax non-dom). As will be seen, he has studiously avoided for many years bringing taxable assets onshore, and there is no likelihood he will now do so. He says he intends to buy a house in the UK, but W considers this entirely unlikely. ... he is much more likely to continue to rent in England and buy in the Netherlands."
>
> ... [There is] no general rule about the inclusion or exclusion of such tax but ... the court must deal in realities and must not make its order on a false basis. ... These taxes cannot be avoided if the funds are brought here, or if they are used indirectly to purchase property under some back-to-back agreement. At present the husband lives a bipolar life between London and Amsterdam. In my judgment it would not be unreasonable for him to buy a home here in which to live with his children when with him. Therefore, it is reasonable in this case to include the liability to tax as a deduction.

For other tax issues in divorce, see:
18.50 (Proceeds of divorce settlement)
50.6 (Benefit in course of divorce)

17.26 Remittance compliance/enquiry

In 2013 HMRC set out standard form letters to UK resident remittance basis taxpayers. These were popularly known as "nudge letters"; the HMRC term was "educational letters". They were controversial in that: (1) HMRC sent the letters directly to its customers even if they had

present to move from the inconvenience of taxation by law to the convenient (but ultimately corrupt) method of taxation by negotiation.

[77] [2014] EWHC 392 (Fam) at [69].

agents acting for them.[78]

(2) The letters stated controversial positions in an unqualified and peremptory way.[79]

The professional bodies understandably objected[80] and (whether or not for that reason) HMRC did not do this again.[81]

In about 2014, HMRC asked agents "what tests and checks did you carry to establish whether or not remittances had been made?". This seems a loaded question.[82] It contains the assumption that accountants are generally expected to conduct tests and checks. But it is correct to say that unguided lay taxpayers will not understand the meaning of remittance, as the term is defined in a wide, complex, and artificial way. Accountants responsible for completing tax returns of remittance basis taxpayers should not merely ask their clients what income/gains have been remitted. They may rely on their clients answers only if they have properly explained the rules. HMRC are entitled to ask how that has been done. Perhaps that is what the question is intended to address.[83]

17.27 Tax return: Unremitted RFI/gains

Unremitted income/gains are not taxable and need not be disclosed:

(1) in a tax return[84] or

(2) in an HMRC domicile enquiry

HMRC say:

> Those using the remittance basis will not be required to make any additional disclosures about their income and gains arising abroad. So long as they declare their remittances to the UK and pay UK tax on them, they will not be required to disclose information on the source of the remittances.

[78] This was a breach of the HMRC Charter ("We'll respect your wish to have someone else deal with us on your behalf, such as an accountant").

[79] See 18.15.4 (Travel to/from UK).

CHAPTER EIGHTEEN

THE MEANING OF REMITTANCE

18.1 ITA remittance basis: Introduction
18.1.1 Scope of ITA remittance basis
18.1.2 Why is remittance basis hard
18.1.3 Pre-2008 remittance rules compared
18.1.4 Construction of remittance basis
18.2 Remittance conditions A to D
18.3 Relevant person: Introduction
18.4 Relevant person: Family
18.5 Relevant person: Companies
18.5.1 "Participator"
18.6 Relevant person: Trusts
18.6.1 Unit trust
18.7 Body connected with trust
18.7.1 "Connected with" settlement
18.7.2 "Body"
18.8 Company relevant person: Examples
18.8.1 Co relevant person: Critique
18.9 Relevant person: Partnership
18.10 Relevant person: Pre-2008 income/gain
18.11 Relevant person: Compliance
18.12 Relevant person: Critique
18.13 "Property"
18.13.1 "Property" and "money"
18.13.2 Sehgal v HMRC
18.14 Remittance condition A: UK link
18.14.1 Property brought to UK
18.14.2 Property received in UK
18.14.3 Property used in UK
18.14.4 Bank entries
18.14.5 Property in transit
18.14.6 Gift to non-relevant person
18.14.7 Arm's length payment to non-relevant person
18.14.8 Acquisition of UK security
18.14.9 Disposal of UK security
18.14.10 Acquisition of UK debt
18.14.11 Disposal of UK debt
18.14.12 Situs of property for condition A
18.14.13 Co with UK asset (secondhand co)
18.15 Service provided in UK
18.15.1 "Service"
18.15.2 Where are services provided
18.15.3 Identifying the services
18.15.4 Travel to/from UK
18.15.5 Service for benefit of relevant person
18.16 Condition B: Link to income/gain
18.16.1 Property of relevant person
18.16.2 Services
18.17 Property is the income or gains
18.17.1 What is trading income
18.17.2 What is property income
18.17.3 What is a gain
18.17.4 Remittance of deductible expenses
18.18 Derived property
18.18.1 "Derived"
18.18.2 s.22 TCGA case law
18.18.3 Income/gain invested/reinvested
18.18.4 T gives income/gain to R
18.18.5 T buys asset from V
18.18.6 T sells asset to P
18.18.7 T lends income/gains to B
18.18.8 T subscribes for shares in R Ltd
18.18.9 Double representation
18.18.10 T subscribes to investment fund
18.18.11 T purchases R Ltd (secondhand co)
18.18.12 T uses income/gains to pay debt
18.18.13 Refinancing

18.18.14 Loan secured on income/gains
18.18.15 Income from income/gains
18.18.16 Gift on to third party
18.18.17 Receipt of cheque in UK
18.18.18 Betting

Remittance from joint account	94.3.9

18.1 ITA remittance basis: Introduction

This chapter considers what constitutes a remittance, for the purposes of the remittance basis.

The law is in Chapter A1 Part 14 ITA, which sets out what I call the **"ITA remittance basis"**.

The ITA system of numbering sections is idiosyncratic. The provisions of Chapter A1 Part 14 are numbered 809A to 809Z, and, continuing beyond 809Z, are numbered 809Z2 to 806Z10. Subsequently enacted provisions are slotted in between, eg between 809V and 809W we have 15 sections numbered 809VA to 809VO.

However, s.809A is not the first section of ITA whose number begins with 809. Before it are *eight* Chapters of Part 13, (numbered Chapters 5A, 5AA, 5B-5F and 6). These begin with s.809AZA and conclude with s.809ZR.

This does make navigation difficult; but there it is.[1]

18.1.1 *Scope of ITA remittance basis*

Section 809K(1) ITA identifies 6 places where the ITA remittance basis applies:[2]

> Sections 809L to 809Z6[3] apply for the purposes of—

Provision	***Topic***
Chap A1 Part 14 ITA	Meaning of remittance
s.22, s.26 ITEPA	Employment income
Chap 5B Part 2 ITEPA	Employment-related securities
ss.554Z9-554Z11	Disguised remuneration
s.832 ITTOIA	Relevant foreign income
sch 1 TCGA	CGT

This is just a signpost provision, and not quite the full list. The ITA remittance basis is incorporated in these places, and in other places, using whatever formula floats to the drafter's mind:

> See Chapter A1 of Part 14 of ITA 2007 for the meaning of "remitted to the UK" etc.[4]

> "remitted to the UK" has the meaning given in Chapter A1 of Part 14 of

[1] This is due to a misguided application of OPC drafting guidelines; see App.13.3 (Section numbering system).

[2] For clarity, I set this out in a table format, and abbreviate the section descriptions.

[3] The reference to "ss.809L to 809Z6" was slightly strange, as it omitted s.809Z7 (interpretation). Now it is wrong, because FA 2012 added further sections: it should be taken as a reference to "ss.809L to 809Z10".

[4] See s.22(6), 26(5) ITEPA, s.832(4) ITTOIA, s.12(5) TCGA (all inserted 2008); s.648(4) ITTOIA (inserted 2009); s.554Z11(4) ITEPA (inserted 2011); s.41F(10) ITEPA (inserted 2014).

> ITA 2007.[5]
>
> "remitted to the UK" is to be read in accordance with Chapter A1 of Part 14.[6]
>
> any question as to whether, and when, amounts are "remitted to the UK" is determined in accordance with the rules in Chapter A1 of Part 14 of ITA 2007.[7]

This could have been drafted more neatly, but it works. As far as I can see, the ITA remittance basis in Chapter A1 Part 14 applies everywhere the expression "remitted to the UK" is used, ie everywhere the remittance basis applies.

18.1.2 *Why is remittance basis hard*

The difficulty is inherent in the concept of a remittance basis. Although it is an exaggeration to say that "money has no earmark" it is often very difficult to trace or earmark money.[8] The fungibility of income/gains and other assets makes it hard to determine whether any specific asset received in the UK should be regarded as the income/gains. But this is what a remittance basis requires to be done.

Before 2008 the matter was largely left to the courts to sort out. It cannot be said that the courts were entirely successful.[9] In 2008 parliament recast the rules in statutory form. By most measures this has also been unsuccessful. The ITA rules are:

(1) Unstable: they were amended almost every year in the decade after 2008, and even now the law does not seem to be stable.
(2) Complex: the topic which took up 78 pages in the 2007/08 edition of this work needs four chapters and over 400 pages in the current edition.
(3) Record keeping is vastly increased.

No less than before, careful planning is needed to avoid unfairness.

[5] See s.408A(10) ITTOIA, s,689A(6) ITTOIA (both inserted in 2013).

[6] See s.726(7) ITA, s.730(7) ITA (both inserted in 2017).

[7] Para 5(3) sch 1 TCGA.

[8] *Lipkin Gorman v Karpnale* [1989] 1 WLR 1340 at p.1382 (CA). The law of tracing illustrates this.

[9] Thus *Thomson v Moyse* 39 TC 291 at p.328: "this difficult branch of the law"; *Kneen v Martin* 19 TC 33 at p.41: "This subject is always troublesome".

18.1.3 *Pre-2008 remittance rules compared*

The wording of the ITA remittance basis is so different that cases on the pre-2008 remittance basis need careful review to see if they have any relevance to the current law; in practice I have not found any that are still important.

HMRC agree. The RDR Manual provides:

> **RDRM31210. Key differences between 'new' (post 5 April 2008) and 'old' regime (pre 6 April 2008)** [Jan 2019]
> ...The previous case law is now of limited relevance.

There should be no assumption of continuity, ie that the post-2008 law is the same as before. There are many transactions which are taxable remittances which were not caught under the pre-2008 rules; but there are also transactions which were formerly caught but which are not now taxable remittances.[10]

In earlier editions I discussed the enactment history, and differences between the pre-2008 provisions and the current law.[11] I omit that now, because the enactment history sheds no light on the current law, and the differences are of historical interest only. HMRC and taxpayers, and perhaps the Courts, will refer to the pre-2008 law where it supports their view of the current law, and ignore it when it does not. But one should not take that seriously.

18.1.4 *Construction of remittance basis*

Sehgal v HMRC refers to EN FA 2008:[12]

> Where [gains] are in effect remitted to the UK, in such a manner that the individual has the use or enjoyment of them in the UK, the individual should be liable to tax on them.

Seghal continues:

> This ... supports a wide interpretation of the legislation; it was intended to cover any guise in which offshore gains could be "enjoyed" in the UK.

The concept of remittance is clearly intended to be broad. One should not

[10] For example, the remittance reliefs discussed in the next chapter.

[11] See the 16th (2017/18) edition of this work para 12.12.1 (Enactment history, Remittance Condition A) and 12.15.2 (Enactment history, Remittance Condition B).

[12] [2022] UKFTT 312 (TC) at [103].

need to refer to the explanatory notes to see that. But these broad principles operate at a high level of generality, and do not solve the questions which arise in practice. In *Sehgal* itself:[13]

> Both parties suggested that the Tribunal should take a realistic view of the transactions ... but they had very different views of what that reality should be...

That will not surprise readers. It happens all the time.[14] We need to turn to the words of the remittance basis and of the legal documentation. But sometimes, perhaps, an argument leads to such absurd results that these generalities are useful.

For completeness, according to the FTT in *Sehgal*:

(1) Section 809L is an anti-avoidance provision.[15]

(2) Section 809L is intended to close "loopholes", or "a loophole".[16]

As to point (1), s.809L is not in any meaningful sense, an anti-avoidance provision. It simply gives a comprehensive statutory definition to "remittance".[17]

As to point (2), *Sehgal* does not identify what the "loophole(s)" were. Readers who remember the pre-2008 rules will recall that they had some quirks, or "loopholes" if one must descend to the language of the tabloids.[18] That the ITA code has corrected these does not shed much, if any, light on the present law. More significantly, if the old law is relevant to the new, it may be noted that the pre-2008 rules were also widely construed.[19]

The reader may hope that the UT decision is released before these comments are recited in other case law.

18.2 Remittance conditions A to D

Section 809L(1) ITA provides:

[13] at [96].

[14] See App. 7.1 (What do we mean by real).

[15] [2022] UKFTT 312 (TC) at [94].

[16] the plural at [94] and the singular at [103].

[17] Of course there are some provisions in the ITA remittance basis which one can properly call anti-avoidance provisions, such as the mixed-fund TAAR.

[18] See App.1.10 (Loophole/tax break).

[19] See the 6th (2007/08) edition of this work, para 9.25 (Method of remittance does not matter).

> An individual's income is, or chargeable gains are, "remitted to the UK" if—
> (a) conditions A and B are met,
> (b) condition C is met, or
> (c) condition D is met.

Thus there is a remittance if one of three conditions, or (more accurately) sets of conditions, are met. I refer to "**remittance conditions A to D**", and I refer to the income or chargeable gains as "**income/gains**". HMRC sometimes use the abbreviation FIG (foreign income or gains); I leave the word foreign to be understood.

It is considered that s.809L(1) is a comprehensive and not an inclusive definition of remittance. That is, a sum is remitted if and only if one of these three sets of conditions are satisfied. Remittance conditions A to D are so complex, and so broad, that there is no room for any other type of remittance.

In practice, remittance conditions A and B are the most important.

I refer to a remittance within the meaning of s.809L(1) as a **"taxable remittance"**.

18.3 Relevant person: Introduction

Before discussing the remittance conditions, it is necessary to consider the term "relevant person". All four remittance conditions use this term.

"Relevant person" is defined in s.809M ITA. Section 809M(1) ITA provides:

> This section applies for the purpose of this Chapter.[20]

The term "relevant person" is also used in transitional provisions: para 86(2)(3) sch 7 FA 2008. Here the drafter did not supply any definition but the context shows that the s.809M definition must be applied. So the definition applies throughout the remittance provisions.

A relevant person strictly means the individual to whom income/gains accrue, as well as certain persons connected to them. But in the discussion below I generally refer to the specific individual as "the individual" and use the term "relevant person" to mean the others within the statutory definition.

[20] This is duplicated in s.809Z(10) ITA: "In this Chapter ... "relevant person" has the meaning given by section 809M".

Strictly one should not use the term “relevant person” in the abstract. A relevant person can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a relevant person in isolation (leaving the words “in relation to an individual” and the identity of that individual to be inferred).

Section 809M ITA sets out 8 categories of relevant person. These can be split into three groups: close family, family companies, and family trusts.

18.4 Relevant person: Family

The first four categories of relevant person are close family. Section 809M(2) ITA provides:

> A “relevant person” is—
> (a) the individual,
> (b) the individual’s husband or wife,
> (c) the individual’s civil partner,
> (d) a child or grandchild of a person falling within any of paras (a) to (c), if the child or grandchild has not reached the age of 18.

Section 809M(3) ITA treats cohabitees as married persons, so they and their children/grandchildren may be relevant persons under this definition.[21]

18.5 Relevant person: Companies

The provisions discussed in this section have had a complicated evolution. I omit that here – reluctantly, as the story has amusing aspects – but it is now of historical interest only.[22]

Under s.809M(2)(e) ITA the next category of relevant person is:

> (e) [i] a close[23] company in which a person falling within any other paragraph of this subsection is a participator, or

[21] See App.3.4.1 (Cohabitee treated as spouse).

[22] For a lesson in how not to legislate, see the 9th (2010/11) edition of this work para 10.4, 10.5.

[23] Section 809M(3)(c) ITA provides a referential definition:

> “close company” is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act).

This is unnecessary as that is the default definition in the ITA: see 104.26 (Close company: Introduction). But it does no harm.

> [ii] a company which is a 51% subsidiary[24] of such a close company.

Under s.809M(2)(f) ITA the next category of relevant person is:

> (f) [i] a company
> [1] in which a person falling within any other paragraph of this subsection is a participator, and
> [2] which would be a close company if it were resident in the UK, or
> [ii] a company which is a 51% subsidiary of such a company

This is intended to catch family companies but it is widely drawn. An individual would not usually know whether any company is a relevant person in relation to them, because they cannot tell whether it might have a participator who is a trustee of a RP trust.

Companies may also be relevant persons as bodies connected to trusts.[25] For charitable companies, see 18.52.1 (Is charity a relevant person).

18.5.1 *"Participator"*

The key term here is "participator". Section 809M(3)(ca) ITA provides:

> "participator",
> [i] in relation to a close company, means a person who is a participator in relation to the company for the purposes of section 455 of CTA 2010 (see sections 454 and 455(5) of that Act), and,
> [ii] in relation to a company that would be a close company if it were resident in the UK, means a person who would be such a participator if it were a close company

Para [i] incorporates the extended definition of "participator".[26]

Para [ii] is unnecessary,[27] but it does no harm.

18.6 Relevant person: Trusts

Under s.809M(2)(g) ITA the next category of relevant person is:

> (g) the trustees of a settlement of which a person falling within any

[24] Section 809M(3)(cb) ITA provides the standard definition: '51% subsidiary' has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010). See 64.26 ("51/75/90 % subsidiary").

[25] See 18.7 (Body connected with trust).

[26] See 104.24 (Participator: extended definition).

[27] See 104.23.12 (Participator in non-resident co).

> other paragraph of this subsection is a beneficiary.

This is intended to catch family trusts but it is so widely drawn it covers many if not most trusts in existence.

In the following discussion:

"An RP beneficiary" is a beneficiary falling within any other paragraph of s.809M(2).

"An RP trust" is a trust within s.809M(2)(g), ie one with an RP beneficiary.

Strictly one should not use these terms in the abstract. An RP trust can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a RP trust in isolation (leaving the words "in relation to an individual" and the identity of that individual to be inferred).

Thus in my terminology, if T (or T's spouse, etc) is a beneficiary, the trust is an RP trust in relation to T, or (in short) it is an RP trust.

Section 809M(3)(e) ITA defines "beneficiary":

> "beneficiary", in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement;

Every trust with an unrestricted power to add beneficiaries (which is a standard form) is an RP trust.

If T and their relevant close family (spouse etc) are all excluded, but the power to add beneficiaries extends to a close company in which T is a participator, then the trust is still an RP trust. The company may be a RP beneficiary even though T has no interest in it.

If the power to add beneficiaries is only exercisable with the consent of an individual, the position is different.

Suppose the beneficiaries are T's children and their issue. If T's children are adult and there are no minor grandchildren, then the trust is not an RP trust. However it becomes a RP trust if a grandchild is born.

A trust is not an RP trust in relation to T just because its terms provide that children or grandchildren of T can benefit after they have reached the age of 18, as long as they cannot benefit before then.[28]

[28] See *Vestey v IRC* 31 TC 1 (known as the first *Vestey* case) which decided that a trust with power to benefit the widow of the settlor was not settlor-interested. At the time that the income arose:

(1) The settlor's wife could not benefit (as she was not a widow).

(2) It was possible that in the future she could benefit (as she might survive the settlor

If T is not a beneficiary, but T lends interest-free to the trust, it is considered that the trust does not become an RP trust in relation to T just because of the loan. T may receive a benefit (on repayment of the loan).[29] However that benefit arises under or by virtue of making the loan to the trustees, (ie, under or by virtue of the loan agreement): T does not receive a benefit under or by virtue of the settlement.[30]

For charitable trusts, see 18.52.1 (Is a charity a relevant person?).

Section 809M(3)(d) ITA provides:

> "settlement" and "settlor" have the same meaning as in Chapter 2 of Part 9.

This brings in the standard IT/CGT definition of "settlement".[31] That is strictly unnecessary, since this definition applies except so far as the context otherwise requires; but it does no harm.[32]

The definition of "settlor" is otiose as the word is not used in the definition of "relevant person".

For completeness: s.809M(3)(f) ITA provides an otiose definition of trustee.[33]

It makes no difference if an individual to whom income/gains arise is a

and so become a widow). That did not matter because the legislation (which is comparable to s.809M) was held to apply only if *at the time that the person received a benefit* she fell within the words "spouse of the settlor".

A different conclusion was reached in relation to s.28 IHTA (employee benefit trusts): see *Barker v Baxendale Walker Solicitors* [2017] EWCA Civ 2056; but the legislation there is not the same as s.809M.

[29] See 47.6.2 ("Settlor-interested" for s.624).

[30] The same point arises in relation to pre-owned assets, where HMRC accept a similar argument: see 83.8 (POA intangible property charge).

[31] See 87.3 (Settlement: Standard IT/CGT definition).

[32] The definition is useful for the avoidance of doubt, since s.809M twice refers to s.993 ITA, where the settlement-arrangement definition applies. Thus the definition makes it clear that the settlement-arrangement definition of settlement is not applicable to s.809M.

[33] Section 809M(3)(f) ITA provides: "'trustee' has the same meaning as in section 993 (see, in particular, section 994(3))". So we turn to s.994(3) ITA which contains what I call the deemed trustee rule; see 87.8.2 (Non-classic trust: Deemed trustee). The deemed-trustee rule deals with the problem where legislation refers to trustees of a settlement-arrangement (which may not have trustees in the trust-law sense). The deemed-trustee rule is not needed where (as here) "settlement" has the standard IT/CGT definition, and so must have trustees in the trust-law sense. But no harm arises.

trustee, or a participator in a corporate trustee, as trustees are deemed to be a separate, notional person (which is not a company).[34]

18.6.1 *Unit trust*

A unit trust is not a settlement, so trustees of a unit trust are not relevant persons under s.809M(2)(g) ITA.

A unit trust is not a company (though it is deemed to be a company for some specific tax purposes) so it is not a relevant person under any other head.

18.7 Body connected with trust

Under s.809M(2)(h) ITA the last category of relevant person is:

> (h) a body connected with such a settlement.

That is, a body connected with an RP trust, within 809M(2)(g): a trust of which some other relevant person is a beneficiary.

18.7.1 *"Connected with" settlement*

Section 809M(3)(g) ITA defines "connected with":

> a body is "connected with" a settlement if the body falls within section 993(3)(c), (d), (e) or (f) as regards the settlement.

This must not be confused with the much more common tax concept of a "connected person".

In order to follow this, one needs to set out the four paragraphs of s.993(3)(c)(d)(e) and (f).

First, s.993(3)(c)(d) ITA provide:

> (3) A person, in the capacity as trustee of a settlement,[35] is connected with ...
>
> (c) any close company whose participators include the trustees of the settlement,
>
> (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement

[34] See 7.3 (Trustees a distinct person).

[35] "Settlement" in s.993 means settlement-arrangement: see s.994(1) ITA. However for a body to qualify as a relevant person under s.809M(2)(h) there needs to be a settlement within the standard IT/CGT definition.

Section 809M(3)(g) is not elegantly drafted. It refers to a body connected with a settlement; whereas s.993 refers to bodies connected with trustees of a settlement; but the meaning must be the same.

At first sight it seems unnecessary for s.809M(3)(g) to refer to s.993(3)(c) or (d), because any company within (c) or (d) would be a relevant person in any event under s.809M(2)(e) or (f).[36] But this does make a difference as can be seen from the examples below. In any case, one needs to have (c) and (d) in mind in order to understand s.993(3)(e).

"Participator" in s.993(3)(c)(d) is not defined; it is considered that it bears the normal close company meaning.

Section 993(3)(e) ITA provides:

> (e) any body corporate controlled (within the meaning of section 995) by a company within para (c) or (d)

For the s.995 definition of control, see 104.2.3 (Control: Strict sense).

Lastly, s.993(3)(f) ITA provides:

> (f) if the settlement is the principal settlement in relation to one or more sub-fund settlements, a person in the capacity as trustee of such a sub-fund settlement.

It seems unnecessary for s.809M(3)(g) to refer to s.993(3)(f). Possibly the drafter only intended to refer to s.993(3)(c)(d)(e) and the reference to (f) slipped in by mistake. But since the sub-fund regime is dead-letter tax law (hardly ever found in practice) the point does not matter.[37]

18.7.2 *"Body"*

Section 809M(2)(h) ITA refers to a "body" connected with a settlement. The term is wide and somewhat vague. However in order to fall within s.993(3)(c)(d) the body must be a company. In order to fall within s.993(3)(e) the body must be a body corporate. Presumably the word "body" was selected as the apt term to include the (somewhat theoretical) case of trustees of sub-funds under s.993(3)(f).

18.8 Company relevant person: Examples

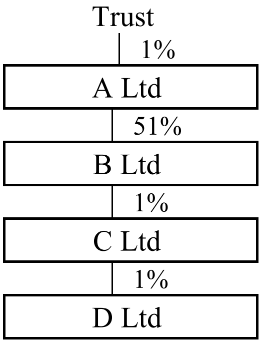
It may be helpful to give some examples of how the relevant person rules apply to trust/company structures. In the following examples:

[36] Because the trustees are participators.

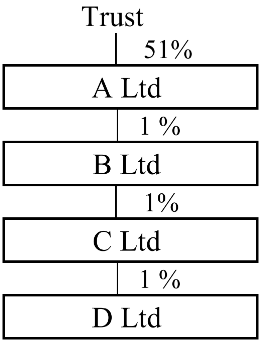
[37] See 63.2 (Sub-Fund regime).

"(e)-company" is a relevant person under s.809M(2)(e)[38]
"(f)-company" is a relevant person under s.809M(2)(f)[39]
"(h)-company" is a relevant person under s.809M(2)(h)[40]
"non-(e) rel. person" is a person who falls within any other paragraph of 809M(2) ie (1) not a person who falls outside 809M and (2) not a person who is *only* within para (e)
"non-(f) rel. person" is a person who falls within any other paragraph of 809M(2) ie (1) not a person who falls outside 809M and (2) not a person who is *only* within para (f)

Example 1



Example 2



Assume the trust is a relevant person (eg the individual is a beneficiary). Assume all the companies are close.

A Ltd is (in my terminology):
- an (h)-company
- an (e)-company if UK resident, or an (f)-company if non-resident.
- a non-(e) rel. person and non-(f) rel person (because it is not *only* within (e)/ (f))

Example 1
Assume first that the companies are all non-resident close companies.
B Ltd is an (f)-company because a non-(f) rel. person - A Ltd - is a participator.
C Ltd is not a relevant person. It is not an (f)-company as it does not meet the requirement in (f) that a person "falling within any *other* paragraph" of s.809M(2) is a participator.

[38] See 18.5 (Relevant person: Companies).
[39] See 18.6 (Relevant person: Trusts).
[40] See 18.7 (Body connected with trust).

The result is the same if all the companies are UK resident close companies, though the statutory references are different:
B Ltd is an (e)-company because a non-(e) rel. person - A Ltd - is a participator.
C Ltd is not a relevant person. It is not an (e)-company as it does not meet the requirement in (e) that a person "falling within any *other* paragraph" of s.809M(2) is a participator.

Suppose however that B Ltd is UK resident and C Ltd is non-resident. In that case C Ltd *is* a relevant person:
B Ltd is an (e)-company because a non-(e) rel. person - A Ltd - is a participator.
C Ltd is an (f)-company as a non-(f) rel. person - B Ltd - is a participator.

It follows that D Ltd is then an (e)-company if UK resident, since a non-(e) rel. person - B Ltd - is a participator.

Example 2

The difference in example 2 is that the trustees are participators in B Ltd[41] so B Ltd is an (h)-company.

18.8.1 *Co relevant person: Critique*

Where any of these companies are relevant persons, so are
- their 51% subsidiaries and
- companies they "control" (in the ultra-wide sense)

It will be apparent that the definition of relevant person for companies is far too wide; it is not realistic to think that the rules are or ever could be applied in practice to large corporate groups of close companies.

18.9 Relevant person: Partnership

A general or limited partnership does not fall within any para of s.809M(2)(a)-(g) ITA.

A general or limited partnership does not fall within s.809M(2)(h) ITA. What if trustees control a partnership? A general or limited partnership may be a body,[42] but even if it is, the partnership is not "connected with"

[41] See 104.23.2 (Chain of wholly-owned co's).

[42] A partnership is a body in the general sense, but it is deemed not to be an entity (and so, perhaps, not a body) for IT purposes: see 85.16 (Partnership transparency: IT/CT).

the settlement within s.809M(3)(g) as it is not a company or body corporate.[43]

So a general or limited partnership as such is never a relevant person. That is not surprising, since a partnership is also not a "person" in the normal legal sense of the word.[44]

The LLP-law analysis of a UK LLP is different from the partnership law analysis of a true partnership, but the end result should be the same. An LLP is not (generally) a company for IT/CGT purposes, so it does not fall within any para of s.809M(2)(a)-(g) ITA. What if trustees control an LLP? The LLP is not connected with the settlement under s.809M(3)(g). An LLP is actually a body corporate, but it should be deemed not to be a body corporate for this purpose.[45]

Of course the members of the partnership may be relevant persons; see 18.49 (Partnerships).

HMRC agree. The RDR Manual provides:

> **RDRM33530. Partnerships** [Jan 2019]
> ... *Offshore partnerships trading or investing in the UK*
> A partnership is not a relevant person RDRM33030. Individuals who are partners together in a partnership are not relevant persons by virtue of their role as a partner (although they may, of course, be relevant persons under other provisions).

18.10 Relevant person: Pre-2008 income/gain

Para 86(4) sch 7 FA 2008 provides a transitional relief for pre-2008 income/gains:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

This transitional rule amends s.809L, so it applies for remittance conditions A/B, C and D. Corresponding amendments are made elsewhere when required:

But it is not necessary to rely on this point here.

[43] See 85.14 (Partnership: person/body corporate).

[44] See 85.14 (Partnership: person/body corporate).

[45] See 85.22.3 (LLP: Partnership terms applied).

Topic	**Section**	**Amended by**	**See**
Remittance condition C	s.809N ITA	Para 87 sch 7 FA08	18.31
Remittance condition D	s.809O ITA	Para 88 sch 7 FA08	18.34
Settlor-interested trust	s.648 ITTOIA	Para 86(4A) sch 7 FA 08	47.8.5

The para 86(4) transitional rule does not apply in other provisions, in particular: s.809Z2 (Personal use rule); para 86(2)(3) sch 7 FA 2008. The reader may wonder if that is deliberate or an oversight, but it does make sense. These are provisions where it is helpful to have a wide definition of relevant person. The point will not often arise.

Amended as para 86(4) directs, conditions A/B (set out in s.809L(2)(3) ITA) read as follows:

> Condition A is that—
> (a) money or other property is brought to, or received or used in, the UK by or for the benefit of ~~a relevant person~~ the individual, or
> (b) a service is provided in the UK to or for the benefit of ~~a relevant person~~ the individual.
>
> (3) Condition B is that—
> (a) the property, service or consideration for the service is (wholly or in part) the income or chargeable gains,
> (b) the property, service or consideration—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is property of or consideration given by ~~a relevant person~~ the individual[46]

So there is a taxable remittance of pre-2008 income/gains only if brought/received/used in the UK *by the individual.* Receipt (etc) by a relevant person does not count.

The RDR Manual provides:

> **RDRM31480. Relevant persons and foreign income and gains arising before 6 April 2008** [Jan 2019]
> [The Manual summarises the legislation and continues:]
> **Effect**
> This means that the income or gains remitted either as cash or property have to be brought to, received by or used in the UK for the benefit of the individual concerned before there can be a remittance.

[46] I can omit the provisions which follow, relating to relevant debts, as these provisions do not use the expression "relevant person".

The Manual provides a straightforward (if factually implausible) example.[47]

18.11 Relevant person: Compliance

Suppose:
(1) an individual gives income/gains to a relevant person ("R"); and
(2) R remits sums to the UK.

The individual in principle becomes liable to a tax charge. The residence of R does not matter.

However, R is under no duty to inform the individual that R has remitted sums to the UK. R is under no duty to inform HMRC, as any tax liability on the remittance is that of the individual, not of R. But the rules in theory require R to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition C. Suppose:
(1) an individual gives income/gains to a non-relevant person ("G", a gift recipient); and
(2) qualifying property is enjoyed by a relevant person (or used in respect of a relevant debt).

The individual in principle becomes liable to a tax charge. The residence of G does not matter. G is under no duty to inform the individual or HMRC. But the rules in theory require G to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition D, where any property of any third person ("P") is enjoyed by a relevant person (or used in respect of a relevant debt) and there is a connected operation (as defined). The individual in principle becomes liable to a tax charge. The residence of P does not matter. P is under no duty to inform the individual that P has remitted sums to the UK or to inform HMRC. But the rules in

[47] "Sanjay is a non-domiciled remittance basis user who transferred £10,000 of his foreign employment income from 2007-08 to his 15 year old grandchild's offshore bank account.
In 2008-09 the grandchild then remits £3,000 of this to the UK to buy himself a new computer. [How the 16 year old minor would operate the account and purchase the (rather expensive) computer is not explained, but it does not matter.]
Under the rules at section 809L this would create a taxable remittance of £3,000 by Sanjay because his grandson is a relevant person. However the transitional rule means that there is no taxable remittance of this income because it is employment income from 2007-08."

theory require P to keep records for the lifetime of the individual.

Of course in practice these rules will not (and indeed could not) be observed except in straightforward cases.

The individual has no indemnity against the relevant person, gift recipient or third party.

Under the pre-2008 remittance basis, if A (a remittance basis taxpayer) transferred A's income to any other person ("B") and B receives that income abroad, there was in general no remittance of that income if B subsequently remits the income to the UK. In the 6th edition of this work I said:

> The law could hardly be otherwise, for A will not usually know what B does with his money after it has been transferred to B.

I was wrong about that! My comment assumed that workability was a necessary requirement of UK anti-avoidance provisions. Now it is sufficient if the law is workable in simple cases.

A relevant person who bears a grudge against an individual (eg a separated spouse) may be able to trigger a significant tax charge out of spite, by deliberately remitting income/gains they have received from the individual. They may alternatively blackmail the individual by threatening to remit unless paid not to do so.

What about a gift recipient (such as an estranged adult child)? There is no charge if they remit income/gains they have received from the individual. What if they apply property they have been given for the benefit of a relevant person, eg a minor child or grandchild of the individual? This arguably does not constitute a taxable remittance under condition B, because the sums are not derived property, but it is caught by remittance condition C.

Also see 18.50 (Proceeds of divorce settlement).

The RDR Manual provides:

> **RDRM35030 remittances derived from foreign income or gains** [Jan 2019]
> ... Where an individual gives untaxed foreign income or gains to another person then they should ensure the donee is aware that they must tell the donor if the property or anything subsequently derived from it is bought to the UK in circumstances such that there would be a remittance under ITA07/s809L. ...

There is no statutory obligation to do this but failure will make compliance difficult.

HMRC say in March 2009 Qs & As Q9:

> If
> [1] the record keeping requirements are felt to be too onerous and
> [2] the probability of remittance to the UK is high
> the donor may wish to consider making a gift of taxed income or gains.

If "the probability of remittance to the UK is high" then the donor may indeed prefer a gift of taxed income/gains,[48] quite regardless of record keeping requirements. Conversely, what advice would HMRC give its customers if the record keeping was felt to be onerous but the probability of remittance was low? Or if the donor had insufficient taxed income/gains to make the gift?

18.12 Relevant person: Critique

If an individual remits their own income to the UK, they are able to spend it here and there is some sense in taxing them. The same may be said for an individual's spouse and minor children.

The extension to minor grandchildren (though not to adult grandchildren) is a novel development in tax. The policy is inconsistent with other anti-avoidance provisions, and leads to strange anomalies and nonsense.[49] The intention is perhaps to catch grandparents paying the school fees of their UK resident grandchildren – at least if the school is in the UK. The Brown administration was not supportive of private education. But that is only a surmise, as the Government never published any explanation.

The 2010 coalition administration apparently considered this point:

> 2.128 ... the Government does accept that there is value in giving further consideration to the following suggestions:
>
> - Excluding minor grandchildren from the definition of a 'relevant person'...
>
> 2.129 The Government will undertake further evaluation of these areas with a view to implementing any changes from April 2013.[50]

[48] Or other clean capital.

[49] See 18.47 (School fees).

[50] HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

In practice nothing happened.

When a family trust or company remits its income to the UK, the individual (as beneficiary or participator) is not in any way advantaged unless and until the trustees decide to transfer the income to them or to a close family member. In these respects the definition of relevant person is extravagantly wide. What was the thought process that has led to this situation? Needless to say, there was no discussion of policy issues when the rules were announced. I infer that the law is based on a conception that the remittance basis requires funds to be taxed if and when *funds* come to the UK. The policy ought surely to be to charge tax when funds are available *for personal spending* in the UK, not simply because they are invested here. The reader may think it unfortunate that the manner of the 2008 reforms precluded debate or consideration about what the remittance basis was intended to achieve.

For these reasons the definition of relevant person ought to be restricted to the individual and close family.

In the 2010/11 edition of this work I said:

> The main effect of the present rules is to impose a prohibitive tax charge on investment in the UK by the foreign domiciliary or relevant persons.

This is now recognised to an extent by:

(1) The introduction of remittance investment relief in 2012 (though that is a complex and restricted relief)

(2) The introduction of protected-trust reliefs in 2017

It is considered that the way forward is to restrict the definition of relevant person to the individual, spouse, minor children and (perhaps regrettably, but unavoidably) cohabitee. Remittance investment relief could then be abolished; it would not be needed. That would be a significant simplification, enhance UK investment, and not result in any significant loss of tax. The 2008 reform lost sight of what the remittance basis is in fact intended to catch, and overlooked that the remittance basis was, and (if it serves any purpose) still is, intended to attract wealthy foreigners to reside *and invest* in the UK.

18.13 "Property"

18.13.1 *"Property" and "money"*

The remittance basis provisions use the following expressions:

Undefined term		**Used**	**See para**
Money or other property		Often	
Property [*used by itself*]		Often	*Discussed here*
Money [*used by itself*]		809RC, 809UA, 809V	
Defined term	**Definition**	**Used**	
Property	Does not include "Money"	809X-809Z6	19.30.1
Money	Includes specified assets	809X-809Z6, para 86	19.30.2
Partly defined expression		**Used**	
(*Money defined, property not defined*)			
Property (including money)		Para 86(2) sch 7	18.53.1
Property (other than money)		Para 86(3) sch 7	18.53.2

I think it is clear that the word "property" by itself includes money, that is, it is equivalent to "money or other property".[51] In this book I use the word "property" (by itself) to mean money or other property.

When the expression "money or other property" is used, we do not care about the meaning of the word "money" because if an asset is not "money" it will be "other property".

When the expression "money" is used by itself, or in the expression "property other than money", we may have to consider the meaning of the word "money".

Property is not defined in the ITA remittance basis. It has no doubt a wide meaning, but there are limits.

18.13.2 *Sehgal v HMRC*

Sehgal v HMRC[52] is the first case on the ITA remittance basis. It is relevant to the topics of property, services, and derivation. So I refer to it several times in this chapter. I set out the facts here so I can refer to it without repeating the facts elsewhere.

Sehgal concerned convoluted transactions, as commercial transactions often do. In short:

(1) S, a remittance-basis taxpayer,[53] owed £6m to B ("the indemnity debt"). The indemnity debt had arisen in the following circumstances:

(a) A UK company owned by S ("the Debtor Company") owed £6m

[51] It follows that the reference to money is otiose; but the related expression "property of any description including money" is quite common in statutory drafting, and goes back at least to s.4 Trustee Investments Act 1961.

[52] [2022] UKFTT 312 (TC). The case is not yet final. I see little prospect of the taxpayer losing the appeal, but the reasoning may change.

[53] In more detail, there were in fact two taxpayers, but nothing turns on that.

("the inter-company debt"[54]) to another company ("the Creditor Company)

(b) S (the seller) sold Target Co to B (the buyer, an unconnected non-resident company)[55] and in doing so

(c) S gave B an indemnity that the inter-company debt would be paid. Unfortunately Debtor Co had no funds to pay the inter-company debt, so S became obliged to pay the indemnity debt to B.

A foreign chargeable gain accrued to S on the sale of Target Co.

It is very often the case that effectively the same commercial transaction can be carried out in different ways,[56] and that was the case here.

The most straightforward solution was that S simply paid the indemnity debt to B. Then:

- The payment would have been deductible in computing the chargeable gain[57]
- There would have been no remittance, since (among other reasons) no property (or service) would have been received in the UK.

Again, S might simply have transferred £6m to Debtor Co, in order that Debtor co paid its debt. In that case, property (the money) would have been received in the UK by a relevant person, for Debtor Co was a relevant person in relation to S.[58]

But the indemnity debt was satisfied in a third way:

(2) (a) A separate company owned by S ("the payor company") transferred £6m ("the third-party payment") to a company owned by B ("the payee company").[59]

[54] The indemnity debt was not a relevant debt, but the inter-company debt was. So there might also have been an interesting issue concerning relevant-debt remittances, but this aspect was not raised in argument.

[55] The sale was in 2010; it took 12 years for the matter to reach the stage of a FTT decision.

[56] See App 7.9 (Form v substance: Cardinal principle).

[57] See 56.4.9 (Contingent liabilities). Of course the deduction would only matter if the foreign gain was later remitted.

[58] There would still be no taxable remittance as the £6m was not derived from the gain; see 18.17.4 (Remittance of deductible expenses).

[59] It did this by buying assets at£6m above market value. There were said to be accountancy reasons for this contrived transaction, though the reader may wonder about that. But nothing turns on that as far as tax is concerned.

(b) In consideration of the third-party payment:
   (i) Debtor co was released from its obligation to pay the inter-company debt
   (ii) B released S from his obligation to pay the indemnity debt

In short, the inter-company debt, and the indemnity debt, were satisfied, but by a payment from a different person (not the debtor) to a different person (not the creditor).

(3) In order to fund the third-party payment, S transferred £6m out of the proceeds of sale to the payor company.

It was still the case that the £6m payment made by S was deductible for CGT purposes (even though the payment was made from S to the payor co and not to B). The issue was whether this sum was remitted.

It may be helpful to identify the 7 dramatis personae in *Sehgal* by their roles:[60]

My term	**Role**	**Tax status**	**Actual name**
S	Seller/indemnity debtor	Remittance basis user	Sehgal
B	Buyer/indemnity creditor	Non resident co	Centennial
Target Co	Company that S sold to B	Non-resident co	VGL
Debtor Co	Inter-co debt: debtor	UK co	IR
Creditor Co	Inter-co debt: creditor	UK co	Visage
Payor Co	Paid £6m to payee	Non-resident co	SKS
Payee Co	Received £6m from payor	Non-resident co	Miles

With these facts in mind, we can turn to the comments in *Sehgal* on the meaning of "property". HMRC argued that, before the third-party payment:
- S had the right to have the indemnity debt settled by a 3rd party payment
- the debtor company had the right to have the inter-company debt settled by a 3rd party payment

The FTT held that these "rights" (if that word is apt) were not "property" within the meaning of s.809L, as the rights were "conditional" (if that word is apt).[61]

[60] The discussion is easier to follow if one uses my labels, but to follow the decision one needs the actual names.

[61] at [114]. But even if the rights were property, it would be property of nil market value, so it would not matter.

HMRC next argued that after the third-party payment, S and the debtor company received property. This argument failed too. The release of a debt is not property.

The reader may think that these arguments far-fetched. But as the case progresses, we may end up with an illuminating discussion of the meaning(s) of the word "property".

18.14 Remittance condition A: UK link

Remittance conditions A and B go together: condition A requires a link to the UK, and condition B requires a link to the income/gains. Both conditions need to be satisfied to have a taxable remittance under s.809L(1)(a).

Section 809L(2) ITA provides:

> Condition A is that—
> (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person, or
> (b) a service is provided in the UK to or for the benefit of a relevant person.

There are eight ways to satisfy remittance condition A. The first six are:

(1) Property is:
  (a) brought to the UK
    (i) by a relevant person
    (ii) for the benefit of a relevant person
  (b) received in the UK
    (i) by a relevant person
    (ii) for the benefit of a relevant person
  (c) used in the UK
    (i) by a relevant person
    (ii) for the benefit of a relevant person

I refer to these as the **"brought" limb,** the **"received" limb,** and the **"used" limb** of condition A. I refer to property within (1) as "**property brought/received/used in the UK**".[62]

The last two ways to satisfy condition A are:

(2) A service is:

[62] One might refer to it as "condition A property" or "UK property" but I think it is clearer to use the clumsy expression "brought/received/used". I leave the words "by/for the benefit of a relevant person" to be implied.

(a) provided in the UK to a relevant person
(b) provided in the UK for the benefit of a relevant person

18.14.1 *Property brought to UK*

The first two ways to satisfy remittance condition A are:

(a) Property is brought to the UK by a relevant person
(b) Property is brought to the UK for the benefit of a relevant person

This limb requires one to identify whether property is brought to the UK, and if so who brings it to the UK, or for whose benefit it is brought. If a relevant person brings it, condition A is satisfied. If someone else brings it, para (a) is not satisfied.

For instance, suppose T owns a chattel outside the UK, and wishes to lend it to a non-relevant person, eg an adult child, in the UK.

(1) If T brings the chattel to the child in the UK, there is a taxable remittance.
(2) If the child collects it abroad, or arranges for a courier to bring it, then para (a) does not apply. No other part of condition A applies, so there is no taxable remittance.

What if T instructs a courier to bring the chattel to the child in UK? One might think that T (by instructing the courier) has brought the chattel to the UK. But comparing this with cases (1) and (2) it is considered that the courier (not T) has brought the chattel to the UK, so there is no taxable remittance. It would be strange if the administrative matter of who instructs the courier should determine taxability.[63]

This could be relevant if a remittance basis taxpayer wished to lend to a museum, as it would not usually[64] be necessary to meet the conditions of the public access rule.

Para (b) would apply if N holds property as nominee for T, and N brings the property to the UK. This would apply if N was bare trustee or a trustee of an IIP trust under which T is life tenant.

18.14.2 *Property received in UK*

The next two ways to satisfy remittance condition A are:

[63] This is consistent with the HMRC view discussed in 18.14.5 (Property in transit). For gifts of cash, see 18.14.6 (Gift to non-relevant person).

[64] The public access rule would be needed if the museum was a relevant person.

(c) Property is received in the UK by a relevant person
(d) Property is received in the UK for the benefit of a relevant person

This requires one to ask where property is received (or more precisely, whether property is received in the UK); the answer is by no means obvious. If property is received in the UK, the question is who receives it, or for whose benefit is it received.

We need the "brought" limb as well as "received". T can receive an asset in the UK without bringing it here, eg:

(1) on the purchase of a UK situate chattel
(2) on a bank transfer to a UK account[65]

Can T "bring" an asset to the UK without receiving it in the UK? Perhaps an example is if T acquires a chattel outside the UK, and packs it in T's luggage; or acquires a car outside the UK and drives it to the UK. T "brings" the chattel or car to the UK, but does not "receive" it here.[66] So both these limbs of condition A are needed.

Para (d) would apply if:

(1) N holds property as nominee for T, and N receives the property in the UK. This would apply in particular if
    (a) N is a bare trustee or
    (b) N is a trustee of an IIP trust under which T is life tenant.[67]
(2) A payment is made into an overdrawn account. For instance, suppose a UK bank account of R (a relevant person) is £200 overdrawn, and a payment is made into the account of £100. R's debt to the bank is reduced by £100. R does not receive any property. But the bank receives the property in the UK for the benefit of R.

18.14.3 *Property used in UK*

The next two ways to satisfy remittance condition A are:

(e) Property is used in the UK by a relevant person
(f) Property is used in the UK for the benefit of a relevant person

This requires one to ask whether property is used, where property is used,

[65] See 18.14.6 (Gift to non-relevant person).

[66] It is arguable that an asset can only be received once, so if it is received outside the UK it cannot later be received in the UK, but whether or not that is right, in the case of a chattel or car, there is no identifiable act of "receipt" in the UK.

[67] See 42.5 (Life tenant remittance basis user).

who is the user, and what exactly is the property which is used.

It is suggested that "used" means enjoyed in specie, and property is used where it is situate.

It is difficult at first sight to see the role of the "used" limb of condition A. Normally if T uses property in the UK, T (or a relevant person) will have brought or received it in the UK, so the "brought" or "received" limbs will be satisfied. But there could arguably be a case where property comes to be held by T without being brought or received in the UK by T[68] and in such a case the "used" limb is needed.[69]

If a creditor enforces a debt, and receives money due, one does not say that the creditor is "using" the debt in the normal sense of the word, though the creditor could be said to be using rights attached to the debt. But it is not clear where these rights are used. So it is suggested that the used limb does not apply to debts or other choses in action.

If money is spent, it is "used" in the normal sense of the word.[70] However it is not clear where money (other than cash) is used, so it is not clear how one decides whether it is used in the UK. It is suggested that spending money should be dealt with under the receipt limb, or the brought limb of condition A, or under the relevant debt rule, eg using money to pay a debt may be a relevant-debt remittance of the money; but the used limb does not apply: the money is not used in the UK. Money in a bank account is in law a debt, so that is consistent with the above. In short, in the "used" limb of condition A, "used" means used *in specie*.

18.14.4 *Bank entries*

Where an individual transfers money from their foreign bank account to another foreign bank, that naturally involves entries in records ("books") of both banks. What if those records are kept in the UK?[71] Remittance

[68] See 18.14.8 (Acquisition of UK security).

[69] There could of course be a case where property is brought or received in the UK by a non-relevant person and used by T, eg if T gives RFI to a brother who purchases a house which T occupies. In that case condition A is satisfied under the "used" limb. But condition B is not satisfied (the house is not property of a relevant person) so the question whether condition A is satisfied does not arise. This situation is covered instead by remittance condition C.

[70] That is self evident, but if an example is needed, see s.809VA ITA referring to money being "used" to make an investment.

[71] This is understood to be the position for Channel Island and IoM banks. But nowadays, I expect, accounting records may be duplicated in the cloud, and not kept

condition A is not satisfied: the funds are not brought/received/used in the UK. I think that is self-evident; but for completeness, the RDR Manual confirms the point:

> **RDRM33560 Banking Issues** [Jan 2019]
> **Banking Transactions**
> Transfers between foreign centres often pass through the UK banking system, for example when a sterling payment is made abroad and the payment is cleared through London in the normal banking process.
> In such circumstances HMRC do not regard the passage of funds through the UK as being a taxable remittance.
> The machinery employed is irrelevant provided that, without express provision, the individual has:
> - no right to payment at any intermediate point; and
> - no control over the funds transferred by their foreign bank to secure payment at the agreed point.

Similarly, the EI Manual provides:

> **EIM40302 Meaning of "remitted to the UK"** [Jan 2021]
> [1] Earnings are remitted to the UK if they are paid to the employee in cash in this country or if the employee's bank account here is credited with them. Employees may arrange to have earnings paid into offshore bank accounts to avoid this rule.
> [2] Money that is transmitted from the employer's bank in the UK to the employee's offshore bank is not treated as remitted here. It has been in the banking system all of the time; the employee did not have access to it.

EIM para [1] is obviously correct, and there is no reason to think that the circumstances described in the RDRM amount to a remittance. But the statements (underlined) that money *"passes through the UK"* or *"through the UK banking system"* or that money has *"been in the banking system"* is layman's language. The image is one of coins or banknotes, leaving one bank, and entering into another bank, where they are stored in its vaults for safekeeping, and where they belong to a customer of the bank, in some version of the vault at Gringotts. But this is not how banking works. Banking law draws a different distinction between the accountholder's money and the bank's money. In *Foskett v McKeown*:[72]

in any one identifiable place. .

[72] [2001] 1 AC 102 at p.127.

> We speak of money at the bank, and of money passing into and out of a bank account. But of course the account holder has no money at the bank. Money paid into a bank account belongs legally and beneficially to the bank and not to the account holder. ... there is no money in the account. There is merely a single debt of an amount equal to the final balance standing to the credit of the account holder. No money passes from paying bank to receiving bank or through the clearing system (where the money flows may be in the opposite direction). There is simply a series of debits and credits which are causally and transactionally linked.[73]

18.14.5 *Property in transit*

The same approach is applied in March 2009 Qs & As to physical assets transported by a courier through the UK:

> **Q17:** Will HMRC apply the same principle, expressed in relation to mechanistic banking transfers which pass through the UK in the banking system, in a case where a courier passes through the UK in transit carrying property not covered by the temporary importation exemption?
> **A:** Yes. In principle, where the "passing through" is a mechanistic part of the courier service provision and, no relevant persons have any rights to use or access the property at any intermediate point; and no control over how property is transported to and from the agreed points. In such circumstances the passage of property which merely "touches" the UK would not be regarded as a sum remitted to the UK.

More analytically, remittance condition A is not satisfied because the owner of the property:
(1) does not receive it in the UK;
(2) does not bring it to the UK (the courier brings it; or it is not "brought" at all, in the relevant sense, as its UK presence is transitory).

[73] Likewise, *Foley v Hill* (1848) 2 HLC 28 at p.36:

> "Money, when paid into a bank, ceases altogether to be the money of the principal ... ; it is then the money of the banker, who is bound to return an equivalent by paying a similar sum to that deposited with him when he is asked for it. The money paid into the banker's custody... is then the banker's money; he is known to deal with it as his own; he makes what profit of it he can, which profit he retains to himself, paying back only the principal, ... or the principal and a small rate of interest ..."

I am not aware of differences in other legal systems, and it difficult to see how there could be, as banking is an international activity.

This is consistent with art 26(1) United Nations Convention on the Law of the Sea:

> No charge may be levied upon foreign ships by reason only of their passage through the territorial sea.

In the Dover Strait, the southerly shipping lane is territorial sea, and so counts as part of the UK;[74] but there is no taxable remittance of a foreign ship, or, presumably, property in the ship, unless or until it enters a UK port or inland waters.

18.14.6 *Gift to non-relevant person*

In *Timpson's Executors v Yerbury*[75] (a pre-2008 remittance case):

(1) Mrs Timpson ("T") gave cheques representing her income to her children.
(2) The children cashed the cheques which were credited to their bank accounts in the UK.

Thus the income was received in the UK, but it was not received by T. This was nevertheless held to be a taxable remittance by T. Romer LJ and (I think) Greene LJ decided *Timpson's Executors* on the basis that there was a taxable remittance if:

(1) money is received in the UK by a third party at T's direction, and
(2) immediately before receipt, the money (or funds representing it) belonged to T.[76]

This is not the law under the ITA remittance basis. Remittance condition A requires that property is brought/received/used in the UK *by or for the benefit of a relevant person*. So if a remittance basis taxpayer writes a cheque on a foreign bank account, gives it to a donee (not a relevant person) who pays the cheque into their UK bank account, remittance condition A is not satisfied. The receipt of the cheque is not a remittance.[77] The money is received in the UK by the donee (not by a relevant person); and if it is brought to the UK, it is brought in by the donee.

[74] See App.2.19.5 (Territorial sea).

[75] 20 TC 155 followed in *Walsh v Randall* 23 TC 55.

[76] The judgments are discussed in detail in the 2012/13 edition of this work, but this is now of historical interest only.

[77] See 18.18.17 (Receipt of cheque in UK).

Suppose (instead of a cheque) T makes a gift to a donee (not a relevant person) by electronic transfer from T's offshore account to the UK account of the donee. It is considered that remittance condition A is not satisfied. It would be strange if there were a difference between payment by cheque and a direct electronic transfer. At first sight it seems that T "brought" the money into the UK (even though T did not receive or use it in the UK). But the better view is nothing is *brought* to the UK. One needs to understand the banking law background. A bank transfer involves the destruction of an asset (T's claim against T's bank) and the creation of a new asset (the donee's claim against the donee's bank, which may of course be a different bank).[78] The new asset is received in the UK but not brought to the UK.[79]

In addition, remittance condition B is not met. This requires that the property "is property of ... a relevant person." At the time the property is received in the UK, which is the time which matters,[80] the money is property of a non-relevant person.

[78] "It is something of a misnomer to speak of the transfer of funds, as there is no actual transfer of coins and bank notes from the payer to the payee, and no assignment of the debt owed to the payer by their own bank." Brindle & Cox, *The Law of Bank Payments* (5th ed., 2017), para 3-002; *R v Preddy* [1996] AC 815 at p.841D and p.834: "The question remains, however, whether the debiting of the lending institution's bank account, and the corresponding crediting of the bank account of the defendant or his solicitor, constitutes obtaining of that property. The difficulty in the way of that conclusion is simply that, when the bank account of the defendant (or his solicitor) is credited, he does not obtain the lending institution's chose in action. On the contrary, that chose in action is extinguished or reduced pro tanto, and a chose in action is brought into existence representing a debt in an equivalent sum owed by a different bank to the defendant or his solicitor. In these circumstances, it is difficult to see how the defendant thereby *obtained property belonging to another,* ie to the lending institution....I start with the proposition that the money in a bank account standing at credit does not belong to the account holder. He has merely a chose in action which is the right to demand payment of the relevant sum from the bank. I use the word money for convenience but it is of course simply a sum entered into the books of the bank. When a sum of money leaves A's account a chose in action quoad that sum is extinguished. When an equivalent sum is transferred to B's account there is created in B a fresh chose in action being the right to demand payment of that sum from his bank."

[79] If that is right, it does follow that that the words "bringing of money to the UK" in s.809V ITA are either redundant or informal; see 19.24 (Relief on paying remittance charge). But an argument from redundancy carries little weight; see 2.1.2 (Argument from redundancy).

[80] See 18.26.2 (Condition B).

The practice before 2008 was for remittance basis taxpayers to make the gift abroad (by payment into a foreign bank account of the donee). This will no doubt continue, even though it is not strictly necessary, because HMRC may not agree with this analysis. The RDR Manual provides:

> **RDRM33140 Condition B - direct remittance of income and gains**
> [Jan 2019]
> Example 5 (Tyler)
> T, a remittance basis user, donates an amount of money to a Battersea Dogs Home, a UK charity, by making a payment direct to the charity from his US bank account which contains his relevant foreign income. There has been a direct remittance of T's income into the UK; it does not matter that he or any other relevant person does not benefit personally from the money...

In the usual style of the Manual, the example states a conclusion without addressing the relevant statutory provisions, and it is not likely that the author has considered the technical issues.

If the HMRC view were right, then law reform would be appropriate, as there is no point in forcing donees to open foreign bank accounts. But all that is needed is a statement of practice which recognises the existing law.

See too 18.29.1 (Gift of income/gains: Navigation).

18.14.7 *Arm's length payment to non-relevant person*

Similar points apply to an arm's length payment to a non-relevant person. This might arise if a payment (out of income/gains) is made for a foreign asset. Suppose:

(1) T pays to X the purchase price of an asset which T receives outside the UK.
(2) T subscribes for shares in a non-close[81] offshore company X Ltd.

If T pays the money to the UK bank account of X, there is a tenable argument that there is no taxable remittance, on the grounds that neither condition A nor condition B are satisfied.

As to condition A: The sum is not received in the UK by T. It is considered that the money is not received in the UK for the benefit of T. X receives the money for his own benefit (even though the effect of the payment is to satisfy T's debt). The sum is not used in the UK, and, for

[81] I specify X Ltd is not close, so it will not be a relevant person in relation to T.

the reasons set out above, is not brought to the UK.

As to condition B: Even if the money in X's account derives from T's income/gains (which is debatable) it is not property of a relevant person.

This gives a sensible result. There is no remittance in any real or meaningful sense, and no reason why one would expect a tax charge to arise.

The same applies if the payment is consideration for a service provided outside the UK. A payment which is consideration for a service provided in the UK is taxable wherever received, if the consideration is given by a relevant person (unless foreign services relief applies).

HMRC may not agree. A payment into a foreign account of X is desirable, though it is unfortunate that X must be put to the trouble of opening a foreign bank account. HMRC have argued:[82]

(1) A purposive approach requires a remittance. That depends of course on identifying the purpose. One might think that the purpose of the remittance basis is to tax individuals who have spending money in the UK, not spent money relating to outside assets. HMRC will argue that the purpose is wider. But what is the purpose in forcing the vendor to open a foreign account? Purposive arguments are always vulnerable to the weakness of framing the purpose to fit the desired outcome.[83]

(2) A banking law analysis (that nothing is brought to the UK) is a "technical" argument. No doubt it is. HMRC argue for what may be described as a technical remittance. Allegations of "technical" arguments may go both ways, which tends to suggest doubt as to whether "technical" is a useful analytical concept, or mere pejorative rhetoric, or another synonym of a non-purposive approach.[84]

(3) The provisions should be construed in a real-world commercial manner. If this means anything other than a purposive approach, this lies the realm of rhetoric and not argument.[85] No-one would argue for an unreal and uncommercial manner of construction, but what does that mean and how does one decide which is which?

Note how "real", "technical" and "purposive" are all thrown into the

[82] Private correspondence.

[83] See App 9.4 (Difficulty of ascertaining tax policy).

[84] See App 1.8 (Technical).

[85] See App 7.5 (The real world).

submission pot. Perhaps they are three ways of putting the same point.

(4) The wording of s.809V(1) ITA (relief for payment of remittance basis charge)[86] supports the HMRC view. It assumes that payment to HMRC is bringing money to the UK. That is a more traditional approach of construction, and there is something in this point.

18.14.8 *Acquisition of UK security*

In the following discussion, a **"UK security"** means a security[87] which is UK situate (usually because the company's register is UK situate).

What is the position if T uses RFI to acquire a UK security, eg purchases a security from a third party? I assume for simplicity that:

(1) The company which issued the security is not a relevant person.[88]

(2) The RFI itself is not brought/received/used in the UK by a relevant person (I assume payment is made outside the UK).

The question then is whether the UK security is brought/received/used in the UK.

The "brought" limb of condition A is not satisfied: the UK security is not brought to the UK.

HMRC might rely on the "received" limb. The UK security is "received" by T, but does T receive it *in the UK*?

The ITA remittance basis requires one to identify where property is received. Identifying the place of receipt of property is comparable in two respects to identifying the situs of property or the location of a source of income:

(1) Just as every asset has a situs (and only one situs),[89] and every source of income has a location (and only one location),[90] it is considered that property should have one (and only one) place of receipt.

(2) In the case of tangible property, the place of receipt should be clear. In other cases, just as the situs and source rules, there are no satisfactory solutions and the question can only be answered by somewhat arbitrary selection of connecting factors.

[86] See 19.24 (Relief on paying remittance basis charge).

[87] I use the term here to include shares and debt-securities.

[88] See 18.18.8 (T subscribes for shares in R Ltd).

[89] See 102.3 (Every asset has one situs).

[90] See 16.3 (Approach to locating source).

But while situs and source are old questions, governed by well-established rules, the place of receipt of an asset is a new question on which no guidance is to be found.

Money paid to a beneficiary's bank account is received where the account is kept.

It is considered that a security is received where the security is situated under private international law rules. I have considered whether the security might be received in the jurisdiction whose law governs the transfer or creation of the security. But that relates to how the security is received, and not where it is received.

It is arguable that T does not receive property in the UK: either the security is not received anywhere, or else it is received in the place of the law governing the transfer or creation of the security (which may or may not be a UK law). On that argument, while condition A is satisfied if the individual actually uses the security in the UK, merely acquiring UK situate securities may not be not enough.[91]

HMRC do not agree. One of the RDR Manual's examples of taxable remittances is the receipt of UK securities:

> **RDRM33050 Practical Examples of Remittances to UK** [May 2020]
> [Taxable remittances include:]
> - You buy shares or bonds in a UK registered plc from a foreign broker with your foreign income.

If receipt of a UK security is receipt of an asset in the UK, then there is the surprising consequence that (except for "money", as defined) the temporary importation rule would apply.[92]

In practice the answer is not to acquire UK securities except out of clean capital. In some cases it may be possible to make the security situate outside the UK, by using bearer securities or specialty debts, and arranging that the document is kept outside the UK.

18.14.9 *Disposal of UK security*

If a security is not received in the UK, so remittance condition A is not met on the acquisition of the asset, the question arises whether the asset

[91] If this were wrong then words "used in" in remittance condition C (and perhaps condition A) would arguably be otiose since chattels used in the UK must be received in or brought to the UK.

[92] See 19.34 (Temporary importation rule).

might later be used in the UK. It is arguable that "use" is appropriate to chattels but not to intangible property. Does the sale or redemption of a security amount to "use"? If it does, is the asset used "in the UK" just because the asset is situate here? Or is something else required, and if so what? The difficulties in these questions support the view that the term "use" does not apply to securities.

18.14.10 *Acquisition of UK debt*

Similar issues (but not quite identical) arise in relation to simple debts, ie debts which are not securities.

In the following discussion, a **"UK debt"** means a debt which is UK situate (usually because the debtor is UK resident).

What is the position if T lends RFI to a person ("the debtor")?[93]

I assume for simplicity that:

(1) The debtor is not a relevant person.[94]
(2) The RFI itself is not brought/received/used in the UK by a relevant person (assume payment is made outside the UK).

The question then is whether the UK debt is brought/received/used in the UK.

The "brought" limb of condition A is not satisfied: the UK debt is not brought to the UK.

HMRC might rely on the "received" limb. The UK debt is "received" by T, but does T receive it "in the UK"?

It is suggested that a debt is received where the debt is situated under private international law rules. It is arguable that T does not receive property in the UK: either the debt is not received anywhere, or else it is received in the place of the law governing the transfer or creation of the debt (which may or may not be a UK law). On that argument, while condition A is satisfied if the individual actually uses the assets in the UK, merely acquiring UK situate assets may not be not enough.[95]

There is no HMRC guidance (the RDR Manual passage discussed above refers only to "shares or bonds").

If receipt of a UK debt is receipt of an asset in the UK, then there are

[93] Similar issues arise if T purchases a simple debt, but that is less common.

[94] See 18.18.7 (T lends income/gains to B).

[95] If this were wrong then words "used in" in remittance condition C (and perhaps condition A) would be otiose since chattels used in the UK must be received in or brought to the UK.

some surprising consequences:

(1) There might be a taxable remittance if an individual lends to a UK resident (even if the borrower is not a relevant person) since the lender receives a debt and a debt from a UK resident debtor is usually UK situate.

(2) There might be a remittance if T sells a foreign asset to a UK resident and:

   (a) the sale price remains outstanding for a time as a debt, because the debt is UK situate; or

   (b) the sale price is unascertained, and so a contractual chose in action, as in *Marren v Ingles*,[96] because the contractual right is UK situate.[97]

   In these two cases it is suggested that mere delays in payment should not count as remittences; the debt or contractual right (even if UK situate) should be characterised as merely a step in the mechanism of payment and not as an independent receipt.

(3) In the case of a debt other than "money" (as defined) the temporary importation rule would apply.[98]

A cautious approach where possible is to make the debt situate outside the UK, which might be done by using a specialty debt, and arranging that the document is kept outside the UK.

What if the debtor is non-resident but later becomes UK resident? It is suggested that the debt is received outside the UK, and it is not brought to the UK by (or for the benefit of) a relevant person, so the change of residence of the debtor does not constitute a remittance.

18.14.11 *Disposal of UK debt*

If a debt is not received in the UK, so remittance condition A is not met on the acquisition of the asset, the question arises whether the asset might later be used in the UK. It is arguable that "use" is appropriate to chattels but not to intangible property. Does the calling in a debt amount to "use"?

[96] See 56.4.6 (Chose in action analysis).

[97] See Firth, "A trap for remittance-basis taxpayers: the situs of choses in action" GITC Review, Vol.XI no.2 *http://taxbar.com/wp-content/uploads/2016/01/A_Trap_for_Remittance_-_Basis_Taxpayers_The_Situs_of_Choses_in_Action_Michael_Firth.pdf.pdf*

[98] See 19.34 (Temporary importation rule).

If it does, is the asset used "in the UK" just because the asset is situate here? Or is something else required, and if so what? The difficulties in these questions support the view that the term "use" does not apply to intangible assets.

18.14.12 *Situs of property for condition A*

There are no statutory situs rules for income tax, so the common law/private international law rules apply.[99] So money received in a UK branch of a foreign bank is remitted, but money received in a foreign branch of a UK bank is not remitted.[100] Money is remitted if received in:
(1) a UK account in the name of the taxpayer, and held by them beneficially; or
(2) a UK account held in the name of a third party who holds on trust for the taxpayer.

CGT has statutory situs rules. But it is considered that the effect of para 5(3) sch 1 TCGA[101] is to incorporate the ITA rules, so the CGT situs rules do not apply for the purpose of remittance condition A. That view is supported by s.809W(6) ITA, which applies the CGT situs rules specifically for the purposes of foreign services relief.[102] If that view were wrong, there could be a remittance under the CGT remittance basis when a remittance basis taxpayer:
(1) places sterling in a foreign bank account, as the account is regarded as UK situate for CGT;[103] or
(2) sells and leaves the purchase price outstanding, since the right to the purchase price is a UK situate asset under the CGT situs rules.

18.14.13 *Co with UK asset (secondhand co*)

Suppose T acquires a non-UK company which holds a UK asset. If the UK asset is not enjoyed in specie by T or a relevant person, then Condition A is not satisfied. If the UK asset is (say) a house, which is occupied by T, then remittance condition A is satisfied. However, remittance condition B is not satisfied.[104]

[99] See 102.1 (Concepts of situs).
[100] See 102.23 (Bank account).
[101] See 18.1.1 (Scope of ITA remittance basis).
[102] See 19.26 (Services condn A: Non-UK property).
[103] See 103.12 (Bank account).
[104] See 18.18.11 (T purchases R Ltd (secondhand co)).

18.15 Service provided in UK

The next way to satisfy remittance condition A is:

> *(e) a service is provided in the UK to a relevant person*

Basic planning is to use services provided outside the UK where possible, eg foreign investment advice, foreign accountancy services, foreign travel agencies, and foreign schools. Of course tax is not the only consideration here; and foreign services relief, if applicable, may allow the use of UK-based service providers.[105]

18.15.1 *"Service"*

In *Sehgal v HMRC*, in short,[106] payor co made a payment to payee co in consideration of which, a third person (B):
- released a debt (the indemnity debt) owed by S to B
- procured the release of a debt (the inter-company debt) owed by debtor co to creditor co.

It would not have occurred to me that B was providing a service to S, or to debtor co, by releasing or procuring the release of their debts. But the FTT held that it was:

> 135. Considering the definition of a "service" suggested by the Appellants from the *Richmond on Thames*[107] decision "any self-employed economic activity, normally provided for remuneration" we do not think that it is stretching the meaning of "service" too far to suggest that this was some sort of financial service, in the same way as someone providing a third-party guarantee or credit protection insurance is providing a service.
> 136. From both the Appellants' and IR's perspective the "service" was commercial and for consideration, being the extinguishing of their obligations under the Indemnity (the Appellants) and the waiving of its debt obligations (IR). We think it is clear (!) in this context that an agreement not to take an action or pursue a claim can be a "service".

Reliance on the *Richmond on Thames* case was misplaced, as that concerned legislation with an express definition of "service"; and the analogy of guarantees or insurance is misplaced, as those are ongoing

[105] See 19.25 (Foreign services relief).

[106] For the facts in detail, see 18.13.2 (Sehgal v HMRC).

[107] *R (oao Gaskin) v Richmond Upon Thames BC* [2018] EWHC 1996 (Admin).

liabilities. It did not matter, as the taxpayer won on another point.[108] But as the case progresses, we should end up knowing more about the meaning(s) of the word "service".

18.15.2 *Where are services provided*

The rule requires one to identify the place where a service is provided, or at least whether it is provided in the UK. See 34.30 (Where are duties performed).

In some cases this is straightforward. In other cases there is no obvious answer:[109] the connecting factors could be:

(1) where the work is done
(2) where the supplier is based
(3) where is the property (if any) to which the service relates
(4) where the customer is based

If a service is provided by an individual or individuals at a particular time and place, the service is provided in the place where the individual(s) are when the service is provided. In other words, the connecting factor should be where the work is being done, when that is physical work carried out in a physical location.[110] Thus a person outside the UK who is on the phone/Skype/Zoom/Teams with a person in the UK is providing his services outside the UK. If UK counsel is instructed to appear in a court outside the UK, the service is provided outside the UK. But advisory work or drafting is provided where counsel is based.

Where services are performed by a team of people, and do not involve work in a single location, the services should be said to be provided where the supplier is based. If a supplier is based in two places, the service is provided in the base most closely connected with the supply.

In practice, physical work will generally be done where the supplier is based, so factors (1) and (2) will normally point the same way. But that is not necessarily the case. If one instructs a French firm to do building work in the UK the service is provided in the UK: if one instructs a UK firm to do building work in France, the service is provided out of the UK.

Factor (3) cannot be decisive as foreign services relief assumes that a

[108] See 18.17.4 (Remittance of deductible expenses).

[109] To say that the question is just one of fact is not an answer, but only a way of avoiding the question: see 26.15.1 (Source of interest: Critique).

[110] See 34.30 (Where are duties performed).

service which relates to property situate outside the UK may be a service provided in the UK.[111]

The RDR Manual is consistent with this view. It provides:

> **RDRM34040. Relevant services provided in the UK** [Jan 2019]
> ... A service is regarded as having been provided in the UK if the providers of that service are based in and give that service in the UK....

"Based in" the UK is my factor (2). I understand that the words *"and give that service in the UK"* is my factor (1), where physical work is done. This is therefore an easy case where both factors point the same way.

The RDR Manual goes on to give this example:

> *Example 1 (Chandra)*
> C, a remittance basis user, engages an investment manager based in the UK to manage her portfolio of investments in foreign stocks and shares of overseas concerns. ...
> The service - the management of the portfolio - is provided in the UK to C...[112]

This is a case where there is no physical work within factor (1), so one falls back on factor (2), where the supplier is based.

In *Sehgal*[113] the "service" (if it was a service) was the release of a debt.

[111] See 19.25 (Foreign services relief).

[112] March 2009 Q&As made the same point:

> **Q23**: ... If a service provider engages with the Jersey resident trustees of a trust of which a UK resident but non-domiciled individual is a beneficiary and settlor and provides advice which is prepared and issued from the UK, but received and read in Jersey, it is not clear if this would be "a service provided in the UK."...
> **A**: ... The general rule is that, for the purposes of this condition, a service is regarded as being *provided in the jurisdiction where the providers of that service are based*. Advice which is researched, prepared and issued from the UK would therefore fall within the definition of "provided in the UK" irrespective of where the client might receive it.
> **Q24**: As part of providing advice to clients who have an international aspect to their affairs, a service provider may prepare advice in several different jurisdictions, which may then be issued from only one office, and therefore country, that being the office which has the main relationship with the client.
> **A**: In the case where an offshore service provider provides advice which has been prepared in several different jurisdictions, the same approach will need to be taken to determine whether the test in section 809L is met, and, *because the advisers in your scenario are based in the UK, their service will be provided in the UK.*
> (Emphasis added)

[113] See 18.15.1 ("Service").

This was said to be provided in the UK:

> 137. We then have to determine whether that service was provided in the UK; as far as [debtor co] is concerned, it is in the UK, the agreement is governed by UK law and the relevant debts [the inter-co debts] are between two UK companies. It is hard to see how, if a service has been provided, it can have been provided anywhere other than in the UK; the effect of the service was certainly in the UK, it is [debtor company's] debt obligations in the UK which are waived.
> 138. We also note that the descriptions of services provided in the UK in HMRC's manual suggest that if a service is enjoyed in the UK, it is treated as made in the UK for these purposes (see RDRM 33130).
> 139. The situation for [B] is more complicated, they are not in the UK (?), but the Side Letter is governed by UK law and the SPA [share purchase agreement] was governed by UK law.
> 140. Of the indicia suggested by HMRC to determine the place where services are provided for these purposes, in our view where the services relate to the release of a debt, the most important indicia is where the debt is located; by reference to the normal application of situs rules, the debts owed by the Appellants have a UK situs and therefore the service should be treated as made in the UK.
> 141. For these reasons we have concluded that the release of the obligations of both B and [debtor company] does entail providing a service in the UK under Condition B.

18.15.3 *Identifying the services*

In order to decide where a service is provided, it is necessary to identify the service or services which are provided.

The RDR Manual gives an example:

> **RDRM34040. Relevant services provided in the UK** [Jan 2019]
> ... *Example 5 (Sarah)*
> S, a remittance basis user, purchases an air ticket using her foreign income and gains to travel from Sweden to Holland, using a UK based booking agency. Payment is made into the agency's offshore bank account.
> There is a 'service provided in the UK', which is the agent's booking services, so the part of the cost of the service that relates to the agency's booking fee is a remittance (although not the cost of the flight between Sweden and Holland as no part of this service is provided in the UK). ...

There are two possible ways to understand this:

(1) There are two services, a booking service and a transport service.

(2) There is only one service, but it may be apportioned between the part made in the UK, and the part outside the UK.

These are two routes to the same destination, but I prefer solution (2). Solution (1) raises a distinction between (1) single (though composite) services and (2) multiple (but distinct) services. A similar distinction is drawn for VAT between multiple/composite supplies, but it has proved to be problematic.

In order to decide where a service is provided, it may be necessary to identify who is providing the service. If solicitors instruct counsel, counsel's services are usually provided to the solicitors.[114] But if the solicitors simply provide counsel's services on to the lay client, the position is the same as if counsel's services were provided directly, ie the place where counsel provides the services to the solicitors is the same place where the solicitors provide those services on to the lay client.

18.15.4 *Travel to/from UK*

Where one travels entirely within the UK, the services are provided in the UK and where one travels entirely outside the UK, the services are provided outside the UK. What is the position if the journey begins in the UK and ends outside, or begins outside the UK and ends within? Possible solutions are:

(1) The services are provided in the UK if the journey is wholly or partly in the UK, ("view 1")
(2) The services are only provided in the UK if the journey is wholly in the UK ("view 2")
(3) Apportion the journey into two parts ("view 3").

None of these are satisfactory.

View 1: The statute does not refer to a service which is provided "wholly or in part" in the UK and the fact that that expression is used elsewhere in the same section on *four* occasions suggests view 1 is not correct. Also view 1 is not fair to the taxpayer, particularly in a case where the UK

[114] COMBAR and Bar Council standard terms provide that the contract is between counsel and solicitors, not the lay client. De Voil Indirect Tax Service (looseleaf) para V6.134 provides: "Normally the instructing solicitor is regarded as the barrister's client and the supply will hence be seen as being made to [the solicitor]. However, the principles described in V3.128 on how to identify the recipient of a supply of services will be relevant."

element is small.

View 2 is likewise unfair to HMRC.

View 3 is correct but impractical, as (1) there is only one service and it is not clear that one can divide that into two parts; (2) apportionment of relatively small amounts would be laborious.[115]

The best answer is that in this case factor (1) - where physical work is done - does not provide a solution, and one should rely on factor (2) - where the supplier is based.[116] That will normally be clear.[117]

What is the HMRC view? The RDR Manual provides:

> **RDRM34040. Relevant services provided in the UK** [Jan 2019]
> *... Example 4 (Charlotte)*
> C, a remittance basis user, purchases a return air ticket using her foreign income. The ticket is to travel from the UK to Belgium and return. *The ticket was purchased from a UK company* but payment was made into the company's offshore bank account.

The HMRC analysis is as follows:

> Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK [ie the service is provided in the UK]. ...[118]

This is consistent with my analysis if it is significant that the HMRC

[115] A third possible difficulty arises if there were a flight between two non-UK destinations, but which involved flying over the UK. it is considered that a person flying over the UK is not, for this purpose, "in" the UK; contrast 18.14.5 (Property in transit).

[116] The same considerations led OECD Model to a comparable rule. Art 8(1) OECD Model provides: "Profits from the operation of ships or aircraft in international traffic shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated."

[117] The position for Eurostar may require further examination.

[118] For completeness: there is another version of this example in RDRM33130 [Jan 2019]:
"*Example 3*
Charlotte, a remittance basis user, purchases an air ticket using her foreign income. The ticket is to travel from the UK to Belgium. The ticket was purchased from an overseas company and payment made into the company's offshore bank account.
Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK."
This is incoherent, since the example states there is a ticket from the UK to Belgium, but the analysis states the journey ends in the UK.

example specified that the purchase was from a UK company. But that is not the way that HMRC express their reasoning. Fact-rich examples in the style of the Manuals make light reading but dim guidance.

In 2013 HMRC set out standard form letters to UK resident remittance basis taxpayers ("nudge letters").[119] The letters gave examples of what constituted a taxable remittance including:

- You buy a return air fare from New York to London overseas using your foreign income.
- You book a holiday with a foreign travel agent to sail from Southampton to New York which you pay for with your foreign income.[120]

One may infer that the HMRC now take view 1, and regard a transport service as provided in the UK if any part of the journey is in the UK. The difficulty in resolving the point is that the sums in any one case are not likely to justify litigation by the individual, but the point is worth litigating by HMRC. However if an individual needs to fight on some other more weighty issues, then this may come to the tribunal as an additional point. Some private jet providers, such as Netjets, render two levels of charges. One is a standing, fixed charge and the other is a charge based on actual usage and is therefore variable. The variable charge is like any other plane ticket. What about the fixed charge? It could be allocated based on a percentage of annual UK to non-UK usage per taxpayer. But the better view is that the fixed charge is provided where the supplier of the service is based.

Some providers sell a block of (say) 25 hours flight, and the actual flights do not take place until later. It could be that the place the service is provided is determined when the fee is paid; in that case the service is provided where the supplier is based. Or one may say that no service is provided until the flight takes place. That would mean that the year of remittance may be different from the year of payment.

18.15.5 *Service for benefit of relevant person*

The last way to satisfy remittance condition A is:

> *(f) a service is provided in the UK for the benefit of a relevant person*

[119] See 17.26 (Remittance basis compliance/HMRC enquiries).

[120] See *https://www.kessler.co.uk/wp-content/uploads/2015/06/HMRC-nudge-letters.pdf*

Does para (f) add anything to para (e), that is, do the words "for the benefit of" add anything? When is a service provided for the benefit of a person but not to that person? An example is if a parent P contracts with a school to educate P's child C. The services are perhaps provided to P (who pays for them) but for the benefit of C. That would matter if C was a relevant person and P was not (which might happen if the income was that of C's uncle, say).

This rule may make it unnecessary to identify the person to whom the services are provided, a question which has given rise to much difficulty in a VAT context.

18.16 Condition B: Link to income/gain

Section 809L(3) ITA provides:

> Condition B is that—
> (a) the property, service or consideration for the service, is (wholly or in part) the income or chargeable gains,
> (b) the property, service or consideration—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is property of or consideration given by a relevant person ... [121]

In condition B:

- "The property" means the property referred to in condition A, that is, in short, the property brought/received/used in the UK.
- "The service" means the service referred to in condition A, that is, in short, the service provided in the UK.

There are eight ways to satisfy remittance condition B. The first two relate to property (ie the property brought/received/used in the UK):

(1) This property:
  (a) is (wholly or in part) the income/gains or
  (b) (i) is derived property and
  (ii) is property of a relevant person

The next four[122] relate to services, ie a service provided in the UK:

[121] Section 809L(3) continues with paras (c) and (d) which relate to debt-remittances, considered separately below.

[122] The remaining two relate to relevant-debt remittances, which are considered separately below.

(2) This service:
 (a) is the income/gains or
 (b) derives from the income/gains or
(3) The consideration for this service:
 (a) is (wholly or in part) the income/gains, or
 (b) (i) is derived property and
  (ii) is consideration given by a relevant person

18.16.1 *Property of relevant person*

Remittance condition B is met in relation to property brought/received/used in the UK if the property:
 (a) is (wholly or in part) the income/gains or
 (b) (i) is derived property and
  (ii) is property of a relevant person

If the property *is* the income/gains, it does not have to meet the requirement that it is property of a relevant person. If the property is *derived from* the income/gains ("derived property"), it does have to meet that further requirement.

Why the distinction? If T transfers income/gains to R, the funds cease to be the income/gains (instead in the hands of R the funds become derived property). That is, if the property *is* the income/gains, the property must necessarily be property of the specific individual (T) (not anyone else who is a relevant person in relation to T), so it is not necessary to impose the requirement expressly. That might be the reason; though if so the matter could have been more simply expressed.

Suppose:
(1) T gives income to S (not a relevant person).
(2) S uses the money to buy property used by T.

Condition B is not satisfied: the purchased property is derived property but it is not the property of T or of any relevant person.[123]

The question whether property either *is* the income/gains or is *derived from* the income/gains also matters for the purposes of s.809P ITA (amount of income remitted).

18.16.2 *Services*

Condition B is met in relation to a service provided in the UK if:

[123] But remittance condition C or D may then apply.

(2) This service:
 (a) is the income/gains or
 (b) derives from the income/gains or
(3) The consideration for this service:
 (a) is (wholly or in part) the income/gains, or
 (b) (i) is derived property and
  (ii) is consideration given by a relevant person

It will be rare to have a case within (2), ie where a *service* is (or derives from) income/gains. Examples may be services which constitute earnings as benefits in kind, or services which constitute benefits taxable under s.731/s.87, which are deemed to derive from income/gains.

Cases will usually fall within (3). The time of remittance is the later of:
(1) the time the consideration is given and
(2) the time the service is provided

We may need to classify what the relevant person receives as (1) property or (2) a service.

In practice it will not generally matter. That is fortunate, as the distinction is not always easy. Suppose T pays rent for use of a picture in the UK. Does T receive a service? It is thought not.[124] Does T receive property and if so what? T does not receive the picture, but receives a contractual right, which is considered to be "property" for present purposes. Or it may be that T makes a payment in respect of a relevant debt. It is considered that there ought to be a taxable remittance under one or other of these routes, though neither analysis is entirely trouble-free.

Condition B refers to property, consideration for services, and to services. But it is impossible to keep referring to all three. For the sake of comprehensibility, I refer to property and leave the references to consideration for services (and to services) to be read in; (more or less) same points apply to each of them.

18.17 Property is the income or gains

The question whether property brought/received/used in the UK is income should be straightforward if the income is *pure* income, such as dividends, interest or income distributions from trusts. The income will usually be easy to identify.

[124] "Service" is widely defined for VAT, but that definition is not applicable here.

18.17.1 *What is trading income*

The question whether property brought/received/used in the UK is *trading* income is more difficult.

Strictly speaking, trading income is not an item of property: it is a figure that emerges as the result of a computation. The gross receipts of a trade are not the trading income. Even the net receipts (ie gross receipts less trade expenses paid out of the receipts) are not the trading income: the quantum of trading income is likely to be different from the amount of net receipts, once one allows for accruals, capital expenditure, and so on.

That is self-evident, but if authority is needed, see *Reed v Young*:

> ... the distinction between the assets of a partnership and its profits for a given period. That distinction is self-evident ... A loss, like a profit, is an accounting measure of the firm's performance over a given period. Liabilities, like assets, vary from day to day. Just as you do not make a profit by acquiring an asset, so you do not sustain a loss by incurring a liability.[125]

Similarly *Anson v HMRC*:

> ... in general an entity will not have particular assets that can be said to be assets which represent the profit which it has made.[126]

However the meaning of words is governed by context, and the context shows that once trading income has arisen, net trading receipts should be taken as being, or including, the trading income,[127] for the purposes of remittance condition B. If net trading receipts are brought/received/used in the UK, therefore, there is a taxable remittance of the trading income. Otherwise the remittance basis does not work. In other words, the distinction between net receipts (assets) and trading income (a computation but not an asset) is disregarded, or at least, is not carried to

[125] 59 TC 196 at p.227.

[126] [2013] EWCA Civ 63 at [59]. The decision was reversed by the Supreme Court, but this point was not contentious. Likewise *Hoey v HMRC* [2022] EWCA Civ 656 at [155]: "we do not see how a mere trading receipt can be equated with the receipt of trading income."

[127] Alternatively the net trading receipts may be said to be derived from the trading income. That may be the better analysis, but it usually makes no difference. For brevity I refer to the sum as constituting trading income rather than derived from trading income.

its logical conclusion, where the conclusion would be absurd.[128]

If the trader receives a proportion of the trading receipts in the UK, there should be an apportionment, eg if half the trading receipts are received in the UK, there is a remittance of half the trading income. The mixed fund rule does not apply, as there is no mixed fund.

Trading income is regarded as arising at the end of an accounting period, not during the period, for it is only then that it can be discovered whether the trade made a profit for the relevant period and if so what the profit is.[129]

Suppose a person carrying on a foreign trade receives the trading receipts in the UK, during the trade accounting period and retains them in the UK. That sum is not trading income, or derived from trading income, at the time of receipt, for no trading income has yet arisen. At the end of the accounting period, when the profits are ascertainable, the sum can be regarded as derived from trading income. The trading income is regarded as remitted at that time.[130]

What if the trader receives trading receipts in the UK, and removes them from the UK in the same accounting period, before any trading income arises? At the time of the receipt the sum received is not trading income. On a strict reading, there is no taxable remittance later when the trading income accrues; though one might construe s.809U ITA loosely,[131] so that there is a remittance of trading income when the trading income arises. The safe course, if trading income is taxed on the remittance basis (typically under the s.720 remittance basis) is to ensure that all sums are received and kept outside the UK.

18.17.2 *What is property income*

The same applies to property income of a property business, which is computed in the same way as trading income.

18.17.3 *What is a gain*

The question of whether property brought/received/used in the UK is a

[128] Similar issues arise in a ToA context: see 48.7 (Income "payable" to person abroad).

[129] *Re Robbins* [1941] Ch 434. Similarly *Anson v HMRC*[2013] EWCA Civ 63 at [59]: "... profits do not arise until an account is struck for a particular period showing that there has been a profit..."; the point was not discussed in the subsequent appeal.

[130] See 18.48 (Remittance before income/gains arise).

[131] See 18.48 (Remittance before income/gains arise).

gain raises a similar question and has a similar answer. Strictly speaking, a gain is not an item of property: like trading income, it is a figure resulting from a computation. The quantum of a gain (generally) depends (in part) on the amount or value of the proceeds of a disposal, but that does not entail that the gain is a part of the proceeds. The proceeds of a disposal are not the gain.

But notwithstanding the jurisprudential nature of a gain, the proceeds of a disposal for full consideration should be regarded as constituting or including the gain for the purposes of remittance condition B.[132]

HMRC agree. The CG Manual provides:

> **CG25380 Mixed funds: introduction** [Nov 2019]
> ... Proceeds received from the disposal of a chargeable asset will include a return of some or all of the capital cost of the asset and may also include an element of gain. If a non-UK asset costing £500 is sold for ... £650, £500 represents capital and £150 represents a gain. The proceeds arise from two sources and therefore constitute a mixed fund in their own right. ...

Similarly, the RDR Manual provides:

> **RDRM35320 Mixed Funds: Example 4 Note 3** [Jan 2019]
> ... unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. ...

18.17.4 *Remittance of deductible expenses*

Suppose a person pays deductible expenses out of gross rent. The property income of the person is the net profit (rent less expenses), it is not the gross rent. So if the person brings some of the gross rent to the UK, to pay deductible expenses, that is not a taxable remittance of the property income. The income is the profit (if any) which is left after payment of deductible expenses. That includes interest, so far as deductible.

This view is confirmed in *Sehgal v HMRC*[133] where an individual paid a sum deductible in computing a chargeable gain, in consideration of what the FTT held to be a service received in the UK. The sum paid was

[132] Alternatively the net proceeds of a disposal may be said to be derived from the gain. The position is more difficult for sales at an undervalue: see 18.45.5 (Sale of asset at undervalue).

[133] [2022] UKFTT 312 (TC) at [142] ff. For the facts, see 18.13.2 (Sehgal v HMRC).

remitted, but the gain was not remitted, as the sum paid was not derived from the gain.

18.18 Derived property

18.18.1 *"Derived"*

Remittance condition B (and C and D) refer to property which *derives (wholly or in part, and directly or indirectly)* from income/gains. I refer to this as "**derived property**".

The words "directly or indirectly" show that the drafter did not want the word "derive" to be narrowly construed.

In the following discussion I just use the word "derive" and leave "directly or indirectly" to be understood.

18.18.2 *s.22 TCGA case law*

Some guidance might be drawn from case law on s.22 TCGA ("there is ... a disposal of assets ... where any capital sum is *derived from assets...*").

In *IRC v Montgomery,* trustees sold a policy of insurance, which was valuable because a fire had damaged land insured. The sale proceeds were derived from the policy and not derived from the land:

> What, in the context of [s.22], does "derived" mean? The relevant dictionary meaning of "derivation" is to trace or show the origin, and that is what I think it means here.

A dictionary definition never solves a legal problem.[134] Perhaps it is just a matter of clearing the throat before settling down to work:

> It appears to me quite clear that the capital sum paid by [the purchaser of the policy] was derived from the sale of the rights under the policies, and that *it is not right to go back any further*. If it were legitimate to embark on the exercise of tracing the derivation of assets back in the manner of an abstract of title, I do not know where the line could ever properly be drawn. I think that one must ask the simple (?) question, "From what asset of the trustees was the capital sum ... derived?" and the simple answer is that it was derived from the ... policies of insurance.[135]

In *Zim Properties v Procter*, a taxpayer failed to sell property due to his

[134] See App 2.1.3 (Dictionaries).

[135] 49 TC 679 at p.686.

solicitors negligence. The negligence claim was settled for £70k. The sum was derived from the claim (a chose in action) and not derived from the property:[136]

> a capital sum may be derived from assets ... even though those assets may not be the immediate source of that sum. That is not to say that Walton J. was wrong in holding in *IRC v Montgomery*, that the sum received by the trustees ... was derived from their rights under the policies. It means no more than that it would be a mistake to interpret Walton J.'s decision in that case as authority for the proposition that the asset from which a capital sum is derived must always be the asset that constitutes its immediate source.

Perhaps inevitably, we also have references to the "real" source:

> One has to look in each case for the real (rather than the immediate) source of the capital sum.

But references to reality do not help much, if at all.[137]

Remittance condition B has a different context, and uses the words "directly or indirectly" which are not found in the CGT provision. But I think the general principle is the same in a remittance context, and indeed in any context: the line between what is and what is not derivation must be drawn somewhere, and somewhere practical, and there comes a point where *it is not right to go back any further*. This formulation expresses the principles of derivation at a high level of generality, which may not take us very far when it comes to practical issues. But suppose in *Montgomery/Zim* the underlying asset (land damaged by fire/land unsold due to negligence) had been derived from foreign income. No-one would say that the proceeds of the insurance policy/negligence claim was derived from that income, even indirectly; and there would not be a charge on that income if the proceeds were remitted to the UK.

18.18.3 *Income/gain invested/reinvested*

Suppose T uses income/gains to purchase assets. The purchased assets are

[136] 58 TC 371 at p.391; this case also includes the memorable aphorism that:

> "The interpretation of the capital gains tax legislation requires, as does the interpretation of any legislation, the exercise of common sense, rather than just the brute application of verbal formulae."

The decision was (more or less) reversed by ESC D33, but I do not pursue that here.

[137] See App.7.1 (What do we mean by real); App 7.9.2 (Cardinal principle reaffirmed).

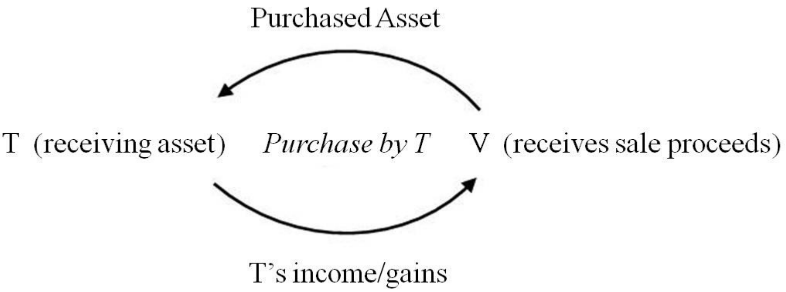
derived from the income/gains. If the purchased assets are sold and the proceeds reinvested in new assets, those new assets are derived from the income/gains indirectly. This tracing process can continue for the lifetime of T.

18.18.4 *T gives income/gain to R*

Suppose T gives income/gains to R. The funds in the hands of R are not the income/gains, but they are derived from the income/gains. If R uses the funds to purchase assets, the purchased assets are derived from the T's income/gains, indirectly, and (as above) that tracing process can continue for the lifetime of T.[138]

18.18.5 *T buys asset from V*

Suppose:
(1) T buys an asset ("the purchased asset") from a vendor ("V") for full consideration.
(2) T uses income/gains to pay the purchase price.



The sale proceeds in the hands of V are derived from the purchased asset, and (indirectly) from property V used to acquire the asset. But the sale proceeds in the hands of V are not derived from T's income/gains. So there is no taxable remittance of T's income/gains if remitted, eg if:
(1) V is a relevant person and brings the sale proceeds to the UK; or
(2) V is not a relevant person but transfers them to a relevant person who brings them to the UK

In these cases, remittance condition B is not satisfied.[139] It does not matter

[138] See too 18.29.1 (Gift of income/gains: Navigation).

[139] Of course the purchased asset in the hands of T is derived from T's income/gains, so there would be a taxable remittance if T brings the purchased asset to the UK.

that sale proceeds may be traceable in specie to the income/gains.

Likewise if V provides a service to T for full consideration, and T uses income/gains to pay the fee. The fee in the hands of V is not derived from T's income/gains.[140]

This is a sensible rule, because if T uses income/gains to purchase an asset from a company, at arm's length, T will often have no way of knowing whether the company is a relevant person, and T can hardly be expected to ask the company what it has done with its own money. Whereas if T *gives* money to a donee, the request is not so unreasonable.

A little support for this view may be found in *Cohen v Petch*. Here:

(1) A building society lent money to T.
(2) T used the borrowed money to purchase an asset from T's mother.
(3) The mother promptly gave or lent the sale proceeds back to T.
(4) T lent the money to a company.

Diagrammatically:

	Building society loan		*Purchase price*		*Gift or Loan*		*Loan*	
Building Society	→	T	→	Mother	→	T	→	Company

T claimed relief for the interest on the building society loan. The Special Commissioner said:

> ... once the money had been borrowed [by] the taxpayer from the society

If my view is wrong, there would be a double charge to tax where:
(1) R (a relevant person in relation to T) receives income/gains (R's income) and uses it to purchase an asset (the purchased asset).
(2) T receives income/gains (T's income) and uses it to purchase the asset from R.
Suppose T brings the purchased asset to the UK. There is a taxable remittance of T's income. But it would be surprising if R's income was also remitted.

[140] Of course, if V provides the service to T in the UK, there is a taxable remittance (subject to foreign services relief) on the basis that T's income/gain is consideration for the service.
If it were the case that an arm's length fee for a service is derived from the income used to pay the fee, there is an (admittedly, subtle) anomaly:
(1) In cases where foreign services relief applies, there is no taxable remittance; see 19.27 (Services condition B: Pay non-UK bank).
(2) In other cases (eg if the service is not provided in the UK) there could be a taxable remittance when V brings the consideration to the UK.

> it was paid to his mother and became her funds. Subsequently, three days later, the sum of £46,600 was returned to the taxpayer by his mother either in the form of a loan or as a gift. *The funds, whether or not they are traceable in specie, were no longer the money borrowed from the society.* They were funds lent or given by [the mother] to her son. *There was no longer any link between the money which the taxpayer eventually lent to the company and the money which he borrowed from the society.*[141]

The questions (simplifying the clumsy language of ICTA) were:

(1) Was the money borrowed from the building society used to lend to the company.

(2) Was the money "applied for some other purpose" before being so used.[142]

This not the same as the wording of the ITA remittance basis ("derived directly or indirectly"). But the words used in the decision ("no longer any link") support the view that the derived condition would not be satisfied.

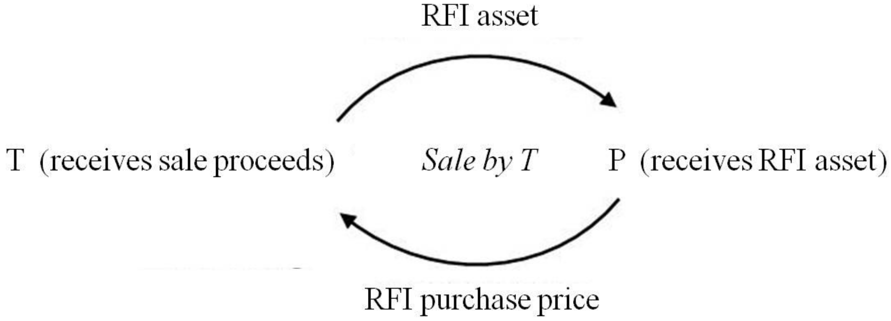
If T consciously pays *more* than full consideration, then the sale proceeds in the hands of V are derived from T's income/gains to the extent of the excess.

18.18.6 *T sells asset to P*

Suppose:

(1) T uses RFI to acquire an asset ("the RFI asset").

(2) T sells the RFI asset to a purchaser ("P") for full consideration.



It is considered that the RFI asset in the hands of P is not derived from T's RFI. So there is no taxable remittance if P brings the RFI asset to the UK:

[141] [1999] STC (SCD) 207 at p.211.

[142] The current provisions are s.385(3) ITA and 392(2) ITA.

remittance condition B is not satisfied.[143]

Similarly, suppose:

(1) T sells an asset to a company within s.720 or s.3, or to a trust within s.624 for full consideration.[144]
(2) The company uses its income (treated as derived from T's s.720 income) or its gains (treated as derived from T's s.3 gains) or the trust uses its income (treated as derived from T's s.624 income) to pay the purchase price.

The sale proceeds in T's hands are not derived from the s.720 income, the s.3 gains or the s.624 income.

18.18.7 *T lends income/gains to B*

Suppose T lends income/gains to a borrower ("B"). Are the funds in B's hands derived from T's income/gains? There are three possible solutions:

(1) B's borrowed money is always derived from T's income/gains.
(2) B's borrowed money is never derived from T's income/gains.
(3) B's borrowed money is sometimes derived from T's income/gains.

There are strong arguments in favour of solution (2):

(1) B's promise to repay the loan is (in principle)[145] full consideration for the money, whether the loan is on commercial terms or interest free repayable on demand (the promise to repay an interest free loan is full consideration). B's borrowed money is derived from that promise.[146]
(2) T acquires an asset (the benefit of the debt) which is derived from the RFI, and it seems surprising that B's borrowed money was also derived from the same income/gains.

The objection to solution (2) is that it is too good to be true; a remittance is too easily avoidable. There is not much point in having a charge on remittances by relevant persons which applies if T *gives* income/gains to

[143] Of course, the sale proceeds in the hands of T are derived from T's RFI, so there would be a taxable remittance if T brings the sale proceeds to the UK.
If my view is wrong, there could be a double charge to tax.

[144] Considerable further thought is required if the sale is for more than full consideration.

[145] The position would be different if the loan is a fixed-term loan at a low rate of interest as then B's promise to repay is not full consideration; that would be unusual and is assumed not to be the case here.

[146] Contrast 83.6 ("Provide").

B, but not if T *lends* income/gains to B interest-free. It is considered that there must be some circumstances in which one should regard B's borrowed money as derived from T's income/gains. The court might then describe the loan as a mere "conduit".[147] However "conduit" is a metaphor which constitutes a conclusion rather than a basis for reaching that conclusion. The difficulty is to find an appropriate method of distinguishing between cases where one does and does not regard borrowed money as derived from income/gains used to make the loan.

It is suggested that one should seek to distinguish between:

(1) loans which have characteristics of an outright payment, where B's borrowed money is regarded as derived from the income/gains; and
(2) loans which do not have those characteristics.

A loan has the characteristics of an outright payment, if, for instance:

(1) There is no intention to repay the loan,
(2) The loan is likely to remain outstanding for a substantial period, such as the lifetime of B, or, perhaps, the period that B is UK resident, or
(3) B has insufficient funds to repay the loan (other than the borrowed money).

Such "loans" (the facts justifying scare quotation marks) are (from the recipient's viewpoint) more or less equivalent to outright payments.

A loan on arm's length terms is less like an outright payment, at least assuming there is in fact an intention to comply with the terms (pay the interest).

A loan made at arm's length is not like an outright payment.

Similar points arise on a sale with the payment left outstanding (which may be regarded as commercially equivalent to a loan, though not a loan in the strict sense of the word).

Remittance condition D might also need consideration.

18.18.8 *T subscribes for shares in R Ltd*

Suppose T uses income/gains to subscribe for shares issued by a company which is a relevant person ("R Ltd").

The shares received by T are derived from the income/gains.

[147] *Harmel v Wright*, 49 TC 149 is a case on the pre-2008 remittance basis, and so not now directly relevant, but it illustrates the point at p.157: "emoluments, which mean money, come in at one end of a conduit pipe and pass through certain traceable pipes until they come out at the other end to the taxpayer".

It is considered that the proceeds of the share subscription received by R Ltd are also derived from the income/gains, at least indirectly, for the following reasons:

(1) This fits the context. There would be little point in providing that companies are relevant persons if that were not so.

(2) If the proceeds of the share subscription held by R Ltd were not derived from the income/gains, what are they derived from? A share issue is unlike a normal sale or similar transaction, as it costs the company nothing to issue shares. The issued shares did not belong to the company before they were issued.

18.18.9 *Double representation*

The two paragraphs above indicate that in cases of loans, and share subscriptions, it is possible to have two distinct assets each of which are derived from the same income/gains: (1) the funds lent or used to subscribe for the shares, and (2) the benefit of the loan or the shares.

One might describe that as **"double representation"**.

Double representation can also arise for foreign s.731 income, which may be treated as derived from two distinct assets:

(1) the benefit to which it relates and (2) the relevant foreign income to which it relates.[148]

There would be a taxable remittance if either of these assets are remitted to the UK. But the income/gains could only be remitted once.

18.18.10 *T subscribes to investment fund*

The position is different if:

(1) T uses income/gains to subscribe for an interest in a collective investment fund, along with other investors.

(2) That fund invests in a portfolio of underlying companies (by way of loan or share subscription) together with other investors in those companies.

T's interest in the collective investment fund is directly derived from the income/gains. But the funds in the underlying companies portfolio should not be regarded as derived from T's income/gains. The commingling of funds at investment fund level, and again at portfolio level, creates a

[148] See 50.39.2 (When is s.731 income remitted).

remoteness sufficient to break the chain of derivation from the original income/gains. The word “derive” (even “indirectly”) requires a sufficient link and the link must break at some point. Derivation must stop at least at the portfolio investment level. T will not be able to keep track of how the original income/ gains are used to fund investments, once they have been pooled together, firstly with the other funds from the other investors in the collective investment fund, and subsequently at the portfolio level. In order for the law to work in practice there has to be a practical limit to the meaning of the phrase “derive indirectly”.

This issue only arises if the underlying companies are close, and so relevant persons, but that can happen, because of the excessive width of the concepts of control and close company.[149]

18.18.11 *T purchases R Ltd (secondhand co)*

Suppose T uses income/gains to purchase shares in R Ltd (a relevant person). R Ltd already owns assets. The assets of R Ltd are not derived property: they do not derive from T’s income/gains.

18.18.12 *T uses income/gains to pay debt*

Suppose:

(1) B borrows from L and receives “the borrowed money”
(2) B uses income/gains (“B’s income/gains”) to repay the debt to L so
    (a) L receives “the repaid money”
    (b) B retains the borrowed money

In the absence of a statutory provision, the borrowed money would not in principle[150] be derived from B’s income/gains. It would not be derived from the income/gains at the time of the borrowing. It would not become derived from the income/gains later when the debt is repaid. However, the s.809R backward-tracing rule alters this.[151]

It is considered that the repaid money in the hands of L is not derived from B’s income/gains. It is derived from the debt, and (indirectly) from

[149] See 104.8 (Ultra-wide control: Critique).

[150] The position should be different if the two steps formed part of an arrangement. In those circumstances, the law recognises “backward tracing”: *Brazil v Durant* [2015] UKPC 35 at [34] - [40].
Of course, if the debt were a relevant debt there would be a relevant-debt remittance of income/gains used to repay the debt.

[151] See 20.7 (Income/gains used to pay debt).

the funds which L used to make the loan to B.

18.18.13 *Refinancing*

Suppose:

(1) L lends "the debt 1 fund" to B ("debt 1")
(2) Subsequently:
  (a) L lends "the debt 2 fund" to B ("debt 2")
  (b) B uses the debt 2 fund to repay debt 1[152]

It is considered that the repaid money in the hands of L:

(1) is derived directly from debt 1
(2) is derived indirectly from the debt 1 fund
(3) is not derived (even indirectly) from the debt 2 fund.

It would be different if B were insolvent and unable to repay debt 2.

If B is a trading company, then Remittance Investment Relief might also be considered, though the relief is not straightforward.

18.18.14 *Loan secured on income/gains*

It is helpful first to consider the position for unsecured loans. Suppose:

(1) T borrows without giving security
(2) T receives the borrowed money in the UK
(2) T owns foreign income/gains and the lender would not lend had T not owned those (or some other) assets

There are three bases on which it may be said that T has remitted the RFI to the UK:

(1) It may be argued that the borrowed money is derived from the RFI.
(2) It may be argued that the income/gains is:
  (a) Used outside the UK in respect of a relevant debt; or
  (b) Used in the UK

The arguments are conceptually distinct, but they overlap, and may be regarded as coming to the same thing. HMRC agree that there is no taxable remittance.[153] In particular, the fact that the lender would not lend if the borrower did not have the RFI (or other assets of sufficient value) does not entail that the borrowed money is derived from the RFI. T's

[152] This would typically happen because B has no liquid assets to repay debt 1.

[153] See 18.24 (Use as security for debt).

borrowed money is derived from T's promise to repay.

Suppose T borrows on the security of income/gains. Is the borrowed money derived from the income/gains? It is considered that in this case the borrowed money is still derived from the promise to repay and not from the foreign income/gains subject to the security. That is still the case even if T could not have borrowed without giving that security. There are three reasons for this view:

(1) The position is analogous to an unsecured loan, where no-one suggests that borrowed money is derived from the borrower's income/gains, even T could not have borrowed were it not for that income/gains, and even if T subsequently charges the loan on income/gains.
(2) A rule which says that borrowed money is derived from a security if and only if the borrower needed the security in order to borrow is not workable: the question whether the security is needed is often imponderable.
(3) The relevant-debt rule[154] is designed to cover this aspect of remittances and that suggests that there would not be a remittance under general principles.

It is considered that the case of *West v Trennery*[155] is not relevant here, since the statutory words on which the decision rests are not present in the remittance basis provisions. In practice HMRC appear to accept this view, though they do contend that there is a relevant-debt remittance; see 18.24 (Use as security for debt).

18.18.15 *Income from income/gains*

Suppose:

(1) T receives £1m ("original income").
(2) T invests the original income and receives £50k ("new income").

It is considered that the new income is not derived from the original income. One must stop tracing the original income at that point. Otherwise various odd results will follow.[156]

[154] See 18.24 (Use as security for debt).

[155] For this case see App.2.9 (Representing assets).

[156] If the new income is derived from the original income, and T remits the £50k new income, T would pay tax on:
(1) The £1m original income and
(2) The £50k new income

The same applies if the original income is invested to produce gains ("new gains"). The new gains are not derived from the old income. So a remittance of the new gains does not constitute a remittance of the old income.

This issue may not arise much in practice, as the original income and the new income/gains may be held in a single mixed fund, in which case the mixed fund rules will apply.

18.18.16 *Gift on to third party*

The position becomes more complex if a second individual is involved. Suppose:

(1) T gives income/gains to A (an individual, who may or may not be a relevant person).[157]

(2) A gives the fund to B (a relevant person).

It is suggested that the funds in the hands of B are derived property if steps (1) and (2) form an arrangement. If there is no connection of that kind between T's gift and the transfer to B, the funds in B's hands are not derived property. The chain of derivation stops there. In particular, if B acquires the funds on the death of A, the funds are not derived property.[158]

If T gives income/gains to a trust and the trustees appoint the fund to B, the same approach should be applied, but the two steps do form an arrangement because the trustees is merely carrying out the intention of the settlor and is not a wholly independent mind.[159] So the funds in the hands of B are derived property.

Similarly, suppose:

(1) T gives £1m original income to R (a relevant person).

(2) R receives £50k new income.

(3) R brings the £50k new income to the UK.

If the new income is derived from the original income:

(a) R will pay tax on the new income (on an arising or remittance basis, depending on whether R is a remittance basis taxpayer; that makes no difference for the purposes of this example).

(b) T would pay tax on the original income, on the remittance of the new income by R.

[157] If A is not a relevant person, A will be a gift recipient, and remittance condition C needs consideration.

[158] This view is supported a little by s.48(3C)(b) IHTA: see 75.16.3 (Purchased equitable interest).

[159] See 87.5.7 (Trust appointment: Filling blanks).

18.18.17 *Receipt of cheque in UK*

Suppose T receives in the UK a cheque which, if cashed, the proceeds would be income/gains. For instance, a cheque representing a dividend from a non-resident company, or a cheque drawn on a foreign account holding unremitted income of T.

A cheque has a twofold character:

(1) It is an instruction to the payor's bank.
(2) It is also a chose in action which entitles the payee to sue on it.[160]

Under neither character is the mere receipt of a cheque a taxable remittance.[161] So far as the cheque is an instruction to pay:

> It is not enough to complete the beneficiary's title to the proceeds of the transfer that the beneficiary [ie payee] or his or her bank receives the payment instruction. This is the case whether the instruction is embodied in a telex or telephone instruction given by the originator [payor] or a standing order or payment order form The instruction only confers on the originator's bank the necessary mandate to make the payment to the beneficiary as his or her agent and to debit his or her account.[162]

So far as the cheque is a chose in action, a promise to pay, it is a different asset from the funds in the account, and so not derived property. Remittance condition B is not satisfied. Also, the chose in action is not UK situate (even if the paper itself is in the UK) unless the cheque is a

[160] Fox, *Property Rights in Money* (1st ed, 2008) para 5.18, 5.64.

[161] This continues the pre-2008 law. The RDR (discussing the pre-2008 remittance basis) provides:
"RDRM36110 Remittance Basis up to 6 April 2008: Cheques received [Jan 2019]
If a taxpayer receives a cheque which represents taxable foreign income, before it is treated as taxable remittance it is necessary for the taxpayer to do something with it after it came into his or her hands.
For example, the cheque might be:
- Credited to a UK bank account
- Exchanged for cash (through a bank or otherwise)
- Accepted by a third party in settlement of a debt owed by the taxpayer
- Given away to a relative

A taxable remittance is not made if a cheque is received in the UK but is then sent abroad and credited to a bank account which the taxpayer has overseas."

[162] Fox, *Property Rights in Money* (1st ed, 2008) para 5.64.

bearer instrument or negotiable.[163] So remittance condition A is also not satisfied.

Even if the cheque is presented to a bank in the UK, there is still no remittance if:

(1) the credit is made to the payee's foreign account, not to a UK account; or

(2) the payee is not a relevant person.[164]

18.18.18 *Betting*

In a conventional bet, the individual puts pays a stake, in advance, to the bookmaker. The winnings (if any) are a mixed fund of the original stake and clean capital (because betting profit is not taxed).

Spread betting is explained in *Spreadex v Battu*:

> Spread betting is not so much or not merely a bet, although it can be described as such, as a form of contract for differences. It enables a customer to take a position on a market (or an event) for a very small stake. Thus, if the Dow Jones index is, say, at 10,000, one can "buy" or "sell" the market at a spread around the index of, for the sake of example, 10 points either way, 9990 to 10,010. If one buys, one is betting that the market will rise above 10,010. If one sells, one is betting that the market will fall below 9990. If one buys and the market rises, one stands to gain £1 for every point that the index exceeds 10,010. If one sells and the market falls, one stands to gain £1 for every point that the index drops below 9990. If, however, one calls the market wrong, then one will stand to lose £1 for every point the market rises above 9990. Until the bet or "trade" is closed, the gains and losses are merely "running" gains or losses. They are real enough, but constantly changing with every change in the index, and have not yet been fixed. Closing the bet will fix the position, win or lose. Unlike a classic bet, the customer can of course lose more than his stake. Indeed, on the example given, of a sales spread point of 9990 when the market is at 10,000, if the market does not move an inch, the customer will lose £10 for every £1 staked. Nor, again unlike a classic bet, are his winnings fixed at the outset by an agreement on odds. In theory, winnings based on rising markets are infinite (in practice, of course, they are not) and losses based on falling

[163] Cheques drawn on UK banks have generally been non-transferable since the Cheques Act 1992.

[164] See 18.14.6 (Gift to non-relevant person); 18.14.7 (Arm's length payment to non-relevant person).

> markets are limited only in so far as they cannot exceed the consequences of a fall in the index to zero.[165]

Pelling explains:

> A spread bet is a form of contract for differences. The client agrees with the firm where he holds his account that each will pay to the other a specified sum per point (the stake) in respect of movements in a nominated index. In financial spread betting the index could be the FTSE 100 or the Dow, or the price of an individual share such as BP or, conceivably, a much smaller floated company, or the price of a commodity or a rate of exchange between specified currencies. If the client is "long" the firm will pay him the stake multiplied by any increase in the index value between opening and closing, but he will have to pay the firm on the same basis if there is a decrease. If he is "short" the opposite applies. The "spread" is the difference between the long and short, or "buy" and "sell" prices at any given time. Spread bets generally have expiry dates built into them but the client is able to close his position before expiry if he chooses to do so. The firm, however, does not have the same discretion. ...
>
> Not all spread betting is on financial indices. Spread betting markets are made by firms on a huge breadth of sporting events, although in this country anecdotal evidence suggests that the biggest individual positions are still taken on financial indices. In this regard spread betting offers certain advantages over more orthodox financial instruments when it comes to profiting from market movements. First, profits on spread bets are taken free of capital gains tax.[166] Secondly, the "geared" or "leveraged" nature of spread bets means that typically the client only has to put up a fraction of the total cost of a position, which means that he can get bigger exposure for a given sum (in hedging the exposure the firm puts up the balance of the cost from its own resources). Thirdly, spread betting offers the client the opportunity to go "short" if he thinks that the market will fall — something that is not always available with a more straightforward brokerage.[167]

In a spread bet, the individual does not put up any stake, but instead incurs a liability to make a possible payment in the future.

[165] *Spreadex Ltd v Battu* [2005] EWCA Civ 855 at [2].

[166] See 72.15.4 ("Gambling").

[167] Pelling, "The long and the short: common issues in spread betting cases" (2012) 1 JIBFL 18.

If an individual takes a spread bet and loses, nothing can be received in the UK[168] and there can be no remittance. If an individual takes a spread bet and wins, the winnings are not derived from any income/gains: they are derived from the (contingent) liability which the individual undertook when making the bet. Accordingly, there is no taxable remittance if the winnings are brought to the UK.

18.18.19 *Proceeds of insurance claim*

In *IRC v Montgomery*[169] the taxpayer sold a policy of insurance, which was valuable because a fire had damaged insured land held by the taxpayer. The sale proceeds were derived from the policy and not derived from the land. So:

(1) If the insured land was derived from income/gains but the insurance policy was not, then the proceeds would not be taxable on remittance.
(2) If the premium on the policy was derived from income/gains, the income/gains spent on the premium would be remitted (but not any income/gains spent on the land).

18.19 Bank errors

In *Duke of Roxburghe's Executors v IRC*[170] a taxpayer[171] received and held offshore:

(1) income subject to UK tax on an arising basis ("taxed income");[172] and
(2) foreign income taxed on the remittance basis, and which was therefore taxed if remitted ("untaxed income").

These were wisely held in separate accounts, and so a remittance out of the taxed income account would not be taxable. The taxpayer correctly directed the bank to make a remittance to the UK out of her taxed income account. Unfortunately the bank carelessly debited the wrong account, so according to the bank records, the sum remitted could (largely) be traced

[168] Assuming payment of the loss is made out of the UK.

[169] The case contains some general comments on the meaning of "derived", see 18.18.1 ("Derived").

[170] 20 TC 711.

[171] More accurately, the wife of the taxpayer: the income of a married woman was at the time deemed to be the income of the husband, so the appellant was the Duke, not the Duchess. But nothing turns on that.

[172] For completeness: this was foreign source income of a class not then qualifying for the remittance basis, and so taxed on an arising basis; but nothing turns on that.

to untaxed income!

The Court of Session identified the sum remitted as taxed income because the taxpayer had *intended* the remittance to come out of taxed income.[173]

The same applies under the ITA remittance basis. In the terms of the ITA remittance basis, one would say that the sum the taxpayer received in the UK was derived from her taxed income. It did not matter that there was a debit, no doubt later corrected, from the untaxed income account. That banking records were wrong, and did not reflect the legal position.

The principle also applies in other circumstances of bank error, eg if

(1) A bank was instructed to pay a dividend into a foreign account and accidentally paid it into a UK account of the same bank

(2) A bank was instructed to pay a dividend into an income account, and accidentally paid it into a capital account of the same bank, creating a mixed fund.

HMRC agree. The RDR Manual provides:

> **RDRM33560 Banking Issues** [Jan 2019]
> *Bank Errors and Mistakes*
> Where
> [1] a bank acts contrary to express instructions by an account holder, and
> [2] that mistake inadvertently results in a taxable remittance to the UK by the account holder,
>
> the account holder and the bank may alter the transaction in line with the original instructions given.
> If the bank does this, HMRC will treat the earlier [mistaken] transaction

[173] "The Duchess was entitled to have the remittance debited against any fund belonging to her and under her control and ... she did so effectually by the *instructions* to debit it against money not derived from the [untaxed] income." Lord Normand at p.726 (emphasis added).
This was also the view of Lord Fleming at p.732: "I base my decision ... on the ground that it was the legal right of the Duchess to make the appropriation against any particular fund belonging to herself, and that in law she made that appropriation when she *directed* the Bank making the remittance to charge it against her funds in their hands which had already borne British Income Tax."
A second ground of the decision was that a remittance out of a mixed fund of taxed and untaxed income is in general to be treated as out of the taxed income first, regardless of the intention of the taxpayer. The second ground is now reversed by the ITA mixed fund rules. In any case, one would not nowadays regard the two accounts as a single mixed fund.

> as not having taken place and the new transaction as being the original transaction in looking at whether there has been a taxable remittance from that account.

The error will normally involve a bank, but the same must apply to a non-banking institution which holds accounts for a customer.

See too 20.19.8 (Accidental remittance of nominated income).

18.20 Relevant-debt remittance

I turn to the second part of remittance condition B. Section 809L(3) ITA provides:

> Condition B is that ...
> (c) the income or chargeable gains are used outside the UK (directly or indirectly) in respect of a relevant debt, or
> (d) anything deriving (wholly or in part, and directly or indirectly) from the income or chargeable gains is used as mentioned in para (c).

There are similar provisions in remittance conditions C and D, but condition B is the most important. I refer to this as "**relevant-debt remittances**" (or just debt-remittances).

In order to have a debt-remittance under condition B, two conditions must be satisfied; in short:

(1) A *relevant debt* (in short, relating to property brought/received/used in the UK).
(2) Income/gains used *in respect of* the debt.

There is no relevant-debt remittance unless both conditions are satisfied, eg there is no relevant-debt remittance if:

(1) a relevant debt is paid out of a sum which does not constitute income/gains; or
(2) income/gains are used to satisfy a debt which is not a relevant debt.

There is no taxable remittance if the income/gains arose when the individual was not UK resident.[174]

A further requirement is that the income/gains are used *outside the UK*; however if the income/gains are used in the UK, there will normally be a remittance under the usual remittance rules, so this is not important in

[174] See 17.21 (RFI/gains of non-resident, remitted when resident).

practice.

For the interaction of relevant-debt remittances and exempt property reliefs, see 19.29 (Exempt property).

18.21 Relevant debt

"Relevant debt" is a key term, which is used in remittance conditions B, C and D. Section 809L(7) ITA provides the definition.

There are six categories of relevant debt:

> In this section "relevant debt" means a debt that relates (wholly or in part, and directly or indirectly) to—
> (a) property falling within subsection (2)(a)
> (b) a service falling within subsection (2)(b)
> (c) qualifying property dealt with as mentioned in subsection (4)(a),
> (d) a service falling within subsection (4)(b),
> (e) qualifying property dealt with as mentioned in subsection (5)(a), or
> (f) a service falling within subsection (5)(b).

To understand this one must read in the words in the six cross-references, thus:

Paragraphs	**incorporate wording from**
(a) and (b)	remittance condition A
(c) and (d)	remittance condition C
(e) and (f)	remittance condition D

When one reads in the words, the text becomes:

> In this section "relevant debt" means a debt that relates (wholly or in part, and directly or indirectly) to—
> (a) property falling within subsection (2)(a) [property brought/received/used in the UK],
> (b) a service falling within subsection (2)(b) [service provided in UK],
> (c) qualifying property dealt with as mentioned in subsection (4)(a) [brought/received/used in UK and enjoyed by a relevant person],
> (d) a service falling within subsection (4)(b) [service enjoyed in UK by a relevant person],
> (e) qualifying property dealt with as mentioned in subsection (5)(a) [brought/received/used in UK and enjoyed by a relevant person], or
> (f) a service falling within subsection (5)(b) [service enjoyed in UK

by a relevant person].

Para (f) is otiose: it only repeats para (d).[175] But it does not matter.

In para (e) "*Qualifying* property dealt with as mentioned in s.809L(5)(a)", the word "qualifying" is meaningless. The expression "qualifying property" is defined for remittance condition C but not for condition D.

The most important category is para (a). The discussion here concentrates on this category. There are two steps in deciding whether a debt is a relevant debt within para (a):

(1) One must identify the property (if any) to which the debt relates. I refer to that as the **"debt-related asset"**.

(2) One must ask if that asset is "property falling within s.809L(2)(a)" ie is the property brought/received/used in the UK by a relevant person.

Strictly one should not use the term "relevant debt" in the abstract. A relevant debt can exist only *in relation to certain persons*. If a debtor borrows, the debt is a relevant debt for:

(1) the individual who brings/receives/uses the money in the UK (who will normally be the debtor); and

(2) persons who are relevant persons in relation to that individual.

For instance, if H borrows and receives the money in the UK, the debt is a relevant debt for the wife of H (who would make a taxable remittance if she used her income/gains to repay the debt). But it is not a relevant debt in relation to the father of H (who would not make a taxable remittance if he used his income/gains to repay the debt).

But where the context is clear it is permissible to refer to a relevant debt in isolation (leaving the words "in relation to a person" and the identity of that person to be inferred).

"Debt" is not defined. It is suggested that it includes any liability to pay money. If an individual holds a lease, the payment of rent is the payment of a debt. If the land is UK situate, the debt is a relevant debt.

The residence of the lender does not matter. A loan from a UK bank is not a relevant debt if the money borrowed is received and retained outside the UK but it is a relevant debt if the money borrowed is received in the UK. However there is a relevant-debt remittance only if income/gains are used *outside the UK* in respect of a relevant debt, which is not likely to

[175] Likewise perhaps para (e).**Do 18**

happen where the loan is from a UK bank: repayment to a UK bank is in principle use of funds in the UK.

A debt may be a relevant debt even though:

(1) the debtor was non-resident when the debt arose, or
(2) the debtor was non-resident when property to which the debt relates was remitted to the UK.[176]

A debt which was not at first a relevant debt(because money borrowed was not brought/received/used in the UK) may later become a relevant debt (because the money is later brought/received/used in the UK).

18.22 Debt "related" to property (debt-related asset)

"Relates" requires some nexus between the debt and the debt-related asset; exactly what that nexus is has been left to the courts to sort out.[177]

The words "directly or indirectly" do not add any clarity; indeed I am not sure that it is altogether coherent to speak in the abstract of direct and indirect relationships, for "relates" requires a relationship and an indirect relationship is a type of relationship. But the word "indirectly" shows that the drafter did not want the word "relates" to be narrowly construed.

In the following discussion I just use the word "relate" and leave "directly or indirectly" to be understood.

18.22.1 *Simple examples*

Suppose T borrows and receives money. The debt relates to the money. If T receives the borrowed money in the UK, the debt is a relevant debt.

If T borrows and receives the borrowed money outside the UK, the debt still relates to the money, but the money is not "property falling within s.809L(2)(a)" so the debt is not a relevant debt. However if T later brings the money to the UK, it becomes "property falling within s.809L(2)(a)" and the debt at that time becomes a relevant debt. HMRC agree.[178]

T may borrow but without receiving money: T may draw down the borrowing under a loan facility, to pay for an asset, the money being paid directly to the vendor. In that case the debt relates to the asset. If at any time T brings/receives/uses the asset in the UK the debt is a relevant debt.

[176] For an example of this, see 18.24.6 (Income/gains from collateral).

[177] See App.2.4.3 (Relating to).

[178] See the example of Ali at 18.22.6 (Borrowing/receipt/repayment by different people).

It makes no difference whether the loan is drawn down first, to provide money, or (which may be more usual) drawn down directly to pay for the asset.

The RDR Manual provides some examples which are consistent with the above. I set out the relevant parts of the text, relegating the full text to footnotes.

Example 1 concerns borrowing to buy UK shares.

> *Example 1 (Katrina)*[179]
> K borrows money to buy shares in a UK company.

The HMRC analysis is as follows:

> This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person.

More analytically, the debt is in the HMRC view a relevant debt on the following grounds:

(1) The debt relates to the shares. (This is correct).
(2) The shares are received in the UK by K.[180]

Example 2 concerns borrowing to buy UK residential accommodation:

> *Example 2 (Gary)*[181]
> G borrows money to buy an apartment in the UK which he occupies.

The HMRC analysis is as follows:

[179] The example in full (including its irrelevant detail) is as follows:
"**RDRM33160 Condition B - relevant debt** [Mar 2022]
In May 2006 Katrina, a remittance basis user, borrows money from an overseas bank to buy shares in a UK company. This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person (Katrina).
From 6 April 2008 any foreign income or gains that Katrina uses in respect of the loan, for example to service or to repay the loan, are taxable as a remittance."

[180] This assumes a receipt of UK situate property is a receipt in the UK; see 18.14.8 (Acquisition of UK security).

[181] The example in full (including its irrelevant detail) is as follows:
"**RDRM33160 Condition B - relevant debt** [Mar 2022]
On 6 April 2015, Gary, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull.
The loan is a relevant debt because money is used in the UK, and it is in respect of property (the apartment) which is used in the UK for the benefit of a relevant person (Gary)."

> The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (G).

More analytically, this is a relevant debt on one or both of the following grounds:

(1) It relates to the flat which is used in the UK by G. (This is correct).

(2) It relates to money which is used in the UK by G. Whether this is correct depends on the details of the purchase arrangement, but it does not matter since the debt is a relevant debt under (1).

Example 3 concerns borrowing to buy a UK chattel for a relevant person.

> *Example 3 (Robina and Mark)*[182]
> R borrows money to buy a car for M, a relevant person.

The HMRC analysis is as follows:

> The loan is a relevant debt because it is respect of[183] property (the car) which is used in the UK by a relevant person (M).

More analytically, there is a relevant debt because:

(1) The debt relates to the car.

(2) The car is used in the UK by a relevant person, M. (Another reason is that the car must have been brought or received in the UK by R or M.)

Example 4 concerns borrowing to pay for two services, one provided in and the other out of the UK; I discuss this at 18.22.12 (Debt relates to property in part).

Example 5 concerns borrowing to purchase an asset given to a relevant person; I discuss this at 18.22.6 (Borrowing/receipt/repayment by different people).

[182] The example in full (including its irrelevant detail) is as follows:
"**RDRM33160 Condition B - relevant debt** [Mar 2022]
In October 2012 Robina, a remittance basis user, borrows money on a fixed-rate loan from an overseas bank to buy a car for Mark, a relevant person. Robina pays £x each month from 1 November 2012, making 24 monthly payments. She uses her foreign chargeable gains to make these repayments.
The loan is a relevant debt because it is respect of property (the car) which is used in the UK by a relevant person (Mark)."

[183] The author of the example probably regarded "relates to" and "in respect of" as synonymous, and perhaps they are; but it is best to use the statutory wording and not a paraphrase.

Example 6 (Francine) is a straightforward example of borrowing to pay for services in the UK which adds nothing and so is not set out here.

For example 7, see 18.22.6 (Borrowing/receipt/repayment by different people).

18.22.2 *Asset derived from debt-related asset*

Suppose:

(1) T borrows and uses the borrowed money to purchase a non-UK asset ("asset 1").

(2) T later sells asset 1 and uses the sale proceeds to purchase a UK asset ("asset 2").

The debt relates to asset 1. It is considered that the debt does not necessarily relate to asset 2. The word "relates" requires more than just a historic tracing exercise. It is suggested that the debt relates to asset 2 if and only if steps (1) and (2) form part of an arrangement.

Suppose:

(1) T borrows.

(2) The borrowed funds (or proceeds representing them) are mixed with other funds.

(3) Some of the mixed funds are used to acquire a UK asset (leaving an amount in the mixed fund which equals the borrowed funds).

Does the borrowing relate to the UK asset or to the amount remaining in the mixed fund? Unless steps (1) to (3) form part of an arrangement, the debt does not relate to the UK asset. If the debt does relate to the asset, some commonsense tracing rules must be devised; the ITA mixed fund regime does not apply.

Suppose T borrows invests the borrowed funds, and receives income from the borrowed funds. It is considered that the debt does not relate to the income. So if the income is remitted, it is in principle taxable, but the debt does not thereby become a relevant debt.

18.22.3 *Debt-related asset leaves UK/ceases to exist*

Suppose:

(1) T borrowed to acquire an asset.

(2) T brings/receives the asset in the UK so the debt is a relevant debt.

(3) T later takes the asset outside the UK.

The debt still relates to the asset. It is suggested that the asset is still "property falling within s.809L(2)(a)" ie property brought/received in the UK by T. So the debt is still a relevant debt. The contrary view would give scope for planning/avoidance. Suppose T wanted to use property/ chattels in the UK:

(1) T borrows funds.
(2) T uses the funds to purchase property in the UK and chattels which T brings/receives in the UK.
(3) Interest (unpaid) rolls up on the debt.
(4) Later when T no longer wants to use the property/chattels, the chattels are taken outside the UK, and the property is sold.
(5) The debt and interest is then repaid.

If my view is wrong, the debt has ceased to be a relevant debt by the time it is repaid so there is no taxable remittance, even though T may have enjoyed substantial benefits in the UK.

Suppose:

(1) T borrowed to acquire an asset.
(2) T brings/receives the asset in the UK so the debt is a relevant debt.
(3) The asset ceases to exist (eg it is a short lease which expires, or money which is spent).

It is considered that the debt remains a relevant debt. That is consistent with relevant debt rule for services, for if T borrows to pay for services provided in the UK, the debt is a relevant debt even after the services have ceased to be provided.

18.22.4 *Borrowing to repay debt*

Suppose:

(1) T borrows to acquire borrowed money or other property; T has a debt ("debt 1") and an asset ("asset 1"). Debt 1 relates to asset 1.
(2) T borrows again ("debt 2") and uses the borrowed funds to repay debt 1, so T retains asset 1.

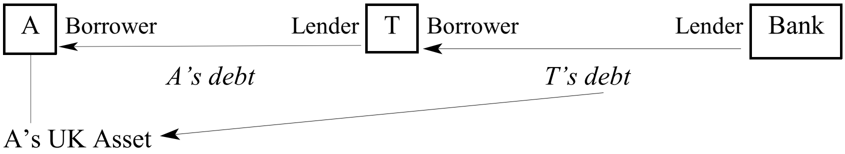
Does debt 2 relate to asset 1? It is considered the answer is yes, if the steps form a scheme or arrangement.

18.22.5 *Borrowed money lent to 3rd party*

The position becomes more complex if borrowed money is lent on to another person. Suppose:

(1) T borrows money from a bank.

(2) T lends the borrowed money to A.
(3) A uses the money to acquire a UK asset ("A's UK asset").



A
Borrower
Lender
T
Borrower
Lender
Bank
A's debt
T's debt
A's UK Asset

Does T's debt relate to A's UK asset?

In this case:
(1) T has a debt: the burden of the debt to the bank ("T's debt"). One needs to ask if it is a relevant debt.
(2) A has a debt: the burden of the debt to T ("A's debt"). One needs to ask if it is a relevant debt.
(3) T has an asset: the benefit of A's debt to T: one needs to ask if it is UK situate.
(4) A has an asset: "A's UK asset".

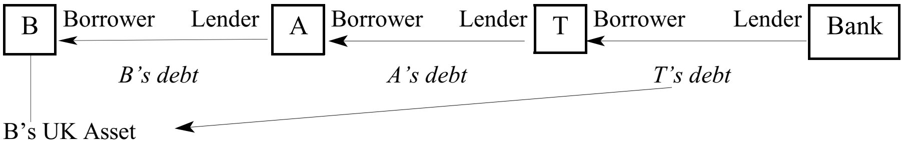
A's debt is a relevant debt: it relates to A's UK asset.

Is T's debt a relevant debt? T's debt relates to the benefit of A's debt. If the benefit of A's debt is a UK situate asset, then T's debt is a relevant debt. Let us assume this is not the case.

T's debt is also a relevant debt if (1) it relates (indirectly) to A's UK asset and (2) A is a relevant person in relation to T. It is considered that T's debt does not relate to A's UK asset if steps (1) and (2) do not form an arrangement. If there is no connection of that kind between T's debt and the UK asset, the debt does not relate to the asset.

If there is an arrangement, it is suggested that T's debt does relate to A's UK asset. The contrary is arguable, since T has another asset which does relate to the debt. Scope for tax avoidance in this conclusion is restricted, since the relevant debt rule applies to A.

If that is so, what would the position be if:
(1) T borrows from a bank and lends to A.
(2) A lends the proceeds of the borrowing to B.



B
Borrower
Lender
A
Borrower
Lender
T
Borrower
Lender
Bank
B's debt
A's debt
T's debt
B's UK Asset

Does T's debt relate to B's UK asset?

(3) B uses the money to acquire a UK asset. How many assets would T's debt relate to, and could T keep track of them all? Perhaps the position depends on the nature of the arrangement. In some cases it would be easy to trace, and in others, less so.

18.22.6 *Borrowing/receipt/repayment by different people*

A relevant-debt remittance requires three conditions:
(1) A debt relating to property
(2) The property is received/brought/used in the UK by a relevant person
(3) A payment in respect of that debt

Normally those three steps will be taken by the same person but that need not be the case. There may be two or three separate persons involved:
(1) A may borrow
(2) B may receive the debt-related asset in the UK
(3) C may repay the debt

The debt is a relevant debt in relation to B and to those who are relevant persons in relation to B.[184]

RDR Manual 33160 gives a straightforward example where A borrows to purchase an asset which is given to a B (a relevant person), B brings it to the UK:

Example 5 (Ali)[185]

[184] As to when the relevant person test must be satisfied, see 18.26.3 (Relevant debt: Becoming/ceasing to be relevant person).

[185] The example in full (including its irrelevant detail) is as follows:
"**RDRM33160 Condition B - relevant debt** [Mar 2022]
Ali, a remittance basis user, purchases a sculpture in Sweden in October 2012 (refer to the earlier example). He takes out an interest-free (!) loan with his US bank to fund this purchase, repayable within 1 year. In November 2012 he gives them to his wife as an anniversary gift.
She initially keeps it at her mother's home in Stockholm, but 6 months later in March 2013 Ali's wife decides to bring the sculpture to the UK to display in her UK garden. In October 2013 Ali arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami, which he had purchased in May 2011, using his relevant foreign earnings, and some capital inherited from an uncle.
There is a debt (the loan from the US bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (Ali's wife, in March 2013).
The oil painting which derives, in part, from A's relevant foreign earnings, is used

> A borrows to purchases a sculpture outside the UK.
> A gives the asset to his wife W.
> W brings the asset to the UK.

HMRC correctly analyse why the debt is a relevant debt:

> There is a debt (the loan from the bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (W).

That was a case where the debt-related asset was given to B. Suppose:
(1) T borrows money.
(2) T gives the borrowed money to R (a relevant person in relation to T).
(3) R uses the money to acquire a UK asset ("R's UK asset").

Is T's debt a relevant debt? T's debt is a relevant debt if it relates (indirectly) to R's UK asset. It is suggested that T's debt relates to R's UK asset if and only if steps (1) and (2) form an arrangement. If there is no connection of that kind between T's debt and the R's asset, the debt does not relate to the asset.[186]

The RDR Manual 33160 provides an example where A borrows and income of B (a relevant person) is used to repay the debt:

> Example 7 (Kumar)[187]

outside the UK in respect of this relevant debt.
There is a taxable remittance in 2013-14, the tax year in which the painting is used to pay the relevant debt."
More analytically, remittance condition B is satisfied under s.809L(3)(d): the picture (which derives from RFE) is used in respect of the relevant debt. The example continues:
"The remittance occurs when the foreign income or gains are regarded as used in respect of the relevant debt (2013-14) not when the property is first used in the UK by a relevant person (2012-13). ...
Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank."

[186] Contrast 18.18.16 (Gift on to third party).

[187] The example in full (including its irrelevant detail) is as follows:
"**RDRM33160 Condition B - relevant debt** [Mar 2022]
Example 7
Kumar sets up and is a beneficiary of a non resident trust with £1,000,000 capital which the trustees invest in overseas property which produces income that would be chargeable on Kumar if he remitted it to the UK.
The trust borrows £500,000 from an offshore lender to buy a UK asset which Kumar uses in the UK. The trust pays the interest on the loan with the income from the letting of the overseas property.

> K is settlor of a non resident settlor-interested trust.
> The trust borrows to buy an asset which K uses in the UK.

The HMRC analysis is as follows:

> There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person).

More analytically, the debt is a relevant debt since:

(1) It relates to the UK asset.
(2) The asset falls within s.809L(2)(a) for two reasons (either would be sufficient):
    (a) The asset is used in the UK by a relevant person (K).
    (b) The asset must have been brought to or received in the UK by the trustees or by K.

Thus if the trustees repay the debt out of foreign trust income (which is deemed to be the income of K, as income of a settlor-interested trust) then K is chargeable under the s.624 remittance basis. If K repays the debt out of K's own income/gains there is also a taxable remittance of that income/gain.

18.22.7 *Borrowing to acquire co shares*

Suppose T borrows and buys all the shares of a company which owns a UK asset ("the Co's asset"). The debt relates to the shares. At first sight it may seem that the debt also relates to the Co's asset. But note that if T uses income to purchase the shares, the income is not remitted. That being the case, it would be anomalous if there were a remittance if T borrows to purchase the shares and then uses income to pay the debt. So the debt should not be regarded as a relevant debt: the debt does not relate to the Co's asset.[188] One does not lightly pierce the corporate veil.

If that were wrong then anyone who borrows to acquire quoted shares would need to investigate whether UK assets were held by the company; that cannot be right.

The above concerns a share *purchase*. Suppose:

(1) T borrows and *subscribes* for shares in a company.

> There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person). The income used to service the loan is regarded as a taxable remittance, chargeable on Kumar."

[188] It would be different if there were an arrangement under which (1) the company acquired the property and (2) the individual borrowed to purchase its shares.

(2) The company uses the proceeds of the share subscription to acquire UK assets.

Is the debt a relevant debt? It is suggested that the answer is, yes, if the two steps form part of an arrangement; but not otherwise.

18.22.8 *Borrowing for partnership share*

Suppose:

(1) T borrows and buys an interest in a partnership or subscribes for partnership capital

(2) The partnership owns or acquires a UK asset ("the partnership asset")

It is suggested that the debt does not relate to the partnership asset. It relates to the partnership share.[189]

18.22.9 *Debt for unpaid interest*

Suppose T has two debts:

(1) A debt for capital borrowed (the principal debt)

(2) A debt for interest on the principal debt (the interest debt)

The fact that the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) does not make the interest debt a relevant debt. This follows from the repeal of the former s.809L(8) ITA in 2009. However see 18.23.1 (Payment of interest).

18.22.10 *Debt charged on UK asset*

Suppose:

(1) T borrows and receives the borrowed money abroad

(2) T secures the debt on property brought/received/used in the UK.

It is considered that the debt does not relate to the UK property (within the meaning of s.809L) so the debt is not a relevant debt. The context shows that the colourless word "relate" is intended to apply to the proceeds of the debt, the borrowed money. Otherwise there would be a remittance when the debt is repaid, which is absurd.

18.22.11 *Debt imposed by law*

This section considers debts imposed by law.

[189] See 18.49 (Partnerships). But the position is different if the partnership borrows.

A court order on a divorce is not normally a relevant debt (it does not normally relate to property brought received/used in the UK, though it might do so). Indeed the obligation may not be a "debt". Likewise liabilities arising under a separation agreement. So there will not normally be a relevant-debt remittance.

Similarly, a fine or penalty does not necessarily relate to property brought/received/used in the UK.

A tax liability on income/gains relates to the income or gains. If so a tax liability on income/gains is not necessarily a relevant debt, but a tax liability on UK income/gains, or on remitted foreign income/gains is a relevant debt.

Even if the debt is not a relevant debt, there might be a remittance under ordinary principles when the debt is satisfied.[190]

18.22.12 *Debt relates to property in part*

If a debt relates partly to property brought/received/used in the UK, the entire debt is a relevant debt, the unfairness is avoided by s.809P(10) ITA.[191]

In RDR Manual the facts (stripping out irrelevancies)[192] are as follows:

> *Example 4 (Karen)*
> K borrows:
> - to pay for UK school fees, a service provided in the UK to her minor daughter (a relevant person)
> - to pay for a summer school in France, a service provided outside the UK

The debt is a partly-relevant debt.

> K repays the overdraft from her relevant foreign earnings.

[190] See too 19.24 (Relief on paying remittance charge).

[191] See 18.36 (Debt-remittances); 18.37 (Debt-remittance: P(10) cap).

[192] The example in full (including its irrelevant detail) is as follows:

"**RDRM33160 Condition B - relevant debt** [Mar 2022]

Example 4

In August 2011 Karen, a remittance basis user, uses an interest-free [*sic*] overdraft facility on her Jersey bank account to pay UK school fees for her 14 year old daughter Lauren. She also uses the remainder of the facility to pay for Lauren to attend a summer school in France organised by a French university. Karen repays the overdraft from her relevant foreign earnings between August and November 2011. ..."

The HMRC analysis is:

> There is a debt (the overdraft) which relates in part to a service provided in the UK (the schooling) to a relevant person (the daughter) – this part is a relevant debt. However part of the overdraft facility is not a relevant debt because it does not relate to a service provided to the daughter in the UK, but to a service provided in France.

The author has overlooked the definition of relevant debt in s.809L(7) ITA:

> In this section "relevant debt" means a debt that relates *(wholly or in part,* and directly or indirectly) to—
> (a) property falling within subsection (2)(a) [property brought/ received/used in UK by a relevant person]
> (b) a service falling within subsection (2)(b) [service provided in UK to a relevant person] ...

HMRC conclude:

> The daughter ... has taxable remittances of the relevant foreign earnings used to service and repay the part of the overdraft that is a relevant debt.

More analytically, K has a taxable remittance on the basis that:
(1) Remittance condition A is satisfied: a service is provided in the UK to a relevant person (the daughter)
(2) Remittance condition B is satisfied: the RFE is used outside the UK in respect of a relevant debt
(3) The amount remitted is the part of K's RFE used in respect of the part of the debt that is in respect of the UK services (the UK school fees).[193]

The end result is the same; HMRC have taken the wrong route to the right destination.

18.22.13 *2008 transitional rules for relevant debt*

In the following discussion a **"pre-2008 debt"** is one incurred before 6 April 2008.

Suppose:

(1) A pre-2008 debt which is not a relevant debt (the debt-related property is kept outside the UK).
(2) The debt-related property is brought/received/used in the UK by a relevant person after 2008.

[193] See 18.37 (Debt-remittance: P(10) cap).

The debt becomes a relevant debt at the time the property is brought/received/used in the UK. There is no difference here between a pre-2008 debt and a post-2008 debt.

Suppose:
(1) A pre-2008 debt
(2) The debt-related property is brought/received/used in the UK by the borrower *before* 2008.

It is considered that the debt becomes a relevant debt from 2008/09. In this case there is a transitional relief if the pre-2008 debt is a residential loan.[194]

Suppose:
(1) A pre-2008 debt
(2) The borrower gives the debt-related property to, say, a spouse.
(3) The property is brought/received/used in the UK by spouse before 2008.

Is this a relevant debt? It is arguable that the answer is no, on the grounds that the property was not brought/received/used in the UK by a relevant person. The spouse was not a relevant person at the time the property was brought/received/used in the UK, because the wide concept of relevant person did not then exist. This is consistent with the relevant person transitional rule.[195]

The usual 2008 transitional reliefs applies if pre-2008 income/gains are used to repay a relevant debt (wherever incurred).[196]

18.23 Use "in respect of" debt

Condition B is satisfied if income/gains are used in respect of a relevant debt.

In the discussion below I sometimes refer simply to a debt, rather than a relevant debt; ie it may be assumed the debt is a relevant debt.

Use "in respect of" a debt requires some nexus between the use and the debt; exactly what that nexus is has been left to the courts to sort out.

The words "directly or indirectly" do not add any clarity. Indeed I am not sure that it is altogether coherent to speak in the abstract of use "directly

[194] See 18.54 (Transitional relief: Pre-2008 loans).

[195] See 18.10 (Relevant person: Pre-2008 income/gain).

[196] See 18.10 (Relevant person: Pre-2008 income/gain); 18.53 (Transitional: pre-2008 property).

or indirectly" in respect of a debt, for use indirectly in respect of a debt is use in respect of a debt. The word "indirectly" does show that the drafter did not want the words "in respect of" to be narrowly construed. But (subject to context) the expression always has a wide meaning.[197]

If income/gains are used to pay a debt, this is relevant-debt remittance: money used to pay a debt is used in respect of the debt.

If an asset is transferred in satisfaction of a debt, that is a disposal of the asset. If a gain arises on that disposal, that gain is also used in respect of the debt.

If the benefit of a debt is purchased from the creditor, the purchase price is used in respect of the debt.

18.23.1 *Payment of interest*

Section 809L(9) ITA provides:

> The cases in which property (including income or chargeable gains) is used in respect of a debt include cases where the property is used to pay interest on the debt.

Suppose T has two debts:
(1) A debt for capital borrowed (the principal debt)
(2) A debt for interest on the principal debt (the interest-debt)

It is possible that:
(1) the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) but
(2) the interest-debt is not a relevant debt.[198]

However if T uses income/gains to pay the interest-debt, the funds are regarded as used in respect of the *principal* debt, and so are regarded as remitted under the relevant debt rule. In other words, it does not matter whether or not the interest-debt is a relevant debt, all that matters is that the principal debt is a relevant debt.

18.24 Use as security for debt

18.24.1 *Unsecured loan*

It is helpful first to consider the position for unsecured loans. If T borrows

[197] See App.2.4.1 (In respect of).

[198] See 18.22.9 (Debt for unpaid interest).

without giving security, T's assets are not used in respect of the debt. That is so even if T owns foreign income/gains and the lender would not lend had T not owned those assets. The fact that the lender only lends because of the foreign income/gains does not by itself entail that the foreign income/gains is used in respect of the debt. HMRC agree:[199]

> HMRC accepts that there is no remittance where
> [1] a loan is unsecured, but
> [2] it is clear that it [the loan] is only given because the lender is aware of the various assets the borrower has (some of which will represent or be derived from FIG [foreign income or gains]).
> Since there is no "contractual matrix" the lender has no right of recovery against the assets representing or derived from FIG, so the FIG cannot be said to be "used" in connection with[200] a relevant debt, HMRC consider that the legislation will not be engaged.
> Although the matter had not been fully considered, HMRC thought that it would not try to argue that there was "use" where a loan is only made as a result of a credit agency check (which would have taken into account the individual's assets representing or derived from FIG).[201]

That must be right. The contrary view could lead the absurd result that if a person borrowed on an unsecured loan, all their foreign income/gains might be regarded as remitted, as it would (in the post-2014 HMRC view) if it were subject to a formal charge.

There could be a remittance if the foreign income/gains is used in some way to satisfy the terms of the loan. There is then, in HMRC's words, a "contractual matrix" (though I am not sure that is a particularly helpful way of putting it).

18.24.2 *Secured loan*

Suppose income/gains are charged as security for a relevant debt. There

[199] Note of meeting between professional bodies & HMRC, 11 Sept 2014 para 15 *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/a1b82d1f-8e06-49a6-98dc-896c9e9cf9cf/Rep%20body%20agreed%20note%20of%2011%20September%20meeting%20after%20HMRC%20comments.pdf*

[200] Author's footnote: the correct statutory term is, used "in respect of" a relevant debt.

[201] There is no reason to think that HMRC have altered their practice on this point. Although the last sentence is expressed tentatively, it clearly follows from the point made in the first sentence of this quote. A commercial lender will always make a credit check, and it can make no difference whether that task is carried out by the lender itself or outsourced to a credit agency.

are various possible views:

(1) One view is that the charge constitutes "use" of the funds, in respect of the debt, within the meaning of the relevant debt rule. On this view, charging funds as security for a relevant debt constitutes a taxable remittance. Nothing more is needed.

(2) Another view is that funds are only "used" in respect of a debt if they are "used up" ie consumed; on this view (unless and until the security is enforced) funds used as security are not "used", and charging funds as security for a relevant debt does not constitute a remittance.

(3) A compromise view is that merely charging funds does not constitute use in respect of the debt: something more is needed, combined with the charge, before the income/gains can be said to be used in respect of the debt. The question then is to identify that "something more". HMRC adopted a form of this compromise view until 2014.

If charging funds does constitute a remittance, the question arises as to whether the remittance is the whole of the charged fund, or only part, and if so which part. I consider that separately below.[202]

18.24.3 *HMRC pre-2014 view*

Until 4 August 2014, the RDR Manual provided:

> ***RDRM33170 collateral in respect of relevant debt*** *[Dec 2011]*
> *Foreign income and gains may be used as collateral for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt).*
> *Such foreign income and gains used as collateral are used 'in respect of' the relevant debt, so there may be a taxable remittance at this point.*
> *[1] The foreign income or gains used as collateral may be used directly, that is, the lender may receive a charge over cash assets in a bank account.*
> *[2] However it is more likely they will be offered indirectly, often in the form of an asset such as a property or bond note that is 'derived from' the foreign income or gains.*[203]
> *[3] This situation only arises where remittance basis users offer their foreign income or gains for use as collateral for a relevant debt,*

[202] See 18.38 (Security for debt: Amount remitted).

[203] Author's footnote: I rather doubt that [2] is "more likely" than [1] and perhaps HMRC agreed, as the current Manual does not make that point; but it does not matter.

> *whether to a UK-based or an offshore lender.*
>
> *[4] In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007 /s809L(3)(c))...*[204]

So far the Manual appeared to take the view that charging as security is use in respect of a debt, but the text went on to qualify that with an exception so large that that the default rule rarely applied:

> *Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also 'used in respect of' a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible sources of a taxable remittance charge in respect of the relevant debt – the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.*
>
> *In the majority of commercial situations, neither party to the relevant debt transaction expects or intends that the collateral offered as security will be taken by the lender. Instead it is planned that the loan will be serviced and the capital repaid without recourse to the security charge. In such cases using foreign income or gains to regularly service or make capital repayments in respect of the relevant debt effectively 'masks' the collateral being used. In such cases the only taxable remittance will occur as and when the foreign income or gains are used to service or repay the loan. The payments, and thus the taxable remittances, will be spread over the loan period.*

HMRC then specified some exceptions where the default rule would apply, so granting a charge for a debt would be a remittance of the assets charged.[205]

[204] More analytically: There is no taxable remittance in the case of UK property or non-taxable offshore property because remittance condition B is not met.

[205] The Manual provided:

> In some cases, usually involving avoidance or non-commercial arrangements, the relevant debt is not serviced or repaid by the borrower, or only a token amount is offered. In these circumstances the foreign income or gains offered as collateral are being utilised in respect of the relevant debt, that is, to delay or minimise service charges or repayments. As there is only one possible tax charge in respect of the relevant debt, that is the charge HMRC will take. The charge is taken up-front when the collateral is offered. Such arrangements are expected to be rare. This should not be mistaken with interest-only repayment terms, or commercial arrangements that offer payment breaks and so forth. Always check the terms and general availability of the loan arrangements on offer.

In short, on this view, security is not "used in respect of a debt" if the debt is "serviced and repaid" on commercial terms;[206] but in other cases it is so used. I refer to this as the **"pre-2014 HMRC view"**.

18.24.4 *Post-2014 HMRC view*

The RDR Manual was amended on 4 August 2014 and now takes a different view:

> **RDRM33170 collateral in respect of relevant debt** [Jan 2019]
> Foreign income and gains may be used as collateral for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt - see RDRM33160).
> The foreign income and gains used as collateral are used 'in respect of' the relevant debt, so there is a taxable remittance when the loan is brought to the UK.
> The collateral containing the foreign income and gains may be a charge over cash assets in a bank account or other possessions, such as property or financial instruments that are 'derived from' foreign income or gains.
> This situation only arises where remittance basis users offer their foreign income or gains as collateral for a relevant debt, whether to a UK-based or an offshore lender.
> In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007/s809L(3)(c)) as the property used as collateral will not contain foreign income or gains.[207]
> To determine the amount of remittance where foreign income or gains are used as collateral in respect of a relevant debt refer to RDRM35050 Condition B – Collateral in respect of relevant debt.[208]
> Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also 'used in respect of' a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible

> If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment schedules.

The Manual gave examples which I considered in the 2018/19 edition of this work at 12.21.3, but I omit this now as it is of historical interest only.

[206] Likewise if there is other artificial arrangements, such as back-to-back loans.

[207] More analytically: There is no taxable remittance of UK property or non-taxable offshore property because remittance condition B is not met.

[208] See 18.38 (Security for debt: Amount remitted).

> sources of a taxable remittance charge in respect of the relevant debt - the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.

Similarly:

> **RDRM37050 Foreign income and gains as collateral** [Mar 2022]
> **Remittance basis clarifications**
> *When foreign income or gains are used as collateral when does the remittance take place?*
> A remittance will occur if foreign income or gains are used in respect of a relevant debt. HMRC considers that foreign income or gains will be used in respect of a relevant debt, if
> [1] they are used to agree the terms for the loan or
> [2] used to satisfy the terms of a loan.
> If the loan is not a relevant debt initially, the foreign income or gains used as collateral will be remitted at the point the loan becomes a relevant debt.

The Manual then gives an example; the facts (stripping out irrelevancies)[209] are as follows:

> **RDRM33170 collateral in respect of relevant debt** [Mar 2022]
> **Example 1** (John)
> In 2012-13 J, a remittance basis user takes out a loan for £200,000 from

[209] The example in full (including its irrelevant detail) is as follows:

> "**RDRM33170 collateral in respect of relevant debt** [Mar 2022]
> In 2012-13 John, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. John uses the loan to purchase a horse and a stable/paddock in Chester to indulge his young daughter's latest hobby; so the loan is a relevant debt.
> John offers as collateral for the loan a 5-year offshore bond, due to mature in 2015. He purchased this bond in 2010-11 (a year in which he was also a UK resident remittance basis user) using £200,000 of his untaxed relevant foreign income from that year.
> John repays £18,000 of the loan (principal plus interest) in 2012-13, using his relevant foreign earnings from his separate employment in Guernsey.
> John is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so John is using his relevant foreign income in respect of the relevant debt. However John is also using his relevant foreign earnings to both service and repay the debt capital; both the £200,000 foreign income from 2010-11 and the £18,000 foreign earnings from 2012-13 are regarded as remitted in 2012-13."

> a Guernsey bank. J uses the loan to purchase a horse and a stable/paddock in Chester; so the loan is a relevant debt.
>
> J offers as collateral for the loan a 5-year offshore bond. He purchased this bond in 2010-11 (a year in which he was also a UK resident remittance basis user) using £200,000 of his untaxed relevant foreign income from that year.
>
> J repays £18,000 of the loan (principal plus interest) in 2012-13, using his relevant foreign earnings from his separate employment in Guernsey.

The HMRC analysis is now as follows:

> J is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so J is using his relevant foreign income in respect of the relevant debt.
>
> However J is also using his relevant foreign earnings to both service and repay the debt capital; both the £200,000 foreign income from 2010-11 and the £18,000 foreign earnings from 2012-13 are regarded as remitted in 2012-13.[210]
>
> **Note** - In the example above, the relevant debt could also be serviced and repaid using non-taxable income or capital sources in which case there would be no taxable remittances of foreign income or gains in respect of the servicing payments.
>
> If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment schedules.
>
> **Note** - Previous HMRC guidance did not follow the position given above and suggested (!) that collateral in 'commercial' situations was not taxable if 'regular' servicing payments were made. This guidance was withdrawn on 4 August 2014...

I refer to this as the **"post-2014 HMRC view"**.

18.24.5 *"Use as collateral"*

Extracting the principles from the Manual quotes above, HMRC argue that income/gains are used in respect of a debt if:

- used as collateral for a loan
- offered as collateral for a debt

[210] Author's footnote: However J would not have paid tax on this remittance, because in the relevant year (2012/13), it would have not been regarded as taxable, on the basis of the pre-2014 HMRC view.

- used to agree the terms for the loan or
- used to satisfy the terms of a loan

We need to understand what constitutes "use as collateral".

One should not construe the Manual as though it was a statute. (Nowadays, do we even construe a statute "as though it was a statute"? Discuss.) Nevertheless, "collateral" (which means the same as security) has a clear legal meaning: it is property in which the creditor has a security interest, ie property subject to a charge, mortgage, pledge or lien. It does not include property subject to a right of set-off.[211]

The RDR Manual provides:

> **RDRM37050 Foreign income and gains as collateral** [Mar 2022]
> *... Are foreign income or gains used (and remitted) in respect of a loan if*
> *[1] they are not part of the formal security package, but*
> *[2] can be used by the bank to repay the loan in the event of a default as the result of a general pledge contained in the bank's standard terms and conditions*
> If the loan or the repayment terms are conditional on the availability of the foreign income or gains used as collateral, HMRC considers the foreign income or gains have been used in respect of the debt and there will be a taxable remittance.
>
> *For there to be a remittance, does the customer need to take some positive action to use foreign income or gains as security for the loan?*
> There doesn't need to be some positive action on behalf of the customer for there to be a remittance of foreign income or gains used as collateral.
> For example,
> [1] if, at the point the relevant debt is taken out, the collateral offered is £250,000 capital held in a nominated account.
> [2] £10,000 clean capital is subsequently withdrawn from the account
> [3] but on the same day a foreign gain of £10,000 is paid into the account.
> Although the individual may not have taken a formal step of offering the foreign gain to the lender as collateral, the foreign gain has been used in respect of the relevant debt. The foreign gain has been used in respect of the debt because the payment into the account prevented a

[211] See 82.10.1 (Security/collateral), discussing the statutory phrase "held or made available as security, collateral or guarantee" in an IHT context.

> breach of the terms of the loan.

But it seems to me on those facts that the individual has "taken a formal step of offering the foreign gain to the lender as collateral", simply by paying the sum into the account.

18.24.6 *Income/gains from collateral*

HMRC discuss the position of income/gains arising from the collateral:

> **RDRM37050 Foreign income and gains as collateral** [Mar 2022]
> *... Is it accepted that where*
> *[1] the original collateral remains in place but*
> *[2] that collateral itself generates further overseas income and gains,*
> *there is no additional remittance as a result of the additional income and gains arising, even where the assets representing those income and gains form part of the security for the loan?*
> HMRC considers that the point at which foreign income or gains are remitted will depend on the particular facts.

"Depends on the facts" does not take us far, but it introduces the HMRC answer:

> If
> [1] the loan terms are conditional on the foreign income or gains used as collateral, or
> [2] foreign income or gains are used to satisfy the terms of the loan,
> the foreign income or gains have been used in respect of a relevant debt and there will be a taxable remittance.
> *Would the answer still be the same if, as a result of investment losses, the original collateral (although not having been withdrawn) is reduced below the amount of the loan?*
> If foreign income or gains are used to make up a shortfall in the collateral originally offered, there will be a taxable remittance. At this point, the foreign income or gains have been used in respect of a relevant debt because they have been used to satisfy the terms on which the loan was provided.

So if there is no shortfall, the income/gains are not remitted.

A note of meeting between Professional Bodies/HMRC provides:[212]

[212] "Treatment of loans secured on foreign income or gains by remittance basis users" (Apr 2022) *https://www.tax.org.uk/treatment_of_loans*
ICEAW publish this note as TAXguide 20/21.

> **Question 1:** *Non-resident individual with existing "relevant debt" secured over non-UK portfolio becomes UK resident – is there a remittance of income/gains arising within the portfolio after the individual becomes UK resident?*
>
> A is non-UK resident and domiciled (and has never been resident or domiciled in the UK).
>
> In 2015, he purchases a house in the UK for £1 million. This is funded
>
> [1] as to £400,000 by A from his own resources and
>
> [2] as to the remaining £600,000 by a loan from his bank in Malaysia which is secured by a charge over A's investment portfolio held with the bank which, at the time the security is granted is worth £1.5 million.
>
> There is no restriction on A dealing with the portfolio or making withdrawals although, if the value of the portfolio falls below £900,000, he is required to top up the security so that it has a value of at least £1 million, failing which the bank can call in the loan. Subject to this, the charge is, however, in respect of all assets comprised in the account which holds the portfolio from time to time.

The professional bodies comment:

> As the loan proceeds have been used in the UK, the loan is a "relevant debt".[213]
>
> On the basis of HMRC's interpretation, the portfolio has been "used" in respect of the relevant debt as it has been given a security for the loan. There is however no taxable remittance at the time the loan is put in place as A is non-UK resident.

That is not contentious, but it leads us to the question:

> The question is whether any income or gains which arise within the portfolio after A becomes UK resident (and assuming that he is taxed on the remittance basis) would be treated as remitted as a result of the security arrangements.

The same question would arise if A had been UK resident throughout:[214]

[213] Author's footnote: the debt is a relevant debt even though the debtor was non-resident
(1) when the loan was made, and
(2) when the property to which it relates was received in the UK
See 18.21 (Relevant debt).

[214] Except that in this case, A is (hopefully) more likely to obtain tax advice and avoid this trap.

would income/gains from the charged fund count as remitted?

The professional bodies say the answer is no:

> In our view, although the post-residence income and gains will form part of the security for the loan (as the charge is over the entire contents of the portfolio account from time to time), they cannot be said to have been "used" in respect of the relevant debt. There are two reasons for this:
>
> 1. As long as £900,000 remains in the portfolio, A is free to withdraw the income and gains at any time. As there is no requirement for him to leave the income/gains in the account, they have not been "used" by A in respect of the debt.

HMRC would no doubt respond that the asset is used when subject to the pledge, and ceases to be used if withdrawn.

> 2. The entire portfolio is (according to HMRC) "used" in respect of the relevant debt when it is first given as security. If nothing has been added to the portfolio by A, it is difficult to see how any part of the portfolio can be "used" in respect of the relevant debt a second time. As the post-residence income and gains are part of the existing portfolio (rather than resulting from any addition), there is nothing new which is being "used" in respect of the relevant debt.
>
> The contrary argument of course is that there are now assets in the portfolio which either are, or are derived from, the post-residence income and gains and which have been "used" in respect of the relevant debt as they form part of the security of the loan. However, for the reasons set out above, we do not believe that this is the right analysis.

HMRC do not agree with the professional bodies:

> **HMRC response**
>
> In this scenario the loan is secured by a charge "in respect of all assets comprised in the account which holds the portfolio from time to time''. The £900,000/ £100,000 requirement is an additional layer of security for the loan, but the charge is over all the assets in the investment portfolio.
>
> Foreign income or gains arising in the portfolio after the individual becomes UK resident will be 'used' in respect of a relevant debt because they form part of the security for the loan and there will be a taxable remittance

The professional body's analysis depends on the proposition that the income/gains are "nothing new". That is not correct. The question is whether they are added to the (charged) portfolio. If the fund manager pays the income directly out to the owner, the income is not added to the portfolio and the income is not remitted. But if the fund manager retains the income as part of the portfolio, it is added to the portfolio, and so used in respect of the debt. The same applies to gains, but in practice these are likely to be added to the portfolio.

The moral is that a non-resident should review their banking arrangements before becoming UK resident, along with much other pre-residence planning.[215]

18.24.7 *Debt becomes relevant debt*

A non-relevant debt may become a relevant debt.[216]

Suppose:

(1) T grants a charge over foreign income/gains as security for a non-relevant debt

(2) Later the debt becomes a relevant debt (as the proceeds of borrowing are received in the UK).

In the post-2014 HMRC view, at least, there is a relevant-debt remittance of the foreign income/gains when the debt becomes a relevant debt. That must be on the basis that when the charge is granted, the assets charged continue at all times subsequently to be used in respect of the debt.

18.24.8 *Transitional: Pre-2014 loan*

On the post-2014 HMRC view there is a remittance when a relevant debt is charged on income/gains. But HMRC did not seek to apply this to "arrangements where the loan was brought into or used in the UK before 4 August 2014".[217]

It follows that HMRC cannot say that there is a taxable remittance later when the same income/gains are remitted to the UK (or used to repay the

[215] See 13.1 (UK arrival or departure: Tax checklist).

[216] See 18.21 (Relevant debt).

[217] It is suggested that HMRC's transitional relief practice only applies where there was (on the new HMRC view) a remittance before 4 August 2014. Eg if the loan was brought to the UK before 4 August 2014, but charged on foreign income/gains after that date, the transitional relief would not apply.

debt).[218] A sum (on the post-2014 HMRC view) which is remitted in one year cannot give rise to a remittance charge if remitted again in a second year. As HMRC cannot usually assess the tax in the year of remittance, pre-2014 loans may provide a windfall for the taxpayer, though in practice the mixed fund rules may somewhat restrict the advantage. The point could still arise, but it is now of mainly historical interest.

18.24.9 *The correct view*

The meaning of words is always context dependent, but this is particularly so in the case of broad expressions such as "used" in respect of a debt.

The pre-2014 HMRC view raises few difficulties.

The post-2014 HMRC view leads to more serious difficulties:

(1) Double remittance charge (which was the reason why HMRC adopted its pre-2014 view).

(2) What if the value of the property charged exceeds the amount of the loan? HMRC's view has wavered, but their post-2020 view is that the remittance is not limited to the amount of the loan, which can lead to absurd results.[219]

For these reasons, it is arguable that (in the absence of special circumstances) the mere grant of security is *not* use in respect of the debt, ie that HMRC's pre-2014 view was correct. But it would be a "good win" for the taxpayer, and it is wiser to avoid the issue.

No-one has yet challenged the post-2014 HMRC view. A challenge would be expected if HMRC take the most extreme position as to the amount remitted,[220] but that now seems unlikely.

It is considered that the better view is that:

(1) funds charged are "used" in respect of a debt (and so remitted) if the loan would not be made on substantially the same terms, without the security,

(2) funds are not "used" if the circumstances are that the loan would be

[218] The principle that a concession in one year cannot be used to impose a tax in another year is self-evident; but if authority is needed, see s.284A TCGA (Concessions that defer a CGT charge) which (in short) disapplies the principle for pre-1999 CGT concessions only.

[219] See 18.38 (Security for debt: Amount remitted).

[220] See 18.39 (Amount remitted: post-2020 HMRC view).

made on substantially the same terms, without the security.[221]

There are difficulties in applying this view: The question whether the loan would be made without the security is a hypothetical question which could be imponderable. So this is not an altogether easy solution, but perhaps it is the best that can be done. However, in practice, it will not be common that the loan would be made on substantially the same terms, without the security. So it is not likely to happen often that there is a difference between the HMRC view and the view taken here.

18.24.10 *Policy issues*

Whenever there is a dispute as to what the law is, it is worth pausing to ask: regardless of what the current law is - what should it be? Should the law treat a charge on income/gains as security as a remittance?

It seems to me that there is no right or wrong answer to this: it depends on how generous or stringent a remittance basis one wants, bearing in mind that:

(1) The policy reason for the remittance basis is to make the UK an attractive place for foreign domiciliaries to reside.[222]
(2) One might ask if the income or gains are "in effect remitted to the UK, taking a realistic view"[223]

The pre-2014 HMRC view permits tax planning by allowing the option of borrowing instead of remitting income/gains. However:

(1) There is not usually any tax advantage. Broadly, one exchanges an up-front charge of tax on the sum borrowed for an ongoing charge of tax on interest and repayments (made out of income/gains). There is no overall tax saving, except in the case of a remittance basis taxpayer who:
    (a) dies before repaying the debt, or
    (b) leaves the UK before repaying the debt, and is not just temporary non-resident.

    This is not tax avoidance in the strictest sense of the expression.
(2) Such planning remains possible under the post-2014 HMRC view -

[221] The answer to that question may vary over time, but the test should be applied at the time the debt arises. if a loan would have been made, but on different terms, or in smaller amount, there would be a use in respect of the debt.

[222] See 1.1 (Foreign Domicile Tax Policy: Introduction).

[223] See 18.1.4 (Construction of remittance basis).

at a greater cost - by unsecured borrowing.

The reader may suspect an inconsistency in government policy here. Perhaps some of those responsible for tax administration have no sympathy with government's decisions in 2008 and 2017 to retain the remittance basis; so they seek to adopt as strict an interpretation of the law as is possible, regardless of common sense or fairness.

On any basis:

(1) The double remittance charge involved in the post-2014 HMRC view of debt-remittance is wrong. If charging property as security for a relevant debt is a taxable remittance of the property charged, repaying the relevant debt should not be.[224]

(2) The post-2020 HMRC view (that the amount remitted in the case of a charge is not limited to the amount of the relevant debt) is wrong. If granting a charge over foreign income or gains is a taxable remittance, the amount remitted should be capped to the value of the relevant debt in all cases, not just in some cases. But HMRC may in due course abandon that view.

However, there is little prospect of law reform on that point, at least, at the present time.

18.24.11 *Remittance planning by loans*

Suppose:

(1) a remittance basis taxpayer (T) has an foreign asset which is clean capital but on which a gain would arise if it were disposed of.

(2) T needs short term or medium term funds in the UK,

T could sell and remit the proceeds, but the gain would be subject to CGT. In this case it may be better for T to borrow, charged on the asset. The gain would not be remitted because there is no disposal and no gain accrues. If the charge did not extend to income from the asset, that would not be remitted either. Of course funds used to pay interest, or repay the debt, would be remitted, and the same planning applies to an arising basis taxpayer: it may be better to borrow than to dispose of an asset and realise a gain.

[224] Unless the debt exceeds the value of the security, which will not be the case in ordinary commercial lending.

18.25 Guarantees

It is suggested that a guarantee is not a debt.[225] But if principal debtor defaults, the guarantee can be called on, and a debt comes into existence. So where G guarantees the debt of D, there are, potentially, two debts:

(1) D's debt (the principal debt)
(2) G's debt (the guarantee debt)

Assume D's debt is a relevant debt in relation to D (it relates to UK property received by D). G's debt relates to the same property. It is a relevant debt in relation to G, if D is a relevant person in relation to G.[226] Then if G uses his foreign income/gains to pay G's debt, the income/gains are remitted. This is assumed in transitional relief.[227]

If the guarantee is secured, the security relates (indirectly) to D's debt. So if D's debt is a relevant debt in relation to G, the security is under the post-2014 HMRC view regarded as remitted.[228]

18.26 Becoming/ceasing to be relevant person: Conditions A & B

A person may be a relevant person at one time and not at another time. For instance, a child ceases to be a relevant person on becoming 18; an individual becomes a relevant person on marriage or cohabitation, and ceases to be a relevant person on divorce or separation. A company becomes/ceases to be a relevant person in relation to T if T becomes/ceases to be a participator in the company.

The statute does not expressly address the application of conditions A and B in this situation. We need to find the answer as best we can in the words of the statute.

18.26.1 *Condition A*

Section 809L(2) ITA provides:

> Condition A is that—
> (a) ... property is brought to, or received or used in, the UK by ... a relevant person...

For present purposes there are three ways of satisfying condition A:

[225] See 56.22.2 (Meaning of "debt").
[226] See 18.21 (Relevant debt).
[227] See 18.54 (Transitional relief: Pre-2008 loans).
[228] See 18.24 (Use as security for debt).

property must be (i) brought or (ii) received or (iii) used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment. It is considered that condition A is met if and only if the person is a relevant person at that moment.

Suppose:

(1) T uses income/gains to make a gift of an asset to S (not a relevant person). S brings or receives the asset in the UK. There is no taxable remittance at the time of the gift or at the time of the receipt in the UK.

(2) Later, S becomes a relevant person (eg S becomes a spouse or cohabitee). There is no taxable remittance at that time.[229]

Likewise if:

(1) T uses income/gains to make a gift of an asset to R (a relevant person). R does not remit the asset to the UK. There is no taxable remittance at this time.

(2) Later, R ceases to be a relevant person, and subsequently brings or receives the asset in the UK. There is no taxable remittance at that time.

HMRC agree. RDRM33150 example 5 is an example of a person ceasing to be a relevant person. The facts (stripping out irrelevancies)[230] are:

> In 2013 W uses foreign chargeable gains to purchase a motorcycle

[229] An interesting question arises if there is a second receipt in the UK later. That is, add to those two steps a third step: S subsequently takes the property outside the UK and then (still a relevant person) brings or receives it in the UK for a second time. Is there a taxable remittance on the second receipt? It is suggested that the answer is no, though it needs a somewhat purposive construction to reach that result.

[230] The example in full (including its irrelevant detail) is as follows:
"**RDRM33150 Condition B - remittances derived from income or gain** [Mar 2022]
Example 5
Caroline is a remittance basis user. In August 2013 she realises some foreign assets and so makes some foreign chargeable gains. She uses all the proceeds (and so uses all these gains) to purchase a motorcycle in Paris which she gives to her husband Joel. It is registered in his name. Joel keeps the bike at his French apartment. A few years later Caroline and Joel divorce, and Joel moves from their home in Liverpool to Manchester.
In September 2017 Joel and Caroline's 16 year old son, Joseph wants to learn how to ride a motorcycle, so Joel imports his bike from Paris to his Manchester home for Joseph to use."

> offshore.
> W gives the asset to her husband H. H keeps the bike at offshore. [So there is no remittance at this time].
> Subsequently, H and W divorce, and H moves from their home [ie H ceases to be a relevant person].
> In 2017 H brings his bike to the UK.

The relevant part of HMRC analysis is as follows:

> H and W were married and so H was a relevant person in 2013 when W gave him the motorcycle; he could not therefore have been a gift recipient (see Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.[231]

> By 2017 they have divorced so H is not a relevant person when he brings in the motorcycle [to the UK].

More analytically, condition A is not satisfied because H is not a relevant person at the time when H brings the asset to the UK.

18.26.2 *Condition B*

Condition B provides (in part):

> Condition B is that—
> (b) the property, service or consideration [received in the UK]—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is *property of or consideration given by a relevant person ...*

It is considered that the requirement in (b)(ii) is met only if the person is a relevant person at the time that condition A is met (ie at the time that the property is brought/received/used in the UK). HMRC agree. The RDRM33120 motorbike example (already discussed just above in connection with condition A) covers the point. The facts (so far as relevant) are as set out above with one additional fact:

> The motorcycle is used in the UK by C who is a minor child of W (a relevant person).

The HMRC analysis is as follows:

[231] See 18.29.2 (Remittance condition C: Gift recipient).

> Here, property has been provided in the UK (the motorcycle) for the use of a relevant person (C) ...

More analytically, condition A is satisfied.

> ...and the property derives directly from W's foreign chargeable gains. However the motorcycle is the property of H, who is not a relevant person [at the time that the property is used by the relevant person C], so there is no taxable remittance for W.

More analytically, condition B is not satisfied because H is not a relevant person when the asset is used by the relevant person, C.

To drive the point home, the RDR Manual 33150 gives another example making the same point on somewhat far-fetched facts. So far as relevant[232] the facts are:

> In 2011 W uses RFI to purchase prints retained outside the UK.
> W gives the prints to her daughter D who is age 16 and so a relevant person. D retains the prints outside the UK [so there is no remittance].
> D ceases to be a relevant person on becoming 18 but in that year (although still a teenager) D has a child GD (who is a relevant person in relation to W).
> In 2016 D enters into an (implausible) agreement under which she transfers the prints (still outside the UK) to the mother of a singing teacher in consideration of the teacher giving singing lessons to GD (age only 3) in the UK.

The HMRC analysis is as follows:

[232] The example in full (including its irrelevant detail) is as follows:
"**RDRM33150 Condition B - remittances derived from income or gain** [Jan 2019]
Example 6
In 2011, while visiting New York, Ros, a UK resident remittance basis user, purchases several art prints by H Marecus, an international artist. Ros uses her relevant foreign income to make the purchase. She gives them to her daughter Rachael, who is at that time living and studying in the US, as a 16th birthday present in February 2011. Rachael returns to the UK in May 2011, but leaves the prints at her uncle's New York apartment.
In June 2016 Rachael's 3 year old daughter Abigail decides to start singing lessons in Newcastle. The singing teacher's mother is a collector of Marecus prints, so the teacher agrees with Rachael to accept one of the prints in exchange for the lessons. Rachael arranges for her uncle to send the print from New York directly to the singing teacher's mother in California."

> A service has been provided in the UK (the singing lessons) for the benefit of a relevant person (GD) ...

More analytically, condition A is satisfied.

> ...and the consideration for the service (the print) derives from W's RFI. However the consideration is given by D, who is not a relevant person [at the time that condition A is satisfied] and so W has not made a taxable remittance of her relevant foreign income. D is 21 years old and so is not a relevant person in June 2016 when she gives the prints in consideration for a service.

More analytically, condition B is not satisfied.

> Note – D was 16 years old and so is a relevant person in 2011 when her mother gave her the prints (see also Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose:

(1) T uses income/gains to make a gift of an asset to S (not a relevant person). There is no taxable remittance at this time.
(2) S becomes a relevant person, and subsequently brings/receives the asset to the UK. There is a taxable remittance at that time.

HMRC agree. The RDR Manual provides an example where the facts (stripping out irrelevancies)[233] are:

[233] The example in full (including its irrelevant detail) is as follows:
"**RDRM33240 Gift recipients cannot be relevant persons** [Mar 2022]
In June 2010 Sam, a remittance basis user, uses £8,000 of her relevant foreign income to make an overseas purchase of an antique clock from a dealer in Denmark. Sam immediately makes a gift of an antique clock to Chris and Jo, who at that time are living in Denmark. The clock is kept at Chris's family home in Copenhagen. Chris, not being a relevant person, is a gift recipient.
Two years later Jo and Chris split up, and in July 2014, Sam and Chris marry. Chris ceases to be a gift recipient at this time.
In October 2014 Chris brings the antique clock to the UK to the house that is shared with Sam. ..."
The example as published is defective in that it must be assumed (though this is not stated) that Chris gave his interest in the clock to Jo (or perhaps the gift was to Jo and not to Jo and Chris).

> **RDRM33240 Gift recipients cannot be relevant persons** [Mar 2022]
> *Example 2*
> In 2010 T uses RFI to purchase a clock outside the UK.
> T immediately gives the clock to S (not a relevant person) and it is kept outside the UK.
> S, not being a relevant person, is a gift recipient.
> In 2014, T marries S. S becomes a relevant person and ceases to be a gift recipient at this time.
> Subsequently, S brings the clock to the UK.

The HMRC analysis is as follows:

> As S is no longer a gift recipient Condition C is not relevant.
> However as S is now [in 2014] a relevant person there is a taxable remittance chargeable on T when S imports the clock, under Conditions A and B. This is because
> [1] property (the clock) has been brought to the UK by a relevant person (S) [ie condition A is satisfied] and
> [2] that property derives from T's RFI and the property is property of a relevant person (S) [ie condition B is satisfied]

So far we have considered property brought to or received in the UK. That can happen only at a particular moment. On the other hand, property can be *used* in the UK over a period of time. Suppose:

(1) Year 1: T uses income/gains to make a gift of an asset to S (not a relevant person). S uses and continues to use the asset in the UK eg she buys a house which she occupies. There is no taxable remittance at the time of the gift or at the time of the use.

(2) Year 2: S becomes a relevant person (eg a spouse or cohabitee). She continues to use the property.

Is there a taxable remittance in year 2 when S becomes a relevant person? It would be strange if there were a difference between this case and the case of receipt in the UK. It is suggested that the answer is, no.

18.26.3 *Relevant debt: Becoming/ceasing to be relevant person*

Similar principles apply to debt-remittances. A relevant debt is (in short) one which relates to property brought/received/used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment, and *used* (if at all) only at a particular time or period. It is considered that a debt relating to that property is a relevant debt in relation to an individual only if the person who brings/receives/uses the property in the UK is a relevant person in relation to that individual at that time the property is brought/received/used in the UK.

Suppose:

(1) S (not a relevant person in relation to T) borrows money. S brings/receives the money in the UK. The debt is not a relevant debt in relation to T, so there would be no taxable remittance if T repaid the debt out of T's income/gains.
(2) Later, S becomes a relevant person (eg S becomes a spouse or cohabitee of T). The debt is still not a relevant debt, and there is no taxable remittance if T repaid the debt.

Likewise if:

(1) R (a relevant person in relation to T) borrows money. R does not remit the money to the UK. The debt is not a relevant debt.
(2) Later, R ceases to be a relevant person, and subsequently brings or receives the money in the UK. The debt is still not a relevant debt.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose

(1) R (a relevant person in relation to T) borrows money. R does remit the money to the UK. The debt is a relevant debt in relation to T.
(2) R ceases to be a relevant person in relation to T (eg R and T divorce).

The debt does not cease to be a relevant debt in relation to T. The debt relates to the property, and the property still falls within s.809L(2)(a). So there is a taxable remittance if T repays the debt after divorce.

18.26.4 *Third persons*

The position becomes more complicated when a third person is involved. Suppose:

(1) T gives income/gains to T's spouse W.
(2) There is a divorce and W ceases to be a relevant person.
(3) W transfers the income/gains to a trust under which a minor child of T is a beneficiary. The trustee is a relevant person in relation to T.
(4) The trustee transfers the funds to the minor child who receives them in the UK.

Condition B appears to be satisfied since at the time of the receipt in the UK the funds are the funds of a relevant person. But the trust funds may not be derived income.[234]

18.27 Debt becomes/ceases to be relevant debt

A debt which is not a relevant debt may become a relevant debt. Condition B is (in short) that income is used in respect of a relevant debt. It is considered that there is a taxable remittance only if the debt is a relevant debt at the time income is used in respect of the debt.

Suppose:

(1) Year 1:

   (a) T borrows and receives the borrowed money offshore.

   (b) T uses income/gains to pay the interest (use in respect of the debt).

In year 1 condition B is not satisfied as the income/gains is not used in respect of a relevant debt.

(2) Year 2: T remits the borrowed money to the UK.

In year 2 the debt becomes a relevant debt, but it is considered that the income/gains used to pay interest in year 1 does not become remitted at that time. But if income/gains is used to pay more interest in year 2, that income/gains satisfies condition B.

If a debt is, or becomes, a relevant debt, it is not likely that it can subsequently cease to be a relevant debt (so the tax puzzle of a debt ceasing to be a relevant debt is not likely to arise).[235]

18.28 Conditions C/D: Introduction

The drafter identified gaps in remittance conditions A and B which are addressed by remittance conditions C and D. In outline:

(1) An individual (T) may enjoy property in the UK which:

   (a) is derived from T's income/gains ("derived property") but

   (b) the derived property is *not property of a relevant person*.

   Then condition B is not met.[236]

   Condition C fills this gap by imposing a remittance if T enjoys derived property in the UK property which is property of a third party

[234] See 18.18.16 (Gift on to third party).

[235] See 18.22.3 (Debt-related asset leaves UK/ceases to exist).

[236] It is usually a requirement of condition B that the income/gains are the property of a relevant person; see 18.16.1 (Property of relevant person).

(not a relevant person). This third party must however be a gift recipient.

(2) T may enjoy property in the UK which is *not derived from T's income/gains* ("non-derived property"). Then condition B is not met. Condition C fills this gap by imposing a remittance if T enjoys non-derived property in the UK (in short) by an operation made with reference to the gift. There must again be a gift recipient.

(3) T may enjoy property in the UK which is not property of a relevant person or a gift recipient. Then conditions B and C are not met. Condition D fills this gap by imposing a remittance if:
   (a) T has made a disposition to a third person ("the condition D person)
   (b) T enjoys any property of a condition-D person by reference to that disposition.

Another way to put it is that conditions A/B essentially involve only the taxpayer, T (or at least, they only involve relevant persons). Conditions C/D involve benefits provided to T by a third party, not a relevant person, being either a gift recipient or a condition-D person.

18.28.1 *Conditions C/D compared*

It may be helpful to see the key parts of conditions C/D side by side:

Condition C	**Condition D**
s.809L(4): Condition C is that	**s.809L(5):** Condition D is that
qualifying property of a gift recipient—	property of a person other than a relevant person (apart from qualifying property of a gift recipient)—
(a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,	[identical]
(b) is consideration for a service that is enjoyed in the UK by a relevant person, or	[identical]
(c) is used outside the UK (directly or indirectly) in respect of a relevant debt.	[identical]
[no equivalent]	in circumstances where there is a connected operation.

s.809N(7): "Qualifying property", in relation to a gift recipient, is—	**s.809O(3):** A "connected operation", in relation to property dealt with as mentioned in section 809L(5)(a), (b) or (c), means
(a) the property that the individual gave to the gift recipient, (b) anything that derives (wholly or in part, and directly or indirectly) from that property, or	[no equivalent]
(c) any other property, but only if it is dealt with as mentioned in section 809L(4)(a), (b) or (c) [in short, enjoyed by T] by virtue of an operation which is effected—	an operation which is effected—
(i) with reference to the gift of the property to the gift recipient, or (ii) with a view to enabling or facilitating the gift of the property to the gift recipient to be made.	(a) with reference to a qualifying disposition,[237] or (b) with a view to enabling or facilitating a qualifying disposition.

Condition C (unlike condition D) requires a gift recipient; but if there is a gift recipient, condition C is wider, as (unlike D) it applies to "qualifying property" which is a wider concept than "connected operation".

18.29 Gift of income/gains

18.29.1 *Gift of income/gains: Navigation*

A gift of unremitted foreign income/gains may raise various issues:

Topic	**See para**
Remittance condition C	*Discussed here*

[237] Section 809O(4) ITA provides:
A "qualifying disposition" is a disposition that—
(a) is made by a relevant person,
(b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c) [ie made to/for the benefit of the condition-D person], and
(c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

Whether gift is remitted	18.14.6
Derivation issues	18.18.4; 18.18.16
Condition D	18.33
Gift to charity	18.52
Mixed fund issues	20.10

18.29.2 *Remittance condition C: Gift recipient*

Section 809L(4) ITA provides:

> Condition C is that qualifying property of a gift recipient—
> (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
> (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

18.29.3 *Enjoyment by relevant person*

The requirements in (a) and (b) are similar but not the same as remittance condition A. The differences are as follows:

Condition C requirement	**Condition A requirement**
Property brought/received/ used in the UK	Property brought/received/used in the UK *by or for the benefit of a relevant person.*
Property *enjoyed* by a relevant person.	No equivalent in condition A (though the requirement that the property is brought/received/ used by or for the benefit of a relevant person is similar.)

The word "enjoyed" in condition C means more or less the same as the word "used" in condition A.[238] I do not think there is a difference though if there were, the vagueness of the words makes it impossible to say what it may be. The reason for the different word is perhaps that parts of condition C are derived from the GWR wording, where the word "enjoyed" is used[239] so the word enjoyed is copied across to condition C.

Enjoyment is a cliff-edge test: any enjoyment (above de minimis) and the entire sum is remitted, even if the sum exceeds the value of the

[238] As to which, see 18.14.3 (Property used in UK).

[239] See 78.1 (GWR – Introduction).

enjoyment.

18.29.4 *Enjoyment disregards*

Section 809N ITA provides definitions and other supplementary provisions for condition C. Section 809N(1) ITA provides:

> This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition C in section 809L.

Section 809N(9) ITA provides three cases where enjoyment is disregarded. Since enjoyment is a requirement of remittance condition C, the disregards amount to exemption from condition C:

> Enjoyment by a relevant person of property or a service is to be disregarded in any of these cases—
> (a) if the property or service is enjoyed virtually to the entire exclusion of all relevant persons;
> (b) if full consideration[240] in money or money's worth is given by a relevant person for the enjoyment; or
> (c) the property or service is enjoyed by relevant persons in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

Para (a) is based on IHT GWR provisions.[241]

Para (b) is the most important of the three disregards, and is also based on GWR.[242] I refer to it as the "**full consideration exemption**". I discuss these two paragraphs in the GWR chapter.

Para (c) concerns charitable or public gifts; it is hard to see that it is needed, but it does no harm.

Suppose:

(1)(a) T gives pre-2008 income/gains to T's spouse (not a relevant person and so a gift recipient) and the spouse uses the money to buy a property jointly with T; or

(b) T gives income/gains to T's brother (a gift recipient) and the brother uses the money to buy a property jointly with T.

(2) The co-owners occupy the property jointly.

[240] See App 4.9 (Market value/full consideration).

[241] See 78.6.4 ("Virtually" excluded).

[242] See 78.7 (Full consideration exemption for GWR).

It is considered T does not "enjoy" the co-owner's half share, so condition C is not satisfied in respect of the gifted income/gains. The same would apply to jointly held chattels.

Suppose:

(1) T gives income/gains to T's adult son S (a gift recipient), and
(2) S uses the money to purchase a UK residence which is occupied by S, not by T.
(3) S has a minor child, GS (a relevant person), who also lives in the property.

It is considered that the property is not "enjoyed" by GS, who is merely a licensee of S. Any "enjoyment" by GS is incidental to the primary use by S, and should be ignored. It is different if S leaves the property and GS becomes the occupier (but since GS is by then likely to be 18, GS ceases to be a relevant person). HMRC agree. RDR Manual provides:

> **RDRM33270 enjoyment by a relevant person ignored** Dec 2021]
> Each case will depend on its particular facts, but broadly, enjoyment by a relevant person is disregarded, and so there is no taxable remittance under Condition C (if there otherwise would be) where the property or service is enjoyed by the gift recipient virtually to the entire exclusion of all relevant person, that is,
> [1] the gift is genuine and
> [2] any enjoyment by a relevant person is incidental...

After this somewhat loose paraphrase of Condition C, the Manual gives the example we are considering:

> For example a minor child may derive benefit from living in the UK with his parents in a house that was purchased using offshore funds gifted by his grandfather (a remittance basis user) to his father, for his father's own use. It is normal for a young child to live with his parents and therefore, in most cases, no advantage over minor children generally is obtained. In this type of circumstance HMRC would generally accept that the minor child's enjoyment of the house was merely incidental to that of his father.

18.29.5 *Gift recipient*

The key terms in remittance condition C are "gift recipient" and "qualifying property".

Section 809N(2) ITA provides:

> A "gift recipient" means a person, other than a relevant person, to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
>
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Strictly one should not use the term "gift recipient" in the abstract. A gift recipient can exist only *in relation to an individual (the donor)*. But where the context is clear it is permissible simply to refer to a gift recipient.

A relevant person cannot be a gift recipient. So in practice gift recipients will be individuals who are not members of the individual's close family, such as parents, adult children, friends and relatives. (Family trusts and companies will generally be relevant persons and where they are not, it is unlikely they would or properly could enter into a transaction caught by condition C.)

If T makes a gift to G, and G gives the property to H, H is not a gift recipient in relation to T.

If T makes a gift to a trust, and the trust appoints the property to B, B is not a gift recipient, as T has not made a gift to B.

18.29.6 *"Gift"*

Section 809N(5) ITA extends "gift" to include a disposal at an undervalue:

> The individual "makes a gift of" property if the individual disposes of the property—
>
> (a) for no consideration, or
>
> (b) for consideration less than the full consideration in money or money's worth that would be given if the disposal were by way of a bargain made at arm's length;
>
> but, in a case falling in para (b), the individual is to be taken to make a gift of only so much of the property as exceeds the consideration actually given.

In the phrase "full consideration in money or money's worth *that would be given if the disposal were by way of a bargain made at arm's length*" do the italicised words add anything? It is thought not; these words are otiose but they do no harm.

Section 809N(6) ITA is intended to widen this:

> A reference to the individual making a gift of property includes a case where—
> (a) the individual retains an interest in the property, or
> (b) an interest, right or arrangement enables or entitles the individual to benefit from the property.

I am unable to make sense of this. The wording is loosely based on s.102A FA 1986 but the context there is different, and s.102A is itself obscure, so that does not shed any light on the matter. Perhaps it is meaningless.

Suppose T makes an interest-free loan to B. The transaction is for full consideration so it is not a gift within s.809N(5). A lender in principle has no interest in the money lent so s.809N(6)(a) does not apply. A loan does not entitle T to benefit from the money lent. B may use that money for himself or herself. It is considered that the loan does not enable T to benefit from the money lent, so s.809N(6)(b) does not apply. B is not a gift recipient.

18.29.7 *"Qualifying property"*

Section 809N(7) ITA defines "qualifying property". There are three categories of qualifying property:

> "Qualifying property", in relation to a gift recipient, is—
> (a) the property that the individual gave to the gift recipient,
> (b) anything that derives (wholly or in part, and directly or indirectly) from that property, or

Para (a) and (b) concern what I call derived property. The definition goes on to include non-derived property which has some nexus to the gifted property:

> (c) any other property, but only if it is dealt with as mentioned in section 809L(4)(a), (b) or (c) [in short, enjoyed by T] by virtue of an operation which is effected—
> (i) with reference to the gift of the property to the gift recipient, or
> (ii) with a view to enabling or facilitating the gift of the property to the gift recipient to be made.[243]

[243] I am not sure that para (ii) adds anything to para (1) as if an operation is made "with a view to enabling or facilitating" a gift, it would be made "with reference to the gift". But nothing turns on that.

Section 809N(8) ITA is intended to widen this:

> In subsection (7)—
> (a) the reference in para (b) to anything deriving from property, and
> (b) the reference in para (c) to other property,
> includes a thing,[244] or property, that does not belong to the individual but which the individual is enabled or entitled to benefit from by virtue of any interest, right or arrangement.

This is misconceived. Qualifying property will not belong to the individual because it has been given to the gift recipient, so it is not necessary to say that property includes property not belonging to the recipient. Here, as in s.809N(6), the drafter's desire to achieve the widest possible generality, and avoid any possible gaps in the legislation, has led to incoherence. But it does not matter.

18.29.8 *Time of remittance*

Section 809L(6) ITA provides a rule which applies for conditions C and D:

> In a case where subsection (4)(a) or (b) [condition C] or (5)(a) or (b)[condition D] applies to the importation or use of property, the income or chargeable gains are taken to be remitted at the time the property or service is first enjoyed by a relevant person by virtue of that importation or use.

18.29.9 *Becoming/ceasing to be relevant person: Condition C*

Section 809N ITA provides:

> (3) The question of whether or not a person is a relevant person is to be determined by reference to the time when a gift is made.
> (4) But, if a person to whom a gift is made subsequently becomes a relevant person, the person ceases to be a gift recipient.

Thus if a gift is made to a relevant person, condition C cannot apply, even if they cease to be a relevant person[245] and so become a gift recipient.

[244] The reference to a "*thing or* property" is meaningless. What non-property "thing" could there be?

[245] See 18.26 (Becoming/ceasing to be relevant person: conditions A & B); 18.32.4 (Becoming/ceasing to be a relevant person: condition D).

If a gift is made to a non-relevant person, condition C ceases to apply if they become a relevant person. That makes sense because in such a case, remittance conditions A and B may apply.

18.30 Examples of condition C

18.30.1 *Enjoyment of gifted asset*

The RDR Manual provides examples numbered (1)(a) and (b); I consider example (b) first as it is the easier of the two. I reword the examples so that T is the taxpayer and G is the gift recipient.

The facts of example 1(b) (stripping out irrelevancies)[246] are:

> *Example 1(b) (Klimt)*
> T gives money derived from chargeable gains to his sister G (a gift recipient).
> G uses the money to buy a car.
> T's wife uses the car in the UK.

Condition C is satisfied. The HMRC analysis is:

[246] The example in full (including its irrelevant detail) is as follows:

> **RDRM33260 Gift recipients - qualifying property** [Mar 2022]
> *"Example 1(b) (Klimt and Helena)*
> In May 2015 K, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister H, a gift recipient. In October 2016 H uses half of this money to buy a car in the UK which she makes available to K's wife to use ..."

There is a similar example in the CG Manual:

> **CG25342 Gifts Of Money And Assets: ITA07/S809L(4)** [Dec 2021]
> *[Torvald and Stig]*
> ... T claims the remittance basis in 2009-10; in that year he sells a property in Norway and uses the proceeds to buy a car which he gives to his business partner S who lives in Oslo. S exports the car to the UK and gives T's wife Helga the keys.
> In terms of ITA07/S809L(4), the car is qualifying property because it was given by T to S. S is a gift recipient because he is not a relevant person and he has received a gift of property (the car) that drives from T's chargeable gain. ... The car is brought to the UK and is enjoyed by a relevant person, T's wife. T's chargeable gain on the disposal of his property has therefore been remitted to the UK to the extent that it was used to buy the car.

The Manual adds:

> Note that it is the cost of the car, not its market value when it comes to be used in the UK, which fixes the upper limit of the remittance.

But this point is contentious, see 18.35.2 (Change in value).

> The qualifying property here is the car, which derives from the money that T gifted to G.
> That qualifying property is used in the UK and is enjoyed by a relevant person (T's wife).
> The use of the gift means there is a taxable remittance on T.

The same applies if:

(1) T gives income/gains to T's adult son S (not a relevant person) and
(2) S uses it to buy the house in the UK in which T lives.

This is not caught by remittance condition B. (The house is derived from the income/gains but it is not property of a relevant person.) The house is qualifying property and is caught by remittance condition C.[247]

18.30.2 *Gift of gifted asset*

The facts of RDR Manual example 1(a) (stripping out irrelevancies)[248] are:

> T gives money derived from chargeable gains to his sister G (a gift recipient).
> G brings the money to the UK and then gives it to T's wife.

In the HMRC view condition C is satisfied. The HMRC analysis is as follows:

> [1] The qualifying property here is the money that T gifted to G.
> [2] That qualifying property is used in the UK and is enjoyed by a relevant person (T's wife).
> [3] The use of the gift means there is a taxable remittance on T.

Is point [2] correct? Condition C is that:

> qualifying property of a gift recipient is ... enjoyed by a relevant person,

The money ceases to be qualifying property "of a gift recipient" when G gives it to T's wife. Thus qualifying property of a gift recipient is brought

[247] See 18.46 (Purchase of family home).

[248] The example in full (including its irrelevant detail) is as follows:
RDRM33260 Gift recipients - qualifying property [Mar 2022]
"*Example 1(a) (Klimt and Helena)*
In May 2015 Klimt, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister Helena, a gift recipient. In October 2016 Helena transfers half of this money to the UK and gives it to Klimt's wife.

to or received in the UK.[249] It might be argued that the property which is enjoyed by a relevant person is not property of a gift recipient. But perhaps that is reading the provision too strictly.

However that may be, on the facts of the example, remittance condition B may be satisfied. That depends on whether the money given to T's wife can be said to derive from T's gains, which would be the case if the two steps of the example are part of a single arrangement.[250]

18.30.3 *Enjoyment of non-derived property*

RDRM35060 [Mar 2022] next provides an example where the property enjoyed in the UK by T is not derived from T's income/gains (in my terminology, "non-derived property"). The facts (stripping out irrelevancies)[251] are:

> There is an arrangement under which:
> (1) T gives RFI to his aunt G (a gift recipient).
> (2) Later,[252] G allows T's wife to use a property in the UK owned by G, without charge.

One analysis of these facts is that T and G have entered into a contract, under which G promises to allow T's wife to use the land in consideration of T's payment (not properly called a "gift") to G. In that case there is a remittance under remittance conditions A and B. It is however assumed that the arrangement is an informal, non-binding, non-contractual one.

[249] Though, contrary to the HMRC analysis, it is not *used* in the UK (unless one says that H "uses" the funds by making a gift to K's wife, which is not a natural meaning of the word "uses").

[250] See 18.18.16 (Gift on to third party).

[251] The example in full (including its irrelevant detail) is as follows:
RDRM35060: Condition C - remittances of relevant income or chargeable gains - property [Mar 2022] *(Adam and Linda)*
L's husband's family has owned a holiday house in Scotland for many years. In February 2012 her nephew A, a remittance basis user transfers some of his foreign income and gains to his aunt, L, the gift recipient, which she uses to book herself on an around-the-world cruise. A gives the money to L on the agreement that L will provide his wife Clare, a keen painter, with access to the Scottish property.
Several months later L provides Clare with an agreement saying that she can use the Scottish house, for which Clare pays nothing.

[252] The example specifies that "several months" pass between step (1) and step (2) to make the point that one cannot avoid the tax consequences of the arrangement by a few months delay.

That would be implausible if G were a stranger, but not in the case of a friend or relative. In that case condition B is not satisfied.

The HMRC analysis is as follows:

> The house cannot be said to "derive from" the income or gains.

More analytically, condition B is not satisfied.

However condition C is satisfied:

> The house is "other property" [ie non-derived property, within s.809N(7)(c)] used in the UK and enjoyed by a relevant person (T's wife).
> As the operation which brought the house within Condition C was done
> [i] with reference to the gift[253] or
> [ii] to enable or facilitate the gift[254]
> it is qualifying property and Condition C is met.
> There is a remittance and tax is chargeable on T.
> The amount of the remittance is determined by s809P(11)(c).[255]

Suppose the order of transactions was reversed:

> (1) G grants allows W to use a property in the UK.
> (2) Later, after W has left the property, T gives RFI to G.

Condition C is not satisfied at stage (1) since G is not at that point a gift recipient. At stage (2) G becomes a gift recipient but condition C does not become satisfied. However condition D would apply: see 18.33 (Condition D: Examples).

18.30.4 *Gifted asset used to pay relevant debt*

The last HMRC example is slightly contrived, in order to illustrate the relevant debt rule in application to remittance condition C. The facts (stripping out irrelevancies)[256] are:

[253] It is not clearly stated in the example that the operation was done with reference to the gift, but that is a reasonable inference.

[254] On the facts, condition [ii] is not met, but it does not matter as condition [i] is met.

[255] See 18.43 (Condition C/D: Amount remitted).

[256] The example in full (including its irrelevant detail) is as follows:
"**RDRM33260 Condition C - relevant debt** [Mar 2022]
(Fraser and Victor)
F, who is a remittance basis user, purchases some non-UK shares in January 2012, using his foreign income and gains. F makes a gift of these shares to his brother, V, a fashion designer.

> T gives property derived from RFI (shares) to his brother G, (a gift recipient.)
> G borrows to purchase furniture.
> T uses the furniture in the UK.
> G uses the property to repay the loan.[257]

The HMRC analysis is as follows:

> T has made a gift of property derived from his foreign income (the shares) to G, a gift recipient. The shares are thus qualifying property of a gift recipient.
> The loan taken out by G to purchase the furniture is a relevant debt because it relates to property (the furniture) brought to the UK for the benefit of a relevant person (T).
> T benefits because he uses the furniture.
> The qualifying property (the shares) of G (a gift recipient) is used outside the UK in respect of this relevant debt. There is a remittance under Condition C.

18.31 Condition C: Pre-2008 income/gain

For pre-2008 income/gains, para 86(4) sch 7 FA 2008 provides that references to relevant person in s.809L have effect as references to the individual.[258]

Amended as para 86(4) directs, condition C (set out in s.809L(4)) provides:

> Condition C is that qualifying property of a gift recipient—
> (a) is brought to, or received or used in, the UK and is enjoyed by ~~a relevant person~~ the individual,
> (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ the individual, or
> (c) is used outside the UK(directly or indirectly) in respect of a relevant debt.

In March 2012 V takes out a loan with an offshore bank to purchase a designer table and chairs. V brings these table and chairs to the London town house that he and his brother F inherited jointly from their father, and where they both now live. F regularly entertains clients and friends at the house.
V uses some of the shares and bonds to pay off the loan.

[257] That is, G sells and uses the proceeds to repay the loan; or (less plausibly) transfers the shares to the creditor in satisfaction of the loan.

[258] See 18.10 (Relevant person: Pre-2008 income/gain).

Para 87 sch 7 FA 2008 makes corresponding amendments to s.809N:

> Section 809N of ITA 2007 (section 809L: gift recipients, qualifying property and enjoyment) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—
>
> (a) the reference in subsection (2) to a relevant person were to the individual,
> (b) subsections (3) and (4) were omitted, and
> (c) the references in subsection (9) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 87 directs, s.809N(2) ITA reads:

> A "gift recipient" means a person, other than ~~a relevant person~~, the individual to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

The words "other than the individual" are meaningless because the individual cannot make a gift to himself. So s.809N(2) means:

> A "gift recipient" means a person ... to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Para 87 does not restrict the definition of "gift recipient": it *widens* it.

The para 87 deletions of 809N(3)(4) are straightforward amendments consequential on the para 87 amendment to s.809N(2).

The last para 87 amendment is also a straightforward consequential amendment. Amended as para 87 requires, s.809N(9) reads

> Enjoyment by ~~a relevant person~~ the individual of property or a service is to be disregarded in any of these cases—
>
> (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ the individual,
> (b) if full consideration in money or money's worth is given by ~~a relevant person~~ the individual for the enjoyment, or
> (c) the property or service is enjoyed by ~~relevant persons~~ the individual in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general

public.

The condition C rule for pre-2008 income/gains is not very different from that which applied under the pre-2008 law.

18.32 Condition D: Connected operation

For an introduction to this topic, see 18.28 (Role of remittance conditions C/D).

Section 809L(5) ITA provides:

> [1] Condition D is that property of a person other than a relevant person (apart from qualifying property of a gift recipient)—
> (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
> (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,
> [2] in circumstances where there is a connected operation.

We need some terminology to grapple with this, and in the following discussion:

A **"condition-D person"** is:
(1) a non-relevant person
(2) whose property is used as set out in (a)-(c), ie (in short) enjoyed by a relevant person
(3) to whom T has made a qualifying disposition, ie (in short), T has made a disposition to the person of his income/gains.

The **"enjoyment requirement**" is the requirement in s.809L(5)[1] (in short, that a relevant person enjoys property of the condition-D person in the UK).

The wording of the enjoyment requirement is (more or less) the same as in remittance condition C.[259] The same enjoyment disregards apply.[260] The same timing rule applies.[261] These aspects need not be considered again here.

[259] See 18.29.3 (Enjoyment by relevant person).

[260] Section 809O(6) ITA repeats s.809N(9) verbatim; see 18.29.4 (Enjoyment disregards).

[261] See 18.29.8 (Time of remittance).

18.32.1 *Condition-D person*

The RDR Manual comments on the identity of the condition-D person:

> **RDRM33430 Connected Operation - definition** [Jan 2019]
> The property that is brought to the UK, or used outside the UK as consideration for a service or in respect of a relevant debt must not be qualifying property of a gift recipient as this will fall within Condition C. However this restriction relates to the property not the individual, so the same person may be a gift recipient under Condition C and, in other transactions, "a person whose property is used" under Condition D.

Could a partnership be a condition-D person? A partnership is not a relevant person. An English law partnership is not a person at all, in the strict sense, but the word person can be used loosely, to include a partnership;[262] and the context suggests that is the case here.

18.32.2 *"Qualifying disposition"*

The key term in remittance condition D is "connected operation", and that term relies on the concept of a "qualifying disposition." Section 809O provides the definitions and other supplemental provisions for condition D.

Section 809O(1) ITA provides:

> This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition D in section 809L.

Section 809O(4) ITA defines "qualifying disposition":

> A "qualifying disposition" is a disposition that—
> (a) is made by a relevant person,
> (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c) [ie made to/for the benefit of the condition-D person], and
> (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

Section 809O(5) ITA provides an exception:

> But a disposition of property is not a qualifying disposition if the

[262] See 85.14 (Partnership: person/body corporate).

> disposition is, or is part of, the giving of full consideration in money or money's worth for the dealing that falls within section 809L(5)(a), (b) or (c).

I do not see the need for that, since if there is full consideration for "the dealing that falls within section 809L(5)(a), (b) or (c)" (in short, for the enjoyment by the relevant person) then the full consideration exemption applies.[263] But it does no harm.

18.32.3 *Connected operation*

Armed with the term "qualifying disposition" we can turn to the definition of "connected operation". Section 809O(3) ITA provides:

> A "connected operation", in relation to property dealt with as mentioned in section 809L(5)(a), (b) or (c), means an operation which is effected–
> (a) with reference to a qualifying disposition, or
> (b) with a view to enabling or facilitating a qualifying disposition.[264]

Thus in order to have a connected operation, four requirements must be met:

(1) A qualifying disposition (in short, a transfer from T to the condition-D person).
(2) An operation (but that is so wide it scarcely counts as a requirement).
(3) A link between the operation and the qualifying disposition: the operation must be effected with reference to the qualifying disposition.
(4) A link between the operation and the condition-D person's property: the operation must be "in relation to property dealt with as mentioned in s.809L(5)(a)(b)(c)" ie it must relate to the condition-D person's property enjoyed by T.

The RDR Manual comments on requirement (3):

> **RDRM33430 Connected Operation - definition** [Jan 2019]
> It is important to note the words "with reference to" and "with a view to enabling or facilitating a qualifying disposition". The nature of the link

[263] See 18.29.4 (Enjoyment disregards). Perhaps the point is that s.809O(5) provides exemption in a case falling within s.809L(5)(c) (relevant debts).

[264] The wording here is the same as for limb (c) of the definition of "Qualifying property" for condition C; see 18.29.7 ("Qualifying property").

between the connected operation and the qualifying disposition, or even which comes first, is not specified. This means that a taxpayer cannot avoid a charge to tax by setting up complex structures to disguise foreign income or gains, or to try and "break the link" between something enjoyed in the UK and that income or those gains.

18.32.4 *Becoming/ceasing to be relevant person: Condition D*

Section 809O(2) ITA provides:

> For the purposes of section 809L(5) [Condition D], the question of whether or not the person whose property is dealt with as mentioned in para (a), (b) or (c) of section 809L(5) is a relevant person is to be determined by reference to the time when the property is so dealt with.

The same rule applies for condition C: see 18.29.9 (Becoming/ceasing to be relevant person: Condition C).

18.33 Condition D: Examples

18.33.1 *The 3 examples*

I consider three examples which are variants of a single theme. I first make some general comments which apply in each case, and then consider them separately.

In each example T wishes to use UK land owned by X. I assume that X is not a relevant person.

There is an informal, non-binding arrangement under which:

(1) T uses an asset of X in the UK for no consideration (X grants T a gratuitous licence).
(2) T makes a gift of income/gains:
    (a) example 1: T makes the gift to X
    (b) examples 2 & 3: T makes the gift to a company associated with X:
        (i) example 2: T makes the gift to a company owned by X
        (ii) example 3: T makes the gift to the company which owns X (X is a subsidiary company and the gift is to the parent company)

A likely analysis of these facts is that T and X have entered into a contract, under which X leases or licenses the land to T in consideration of T's payment (misdescribed as a "gift"). In that case there is a remittance under remittance conditions A and B, on the basis that:

(1) If the rent is paid in advance: T receives an asset in the UK (a lease

or licence) which is derived from T's RFI; or

(2) If the rent is paid after the grant of the lease: T has used RFI to pay a relevant debt.

Note that the rent would also be taxable.

It is however assumed that the arrangement is an informal, non-binding, non-contractual one. That might be possible if X is a friend or relative of T or a friendly trust or company. In that case condition B is not satisfied.

In each case, the condition D analysis is essentially the same:

- X is the condition-D person.
- The enjoyment requirement is met by T's use of X's asset.
- T's gift to X or the associated company is a qualifying disposition.
- The connected operation is X's licencing T to use the asset.

So condition D is satisfied.

18.33.2 *Example 1: Loan + gift to lender*

The example is:

(1) T uses an asset of X in the UK for no consideration (X grants T a gratuitous licence).

(2) T later makes a gift of income/gains to X.

Condition C will apply if T makes the gift first, but it does not apply here because X is not a gift recipient at the time X allows T to use the asset.

Condition D is not satisfied at stage (1) as there is no connected operation. Could one say that there is no charge at stage (2): one could not say that X's property is enjoyed "in circumstances where there *is* [present tense] a connected operation?" That would probably be reading too much into a tense. But the point may not arise, if (as could well be the case) there is a contract between X and T, as there would be a remittance under conditions A and B.

18.33.3 *Loan/gift for benefit of lender*

The RDR Manual provides a version of example 2. The facts (stripping out irrelevancies)[265] are:

[265] The example in full (including its irrelevant detail) is as follows:

> **RDRM35080 Condition D - remittances of foreign income or chargeable gains** [Jan 2019] *Janet and John*
>
> John personally owns a country estate in Cornwall, in an area of outstanding natural beauty. His friend Janet wishes to use the mansion for several important family functions.

> There is an arrangement under which:
> (1) X allows T to use the land rent free.
> (2) T transfers an asset derived from T's RFI (a yacht) to a company owned by X, at an undervalue.

This is like example (1), except that T transfers the RFI to a company owned by X (not to X directly).

The HMRC analysis first considers condition C:

> X is not a gift recipient (the yacht was given to his company, not to X). Condition C cannot therefore apply.

So we turn to condition D. In my terminology, X is the condition-D person.

> [1] X is not a relevant person in relation to T.[266]
> [2] There is a qualifying disposition because:
> [a] There is a disposal of property (the yacht) which derived from T's income (ITA07/S809O(4)(c))
> [b] The disposal was made by a relevant person (T) (ITA07/S809O(4)(a))
> [c] The disposal was for the benefit of X (although the disposal was not made directly to X, he benefits from it through his ownership of the company) (ITA07/S809O(4)(b))
> [3] X's property [the land] is enjoyed in the UK by a relevant person (T) (ITA07/S809L(5)(a) and ITA07/S809O(4)(b)).
> In this example T's advantage is due to[267] a connected operation[268]

Janet is a remittance basis user. She owns a foreign yacht which she bought using £600,000 of her foreign income and gains. On 2 March she disposes of the yacht to a non-resident company for £150,000.

John has a controlling interest in that non-resident company. In October, with reference to the transfer of the yacht, John allows Janet full and exclusive use of the estate, rent-free.

[266] The HMRC analysis adds that "the company is not a relevant person (as T is not a participator)". In fact, whether the company is a relevant person is not determined by the facts expressly given in the example. The company would be a relevant person if any relevant person is a participator. Perhaps we are meant to assume that X is the sole participator in the company. However it makes no difference whether or not the company is a relevant person (unless the company brings the yacht to the UK).

[267] "Due to" is an inaccurate paraphrase of the statutory language, but it does not matter.

[268] HMRC do not identify the operation, but I think it is X's licencing the land to T; this is indeed a connected operation.

> (ITA07/S809O(3)) and Condition D will be met.
> Some or all of the foreign income used by T to acquire the yacht will be remitted.

The Manual does not consider whether it is some or all of the income which is remitted, which one might have thought an important issue. In principle, all of the income is remitted.[269]

18.33.4 *Loan/gift to parent of co lender*

The CG Manual provides a version of example 3. The facts (stripping out irrelevancies)[270] are:

> T enters into an arrangement with X Ltd (not a relevant person) under which:
> (1) A subsidiary of X Ltd[271] ("the subsidiary") acquires a house and allows T to live in it rent-free.
> (2) T transfers shares (derived from foreign chargeable gains) to X Ltd.

This is like example (2) above, except that T's gift is to the parent of X Ltd (not a company owned by X Ltd).

In my terminology, X Ltd is the condition-D person.

Let us ignore the implausibility of the facts. (In practice, the transfer might be the purchase price, in which case the subsidiary would hold the house on trust for T. Or the transfer might be rent. In those cases there is a remittance under usual principles.) Let us assume that the arrangement is an informal, non-binding, non-contractual one.

[269] See 18.43 (Condition C and D: mount remitted).

[270] The example in full (including its irrelevant detail) is as follows:
Antonella
CG25343 Meaning of remitted to the UK: other reciprocal arrangements [Dec 2021]
A has claimed remittance basis in 2009-10. She realises a foreign chargeable gain of £5 million in that year and uses it to buy shares in a company listed on the Zurich stock exchange. She enters into an agreement with her bank in Naples that an Italian subsidiary of the bank will acquire a house in London and allow A and her family to live in it rent-free: as consideration for this she agrees to transfer her Swiss shares to the bank. The family moves into the house on 3 April 2010 and A transfers the shares on 7 April.

[271] The Manual specifies that X Ltd is a bank. It is not conceivable that a bona fide bank could enter into an arrangement of this kind, but a friendly company might do so.

In that case condition B is not satisfied. The HMRC analysis on this point is:

> Note that the conditions for a basic remittance are not met because the London property is not, and is arguably not derived from, the chargeable gain, and does not belong to a relevant person.

The Manual then makes a comment which relates to remittance condition C:

> The conditions for a remittance after a gift are not met because the gain or property derived from the gain is not gifted to the bank subsidiary but transferred for what we assume is full value.

The HMRC analysis for condition D is as follows:

> T is a relevant person, and she makes a disposition of property which derives from her own chargeable gains. The disposition is made
> [i] to (if it is made directly to the subsidiary) or
> [ii] for the benefit of (if it is made to another company in X Ltd's group)
> the person whose property is used to provide the advantage in the UK. There is therefore a qualifying disposition.

In fact the example specifies that the shares are transferred to X Ltd. The condition-D person (who provides the property) is the subsidiary. The transfer to a parent company is not for the benefit of a subsidiary. So there is no qualifying disposition. The rest of the HMRC analysis does not arise:

> Property belonging to X Ltd's subsidiary is used in the UK and is enjoyed by a relevant person (eg T or her family).
> Furthermore, the process by which the London House is made available is closely linked[272] to the qualifying disposition ie the transfer of the shares to the bank, so it is a connected operation.
> So a chargeable gain of £5m is treated as accruing to T.

The HMRC example raises the timing issue:

> T moves into the house on 3 April 2010 and T transfers the shares on 7 April.

The HMRC analysis states that the gain is treated as remitted in 2009/10. See 18.29.8 (Time of remittance).

[272] This wording is a paraphrase of the statutory language, but it does not matter.

18.34 Condition D: Pre-2008 income/gain

For pre-2008 income/gains, para 86(4) sch 7 FA 2008 provides that references to relevant person in s.809L have effect as references to the individual.[273]

Amended as para 86(4) directs, condition D (set out in s.809L(5) ITA) provides:

> Condition D is that property of a person other than ~~a relevant person~~ *the individual* (apart from qualifying property of a gift recipient)—
>
> (a) is brought to, or received or used in, the UK, and is enjoyed by ~~a relevant person~~ the individual,
>
> (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ the individual, or
>
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,
>
> in circumstances where there is a connected operation.

This is consistent with remittance condition A and B rules for pre-2008 income.[274] Since the para 86(4) amendment applies only for s.809L, para 88 sch 7 FA 2008 has to make further amendments to s.809O ITA:

> Section 809O of ITA 2007 (section 809L: dealings where there is a connected operation) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—
>
> (a) subsection (2) were omitted, and
>
> (b) the references in subsections (4) and (6) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 88 requires, s.809O(4) ITA provides:

> A "qualifying disposition" is a disposition that—
>
> (a) is made by ~~a relevant person~~ the individual,
>
> (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c), and
>
> (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

The last para 88 amendment is also a straightforward consequential

[273] See 18.10 (Relevant person: Pre-2008 income/gain).

[274] See 18.10 (Relevant person: Pre-2008 income/gain).

amendment. Amended as para 88 requires, s.809O(6) ITA reads

> Enjoyment by ~~a relevant person~~ the individual of property or a service is to be disregarded in any of these cases—
> (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ the individual,
> (b) if full consideration in money or money's worth is given by ~~a relevant person~~ the individual for the enjoyment, or
> (c) the property or service is enjoyed by ~~relevant persons~~ the individual in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

18.35 Amount remitted

Section 809P(1) ITA provides:

> The amount of income or chargeable gains remitted to the UK is to be determined as follows.

Five rules then follow.

18.35.1 *Income/gains remitted*

It is helpful to read the first two rules side by side:

s.809P(2) ITA	**s.809P(3) ITA**
If the property, service or consideration[275] is the income or chargeable gains,	If the property, service or consideration derives from the income or chargeable gains,
the amount remitted is equal to the amount of the income or chargeable gains.	the amount remitted is equal to the amount of income or chargeable gains from which the property, service or consideration derives.

That seems sensible, but problems do arise.

18.35.2 *Change in value*

The RDR Manual provides:

[275] The words "property, service or consideration" relate back to the wording of condition B: property means property brought/received/used in the UK, service means a service provided in the UK, and consideration means consideration for a service provided in the UK.

> **RDRM35030 remittances derived from foreign income/gains** [Jan 2019]
>
> [1] ... Where, as in most cases, the property, service or consideration derives from a foreign currency, the taxable amount is the pounds sterling equivalent value (at time of remittance) of the amount of foreign currency (refer to RDRM31190 Exchange rates) used to acquire or pay for the property or service etc.

Point [1] assumes that one translates foreign currency income into sterling at the time of remittance; this is almost certainly wrong.[276]

> [2] This means that where an item of depreciating value (such as a car) is brought to the UK the amount that is liable to tax is not the current value of the car but the amount of foreign income or gains from which the car derives (example 4).
>
> [3] For the same reason, where an item of appreciating value (perhaps a work of art) is brought to the UK, the taxable amount is the amount of foreign income or gains from which the property derived, and not its current market value (example 5).
>
> [4] The same principle applies where an investment is made in shares or other such financial instruments, and those shares are in, or are otherwise brought, to the UK. The chargeable amount is the amount of foreign income or gains from which the shares derived ...

18.35.3 *Fall in value: Remittance in specie*

Point [2] states that on remittance in specie of an asset purchased from foreign income/gains, the amount remitted is the amount of foreign income/gains and not the value of the asset at the time of remittance, if lower. To hammer the point home, RDR Manual provides a straightforward example where the facts (stripping out irrelevancies)[277] are

[276] See 95.6 (Remittance basis: Conversion date).

[277] The example in full (including its irrelevant detail) is as follows:
"**RDRM35030: Conditions A and B - remittances derived from foreign income or gains** [Jan 2019]
In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.
Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000. ..."

as follows:

> **RDRM35030 remittances derived from foreign income or gains** [Jan 2019]
> *Example 4 (Marianne)*
> M purchases a car for £25,000 of foreign chargeable gains.
> M later brings the car to the UK.
> The market value of the car at that time is £14,000.

The HMRC analysis is as follows:

> The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

This view leads to the absurd result, that if the car was old and only worth £1k, there would still be a taxable remittance of £25k. That is perhaps an extreme case, but on any basis the tax charge is likely to exceed the value of the car when remitted.[278]

18.35.4 *Fall in value: Sale proceeds remitted*

In earlier editions of this work, I raised this challenge:

> The author has not addressed the interesting questions which arise if M sells the car abroad. Suppose on the above facts M had sold the car abroad, and brought the proceeds of (let us say) £14k to the UK.

HMRC amended the Manual to address this, and boldly argue that the same unfairness results:

> This would be the case even if M sold the car in Italy for its market value of £14,000 and brought the sale proceeds to the UK. The taxable remittance is still £25,000 of M's foreign gains as that is what the sale proceeds are derived from.[279]

The Manual gives a straightforward example to hammer the point home where the facts (stripping out irrelevancies)[280] are as follows

[278] The unfairness is slightly masked by the implausible figures given in the example. Average depreciation of a three year old car is about 60% so the tax charge on £25k arises on importation of an asset more likely to be worth £10k than £14k. But the values do not affect the principle.

[279] This passage was added to the Manual in 2014.

[280] The example in full (including its irrelevant detail) is as follows: "**RDRM35030: Conditions A and B - remittances derived from foreign income or gains** [Jan 2019] B purchases shares in a French company using £100,000 of his

> **RDRM35030 remittances derived from foreign income/gains** [Jan 2019]
> Example 6 (Ben)
> B purchases foreign shares for £100,000 from foreign income.
> B later sells the shares for £75,000.
> B remits the sale proceeds to the UK.

The HMRC analysis is as follows:

> Although he has only transferred £75,000 to the UK we need to determine what the money derives from. In this case it derives originally from £100,000 of his unremitted foreign income. As a result of this B has made a taxable remittance of £100,000.

This view leads to an absurd result, that if the asset was sold for £1 which was remitted, there would still be a taxable remittance of £100k.

18.35.5 *Fall in value: Discussion*

It is considered that the concept of derivation is flexible enough to reach the obviously sensible result that the amount remitted does not exceed the value or amount of what is actually remitted. On the facts of example 6 (fall in value, sale and remittance of proceeds of sale) the amount remitted should be capped at the proceeds of sale (in the example, £75k). The balance is attributable to the loss, which is not remitted. This avoids the absurdity noted above, that on the HMRC view, if the shares are sold for £1, which is remitted, there is a taxable remittance of £100k.

This also avoids the anomaly that if the mixed fund rules apply, whatever the constituents of the fund, the amount remitted is capped by the amount or value of the proceeds received in the UK. For instance the remittance would not exceed the amount of the transfer if (varying the facts of example 6):

(1) if the shares were purchased out of RFI and a chargeable gain, or out of RFI of two separate years; or
(2) if the proceeds of sale (in the example, £75k) were mixed with other income or gains, and then remitted.

On the facts of example 4, (fall in value and remittance of asset in specie),

unremitted foreign income. Unfortunately the company performs badly and several years later B sells his entire share holding for £75,000. He transfers the whole of the sale proceeds to his UK account and uses the money to fund his general living expenses in the UK."

it is similarly arguable that the amount remitted should be capped at the value of the asset when remitted (in the example, £14k). The balance is attributable to depreciation which is not remitted. But a remittance in specie is different from the case of a sale and remittance of the proceeds of sale (as example 6), because with a remittance in specie the loss from the fall in value has not been realised. Suppose the asset which fell in value and was then remitted was a chargeable asset, (a picture, say, not a car, which is exempt from CGT). The taxpayer could sell the asset when in the UK and realise an allowable loss. That suggests one should not credit the loss at the time of the remittance, or there would be a double deduction. So M would be best advised to sell her car abroad, and bring the proceeds to the UK. In practice I expect remittances in specie would be relatively uncommon, so this problem will not often arise or will not concern significant sums.

18.35.6 *Asset increases in value*

Point [3] of the RDRM passage set out above states that on remittance of an asset purchased from foreign income/gains, the amount remitted is the amount of foreign income/gains and not the value of the asset at the time of remittance, if higher. That is obviously right. The increase in value comes into charge on a disposal.

18.36 Debt-remittance: Amount remitted

I turn to consider the amount remitted in cases of debt-remittances, that is, where foreign income or gains is used in respect of a relevant debt. Section 809P ITA provides rules for relevant-debt remittances:

s.809P(4)	**s.809P(5)**
If the income or chargeable gains are used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt]	If anything deriving from the income or chargeable gains is used as mentioned in section 809L(3)(c),
the amount remitted is equal to the amount of income or chargeable gains used;	the amount remitted is equal to the amount of income or chargeable gains from which what is used derives;
but this is subject to subsection (10).	[Identical]

Apart from the P(10) cap,[281] which only applies to debt-remittances, s.809P(4)(5) (which apply to debt remittances) is the equivalent of s.809P(2)(3) (which apply for general remittances)[282].

The RDR Manual provides some examples. The first example is payment of interest on a relevant debt:

> **RDRM35040 remittances in respect of relevant debt** [Mar 2022]
> **Example 1 (Katrina)**
> In May 2011, K, a remittance basis user, borrows £12,000 from an overseas bank to buy shares in a UK company. This is a relevant debt.
> In tax year 2011-12 K uses £4,600 of her relevant foreign income to pay the interest and to repay some of the amount borrowed.
> The chargeable amount is £4,600.

The second example is payment of interest and repayment of capital of a relevant debt:[283]

> **RDRM35040 remittances in respect of relevant debt** [Mar 2022]
> **Example 2 (Gary)**
> On 6/4/2015 G, a remittance basis user, borrows money from an overseas bank to buy an apartment in the UK.
> In 2015/16 G pays £12k interest out of his relevant foreign earnings.
> In 2016/17 G pays £30k interest and capital from relevant foreign

[281] See 18.37 (Debt-remittance: P(10) cap).

[282] See 18.35.1 (Income/gains remitted).

[283] The example in full (including its irrelevant detail) is as follows:
RDRM35040 remittances in respect of relevant debt [Mar 2022]
Example 2 (Gary)
On 6 April 2015, G, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull. Payments are due on the first day of each month from May 2015 onwards. The first 12 payments are on an interest-only basis.
G pays £1,000 interest each month to the overseas lender from his overseas account with the same bank, into which G ensures a sufficient amount of his relevant foreign earnings are paid directly to cover the repayments.
From 1 May 2016 the payments increase to a fixed amount of £2,500 each month as G starts to repay the capital amount of the loan as well as the interest. The payments continue to be met from the same account of relevant foreign earnings.
The loan is a relevant debt because it is respect of property (the apartment) which is used in the UK by a relevant person (G).
G has made taxable remittances in 2015-16 of £12,000, that being the relevant foreign earnings used to service the relevant debt. In 2016-17 G has made taxable remittances of £30,000, being the amount used to both service and repay the relevant debt.

> earnings.

The HMRC analysis is:

> The loan is a relevant debt because it is respect of property (the apartment) which is used in the UK by a relevant person (G).
> G has made taxable remittances in 2015-16 of £12,000, that being the relevant foreign earnings used to service the relevant debt.
> In 2016-17 G has made taxable remittances of £30,000, being the amount used to both service and repay the relevant debt.

The next two examples make the facts a little more complicated but the debt remittance principles are the same:

> **Example 3 (Ali)**
> A, a remittance basis user, borrows money.
> A uses the loan to purchase an asset kept outside the UK.
> A gives the asset to his wife W who keeps the asset outside the UK.
> W brings the asset to the UK.
> A satisfies the loan by transfer of another asset which is outside the UK, and which was purchased with £50,000 RFE and £30,000 of clean capital.[284]

The HMRC analysis is as follows:

> The relevant debt is serviced by the oil painting, which derives, in part, from A's RFE (refer to the earlier example). A has made a taxable remittance in 2013-14 of £50,000.
> Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.
>
> **Example 4 (Francine)**
> F, a remittance basis user, borrows £40,000 which she uses to pay the

[284] The example in full, including its irrelevant detail, is as follows:
"**RDRM35040 remittances in respect of relevant debt** [Mar 2022]
A, a remittance basis user, purchases some sculptures in Sweden in October 2012 for £80,000; he takes out an interest-free (!) loan of £80,000 with his US bank to fund this purchase, repayable within 1 year.
In November 2012 he gives them to his wife as an anniversary gift. She initially keeps them at her mother's home in Stockholm, but 6 months later in March 2013 she decides to bring these sculptures to the UK to display in her UK garden.
In October 2013 A arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami. A had purchased the painting in May 2011, using £50,000 of his relevant foreign earnings and £30,000 of capital inherited from an uncle. ..."

> foreign contractor for services provided in the UK.
> F transfers to the creditor a bond purchased out of foreign chargeable gains of £10k, as part repayment of the loan.[285]

The HMRC analysis is as follows:

> The relevant debt is serviced by the German bond which derives wholly from F's foreign chargeable gains, and is used outside the UK in respect of this relevant debt (refer to the earlier examples). F has made a taxable remittance in 2013-14 of £10,000.

18.37 Debt-remittance: P(10) cap

18.37.1 *Wholly/partly relevant debts*

I coin two terms:

Term	**Meaning**
Partly-relevant debt	Relates partly to UK property, eg part of loan remitted
Wholly-relevant debt	Relates wholly to UK property, eg whole loan remitted

18.37.2 *The P(10) cap*

Section 809P(4)(5) (which apply to debt remittances) is the equivalent of s.809P(2)(3) (which apply for general remittances), but in the case of debt-remittances, there is a cap on the amount remitted. Section 809P(10) ITA provides:

> If the debt is only partly in respect of[286]
> [a] the property [ie the property received/brought/used in the UK]
> [b] or service, [ie the service provided in the UK]
> the amount remitted is (if it would otherwise be greater) limited to the

[285] The example in full, including its irrelevant detail, is as follows:
"**RDRM35040 remittances in respect of relevant debt** [Mar 2022]
F, a remittance basis user, has a Spanish-style courtyard created at her house in Brighton. She takes out an unsecured loan of £40,000 from her French bank which she uses to pay the specialist Spanish contractor.
F has several French government bonds, which she purchased entirely from her relevant foreign income, and a German government bond which she acquired using her foreign chargeable gains. These bonds are each worth £10,000.
In September 2010 F gives the German bond to her bank as part repayment of the loan. ..."

[286] Section 809P(10) refers to a debt *in respect of* UK property; the definition of relevant debt is one which *relates* to UK property. It is considered that the expressions are synonymous.

> amount the debt would be if it were wholly in respect of the property or service.

I refer to this as the "**debt-remittance P(10) cap**". This is not an ideal label, but I cannot think of better.

Suppose:

(1) T borrows £10m.
(2) T remits £1m of the borrowed money to the UK.

The debt is a relevant debt, and in my terminology, a partly-relevant debt, and the P(10) cap applies.

(3a) T repays the entire borrowing out of income/gains.
The amount remitted is £1m.

(3b) Suppose instead T only repaid £1m or £2m of the debt.
There is still a remittance of £1m.

This example illustrates a planning point: it may be better to avoid partly relevant debts (which relate *partly* to property brought/received/used in the UK). Instead, T could borrow so as to have two separate debts, one of £1m (remitted to the UK) and one of £9m (unremitted). Then the unremitted debt is *not* a relevant debt and can be repaid out of foreign income/gains.

The RDR Manual provides a straightforward example:

> **RDRM35040 remittances in respect of relevant debt** [Mar 2022]
> **Example 5 (Karen)**[287]
> In 2011/12 K, a remittance basis user, borrows £10,000 from a Jersey bank and uses the borrowed funds to pay
> [1] £8,000 for services provided to a relevant person in the UK, and
> [2] £2,000 for services provided out of the UK.
> K repays the borrowing from her relevant foreign earnings.

The debt is a partly-relevant debt.

[287] The example in full (including its irrelevant detail) is as follows:
"**RDRM35040 remittances in respect of relevant debt** [Mar 2022]
In August 2011 K, a remittance basis user, uses an interest-free £10,000 overdraft facility on her Jersey bank account to pay £8,000 of UK school fees for her 14 year old daughter Lauren. The remaining £2,000 of the facility is used to pay for Lauren to attend a summer school in France organised by a French university.
K repays the overdraft from her relevant foreign earnings between August and November 2011. ..."

The HMRC analysis is as follows:

> K has made a taxable remittance in 2011-12 of £8,000 relevant foreign earnings, that being the part of the debt that is in respect of a service provided in the UK ... which is thus a 'relevant debt'.

What if K also paid interest on the debt out of her foreign income? The example avoids the question by stipulating, implausibly, that the bank borrowing is interest-free.

(1) On the facts of the example of Karen, where the loan is from a non-UK bank, it is suggested that there should be an apportionment, so if Karen pays the interest out of her foreign income, only 80% of the foreign income used to repay the interest is regarded as remitted. It may be better for Karen to take out two distinct loans, to avoid the issue.

(2) If the loan is from a UK bank, then all the foreign income used to pay interest is regarded as remitted, on the basis that the money used to pay the interest is used in the UK or is consideration for a service (the loan) provided in the UK.

18.38 Security for debt: Amount remitted

On the basis that income/gains are used in respect of a relevant debt if charged as security for a relevant debt, the question arises as to the amount of income/gains remitted.

18.38.1 *Pre-2020 HMRC view: general cap*

The RDR Manual formerly provided:

> **RDRM35050 Collateral in respect of relevant debt** [Jan 2019]
> *The amount of the foreign income or gains that are so used in respect of the relevant debt will be restricted to the amount of the capital loaned, together with any accrued interest (where applicable). The amounts due will depend, to some extent on the terms on which the security is offered.*

On this view, which I call the **"pre-2020 HMRC view"**, the amount remitted when foreign income/gains is charged as security for a relevant debt is in all cases capped:

(1) In the case of wholly-relevant debt, the cap is the amount of the debt

(2) In the case of a partly-relevant debt, the P(10) cap applies

HMRC gave a number of examples. The first was a straightforward charge over RFI of £160k to secure a relevant debt of £100k:

> *Example 1 (Freda)*
> *F, a remittance basis user takes out an interest-free loan for £100,000; with allegedly (?) no requirement for repayment until an indeterminate future date.*[288] *She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt.*
> *F offers as collateral for the loan a French painting, currently in her Parisian apartment. She purchased this painting in an earlier tax year in which she was also a UK resident remittance basis user, using £160,000 of her untaxed relevant foreign income from that year.*
> *The painting is still worth £160,000.*[289]

The HMRC analysis was as follows:

> *F has used her foreign income as collateral, in respect of a relevant debt.*

That is the HMRC post 2014-view.

> *The amount so used is 'capped' at the amount of the debt, which is £100,000 in this case.*
> *The reason for this is obvious if you consider what would happen in the very unlikely event that the lender immediately 'seized' the collateral in the painting to repay the £100,000 debt in full. The lender would realise £160,000 from the painting; the lender would retain £100,000 to satisfy the debt owed and return £60,000 to F (ignoring accrued interest, penalties and service charges). So only £100,000 of the collateral is used in respect of the debt.*

18.38.2 *Charge over single mixed fund*

HMRC considered a mixed fund charged as security for a relevant debt:

> ***RDRM35270 Remittances from mixed funds - collateral in respect of relevant debt*** *[Jan 2019]*
> *When foreign income and gains are used as collateral for a relevant debt they are used 'in respect of' the relevant debt, so there will be a taxable remittance when the loan is brought to the UK....*

[288] The significance of this is that granting the security constitutes use of the painting in respect of a relevant debt, so there is a remittance even applying the pre-2014 HMRC view.

[289] The analysis must be the same if the painting has gone up in value. But this avoids having to consider the position if the value had gone down at the time of the charge.

> *Often the collateral offered will be an asset which is itself a mixed fund. In these circumstances the mixed fund ordering rules at section 809Q(4) apply to the asset offered as security. In such a case, the taxable amount is made up of the same amounts of capital and foreign income and gains that were used to purchase the asset in the first place. The 'transfer' is the offering of the asset as collateral in respect of the relevant debt and any formal charge is registered to the lender (where appropriate). The analysis is carried out on the date immediately before the collateral is so offered.*

This analysis assumes that the charge is a "transfer" from the mixed fund for the purposes of s.809Q(4),[290] so the ITA mixed fund rules apply. Granting a charge (which the author, using layman's language, calls "offering an asset as collateral") is not a transfer in the normal sense of the word but the context suggests that "transfer" might be given a wide meaning, to include anything which constitutes a remittance.

The amount of that transfer is the amount which is remitted.

HMRC gave two more examples which I need not set out here.[291]

18.38.3 *Lender priority respected*

HMRC also considered the case where a debt is charged over several assets (not comprising a single mixed fund):

> *Example 3 (Freda)*[292]
> *F, a remittance basis user receives an interest-free loan*[293] *of £100,000. She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt.*
> *F gives, as collateral for the loan, a general right to the bank over her many current and savings accounts and investment portfolio held with them.*
> *Ignoring accrued interest, the 'cap' on the amount of collateral regarded as used in respect of the relevant debt is £100,000.*

On the pre-2020 HMRC view, there is a remittance of £100k. It is

[290] See 20.5.2 (Onshore transfer).

[291] See the 2021/22 edition of this work 17.32.5 (Security for debt: Amount remitted).

[292] This is a variant of *Example 1 (Freda)* above.

[293] The grant of an interest-free loan from a bank seems somewhat implausible, unless the bank is owned by F or a connected person. The significance is that the loan is not commercial, so granting security over this kind of loan constitutes a remittance even applying the pre-2014 HMRC view.

necessary to ascertain exactly which income and gains are remitted.

> *The 'transfer' is the offering of the asset as collateral so an analysis of F's accounts over which the charge is granted would be needed to analyse the credits into each account immediately before the date of transfer, in order to determine the constituent parts of each account for s809Q(4) purposes.*
> *In these circumstances the terms and conditions surrounding the loan and the collateral offered should be examined carefully as this may prioritise the order of the accounts against which any 'collateral' charge will be taken; for example it may prioritise current or savings flexible accounts over high-interest period or notice accounts. The s809Q(4) analysis should reflect this priority.*

HMRC repeated the point in a meeting with the professional bodies. The note of meeting provides:

> *HMRC confirmed that generally the examples in RDRM35270 continue to stand, so if there is contractual priority this will be respected.*[294]

18.39 Amount remitted: post-2020 HMRC view

HMRC quietly changed their position in 2020, and adopt what I call the **"post-2020 HMRC view"**.

Under the post-2020 HMRC view, the amount remitted depends on whether there is a wholly or partly relevant debt.

18.40 Wholly-relevant debt: no cap

The Manual now provides:

> **RDRM37050 Foreign income and gains as collateral** [Mar 2022]
> **Remittance basis clarifications** (!)[295] ...
> *Where the overseas income and gains which are used as security for the relevant debt exceed the amount of the debt, is it HMRC's practice to limit the amount of the remittance to the amount of the debt plus any accrued interest?*
> Where the full amount of the loan has been brought to the UK the

[294] Note of meeting between professional bodies & HMRC, 11 Sept 2014 para 15 *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/a1b82d1f-8e06-49a6-98dc-896c9e9cf9cf/Rep%20body%20agreed%20note%20of%2011%20September%20meeting%20after%20HMRC%20comments.pdf*

[295] See App 1.2 (Clarify/modernise/reform). This was published (co-incidentally?) on 18 December, so some time passed before the "clarification" was noticed.

> amount of foreign income or gains taxed as a remittance is not capped at the amount of the loan. The amount of the remittance will be the full amount of foreign income or gains that are used as collateral for the loan...

On the post-2020 HMRC view, where T grants a charge over foreign income/gains as security for a wholly relevant debt, the amount remitted is the total income/gains charged. There is no cap by reference to the amount of the relevant debt. That reverses the view taken previously.

The post-2020 HMRC view leads to the absurdity that if T charges a foreign fund of £10m as security for a wholly-relevant debt of £1, the whole of the £10m is remitted. That cannot be right. So it is considered that the pre-2020 HMRC view is correct. Indeed at the time HMRC thought that was "obvious".[296]

18.40.1 *Partly-relevant debt: P(10) cap*

HMRC accept that their post-2020 view only applies to a wholly-relevant debt. It does not apply to a partly-relevant debt, because of the P(10) cap:[297]

> Where only part of the loan has been brought to the UK, s809P (10) ITA 2007 caps the extent of the amount of the collateral remitted to the total of the loan brought to the UK. S809P (10) ITA 2007 applies only where part of the loan has been brought to the UK.

If T charges foreign income/gains as security for a partly-relevant debt, the position did not change in 2020.

The moral seems to be that if T wishes to charge foreign income/gains as security for a relevant debt, it should be a partly-relevant debt and not a wholly relevant debt, ie borrow and spend or leave £1 of the borrowing offshore. This avoids the need to challenge HMRC's post-2020 view, and the unfairness if HMRC were correct.

The distinction between wholly/partly relevant debts is anomalous (one could use stronger language) and also suggests that the post-2020 HMRC view is wrong about wholly-relevant debts

18.40.2 *Lender priority not respected*

The change of practice also affects debts charged on several assets:

[296] See 18.38.1 (Pre-2020 HMRC view: general cap).

[297] 18.37 (Debt-remittance: P(10) cap).

> *Will HMRC look at any provisions in the arrangements between the taxpayer and the bank as to the priority of any security held by the bank in assessing what has been remitted to the UK?*
> *For example, A borrows £500,000 from a bank to purchase a property in the UK for £750,000. The bank takes a charge over the property but also has security over A's portfolio with the bank in Switzerland. The agreement with the bank however specifies that the bank must attempt to enforce its security over the property before it can enforce against the portfolio. As the value of the property is in excess of the amount of the loan, do HMRC accept that there is no remittance of any foreign income and gains contained in the portfolio?*
> If the provision of the loan or the repayment terms are conditional on the availability of the foreign income or gains used as collateral, the foreign income or gains are used in respect of the debt and there will be a taxable remittance. In the above scenario, there will be a taxable remittance of the foreign income or gains in A's portfolio with the bank in Switzerland.

That also reverses the view taken previously.[298]

18.40.3 *Security over several assets*

The note of meeting between Professional Bodies/HMRC provides:[299]

> **Question 2:** Order of priority where the amount remitted is limited to the amount of the loan which is used in the UK.
> B purchases a property in the UK for £750,000. She takes out a loan outside the UK of £500,000. Of this, she uses £400,000 to assist with the purchase of the property. B uses the remaining £100,000 to purchase a painting which she keeps at her house in Switzerland.

In my terminology, we have a partly-relevant debt.

> B is a UK resident, remittance basis user.
> The £500,000 loan is secured over two separate investment accounts which B holds with the lending bank in Switzerland.
> [1] The first account derives from B's non-UK capital gains and, at the time the loan is put in place, holds assets worth £600,000.
> [2] The investments in the second account derive from B's overseas

[298] See 18.38.3 (Lender priority respected).

[299] "Treatment of loans secured on foreign income or gains by remittance basis users" (Apr 2022) *https://www.tax.org.uk/treatment_of_loans*
ICEAW publish this statement as TAXguide 20/21.

> income and is worth £200,000.
>
> The terms of the agreement between the bank and B provide that the bank must enforce its security over the capital gains account and, only if there is a shortfall, can it recover any excess from the income account.

The remittance is capped at £400k. So the question arises as to what income/gains are remitted:

> Does HMRC agree that, as the capital gains account contains more than £400,000, the remittance should be treated as comprising entirely capital gains or would HMRC take the view that, despite the priority provisions, there is a proportionate remittance of capital gains and income (i.e. £300,000 of gains and £100,000 of income)?

HMRC do not agree:

> **HMRC response** The order in which the bank will enforce its security is not relevant to the remittance position and should not determine the foreign gain/ foreign income split of the capped remittance. The entirety of the funds in B's non-UK capital gains account and B's overseas income account have been used in respect of the relevant debt.
>
> £400,000 of the £500,000 loan has been brought to the UK. The amount of the remittance is capped at £400,000 and the mixed fund ordering rules are applied to the determine the make up of the capped remittance £600,000 foreign gain and £200,000 foreign income has been used in respect of the relevant debt. If the income and the gains are for the same tax year applying the mixed fund ordering rules results in a capped remittance of £200,000 foreign income and £200,000 foreign gain.

There are two points here:

(1) The lender's priority does not affect the position; this has already been noted

(2) The ITA mixed fund rules apply. These rules probably do apply if there is a charge over a single mixed fund. On the facts posited, there are two separate, non-mixed, funds. Perhaps the context shows that everything subject to the charge is to be regarded as one fund; though it is not obvious.

The view of the professional bodies, that lender's priority should be respected, is the better view.

18.40.4 *Post-2020 view: Critique*

There were two major changes of view in 2020, and HMRC's customers may think that ought to have been properly announced. Thought might also have been given to transitional issues.

HMRC deny that there has been a change of view.[300] The reader may be puzzled about that. That that the RDRM has changed its view is undeniable, and while HMRC are not bound by their manuals, it is difficult to accept that what the Manual stated clearly, repeatedly, and at length, was not formerly the HMRC view. But in October 2023 HMRC agreed to review their position, so they may return to their pre-2020 view.[301] Time will tell.

18.41 Post-charge ingredients of mixed fund

Suppose:

(1) A relevant debt of £100

(2) A mixed fund of £200 is charged as security for the debt ("the charged fund"). This involves a remittance of £100 (not £200)[302]

(3) The ITA mixed fund rules apply to determine what part of the debt is remitted (as is the HMRC view) so that (say) £100 of income is remitted.

What are the ingredients of the mixed fund after that? The £100 may be treated as remitted, as a result of the charge, but it is still held in the fund. It is considered that the £100 treated as remitted becomes a capital ingredient of the fund, within category (i), received on the date of the remittance, and the mixed fund rules are applied accordingly. So if the individual later brings £100 from the charged fund to the UK that sum is remitted first (assuming there are no subsequent receipts in the fund) and so is not taxed twice.

[300] "HMRC has applied a consistent approach to the remittance basis treatment of foreign income or gains used as loan security since publication of the HMRC notices on 4 August 2014 and 15 October 2015. The updates to the RDRM made in December 2020 and July 2021 were to clarify and correct existing guidance and were not made because HMRC had changed its position."
"Treatment of loans secured on foreign income or gains by remittance basis users" (Apr 2022) *https://www.tax.org.uk/treatment_of_loans*:
ICEAW publish this statement as TAXguide 20/21.

[301] See *https://www.tax.org.uk/hmrc-to-review-their-position-on-remittances*

[302] This is the case:
(1) On the pre-2020 HMRC view in all cases
(2) On the post-2020 HMRC view if
(a) The debt is a partly-relevant debt; or

18.42 Amount remitted: P(12) cap

Section 809P(12) ITA provides:

> [a] If
> [i] the amount remitted (taken together with any amount previously remitted) would otherwise exceed
> [ii] the amount of the income or chargeable gains,
> [b] the amount remitted is limited to
> [c] the amount which, when taken together with any amount previously remitted, is equal to the amount of the income or chargeable gains.

I refer to this as the **"P(12) cap"** on the amount remitted. That is not an ideal label but I cannot think of better.

How could the amounts remitted (which must derive from the income/gains) exceed the amount of the income/gains?

This could happen in cases of double representation, ie there are two assets which are both derived from the same income/gains,[303] and both assets are remitted.

Another case is if income is remitted twice. Suppose:

(1) Year 1: T (an individual taxable on the remittance basis) receives income in the UK. The income is remitted ("the first remittance") and so subject to tax.

(2) Year 2: The income is used in the UK, or is transferred out of the UK and brought to the UK again ("the re-remittance").

The RDR Manual provides:

> **RDRM35030 remittances derived from foreign income/gains** [Jan 2019]
> When taken together with any amounts that have been previously remitted (or treated as having been remitted), the taxable amount of income or gain that is treated as having been remitted because of these provisions cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)).
> Where property is brought to or used in the UK by or for the benefit of a relevant person the amount that is liable to tax is the amount of the underlying foreign income or gains from which the property derives (whether directly or indirectly). The taxable remittance will only occur once; this will usually be the time the asset is first brought to, received

[303] See 18.18.9 (Double representation).

by or used in the UK by a relevant person.

This is right. But the same will apply if the income/gains is *not* taxed on the first remittance, eg:

(1) A remittance by a non-resident of income/gains of a resident period.
(2) A remittance before 2008 of source-ceased income or of property enjoyed in specie.[304]

HMRC agree. December 2008 Q&As provides:

> **Q9** If a taxpayer undertook a source ceasing exercise during the 2006-07 tax year and then remitted the proceeds before the 2008-09 tax year, if those funds were to then be taken back outside of the UK and re-imported, would this constitute a remittance. In other words, would the earlier source ceasing exercise be looked through despite its timing? It is understood that interest/profit from any new investment would be a remittance.
> **A** If the source ceased in 2006-07 and was remitted in 2007-08, then this did not count as a remittance and it will not count as a remittance if it is exported and subsequently re-imported.

HMRC do not cite a statutory authority to justify their answer; s.809P(12) ITA would do, though there are others as well.[305]

18.43 Condition C/D: Amount remitted

Section 809P(6)(7) ITA deal with condition C:

> (6) In a case falling within section 809L(4)(a) or (b), the amount remitted is equal to the amount of the relevant income or chargeable gains.
> (7) In a case falling within section 809L(4)(c), the amount remitted is equal to the amount of the relevant income or chargeable gains; but this is subject to subsection (10).
> ...
> (11) In subsections (6) and (7) "relevant income or chargeable gains" means—
> (a) if the qualifying property falls within section 809N(7)(a), the income or gains—
> (i) of which the qualifying property consists, or

[304] The temporary non-residence rules would need consideration.

[305] Para 86(2) sch 7 FA 2008 would also provide relief here (at least, assuming remittance conditions A/B apply, which is the normal case): see 18.53 (Transitional: pre-2008 property). But the point is now of mainly historical interest.

> (ii) from which the qualifying property derives;
>
> (b) if the qualifying property falls within section 809N(7)(b), the income or gains—
> (i) of which the property given to the gift recipient consisted, or
> (ii) from which that property derived;
>
> (c) if the qualifying property falls within section 809N(7)(c), the income or gains—
> (i) of which the property given to the gift recipient consists, or
> (ii) from which that property derives.

Section 809P(8)(9) ITA make equivalent provision for condition D:

> (8) In a case falling within section 809L(5)(a) or (b), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c).
>
> (9) In a case falling within section 809L(5)(c), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c); but this is subject to subsection (10). The RDR Manual offers seven examples but the matter does not seem important enough to be setting out here.

18.44 Sets

Section 809P(13) ITA provides:

> If the property forms part of a set only part of which is in the UK, the amount remitted is such portion of what it would have been had the complete set been brought to, or received or used in, the UK when the part was as is just and reasonable (having regard to the part of the set which is there).

This is a mad level of micro-detail, and should be repealed. But in practice the point will rarely if ever arise.

18.45 Gain on disposal at undervalue

18.45.1 *The CGT background*

Gains are computed as the consideration for a disposal less allowable expenditure. In certain circumstances the consideration for a disposal is deemed to be market value consideration, not the actual consideration (if any).[306] In these cases a gain is deemed to accrue which is not a real gain

[306] See App.4.8 (CGT market value rule).
In certain circumstances a gain is deemed to accrue to an individual even though

(in the sense that the individual does not actually receive a sum which constitutes or represents the gain). I refer to this as a **"deemed gain"**.

The most common case of a deemed gain is a gift. In money terms (one might say, in economic reality, but I do not think that is a helpful concept) a gift cannot give rise to a gain, and normally gives rise to a loss. However, for CGT purposes a gift is treated as made for market value.

18.45.2 *Remittance of deemed gain*

In the absence of express provision, a deemed gain accruing on a gift could not be remitted, because the individual does not have property which is or derives from the gain and which could be received/brought/used in the UK. Accordingly, s.809T ITA provides:

> (1) This section applies if—
> (a) foreign chargeable gains accrue to an individual on the disposal of an asset, and
> (b) the individual does not receive consideration[307] for the disposal of an amount at least equal to the market value[308] of the asset.
> (2) For the purposes of this Chapter [Chapter A1 Part 14, remittance basis], treat the asset as deriving from the chargeable gains.

It is not expressly stated that s.809T only applies on a disposal made by an individual, but this is implied. Eg on a disposal by non-resident close company, conditions (a)(b) are met, if one reads the words literally:
(a) s.3 gains may accrue to an individual who is a participator, and
(b) the individual does not receive the consideration for the disposal.

But s.809T does not apply. Otherwise provisions such as s.3D(3)(a) TCGA would be unnecessary.[309]

HMRC accept that pre-2008 deemed gains cannot be remitted.[310]

For the interaction with s.87, where the gift is to a trust, see 61.7.6 (Payment from unremitted gains).

there is no disposal, but s.809T does not apply to that.

[307] "Consideration" here obviously means actual consideration, as opposed to deemed market value consideration. (Though normally in the legislation the drafter states this expressly; eg s.165(7) TCGA.)

[308] Defined s.809Z10 ITA: "In this Chapter ... "market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

[309] See 64.23 (Section 3 remittance basis).

[310] See the 2021/22 edition of this work para 17.33.6 (Transitional: Pre-2008 deemed gain).

18.45.3 *Gift of asset*

Suppose:

(1) T (a remittance basis taxpayer) gives an asset (foreign situate) to a trust. A gain is deemed to accrue on the disposal as if the asset were sold for market value (the deemed gain).

(2) T (or a relevant person) receives the asset in the UK.

The deemed gain is remitted.

For the interaction with s.87, see 61.7.6 (Payment from unremitted gains).

18.45.4 *Sale of asset at market value*

Suppose T sells an asset for market value. Then s.809T does not apply. It does not matter if T is connected with the purchaser. The purchase price is or (better) is derived from the gain accruing on the sale, but the asset itself is not (and is not derived from) the gain. So it does not matter if the asset is remitted.

Suppose T sells an asset and the purchase price is left outstanding as a debt. It is considered that T "receives" the consideration, for the benefit of the outstanding debt is the consideration.

18.45.5 *Sale of asset at undervalue*

Suppose T sells an asset at an undervalue. Assume for the purpose of discussion that the asset has a market value of £200 and a base cost of £50. So a deemed gain of £150 accrues on the disposal.

The asset is treated as derived from the deemed gain, and there is a charge if the asset is remitted.

If the asset is sold for base cost, £50, it is suggested that the £50 is not derived from the deemed gain, so the £50 sale proceeds could be remitted tax free. But other views are possible.

What if the asset is sold at an undervalue, but for more than base cost, say for £100? In the absence of s.809T, I would say that the purchase price is in part derived from the gain. One might say that since the sale price is half the market value, half of the sale price represents the gain, ie £75. I prefer the view that the purchase price is £50 more than base cost, so that £50 of the purchase price is derived from gain. Does the rule in s.809T, that the asset is derived from the gain, mean that the sale proceeds are *not* derived from the gain? Logically that should follow, but if that were right then tax could be avoided by sales at a (marginal) undervalue. So the context shows that one should not carry the deeming so far.

The conclusion is that on a sale at an undervalue:

(1) the asset held by the trust derives from the gain *and*

(2) the sale proceeds (in part)

are both derived from the gain. The cap on the amount remitted avoids double taxation.[311]

The s.809T rule applies to all sales at less than market value, even if the undervalue is accidental.

The s.809T rule applies if the sale is less than market value, even if it is 99% of the market value. But any value within the market value range will suffice; it is potentially misleading to refer to "the" market value.[312]

The rule applies even if the disposal is not between connected persons, though in practice this is not likely to arise because:

(1) A disposal between unconnected persons is not likely to be at an undervalue.

(2) If the purchaser brings the asset to the UK, that is not likely to be a taxable remittance (because the purchaser is not likely to be a relevant person in relation to the seller).

18.46 Purchase of family home

Suppose:

(1) T gives income/gains to T's son S, not a relevant person.

(2) S buys the freehold interest of a house and uses the income/gains to pay the purchase price.

The topic raises many remittance issues, discussed throughout this chapter, so it is convenient to draw them together.

18.46.1 *Rent-free occupation*

Suppose S allows T to occupy the house rent-free. It is considered that S "uses" the house (the word "use" is wide enough to cover this even though it would be more normal and better legal English to say S occupies or enjoys the use of the house). Accordingly remittance condition A is satisfied. The house is derived from the income/gains, but condition B is not satisfied because the property is not property of a relevant person.

Remittance condition C is satisfied, since the property is qualifying property of a gift recipient, and is used and enjoyed by a relevant person.

[311] See 18.42 (Amount remitted: P(12) cap).

[312] See App 4.9.4 (Full consideration range).

So the purchase price income/gains is remitted.

18.46.2 *Lease for full consideration*

Now suppose:

(1) T gives income/gains to T's son S, who uses it to buy the freehold interest of a house.

(2) S grants a lease of the property to T for full consideration and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above). So remittance condition A is satisfied in relation to the lease. However the lease is not derived from the income/gains. So condition B is not satisfied. Of course funds T uses to pay for the lease are regarded as remitted.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not property of a relevant person so condition B is not satisfied.

Conditions C and D are excluded (even if they could otherwise apply) since the full consideration exemption applies.

18.46.3 *Lease not for full consideration*

Now suppose:

(1) T gives income/gains to T's son S, not a relevant person, who uses it to buy the freehold interest of a house.

(2) S grants a lease of the property to T for no consideration or for less than full consideration, and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above) So remittance condition A is satisfied in relation to the lease. If the transactions are part of an arrangement, the lease is derived from the income/gains. So condition B is satisfied (as the lease is property of a relevant person). What is the amount remitted? It is the amount from which the lease is derived. It is suggested that that is not the full amount used to pay for the property, but only a part reflecting the value of the lease.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not the property of a relevant person so condition B is not satisfied.

Turning to remittance condition C, does T enjoy the lease for the purposes of remittance condition C? T does. At first sight this does not matter as the lease is not qualifying property of a gift recipient (it is not property of a gift recipient). The lease may (depending on the facts) however be qualifying property within s.809N(7)(c). If so the amount remitted is all the income/gains(not the value of the lease).

Next, does T use and enjoy the reversion? It is considered that T does, since the lease T enjoys is derived from the reversion, and the lease is the mechanism by which T enjoys the reversion. If that is right, then condition C is satisfied, since the reversion is qualifying property of a gift recipient.

18.46.4 *Another analysis*

Another analysis is that the "property" is the physical house, not the legal interests in the property, but one should not disregard the most basic principles of the law of real property in construing a taxing statute, if any other approach is possible.

18.47 School fees

Suppose T wishes to pay the school fees of minor grandchildren. Assume the grandchildren are at school in the UK (otherwise there is no problem). A direct payment out of income/gains is a remittance as conditions A and B are satisfied.

Suppose T gives funds to T's child (not a relevant person) and the child uses the funds to pay the fees. This is still a remittance as conditions A and B are still satisfied: the funds in the hands of the child are derived from the income/gains.

Suppose there is an informal arrangement under which:

(1) T gives funds to T's child;
(2) the child will use *other* funds to pay the school fees.

This is caught by condition C because the funds used to pay the fees are "qualifying property" within s.809N(7)(c). That is, it is used to pay the school fees by virtue of an operation which is effected "with reference to the gift of the property to the gift recipient".

T must therefore make an unconditional gift to T's child ie a gift such that the payment of the school fees is not with reference to that gift; in that case (assuming the fees are not paid out of the gifted property) there is no taxable remittance.

18.48 Remittance before income/gains arise

Section 809U ITA provides:

> Where—
>
> (a) income or foreign chargeable gains are treated as arising or accruing, and
>
> (b) by virtue of anything done in relation to anything regarded as deriving from the income or chargeable gains, the income or chargeable gains would otherwise be regarded as remitted to the UK before the time when they are treated as arising or accruing,
>
> treat the income or chargeable gains as remitted to the UK at that time.

This provision can apply to s.87 gains[313] where:

(1) Year 1:
  (a) A beneficiary receives a capital payment which is remitted to the UK.
  (b) No s.87 gains accrue in that year, because there are no trust gains to which the capital payment can be matched.

(2) Year 2: Trust gains accrue which are matched to the capital payment, so s.87 gains accrue in year 2.

Similarly, this provision can apply to s.731 income[314] where:

(1) Year 1:
  (a) An individual receives a benefit which is remitted to the UK.
  (b) No s.731 income arises in that year, because there is no relevant income to which the benefit can be matched.

(2) Year 2: Relevant income arises, which is matched to the benefit, so s.731 income arises in year 2

Or

(1) Year 1:
  (a) Relevant income arises which is remitted to the UK.
  (b) No s.731 income arises in that year, because there is no benefit to which the relevant income can be matched.

(2) Year 2: A benefit is received which is matched to the relevant income, so s.731 income arises in year 2.

These are cases where the individual may receive property in the UK

[313] See 61.19 (s.87 remittance basis).

[314] See 50.39 (s.731 remittance basis).

(regarded as deriving from s.731 income or s.87 gains) in a year earlier than the year in which the income/gains are treated as arising.

Section 809U may also apply to accrued income profits, and, it is suggested, to trading income.

18.49 Partnerships

This section discusses two related questions.[315] Assume P (a remittance basis taxpayer) is a member of a partnership.

(1) *Remittance of funds transferred to partnership.* Suppose:
  (a) P receives income/gains.
  (b) P contributes the funds to the partnership, as partnership capital.
  (c) The partnership brings the funds to the UK.

(2) *Remittance of partnership income/gains*. Suppose:
  (a) The partnership receives income/gains.
  (b) The partnership does not distribute the funds to the partners, but brings the funds to the UK.

In these cases, is there a taxable remittance? The partnership itself is not a relevant person[316] but P is a relevant person and P's partners may be relevant persons too.

There are two possible views:

(1) One regards P as owning a *distinct asset* (a chose in action) and not a share of the partnership assets. In that case:
  (a) Funds contributed to the partnership are remitted if P receives the partnership share in the UK (because the partnership share is derived from P's income/gains).[317]
  (b) Partnership income/gains brought by the partnership to the UK are not remitted.

(2) One regards P as owning *a share of the partnership assets*. In that case:
  (a) Funds contributed to the partnership[318] are remitted if the partnership brings the funds to the UK.

[315] Also see 18.22.8 (Borrowing for partnership share); for mixed fund issues, see 20.9.4 (Partnership Income/gains mixed with partnership assets).

[316] See 18.9 (Relevant person: Partnership).

[317] Assuming (which is perhaps arguable) that receipt of a UK situate intangible asset counts as receipt in the UK for the purposes of remittance condition A.

[318] Or at least, the part of the funds attributable to the partnership shares of P and of other partners who are relevant persons.

(b) Partnership income/gains[319] are remitted if the partnership brings the income/gains to the UK.

One might describe the first view as being that partnerships are not transparent for remittance basis purposes, and the second view as one that partnerships are transparent. But that is just a convenient shorthand, not an exact statement of the statutory provisions.

18.49.1 *Partnership opaque for remittance basis*

The starting point is to understand the legal nature of a partnership share; see 85.3 (Nature of partnership share) where I identify two possible analyses of a partnership share, which I call a chose in action analysis and a co-ownership analysis. The choice depends on the context.

In the context of remittances, the RDR Manual adopts the chose in action analysis:

> **RDRM33530. Partnerships** [Jan 2019]
> *Investment into partnerships*
> When a partner makes a capital contribution to a partnership they acquire an asset under partnership law, namely an 'interest' or 'share' in the partnership which gives them rights to share in future profits and distributions (of their capital and any surplus) on dissolution of the partnership.

On this basis the RDR Manual adopts the non-transparent view:

> **RDRM33530. Partnerships** [Jan 2019]
> ... *Offshore partnerships trading or investing in the UK*
> ... Offshore partnerships, whether trading or investment partnerships, may bring partnership funds into the UK to meet trading or investment expenses in the usual course of partnership business. As the funds are brought in by the partnership they are not brought in by a relevant person. In most cases there will be no benefit to a relevant person from the money or other property brought into the UK by the partnership, nor will a service usually be provided in the UK to or for the benefit of a relevant person, so Condition A of ITA07/s809L is not met.[320] Thus there will be no taxable remittance.

In short, in the Manual's view, partnerships are not transparent for

[319] Or at least, the share of the income/gains attributable to partnership shares of P and of other partners who are relevant persons.

[320] This is a loose paraphrase of remittance condition A, but the meaning is clear.

remittance basis purposes (in the sense that remittance by the partnership is not remittance by the partners). The Manual refers to offshore partnerships, but the same must apply to UK partnerships.

The co-ownership analysis would give a different answer. But the context shows that the chose in action analysis is preferable, since in many common partnership situations, tracing from a partnership contribution to the partnership assets is simply impractical.

This conclusion is consistent with the rule that partnership income is regarded as income of the partners; in that sense partnerships are said to be transparent.[321] There is no contradiction, for the issues and statutory provisions are different: there is no general principle of income tax transparency which requires the same answer in every context.[322]

This conclusion is consistent with s.848 ITTOIA (partnership not an entity for IT purposes) as it is based on the nature of a partnership, and does not depend on a conception that a partnership is an entity; in any case, the purpose of s.848 relates specifically to assessment.[323]

For these reasons, the Manual's view is correct.

The RDR Manual adds four qualifications:

> **RDRM33530. Partnerships** [Jan 2019]
> ... [1] In cases where there does appear to be a benefit to an individual partner (or to another relevant person) from money or other property brought into UK by the partnership, or from a service provided in the UK for which the partnership gives consideration then you should examine the transaction and the partnership documents very carefully to identify the source of the partnership funds.

This is considering whether a capital contribution to the partnership is remitted. More analytically, remittance condition A is satisfied if a partnership asset is used in the UK for the benefit of a relevant person, or if the partnership pays the consideration for a service provided in the UK to a relevant person. But remittance condition B is not satisfied, as even if the partnership asset or consideration derived from the individual's income/gains, the property is not property of a relevant person. Instead condition D needs consideration (see below).

The Manual continues:

[321] See 85.16 (Partnership transparency: IT/CT).

[322] See 90.6.1 (Transparent/opaque terminology).

[323] See 85.17 (Entity disregard rule).

> **RDRM33530. Partnerships** [Jan 2019]
> [2] The provision of the property or service by the partnership may be a remittance of that individual's 'share' in partnership profit. To the extent that the individual's share in partnership profit falls to be regarded as relevant foreign income (see below) there may be a remittance.

This is considering whether partnership income/gains are remitted.

The Manual continues:

> **RDRM33530. Partnerships** [Jan 2019]
> [3] You may also need to examine whether there is a true partnership, or whether in fact it is the individual's foreign income or gains that have been remitted.

Whether there is a partnership is a question of partnership law. That should not cause difficulties, if documentation and implementation are correct, but it depends on the facts.[324]

> [4] Alternatively there may be a connected operation to which Condition D of ITA07/s809L(5) applies. ...

The Manual wisely does not explain any further; it is possible that remittance condition D could be satisfied, if the individual enjoys a benefit from partnership property in the UK, though the HMRC argument is not completely straightforward.

Suppose the partnership borrows and brings the borrowed money to the UK. The debt is a relevant debt. If the partnership then repays the debt out of property derived from income/gains of P, there is in principle a relevant-debt remittance.

18.49.2 *Income/gains contributed to partnership*

The RDR Manual 33530 provides:

> **RDRM33530. Partnerships** [Jan 2019]
> ... It follows [from the statement of the partnership law position] that a remittance basis user who uses his foreign income or gains to make a capital contribution to a UK partnership acquires a UK asset; namely a share in the UK partnership, in exchange for his 'equity' subscription in the partnership. Thus the foreign income or gains that he uses to contribute to the partnership will be a taxable remittance within ITA07/s809L.

[324] See 85.5.3 (Formation of partnership).

> This is so even if the individual places his investment into the partnership's overseas account, and the UK partnership is only investing or trading overseas and not in the UK.

The text does not say what it means by "UK partnership" - presumably it means an interest in which is UK situate, on common law/international law principles: that is, a partnership which is managed and controlled in the UK.[325]

It is in principle correct that if a person who is not a partner uses offshore income/gains to acquire a share in a UK situate partnership, there is a taxable remittance.[326]

On the other hand, if all the partners of an existing partnership contribute further partnership capital in proportion to their partnership shares, no-one acquires a larger partnership share than before, and there is nothing received in the UK.

If a partner lends income/gains to a partnership, there might be a taxable remittance if the loan is a UK situate asset.[327]

18.49.3 *Partnership profits remitted*

Where partnership income is RFI[328] the same point arises. There is no taxable remittance if the partnership brings its income to the UK. A partner can only remit income to the UK after it is distributed to them from the partnership.

See too 20.9.4 (Partnership Income/gains mixed with partnership assets): mixed funds.

18.49.4 *Company held by partnership*

Suppose a partnership holds a company. The partners are participators in the company. The company will be a close company (or a non-resident close company), since partners are associates. Accordingly the company is a relevant person in relation to each of the partners. So there is a taxable remittance if income/gains are brought/received/used in the UK by the company; even though there would be no remittance if the same property

[325] See 102.35 (Situs of partnership share).

[326] This assumes that receipt of a UK situate asset is a taxable remittance, ie is a receipt of an asset in the UK. The contrary might be argued: see 18.14.8 (Receipt of UK situate investment asset).

[327] See 18.14.10 (Acquisition of UK debt).

[328] See 85.19 (Partnership income: Remittance basis); 18.17.1 (What is the income?).

was brought/received/used in the UK by the partnership which holds the company! This is the case regardless of the number of partners, because a company held by a partnership is close even if it has hundreds of unconnected partners. Remittance investment relief may mitigate this problem.

18.50 Proceeds of divorce settlement

Suppose T transfers income/gains to W as part of a divorce settlement. It is suggested that the funds in the hands of W are not derived from T's income. They are received for full consideration (in the general sense of that expression).[329] If that is right, remittance condition B is not satisfied even if:

(1) W remits while still a relevant person (before decree absolute);
(2) W applies the funds for the benefit of relevant persons (eg children or grandchildren of T under 18).

However in case HMRC do not agree, W should not bring the funds to the UK until after decree absolute, by which time she has ceased to be a relevant person; and she should ideally not use the funds for the benefit of relevant persons (in relation to H). Then there is clearly no taxable remittance.[330]

18.51 Debit, credit and charge cards

This section considers whether the use of debit, credit and charge cards involves a remittance. The starting point is to understand the legal nature of debit, credit and charge cards. The following analysis draws on *The Law of Bank Payments*.[331]

On the use of a card, three contracts come into being. For present purposes the most important terms of the contracts are as follows:

(1) Cardholder and supplier
This is the contract for goods or services between the cardholder and the person from whom the cardholder purchases goods or services

[329] See App.4.6 (Transfer on divorce).

[330] See 18.26 (Becoming/ceasing to be relevant person: conditions A and B). As to relevant-debt remittances, see 18.22.11 (Debt imposed by law).

[331] Brindle & Cox, (5th ed., 2017), para 4-007. In any particular case it is strictly necessary to review the specific terms governing the card concerned, but I expect that will not usually make any difference in practice. Store-issued cards are not discussed here.

("the supplier"). This contract is the same whether the cardholder pays by card or by cash.

(2) Card-issuer and supplier
The card-issuer undertakes to honour the card by paying the supplier.

(3) Card-issuer and cardholder
   - (a) A *debit* card is issued only by a bank. The contract between the card-issuer bank and cardholder authorises the bank to debit the cardholder's bank account with the amount of the card transaction.
   - (b) Charge and credit cards are different. Here the cardholder is required to make a payment to the card-issuer. A *charge* card requires the cardholder to repay the balance outstanding after a set period.[332] A *credit* card allows the cardholder extended credit.

It is necessary to distinguish between use of cards to obtain (1) cash, and (2) goods or services.

18.51.1 *Card used to obtain cash*

If a debit card is used to obtain cash in the UK from a foreign bank account which is in credit,[333] and the card is used at a branch of the bank which issued the card, then there is clearly a remittance of the money. The same applies if cash is withdrawn from a bank which is not the card-issuing bank, because the third party bank acts as the agent for the card-issuing bank.

The use of a *charge* card to obtain cash in the UK is likewise a remittance. The time of the remittance is when the sum is debited from the individual's bank account (assuming the account is in credit); not when the sahs is obtained by using the card. The position is the same if an individual uses a *credit* card to obtain cash in the UK.

18.51.2 *Card to buy goods/services*

Where a debit card is used to obtain services provided in the UK, remittance condition A is satisfied. Payment to the card issuer out of

[332] In the case of a bank-issued credit card, the issuer is normally authorised to debit the cardholder's bank account to meet a debt due on the card. But in practice this facility is not used unless needed (or the card effectively becomes a debit card).

[333] If the effect of use of the card is to put an account into debit, there is obviously no remittance on ordinary principles, though there will in principle be a relevant-debt remittance when the overdrawn account is repaid.

income/gains satisfies remittance condition B.

Where a debit card is used to obtain goods provided in the UK, remittance condition A is satisfied, but not if the goods are exempt property, which will quite often be the case (clothes, watches, jewellery, or items under £1k).[334] Where that relief does not apply, payment to the card issuer out of income/gains would satisfy remittance condition B.

18.51.3 *HMRC view*

The RDR Manual provides:

> **RDRM36130 Credit Cards and Debit Cards** [Jan 2019]
> *Credit card issued in the UK*
> If a taxpayer who is chargeable on the remittance basis uses a UK credit card to pay for goods or services, either in the UK or overseas and he or she subsequently settles their credit card bill using foreign income or gains, the payment is a taxable remittance.
> The remittance does not have to be received in the UK by the taxpayer, it is sufficient that it is received by the credit card company in the UK.

HMRC do not say why this is so, but perhaps the argument is that the money is used or brought to the UK by a relevant person. This is not the case. [335] However a remittance basis taxpayer should avoid a UK credit card in order to avoid dispute.

> *Credit card issued by an overseas bank or other financial institution*
> Where an overseas credit card is used in the UK, the cardholder is effectively authorising the credit card company to pay the bill for the goods or service in just the same way as if they had instructed the bank to make a payment directly to the person supplying the goods or services.
> The terms of credit card agreements may differ as to the moment of "indebtedness" between the cardholder and the credit card company. However the use of the credit card to pay for goods used or received in the UK, or services provided in the UK by, to, or for the benefit of a relevant person will create a debt.
> The use of the individual's untaxed foreign income or gains to pay the credit card company in respect of the debt will be a taxable remittance. Interest and other such charges should be apportioned accordingly between UK and non-UK goods and services. In most cases a straight proportional split of the interest against each type of expenditure will be

[334] See 19.29 (Exempt property).

[335] See 18.14.3 (Property used in UK).

acceptable; for example if £400 of the debt relates to UK goods which are taxed as a remittance and £600 to non-UK goods and there is an interest charge in relation to that £1,000 debt of £10, then £4 of the interest is also a taxable remittance. However some cards may apply different rates where cash is withdrawn, or depending of date of purchase, in which case the taxpayer will need to compute the interest due on the "relevant debt" part of the payment only.

Note 1: This section may apply to any credit card debt which the individual satisfies using their foreign income or gains, even if they are not the cardholder.

Note 2: If an overseas credit card is used abroad and the account is settled direct to the card company out of overseas income, no liability to UK tax will arise. But if an asset purchased using the card is brought to the UK and subsequently sold here, there will be a taxable remittance, at the date of disposal, up to the amount of any foreign income used to settle the original account.

Debit card issued by an overseas bank or other financial institution

Payments for goods or services that are made using a debit card (for example a Visa debit card or one issued under the brand name "Cirrus") issued by an overseas financial institution are treated in exactly the same way as a cash transaction.

This means that when goods or services are purchased in the UK[336] using a debit card, a taxable remittance is made to the extent of the amount of any overseas income or gains in the bank account. Likewise any cash withdrawals from shops or ATM machines in the UK are taxable cash remittances.

Payment by cheque drawn on an overseas account or by electronic transfer of any kind are also treated in exactly the same way as cash and are potentially taxable remittances of overseas income and gains.

18.52 Gift to charity

A remittance basis taxpayer ("T") making a gift to charity[337] should give:

(1) money (including foreign currency), qualifying for gift aid relief or

(2) foreign assets, qualifying for qualifying investment donation relief.[338]

[336] Author's footnote: More analytically, in the language of condition A, when goods are received in the UK or services are provided in the UK.

[337] This includes some EU and EEA charities: see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), Chapter 3 (Definitions of "Charity"), online version *https://www.taxationofcharities.co.uk*

[338] For these reliefs, see See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), Chapter 15 (Cash Gifts from

The gift may be made out of income/gains, or property derived from income/gains. If the sum given is money the gift should be to a bank account in the name of the charity outside the UK.[339]

For the interaction of gift aid and the remittance basis claim charge, see 17.12.8 (Interaction with Gift Aid).

18.52.1 *Is charity a relevant person*

Suppose:

(1) T gives assets to a charity which receives the assets offshore.
(2) The charity brings the assets to the UK.

There is in principle no taxable remittance, unless the charity is a relevant person in relation to T.

A charitable company would be a relevant person if it is a close company and T or some other relevant person is a participator.[340]

A charitable trust would be a relevant person if T or some other relevant person is a beneficiary.[341] No individual has a legal or equitable (beneficial) interest in a charitable trust, so in the strict sense a charitable trust has no beneficiaries:

> Individuals may benefit from the application of trust moneys but they are not, as individuals, the beneficiaries of the trust and may not enforce its terms.[342]

Individual to Charity (Gift Aid)) and Chapter 21 (Gift of Shares/Land to Charity),online version *https://www.taxationofcharities.co.uk*

[339] I understand that the CAF maintain an offshore account for this purpose (and no doubt some other charities do the same). This is not strictly necessary: see 18.14.6 (Gift to non-relevant person); but HMRC do not agree with that view.

[340] See 18.5 (Relevant person: Companies). There is a reasonable argument that a charitable company cannot be close, but it would be safer to assume that it may be close: see 104.23.10 (Member of charitable co).

[341] See 18.6 (Relevant person: Trusts).

[342] *Re Crown Forestry Rental Trust, Latimer v IRC* [2004] 4 All ER 588 at [29]. Likewise Law Commission, *Capital and Income in Trusts: Classification and Appointment* Consultation Paper No. 175 (2004) para 6.16: "The 'beneficiary' [of a charitable trust] is at all times the public (although the identity of the individuals who incidentally benefit from the carrying out of the charitable purpose may not remain constant)."
Likewise *AG v Cocke* [1988] Ch 414 at p.419: "... the nonsense of alleging that there is any beneficiary in any meaningful sense of that word under a public charitable trust of this nature. It seems probable to me that in almost all charitable trusts there are no individual beneficiaries."

There is a statutory definition but that makes no difference. Section 809M(3)(e) ITA provides:

> "beneficiary", in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement.

It is possible (at least theoretically) that (say) the individual becomes destitute and a charity whose objects include the relief of poverty makes them a grant. However that does not bring the individual within the definition. One must say:
(1) The benefit is incidental (the object of the charitable trust being the relief of poverty, not to benefit the individual) and incidental benefits should be disregarded;[343] or
(2) This possibility is not included in the word "may".[344]

If that were wrong, then (in the absence of a settlor exclusion clause) every charitable trust is within the scope of s.624 ITTOIA is a settlor-interested trust; which cannot be correct. The definition must be read in its context. The purpose is to include discretionary beneficiaries or persons who may be added to the class of beneficiaries.

So a charitable trust is not a relevant person. This is the case even if the individual is a trustee or owner and director of a corporate trustee of the charity. If limited liability is needed, the trust may have a corporate trustee.

What about a company wholly owned by a charitable trust ("a subsidiary company")? The charity trustee is a participator, but it is not a relevant person. For the same reason, s.809L(2)(h) will not apply.[345] So the subsidiary company of a charitable trust is not a relevant person. I mention one exception for completeness: a loan creditor is a participator, so the subsidiary company is a relevant person if the individual (or any other relevant person) is a loan creditor of the subsidiary company. In practice funding for the subsidiary company will usually come from the charity, not from loans directly from the individual or other relevant persons, so this

I stress this because statute does sometimes refer to "beneficiaries" of a charity, eg: s.525(1)(b) ITA, s.561 ITA; s.117 Charities Act 2011. These are examples of the word being used in a loose sense, where it may apply in the context of charitable companies as well as charitable trusts.

[343] See 50.4.9 (School/university fees).

[344] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 13.13 (What does a settlor exclusion clause cover?).

[345] See 18.7 (Body connected with trust).

should not be a problem.

Outstanding loans from the individual to the charity would need further consideration.

18.52.2 *Gifts to charity: Reform*

A rule that a charity is not a relevant person would be sensible and avoid the current illogical distinction between charitable trusts and charitable companies. But if (as advocated in this book) the definition of relevant person was cut back to individuals closely connected to the individual, this problem would fall away.

HMRC say:

> 2.91 A number of responses from the arts and charity sectors suggested that the business investment relief[346] should be extended to allow non-domiciles to bring overseas income and gains to the UK tax-free for the purpose of making donations to, or investments (?) in, UK charities.

I suspect, though it is not completely clear, that the suggestion was that a gift directly to a UK bank account of a charity should not be regarded as a taxable remittance. That reform would make it unnecessary for charities to maintain a foreign bank account. That seems in principle sensible,[347] but HMRC rejected it:

> **Government response**
> 2.92 The Government is committed to encouraging philanthropy. However, there are already tax-efficient ways for non-domiciles to make donations to UK charities[348] and the Government has not seen any

[346] As far as I can see, the proposal has nothing to do with business investment relief; the proposal was framed that way because it was made in the context of a consultation on that relief.

[347] There are two complications. (1) If one is going to change the rule, there is no good reason to limit the change to charities. The same rules should apply to a payment to the bank account of a non-charity, for instance, a gift to a non-relevant person should not have to be made via a foreign bank account. The point illustrates how well meaning reform proposed special interest groups can complicate matters as they may fail to look at the broad picture. (2) The proposal assumes that at present a payment to a UK bank account is a remittance; that is the HMRC view, but it is not correct. see 18.14.6 (Gift to non-relevant person); So what is needed is a change of practice, not a change in the law.
Still, it could all be sorted out easily enough.

[348] It does not say, but presumably this is a reference to planning by a gift to a foreign bank account.

> compelling evidence that extending the business investment relief in the way suggested would lead to a significant increase in the level of donations to UK charities by non-domiciles. It is also very likely that complicated legislation and anti-avoidance provisions would be required. The Government therefore does not intend to take any further action on this issue at the present time...[349]

Thus there is no current prospect of reform.

18.53 Transitional: Pre-2008 property

Para 81 sch 7 FA 2008 provides the starting point:

> The other[350] amendments made by this Part of this Schedule [ie Part 1 which sets out the provisions discussed in this chapter] have effect for the tax year 2008-09 and subsequent tax years.

18.53.1 *Pre-April 08 remittance: Para 86(2) relief*

Under the pre-2008 RFI remittance basis, there was no remittance of RFI if property was remitted *in specie* (not in the form of money). This is now caught by remittance condition B.

Para 86 sch 7 FA 2008 provides a transitional relief:

> (1) Section 809L of ITA 2007 (meaning of "remitted to the UK") has effect subject to this paragraph.
> (2) If, before 6 April 2008, property (including money) consisting of or deriving from an individual's relevant foreign income was brought to or received or used in the UK by or for the benefit of a relevant person[351], treat the relevant foreign income as not remitted to the UK on or after that date (if it otherwise would be regarded as so remitted).

[349] The paragraph concluded "but [the Government] will consider how to increase awareness of ways for non-domiciles to make tax-efficient donations under the existing rules." Nothing was done. Perhaps that was not intended seriously. Or perhaps the Government realised that the current rules are so absurd that the less that is said about them, the better.
HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (2011).
http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

[350] The word "other" excludes provisions concerning employment-related securities, not discussed here.

[351] The restricted definition of "relevant person" in relation to pre-6 April 2008 income does not apply here; see 18.10 (Relevant person: Pre-2008 income/gain).

I refer to this as **"para 86(2) transitional relief"** and I refer to the asset brought/received/used in the UK as **"the UK asset"**.

The UK asset may be any property, including money. At first sight, the words "including money" seem otiose: the word "property" alone would include money. But para 86(3) transitional relief (discussed below) refers to "property other than money" and (as it was desired to apply para 86(2) transitional relief to money brought to the UK before 2008), it made some sense for the statute refer expressly to property including money, if only for clarity. That avoids any inference that money would not be within para 86(2).

Para 86(2) transitional relief continues to apply even if the UK asset is sold. HMRC appear to accept this in relation to para 86(3) transitional relief (see the example of Heidi, below) and the same must apply in relation to para 86(2). The result is something of a windfall, but there it is.

The RDR Manual provides:

> **RDRM31460 Property derived from RFI not treated as a remittance (1)** [Jan 2019]
>
> *Background*
>
> The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. In certain situations, the operation of the previous remittance rules in respect of relevant foreign income meant that it could be brought to the UK without triggering an immediate tax charge. As an example, if an asset such as a car was purchased abroad using relevant foreign income and the car was then brought into the UK, there would be no income or capital gains[352] tax charge when it is brought in. Instead the charge would only occur if/when the asset was sold or otherwise realised for cash in the UK (also refer to RDRM31250 Changes to old regime - cash only).
>
> Property consisting of, or deriving from, relevant foreign income from tax years up to and including 2007-08 may have been brought into the UK prior to 6 April 2008, and the transitional provisions deal with these situations.
>
> ***Transition***
>
> The transitional position is that the new rules contained in s809L do not have effect and that property brought to the UK is not treated as a remittance where:

[352] There is no question of a CGT charge if the car is purchased out of RFI, so the words "or capital gain" are irrelevant. But it does not matter.

> - Property, including money, was acquired either directly or indirectly using relevant foreign income RDRM31140 and was brought to, received, or used in the UK before 6 April 2008.
>
> ***Effect***
>
> Relevant foreign income brought to or used in the UK by the individual or any other relevant person before 6 April 2008 is not regarded as remitted under s809L after 6 April 2008 even if it is still in the UK. So in the example of the car above, even though it is still used in the UK by a relevant person on or after 6 April 2008 it will not be treated as a remittance under s809L.
>
> Also, the same money or property can be sent or taken outside the UK and then brought in again. It will not be regarded as a remittance when brought in a second or subsequent time. ...

The Manual goes on to explain why the transitional relief is restricted to RFI:

> Note: This transitional provision applies only to relevant foreign income because the pre 6 April 2008 position for employment income and capital gains was different. These were always chargeable even if remitted in the form of property rather than cash.

It is debatable whether this correctly states the pre-2008 law, but it does not now matter.

Suppose:

(1) T borrowed to purchase an asset and acquired the asset before 6 April 2008.
(2) T receives the asset in the UK after 6 April 2008.
(3) T repays the borrowing out of RFI after 6 April 2008.

Para 86(2) transitional relief does not apply because the purchased asset is not derived from RFI.

18.53.2 *Pre Mar 08 acquisition: Para 86(3) relief*

Para 86(3) sch 7 FA 2008 provides:

> If, before 12 March 2008, property (other than money) consisting of or deriving from an individual's relevant foreign income was acquired by a relevant person[353], treat the relevant foreign income as not remitted to

[353] The restricted definition of "relevant person" in relation to pre-6 April 2008 income does not apply here; see 18.10 (Relevant person: Pre-2008 income/gain).

> the UK on or after 6 April 2008 (if it otherwise would be regarded as so remitted).

I refer to this as **"para 86(3) transitional relief"**.

Para 86(2) transitional relief applies where property (including "money") was *remitted* before 6 April 2008.

Para 86(3) transitional relief where property (excluding "money") was *acquired* before 12 March 2008, regardless of the date of remittance.

The RDR Manual provides:

> **RDRM31470 Property derived from RFI not treated as a remittance (2)** [Jan 2019]
>
> [The Manual repeats the text of RDR Manual 31460 and continues:]
>
> ***Transition***
>
> The transitional position is that the new rules contained in s809L do not have effect and that property brought to the UK will not be treated as a remittance where:
>
> - property (other than money) was acquired either directly or indirectly by a relevant person using relevant foreign income before 12 March 2008 and is brought to or received in the UK after 5 April 2008.
>
> The exclusion of money is important as it ensures that income arising from sources that have ceased is subject to the rule changes.[354] See s809Y ITA 2007 for the definition of money in these circumstances.
>
> ***Effect***
>
> This provision is similar to that described in RDRM31460. However this provision applies only to the purchase of property abroad before 12 March 2008 using relevant foreign income, where that property remained abroad and was not brought to or used in the UK before 6 April 2008.
>
> ***Example 1*** (Heidi)
>
> H bought a car in Germany on 15 October 2007 using her relevant foreign income.
>
> She kept the car at her German apartment until May 2009 when she decided to bring it to the UK to use here. Under the previous rules there would have been no remittance until the car was sold in the UK.

The HMRC analysis is as follows:

> Under the new rules at s809L the car is regarded as derived from the relevant foreign income and so, without this transitional rule, there would be a taxable remittance of that relevant foreign income in May 2009.

[354] Author's footnote: I am unable to understand this sentence.

> ***Example 1A*** (Heidi)
> As for example 1 but this time H decides that she needs a bigger car. In August 2009 she sells her car in Germany and brings the proceeds to the UK.

The HMRC analysis is as follows:

> The proceeds from the sale of the car derive from H's relevant foreign income and would be regarded as a taxable remittance to the UK under the new rules at s809L. But as H's car (the property) was acquired before 12 March 2008 the transitional rule at paragraph 86(3) applies and what would be regarded as remitted is treated as not remitted. The money from the sale of the car that H brings into the UK is not therefore a taxable remittance.
> There will be no foreign chargeable gain on the disposal of the car because her private motor vehicle is not a chargeable asset.[355]

Since para 86(3) relief applies to property "other than money" the definition of "money" is important. Para 86(5) provides: "money" has the same meaning as in s.809Y ITA; see 19.30.2 ("Money").

If para 86(3) is taken literally, it disapplies the remittance basis for all RFI held in non-"money" form before 12 March 2008! For instance, it would apply to RFI invested in shares.

The possibilities are:

(1) "Property (other than money)" should be taken literally, ie any form of property other than "money" (as defined).

(2) "Property (other than money)" should be taken to refer to chattels (as the drafter of the RDR Manual perhaps assumes).

(1) Solution (1) is far reaching, and the reader may wonder whether it represents the actual intention of the drafter. Of course, the FA 2008 was enacted in such a rush that one can safely say that no-one carefully formulated any intention at all on the extent of para 86.

[355] The RDR Manual is less clear-cut on the position if there is a sale of the asset:
"RDRM36230. Cash only [Jan 2019]
Under the transitional rules introduced in FA 2008 ... any asset purchased out of untaxed relevant foreign income which an individual owned on 11 March 2008 remains exempt from a charge under the remittance basis, for so long as that individual owns it, even if that asset is outside the UK and is imported at a later date. Any asset in the UK on 5 April 2008 is also exempt from a charge under the remittance basis for so long as the current owner owns it, even if that asset is later exported and then re-imported."

(2) One might infer from the RDR Manual that HMRC intended para 86(3) to apply to RFI used to purchase chattels; but the Manual was written much later, and there was no clear statement at the time the Act was passed, so that may be an afterthought. It is also inconsistent with the words "other than money". To read the section in that way amounts to legislation and not construction.

It is considered that solution (1) is to be preferred.

18.54 Transitional relief: Pre-2008 loans

Para 90 sch 7 FA 2008 provides a relief which I call "**transitional loan relief**". Para 90(1) provides:

> This paragraph applies if—
>
> (a) before 12 March 2008, money was lent to an individual outside the UK,
>
> (b) the loan was made for the purpose of enabling the individual to acquire an interest in residential property in the UK (and for no other purpose), and
>
> (c) before 6 April 2008—
>
> (i) the money was received in the UK,
>
> (ii) the individual used the money to acquire an interest in residential property in the UK ("the interest"), and
>
> (iii) repayment
>
> [A] of the debt for the money ("the debt"), or
>
> [B] of payments made under a guarantee of that repayment ("the guarantee"),[356]

[356] Para 90(6) sch 7 FA 2008 defines "guarantee":

"In this paragraph 'guarantee' includes an indemnity, and 'guaranteed' is to be read accordingly."

March 2009 Q&As provides:

Q20: We would also welcome confirmation that the provisions in paragraph 90(1)(c)(iii) apply to a non-UK loan drawn down before 12 March 2008 where there are two (or more) guarantees in place for repayment of the debt, of which only one is secured on the UK residential property.

A: We can only reply in general terms to this query. The way in which this provision will apply will be determined in practice by the details of the particular loan or guarantee transactions in question. We would generally treat repayments of a debt secured on the property itself as falling within the provisions of paragraph 90 regardless of what guarantees might also exist. Likewise, any repayments made under such a guarantee will also be covered by the paragraph. However, any repayments made under a guarantee which is not secured on the UK property will

> was secured on the interest.

Para 90(2) provides the relief:

> Relevant foreign income of the individual used outside the UK before 6 April 2028 to pay interest on the debt is treated as not remitted to the UK.

The individual does not have to occupy the relevant property. However transitional loan relief is restricted in important ways:

(1) The relief applies only to RFI; it does not apply if employment income or gains are used to pay the interest.
(2) The relief applies only to loans for residential property; it does not apply even to loans to pay home improvements or SDLT.
(3) The relief applies only to secured loans.
(4) The relief applies only to loans by individuals, not if the borrowing is by a trust or company.

Suppose:

(1) H borrowed before 2008 to purchase property.
(2) W used her RFI to pay interest on the loan.

Transitional loan relief does not apply as W is not the individual to whom the money is lent.

The effect of the relief in some cases will be to impose a severe tax penalty on a foreign domiciliary who wishes to move house. It also makes re-financing almost[357] impossible as the relief ceases to apply.

18.54.1 *Refinancing pre-2008*

Para 90(4) sch 7 FA 2008 provides:

> If—
>
> (a) before 12 March 2008, money was lent to the individual outside the UK ("the subsequent loan"),
> (b) the subsequent loan was made for the purpose of enabling the individual to repay—
>   (i) the loan mentioned in sub-para (1), or
>   (ii) another loan in relation to which sub-paras (2) and (3) apply (by virtue of this sub-paragraph),

not be covered.

[357] It would be possible for the creditor to assign the benefit of the loan, which may allow some scope for refinancing.

and for no other purpose, and

(c) before 6 April 2008—
  (i) the individual used the money to repay the loan referred to in para (b)(i) or (ii), and
  (ii) repayment of the subsequent loan, or of payments made under a guarantee of that repayment, was secured on the interest,

sub-paras (2) and (3) apply in relation to the subsequent loan (and for this purpose references there to the debt or the loan are to be read as references to the subsequent loan).

18.54.2 *What is loan made for*

March 2009 Q&As provides:

> **Q19:** It would be helpful to understand more fully the meaning of the requirement in paragraph 90(1)(b) that the loan was made for the purpose of acquiring an interest in residential property "and for no other purpose" and in particular to what extent any other purpose might cause the whole loan to fall outside paragraph 90.
>
> In a situation where money is lent before 12 March 2008 from a non-UK bank to an individual (resident but not domiciled in the UK) outside the UK under a facility letter for £5 million. £4.5 million of the facility is initially drawn down and the money used by the individual to purchase a residential property in the UK. Assume for these purposes that the loan was secured on a UK residential property.
>
> Subsequently (and before 12 March 2008) a second tranche of £0.5 million was drawn down under the same loan facility, also outside the UK. The money from the second draw down was used to refurbish the residential property purchased by the first draw down.
>
> **A:** The effect of paragraph 90(1) is to provide transitional provisions for loans made for the purpose of acquiring an interest in residential property in the UK. In this scenario, there are effectively two separate loans, even though they were made under a single facility letter: it is the drawdown of the money rather than the facility letter which constitutes the lending of the money. Therefore the first £4.5m drawn-down was money lent to the individual before 12 March and used to purchase a UK residential property and for no other purpose and was secured on that interest. That being the case, the transitional conditions will apply if, and to the extent which, relevant foreign income is used to pay interest on the debt.
>
> However, because the second £0.5m tranche of money was used to refurbish the property rather than to acquire an interest in it, it is does not

> meet the conditions set out paragraph 90(1)(b). Therefore, any relevant foreign income which is used to pay interest on this part of the debt will be treated as a taxable remittance in the UK.[358]

What if a loan meets the conditions in part? It appears that HMRC accept there can be an apportionment. March 2009 Q&As provides:

> **Q21**: We would welcome guidance on the principles for calculating the interest on that part of the debt which can be paid from relevant foreign income of the individual outside the UK without triggering a taxable remittance (under paragraph 90(2)). We suggest a reasonable approach is to calculate the interest element based on the loan capital ratio (ie that part of the loan which meets the paragraph 90 conditions over total capital of the loan facility), and apply that ratio to the total amount of interest due.
> **A**: The approach you suggest is, in broad terms, one which HMRC would consider acceptable, with the obvious caveat that the actual approach in any specific case would depend entirely on the terms of the loans.

18.54.3 *When is loan made*

December 2008 Q&As provides:

> **Q27 Remittance basis - offshore borrowing** If a mortgage was arranged and contracts for the purchase of the relevant property were exchanged in October 2007 but completion was not until March 31 2008 and the mortgage funds were not drawn down until completion, would this be considered to be an existing mortgage as at 12 March 2008?

HMRC refuse to answer the question:

[358] The RDR Manual provides:
RDRM31501 Transitional Provisions: RFI and offshore loans [Jan 2019]
Example 1 (Jennifer)
Before 11 March 2008 J draws down £100,000 from a mortgage loan with a non-UK bank that is secured on a residential property in the UK, with interest payments made out of relevant foreign income. On 10 March 2008 she draws down a further amount of £21,000 from this mortgage (still secured on the UK property) to fund some home repairs.
Although the full £121,000 has been lent before 12 March 2008, only £100,000 relates to the acquisition on the interest in the property, so it is only the interest payments in relation to the £100,000 draw-down of the loan that are not treated as a remittance.

> **A** The conditions for the grandfathering relief to run would only be met if the "lending" took place before 12 March 2008, providing the funds were received in the UK and used to acquire the interest in the property in question before 6 April 2008. The answer depends on the terms and conditions of the mortgage arrangement, which determine the point at which the funds are regarded as "lent".

The answer does not depend on the terms and conditions of the mortgage arrangement. It depends on when the money was lent which the question states was not until completion. Thus transitional loan relief is not available. This is of course extremely unfair: it may be because of the unfairness that HMRC choose not to answer the question. But the same question is asked later in the Q&As, and receives a straight answer:

> **Q** A UK non-domiciled came to the UK in July 2007. He made an offer to purchase a residential property in the UK in November 2007. The deal became unconditional in February 2008 and entry was agreed for 16 March 2008. He has an offshore mortgage and the loan offer was made prior to 12 March but of course not drawn until 16 March. Does para 90 of Schedule 7 of FA 2008 apply?
> **A** The grandfathering provisions for offshore mortgages apply only where the loan was made before 12 March 2008. This means that the money had to be in the hands of the non-domiciled individual (or for example in the Solicitor's client account) before that date.

18.54.4 *Joint accounts*

March 2009 Q&As provides:

> **Q22:** We would welcome confirmation that the remittance protection in paragraph 90 applies where a husband and wife (or civil partners), both of whom are resident but not domiciled in the UK, have a joint non-UK bank account and a joint offshore mortgage. The offshore mortgage meets the conditions set out in paragraph 90 (1).
> If only one spouse (or civil partner) has relevant foreign income and that spouse makes a payment into a joint non-UK bank account using that relevant foreign income and these funds are then used to pay the interest on the offshore mortgage, then it is our understanding that such payment of interest will not constitute a remittance of any of the relevant foreign income by virtue of paragraph 90.
> **A:** We are not able to provide the confirmation you are seeking because whether there is a taxable remittance in this situation will depend on the composition of the joint account and the way in which the mixed fund rules section 809Q apply to it. Therefore we can again only answer in

> general terms.
>
> Provided the payment of relevant foreign income by one spouse or civil partner into the joint account is the only income within that account (in other words, section 809Q is not in point) which is then used to pay the interest on the mortgage which meets the conditions within paragraph 90(1), then that payment would also fall within paragraph 90.

18.54.5 *"Residential property"*

Para 90(5) sch 7 FA 2008 provides:

> In this paragraph "residential property" has the same meaning as in Part 4 of FA 2003 (see section 116 of that Act).

So we turn to s.116 FA 2003 to find the complex definition:

> (1) In this Part "residential property" means—
>
> (a) a building that is used or suitable for use as a dwelling, or is in the process of being constructed or adapted for such use, and
>
> (b) land that is or forms part of the garden or grounds of a building within para (a) (including any building or structure on such land), or
>
> (c) an interest in or right over land that subsists for the benefit of a building within para (a) or of land within para (b);
>
> and "non-residential property" means any property that is not residential property.
>
> This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.
>
> (2) For the purposes of subsection (1) a building used for any of the following purposes is used as a dwelling—
>
> (a) residential accommodation for school pupils;
>
> (b) residential accommodation for students, other than accommodation falling with subsection (3)(b);
>
> (c) residential accommodation for members of the armed forces;
>
> (d) an institution that is the sole or main residence of at least 90% of its residents and does not fall within any of paras (a) to (f) of subsection (3).
>
> (3) For the purposes of subsection (1) a building used for any of the following purposes is not used as a dwelling—
>
> (a) a home or other institution providing residential accommodation for children;
>
> (b) a hall of residence for students in further or higher education;
>
> (c) a home or other institution providing residential accommodation with personal care for persons in need of personal care by reason

of old age, disablement, past or present dependence on alcohol or drugs or past or present mental disorder;

(d) a hospital or hospice;

(e) a prison or similar establishment;

(f) a hotel or inn or similar establishment.

(4) Where a building is used for a purpose specified in subsection (3), no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use.

(5) Where a building that is not in use is suitable for use for at least one of the purposes specified in subsection (2) and at least one of those specified in subsection (3)—

(a) if there is one such use for which it is most suitable, or if the uses for which it is most suitable are all specified in the same sub-paragraph, no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use,

(b) otherwise, the building shall be treated for those purposes as suitable for use as a dwelling.

(6) In this section "building" includes part of a building.

(7) Where six or more separate dwellings are the subject of a single transaction involving the transfer of a major interest in, or the grant of a lease over, them, then, for the purposes of this Part as it applies in relation to that transaction, those dwellings are treated as not being residential property.

(8) The Treasury may by order—

(a) amend subsections (2) and (3) so as to change or clarify the cases where use of a building is, or is not to be, use of a building as a dwelling for the purposes of subsection (1);

(b) amend or repeal subsection (7) and the reference to that subsection in subsection (1).

Any such order may contain such incidental, supplementary, consequential or transitional provision as appears to the Treasury to be necessary or expedient.

18.54.6 *Withdrawal of relief*

Para 90(3) sch 7 FA 2008 provides:

If, at any time on or after 12 March 2008—

(a) any term upon which the loan was made, or any term of the guarantee, is varied or waived,

(b) repayment of the debt, or of payments made under the guarantee, ceases to be secured on the interest,

(c) repayment of any other debt is secured on the interest or is guaranteed by the guarantee, or

> (d) the interest ceases to be owned by the individual,
>
> sub-para (2) does not apply in relation to relevant foreign income used as mentioned there after that time.

I am unable to see the point of conditions (b) and (c).

FAQ Remittances (April 2008) stated that the relief only applies so long as "no further advances are made on or after 12 March". This is not correct, but if any further advances are made care must be taken with the documentation to ensure that there is a new loan (not a variation of an existing one) and the debt is not secured on the individual's interest in the property.

The RDR Manual provides:

> **RDRM31502 Transitional Provisions: RFI and offshore loans - Example 2** [Jan 2019] (Charles)
>
> C is a UK resident remittance basis user and has lived in the UK for several years. He has an existing mortgage that was taken out in 2005 with a non-UK bank that is secured on a house in the UK in which C, his wife and children all live. C pays interest on the loan out of his untaxed relevant foreign income.
>
> The existing mortgage facility includes an open credit facility that allows C to borrow (draw-down) additional funds. On 15 March 2008 C uses the credit facility to borrow a further amount of £100,000 that he intends to use to buy an additional interest in his residential property. The terms and conditions of the original loan facility apply to the further draw-down.
>
> The draw down of additional funds after 12 March 2008 represents a further advance of the mortgage under the original terms, so it is not regarded as 'another debt' secured on the property. It is a 'relevant debt' for the purposes of s809L.
>
> **RDRM31510 Transitional Provisions: Loans in existence before 12 March 2008 - Grandfathering no longer applicable** [Jan 2019]
>
> ...
>
> **Example 1** (Judith)
>
> J is a UK resident, non-domiciled remittance basis user who has an offshore mortgage from an overseas lender that was in place before 12 March 2008 on which she pays interest out of her relevant foreign income.
>
> Under the terms of her loan agreement interest on the loan is at a fixed rate for two years at the end of which J will automatically transfer to the lenders standard variable rate for the remaining ten year period of the loan agreement.

> The ending of the fixed-rate period and the automatic transfer to the variable rate is not regarded as amending or otherwise varying the loan facility, so the 'grandfathering' provision at FA08/para 90 applies to the loan.

In practice in the usual case the move to a floating rate will happen automatically, and the relief will continue to apply.

> **Example 2 (Jane)**
> J is a UK resident, non-domiciled remittance basis user who has an offshore mortgage from an overseas lender that was in place before 12 March 2008 on which she pays interest out of her relevant foreign income.
> Under the terms of her loan agreement the loan is a two-year fixed interest loan. In May 2009, at the end of the two year period, J agrees a new loan with the same bank, for a further period of two years. The new loan has the same terms as her previous loan agreement.
> This is a new loan that is not covered by the grandfathering provisions at FA08/para 90. The new loan is a 'relevant debt'; any payments of interest (or capital) that are made from the Jersey account are a taxable remittance.

18.54.7 *Transitional loan relief: Critique*

No reasons were ever given for the restricted scope of transitional loan relief, so one is left to speculate. If the purpose of the relief is to assist those who have taken out loans on the assumption that the law which existed from 1956 to 2008 would govern the taxation of the interest, and who may now be unable to pay the interest, the restrictions are irrational.

I surmise that the object was specifically to support the residential property market by preventing forced sales by foreign domiciliaries who became unable to repay their mortgages by reason of the new tax charge: If so those who borrowed to buy a house and improve it are particularly unfairly treated. The restriction of relief to RFI is also irrational.[359]

Non-residential property does not qualify for transitional loan relief. Loans to acquire let property had a benevolent treatment under the pre-2008 remittance basis: interest on the loan could be paid out of income without a remittance, but the interest was deductible in computing the profits of the UK property business. Similar points apply to other cases

[359] It was probably based on the erroneous belief that under the pre-2008 rules, employment income or gains used to pay interest were regarded as remitted.

where interest is deductible. Perhaps that was thought to be too generous to justify a transitional relief.

Perhaps the matter was not thought much, if at all, and the only thinking was to provide the smallest possible transitional relief consistent with appeasing the banking lobby or other objectors. Perhaps it was to give the appearance of a transitional relief without much substantial relief. In the absence of any reasons being provided by HMRC, all the above can only be speculation.

18.55 Remittance basis planning

The starting point is not to remit. That must be as old as the remittance basis. Lord Barnett (then Labour Chief Secretary to the Treasury) said:

> I used to advise people not to remit.[360] It was a perfectly legitimate thing to do. It would have been silly to do so. They did not need to do it.[361]

18.55.1 *Avoid mixed fund: Segregation*

In practice individuals may need to bring some funds to the UK. The way to avoid or minimise remittance basis liabilities is to keep funds which are charged at different rates on remittance separate from each other.

The starting point is to segregate clean capital and other funds.[362] Clean capital may consist of:

(1) Funds acquired before arrival in the UK
(2) Gifts[363] and inheritance
(3) Capital distributions from trusts (if not within the many IT and CGT anti-avoidance provisions)
(4) UK income/gains
(5) Foreign income/gains taxed on an arising basis (because no remittance basis claim is made or the individual is deemed domiciled)

[360] In the 1940's and 1950's Barnett was an accountant in private practice.

[361] *Hansard,* Standing Committee A, Finance Bill debate 20 June 1974, col.426. Again HC Deb 22 July 1974 vol 877 cc1114-37: "They avoided tax by not remitting the pension, and that was perfectly proper. There was no need for them to pay the tax and they did not do so." *https://api.parliament.uk/historic-hansard/commons/1974/jul/22/foreign-pensions-or-annuities*

[362] See 18.55.1 (When are funds mixed).

[363] Unless the donor is a remittance basis taxpayer making a gift of income/gains to a relevant person.

If funds are large enough, and there is not enough clean capital alone, it may be worth segregating:

(1) Income taxable on remittance:
 (a) at the top rate
 (b) at the top dividend rate
 (c) at lower rates (because of DT relief)

(2) Chargeable gains taxable on remittance:
 (a) at the full CGT rate
 (b) at lower CGT rates (because of DT relief)

(3) Clean capital

Funds can then be remitted from accounts with a lower or nil rate of tax. Income taxable at the top rate can be used abroad or reinvested. Thus one may need as many as six accounts. The reader may think that a tax system which requires this may benefit from simplification, but HMRC do not agree.[364]

Once an individual has become deemed domiciled (or decides not to claim the remittance basis charge) income is taxed on an arising basis. That may be remitted, and may be paid into a mixed fund (because it comes out of the fund first); but care is still needed not to transfer unremitted income/gains into a clean capital account, under the offshore transfer rules.

HMRC accept this planning. The CG Manual provides:

> **CG25385 Remittance basis: mixed funds: summary** [Nov 2019]
> ... Taxpayers may prefer to create and operate a number of bank accounts so that income and capital from various sources or of various years is always clearly identifiable as such and the mixed fund rules do not apply when transfers are made from those accounts. This is not in principle objectionable...[365]

How does one segregate funds? An easy course is to keep clean capital in a bank account and pay the income into a separate account. The bank

[364] See 20.21 (Mixed funds: Critique).

[365] Another example: HMRC 2018 Cleansing Guidance example 7 provides: "If he wants to safeguard the 3 new accounts and his other 4 cleansed accounts from becoming mixed fund accounts in the future, Hamid will have to ensure that any funds accruing in each account (for example, interest) are paid into a separate account to prevent 'tainting' of the funds."
See *https://www.gov.uk/guidance/cleansing-mixed-funds*

account may be in any currency as currency bank account gains are not taxed.

What if the individual does not want to hold cash for an extended period, and wishes to be able to invest in a wider class of assets? Possible solutions are:

(1) Borrowing charged on investments which are clean capital.
(2) Life insurance policy[366] purchased out of clean capital. The individual may surrender up to 5% of the policy tax free, per annum, and that amount is derived from the clean capital, and can be remitted tax free. The growth in the policy reflects the underlying investments but the gains on those investments do not form a mixed fund. The gain on the ultimate surrender of the policy is taxable, but the proposal may be attractive if it is anticipated that will be when the policyholder is non-resident (and not temporarily non-resident).

18.55.2 *Planning when mixed fund exists*

Suppose T already has a substantial mixed fund holding income and gains. Some planning is still possible. T should begin segregating income from the fund, allowing capital gains to accrue within the fund. Subsequent remittances are regarded as taken from those gains first before the income of earlier years. If the gains are sufficient to exceed the remittances, this will reduce the rate of charge on remittance to CGT rates, as gains of subsequent years are treated as remitted before income of earlier years.

18.56 Reform

HMRC have rejected calls for simplification:

> The Government will not look further at the following:
> *Simplification* Definition of a remittance and the derivation rules
> *Government response* The Government recognises that the definition of a taxable remittance is widely defined but believes any change to narrow the rules would open up opportunities for abuse and an unacceptable risk to the Exchequer.[367]

[366] But not a personal portfolio bond.

19.37.10 Exempt property invested
19.37.11 Interaction with gift to nation relief
19.37.12 Compensation taken offshore/invested

19.1 Remittance reliefs: Introduction

This chapter considers 8 reliefs which allow property to be received in the UK without a taxable remittance:

Relief	**See para**
Investment relief	19.2
Paying remittance basis charge	19.24
Foreign services relief	19.25
Exempt property remittance reliefs:	19.29
(a) public access	19.31
(b) personal use	19.32
(c) the repair rule	19.33
(d) temporary importation	19.34
(e) small remittances	19.35

19.2 Remittance investment relief

The ITA remittance basis in its original 2008 form (more or less) prevented remittance basis taxpayers from investing in the UK, either directly or indirectly through trusts and companies.

The coalition government introduced the relief in 2012. It is slotted in after s.809V ITA, so the 15 sections are numbered ss.809VA - 809VO.[1] The statutory heading is "business investment relief". Although it is usually best to adopt statutory terminology, I prefer for clarity to call it **"remittance investment relief"** (or, in this chapter, where the reference is clear, just "investment relief").[2]

The introduction of protected-trust relief in 2017 reduced the need for the relief, because income/gains arising in a protected trust, or underlying company, can in principle be brought to the UK for investment, without a taxable remittance.[3] The relief is only needed if the funds invested in the UK are (or derive from) foreign income/gains of an individual, which would in principle be taxable if remitted. Common examples are:

(1) Income/gains of the individual directly
(2) Income gains of a company held directly (not in a trust) within s.3 or s.720
(3) Benefits taxable under the s.87 or s.731 remittance basis

The development of the relief can be traced through:

- a consultation paper[4]
- consultation response paper[5] (**"consultation response document"**)

[1] See App. 13.3 (Section numbering system).

[2] I guess the more bland and unhelpful label "business investment relief" was chosen for presentational reasons. "Business investment" is a positive spin: who could object to business investment? But presentation is of course important.

[3] See 92.9 (s.624 protected-trust relief); 92.8 (s.720: Protected-trust relief). Protected-trust relief is better, as it does not have the onerous conditions and traps of remittance investment relief.

[4] HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

[5] HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (2011). *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

- a guidance note[6]

But these are now of mainly historical interest.

Some of the drafting is loosely derived from other reliefs, such as community investment relief[7] and social investment relief[8].

19.3 Relevant event

Section 809VA(1) ITA sets out three conditions for relief. The first is in para (a):

> (1) Subsection (2) [remittance investment relief] applies if–
> (a) a relevant event occurs,

The term "relevant event" is an opaque label, but it is better to follow the statutory usage as anything else is even more confusing.

There are two types of relevant event.

19.3.1 *Relevant event: Investment*

Section 809VA(3) ITA provides:

> A "relevant event" occurs if money or other property–
> (a) is used by a relevant person to make a qualifying investment[9]

The RDR Manual provides:

> **RDRM34330 Qualifying Investments Overview** [Jan 2019]
> ...Sometimes investments are made in qualifying companies via nominees rather than directly by a relevant person. Strictly this would mean the investment failed to qualify for business investment relief as the investment must be made by a relevant person (section 809VA(3)(a) ITA 2007). However HMRC will not reject a claim to business investment relief in cases where a relevant person subscribes for shares in a qualifying company through a nominee provided that relevant person is able to demonstrate they have beneficial ownership of those shares and that all of the other conditions for the relief are met.

It seems to me that HMRC practice is correct as a matter of law, not

[6] HMRC Guidance Note: Changes to the Remittance Basis (2012) *https://www.gov.uk/government/publications/guidance-note-changes-to-the-remittance-basis*

[7] Part 7 CTA 2010; Part 7 ITA.

[8] Part 5B ITA.

[9] See 19.9 ("Qualifying investments").

concession: an investment made by a nominee counts as made by the beneficial owner.[10] But the issue is not likely to arise.

19.3.2 *Remittance for investment purpose*

Section 809VA(3) ITA provides:

> A "relevant event" occurs if money or other property...
> (b) is brought to or received in the UK in order to be used by a relevant person to make a qualifying investment.

Section 809VA(5) ITA imposes a time limit on the period between bringing the money to the UK and making the investment:

> Subsection (2) [remittance investment relief] applies by virtue of subsection (3)(b) to the extent only that the investment is made within the period of 45 days beginning with the day on which the money or other property is brought to or received in the UK.

Section 809VA(6) ITA deals with the situation where some of the money brought to the UK is used to make the investment:

> Where some but not all of the money or other property is used to make the investment within that 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

19.4 Remittance by virtue of relevant event

Section 809VA(1) ITA sets out three conditions for relief. The second is in para (b) but this must be read with para (a) to follow the sense:

> (1) Subsection (2) [remittance investment relief] applies if–
> (a) a relevant event occurs,
> (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event...

19.4.1 *"Income/gains of individual"*

The relief applies to income treated as arising to an individual under s.624, or s.720, or gains treated as accruing under s.3, even though the income or gains actually arise to a non-resident trust or company and are invested (and so remitted) by the trust or the company. This was deliberate.

[10] See 87.7.4 (Tax treatment of bare trust).

HMRC say:

> 2.34 It is common for non-domiciles to hold money in offshore trusts but the tax treatment of remittances currently deters some offshore trusts and companies from investing in the UK. For this reason, it is not proposed to limit the new tax incentive to investments made directly by the individual. There will be no restriction on individuals remitting overseas income or capital gains which are held in investment vehicles or trusts. This will allow non-domiciles to invest in UK businesses using funds held in offshore companies and trusts without attracting a tax charge on the remittance.[11]

Suppose:
(1) an individual receives a benefit chargeable under the s.87 remittance basis or the s.731 remittance basis and
(2) the individual uses the benefit to make a qualifying investment.

Investment relief applies, as the income or gains invested are the income or gains of the individual.

Similarly, investment relief applies if:
(1) an individual receives a benefit chargeable under the s.731 remittance basis and
(2) the person abroad uses matched relevant income to make a qualifying investment.

It is not a requirement that the income used to make the investment is the income of the individual: just that income of the individual would be regarded as remitted by virtue of the relevant event.

However in these cases, consideration must be given as to whether the benefit is a related benefit.

19.4.2 *"By virtue of" relevant event*

The requirements for relief in s.809VA(1)(b) are:
(1) a relevant event
(2) income/gains remitted to the UK and
(3) the remittance is "by virtue of" the relevant event.

[11] HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

Suppose:

(1) T lends to a company or subscribes for shares in a company.

(2) The company uses the funds to purchase a property in the UK.

Step (1) is a relevant event. If it is also a remittance to the UK, the position is straightforward: the relief applies.

Suppose step (1) is not a remittance to the UK (in short, because the company is an offshore company which receives the funds outside the UK). There is a taxable remittance at step (2) when the company brings the funds to the UK.[12] However the company does not make a qualifying investment so step (2) is not a relevant event. But it is considered that the remittance is "by virtue of" the relevant event at step (1), so the relief applies. HMRC agree. The RDR Manual provides:

> **RDRM34330: Qualifying investments - overview** [May 2020]
> It is possible for a qualifying investment to be made in a close company which is itself a relevant person [see RDRM33030]. In such cases, where the company subsequently uses the invested funds in the UK, for example to purchase stock or to pay employees, the foreign income and gains will not be treated as a taxable remittance, provided they are not used in a way which would itself be a potentially chargeable event [see RDRM34390].

Suppose:

(1) T borrows to make a qualifying investment. This is a relevant event but no income/gains are remitted to the UK.

(2) T uses income/gains to repay the loan. This is a remittance of the income/gains.

HMRC accept that the relief applies. CIOT say:

> HMRC have confirmed that using foreign income and/or gains to repay loans where those loans, in turn, funded investments made after 6 April 2012, would in principle qualify for the business investment relief.
> Concerns had been expressed on this point because s809VA(1)(b) gives relief only where (in the absence of the relief) income or chargeable gains would be regarded as remitted by virtue of the investment. Where borrowed monies are used to make the investment, it is not the investment which (in the absence of the relief) triggers the remittance; rather it is the subsequent repayment of that borrowing which triggers the

[12] Assume the company is a relevant person (as a close company would be).

> remittance.
>
> However, HMRC have confirmed that they take a wide view of the meaning of 'by virtue of' in this context and there is nothing in s809VA which requires that the remittance which would otherwise have occurred should take place in the same year as the relevant event to which it relates. It therefore follows that the remittance and claim can be in a year or years after the relevant event.
>
> For non-doms wishing to invest in this way, there is therefore scope – through borrowing – to fund that investment through future offshore income/gains.
>
> Claims should be made in the year(s) that the loan is repaid rather than the year the investment is made and careful records will obviously need to be kept for these purposes.[13]

It would have been better if the statutory expression was "in connection with" the relevant event, not "by virtue of" the relevant event. But a generous construction, together with the flexibility inherent in a causation test, has brought us to the same destination.

Section 809VA(4) ITA confirms that relief is available following an exempt property clawback charge:

> Subsection (1)(b) includes a case where income or gains would be treated under section 809Y[14] as remitted to the UK by virtue of the relevant event.

That seems self-evident, though it will rarely if ever happen in practice.

19.5 Claims

The third condition for the relief is in s.809VA(1)(c) ITA which provides:

> Subsection (2) [remittance investment relief] applies if ...
>
> (c) the individual makes a claim for relief under this section.

Section 809VA(8) ITA provides:

> A claim for relief under this section must be made on or before the first anniversary of the 31 January following the tax year in which the income or gains would, but for subsection (2) [remittance investment relief], be regarded as remitted to the UK by virtue of the relevant event.

The claim is made in the tax return. The sidenote to box 38 SA109

[13] Press release 15 August 2012 [2012] STI 2563.

[14] See 19.36 (Exempt property clawback charge).

(2022/23) reads:

> If you are claiming relief from UK tax for foreign income or gains invested in a qualifying business, enter the total amount invested and the Company Registration Numbers below

The RDR Manual provides:

> **RDRM34380 Claiming Business Investment Relief** [Jan 2019]
> ... It is not necessary for an individual to claim the remittance basis in the year the investment is made...

That is self-evident. But of course the individual must have been a remittance basis taxpayer at some point, in order to hold foreign income/gains taxable on the remittance basis.

19.6 The relief

Assuming the three conditions in s.809VA(1) are satisfied, we can turn to the relief, which is in s.809VA(2) ITA; but to follow that one needs to read subsections (1) and (2) together:

> (1) Subsection (2) [remittance investment relief] applies if–
> (a) a relevant event occurs,
> (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event, and
> (c) the individual makes a claim for relief under this section.
> (2) The income or gains are to be treated as not remitted to the UK.

19.7 Investment relief TAAR

Section 809VA(7) ITA provides:

> Subsection (2) [remittance investment relief] does not apply if the relevant event occurs, or the investment is made, as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts
> ...
> "tax", if neither income tax nor corporation tax is specified, means either of those taxes.

So it does not matter if the purpose of the arrangement is IHT avoidance or CGT avoidance: only IT (or CT) avoidance counts.

The HMRC consultation paper provided:

> 2.53 ... there will be provisions to prevent non-domiciles buying a pre-existing business from themselves by selling it to a new company funded by income remitted from overseas. This would create no new business investment in the UK and would merely transfer legal ownership whilst the individual continues to own the business.[15]

There are no express provisions to this effect, but the arrangement may constitute avoidance and so the relief would be disallowed.

CIOT lobbied for repeal of this TAAR:

> That test is a potential deterrent as nobody can say with certainty what kind of transaction a particular officer of HMRC, or an individual judge, will view as avoidance. ...We would urge removal of section 809VA(7), particularly now that the GAAR has been enacted.[16]

But no-one took any notice of that.

19.8 Investment fails to proceed

A person may bring funds to the UK intending to make an investment which fails to proceed. Then there is no relief under s.809VA(2) ITA as there is no relevant event, but s.809VB ITA provides relief:

> (1) This section applies to any portion of the income or gains to which section 809VA(2) [remittance investment relief] does not apply because the investment was not made within the period mentioned in section 809VA(5) ("the 45-day period").
> (2) That portion is to be treated as not remitted to the UK to the extent that the remaining money or other property is taken offshore within the 45-day period.
> (3) Where some but not all of the remaining money or other property is taken offshore within the 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

[15] HMRC, *Reform of the taxation of non-domiciled individuals: a consultation* (2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

[16] Business Investment Relief: CIOT comments (2013) *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/f01bc071-e903-4a8c-bd7a-a7cdc76fdf6d/160926%20BIR%20-%20earlier%20CIOT%20and%20HMRC%20correspondence.pdf*

> (4) If any remaining money or other property is taken offshore within the 45-day period, nothing in subsection (2) prevents anything subsequently done in relation to it (or anything deriving from it) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is subsequently done.
> (5) A reference to the "remaining" money or other property is to so much of the money or other property brought to or received in the UK as is not used within the 45-day period to make the investment (which may in some cases be all of it).

19.9 "Qualifying investment"

This is a key term used throughout the remittance investment relief provisions; in particular, a relevant event requires a qualifying investment. Section 809Z10 ITA provides:

> In this Chapter ... "qualifying investment" has the meaning given by section 809VC (and references to making a qualifying investment are to be read in accordance with that section)

So we turn to s.809VC.

19.9.1 *"Investment"*

"Investment" has an artificial meaning. Section 809VC(1) ITA provides:

> For the purposes of section 809VA, a person makes an investment if–
> (a) shares[17] in a company are issued to or acquired by the person, or
> (b) the person makes a loan (secured or unsecured) to a company.

This definition applies only for s.809VA, so it needs to be incorporated when the same term is used elsewhere: s.809VD(4) ITA.

Non-corporate investments do not count as "investment" and do not qualify for relief. HMRC say:

> 2.43 The Government is not yet convinced of the case for including partnerships within the relief. It remains concerned that extending the relief in this way could lead to large scale avoidance unless complex anti-avoidance legislation was introduced. The legislation which will take effect from 6 April 2012 will not allow investment in partnerships.
> 2.44 However, in view of the strength of support for extending the relief

[17] Section 809VC(6) ITA provides: "A reference in this section to "shares" includes any securities." This is an artificial definition of shares; it would have been better drafting to refer to securities and define that term to include shares; but it does not matter.

> to investments in partnerships and the increased investment that this might encourage, the Government will consider this issue further to evaluate whether there is any scope for widening the relief to include investment in partnerships in Finance Bill 2013. The Government will not consider extending the relief to sole traders.[18]

Nothing happened, and OTS floated the same idea three years later.[19] HMRC responded:

> HMRC is considering this proposal in more detail, however, it is very likely that the costs associated with this change will rule out taking this proposal further.[20]

Again nothing happened, and the proposal has been dropped.

Section 809VC ITA provides some terminology:

> (2) The company is referred to as "the target company".
> (3) The shares or the person's rights under the loan (or both) forming the subject of the investment are referred to as "the holding"...

Section 809VC ITA deals with the question of when an investment by way of loan is made:

> (7) If a loan agreement authorises a company to draw down amounts of a loan over a period of time—
> (a) entry into the agreement does not count for the purposes of this section as the making of a loan, but
> (b) a separate loan is to be treated as made each time an amount is drawn down under the agreement.
> (8) Accordingly—
> (a) a separate investment is treated as made each time an amount is drawn down under the agreement, and
> (b) the reference in subsection (3) to the person's rights under the loan applies only to so much of the person's rights as relate to the drawdown of that particular amount.

19.9.2 *"Qualifying" investment*

Section 809VC(4) ITA provides:

> The investment counts as a "qualifying investment" if conditions A and B are met when the investment is made.

I refer below to **"investment conditions A and B"**.

19.10 Condition A: Trading co/group

Section 809VD(1) ITA provides:

> Condition A is that the target company is–
> (a) an eligible trading company,
> (b) an eligible stakeholder company,
> (ba) an eligible hybrid company, or
> (c) an eligible holding company.

I refer to these together as "eligible companies".

19.10.1 *Trading/stakeholder/hybrid co*

It is helpful to see the definitions side by side:

s.809VD(2) ITA	**s.809VD(3) ITA**	**s.809VD(3A) ITA**
eligible trading company	*eligible stakeholder company*	*eligible hybrid company*
A company is an "eligible trading company" if–	A company is an "eligible stakeholder company" if–	A company is an "eligible hybrid company" if—
(a) it is a private limited company,	(a) it is a private limited company,	(a) it is a private limited company,
		(b) it is not an eligible trading company or an eligible stakeholder company,
(b) it carries on one or more commercial trades or is preparing to do so within the next 5 years, and	(b) it exists wholly for the purpose of making investments in eligible trading companies (ignoring any minor or incidental purposes), and	(c) it carries on one or more commercial trades or is preparing to do so within the next 5 years,
	(c) it holds one or more such investments or is preparing to do so within the next 5 years.	(d) it holds one or more investments in eligible trading companies or is preparing to do so within

	the next 5 years, and
(c) carrying on commercial trades is all or substantially all of what it does (or of what it is reasonably expected to do once it begins trading).	(e) carrying on commercial trades and making investments in eligible trading companies are all or substantially all of what it does (or of what it is reasonably expected to do once it begins operating).

Section 809VD(4) ITA provides:

> The references in subsections (3) and (3A) to making investments is to be read in accordance with section 809VC.[21]

19.10.2 *Eligible holding company*

Section 809VD ITA provides:

> (5) A company is an "eligible holding company" if—
> (a) it is a member
> [i] of an eligible trading group or
> [ii] of an eligible group that is reasonably expected to become an eligible trading group within the next 5 years,
> (b) an eligible trading company in the group is a 51% subsidiary of it, and
> (c) if the ordinary share capital that it owns in the eligible trading company is owned indirectly,[22] each intermediary in the series is also a member of the group.
> (6) "Group" means a parent company and its 51% subsidiaries.[23]
> (7) "Parent company" means a company that—
> (a) has one or more 51% subsidiaries, but
> (b) is not itself a 51% subsidiary of any company.
> (8) A group is an "eligible group" if the parent company and each of its 51% subsidiaries are private limited companies.
> (9) A group is an "eligible trading group" if—
> (a) it is an eligible group, and

[21] See 19.9.1 ("Investment").

[22] Section 809VD(10) ITA provides: "The reference in subsection (5) to owning ordinary share capital indirectly is to be read in accordance with section 1155 of CTA 2010." See 64.26.2 (Indirect ownership).

[23] See 64.26 ("51/75/90 % subsidiary"); 64.24 (CG Group reliefs).

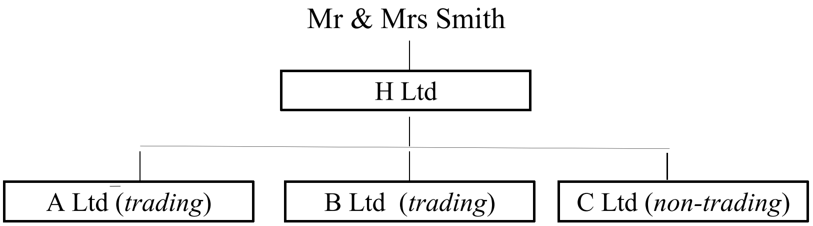
(b) carrying on commercial trades is all or substantially all of what the group does (taking the activities of its members as a whole).

A group may consist of resident and non-resident companies.

The RDR Manual provides:

> **RDRM34355 Eligible Holding Company** [Jan 2019]
> ...All the companies in the group must be private limited companies for the group to be an eligible trading group. The group activities, as a whole, must be the carrying on of commercial trades. It is not necessary for all the members of the group to carry on a trade; the test is that, considering the activities of all the group members together, all or substantially all, of what the group does is carrying on commercial trades.
>
> Whether or not carrying on a commercial trade is all or substantially all of an eligible trading group's activities will depend on a consideration of all the relevant facts. However, where carrying on a commercial trade accounts for at least 80% of an eligible group's total activities, the group will generally be regarded as meeting this requirement ...
>
> *Example 1*
>
> The shares in holding company H Limited are all owned by Mr and Mrs Smith, making it a private limited company. H Limited owns 100% of the share capital in A Limited, B Limited and C Limited. As it is not itself a subsidiary company, and each of its subsidiaries are private limited companies, H Limited is the parent company of an eligible group.

Diagrammatically:



> If the activity of C Limited is negligible, so that substantially all that the group does is carry on a commercial trade, the group will qualify as an eligible trading group. Qualifying investments could be made directly in H Limited (an eligible holding company), A Limited or B Limited (both eligible trading companies); however direct investments in C Limited would not be eligible for relief.
>
> If the activities of C Limited were significant enough to mean that the group was not an eligible trading group. H Limited would not be an eligible holding company. However, investments could still be made

directly in A Limited and B Limited if they were eligible trading companies.[24]

19.10.3 *Substantially trading*

In the following discussion the **"standard definition"** of trading company is the one found in the following contexts:

Context	**Provision**
Hold-over relief	s.165A(3) TCGA
Business asset disposal relief	s.236I(2) TCGA
Substantial shareholding exemption	Para 20(1) Sch 7AC TCGA[25]

It is helpful to consider "eligible trading company" condition (c) together with the standard definition of "trading company". They raise (more or less) the same issues, so guidance on one is relevant on the other:

s.809VD(2) ITA definition	**Standard definition**
A company is an "eligible trading company" if ... (c) carrying on commercial trades is all or substantially all of what it does (or of what it is reasonably expected to do once it begins trading).	"Trading company" means a company carrying on trading activities whose activities do not include to a substantial extent activities other than trading activities.

The RDR Manual provides:

> **RDRM34345 Eligible Trading Company** [Apr 2019]
> ... The phrase 'all or substantially all' used in the definition of an eligible trading company is not defined in the legislation. Whether or not carrying on a commercial trade is all or substantially all of a trading company's activities will depend on a consideration of all the relevant facts. However, where carrying on a commercial trade accounts for at least 80% of a company's total activities, the company will generally be regarded as meeting this requirement.

The CG Manual discusses the standard definition:

[24] The Manual has a second example not printed here as it does not add much to the first.

[25] Para 20 differs from the standard definition by adding a definition of "trading activities" which is not found elsewhere.

CG64090: trading company and holding company of a trading group - the meaning of "substantial" [Oct 2020]

... Most companies and groups will have some activities that are not trading activities. The legislation provides that such companies and groups still count as trading if their activities "… do not include to a substantial extent activities other than trading activities". The phrase "substantial extent" is used in various parts of the TCGA92 to provide some flexibility in interpreting a provision without opening the door to widespread abuse. Substantial in this context means more than 20%.

The question to ask is how should a company's non-trading activities be measured to assess whether they are substantial?

There is no simple formula to this but some, or all, of the following are among the measures or indicators that might be taken into account in reviewing a particular company's status. These indicators, adopted for Business Asset Disposal Relief, are the same as those used for the old taper relief and in the Substantial Shareholding Exemption for corporation tax.

Income from non-trading activities

For example, a company may have a trade but also let an investment property. If the company's receipts from the letting are substantial in comparison to its combined trading and letting receipts then, on this measure in isolation, the company would probably not be a trading company.

The asset base of the company

If the value of a company's non-trading assets is substantial in comparison with its total assets then again, on this measure, this could point towards it not being a trading company. If a company retains an asset it previously used, but no longer uses, for the purposes of its trade, this may not be a trading activity (but see above regarding surplus trading premises). In some cases it might be appropriate to take account of intangible assets (e.g. goodwill) that are not shown on a balance sheet in considering a company's assets. Current market value and amounts given by way of consideration for assets may both be appropriate measures of the relative extents of a company's trading and other activities. Which measure is appropriate will depend on the facts in each case.

Expenses incurred, or time spent, by officers and employees of the company in undertaking its activities

For example, if a substantial proportion of the expenses of a company were to be incurred on non-trading activities then, on this measure, the company would not be a trading company. Or a company may devote a substantial amount of its staff resources, by time or costs incurred, to

> non-trading activities.
>
> **The company's history**
>
> For example, at a particular instant certain receipts may be substantial compared to total receipts but, if looked at on a longer timescale, for instance if a company's trade was seasonal, they may not be substantial compared to other receipts over that longer period. Looked at in this context, therefore, a company might be able to show that it was a trading company over a period, even where that period may have included particular points in time when non-trade receipts amounted to a substantial proportion of total receipts.
>
> **Balance of indicators**
>
> The indicators discussed should not be regarded as individual tests to which a 20% "limit" applies. They are factors, or indicators, that may be useful in establishing whether there is substantial overall non-trading activity. It may be that some indicators point in one direction and others the opposite way. You should weigh up the relevance of each in the context of the individual case and judge the matter "in the round" (see approach of the Special Commissioner in the IHT case of *Farmer v IRC*[26]). If you are unable to agree the status of a particular company for a period then the issue could be established only as a question of fact before the First-tier Tribunal.

Allam v HMRC discussed the definition of trading company in the context of entrepreneur's relief:[27]

> 90 ... in this context substantial should be "taken to mean of material or real importance in the context of the activities of the company as a whole".

That does not take us far. The word "real" rarely does.[28]

> Both parties agreed and we agree that the test is qualitative and quantitative. It is necessary to look at both the nature of the activities and to measure in some way the extent of those activities. Further, the company's activities must be looked at as a whole. It is not appropriate to apply any sort of numerical threshold as suggested by HMRC's guidance.
>
> 93 ... What is substantial in the context of trading and non-trading activities should be given its ordinary and natural meaning. Application

[26] [1999] STC (SCD) 321.

[27] [2021] UKUT 291 (TCC).

[28] See App.7.1 (What do we mean by real).

> of the test involves identifying the trading and non-trading activities and then considering how best to measure the non-trading activities to see whether they are substantial in the context of the company's activities as a whole.

The UT rightly dismissed an argument that holding investments should be ignored as that does not involve much (if any) "activity":

> 96. [The taxpayer's] submissions proceeded on the footing that the activities of a company are confined to the actions of its directors and employees; in other words actual human activities. We do not accept that activities in this context are to be construed so narrowly. We accept that the reference to "activities" in s 165A(3) is in the sense of what the company actually does, but the question of what the company actually does must be looked at in commercial terms. In that sense, trading is an activity, but so too is holding an investment property and receiving rents. That is what the FTT meant when it described the activity of holding property and collecting rent as a "passive activity". There may be little action required on the part of directors and employees in such an activity, but it remains an activity in commercial terms. In ordinary language a company might be described as having a principal activity as a holding company. There may be little if any activity on the part of directors and employees as such, but it remains the company's principal activity, even if it also engages in other commercial activities.

The UT then set out the correct test:

> 98. ...in considering the activities of a company, the test is a holistic one. The test is not confined to physical human activity, but requires an overall consideration of what it is that the relevant company does.
>
> 101. In our view, the question of what amounts to an activity in the context of a company is a straightforward question. It is what the company does in commercial terms. The question of how to measure the extent of an activity may be more difficult and will be informed by the statutory context. In the present case, the context is that of a relief from capital gains tax aimed at trading companies. Trading companies are defined in the first instance as companies carrying on trading activities, with an exclusion by reference to the extent of any non-trading activities. ... the purpose of the relief would be defeated if the limitation did not exclude shares in companies having substantial investment holdings. The holding of investments is an activity for these purposes. As we have said, we consider that the FTT was correct not to focus solely on physical activities. Otherwise, shares in a company with a small trading activity would qualify for relief even where it had a large investment business

> involving very little physical activity. Conversely, shares in the same company would not qualify for relief if it had a large investment business involving considerable physical activity. That result makes no sense to us in the context of a relief aimed at shares in companies carrying out trading activities. The measure of an activity for these purposes must be more than a simple measure of the time and work involved in carrying on the activity.
>
> 102. In the context of a relief from tax in relation to the shares of a trading company we consider that Parliament intended financial measures of activity to be taken into account as well as measures of physical activity.
>
> 103 ... whether an asset is income producing or not is not determinative of the availability of relief. The extent to which assets are income producing is only one factor and the circumstances in which a company comes to hold non-income producing assets would also be relevant.

This is all self-evident, but perhaps it is helpful to see it expressed.

19.10.4 *Private limited company*

The term "private limited company" matters for the definitions of eligible trading/stakeholder/holding company.

Section 809VD(11) ITA provides:

> A company is a "private limited company" if–
> (a) it is a body corporate whose liability is limited,
> (b) it is not a limited liability partnership, and
> (c) none of its shares are listed on a recognised stock exchange.[29]

The drafting is odd - why not simply say "a company whose shares are not listed"? Why must liability be limited? But it does not matter.

The company need not be UK resident. This is deliberate. HMRC say:

> 2.38 The Government wants to ensure that non-domiciles can invest in a range of companies, including those incorporated in other countries, and believes this will broaden the positive economic impact of this incentive. Therefore, it does not propose to restrict tax relief to investment in businesses that are resident in the UK or to businesses carrying out trades wholly or mainly in the UK. Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies....
>
> 2.41 The Government does not propose to introduce any other restrictions

[29] See App 2.18 (Listed/Recognised stock exchange).

> on the type of holding company that can qualify or the degree of ownership the company has over its subsidiary companies. This means that companies that hold shares in other companies and are resident outside the UK would be included. It also means that private equity companies and venture capital companies could qualify even where they do not have a majority ownership stake in the invested companies....
> 2.52 The Government agrees that restricting investment to non-UK resident companies with a UK PE is not necessary and has decided not to include this restriction.[30]

The company may be a foreign entity. This was deliberate. HMRC say:

> 2.45 Investment in a foreign entity will be eligible for relief where it is a private limited company and the other conditions on qualifying activities are met.

19.10.5 *"Trade"*

Section 809VE ITA provides an extended definition of trade, to include property investment:

> (1) Section 809VD is to be read in accordance with this section.
> (2) A reference to a "trade" also includes—
> (a) anything that is treated for corporation tax purposes as if it were a trade, and
> (b) a business carried on for generating income from land (as defined in section 207 of CTA 2009[31]).

HMRC said:

> 2.33 Businesses undertaking furnished holiday lettings (FHLs) will not be qualifying businesses for the purposes of the relief. Although FHLs are treated as a trade for certain purposes, they are not taxed as such and will therefore not meet the qualifying conditions.[32]

This is not carried through in the legislation since FHL is a property business. Presumably there was a change of mind.

[30] Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

[31] See 24.2.4 (Generating income from land).

[32] Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf*

The residence consultation paper explains:

> **UK businesses**
> 2.38 ... Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies ....
> 2.39 While this approach would allow investments to be used for trades outside the UK, non-domiciled investors can already invest in such trades without remitting income or capital gains into the UK. It is therefore likely that in the vast majority of cases, non-domiciles will use the new incentives to invest in UK trades, which they cannot currently do without incurring a tax charge.[33]

19.10.6 *"Commercial" trade*

Section 809VE(3) ITA provides:

> A trade is a "commercial trade" if it is conducted on a commercial basis and with a view to the realisation of profits.

See App 5.1 (Commercial basis/view to profit).

This definition applies only for s.809VD, so it needs to be incorporated when the same term is used elsewhere: s.809VH ITA.

19.10.7 *Research and development*

Section 809VE ITA provides:

> (4) The carrying on of activities of research and development from which it is intended that a commercial trade will be derived, or will benefit, is to be treated as the carrying on of a commercial trade.
> (5) But preparing to carry on activities within subsection (4) is not to be treated as the carrying on of a commercial trade.

19.10.8 *Corporate partner*

Section 809VE(6) ITA provides:

> A company which is a partner in a partnership is not to be regarded as carrying on a trade carried on by the partnership.

What is the reason for this?

[33] HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

19.11 Condition B: No benefit

Section 809VF(1) ITA provides:

> Condition B is that
> [a] no relevant person has (directly or indirectly) obtained or become entitled to obtain any related benefit, and
> [b] no relevant person expects to obtain any such benefit.

Remittance investment relief has two no-benefit rules:

(1) Investment condition B, which (in short) disapplies the relief if there is a benefit or expected benefit at the time of the investment.

(2) The extraction of value rule which (in short) claws back the relief if there is a receipt of value later, even though not expected at the time of the investment.[34]

Investment condition B is severe in that any benefit disallows relief on the entire investment.

The relief is disapplied even if the benefit is received outside the UK, which is illogical in the context of the remittance basis.

19.11.1 *Benefit*

"Benefit" is not usually defined, but that did not deter the drafter. Section 809VF(2)(a) ITA provides:

> A "benefit"–
> (a) includes the provision of anything that would not be provided to the relevant person in the ordinary course of business, or would be provided but on less favourable terms, ...

Section 809VF(2)(b) ITA provides an exclusion:

> A "benefit" ...
> (b) does not include the provision of anything provided to the relevant person in the ordinary course of business and on arm's length terms.

I think all this is otiose and benefit still has its normal (wide) meaning; but it does no harm.

19.11.2 *"Provision"*

"Provision" is never defined, but that did not deter the drafter. Section 809VF(4) ITA provides:

[34] See 19.14 (Extraction of value rule).

> For the purposes of subsection (2)–
>
> (a) a reference to the provision of anything is to the provision of anything in money or money's worth, including property, capital, goods or services of any kind, and
>
> (b) "provision" includes any arrangement that allows a person to enjoy or benefit from the thing in question (whether temporarily or permanently).

This is again otiose, though it does no harm. One hopes this will not enter parliamentary counsel's handbook, and so become standard practice, like the ubiquitous (but unnecessary) definitions of arrangement.

19.11.3 *"Related" benefit*

Section 809VF(3) ITA provides a wide meaning of "related":

> A benefit is "related" if–
>
> (a) it is directly or indirectly attributable to the making of the investment (whether it is obtained before or after the investment is made), or
>
> (b) it is reasonable to assume[35] that the benefit would not be available in the absence of the investment.

The normal way to draft no-benefit rules is to say that the rule applies if the benefit is received by reason of, or as a result of, or in consequence of, the investment. I am unable to see any difference between those words and the phrase used, *attributable to the investment*. Either way, there is a causation test. Perhaps the drafter though that "attributable" was wider.

As usual, the words "directly or indirectly" do not add much, but they show that the drafter did not want the word "attributable" to be narrowly construed.

Para (b) adds nothing, as if a benefit would not be available in the absence of the investment, the benefit must be attributable to the investment. So it is not significant that this provision is not found in the extraction of value rule which also uses the expression "attributable to the investment".

19.11.4 *HMRC examples*

The RDR Manual provides some straightforward examples:

[35] See App 2.24.1 (Reasonable-to-assume wording).

RDRM34360: Qualifying investments - condition B [May 2020]

Example 1 [Joaquin]

J invests £250,000 in a qualifying company obtaining newly issued shares for his investment. J does not become either a director or an employee of the company.

All of the existing company directors have the use of company vehicles but these are unavailable to any other individual or current employee.

The company wish to thank J and so provide him free of charge with a company vehicle.

J's investment has failed Condition B as the benefit, the company vehicle, is related directly to the making of the investment. It would not have been available at all in the absence of J's investment. Therefore J's £250,000 investment will be a taxable remittance unless he takes the appropriate mitigation steps.

The benefit is not taxable on J as he is not an employee or director of the company. ...

Example 2 [Todd]

In March 2012 T is invited to invest some money in a private limited company, Company B. Company B expects to start trading commercially in the three to four months after T agreeing his investment.

T has been a remittance basis taxpayer for a number of years and decided to invest £500,000 of his foreign income and gains. On 6 April 2012 T transfers the money to his UK bank account and on 1 May 2012 (25 days later) he makes his investment in Company B. In return for this investment T is issued with shares in Company B and he becomes a working director of the company, receiving a salary at a market rate. Company B commences trading on 1 June 2012.

The investment was made within 45 days of T bringing his foreign income and gains to the UK and Company B began commercial trading within two years of the investment having been made. Conditions A and B are both satisfied and so T's foreign income and gains qualify to be treated as not remitted to the UK provided T makes a valid claim on his 2012-13 tax return.

T is in receipt of a salary for his work as a director and, because Company B is profitable, he and other shareholders are paid a dividend on 31 July 2013. These payments would reasonably have been expected to be made to any other similar director and shareholder of the company and are taxable in the UK so are not "benefits" for the purpose of Condition B. T's foreign income and gains continue to be treated as not remitted to the UK.

19.12 Clawback remittance charge

Section 809VG(1) ITA provides:

> Subsection (2) applies if–
> (a) income or chargeable gains are treated under section 809VA(2) as not remitted to the UK as a result of a qualifying investment,
> (b) a potentially chargeable event occurs after the investment is made, and
> (c) the appropriate mitigation steps are not taken within the grace period allowed for each step.[36]

If these conditions are satisfied, we move on. Section 809VG(2) ITA provides:

> The affected income or gains are to be treated as having been remitted to the UK immediately after the end of the relevant grace period.

I refer to this as the **"clawback remittance charge"**.

19.12.1 *"Relevant grace period"*

The "grace period" is the deadline for taking the appropriate mitigation steps. As there are various possible grace periods, statute uses the term "relevant" grace period to fix the date on which the clawback remittance charge arises.

Section 809VG ITA provides:

> (3) Where the step required by section 809VI(2)(a) is not taken within the grace period allowed for that step, "the relevant grace period" is the grace period allowed for that step.
> (4) Otherwise, "the relevant grace period" is the grace period allowed for the step required by section 809VI(1) or (2)(b).

19.12.2 *"Affected income or gains"*

"Affected income or gains" matters as these are the income/gains which are treated as remitted under the clawback remittance charge.

Section 809VG ITA provides:

> (5) "The affected income or gains" means such portion of the income or gains mentioned in subsection (1)(a) [income/gains qualifying for Business Investment Relief] as reflects the portion of the investment

[36] See 19.18 (Grace period).

> affected by the potentially chargeable event.
>
> (6) The portion of the investment affected is—
>
> (a) if the potentially chargeable event is a disposal of a part of the holding (or a part of the remaining holding), a portion equal to the portion of the holding (or remaining holding) being disposed of, and
>
> (b) otherwise, the whole of the investment.

19.12.3 *Investment partly offshore*

Section 809VG(8) ITA provides:

> If a qualifying investment is made using the money or other property mentioned in section 809VA(3) together with other funds ...

What is the property "mentioned in s.809VA(3)" is the money or other property invested.[37] So s.809VG(8) applies if an investment is made partly out of UK funds and partly out of offshore funds.

Assuming the opening words of s.809VG(8) are satisfied, two rules follow:

> (a) that investment is to be treated as two separate investments,
>
> [i] one made using the money or other property mentioned in section 809VA(3) and
>
> [ii] one made using the other funds, and
>
> (b) references in the business investment provisions[38] to "the investment" and "the holding" relate only to the investment made using the money or other property mentioned in section 809VA(3).

The RDR Manual provides:

> **RDRM34535 Order Of Disposals: Qualifying And Non Qualifying Investments** [Jan 2019]
>
> If an investment is made with some funds that would qualify for business investment relief and some that would not, it is treated as two separate investments, one containing the qualifying funds and one containing the non qualifying funds. (s809VG(8) ITA2007)

[37] Section 809VA(3) provides:

> A "relevant event" occurs if money or other property—
>
> (a) is used by a relevant person to make a qualifying investment, or
>
> (b) is brought to or received in the UK in order to be used by a relevant person to make a qualifying investment.

[38] Defined s.809Z10 ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

> In Example 1 in RDRM34530[39] if Asif's second investment of £100,000 in June 2013 had been funded half from foreign chargeable gains and half from a UK taxed source, this would be treated as two separate investments of £50,000. One of the investments of £50,000 would derive from the foreign chargeable gains and the other from UK taxed income. In any subsequent disposal where the mitigation step is not taken, the investment containing the foreign chargeable gains would be deemed as disposed of before the investment containing the non taxable funds.

19.12.4 *Series of events*

Section 809VG(9) ITA provides:

> If the potentially chargeable event mentioned in subsection (1)(b) is not the first such event to affect the investment, the income or gains mentioned in subsection (1)(a) do not include, as respects that investment—
>
> (a) any part already treated under subsection (2) as remitted to the UK as a result of an earlier event,
>
> (b) any part contained in amounts already taken offshore or reinvested by way of appropriate mitigation steps following an earlier event, or
>
> (c) any part contained in amounts already used to make a tax deposit without which an amount mentioned in paragraph (b) would not have been enough to satisfy section 809VI(1) or (2)(b) (see section 809VK).[40]

19.13 Potentially chargeable event

There are four types of potentially chargeable event:

Potentially chargeable event	**See**
Ceasing to be an eligible company	19.13.1
Disposal of holding	19.13.2
5-year start-up rule	19.13.3
Extraction of value	19.14

19.13.1 *Ceasing to be eligible co*

Section 809VH(1) ITA provides:

> For the purposes of section 809VG, a "potentially chargeable event"

[39] See 19.20.1 (Multiple claims).

[40] See 19.19.1 (Retention to pay CGT).

> occurs if—
>
> (a) the target company is for the first time neither an eligible trading company nor an eligible stakeholder company nor an eligible hybrid company nor an eligible holding company...

An example would be if the company stops trading or becomes quoted.

The RDR Manual provides:

> **RDRM34410 Ceasing To Be An Eligible Company** [Jan 2019]
> ...It is possible for a target company [see RDRM34340] to change its status, yet remain a qualifying company. For example, as a consequence of a share reorganisation, a company changes from being an eligible trading company, eligible stakeholder company, or a eligible holding company, to being one of the other qualifying types of company (e.g. stops being an eligible trading company and starts being an eligible stakeholder company). The investment will be viewed as having been a qualifying investment throughout therefore there is no potentially chargeable event. (s809VH(1)(a) ITA2007)

19.13.2 *Disposal of holding*

Section 809VH ITA provides:

> (1) For the purposes of section 809VG, a "potentially chargeable event" occurs if ...
>
> (b) the relevant person who made the investment ("P") disposes of all or part of the holding

"Dispose" is not defined and so has its natural meaning, not the CGT meaning.[41]

A person does not dispose of assets on death[42] so death is not a potentially chargeable event.

The RDR Manual provides:

> **RDRM34390 Potentially Chargeable Events Overview** [Jan 2019]
> ... **Share for share exchanges**
> During corporate restructuring, old shares can be disposed of and new shares in the same company, or another company, issued in their place. The disposal of the old shares is a potentially chargeable event. However, provided both the old and new shares are qualifying

[41] This is consistent with the rule that CGT statutory situs rules do not apply for remittance purposes: see 18.14.12 (Situs of property for condition A).

[42] Contrast 67.5 (Death of individual).

> investments, the exchange will be treated as an immediate reinvestment in a target company and no potentially chargeable event will occur provided a valid claim is made on the appropriate tax return for the year of the share exchange. The new shares are derived from the original foreign income and gains in the same way as the original shares.

If consideration for a disposal is paid by installments, it may be difficult to re-invest so as to avoid a clawback charge. Section 809VH(8) ITA deals with this:

> If consideration for a disposal of all or part of the holding is to be paid in instalments, the disposal is to be treated for the purposes of this section as if it were separate disposals, one for each instalment (and each giving rise to a separate potentially chargeable event).

19.13.3 *5-year start-up rule*

Section 809VH ITA provides:

> (1) For the purposes of section 809VE, a "potentially chargeable event" occurs if ...
> (d) the 5-year start-up rule is breached.

Section 809VH ITA provides:

> (5) The 5-year start-up rule is breached if—
> (a) immediately after the end of the period of 5 years beginning with the day on which the investment was made, the target company is non-operational, or
> (b) at any time after the end of that period, the target company becomes non-operational.
> (6) The target company is "non-operational" at any time when—
> (a) it is an eligible trading company but is not trading,
> (b) it is an eligible stakeholder company but—
> (i) it holds no investments in eligible trading companies, or
> (ii) none of the eligible trading companies in which it holds investments is trading,
> (ba) it is an eligible hybrid company but is not trading and—
> (i) it holds no investments in eligible trading companies, or
> (ii) none of the eligible trading companies in which it holds investments is trading, or
> (c) it is an eligible holding company but—
> (i) the group of which it is a member is not an eligible trading group, or
> (ii) none of its 51% subsidiaries in the eligible trading group of

> which it is a member is an eligible trading company that is trading.
>
> (7) In subsection (6), "trading" means carrying on one or more commercial trades (including the carrying on of any activities treated under section 809VE(4) as the carrying on of a commercial trade).

19.13.4 *Insolvency relief*

Section 809VH ITA provides:

> (9) An event listed in subsection (1) does not count as a potentially chargeable event if it is due to an insolvency step taken for genuine commercial reasons (but this does not prevent the extraction of any value in connection with the insolvency step from counting as a potentially chargeable event).
>
> (10) For the purposes of subsection (9), an insolvency step is taken if—
>
> (a) the target company enters into administration or receivership or is wound up or dissolved,
>
> (b) the target company is an eligible stakeholder company or an eligible hybrid company and any eligible trading company in which it holds an investment enters into administration or receivership or is wound up or dissolved,
>
> (c) the target company is an eligible holding company and any eligible trading company in the group that is a 51% subsidiary of it enters into administration or receivership or is wound up or dissolved, or
>
> (d) a similar step is taken in relation to a company mentioned in paragraph (a), (b) or (c) under the law of a country or territory outside the UK.

The RDR Manual provides:

> **RDRM34390 Potentially Chargeable Events Overview** [Jan 2019]
>
> *Example 1* (Junaid)
>
> J made a qualifying investment of £500,000 in Bey Motors Limited. Unfortunately Bey Motors is not successful and the company goes into receivership, ceasing trading on the 11 March 2015. At this point there is no chargeable event even though the company has ceased trading; J need take no mitigation steps.
>
> On 5 December 2015 J, as a creditor, receives £40,000 from the disposal of the company's assets. J will need to take the appropriate mitigation steps to prevent a taxable remittance from occurring.

It might be noted that "insolvency step" is a misnomer: administration, receivership, winding-up and dissolution may all occur with solvent as well as insolvent companies.

Conversely, a company which is in financial difficulty and finds itself unable to discharge its liabilities will often (and ought properly to) cease trading before (sometimes well before) taking formal "insolvency steps" as defined here. Does such a company then cease to be an eligible company at an earlier point? This would, in principle, make insolvency relief irrelevant in many cases. HMRC are likely to be take a pragmatic view in straightforward situations.

19.14 Extraction of value rule

Section 809VH ITA provides:

> (1) For the purposes of section 809VG, a "potentially chargeable event" occurs if ...
> (c) the extraction of value rule is breached

Section 809VH(2) ITA provides:

> The extraction of value rule is breached if–
> (a) value (in money or money's worth) is received by or for the benefit of P or another relevant person,
> (b) the value is received from any person in circumstances that are directly or indirectly attributable to the investment, and
> (c) the value is received other than by virtue of a disposal that is itself a potentially chargeable event.

The normal way to draft para (a) would be to say that the extraction of value rule is breached if P (or a relevant person) receives a *benefit*. Is there a difference between receiving a "benefit" and the novel (and somewhat illiterate[43]) expression, receiving *value*?

Perhaps the words are apt to include making or repaying a loan, or redeeming shares, which may not be a benefit as there is full consideration.

[43] I am not sure it is strictly correct to speak of receiving value. One may receive a benefit, or other thing, which has a value; but one does not receive value as such, the value is an attribute of what one receives. I can receive a valuable asset, but what I receive is the asset, not the value. But perhaps the objection is pedantic. One receives value if one receives benefit or other thing which has a value.
The words "in money or money's worth" are unnecessary but they do no harm.
The expression value received is used elsewhere, but with a defined meaning, so that gives no guidance here.

The word attributable is also used in investment condition B: see 19.11.3 ("Related" benefit).

HMRC give some straightforward examples:

> 2.52 ... the Government proposes to introduce a provision to prevent the value of the investment leaking out to the individual either directly through payments or loans which are not arms-length or through transactions designed to pass value to the individual. For example, it would not be permitted for the company to use the funds invested to guarantee loans made to the individual; nor would it be possible to make payments to a third party which are linked to payments made to the individual.[44]

If value is extracted, all the relief is clawed back unless the entire holding is sold and the entire proceeds reinvested or removed abroad. That is the result even if the value extracted is minimal.[45]

The rule applies even if the value is received outside the UK, which is illogical in the context of the remittance basis.

Section 809VH(3) ITA provides a limited exception where the value is income for tax purposes:

> But the extraction of value rule is not breached merely because a relevant person receives value that–
> (a) is treated for income tax or corporation tax purposes as the receipt of income or would be so treated if that person were liable to such tax, and
> (b) is paid or provided to the person in the ordinary course of business and on arm's length terms.

19.14.1 *VCT/EIS relief*

What is the position if the investment confers EIS tax relief? At first sight, there is a problem. The tax relief is a receipt of value. The benefit is received in circumstances which are attributable to the investment.[46] The exemption for income-taxable benefits does not apply.

[44] HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

[45] See 19.12.2 ("Affected income or gains").

[46] The same conclusion was reached in another context in *Harris v HMRC* [2010] UKFTT 385 (TC).

However the RDR Manual provides:

> **RDRM34385 Interaction of Business Investment Relief with Enterprise Investment Scheme (EIS) and Seed Enterprise Investment Scheme (SEIS)** [Jan 2019]
> If an individual claims business investment relief, there is nothing to prevent that individual from claiming either EIS or SEIS relief on the investment; provided that the qualifying criteria for all the schemes are met. ...

19.15 "Appropriate mitigation steps"

Where there is a potentially chargeable event, there is (in short) still no remittance clawback remittance charge if the appropriate mitigation steps are taken.

Section 809VI ITA provides:

> (1) If the potentially chargeable event is a disposal of all or part of the holding, the appropriate mitigation steps are regarded as taken if the whole of the disposal proceeds have been taken offshore or reinvested.
> (2) For any other case, the appropriate mitigation steps are regarded as taken if—
> (a) P has disposed of the entire holding (or so much of it as P retains when the potentially chargeable event occurs), and
> (b) the whole of the disposal proceeds have been taken offshore or re-invested.

19.16 "Taken offshore" or "re-invested"

19.16.1 *Scope of definition*

Section 809Z9 ITA provides:

> (1) This section applies to a provision of this Chapter that is satisfied if something (for example, disposal proceeds) is taken offshore or used by a relevant person to make a qualifying investment...
> (10) References in this section to something being "invested" are to something being used by a relevant person to make a qualifying investment.
> (11) The provisions to which this section applies include sections 809UA(2)[47] and 809VB(2)[48], but in those cases—

[47] See 19.24.4 (Payment on account).

[48] See 19.8 (Investment fails to proceed).

> (a) disregard references in this section to investment, and
> (b) in the case of section 809VB(2), the assessment date for the purposes of subsection (5) is the date of the relevant event (see section 809VA(3)(b)).

19.16.2 *"Taken offshore"*

Section 809Z9(2) ITA provides:

> Things are to be regarded as "taken offshore" if (and only if) they are taken outside the UK such that, on leaving the UK, they cease to be available—
> (a) to be used or enjoyed in the UK by or for the benefit of a relevant person, or
> (b) to be used or enjoyed in any other way that would count as remitting income or gains to the UK.

19.16.3 *Taking money offshore*

Section 809Z9(3) ITA explains how money is taken offshore:

> If—
> (a) the thing required to be taken offshore or invested is money and
> (b) it is paid temporarily into an account pending satisfaction of the provision,
> the provision is satisfied only if the money actually taken offshore or invested is taken from the same account.

There is no relief if money is transferred from one account to another, or if money is paid into one account and funds from another account are taken offshore. It is difficult to see the reason for the rule.

The RDR Manual provides:

> **RDRM34460 Taking Proceeds Offshore or Investing Them** [Jan 2019]
> *Example 1* (Ammar)
> A disposes of some of his qualifying investment for £50,000. He deposits the £50,000 proceeds into a joint bank account he holds with his wife Layan. The joint account contains UK taxed income of both A and Layan.
> A fortnight later, A transfers £50,000 from the joint account to an account in his sole name in the Isle of Man.
> A is regarded as having taken the proceeds of the sale of his qualifying investment offshore and thus to have taken the appropriate mitigation steps.

> If A had transferred the £50,000 to the Isle of Man from a different UK bank account, he would not have carried out the appropriate mitigation step and would be taxable on the foreign income or gains used to make his original investment.

Taking property (not money) offshore

Section 809Z9 ITA then deals with property other than money:

> (4) If the thing required to be taken offshore or invested is something in money's worth,[49] the provision may be satisfied—
> (a) by taking the thing offshore or investing it, or
> (b) by taking offshore or investing money or other property of the equivalent value.
> (5) "The equivalent value" is the market value[50] of the thing in money's worth, assessed as at the date of the sale or other disposal in relation to which the provision is triggered.

Perhaps the point is that the consideration might be property which cannot be taken offshore.

Section 809Z9(6) ITA then deals with deemed consideration:

> If the consideration for a disposal is deemed under section 809Z8(4),[51] the provision may be satisfied by taking offshore or investing money or other property of a value equal to—
> (a) the amount of the deemed consideration, less
> (b) any agency fees (within the meaning of section 809Z8) that are deducted before the actual consideration is paid or otherwise made available to or for the benefit of a relevant person.

Section 809Z9(7) ITA deals with the interaction with exempt property rules:

> Subsections (4)(b) and (6) do not apply in the case of other property of the equivalent value if the other property is—
> (a) exempt property under section 809X,[52]
> (b) consideration for the disposal of any such exempt property, or

[49] "Something in money's worth" is a clumsy expression meaning property other than money; the drafter is half remembering the technical expression *consideration of money or money's worth*.

[50] Defined s.809Z10 ITA: "In this Chapter ... "market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

[51] See 19.17.3 (Deemed consideration).

[52] See 19.29 (Exempt property).

> (c) consideration for the disposal of all or part of the holding (see section 809VC) relating to a qualifying investment.

Section 809Z9(8) ITA deals with the interaction with the mixed fund rules:

> Money or other property taken offshore or invested in accordance with subsection (4)(b) or (6) is to be treated for the purposes of this Chapter—
> (a) as deriving from the thing required to be taken offshore or invested, and
> (b) as having the same composition of kinds of income and capital as that thing.

19.16.4 *Part taken offshore*

Section 809Z9(9) ITA provides:

> A provision to which this section applies may be satisfied—
> (a) by taking the whole thing offshore or investing the whole thing, or
> (b) by taking one part offshore and investing the other part.

19.16.5 *"Re-invested"*

Section 809VI(7) ITA provides:

> Proceeds are "re-invested" if a relevant person uses them to make another qualifying investment (or the proceeds are themselves a qualifying investment) whether in the same or a different company.

An example is a share for share exchange.

19.16.6 *Gain on disposal of investment*

Section 809VI ITA provides:

> (3) But if the disposal proceeds exceed X, subsections (1) and (2)(b) apply only to so much of the proceeds as is equal to X.
> (4) "X" is—
> (a) the sum originally invested,[53] less
> (b) so much of that sum as has, on previous occasions involving the same investment—

[53] This has a commonsense definition in s.809VI:

> (5) "The sum originally invested" means the amount of the money, or the market value of the other property, used to make the investment.
> (6) Market value is to be assessed for these purposes as at the date of the relevant event (see section 809VA).

(i) been taken into account in determining the affected income or gains under section 809VG(2) [clawback remittance charge],

(ii) been taken offshore or re-invested in order to avoid the application of that section, or

(iii) been used to make a tax deposit without which the amount actually taken offshore or re-invested would not have been enough to satisfy subsection (1) or (2)(b) (see section 809VK).[54]

The RDR Manual provides:

> **RDRM34440 Appropriate Mitigation Steps** [Jan 2019]
> *Example 1* (Luther)
> L has made a qualifying investment of £1 million in Nelka Fashions Limited. The company flourishes, and after several years, L decides to dispose of half of his holding. The disposal proceeds are £1,200,000.
> There have been no prior potentially chargeable events so amount X is £1 million (the amount originally invested). This is less than the disposal proceeds of £1,200,000 so L is only required to take £1 million offshore in order to take the appropriate mitigation steps.
> There is also a capital gain of £700,000 (proceeds £1,200,000 less cost of £500,000) that L will report on his Self Assessment tax return for the year of disposal.
> *Example 2* (Rory)
> R brings £1 million of his foreign income to the UK and invests in an eligible trading company for which he acquires 1,000 newly issued shares.
> Twelve months later R sells 250 shares for £325,000. The acquisition cost of these shares is £250,000 so there is a UK capital gain of £75,000. As amount X is £1 million, R must take the entire £325,000 offshore or reinvest it in a target company if he is to avoid a taxable remittance of the £250,000 used to buy the shares. R accordingly takes £325,000 offshore.
> In the following tax year R sells a further 250 shares for £450,000 which gives rise to a UK capital gain of £200,000. Amount X is now £675,000 - that is the original investment of £1 million less the amount of £325,000 previously taken offshore. R must again take the entire proceeds of £450,000 offshore or reinvest in an eligible company to avoid a taxable remittance of £250,000. R takes £450,000 offshore.

[54] See 19.19.1 (Retention to pay CGT).

Five years later R sells his remaining 500 shares for £2,500,000, making a UK capital gain of £2 million. At this point R has taken offshore £775,000 of his original £1 million qualifying investment, amount X is now £225,000. R must therefore take a further £225,000 offshore or reinvest it if he is to avoid a taxable remittance of £500,000. The remaining £2,275,000 can be retained in the UK.

19.16.7 *Liquidation of target company*

Section 809VI(8) ITA provides:

> In cases where a breach of the extraction of value rule occurs in connection with the winding-up or dissolution of the target company—
> (a) subsection (2)(a) does not apply,
> (b) the reference in subsection (2)(b) to the disposal proceeds is to the value received, and
> (c) references in this section and in succeeding provisions of the business investment provisions[55] to the disposal proceeds are to be read as references to the value received.

19.17 "Disposal proceeds"

Section 809Z8(1) ITA provides:

> (1) In this Chapter, in relation to a sale or other disposal, "the disposal proceeds" means—
> (a) the consideration for the disposal, less
> (b) any agency fees that are deducted before the consideration is paid or otherwise made available to or for the benefit of the person making the disposal ("the transferor") or any other relevant person.

19.17.1 *Agency fees*

Section 809Z8 ITA provides:

> (6) In subsection (1), "agency fees" means fees and other incidental costs of the disposal that are charged to the transferor by any person by or through whom the disposal is effected, but excluding any such fees or costs that—
> (a) are charged to the transferor by another relevant person, or
> (b) are to be passed on to or otherwise applied for the benefit of a

[55] Defined s.809Z10 ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

> relevant person.
>
> (7) The exclusion mentioned in subsection (6) does not apply to the extent that the fees or costs—
>
> (a) relate to a service actually provided by the relevant person to the transferor in connection with effecting the disposal, and
>
> (b) do not exceed the amount that would be charged for that service if it were provided in the ordinary course of business and on arm's length terms.

19.17.2 *Non-cash consideration*

Section 809Z8(3) ITA provides:

> If the consideration is provided in the form of anything other than money, the amount of the consideration is the market value[56] of the thing at the time of the disposal.

19.17.3 *Deemed consideration*

Section 809Z8 ITA[57] provides:

> (4) If the disposal is made other than by way of a bargain made at arm's length, the disposal is deemed to be made for a consideration equal to the market value, immediately before the disposal, of the thing being disposed of.
>
> (5) Without limiting the generality of subsection (4), a disposal made to another relevant person or to a person connected with a relevant person is treated in all cases as made other than by way of a bargain at arm's length.

Usual CGT reliefs such as spouse relief and charity relief do not apply.

19.18 Grace period

There is no clawback remittance charge if "the appropriate mitigation steps" are taken within the "grace period".

Section 809VJ ITA provides:

> (1) The grace period allowed for the step mentioned in section 809VI(2)(a) [disposal of holding] is the period of 90 days beginning—
>
> (a) if the potentially chargeable event is a breach of the extraction of

[56] Defined s.809Z10 ITA: "In this Chapter... "market value" has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act)."

[57] Flagged by s.809Z8(2) ITA.

> value rule, with the day on which the value is received, and
> (b) otherwise, with the day on which a relevant person first became aware or ought reasonably to have become aware of the potentially chargeable event.

In the case of the extraction of value rule, the grace period is fixed as the date of receipt, even though the investor may not know the rule is breached (because the value may be received by another person. The power to extend time may be useful here.

> (2) The grace period allowed for the step mentioned in section 809VI(1) and (2)(b) is the period of 45 days beginning with the day on which the disposal proceeds first became available for use by or for the benefit of P or any other relevant person.

19.18.1 *Breach of startup rule*

Section 809VJ ITA provides:

> (2A) But subsection (2B) applies instead of subsections (1) and (2) where the potentially chargeable event is a breach of the 5-year start-up rule by virtue of section 809VH(5)(b).
> (2B) The grace period allowed for the steps mentioned in section 809VI(2)(a) and (2)(b) is the period of 2 years beginning with the day on which a relevant person first became aware or ought reasonably to have become aware of the potentially chargeable event referred to in subsection (2A).

19.18.2 *Exceptional circumstances*

Section 809VJ(3) ITA provides:

> An officer of HMRC may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in exceptional circumstances.

HMRC give one example of exceptional circumstances:

> 2.24 In some cases, it may be difficult for an investor to know that a company's activities have changed and to dispose of their investment within the 45-day period. The draft legislation therefore contains a provision to allow HMRC to extend this grace period where exceptional circumstances mean it would be unreasonable to expect the individual to dispose of an investment within 45 days.[58]

[58] Consultation Response Document *http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treas*

19.18.3 *Extension of grace period*

Section 809VJ ITA provides:

> (4) An officer of HMRC may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in circumstances specified in regulations made by the Commissioners.
> (5) Regulations under subsection (4) may have effect in relation to investments made before the day on which the regulations are made.
> (6) Nothing in subsection (4) or in regulations made under it limits the power conferred by subsection (3).
> (7) The powers conferred on officers of HMRC by subsections (3) and (4) include power to agree to extend a grace period for a length of time that is indefinite but is capable of becoming definite by means identified in the agreement (such as the satisfaction of conditions).

The regulations are the Business Investment Relief Regulations 2012. It is dispiriting to see the level of micro-detail under a government which claimed to be "determined to cut red tape".[59]

Regulation 2 Business Investment Relief Regulations provides:

> 2. The grace period allowed for an appropriate mitigation step by section 809VJ of the Income Tax Act 2007 may be extended by an officer of HMRC if regulation 3 or 4 applies.
> **Lock-up agreements**
> 3.—(1) This regulation applies if conditions 1 and 2 are met.
> (2) Condition 1 is that—
> (a) the target company has ceased to be a private limited company by virtue of having some or all of its shares listed on a recognised stock exchange; or
> (b) (i) the target company has become a subsidiary of another company ("the new company"); and
> (ii) the new company is a body corporate some or all of whose shares are listed on a recognised stock exchange (or are to be so listed).
> (3) Condition 2 is that P is unable to comply with an appropriate mitigation step without breaching the terms of a lock-up agreement.
> (4) For the purposes of this regulation "lock-up agreement" means a contract—

ury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

[59] *https://webarchive.nationalarchives.gov.uk/ukgwa/20150423095857/http://www.redtapechallenge.cabinetoffice.gov.uk/home/index/*

(a) entered into by P with one or more relevant parties which is directly related to the listing of shares in the target company or, as the case may be, the new company, on a recognised stock exchange; and

(b) that imposes restrictions on the time or manner in which P may—

(i) dispose of some or all of P's holding in the target company; or

(ii) dispose of some or all of any shares in the new company received by P in return for P's holding in the target company.

(5) For the purposes of this regulation "relevant party" means—

(a) the target company;

(b) the new company;

(c) professional advisers retained by the target company or the new company in relation to the listing of the shares of the target company (or, as the case may be, the shares of the new company) on a recognised stock exchange.

Statutory and legal bars

4. This regulation applies if—

(a) P is prevented from taking an appropriate mitigation step by a prohibition imposed by or under any enactment; or

(b) the taking of an appropriate mitigation step by P would breach the terms of an order imposed by any court.

19.19 Effect of mitigation steps

Section 809VL ITA provides:

(1) This section explains the effect for the purposes of this Chapter in cases where section 809VG(2) [clawback remittance charge] does not apply because the appropriate mitigation steps were taken within the grace period allowed for each step.

(2) If disposal proceeds were taken offshore as part of those steps, nothing in section 809VA(2) [remittance investment relief] prevents anything subsequently done in relation to those proceeds (or anything deriving from them) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is subsequently done.

(3) If disposal proceeds were re-invested as part of those steps—

(a) the underlying income or gains continue to be treated under section 809VA(2) as not remitted to the UK, and

(b) the business investment provisions[60] apply to the reinvestment as they apply to the original investment.

(4) In the application of the business investment provisions to the reinvestment—

(a) treat the potentially chargeable event mentioned in section 809VG(1)(b) as the relevant event,

(b) treat the underlying income or gains as the income or gains treated under section 809VA(2) as not remitted to the UK as a result of the re-investment, and

(c) treat the amount used to make the re-investment as the sum originally invested.

(5) If the re-investment is made using more than the minimum amount of disposal proceeds required to satisfy section 809VI(1) or (2)(b)—

(a) that investment is to be treated as two separate investments, one made using the minimum amount of disposal proceeds and one made using the excess, and

(b) references in the business investment provisions to "the investment" and "the holding" relate only to the investment made using the minimum amount of disposal proceeds.

(6) "The underlying income or gains" means the affected income or gains (within the meaning of section 809VG) or, if one part of the disposal proceeds is taken offshore and the other part re-invested, a corresponding proportion of the affected income or gains.

(7) A further claim must be made in accordance with section 809VA in respect of the re-investment and, if no such claim is made on or before the first anniversary of the 31 January following the tax year in which the re-investment was made, section 809VG(2) [clawback remittance charge] applies, as respects the original investment, as if the appropriate mitigation steps had not been taken within the grace period allowed for each step.

(8) Section 809VM makes further provision in cases involving a tax deposit.

19.19.1 *Retention to pay CGT*

Section 809VK ITA provides:

(1) This section applies if—

(a) there is a disposal of all or part of the holding,

[60] Defined s.809Z10 ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

> (b) the disposal counts as a potentially chargeable event or is part of the appropriate mitigation steps taken in consequence of a potentially chargeable event,
> (c) a chargeable gain (but not a loss) accrues to P on the disposal, (d) P is chargeable to capital gains tax (but not corporation tax) in respect of that gain, and
> (e) the actual disposal proceeds are less than Y.
>
> (2) The difference between the actual disposal proceeds and Y is referred to in this section as "the shortfall".
>
> (3) "The actual disposal proceeds" means the disposal proceeds but disregarding section 809Z8(4).[61]
>
> (4) "Y" is the sum of—
> (a) the amount (if any) that would, but for this section, be required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b), and
> (b) the amount found by applying the highest potential CGT rate to the amount (computed in accordance with TCGA 1992) of the chargeable gain accruing to P on the disposal.
>
> (5) The highest potential CGT rate is the highest rate specified in section 1H of TCGA 1992 (regardless of the type of the chargeable gain or, if P is an individual, the rate of income tax at which P's income is chargeable).
>
> (6) If this section applies, the amount that is required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) is reduced by the permitted amount.
>
> (7) "The permitted amount" is so much of the shortfall as is used, within the grace period allowed for taking the disposal proceeds offshore or re-investing them, to make a deposit in respect of which a certificate of tax deposit is issued to P under section 12 of the National Loans Act 1968.
>
> (8) A reduction may not be made under subsection (6) unless—
> (a) when details of the deposit are confirmed to HMRC, the confirmation letter states that this section is intended to apply to the deposit, and
> (b) the amount of the deposit is no greater than the shortfall.

19.19.2 *Tax deposit*

Section 809VM ITA provides:

> (1) This section applies in cases where—
> (a) section 809VG(2) [clawback remittance charge] did not apply

[61] See 19.17.3 (Deemed consideration).

> because the appropriate mitigation steps were taken within the grace period allowed for each step,
>
> (b) the amount required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) had been reduced under section 809VK[62], and
>
> (c) but for that reduction, the amount that was actually taken offshore or re-invested would not have been enough to satisfy section 809VI(1) or (2)(b).
>
> (2) The tax deposit that gave rise to the reduction is referred to in this section as "the tax deposit".
>
> (3) Use of the tax deposit to pay the relevant tax liability[63] does not count as remitting the underlying income or gains to the UK (and, accordingly, section 809VA(2) [remittance investment relief] continues to apply to the income or gains).

19.19.3 *CTD clawback charge*

Section 809VM ITA provides:

> (4) If any of the CTD conditions is breached, the underlying income or gains are to be treated as having been remitted to the UK immediately after the day on which the breach occurs.
>
> (5) "The underlying income or gains" means such portion of the affected income or gains (within the meaning of section 809VG) as is—
>
> (a) represented by the payment, in the case of subsection (3), or
>
> (b) affected by the breach, in the case of subsection (4).

19.19.4 *CTD conditions*

Section 809VM(6) ITA provides:

> The CTD conditions are as follows—
>
> (a) the tax deposit must not be used to pay a tax liability other than the relevant tax liability,
>
> (b) if any of the tax deposit is withdrawn by the depositor, the amount withdrawn must be taken offshore or re-invested within the period of 45 days beginning with the day on which the withdrawal was made, and
>
> (c) any part of the tax deposit that has been neither used to pay a tax

[62] See 19.19.1 (Retention to pay CGT).

[63] Defined s.809VM(8): For the purposes of this section ... (a) "the relevant tax liability" means P's liability to capital gains tax for the tax year in which the disposal took place...

liability nor withdrawn by the due date[64] must be withdrawn by the depositor and taken offshore or reinvested[65] within the period of 45 days beginning with that date.

(7) Where the CTD conditions were not breached because the requisite amount was taken offshore or re-invested within the 45-day period mentioned in subsection (6)(b) or (c)—

(a) section 809VL applies to the amount taken offshore or reinvested as it applies to disposal proceeds, but

(b) read the reference in section 809VL(4)(a) to the potentially chargeable event as a reference to—

(i) the withdrawal,[66] in a case within subsection (6)(b), and

(ii) the due date, in a case within subsection (6)(c).

The RDR Manual provides:

> **RDRM34460 Taking Proceeds Offshore or Investing Them** [Jan 2019]
>
> *Example 2* (Magnus)
>
> M, a UK resident remittance basis taxpayer, loaned £40,000 to a friend's eligible trading company in 2012-13; he makes a valid claim to business investment relief on his Self Assessment tax return.
>
> The £40,000 is made up of £20,000 foreign capital gains and £20,000 foreign income.
>
> The business is successful and in 2014-15 is in a position to repay 50% (£20,000) of the loan back. The £20,000 will retain the ratio of the type of funds originally invested so will comprise £10,000 foreign capital gains and £10,000 foreign income.
>
> As M is looking to upgrade his car, his friend offers him a 6 month old company car which has a market value of £20,000. M takes ownership of the car in repayment of the loan to date.
>
> The car is now treated as deriving from £10,000 foreign capital gains and £10,000 foreign income. M wants to use the car in the UK, so to carry out the appropriate mitigation step he decides to take £20,000 of his UK taxed income offshore instead. Although it is UK taxed income, the £20,000 will now be treated as deriving from the £10,000 foreign capital gains and £10,000 foreign income that M originally invested. If, in the

[64] Defined s.809VM(8): For the purposes of this section ... (b) "the due date" means the date by which the relevant tax liability is required to be paid...

[65] Defined by reference s.809VM(8): For the purposes of this section ... (c) "re-invested" has the meaning given in section 809VI(7)...

[66] Defined s.809VM(8): For the purposes of this section ... (d) references to withdrawal include repayment for whatever reason.

future, these funds are remitted to the UK they will be taxed as M' foreign capital gains and foreign income.

Example 3

In the above example, instead of taking £20,000 of his UK taxed income offshore, M decides to take offshore an antique vase purchased with £25,000 of his UK employment income. The vase has a market value of £30,000 at the time that M takes possession of the car in satisfaction of the part repayment of the loan he made to his friend's company.

M has taken the appropriate mitigation step and no tax under the remittance basis is due on the disposal of his qualifying investment. The vase is now regarded as deriving from M' £10,000 foreign chargeable gains and £10,000 foreign income originally loaned to the company.

If the value of the vase had fallen to £15,000 by the time the loan was repaid, it would not be regarded as fulfilling the mitigation steps. M would have to take additional property offshore to the value of £5,000.

The RDR Manual provides:

RDRM34500 Certificates Of Tax Deposit (CTD) [Jan 2019]

HMRC operates a general Certificate of Tax Deposit scheme. Under the scheme a taxpayer can make tax deposits in advance of tax liabilities becoming due and payable. For information about how to make a tax deposit refer to our website (The Certificate of Tax Deposit Scheme)

An individual, claiming business investment relief, who sells the whole of their investment at a gain, will usually have sufficient proceeds to take the mitigation steps and to pay any Capital Gains Tax on the gain made. That is because, in order to take the appropriate mitigation steps [see RDRM34440], they are only required to take the original invested amount outside the UK and can leave the "gain" element in the UK to pay any resulting tax liability.

However, in the case of a partial disposal where the proceeds received from the sale are less than the amount originally invested, the whole of the disposal proceeds must be taken outside the UK or reinvested in order to take the appropriate mitigation steps. In such a case, there may be no funds available in the UK to pay any resulting Capital Gains Tax liability.

Example 1 (Kylie)

K's initial qualifying investment is £100,000 for which she receives 10,000 shares.

Two years later she sells 5,000 shares for £80,000 giving rise to a capital gain of £30,000 on which she calculates the maximum Capital Gains Tax payable would be £8,400. The proceeds are less than the sum originally invested (£100,000) so the whole of the £80,000 must be taken offshore

> or reinvested in order to take the appropriate mitigation steps. If K does not have sufficient UK funds to pay the Capital Gains Tax liability she could have to remit offshore funds to the UK, which themselves could become taxable as a remittance.
>
> The CTD scheme can be used in situations such as this in order to pay the UK Capital Gains Tax. When taxpayers use some of the proceeds of their disposal to make a tax deposit, which must be made within 45 days of the disposal proceeds being paid [see RDRM34480], the amount of the disposal proceeds that must be taken offshore or reinvested in order to take the appropriate mitigation steps is reduced by the amount of the tax deposit. (s809VK ITA2007)
>
> *Example 2*
>
> Following on from the example above, K makes a tax deposit of £8,400 ten days after receiving the disposal proceeds. The amount that K must take offshore or re-invest in order to carry out the mitigation steps is now £71,600 (£80,000 less £8,400); K has a further 35 days to reinvest this sum or take it offshore.

The RDR Manual provides:

> **RDRM34510 CTD Amount That Can Be Deposited** [Oct 2016]
>
> *Example 1* (Charan)
>
> C pays tax on the remittance basis. In 2012-13 he made a qualifying investment of £1 million in an engineering company and was issued with 20,000 shares. He subsequently makes a claim for the business investment relief on his Self Assessment tax return for the tax year 2012-13, and so does not pay any UK tax on what would otherwise have been a chargeable remittance of £1 million.
>
> In July 2015 C disposes of 10,000 shares for £800,000 making a capital gain of £300,000. To comply with the appropriate mitigation steps C must move the entire £800,000 proceeds offshore or reinvest them in a target company. In this case C can choose to make a tax deposit with HMRC under the CTD scheme and, if he does so, the tax deposit will reduce the amount of the proceeds that must be taken offshore or reinvested.
>
> C calculates the potential maximum Capital Gains Tax liability accruing on the gain from his part disposal as:
>
> £300,000 x 28%* = £84,000
>
> Amount Y is therefore £884,000 (£800,000 plus £84,000). As this is higher than the amount that must be taken offshore to satisfy the mitigation steps, C is able to make a tax deposit of the difference.
>
> If C makes a tax deposit of £84,000, he need only take offshore or reinvest £716,000 (£800,000 less £84,000) to complete the mitigation

steps. C must also confirm, in writing, to HMRC that ITA07/s809VK is intended to apply to the tax deposit.
*Based on Capital Gains Tax rates at May 2012.

Example 2 (Izaak)
I has made a qualifying investment of £1 million. He was issued with 250,000 shares at a cost of £4 per share. He makes a claim for business investment relief on his Self Assessment tax return for the tax year 2012-13, and does not pay any UK tax on what would otherwise have been a remittance of £1 million. I disposes of his holding over several years as illustrated below.

	2012-13	**2013-14**	**2014-15**	**2015-16**
Shares held at start of year	250000	250000	150000	112500
Shares disposed of	-	100000	37500	112500
Disposal proceeds (a)	-	£500,000	£200,000	£700,000
Cost of shares disposed of (b)	-	£400,000	£150,000	£450,000
Chargeable gain: (a)−(b) = (c)	-	£100,000	£50,000	£250,000
Maximum Capital Gains Tax liability (c) × 28% = (d)	-	£28,000	£14,000	£70,000
Amount to be taken offshore or reinvested under mitigation steps (e)		£500,000	£200,000	£30,000
Amount Y - amount to be taken offshore or reinvested plus maximum CGT liability (d) + (e) = (f)		£528,000	£214,000	£370,000
Shortfall - difference between Y and disposal proceeds, unless disposal proceeds are greater than Y (f)−(e) = (g)		£28,000	£14,000	Disposal proceeds greater £0
Amount that I can deposit in CTD within 45 days of disposal		£28,000	£14,000	Not Applicable
Amount I must take offshore or reinvest within 45 days of disposal if he chooses to make the maximum deposit under the CTD scheme (e) - (g) -		£472,000	£186,000	£300,000

There is no requirement for the taxpayer to make a tax deposit if they prefer to meet their capital gains tax liabilities from other funds. If they do not make a tax deposit, the amount to be taken offshore or reinvested is not reduced.

19.20 Pooling investments in co/group

19.20.1 *Multiple claims*

Section 809VN(1) ITA provides:

> Subsection (2) applies if at any time income or chargeable gains of an individual are treated under section 809VA as not remitted to the UK as a result of—
> (a) more than one qualifying investment made in the same target company,
> (b) more than one qualifying investment made in companies in the same eligible trading group, or
> (c) qualifying investments made
> [i] in an eligible trading company and
> [ii] in an eligible stakeholder company or eligible hybrid company that holds investments in that trading company.

Where this condition is met, we turn to s.809VN(2) ITA:

> In the application of section 809VG at that time—
> (a) treat the investments and holdings as if they were a single qualifying investment and a single holding, and
> (b) assume that a disposal of all or part of that deemed single holding affects the deemed single investment in the order in which the qualifying investments were made (that is to say, on a first in, first out basis).

There are two deemings here:

(1) A pooling of the various holdings. If an investor has made multiple investments qualifying for relief in the same company or group, clawback on receipt of a benefit affects all the investments unless they are all taken abroad or reinvested.
(2) Disposals are on a FIFO basis regardless of the asset actually disposed of.

The RDR Manual gives a straightforward example where the facts (stripping out irrelevancies)[67] are as follows:

[67] The example in full (including its irrelevant detail) is as follows:
In tax year 2011-12 A is a UK resident remittance basis taxpayer. He had substantial foreign earnings that year, and in June 2012 he makes an investment of £100,000 of his foreign earnings in K Limited, a private limited trading company. A receives

> **RDRM34530 Order of disposals: Multiple qualifying investments**
> [Jan 2019]
> *Example 1* (Asif and Kadigan Ltd)
> A is a remittance basis taxpayer.
> In June 2012 A makes an investment of £100,000 of his foreign earnings in K Limited. A receives 50,000 newly issued ordinary 'A' shares in the company. A claims remittance investment relief and the £100,000 foreign earnings are treated as not remitted to the UK.
> In June 2013, A makes a further investment of £100,000 that consists of foreign chargeable gains. A receives 40,000 newly issued ordinary 'B' shares. A claims remittance investment relief so the foreign chargeable gains are treated as not remitted to the UK.
> In June 2014, A sells the 40,000 ordinary 'B' shares Limited for £180,000. A does not carry out the appropriate mitigation steps.

The HMRC analysis is as follows:

> There has been more than one qualifying investment by A in K Limited so, for remittance basis purposes, the sale is matched against the 2012/13 investment first, that is A's original purchase of 50,000 ordinary 'A'

50,000 newly issued ordinary 'A' shares in the company in respect of his investment. The conditions applying to the making of his investment under the business investment relief provisions are met and A makes a valid claim on his 2012-13 Self Assessment tax return. The £100,000 foreign earnings are treated as not remitted to the UK.
In June 2013 A makes a further investment of £100,000 that consists entirely of foreign chargeable gains from 2012-13. As the value of K Limited has increased, A receives 40,000 newly issued ordinary 'B' shares for his investment. Once again, A makes a valid claim to business investment relief on his 2013-14 Self Assessment tax return in respect of the £100,000 investment of foreign chargeable gains, which are treated as not remitted to the UK.
In June 2014 A wants to buy a property in the UK and partially finances the purchase by selling the 40,000 ordinary 'B' shares in K Limited for £180,000. As A requires the money in the UK he does not carry out the appropriate mitigation steps and will be taxable on the foreign income or gains used to make the qualifying investment.
There has been more than one qualifying investment by A in K Limited so, for remittance basis purposes, the sale is matched against the June 2012 investment first, that is A's original purchase of 50,000 ordinary 'A' shares. A is taxable on £100,000 of his foreign earnings from 2011-12 and this is regarded as remitted to the UK in 2014-15. A has also made a UK capital gain on the disposal of his ordinary 'B' shares and he reports this on his 2015-16 SA return. The 50,000 'A' shares remaining invested in the company are treated as deriving from £100,000 foreign chargeable gains arising in 2012-13.

shares. A is taxable on £100,000 of his foreign earnings and this is regarded as remitted to the UK in 2014-15.
A has also made a UK capital gain on the disposal of his ordinary 'B' shares.
The 50,000 'A' shares remaining invested in the company are treated as deriving from £100,000 foreign chargeable gains.

19.20.2 *Qualifying & other investments*

Section 809VN(3) ITA provides:

> Subsection (4) applies if at any time—
> (a) income or chargeable gains of an individual are treated under section 809VA as not remitted to the UK as a result of one or more qualifying investments,
> (b) in addition to that investment or those investments, a relevant person holds at least one other investment in
> [i] the same target company,
> [ii] the same eligible trading group or
> [iii] a related eligible company,[68] and
> (c) that other investment is not a qualifying investment.

Where these conditions are met, we turn to s.809VN(4) ITA:

> In the application of section 809VG at that time—
> (a) treat the investments and holdings as if they were a single investment and a single holding, and
> (b) assume that a disposal of all or part of that deemed single holding is a disposal of a holding from a qualifying investment until the holdings from all the qualifying investments have been disposed of.

These are the same two deemings as s.809VN(2) discussed above; though the second of them is slightly differently worded.

The RDR Manual gives an example where the facts (stripping out irrelevancies)[69] are as follows:

[68] Section 809VN (5) provides: "The reference to a "related eligible company"—
(a) in relation to an eligible trading company, is to an eligible stakeholder company or eligible hybrid company that holds investments in that company, and
(b) in relation to an eligible stakeholder company, is to an eligible trading company in which that company holds investments."

[69] The example in full (including its irrelevant detail) is as follows:
E holds 100 shares in a UK trading company he set up in 2004 using £500,000 of his

> **RDRM34535 Business investment relief: Mixed funds** [Oct 2016]
> *Example 1* (Erik)
> E holds 100 shares in a UK trading company set up in 2004 using £500,000 of his UK taxed income. This is not a qualifying investment.
> In June 2012 E invests £500,000 of his foreign income into the company and receives an additional 100 newly issued shares. E claims remittance investment relief and the foreign income is not taxed as a remittance.
> In 2013-14 E sells half of his 200 shares for £750,000.
> E does not carry out the appropriate mitigation steps,

The HMRC analysis is as follows.

> The 200 shares are treated as a single holding and the disposal of 100 of the shares is treated, for remittance basis purposes, as out of qualifying investments first. E is treated as disposing of the investment made in June 2012 first and so will be taxed on £500,000 foreign income on the

UK taxed income. This is not a qualifying investment.
In June 2012 E invests a further £500,000 of his foreign income into the company and receives an additional 100 newly issued shares. As E's investment is a qualifying investment, he makes a claim to business investment relief on his tax return for 2012-13 and the foreign income is not taxed as a remittance.
In 2013-14 E decides to sell half of his 200 shares to help fund the purchase of a property in the UK and receives £750,000 for them.
As E does not carry out the appropriate mitigation steps, the 200 shares are treated as a single holding and the disposal of 100 of the shares is treated, for remittance basis purposes, as out of qualifying investments first. E is treated as disposing of the investment made in June 2012 first and so will be taxed on £500,000 foreign income on the remittance basis. E has also made a capital gain that he declares on his 2013-14 Self Assessment tax return along with the £500,000 foreign income remittance.
Once again, it does not matter whether E or another relevant person makes the investments. All investments are treated as a single holding and disposals will be treated as coming from the qualifying investments first.
If an investment is made with some funds that would qualify for business investment relief and some that would not, it is treated as two separate investments, one containing the qualifying funds and one containing the non qualifying funds. (s809VG(8) ITA2007)
In Example 1 in RDRM34530 if Asif's second investment of £100,000 in June 2013 had been funded half from foreign chargeable gains and half from a UK taxed source, this would be treated as two separate investments of £50,000. One of the investments of £50,000 would derive from the foreign chargeable gains and the other from UK taxed income. In any subsequent disposal where the mitigation step is not taken, the investment containing the foreign chargeable gains would be deemed as disposed of before the investment containing the non taxable funds.

remittance basis.
E has also made a capital gain.

In *Allam v HMRC*:[70]

(1) T lent funds to a company (a qualifying investment).
(2) The company declared a dividend left outstanding as a sum due to T ("the dividend debt")

The question was whether the dividend debt was an investment for the purposes of s.809VN(4) ITA. The FTT held:

> 275. ... There is no definition of "investment" in or for the purpose of s809VN. We therefore agree ... that "investment" in s809VN (and in the other provisions of relating to business investment relief) must be given its ordinary meaning informed by the context in which it is being used...
> 277. The same rationale does not apply to the use of the word "investment" in other parts of the business investment relief rules. For example, there is no reason why the concept of "investment" in those provisions should not encompass any interest in the share or loan capital of a company that a person acquires from a third person. That having been said, in our view, the meaning of "investment" in s809VN (and in other part of the business investment relief rules) must at the very least be informed by s809VC given that the provisions form part of the same code: for example, a (non-qualifying) investment is treated by s809VN(4)(a) as part of the same "holding" as a qualifying investment (for the purposes of s809VC(2)) and the same concepts of "disposal" (in s809VG(1)(b)) should apply to them.
> 278. Against this background, in our view, a normal dividend which is declared (and so becomes due and payable) does not, simply because it is not paid immediately, become an "investment" for the purposes of s809VN. In those circumstances, the dividend is a return on the investment (the shares). It is not a disposal of the investment. In the period before the dividend is actually paid, the obligation to pay the dividend does not (without more) become an "investment" for the purpose of the business investment relief rules so that when it is discharged the payment is treated as a disposal. This interpretation accords with the natural meaning of the words. It also avoids the risk of a dividend on shares becoming both taxable income and, at the same

[70] [2020] UKFTT 216 (TC). The decision had been issued 4 months previously, but the Tribunal subsequently decided they had made a mistake on this point, revoked that decision, and reissued their decision; see at [295].

> time, a potentially chargeable event under the business investment relief rules, which would run contrary to the purpose of those rules, which is to encourage investment in UK trading companies.
>
> 279. By a "normal" dividend in the previous paragraph, we mean a regular dividend paid out of the commercial profits of the company. We can envisage circumstances in which the same conclusion might not be reached – for example, if a dividend is paid out of profits created on a reduction in capital of the company. However, every case will have to be judged on its own facts in the context of all of the circumstances.
>
> 280. In our view, before an outstanding normal dividend can be treated as a further investment, there needs to be some further step which indicates that the shareholder is intending to reinvest the proceeds and put them at the disposal of the company. That may occur in a number of ways, for example, the shareholder and the company may take steps after a dividend has been declared to formalize the debt which is then outstanding between the shareholder and the company by entering into documentation to govern its terms or the shareholder may agree to accept further shares in lieu of the unpaid dividend. We also accept that that, in appropriate circumstances, it may be possible to infer that position has been reached between the company and its shareholders, for example, if a dividend has been left outstanding for a material period of time and/or if interest is charged on the amount due. Whether such an inference can be justified will depend on the circumstances of the case.

So far so good, and this was common ground on the appeal.

The decision is more doubtful when it applies this to the facts of the case:

> 281. If we turn to the facts of this case, in our view, the unpaid dividend declared on 19 December 2012 became an investment before it was paid on 14 March 2013. Steps were taken which indicate that Dr Allam was reinvesting the proceeds (albeit for a relatively short time) and putting them at the disposal of the company. The obligation to pay the dividend was added to the loan account of Dr Allam with the company and taken into account in the balance due to Dr Allam on that account. There was no differentiation made between the dividend and other amounts due to Dr Allam (which were clearly "investments" for these purposes) shown in that account in the respect. Interest was charged on the balance.
>
> 282. The outstanding dividend should therefore be treated as a loan made by Dr Allam and so as part of the same single investment and single holding in Allamhouse as his other qualifying investments (the overseas loans) and any other investments in Allamhouse that he may have had (s809VN(4)(a)).

This was approved by the UT.[71] But there was no loan, as that word is strictly understood.[72]

The tribunal might at least have acknowledged the unfairness which follows from their decision, but arguably that follows necessarily from the strictness of the potentially chargeable event rules.

There is here an important planning point, or trap, not to provide informal short term credit to a company where remittance investment relief has been claimed.

19.20.3 *Investments held by different persons*

Section 809VN(6) ITA provides:

> Subsections (2) and (4) apply whether the investments in question are held by the same relevant person or different ones.

This would apply (for instance) where some investments are made by one close company in which T is a participator, and other investments are made by another.

19.20.4 *Examples*

These rules work in anomolous ways.

Suppose:

(1) An individual ("T") makes an investment (say, a loan) in a company which qualify for remittance investment relief.
(2) T (or a relevant person) purchases other investments (say, shares) in the same company; those purchased shares are not a qualifying investment.
(3) T (or the relevant person) sells the shares.

The two investments are pooled, the sale is treated as a disposal of the loan, so the proceeds must be removed outside the UK.

Suppose:

(1) An individual ("T") makes an investment (say, a loan "the first loan") in a company and does not claim remittance investment relief (eg the loan may have been made before 2012).
(2) T (or a relevant person) lends to the same company ("the second loan") and claims the relief.

[71] [2021] UKUT 291 (TCC).
[72] See App 2.7 (Loan).

Pooling does not apply. Section 809VN(2) does not apply as there is only one claim for relief. Section 809VN(4) does not apply as the first and the second loan are both qualifying investments. (A loan or share subscription may be a qualifying investment even though the investor does not claim the relief.)

19.21 Investment from mixed fund

Section 809VO ITA provides:

> (1) This section applies if—
> (a) but for section 809VA(2) [remittance investment relief], income or gains would have been remitted to the UK by virtue of a relevant event, and
> (b) section 809Q (transfers from mixed funds) would have applied in determining the amount that would have been so remitted.

That is, s.809VO applies if:
(a) Remittance investment relief applies; and
(b) The investment is made out of a mixed fund.

Suppose:

(1) A mixed fund consisted of

capital	£90
income	£10
total	£100

(2) The investment was £10

In the absence of express provision, the onshore transfer mixed fund rule would apply. The investment would represent the £10 income, and the mixed fund would cease to be mixed. That would allow scope for planning. So s.809VO(2) provides:

> The relevant event counts as an offshore transfer for the purposes of section 809R(4).

This applies the offshore mixed fund rule. Thus on the facts of the example above:

(1) The investment is a mixed fund of £9 capital and £1 income.
(2) The offshore fund becomes a mixed fund of £91 capital and £9 income.

Section 809VO ITA provides:

> (3) The holding is to be treated as containing a proportion of each kind

> of income and capital contained in the invested property equal to the fixed proportion.
> (4) "The fixed proportion" is the proportion of that kind of income or capital contained in the invested property by virtue of subsection (2).
> (5) "The invested property" means the money or other property used to make the investment.

19.21.1 *Funds taken offshore*

Section 809VO ITA provides:

> (6) Subsection (7) applies in cases where—
> (a) section 809VG(2) [clawback remittance charge] does not apply because an amount is taken offshore, re-invested or used to make a tax deposit,[73] or
> (b) section 809VM(4) [CTD clawback charge] does not apply because an amount is taken offshore or re-invested.[74]
> (7) The amount taken offshore, re-invested or used to make a tax deposit is treated, immediately after that step, as containing the fixed proportion of each kind of income and capital contained in the holding.
> (8) In cases where section 809VG(2) applies—
> (a) the affected income or gains are so much of the fixed amount of each kind of income or gain mentioned in subsection (1)(a) as reflects the portion of the investment affected by the potentially chargeable event (see section 809VG(6)),
> (b) "the fixed amount" is the amount of that kind of income or gain that the holding is treated as containing by virtue of subsection (3), and
> (c) section 809Q does not apply in determining the affected income or gains.

These rules could still be exploited for tax planning, but the mixed fund TAAR is kept in reserve.[75]

19.22 Clearance

It is possible to seek advance clearance that the relief applies, under CAP1.[76] This is a non-statutory procedure, but a clearance would bind

[73] See 19.12 (Clawback remittance charge).

[74] See 19.19.2 (Tax deposit).

[75] Section 809VO(9) ITA provides: "Section 809R(2) and (3) and section 809S apply for the purposes of this section." See 20.11 (Mixed-fund TAAR).

[76] HMRC, "Non-statutory clearance service guidance".

HMRC, assuming full disclosure.

Annex B CAP1 sets out the points to cover in the application:[77]

Annex B - Business Investment Relief advance assurance checklist

Use this checklist if you want to ask HM Revenue and Customs (HMRC) to give you their view on whether a proposed investment can be treated as a qualifying investment as defined in section 809VC of Income Tax Act (ITA) 2007 ...

It helps us if you follow the order set out in the checklist in your clearance application and use the numbering on any supporting documents.

Send us your request by post to:

Business Investment Relief, HM Revenue and Customs, BX9 1BN

1. Information about the claimant and their request for advance assurance

1.1 The claimant's name, address and customer identification number in full, eg, National Insurance number (NINO) and Self Assessment (SA) Unique Taxpayer Reference (UTR). The claimant is the person whose foreign income and gains will be used to make the investment.

1.2 If you are requesting advance assurance on behalf of the claimant, state the capacity in which you are acting and your authority to do so where HMRC don't already hold this. Provide your contact details for correspondence including your phone number.

1.3 The legislation permits a 'relevant person' to make an investment using the claimant's foreign income or gains. A relevant person is defined in section 809M of ITA 2007. Please provide general information about the 'relevant person' if the 'relevant person' is:

- an individual, tell us the name and address, NINO, UTR and the relationship of the 'relevant person' to the claimant.
- a company, tell us the: registered office, place of tax resident, directors and shareholders (including their names and addresses), any UK tax reference, company registration number and reason for it being a 'relevant person', that is, its relationship to the claimant.

2. Information about the proposed investment(s)

2.1 General information about the company in which the proposed investment is intended to be made: name and registered office address, Company Registration Number, date and place of incorporation and UK tax reference if known

2.2 Details of all trading or other activities which the company, and any subsidiary company(ies), is carrying on or intends to carry on. Please provide detailed information that demonstrates that the company is an eligible trading, stakeholder or holding company ...

2.3 Details of how the investment will be structured.

2.4 Details about any shares to be issued to the claimant or 'relevant person' by the company and/or details of the nature of any loan(s) to be made by the claimant or 'relevant person' to the company.

2.5 Details of any loan or subscription agreement or other side agreement to be entered into by the claimant or 'relevant person'.

[77] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/748413/Annex_B.pdf*

2.6 The anticipated date that the income/gains will be brought to the UK and the date the investment will take place.

2.7 The amount of income/gains to be invested.

2.8 The anticipated SA Return year in which the claimant will claim the relief.

2.9 Copies of all supporting documents including:

- the latest available accounts of the company and of any subsidiary company or investment company, or an explanation of why no accounts are available
- a copy of any prospectus or similar document (such as a business plan or financial projections) issued by the company to potential investors
- an up-to-date copy of the Memorandum and Articles of Association for the company with details of any changes to be made

Please identify any part(s) or passage(s) of the documents that you think are particularly relevant.

2.10 Any other information relevant to the request.

3. Advice requested from HMRC

3.1 The nature of the assurance you are seeking from HMRC – set out your opinion of the tax consequences of the particular investment you want HMRC to consider and how you have arrived at that opinion.

3.2 A clear explanation of any point(s) on which you are uncertain. If you have already received professional advice please explain why you are still unclear and share any advice which you are content to disclose.

3.3 Any legal advice you have already received which you are content to disclose.

4. Claimant's confirmation

Please include with your request confirmations from the claimant (see 4.1 or 4.2 below)

4.1 To the best of their knowledge and belief, no 'relevant person' will (directly or indirectly) obtain or become entitled to obtain any related benefit, and no 'relevant person' expects to obtain any such benefit as a consequence of making the investment.

[For these purposes, a benefit is defined in section 809VF of ITA 2007]

4.2 To the best of their knowledge and belief they have told HMRC about all of the facts relevant to the investment/the advice sought and that these are correct.

5. Tax avoidance schemes

5.1 If there is an avoidance scheme which covers all or part of the transaction please provide details of the arrangement and/or any disclosure made to HMRC with the allocated DOTAS scheme reference number, if applicable.

19.23 Investment relief: Critique

Budget 2011 announced:

> **3.7 Review of non-domicile taxation** ... the rules mean that foreign income and gains are taxed if they are brought to the UK and this is a disincentive to inward investment. The Government will introduce the following reforms:
>
> - remove the tax charge when non-domiciles remit foreign income or capital gains to the UK for the purpose of commercial investment in UK businesses

It is melancholic to compare the aspiration expressed in three lines with the outcome, in 18 dense pages of legislation. The rules are complex, restrictive, and (most seriously, for potential investors) contain many uncertainties, as anyone who tries to apply them will discover.

In the consultation paper, HMRC said:

> 2.48 At the same time the Government recognises that complicated anti-avoidance provisions could deter non-domiciles from using this new incentive and believes that both these risks can be tackled by relatively straightforward provisions....
> The Government recognises that complexity can deter investment. Therefore, to make the investment incentive genuinely appealing to non-domiciles, the Government is clear that it should be free of unnecessary restrictions and be simple to use.[78]

I infer that the minister's intention clashed with the deeply ingrained culture of HMRC, that anti-avoidance is a consideration which trumps every other; and the latter prevailed. In consequence, the legislation has not lived up to the promise.

All else being equal, a remittance basis taxpayer will not wish to rely on this relief to invest in the UK, either directly or indirectly through trusts and companies, as investment elsewhere avoids the burden of the rules discussed in this chapter.

For a simple solution to this problem, see 18.12 (Relevant person rules: Critique).

19.24 Relief on paying remittance charge

19.24.1 *Paying rem. basis charge*

Section 809V(1) ITA provides:

> Subsection (2) applies to income or chargeable gains of an individual if–
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
> (b) the money is brought to the UK by way of one or more direct payments to the Commissioners [HMRC], and

[78] HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

> (c) the payments are made in relation to a tax year to which section 809H [remittance basis claim charge[79]] applies as regards the individual.

Where these conditions are met, s.809V(2) ITA provides the relief:

> The income or chargeable gains are to be treated as not remitted to the UK to the extent that the payments do not exceed the applicable amount (as defined in section 809H).[80]

The RDR Manual provides:

> **RDRM34020. Remittance Basis charge - money paid directly to HMRC** [Jan 2019]
> Money brought into the UK to pay the remittance basis charge (see RDRM32210) is treated as not remitted to the UK if direct payment is made to HMRC (ITA07/s809V). This exemption will only apply if the money is paid:
>
> - in respect of the tax due for the year in which the remittance basis has been claimed, and
> - the remittance basis charge is due for that tax year.
>
> Only remittances that relate to the remittance basis charge are covered by the exemption. Remittances of foreign income or gains to pay any other liability to UK tax, including for example income tax or capital gains tax on remitted amounts, are themselves chargeable to UK tax as remitted income or gains of the tax year in which the tax is paid to HMRC (although see also RDRM35140 - remittances of nominated income). This includes payments to settle enquiry cases by contract settlement except to the extent of any payments of the remittance basis charge included in the contract settlement (but not any interest or penalties on those amounts).
> The remittance basis charge can be paid in one or more amounts. However, the amount that benefits from the exemption provided at s809V is limited to the amount of the charge - that is either £30,000 or £50,000.[81] The amount due can be paid in one lump sum or in several stages, and may form part of the payments on account paid on 31 January or 31 July, or may be paid as a balancing payment. The exemption applies as long as the payment is in relation to the tax year in which the remittance basis charge is due.
> The exemption only applies where the remittance basis charge is paid

[79] See 17.12 (Remittance basis claim charge).

[80] See 17.12.1 (7 & 12-year residence tests).

[81] The text has not been updated for the increase from £50k to £60k in 2015.

> directly from foreign income or gains held outside the UK, the payment must be made direct to HMRC. This can be done either by:
>
> - cheque (drawn on a foreign bank account)
> - electronic transfer of funds.
>
> Taxpayers will need to keep sufficient records to show that payment of the £30,000, or £50,000 remittance basis charge was made directly to HMRC from an overseas account. A copy of a cheque (or cheques) drawn on the foreign bank account, or the relevant bank statement identifying the bank transfer are examples of acceptable evidence.

The Manual gives an example where A remits £40k to pay a £30k remittance basis charge:

> ***Example*** (Alex)
>
> A is a long-term UK resident remittance basis taxpayer. He uses the remittance basis in 2008-09 and plans to use it again in 2009-10. A therefore makes payments on account (see RDRM32390) of £100,000 on 31 January 2009 and on 31 July 2009 in respect of his 2009-10 liability.
>
> In July 2009 he pays £40,000 of that payment on account from his 2008-09 foreign income. Payment is made by cheque drawn on an account at a bank in the Isle of Man that was sent direct to HMRC.
>
> A's tax liability for 2009-10 is £200,000 including the remittance basis charge of £30,000, which has been wholly met from the payments on account that he has made. No further tax is due for this year.
>
> Because £40,000 of the tax that A has paid on account was paid directly to HMRC from an overseas account, £30,000 of the £40,000 income remitted may be treated as not remitted to the UK and is not chargeable to tax, unless A has instructed otherwise. The remaining £10,000 will be taxed as a remittance in the normal way. As it was remitted in July 2009 it will be a taxable remittance for the tax year 2009-10, and should be declared as such.
>
> In this example, all of the £40,000 was remitted in July. However the remittances might be split between the payment on account dates, for example £20,000 remitted on 31 January 2009 and a further £20,000 on 31 July 2009. In such cases, unless the taxpayer specifies otherwise, the £10,000 that is not subject to the exemption and so is a taxable remittance will be treated as having occurred at the later date, as this will usually be in the taxpayer's favour.
>
> Refer to RDRM34030 for example of where the 'remittance basis charge' is repaid to A, or otherwise no longer applies
>
> **Nominated Income or gains**
>
> If taxpayers use nominated income or gains to pay the remittance basis

> charge of either £30,000 or £50,000 it is treated as not remitted to the UK under section 809V. Because none of the individual's nominated income or gains is treated as having been remitted to the UK in that tax year you do not have to apply the 'ordering rules' at ITAs809I and s809J. See RDRM35100 Remittances of nominated income or gains.
> lf the remittance basis charge is repaid by HMRC it is treated as remitted at that point (see RDRM34030) and section 809I will be triggered.

See 20.19.9 (Nominated income used to pay remittance basis charge).

19.24.2 *B pays A's rem. basis charge*

The Manual formerly discussed the somewhat unusual situation where B pays the remittance basis charge due from A:

> ***Example 1*** (Olaf and Giselle)
> O uses the remittance basis in 2008/09 and 2009/10 and 2010/11; but in 2011/12 O chooses not to use the remittance basis.
> In 2011/12 O makes payment of £30,000 direct to HMRC from his foreign income that arose during 2009/10. This payment is to pay the remittance basis charge of his sister G, who is a long term resident of the UK and who has made a claim to the remittance basis in 2011/12.
> The £30,000 remitted by O may be treated as not remitted to the UK under Section 809V ITA 2007 and so is not chargeable to tax provided that the payments made for a particular year do not exceed £30,000.
> The position should be looked at critically if there is evidence of any reciprocity. In the case of doubt or difficulty submit to PTI Advisory Foreign Income and Remittance Basis Team.

This text was removed in January 2014. The Manual formerly provided:

> The £30,000 remittance basis charge may be paid directly from outside the UK to HMRC by a person other than the individual; the most common example will be a payment by an employer on behalf of an employee. In such cases the £30,000 paid to HMRC may form part of the taxpayer's income, for example if paid by his employer the £30,000 will form part of the employee's earnings. To the extent that these are regarded as foreign chargeable earnings this exemption will apply.

This text was removed in June 2016.

19.24.3 *Repayment of rem. basis charge*

Section 809V(3) ITA provides:

> Subsection (2) [relief for payment of remittance basis charge] does not

apply to payments if or to the extent that they are repaid by the Commissioners.

The RDR Manual provides:

> **RDRM34030 repayment by HMRC** [Jan 2019]
> There may be some exceptional circumstances where the £30,000 or the £50,000 remittance basis charge is paid to HMRC but then is later repaid, or is otherwise no longer due.
> Any foreign income or gains remitted to pay the charge and initially covered by the exemption at ITA07/s809V will be regarded as a remittance when the charge is withdrawn and so will be treated as liable to UK tax at that point (ITA07/s809V(2)).
> **Change of claim**
> The £30,000 or £50,000 remittance basis charge is most likely to be withdrawn where an individual, having made a claim for the remittance basis and paid the charge for that year, subsequently decides not to claim the remittance basis for that year and makes an amendment to their Self Assessment return (TMA1970/s9ZA). In such circumstances ITA07/s809H will not apply for that tax year, so the exemption cannot apply either.
> **Change of status**
> The other situation where the £30,000 or £50,000 is likely to be withdrawn or not otherwise due is where it later transpires an individual has claimed the remittance basis for a tax year but was not entitled to do so as they were UK domiciled and ordinarily resident in the UK in that year.
> **Effect**
> If the exemption under section 809V was claimed, the foreign income or gains used to pay the remittance basis charge will not have been subject to tax in the year in which they arose/accrued because the individual used the remittance basis in that year. Due to the exemption the income or gains will also not have been subject to tax when brought into the UK.
> In such situations there are two possibilities:
>
> - the £30,000 or £50,000 payment was made from foreign income or gains from an earlier year in which the individual was entitled to claim the remittance basis and did so. The £30,000 or £50,000 is treated as a taxable remittance and will be taxable in the year in which the remittance to HMRC occurred
> - the £30,000 or £50,000 payment was made from foreign income or gains from the present year or an earlier year in which the individual was not entitled to claim the remittance basis. The income or gains will be taxed on the arising basis for the year in which the foreign

income or gains actually arose. If the return cannot be amended you may need to deal with such assessments under the 'discovery provisions' at TMA70/s29.

Example 1(Alex)

In the example in RDRM34020 above, A's circumstances change and he decides not to claim to be taxed on the remittance basis for 2009-10. His liability for 2009-10 on the arising basis is £195,000.

When A made the payment on account of £40,000 in July 2009 he anticipated that £30,000 of it would be attributed to the remittance basis charge. In the event he did not claim to be taxed on the remittance basis. He does not have to pay the remittance basis charge.

None of the payments on account can therefore be attributed to the remittance basis charge and the £40,000 that A paid from his 2008-09 foreign income (remember that A did use the remittance basis in 2008-09) in July 2009 is a taxable remittance.

Any cases of difficulty should be referred to Specialist PT, Personal Tax International - Advisory, Foreign Income and Remittance Basis Team.

19.24.4 *Payment on account*

The RDR Manual provides:

> **RDRM34030 repayment by HMRC** [Jan 2019]
>
> ... Finance Act 2013 introduced section 809UA ITA 2007 for the years 2012-13 onwards. This legislation allows payments on account made in anticipation of a claim to the remittance basis to continue to be treated as not remitted if no claim to the remittance basis is subsequently made provided an amount equivalent to the foreign income and gains paid directly to HMRC is taken offshore.

Section 809UA ITA provides:

> (1) Subsection (2) applies to income or chargeable gains of an individual if—
>
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
>
> (b) the money is brought to the UK by way of direct payments to the Commissioners on account of income tax,
>
> (c) the tax year ("tax year 2") in respect of which the payments on account are made is a tax year for which section 809H (remittance basis charge for long-term UK resident) does not apply as respects the individual, and
>
> (d) that section applied as respects the individual for the previous

> tax year ("tax year 1").

The wording draws on s.809V.

> (2) The relevant amount of income or chargeable gains is to be treated as not remitted to the UK if money equal to the relevant amount is taken offshore by—
> (a) the 15 March following the end of tax year 2, or
> (b) such later date as the Commissioners may allow on a claim made by the individual.
> (3) A claim under subsection (2)(b)—
> (a) may be made only if the individual has made and delivered a return under section 8 of TMA 1970 for tax year 2 and reasonably expects to receive from the Commissioners a repayment of tax paid in respect of that tax year, and
> (b) may be made no later than the 5 April following the end of tax year 2.
> (4) Money that is taken offshore in accordance with subsection (2) is to be treated as having the same composition of kinds of income and capital as the money used to make the payments on account.
> (5) In this section "the relevant amount" means the lower of the following—
> (a) the amount brought to the UK as mentioned in subsection (1)(b), and
> (b) the applicable amount (as defined in section 809H) for tax year 1 ...

19.25 Foreign services relief

Section 809W(1) ITA provides:

> This section applies to income or chargeable gains if—
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK because conditions A and B in section 809L are met,
> (b) condition A in section 809L [remittance condition A] is met because a service is provided in the UK ("the relevant UK service"), and
> (c) condition B in section 809L [remittance condition B] is met because section 809L(3)(a) or (b)[82] applies to the consideration for the relevant UK service ("the relevant consideration").

[82] In short, the consideration derives from the income/gains; see 18.16 (Condition B: Link to income/gain).

I refer to these conditions as "**services relief conditions A and B**".

Section 809W(2) ITA provides the relief:

> The income or chargeable gains are to be treated as not remitted to the UK if the following conditions are met but this is subject to subsection (5).

I refer to this as "**foreign services relief**".

There is no relief if remittance conditions C or D apply, but in practice that will not often happen.

More importantly, there is no relief if s.809L(3)(c) or (d) apply, which deal with debt remittances. Thus suppose:

(1) T borrows and uses the borrowed money to pay for foreign services provided in the UK: the debt is a relevant debt.
(2) T repays the debt.

There is a taxable remittance under the debt remittance rules even though a direct payment for the services would qualify for foreign services relief and so be exempt. This is anomalous. The reason might be the difficulty of applying services relief condition B to a relevant debt case; if so it is not a good reason as services condition B is itself misconceived.

Unless the service is provided in the UK there is no need for foreign services relief.[83] In the following discussion it is assumed that the service is provided in the UK.

19.26 Services cond^n A: non-UK property

Section 809W(3) ITA provides:

> Condition A is that the relevant UK service relates wholly or mainly to property situated outside the UK.

One needs to identify:

(1) The service
(2) The property (if any) to which the service relates
(3) The situs of that property
(4) If the service relates to foreign property and to other things, whether the property relates "mainly" to the foreign property

Situs is relatively straightforward. Section 809W(6) ITA incorporates the

[83] See 18.15 (Service provided in the UK).

CGT situs rules.[84]

19.26.1 *Relating to non-UK property*

EN Clause 23 Sch 7 Remittance Basis Amendment 354 provides some obvious examples:

> 7. Condition A would cover for example,
> [1] fees paid to a UK bank for managing an individual's overseas investment portfolio.
> [2] ... legal or brokerage fees in respect of offshore assets, such as the legal fees on the sale of a foreign house....

This is considering fees paid by the individual, but the same applies to fees paid by a relevant person, such as a settlor-interested trust:[85]

> 13. Among the sort of payments that Condition A might cover would be fees paid by non-UK resident trustees to UK advisers for advice on
> [1] managing the assets held in the trust or
> [2] non-UK assets the trustees are considering purchasing.
> Accountancy fees for preparing non-UK tax returns would also be covered providing the majority of the accountancy services relates to non UK property.

The RDR Manual provides:

> **RDRM34060 Relevant services provided in the UK - location of overseas property** [Jan 2019]
> In applying these rules it is important to determine exactly what the service relates to, not just to whom it is provided.
> For example, services may be said to be provided for non-resident trustees (a relevant person) RDRM33030 in respect of shares that the trust owns in a non-resident company (that would, if it were UK resident, be a 'close' company').[86] However if the service actually

[84] Section 809W(6) ITA provides: "sections 275 to 275C of TCGA 1992 (location of assets) apply for the purposes of subsection (3) as they apply for the purposes of TCGA 1992." See 103.1 (Asset situs for CGT: Introduction).

[85] After 2017 protected-trust relief is likely to be available, so it is not necessary for trustees to rely on foreign services relief.

[86] The author is confused, here and in the examples which follow, in that whether or not the company is a close company is not relevant; though in the kind of case under consideration the company is likely to be close. (In this section I use the expression "close" company loosely, to include a non-resident close company, ie one which would be close if UK resident.)

> relates to that company's underlying UK assets then the service does not relate to property 'outside the UK'.
>
> On the other hand, if the service is in connection with legal obligations between the trustees and the non-resident company in respect of, say the shares that are held, for example updating the share register in the local territory, then this is a service relating to property (the company/shares) wholly situated outside of the UK.
>
> *Example 1 (Petra)*
>
> P, a remittance basis user, is a participator in a Jersey company that would, if it were in the UK, be a close company. The company is a relevant person RDRM33030.[87] The company owns a portfolio of UK real estate. UK-based advisors produce an investment and tax report in respect of the company's UK activities; the advisors fees are paid overseas using P's foreign income.

The example is factually far-fetched since one would normally expect the company to pay for its own advice, out of its gross rental income, and (so far as the expense is deductible) there would in principle be no taxable remittance.[88] But we must assume (as the example requires) that P did pay for the advice. The HMRC analysis is as follows:

> The relevant UK service is the provision of advice in a tax report which relates to the Jersey company's UK activities. It is the UK activities which are the subject of the advice, not the overseas company so the exemption cannot apply. We look through to what the work relates to.

More analytically, the service relates to property, not activities; but it relates to UK property and so HMRC are correct to conclude that the foreign services relief does not apply.

The moral for tax planning is that P should use foreign advisers (who may subcontract to the UK).

> *Example 1(a)*
>
> The Jersey company in example 1 above also has a French property, which makes up only 10% of its business.
>
> UK-based advisors produce a separate marketing report in respect of this property. The advisors fees are paid overseas using P's foreign income.
>
> The service provided in the UK - in this case the preparation of the report - relates to a non-UK property. So the exemption at ITA07/s809W

[87] The facts that the company is close, and a relevant person, are irrelevant; see above footnote.

[88] See 18.17.1 (What is trading income).

> would apply, assuming the other conditions are also met.

This is straightforward.

> **RDRM34040 Relevant services provided in the UK** [Jan 2019]
> *...Example 6 (Micho)*
> M, a remittance basis user, employs UK-based agents to prepare his US tax return. He uses his foreign income to pay for this service, paying directly into the agent's offshore bank account. This is a service provided in the UK.
> Advice on the completion of a non-UK tax return would generally be within the exemption providing the majority of the advice relates to non-UK property; for example:
> 1. M's major source of income is UK salary and other UK employment benefits, and most of the work relates to this.
> This is service work relating to non-asset related income, eg employment income, so whether UK employment or not there is no property so the exemption at s809W cannot apply.

More analytically, an employment contract is property,[89] and the service relates to it. However a contract of UK employment is likely to be subject to UK law, and so UK situate; so the conclusion that foreign services relief does not apply is correct. The moral, again, is that M should use foreign advisers.

The Manual continues:

> 2. Most of the work undertaken is in respect of his UK sources of income and gains, albeit these are small compared to his world wide income and gains.
> The service relates to investment income/gains from UK sources so it is outside the exemption.

More analytically, the issue is CGT situs, not source, but in practice the two are normally the same.

> 3. Most of the work undertaken is in respect of advice relating to investment income/gains from non-UK sources.
> The service provided relates to investment income/gains from non-UK sources, so it is within the exemption if all other conditions are met.

Perhaps more importantly, fees for UK tax advice, and for preparing UK tax returns, will similarly be exempt if they relate mainly to non-UK assets.

[89] *O'Brien v Benson's Hosiery* 53 TC 254.

In some cases, it would be helpful for invoices to identify expressly the property to which the services charged for relate.

19.26.2 *"Wholly or mainly"*

The RDR Manual provides:

> **RDRM34040. Relevant services provided in the UK** [Jan 2019]
> ... For the purposes of applying the exemption "wholly or mainly" means more than half. Wholly or mainly relates to the service provided, not the property, and is, in general, judged by reference to work done, normally time spent.
> However, if advisers value the measurement of work done using a variety of factors, such as, for example a basis of both time and fee rate (eg use of a team specialising in international property), it is appropriate that this should be reflected in the considerations of "wholly or mainly". Other factors may include the fee and time rate if specialist advice was required, split of assets between UK and foreign situs, and the place of research or administration.[90]

The RDR Manual provides an example:

> **RDRM34040. Relevant services provided in the UK** [Jan 2010]
> ... *Example 2 (Ritika)*
> R, a remittance basis user, engages an investment manager based in the UK to manage her investment portfolio which covers assets both in and outside the UK and which changes throughout the year. ... Whether Condition A is met depends on whether the service provided relates wholly or mainly to property situated outside the UK.
> If the advice relates to assets and investments held by R, and/or her obligations that ensue from these (eg completing valuation/ownership details to comply with requirements in the jurisdiction where the assets are based), and the advice relates to both UK-situs and offshore situs assets, it will depend on the split of the assets.
> For example, if she holds, say, 60% foreign assets, and the advice given relates to all of the assets held in the portfolio, then the 'wholly or mainly' test would be met.
> If the advisers are considering changes in R's portfolio or the acquisition of UK assets and their research is UK-centric, then the 'service' provided in the UK is likely to relate to UK property, regardless of what is eventually acquired.

[90] The same point is made in EN Clause 23 Sch 7 Remittance Basis Amendment 354.

The tax planning moral is that R should instruct the investment managers to invest in non-UK property, but in practice she will want to do that for other reasons anyway; or (better) appoint foreign managers and then R can forget about the requirements of foreign services relief.

19.26.3 *Identifying the service*

It is necessary to identify what is the service before identifying what is the property to which the service relates:

(1) There may be one service relating to UK and non UK property, in which case one applies the "wholly or mainly" test.

(2) There may be separate services, one (or more) relating to UK property, and one (or more) relating to foreign property, in which case the services relating to the foreign property only can qualify for the relief.

Of course either analysis may better suit the taxpayer or HMRC, depending on the outcome of the wholly or mainly test. The VAT distinction between single (though composite) and multiple supplies is applicable here.

The RDR Manual provides:

> **RDRM34040. Relevant services provided in the UK** [Jan 2019]
> ... If
>
> [1] the services (and thus the consideration due for that service) can be clearly and specifically identified as relating either to UK assets or to non-UK assets and
>
> [2] it is possible to separately identify this from the fees structure and invoicing,
>
> the work relating to UK assets will not be regarded as meeting the "wholly or mainly" test at Condition A in section 809W.[91] This does not necessarily require a separate advice letter, report or invoice ("split-invoice") to be issued, as long as the individual is clearly able to identify from the invoice to what his payments relate. ...

If that is right, a remittance basis taxpayer should not use a UK investment manager, say, as the commission on the purchase of UK situate securities would not be exempt, even if the securities as a whole are mainly non UK situate. A UK investment manager should be used only if no UK situate

[91] Author's footnote: It follows that the work relating to the foreign assets does meet the wholly or mainly test (even if the foreign assets are a minority of the whole).

securities are purchased.

Where there are two or more separate supplies, some exempt, some not, it is necessary to identify the consideration given for each supply. The RDR Manual discusses apportionment:

> **RDRM34040. Relevant services provided in the UK** [Jan 2019]
> If there is a split contract for services relating to UK and non-UK assets you should accept the computations if the split bears a reasonable resemblance to the actuality of service provided.
> Any attempt to use artificial or otherwise unrealistic cost structures, for example to increase the costs attributed to non-UK property advice work against UK-property advice work should be strongly resisted. ...

See too 18.15.3 (Identifying the services).

19.27 Services condⁿ B: Pay non-UK bank

Section 809W(4) ITA sets out services relief condition B:

> Condition B is that the whole of the relevant consideration is given by way of one or more payments to one or more bank accounts held outside the UK by or on behalf of the person who provides the relevant UK service.

No relief is available if any part of the fees are paid in any other manner, for instance by way of set-off.

The service provider will generally remit the payment to the UK immediately on receipt. That does not affect the customer's tax position. In particular:

(1) If the service provider is not a relevant person, it does not matter whether it subsequently receives money in the UK.

(2) Even if the service provider is a relevant person, it is considered that the money it receives in the UK is derived from the work done in providing the services, and is not derived (even indirectly) from the customer's income.[92]

(3) Even if that were wrong, s.809W(2) is wide enough to provide exemption in this case.

That is sensible, as the customer will not usually know, and cannot be expected to know, what the service provider does with its own money.

[92] See 18.18.5 (T buys asset from V).

19.27.1 *Services condition B: Critique*

I am unable to see the purpose of services relief condition B. It continues the rule in *Timpson's Executors v Yerbury* applicable under the pre-2008 remittance basis. Perhaps the policy was that something which was a remittance under the pre-2008 rules should in principle continue to be a remittance under the ITA remittance rules. If so the policy was misguided. The opportunity should have been taken to create a new and coherent set of rules. As it is, suppliers of services relating to foreign property will need to open foreign bank accounts and the individual must ensure that they pay all the fees into that account; a pointless and inconvenient bureaucratic requirement, but there it is.

In practice it may be easier to appoint foreign advisers, or other suppliers, so as not to have to bother about the relief.

19.28 Services relief: s.730/s.87 benefit

Section 809W(5) ITA provides:

> Subsection (2) does not apply if the relevant UK service relates (to any extent) to the provision in the UK of—
> (a) a benefit that is treated as deriving from the income by virtue of section 735,[93] or
> (b) a relevant benefit within the meaning of section 87B of TCGA 1992 that is treated as deriving from the chargeable gains by virtue of that section.[94]

I refer to a benefit within (a) or (b) as a **"s.731/s.87 benefit"**.

I do not see what the legislation is aiming at here. The following conditions must all be satisfied:

(1) A service is provided in the UK.
(2) The service relates to non-UK property.
(3) The service relates to the provision *in the UK* of s.731/s.87 benefit.

Points (2) and (3) appear to be contradictory.

Is the following a possible (if unlikely) scenario to which the rule might apply?[95]

(1) P transfers (1) RFI and (2) clean capital to an offshore trust.

[93] See 50.39 (Section 731 remittance basis).
[94] See 61.19 (s.87 remittance basis).
[95] I am grateful to John Barnett for this suggestion.

(2) Later P borrows from a UK bank to buy a UK house. The trustees charge the clean capital to guarantee P's borrowing. The trustees employ UK lawyers to advise on the guarantee.

The analysis might be:

(1) The lawyers' service relates:
  (a) wholly or mainly to property outside the UK (the clean capital)
  (b) to a lesser extent, to a s.731/s.87 benefit to P.

In the absence of s809W(5) the trustees could use the RFI to pay the lawyers. Section 809W(5) might prevent this.

Whether this unusual scenario merits specific legislative counteraction is highly doubtful.

It is suggested that s.809W(5) ITA should be repealed.

19.29 Exempt property

Section 809X(1) ITA provides:

> Exempt property which is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies[96] is to be treated as not remitted to the UK.

I refer to this as **"exempt property remittance relief"**.

There are five categories of exempt property:

Exempt property	**See para**
Public access for works of art	19.31
Clothing/footwear/jewellery/watches for personal use	19.32
Property brought to UK for repair	19.33
Temporary importation (275 days)	19.34
Small remittances (under £1,000)	19.35

I deal with the categories in the statutory order, though temporary importantion is the most important; the others are of specialist or de minimis interest only.

The exemptions do not extend to remittance condition C or D, but those conditions will not often apply.

Suppose:

(1) T borrows to purchase exempt property.
(2) The exempt property is brought/received/used in the UK.

[96] Section 809L(2)(a) applies if "money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person."

Is the debt is a relevant debt? The debt relates to the exempt property, so the question is whether the exempt property "falls within s.809L(2)(a)". It is the old question of how far to carry the deeming.[97] It is considered that since the exempt property is treated as not remitted, it is treated as not falling within s.809L(2)(a), so the debt is not a relevant debt, and repayment out of foreign income or gains is not a taxable remittance. If the property ceases to be exempt, there would be a remittance under s.809R(3).[98]

19.30 Exempt property code: Definitions

Section 809Z6 ITA provides some definitions.

Section 809Z6(1) ITA provides:

> This section applies for the purposes of sections 809X to 809Z5.

These sections cover all the exempt property exemptions.

19.30.1 *"Property"*

Section 809Z6(2) ITA provides:

> "Property" does not include money.

This is an artificial definition of "property" as the word in its natural sense does include money.

In the remittance basis provisions outside s.809X to s.809Z5, the word "property" is used without a definition, and does include money.[99] This breaches the somewhat elementary principle of good drafting, not to use the same word with different meanings. The consequence is to cause confusion and make discussion more difficult, as care is needed in choice of terminology. In this chapter:

– the word *property* (by itself) does include money;
– where I want to refer to "property" in the artificial s.809Z6(2) sense, which applies for exempt property purposes, I use the expression *property (excluding "money").*

19.30.2 *"Money"*

Section 809Z6(3) ITA provides an inclusive definition of money:

[97] See App 8.2 (Deeming provisions: Construction).
[98] See 20.7 (Income/gains used to pay debt).
[99] See 18.13.1 ("Property" and "money").

> In subsection (2) "money" includes—
> (a) a traveller's cheque,
> (b) a promissory note,
> (c) a bill of exchange, and
> (d) any other—
> (i) instrument that is evidence of a debt, or
> (ii) voucher, stamp or similar token or document which is capable of being exchanged for money, goods or services.

Why does the drafting identify these four types of money? It is not following any statutory precedent definition of money.[100] The answer is that it is adopting the concept of money used in the pre-2008 remittance basis. The pre-2008 rule that there was only a taxable remittance if the asset remitted was "money". There was some case law discussing this. In *Scottish Widows Fund Life Assurance Society v Farmer*:[101]

> Now, actual receipt of money, it seems to me, can only be effected in one of two ways. Either the money itself must be brought over in specie, or the money must be sent in the form which, according to the ordinary usages of commerce, is one of the known forms of remittance.

What is a "commercially recognised form of money"? In *Thomson v Moyse*:[102]

> Nor is it necessary that Mr Moyse ... should receive the sums in coins or dollar notes or treasury notes. It is sufficient if he ... receives the sums in England in any of the other forms of money recognized by commercial men, such as bills of exchange, cheques, promissory notes or cash at bank.

The former Inspectors Manual echoed the point:

> ***IM1564 meaning of 'sums received in the UK'*** *[Dec 06]*
> *The receipt may be in any commercially recognised form of money, for*

[100] For completeness: the nearest precedents I can find are:
(1) sch 9 POCA 2002: "cash" defined to include travellers' cheques
(2) s.1102 CTA 2010: "securities" includes a promissory note or other instrument evidencing indebtedness...

[101] 5 TC 502 at p.508, following *Gresham Life v Bishop* 4 TC 464 at p.476. But the question is to some extent a question of fact, not law. Commercial practices change over time. See *Chitty on Contracts* (34th ed., 2021), 24-054 (Mode of payment); and see the 6th edition of this work (2017/18) para 9.26 (UK receipt must be money or commercial equivalent).

[102] 39 TC 291 at p.340.

> *example, cash, notes, cheques, promissory notes, bills of exchange, or financial credit.*

This is the origin of the categories set out in the statutory definition of money.

If that is right, then the definition might only for the avoidance of doubt, as the items specifically mentioned could all be "money" in the general sense; but money has a range of meanings[103] and a definition adds clarity.

"Instrument that is evidence of a debt" should be construed *ejusdem generis* with traveller's cheques, promissory notes, and bills of exchange. These may all be regarded as commercially equivalent to money.

The statutory definition is expressed to apply only for the purposes of s.809Z6(2), through which it applies for the purposes of s.809X to s.809Z5. It is also used in para 86 sch 7 FA 2008 (2008 transitional relief) where it is incorporated by reference.[104]

Elsewhere in the remittance basis provisions the word *money* is used without definition, and has its ordinary meaning. So, strictly, care is needed in use of terminology. In this chapter:
- when the word *money* is used in the defined sense, which applies in the exempt property context, I refer to it as "money" with scare quotation marks.
- when the word *money* is used in its ordinary sense, I write it without quotation marks.

But in practice the statutory definition will not usually make any difference.

19.30.3 *Property "being in the UK"*

Section 809Z6(4) ITA defines "being in the UK":

> References to property being in the UK are references to the property—
> (a) being in the UK after being brought to, or received in, the UK in circumstances in which section 809L(2)(a) applies, or
> (b) being used in the UK in circumstances in which section 809L(2)(a) applies.

Section 809L(2)(a) applies if "money or other property is brought to, or

[103] See 96.5.1 (Terminology: Currency/money).

[104] The definition is also repeated verbatim in s.809Y. That is otiose as the definition in s.809Z6 would apply: that definition applies for s.809X to s.809Z5. But it does not matter.

received or used in, the UK by or for the benefit of a relevant person."

19.30.4 *"Lost, stolen or destroyed"*

Section 809Z6(5) ITA provides:

> References to property being lost, stolen or destroyed are to the property being lost, stolen or destroyed whilst in the UK.

19.30.5 *"Compensation payment"*

Section 809Z6(6) ITA provides:

> "Compensation payment", in relation to property that has been lost, stolen or destroyed, means any payment of compensation (whether under an insurance policy or otherwise) in respect of the property.

19.30.6 *Compensation payment "released"*

Section 809Z6(7) ITA provides:

> A compensation payment is "released" on the day on which it first becomes available for use in the UK by or for the benefit of any relevant person.

19.30.7 *"Recovered"*

Section 809Z6(8) ITA provides:

> Property that has been lost or stolen is "recovered" on the day on which it becomes available to be used or enjoyed in the UK by or for the benefit of a relevant person.

19.31 Public access rule

19.31.1 *Introduction*

Suppose an individual has purchased works of art out of foreign income or gains. It may be possible to lend these works to UK institutions without a taxable remittance[105] but s.809Z ITA provides an additional exemption for works of art brought to the UK for public display. Perhaps it is intended for the case where the institution is a relevant person.

Section 809X(3) ITA provides:

> Property is exempt property if it meets the public access rule (see section 809Z).

[105] See 18.14.1 (Property brought to UK).

Section 809Z(1) ITA provides:

> Property meets the public access rule if conditions B and C are met.

I refer to **"public access conditions B and C"**.

The former conditions A and D were deleted by the FA 2013. Former condition A had restricted the relief (in short) to works of art. It is now available (in short) for any property (excluding money) but the requirement of public display at an approved gallery or museum effectively limits it to chattels of public interest. Former condition D had incorporated VAT rules by reference which required several pages to set out and which the 2012/13 edition of this work had described as "quite pointless".

19.31.2 *Public access*

Section 809Z(3) ITA provides:

> Condition B is that—
> (a) the property is available for public access at an approved establishment,
> (b) the property is to be available for public access at an approved establishment and, in connection with its being so available, is in transit to, or in storage at, public access rule premises, or
> (c) the property has been available for public access at an approved establishment and, in connection with its having been so available, is in transit from, or in storage at, public access rule premises.

The key terms here are "available for public access" and "approved establishment." Both are defined.

19.31.3 *Available for public access*

Section 809Z(4) ITA provides:

> Property is "available for public access" at an approved establishment if the property is—
> (a) on public display at the establishment,
> (b) held by the establishment and made available to the public on request for viewing or for educational use, or
> (c) held by the establishment for public exhibition in connection with the sale of the property.

The RDR Manual outlines the statutory provision and continues:

> **RDRM34140 available for public access - definition** [Jan 2019]
> ... Some property qualifying under the public access rule will be on permanent display at an approved establishment. Other works will have been lent to a museum or art gallery as part of temporary exhibition - perhaps of the work of a particular artist.
> The second bullet above [para (b)] might apply to articles that are too fragile to be on permanent display.
> Prior to 6 April 2012, property brought into the UK for public display in connection with its sale to satisfy the public access rule meant that if that property was sold in the UK a charge arose ....
> Since 6 April 2012, property brought to the UK for public display and subsequently sold in the UK may not result in a UK charge to tax if all of the conditions as set out at s809YA are met ...

19.31.4 *Approved establishment*

Section 809Z(5) ITA defines approved establishment. There are two types:

> An "approved establishment" is—
> (a) an approved museum, gallery or other institution within the meaning of Group 9 of Schedule 2 to the Value Added Tax (Imported Goods) Relief Order 1984, or

If one turns to the VAT (Imported Goods) Relief Order 1984 one might expect to find a definition of "approved museum, gallery or other institution." There is none, but article 2 does say that "approved" means approved by the secretary of state. In practice approval is granted by the National Import Reliefs Unit and its practice is set out in HMRC Notice 361 (Importing museum and gallery exhibits free of duty and VAT).

Section 809Z(5) ITA continues:

> An "approved establishment" is ...
> (b) any other person, premises or institution designated (or of a description designated) by the Commissioners.

The RDR Manual provides:

> **RDRM34130 approved establishment - definition** [Jan 2019]
> ...Any questions about what constitutes an 'approved establishment' or requests for approval as an 'approved establishment' (ITA07/s809Z(5)(b)) should be made to Specialist Personal Tax, PTI Advisory - Remittance Basis Technical Team.
> There is no set form which needs to be completed to request designation as an approved establishment, but all applications should be made in writing and provide sufficient detail about the relevant circumstances

relating to making property available for public access, including particulars of the appropriate person, premises or institution wanting to be designated as an approved establishment and full contact details.

19.31.5 *Public access premises*

Lastly, s.809Z(6) ITA defines public access rule premises:

> "Public access rule premises" are—
> (a) premises in the UK at which the property is to be, or has been, available for public access, or
> (b) other commercial premises in the UK used by the approved establishment for the storage of property in advance of its being, or after its having been, available for public access at the approved establishment.

19.31.6 *Condition C: Time limit*

Section 809Z ITA provides:

> (7) Condition C is that, during the relevant period, the property meets condition B for no more than—
> (a) two years, or
> (b) such longer period as the Commissioners may specify.
> (8) "The relevant period" means the period—
> (a) beginning with the importation of the property, and
> (b) ending when it ceases to be in the UK after that importation.
> (8A) But if the property is lost or stolen—
> (a) the relevant period ends with the time at which it is lost or stolen, and
> (b) a new relevant period begins with its importation or the time at which it is recovered.
> (9) "Importation" means the property being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies.

The definition of "importation" recognises that there may be an importation to the UK to which s.809L(2) does not apply, in which case time does not begin to run. The RDR Manual provides:

> **RDRM34150 Public access rule - Condition C - two year period** [Jan 2019]
> ...
> The relevant period starts with the importation of the property and ends when the property ceases to be in the UK after that importation.
> For these purposes, property is treated as brought into the UK or

imported if it is brought to the UK in circumstances such that it would be treated as a remittance to the UK within Condition A of ITA07/s809L (refer to RDRM33120 Condition A - property) if it were not for this public access rule (or any other rule exempting it) (ITA07/s809Z(9)).

The two year period will not necessarily start with the importation of the property as the property may not have been available for public access when it was first imported into the UK. For example it may be brought in under the temporary importation rule prior to public access.

Again the two year period will not necessarily end when the property ceases to be in the UK as the property may cease to be available for public access before the property actually leaves the UK. For example it may instead qualify under the repair rule after a period of public access.

Example 1 (Faizal)[106]

F is a UK resident remittance basis user. He is asked by a London museum, which is an approved establishment, if he will contribute a vase that he owns to an exhibition that the museum intends to stage. The vase is derived from F's relevant foreign income.

F arranges for the vase to be shipped to the UK from his holiday home in Switzerland. In May the vase is received by the museum and is put into secure storage for one month after which the museum will begin to set up the special exhibition. The exhibition lasts until the following year in October, at the end of which the vase is returned to Switzerland. The vase has been in the UK for 18 months in total. The vase is exempt property so F has not made a chargeable remittance.

Example 2

The circumstances are the same as Example 1 but this time, at the end of the exhibition, the vase is not returned to Switzerland. Instead, F asks for the vase to be sent to a well known restorer in Newcastle to be cleaned. The restorer keeps the vase in his business premises for a further eight months [!] and then in the following June F arranges for it to be sent back to his home in Switzerland.

The vase has been in the UK for 26 months. The vase, purchased using F's relevant foreign income is exempt property under the public access rule for the 18 months from its arrival in the UK in May to the October in the following year.

Between October and the following June it is within temporary importation rule (as it is with the repairer) and so remains exempt property. As the 2 year time 'repair' limit at Condition C has not been exceeded the vase remains exempt property throughout and F has not made a taxable remittance.

[106] I omit a few irrelevancies in setting out the text of this example.

> Any requests under the terms of ITA07/s809Z(7)(b) to extend the period during which property may remain in the UK under the terms of the public access rule should be made to Specialist Personal Tax, PTI Advisory, Foreign Income and Remittance Basis Team.

19.32 Personal use rule

Section 809X(4) ITA provides:

> Clothing, footwear, jewellery and watches are exempt property if they meet the personal use rule (see section 809Z2).

Section 809Z2 ITA provides:

> (1) Clothing, footwear, jewellery or watches meet the personal use rule if they—
> (a) are property of a relevant person[107], and
> (b) are for the personal use of a relevant individual.
> (2) In this section—
> (b) "relevant individual" means an individual who is a relevant person by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild).

The words "*by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild)*" are otiose because an individual who is a relevant person is necessarily a relevant person by virtue of those provisions; but no harm is done.

19.33 Repair rule

Section 809X(5)(a) ITA provides:

> Property is exempt property if— ...
> (a) the property meets the repair rule (see s.809Z3).

Section 809Z3 ITA provides:

> (1) Property meets the repair rule for the whole of the relevant period if, during the whole of that period, the property meets the repair conditions.
> (2) Property meets the repair rule for a part of the relevant period if—

[107] The restricted definition of "relevant person" in relation to pre-6 April 2008 income does not apply here; see 17.9 (Relevant person: Pre-2008 income/gain).

> (a) during the whole of that part of that period, the property meets the repair conditions, and
> (b) during the whole of the other part of that period, or the whole of each other part of that period, the property meets the repair conditions or the public access rule.

19.33.1 *Repair conditions*

Section 809Z3 ITA provides:

> (3) Property meets the repair conditions if the property—
> (a) is under repair or restoration,
> (b) is in transit from a place outside the UK to repair rule premises, in transit between such premises, or in storage at such premises, in advance of repair or restoration, or
> (c) is in storage at such premises, in transit between such premises, or in transit from such premises to a place outside the UK, following repair or restoration.

19.33.2 *Repair premises*

Section 809Z3 ITA provides:

> (4) "Repair rule premises" means—
> (a) premises in the UK that are to be used, or have been used, for the repair or restoration referred to in subsection (3)(b) or (c), or
> (b) other commercial premises in the UK used by the restorer for the storage of property in advance of, or following, repair or restoration of property by the restorer.[108]
>
> (6) Property meets the repair conditions, or the public access rule, during the whole of a period, or the whole of part of a period, if the property meets those conditions or that rule—
> (a) on the whole of, or on part of, the first day of that period or part period,
> (b) on the whole of, or on part of, the last day of that period or part period, and
> (c) on the whole of each other day of that period or part period.
> (7) "The relevant period" has the same meaning as in section 809Z.

The relief applies only to the property being repaired. There is no relief for the cost of repair. A remittance basis taxpayer would not normally bring

[108] Defined ss(5): "Restorer" means the person who is to carry out, or has carried out, the repair or restoration referred to in subsection (3)(b) or (c).

an asset to the UK in order to make use of UK repair or restoration services. Even if the importation of the asset did not give rise to a taxable remittance the payment for the repair would give rise to a taxable remittance. Thus yacht and similar restoration work, for instance, from remittance basis taxpayers is lost to the UK. But there it is.

19.34 Temporary importation rule

Section 809X(5)(b) ITA provides:

> Property is exempt property if— ...
>
> (b) the property meets the temporary importation rule (see s.809Z4)

Section 809Z4(1) ITA provides:

> Property meets the temporary importation rule if the total number of countable days (subject to any increase under subsection (3B)) is 275 or fewer.

19.34.1 *Countable day*

Section 809Z4(2) ITA defines "countable day":

> A "countable day" is a day on which, or on part of which, the property is in the UK by virtue of being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies (whether the current case, or a past case, when the property was so brought, received or used).

One needs to keep a lifetime record for every item of property (except money, which does not qualify for the relief as it is not "property"[109]).

Days before 2008/09 are not countable days, but that will not normally matter because chattels received in the UK before 2008 qualify for transitional relief.[110]

If the property is in the UK but brought/received/used by a non-relevant person, that does not count towards the countable days.

The relief was designed for chattels, but it applies to all forms of property (except "money"). It applies for instance on the acquisition of UK land or securities[111] (other than "money") if the purchase price is received by the

[109] See 19.30.1 ("Property").

[110] See 18.53 (Transitional: pre-2008 property).

[111] The receipt of UK securities is in principle a remittance; see 18.14.8 (Acquisition of UK security).

vendor offshore (and so is not remitted). I have wondered whether the law should be amended so the relief is restricted to chattels, but the relief is essentially a form of de minimis relief: short term UK use should not count. That should logically apply to all forms of property.

Section 809Z4(3) ITA deals with the interaction with other exempt property remittance reliefs:

> A day is not a countable day if, on that day or any part of that day—
> (za) the property meets the public access rule,
> (a) the property meets the personal use rule,
> (b) the property meets the repair rule,
> (ba) subsection (3A) applies to the property [lost or stolen property],
> (c) the notional remitted amount[112] in relation to the property is less than £1,000, or
> (d) all or any part of the income or chargeable gains contained in the property (or from which the property derives) is treated, or continues to be treated, under section 809VA(2), 809Y(8)(b) or 809YC(2) or 809YF(4) as not remitted to the UK.

The RDR Manual provides a straightforward example:

> **RDRM34220 Temporary importation rule - countable days** [Jan 2019]
> ... Example (Jez)
> On 15 January 2010 J, a remittance basis user, brings a rare oil painting into the UK to hang on the wall of his castle. J had purchased the painting two months earlier using his foreign employment income.
> On 1 July 2010 he allows the painting to be put on public display at the National Gallery, London. The painting remains on display for six months, until 31 December 2010, after which it is immediately shipped to J's office in Dubai on 1 January 2011.

The HMRC analysis is as follows:

> The conditions for meeting the public access rule for the period 1 July 2010 to 31 December 2010 have been satisfied.
> Bringing the painting into the UK would ordinarily be a taxable remittance under section 809L but we need to consider the exemption rules. During the period 15 January to 30 June 2009 the painting was not available for public access. This period is immediately followed by a period of public access from 1 July 31 December 2009.
> The 15 January to 30 June 2009 period falls to be considered under the

[112] This term is defined in s.809Z5 ITA: see 19.35 (Small remittance rule).

temporary importation rule (167 days).
For the period 1 July 2009 to 31 December 2009 the property is exempt property under the public access rule and therefore this period does not count towards the 275 day limit.

19.34.2 *Lost/stolen property*

Section 809Z4(3) ITA provides:

> A day is not a countable day if, on that day or any part of that day ...
> (ba) subsection (3A) applies to the property [lost or stolen property]

Section 809Z4(3A)(3B) ITA provides:

> (3A) This subsection applies to the property if—
> (a) it is not available to be used or enjoyed in the UK by or for the benefit of a relevant person because it has been lost, stolen or destroyed,
> (b) (if lost or stolen) it has not been recovered, and
> (c) no compensation payment has been released in respect of it.
> (3B) If—
> (a) property that has been lost or stolen is recovered,
> (b) the first day after the day on which it is recovered is a countable day, and
> (c) excluding that countable day there have already been 231 or more countable days in relation to the property,
> the number of countable days specified in subsection (1) is read as being increased by the number necessary for there to be 45 countable days beginning with the countable day mentioned in paragraph (b).

19.35 Small remittance rule

Section 809X(5)(c) ITA provides:

> Property is exempt property if ...
> (c) the notional remitted amount (see s.809Z5) is less than £1,000,

I refer to this as the **"small remittance rule"**.
Section 809Z5(1) ITA defines "notional remitted amount":

> The "notional remitted amount", in relation to property, is the amount that would be taken to be remitted to the UK in relation to the property (if section 809X did not apply in relation to the property).

Money does not qualify for the relief as it is not "property".[113]

[113] See 19.30.1 ("Property").

Each item of property qualifies for the £1,000 limit. HMRC agree. The RDR Manual provides:

> **RDRM34180 Exempt Property - Notional remitted amount less than £1,000** [Jan 2019]
> ... Example (Jacob)
> J, a remittance basis user, uses his foreign income to purchase a mobile phone for £250 whilst on holiday in Florida. Later in the same trip, while in Singapore he also buys a fountain pen for £485, and a new suitcase at the airport, as a present for his wife. This cost him £630. He brings all the items back to the UK with him upon his return home..
> The mobile phone, pen and suitcase all derive from J's foreign income so would be taxable as remittances when brought into the UK under ITA07/s809L. However each item's notional remitted amount (£250, £485 and £630 respectively) is under the £1,000 limit, so section 809Z5 provides that the phone, the pen and the suitcase are regarded as exempt property. J has not therefore made a chargeable remittance.
> In J's case the total cost of all the property brought to the UK exceeds £1,000. However the exemption limit applies to each item of property, unless it forms part of a set.

£1,000 was quite a substantial limit, but it has not been increased so its real value is gradually being whittled away by inflation.

The passage concludes with a comment on sets:

> Where the property in question forms part of a set and only part of that set is in the UK, a just and reasonable apportionment is made to find the notional value of that part by reference to what the remittance would have been had the whole set been brought to, or received or used in the UK at the same time as the part in question (ITA07/s809P(13)). ...

That issue will rarely if ever arise.

19.36 Exempt property clawback charge

19.36.1 *Clawback charges*

Section 809Y(1) ITA provides:

> Property that ceases to be exempt property is to be treated as having been remitted to the UK at the time it ceases to be exempt property.

I refer to this as the **"exempt property clawback charge"**.

Section 809Y(2) ITA provides:

> Property ceases to be exempt property in any of the following cases.

There are three cases where this may apply.

19.36.2 *Case 1: Sale in UK*

Section 809Y(3) ITA provides:

> The first case is where the whole or part of the exempt property is sold or otherwise converted into money[114] whilst it is in the UK.

An exchange for a non-money asset is not a sale.

19.36.3 *Case 2: Exemption ceases*

Section 809Y(4) ITA provides:

> The second case is where the property—
> (a) is exempt property only because it meets one or more of the relevant rules,[115]
> (b) ceases to meet that rule, or all of those rules, whilst it is in the UK, and
> (c) does not meet any other relevant rule.

19.36.4 *Case 3: Compensation payment*

Section 809Y(4B) ITA provides:

> The third case is where a compensation payment is released in respect of exempt property that has been lost, stolen or destroyed.

19.36.5 *Lost property*

Section 809Y(4A) ITA provides:

> Where exempt property has been lost, stolen or destroyed, the first and second cases do not apply in relation to the property during any period—
> (a) beginning with the time at which it was lost, stolen or destroyed, and
> (b) (if lost or stolen) ending with the time at which it is recovered.

[114] For the definition see 19.30.2 ("Money").

[115] Section 809Y(5) ITA provides:
"relevant rule" means-
(a) the public access rule,
(b) the personal use rule,
(c) the repair rule, and
(d) the temporary importation rule.

19.37 Sales relief

Section 809YA - 809YD ITA provide two reliefs for arm's length sales where the proceeds are taken out of the UK:

(1) Relief from the exempt property clawback charge
(2) The gain on the sale of a UK situate asset is a foreign gain (so the remittance basis can apply)

I refer to this as **"sales relief"**.

Perhaps this reflects some effective lobbying by auctioneers. Of course it is far too complicated.

Section 809YA(1) ITA provides relief from the clawback charge:

> Section 809Y(1) does not apply to property if—
> (a) it ceases to be exempt property because the whole of it is sold whilst it is in the UK, and
> (b) conditions A to F are met.

I refer to **"sales relief conditions A-F"**.

19.37.1 *Sale to 3rd party*

Section 809YA ITA provides:

> (2) Condition A is that the sale is to a person other than a relevant person.
> (3) Condition B is that the sale is by way of a bargain made at arm's length.
> (4) Condition C is that, once the sale is completed, no relevant person—
> (a) has any interest in the property,
> (b) is able or entitled to benefit from the property by virtue of any interest, right or arrangement, or
> (c) has any right (whether conditional or unconditional) to acquire
> [i] any interest mentioned in paragraph (a) or
> [ii] ability or entitlement mentioned in paragraph (b).

19.37.2 *Prompt receipt of proceeds*

Section 809YA ITA provides:

> (5) Condition D is that the whole of the disposal proceeds are released (whether in one go or in instalments) on or before the final deadline.
> (6) "The final deadline" is the first anniversary of the 5 January following the tax year in which the property ceases to be exempt property (within the meaning of section 809Y).

19.37.3 *Proceeds taken offshore/invested*

Section 809YA ITA provides:

> (7) Condition E is that—
> (a) the whole of the disposal proceeds are
> [i] taken offshore or
> [ii] used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the proceeds are released, or
> (b) if the disposal proceeds are paid in instalments, each instalment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the instalment is released.
> (8) But if any of the disposal proceeds are released in the period of 45 days ending with the final deadline, Condition E is satisfied, as respects those proceeds, only if they are taken offshore or used by a relevant person to make a qualifying investment on or before the final deadline.

19.37.4 *Qualifying investments*

Section 809YA(9) ITA provides:

> Condition F is that, if Condition E is satisfied wholly or in part by using disposal proceeds to make a qualifying investment, the remittance basis user makes a claim for relief under section 809YC(2) on or before the first anniversary of the 31 January following the tax year in which the property is sold.

Section 809YB ITA provides power to extend the time limit for investment:

> (1) An officer of HMRC may agree in a particular case to extend any period within which disposal proceeds (or instalments) must be taken offshore or used by a relevant person to make a qualifying investment in order to satisfy Condition E.
> (2) The power to agree to an extension is exercisable only in exceptional circumstances and only if the remittance basis user requests such an extension.

19.37.5 *"Released"*

Section 809YA ITA(10) provides a commonsense definition:

> For the purposes of this section, proceeds or instalments are "released"

on the day on which they first become available for use by or for the benefit of any relevant person.

19.37.6 *Sales relief TAAR*

Section 809YA(11) ITA provides:

> This section does not apply if the sale is made as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

This is an avoidance-purpose TAAR; see 3.2.1 (Types of unallowable purpose).

19.37.7 *Supplemental rules*

Section 809YC ITA provides:

> (1) This section has effect if section 809Y(1) does not apply to property by virtue of section 809YA.
> (2) The income and gains treated under section 809X as not remitted to the UK continue to be treated after the sale as not remitted to the UK even though the property has ceased to be exempt property.
> (3) But nothing in subsection (2) prevents anything done in relation to any part of the disposal proceeds after that part is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is done.
> (4) Treat the disposal proceeds as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the UK (as mentioned in section 809X).
> (5) Where Condition E was met by using the disposal proceeds to make a qualifying investment—
> (a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (2), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and
> (b) if the investment was made using more than just the disposal proceeds, treat only the part of the investment made using the disposal proceeds as "the investment" for the purposes of those provisions.

19.37.8 *Relief for gain on sale*

Section 809YD(1) ITA provides:

> This section applies to an individual ("P") if—
> (a) a chargeable gain (but not a loss) accrues to a person on a sale of exempt property,
> (b) but for section 809YA [sales relief], section 809Y(1) [clawback charge][116] would have applied to the property by virtue of the sale, and
> (c) P is either—
> (i) the person to whom the gain accrues, or
> (ii) a person to whom a part of the gain is treated as accruing under section 3 of TCGA 1992 (members of non-resident companies).

In the HMRC view, the relief only applies if there would have been a clawback charge. If the temporarily UK asset is derived from clean capital, the relief does not apply. That seems rather odd. Is it actually right?

If these conditions are met we move on to the relief. Section 809YD(2) ITA provides:

> The relevant UK gain is to be treated for the purposes of this Chapter as if—
> (a) it were a foreign chargeable gain of P, and
> (b) in the case of section 809E, it were not part of P's UK income and gains.

The RDR Manual explains para (b):

> **RDRM34280: chargeable gains on sales of exempt property** [May 2020]
> Some individuals do not need to make a remittance basis claim because they have no UK income or gains and do not remit any foreign income and gains (refer to RDRM32140). For those individuals, the foreign chargeable gain will not be treated as part of their UK income and gains (ITA07/s809YD(2)(b)).
>
> (3) Accordingly, if section 809F [remittance basis] applies to P for the applicable tax year,[117] the relevant UK gain is charged in accordance with paragraph 1 of Schedule 1 to TCGA 1992 as if it were a foreign

[116] See 19.36 (Exempt property clawback charge).

[117] Section 809YD(5) provides: "The applicable tax year is —
(a) if section 1M of TCGA 1992 (temporary non-residents) applies in P's case and the relevant UK gain is within subsection (2) of that section, the tax year that consists of or includes the period of return as defined in that section,
(b) otherwise, the tax year in which the relevant UK gain accrues."

> chargeable gain.
>
> (4) The relevant UK gain is—
>
> (a) in a case falling within subsection (1)(c)(i), the gain accruing to P,
>
> (b) in a case falling within subsection (1)(c)(ii), the part of the gain treated as accruing to P...
>
> (6) In applying this Chapter to the relevant UK gain—
>
> (a) treat the amount of any gains mentioned in section 809Q(4)(e) contained in the disposal proceeds by virtue of section 809YC(4) as increased by the amount of the relevant UK gain,
>
> (b) disregard section 809U,[118] and
>
> (c) anything done in relation to any part of the disposal proceeds before the part is taken offshore or used to make a qualifying investment (or both) does not count as a remittance to the UK of any of the relevant UK gain.
>
> (7) The relevant UK gain is to be treated for the purposes of the following provisions of TCGA 1992 as if it accrued on the disposal of a foreign asset (within the meaning of Schedule 1 to TCGA 1992)—
>
> (a) section 1M,
>
> (b) section 3D, and
>
> (c) Schedule 1.
>
> (8) This section has effect despite section 3D(2) of TCGA 1992.

19.37.9 *Election out of relief*

One can elect out of this relief. Section 809YD(9) ITA provides:

> This section does not apply with respect to a chargeable gain if P gives notice to HMRC under this subsection.[119]

A notice will not usually be advantageous, but it might perhaps in some cases of double taxation relief. HMRC give another example of when a notice might be desirable:

> **RDRM34280: chargeable gains on sales of exempt property** [May 2020]
>
> Where an individual has unremitted foreign income and gains of less

[118] See 18.48 (Remittance before income/gains arise).

[119] Section 809YD(10) provides: “A notice under subsection (9)—
(a) must be in writing and must identify the gain in question,
(b) must be given on or before the first anniversary of the 31 January following the applicable tax year, and
(c) may not be revoked after that first anniversary.”

> than £2,000 they can be taxed on the remittance basis without making a claim (see RDRM32110). Such individuals do not lose access to personal allowances or their annual exempt amount and are not required to pay the annual remittance basis charge regardless of the length of time they have been resident in the UK. Where an individual sells exempt property giving rise to a chargeable gain, treating the gain as a foreign chargeable gain might mean their total unremitted foreign income and gains exceed the £2,000 limit in the year of sale. The individual would need to make a claim to be taxed on the remittance basis under ITA07/s809B and become liable to pay the remittance basis charge if they wanted access to the remittance basis.
> An individual can therefore elect for the foreign gain arising on the sale of exempt property to be treated as a UK chargeable gain...

I have wondered whether a notice is desirable in order that a loss on the disposal is an allowable loss, but that does not seem to be the case. HMRC agree:

> **RDRM34280: chargeable gains on sales of exempt property** [May 2020]
> Where an allowable loss accrues on the sale, the loss will be treated as a UK loss and available to be used against any UK gains under existing rules for capital losses.

19.37.10 *Exempt property invested*

Section 809Y(6) ITA provides:

> Subsection (1) does not apply to property that ceases to be exempt property by virtue of the first or second case if—
> (a) the property, or anything into which it is converted,[120] is used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which it ceased to be exempt property, and
> (b) the remittance basis user[121] makes a claim for relief under this

[120] This is given a commonsense definition in s.809Y(7): "The reference in subsection (6)(a) to anything into which property is converted is—
(a) if the property is disposed of, the disposal proceeds, and
(b) if the property is converted into money in some other way, the money into which it is converted, (including where the disposal or conversion occurs after the property ceases to be exempt property)."

[121] Defined s.809Z10: "In this Chapter "the remittance basis user", in relation to income or chargeable gains of an individual, means that individual."

> subsection on or before the first anniversary of the 31 January following the tax year in which the property ceases to be exempt property.

Section 809Y(8) ITA incorporates the investment remittance relief rules:

> (8) If subsection (1) does not apply by virtue of subsection (6)—
> (a) the property (or thing into which it was converted) used to make the investment is to be treated as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the fixed amount,
> (b) the income or gains treated under section 809X as not remitted to the UK continue to be treated as not remitted to the UK even though the property has ceased to be exempt property, and
> (c) the business investment provisions[122] apply to the income and gains as they apply to income or gains treated under section 809VA(2) as not remitted to the UK.
> (9) "The fixed amount" is the amount of that kind of income or gain contained in the property when it was brought to, or received or used in, the UK (as mentioned in section 809X).

Section 809Y(10) ITA provides an apportionment rule:

> If the investment is made using more than just the property (or thing into which it was converted), treat only the part made using the property (or thing into which it was converted) as "the investment" for the purposes of the business investment provisions.

19.37.11 *Interaction with gift to nation relief*

For completeness, s.809YE ITA provides:

> (1) Section 809Y(1) [exempt property clawback charge] does not apply to property if—
> (a) it ceases to be exempt property in the second case mentioned in that section, and
> (b) by no later than the time when it ceases to be exempt property, it has been donated in the circumstances described in paragraph 1 of Schedule 14 to FA 2012 (gifts to the nation).
> (2) Where section 809Y(1) does not apply to property by virtue of this section, the property is to continue to be treated as not remitted to the UK even though it no longer meets any of the relevant rules.

[122] Defined s.809Z(10) ITA: "In this Chapter "the business investment provisions" means sections 809VA to 809VO".

19.37.12 *Compensation taken offshore/invested*

Section 809YF ITA provides:

> (1) Section 809Y(1) does not apply to property if—
>
> (a) it ceases to be exempt property because a compensation payment in respect of it is released, and
>
> (b) conditions A and B are met.
>
> (2) Condition A is that the whole of the compensation payment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the payment is released.
>
> (3) Condition B is that, if Condition A is satisfied wholly or in part by using the compensation payment to make a qualifying investment, the remittance basis user makes a claim for relief under subsection (4) on or before the first anniversary of the 31 January following the tax year in which the payment is released.
>
> (4) If section 809Y(1) does not apply to property by virtue of subsection (1), the income and gains treated under section 809X as not remitted to the UK continue to be treated after the compensation payment is released as not remitted to the UK even though the property has ceased to be exempt property.
>
> (5) But nothing in subsection (4) prevents anything done in relation to any part of the compensation payment after that payment is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the UK at the time when the thing is done.
>
> (6) Treat the compensation payment as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the UK (as mentioned in section 809X).
>
> (7) Where Condition A was met by using the compensation payment to make a qualifying investment—
>
> (a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (4), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and
>
> (b) if the investment was made using more than just the compensation payment, treat only the part of the investment made using the payment as "the investment" for the purposes of those provisions.

CHAPTER TWENTY

MIXED FUNDS

20.1 Mixed funds: Introduction
20.1.1 Navigation
20.2 Definition of "mixed fund"
20.2.1 The statutory definition
20.2.2 Identifying the fund
20.2.3 When are funds mixed
20.2.4 Money paid in & withdrawn
20.3 Interaction with share pooling
20.4 Ingredients of mixed fund

Remittance from joint account	94.6

20.1 Mixed funds: Introduction

It is helpful first to outline the problems which the mixed fund rules are intended to address.

Suppose a person holds a fund which includes different types of income/gains, or income/gains of different years:

(1) If the person remits part of the fund to the UK, it is necessary to know:
  (a) which type of income or gains have been remitted (as different rates may apply)
  (b) which year's income or gains have been remitted (as different rules may apply to different years).

(2) If the person transfers some assets out of the fund, without remitting

those assets to the UK, there is no immediate tax charge. However if there is a later remittance out of the remaining fund, or the transferred assets, it is necessary to know:

(a) which income/gains are in the remaining fund, and
(b) which income/gains are in the transferred assets.

The mixed fund rules are intended to answer these questions.

I coin the following terminology:

"ITA mixed fund rules" means the rules set out in s.809Q to 809S ITA.
"Pre-2008 mixed fund rules" means the rules applicable before 2008/09.

20.1.1 *Navigation*

The layout of the provisions is as follows:

ITA	**Topic**	**See para**
s.809Q	Onshore transfer rule	20.5
s.809R	Offshore transfer rule	20.6
s.809RA-s.809RD	OWR (employment income) mixed fund rule	34.23
s.809S	Mixed fund TAAR	20.11

20.2 Definition of "mixed fund"

20.2.1 *The statutory definition*

There are two section-wide definitions:

s.809Q(6) ITA	**s.809R(7) ITA**
In this section "mixed fund" means money or other property which, immediately before the transfer, contains or derives from—	In this section 'mixed fund' means money or other property containing or deriving from—
(a) more than one of the kinds of income and capital mentioned in subsection (4), or	(a) more than one of the kinds of income and capital mentioned in section 809Q(4), or
(b) income or capital for more than one tax year.	(b) [Identical]

These are effectively identical definitions, as the words "immediately before the transfer" make no difference to the definition.

One must first identify what is the fund, and then identify the constituents which it contains (or derives from).

20.2.2 *Identifying the fund*

The paradigm example of a mixed fund is a bank account with diverse entries.

A mixed fund need not necessarily be a bank account. If money constituting a mixed fund is invested in an asset, the asset is the mixed fund. For instance, if a person uses foreign income and capital to purchase a foreign property, or shareholding, the foreign property or shareholding is a mixed fund.

A portfolio of securities constitutes a single fund if it is managed by one investment manager and held under one account name and number.

In some cases it may be unclear whether a number of securities should be classified as distinct funds, or together constitute a single fund;[1] in practice, any reasonable analysis consistently adopted ought to be acceptable.

20.2.3 *When are funds mixed*

Funds are distinct, ie, not mixed, if they are held in separate accounts or sub-accounts[2] at one bank. HMRC agree. The RDR Manual provides:

> **RDRM35230 Remittances from mixed funds** [Jan 2019]
> *No Mixed Fund*
> A mixed fund does not exist just because the individual has several accounts with the same banking institution, if each account is separately constituted and contains only one of the relevant types of income from only one year. This will usually include bank accounts set up as sub-accounts under an "umbrella" agreement.
> If income and capital sources from a tax year are maintained separately (sometimes referred to as "kept clean" or "clean capital") no mixed fund is created, and so these rules will not apply.[3]

[1] The question of what is a distinct fund is comparable to the question of what constitutes a distinct trust; for which, see 99.22.2 (Variation or resettlement?).

[2] I suspect that "sub-account" is a commercial term with no precise or significant legal meaning; but it is not necessary to pursue that. The issue is raised in Cleansing Q&As Questions 11 and 12, but HMRC did not answer beyond saying that "Whether a sub account is a separate account will be a question of fact determined by the terms attached to an account."

[3] The Manual then gives a straightforward example: "For example, an individual maintains three separate accounts with the same offshore institution:
Account A into which he pays his relevant foreign earnings for the tax year
Account B into which he pays some inherited money (clean capital)

This is consistent with the banking law background:

> A person's claim to money in his or her account is identifiable by an account name and/or number, and ... is distinct from any other claim he or she may have against the same bank.[4]

Accordingly one can in principle avoid mixing income with other funds by arranging that the income is paid to a separate account. If one does that, it will be possible to remit the other funds, keeping the income unremitted.[5]

The position is different for capital gains. A capital gain has no separate identifiable existence, so the proceeds of a disposal giving rise to a gain are always a mixed fund.[6] For accrued income profits see 28.9 (AIP remittance basis).

20.2.4 *Money paid in & withdrawn*

The RDR Manual provides:

> **RDRM33560. Banking Issues** [Jan 2019]
> *Interest credits to a capital account*
> Often interest on a maturing deposit
> [1] is credited to the same account comprising the principal capital investment, but
> [2] under the bank's normal internal system the interest is then immediately and identifiably transferred to an income account.[7]
> Where a mixed fund such as this is created fleetingly by an operation of the banking system, HMRC will accept that the interest credit will not taint the principal and so the mixed fund rules in ITA07/s809Q to s809S do not apply.

At first sight this statement may seem concessionary. However, it is a sensible commercial construction of the statute to say that a sum only

Account C into which he pays some relevant foreign income for the tax year
As long as these accounts do not become mixed funds, the individual can bring money into the UK from Account B and that will be accepted as a being a transfer of "clean" capital, and so will not be a taxable remittance."

[4] Fox, *Property Rights in Money* (1st ed, 2008), para 1.108 (original footnotes omitted).

[5] See 18.55.1 (Avoiding mixed funds: Segregation).

[6] See 18.17.3 (What is a gain).

[7] I would be interested to know from readers how often this actually happens; and how long interest typically remains in the deposit account.

"fleetingly" in an account should not to be said to become "mixed".

The statement refers to banks, and to interest, but the same should apply to a non-banking institution which holds accounts for a customer, and to other types of income, such as dividends.

See too 18.19 (Bank errors).

20.3 Interaction with share pooling

Cleansing Q&As[8] Question 14 provides:

> How do you carry out a mixed fund analysis where an individual has shares/securities of the same class in more than one portfolio?
> **Suggested Answer**
> Unless the portfolios mirror each other such that the amount taken from each account to acquire the investments is the same as the CGT base cost amount (TCGA 1992, s 104),[9] there are significant mixed fund issues where shares/securities of the same class are held in more than one portfolio. This is because the TCGA 1992, s 104 legislation provides that all shares/securities of the same class that were acquired by an individual in the same capacity are pooled for base cost purposes (provided the 30 day or same day rules do not apply). As such, the base costs used for the CGT computations will be different (possibly significantly so) to the amount used to acquire the shares/securities.
> ***We would strongly suggest that to avoid complexity, shares/securities of the same class are not held in more than one portfolio.***
> However, it is likely that not realising the issues, a number of taxpayers will have shares/securities of the same class in more than one investment portfolio. If the client wants to cleanse it will be necessary to carry out a mixed fund analysis taking this issue into account. This additional problem will make a mixed fund analysis in a real example extremely complex and even more time consuming. Depending on the numbers the divergence between the base cost and the amount used from the mixed fund account to make the purchases could result in significant additions to or depletions from the ITA 2007, s 809Q(4)(i) "other" category. In basic terms clean capital could either be created or depleted.
> **The following is a simplified example to illustrate the point (the acquisition and sales proceeds figures have been specifically chosen such that large gains and losses result in order to show what a significant difference this issue can make to the mixed fund analysis).**
> **Example (Kurt/Raven Inc)**
> K is a UK resident foreign domiciliary.
> On 15 June 2011 he paid a £5 million inheritance (received in 2011/12) into

[8] For this document, see 20.12 (Cleansing mixed funds).

[9] See 56.12.2 (Share-matching).

account C with XYZ Offshore Bank. He used this £5 million to acquire £1 million shares in R Inc (£5 per share). These shares were kept within an investment portfolio with XYZ Offshore Bank with a linked sterling account.

K already held shares in R Inc in a mixed fund portfolio with LMN Offshore Fund Manager. The 2 million shares had been acquired in 2008/2009 for £3.50 per share using £7 million of funds representing K's 2008/09 Remittance Basis relevant foreign earnings.

R Inc operates in a volatile sector, but K feels he has specialist knowledge of the sector and that he can make a profit from investing in the shares despite the volatility.

On 19 October 2014 K sold 1 million of the R Inc shares in his LMN Offshore Fund Manager portfolio for £8 per share.

His base cost per share must take both portfolio holdings into account so is £4 ((£5 million + £7 million) / 3 million).

K is a Remittance Basis User in 2014/15. Proceeds of £8 million are received. This breaks down as:

£3.5 million traceable to K's 2008/09 Remittance Basis relevant foreign earnings (that is 50% of the original £7 million used to acquire the holding of which half has been sold);

£4 million 2014/15 Remittance Basis chargeable gain (proceeds of £8 million less base cost of £4 million); and

£0.5 million – 2014/15 “other” ITA 2007, s 809Q(4)(i) - arisen as the operation of TCGA 1992, s 104 results in a £4 million Remittance Basis Chargeable Gain rather than the £4.5 million gain that would have arisen if pooling was not necessary and the actual amount used from LMN Offshore Fund had been the base cost. As the amount falls into s 809Q(4)(i) it is effectively an addition to clean capital.

Just over a year later, on 24 November 2015 K acquired a further 1 million shares in R Inc in his LMN Offshore Fund Manager portfolio paying £2 per share (this was a low price for the shares and K was confident that they would recover).

K reinvested £2 million of the £8 million he received. This is an offshore transfer:

investment 25%; and (ii) kept in cash 75%.

24 November 2015 acquisition	**New Investment - 1 million holding R Inc shares 25% offshore transfer**	**Bank account 75%**
2008/09 Remittance Basis relevant foreign earnings	£875,000	£2,625,000
2014/15 Remittance Basis chargeable gain	£1 million	£3 million

2014/15 “other” ITA 2007, s 809Q(4)(i)	£125,000	£375,000

The original unsold 1 million R Inc shares in his LMN Offshore Fund Manager portfolio represented £3.5 million of 2008/09 Remittance Basis relevant foreign earnings.

On 5 October 2017 K sold his entire 1 million R Inc shares holding in his XYZ Offshore Bank portfolio for £4.50 per share.

Again, K's base cost per share must take both portfolio holdings into account, so is £3.50 ((£5 million + £3.5 million + £2 million) / 3 million). The base cost of the 1 million shares sold is, therefore, £3.5 million.

K is a Remittance Basis User in 2017/18. Proceeds of £4.5 million are received, the base cost for the £1 million shares is £3.5 million (as calculated above). From a CGT perspective, because of the operation of TCGA 1992, s 104, a £1 million gain has been realised (Remittance Basis no foreign tax credit).

If pooling were not necessary and the actual amount used from XYZ Investment Bank had been used as the base cost there would have been a £0.5 million loss.

There is, therefore, a mixed fund analysis issue, since the funds within the bank account are £1.5 million less than the funds used to acquire the shares and the chargeable gain.

The situation here is different to that in question 13 but again we have a situation where there is £1.5 million less in the mixed fund and nothing in the legislation to assist in terms of how this diminution should be treated. Applying the same just and reasonable methodology as in question 13:

Step 1 – proportionately allocate out the £1.5 million across the original clean capital used to acquire the shares and the Remittance Basis gain on the sale of the shares:

	Amounts Per Category	%	Reduction	Proceeds
Clean Capital	£5 million	83.33%	£1.25 million	£3.75 million
Remittance Basis Gain	£1 million	16.67%	£0.25 million	£0.75 million
	£6 million		£1.5 million	£4.5 million

Step 2 – adjust the step 1 result as the derivation rules mean that the gains figure cannot be reduced.

	Amounts Per Category
Clean Capital s 809Q(4)(i) ITA	£3.75 million
Remittance Basis Gain s 809Q(4)(e)	£1.00 million
	£4.75 million

That is, again as a result of the derivation rules, the mixed fund analysis aggregate total of the ITA 2007, s 809Q(4) categories of income and capital is higher (in this case £0.25 million higher) than the actual proceeds figure.

On 19 February 2018 K uses £4.25 million of the £4.5 million within his XYZ Offshore Bank account to acquire 600,000 shares in R Inc. This is an offshore transfer:

investment 94.4%; and (ii) kept in cash 5.6%.

On 31 May 2018 K sells the 2 million shares in R Inc within his LMN Offshore Fund Manager portfolio for £11 per share.

His base cost per share must take both portfolio holdings into account, so is £3.75 ((£4.25 million + £3.5 million + £2 million) / 2.6 million). The base cost of the 2 million shares sold is, therefore, £7.5 million.

K is a Remittance Basis User in 2018/19. Proceeds of £22 million are received and paid into the same LMN Offshore Fund Manager account as the funds not reinvested from the first sale. The £22 million proceeds breaks down as:

- £ 4,375,000 (£875,000 + £3.5 million) traceable to K's 2008/09 Remittance Basis relevant foreign earnings;
- £1,000,000 2014/15 Remittance Basis chargeable gain;
- £125,000 2014/15 “other” ITA 2007, s 809Q(4)(i);
- £14.5 million (£22 million less £7.5 million) 2018/19 Remittance Basis chargeable gain;
- £2 million 2018/19 “other” ITA 2007, s 809Q(4)(i) - arisen as the operation of TCGA 1992, s 104 results in a £14.5 million Remittance Basis Chargeable Gain rather than the £16.5 million gain that would have arisen if pooling was not necessary and the actual amount used from the LMN Offshore Fund Portfolio account had been the base cost. As the amount falls into s 809Q(4)(i) it is effectively an addition to clean capital.

Note that the LMN Offshore Fund Portfolio account could be cleansed prior to 6 April 2019 and the total £2.5 million ITA 2007, s 809Q(4)(i) “other” (the £375,000 kept in the account and the £125,000 and £2 million above) transferred to a new “clean capital account”.

HMRC Comment

HMRC are OK with the response.

20.4 Ingredients of mixed fund

20.4.1 *Mixed fund categories*

Section 809Q(4) ITA identifies 9 categories of income and capital which may make up a mixed fund:

The kinds of income and capital are—[10]

[10] For clarity I have set this out in tabular form rather than the layout of the statute.

Category	Type of income/capital	Exceptions	Exceptions fall within:
(a)	Employment income	Foreign income	para (b)(c)(f)
(b)	Relevant foreign earnings	Foreign taxed income	para (f)
(c)	Foreign specific employment income	Foreign taxed income	para (f)
(d)	Relevant foreign income	Foreign taxed income	para (g)
(e)	Foreign chargeable gains	Foreign taxed gains	para (h)
(f)	Employment income subject to a foreign tax		
(g)	Relevant foreign income subject to a foreign tax		
(h)	Foreign chargeable gains subject to a foreign tax		
(i)	Income or capital not within another paragraph [residuary category]		

I refer to these as the "**mixed fund categories**".

The order in which these categories are placed is important: I call this the "**mixed fund priority order**".

A remittance basis taxpayer needs to classify every mixed fund into these nine categories for every year from 2008/09. The mixed fund rules require a vast amount of record keeping.

20.4.2 *Income/gains of non-resident*

Income which accrues to a non-resident is not RFI[11] (even if it is foreign income which would be RFI if received by a UK resident). Similarly, earnings received by a non-resident are not employment income.[12] Such income falls into the residuary category (i).

Chargeable gains from non-UK assets which accrue to a non-resident *are* foreign chargeable gains.[13] Such gains will fall within category (e) or (h) depending on whether they are subject to a foreign tax.

One could devise circumstances where these points matter, but in practice it seems unlikely to arise.

20.4.3 *Income/gains of UK resident*

What if a UK resident individual receives foreign income or gains which are taxable in the year of receipt, either because they are remitted to the UK or because no remittance basis claim is made in that year? The sums do not cease to be foreign income or gains, so they remain in their relevant categories (a) to (h).

[11] Because it does not meet the condition in s.830(1)(b) ITTOIA; see 16.9.2 ("Relevant foreign income").

[12] Unless within s.27 ITEPA (duties performed in UK or overseas Crown employment).

[13] See 56.6 (Territorial scope of CGT) and 17.4.3 (Foreign chargeable gains).

20.4.4 *"Foreign tax"*

I refer to income/gains which are subject to a foreign tax as **"foreign-taxed"**. This affects the mixed fund categories in the following way:

	Not foreign-taxed	**Foreign-taxed**
RFE	para (b)	para (f)
FSEI	para (c)	para (f)
RFI	para (d)	para (g)
Gains	para (e)	para (h)

The object is to increase UK tax by deferring the remittance of foreign-taxed items, so deferring foreign tax credits. This (surely unfair) policy comes at a considerable cost in complexity, since it roughly doubles the number of mixed fund categories and the record keeping.

Section 809Q(5) ITA defines "foreign tax":

> In subsection (4) "foreign tax" means any tax chargeable under the law of a territory outside the UK.

At first I thought that tax deducted under the former EU Saving Directive was not "foreign tax". The EU is not a territory outside the UK. But if tax was deducted in, say, Luxembourg, the better view is that the tax was chargeable under the law of *Luxembourg* so the tax is a foreign tax. That is clearly so if the EU directive did not have direct effect in the MS concerned and it would be strange if the position were different when the directive does have direct effect.

20.4.5 *"Subject to foreign tax"*

The RDR Manual provides:

> **RDRM35240 Remittances from mixed funds - Identifying nature of remittance** [Jan 2019]
>
> ...
>
> Occasionally UK resident remittance basis users' UK employment income may be "subject to foreign tax", that is to say another country or government authority (usually their country of nationality or citizenship) will also tax them on this income. In these cases HMRC will accept that the individual's UK source employment income may still be regarded as within Para (a) in the mixed fund, unless the individual requests otherwise, in which case it will remain to fall within Para (f) as employment income subject to a foreign tax.

This is obviously an extra-statutory concession.

> This is only relevant where the other country has in fact subjected the UK employment income under consideration to their tax. In some cases no tax will, in fact, have been due in or paid to the other country due to various exemptions and provisions, (for example the US has a "foreign earned income exclusion" provision to employment income below a certain level), so the UK employment income will be within Para (a) anyway.

This is not correct as it is not consistent with the approach applied elsewhere in deciding what is "subject to tax".[14] But it will normally suit taxpayers to treat UK earnings as category (a) so it will not be contested.

20.4.6 *Cat. (i): Other income/capital*

This is the residuary category.[15] That would include:

(1) Gifts, inheritance
(2) Borrowed money
(3) Gain on a disposal of a UK situate asset
(4) Gain which is not chargeable (eg on disposal of FOTRA security)
(5) Chargeable event gain (eg on surrender of a life policy)
(6) Foreign income of non-residents (including protected s.720 income and protected s.624 income)

Section 809Q(8) ITA provides:

> References in this section and section 809R to anything deriving from income or capital within para (i) of subsection (4) do not include—
> (a) income or gains within any of paras (a) to (h) of that subsection, or
> (b) anything deriving from such income or gains.

If a sum falls into two categories, category (i) and another, then the other category takes priority. How could a sum fall into two categories? Suppose:

(1) RFI arises to A.
(2) A gives the RFI to B, or lends it interest-free to B.

The receipt in B's hands is B's capital (within (i)); and is also derived from A's RFI; it is treated in B's hands as derived from RFI (category (b).

[14] See 108.13 ("Subject to tax").

[15] The *i* indicates the number nine; it is not the Roman numeral representing the number one.

20.4.7 *Finding income/capital for year*

Step 1 in s.809Q(3) ITA provides:

> For each of the categories of income and capital in paragraphs (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

Income for a tax year is not difficult to identify, for the tax system requires one to attribute income to a tax year and provides rules for that purpose. Chargeable gains for a tax year are not difficult to identify, for gains accrue on a particular date, and in particular cases there are rules to identify the date.

It is considered chargeable-event gains are category (i) capital for the year in which they are received. Suppose:

(1) Year 1: T uses RFI to purchase a foreign policy for £1m.
(2) Year 5: T surrenders the policy for £2m and realises a chargeable event gain of £1m (taxable on the arising basis[16]). T remits £1m.

The £1m remitted is category (i) (residuary category) of year 5, so there is no further charge on the remittance.[17]

20.4.8 *Derived property*

Section 809R ITA provides:

> (1) This section applies for the purposes of step 1 of section 809Q(3) (composition of mixed fund).
> (2) Treat property which derives wholly or in part (and directly or indirectly) from an individual's income or capital for a tax year as consisting of or containing that income or capital.

This is needed as step 1 refers to income or capital of the individual, but that must of course be taken to include sums derived from that income or capital.

For instance, suppose:

(1) Year 1: T receives £1m capital and uses it to purchase shares.
(2) Year 2: T sells the shares for £2m (£1m gain).

[16] See 70.5 (No remittance basis).

[17] The £1m remitted is not regarded as derived from the RFI: see 18.18.15 (Income from income/gains).

The proceeds of sale are a mixed fund consisting of:

(1) Gains of year 2 (the gain on the disposal); and
(2) Capital of year 1 (not year 2) because that derives from the capital of year 1.

HMRC agree: see the example of Jason in 20.5.8 (RFI + gain of different years).

20.5 Onshore transfers

20.5.1 *Scope of mixed fund rules*

Section 809Q ITA provides:

> (1) This section applies for the purposes mentioned in subsection (2) ...
> (2) The purposes referred to in subsection (1) are—
> (a) determining whether condition B in section 809L is met, and
> (b) if it is met, determining (under section 809P) the amount of income or chargeable gains remitted.

Accordingly, the mixed fund rules do not apply for the purposes of remittance basis conditions C or D. This is presumably because those conditions do not always require the use of foreign income/gains or property derived from it. Fortunately conditions C and D will not often apply. So in practice the mixed fund rules apply for most remittance purposes. When conditions C and D are in point, one applies the pre-2008 mixed fund rules.

This may allow some tax planning. Suppose:

(1) T has a mixed fund of £2m, consisting of 50% clean capital and 50% gains.
(2) T wishes to bring £1m into the UK to purchase a property.

If T brings in £1m personally, the ITA mixed fund rules apply and there is gains remitted of £1m. If T gives the fund to a non-relevant person, say, an adult child, who purchases the property and allows T to live there, the pre-2008 mixed fund rules apply, and there is a remittance of £0.5m. But the mixed-fund TAAR might apply.

20.5.2 *Onshore transfer*

Section 809Q(1) ITA provides:

> This section applies ... where
> [za] condition A in section 809L is met [property is brought/

> received/used in the UK by a relevant person][18] and—
>
> (a) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, a transfer from a mixed fund, ...

Expanding this, and focussing on property rather than services (which are less important) it should be read to mean:

> This section applies where
>
> [za] Condition A is met, [property is brought/received/used in the UK by a relevant person], and—
>
> (a) [i] the property ... is (wholly or in part) ... [property transferred by][19] a transfer from a mixed fund, or
>
> [ii] the property ... derives ... from [property transferred by] a transfer from a mixed fund...

The next part of s.809Q(1) deals with debt remittances:

> This section applies ... where
>
> [za] Condition A is met, [property is brought/received/used in the UK by a relevant person], and ...
>
> (b) [i] a transfer from a mixed fund, or
>
> [ii] anything deriving (wholly or in part, and directly or indirectly) from such a transfer,
>
> is used as mentioned in section 809L(3)(c) [used in respect of a relevant debt].

I refer to a transfer to which s.809Q applies as an **"onshore transfer"**. That term is not wholly apt[20] but it will do as a short label. The RDR Manual occasionally uses the expression "remittance transfer".

In short, there is an onshore transfer in six cases:

(1) A relevant person receives property in the UK which:
 (a) is transferred from a mixed fund or
 (b) is derived from a transfer from a mixed fund

(2) A relevant person receives a UK service, consideration for which:
 (a) is transferred from a mixed fund or

[18] See 18.14 (Remittance condition A: UK link).

[19] The words in square brackets must be implied. The drafter has referred to a transfer but intends to refer to the property transferred by the transfer, which is actually a different thing. But the meaning is clear.

[20] For instance, a transfer of funds received in the UK by a non-relevant person counts as an offshore transfer and not as an onshore transfer.

(b) is derived from a transfer from a mixed fund

(3) Property is used in respect of a relevant debt (eg repaying the debt) and the property is:
(a) transferred from a mixed fund or
(b) property derived from a transfer from a mixed fund.

20.5.3 *"Transfer"*

Transfer is not defined but the context shows that it means any payment or transfer from a mixed fund, whether or not for consideration.

If (the paradigm case) the mixed fund is a bank account, it means any withdrawal from the account.

If the mixed fund is a managed account of securities, it would include any transfer out of the account, but not:

(1) sales where the proceeds are paid into the account; or
(2) purchases where the price is paid from the account

Section 809Q(7) ITA defines the amount of a transfer:

> References in this section to the amount of the transfer include the market value of it.

It would be more accurate to refer to the value of the property transferred, not the value of the transfer, but the meaning is clear. Thus if, say, dollars are transferred to the UK from an offshore dollar account, the amount of the transfer is the value of the dollars at the time of the remittance.

20.5.4 *Onshore transfer mixed fund rule*

We can turn at last to the rule itself. Section 809Q(3) ITA provides:

> The extent to which the transfer is of the individual's income or chargeable gains is to be determined as follows.

Section 809Q(3) ITA then sets out five steps. It is easier to follow the steps if one has an example in mind. Suppose T (a remittance basis taxpayer) receives £100 per annum of each of the mixed fund categories and pays them into one mixed fund:

Category	**Type of income**	**Year 1**	**Year 2**
Para (a)	UK earnings	£100	£100
Para (b)	relevant foreign earnings	£100	£100
Para (c)	FSEI	£100	£100
Para (d)	relevant foreign income	£100	£100
Para (e)	foreign chargeable gains	£100	£100

Para (f)	foreign-taxed earnings	£100	£100
Para (g)	foreign-taxed RFI	£100	£100
Para (h)	foreign-taxed gains	£100	£100
Para (i)	residuary category	£100	£100

There is therefore a mixed fund of £1800. Suppose T remits nothing in year 1 and £1,000 to the UK in year 2. This is an onshore transfer. One follows the steps thus:

> *Step 1*
> *For each of the categories of income and capital in paras (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.*
> *"The relevant tax year" is the tax year in which the transfer occurs.*

In the example, the relevant tax year is year 2. I consider this further below but for present purposes assume that "the amount of income or capital of the individual in the mixed fund immediately before the transfer" is as set out in the table above.

> *Step 2*
> *Find the earliest paragraph for which the amount determined under step 1 is not nil.*

The earliest paragraph is para (a) and the amount determined under step 1 is £100.

> *If that amount does not exceed the amount of the transfer, treat the transfer as containing the income or capital within that paragraph (and for that tax year).*

T's transfer is treated as containing £100 employment income category (a) for year 2.

> *Otherwise, treat the transfer as containing the relevant proportion of each kind of income or capital within that paragraph (and for that tax year).*
> *"The relevant proportion" is the amount of the transfer divided by the amount determined under step 1 for that paragraph.*

(Had the transfer been (say) £50 then the relevant proportion would have been £50 ÷ £100 = 50% so the transfer would have been treated as containing £50 employment income category (a) for year 2.)

> *Step 3*
> *Treat the amount of the transfer as reduced by the amount taken into account under step 2.*

The amount of the transfer is reduced to £900.

> *Step 4*
> *If the amount of the transfer (as reduced under step 3) is not nil, start again at step 2.*
> *In step 2, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step in relation to the transfer.*

Following this iterative process a total of nine times, the transfer is treated as containing:

(a)	employment income	£100
(b)	relevant foreign earnings	£100
(c)	foreign specific employment income	£100
(d)	relevant foreign income	£100
(e)	foreign chargeable gains	£100
(f)	foreign-taxed employment income	£100
(g)	foreign-taxed RFI	£100
(h)	foreign-taxed gains	£100
(i)	residuary category	£100
Total		**£900**

The amount of the original £1,000 transfer is by this stage treated as reduced to £100. We move to the next step:

> *Step 5*
> *If the amount of the transfer (as reduced under step 3) is not nil once steps 2 and 3 have been undertaken in relation to all paragraphs of subsection (4) for which the amount determined under step 1 is not nil, start again at step 1.*
> *In step 1, read the reference to the relevant tax year as a reference to the tax year immediately before the last tax year for which step 1 has been undertaken in relation to the transfer.*

Thus we repeat step 2 a last and tenth time, reading "the relevant tax year" to mean year 1. So the transfer of £1,000 from the mixed fund is treated as being:

Category	**Type of income**	**Year**	**Amount**
Para (a)	UK earnings	2	£100
Para (b)	relevant foreign earnings	2	£100
Para (c)	FSEI	2	£100
Para (d)	relevant foreign income	2	£100
Para (e)	foreign chargeable gains	2	£100
Para (f)	foreign-taxed earnings	2	£100
Para (g)	foreign-taxed RFI	2	£100
Para (h)	foreign-taxed gains	2	£100
Para (i)	residuary category`	1	£100

In order to reach this answer for one single transfer we have had to carry out 37 steps.[21] Yet it will be common for there to be hundreds or thousands of transfers from mixed funds.

20.5.5 *Drafting style: Critique*

The effect of the onshore transfer mixed fund rule is that transfers from a mixed fund are treated as being made in the mixed fund priority order, taking more recent years before earlier years. Why didn't the statute simply say so? For a discussion of the drafting style, see 61.15.7 (Method statements: Critique). But the fundamental problem is not the drafting, but conception of the mixed fund rule.

20.5.6 *Examples: onshore transfers*

The RDR Manual provides examples. I set them out more or less verbatim, but rearrange and omit some irrelevant detail for clarity.

20.5.7 *Mixed RFE/RFI/EI of 1 year*

The first example involves a single onshore transfer out of a mixed fund containing RFE, RFI and UK employment income of one year.

RDRM 35280 Example 1 (Amelia) [Jan 2019]
A, a remittance basis user, has an offshore account with mixed funds as follows:
– foreign earnings from two employers totalling £40,000 per month, half of which is subject to foreign tax [mixed fund categories (b) and (f)]
– relevant foreign income of £10,000 per quarter, which is not subject to foreign tax [mixed fund category (d)].
– some of her UK employment income (£50,000 per month) which has already been subject to tax in the UK is paid into the same offshore bank account [mixed fund category (a)]

[21] Steps 1–4 were each carried out 9 times and step 5 once.

On 15 October 2010 A purchases an aircraft for £460,000, which she brings to the UK.

Since the account was opened in the tax year, we have an account with 20 credits and one debit (an onshore transfer) thus:

2009-10		**Credit (Debit)**	**Balance**	**Category**
30 Apr	UK salary	£50,000	£50,000	(a)
30 Apr	Overseas salary NFT[22]	£20,000	£70,000	(b)
30 Apr	Overseas salary FT[23]	£20,000	£90,000	(f)
31 May	UK salary	£50,000	£140,000	(a)
31 May	Overseas salary NFT	£20,000	£160,000	(b)
31 May	Overseas salary FT	£20,000	£180,000	(f)
2 Jun	RFI	£10,000	£190,000	(d)
30 Jun	UK salary	£50,000	£240,000	(a)
30 Jun	Overseas salary NFT	£20,000	£260,000	(b)
30 Jun	Overseas salary FT	£20,000	£280,000	(f)
31 Jul	UK salary	£50,000	£330,000	(a)
31 Jul	Overseas salary NFT	£20,000	£350,000	(b)
31 Jul	Overseas salary FT	£20,000	£370,000	(f)
31 Aug	UK salary	£50,000	£420,000	(a)
31 Aug	Overseas salary NFT	£20,000	£440,000	(b)
31 Aug	Overseas salary FT	£20,000	£460,000	(f)
2 Sept	RFI	£10,000	£470,000	(d)
30 Sept	UK salary	£50,000	£520,000	(a)
30 Sept	Overseas salary FT	£20,000	£540,000	(f)
30 Sept	Overseas salary NFT	£20,000	£560,000	(b)
15 Oct	Aircraft purchase	(£460,000)	£100,000	

Step 1 Identify the "amount of transfer" in the relevant year (2010-11) £460,000

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a) UK employment income	£300,000
Para (b) Relevant foreign earnings (not subject to a foreign tax)	£120,000
Para (d) RFI (not subject to a foreign tax)	£20,000
Para (f) Employment income subject to a foreign tax	£120,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: Para (a) £300,000

Step 3 Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.

£460,000
-£300,000
£160,000

Step 4 Find the next paragraph/amount for that tax year. In the order

[22] Not foreign-taxed.

[23] Foreign-taxed.

of preference listed above repeat Steps 2 and 3.	
Step 2 repeated: Para (b)	£120,000
Step 3 repeated Amount transferred further reduced to:	£40,000
Step 4 In the order of preference listed above repeat Steps 2 and 3.	
Step 2 repeated: Para (d)	£20,000
Step 3 repeated Amount transferred further reduced to:	£20,000
Step 4 In the order of preference listed above repeat Steps 2 & 3.	
Step 2 Para (f)	£120,000
Step 3 If the amount at Step 2 is equal to or more than the remaining amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain	£nil

There has been a transfer to the UK of £460,000. Of this, £300,000 is from UK employment income which has already been taxed, so will not be taxed again. There have also been taxable remittances of A's relevant foreign earnings (£140,000 (£20,000 of which was subject to a foreign tax) and relevant foreign income (£20,000)).
£100,000 of taxed foreign employment income (para f) remains in the offshore account fund.

Moral: A should have kept her taxed foreign earnings separate so that they could be remitted. The tax on that remittance would be less because the foreign tax credit would be available. If A had kept all the sources of income separately, she would also have been saved the cost of the computation.

20.5.8 *Mixed RFI/gain of different years*

The next example is a single onshore transfer from a mixed fund with RFI of earlier years and a chargeable gain of a later year.

RDRM35290 Example 2 (Jason) [Jan 2019]
In Year 1 J purchases shares in a foreign company for £8m. The £8m represents J's 'clean' capital, being perhaps an inheritance or similar such windfall.
In Year 3 J later sells the shares for £10m, which produces a £2m chargeable gain. The sale proceeds are credited in Year 3 to his overseas bank account that contains some relevant foreign income from the last two tax years, but no other monies.
There is now a mixed fund, containing:
£8m capital from Year 1,
£2m a foreign chargeable gain from Year 3
relevant foreign income from Years 2 and 3.
Later in Year 3 J, a remittance basis user, brings £5m to the UK from that account. The ordering rules in ITA07/s809Q mean that all of the relevant foreign income and the £2m gain from Year 3 is treated as remitted before any of the capital can be considered as remitted.
If the mixed fund also included other amounts of income or capital gains for that tax year (Year 2 or 3), those amounts must also be taken into account before any of the 'capital'

element of the proceeds, (that is the £8m that is not a gain) realised by the sale of shares can be considered.

Moral: J should have kept the proceeds of the share sale in a separate account. Then the £5m remittance would have been £2m gain and £3m capital.

Better, J should have disposed of the shares by two separate disposals of £5m each, and remitted the proceeds of the first disposal. Then remittance would have been £1m gain and £4m capital.

20.5.9 *Fund accruing over 2 years*

The next example involves a single onshore transfer out of a mixed fund of RFE, RFI and UK earnings and chargeable gains, accruing over a two year period.

RDRM35300 Mixed Funds: Example 3 - single remittance (Jeff) [Jan 2019]
J has:
- UK salary of £10,000 a month paid into an overseas bank account [mixed fund category (a)].
- a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the same bank account [mixed fund category (f)].

Both salaries are paid on the last day of each month.
- Dividends from a shareholding in a foreign company are also paid into the account [mixed fund category (g)].

In Year 0, J had purchased shares in a foreign company for £8m. The £8m is‘clean’ capital [mixed fund category (i)]. J sells the shares in Year 2 for £10m, which produces a £2m chargeable gain [mixed fund category (e)]..

J’s remittances to the UK from this fund in Year 2 are £10m.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are credited net of overseas withholding taxes.

		Credit (Debit)	**Balance**	**Category**
Year 1			£0	
31 Mar	UK salary (net of tax)	£10,000	£10,000	(a)
31 Mar	Overseas salary FT	£5,000	£15,000	(f)
Year 2				
30 Apr	UK salary	£10,000	£25,000	(a)
30 Apr	Overseas salary	£5,000	£30,000	(f)
15 May	Dividend	£2,000	£32,000	(g)
31 May	UK salary	£10,000	£42,000	(a)
31 May	Overseas salary	£5,000	£47,000	(f)
18 Jun	Sale of shares: gain	£2,000,000		(e)
	Sale of shares: capital	£8,000,000	£10,047,000	(i)
30 Jun	UK salary	£10,000	£10,057,000	(a)

30 Jun	Overseas salary	£5,000	£10,062,000	(f)
25 Jul	Dividend	£2,000	£10,064,000	(g)
31 Jul	UK salary	£10,000	£10,074,000	(a)
31 Jul	Overseas salary	£5,000	£10,079,000	(f)
31 Jul	Bank interest	£5,000	£10,084,000	(d)
14 Aug	Transfer to UK account	(£10,000,000)	£84,000	

Applying the ordering rules in S809Q to the account immediately before the transfer:

Step 1 Identify the "amount of transfer" in relevant tax year (Year 2) **£10,000,000**

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax	Year 1: £10,000 Year 2: £40,000
Para (d) Relevant foreign income (not subject to a foreign tax) *Bank interest*	Year 2: £5,000
Para (e) Foreign chargeable gains (not subject to a foreign tax)	Year 2: £2,000,000
Para (f) Employment income subject to a foreign tax	Year 1: £5,000 Year 2: £20,000
Para (g) Relevant foreign income subject to a foreign tax *Foreign dividends*	Year 2: £4,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:

Para (a) £40,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £10m less £40k = £9,960,000

Step 4 Find the next paragraph/amount for that tax year.
In the order of preference listed above repeat Steps 2 and 3.

Step 2 **Para (d)** −£5,000
Step 3 £9,955,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2 **Para (e)** −£2m
Step 3 £7,955,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2 **Para (f)** −£20,000
Step 3 £7,935,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2 **Para (g)** −£4,000
Step 3 £7,931,000

At this point all of the income of Year 2 has been matched against the remittance.

Step 5 If the amount of the transfer (as reduced under Step 3) is not nil once steps 2 and 3 have been undertaken for all of the capital, income and gains of the relevant tax year repeat the exercise using the income, capital and gains of the next earliest year (Year 1)

Step 2	**Para (a)**	−£10,000
Step 3		£7,921,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	**Para (f)**	−£5,000
Step 3		£7,916,000

At this point all of the income of Year 1 has been matched against the remittance

Step 5 If the amount of the transfer (as reduced under Step 3) is not nil once steps 2 and 3 have been undertaken for all of the capital, income and gains of the relevant tax year repeat the exercise using the income, capital and gains of the next earliest year (Year 0)

Step 2 - If the amount is more than the [residual] 'relevant amount', treat the whole of the remittance as coming from that item of income or gain **Para (i)** £8m

The result of this exercise is that

- All of J's UK salary in tax year 2 is deemed to have been brought to the UK first.
- Similarly all of his foreign income and gains of tax year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.
- J's income of Year 1 is also matched against the remittance.
- £7,916,000 capital has also been brought to the UK.

Until such time as further amounts of income and gains are credited to the overseas account, the mixed fund contains £84,000 of capital (from the sale of shares).

The next part of the example has two more transfers from the mixed fund.

RDRM35310: Mixed Funds: Example 3 - (continuation) remittance of funds covering two years) [Jan 2019]

Immediately after the £10m transfer in Year 2 (refer to example 3) J's mixed fund contains £84,000 of capital from Year 0 (from the sale of shares).

For the rest of Year 2, J continues to have his UK salary of £10,000 a month and his 'relevant foreign earnings' of £5,000 a month paid into that same account. Both salaries are paid on the last day of each month. There are no further credits or debits from the account in Year 2.

In Year 3 J purchases shares in a UK company by direct debit from this account (£150,000). He also transfers £5,000 to meet daily living expenses. These amounts are remittances from a mixed fund to which the rules in s809Q apply.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are also credited to the account net of overseas withholding taxes.

J's overseas bank account continuation

		Credit (Debit)	**Balance**	**Category**
Year 2	Balance b/f		£84,000	
31 Aug	UK salary	£10,000	£94,000	(a)
31 Aug	Overseas salary	£5,000	£99,000	(f)
30 Sept	UK salary (net of tax)	£10,000	£109,000	(a)
30 Sept	Overseas salary (net of tax)	£5,000	£114,000	(f)
31 Oct	UK salary	£10,000	£124,000	(a)

31 Oct	Overseas salary	£5,000	£129,000	(f)
30 Nov	UK salary	£10,000	£139,000	(a)
30 Nov	Overseas salary	£5,000	£144,000	(f)
31 Dec	UK salary	£10,000	£154,000	(a)
31 Dec	Overseas salary	£5,000	£159,000	(f)
31 Jan	UK salary	£10,000	£169,000	(a)
31 Jan	Overseas salary	£5,000	£174,000	(f)
28 Feb	UK salary	£10,000	£184,000	(a)
28 Feb	Overseas salary	£5,000	£189,000	(f)
31 Mar	UK salary	£10,000	£199,000	(a)
31 Mar	Overseas salary	£5,000	£204,000	(f)
Year 3				
30 Apr	UK salary	£10,000	£214,000	(a)
30 Apr	Overseas salary	£5,000	£219,000	(f)
15 May	Dividend	£2,000	£221,000	(g)
31 May	UK salary	£10,000	£231,000	(a)
31 May	Overseas salary	£5,000	£236,000	(f)
30 Jun	UK salary	£10,000	£246,000	(a)
30 Jun	Overseas salary	£5,000	£251,000	(f)
30 Jun	Purchase UK shares	(£150,000)	£101,000	
3 Jul	Transfer to UK	(£5,000)	£96,000	

The direct debit on 30 June (£150,000) is a remittance from a mixed fund. Applying the ordering rules in S809Q to the account immediately before the transfer:

Step 1 Identify the "amount of transfer" in the relevant tax year (Year 3) **£150,000**

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for the relevant tax year (Year 3) immediately before the date of the transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax	£30,000
Para (f) Employment income subject to a foreign tax	£15,000
Para (g) Relevant foreign income subject to a foreign tax	£2,000

Step 2 Identify the earliest paragraph above for the relevant year (Year 3), which has an amount of income or gain in the mixed fund:
Para (a) £30,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £150,000

-£30,000

£120,000

Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (f)** £15,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the

amount identified in Step 2. £120,000
-£15,000
£105,000

Step 4 Repeat Steps 2 and 3.
Step 2 Identify the earliest paragraph: **Para (g)** £2,000
Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £105,000
-£2,000
£103,000

At this stage all of the amounts credited to the account in Year 3 have been matched against remitted amounts. Income and capital of the next previous year (Year 2) must now be considered - so return to Step 1 for Year 2.

Step 1 Identify the separate amounts of income, capital gains and capital present for Year 2 before transfer:
Para (a) Employment income (including UK employment income) not subject to a foreign tax £80,000
Para (f) Employment income subject to a foreign tax
£40,000

Step 2 Identify the earliest paragraph above for the relevant year (Year 2), which has an amount of income or gain in the mixed fund: **Para (a)** £80,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £103,000
-£80,000
£23,000

Step 4 Find the next paragraph/amount for that tax year.
In the order of preference listed above repeat Steps 2 and 3.
Step 2 Identify the earliest paragraph: **Para (f)** £40,000
Step 3 If the amount is more than the [residual] "transfer amount", the whole of the remittance comes from that paragraph. £23,000

The £150,000 transfer is therefore regarded as a remittance of:

Amount	**Type of income**	**Category**	**Income of year**
£110,000	UK employment income	(a)	£30k Year 3 + £80k Year 2
£38,000	Relevant foreign income	(f)	£15k Year 3 + £23k Year 2
£2,000	Relevant foreign earnings	(g)	Year 3
£150,000			

Note
The transfer on 3 July of £5,000 to meet daily living expenses will similarly be regarded as coming from the 'earliest paragraph' in the mixed fund, which is paragraph (f) containing £17,000 of relevant foreign earnings from Year 2.

Reconciliation

The mixed fund still contains:

£84,000	Capital of Year 0 (from the sale of shares in Year 2) together with
£12,000	Relevant foreign earnings from Year 2, and
£96,000	

The result of this exercise is that:

- All of J's UK salary in Year 3 (£30,000) is deemed to have been brought to the UK first and is not a taxable remittance. In addition, J has remitted £80,000 of UK employment income from Year 2 that is also not taxable again upon remittance.
- Similarly all of his relevant foreign income (£2,000) and overseas employment income of Year 3 (£15,000) together with £28,000 of relevant foreign earnings from Year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax

Moral: J should have kept his £150k capital receipt separate and remitted from that. That would have reduced the tax on the remittance and saved the costs of the computation.

20.6 Offshore transfer

Section 809R ITA provides:

> (1) This section applies for the purposes of step 1 of section 809Q(3) (composition of mixed fund)...
> (4) Treat an offshore transfer from a mixed fund as containing the appropriate proportion of each kind of income or capital in the fund immediately before the transfer.
> "The appropriate proportion" means the amount (or market value) of the transfer divided by the market value of the mixed fund immediately before the transfer.

I refer to this as the **"offshore transfer rule"**. The scope of the rule is limited to cases where the onshore transfer rule applies, as to which, see 20.5.1 (Scope of mixed fund rules).

20.6.1 *"Transfer"*

"Transfer" is not defined.

It should have the same meaning as in s.809Q[24] so there is a transfer where the funds in the hands of the transferee are regarded as derived from the mixed fund, but not otherwise. For the meaning of derived in this context, see 18.18 (Derived property).

[24] See 20.5.3 ("Transfer").

20.6.2 *"Offshore" transfer*

Section 809R(5) ITA defines "offshore transfer":

> A transfer from a mixed fund is an "offshore transfer" for the purposes of subsection (4) if and to the extent that section 809Q does not apply in relation to it.

So far the definition seems clear. One must ask whether s.809Q applies. Section 809Q applies (in short) if property from a mixed fund is received in the UK by a relevant person.[25] A transfer to a UK bank account is an onshore transfer. So a transfer to a foreign account appears to be an offshore transfer.

But suppose:
Year 1: A sum is transferred from a mixed fund to a foreign account ("the first transfer").
Year 2: The sum (now in the foreign account) is transferred to a UK account ("the second transfer").

It appears that in year 1 the first transfer is not an onshore transfer, but in year 2 it becomes one.[26] To avoid this result, s.809R(6) ITA provides:

> Treat a transfer from a mixed fund as an "offshore transfer" (and section 809Q as not applying in relation to it, if it otherwise would do) if and to the extent that, at the end of a tax year in which it is made—
> (a) section 809Q does not apply in relation to it, and
> (b) on the basis of the best estimate that can reasonably be made at that time, section 809Q will not apply in relation to it.

If condition (a) and (b) of this subsection are *both* satisfied, there are two consequences:

(1) One must treat the transfer as an offshore transfer.
(2) One must treat section 809Q as not applying in relation to it, if it otherwise would do.

Unless condition (a) and (b) are both satisfied, this subsection does not apply.

The condition in subsection (6)(a) is clear enough. One asks whether s.809Q applies at the end of the tax year. Eg this condition is met if:

[25] See 20.5.2 (Onshore transfer).

[26] Section 809Q applies because (1) remittance condition A is met, and (2) the property received in the UK derives indirectly from the first transfer from the mixed fund.

(1) T transfers a sum from a mixed fund to a new offshore account on 6th April 2008, and
(2) the money is still there on 5th April 2009, or the money has been used to purchase a non UK asset.

Subsection (6)(b) is a challenge. At the end of the tax year, one must ask whether s.809Q will or will not apply in relation to the transfer. In relation to some transfers one can say with certainty that s.809Q will not apply. If the transferor draws a sum from a mixed fund to pay for a dinner outside the UK, then s.809Q will not apply to it because nothing will be received in the UK. That is an offshore transfer.

If a person transfers a sum to an offshore account and does expect to spend it in the UK that is an onshore transfer when remitted to the UK.

20.6.3 *Recomputation problem*

I use the term "**problematic transfer**" (for reasons which will become clear) to describe a transfer made in the following circumstances (by no means unusual):

(1) In year 1 T transfers a sum from a mixed fund to an account outside the UK.
(2) At the end of year 1 the transferred sum is not received in the UK.
(3) T cannot say at the end of the year 1 that "section 809Q will not apply in relation to" the problematic transfer. This may be because:
 (a) At the end of year 1, T does expect to spend the sum in the UK but not until a later year, say, year 5; or
 (b) T has not decided whether to remit the sum to the UK or not.

 At the end of year 1, the problematic transfer is not an onshore transfer. It is an offshore transfer within the definition in s.809R(5). Admittedly it is not within subsection 809R(6) but that subsection does not stop any transfer being an offshore transfer, if applicable it treats onshore transfers as offshore transfers.
(4) Suppose in a later year (say year 5) T transfers the sum to the UK. I refer to this as its **"subsequent remittance**."

On one view, the problematic transfer changes status at the time of its subsequent remittance and becomes an onshore transfer. That is workable if in the meantime T has not made any other onshore transfers from the mixed fund. It is not workable if in the meantime T has made other transfers from the mixed fund, because:

(1) T needed to know at the time what income or gains those other

transfers included.

(2) There cannot be a recomputation of the tax effect of the other transfers in earlier years on the basis that the problematic transfer has turned out to be an onshore transfer after all. I think that is obviously impractical, but for good measure it is also inconsistent with s.809R(9) ITA which provides:

> If section 809Q applies in relation to more than one transfer from a mixed fund, when undertaking step 1 in relation to the second or any subsequent transfer take into account the effect of step 2 of section 809Q(3) (composition of transfer) as it applied in relation to each earlier transfer.

It is difficult to make a coherent and workable tax regime out of this intractable statutory material, which is not surprising given the way in which it was enacted. I think the best solution is to say that s.809R(6)(b) is misconceived, that a problematic transfer is only an onshore transfer if s.809Q applies to it in the year of the transfer. If at the end of the year it is an offshore transfer, its status does not change later. This can be justified on the basis that IT is an annual tax.[27]

The alternative view is that the problematic transfer does change its status and becomes an onshore transfer, on the occasion of its subsequent remittance. One carries through the implications for tax purposes so far as that is possible, so the result is that tax is charged as if the problematic transfer was made after the subsequent transfers.

If that were so, another issue arises. Suppose when asked whether the sum will be remitted, T says (as may well be said) that T will remit it if represents an offshore transfer. The question whether a sum will be remitted to the UK may depend on the tax position, ie if it represents an offshore transfer it will be remitted and if it represents an onshore transfer it will not. It is therefore impossible to answer the s.809R(6)(b) question, whether the sum will be remitted, on the view that a problematic transfer becomes an onshore transfer when remitted; for if it is an offshore transfer it will be remitted (and so is an onshore transfer) but if it is an onshore transfer it will not be remitted (and so is an offshore transfer).

20.6.4 *HMRC explanation*

EN Clause 23 sch 7 Remittance Basis Amendments 463 to 481 explains

[27] See 14.3.4 (IT is an annual tax).

s.809R(4) ITA:

> 7. Amendment 465 introduces a new subsection [4], dealing with cases where transfers are made wholly offshore. The new rules aim to ensure that where a transfer is made offshore from fund A to fund B, and remittances to the UK are then made from fund A or fund B, the normal ordering rules for mixed funds apply, as they would have done had the transfer to Fund B not been made before the remittance.

This is an inaccurate precis of the offshore transfer mixed fund rule. The EN continues:

> 8. So if fund A consisted of equal amounts of untaxed income and capital, and half the fund was transferred to fund B, it cannot be argued that fund A or B consisted solely of capital, and remittances from fund A or B were not therefore taxable. Instead, where there is an offshore transfer, so that the normal mixed fund ordering rules do not apply, fund B is to be treated as containing the same proportion of the different categories of income and capital as the original fund, in relation to the amount transferred.

20.6.5 *Transfer part on/off-shore*

Section 809R(8) ITA provides:

> If section 809Q applies in relation to part of a transfer, apply that section in relation to that part before applying subsection (4) in relation to the rest of the transfer.

In practice this will rarely occur.

20.6.6 *Examples: on/off-shore transfers*

The RDR Manual provides a straightforward example of onshore and offshore transfers from an account with different categories of income and gains:

> **RDRM35430** [Jan 2019], **RDRM35440** [Jan 2019]
> **Example 1** (Ahmid)
> A, a remittance basis user has an offshore bank account into which is paid both UK source (taxed) income and his foreign income and gains. A makes regular **transfers from this account to his UK account to meet his UK living expenses.**

		Credit (Debit)	Balance	Category	Note
10 Apr	XYZ (CI) Ltd – proceeds from sale of shares	£1,000,000	£1,000,000	(e)	1
15 Apr	RFI dividend	£10,000	£1,010,000	(g)

30 Apr	Bank interest	£5,000	£1,025,000	(d)	
30 Apr	Overseas salary[28]	£5,000	£1,030,000	(f)	
3 May	Transfer to UK a/c	(£5,000)	£1,025,000		2
15 May	Offshore dividend	£2,000	£1,027,000	(g)	
31 May	UK salary	£10,000	£1,037,000	(a)	
31 May	Overseas salary	£5,000	£1,042,000	(f)	
31 May	ABC (IoM) Ltd – purchase of shares in foreign company	(£1,000,000)	£42,000		3
3 Jun	Transfer to UK a/c	(£5,000)	£37,000		4
30 Jun	UK salary	£10,000	£47,000	(a)	
30 Jun	Overseas salary	£5,000	£52,000	(f)	
3 Jul	Transfer to UK a/c	(£5,000)	£47,000		5
31 Jul	UK salary	£10,000	£57,000	(a)	
31 Jul	Overseas salary	£5,000	£62,000	(f)	
3 Aug	Transfer to UK a/c	(£5,000)	£57,000		6
15 Aug	Cheque – ZZZ Cars Ltd London	(£25,000)	£32,000		7

Note 1

The sale price of the shares includes a gain over the original purchase price of £150,000 that has not been taxed. The purchase was made long before 6 April 2008 and was made using accumulated foreign income and gains which were treated as clean capital.

The mixed fund provisions do not apply to foreign income or gains that arose or accrued before 6 April 2008 (Sch 7 FA 2008 para 89). This means that it is not possible to apply the "mixed fund" rules to the £850,000 used to buy the shares.

Note 2

Using the ordering rules at ITA07/s809Q(1), the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the "earliest paragraph" of income or gains within the mixed fund.

Working this through this example:

The £5,000 transfer to the UK on 3 May is a "transfer" from a mixed fund within section 809Q. Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (g)	RFI subject to tax	£10,000
Para (i)	Income or capital not within another para	£850,000

The remittance is regarded as coming from the "earliest paragraph", that is Para

[28] Net of tax.

(a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed.

Note 3

The purchase of shares on 31 May is an "offshore transfer"; by the end of the tax year the shares purchase have not, nor on best estimate are they likely to be, a remittance transfer [in my terminology an onshore transfer] so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of the following

Para (a)	employment income	£ 15,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	RFI subject to tax	£12,000
Para (i)	Income or capital not within another para	£850,000
		£1,042,000

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund.

Para (a)	employment income	£14,396
Para (d)	RFI	£4,798
Para (e)	Chargeable gains	£143,953
Para (f)	Earnings subject to a foreign tax	£9,597
Para (g)	RFI subject to tax	£11,517
Para (i)	Income or capital not within another para	£815,739
		£1,000,000

Note 4

The £5,000 transfer on 3 June to the UK is a "transfer" to the UK from a mixed fund, and is within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a)	employment income	£604
Para (d)	RFI	£202
Para (e)	Chargeable gains	£6,047
Para (f)	Earnings subject to a foreign tax	£403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The transfer is regarded as coming from each of the paragraphs in order; that is £604 from Para (a), and a taxable remittance of £4,396, being £202 from Para (d) and £4,194 from Para (e).

Note 5 and 6

Both of these £5,000 transfers are to the UK. There have been credits to the fund between the last transfer (note 4) and this transfer and the fund now contains some employment income (Para a) and additional amounts of foreign earning subject to foreign tax (Para f) in addition to the residue following the last transfer.

The £5,000 transfers made on 3 July and 3 August are regarded as coming from the earliest paragraph of income, that is Para (a) – £10,000 of UK employment income credited to the account on 30 June.

Note 7

The cheque remittance on 15 August is £25,000. This amount was used to buy a car from a UK company. This is also a remittance within s809Q.

Immediately before the transfer the mixed fund consists of:

Para (a)	employment income	£10,000
Para (d)	RFI	£nil
Para (e)	Chargeable gains	£1,853
Para (f)	Earnings subject to a foreign tax	£10,403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The cheque remittance is regarded as coming from each of the paragraphs in order; that is £10,000 from para (a), £1,853 from para (e) and £10,403 from Para (f), £483 from Para (g) and £2,261 from Para (i).

The remaining £32,000 at 15 August is also within Para (i)

20.6.7 *Example 1(a)*

Example 1(a) – Transfer to another account To continue the offshore account in example 1:

Date		**Credit (Debit)**	**Balance**	**Category**	**Note**
	Balance b/f		£32, 000		
31 Aug	Overseas salary (net of tax)	£5,000		f	
31 Aug	UK salary	£10,000		a	
3 Sept	Transfer to UK a/c	(£5,000)			1
15 Sept	Cheque – XYZ Travel Services (CI) Ltd	(£10,000)			2
30 Sept	Overseas salary (net)	£50,000		f	
30 Sept	Overseas Dividend	£350,000		g	
30 Sept	UK salary	£180,000		a	
3 Oct	Transfer to UK a/c	(£5,000)			3
15 Oct	Transfer to Swiss a/c	(£350,000)			4

Note 1

Immediately before the transfer on 3 September the mixed fund contained:

Para (a)	Employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the 'earliest paragraph', that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed,

Note 2
The next payment from the account is £10,000 for the family holiday flights to the USA. The full payment is a remittance because the service provided is in the UK – the flights begin or end in London.
The transfer is regarded as coming from each of the paragraphs in order; that is £5,000 from para (a) and a taxable remittance consisting of £5,000 from para (f).
Note 3
Immediately before the remittance on 3 October the mixed fund contained:

Para (a)	Employment income	£180,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the 'earliest paragraph', that is para (a), so the £5,000 is UK employment income.
Note 4
The transfer of £350,000 to a new Swiss bank account is an offshore transfer. Immediately before the offshore transfer on 15 October the IoM bank account (mixed fund) is regarded as containing:

Para (a)	Employment income	£175,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	£32,000
		£607,000

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	Employment income	£100,906
Para (f)	Earnings subject to a foreign tax	£28,830
Para (g)	RFI	£201,812
Para (i)	Income or capital not within another para	£18,452

The Swiss bank account is another 'mixed fund', containing the income, gains and capital of the transferred amount. Assuming nothing else is added or taken away from the Swiss account in the interim, if in a couple of years time A decides to remit £120,000 to the UK from his Swiss bank account, the same ordering rules will apply to the Swiss fund, so the remittance is regarded as consisting of £100,906 from para (a) and £19,094 from para (f).

20.6.8 *Example 2*

The next example has another mix of offshore and onshore transfers.

RDRM 35450 [Apr 2019]
Example 2 (Lorraine)
L, a remittance basis user, opens an offshore bank account in Bermuda into which is paid both UK source (taxed) income and her foreign income and gains. L makes a few transfers from this account to her UK account to meet UK living expenses. She also transfers money from this account to her other offshore account in Jersey, as well as using it for several offshore purchases.

Account 1 Bermuda

		Credit (Debit)	Balance	Category	Note
Year 1					
15 Jan	Capital	£1,000,000	£1,000,000	(i)	1
30 Jan	UK salary	£10,000	£1,010,000	(a)	
30 Jan	Bank interest	£5,000	£1,015,000	(d)	
30 Jan	Overseas salary (net of tax)	£5,000	£1,020,000	(f)	
3 Feb	Transfer to UK a/c	(£5,000)	£1,015,000		2
28 Feb	Dividend	£2,000	£1,017,000	(g)	
28 Feb	UK salary	£10,000	£1,027,000	(a)	
28 Feb	Overseas salary	£5,000	£1,032,000	(f)	
3 Mar	Purchase of shares in foreign company	(£800,000)	£232,000		3
10 Mar	Transfer to UK a/c	(£5,000)	£227,000		4
31 Mar	UK salary	£10,000	£237,000	(a)	
31 Mar	Overseas salary (net of tax)	£5,000	£242,000	(f)	
2 Apr	Transfer to UK a/c	(£5,000)	£237,000		5
Year 2					
30 Apr	UK salary	£10,000	£247,000	(a)	
30 Apr	Overseas salary (net of tax)	£5,000	£252,000	(f)	
3 Mar	Transfer to UK a/c	(£5,000)	£247,000		6
15 Mar	Transfer to UK a/c	(£100,000)	£147,000		7
31 May	UK salary	£10,000	£157,000	(a)	
31 May	Overseas salary (net of tax)	£5,000	£162,000	(f)	
8 Jun	Transfer – A2Z travel services	(£20,000)	£142,000		8

Year 1

Note 1

The £1,000,000 credited to the account on 15 January was inherited under L's great aunt's will, and is "clean" capital.

Note 2

The £5,000 transfer to the UK on 3 May is a "remittance" from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Inherited capital	£1,000,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 3

The purchase of shares on 3 March (£800,000) is an "offshore transfer". By the end of the tax year the shares purchased have not been sold, brought to the UK or otherwise used so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of the following:

Para (a)	Employment income	£15,000
Para (d)	Relevant foreign income	£5,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	Relevant foreign income subject to tax	£2,000
Para (i)	Inherited capital	£1,000,000
		£1,032,000

The "offshore transfer" (the shares purchase) consists of an appropriate proportion (100/129) of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£11,628
Para (d)	RFI	£3,876
Para (f)	Earnings subject to a foreign tax	£7,752
Para (g)	RFI subject to tax	£1,550
Para (i)	Income or capital not within another para	£775,194
		£800,000

Note 4

The £5,000 transfer to the UK on 10 March is a "remittance" from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer the mixed fund consists of:

Para (a)	employment income	£3,372
Para (d)	RFI	£1,124
Para (f)	Earnings subject to a foreign tax	£2,248
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806
		£232,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), £3,372, para (d) £1,124 and para (f) £504. Of this amount, £1,124 and £504 are taxable remittances.

Note 5

The next remittance on 2 April is again £5,000. Two further amounts have been credited to the account which now consists of

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£6,744

Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

The account now consists of:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806
		£237,000

At the end of the tax year, L has made taxable remittances of: £1,628 (para (d) £1,124 and para (f) £504). She has also made two offshore transfers:

Year 2

At the start of the next tax year, L continues to make remittances to the UK from the overseas account. The "mixed fund" rules mean that income gains and capital of a tax year are treated in priority to income gains and capital of a previous year.

Note 6

The £5,000 transfer to the UK on 3 May is a "remittance" from a mixed fund within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 7

On 15 May, L transfers £100,000 to her UK bank account. This is a "remittance" from a mixed fund within section 809Q(1).

Applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000

So £10,000 of the transfer comes from these two paragraphs of Year 2 income. The outstanding balance of £90,000 must be identified by applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 1 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

So the remaining £90,000 of the transfer will regarded as consisting of monies from para (a) £5,000, Para (f) £6,744, Para (g) £450 and Para (i) £77,806 from

Year 1.
The mixed fund now consists of:

Para (i)	Income or capital not within another para	£147,000

20.7 Income/gains used to pay debt

Section 809R(3) ITA provides:

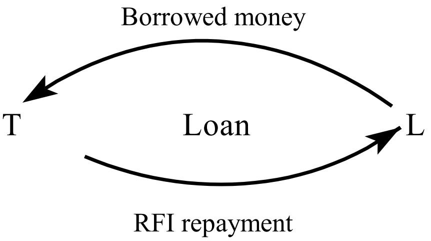
> If a debt relating (wholly or in part, and directly or indirectly) to property[29] is at any time satisfied (wholly or in part) by—
>
> (a) an individual's income or capital for a tax year, or
>
> (b) anything deriving (directly or indirectly) from such income or capital,
>
> from that time treat the property as consisting of or containing the income or capital if and to the extent that it is just and reasonable to do so.

I refer to this as the **"s.809R backward-tracing rule"**.

Suppose:

(1) T borrows from L and receives "the borrowed money" outside the UK.

(2) T uses RFI to repay the debt to L so T retains the borrowed money.



The debt is not a relevant debt, so its repayment is not a taxable remittance under the debt remittance rules.

In the absence of a statutory provision, one would not usually say that the borrowed money was derived from the RFI, or that the borrowed money consists of or contains the RFI.[30] However the debt relates to the borrowed money. So applying the s.809R backward-tracing rule, the borrowed money is treated as consisting of or containing the RFI, so far as is just and reasonable.

When is that just and reasonable? It seems just and reasonable in

[29] The phrase "debt relating ... to property" is taken from the definition of relevant debt; for discussion, see 18.22 (Debt "related" to property (debt-related asset)).

[30] See 20.7 (Income/gains used to repay debt).

principle, and clearly so in cases of avoidance.

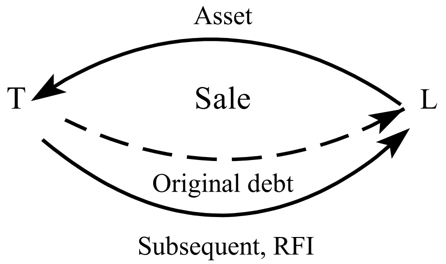
If the debt is satisfied in part by RFI, and in part by clean capital, then it would be just and reasonable to regard the proportionate part of the borrowed money as derived from the RFI.

Cases where it is not just and reasonable to apply the s.809R(3) backward-tracing rule may include:

(1) If the sums involved were small.
(2) If it was not reasonably practical to make that tracing exercise (but the requirement in s.809R(3) that the debt must "relate" to the borrowed money is another route to the same destination).
(3) If the borrowed money was received/brought/used in the UK. Then the debt would be a relevant debt and its repayment is a taxable remittance under the debt remittance rules (or under ordinary principles). The taxpayer cannot argue that s.809R(3) prevents a remittance under the debt remittance rules as that would not be just and reasonable.

The same analysis applies if:

(1) T purchases a non-UK asset from L and left the purchase price outstanding as a debt.
(2) T uses the RFI to repay the debt.



Applying the s.809R backward-tracing rule, the asset will be treated as consisting of or containing the RFI so far as just and reasonable.

It is curious that the s.809R backward-tracing rule has been made a part of the mixed fund rules, and does not apply more generally.

20.7.1 *Backward tracing: example*

The RDR Manual gives an example involving repayment of a loan (not a relevant loan) from a mixed fund.

RDRM35470 [Jan 2019]
Example (Frankie)
... F, a remittance basis user, has a bank account in Jersey into which is paid both UK source (taxed) income and foreign income and gains.
F makes transfers from the Jersey account to his UK account to meet his UK living expenses.
On 28 May, F acquires a loan from his Jersey bank that he uses to purchase an asset in Jersey for £200,000. He repays the loan from this account.

		Credit (Debit)	**Balance**	**Category**	**Note**
6 Apr	Clean capital	£80,000	£80,000	(i)	
15 Apr	RFI NFT	£10,000	£90,000	(d)	
30 Apr	UK salary	£10,000	£100,000	(a)	
30 Apr	RFI interest	£5,000	£105,000	(d)	
30 Apr	RFE NFT	£5,000	£110,000	(b)	
3 May	Transfer to UK a/c	(£5,000)	£105,000		1
15 May	RFI	£2,000	£107,000	(d)	
31 May	UK salary	£10,000	£117,000	(a)	
31 May	Overseas salary	£5,000	£122,000	(b)	
3 Jun	Transfer to UK a/c	(£5,000)	£117,000		2
28 Jun	loan repayment	(£15,000)	£102,000		3 & 4
30 Jun	UK salary	£10,000	£112,000	(a)	
30 Jun	Overseas salary	£5,000	£117,000	(b)	
3 Jul	Transfer to UK a/c	(£5,000)	£112,000		5
28 Jul	loan repayment	(£15,000)	£97,000		6
31 Jul	UK salary	£10,000	£107,000	(a)	
31 Jul	Overseas salary	£5,000	£109,000	(b)	
3 Aug	Transfer to UK a/c	(£5,000)	£102,000		7
15 Aug	Cheque – ZZZ Cars	(£25,000)	£77,000		8
28 Aug	loan repayment	(£15,000)	£62,000		9
31 Aug	Overseas salary	£5,000	£67,000	(b)	
31 Aug	UK salary	£10,000	£72,000	(a)	
3 Sep	Transfer to UK a/c	(£5,000)	£67,000		10

The first two transfers are straightforward:

Notes 1 & 2: £5k UK remittances
Using the ordering rules at ITA07/s809Q, the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the "earliest paragraph" of income or gains within the mixed fund.
The remittance on 3 June is also matched against the UK salary from that tax year credited to the account before that date.

We now turn to the point of the example:

Note 3
The £200,000 used to pay for the assets is borrowed capital and is not

> in itself a remittance or an offshore transfer.

This is correct. The payment of £200k is not an offshore transfer (as defined) because the £200k is not mixed into the mixed fund.[31]

If the £200k had been paid into the account (and withdrawn from there to purchase the asset) the analysis would have been different.

> However, subsequent payments of interest and capital used to repay the loan are offshore transfers.
>
> **Note 4: £15k loan repayment**
>
> At the time immediately before the first repayment of the debt occurs on 28 June, the mixed fund is composed as follows:
>
> | | |
> |---|---|
> | Clean capital | £80,000 |
> | UK salary | £10,000[32] |
> | Relevant foreign earnings | £10,000 |
> | Relevant foreign income | £17,000 |
> | | £117,000 |
>
> The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:
>
> | | |
> |---|---|
> | Clean capital | £10,256 |
> | UK salary | £1,282 |
> | Relevant foreign earnings | £1,282 |
> | Relevant foreign income | £2,180 |
> | | £15,000 |
>
> The property acquired by F using the loan is now regarded as containing this income. ...

The next remittance is straightforward:

> **Note 5**: **£5k UK remittance**
>
> The next remittance on 3 July is again £5,000 that is matched against the UK salary credited to the account before that date.

Now comes the second loan repayment:

> **Note 6: £15k loan repayment**
>
> At the time immediately before the repayment on 28 July, the “mixed fund” is composed as follows:

[31] See 20.6.2 (“Offshore” transfer).

[32] Although £20,000 of F’s UK salary has been credited to the account, £10,000 has already been remitted prior to 28 June (see Notes 1 and 2).

Clean capital	£69,744
UK salary	£13,718
Relevant foreign earnings	£13,718
Relevant foreign income	£14,820
	£112,000

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£9,339
UK salary	£1,838
Relevant foreign earnings	£1,838
Relevant foreign income	£1,985
	£15,000

The property acquired by F is now regarded as containing this income.

Next come two straightforward onshore transfers:

Note 7 and 8: £5k UK remittance & £25k UK remittance
A further £5,000 remittance on 3 August is again matched against UK salary.
The payment of £25,000 to ZZZ Cars is to buy a car and is a taxable remittance. Immediately before the transfer the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£16,880
Relevant foreign earnings	£16,880
Relevant foreign income	£12,835
	£107,000

This £25,000 remittance is matched firstly against UK salary (£16,880), then against relevant foreign earnings (£8,120).

Next another loan repayment:

Note 9: £15k loan repayment
At the time immediately before the repayment on 28 August, the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£nil
Relevant foreign earnings	£8,760
Relevant foreign income	£12,835
	£82,000

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£11,049
Relevant foreign earnings	£1,603
Relevant foreign income	£2,348
	£15,000

Note 10: £5k UK remittance

The fifth remittance on 3 September is again £5,000 that is matched against the UK salary from that tax year credited to the account before that date.

The account now contains £77,000, being

Clean capital	£49,356
UK salary	£5,000
Relevant foreign earnings	£12,157
Relevant Foreign Income	£10,487

For the purposes of this example, assume that on 8 September F wins the Jersey local lottery ("clean capital") and uses his winnings to pay off the outstanding loan.[33]

Three years later, F brings the property acquired with the loan to the UK. The property is a mixed fund, and it is regarded as containing the income and capital used to pay off the loan, that is:

UK salary	£3,120
Relevant foreign earnings	£4,723
Relevant foreign income	£6,513
Clean capital	£185,644
Total	£200,000

F has remitted foreign income of £4,723 + £6,513 = £11,236.

The moral which follows from this example is the imperative of not mixing funds of different types of income or gains, so far as possible.

20.8 Fund with different types of RFI

Suppose a person holds in one mixed fund two different types of RFI, both subject to foreign tax, but one subject to a higher rate of foreign tax than the other. It matters which type of income is remitted, because one type qualifies for more foreign tax credit relief than the other.

The ITA mixed fund rules give no guidance because both fall into the

[33] The author does not consider the remittance issues of bets; see 18.18.18 (Betting).

same mixed fund category. It is considered that the *Duke of Roxburghe*[34] approach applies. A remittance from this mixed fund should be regarded as made first out of the income which qualifies for more UK double tax relief.

However, it would be better (if practical, ie if the sums are large enough to bother) to pay the two types of income into separate accounts. Then this issue does not arise and a remittance from the appropriate account can easily be identified as one type of income or the other.

20.9 Income/gains arise to 3rd party

So far we have considered the mixed fund rules where an individual transfers from a mixed fund containing their own income or gains. The position is more complex when another person is involved. This may arise in two ways:

(1) Income/gains received by a third party are treated as arising to the individual
(2) The individual receives income/gains and gives them to a third party

In either case the third party may then mix the funds with their other funds. This paragraph considers point (1) and the following considers point (2).

20.9.1 *s.3 gains mixed with co assets*

Section 3 gains may be mixed with company assets. Suppose:

(1) A gain accrues to non-resident company within s.3 TCGA, so that a s.3 gain accrues to a participator, taxable on the s.3 remittance basis.
(2) That gain forms part of a mixed fund (ie the gain is mixed with other funds of the company).

There is a taxable remittance if the company remits its gain to the UK. If part of the mixed fund is remitted to the UK, it is considered that the mixed fund rules apply to determine whether the part remitted is the participator's gain. Section 809Q(3) ITA provides:

> The extent to which the transfer is of *the individual's income or chargeable gains* is to be determined as follows.

Similarly, step 1 of s.809Q(3) requires one to find the income or gains *of*

[34] 20 TC 711.

the individual. However the gains in the company are treated as derived from the s.3 gains of the individual.[35] So applying s.809R(2) ITA the funds of the company are treated as containing those gains.[36]

If the company is held in a trust, a UK resident individual is not subject to tax under s.3, and this issue does not arise.

20.9.2 *s.720 income mixed with person abroad's assets*

Section 720 income may be mixed with assets of the person abroad. Suppose:

(1) Income arises to a person abroad within s.720, so that s.720 income arises to a transferor, taxable on the s.720 remittance basis.

(2) That income forms part of a mixed fund (ie the income is mixed with other funds of the person abroad).

There is a taxable remittance if the person abroad remits its income to the UK. If part of the fund is remitted to the UK, it is considered that the mixed fund rules apply to determine whether the part remitted is the transferor's income. The reasoning is the same as for s.3 gains. The funds held by the person abroad are treated as derived from the s.720 income of the individual.[37] So applying s.809R(2) ITA the funds of the person abroad are treated as containing that income.[38]

From 2017, the transferor is likely to qualify for protected-trust relief and this issue will not arise.

This view may favour the taxpayer. Suppose:

(1) A company within s.720

(2) An individual is subject to tax by reference to the company income under the s.720 remittance basis.

(3) The company holds a mixed fund consisting of:[39]

Item	**Amount**	**Mixed fund category**
Income of year 1[40]	£100	(i) (the company's income) *and* (b) (the transferor's s720 income)

[35] See 64.23 (Section 3 remittance basis).

[36] See 20.4.8 (Derived property).

[37] See 49.26 (s.720 remittance basis).

[38] See 20.4.8 (Derived property).

[39] In this example it does not matter which category the income falls in; as the year 2 item will be remitted before year 1 items.

[40] This is (1) actual income of the company and (2) treated as derived from s.720 income of the transferor.

Gain of year 2	£100	(e) or (h)
Total fund	£200	

(4) In year 3, the company remits £100 to the UK.

The sum remitted is regarded as the gain, so:

(1) For the purpose of the s.720 remittance basis, the income is not remitted.

(2) If s.3 applies to the individual,[41] the remittance gives rise to a charge on the s.3 gain under the s.3 remittance basis.

Similar points arise for s.731 if a mixed fund contains (1) relevant income and (2) other assets of the person abroad.

20.9.3 *Settlor-interested trust income mixed with trust assets*

Income of a settlor-interested trust may be mixed with trust assets. Suppose:

(1) Income arises to a settlor-interested trust within s.624, so that the trust income arises to the settlor, taxable on the s.624 remittance basis.

(2) That income forms part of a mixed fund (ie the income is mixed with other funds of the trust).

There is a taxable remittance if the trustees remit the income to the UK. If part of the mixed fund is remitted to the UK, it is considered that the mixed fund rules apply to determine whether the part remitted is the settlor's income. The funds in the hands of the trustees are, or are derived from, the s.624 income.[42] So applying s.809R(2) ITA the funds in the hands of the third party are treated as containing that income.[43]

From 2017, a settlor-interested trust is likely to qualify for protected-trust relief and this issue will not arise.

20.9.4 *Partnership income/gains mixed with partnership assets*

Income/gains of a partnership may be mixed with partnership assets. Suppose:

(1) Income/gains arise to a partnership.

[41] In short, if the individual owns the company directly, ie the company is not held in a trust; and the s.3 motive and other defences do not apply.

[42] In this case (unlike the s.3/s.720 cases) there is no statutory rule to treat the trustees funds as derived from the settlor's s.624 income, but none is needed.

[43] See 20.4.8 (Derived property).

(2) The income/gains are initially retained by the partnership but are of course treated as arising to a partner; assume a partner taxable on the remittance basis.
(3) The income/gain forms part of a mixed fund (ie the gain is mixed with other funds of the partnership).
(4) The partnership distributes part of the fund to the partner.

There is a taxable remittance if the partner remits the income/gains to the UK. The partnership distribution is from a mixed fund, and it is considered that the mixed fund rules apply to determine whether the part remitted is the partner's income/gain. The funds in the hands of the partnership are or are derived from the partner's income/gains.[44] So applying s.809R(2) ITA the funds in the hands of the partnership are treated as containing the income/ gains.[45]

In relation to large investment partnerships, the mixed fund rules are not workable, and it is suggested that investor/partners have no option but to accept that a partnership distribution consists of income or capital in accordance with the information given to them by the partnership at the time of the distribution.

20.10 **Gift of income/gains**

This section discusses mixed fund issues arising from gifts. See too 18.29.1 (Gift of income/gains: Navigation).

20.10.1 *A's income/gains mixed with B's property*

Suppose:
(1) An individual ("T") makes a gift to a relevant person ("the donee").
(2) (a) *Case 1:* The gifted property is a mixed fund of T, ie it is derived from income/gains of T,[46] but is not mixed with other funds of the donee.
(b) *Case 2:* The gifted property is mixed with funds of the donee in category (i) (residual capital)
(b) *Case 3:* The gifted property is mixed with funds of the donee in category (a) - (h) (taxable on the donee when remitted)

[44] In this case (unlike the s.3/s.720 cases) there is no statutory rule to treat the partnership funds as derived from the settlor's income/gains, but none is needed.

[45] See 20.4.8 (Derived property).

[46] If a gain accrues on the gift, the gifted property is treated as derived from that gain.

(3) The donee remits part of the mixed fund to the UK.

In each case, the transfer is from a mixed fund, and it is considered that the mixed fund rules apply to determine whether the part remitted is income/gains, and whose income/gains it is.

The mixed fund rule matters for T, but in case 3, it also matters for the donee (assume the donee is also a remittance basis taxpayer). Assume in case 3 that:

(1) T has given £100 of his RFI to the donee
(2) The donee has mixed that with £100 of her RFI, so has a mixed fund of £200
(3) The donee remits £100 from the mixed fund.

Has the donee remitted T's income or the donee's own income? It is in the donee's interest to argue that the donee has remitted T's income, and in T's interest to argue that the donee has remitted the donee's income.

One must categorise the donee's mixed fund into the mixed fund categories. The part derived from the gifted property falls into two categories:

(1) From T's perspective, it is RFI of T, within category (d)
(2) From the donee's perspective, it is residual capital of the donee, within category (i)[47]

I think the best answer to this conundrum is that one applies the mixed fund rules twice, once for the donee and then for T. Take the facts of the example of case 3 above:

(1) Year 2: T has given £100 of his RFI to the donee
(2) The donee has mixed that with:
Case 3(a): £100 of the donee's RFI arising in year 1
Case 3(b): £100 of the donee's RFI arising in year 2

So the donee has a mixed fund of £200 which from the donee's perspective consists of:

Case 3(a): £100 RFI for year 1 and £100 residuary capital for year 2
Case 3(b): £100 RFI for year 2 and £100 residuary capital for year 2

(3) The donee remits £100 from the mixed fund.

[47] I have considered an argument that the gifted property does not fall within the final category (i) since that refers to capital not within another paragraph of this subsection. But that solution does not seem to work.

First the mixed fund rules are applied from the donee's perspective:

Case 3(a) The donee has remitted the donee's £100 residuary capital
Case 3(b) The donee has remitted the donee's £100 RFI

Then one applies the mixed fund rules from the perspective of T to what has been identified as remitted by the donee:

Case 3(a) The donee has remitted the donee's £100 residuary capital, which is derived from T's RFI, and T is taxable on £100 (the donee is not taxable)
Case 3(b) The donee has remitted the donee's £100 RFI, which is not derived from T's income, and T is not taxable (the donee is taxable).

A similar problem arises in the case of a joint account, which may be a mixed fund; see 94.6 (Remittance from joint account).

20.10.2 *Gift to non-relevant person*

Suppose:

(1) Income/gains accrue to an individual ("T")
(2) The individual gives the income/gains to a non-relevant person ("donee").

The common example will be a gift of pre-2008 income/gains to a trust. The donee is not a relevant person in relation to those income/gains. There will only be a taxable remittance if T receives the income/gains. What if the income/gains form part of a mixed fund held by the trustees? It is considered that the mixed fund rules apply just as in the case of a gift to a relevant person.

20.10.3 *Unremitted income/gains given to trust*

Suppose:

(1) A remittance basis taxpayer ("S") receives foreign income/gains ("the old income/gains") which is not remitted to the UK and so not taxed.
(2) S transfers the old income/gains to a non-resident trust.
(3) The trustees make a distribution to S which is received in the UK.

If the distribution is an income receipt of S, it is taxed as an Annual Payment on ordinary principles;[48] that should not count as a taxable remittance of the old income/gains as the receipt of new income should

[48] See 41.3 (Tier 3: Discretionary payment: charge).

not be regarded as derived from the old income/gains.[49]

How do the mixed fund rules in these circumstances? It is considered that the mixed fund rules apply just as in the case of a gift to any other relevant person

For the position where the distribution is a capital payment, see 61.7.6 (Payment from unremitted gains).

20.11 Mixed-fund TAAR

Section 809S contains an anti-avoidance rule which I call the "**mixed-fund TAAR**".[50]

20.11.1 *Mixed-fund TAAR conditions*

Section 809S(1) ITA sets out the conditions for the application of the Mixed-fund TAAR:

> This section applies if,
> [a] by reason of an arrangement
> [b] the main purpose (or one of the main purposes) of which is to secure an income tax advantage or capital gains tax advantage,
> [c] a mixed fund would otherwise be regarded as containing income or capital within any of paras (f) to (i) of section 809Q(4).

There are strictly four requirements or conditions here.

(1) An arrangement.[51] But this term is so wide that point (1) is not so much a requirement as a convenient definition for use in conditions (2) and (4). One cannot identify purpose until one can identify the arrangement.
(2) The arrangement has a main purpose to secure IT/CGT advantages.[52]
(3) A mixed fund would otherwise be regarded as containing income or capital within mixed fund categories (f) to (i).
(4) The state of affairs in (3) is by reason of the arrangement (but this does not add much to requirement (3).

Unpacking the third requirement, "otherwise" must mean:

[49] See 18.18.15 (Income from income/gains).

[50] See 3.1 (TAAR/unallowable purpose test).

[51] Section 809S(3) ITA provides the standard (unnecessary) IT definition: see App 2.2.3 (Definitions of "arrangement").

[52] Section 809S provides the standard definitions of IT/CGT advantage: see 3.19.1 (Tax advantage: Definitions).

(3)(a) If, counterfactually, there had been no arrangement, there would be a mixed fund with income in categories (f) to (i)

(b) Because of the arrangement, there is either no mixed fund, or at least, there is a mixed fund with less income in categories (f) to (i)

Conditions (1) and (2) are standard TAAR wording. Condition (3) is not standard form, and is quite restrictive. But the provision should be taken to mean what it says.

Statute refers to a mixed fund contains (or would contain) income or capital within mixed fund categories (f) to (i). So if a mixed fund consisted of (say) RFI within category (d) and chargeable gains within category (e), the mixed-fund TAAR does not apply. This is a little surprising and it might be that s.809S(4) contains a typographical error, (f) being a slip for (a). But it is not obvious that there has been an error, as there is rather more scope for manipulation of the rules in a mixed account which contains categories (f) to (i). So a court should construe the section to mean what it says. In practice the point is not important, as a mixed fund will usually contain some item within categories (f) to (i).

20.11.2 *Mixed-fund TAAR: Application*

Assuming the conditions of the mixed-fund TAAR are met, we move on. Section 809S(2) ITA provides:

> Treat the mixed fund as containing so much (if any) of the income or capital as is just and reasonable.

Section 809S is primarily intended to override the offshore mixed fund transfer rule, although this is not expressly stated.[53]

Suppose:

(1) T has an account ("account 1") with a mixed fund containing £2m, 50% income and 50% capital.

(2) T transfers £1m (half the total amount) to another account ("account 2") (an offshore transfer). T intends to keep that amount offshore.

(3) T then remits the funds in account 1 to the UK.

Applying the offshore transfer mixed fund rule the first account, which is

[53] The mixed-fund TAAR could also override the *onshore* transfer mixed fund rule, but it is not likely to be just and reasonable to substitute any other set of rules.

remitted, consists of 50% income and capital, so on remittance 50% of the sum received is tax free. In the absence of the offshore transfer, the whole of the £1m remitted would have been subject to income tax.

The offshore transfer is an arrangement which secures an IT advantage. Assuming this was a main purpose, the conditions for the application of the mixed-fund TAAR are satisfied.

One then has to ask what is "just and reasonable". The drafter has given up here and left the courts to sort it out.[54] One might say that it is reasonable to apply the pre-2008 mixed fund rules. That can hardly be described as unjust or unreasonable. But it is considered that the expression "just and reasonable" should be construed in the context of the onshore transfer mixed fund rule. So the arrangement should be disregarded: it would be just and reasonable to raise tax as if the offshore transfer from the first account had not been made. To put it another way, it is just and reasonable that transfers whose main purpose is to obtain a tax advantage should not do so.

20.12 Cleansing mixed funds

This relief was first announced in "Reforms to the taxation of non-domiciles: further consultation" ("**the 2016 consultation paper**").[55] But this paper is now of historical interest only.

There are two reliefs:

(1) Para 44: this is available to all mixed funds

(2) Para 45: this applies where a mixed fund includes pre-2008 items

Cleansing is not an apt term for these reliefs, but it is a convenient shorthand, and it is difficult to think of a better one.

HMRC have issued guidance which I call:

(1) **"2017 cleansing guidance"**[56]

[54] CIOT express the point more strongly in Response to consultation paper "Reform of the taxation of non-domiciled individuals": "Section 809S is so widely drawn as to be almost meaningless." But TAAR drafting noteworthy for vagueness in 2008 has become standard, and no longer excites comment.

[55] *https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles-further-consultation* (2016).

[56] HMRC, "Cleansing of Mixed Funds" (April 2017)
The 2017 guidance was issued when the legislation was still in draft, and needs to be read subject to the subsequently introduced para 45 relief; but it contains useful comments which are not in the 2018 guidance.

(2) **"2018 cleansing guidance"**[57]

The professional bodies have published a set of Q&As with HMRC replies (**"Cleansing Q&As"**).[58] The edition history is:

Version	**Date**	**ICAEW label**
1		
2	October 2018	Taxguide 05/18
3	March 2019	Taxguide 02/19

20.12.1 *Outline of cleansing reliefs*

The 2016 consultation paper provides:

> The government recognises that the mixed fund rules can (!) be complicated, and that these reforms will mean that those non-doms who become deemed-domiciled in April 2017 who were taxed on the remittance basis will have to pay tax in the UK on their offshore income and gains on an arising basis for the first time. It will also mean that an individual with a mixed fund will find it difficult to bring any money from the fund into the UK without paying tax at their top rate of tax when they do so. For some, this will be a punitive outcome, as the fund will be comprised of a mix of both foreign income which would be taxable at the highest rate of tax as well as money that would be taxable at a lower rate; for example, foreign gains which would be taxed at a top rate of 28% or clean capital, which would not be taxable at all even when remitted.
>
> The government has therefore decided to introduce a temporary window in which such individuals will be able to rearrange their mixed funds overseas to enable them to separate those funds into their constituent parts. This window will last for one tax year [later extended to two tax years] from April 2017 and it will provide certainty (!) on how amounts remitted to the UK will be taxed.
>
> During this time, non-doms with mixed funds will be able to rearrange their mixed funds and separate out the different parts. This will mean, for instance, that they will be able to move their clean capital, foreign income and foreign gains into separate accounts, and will then be able

[57] HMRC, "Cleansing mixed funds" (January 2018) *https://www.gov.uk/guidance/cleansing-mixed-funds*

[58] The full title is "Cleansing of Mixed Funds - Professional Bodies Q&As". See *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-02-19--cleansing-of-mixed-funds.ashx*

> to remit from their accounts as they wish and pay the appropriate amount of tax. There will be no requirement for the non-dom to make a remittance from their newly segregated accounts in any particular order or within any particular time limit. This will mean that an individual who separates their mixed funds may, if they wish, remit funds from each separated fund, even if that remittance takes place in a later tax year after the transitional period has ended.
>
> The special treatment will only apply to mixed funds which consist of amounts deposited in bank and similar accounts. Where the mixed fund takes the form of an asset (for example a valuable painting), it will not qualify for the special treatment. However, an individual will be able to sell any overseas asset during the transitional window and separate the sale proceeds in the same way as any other money.
>
> Cleansing will not be available where an individual is unable to determine the component parts of their mixed fund. The mixed fund rules have always required a remittance basis user to track and monitor their offshore funds in order to benefit from the remittance basis, and while the government is willing to introduce a transitional rule to help people to separate their funds, this will not extend to those who are unable to identify the source of those funds.
>
> This treatment will be available to any non-dom who was not born in the UK with a UK domicile of origin – it will not be restricted only to individuals who have been resident for 15 of the past 20 years who will become deemed-domiciled under the new rules.
>
> An individual need not be resident in the UK in April 2017 to be able to use this protection, but it will only be of any benefit to those individuals who have been UK resident at some point in time and who have used the remittance basis of taxation.

20.13 Para 44 cleansing relief

20.13.1 *Para 44 cleansing relief: scope*

Para 44(1) sch 8 F(no.2) A 2017 provides:

> This paragraph applies for the purposes of the application of section 809Q(3) of ITA 2007 in relation to an individual ("P").

Cleansing relief only applies in relation to an individual, but it can apply to mixed funds of trusts or companies, where they hold income within s.624 or s.720, as that is deemed to be, or to be derived from, the income of an individual. Likewise for s.3 gains of a company so far as they are attributed to an individual who is a participator.

20.13.2 *Cleansing relief conditions*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where-

Seven[59] conditions then follow which I call **"para 44 cleansing conditions"**.

20.13.3 *Condition (a): Date of transfer*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where-
>
> (a) the transfer is made in the tax year 2017-18 or the tax year 2018-19

Cleansing (unlike 2017 rebasing) was a short term transitional relief. The transfer must be made in 2017/18 or 2018/19, and the relief stopped on 5 April 2019. But it remains necessary to understand the relief in order to analyse mixed funds going forward.

20.13.4 *Condition (b): Money*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...
>
> (b) the transfer is a transfer of money

"Money" in its normal sense includes foreign currency[60] but not cryptoassets (such as bitcoin).[61]

HMRC say:

> Bitcoins are not considered to be legal tender and therefore not recognised as money.[62]

[59] They are numbered semi-numerically (a) - (f), but para (c) contains two conditions.

[60] See Proctor, *Mann and Proctor on the Law of Money* (8th ed, 2022), para 1.93.

[61] See 96.2 (Cryptoasset terminology).

[62] Charity Tax Forum Action Point Log *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/440570/Action_Point_Log_29_May_2015.pdf*

20.13.5 *Cond. (c): Inter-account transfer*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...
>
> (c) the mixed fund from which the transfer is made is an account (account A) and the transfer is made to another account (account B)

What constitutes a separate account? See 20.2.2 (Identifying the fund).

20.13.6 *Condition (d): Nomination*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...
>
> (d) the transfer is nominated by P for the purposes of this subparagraph

2018 Cleansing Guidance provides:

> You must ... make the nomination between 6 April 2017 to 5 April 2019

But that is plainly wrong. The legislation specifies a time limit for the making the transfer, but not for making the nomination, and there is no reason to imply one. However until a nomination is made, the relief will not apply; and a return would be made on that basis; if the nomination is made after the return is submitted, the return would need to be amended, and once the time limits for amendment have passed, it is too late to amend.[63]

2017 Cleansing Guidance provides:

> There is no formal nomination process, but records of all nominations must be retained.[64]

Nomination may even be oral, but in practice a short written memorandum is appropriate, such as:

[63] The position here is similar to a Gift Aid declaration; see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 15.51 (Gift Aid declaration), online version *https://www.taxationofcharities.co.uk*

[64] The guidance subsequently refers to s.12B TMA.

> I nominate the transfer made [date] of [amount] from [account A] to [account B] for the purposes of para [44(2)(d)][65] sch 8 F(no.2)A 2017.[66]

The memorandum should be kept on file. There is no formal claim or election, but the nomination requirement amounts to a claims procedure as it effectively makes the relief optional.

20.13.7 *Cond.(d): 1 nominated transfer*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...
>
> (e) at the time of the nomination no other transfer from account A to account B has been so nominated

2017 Cleansing Guidance provides:

> Such a nomination can only be made once with respect to any one mixed fund account. All the nominated amounts from the mixed fund account must be transferred to the receiving account(s) at the same time.

Transfers to the same account at different times in principle constitute 2 distinct transfers, which is not allowed. But:

> If an individual gives instruction to their bank to make a transfer, say on a Monday, but the transfer, or part of the transfer, is not effected until Tuesday due to the bank's internal processes and through no fault of the individual, the transfer will be acceptable for cleansing purposes. All transfer instructions to the bank should be retained by the individual.

More than one transfer can qualify for cleansing, but each transfer must be to a separate account. It is difficult to see the point of that.

2017 Cleansing Guidance provides:

> It is not necessary to cleanse all overseas mixed fund accounts at the same time, so long as each account is cleansed within the 2-year window, ending 5 April 2019.
>
> Nor is it necessary to completely empty the original mixed fund account, though once a nominated transfer from an account has happened it cannot be nominated again.

[65] For para 45 cleansing relief say: para 45(1)(e).

[66] The memorandum also needs to specify income/gains: see 20.13.10 (Specifying income/capital).

20.13.8 *(f): Qualifying individual*

Para 44 sch 8 F(no.2) A 2017 provides:

> (2) Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund where ...
>
> (f) P is a qualifying individual.

Qualifying individual is a label for a set of rules (note that the rules are not the same as for the definition of qualifying individual for 2017 rebasing relief).

Para 44 provides:

> (3) P is a qualifying individual if-
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applied in relation to P for any tax year before the tax year 2017-18

P must be a remittance basis taxpayer for at least one of the years 2008/9 to 2016/17. That will generally require a remittance basis claim, but for shorter term residents, it need not involve payment of the remittance basis charge.

Para 44 provides:

> (3) P is a qualifying individual if ...
>
> (b) P is not an individual who-
>
> (i) was born in the UK, and
>
> (ii) whose domicile of origin was in the UK.

Formerly-domiciled individuals are, as usual, excluded from relief.

20.13.9 *Effect of para 44 cleansing*

Assuming the para 44 cleansing conditions are met, we move on to the rule. Para 44(2) sch 8 F(no.2) A 2017 provides:

> Section 809R(4) of ITA 2007 does not apply to an offshore transfer from a mixed fund[67] where [the cleansing application conditions are satisfied]

Having disapplied 809R(4), para 44(4) lays out a different rule:

> An offshore transfer to which sub-paragraph (2) applies is to be treated

[67] Para 44(6) applies the standard definitions: "In this paragraph "mixed fund" and "offshore transfer" have the same meanings as in section 809R(4) of ITA 2007."

> as containing such amount of such kind or kinds of income and capital in the mixed fund immediately before the transfer as may be specified in the nomination under sub-paragraph (2)(d).

Para 44 relief applies only if the transfer from the mixed fund is an offshore transfer. If it is an onshore transfer, the relief does not apply.

20.13.10 *Specifying income/capital*

The nomination needs to specify the "amount [or amounts[68]] of such kind or kinds of income and capital in the mixed fund immediately before the transfer;" and these will in principle be the amounts taken to be transferred by the transfer.

The kinds of income and capital which can be specified clearly include the 9 kinds specified in the mixed fund categories, but may be more detailed, for instance, one may specify:

(1) a type of RFI which has DT relief at a higher rate.
(2) income/capital of a particular year.

It is not essential to specify any amount at all (the statute refers to "such amount as *may* be specified in the nomination) but in the absence of a specification the usual offshore transfer rules will apply to the transfer.

"Specified" means unambiguously identified or made clear.[69] It is not strictly necessary to specify a number, but it is doubtful whether "such amount of RFI as is in the account" is sufficiently clear.

20.13.11 *Under-nomination*

The amount(s) specified may be less than the sum transferred. Eg one may transfer £100 and specify £50 as RFI. In that case the usual offshore transfer rules apply to the amount which is not specified.

HMRC agree. Cleansing Q&As Question 6 provides:

> ... Please confirm that cleansing transaction(s) and nomination(s) are valid where there have been under nominations and the original mixed fund account remains mixed when all the transfers have taken place?
>
> **Suggested answer**
>
> In such circumstances the cleansing transaction(s) and nomination(s) will be valid.

[68] The singular "amount" clearly includes the plural.

[69] That is the ordinary meaning, and was adopted in another context in *Re Green* [1985] 3 All ER 455 at p.460.

There is nothing in the legislation that states that for the cleansing transactions to be valid the original mixed fund account must be fully cleansed such that after the cleansing transactions it is no longer a mixed account.

Example

An individual has a mixed fund offshore account (account C). The individual knows that the account was opened initially with £10 million of clean capital but is not sure about other receipts. The mixed fund analysis is, therefore, carried out on the basis that all the other receipts are Remittance Basis income with no foreign tax credit. Having carried out the analysis on this basis there is £7.8 million of clean capital as at 29 July 2018. To be cautious £7.5 million is transferred out to newly established offshore account D and the appropriate nomination made for the clean capital (ITA 2007, s 809Q(4)(i)). The remaining contents of account C are unknown. This is not an issue.

Example

An individual has a mixed fund account (account C) and analysis breaks it down as:

- £1.2 million Remittance Basis relevant foreign income not subject to a foreign tax;
- £2.7 million Remittance Basis foreign gains not subject to a foreign tax; and
- £3.3 million clean capital (inheritances and gifts).

All funds arising after 5 April 2008.

... Three new accounts are opened (accounts B, C and D) and the following cleansing transfers and nominations are made in 2018/19:

- £1 million to account D - a nominated transfer for the purposes of Finance (No 2) Act 2017, sch 7, part 4, para 44(2) with the £1 million transferred to account D representing income within ITA 2007, s 809Q(4)(d) (that is relevant foreign income other than income within paragraph (g)).
- £2.5 million to account E - a nominated transfer for the purposes of Finance (No 2) Act 2017, sch 7, part 4, para 44(2) with the £2.5 million transferred to account E representing gains within ITA 2007, s 809Q(4)(e) (that is foreign gains other than gains within paragraph (h)).
- £3 million to account F - a nominated transfer for the purposes of Finance (No 2) Act 2017, sch 7, part 4, para 44(2) with the £3 million transferred to account F representing income within ITA 2007, s 809Q(4)(i).

The three nominations are valid. Account C remains mixed containing (in accordance with the analysis):

- £200K of relevant foreign income not subject to a foreign tax;
- £200K foreign gains not subject to a foreign tax; and
- £300K clean capital (inheritances and gifts).

HMRC say: HMRC has no problem with this response.

20.13.12 *Over-nomination*

Para 44(5) sch 8 F(no.2) A 2017 provides:

> An amount of a kind of income or capital specified under sub-paragraph (4) may not exceed the amount of that kind which is in the mixed fund immediately before the transfer.

What if one specifies an amount of income/capital which exceeds the amount in the mixed fund? It is considered that the specification should be valid up to the actual amount of income/capital. But HMRC do not agree. 2018 Cleansing Guidance provides:

> If nominated transfers exceed the amount of that kind of income held in the mixed fund account immediately before the transfer then the normal mixed fund rules will apply. Such a nomination would be invalid

If that is right, another nomination could be made. In the meantime, the Guidance explains:

> [The invalid nomination] would have the potential to affect all subsequent nominations possibly invalidating them too...
> **Example 2** (Flavia)
> F has a mixed fund account which contains the following funds immediately before she nominates transfers[70] under the cleansing provisions:

Date	**Nature of receipt**	**Amount**[71]
2014/15	Overseas capital gain	£200,000
2014/15	Clean capital	£150,000
2013/14	Foreign income	£110,000
2013/14	Overseas capital gain	£600,000
2010/11	Foreign income	£850,000
		£1,910,000

> F nominates £1 million foreign income, transferring it to a new account

[70] In fact, in the example as reformulated in March 2018, there is only one transfer.

[71] I have formulated the data into a table, for enhanced clarity.

> (B) on 17 July 2018.
> F leaves the balance of her funds in the original account (A).

The HMRC analysis is as follows:

> The total amount of foreign income immediately before the transfer to account B was £960,000, F's transfer exceeds the total amount of foreign income contained in the account by £40,000.
> This error means that F has breached one of the cleansing conditions, instead of successfully cleansing the original account F has engaged the mixed fund rules at section 809Q and 809R (that is the entire £1 million is taken to be an offshore transfer), creating another mixed fund. She will need to work out by applying these rules the proportion of income, gains and capital that this account contains.

The author, perhaps understandably, preferred not to work through the example numerically.

> F can if she wished subsequently cleanse this account (B) by correctly applying the cleansing provisions so long as she is within the 2 year window.

Alternatively, as noted, F could simply make another nomination.

If the figures are uncertain, the best solution is to transfer the minimum amount of category (i) assets (clean capital) to a new account, with the appropriate nomination and specification, and leave the income/gains (whatever they may come to) in the old account.

20.13.13 *Cleansing joint account*

2018 Cleansing Guidance provides:

> Joint mixed fund accounts can be cleansed even if only one person qualifies.
> Each qualifying person can cleanse their share of the joint account by identifying:
>
> - the funds which are theirs
> - what those funds are, income, capital or chargeable gains

2017 Cleansing Guidance provides:

> There is nothing to prevent the cleansing of a joint mixed fund account. No matter how many named account holders there are there can still only be 1 nominated transfer from the account for mixed fund cleansing purposes.

20.13.14 *Rebasing/cleansing compared*

In outline:

2017 Rebasing[72]	**Cleansing**
Asset held 5/4/17	Asset acquired any time
Disposal any time post 6/4/17	Account transfer 2017/8 or 2018/19
Any asset	Money only
Asset foreign-situate 16/3/16 - 5/4/17	Asset unremitted
Remittance basis charge in 2008/9 - 17/18	Rem. basis claim in 2008/09 - 17/18
P not formerly-domiciled resident	Same
P meets 15-year rule in 2017/18	Not required
Election to disapply	Nomination to apply

20.14 Para 45 cleansing relief

Para 44 and 45 cleansing reliefs overlap, and an individual may effectively claim either, by an appropriate nomination, if the necessary cleansing relief conditions are satisfied.

It is easiest to follow para 45 cleansing relief if it is set out in a format which highlights the differences from para 44 cleansing relief.

Para 45 sch 8 F(no.2) A 2017 provides:

> (1) This paragraph applies to a transfer made by a person ("P") from a mixed fund where—

Seven conditions then follow which I call **"para 45 cleansing conditions"**:

> (a) the transfer is made in the tax year 2017-18 or the tax year 2018-19,
> (b) the transfer is a transfer of money,
> (c) the mixed fund[73] from which the transfer is made is an overseas account[74] (account A) containing pre-6 April 2008 income or chargeable gains,[75] ~~and~~

[72] See 56.16 (2017 rebasing).

[73] Para 45(5) provides: "In this paragraph and paragraph 46—
"mixed fund" has the same meaning as in section 809R(4) of ITA 2007".

[74] Para 45(5) provides: "In this paragraph and paragraph 46 ...
"overseas account" means an account situated outside the UK".

[75] Para 45(5) provides: "In this paragraph and paragraph 46 ...
"pre-6 April 2008 income or chargeable gains" means income or chargeable gains for the tax year 2007-8 or any earlier tax year."

(d) the transfer is made to another overseas account (account B),[76]
(e) the transfer is nominated by ~~P~~ the person for the purposes of this subparagraph,
(f) at the time of the nomination no other transfer from account A to account B has been so nominated, and
(g) P is a qualifying individual.

The only difference here is that the transferor account must contain pre-2008 income/gains.

The definition of qualifying individual is the same: para 45(2).

Cleansing under para 45 (just as para 44) requires the individual to be a remittance basis taxpayer for at least one of the years 2008/9 to 2016/17. Remittance basis treatment in an earlier year will not suffice. That is not logical, but there it is.

Assuming the para 45 conditions are satisfied, we move on to the relief. Para 45(3) provides (highlighting differences from para 44 relief):

> A~~n offshore~~ transfer to which ~~sub-paragraph (2)~~ this paragraph applies is to be treated as containing such amount of such kind or kinds of income ~~and~~ or capital in the mixed fund immediately before the transfer (for example, income or chargeable gains for a particular tax year) as may be specified in the nomination under ~~sub-paragraph (2)(d)~~ subparagraph (1)(e).

The transfer need not be an offshore transfer, though it must be made to an offshore account, which is not quite the same thing.[77] The other differences in wording are not material.

Para 45(4) provides:

> An amount of a kind of income or capital specified under sub-paragraph ~~(4)~~ (3) may not exceed the amount of that kind which is in the mixed fund immediately before the transfer.

This is the same rule as for para 44 relief..

20.14.1 *Pre-2008 payments*

Para 46 sch 8 F(no.2) A 2017 applies only to para 45 relief. It provides rules for pre-2008 payments in/out of the mixed fund.

[76] It does not matter whether account B is a mixed fund or not. That seems self-evident, but the point is also confirmed in Cleansing Q&As Question 8.

[77] See 20.6.2 (“Offshore” transfer).

> (1) This paragraph applies to determine, for the purposes of paragraph 45, the composition of the mixed fund referred to in paragraph 45(1).

Para 46(2)-(5) provide the rules for a payment out of the mixed fund:

> (2) Sub-paragraphs (3) to (5) apply where a transfer of money is made before 6 April 2008 from the mixed fund to another overseas account.
> (3) Take the following Steps—
> *Step 1*. Calculate the total amount of income and chargeable gains in the mixed fund immediately before the transfer ("the total income and gains").
> *Step 2*. Calculate what proportion of the total income and gains is income and what proportion is chargeable gains.
> (4) If the amount transferred does not exceed the total income and gains, the transfer is to be treated as if it consisted of income and chargeable gains in the proportions found under Step 2 in sub-paragraph (3).
> (5) If the amount transferred exceeds the total income and gains, the transfer is to be treated as if it consisted of—
> (a) all the income and chargeable gains that were in the mixed fund immediately before the transfer, and
> (b) in respect of the balance, other capital from the mixed fund.

Cleansing Q&As Question 8 provides:

> Does the reference in the legislation to "the mixed fund" in para 46(2) purely refer to the account being cleansed such that the legislative rules above do not apply for pre-6 April 2008 offshore transfers between two mixed funds i.e. does the reference to "another overseas account" in para 46(2) include a mixed fund account or not?
> **Suggested answer put to HMRC**
> There is nothing in the legislation that suggests that the reference to "another overseas account" must be a reference to an account which is not a mixed fund. Indeed, the second rule specifically suggests that the transfer from the other overseas account to the mixed fund is a transfer between different mixed fund accounts since para 46(7-9) suggests there could be income and gains in the other account.
> **HMRC Comment**
> Agree only for cleansing.

Para 46(6)-(8) provide the rules for a payment into the mixed fund:

> (6) Sub-paragraphs (7) and (8) apply where—
> (a) a transfer of money is made before 6 April 2008 from another overseas account to the mixed fund, and

> (b) there is insufficient evidence to determine the composition of the transfer.
>
> (7) Take the following Steps—
>
> *Step 1*. Calculate the total amount of income and chargeable gains in the other overseas account immediately before the transfer ("the total income and gains").
>
> *Step 2*. Calculate what proportion of the total income and gains is income and what proportion is chargeable gains.
>
> (8) The transfer is to be presumed to consist of income and chargeable gains in the proportions found under Step 2 in sub-paragraph (7).

Para 46(9) provides a rule where there is no evidence as to origin of the funds:

> For the purposes of Steps 1 and 2 in sub-paragraph (7), if there is insufficient evidence to say that an amount is income or that it is chargeable gains, treat it as income.

This only applies for the limited purpose mentioned.

20.15 Loss in mixed fund

Suppose a mixed fund of:

Gains	30
Capital	70
Total fund	100

The fund is invested and a loss is made of 10, leaving a fund of 90. There are (at least) 4 possibilities:

	Deduct loss from gain	**Deduct loss from capital**	**Deduct loss pro rata**	**No deduction**
Gains	20	30	23	30
Capital	70	60	57	70
Total capital/gain	90	90	90	100

The following points are clear:

(1) Losses (like gains) accrue to an individual on a disposal of assets.

(2) Losses may or may not be allowable (depending in particular on whether a loss election has been made)

(3) Losses (unlike gains) cannot be remitted. Or more accurately, tax has a concept of remitting income or gains, but there is no concept of remitting a loss so the question whether or not a loss may be said to be remitted does not arise.

The key statutory provisions are:

(1) The definition of "mixed fund" in s.809Q(6):

> In this section "mixed fund" means money or other property which, immediately before the transfer, contains or derives from
> (a) more than one of the kinds of income and capital mentioned in subsection (4), or
> (b) income or capital for more than one tax year.

(2) Step 1 s.809Q(3):

> For each of the categories of income and capital in paragraphs (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

In the example above, there exists a mixed fund, as defined, ie, property (a fund) "which contains or derives from more than one kind of income/capital". Even if the fund did not "contain" more than one kind of income/capital (say the loss equalled the gain, and assume the loss could be set against the gain) the fund may still be said to *derive* from 30 gain and 70 capital,

So the question is: What is the amount of "income or capital in this mixed fund".

The legislation does not answer this directly, but it is suggested that the loss is simply ignored in computing the amount of income/capital in the fund. The loss erodes neither the capital nor the gain. This is more consistent with the rules that:

(1) The loss is not allowable
(2) A mixed fund need not *contain* income/capital, it is sufficient if it *derives from* mixed income/capital

Any other rule would be difficult to operate in practice as assets are bought and sold; but the remittance basis is often difficult to operate.

Accordingly if (on the example) one remits the whole of the £90 fund, one applies the mixed fund rules and the remittance consists of £30 gain and £60 capital.

However the HMRC view is more generous: capital losses should be deducted from capital gains, in analysing the contents of a mixed fund.[78]

[78] Private correspondence. It would be appropriate to explain the basis of the tax computation in the "white box".

So there would be a remittance of £20 gain and £70 capital.

The issue is raised in Cleansing Q&As Question 13:

Example 1

In the example in the question the funds used to acquire the property break down into Remittance Basis income and clean capital, as follows:

	Amount	%
Relevant foreign income	£1.0 m	40%
Relevant foreign earnings	£1.0 m	40%
Clean capital	£0.5 m	20%
	£2.5 m	

The property is sold for £2 m, so we have a loss of £0.5 m and nothing in the legislation to assist in terms of how this loss should be treated.

Applying just and reasonable methodology one would proportionally reduce each category of income and capital as follows:

	Acquisition Cost	Reductions	Proceeds
Relevant foreign income	£1.0 m	£0.2 m	£0.8 m*
Relevant foreign earnings	£1.0 m	£0.2 m	£0.8 m*
Clean capital	£0.5 m	£0.1 m	£0.4 m
	£2.5 m	£0.5 m	£2.0 m

*Whilst the above is a necessary first step[79] as it deals with the loss, the allocation above cannot be the final position. This is because it is not in accordance with the derivation rules for income and chargeable gains in ITA 2007, Part 14, Chapter A1, which make it clear that such amounts cannot be reduced.[80] This means that for mixed fund analysis purposes there is:

	Amount
Relevant foreign income	£1.0 m
Relevant foreign earnings	£1.0 m
Clean capital	£0.5 m[81]
	£2.5 m

That is, the aggregate total of the s 809Q(4) categories of income and capital is £0.4 m higher than the actual £2 m proceeds figure.

The Q&A then considers the implications for cleansing relief:

[79] Author's footnote: I do not see why this is a necessary step, since the loss deducted at this step is then added back in.

[80] I think the reference is to s.809P(3): see 18.35.2 (Change in property value).

[81] Author's footnote: the original reads £0.4m and gives the total as £2.4m, but I think that is just a slip.

The £0.4 m of clean capital can be cleansed.

Example 2
Initially a painting is acquired for £4.8 m:

	Amount	%
Relevant foreign income	£1.2 m	25%
Foreign gains	£1.2 m	25%
Clean capital	£2.4 m	50%
	£4.8 m	

The painting is sold for £3.6 m realising a loss of £1.2 m.
Step 1 – proportionally allocate out the £1.2 m loss.[82]

	Acquisition cost	Reductions	Proceeds
Relevant foreign income	£1.2 m	£0.3 m	£0.9 m
Foreign gains	£1.2 m	£0.3 m	£0.9 m
Clean capital	£2.4 m	£0.6 m	£1.8 m
	£4.8 m	£1.2 m	£3.6 m

Step 2 – adjust the step 1 result as the derivation rules mean that the income and gains figures cannot be reduced.

	Amount
Relevant foreign income	£1.2 m
Relevant foreign earnings	£1.2 m
Clean capital	£1.8 m
	£4.2 m

That is, the aggregate total of the ITA 2007, s 809Q(4) categories of income and capital is £0.6 m higher than the actual proceeds figure.

So far Q&A example 2 is like example 1, but there is then another transaction of purchase and sale, this time at a profit:

The proceeds are paid into a new offshore account (C) and then reinvested in shares. The shares are sold on 19 May 2018 for £4.4 m and the proceeds paid into account C (which contains no other funds). A Remittance Basis gain of £0.8 m is realised on the sale (£4.4 m less £3.6 m). As such, for mixed fund analysis purposes there is:

	Funds Re-invested	Rem. Basis gain	Amount
Relevant foreign income	£1.2 m	£1.2 m	

[82] As noted, I cannot see the point of Step 1, which is undone by Step 2; but it does not matter.

Foreign gains	£1.2 m	£0.8 m	£2.0 m
Clean capital	£1.8 m	£1.8 m	
	£4.2 m	£0.8 m	£5 m

That is, again as a result of the derivation rules, the mixed fund analysis aggregate total of the s 809Q(4) categories of income and capital is £0.6 m higher than the actual proceeds figure paid into account C.

The Q&A then considers the implications for cleansing relief:

The £1.8 m of clean capital can be cleansed.
The £2 m of foreign gains could also be cleansed (since the current CGT rates are much lower than the Income Tax rates this might be felt to be worthwhile).

HMRC Comment[83]
• Derivation rules do not account for clean capital.
• The derivation rules only apply to foreign income or gains.

I find this comment delphic: does it mean that HMRC agree with the two examples?

20.16 Pre-2008 mixed fund

The ITA mixed fund rules raise transitional issues which the FA 2008 addresses only in general terms, leaving HMRC, taxpayers and the courts to sort the matter out as best they can.

Para 89 sch 7 FA 2008 provides:

> Sections 809Q to 809S of ITA 2007 (transfers from mixed funds) do not apply for the purposes of determining whether income or chargeable gains for the tax year 2007-08 or any earlier tax year are remitted to the UK (or the amount of any such income or chargeable gains so remitted).

20.16.1 *Pre-2008 transfer from fund*

Suppose:
(1) A mixed fund contains pre-2008 income/gains.
(2) A transfer is made from that fund to the UK before 2008.

One obviously applied the pre-2008 mixed fund rules (discussed in the next section) to identify what was remitted at the time of the transfer and the same rules determine what income/gains remain in the fund (which

[83] Footnote original: The HMRC comments are in line with the comments made in the Q&A. However, HMRC does not say whether it agrees with the examples.

may be remitted post 2008).

20.16.2 *Post-2008 transfer from fund with pre-2008 FIG*

Suppose:
(1) A mixed fund contains pre-2008 income/gains (no post-2008 income/gains have been added).
(2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. Para 89 means that one disregards the ITA mixed fund rules (and instead applies the pre-2008 mixed fund rules discussed in the next section).[84] HMRC agree.[85]

20.16.3 *Post-2008 transfer from fund with pre- & post-2008 income/gains*

Suppose:
(1) A mixed fund contains pre-2008 and post-2008 income/gains.
(2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. The analysis comes in two stages.
(1) First one has to determine whether the transfer consists of pre-2008 or post-2008 income/gains.
(2) (a) If the transfer consists of pre-2008 income/gains, one applies the pre-2008 mixed fund rules to identify what is remitted.
(b) If the transfer consists of post-2008 income/gains, one applies the ITA mixed fund rules to determine what is remitted.

Which set of rules apply at stage 1? It is suggested that one first applies the ITA mixed fund rules so far back as 2008/09 and then the pre-2008 mixed fund rules. HMRC agree.[86]

20.17 Pre-2008 mixed fund rules

We can now turn to consider the pre-2008 mixed fund rules. There were few statutory provisions. There were a few old cases, supplemented by

[84] This view is the more natural reading. Also, if it were wrong (so one had to apply the ITA mixed fund rules) it would be necessary to classify the constituents of the mixed fund held at 6/4/08 by date and by the nine mixed fund categories, going back without limit of time. Records in many cases will not exist.

[85] See 20.18.2 (Transfer from fund with pre-and post-2008 entries).

[86] See 20.18.2 (Transfer from fund with pre-and post-2008 entries).

practice, and outside areas governed by clear rules, I expect HMRC would accept any reasonable view.

20.17.1 *Fund: Taxed/untaxed income*

The RDR Manual provides:

> **36320. Remittances from a mixed fund** [Jan 2019]
> ... Where an overseas 'mixed fund' contained an amount that has already suffered UK tax, for example UK salary dealt with under PAYE, the practice (*Sterling Trust v CIR* 12 TC 868) was that a taxpayer was entitled to say that he or she has remitted income which has already suffered UK tax (to the extent that such income exists in the fund) in priority to income which is assessable on the arising basis [ie in priority to income which is assessable if remitted].[87]

This is soundly based on *Duke of Roxburghe's Executors v IRC*.[88]

20.17.2 *Fund: Untaxed/DT relief income*

Suppose an individual holds in one pre-2008 mixed fund:

(1) income which is subject to foreign tax and qualifies for UK double tax relief; and
(2) untaxed foreign income taxable in full on the remittance basis.

It is considered that the *Roxburghe* approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for UK double tax relief.

20.17.3 *Fund: Capital/income*

In *Scottish Provident Institution v Allan* 4 TC 591, the taxpayer held offshore:

(1) Capital which had been invested in secured loans in Australia, and which would not be taxable if remitted; and
(2) Interest arising from those loans, which qualified for the remittance

[87] The same point is made in RDR Manual 35320 [Jan 2019] (Mixed Funds: Example 4 - remittances before 6 April 2008, Note 2).

[88] 20 TC 711 discussed in another context at 18.19 (Bank errors).
Although the taxpayer in *Roxburghe* kept the funds in two accounts at the bank, the result would have been the same if the taxed and untaxed income had been held in a single bank account. This was accepted without argument in *Walsh v Randall* 23 TC 55: see para 3 of the Special Commissioners' decision, and it is accepted in this passage from the RDR Manual.

basis, and which was therefore taxed if remitted.

A sum was remitted to the UK and the question was whether this sum was the untaxed income or the capital. The background was this:

(1) The income and capital had been paid into a single account (mixed).
(2) The remittances (from the Australian agents) had been accompanied by letters stating that the sums remitted represent repayments of the loans, ie capital. The loans had in some cases been repaid only very shortly before the remittance.
(3) The sum remitted (£200,000) was small compared to the amount of the loans and the interest received (each about £1.5m).

It was held that the remitted sum was the income, not capital. The Lord Chancellor said:

> It is obvious that the mere nicknaming the sum received and ascribing to it, because it is so named, the character of capital and not of income, cannot defeat the right of the Crown to have the tax levied upon that which in substance and truth is [income] ...[89]

Two points shine out:

(1) The description of the remittance as capital does not make the remittance capital if "in truth" it is income. This is self-evident: "a rose by any other name *etc*" However, this principle does not address the more fundamental question of *how* the courts determine what is income and what is capital.
(2) The answer to this second question is that the courts look to the substance.

However, it is one thing to look for the substance, and another to find and identify it. Why, in substance, was the remittance from the income, not from the capital? The answer may be found in the speech of Lord Robertson: "The facts of the case must furnish the inference."

The following facts were relevant:

> [1] First of all there is the fact of remittance in two consecutive years

[89] 4 TC 591 at p593. Similarly Lord Davey: "I must say that that is a draft upon my credulity, a strain upon my powers of belief, which they will not bear. I agree that the mere calling it capital for the purpose of the Inland Revenue Department will not make into capital that which is essentially and in truth ... the interest received on the securities."

> ...
> [2] There is no suggestion that any exceptional reason required remittances of capital, in either year or in both.
> [3] On the other hand it is certain that the amount of invested capital left behind in the Colony, after these remittances, is larger than before; so that the capital is fully accounted for.
> [4] Well then, what is done with this so-called capital remitted? The answer is, exactly what would be done with profits.

This is explained by Lord Shand in argument:

> If it is capital you have brought back and distributed as bonus, you have been paying back capital, which I should think you have no authority to do.

This is why Lord Robertson concluded:

> The inference from these facts is that the moneys remitted were in fact profits, [ie income] ...

The former Inspectors Manual para 1566 gave the HMRC view:

> Where a person maintains abroad a fund (for example, a bank account) containing income assessable on the remittance basis, a capital lodgement to the fund is normally considered to lose its identity in the fund. A subsequent remittance from such a mixed fund, therefore, represents income up to the full extent of the income content of the fund (see *Scottish Provident Institution v Allan* 4 TC 409 and 4 TC 591, and especially the Lord Chancellor's remarks on 'mere nicknaming' at 4 TC 593). Only when the income content of the fund is exhausted will any balance remitted be regarded as capital. Where this is not accepted, the full facts of the case should be reported to Revenue Policy, International (Cases IV and V), Victory House.

The Inspectors Manual over-simplified the law as expounded in *SPI v Allan*. There is no rule that the remittance out of a mixed fund of income and capital is to be treated as income first. Suppose a taxpayer remits a substantial amount, exceeding the income, and applies it capital expenditure, such as an investment in the UK, or the purchase of a house. It is considered that the "substance" of the matter, applying Lord Robertson's approach, is that the remittance is one of capital. The position is even stronger if the taxpayer first uses an amount equal to the income of a mixed account on expenditure abroad of an income nature.

The RDR Manual now provides:

> **RDRM36320. Remittances from a mixed fund** [Jan 2019]
>
> For tax years up to 5 April 2008, there are no statutory rules to determine what amounts remitted from 'mixed funds' actually consisted of.
>
> On occasion this created difficulty in determining, for UK tax purposes what a remittance to the UK actually consisted of, for example, was it non-taxable income, employment income, interest, chargeable gains or capital.
>
> *Scottish Provident v Allan*
>
> Broadly HMRC practice was based on House of Lords decisions, in particular that of *Scottish Provident v Allan* (4 TC 409/591). In the Court of Exchequer, Lord McLaren said (page 419)
>
>> 'un-appropriated remittances must be dealt with according to the ordinary course of business, and these remittances must be presumed to be paid in the first place out of interest so far as they are income, and in the second place of principal or capital. I think that rule results from the fact that no prudent man of business will encroach upon his capital for investment when he has income un-invested lying at his disposal'.
>
> The House of Lords considered that the question of whether any amount of income had actually been received in the UK is essentially one of fact, that is, of tracing in the first instance, or, where direct tracing proves to be impossible, of inference from the known facts.
>
> In the absence of any evidence to the contrary, the principle is that where capital and income have been paid into a single fund overseas so that they are no longer distinguishable, remittances to the UK out of the fund will be presumed to be income to the extent that there is income existing in the fund at the time that the remittance was made.
>
> ... Only when the income content of the fund is exhausted will any balance remitted be regarded as capital.[90]

Note that *SPI v Allan* was a case where the mixed fund was capital and income. The case can have no application where the mixed fund consists of different kinds of income or different kinds of capital.

At first sight there is some tension between *SPI v Allan* and *Duke of Roxburghe* 20 TC 711. In the first, "mere nicknaming" was contemptuously dismissed; in the second, it was the "legal right" of the Duchess to direct whether the remittance was from one part of a mixed fund or the other. The cases agree, however, that the matter is one of

[90] The same passage is found in RDRM 35320 Note 2.

"substance". It is suggested that the cases can be reconciled in this way: in a marginal case, the description of the remittance given by the taxpayer may be decisive. Where the substance of the transaction shows that a remittance is one of income or capital, "mere nicknaming" will not alter the position.

20.17.4 *Fund: Gain/clean capital*

Suppose an individual holds in one pre-2008 mixed fund:

(1) capital which does not represent any chargeable gain within the scope of CGT; and
(2) the proceeds of a disposal on which a chargeable gain accrued.

A remittance from this fund should for CGT purposes be treated as coming out of the tax free source first.

20.17.5 *Remittance: gain or base cost?*

Suppose a foreign domiciliary purchases a foreign asset for £1m; they sell it for £3m and realises a pre-2008 chargeable gain of £2m. If they remit the entire £3m proceeds, the entire £2m gain is charged to CGT. But what is the position if they remit only £1m and retain the balance abroad? The RDR Manual provides:

> **RDRM36320. Remittances from a mixed fund** .... [Jan 2019]
> *Capital Gains*
> For years up to 5 April 2008, where a remittance is made to the UK from a mixed fund into which the proceeds from the sale of an asset (such as a shareholding) has been paid the remittance contains a due proportion of any capital and of any capital gain arising from the disposal.
> That is because, unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. Refer to the Capital Gains Manual CG25380 onwards (and CG25440 in particular).[91]

The last sentence is correct to say that a capital gain has no separate existence. I do not think it even exists as "part of the money received from the sale". It is not a separate or separable item of property existing at all. The gain is merely the result of a computation. The proceeds of a disposal

[91] The same point is made at para 35320 (Mixed Funds: Example 4 - remittances before 6 April 2008 Note 3).

represent the gain, but they do not constitute the gain, just as trading receipts do not constitute the profits of a trade. So it is considered that the HMRC view is correct.

20.18 Pre-2008 mixed funds: examples

The RDR Manual gives two examples concerning pre-2008 mixed funds.

20.18.1 *Pre-2008 transfer from pre-2008 mixed fund*

The first example involves a pre-2008 transfer from a pre-2008 mixed fund. One therefore applies the pre-2008 mixed fund rules.[92]

> **RDRM35320 Mixed Funds: Example 4 - remittances before 6 April 2008**
> **Example 4** (Martyn) [Jan 2019]
> The "mixed fund" rules in s809Q do not apply to amounts that are in an account before 6 April 2008 (FA2008/para 89).
> M has lived in the UK for many years. He has paid UK tax on the remittance basis for all relevant tax years and has decided that he will do so again for 2008-2009.
> M has his UK salary paid into his overseas bank account. He also has a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the account. Dividends from a shareholding in a foreign company are also paid into the account.
> On 18 March M sold some of his foreign shares as he was thinking of purchasing a new property. He deposited the proceeds of £5,000,000 from the sale into his overseas account. This amount is made up of £4m capital and £1m gain (no deduction of foreign tax).

Tax Year 2007-2008		**Credit (Debit)**	**Balance**	**Note**
	Balance b/f		£47,000	1
31 Dec	UK salary (net of tax)	£10,000	£57,000	
31 Dec	Overseas salary (net of tax)	£5,000	£62,000	
3 Jan	Transfer to UK account	(£5,000)	£57,000	2
31 Jan	UK salary	£10,000	£67,000	
31 Jan	Overseas salary	£5,000	£72,000	
3 Feb	Transfer to UK account	(£12,000)	£60,000	2
15 Feb	Dividend	£2,000	£62,000	
29 Feb	UK salary	£10,000	£72,000	
29 Feb	Overseas salary	£5,000	£77,000	
3 Mar	Transfer to UK account	(£8,000)	£69,000	2
18 Mar	Share Sale £4m capital, £1m gain	£5,000,000	£5,069,000	3[93]
31 Mar	UK salary	£10,000	£5,079,000	
31 Mar	Overseas salary	£5,000	£5,084,000	

[92] See 20.16.1 (Pre-2008 transfer from fund).

[93] For this note, see 20.17.5 (Remittance: gain or base cost?).

3 Apr	Transfer to UK account	(£10,000)	£5,074,000	2

Note 1: Identity of balance brought forward

The balance brought forward of £47,000 is made up of

UK salary	£15,000
overseas salary	£25,000
overseas dividends	£7,000
	£47,000[94]

The Manual then considers the tax analysis of the four UK transfers. The key fact is that M never remitted more than the UK salary already received in the account (the transfers totalled £35k and salary totalled £55k). The Manual provides:

> **Note 2: Transfers to UK account**
> ... So to establish the taxable amount of remittances made in the example above in 2007-2008 the account must be analysed. In this case the analysis is straightforward. M has brought £35,000 to the UK between December 2007 and March 2008 to meet his day to day UK spending needs. Applying the *Sterling Trust v CIR* practice outlined above,[95] the £35,000 can be regarded as remittances consisting solely of his UK salary that has already been taxed under PAYE. Because he has claimed the remittance basis of taxation in respect of his relevant foreign income or foreign earnings for 2007-2008 he has no further amount of UK tax to pay on these amounts that stay in the Offshore account.

The example is repeated in RDR Manual 36330 [Jan 2019] (Remittances from a mixed fund - Example 1).

20.18.2 *Transfer from fund with pre- and post-2008 entries*

The next example is a post-2008 transfer from a mixed fund containing pre- and post-2008 income/gains.

RDRM35330 Remittances from mixed funds involving income/gains before 6 April 2008 - Example 4a [Jan 2019]

Continuing from the example 4 above, on 5 April 2008 M's Offshore account contains:

2007- 2008	UK salary	£20,000
	Overseas salary	£45,000
	Overseas dividends	£9,000

[94] The Manual adds: "all items arising in, and credited during that tax year. M has paid the relevant amount of UK tax based upon his UK sources of income and the amounts of foreign income and gains that he has remitted to the UK." But that is not relevant to the example.

[95] See 20.17.1 (Fund: Taxed/untaxed income).

Sale of shares: Capital	£4,000,000
Sale of shares: Gain	£1,000,000
	£5,074,000

2008-2009		**Credit (Debit)**	**Balance**	**Category**	**Note**
6 Apr	Balance b/f	£5,074,000			
30 Apr	UK salary (net)	£10,000	£5,084,000	Para (a)	
30 Apr	Overseas salary (net)	£5,000	£5,089,000	Para (f)	
3 May	Transfer to UK acc	(£5,000)	£5,084,000		1
15 May	Dividend	£2,000	£5,086,000	Para (g)	
31 May	UK salary	£10,000	£5,096,000	Para (a)	
30 May	Overseas salary	£5,000	£5,101,000	Para (f)	
30 Jun	UK salary	£10,000	£5,111,000	Para (a)	
30 Jun	Overseas salary	£5,000	£5,116,000	Para (f)	
30 Jun	Direct Debit to UK	(£100,000)	£5,016,000		2

Note 1 analyses the £5k remittance made 3 May:

Applying the ordering rules in S809Q to the account **immediately before the** transfer:

Step 1 Identify the "amount of transfer" in the relevant tax year (2008-09) £5,000
Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:
Para (a) Employment income not subject to a foreign tax £10,000
Para (f) Employment income subject to a foreign tax £5,000
Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund
Para (a) £10,000
Step 3 Where the amount of the remittance is less than the amount identified at Step 2 the amount remitted is treated coming entirely from that paragraph. There is no need to continue to step 4. £5,000

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 2 analyses the £100k remittance made 30 June. At this point the example becomes more challenging:

M decided to buy a residential property. He remits £100,000 to pay some legal fees [!] for the purchase on 30 June. Although M considers that this amount has come from the sale of shares in 2007-2008 the ordering rules in s809Q require the remittance to be taken into account first against all income and gains of the year in which the remittance is made.

Step 1 Identify the "amount of transfer" in the relevant tax year (2008-2009) £100,000
Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:
Para (a) Employment income not subject to a foreign tax £25,000

Para (f) Employment income subject to a foreign tax	£15,000
Para (g) Relevant foreign income subject to a foreign tax	£2,000
Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:	
Para (a)	£25,000
Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.	£100,000
	- £25,000
	£75,000
Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.	
Step 2 Identify the earliest paragraph: **Para (f)**	£15,000
Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2	£75,000
	-£15,000
	£60,000
Step 4 In the order of preference listed above repeat Steps 2 and 3.	
Step 2 Para (g)	£2,000
Step 3	£60,000
	- £2,000
	£58,000

At this stage all of the amounts credited to the account in 2008-09 have been matched against £100,000 remittance transfer [in my terminology an onshore transfer] in that year. But £58,000 has been brought to the UK that has not been "matched" under the s809Q rules (and cannot be matched because of FA2008/para89).

The remaining £58,000 is regarded as coming from the 2007-08 credits to the account. The ordering rules at section 809Q cannot be used, so instead the general principles outlined in Note 2 of example 4 above will apply.

HMRC then explain the applicable pre-2008 mixed fund rules:

This £58,000 will usually be regarded as a remittance of M's income and is, first and foremost (*Sterling Trust* principle) his taxed income and then (*Scottish Provident v Allan* principle) any other income - that is his foreign employment income or dividends - as he selects.

However in this case M may equally be able to demonstrate that the remaining £58,000 comes from the proceeds of the sale of shares, as he particularly sold the shares in order to fund this house purchase. If that is the case, the remaining remittance will consist of £11,600 foreign chargeable gain (1/5 due proportion – refer to note 3 in example 4).[96]

HMRC do not say whether the £58k remittance is income or capital. How is M to "demonstrate that the £58k comes from the proceeds of the sale of

[96] See 20.17.3 (Fund: Capital/income).

shares" given that the payment was out of a mixed fund? The correct approach is to say that the substance is one of a remittance of capital since the purchase is for the house, ie has the nature of capital expenditure.[97] Thus the £58k remittance is capital.

Moral: M should not have paid the proceeds of the share sale into a mixed account. If it had been paid into a separate account, and the £100k paid from there, the position would have been simpler and better.

20.19 Nominated income/gain remitted

20.19.1 *Outline*

EN FB 2008 provides:

> 14... If, in subsequent years, that "nominated" income or gains upon which the RBC has been paid is, in fact, remitted to the UK, then that income or gains will not be taxed again. However, there are ordering rules to ensure that if "nominated" income or gains is, in fact, remitted when other untaxed income and gains remain unremitted, then that unremitted income and gains is treated as being remitted before the "nominated" income and gains.

These rules are not (or not just) mixed fund rules, as they may apply even if funds are not mixed; but it is convenient to deal with them in this chapter.

20.19.2 *"Nominated income"; "nomination year"*

The expression "nominated income and gains" is defined in s.809I(3) ITA:

> In this section the individual's "nominated income and gains" are the total income and chargeable gains nominated by the individual under section 809C for the relevant tax year or any earlier tax year (each such year for which the individual has made a nomination under that section being referred to as a "nomination year").

This is a section-wide definition only, so the drafter repeated the definition in s.809J(3) ITA. (If the definition had been chapter-wide, or ITA-wide definitions, the repetition would not have been needed.)

The definition is discussed in 17.12.2 (Duty to nominate income/gains).

20.19.3 *"Remittance basis income/gains"*

Section 809I(4) ITA gives this term a fairly commonsense meaning:

[97] See 20.17.3 (Fund: Capital/income).

> An individual's "remittance basis income and gains" are the foreign income and gains of the individual for all the tax years (up to and including the tax year mentioned in subsection (1)(a)) for which section 809B, 809D or 809E applies to the individual, apart from the individual's nominated income and gains.

Nominated income/gains do not count as remittance basis income/gains because they are taxed on an arising basis. The drafter must have regarded this as a section-wide definition only, and so repeated the definition in s.809J(4) ITA.[98]

20.19.4 *Nominated income categories*

The taxpayer must classify their remittance basis income and gains into 8 categories, which I call the **"nominated income/gains categories"**. The categories are set out in s.809J(2) ITA. These are almost the same as the 9 mixed fund categories[99] but:

(1) there are casual differences of wording which do not affect the meaning; and

(2) there are (incredibly) small differences (I do not see why – if any reader can suggest a reason I would be interested to know).

I here set out a table which compares the two (the differences are italicised):

Nominated income/gains categories: s.809J	**Mixed fund categories: s.809Q**
	(a) *employment income (other than income within para (b), (c) or (f))*
(a) relevant foreign earnings (other than those subject to a foreign tax)	(b) relevant foreign earnings (other than income within para (f))
(b) foreign specific employment income (other than income subject to a foreign tax)	(c) foreign specific employment income (other than income within para (f))
(c) relevant foreign income (other than income subject to a foreign tax)	(d) relevant foreign income (other than income within para (g))

[98] "In step (1) of subsection (1) the individual's "remittance basis income and gains" are the foreign income and gains of the individual for all the tax years (up to and including the relevant tax year) for which section 809B, 809D or 809E applies to the individual, apart from the individual's nominated income and gains."

[99] See 20.4 (Ingredients of mixed fund).

(d) foreign chargeable gains (other than gains subject to a foreign tax)	(e) foreign chargeable gains (other than chargeable gains within para (h))
(e) *relevant foreign earnings subject to a foreign tax*	(f) employment income subject to a foreign tax
(f) *foreign specific employment income subject to a foreign tax*	
(g) relevant foreign income subject to a foreign tax	(g) relevant foreign income subject to a foreign tax
(h) foreign chargeable gains subject to a foreign tax	(h) foreign chargeable gains subject to a foreign tax
	(i) income or capital not within another paragraph

Section 809J(6) ITA provides a commonsense definition of "foreign tax" for the purpose of the nominated income/gains categories. The same definition is used for the mixed funds categories and I discuss the definition there.[100]

20.19.5 *Nomination rules: Application*

Section 809I(1) ITA provides:

> This section applies if—
> (a) any of an individual's nominated income and gains is remitted to the UK in a tax year,
> (b) any of the individual's remittance basis income and gains has not been remitted to the UK in or before that year, and
> (c) the £10 test is met for that year.

20.19.6 *The £10 test*

Section 809I ITA provides:

> (5) The £10 test is met for the tax year mentioned in subsection (1)(a) ("year X") if, taking each nomination year separately, the cumulative total as respects at least one nomination year exceeds £10.
> (6) In relation to a nomination year–
> (a) "the cumulative total" means the sum, for all the tax years in

[100] See 20.4 (Ingredients of mixed fund).

aggregate up to and including year X, of the amounts of relevant income and gains remitted to the UK in those tax years from that nomination year, and

(b) "relevant income and gains" means the income and chargeable gains nominated by the individual under section 809C for that nomination year.

This is therefore a de minimis rule.

The 2011 remittance consultation paper explains the background:

> 2.67 Non-domiciles who have been UK resident in at least seven of the past nine tax years are liable to an annual charge of £30,000 if they claim the remittance basis. The rules governing the payment of this charge can be very complicated and result in significant administrative burdens and inconvenience for the taxpayer.
>
> 2.68 Those who elect to pay the charge are required to nominate an amount of their overseas income and capital gains which is taxable on the arising basis and is deemed to generate an additional tax charge of £30,000.
>
> 2.69 There are complicated rules to ensure that an individual cannot subsequently remit any of the income or capital gains which they have nominated before other overseas income and capital gains which would be taxed in the UK when remitted. This must be in addition to the UK tax to which they are otherwise liable on income and capital gains arising in the UK or remitted to the UK. This nomination ensures that the £30,000 is a tax charge on overseas income and gains rather than a standalone levy.
>
> 2.70 Individuals can encounter significant administrative difficulties where they fail to keep their nominated income and capital gains segregated from other income and capital gains. In such situations, an individual might inadvertently remit some of their nominated income and capital gains to the UK. This will mean that they become subject to complicated identification rules which trace the origin of each payment and ensure that the nominated amounts are always the last to be remitted. In the absence of these rules, it would be possible for an individual to reduce significantly the amount of tax they pay on the income or capital gains which they remit to the UK.
>
> 2.71 To avoid some of these complexities, it is common for an individual to open an overseas bank account which has the sole purpose of holding funds to generate sufficient income to be nominated for the purposes of the annual charge. Whilst this should allow the individual to avoid the identification rules, the need to set up a special overseas bank account involves additional expenditure and administrative obligations. Moreover, even where an individual has a dedicated bank account for their nomination, it cannot be guaranteed that they would never inadvertently make remittances from the account.

> 2.72 The Government recognises that this can result in excessive and unhelpful complexity which is hard for the taxpayer to understand. It therefore proposes to amend the legislation to allow individuals to remit the first £10 of income or capital gains which they nominate free of tax and without becoming subject to the identification rules. This will enable them to nominate up to £10 of their foreign income or capital gains for the purposes of the £30,000 charge without having to ensure they do not subsequently remit any part of that nominated amount to the UK. Many individuals only nominate a small amount of foreign income or capital gains and so this simplification would remove the risk of them inadvertently remitting the nominated income and triggering the identification rules.
> 2.73 This would significantly reduce the need to maintain an overseas bank account solely for the purposes of nominating income and capital gains, whilst making the nomination rules less administratively onerous.
> 2.74 The remaining rules applying to nominated income and capital gains will remain unaltered.[101]

The EN accompanying the draft clauses provides:

> 130. Where [remittance basis taxpayers] remit the foreign income and gains which they have nominated under section 809C before any other unremitted foreign income and gains, the order in which income and gains are remitted is determined by sections 809I and 809J.
> 131. The amendments made by Part 4 of the Schedule allow such individuals to remit up to £10 each year of their income or gains which they have nominated without having to ensure they do not subsequently remit any part of that nominated amount into the UK.
> 132. An illustration of how the new rules work is set out below.
> 133. In year 1, an individual nominates £5 income and gains from that year which they remit to the UK. As the total amount of nominated income and gains remitted is less that £10, they do not meet the £10 test and section 809I does not apply.
> 134. In year 2, the individual nominates £20 from year 1, of which they remit £7. The amounts of nominated income and gains from year 1 exceeds £10, so section 809I will apply.

The example is somewhat far-fetched, since an individual would either

[101] HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81510/consult_condoc_non_domicile_individuals.pdf*

nominate a nominal £1 or else nominate a substantial amount. But leaving that aside, para 134 is not correct. The individual cannot (as suggested) nominate, in year 2, £20 of income/gains from year 1 in support of a remittance basis claim in year 2.[102]

Para 237 EN FA 2012 makes the point more accurately:

> Example: in year one, an individual nominates £15 of foreign income or gains and remits £5 of the nominated amount to the UK. As the total amount of nominated income and gains remitted in year one is less than £10, they do not meet the £10 test and section 809I does not apply. In year two the individual remits the balance of nominated income from year one consisting of £10 to the UK. The cumulative total of nominated income and gains from year one remitted to the UK now exceeds £10, so the ordering rules in section 809I will apply.

20.19.7 *Nomination rules*

Assuming that the conditions for the application of the nominated income remittance rules are satisfied, we move on to s.809I(2) ITA which provides:

> Income tax and capital gains tax are charged, for that year and subsequent tax years, as if
>
> [a] the income and chargeable gains treated under section 809J as remitted to the UK by the individual in that tax year had been so remitted
>
> [b] (and income and chargeable gains of the individual that were actually remitted in that year had not been).

So we turn to s.809J ITA, which sets out artificial or fictional remittance rules which I call the "**nominated income remittance rules**". (It would be more accurate to call this "the nominated income/*gains* remittance rules", but for convenience I generally refer to income (rather than income/gains) and leave gains to be understood.)

Section 809J(1) ITA provides:

> If section 809I applies, the following steps are to be taken for the purpose of determining the income or gains treated in a tax year ("the relevant tax year") as remitted to the UK by the individual.

The section sets out six steps. It is easier to follow the steps if one has an

[102] See 17.12.2 (Duty to nominate income/gains).

example in mind.

Suppose T (a remittance basis taxpayer) has remittance basis income and gains of £10k per annum of each of the nominated income/gains categories thus:

Category	**Type of income (in short)**	**Year 1**	**Year 2**
(a)	relevant foreign earnings	£10k	£10k
(b)	foreign specific employment income (FSEI)	£10k	£10k
(c)	relevant foreign income	£10k	£10k
(d)	foreign chargeable gains	£10k	£10k
(e)	foreign taxed relevant foreign earnings	£10k	£10k
(f)	foreign taxed FSEI	£10k	£10k
(g)	foreign taxed RFI	£10k	£10k
(h)	foreign taxed gains	£10k	£10k

Suppose T has in addition to the above £30k nominated income and gains per annum.

T remits nothing in year 1. In year 2 T remits:
(a) £1k from T's nominated income/gains.
(b) £80k from T's remittance basis income/gains.

This brings the nominated income remittance rules into action.

> *Step 1*
> *Find the total amount of—*
> *(a) the individual's nominated income and gains, and*
> *(b) the individual's remittance basis income and gains,*
> *that have been remitted to the UK in the relevant tax year.*
> *This amount is "the relevant amount".*

In the example the relevant tax year is year 2. Applying the facts of the example, the relevant amount is £81k.

> *Step 2*
> *Find the amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C) that is within each of the categories of income and gains in paras (a) to (h) of subsection (2).*
> *If none of sections 809B, 809D and 809E apply to the individual for that year, treat those amounts as nil (and accordingly go to step 6).*

"The amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C)" means the remittance basis income/gains. (The drafter has forgotten to use the term which was defined (twice) for this purpose; but it does not matter.) The amount in the example is as set out in the table above.

> *Step 3*
> *Find the earliest paragraph for which the amount determined under step 2 is not nil.*

The earliest paragraph is para (a).

> *If that amount does not exceed the relevant amount, treat the individual as having remitted the income or gains within that paragraph (and for that tax year).*

The individual is treated as having remitted £10k relevant foreign earnings, category (a) for year 2.

> Otherwise, treat the individual as having remitted the relevant proportion of each kind of income or gains within that paragraph (and for that tax year).
> "The relevant proportion" is the relevant amount divided by the amount determined under step 2 for that paragraph.

(Had the total remittance been (say) £5k then the relevant proportion would have been £5k÷£10k = 50% so the transfer would have been treated as containing £5k RFE category (a) for year (1).)

> *Step 4*
> Reduce the relevant amount by the amount taken into account under step 3.

The relevant amount is reduced to £71k.

> *Step 5*
> If the relevant amount (as reduced under step 4) is not nil, start again at step 3.
> In step 3, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step.

Following this iterative procedure a total of eight times, the transfer is treated as containing:

(a)	relevant foreign earnings	£10k
(b)	foreign specific employment income	£10k
(c)	relevant foreign income	£10k

(d)	foreign chargeable gains	£10k
(e)	foreign taxed RFE	£10k
(f)	foreign taxed SEI	£10k
(g)	foreign taxed RFI	£10k
(h)	foreign taxed gains	£10k
	Total	**£80k**

The relevant amount is by this stage reduced to £1k. We move to the next step:

> *Step 6*
> *If the relevant amount (as reduced) is not nil once steps 3 to 5 have been undertaken in relation to all paragraphs of subsection (2) for which the amount determined under step 2 is not nil, start again at step 2.*
> *In step 2, read the reference to the foreign income and gains of the individual for the relevant tax year as a reference to such of the foreign income and gains of the individual for the appropriate tax year as had not been remitted*[103] *by the beginning of the relevant tax year.*
> *"The appropriate tax year" is the latest tax year which is—*
> *(a) before the last tax year for which step 2 has been undertaken, and*
> *(b) a tax year for which section 809B, 809D or 809E applies to the individual.*

Thus we repeat step 2 a last and ninth time, reading "the relevant tax year" to mean year 1. So the remittance of £81k is treated as being:

(a)	relevant foreign earnings	£11k
(b)	foreign specific employment income	£10k
(c)	relevant foreign income	£10k
(d)	foreign chargeable gains	£10k
(e)	foreign taxed RFE	£10k
(f)	foreign taxed SEI	£10k
(g)	foreign taxed RFI	£10k
(h)	foreign taxed gains	£10k
	Total	£81k

[103] Section 809J(5) ITA provides:
In step 6 of subsection (1) the reference to income or gains being remitted is—
(a) as respects any tax year before section 809I applies, to income or gains being remitted to the UK, and
(b) as respects any tax year in relation to which that section applies, to income or gains treated under this section as so remitted.

March 2009 Qs & As provides:

> **Q3:** HMRC have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of "tainting" every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?
> **A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the "nominated" account. That might be the entire account number, or the account "name", or some other unique identifying feature of the account.

March 2009 Qs & As makes an obvious point:

> **Q6:** If I use nominated income or gains to pay the remittance basis charge of £30,000 it would appear that does not trigger the provisions in sections 809I and 809J. Is that right?
> **A:** If £30,000 of the nominated income or gains is brought to the UK to pay the remittance basis charge, it is treated as not remitted to the UK under section 809V. Therefore section 809I does not apply because none of the individual's nominated income or gains is regarded as having been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so section 809I will be triggered.

20.19.8 *Accidental remittance of nominated income/gains*

The RDR Manual provides:

> **RDRM35140 Remittances of nominated income or gains - misc** [Jan 2019]
> *Accidental remittances*
> If an individual accidentally remits any nominated income or gains to the UK then HMRC will (using its discretionary powers) allow them to undo

> their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s809I and s809J will not apply.
>
> HMRC will only use its discretion in such situations as long as there have been no relevant transactions or other benefits conferred on a relevant person in the interim. Otherwise the s809J ordering rules will apply.
>
> For example, if £20,000 is transferred in error from an overseas bank to a UK bank account and two weeks later the account owner realises the mistake and immediately transfers that £20,000 directly back to the overseas bank account, HMRC will accept that s809I and s809J do not apply. However if, for example, the £20,000 was spent in the UK and then £20,000 from another UK account was transferred back to the overseas account then s809I and s809J do apply.

This recognises the unfairness of the nominated income remittance rules. Contrast 18.19 (Bank error).

20.19.9 *Nominated income used to pay remittance basis charge*

The RDR Manual provides:

> **RDRM35140 Remittances of nominated income or gains - misc** [Jan 2019]
>
> *Accidental remittances*
>
> If an individual accidentally remits any nominated income or gains to the UK then HMRC will (using its discretionary powers) allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s.809I and s.809J will not apply.

20.19.10 *HMRC example*

The RDR Manual provides:

RDRM35150 Remittances of nominated income or gains [Apr 2019]
Example 1 (Alexandria)

	Foreign gains	Jersey RFI	Jersey RFE	Nomination
	Para (d)	Para (c)	Para (a)	(from Jersey RFI)
2010-11	£250,000	£75,000	£200,000	£75,000 RFI
2011-12	£300,000	£80,000	£120,000	£75,000 RFI[104]

[104] The author ignores the complication that the rate of income tax has risen to 50%.

2012-13	Nil	£75,000	£280,000	£75,000 RFI
2013-14	£130,000	£80,000	£150,000	£75,000 RFI
Totals	£680,000	£310,000	£750,000	

In 2013-14 A actually and identifiably remits

£30,000	Jersey relevant foreign income that she nominated in 2010-11,
£140,000	foreign chargeable gains from 2011-12 and
£50,000	relevant foreign earnings from 2013-14.

The ordering rules are triggered. The "relevant year" is 2013-14

Step 1 Identify nominated income and gains remitted in the relevant year	£30,000	**Relevant Amount**	£220,000
Identify the remittance basis income and gains remitted in the relevant year	£190,000		
Step 2			
Find the total amount of the individual's foreign income and gains (excluding those nominated) for the relevant tax year	**Para (a)** Relevant foreign earnings (not subject to a foreign tax)		£150,000
	Para (c) Relevant foreign income (not subject to a foreign tax)		£5,000
	Para (d) Foreign chargeable gains (not subject to a foreign tax)		£130,000
Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil.	**Para (a)**		£150,000
Step 4 Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified	£220k less £150k = £70,000		

Step 5 If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

Step 3 repeated	**Para (c)**	£5,000
Step 4 repeated	Relevant Amount reduced to:	£65,000

Step 5 In the order of preference listed above repeat Steps 3 and 4.

Step 3 repeated	**Para (d)**	£130,000

Step 4 If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain.

S*o A will be taxed on £220,000 of remittances as if she had actually remitted the following*

		2010-11	**2011-12**	**2012-13**	**2013-14**
Foreign chargeable gains	Accruing in year	£250,000	£300,000	Nil	£130,000
	Actually remitted	£Nil	£140,000	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£65,000
Relevant foreign income Nominated	Arising in year	£75,000	£75,000	£75,000	£75,000
	Actually remitted	£30,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil
Relevant foreign income Not nominated	Arising in year	£Nil	£5,000	£Nil	£5,000
	Actually remitted	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000
Relevant foreign earnings	Accruing in year	£200,000	£120,000	£280,000	£150,000
	Actually remitted	£Nil	£Nil	£Nil	£50,000
	Treated as remitted	£Nil	£Nil	£Nil	£150,000

If in future years she actually remits any of these monies, the ordering rules will treat her as having remitted something else instead (refer to RDRM35160 - example 1 continuation).

35160 Remittance of "nominated" income or gains [Jan 2019]
Example 1 - Continued
Moving forward, in 2014-15 A has relevant foreign earnings of £80,000, but no other foreign income or gains. She decides not to use the remittance basis in that year.
In 2014-15 A actually brings into the UK;
£5,000 Jersey relevant foreign income that she did not nominate in 2013-14 (note 1)
£80,000 relevant foreign earnings from 2013-14 and
£80,000 relevant foreign earnings from 2014-15
Although A is not using the remittance basis in 2014-15, the ordering rules at s809J ITA 2007 are still required to determine what she is to be taxed as having remitted in that year. The relevant year is 2014-15.

Ordering rules at 2014-15

Step 1 Identify nominated income and gains remitted in the relevant year (2014-15)	£nil	**Relevant Amount**	£85,000
Identify the remittance basis income and gains remitted in the relevant year	£85,000 (see note 2)		
Step 2 Find the total amount of the individual's foreign income and gains (excluding those nominated) for the relevant tax year If the remittance basis was not used in that year (that is sections 809B, 809D or 809E did not apply), treat those amounts as nil and go to step 6	Nil		

Step 6
If the relevant amount is not nil, start again at step 2. Take the reference to "relevant year" to be a reference to foreign income of gains of the individual for the earliest 'appropriate year' previous to the lat tax year from which Step 2 was undertaken.

Step 2 Find the total amount of the individual’s foreign income and gains (excluding those nominated) for the appropriate tax year (2013-14) (refer to Note 3)	**Para (d)** Foreign	£65,000
Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil.	**Para (d)**	£65,000
Step 4 Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified	Relevant Amount reduced to:	£85k less £65k = £20,000

Step 5 If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

Step 6

If the relevant amount is not nil after Steps 3-5 have been completed for the year, start again at step 2. Take the reference to ‘relevant year’ to be a reference to foreign income of gains of the individual for the earliest ‘appropriate year’ previous to the lat tax year from which Step 2 was undertaken.

Step 2 Find the total amount of the individual’s foreign income and gains (excluding those nominated) for the appropriate tax year (2012-13)	**Para (a)** Relevant foreign earnings (not subject to a foreign tax)	£280,000
Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil	**Para (a)**	£280,000

Step 4 If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So in 2014-15 A is treated as having remitted

£20,000	relevant foreign earnings
£65,000	foreign chargeable gains.

NB – The £80,000 relevant foreign earnings from 2014-15 that she brings in will be taxed on the arising basis in that year.

Note 1 In 2013-14 A has £80,000 of Jersey relevant foreign income, of which £75,000 were nominated; if this £80,000 were all in the one single account, and there was nothing else in the account then, under the principle of this section the first £5,000 remitted in 2014-15 is accepted as being “not-nominated” income.

In this example it is of little practical difference because the s809J ordering rules have already been “triggered” in 2013-14 by her remittance of nominated income (from 2010-11).

But if the ordering rules had not already been triggered, then because, this £5,000 Jersey relevant foreign income in 2014-15 can be accepted as being “un-nominated” income first and foremost, so A’s remittance of this £5,000 would not, of itself, have triggered the s809J ordering rules in this year.

Note 2 A’s remittance basis income and gains are her total foreign income or chargeable gains for all tax years up to the “relevant tax year” (2014-15) in which she used the remittance basis under section 809B, section 809D or section 809E. It therefore excludes her relevant foreign earnings from 2014-15 because she is not using the remittance basis in that year.

Note 3 the 'foreign income and gains ‘for’ the appropriate year exclude any:

- 'nominated’ income or gains, or
- income or gains that were actually remitted to the UK before the beginning of the appropriate tax year or
- income or gains that were treated as remitted to the UK previously under section 809J before the beginning of the appropriate tax year.

In A’s case, the £5,000 Jersey relevant foreign income from 2013-14, and the £80,000 relevant foreign earnings from 2013-14 that she actually remitted in 2014-15 were treated as having been remitted in 2013-14 by the ordering rules (refer to the earlier part of example 1 RDRM35150).

Summary

		2010-11	**2011-12**	**2012-13**	**2013-14**	**2014-15**
Foreign chargeable gains	Accruing in year	£250,000	£300,000	£Nil	£130,000	£Nil
	Actually brought to UK	£Nil	£140,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£130,000	£Nil
Relevant foreign income Nominated	Arising in year	£75,000	£75,000	£75,000	£75,000	£Nil
	Actually brought to UK	£30,000	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil	£Nil
Relevant foreign income Not nominated	Arising in year	£Nil	£5,000	£Nil	£5,000	£Nil
	Actually brought to UK	£Nil	£Nil	£Nil	£5,000	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000	£Nil
Relevant foreign earnings	Arising in year	£200,000	£120,000	£280,000	£150,000	£80,000
	Actually brought to UK	£Nil	£Nil	£Nil	£130,000	£80,000
	Treated as remitted	£Nil	£Nil	£20,000	£150,000	£Nil

20.20 Nominated income: Critique

In short, the effect of the nominated income remittance rule is that remittances are treated as being made in the nominated income/gains priority order, taking more recent years before earlier years (regardless of the actual remittances). As in the case of the “steps” of the mixed fund rules, one is tempted to ask: why didn’t the statute simply say so?

But the drafting is the least of the problems of the nominated income remittance rule. The author of the EN anticipates criticism that this is administratively difficult and offers some tax planning advice:

> 14...The rules dealing with this in sections 809I and 809J will require additional records to be maintained from 6 April 2008 or the first year

> of residence in the UK, if later.
> 15. The record keeping necessary for sections 809I and 809J can be avoided if individuals ensure that "nominated" income or gains upon which the RBC is paid are not remitted to the UK, or only remitted after the remittance of all other unremitted income and gains since the first year of residence from April 2008. If an individual is confident they will never need to remit that "nominated" income or gains, paying the RBC will not involve any extra complexity or record keeping.[105]

Even if this advice were correct it would not help the majority of remittance basis taxpayers, but they should not complain: they are responsible for the problem, which they brought on themselves by making a remittance basis claim:

> 16. As mentioned earlier, those eligible can choose whether or not to claim the remittance basis for each particular year, depending on whether it is to their advantage to do so.

But even the administrative inconvenience is not the serious problem of the rule. The effect of the rule is that if the individual remits a penny of their nominated income/gains, one disregards entirely the actual remittances and charges on the basis of the fictional rules. Thus an individual who actually remits gains is taxed as if they remitted income (as long as they also remits a penny of nominated income). It is therefore in principle desirable to take care not to remit any nominated income/gains. The funds may be used abroad or used to pay the remittance basis charge.

20.21 Mixed funds: Critique

The ITA mixed fund rules operate on a daily, indeed minute by minute basis, as the rules must be applied at the time of every onshore and offshore transfer. They do not operate within a given tax year on a pro rata basis (contrast the s.87 or s.731 matching rules). If a client's account contains thousands of entries, the computations must be done thousands of times. The reader who has studied the chapter to here, and who contemplates applying these rules to the actual circumstances of a client, will agree that the mixed fund rules are unworkable.

[105] The last sentence is not correct. It is not enough that an individual is "confident that they will never need to remit that nominated income or gains". The individual must be able to demonstrate to HMRC that they have not remitted, and that requires record keeping.

Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 records the same view:

> Delegates asked whether HMRC would be prepared to allow for apportionment on an annualised (rather than a monthly) basis. The legislation concentrates on transfers from mixed funds on the occasion of each and every transfer. HMRC did not think it was possible to override the intention of the legislation but agents considered that it would be unworkable to examine each and every debit and credit on the basis envisaged within a new legislation. ...
> The overwhelming view put forward by external delegates was that without the availability of a methodology along the lines of SP 5/84 it would be impractical for any inward expatriate to claim access to the remittance basis because it would not be possible to perform the calculations required by the legislation.[106]

In their defence, HMRC make two points:

> [1] HMRC reminded delegates that use of the remittance basis is voluntary as from 6 April 2008 and
> [2] that HMRC had been asked to bring in rules on remittance from mixed funds and rules relating to overseas transfers.

But as to point [1], the fact that the remittance basis is voluntary is no excuse for unworkable tax law. HMRC here overlook that the remittance basis is intended to make the UK an *attractive* place for foreign domiciliaries to reside. There is no need to comment on point [2].

A few months later HMRC issued SP 1/09 so the step thought impossible proved to be possible after all.[107] But while helping employees who qualify for overseas workday relief, that does not help other remittance basis taxpayers who face the same problems. Why were workday relief employees singled out for special treatment? The reason was presumably down to effective lobbying rather than any rational policy consideration.

The mixed fund legislation needs to be rethought from beginning to end – a challenging task, which could not possibly have been done in the few days available as the FA 2008 hurtled to the deadline for enactment.

In 2011, HMRC rejected the suggestion of reform:

[106] *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

[107] See 34.23 (OWR (recent arrivers) mixed funds).

> In particular, the Government will not look further at the following:
> *Simplification* Reviewing and simplifying the mixed fund rules
> *Government response* Although the Government appreciates that these rules can (!) be complicated to operate, it is essential to be able to identify different types of income, gains and capital as they are remitted from a single account. The Government cannot envisage an alternative approach to achieve this purpose which would not entail similar complexity or a significant Exchequer cost.[108]

But cleansing relief (in 2017) indicates second thoughts, though of a timid and one-off nature.

It is suggested that the rule ought to be that the person remitting from a mixed fund can determine what constituent of the fund the remittance consists of. That would be a significant simplification. The cost to the exchequer could be recovered by an adjustment in the remittance basis claim charge, but the cost (Revenue loss) would be significant.

A variant idea, less of a simplification but less expensive, and so perhaps more attractive, would be that the person remitting can determine what constituent of the fund the remittance consists of, but clean capital has to come out last. Again, the cost could be recovered by by an adjustment in the remittance basis claim charge.

Reform would be especially welcomed by those who actually try to comply with the present rules.

124.2 (Tax collected from UK representatives)

21.1 Trading income: Introduction

The taxation of trading income is governed by Part 2 ITTOIA/Part 3 CTA 2009. A full discussion would require many volumes. I focus on matters closest to the themes of this book.

For the meaning of "trade" see App.2.23 (Trade).

21.2 Charge on trading income

The charge is as follows:

s.5 ITTOIA	**s.35 CTA 2009**
Income tax is charged on the profits of a trade, profession or vocation.	The charge to corporation tax on income applies to the profits of a trade.

The territorial scope of the charge is in s.6 ITTOIA/s.5 CTA 2009, but these provisions are not drafted in the same way and need to be considered separately.

21.3 Profession/vocation

Section 6(3) ITTOIA provides:

> This section applies to professions and vocations as it applies to trades.

The distinction between trade and profession/vocation occasionally matters for tax, but not in s.6, or in the topics discussed here. So in this chapter, reference to "trade" includes a profession or vocation.

21.3.1 *Profession/vocation: Critique*

It is suggested that the distinctions between trade/profession/vocation ought to be abolished: uniform rules should apply to trades, professions and vocations. That would be a worthwhile simplification. It would also solve the problem that no-one actually knows what is meant by "vocation". The meaning of the word has drifted somewhat since it was used in the first Income Tax Act of 1799, but the word does not seem to be used in its ordinary contemporary meaning.

It is generally accepted that a company cannot carry on a profession or vocation, so this change would align CT/IT.

21.4 IT territorial limit: Trading

21.4.1 *UK resident trader: IT*

Section 6(1) ITTOIA provides:

> Profits of a trade arising to a UK resident are chargeable to tax under this Chapter [Chapter 2 Part 2] wherever the trade is carried on.

Section 7 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the profits of the tax year. …
> (4) This section is subject to Part 8 (foreign income: special rules).

Section 7(4) ITTOIA feeds into s.832, which incorporates the remittance basis if the trading income arises from a source outside the UK. It is therefore necessary to identify the location of the source. Section 7(5) ITTOIA states the test of source of trading income:

> And, for the purposes of section 830 (meaning of "relevant foreign income"), the profits of a trade, profession or vocation arise from a source outside the UK only if the trade, profession or vocation is carried on *wholly* outside the UK.

This is a statutory statement of the pre-ITTOIA case law.[1] It is a strangely wide test of source. Applying this test, if a trade is carried on partly in country A and partly in country B, the source of the income is in country A *and* country B. For the same income to have a source in two different countries is contrary to the natural meaning of "source", and contrary to the purpose of the concept which is to locate a source in one jurisdiction in order to identify one state with jurisdiction to tax. (Similarly an individual can have only one domicile.)

The explanation is that s.7(5) ITTOIA does not provide the natural meaning of "source"; it is an artificial definition. It is fortunate (but not surprising) that commonwealth countries which adopted a UK style income tax did not adopt this rule. Thus Commonwealth cases on the

[1] See Avery Jones, "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", *Studies in the History of Tax Law* (Vol 1 2004) p.26, *https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf*

source of trading income are not relevant here.

If any part of the trade is carried on in the UK then the entire trade has a UK source and does not qualify for the remittance basis. There is not even a *de minimis* rule; contrast the incidental duties disregard which applies to employment income.[2]

21.4.2 *Head & brain test*

The former International Tax Handbook discussed the old case law, which still holds good under ITTOIA:

> **209. San Paulo case**
> [The San Paulo Railway Company (*San Paulo (Brazilian) Railway Company v Carter* 3 TC 407)] ... was a UK incorporated company with its board meetings in London. The whole of its physical undertaking was in South America and while it accepted that it was resident here it argued that its business was carried on wholly abroad where its railway was. The Courts held that the head and brain of the trading venture was here and that the profits were those of a trade partly carried on here and that, accordingly, Case I [UK source] applied. ...
> **210. Trade partly in UK**
> The principle underlying the San Paulo decision is that a trade carried on partly in the UK is within Case I. The factors which decide whether a company is resident in the UK by reason of central management and control are, as will be seen, similar to those which decide whether its trade should be within Case I or Case V [foreign source] and the result is that for many years in the corporate sector the only examples seen of Case V trades were those in which a company is a partner in an overseas trade. ...
> **211. *Ogilvie v Kitton***
> But other cases were to show how difficult it was going to be, except on very exceptional facts, to establish that any trade of a resident person was carried on wholly abroad. There was, for example, Mr Ogilvie in *Ogilvie v Kitton* (5 TC 338). He lived in Aberdeen and ran a shop in Canada. To say that he ran the shop really begs the question because he simply received reports from his manager in Canada and did not in fact intervene actively in the business at all, merely taking a tacit interest in things from the information in the reports. It was held that the head and brain of the trading venture was in Aberdeen and that the profits were assessable under Case 1.

In short, if a sole trader is UK resident it is in practice impossible to arrange that their trading income has a foreign source because the "head and brain" is here. Section 7(4)(5) ITTOIA is dead letter law, as far as UK resident sole traders are concerned. The former International Tax Handbook recognised this at para 209:

[2] See 34.16 (Incidental duties in UK).

> That decision [*San Paulo*] suited the Revenue very well. We no longer had to worry about remittances ... And so we effectively got on to a statutory arising basis for trades which, in everyday language, were wholly overseas and we reached that position purely through the interpretation of the statute by the Courts. ...

See too 8.18 (CMC/trade income source compared).

For completeness: s.95 ITA restricts loss relief for trades carried on wholly outside the UK, but since it is almost impossible to arrange that, the section is also dead letter law, as far as UK resident sole traders are concerned.

Assuming it is desired to retain the present law, it would be sensible to state expressly that UK resident sole traders should not qualify for the remittance basis on foreign source trading income.[3] But perhaps the change is more trouble than it is worth.

21.4.3 *UK resident trader: Planning*

If a remittance basis taxpayer carries on a trade partly in and partly out of the UK, the individual will be taxed on the arising basis and not under the remittance basis. In these circumstances the individual may be able to divide up their activities into two parts– those in and those out of the UK. The individual will then be carrying on two separate activities, of which at least one will yield foreign source income and qualify for remittance basis treatment.

How is this division to be achieved? Overseas activities could be carried on by a partnership controlled abroad. The offshore partner may be a company. This route was successfully taken by Sir David Frost.[4] Alternatively the activities could be carried on by a company or trust. In this way foreign trading income may be converted into foreign employment or dividend income which would enjoy a more beneficial tax treatment.

21.4.4 *Non-resident trader: IT*

A different rule applies to trading income arising to a *non*-resident person.

[3] Similar considerations apply to employment income, see 34.16 (Incidental duties in UK), but the trading rules also need to address partnership trading income, as the remittance basis can apply to a UK resident partner - unless that rule too were to be reconsidered.

[4] *Newstead v Frost* 53 TC 525.

Section 6(2) ITTOIA provides:

> Profits of a trade other than a trade of dealing in or developing UK land[5] arising to a non-UK resident are chargeable to tax under this Chapter [Chapter 2 Part 2] only if they arise—
> (a) from a trade carried on wholly in the UK, or
> (b) in the case of a trade carried on partly in the UK and partly elsewhere, from the part of the trade carried on in the UK.

The pre-ITTOIA wording imposed a charge on non-residents on income arising:

> *from any trade, profession or vocation exercised within the UK.*[6]

The meaning was the same so pre-ITTOIA case law is still relevant.

It is not likely that a non-resident will be carrying on a trade *wholly* in the UK (for the same reasons that a UK resident cannot in practice carry on a trade wholly outside the UK). So we are not concerned with para (a).

Section 6(2)(b) effectively raises two issues: (1) When is a trade carried on partly in the UK? (2) If a trade is carried on partly in the UK, how does one identify the profits from that part?

This is sometimes paraphrased by asking the question whether (or to what extent) the source of the trading income is in the UK. There seems nothing wrong with that; it is the correct and natural meaning of the word "source". Since s.7(5) ITTOIA uses the word "source" in an artificial sense in the rules relating to UK resident traders, I have wondered whether it would aid clarity to avoid the word "source" in the context of the rules for non-residents. But it is not practical to avoid the use of the word "source" here[7] so one simply needs to remember that in the context of trading income, source has distinct meanings, or perhaps more accurately, there are distinct tests of source, for residents/non-residents.

21.4.5 *Trading income of split year*

Section 6(2A) ITTOIA provides a sensible split-year rule:

> If the tax year is a split year as respects a UK resident individual, this

[5] See 22.3 (Dealing/developing UK land).

[6] Section 18 ICTA 1988 (repealed). It was accepted (though not stated in statute) that where a trade was exercised partly in the UK, income was apportioned and only the UK part was taxable.

[7] Since relevant case law and foreign statutes regularly use the word "source".

> section has effect as if, for the overseas part of that year, the individual were non-UK resident.

See too 12.8 (Trader: Emigration/immigration).

21.5 To whom trading income arises

Since different IT rules apply depending on whether trading income arises to a resident/non-resident, it is necessary to identify the person to whom the income arises.

21.5.1 *Trading income of trust*

Suppose:

(1) a non-resident trust is carrying on a trade, and
(2) the trust is not within s.624 or s.720.

In the case of a discretionary trust, the trading income arises to the trustees, they are taxed in accordance with the rules relating to *non*-residents so the trustees would only be subject to UK income tax if the trade was carried on partly in the UK, and then only on the profits (if any) attributable to that part.

However if the life tenant of a transparent (*Baker*-style) trust was resident in the UK, then the profits of the trade arise to a UK resident, and the life tenant is taxed in accordance with the rules relating to UK residents: ie on an arising basis unless the stricter condition is satisfied that the trade is carried on by the trustees wholly outside the UK.

21.5.2 *Trading income: s.624/s.720*

Suppose a trade is carried on by a non-resident settlor-interested trust, or company held by a such a trust.

The question arises whether the income qualifies as protected s.624 income or protected s.720 income. Here, the trading income must meet the condition ("the RFI condition") that:

> it would be RFI if it were income of a UK resident individual.[8]

This is a statutory assumption of UK residence.[9] Applying the statutory

[8] See 92.9.1 (Condition A: RFI); 92.13.1 (Condition (a): RFI). For the reason for the wording ("would be RFI if it were the individual's"), see 16.9.2 (Relevant foreign income).

[9] There are several other examples of that; see 61.6.1 (s.87 residence assumption).

assumption, the RFI condition is met only if the company or trust carries on the trade *wholly* outside the UK.

Suppose protected-trust relief is not available (eg if the company is not held in a trust). The question arises whether the trading income qualifies for the s.720 remittance basis. The statutory wording is similar[10] and again, the remittance basis only applies if the company carries on the trade *wholly* outside the UK.

This fits the purpose of the provisions which is to put the transferor in the same position as if no transfer had been made.[11]

21.6 CT territorial limit: Trading

21.6.1 *UK resident company trader*

Section 5(1) CTA 2009 provides:

> A UK resident company is chargeable to corporation tax on income on all its profits wherever arising (but see Chapter 3A for an exemption from charge in respect of profits of foreign permanent establishments).[12]

21.6.2 *Non-resident company trader*

Section 5(2) CTA 2009 provides:

> A non-UK resident company is within the charge to corporation tax on income only if—
> (a) it carries on a trade of dealing in or developing UK land (see section 5B)[13], or
> (b) it carries on a trade in the UK (other than a trade of dealing in or developing UK land) through a permanent establishment in the UK,[14] ...

21.6.3 *Profit of PE*

Section 5(3) CTA 2009 identifies the amount on which CT is charged:

> A non-UK resident company which carries on a trade in the UK through a permanent establishment in the UK is chargeable to corporation tax on all its profits wherever arising that are chargeable profits as defined in

[10] See 47.8.2 (Remittance basis rule); 49.26.(s.720 remittance basis).

[11] See 49.2 (Purpose of transferor charge).

[12] I do not consider this exemption here.

[13] See 22.3 (Dealing/developing UK land).

[14] The drafting is based on article 7 OECD Model.

> section 19 (profits attributable to its permanent establishment in the UK)...

Section 19 CTA 2009 defines "chargeable profits":

> (1) This section applies if a non-UK resident company carries on a trade in the UK through a permanent establishment in the UK.
> (2) The company's chargeable profits are its profits that are—
> (a) of a type mentioned in subsection (3), and
> (b) attributable to the permanent establishment in accordance with sections 20 to 32.
> (3) The types of profits referred to in subsection (2)(a) are—
> (a) trading income arising directly or indirectly through or from the establishment,
> (b) income from property or rights used by, or held by or for, the establishment, and
> (c) chargeable gains falling within section 10B of TCGA 1992 (non-resident company with UK permanent establishment)—
> (i) as a result of assets being used in or for the purposes of the trade carried on by the company through the establishment, or
> (ii) as a result of assets being used or held for the purposes of the establishment or being acquired for use by or for the purposes of the establishment.

The topic of how profits are attributed to a PE needs a long book to itself; it is not discussed here.

21.7 Where is trading income source

The UK case law is mostly antique, because in practice double taxation treaties often apply and then the issues may not arise. But of course that is not always the case. The former International Tax Handbook is erudite and still helpful.[15] Commonwealth cases on the source of trading income should be helpful[16] though unfortunately these cases are inconsistent.[17]

[15] Tax Bulletin 18 provides a brief summary, not set out here.

[16] See 16.8 (Non-UK cases on source).

Wong, "A comparative study of the taxation of business profits - especially 'online' profits - in Australia and the Hong Kong Special Administrative Region of the

21.8 Place where contract made

The former International Tax Handbook provided:

> **813. *Erichsen v Last***
>
> Another very early case was *Erichsen v Last* [4 TC 422] which was heard in the Court of Appeal in 1881. It is a highly important case and, curiously, was not published in Tax Cases until some twenty years after the decision. It is perhaps a pity that *Erichsen v Last* was concerned with a very special sort of trade – the relaying of telegraph messages. The application of the ideas which emerge from *Erichsen v Last* to other trades is, because of its special facts, rather difficult.
>
> The facts are simple enough. Erichsen was the UK representative of the Great Northern Telegraph Company of Copenhagen. The company was not resident here but it had three cables running across the North Sea to bases in Scotland and it had a staff of operators here. Messages were collected through an arrangement with the Postmaster General. The Post Office collected the money and deducted its agreed remuneration before handing over the messages to the company's operators here. The company's own staff then transmitted the messages across the North Sea. Thereafter, depending on their destination, they passed through cables owned by the Danish and Russian governments to their destinations which might have been as far off as Japan. The company made a weak sort of claim that it was not trading here but it went on to say that if it was, it ought to be taxed only on the profit arising from the relaying of the messages along the main cable to Denmark. It was making the point that some of the profit arose from the transmission along other cables which had absolutely nothing to do with the UK.
>
> The first thing the judgments in the Court of Appeal make clear is that the matter is wholly one of fact. The judgments then separate two questions for decision. First, is there trading in the UK? Brett LJ says this on page 425. His words are important because it is here that the significance of contract – place of contract – begins.
>
>> "Now, I think it would be first of all nearly impossible and second wholly unwise to attempt to give an exhaustive definition of when a trade can be said to be exercised in this country. The only thing that we have to decide is whether upon the facts of this case it can be said that this company is carrying on a profit earning trade in this country. Now I should say that wherever profitable contracts are habitually made in England by or for a foreigner with persons in England, because those persons are in England, to do something for or supply something to those persons, such foreigners are exercising a profitable trade in England, although everything done by or supplied by them in order to fulfil their part of the contract is done abroad.

People's Republic of China" (2009) *https://bridges.monash.edu/articles/thesis/A_comparative_study_of_the_taxation_of_business_profits_-_especially_online_profits_-_in_Australia_and_the_Hong_Kong_Special_Administrative_Region_of_the_People_s_Republic_of_China/4546102/1*

> The profit arises to them from the contract which they make. The profit which they derive can only be derived from the payment which is to be made to them by the person with whom they contract. In the given case they would not have any such contract as they are in the habit of making unless it was a contract made in England with a person who is in England because he is in England. Observe, if the person or someone acting for him were not in England he would not be wanting to send a telegraph message from England".

The language is now over 100 years old and while it may perhaps look a little old fashioned today its meaning seems plain. The Court was saying: "You, the customer, are in England and because you are here you want goods here (or in the case in point, you want a message sent from here). The profit comes from the contract, the contract is here and there is trading in England and it is nonetheless trading in England even though the goods come from abroad or the service is provided through electric cables which are partly abroad". ...

815. First champagne cases

Erichsen v Last was followed by the so-called champagne cases. There were three leading champagne cases. In the first two, the Revenue succeeded in a claim that the French champagne houses concerned were trading in the UK through agents in London. In the Pommery case [*Pommery and Greno v Apthorpe* 2 TC 182] there was no express finding as to where contracts were made but most orders were met from stock held in the UK. In the Werle case [*Werle v Colquhoun* 2 TC 402] the Court of Appeal made it clear that they considered the contracts to be made by the agents here on behalf of their principal.

These two houses were producers of champagne as well as sellers of champagne and it is reasonably clear that the Revenue did not claim to tax the producer's profit. In the Pommery case at page 189, the Judge specifically referred to the difficulty of calculating the profit; he said that there might be some difficulty as to the manner of calculation in deciding what amount of expenditure to put against the profits and wondered whether it would be proper to look at the goods sent over to England and to put a fair valuation upon them as they arrived. That he said was a matter of quantum, a matter for the consideration of persons skilled in such things.

In the Werle case on page 413 Fry LJ had a similar approach, he said

> "A small shopkeeper... is plainly carrying on a trade in the place where the shop is ... The question, however, becomes more difficult when the trade is carried on, as in the present case, in a far more complicated manner ... when the contract may be in one place, the goods in another, the principal in another and the goods may be delivered in some other place. We have, however, simply to do this, to take all the relevant facts and the mode in which the business is carried on, and to ask ourselves whether that business be or be not carried on within the UK. It appears to me that the same business may in some sense be carried on in many places. The Head Office of a firm, the place where the goods are manufactured, the place where the contracts are made, may all of them be places in which the business or parts of the business is or are carried on. Now, in the present case what we find is

> this, that the appellants reside in France, carrying on there the business of vineyard proprietors, champagne makers and champagne merchants, no doubt a large portion of that business is carried on within France, but a portion of that business is that of champagne merchants. Now, that means, as I understand, the selling of champagne and that business they carry into effect in England through the intervention of a firm of agents in this country."

816. Contracts abroad

The last of the champagne cases is *Grainger v Gough* [3 TC 311 and 462] and it is a very significant case. The Court of Appeal made no distinction between this and the earlier cases and found that the champagne house was liable on its trading here. ...

But Lord Esher and his fellow judges were overruled by the House of Lords on the question of whether there was liability at all. That was on the basis that in this particular case, contracts were not made in the UK. Although to the customer there may have been little difference between buying through the agents in the first two cases and buying through the agents in the third, there was a difference in the arrangements which the House of Lords saw as vital in determining the non-resident's liability to UK tax. In finding that the contracts were not made in the UK the House of Lords drew the now classic distinction between trading in the UK which involves liability and trading with the UK which does not. Non-residents with customers here commonly rely on this distinction.

The House of Lords may well have had it in mind that if we sought too strenuously to tax foreigners who sold goods here, we might be faced with hostility by countries to which we were exporters and which might seek to tax those exporters in parallel circumstances. The thought is not directly expressed but there is a hint of it at the end of Lord Herschell's judgment on page 468.

21.9 Place-of-contract test rejected

The former International Tax Handbook provided:

817. Place of contract not decisive

There are later judgments and very important judgments which tend to water down a little the great emphasis on place of contract. Lord Atkin speaking in the Smidth case [*Smidth v Greenwood* 8 TC 193] in 1921 said this

> "It (the place of contract) is obviously a very important element in the enquiry and if it is the only element the assessments are clearly bad. The contracts in this case were made abroad. But I am not prepared to hold that this test is decisive. I can imagine cases where a contract of resale is made abroad, and yet the manufacture of the goods, some negotiation of the terms, and complete execution of the contract take place here under such circumstances that the trade was in truth exercised here. I think that the question is, where do the operations take place from which the profits in substance arise?"

This is sometimes called "the operations test". It is not in fact a "test" as such, because further guidance is needed to identify where the profits in substance arise. It is however a rejection of the place of contract test. The former International Tax Handbook gave one further quote to drive the point home:

> In one of the few fairly modern[18] cases on this subject, the Firestone case [*Firestone Tyre & Rubber v Lewellin* 37 TC 111 at p.142] in 1957, Lord Radcliffe said this
>
> > "But he (Counsel for the Appellants) rightly reminded us that more than once the place where the contract is made has been spoken of as the 'crucial' test or, again, as the 'most vital' element. Speaking for myself, I do not find great assistance in the use of a descriptive adjective such as 'crucial' in this connection. It cannot be intended to mean that the place of contract is itself conclusive. That would be to re-write the words of the Taxing Act, and could only be justified if there was nothing more in trading than the act of sale itself. There is of course much more. But if 'crucial' does not mean as much as this, it cannot mean more than that the law requires that great importance should be attached to the circumstance of the place of sale. It follows, then, that the place of sale will not be the determining factor if there are other circumstances present that outweigh its importance or unless there are no other circumstances that can."

This approach is adopted in the Privy Council. The Hong Kong Revenue have issued useful guidance (the "**Hong Kong guidance note**"[19]) which provides:

> 7. Lord Bridge explained the "broad guiding principle" in *Hang Seng Bank* at 322H to 323A in the following terms: "But the question whether the gross profit resulting from a particular transaction arose in or derived from one place or another is always in the last analysis a question of fact depending on the nature of the transaction. It is impossible to lay down precise rules of law by which the answer to that question is to be determined. The broad guiding principle, attested by many authorities,

[18] I guess that this passage in the former International Tax Handbook was written in the 1980s.

[19] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

> is that one looks to see what the taxpayer has done to earn the profit in question."
>
> 8. The "operations test" was further elaborated by Lord Jauncey in *HKTVBI* at 407C-D:
>
> > "*Smidth v Greenwood* [1921] 3 K.B. 583 was cited in Hang Seng Bank case and their Lordships do not doubt that Lord Bridge has in mind the judgment of Atkin L. J. in that case and in particular the passage when he said, at p.593: 'I think that the question is, where do the operations take place from which the profits in substance arise?' Thus Lord Bridge's guiding principle could properly be expanded to read 'one looks to see what the taxpayer has done to earn the profit in question and where he has done it.'"[20] ...
>
> 21. When Lord Bridge said in *Hang Seng Bank* that profits from buying and reselling of commodities were derived from the place where "the contracts of purchase and sale were effected", he could not merely mean legally executed (as this would depend on formal legal rules of offer and acceptance). The Department agrees with the approach in *Magna* and will contemplate all the relevant operations carried out to earn the profits, including the solicitation of orders, negotiation, conclusion, trade financing, shipment and performance of the contracts.
>
> 22. The Department does not merely look at the place of contract to determine the geographical source of profits. Where the contract is made by exchange of letters, by fax, or by e-mail, the application of contract law and of private international law as to where the contract is made may result in conclusions that are entirely fortuitous. In *Firestone Tyre and Rubber Co v Lewellin* [1957] 1 WLR 464 (HL) at 471, Lord Radcliffe said such an approach under the conditions of international business and modern facilities of communication was capable of proving a somewhat ingenuous one. Hunter J shared the same view in *Sinolink Overseas v IRC* 2 HKTC 126 at 131.[21]

21.10 Where profits in substance arise

So we turn to the question of where profits in substance arise. The short answer is that there is no short answer. This test does not answer the question of where trading income arises, it merely rephrases it.

The former International Tax Handbook provided:

[20] Similarly Lord Jauncey in *HK-TVBI* at 409D-E:
"The proper approach is to ascertain what were the operations which produced the relevant profits and where those operations took place."

[21] *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

> **820. NRs: profits in substance**
> It is consistent with the words of Brett LJ at the start of the quotation in ITH813 to say that no neat formula to decide what is, and what is not, trading in the UK can be devised. ...

Circumstances vary so widely that it is not possible to devise a single test that fits all cases.[22] The Hong Kong guidance[23] note provides:

> 11. The broad guiding principle has been followed in subsequent cases before the Court of Final Appeal. In *Kwong Mile*, Bokhary PJ summarised the broad guiding principle at 174I to 175E:
>
> > "The ascertainment of the source of a profit is not hindered by technical rules, but is helped by the broad guiding principle that one looks to see what the taxpayer has done to earn the profit and where he has done it. ... In *IRC v Orion Caribbean* [1997] HKLRD 5 924, Lord Nolan emphasised (at p.931F) that '[n]o simple, single, legal test can be employed' when ascertaining the source of a profit. ... The situations in which the source of a profit has to be ascertained are too many and varied for a universal judge-made test. Apart from the words of the statute themselves, the only constant is the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters."[24]

This is a general principle of international tax law:

> Profits should be taxed where economic activities deriving the profits are performed and where value is created.[25]

It is not, of course, an answer just to say that the question is a question of fact. That simply leaves the issue answered.[26]

21.11 Preparatory/auxiliary activities

The former International Tax Handbook Manual para 849 provided that

[22] "No simple legal test can be employed"; see *IRC v Orion Carribean.*

[23] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

[24] *IRC v Hang Seng Bank* [1990] STC 733 at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

[25] G20 Leaders Declaration (2013) *https://www.oecd.org/g20/summits/saint-petersburg/Saint-Petersburg-Declaration.pdf*

[26] See 26.15.1 (Source of interest: Critique).

activities within OECD Model Convention para 5(4) do not amount to trading in the UK. This states (in short) that preparatory and auxiliary activities do not constitute a PE.[27] That includes in particular:

(1) storage, display or delivery of goods
(2) purchasing goods[28]
(3) collecting information

The Hong Kong guidance note provides:

> ANTECEDENT OR INCIDENTAL ACTIVITIES
> 14. In *ING Baring*at 428, Ribeiro PJ when discussing the legal principle also emphasised the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters. The focus is on establishing the geographical location of the taxpayer's profit-producing transactions as distinct from activities antecedent or incidental to those transactions.
> 15. Whether an act is an antecedent or incidental activity is a question of fact and would depend on the nature of the transaction. In *IRC v The Hong Kong & Whampoa Dock Co* [1960] 1 HKTC 85, the initial business contact in Hong Kong which set in motion a chain of operations that ultimately led to the salvaging of the vessel was rejected as the relevant operation.[29]
> 16. Comments in a similar vein can be found in *Hang Seng Bank* at 320F-G:
>
> > "The activities of the bank from which the income arose was the buying and selling of this property in overseas market places and not the decision making process in Hong Kong or any other activities in Hong Kong. Likewise the income arose from the trading in property situate outside of Hong Kong and not the moneys of customers situate in Hong Kong."[30]

21.12 Buying from UK sellers

The former International Tax Handbook provided:

> **812. Purchasing is not trading in**
> The mere buying of goods here does not amount to trading here. That

[27] See 106.19 (Preparatory and auxiliary activities).

[28] See 21.12 (Buying from UK sellers).

[29] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

[30] *IRC v Hang Seng Bank* [1990] STC 733 at p.738.

> was decided in the very first case in these matters, *Sulley v AG* [2 TC 149], in 1860. A New York firm purchased goods in England for sale in America. It had an office here where the English resident partner saw to the purchasing and shipping of the goods. The Court of Exchequer (a Court of Appeal) found that "The profits of the firm in America do not accrue in respect of any trade carried on in this country, but in respect of the trade carried on in New York, where the main business is conducted".

Maintaining a purchasing office is also included in the list of auxiliary activities which do not amount to trading in the UK.[31]

The Hong Kong guidance note provides:

> BUYING OFFICE
> 29. A trading company, carrying on business outside Hong Kong, may set up a branch in Hong Kong to act as a buying office for the purpose of purchasing goods or merchandise or of collecting information. The activities of the branch are confined to the purchase of goods or merchandise or of collecting information in Hong Kong and it is not involved in their sale, either in Hong Kong or elsewhere. In such a situation, a liability to Hong Kong profits tax would not arise. The functions of a buying office may also be carried out by a subsidiary company or by an agent (either related or unrelated). However, as for a branch, the subsidiary company or agent must not be involved in the sale of the goods. On the other hand, any commission or other remuneration earned by the subsidiary company or agent for performing its services in Hong Kong will be fully taxable.[32]

21.13 Buying/selling to UK purchasers

The former International Tax Handbook para 820 provided:

> But we do attach much importance to Lord Atkin's approach to the question of "trading in" in the *Smidth v Greenwood* case quoted in ITH817 above – "where do the operations take place from which the profits in substance arise".
> We have come to adopt this test as the principal criterion for determining whether there is "trading in". But it should be borne in mind that the Smidth company was found not to be trading in the UK. Although it had an agent in the UK to advise prospective purchasers and assist with the installation of machinery, the profits in substance arose from the sale of that machinery under

[31] Model convention para 5(4)(d); see 21.11 (Preparatory/auxiliary activities).

[32] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

contracts made abroad. ...

821. Merchanting: Place of sale

The decision in the *Smidth* case supports the conclusion that in the case of merchanting business (buying and selling goods for profit), the trade is normally exercised at the place where the contracts for sale are made – that is where the operations take place from which the profits in substance arise.

It may help, in considering why that should be the relevant place, to put the decided cases aside and to ask what sort of facts could possibly be significant in leading to an answer to the question of whether there is trading in the UK. Where merchanting is concerned – buying and selling – there will often be a central office where questions of policy are considered and finance is arranged. There is the buying of the goods and perhaps the holding of a stock of goods. Then there is the search for customers and there is the actual contract for sale. That contract may be at a price laid down in a distant Head Office or it may be for a price negotiated with some skill on the spot. Finally there is delivery involving the question where does the lawful property in the goods pass from seller to buyer.

Few if any of the elements described above necessarily call for a presence in this country and the functions involved can be located where the trader wishes. Most countries take the same view as we do about buying. The Court in *Sulley's* case simply said “It would be most impolitic thus to tax those who come here as customers.” The place of sale, as identified by the place of contract for sale, is a reasonable means of determining the location of trading; trading profit becomes measurable only when there is a sale and without a sale there can be no profit.

822. Place of sale unreliable

But the place of sale, like other elements, can be moved. Even where the trade is that of buying and selling some qualification is needed to the assertion that there is trading in the UK if the contracts for sale are made here. It is generally taken for granted that it must be so if the sales are to people who are here. But, as is apparent from ITH830–ITH834 below which look at the place of contract, just when and where a contract is concluded can depend on fine distinctions and may even be a matter of chance. If, for example, a non-resident advertises goods for sale in a newspaper here and the customer responds by a telephone call to the non-resident during which agreement is reached or there is an exchange of telexes, the contract may technically be made in the UK even though the non-resident does very little here at all. We do not know what view the Courts would take of that though they have certainly not ruled out the possibility that while there may be contracts here there may nevertheless be no trading here [See *Belfour v Mace* 13 TC 558].

There may be similar doubt when sales are to people who are not resident here. The problem can be illustrated by a simple example. A New York art dealer has a picture which a Frenchman is interested in. The American and the Frenchman happen to meet in London which both are visiting for a few days holiday. In their hotel they agree on a price for the picture and conclude the deal. The contract is made here. Is the American trading in the UK? The matter is considered further on in chapter 9 (ITH947).

> One may devise improbable examples of this kind without doing more than to highlight the difficulties which absolute reliance on the place of contract as a test would involve. Other cases of difficulty are those where there is reason to believe that, although contracts are formally made abroad, everything is really done here short of signing a piece of paper. In such cases we would say that there is trading here. The problem in such a case is largely one of proof. See, for example, the comments in chapters 9 (ITH914) and 10 (ITH1017).

The Hong Kong guidance note provides:

> 18. In *IRC v Magna Industrial Co* [1997] HKLRD 171 at 178, Litton VP recognised that in case of a trading profit the purchase and the sale were the important factors. He further included in his deliberation all of the relevant operations and not just the purchase and sale of the products. When applying the operations test, Litton VP said at 176G:
>
> > "In other words, one looks to see what the taxpayer has done to earn the profits and where he has done it. Obviously the question where the goods were bought and sold is important. But there are other questions: For example: How were the goods procured and stored? How were the sales solicited? How were the orders processed? How were the goods shipped? How was the financing arranged? How was payment effected?"
>
> 19. The obtaining of the buyer's order in Hong Kong and the placing of the order with the seller from Hong Kong are the foundations of a trading transaction since the differential between the selling price and the buying price (i.e. the mark-up) generates the profit. In *Exxon Chemical International Supply SA v IRC* 3 HKTC 57, having decided that the obtaining of the order from the buyer and the placing of the order with the seller, took place respectively in and from Hong Kong, Godfrey J concluded that the profit arose in or was derived from Hong Kong.
>
> 20. In *IRC v Euro Tech (Far East) Limited* 4 HKTC 30, Barnett J doubted that there should be some particular level or threshold of activity on the part of the taxpayer in Hong Kong, such as by bringing the products into Hong Kong and re-exporting them. He observed that in many trading companies the taxpayer was doing no more than bringing together the complementary needs of sellers and buyers. He said if the bringing together was done in Hong Kong the trading profit was sourced in Hong Kong....
>
> 23. On the basis of the various court judgments discussed in paragraphs 18 to 22 above, the Department's views which are reflected in its assessing practice on the locality of profits derived from trading in commodities or goods by a business carried on in Hong Kong can be summarised as follows:
>
> (a) Where both the contract of purchase and contract of sale are effected in Hong Kong, the profits are fully taxable.
>
> (b) Where both the contract of purchase and contract of sale are effected outside Hong Kong, no part of the profits are taxable.
>
> (c) Where either the contract of purchase or contract of sale is effected in Hong Kong, the initial presumption will be that the profits are fully taxable. Matters, such as those mentioned in paragraph 18 above, will be examined to determine the issue.
>
> (d) Where the sale is made to a Hong Kong customer (including the Hong Kong

> buying office of an overseas customer), the sale contract will usually be taken as having been effected in Hong Kong.
>
> (e) Where the commodities or goods are purchased from either a Hong Kong supplier or manufacturer, the purchase contract will usually be taken as having been effected in Hong Kong.
>
> (f) Where the effecting of the purchase and sale contracts does not require travel outside Hong Kong but is carried out in Hong Kong by telephone, fax, etc., the contracts will be considered as having been effected in Hong Kong.
>
> (g) The purchase and sale contracts are important factors but all the relevant operations that produce the trading profits must be looked at to determine the locality of the profits. Persons who are merely trading with Hong Kong by either selling goods to customers in Hong Kong or buying goods from suppliers in Hong Kong will not fall within the ambit of this paragraph. Nor will this paragraph applies to a buying office referred to in paragraph 29 below.
>
> 24. Having regard to the points expressed above, it will be apparent that, in the Department's view, the question of apportionment does not arise in relation to trading profits. Trading profits will be either wholly taxable or wholly non-taxable. There is no room to substitute a mixed source for a Hong Kong source even though there might be some overseas activities.[33]

21.13.1 *Trading stock: land*

In *IRC v HK-TVB* the Privy Council said:

> profits accruing to a resident taxpayer from the sale of foreign immovable property are likely to arise in the country where that property is situated although both the contracts of purchase and sale thereof are made in the country of residence of the taxpayer.[34]

The Hong Kong guidance note provides:

> 45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows:
>
> (a) Rental income from real property. *Locality:* Location of the property.

[33] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

[34] [1992] STC 723 at p.729; if further authority is needed, which I doubt, see *Marsh v HMRC* [2017] UKFTT 320 (TC) at [81]: "As all the assets of any trade are situated in the UK and the trade is carried on by the sale in the UK of those assets by contracts having effect under the law of England and Wales it follows that if there is a trade it is carried on in the UK."
However in relation to UK land, this rule is statutory: see 22.3 (Dealing/developing UK land).

> (b) Profits derived by an owner from the sale of real estate. *Locality:* Location of the property.

21.13.2 *Trading stock: securities*

The Hong Kong guidance note provides:

> 45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows ...
> (c) Profits from the purchase and sale of listed shares and other listed securities. *Locality:* Location of the stock exchange where the shares or securities in question are traded. Where the purchase and sale took place over-the-counter, the place where the contracts of purchase and sale are effected.
> (d) Profits from the purchase and sale of unlisted shares and other unlisted securities. *Locality:* Place where the contracts of purchase and sale are effected...

21.13.3 *Buying/selling through agent*

SP 1/01 provides:

> 22. If a non-resident carries on a financial trade outside the UK, any transactions carried out through a UK investment manager are likely to amount to trading in the UK. That is so whether there is a discretionary agreement or whether the manager acts on the instructions of the non-resident. The criteria for deciding whether a non-resident financial company is an investment company or a trading company are the same as those which apply to a resident company.

Whether or not this is right does not much matter as in most cases the investment manager exemptions apply, but (even allowing for the qualification in the use of the word "likely") it is too widely expressed. The Hong Kong guidance note provides:

> 25. Cases may arise where it is claimed that contracts of purchase and of sale have been effected wholly outside Hong Kong by employees of the Hong Kong business travelling abroad or by overseas agents. In this context, no operations are carried out in Hong Kong to give effect to the trading transaction; and the employee or overseas agent habitually exercises a general authority to negotiate and conclude contracts on behalf of his principal.
> 26. Normally the activities of an agent and an employee are accorded the same weight if it can be shown that the employee has full authority to conclude contracts without reference to the business in Hong Kong. In considering claims that contracts have been wholly effected outside

> Hong Kong by employees, Assessors will, in addition to facts in paragraph 18 above, require details of travelling, hotel and subsistence expenses in respect of each individual transaction. Where it is claimed that contracts are effected by overseas agents, it will be necessary to provide agency agreements or other evidence to support the claim.[35]

21.14 Services

The former International Tax Handbook continued:

> **826. Where work is done**
> Many trades are not limited to merchanting. Where services are concerned, we tend to give greater weight to the place where the service is provided.[36]

The Hong Kong Guidance Note adopts the same approach:

> 45. The Department regards the locality of the following types of profits to be as follows ...
> (e) Service fee income. *Locality*: place where the services are performed which give rise to the fees.[37]

This raises the question of where the services are performed/provided.[38] Services performed by an individual (whether personally or on behalf of a company or partnership) are performed where the individual is when they provide the services.[39]

Likewise in Australia:[40]

[35] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

[36] The former International Tax Handbook para 826 continued:

> There are particular difficulties with transmission services with which the approach is to say that the service is given where the act of transmission begins, following the case of *Erichsen v Last* already quoted in ITH813.

[37] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

[38] The International Tax Handbook refers to the place where services are *provided* and the HK guidance refers to the place where services are *performed* but the meaning is the same. I think the word performed is clearer.

[39] See 34.30 (Where are duties performed); See too 111.8.2 (Income from services/ trading).

[40] *CT v Resource Capital Fund IV LP* [2019] FCAFC 51 at [52] citing: *FCT v French* [1957] HCA 73; *FCT v Mitchum* [1965] HCA 23; *FCT v Efstathakis* [1979] FCA 28.

> The place of the performance of services is likely to be significant to determine the source of income derived from personal exertion.

In *Brackett v Chater*[41] a surveyor entered into an employment contract with a Jersey company (owned by a Jersey trust that he had made, although this was not material). Clients contracted with the Jersey company but the surveyor did all the work in the UK using facilities available to them at the offices of the firm in which they were previously partners. The Jersey company was held to be trading in the UK.

Where services are performed by a team of people, and do not involve work in a single location, the answer may be less clear.

The Hong Kong guidance note provides:

> It should be noted that in the case of an investment adviser whose organisation and operations are located only in Hong Kong, profits derived in respect of the management of the clients' funds are considered to have a Hong Kong source.
>
> Included in chargeable sums are not only management fees and performance fees but also rebates, commissions and discounts received by the adviser from brokers located in Hong Kong or elsewhere in respect of securities transactions executed on behalf of clients.[42]

21.14.1 *Commissions*

The Hong Kong Revenue guidance provides:

> RE-INVOICING CENTRE
>
> 27. The Department's view is that if a profit is derived from services rendered in Hong Kong, the profit is clearly taxable. Commission income or profit that accrues to a "re-invoicing centre" for services rendered is chargeable to profits tax. Profits derived from the buying and selling of goods are not service income. The transaction involves the taking of commercial risks (e.g. product risks, inventory risks, credit risks, exchange risks, capital risks, etc.) different from those attached to a service. Confirmation of sales and issue of purchase orders are indications that it is a trading transaction. The source of trading profits depends on the locality of the trading operations. Paragraphs 18 to 26 are relevant.
>
> 28. It is not possible to categorise the circumstances under which income or profit derived by a "re-invoicing centre" would be regarded as a service income and not as a trading profit. In each case, the Department would examine the

[41] 60 TC 134 & 639.

[42] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

nature of the operations and the type of risks in question to determine whether they constitute the provision of services or trading. The label "re-invoicing centre" clearly does not in itself provide the answer as it can mean different business structures.

Example 1

Company A, incorporated in Hong Kong, is a re-invoicing centre of a group of companies with a holding company incorporated in the United States, as more particularly described below. It manages in Hong Kong all foreign currency exposures from intra-company trade, guarantees the exchange rates for future orders and manages intra-affiliate cash flows, including lead and lags of payments. Manufacturing affiliates in Mainland China sell goods to Company A, which in turns resells to the distribution affiliates in North America and Europe. Company A resells at cost plus a mark-up for its services. The mark-up covers the cost of the re-invoicing centre and a reasonable return on the services provided. The profits accrue to Company A are service income derived from Hong Kong. The mark-up earned by Company A, which acts as a re-invoicing centre, is chargeable to profits tax.[43]

21.15 Construction/engineering work

The former International Tax Handbook para 826 continued:

> Where construction and engineering works are concerned we say that the construction works are the essential operations and it is normally immaterial where the contract is signed – there is support for this in the Muller case [*WH Muller & Co (London) v Lethem* 13 TC 151].

21.16 Manufacturing

The former International Tax Handbook para 826 continued:

> There may be more than one part of the trade which can be identified as the profit producing part. There can be the case where there is manufacture abroad and selling here or manufacture here, and selling abroad. To look at the first situation, manufacture abroad and selling here, it is reasonably clear from the champagne cases that the Revenue only claimed to tax the selling profit and there is nothing in the judgments to suggest that it was entitled to more. The question is considered more fully in chapter 9 (ITH920). As to the second situation, manufacture on its own is certainly trading, even though there may be no sales here, and the old judgments tend to support the view that we should in such circumstances seek, on some sensible basis, to tax only

[43] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

> the manufacturing profit. There was a Privy Council [*Commissioners of Taxation v Kirk* [1900] AC 588] case in the early part of the century, an Australian case, which supports that idea and it is what we have in fact always done.

See too *IRC v Hang Seng Bank*:

> If he has … engaged in an activity such as the manufacture of goods, the profit will have arisen or derived from the place where ... the profit making activity carried on. There may, of course, be cases where the gross profits deriving from an individual transaction will have arisen in or derived from different places. Thus, for example, goods sold outside Hong Kong may have been subject to manufacturing and finishing processes which took place partly in Hong Kong and partly overseas. In such a case the absence of a specific provision for apportionment in the Ordinance would not obviate the necessity to apportion the gross profit on sale as having arisen partly in Hong Kong and partly outside Hong Kong.[44]

The Hong Kong Revenue guidance note provides:

> MANUFACTURING PROFITS
>
> 30. Lord Jauncey in *HK-TVBI* at 410F has commented on the source of manufacturing profits. He explained:
>
> > "If a manufacturer in Hong Kong sells his goods to a merchant in Manila the payment which he receives is no doubt sourced in Manila but his profit on the transaction arises in and is derived from his manufacturing operation in Hong Kong."
>
> Where goods are manufactured in Hong Kong, the profits arising from the sale of such goods will be fully taxable because the profit making activities are considered to be the manufacturing operations carried out in Hong Kong, which should include the procurement of raw materials, the employment of labour, the design of products and the use of machinery and plant, etc.
>
> 31. The following examples illustrate the Department's views on this subject:
>
> *Example 2*
>
> Company B manufactures goods in Hong Kong and sells them to overseas customers. The fact that Company B has sales staff based overseas does not give a part of the profits an overseas source. This is not a case for apportionment. The whole of the profits are liable to profits tax.
>
> *Example 3*
>
> Company C manufactures in Mainland China and sells the finished goods through a retailing branch in Hong Kong. The retailing branch has sales staff and a fixed place of business, and has registered for business in Hong Kong.

[44] [1990] STC 733 at p.740. The *dictum* to the contrary in *IRC v HK-TVB* [1992] STC 723 at p.730h can be disregarded.

Company C is both a manufacturer and a retailer. Profits are derived from the manufacturing operations in Mainland China and the retailing operations in Hong Kong. It is necessary to apportion the profits derived by Company C. Profits attributable to the Hong Kong retailing branch are chargeable to profits tax.

32. In Mainland China, two types of processing trade normally involve Hong Kong companies: contract processing and import processing. They are two different forms of transaction and require an accurate legal analysis.

CONTRACT PROCESSING

33. In contract processing, the document that governs the contractual relationship among the parties is the processing agreement. It sets out the rights and responsibilities of the Hong Kong company and the Mainland processing enterprise. The Hong Kong company is responsible for the supply of raw materials and machinery without consideration and to provide technical and managerial know-how while the Mainland processing enterprise is responsible for the provision of factory premises, utilities and labour force. 34. In return for the processing service, the Hong Kong company pays a subcontracting charge to the Mainland enterprise. The legal title to the raw materials and finished goods remains with the Hong Kong company. In the Department's view, the Hong Kong company's operations in Mainland China complement its operations in Hong Kong. Recognising the operations of the Hong Kong company in the Mainland, an apportionment of profits on a 50:50 basis is usually accepted.

35. In *D132/99* 15 IRBRD 25, the taxpayer contended that all of its profits were offshore in nature. The Board of Review held that its operations in Mainland China were not dominant operations that overshadowed the activities in Hong Kong and the operations in Hong Kong could not be disregarded.

36. In *D145/99* 15 IRBRD 91, the Board found that the taxpayer was not privy to the processing agreements, which had been entered into by its fellow subsidiaries and the taxpayer should be assessed for profits tax on 100% of its profits for the years of assessment after the processing agreement lapsed. The Board found that the taxpayer's business was the procurement of toys to satisfy sale and purchase contracts and that important operations took place inside Hong Kong: the reaching of purchase agreements; the determination of price; the issue of invoices; the procurement of raw materials and the shipment of finished products.

37. If the Hong Kong company has restricted involvement in the processing arrangement with the Mainland enterprise, the apportionment of profits could not be appropriate. For example, a Hong Kong company has contracted out the assembly work to various contractors in Hong Kong and the Mainland. The jobs are numerous, small in value and of short duration and the Hong Kong company has minimal involvement in the assembly work. Given that the Hong Kong company does not carry out any manufacturing operations outside Hong Kong, its profits should be fully chargeable to profits tax without any apportionment.

38. The apportionment contemplated in paragraph 34 above will also apply to cases where manufacturing activities are undertaken under a similar arrangement in other places.

IMPORT PROCESSING

39. In import processing, the manufacturing operations are carried out by a foreign investment enterprise (FIE) related to the Hong Kong company. An FIE is often a separate legal entity incorporated in the Mainland. The Hong Kong company sells raw materials to the FIE and buys back the finished goods from the FIE. The Hong Kong company engages in the trading of raw materials and finished goods whilst the FIE manufactures the finished goods. The legal title to the raw materials and the finished goods passes to/from the FIE.

40. In import processing, the gross profits arise from trading transactions whereby the Hong Kong company purchases finished goods from an FIE and sells them for a profit. The manufacturing operations of the FIE in the Mainland are not performed on behalf of, or for the account of, the Hong Kong company even though the Hong Kong company and the Mainland enterprise might be within the same group of companies.

41. In *ING Baring*, Lord Millet NPJ said that the source of profits had to be attributed to the operations of the taxpayer which produced them and not to the operations of other members of the group. In D36/06 21 IRBRD 694 which was a typical import processing case, the Board held that the taxpayer's profits were fully chargeable to profits tax. It was ruled that the FIE was not part of the taxpayer and was not an agent of the taxpayer. Hence the FIE's operations were not relevant in determining the source of profits of the taxpayer. The Board of Review rejected the contention of "substance over form" and disagreed with the suggestion that a leasing agreement of production facilities was similar to a contract processing agreement.

42. The Department holds the view that profits which accrued to the Hong Kong company from "trading transactions" carried out in Hong Kong cannot be attributed to the manufacturing operations of the FIE carrying on business in Mainland China. The source of the trading profits must be attributed to the operations of the Hong Kong company which produced them. In *Consco Tradingv IRC* [2004] 2 HKLRD 818, To Deputy J said that it was correct to consider factors such as the finance arrangements, the payment of raw materials and processing fees, the arrangement for receipt of payment from purchasers for the finished product and pre-contract negotiations and the Board was entitled to conclude that, on the evidence, the preponderance of the activities which earned the profits were performed in Hong Kong. The Court of First Instance said the Board correctly excluded the processing activity of the Mainland Chinese entity as not being relevant to the determining of the taxpayer's source of profits which were derived through the sale of processed goods.

43. In *IRC v Datatronic Limited* [2009] 4 HKLRD 675, where the arrangement between Datatronic and the FIE was an import processing arrangement, the Court of Appeal held that the profit-producing transactions were the purchase of goods from the FIE by Datatronic and subsequent sale and that these activities took place in Hong Kong. Thus, the profits were derived from Hong Kong. The Court of Appeal further held that the fact that the FIE, although a wholly-owned subsidiary of Datatronic, is a separate legal entity and that its dealings with Datatronic were not at varm's length would not detract from the reality of the

legal effect of the transactions. It is also worth to note the Court of Appeal's concurrence with the Board's findings that the manufacturing was done by the FIE in the Mainland is substance and not form and that Datatronic's activities (i.e. assisting the FIE in preparing the goods and supplying them to Datatronic) in the Mainland were merely antecedent or incidental to the profit-generating activities.

44. The Department has noticed that a Hong Kong company is sometimes interposed between an overseas company and a Mainland manufacturing enterprise in order to comply with or circumvent the trade barriers imposed by the overseas jurisdiction. In D7/08 23 IRBRD 102, the Board of Review recognised that making the Hong Kong company a customer of the overseas company and of the Mainland enterprise freed the overseas company from the trade barriers. Applying what the Court of Final Appeal held in the Kim Eng case on the effective cause of the production of the profits in question, it was held that the Hong Kong company's relevant activity in Hong Kong however limited was what was done to earn the profits in question and the Hong Kong company did it in Hong Kong.[45]

21.17 Use of UK commodity markets

The former International Tax Handbook provided:

929. Is use of the markets "trading in"?

It is a good thing for this country that these markets exist. There are all sorts of spin-off advantages. Big business has to be financed and insured and there are shipping services and all sorts of peripheral activities which are good both for the people who are involved in them and for the country's balance of payments. Looking at the physical markets the produce concerned may or may not come to this country. A Brazilian plantation owner may sell his cocoa in London although the buyer may be in France. A broker here will sell to another broker acting on behalf of the buyer and the contract will be made here. So the question arises – is the Brazilian producer trading in London and until the end of the last century it never occurred to anybody that this might be so.

Then came clarification by the Courts on the meaning of trading in the UK and the possibility that the fact of a contract being made by an agent in London could involve the principal in UK tax. It appeared open to the Revenue to contend that he principal was carrying on the selling part of his trade in London or even carrying on the whole trade in London. The Revenue had contended neither of those things; to have done so would have frightened off the foreign users of our markets. In any event, in those early days, the non-resident principal could have arranged that his London brokers did not receive the profits or gains.

But in 1915 everything changed because it was then provided that the receipt of

[45] Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No.21 (Revised) Locality of Profits (2012), *https://www.ird.gov.hk/eng/pdf/dipn21.pdf*

the profits or gains would no longer count[46] and the business world was worried. The Revenue said that it had always regarded business done on our markets through brokers as trading with the UK rather than trading in the UK. But the business world was not satisfied. The difficulty was clear enough. If, as some of the early cases might suggest, the bare making of a contract here is such a vital matter, there is a risk that anybody using our markets might be held to be trading here. The Revenue's former view that in normal circumstances that constituted trading with rather than in the UK is not easily defensible.

930. Pt VIII TMA 1970: Trading in: Can there be any profit?

But accepting that a primary producer, a Brazilian plantation owner selling cocoa in London, is trading in the UK, where is the profit? Such commodities have a world market price at any time; it is an essential function of the market to decide exactly what that price is. If it is decided that the Brazilian producer is trading in the UK he must be charged either as a seller of cocoa or as a cocoa grower. If he is not charged as a grower and, to put it no higher it would be stretching things rather to do so, it is hard to see how any profit can be said to arise in London as a seller of cocoa. The position is entirely different from that of the French champagne grower of the type referred to in ITH815 of chapter 8, who may at least be regarded as making a merchanting profit here. In that situation one would look at the market value of the champagne in bulk and then at the price (wholesale or retail) actually realised in this country. But where commodities like bulk tin or rubber or cocoa are concerned, the position is otherwise. These things are traded in our markets precisely to determine what their market value is and to dispose of them at that price.

931. Dealer

In some cases the primary producer may not sell directly in London but sell to an intermediary in the producing country who in turn sells on the London market. The trade here is then clearly that of selling and if the intermediary does not purchase at world prices – there may, for example, be a reserve price – it may be possible to identify a profit or a loss. But if the intermediary sells through a broker within the exemption described in the following paragraphs then the exemption runs just the same. But it sometimes happens that, although the contracts are made through a broker, the seller has a presence here – a branch or an agent – which plays some part in the selling process. It may, for example, instruct the brokers. The question then is whether what is done is sufficient to enable us to say that the non-resident is trading also through that branch or agent. The terminal markets may be used by a non-resident dealer in commodities simply to hedge purchases or sales of raw materials which take place outside the UK. The hedging transactions may amount to trading here but, again, the broker exemption may apply unless the non-resident has a presence here, other than the broker, which is involved with the hedging transactions. If the exemption does not apply, there is then the question of the extent, if any, to which the results of the related transactions outside the UK should be taken into account in

[46] F(no.2)A 1915 introduced the rules under which UK representative are liable for the tax of non-resident principals.

> measuring the taxable profits. This is an area of difficulty and International Division should be consulted in such a case.

In practice the point is not important because the broker exemption applies.[47]

21.18 Hire of chattels

The position for property income from land is governed by statute and trading case law is irrelevant for UK tax.[48]

What about hiring[49] chattels (eg pictures)? It is necessary to consider trading and non-trading cases separately. In the absence of a trade, income from hiring chattels is Misc Sweep-up Income.[50]

If the hiring is a trade, then the income is trading income and the source is the trade, not the assets of the trade. For a non-resident trader, the question is whether the trade is partly carried on inside the UK, and this can be addressed looking at wider factors than just where the asset is situate. But in practice it is suggested that the situs of the chattels will generally be determinative, unless the trade involves chattels situate in more than one country.[51]

21.18.1 *Is chattel hire a trade*

For general discussion of the concept of trade, see App.2.23 (Trade). I consider here whether chattel hire is a trade.

Business Leasing Manual provides:

> **BLM00315. Whether lessor trading** [Dec 2020]
> In general, where chattels are leased, you should accept that the leasing is by way of trade.
> In exceptional cases, however, where the evidence of trading is extremely slight, for example if only one asset has been acquired for leasing and there is no personal involvement by the taxpayer or any semblance of a trading organisation, the taxpayer's activities may be special leasing within CAA01/S19.
> You should not seek to deny trading treatment where, although there is

[47] See 72.1 (Investment Manager exemptions).

[48] See 24.1 (Property income).

[49] References to hire here include a lease and a licence: the distinction does not matter for present purposes.

[50] See 33.7.1 (Hire of chattels); 33.19.1 (Source: Income from assets).

[51] See 21.13.1 (Trading stock: land).

> no personal involvement by the taxpayer, there is trading activity by a manager as agent for the taxpayer.
> The same principle applies to special purpose vehicle lessor companies set up by groups that carry out leasing activities. In such cases it is not unusual for the company to own only one (or a few) assets and be managed by a group member.[52] ...

This is an oversimplification. For instance, when the chattel is acquired by way of gift (not purchase), and when the taxpayer is an individual or trust rather than a commercial company, then trading is much less likely.

A conclusion of trading will usually suit a non-corporate taxpayer and so not be challenged. A conclusion of trading may be a concern to a corporate taxpayer if it were carrying on that trade in the UK through a permanent establishment, which would move it from income tax to the more onerous corporation tax regime.

21.19 Research division/shop windows

The former International Tax Handbook provided:

> **827. Profit producing activities**
> Early in this chapter (ITH811) an illustration was given of the hypothetical maker of refrigerators making them in various places in the world and selling them in those places. One way of describing the split of that trade is as a vertical split with a vertical slice here and other similar vertical slices in other countries. We would wish to tax only the vertical slice of the trade carried on here. The other way in which a trade may be split may be thought of as horizontal, the sort of situation we have just discussed, one horizontal slice of the trade, manufacturing say, being here and another slice, the selling, abroad.

The horizontal/vertical terminology seems strange. The metaphor is also used in competition law but the other way round.[53] The former International Tax Handbook continued:

> The above cases are straightforward enough but difficulty starts to

[52] Very similar wording is found in BI Manual 61190 [Jul 2006].

[53] "Vertical agreements" are those made between two or more undertakings each of which operates at a different level of the production or distribution chain. "Horizontal agreements" are those made between undertakings operating at the same level of the production or distribution chain, covering for example research and development, production, purchasing or commercialisation. See Regulation (EC) no. 2790/1999.

> emerge when what is done here is not clearly identifiable as part of the whole trade in that way. An example is the non-resident stock-broker with a branch in London which merely puts the goods in the shop window.

"Shop window" is another unhelpful metaphor. What does it mean? The former International Tax Handbook explained:

> There may be a research section here with computers and the other paraphernalia of a modern trade of that sort. The branch gives advice to would be customers and when they decide to buy a particular American stock, it tells its head office in New York and there the actual deal is done. If the London branch really is only a shop window and really does take no part in the contracting process then the conclusion is that that is not trading within the UK; there is only one trade which is providing the service of buying or selling stocks and that is done in New York. It is quite possible for a non-resident trader to have an office here employing a substantial number of people and yet not to be exercising the trade here.
>
> Another example might be the manufacturer on a very large scale in America, which has a research division in this country. The work of the research division may be absolutely vital to the trade but if that trade consisted for example in the making and sale of television sets, one could not say that research on, let us say, conductivity constituted a distinct profit producing part of that trade. That is reasonably clear.

This is right because it is difficult to allocate the profits, so they should be regarded as merely auxiliary.[54]

> More difficult is the position of non-resident banks or insurance companies which use the UK for their investment activities but do not carry on the business of banking or insurance here. The questions in this whole area of "trading in" are mainly those of fact and degree and absolute guidelines are simply not possible. International Division will be glad to help in cases of doubt.

21.20 Where is contract made?

If or so far as the place where the contract is made is an important factor, that place has to be identified. The place where a contract is made is, fundamentally, a question of contract law. But the identity of the place where the contract is made is not relevant for the purposes of contract law, so there are no contract law cases discussing the issue. In the reported tax cases the place where the contract was made was fairly obvious, and so the cases do not help us here. We are thrown back to first principles.

[54] See 21.11 (Preparatory/auxiliary activities).

Going back to first principles, a contract in English law[55] is made by acceptance of an offer. The contract takes effect on acceptance and the place where the contract is made is where the acceptance takes place. As a general rule, acceptance takes place when the acceptance is received by the person who makes the offer. There are, however, exceptions to this:

(1) Acceptance by post–acceptance takes place when and where the letter of acceptance is posted, not where received (unless the offer otherwise provides).

(2) When an offer is made, one can specify in the terms of the offer how and when it can be accepted, and this can therefore alter the place where the contract is made.

Offer and acceptance can be difficult to identify. The court will try to impose an offer and acceptance analysis on circumstances which may not lend themselves to that analysis.[56]

There is no case law on email acceptance.[57] The person making the offer can decide how that offer is accepted so if the documentation is correctly drafted a contract can be made abroad by the click of a mouse outside the UK.

The former International Tax Handbook discussed this issue:

> **The making of a contract**
> **830. General**
> There have been many references in this chapter to the making of a contract and to the place where a contract is made. If two people agree specifically on a sale by word of mouth that is the making of a contract and the place of their agreement is the place where the contract is made. A great deal of business is done in that way daily and the place of contract is not changed by the signing of a piece of paper in a tax haven sometime afterwards. The difficulty is one of

[55] Further consideration is needed if the applicable law is not English law.

[56] Some academic writers have suggested abandoning the "offer and acceptance" analysis and replacing it by a contract theory based on reliance. (There is more than a hint of this in Lord Denning's judgment in *Gibson v Manchester City Council*. This decision was reversed by the House of Lords but even Lord Diplock accepted that there would be times when offer and acceptance would be difficult to identify and the "normal analysis of a contract as being constituted by offer and acceptance" might not be appropriate. However that would be exceptional. See [1979] 1 WLR 294 at p.297).

[57] The Law Commission paper (Electronic Commerce: Formal requirements in commercial transactions, December 2001) does not deal with the issue of where a contract made by email is made.

proof as we have already seen in ITH822. But putting difficulties of that sort on one side, if the question where a contract is made becomes of central importance it is one on which we should rely on legal advice – it is pre-eminently a question for the Solicitor and what follows is very general guidance.

831. Acceptance of offer

Offer and acceptance constitute contract. The place of contract is governed by the place of acceptance of the offer and acceptance takes place where it is received. Where acceptance is communicated by letter it is regarded as received at the place of posting rather than at the place of actual receipt. This is because, once a letter has been posted, the Post Office holds it on behalf of the addressee. Where telephone communication is used the place of acceptance is the place where the recipient of the acceptance is. That is the general rule for so-called instantaneous communication. It would apply also to an acceptance sent by telex or fax directly from the acceptor's office to the offeror's office. The general rule may need qualifying when a cable company's services are used. A telegram like a letter is regarded as received when put into the hands of the Post Office.

832. Price lists

The mere sending out of price lists and advertisements does not constitute an offer, it is rather an open invitation for offers to be made. An offer must be quite specific and a price list is not an offer to supply an unlimited amount of goods at the price named. It follows that when a customer buys goods from a supplier the customer makes the offer and the supplier notifies acceptance. That is generally the assumption in cases where place of contract has been decisive in determining a non-resident's liability. But it is not impossible for a price list to amount to an offer, as long as the list details the price, the quantity and gives a definite description of the goods concerned. If in such circumstances the buyer were to put in some amendment not contained in the original offer, then what the buyer does becomes a fresh offer and one which has to be unconditionally accepted before there can be said to be a binding contract. And there may be a series of communications between customer and supplier so that it is a matter of chance as to who makes and who accepts the final offer.

833. Delivery

It is quite common to find that there is no formal acceptance of the offer by the person supplying the goods and, in that situation, delivery itself will normally constitute acceptance; and then it would be important to look at the place of delivery, the place where the lawful property in the goods passes from seller to buyer.

834. Acceptance by agent

There can be widely different circumstances in which contracts are made here. There is the case where the agent or branch in this country really does the job of negotiating the contract. That person settles the deal and terms and makes the contract here and there is no doubt whatever about it. On the other hand, there can be the case where the agent makes the contract in the legal sense, but does so only with the specific authority of the principal. That is to say the agent gets an offer, writes to or rings the principal, obtains approval and then, and only then, accepts the offer. In that case, acceptance would be here and there are at least two cases [For example, *Wilcock v Pinto & Co* 9 TC 111] on that point.[58]

21.21 Trade partly in UK: Apportionment

I turn to the question of how to apportion where part of the trade is in the UK. Of course this overlaps with the question of whether there is a trade partly in the UK. If there are activities in the UK which do not involve trading in the UK there is nothing to apportion.

Tax Bulletin 18 provides:

> It is perhaps less obvious how the profits from the part of the trade carried on in the UK should be measured. They are required to be measured on the arm's length principle set out in the [OECD model tax convention] where a DTA applies which includes the relevant provisions. It is considered that it also follows from the main rule in Schedule D that the same principle applies even if there is no treaty.
>
> There is support for this principle in the early tax cases on non-residents trading in the UK. For example, in *Pommery & Greno v Apthorpe* at 2 TC 189, Denman J said, with regard to the profits chargeable in the UK from merchanting champagne produced in France, that:
>
>> It may be that there may be some difficulty in some respects as to the manner of calculating the amount of expenditure to be put against the profits, whether it would be a proper course to look at the goods sent over to England and then to consider what profit they make, putting a fair valuation on them as they arrive, and as the money is transmitted, or whether it would be necessary in such a case to look more minutely into the profits and losses upon the whole trade carried on partly in France and partly in England. I do not think it is necessary at all at this stage of the case to decide that. That is a matter of quantum, a matter for the consideration of persons skilled in dealing with such matters as assessing profits of trade.
>
> This can be seen as an early description of the arm's length principle and as a recognition of the need to develop methods to apply that principle in practice.[59]

The former International Tax Handbook also touched on this issue:

[58] There is also a brief comment (not worth setting out here) in NI Manual 29013 [Dec 2016].

[59] Author's footnote: See Russo (ed), "The Attribution of Profit to Permanent Establishments" (2005); OECD Report on the Attribution of Profits to Permanent Establishments (2008). *http://www.oecd.org/dataoecd/20/36/41031455.pdf*

814. Measure of profit in *Erichsen v Last*[60]

The second point the case deals with is – what is the chargeable profit? That is a rather special point where the transmission of messages is concerned. What the company claimed was that a great deal of the profit arose from the transmission over cables which were not here at all. The Master of the Rolls gave a simple parallel example of a foreign company running a steam packet between Dover and Calais. He said that as far as carrying passengers from Dover to Calais was concerned that was trading in Dover. There was no need to look at the three mile limit or anything of that sort. One simply had to take the receipts and deduct the expenses. The journey started here and the service was here. That is an idea limited in its application to trades involving the transmission of passengers, goods and information.

21.22 Post-cessation receipts

Until 1960 post-cessation trading receipts were not subject to tax.[61] Hence there is a separate code to deal with this topic.

I do not discuss here:

Debts paid/released after cessation: s.248, 249 ITTOIA
Relief for post-cessation expenditure: s.254, 255 ITTOIA
Election to carry back: s.257 ITTOIA

21.22.1 *Post-cessation receipt: Charge*

s.242 ITTOIA	**s.188 CTA 2009**
Income tax is charged on post-cessation receipts arising from a trade.	The charge to corporation tax on income applies to post-cessation receipts arising from a trade.

21.22.2 *Extent of charge*

s.243 ITTOIA	**s.189 CTA 2009**
(1) A post-cessation receipt is chargeable to tax under this Chapter only so far as it is not otherwise chargeable to income or corporation tax.	(1) A post-cessation receipt is chargeable to tax under this Chapter only so far as it is not otherwise chargeable to corporation or income tax.

[60] Author's footnote: For facts of *Erichsen v Last* 4 TC 422 see 21.8 (Place where contract made).

[61] See 31.4 (Post-cessation trading receipt).

(2) Accordingly, a post-cessation receipt arising from a trade is not chargeable to tax under this Chapter so far as it is brought into account in calculating the profits of the trade for any period.	[identical]

21.22.3 *Territorial limitation*

Section 243 ITTOIA/s.189 CTA 2009 provide:

> (3) A post-cessation receipt is not chargeable to tax under this Chapter if-
> (a) it is received by or on behalf of a non-UK resident who is beneficially entitled to it, and
> (b) it represents income arising outside the UK.
> (4) A post-cessation receipt is not chargeable to tax under this Chapter if it arises from a trade carried on wholly outside the UK, other than a person's trade of dealing in or developing UK land.

Section 243(5) ITTOIA provides:

> A post-cessation receipt is not chargeable to tax under this Chapter in the case of a partner in a firm if-
> (a) it represents income arising outside the UK from a trade carried on by the firm, and
> (b) the partner's share of the firm's income arising out of the UK is treated as relevant foreign income by section 857(3) (partners to whom the remittance basis applies)

21.22.4 *Split year*

Section 243(6) ITTOIA provides:

> If the tax year is a split year as respects a UK resident individual, this section has effect as if, for the overseas part of that year, the individual were non-UK resident.

21.22.5 *Basis of assessment*

Section 244 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the receipts received in the tax year.
> (2) This is subject to-
> (a) sections 254 and 255 (allowable deductions), and

(b) section 257 (election to carry back).

21.22.6 *"Post-cessation receipt"*

Section 246(1) ITTOIA/s.190(1) CTA 2009 provide:

> In this Part "post-cessation receipt" means a sum-
> (a) which is received after a person permanently ceases to carry on a trade, and
> (b) which arises from the carrying on of the trade before the cessation.

Section 246 ITTOIA provides:

> (2A) If, immediately before a person permanently ceases to carry on a trade, an election under section 25A (cash basis for small businesses) has effect in relation to the trade, a sum is to be treated as a post-cessation receipt only if it would have been brought into account in calculating the profits of the trade on the cash basis had it been received at that time.
> (3) Subsection (4) applies if-
> (a) a firm carries on a trade,
> (b) a person ceases to be a partner in the firm, and
> (c) the departure results in the partner permanently ceasing to carry on the notional trade (see section 852).
> (4) The partner is treated for the purposes of this Chapter as permanently ceasing to carry on the trade.

Section 190 CTA 2009 provides:

> (2) In this Chapter, except in sections 194 and 195, references to a person permanently ceasing to carry on a trade include-
> (a) in the case of a company, the occurrence of an event treated under section 18 of ITTOIA 2005 (companies beginning or ceasing to be within charge to income tax) as the company permanently ceasing to carry on the trade, and
> (b) in the case of a trade carried on by a person in partnership, the occurrence of an event treated under section 246(4) of ITTOIA 2005 (basic meaning of "post-cessation receipt") as the person permanently ceasing to carry on the trade.

21.22.7 *Person liable*

Section 245 ITTOIA provides:

> The person liable for any tax charged under this Chapter is the person receiving or entitled to the receipts.

21.22.8 *Transfer of rights transferee not trading*

s.251 ITTOIA	**s.194 CTA 2009**
(1) This section applies if- (a) a person ("the transferor") permanently ceases to carry on a trade, (b) the transferor transfers to another person ("the transferee") for value the right to receive sums arising from the carrying on of the trade, and (c) the transferee does not subsequently carry on the trade.	(1) This section applies if- (a) a company ("the transferor") permanently ceases to carry on a trade, (b) the transferor transfers to another person ("the transferee") for value the right to receive sums arising from the carrying on of the trade, and (c) the transferee does not subsequently carry on the trade.
(2) The transferor is treated as receiving a post-cessation receipt.	(2) The transferor is treated as receiving a post-cessation receipt.
(3) The amount of the receipt is- (a) the amount or value of the consideration for the transfer, if the transfer is at arm's length, or (b) the value of the rights transferred as between parties at arm's length, if the transfer is not at arm's length.	[identical]
(4) Any sums mentioned in subsection (1)(b) which are received after the cessation of the trade are not post-cessation receipts.	[identical]
(5) This section is subject to- (a) section 252 (transfer of trading stock or work in progress), and (b) section 253 (lump sums paid to personal representatives for copyright etc.).	(5) This section is subject to section 195 (transfer of trading stock).

21.22.9 *Transfer trading stock/work in progress*

Section 252 ITTOIA provides:

> (1) When a person permanently ceases to carry on a trade, a sum

realised by-

(a) the transfer of trading stock, or

(b) the transfer of work in progress,

is not a post-cessation receipt if a valuation of the stock or work is brought into account in accordance with Chapter 12 (valuation of stock and work in progress).

(2) This does not prevent a sum from being treated as a post-cessation receipt as a result of an election under section 185 (election for valuation of work in progress at cost).

(3) In this section-

(a) "trading stock" has the meaning given by section 174, and

(b) "work in progress" and "transfer of work in progress" have the meaning given by section 183.

21.22.10 *PRs lump sum for copyright*

Section 253 ITTOIA provides:

> (1) A lump sum which is paid to the personal representatives of the author of a literary, dramatic, musical or artistic work as consideration for the assignment by them of-
>
> (a) the copyright in the work, or
>
> (b) the public lending right in the work,
>
> is not a post-cessation receipt.
>
> (2) A lump sum which is paid to the personal representatives of the designer of a design in which design right subsists as consideration for the assignment by them of that right is not a post-cessation receipt.
>
> (3) For the purposes of this section it does not matter whether the whole or a part of the right is assigned.

This seems generous.

21.23 DT relief: trading income

Article 7(1) OECD Model provides:

> [a] [i] The profits of an enterprise of a Contracting State shall be taxable only in that State
>
> [ii] unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein.
>
> [b] If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

A full discussion of this topic requires at least 3 volumes:

- a volume on the relief in art 7(1)[a][i]
- another on the meaning of PE (such books have been written)
- another on attribution of profits to a PE, the most contentious topic in international taxation

OECD Commentary provides:

> 11. The first principle underlying paragraph 1, i.e. that the profits of an enterprise of one Contracting State shall not be taxed in the other State unless the enterprise carries on business in that other State through a permanent establishment situated therein, has a long history and reflects the international consensus that, as a general rule, until an enterprise of one State has a permanent establishment in another State, it should not properly be regarded as participating in the economic life of that other State to such an extent that the other State should have taxing rights on its profits.

21.23.1 *"Business"*

Article 3(1)(h) OECD Model provides an inclusive definition of "business":

> the term "business" includes the performance of professional services and of other activities of an independent character.

The Model Commentary to Article 3(1)(h) provides:

> 10.2 The Convention does not contain an exhaustive definition of the term "business", which under paragraph 2, should generally have the meaning which is has under the domestic law of the State that applies the Convention.

In the usual UK sense, "business" is very wide. No-one would have doubted that the provision of professional services or other activities of an independent character constitutes a "business" in the ordinary sense. But the definition does no harm, and is there for historical reasons. OECD Commentary provides:

> 8. Before 2000, income from professional services and other activities of an independent character was dealt with under a separate Article, i.e. Article 14.[62] The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and

[62] See 21.24 (Independent personal services).

> industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article 14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits. This was confirmed by the addition of a definition of the term "business" which expressly provides that this term includes professional services or other activities of an independent character.

The activity of being an employee, and the activity of making or holding or managing investments, may constitute a business in the wide UK sense of the word, but they are not businesses within article 7.

For further discussion, see *G E Financial Investments v HMRC* [2021] UKFTT 210 (TC).

21.23.2 *"Enterprise"*

The term "enterprise" is frequently used in the OECD Model, in particular:

Article: Topic	**Wording** (in outline)
5: Definition of PE	Fixed place of business through which business of an enterprise is carried on
7: Business profits	Profits of enterprise of Contracting State taxable only in that State
9: Associated enterprises	*Not discussed here*
13(2): Capital gains	Gains from ... business property of PE which an enterprise of a Contracting State has in the other State may be taxed in that other State

Article 3(1) OECD Model defines "enterprise" and "enterprise of a Contracting State":

> For the purposes of this Convention, unless the context otherwise requires...
>
> *c)* the term "enterprise" applies to the carrying on of any business;[63]
>
> *d)* the terms "enterprise of a Contracting State" and "enterprise of

[63] See 21.23.1 ("Business").

> the other Contracting State" mean respectively an enterprise carried on by a resident of a Contracting State and an enterprise carried on by a resident of the other Contracting State; ...

The term "enterprise" is used in two ways:

(1) to refer to the business, or business activity
(2) to refer to the person or entity which carries on that activity[64]

Usage (2) seems eccentric, if not erroneous, but it does not matter as the meaning is clear. Perhaps the English is influenced by the French version of the model.

OECD Commentary provides:

> 4. The question whether an activity is performed within an enterprise or is deemed to constitute in itself an enterprise has always been interpreted according to the provisions of the domestic laws of the Contracting States. No exhaustive definition of the term "enterprise" has therefore been attempted in this Article. However, it is provided that the term "enterprise" applies to the carrying on of any business. Since the term "business" is expressly defined to include the performance of professional services and of other activities of an independent character, this clarifies that the performance of professional services or other activities of an independent character must be considered to constitute an enterprise, regardless of the meaning of that term under domestic law. States which consider that such clarification is unnecessary are free to omit the definition of the term "enterprise" from their bilateral conventions.

See Avery Jones, "Does 'Enterprises' in OECD Model mean 'Business'?" (2006) 60 Bulletin for International Taxation 476. See too:

Topic	**See para**
What is a separate enterprise	106.10
Is stichting an enterprise	90.40.6
Enterprise of transparent entity	91.6.1

[64] This is self-evident, but if authority is needed, see *Fowler v HMRC* [2016] UKFTT 234 (TC) at [105]: "the words "enterprise" and "business" are only partially defined in [the South Africa/UK DTA, [which follows the OECD Model]. In this connection, it seems to me that the word "enterprise" is wide enough to encompass both the entity carrying on and the activity which can be described as a business. It is true that Article 3(1)(g) tells us the word "enterprise" applies to the carrying on of any business, but that does not, I think, take us very far. It focuses our attention on what is meant by the word "business"."

21.23.3 *"Profits"*

OECD Commentary on art 7 provides:

> 71. Although it has not been found necessary in the Convention to define the term "profits", it should nevertheless be understood that the term when used in this Article and elsewhere in the Convention has a broad meaning including all income derived in carrying on an enterprise. Such a broad meaning corresponds to the use of the term made in the tax laws of most OECD member countries.

21.23.4 *Attribution to PE*

Article 7(2) OECD Model provides:

> For the purposes of this Article and Article [23 A] [23 B], the profits that are attributable in each Contracting State to the permanent establishment referred to in paragraph 1 are the profits it might be expected to make, in particular in its dealings with other parts of the enterprise, if it were a separate and independent enterprise engaged in the same or similar activities under the same or similar conditions, taking into account the functions performed, assets used and risks assumed by the enterprise through the permanent establishment and through the other parts of the enterprise.

21.23.5 *Adjustment for attribution*

Article 7(3) OECD Model provides:

> 3. Where, in accordance with paragraph 2, a Contracting State adjusts the profits that are attributable to a permanent establishment of an enterprise of one of the Contracting States and taxes accordingly profits of the enterprise that have been charged to tax in the other State, the other State shall, to the extent necessary to eliminate double taxation on these profits, make an appropriate adjustment to the amount of the tax charged on those profits. In determining such adjustment, the competent authorities of the Contracting States shall if necessary consult each other.

21.23.6 *Interest from third state PE*

OECD Commentary provides:

> 28. [Article 11] Paragraph 5 provides no solution for the case, which it excludes from its provisions, where
> [a] both the beneficiary and the payer are indeed residents of the

Contracting States, but

[b] the loan was borrowed for the requirements of a permanent establishment owned by the payer in a third State and the interest is borne by that establishment.

As paragraph 5 now stands, therefore, only its first sentence will apply in such a case. The interest will be deemed to arise in the Contracting State of which the payer is a resident and not in the third State in whose territory is situated the permanent establishment for the account of which the loan was effected and by which the interest is payable. Thus the interest will be taxed both

[a] in the Contracting State of which the payer is a resident

[b] and in the Contracting State of which the beneficiary is a resident.

But, although double taxation will be avoided between these two States by the arrangements provided in the Article, it will not be avoided between them and the third State if the latter taxes the interest on the loan at the source when it is borne by the permanent establishment in its territory.

29. It has been decided not to deal with that case in the Convention. The Contracting State of the payer's residence does not, therefore, have to relinquish its tax at the source in favour of the third State in which is situated the permanent establishment for the account of which the loan was effected and by which the interest is borne. If this were not the case and the third State did not subject the interest borne by the permanent establishment to source taxation, there could be attempts to avoid source taxation in the Contracting State through the use of a permanent establishment situated in such a third State. States for which this is not a concern and that wish to address the issue described in the paragraph above may do so by agreeing to use, in their bilateral convention, the alternative formulation of paragraph 5 suggested in paragraph 30 below. The risk of double taxation just referred to could also be avoided through a multilateral convention. Also, if in the case described in paragraph 28, the State of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the interest at the source, there would be nothing to prevent those two States together with, where appropriate, the State of the beneficiary's residence, from concerting measures to avoid the double taxation that would result from such claims using, where necessary, the mutual agreement procedure (as envisaged in paragraph 3 of Article 25);

> see paragraphs 38.1 and 55 to 55.2 of the Commentary on Article 25).
> 30. As mentioned in paragraph 29, any such double taxation could be avoided either through a multilateral convention or if the State of the beneficiary's residence and the State of the payer's residence agreed to word the second sentence of paragraph 5 in the following way, which would have the effect of ensuring that paragraphs 1 and 2 of the Article did not apply to the interest, which would then typically fall under Article 7 or 21: Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a State other than that of which he is a resident a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.
> 31. If two Contracting States agree in bilateral negotiations to reserve to the State where the beneficiary of the income resides the exclusive right to tax such income,[65] then ipso facto there is no value in inserting in the convention which fixes their relations that provision in paragraph 5 which defines the State of source of such income. But it is equally obvious that double taxation would not be fully avoided in such a case if the payer of the interest owned, in a third State which charged its tax at the source on the interest, a permanent establishment for the account of which the loan had been borrowed and which bore the interest payable on it. The case would then be just the same as is contemplated in paragraphs 28 to 30 above.

21.23.7 *3rd-party relief disapplied*

Section 130 TIOPA provides:

> (1) Subsection (4) applies if double taxation arrangements make the provision, however expressed, mentioned in subsection (2).
> (2) The provision is that the profits of an enterprise within subsection (3) are not to be subject to UK tax except so far as they are attributable to a permanent establishment of the enterprise in the UK.

That includes treaties in OECD Model form, which is the large majority.

> (3) An enterprise is within this subsection if the enterprise—
> (a) is resident outside the UK, or
> (b) carries on a trade, or profession or business, the control or management of which is situated outside the UK.

[65] See 26.27.2 (DTAs with 100% interest relief).

The word "enterprise" here means the person who carries on the enterprise (business).

Assuming the conditions of s.130(1)-(3) are satisfied, we move on to s.130(4) which disallows treaty relief:

> The provision does not prevent income of a person resident[66] in the UK being chargeable to income tax or corporation tax.

In short, treaty relief is only allowed for a person treaty-resident outside the UK, and what I call third-party DT relief[67] is disapplied.

Section 130 applies where an enterprise is carried on by a trust or company which is a resident in a treaty state with a standard business income article; and a UK resident is taxable on the income. The UK resident person does not qualify for DT relief. That may happen:

(1) as life tenant of the trust
(2) under s.624 ITTOIA
(3) under the transactions in land code (though this also has its own treaty override)[68]

For completeness: s.130(5) TIOPA provides an exception:

> Subsection (4)—
> (a) does not apply in relation to income of a person resident in the UK if section 858 of ITTOIA 2005 (UK resident partner is taxable on share of firm's income despite any double taxation arrangements) applies to the income, and
> (b) does not apply in relation to income of a company resident in the UK if section 1266(2) of CTA 2009 (UK resident company that is partner in a firm is taxable on share of firm's income despite any double taxation arrangements) applies to the income.

Section 130 is not needed here as s.858 ITTOIA does the same job; see 85.25 (DT relief: Partnership).

In the 2020/21 edition of this work I said:

[66] Section 130(6) TIOPA defines residence:

> "A person is resident in the UK for the purposes of this section if the person is resident in the UK for the purposes of the double taxation arrangements."

The wording in the definition of treaty-residence is: "a resident *of* the UK", but the preposition does not matter; see 9.1 (Treaty-residence: Introduction).

[67] See 109.1 (Third-party DT relief).

[68] See 22.16.1 (TiL treaty override).

> Section 130 is headed: *Interpreting provision about UK taxation of profits of foreign enterprises*. This rule is however not interpretation or even misinterpretation: it is a treaty override. This section simply disapplies treaty relief for business profits. Breach of treaty agreements has ceased to concern HMRC when on the tax avoidance warpath.

But treaties eventually caught up with the s.130 approach, which is now authorised by the OECD Model/BEPS Savings Clause.[69]

21.24 Independent personal services

Article 14 OECD Model formerly provided:

> *(1) Income derived by an individual who is a resident of a Contracting State in respect of professional services or other activities of an independent character shall be taxable only in that State unless he has a fixed base regularly available in that other State for the purpose of performing the activities. If he has such a fixed base, the income may be taxed in that other State, but only so much of it as is attributable to that fixed base.*
> *(2) The term "professional services" includes especially independent scientific, literary, artistic, educational or teaching activities as well as the independent activities of physicians, lawyers, engineers, architects, dentists and accountants.*

This article was abolished in 2000, but survives in older treaties.
The INTM provides:

> **INTM153160 Independent personal services** [Jul 2018]
> This Article deals with professional income and income from activities of an independent character, income which in the UK would generally be taxed as trade profits. Such income can only be taxed in the country of which the person deriving the income is a resident, but, if he has a fixed base regularly available to him in the other country, then the other country can tax so much of the income as is attributable to that fixed base. Some agreements provide additionally that, if an individual is present in the other country exceeding a specified number of days (normally 183), that other country can tax so much of the income as is attributable to the services performed in that country in that period.
> The Article was deleted from the OECD Model DTC in 2000 on the basis of a report entitled 'Issues related to Article 14 of the OECD

[69] See 109.5 (Savings Clause).

Model Double Taxation Convention'. That decision reflected the fact that there were no intended differences between the concepts of permanent establishment, as defined in Article 5 and used in Article 7 and fixed base as used in Article 14, or between how profits were computed and tax calculated according to which of Article 7 or 14 applied. In addition, it was not always clear which activities fell within Article 14 as opposed to Article 7. The effect of the deletion of Article 14 from a particular treaty will be that income derived from professional services or other activities of an independent character will be dealt with under Article 7 as business profits.

Of course, a large number of the UK's tax treaties still contain an Article 14. As time goes on and as treaties are renegotiated, this will change. But in the meantime, if there is an Article 14 in a particular treaty then it should be applied as appropriate. The last OECD update which contains a commentary on Article 14 was the one published in June 1998.

CONTENTS AT A GLANCE

The chapters are organised thematically as follows:

Volume 1

Introduction and What's New

Obtaining further advice and disclaimer

A1 FIG Relief//Abolition of Domicile Rule

Non-dom policy & avoidance

1. Foreign Domicile: Tax Policy
2. Tax Avoidance
3. Targeted Anti-avoidance Rules (TAARs)

Domicile & residence

4. Domicile
5. Deemed Domicile
6. Residence of Individuals
7. Residence of Trustees

Volume 2

8. Residence of Companies
9. Treaty-Residence
10. Split Years
11. Temporary Non-residence
12. Exit Taxes
13. UK Arrival or Departure: Tax Checklist

Income tax: Principles & remittance basis

14. Income Categorisation
15. Income Recognition: Received /Entitled/Arise/Paid
16. Source/RFI/Territorial Principles
17. The Remittance Basis
18. The Meaning of Remittance
19. Remittance Reliefs
20. Mixed Funds

Income by category

21. Trading Income

Volume 3

22. Trading in Land
23. Performers
24. Property Income
25. Deduction of Interest from Property Income

26. Interest Income
27. Exempt Interest of Non-Residents
28. Accrued Income Profits
29. Deeply Discounted Securities
30. Dividend Income
31. Annual Payments
32. Intellectual Property Income
33. Misc Sweep-Up Income
34. Employment Income
35. Travel Expenses: Employment Income
36. PAYE
37. Employment Income: DT Relief

Volume 4

38. Pension and Annuity Income
39. Benefit in Kind: Family Home and Chattels
40. Benefit in Kind: Loans from Non-Resident Companies

IT: general

41. Discretionary Trusts: Income Tax
42. IIP Trusts: Income Tax
43. Rates of Income Tax: CGT
44. Personal Allowances
45. Non-Resident Income Tax Relief
46. National Insurance Contributions

IT avoidance codes

47. Settlor-Interested Trust Code
48. Transfer of Assets Abroad: Introduction
49. Transfer of Assets Abroad: Transferors
50. Transfer of Assets Abroad: Benefits
51. Transfer of Assets Abroad: Relief From Overlapping Charges
52. Transfer of Assets Abroad: Motive Defence
53. Profit Fragmentation

Volume 5

54. Transfer of Income Stream
55. Transactions in Securities

Capital Gains Tax

56. Chargeable Gains
57. UK Property held by Non-residents
58. Reorganisations
59. Residential Property: CGT
60. Gains of Non-resident Settlor-interested Trust: s.86
61. Capital Payments from Non-resident Trusts: s.87

62. Borrowing by Non-resident Trusts: Sch 4B
63. Sub-funds
64. Gains of Non-resident Companies
65. Capital Losses

Funds

66. FIG Relief - Abolition of Domicile Rule
67. Offshore Income Gains
68. Income from Offshore Funds
69. Unit Trusts

Volume 6

70. Life Policies and Contracts
71. Intermediated Securities
72. Investment Manager Exemptions
73. Investment Management Fees & Carried Interest

Inheritance Tax

74. IHT Terms and Concepts
75. Excluded Property: Definition
76. Excluded Property Exemptions
77. Wills and IOVs
78. Reservation of Benefit
79. Inter-trust Transfers: IHT
80. IHT Deduction for Debts
81. IHT Close-company Code
82. IHT Residential Property Code
83. Pe-owned Assets
84. Pension Schemes and IHT

Entities

85. Partnerships
86. Partnership Income Attribution

Volume 7

87. Settlement, Bare Trust and Associated Terminology
88. Estates of Deceased Persons: CGT
89. Estates of Deceased Persons: Income Tax
90. Foreign Entities
91. Hybrid Entities

Concepts & topics affecting more than one tax

92. Protected Trusts
93. Non-dom/Non-resident Spouse
94. Joint Accounts
95. Foreign Currency Issues
96. Cryptoassets

97. Unremittable Assets
98. ATED and SDLT
99. Who is the Settlor?
100. Multiple Settlors

Volume 8

101. Statutory Tax Indemnities
102. Situs of Assets for IHT
103. Situs of Assets for CGT
104. Control, Connected, Close and Related Expressions
105. Participation and % Interest Tests
106. Permanent Establishment and Branch/Agency

Double Taxation Agreements: IT/CGT

107. Double Taxation Arrangements: Introduction
108. DTA Anti-Abuse Rules
109. Third Party Relief/Savings Clause
110. Limitation on Benefits
111. Credit for Foreign Tax
112. Non-discrimination
113. Mutual Agreement Procedure

Double Taxation Agreements: IHT

114. IHT Double Taxation Treaties: Introduction
115. IHT DTAs: India, Pakistan, Italy, France
116. IHT DTA: Netherlands
117. IHT DTA: South Africa
118. IHT DTA: Switzerland
119. IHT DTA: USA
120. Credit for Foreign IHT

Administration

121. Reporting and Compliance
122. Tax Return Filing Position
123. Claims
124. Collection of Tax from UK Representatives

Volume 9

125. Reporting and Compliance: IHT
126. Penalties
127. Failure to Prevent Tax Evasion
128. Reporting Offshore Trusts
129. International Movement of Capital: Reports
130. Common Reporting Standard
131. Trust Registration

22.20 "Another person"
22.21 "Arrangement"
22.22 "Disposal"
22.23 Definitions
  22.23.1 "Realising a gain"
  22.23.2 "Development"
22.24 Notification and assessment

22.1 Trading in land: Introduction

This chapter considers:
(1) What is trading in land
(2) Non-residents dealing/developing land
(3) Transactions in land code

22.2 What is trading in land

For general discussion of the concept of trade, see App.2.23 (Trade). I consider here what constitutes trading in land.

BIM provides:

BIM60025 land: trading transactions: badges of trade [Jun 2016]
You should consider the established badges of trading and in particular the following:
- whether there have been any previous transactions and, if so, at what intervals;
- whether the way in which the transaction was organised was typical of a land dealer;
- whether a loan was necessary to fund the purchase and, if so, on what terms;
- the character of the land: was it amenity land for the purchaser, suitable for long term investment or ripe for immediate development?
- the length of time the land was held and, particularly, whether there might have been, at the moment of acquisition, a pre-arranged sale.

The badges are summarised in the property dealing context in *Marson v Morton* [1986] 59 TC 381. You should remember that no one factor is determinant. What you are seeking to establish is the overall 'character' of the transaction.

22.2.1 *Intention on acquisition*

BIM provides:

BIM60030 trading transactions: intention on acquisition [Jan 2019]
The purchaser's intention at the moment of acquisition of the land is of great importance. In *Lionel Simmons Properties Ltd v CIR* [1980] 53 TC 461, Lord Wilberforce said at page 491:

> 'Trading requires an intention to trade: normally the question to be asked is whether this intention existed at the time of the acquisition of the asset'.

It is therefore often necessary to demonstrate an intention to trade at the time of acquisition. For land transactions, the exchange of contracts is the moment when the property is acquired. The formal transfer of property or completion follows within a month of completion but is sometimes delayed for commercial, or tax planning reasons.

BIM60035 trading transactions: profit seeking motive [Jun 2016]
An intention to dispose of land at a profit at some time in the future, does not automatically mean there is an intention to trade (*CIR v Reinhold* [1953] 34 TC 389), though in appropriate circumstances such an intention can ensure that a transaction is an adventure in the nature of a trade.

Land may be acquired as a capital asset in the knowledge that it will appreciate in value and realise a 'profit' one day on disposal.

It is not conclusive that the land will produce investment income before eventual sale:

Marson v Morton [1986] 59 TC 381. Accordingly, it will be insufficient to demonstrate a profit seeking motive. A trading intention has to be shown from all the facts of the case.

BIM60040 trading transactions: deal or investment? [Jan 2019]

In practice, it will be rare for someone to say that they are starting a trade in property. Intention may be reasonably inferred from all the circumstances at the time. If you identify the badges of trade in a transaction, these will indicate a trading intention.

It is necessary to examine the transaction objectively. Do the facts suggest a 'deal' or an investment?

If, notwithstanding the purchaser's stated intentions, the facts suggest a trading intention it should be argued that the transaction is part of a trade.

BIM60045 trading transactions: equivocal and unequivocal transactions [Jan 2019]

There may be cases where, on examination of all the facts, it is difficult to decide whether the transaction is part of a trade. A distinction between these 'equivocal' transactions and the 'unequivocal' variety is drawn in the past cases. Examples are *Iswera v CIR* [1965] 1 WLR 668 ... and *Kirkham v Williams* [1991] 64 TC 253.

There are no hard and fast rules as to what makes a transaction equivocal. The matter was considered in *Kirkham v Williams*. In that case Nourse LJ thought an equivocal or ambiguous case was one in which the facts, when viewed on their own, did not tell you whether the land was acquired as trading stock or as a capital asset.

In 'unequivocal' or unambiguous cases the purchaser's actual intention will not be conclusive (see *Iswera v CIR*). Where the transaction is equivocal the purchaser's motive(s) for entering into a transaction may determine the character of the whole transaction.

A purchaser's stated intention of a single capital transaction will constitute evidence that the Tribunal must accept unless sufficient evidence of a trading intention can be adduced by reference to the badges of trade.

This is the principle to be drawn from *Iswera* which was cited with approval in *Kirkham*. As a general rule we should, when the facts allow, argue that the transaction was unequivocal. This means, identifying as many badges of trading as possible.

BIM60050 trading transactions: dual motive transactions [Jun 2016]

Transactions that are 'equivocal' may also be dual motive transactions. A dual motive transaction is a transaction entered into with two objects. An example would be an acquisition of land both to provide accommodation for an existing trade and for eventual development and resale at profit. It would be for the Tribunal to decide as a question of fact in such circumstances whether one of those motives was a trading motive and, if so, to what extent it coloured the whole transaction as being, in essence, a trading transaction. Nourse LJ's comments in *Kirkham v Williams* [1991] 64 TC 253 are relevant.

22.2.2 *Trading stock or capital asset*

In *Simmons v IRC*:[1]

> What I think is not possible is for an asset to be both trading stock and permanent investment at the same time, nor for it to possess an

[1] 53 TC 461.

> indeterminate status, neither trading stock nor permanent asset. It must be one or the other ...

22.2.3 *Supervening trade*

Lionel Simmons Properties v IRC considered a change in intention after purchasing an asset:[2]

> Intentions may be changed. What was first an investment may be put into the trading stock, and, I suppose, vice versa. If findings of this kind are to be made precision is required, since a shift of an asset from one category to another will involve changes in the company's accounts, and, possibly, a liability to tax

BIM provides:

BIM60060 trading transactions: supervening trade [Jun 2016]
... Worthwhile cases should be pursued where it is possible to identify a clear change of intention with regard to the land. Such a change must be shown by reference to objective factors. An example might involve the demolition of a warehouse previously held as a capital asset and the construction for sale of residential flats. It is once again a question of fact and degree. The greater the change in character of the land, the stronger the argument that a supervening trade has commenced.
The change of intention will involve an appropriation of the capital asset to trading stock when the trading activity begins and there will therefore be a deemed disposal at that moment for Capital Gains Tax purposes.[3] The determination of that moment is a question of fact. You should therefore ensure that you examine the history of the project in sufficient detail to be able to identify and, if necessary, to argue for the appropriate date. This date will of course have implications both for the valuation of the land and the expenditure that is allowable as a trade expense or even as pre-trading expenditure under the legislation.
All cases involving supervening trading should be submitted to CTISA before listing for a contentious hearing before the tribunal.
BIM60065 supervening trade: limited development [Jun 2016]
Development of infrastructure alone (for example, the division of land into plots, the construction of access roads and the installation of mains services) is not sufficient to demonstrate the appropriation of land, previously acquired as a capital asset, to stock in trade. Such development is ambiguous as it can point to the preparation of the land for sale. Accordingly, you should obtain more evidence before arguing that a supervening trade has begun. Such development merely enhances the value of the capital asset: *The Hudson's Bay Company Ltd v Stevens* [1909] 5 TC 424.
BIM60070 supervening trade: planning permission [Jun 2016]
The obtaining of planning permission prior to sale does not, in itself, characterise a

[2] 53 TC 461 at p.491. See too *Taylor v Good* 49 TC 277 at p.287; *Page v Lowther* 57 TC 199 at p.217; *Hopscotch v HMRC* [2020] UKUT 294 (TCC).

[3] Author's footnote: see s.161 TCGA.

transaction as a trading transaction: *Taylor v Good* [1974] 49 TC 277. It may, however, provide evidence of intention and thus add weight, in certain circumstances, to a trading argument.

22.2.4 *Trading: Private residence*

BIM provides:

BIM60075 trading transactions: private residences [Jun 2016]
The fact that a dwelling has been used as the person's residence is not automatically fatal to a trading contention: *MacMahon and MacMahon v CIR* [1951] 32 TC 311.
However, to succeed in a trading argument in these circumstances, it is necessary to demonstrate that residential use was incidental to that person's primary objective which was to dispose of it by way of trade.

22.2.5 *Trading: Builders*

BIM provides:

BIM60080 trading transactions: builders [Jun 2016]
Where builders buy and resell land there is a special onus placed on them to show that the transaction is on capital account and not part of the trade, see *Harvey v Caulcott* [1952] 33 TC 159.
This does not mean that builders can never hold land other than as trading stock. It does mean that they have to point to evidence that it was not acquired as trading stock.

22.2.6 *Trading: Losses*

BIM provides:

BIM60085 trading transactions: loss making transactions [Jun 2016]
There may be periods when there is a slump in the property market.
In these circumstances a one off transaction may give rise to a loss. You may be faced with an argument, from a person who is not a land dealer, that the transaction was a trading transaction and the loss is relievable as a trading loss.
The same principles have to be used in determining the character of loss making transactions as profitable ones. Once again the final question is whether the transaction could fairly be described as a 'deal or an investment' (*Marson v Morton* [1986] 59 TC 381), albeit, in the latter case, an investment which went wrong. The key issue is the intention of the purchaser at the time of acquisition: *Lionel Simmons Properties Ltd v CIR* [1980] 53 TC 461...

22.2.7 *Trading: Land acquired as gift*

BIM provides:

BIM60090 trading transactions: land acquired by inheritance or gift [Jun 2016]
Where land is acquired by inheritance or gift, its subsequent disposal will not ordinarily be chargeable as trading income: *Hudson's Bay Company v Stevens* [1909] TC 424 and *Williams v Davies* [1945] 26 TC 371.
A possible exception to this general rule is where, following acquisition, the recipient

decides to use the property to start trading in land. This would be the commencement of a supervening trade (see BIM60060).

22.2.8 *Trading: case law summary*

There are a hundred or so cases on whether a transaction is trading in land. BIM sets out the correct approach to the case law:

> There are numerous decided cases and it is rarely profitable to spend time trying to find one which matches the facts of your case. It is much better to concentrate on the main principles, which can be extracted from the cases listed here.

HMRC's case law reading list is as follows:

BIM60160 trading transactions: useful land cases [Jun 2016]
The following is a list of useful land cases and the points of interest they illustrate....
Marson v Morton [1986] 59 TC 381:
- summary of badges of trading in land context
- the role of case law in arguing and presenting cases
- sale arranged prior to acquisition: a major trade pointer
- trading is a question of fact

Lionel Simmons Properties Ltd (in Liquidation) v CIR [1980] 53 TC 461:
- the importance of establishing intention on acquisition
- assets cannot be acquired with indeterminate status
- assets can change from investment to trading stock and vice versa
- judicial endorsement of concept of supervening trading

Iswera v CIR [1965] 1WLR 1985 ... :
- land bought partly for sale, partly for retention the former to finance the latter: transaction held to be trading
- equivocal/non equivocal transactions

Kirkham v Williams [1991] 64 TC 253:
- discussion of equivocal transactions
- discussion of dual motive transactions

Harvey v Caulcott [1952] 33 TC 159:
- the special position of builders in land transactions

The Hudson's Bay Company v Stevens [1909] 5 TC 421:
- the enhancement of land limited to development of the infrastructure does not entail trading

CIR v Reinhold [1953] 34 TC 389:
- whether adventure in the course of trade
- profit motive not conclusive of trading

Taylor v Good [1974] 49 TC 277, *Page v Lowther* [1983] 57 TC 199:
- supervening trading

Hopscotch Ltd v HMRC [2020] UKUT 294 (TCC) can be added to this list.

22.3 Dealing/developing UK land

The legislation was introduced in 2016. It was put into the Finance Bill at committee stage, so precluding consideration or debate. The professional organisations grumbled (eg the Law Society, "a disturbing precedent of avoiding proper consultation and scrutiny..."). [4] But no-one took any notice.

The background is discussed in an HMRC Technical Note. [5]

The rules relate only to UK land.

In accordance with the policy of the Tax Law Rewrite, the provisions are set out twice, once for IT and again for CT.

s.6(1A) ITTOIA	**s.5(2A) CTA 2009**
Profits of a trade of dealing in or developing UK land arising to a non-UK resident are chargeable to tax under this Chapter wherever the trade is carried on.	A non-UK resident company which carries on a trade of dealing in or developing UK land is chargeable to corporation tax on all its profits wherever arising that are profits of that trade.

In order to understand the significance of this, it may be helpful to review the pre-2016 position.

Income from a non-resident's land dealing/development trade was formerly subject to income tax under general principles if carried on in the UK, but that was likely to be the case. [6] The trade was also likely to have a UK PE. On that basis the trade would have been taxable even pre-2016. However the change may be significant in practice, because it was common before 2016 to seek to arrange that the trade was not carried on in the UK, and so was not taxable; or was carried on without a UK PE, and so could qualify for treaty exemption. In practice, HMRC did not strive to challenge that, and relied instead on the ToA rules. [7]

[4] Law Society Press Release 24 August 2016.

[5] HMRC, "Profits from Trading in and Developing UK Land" (2016) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/507766/1044_Budget_Day_Technical_Note__v2_0__3_.pdf*

[6] See 21.13.1 (Trading stock: land).

[7] See *Davies v HMRC* [2020] UKUT 67 (TCC) discussed at 3.20.5 (Special tax regime).

The provisions now preclude non-residents arguing that a trade of dealing/developing UK land is not subject to income tax, on the grounds that it is carried on outside the UK.

Income from a non-resident company's land dealing/development trade was formerly subject to CT under general principles if carried on in the UK through a UK PE. That was likely to be the case but it was possible for a land dealing trade to have no PE, and the same was at least theoretically possible for a development trade, in which case the non-resident company would be governed by IT rules.

The trend of moving non-resident companies profits from land from IT to CT continued with the FA 2019 CGT/property income reforms.

HMRC describe the charge as an expansion of the territorial scope of IT/CT, which it was, though it is open to question how large the expansion was.

22.3.1 *"Dealing/developing UK land"*

The provisions only apply to a trade of *dealing in or developing UK land.*

Section 6B ITTOIA provides:

> (1) A non-UK resident person's "trade of dealing in or developing UK land" consists of —
>
> (a) any activities falling within subsection (2) which the person carries on ...
>
> (2) The activities within this subsection are—
>
> (a) dealing in UK land;[8]
>
> (b) developing UK land for the purpose of disposing[9] of it.

Section 6B(1)(a) and (2) does not add anything to the natural meaning of dealing or developing.

Section 6B(1) ITTOIA provides:

> A non-UK resident person's "trade of dealing in or developing UK land" consists of ...
>
> (b) any activities from which profits arise which are treated under Part 9A of ITA 2007 [transactions in land] as profits of the

[8] Section 6B(3) ITTOIA (more or less) duplicates the Interpretation Act 1978 definition of land, so it adds nothing; see App 2.20 (Land).
Section 6B(4) ITTOIA provides (for the benefit of a reader unsure of the meaning of "UK"): "In this section ..."UK land" means land in the UK."

[9] Section 6B(4) ITTOIA provides: "In this section "disposal" is to be interpreted in accordance with section 517R of ITA 2007". See 22.22 ("Disposal").

person's trade of dealing in or developing UK land.

See 22.12 (TiL trade).

22.4 Land-dealing TAAR

s.6A ITTOIA	**s.5A CTA 2009**
(1) Subsection (3) applies if a person has entered into an arrangement[10] the main purpose or one of the main purposes of which is to obtain a relevant tax advantage for the person.	(1) Subsection (3) applies if a company has entered into an arrangement the main purpose or one of the main purposes of which is to obtain a relevant tax advantage for the company.
(3) The relevant tax advantage is to be counteracted by means of adjustments.	[Identical]
(4) For this purpose adjustments may be made (whether by an officer of Revenue and Customs or by the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.	[identical]

I refer to this as the **"land-dealing TAAR"**.

22.4.1 *"Relevant tax advantage*"

s.6A(5) ITTOIA	**s.5A(5) CTA 2009**
In this section "relevant tax advantage" means a tax advantage[11] in relation to income tax to which the person is chargeable (or would without the tax advantage be chargeable) by virtue of section 6(1A) [charge on dealing/ developing UK land].	In this section "relevant tax advantage" means a tax advantage in relation to corporation tax to which the company is chargeable (or would without the tax advantage be chargeable) by virtue of section 5(2A) [non-residents dealing/ developing UK land].

[10] Subsection (7) provides the standard (unnecessary) IT definition : see App 2.2.3 (Definitions of "arrangement").

[11] Section 6A(6) ITTOIA sets out the GAAR definition of "tax advantage"; see 3.19.1 (Tax advantage: Definitions).

22.4.2 *Treaty override*

Section 6A(2) ITTOIA/5A(2) CTA 2009 extend the TAAR with a treaty override:

> In subsection (1) the reference to obtaining a relevant tax advantage includes obtaining a relevant tax advantage by virtue of any provisions of double taxation arrangements,[12] but only in a case where the relevant tax advantage is contrary to the object and purpose of the provisions of the double taxation arrangements (and subsection (3) has effect accordingly, regardless of anything in section 6(1) of TIOPA 2010).

The wording is based on the OECD principal purpose test.[13]

Treaty relief would only apply in the absence of a UK PE.[14] When would arranging that be "contrary to the object and purpose" of a DTA? It would presumably suffice if the underlying beneficial owners are in the UK, and there is no commercial reason for using a company set up in the foreign treaty-state.

22.5 Transactions in land: Introduction

This section considers the rules in Part 9A ITA/Part 8ZB CTA 2010 (Transactions in land). I refer to this as the **"TiL code"**.

In accordance with the policy of the Tax Law Rewrite, the provisions are set out twice, once for IT and again for CT. The IT provisions were slotted in after s.517, and so are numbered 517A to 517U. The CT provisions (slotted in after sections numbered 356N to 356NO) are numbered 356OA to 356OT.[15]

22.6 Direct disposal of land

Section 517B(1) ITA/s.356OB(1) CTA 2010 provide:

[12] Section 6A(7) ITTOIA provides the standard commonsense definition: "In this section ... "double taxation arrangements" means arrangements which have effect under section 2(1) of TIOPA 2010 (double taxation relief by agreement with territories outside the UK)."

[13] See 108.8 (OECD principal purpose test).

[14] See 21.23 (DT relief: trading income).

[15] See App 13.3 (Section numbering system).
The 2018/19 ed of this work, para 17.4.1 (Comparison with pre-2016 rules), set out the differences between the current law and the pre-2016 law; but this is now omitted as it is of historical interest only. .

s.517B(1) ITA	**s.356OB(1) CTA 2010**
Section 517C(1) applies (subject to subsection (3) of that section)[16] if—	Section 356OC(1) applies (subject to subsection (3) of that section) if—
(a) a person within subsection (2)(a), (b) or (c) realises a profit or gain from a disposal of any land[17] in the UK, and	[identical]
(b) any of conditions A to D is met in relation to the land.	[identical]

In this chapter:

- A person within (1)(a) is a **"TiL person"**
- I abbreviate "profit or gain" to gain
- Conditions A to D are **"TiL gateway conditions"**:

22.7 TiL person

Section 517B(2) ITA/s.356OB(2) set out 3 categories of TiL person. They are so wide that it is difficult to see how there could be a disposal of land without many TiL persons:

> The persons referred to in subsection (1) are—
> (a) the person acquiring, holding or developing the land,
> (b) a person who is associated[18] with the person in paragraph (a) at a relevant time, and
> (c) a person who is a party to, or concerned in, an arrangement within subsection (3).

22.7.1 *Concerned in arrangement*

Section 517B(3) ITA/s.356OB(3) CTA 2010 provide:

> An arrangement is within this subsection if—
> (a) it is effected with respect to all or part of the land, and
> (b) it enables a profit or gain to be realised—
> (i) by any indirect method, or
> (ii) by any series of transactions.

[16] For this exception, see 22.12.2 (Income receipt exemption).

[17] Section 517S(1) ITA (more or less) duplicates the Interpretation Act definition of land, so it adds nothing; see App 2.20 (Land).

[18] See 22.9.3 ("Associated").

22.7.2 *Slice of action/overage*

BIM provides:

> **BIM60645 'Slice Of The Action' Contracts And Overage Arrangements** [May 2019]
>
> The transactions in UK land rules can be applied to 'slice of the action' contracts.
>
> 'Slice of the action' contracts are so called because they confer upon a landowner (who holds the land as an investment), the right to share in the proceeds of any subsequent development by the purchaser. In these cases, the contract for sale of the land to a builder or developer provides for consideration that is, in whole or in part, contingent upon the successful development of the land.
>
> A common arrangement is for the landowner to receive a fixed sum at the time of the disposal, plus a percentage of the sale proceeds of each building subsequently constructed by the purchaser on the land.
>
> Such 'slice of the action' contracts, and other overage arrangements where the landowner is entitled to receive consideration, if a specified condition is satisfied often fall within the transactions in UK land rules for the following reasons:
>
> - The landowner is included under the definitions of 'person'[19] as the 'slice of the action' contract or other specified contractual condition is an arrangement with the person holding the land.
> - The land has been developed with the main purpose of realising a profit or gain from disposing of the land when developed (condition D in Section 356OB(4)CTA 2010).
>
> **Example 1**
>
> A landowner sells land to a developer for £10m. At the date of sale the land is valued at the same amount.[20] The contract of sale specifies that if the developer makes profits in excess of £5m from developing the land the landowner will receive 10% of subsequent profits. The developer makes £8m profit and pays the landowner £300k.
>
> In this instance the landowner is concerned in an arrangement to develop the land and condition D is met. The £300k will be taxed as trading income.
>
> **Example 2**
>
> A landowner sells land to a developer for £6m. The developer's

[19] Author's footnote: More analytically, the landowner is within s.517B(2)(c) as a person concerned in the arrangement (in my terminology, a TiL person).

[20] This would not normally happen. But it simplifies the example.

> intention is to build a block of flats. The contract stipulates that £3m will be paid to the landowner immediately, and £3m will be paid to landowner at the earlier of 4 years after the date of sale or when 20 of the flats have been sold.
>
> Here the landowner is not concerned in an arrangement to develop the land. The £3m is deferred consideration receivable regardless of whether the land will be developed or not.
>
> ...
>
> **BIM60655 'Slice Of The Action' Contracts: Portion Of Charge May Be Exempt: Example** [May 2019]
>
> In a 'slice of the action' contract the effect of the exemption from the transactions in UK land rules can be significant. Normally, it removes an amount equal to the value of the land at the first intention date from the calculation of income chargeable to tax under those rules.
>
> **Example**
>
> A landowner agrees to sell some fields to a land developer for a fixed payment of £1m and a further payment of £0.5m which is contingent on the properties being built on the site being sold.
>
> - The initial fixed payment of £1m is made on 5/8/2016 ,
> - Further payments of £0.5m contingent on the development are agreed, and
> - The value when the contract is signed on 5/8/2016 (the first intention date) is £1.2m.
>
> The amount excluded from the calculation of the chargeable income is £1.2m, this amount is subject to chargeable gains tax or corporation tax on chargeable gains. The amount of income subject to income tax or corporation tax is £0.3m: the total payments received (£1.5m) less the value of the land at the first intention date (£1.2m).

For completeness: BIM adds:

> If, exceptionally, the first intention date value is less than the fixed initial payment, the amount of the gain taxed as income is the entirety of the contingent payments. The fixed initial payment is not within the calculation of the income since it is not contingent upon the development.
>
> **Example**
>
> A landowner sells land held for investment purposes to a developer for £5.2m. The developer intends to build 10 houses on the land. At the date of sale the land is valued at £5m and in this case this is the first intention date. The contract of sale specifies that £1m will be paid to the landowner when the first house is sold. At the date of sale £5.2m is recognised for capital gains tax purposes. Three years later the first

> house is sold. At this point condition D is met and the £1m will be taxed as trading income.

It is difficult to see how this could happen.

22.8 TiL gateway conditions

22.8.1 *Purpose to realise gain*

Condition A, B, and D relate to a purpose of realising a gain. Section 517B ITA/s.356OB CTA 2010 provide:

Condition A	**Condition B**	**Condition D**
(4) Condition A is that the main purpose, or one of the main purposes,	(5) Condition B is that the main purpose, or one of the main purposes,	(7) Condition D is that (in a case where the land has been developed) the main purpose, or one of the main purposes,
of acquiring the land	of acquiring any property deriving its value from the land	of developing the land
was to realise a profit or gain from disposing of the land.	was to realise a profit or gain from disposing of the land.	was to realise a profit or gain from disposing of the land when developed.

TiL condition A is not likely to arise, as if a main purpose of acquisition is to realise a gain on disposal, there is likely to be a trade on general principles.[21] But conditions B, C and D may arise.

22.8.2 *Trading stock*

Section 517B(6) ITA/s.356OB(6) CTA 2010 provide:

> Condition C is that the land is held as trading stock.

At first sight land held as trading stock would normally meet condition A, but perhaps the drafter was thinking of land acquired for investment and subsequently appropriated to trading stock.

[21] See 22.2 (What is trading in land).

22.8.3 *"Main purpose"*

BIM makes some general comments:

> **BIM60560: Main purpose or one of the main purposes** [May 2019]
> Conditions A, B and D contain a test of whether the "main purpose or one of the main purposes" for acquiring or developing the land, or the property deriving its value from land, was to make a profit or gain from disposal of land. This is a test of purpose, not of benefit or expectation. The concepts of 'the main purpose' and 'a main purpose' are used widely in UK tax law. A person may have more than one main purpose in entering into a transaction, and 'a main purpose' is a wider test than requiring something to be 'the main purpose'. It is therefore important to consider the question of trading alongside a main purpose test when considering whether or not this legislation applies, to ensure that what are genuinely non-trading transactions are not brought within its scope. An example of a type of arrangement where a main purpose test might be invoked would be a fact pattern similar to that in *Ransom v Higgs* [1974] 50 TC 1.

See 3.14 ("Main" purpose).

22.8.4 *Purpose to realise gain*

BIM provides:

> **BIM60555: Amounts treated as profits of a trade of dealing in UK land: Conditions** [May 2019]
> The purpose of this legislation is to ensure that profits from activities which, when looked at in the round, amount to (i) a trade in land or (ii) a trade of developing land, are taxed as trading profits. It is not the purpose of these rules to alter the treatment of activity that is clearly investment.
> The rules effectively look through structures or arrangements which might (?) allow an argument, that on a strict legal analysis, the transactions in question do not amount to a trade.
> These rules do not alter the treatment of or recharacterise investment activities, except where they are part of such a wider trading activity. In particular, they do not apply to transactions such as buying or repairing a property for the purpose of earning rental income, or as an investment to generate rental income and enjoy capital appreciation.
> The legislation should always be understood in the context that it is taxing only what are, in substance, trading profits.

BIM makes some general comments:

> **BIM60560: Main purpose or one of the main purposes** [May 2019]
> ... If a person buys land with the intention of
> [1] building on part of it to retain for their own purposes, and
> [2] of building on the rest of it for sale at a profit [in a manner consistent with trading activity][22],
> it is clear that one of their main purposes is to make a trading profit from development and disposal.
>
> In this instance at the point of acquisition the precise section of the land to be disposed of and the costs relating to that section may not be known. If this is the case profits should be calculated using the original cost of the land apportioned on a just and reasonable basis, subject to the anti-fragmentation provisions.
>
> It may be the case that an investor in UK property expects primarily to benefit from capital growth over time, in addition to obtaining rental yield. The legislation requires that a main purpose of the arrangement is to obtain a gain from disposing of the property. This condition will not be met in the case of straightforward long-term investment, where the economic benefit arising to the owner is the result of market movement from holding that asset rather than transactions that are in the nature of trading.
>
> An owner may also seek to increase the value of their property through improving the quality and security of the property's rental income, for example by negotiating longer leases. Alternatively, they may improve the property through some form of refurbishment in order to attract higher paying tenants, or subdivision of the property to attract more tenants, which again would increase the value of the property. Rental income is often an indicator that the asset is held as an investment, although this is not conclusive - an asset held for trading purposes could produce rental income over a relatively short period, equally an asset held over a longer period may for a number of reasons not produce income but could still be seen as an investment. The facts of each case will determine whether or not one of the main purposes is to make a trading profit from development and disposal.
>
> It is possible for the intention to change over time, at which point the main purpose test would need to be reconsidered (see examples 3, 4 and 5 below).

The HMRC examples are as follows:

[22] Author's footnote: Square brackets are original.

Example/Scenario	**TiL conditions met**
1 Investment + sale 7 years later after repairs	no
2 Development + sale 6 months after development	yes
3 Investment + change of intention after "several" years	yes but 517L relief
4 Purchase investment Co + intention to realise its assets	yes but 517L relief
5 Mixed trading/investment purpose	yes but apportion
6 Investment + redevelopment + sale 5 years later	no
7 Investment + unforeseen sale 2 years later	no
8 Investment + little rent + sale 5 years later	no
9 Investment + unforeseen sale 18 months later	no

> **Example 1 [Investment + sale 7 years later after repairs]**
> A non-resident property investor purchases a property with the primary purpose of realising rental income from the land purchased. When the investor purchased the land one of the factors they considered was likely capital appreciation of the land.
> After letting out the property for 7 years they make some repairs and dispose of the land.

The HMRC analysis is as follows:

> This is an example of an investment not trading transaction. The main purpose of the transaction is the rental income. Whilst the long term capital appreciation could be a reasonable expectation, it is clearly not a profit from a disguised trading transaction and would not therefore meet condition A.
> **Example 2 [Development + sale 6 months after development]**
> A non-resident property investor purchases a property with the intention of developing then selling the property. After developing the property they let it out for 6 months while they wait for the market to pick up.
> In this instance a main purpose of acquiring the land, was to realise a profit from disposing of the land and condition A would be met.
> **Example 3 [Investment + change of intention after "several" years]**
> An individual property investor acquires an old block of flats. They rent the flats out for several years then decide to build new flats on the site. They obtain planning permission for a new development which they complete and sell.
> In this example there has been a change of intention and Section 517L ITA 2007 will apply. Only the profit relating to the period after the change of intention should be taxed as a trading profit. The portion relating to the period where there was an investment intention should

not be included in the tax calculation.

Please see BIM60825 for details on apportionment.

Example 4 [Purchase investment Co + intention to realise its assets]

Company X purchases 100% of the share capital of company Y, which owns a UK property on investment account. Company X has the intention of realising a profit in a manner consistent with trading activity, by procuring company Y that subsequently sells the property. This would fall under Condition B.

In this example there has been a change of intention and Section 356OL CTA 2010 will apply. Only the profit relating to the period after the change of intention should be taxed as a trading profit. The portion relating to the period where there was an investment intention should not be included in the tax calculation.

Please see BIM60825 for details on apportionment.

Example 5 [Mixed trading/investment purchase]

An individual purchases a rundown block of flats. They intend to develop the flats into luxury apartments. After development they intend to keep 55 for rental and sell 45.

In this instance a main purpose of acquiring the land was to realise a profit or gain from disposing of it so condition A would be met. The profit relating to the 45 apartments should be taxed as trading income. Where it is not possible to specifically identify costs relating to the 45 apartments just and reasonable apportionment should be used.

Example 6 [Investment + redevelopment + sale 5 years later]

A non-resident property investor purchases an ageing block of offices in a prime location with the primary purpose of realising rental income from the land purchased. In order to achieve a higher rate of rent and a better quality of tenant, the investor redevelops the offices soon after the acquisition and then lets out the redeveloped offices for a period of 5 years. After such time they dispose of the land at a gain.

In this instance the main purpose of the transaction is the rental income. Whilst the office block is redeveloped, the primary purpose for doing so is to improve the yield from the investment rather than realise a gain.

Example 7 [Investment + unforeseen sale 2 years later]

A non-resident property investor purchases a property with a view to obtaining an income stream from the land purchased. At the time that the investor purchased the land it anticipated holding the property for over 5 years. In fact, after 2 years, the investor suffers a liquidity event and is forced to sell the property. The main purpose of the transaction is the rental income and the sale was motivated by a sudden unforeseen emergency. Condition A would not be met in this instance.

Example 8 [Investment + little rent + sale 5 years later]
A non-resident property investor purchases a property with a view to realising long term capital appreciation from the land purchased. The company will have to wait a significant number of years before the lease ends, or the tenant is prepared to surrender the lease. During the time that the property is held, the rental profits are poor, perhaps due to a rent-free period or vacancy arising from unexpected occupier insolvency. The investor sells the property after 5 years for a significant profit due to a market increase in the value of the land. This is an example of an investment and not trading transaction and condition A would not be met.

Example 9 [Investment + unforeseen sale 18 months later]
A non-resident property investor purchases a property with a view to realising rental income from the land purchased. At the time that the investor purchased the land it anticipated holding the property for over 5 years. In fact, after 18 months, the investor sells the property early as a result of unforeseen circumstances.

In this instance the main purpose of the transaction is the rental income and the sale was motivated by unforeseen circumstances so condition A would not be met.

22.9 Definitions

22.9.1 *"Relevant time"*

Section 517B(8) ITA/s.356OB(8) CTA 2010 provide:

> In this section "relevant time" means any time in the period beginning when the activities of the project begin and ending 6 months after the disposal mentioned in subsection (1).

This only applies for s.517B ITA/s.356OB CTA 2010, so the definition is repeated verbatim in s.517H(6) ITA/s.356OH(6) CTA 2010.

22.9.2 *"The project"*

Section 517B(9) ITA/s.356OB(9) CTA 2010 provide:

> In this section "the project" means all activities carried out for any of the following purposes—
> (a) the purposes of dealing in or developing the land, and
> (b) any other purposes mentioned in Conditions A to D.

This only applies for S.517B ITA/s.356OB CTA 2010, so the definition is repeated verbatim in s.517H(10) ITA/s.356OH(10) CTA 2010.

22.9.3 *"Associated"*

"Associated" person matters because the word is used in:

(1) s.517B(10) ITA/s.356OB(10) CTA 2010: definition of TiL person in direct disposal condition (a)[23]

(2) s.517H(9) ITA/s.356OH(9) CTA 2010: fragmentation rule

s.517B(10) ITA	**s.356OB(10) CTA 2010**
For the purposes of this section a person ("A") is associated with another person ("B") if—	[identical]
(a) A is connected with B by virtue of any of subsections (2) to (4) of section 993 (read in accordance with section 994), or	(a) A is connected with B by virtue of any of subsections (5) to (7) of section 1122 (read in accordance with section 1123), or
(b) A is related to B (see section 517U).	(b) A is related to B (see section 356OT).

This only applies for s.517B/356OB, so the definition is repeated verbatim in s.517H(9) ITA/356OH(10) CTA 2010.

The term "related" is used in the definition of "associated".[24] The definition is in s.517U ITA/s.356OT CTA 2010; see 57.7 ("Related party").

22.10 Indirect disposal of land

s.517D(1) ITA	**s.356OD(1) CTA 2010**
(1) Section 517E(1) applies (subject to subsection (3) of that section) if—	(1) Section 356OE applies (subject to subsection (3) of that section) if—

There follow three conditions, or sets of conditions, which I call indirect disposal conditions (a) to (c).

22.10.1 *Condition (a): Land-rich asset*

s.517D(1) ITA	**s.356OD(1) CTA 2010**
Section 517E(1) applies (subject to subsection (3) of that section) if—	Section 356OE applies (subject to subsection (3) of that section) if—

[23] See 22.7 (TiL person).

[24] See 22.9.3 ("Associated").

(a) a person realises a profit or gain from a disposal of any property which (at the time of the disposal) derives at least 50% of its value from land[25] in the UK	[identical]

I refer to this as an **"indirect disposal of land"** and property within (a) is a "**land-rich asset**".

22.10.2 *Condition (b): Concerned in arrangement*

s.517D(1) ITA	**s.356OD(1) CTA 2010**
Section 517E(1) applies (subject to subsection (3) of that section) if...	Section 356OE applies (subject to subsection (3) of that section) if...
(b) the person is a party to, or concerned in, an arrangement concerning some or all of the land mentioned in paragraph (a) ("the project land")	[identical]

BIM provides:

> **BIM60845: Definitions: Arrangement** [May 2019]
> ... To be in an arrangement[26] it is necessary to be acting together in some way or to have knowledge of the purpose of the arrangement. Where there is a small shareholder who has no or little input into the company which is developing the land, it is unlikely they will be concerned in an arrangement. There is a large spectrum of situations and the specific circumstances will determine whether an individual or company is concerned in an arrangement.
> **Example 1**
> An individual shareholder purchases a small number of shares in one of the UK's largest house builders. After holding these shares for a period they decide to dispose of the shares.
> In this instance it is unlikely the individual is concerned in an arrangement. They are unlikely to be acting together with the house

[25] Section 517S(1) ITA (more or less) duplicates the Interpretation Act 1978 definition of land, so it adds nothing; see App 2.20 (Land).

[26] Author's footnote: This is a loose paraphrase of the statutory term, which is "party to or concerned in" an arrangement. But nothing turns on that.

builder to deal in or develop UK land.

Example 2

An individual purchases 60% of the shares in a company which has been set up to purchase and develop a piece of land. The company will not be selling the land but will be sold to the person who wants to acquire the land. The reason for purchasing the shares was to purchase a portion of the land which will be disposed of after it is developed. When the land is developed the individual sells their shares to a third party.

In this instance it is likely the individual has been concerned in an arrangement to develop the land.

22.10.3 *Condition (c): Purpose of gain*

s.517D(1) ITA	**s.356OD(1) CTA 2010**
Section 517E(1) applies (subject to subsection (3) of that section) if...	Section 356OE applies (subject to subsection (3) of that section) if...
(c) the arrangement meets the condition in subsection (2).	[identical]

Section 517D(2) ITA/s.356OD(2) CTA 2010 provide:

> The condition is that the main purpose, or one of the main purposes, of the arrangement is to—
> (a) deal in or develop the project land, and
> (b) realise a profit or gain from a disposal of property deriving the whole or part of its value from that land.

This is a rough equivalent of the TiL gateway conditions which apply on a direct disposal.[27]

22.11 Deriving/attributing value

These concepts cannot sensibly be defined, but that does not stop the drafter from trying.[28]

22.11.1 *Deriving value*

Section 517S(2) ITA/s.356OR CTA 2010 provide a commonsense definition:

[27] See 22.8 (TiL gateway conditions).

[28] See App 2.9.8 (Derive/represent value).

> In this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] references to property deriving its value from land include—
>
> (a) any shareholding in a company deriving its value directly or indirectly from land,
>
> (b) any partnership interest deriving its value directly or indirectly from land,
>
> (c) any interest in settled property deriving its value directly or indirectly from land, and
>
> (d) any option, consent or embargo affecting the disposition of land.

22.11.2 *Attributing value*

For the purposes of the 50% test it is necessary to ascertain how much value one item of property derives from another.

Section 517N ITA/s.356OM CTA 2010 provide a commonsense rule:

> (1) This section applies if it is necessary to determine the extent to which the value of any property or right is derived from any other property or right for the purposes of this Part [Part 9A CTA, transactions in land/Part 8ZB CTA 2010, transactions in UK land].
>
> (2) Value may be traced through any number of companies, partnerships, trusts and other entities or arrangements.
>
> (3) The property held by a company, partnership or trust must be attributed to the shareholders, partners, beneficiaries or other participants at each stage in whatever way is appropriate in the circumstances.

Section 517N(4) ITA/s.536OM(4) CTA 2010 set out foreign-entity definitions of partnership/partner/ trust/beneficiary, but these are otiose; see 90.3.3 (Foreign-entity clauses).

22.12 TiL trade

The rules for direct/indirect disposals are in s.517C/E ITA and s.356OC/E CTA 2010, and it is helpful to read them side by side:

Direct disposal **s.517C ITA**	**Indirect disposal** **s.517E ITA**
(1) The profit or gain [from the disposal of land] is to be treated for income tax purposes as profits of a trade carried on by the chargeable person.	(1) The relevant amount is to be treated for income tax purposes as profits of a trade carried on by the chargeable person.

s.356OC CTA 2010	**s.356OE CTA 2010**
(1) The profit or gain [from the disposal of land] is to be treated for corporation tax purposes as profits of a trade carried on by the chargeable company (see section 356OG).	(1) The relevant amount is to be treated for corporation tax purposes as profits of a trade carried on by the chargeable company.

I refer to the deemed trade as the **"TiL trade"**.

The TiL code does not have its own charging provision: the income falls under the general charge on trading income.

The (deemed) trading income does not qualify as RFI.[29]

Section 517E (indirect disposal) is the same as s.517C (direct disposal) except the quantum of the charge is on the relevant amount, not the gain.

22.12.1 *Deemed development trade*

Direct disposal	**Indirect disposal**
s.517C ITA	**s.517E ITA**
(2) If the chargeable person is non-UK resident, that trade is the person's trade of dealing in or developing UK land (as defined in section 6B of ITTOIA 2005).	(2) If the chargeable person is non-UK resident, that trade is the chargeable person's trade of dealing in or developing UK land.
s.356OC CTA 2010	**s.356OE CTA 2010**
(2) If the chargeable company is non-UK resident, that trade is the company's trade of dealing in or developing UK land (as defined in section 5B of CTA 2009).	(2) If the chargeable company is non-UK resident, that trade is the company's trade of dealing in or developing UK land.

The wording is effectively the same. The point is to bring into effect the anti-avoidance rules relating to dealing/developing UK land by non-residents; see 22.3 (Dealing/developing UK land).

22.12.2 *Income receipt exemption*

It is helpful to compare the rules for direct/indirect disposals, so I set them

[29] See 16.9.2 ("Relevant foreign income").

side by side. The IT/CT rules are substantially identical, but I set out both for completeness:

Direct disposal	**Indirect disposal**
s.517C(3) ITA	**s.517E(3) ITA**
But subsection (1) [deemed trade] does not apply to a profit or gain [from the disposal of land] so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)— (a) for income tax purposes, or (b) for corporation tax purposes	But subsection (1) [deemed trade] does not apply to an amount [ie a relevant amount] so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)— (a) for income tax purposes, or (b) for corporation tax purposes.
s.356OC(3) CTA 2010	**s.356OE(3) CTA 2010**
(3) But subsection (1) [deemed trade] does not apply to a profit or gain [from the disposal of land] so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)— (a) for corporation tax purposes, or (b) for income tax purposes.	(3) But subsection (1) [deemed trade] does not apply to an amount [ie a relevant amount] so far as it would (apart from this section) be brought into account as income in calculating profits (of any person)— (a) for corporation tax purposes, or (b) for income tax purposes.

BIM Manual gives an example in relation to the indirect disposal charge:

> **BIM60575 Disposals Of Property Deriving Its Value From Land** [May 2020]
> ... **Example**
> A new company is set up to acquire land and develop an office building thereon. The land is not held as trading stock. Once the development is completed, the intention is to sell the company shares as a means of disposing of the development (enveloping) rather than selling the land and buildings directly. If all of the conditions at s.356OD CTA 2010 or s.517 ITA2007 are met the rules will apply to tax the profit on disposal of the shares as income.

This is sensible, though far from obvious from the legislation.

22.12.3 *Date income arises*

s.517C(4)/517E(4) ITA	**s.356OC(4)/356OE(4) CTA 2010**
The profits are treated as arising in the tax year in which the profit or gain is realised.	The profits are treated as arising in the accounting period of the chargeable company in which the profit or gain is realised.

BIM provides:

> **BIM60625 Period In Which The Gain Is Taxed** [May 2019]
> The profit or gain is chargeable in the:
>
> - tax year in which the gain arises (where the person liable for the tax is an individual, a trustee or a personal representative), or
> - accounting period in which the gain arises (where the person liable for the tax is a company). Guidance on accounting periods can be found at CTM01410
>
> **Example 1**
> Company X has an accounting period ending on 31 December 2017. It disposes of a property on 12 May 2017. The profit will be taxable in the accounting period ending 31 December 2017.
>
> **Example 2**
> Non-resident Company X was not within the charge to UK taxation prior to the new legislation. At the date the new legislation came into force they were carrying on a trade of dealing in or developing UK land. As the company has first come into charge to corporation tax on the date of the introduction of the new legislation (5th July 2016) a new accounting period will begin on that date.
>
> **Example 3**
> Non-resident Company Y had a permanent establishment in the UK prior to the introduction of the new legislation. As the company has been chargeable to CT throughout this will not cause the cessation of a tax accounting period and the commencement of a new one.

22.12.4 *Capital gain*

Sections 517C(5)/517E(7) ITA and 356OC(5)/356OE(7) CTA 2010 are all identical:

> This section applies in relation to gains which are capital in nature as it applies in relation to other gains.

In contemporary tax usage, the word gain is usually reserved for gains of a capital nature. If the profit (gains) are of an income nature, the TiL code does not apply.

22.12.5 *Relevant amount*

Relevant amount matters as the indirect disposal charge is on the relevant amount.

s.517E ITA	**s.356OE CTA 2010**
(5) In this section the "relevant amount" means so much (if any) of the profit or gain mentioned in section 517D(1) as is attributable, on a just and reasonable apportionment, to the relevant UK assets.	(5) In this section the "relevant amount" means so much (if any) of the profit or gain mentioned in section 356OD(1) as is attributable, on a just and reasonable apportionment, to the relevant UK assets.
(6) In this section "the relevant UK assets" means any land in the UK from which the property mentioned in section 517D(1) derives any of its value (at the time of the disposal mentioned in that subsection).	(6) In this section "the relevant UK assets" means any land in the UK from which the property mentioned in section 356OD(1) derives any of its value (at the time of the disposal mentioned in that subsection).

BIM provides:

> **BIM60590: Relevant amount and relevant assets** [May 2019]
> ...In all calculations, a just and reasonable basis should be used for apportionment.
>
> **Example 1**
>
> A company disposes of its shareholding in a company. The shares were purchased with the intention of dealing in the project land and making a profit from disposing of the shares which derives their value from the land. The shares are worth £10m, £6m of the value relates to a block of flats based in the UK and £4m to a housing development outside the UK. In this instance, and assuming that the acquisition costs of the shares is nil, the block of flats is the relevant UK asset and the relevant amount is £6m. If consideration paid for the shares was £5m, and 60% of that cost related to the UK development, the relevant amount would be £3m (£6m less 60% of £5m).
>
> **Example 2**
>
> An individual purchases shares in a company which is developing a large housing estate. The shares were valued at £10m and the value is derived entirely from UK Land. When the individual purchased the shares they intended to dispose of 40% of the shares to an individual

who wished to purchase the land after development and hold on to the remaining 60% for the capital appreciation. In this instance the relevant UK assets are the £4m of land. The remaining £6m are investment assets, and not subject to the new legislation.

22.13 Chargeable person/company

Chargeable person/company matters because the TiL trade is deemed to be carried on by the chargeable person/company, and so the chargeable person/company is subject to the tax.[30]

s.517G ITA	**s.356OG CTA 2010**
(1) For the purposes of sections 517C and 517E the general rule is that the "chargeable person" is the person ("P") that realises the profit or gain (as mentioned in section 517B(1) or 517D(1)).	(1) For the purposes of sections 356OC and 356OE the general rule is that the "chargeable company" is the company ("C") that realises the profit or gain (as mentioned in section 356OB(1) or 356OD(1)).

Section 517G ITA/ s.356OG CTA 2010 signposts some exceptions:

s.517G ITA	**s.356OG CTA 2010**
(2) The general rule in subsection (1) is subject to the special rules in subsections (4) to (6).	[identical]
(3) But those special rules do not apply in relation to a profit or gain to which section 517H(3) (fragmented activities) applies.	(3) But those special rules do not apply in relation to a profit or gain to which section 356OH(3) (fragmented activities) applies.

22.13.1 *Provider of value*

s.517G ITA	**s.3560G CTA 2010**
(4) If all or any part of the profit or gain accruing to P is derived from value provided directly or indirectly by another person ("B"), B is the "chargeable person".	(4) If all or any part of the profit or gain accruing to C is derived from value provided directly or indirectly by another person ("B") which is a company, B is the "chargeable company".

[30] See 22.12 (TiL trade).

(5) Subsection (4) applies whether or not the value is put at the disposal of P.	(5) Subsection (4) applies whether or not the value is put at the disposal of C.

22.13.2 *Provider of opportunity*

s.517G(6) ITA	**s.356OG(6) CTA 2010**
If all or any part of the profit or gain accruing to P is derived from an opportunity of realising a profit or gain provided directly or indirectly by another person ("D"), D is "the chargeable person" (unless the case falls within subsection (4)).	If all or any part of the profit or gain accruing to C is derived from an opportunity of realising a profit or gain provided directly or indirectly by another person ("D") which is a company, D is "the chargeable company" (unless the case falls within subsection (4)).

BIM provides:

> **BIM60830: Definitions: Realising a gain** [May 2019]
> **... Example**
> Person A ("A") and person B ("B") are related parties.
> If, by a premature sale, A directly or indirectly transmits the opportunity of realising a profit or gain to another B, then A realises B's profit or gain for B.

BIM provides:

> **BIM60820: Definitions: The chargeable company or person** [May 2019]
> ... Since the tax charge is raised on the third party (i.e. someone who is not a party to the transaction in land), clear and convincing evidence is needed to show that this person, as a matter of fact, is the provider of value or the opportunity for gain. The third party may transmit the value or opportunity directly or indirectly.
> When a person has purchased land or an interest in land at market value under a normal commercial arrangement in the absence of other factors the special rules will not apply to regard them as providing the value for a gain to be realised, or the opportunity to derive that value.
> **Example 1** [Transfer at undervalue]
> Mr B transfers developed land at £1m, which is £9m undervalue, to Company A a non UK resident company in which he is the sole shareholder.
> Company A immediately sells the land realising a £9m profit and immediately goes into liquidation.

The HMRC analysis is as follows:

> In this scenario Mr B would be the chargeable person in respect of that £9m gain.

But is it correct that company A has made a £9m gain?

> **Example 2** [Sale of SPV]
> Company B - a wholly owned subsidiary of company A - develops a property as an investment. Company A sells the shares in company B to company C as soon as the development is complete, and the transaction is caught by the enveloping rules. In this situation, company A would remain the chargeable person - not company B (merely because it had developed the property), nor, company C (as the acquirer of the shares).

BIM provides:

> **BIM60580: Disposals of property deriving its value from land** [May 2019]
> ... Where a company or individual are charged by virtue of S356OD CTA 2010 or Section 517D ITA 2007, they may not have started a trade prior to the point of disposal. If this is the case the obligation to notify will arise when the shares are disposed of.
> **Example 1**
> Company X owns 100% of Company Y. Company Y purchases a piece of UK land and carries out the development of a block of flats. Company Y has no other substantial assets so over 50% of the company's value relates to the land. The intention of Company X is for Company Y to develop the land and to immediately dispose of their shares in Company Y when the land is developed. The land is not held as trading stock by Company Y. When the development is completed Company X sells the shares in Company Y to a third party.
> In this example the disposal meets the conditions and is a disposal of property deriving its value from land. The profits should be treated as trading profits of Company X.
> **Example 2**
> Company X purchases 100% of the share capital of Company Y, whose only asset is a dated office block that is held on investment account. Company X purchased the shares in company Y to hold as an investment and yield income.
> After a period of rental there is a change of intention and a decision to redevelop and sell the office block. To carry out this disposal it is

agreed Company X will dispose of its shares in company Y when the redevelopment is complete.

In this example there has been a change of intention and Section 356OL CTA 2010 will apply. Only the profit relating to the period after the change of intention should be taxed as a trading profit. The portion relating to the period where there was an investment intention should not be included in the tax calculation.

Please see BIM60825 for details on apportionment.

22.14 Fragmentation

s.517H ITA	**s.356OH CTA 2010**
(1) Subsection (3) applies if – (a) a person ("P") disposes of any land in the UK,	(1) Subsection (3) applies if— (a) a company ("C") disposes of any land in the UK,
(b) any of conditions A to D in section 517B is met in relation to the land,[31] and	(b) any of conditions A to D in section 356OB is met in relation to the land, and
(c) a person ("R") who is associated[32] with P at a relevant time has made a relevant contribution to activities falling within subsection (2).	(c) a person ("R") who is associated with C at a relevant time has made a relevant contribution to activities falling within subsection (2).
(2) The following activities fall within this subsection— (a) the development of the land, (b) any other activities directed towards realising a profit or gain from the disposal of the land.	[identical]

22.14.1 *Anti-fragmentation rule*

If these conditions are satisfied, s.517H ITA/s.356OH CTA 2010 recomputes the profit/gain:

s.517H ITA	**s.356OH CTA 2010**
(3) For the purposes of this Part	(3) For the purposes of this Part,

[31] See 22.8 (TiL gateway conditions).

[32] See 22.9.3 ("Associated").

[Part 9A ITA, transactions in land], the profit or gain (if any) realised by P from the disposal is to be taken to be what that profit or gain would be if R were not a distinct person from P (and, accordingly, as if everything done by or in relation to R had been done by or in relation to P).	the profit or gain (if any) realised by C from the disposal is to be taken to be what that profit or gain would be if R were not a distinct person from C (and, accordingly, as if everything done by or in relation to R had been done by or in relation to C).
(4) Subsection (5) applies to any amount which is paid (directly or indirectly) by R to P for the purposes of meeting or reimbursing the cost of income tax which P is liable to pay as a result of the application of subsection (3) in relation to R and P.	(4) Subsection (5) applies to any amount which is paid (directly or indirectly) by R to C for the purposes of meeting or reimbursing the cost of corporation tax which C is liable to pay as a result of the application of subsection (3) in relation to R and C.
(5) The amount— (a) is not to be taken into account in calculating profits or losses of either R or P for the purposes of income tax or corporation tax, and (b) is not for any purpose of the Corporation Tax Acts to be regarded as a distribution.	(5) The amount— (a) is not to be taken into account in calculating profits or losses of either R or C for the purposes of income tax or corporation tax, and (b) is not for any purpose of the Corporation Tax Acts to be regarded as a distribution.

22.14.2 *"Relevant contribution"*

s.517H ITA	**s.356OH CTA 2010**
(7) For the purposes of this section any contribution made by P to activities falling within subsection (2) is a "relevant contribution" unless the profit made or to be made by P in respect of the contribution is insignificant having regard to the size of the project.	(7) For the purposes of this section any contribution made by R to activities falling within subsection (2) is a "relevant contribution" unless the profit made or to be made by R in respect of the contribution is insignificant having regard to the size of the project.
(8) In this section "contribution" means any kind of contribution,	[identical]

including, for example—
(a) the provision of professional or
other services, or
(b) a financial contribution
(including the assumption of a risk).

BIM provides:

> **BIM60610: Relevant Contribution** [May 2019]
> The anti-fragmentation rules address the risk that a developer carrying on a trade of dealing in or developing UK land could enter into arrangements to move profits to a connected party, where the connected party is not chargeable to UK tax on the profit that they realise. This could, for example, arise where a firm supplying professional services is allocated a share of the profit from the disposal of the land. It could also arise where interest is paid to a connected party based to any extent on sharing profits from the development.
> ... All contributions are considered to be relevant contributions unless they are insignificant when considered in relation to the size of the project.
> The significance of a contribution in relation to the size of a project will depend on the facts and circumstances of each instance.
> One situation where a contribution is likely to be considered insignificant is if it is a Low Value Added Service (LVAS). This is because the mark-up for a LVAS is typically low, so the cost is not likely to be material in respect of the project.

The Manual gives 3 straightforward examples.

> **Example 1**
> Company X carries on a trade of dealing in or developing UK land. It receives admin services from a group company and pays a mark-up of 2% on the costs. In this instance the contribution would be regarded as insignificant and the fragmentation rules would not apply.
> **Example 2**
> Company Y carries on a trade of dealing in or developing UK land. A group company (Company Z) designs all of the buildings. Company Y pays Company Z 10% of the profits for the provision of architectural services. In this instance the profit made by Y would not be regarded as insignificant with regards to the size of the project and the fragmentation rules will apply.

Example 3
Company A carries on a trade of dealing in or developing UK land. The group has an intra group service centre run by Company B which provides IT and HR services. The costs which relate to Company A are recharged by Company B. In this instance any profit in Company B is likely to be minimal so the contribution will be insignificant.

22.14.3 *Interest*

BIM provides:

BIM60611: Anti-fragmentation: Interest [May 2019]
A financial contribution is considered a relevant contribution where it includes the assumption of risk by the lender. The rules are targeted at loans which aim to transfer a portion of the project profit from the company making the disposal to an associated company.

There is a relevant contribution where there is an intra group loan which results in the lender being entitled to a proportion of the profit or gain from the project (e.g. via a profit participating loan), or an intra group loan which results in the lender taking on a portion of the risk from the project. In both of these instances the interest payments may result in profits being fragmented to the lender.

Whilst interest payments may be at arm's length, they may still be relevant contributions. For example, if there is a mezzanine loan with an interest rate which is high - due to the lender taking on project risk - the loan could be arm's length, but as the high interest rate is linked to the risk of the project, it would be a relevant contribution.

Anti-fragmentation does not relate to senior lending with terms and interest rates commensurate with those available in the open market or to mezzanine debt where there is no participation in the profits/gains and/or no risk premium element; it only applies where and to the extent that significant project risk is taken on by the lender.

It is likely that if the profit is insignificant then this will be because, for example, the other party has not taken on a significant level of risk in relation to the overall project, although - as with all aspects - this has to be considered in the round.

Where a loan is from an unconnected party the anti-fragmentation rules will not apply. The rules will also not apply where lending from an unconnected party has been on-lent in whole or in part on materially the same terms.

Any loan where there is no risk premium reflected in the interest and where the interest is not linked to the profit from the disposal will not be considered a relevant contribution. In these instances the interest payments will be allowable deductions unless they are disallowed by other legislation.

Where there is a loan between connected parties which has both a portion with a risk premium and a portion without a risk premium, only the portion with the risk element will be considered to be a relevant contribution.

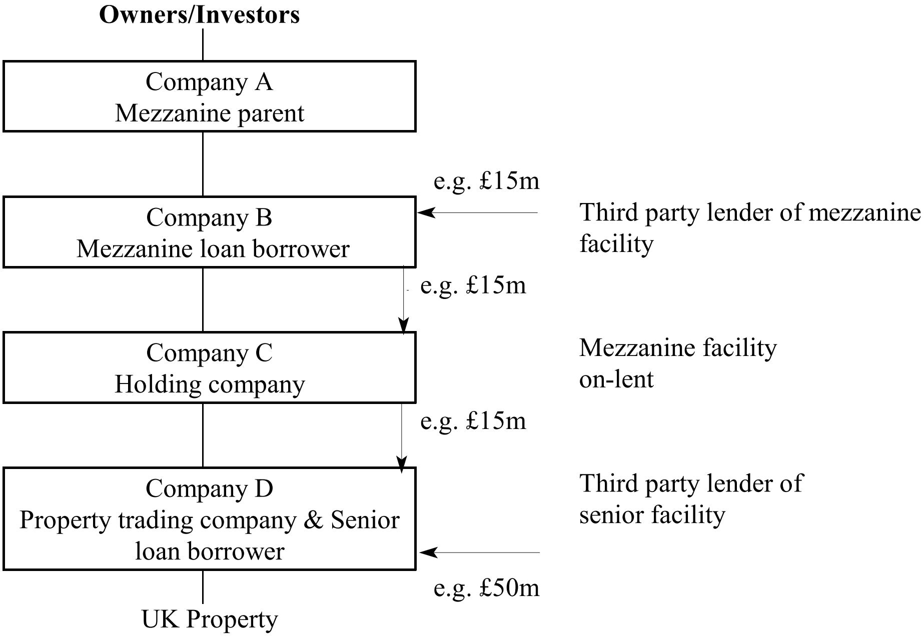
Example 1

Company C has raised as much bank finance as it can, at normal rates, to finance an apartment development. R makes a loan of £300m to Company C with a high interest rate to reflect taking on part of the risk of the project. In this instance the loan is a relevant contribution.

Example 2

R makes a loan of £100m to Company C, at normal senior rates, and this is 30% of the cost of the land. The loan is made for the initial acquisition of land and there are no unusual terms in the loan. In this instance the loan would not be considered to be a relevant contribution.

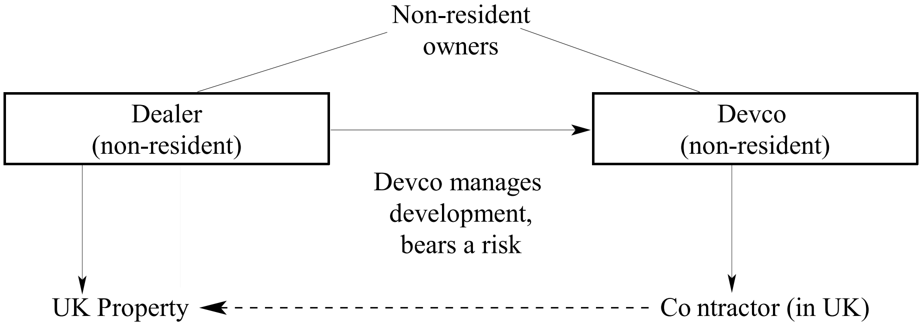
Example 3



Owners/Investors
Company A
Mezzanine parent
e.g. £15m
Company B
Mezzanine loan borrower
Third party lender of mezzanine facility
e.g. £15m
Company C
Holding company
Mezzanine facility on-lent
e.g. £15m
Company D
Property trading company & Senior loan borrower
Third party lender of senior facility
e.g. £50m
UK Property

In the example above the interest deductions would not be considered to be relevant contributions as they are all on-lending of external finance. Where there is external funding this can be traced through any number of companies.

BIM60615: Antifragmentation: Example [May 2019]



In the situation above, 'Dealer' is subject to the new charge, as 'Dealer' will realise a profit from the disposal of UK Land.

In this case 'Dealer' does not have the assets (e.g. cash) or employees to manage the risk comprised in the development. Instead, the risks associated with the development are funded by 'Devco'.

In this example 'Devco' performs many of the significant people functions (SPFs), and as such is paid the majority of the profits realised from the sale of the UK property. This is done in a manner that is designed to be compliant with UK transfer pricing methodologies.

The contribution 'Devco' is making to the development of the land is not insignificant and the anti-fragmentation rules will apply in this case.

- 'Dealer' has disposed of land in the UK,
- Condition A is met in relation to the land, and
- 'Devco' has made a relevant contribution to the development of the land by assuming the risk.

Any profit realised by 'Devco' will be taxed on 'Dealer' as if 'Dealer' and 'Devco' were one entity. Only profits of 'Devco' that are directly attributable to Dealer are taxed in that entity, while Devco's other [unrelated] profits remain taxable in 'Devco.'

If 'Devco' is a UK resident Section 356OC(3) CTA 2009[33] would provide relief, so far as the profits would be brought into account as income in calculating profits (of any other person).

22.15 Calculation of gain

s.517I ITA	**s.356OI CTA 2010**
For the purposes of this Part [Part 9A, transactions in land],	For the purposes of this Part [Part 8ZB, transactions in UK land],

[33] See 22.12.2 (Income gain outside TiL).

(a) the profit or gain (if any) from a disposal of any property is to be calculated according to the principles applicable for calculating the profits of a trade under Part 2 of ITTOIA 2005,	(a) the profit or gain (if any) from a disposal of any property is to be calculated according to the principles applicable for calculating the profits of a trade under Part 3 of CTA 2009,
(b) subject to any modifications that may be appropriate	[identical]
(c) (and for this purpose the same rules are to apply in calculating losses from a disposal as apply in calculating profits).	[identical]

Section 517J ITA/s.356OJ CTA 2010 deal with apportionment in a commonsense way:

> Any apportionment (whether of expenditure, consideration or any other amount) that is required to be made for the purposes of this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] is to be made on a just and reasonable basis.

BIM provides:

> **BIM60620: Calculation of profit or gain** [May 2019]
> After it has been determined that the profits should be treated as trading profits, Section 356OI CTA 2010 and Section 517I ITA 2007 determine how the profit or loss from the disposal should be calculated. The profits should be calculated in accordance with the normal principles for calculating profits of a trade. These principles can be found at Part 2 ITTOIA 2005 for income tax and Part 3 CTA 2009 for corporation tax.
> Where a deduction would be allowable or receipt taxable, if a UK resident business was carrying out the trade, then the same should apply to a non-resident which has a trade of dealing in or developing UK land.
> Where a non-resident company comes within the scope of corporation tax, stock should be recognised at 'carrying value'.. Where an asset is not held as a trading asset the asset should also be brought in at cost. The deeming provisions in Section 41 CTA 2009 are not sufficient to invoke the provisions of Section 158/160 CTA 2009, in order to determine the opening value of stock.
> The trading profits of the development activity should be calculated

> based on UK GAAP or any other acceptable GAAP.
> Where the non-resident business disposes of UK land as only part of a trade, or if it carries on more than one trade, the profit or loss should be apportioned between the UK land trade and the other trade on a just and reasonable basis.

22.15.1 *Losses*

BIM provides:

> **BIM60620: Calculation of profit or gain** [May 2019]
> Carried forward trade losses will be available for use in the normal way. If a company was carrying on a trade of developing UK land - prior to enactment of the new legislation on 5 July 2016 - and was within the charge to CT by virtue of having a permanent establishment in the UK, Section 45 CTA 2010 applies, as the company will be carrying on the same trade [albeit not within the charge to CT under Section 5B CTA 2009]. Therefore, trading losses that accrued before 5 July 2016 will continue to be available to offset against future income of the same trade under Section 45 CTA 2010.

22.15.2 *Group relief*

BIM provides:

> **BIM60620: Calculation of profit or gain** [May 2019]
> Group relief will be permissible in the normal way. Whilst Section 134 CTA 2010 has a "UK related" condition, Section 1141(1) CTA 2010 provides that a company has a permanent establishment in a territory if it has a fixed place of business there through which the business of the company is wholly, or partly carried on. Section 1141(2)(h) provides that a fixed place of business includes a building site or construction or installation project.[34] HMRC's position is that most UK property development sites will fall under Section 1141(2)(h) CTA 2010 and meet the "UK related" condition at Section 134 CTA 2010.

22.15.3 *Foreign taxation*

BIM provides:

> **BIM60600: Fragmented activities overview** [May 2019]
> ...Where an amount is taxed by another jurisdiction unilateral relief may be available and/or an application for Mutual Agreement

[34] See 106.11.1 (Building/construction site).

Procedure (MAP) may be made.

22.15.4 *Interaction of TiL/CGT*

The general rule is that where the person making a disposal is subject to income tax on the proceeds, IT has priority over CGT, and there is no double charge.[35] This rule does not work where X makes a disposal but the income is treated as the income of Y; s.37(5)/(5A) TCGA deal with this problem:

s.37(5) TCGA	**s.37(5A) TCGA**
If—	If—
(a) because section 517G(4) or (6) of ITA 2007 (transactions in land: the chargeable person) applies, an amount is charged to income tax as income of a person other than the person ("A") by whom the gain was realised, and	(a) because section 356OG(4) or (6) of CTA 2010 (transactions in land: the chargeable company) applies, an amount is charged to corporation tax as profits of a person other than the person ("C") by whom the gain was realised, and
(b) the income tax has been paid,	(b) the corporation tax has been paid,
for the purposes of this section the amount charged to that tax is regarded as having been charged as the income of A.	for the purposes of this section the amount charged to that tax is regarded as having been charged as the income of C.

22.16 TiL TAAR

s.517K ITA	**s.356OK CTA 2010**
(1) Subsection (3) applies if an arrangement has been entered into the main purpose or one of the main purposes of which is to enable a person to obtain a relevant tax advantage.	(1) Subsection (3) applies if an arrangement has been entered into the main purpose or one of the main purposes of which is to enable a company to obtain a relevant tax advantage.
(3) The tax advantage is to be counteracted by means of adjustments.	[identical]

I refer to this as the **"TiL Taar"**.

[35] See s.37 TCGA, discussed at 56.4.12 (Interaction of IT/CGT).

s.517K(4) ITA	**s.356OK(4) CTA 2010**
For this purpose adjustments may be made (whether by an officer of Revenue and Customs or by the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.	For this purpose adjustments may be made (whether by an officer of Revenue and Customs or by the company) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

Section 517K(5) ITA/s.356OK(5) CTA 2010 defines "relevant" tax advantage:

> In this section "relevant tax advantage" means an advantage in relation to income tax charged (or which would, if the tax advantage were not obtained, be charged) in respect of amounts treated as profits of a trade by virtue of this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land].

Section 517K(6) ITA/s.356OK(6) CTA 2010 provide the standard IT/CT/CGT definition of "tax advantage".[36]

BIM provides:

> **BIM60700: Avoidance provisions** [May 2019]
> ...**Example**
> An individual is contemplating disposal of shares which derive 60% of their value from land. Just prior to the disposal the individual injects additional capital into the company to ensure the 50% test at Section 517OD (1)(a) ITA 2007 is not met. The individual argues the profits should not be treated as trading profits as the 50% condition is not met. In this instance the individual has entered into an arrangement with a main purpose of obtaining a relevant tax advantage. The tax which would have been chargeable as a result of Part 9A ITA 2007 has been reduced so an adjustment should be made to counter the tax advantage.

The HMRC analysis is as follows:

> In this instance the individual has entered into an arrangement with a main purpose of obtaining a relevant tax advantage. The tax which would have been chargeable as a result of Part 9A ITA 2007 has been reduced so an adjustment should be made to counter the tax advantage.

[36] See 3.19.1 (Tax advantage: Definitions).

22.16.1 *TiL treaty override*

Section 517K ITA/s.356OK CTA 2010 provide a treaty override, in the same terms as the land-dealing TAAR[37]:

> (2) In subsection (1) the reference to obtaining a relevant tax advantage includes obtaining a relevant tax advantage by virtue of any provisions of double taxation arrangements, but only in a case where the relevant tax advantage is contrary to the object and purpose of the provisions of the double taxation arrangements (and subsection (3) has effect accordingly, regardless of anything in section 6(1) of TIOPA 2010).
> (3) The tax advantage is to be counteracted by means of adjustments.

The wording is again based on the OECD principal purpose test.[38]

22.17 Pre-development gain

The rules for direct/indirect disposals are in s.517L ITA/356OL CTA 2010 and it is helpful to read them side by side:

Direct disposal	**Indirect disposal**
s.517L(1)-(2) ITA	**s.517L(3)-(4) ITA**
(1) Subsection (2) applies if—	(3) Subsection (4) applies if—
(a) subsection (1) of section 517C applies because Condition D in section 517B is met (land developed with purpose of realising a gain from its disposal when developed), and	(a) section 517E(1) applies, and
(b) part of the profit or gain mentioned in that subsection is fairly attributable to a period before the intention to develop was formed.	(b) part of the profit or gain mentioned in section 517E(5) is fairly attributable to a period before the person mentioned in section 517D(1) was a party to, or concerned in, the arrangement in question.
(2) Section 517C(1) has effect as if the person mentioned in section 517B(1) had not realised that part of the profit or gain.	(4) Section 517E has effect as if the person had not realised that part of the profit or gain.

[37] See 22.4.2 (Treaty override).

[38] See 108.8 (OECD principal purpose test).

s.356OL(1)-(2) CTA 2010	**s.356OL(3)-(4) CTA 2010**
(1) Subsection (2) applies if—	(3) Subsection (4) applies if—
(a) subsection (1) of section 356OC applies because Condition D in section 356OB is met (land developed with purpose of realising a gain from its disposal when developed), and	(a) section 356OE(1) applies, and
(b) part of the profit or gain mentioned in that subsection is fairly attributable to a period before the intention to develop was formed.	(b) part of the profit or gain mentioned in section 356OE(5) is fairly attributable to a period before the person mentioned in section 356OD(1) was a party to, or concerned in, the arrangement in question.
(2) Section 356OC(1) has effect as if the person mentioned in section 356OB(1) had not realised that part of the profit or gain.	(4) Section 356OE has effect as if the person had not realised that part of the profit or gain.

s.517L(5) ITA	**s.356OL(5) CTA 2010**
In applying this section account must be taken of the treatment under Part 2 of ITTOIA 2005 (trading income) of a person who appropriates land as trading stock.	(5) In applying this section account must be taken of the treatment under Part 3 of CTA 2009 (trading income) of a company which appropriates land as trading stock.

22.18 Private residence: Til relief

Section 517M ITA provides:

> No liability to income tax arises under this Part [Part 9A, transactions in land] in respect of a gain accruing to an individual if—
>
> (a) the gain is exempt from capital gains tax as a result of sections 222 to 226 of TCGA 1992 (private residences), or

See 60.1 (Private residence relief).

22.19 Indirect arrangements

s.517O ITA	**s.356ON CTA 2010**
(1) In determining whether section 517C(1) or 517E(1) applies, account is to be taken of any method, however indirect, by which—	(1) In determining whether section 356OC(1) or 356OE(1) applies, account is to be taken of any method, however indirect, by which—
(a) any property or right is transferred or transmitted, or	[identical]
(b) the value of any property or right is enhanced or diminished.	[identical]
(2) Accordingly— (a) the occasion of the transfer or transmission of any property or right, however indirect, and	[identical]
(b) the occasion when the value of any property or right is enhanced, may be an occasion on which section 517C(1) or 517E(1) applies	(b) the occasion when the value of any property or right is enhanced, may be an occasion on which section 356OC(1) or 356OE(1) applies.
(3) Subsections (1) and (2) apply in particular— (a) to sales, contracts and other transactions made otherwise than for full consideration or for more than full consideration, (b) to any method by which any property or right, or the control of any property or right, is transferred or transmitted by assigning— (i) share capital or other rights in a company, (ii) rights in a partnership, or (iii)an interest in settled property, (c) to the creation of an option affecting the disposition of any property or right and the giving of	[identical]

consideration for granting it,
(d) to the creation of a requirement for consent affecting such a disposition and the giving of consideration for granting it,
(e) to the creation of an embargo affecting such a disposition and the giving of consideration for releasing it, and
(f) to the disposal of any property or right on the winding up, dissolution or termination of a company, partnership or trust.

22.20 "Another person"

Section 517P ITA/s.356OO CTA 2010 provide:

> (1) In this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] references to "other" persons are to be interpreted in accordance with subsections (2) to (4).
> (2) A partnership or partners in a partnership may be regarded as a person or persons distinct from the individuals or other persons who are for the time being partners.
> (3) The trustees of settled property may be regarded as persons distinct from the individuals or other persons who are for the time being the trustees.
> (4) Personal representatives may be regarded as persons distinct from the individuals or other persons who are for the time being personal representatives.

22.21 "Arrangement"

Section 517Q(1) ITA/s.356OP CTA 2010 provide the standard (unnecessary IT definition of "arrangement".[39] But the author tried harder.) Section 517Q(2) ITA/s.356OP CTA 2010 provide:

> For the purposes of this Part [Part 9A ITA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] any number of transactions may be regarded as constituting a single arrangement if—
> (a) a common purpose can be discerned in them, or
> (b) there is other sufficient evidence of a common purpose.

[39] See App 2.2.3 (Definitions of "arrangement").

I doubt if that adds anything to the meaning.

22.22 "Disposal"

Section 517R(1) ITA/s.356OQ(1) CTA 2010 provide:

> In this Part [Part 9A CTA, transactions in land/Part 8ZB CTA 2010, transactions in UK land] references to a "disposal" of any property include any case in which the property is effectively disposed of (whether wholly or in part, as mentioned in subsection (2))—
> (a) by one or more transactions, or
> (b) by any arrangement.

Section 517R(2) ITA/s.356OQ(2) CTA 2010 provide:

> For the purposes of this Part [Part 9A, transactions in land]—
> (a) references to a disposal of land or any other property include a part disposal of the property, and
> (b) there is a part disposal of property ("the asset") where on a person making a disposal, any form of property derived from the asset remains undisposed of (including in cases where an interest or right in or over the asset is created by the disposal, as well as where it subsists before the disposal).

The drafting is based on s.21 TCGA.
BIM provides:

> **BIM60835: Definitions: Disposal** [May 2019]
> ... In a straightforward sale this will be the date of completion. If the date of completion is delayed but the property has effectively been disposed of an earlier date may be applied...
> **Example**
> A developer sets up a company to complete a housing development. The developer intends to dispose of 40% of the properties to a third party and retain 60% of the properties as a longer term investment. When the properties are finished they sell 40% of their shares to the third party. In this instance the 40% is a disposal of property deriving its value from land.

22.23 Definitions

22.23.1 *"Realising a gain"*

s.517T ITA	**s.356OS CTA 2010**
(1) For the purposes of sections 517B(1) and 517D(1) it does not	(1) For the purposes of sections 356OB(1) and 356OD(1) it does not

matter whether the person ("P") realising the profit or gain in question realises it for P or another person.	matter whether the person ("P") realising the profit or gain in question realises it for P or another person.
(2) For the purposes of subsection (1), if, for example by a premature sale, a person ("A") directly or indirectly transmits the opportunity of realising a profit or gain to another person ("B"), A realises B's profit or gain for B.	[identical]

22.23.2 *"Development"*

After some vacillation, BIM now provides:

> **BIM60806: Definitions: Development** [May 2019]
> Whether the land has been developed is a question of fact.
> 'Development' for the purpose of Condition D is not defined but is interpreted to mean any change from the lands position at purchase. In the absence of other factors obtaining planning permission will not constitute land being developed for the purpose of condition D.
> *Example 1*
> A person acquires land with the intention to hold it for investment purposes. After several years planning permission is obtained to build houses on the land. The landowner's intention changes to build and sell housing units on the land. An access road and other infrastructure is built before the landowner gets in financial difficulty and sells the land. Condition D applies, the land has been developed and one of the main purposes of developing the land was to profit from disposing it.
> *Example 2*
> A company carried out research and decided to purchase a plot of land as they have identified the land will be worth significantly more with planning permission. After acquisition they obtain this planning permission and sell the land. The land has not been developed for the purposes of condition D but it is likely that the company has a either a trade in dealing UK land or that Condition A would apply due to the one of the main purposes of acquiring the land was to profit from its disposal.

This is the correct view. Section 55(1) Town and Country Planning Act 1990 provides:

> Subject to the following provisions of this section, in this Act, except where the context otherwise requires, "development," means
> [1] the carrying out of building, engineering, mining or other operations in, on, over or under land, or
> [2] the making of any material change in the use of any buildings or other land.

The significance of the definition for planning is in s.57(1):

> Subject to the following provisions of this section, planning permission is required for the carrying out of any development of land.

It is considered that part [1] of the definition is a succinct statement of the meaning of "development" for TiL purposes. In short, development means building work. Mere change of use (eg using a former shop as a café) is something which needs to be controlled by planning legislation, but is not "development" in the TiL sense.

22.24 Notification and assessment

BIM provides:

> **BIM60900: Notification and assessment** [May 2019]
> Where the legislation applies to a non-UK resident company the company will be treated as having a trade of dealing in or developing UK land. Both resident and non-resident companies and individuals will need to notify chargeability and register to pay tax.
> There are no separate filing or payment rules for this legislation. The normal self-assessment regime for income tax and corporation tax will apply.

23.15.1 "Entertainer"/"Sportsperson"
23.15.2 Income from performance
23.15.3 Performer income computation
23.15.4 Receipts by third parties
23.15.5 Foreign tax credit relief
23.15.6 Cultural exemption

23.1 Entertainers and sportspeople

This chapter considers the taxation of non-resident entertainers and sportspeople ("performers").

The legislation is scattered: trading income rules are in ITTOIA, withholding tax is in ITA, and the bulk of the rules are in Income Tax (Entertainers and Sportsmen) Regulations 1987 ("ITESR"). I refer to this together as the **"entertainers/sportspeople code"**.

The policy of the Tax Law Rewrite was not to rewrite or update statutory instruments. So ITESR is out of date twice over: it was not updated for the 1988 consolidation in ICTA or for the rewrite in ITTOIA, and retains the references to the original legislation in sch 11 FA 1986.[1] The consequence is that the rewrite left this area of law more difficult to follow

[1] FA 1986 can be found at *http://www.legislation.gov.uk/ukpga/1986/41/pdfs/ukpga_19860041_en.pdf*

than before. When quoting ITESR, I add the current statutory references in brackets.

HMRC have issued guidance which I call "**Performers guidance**".[2]

Section 352 ITEPA provides a deduction from employment income for agency fees paid by "entertainers" but this is not discussed here.

23.1.1 *Purpose of the code*

In *Agassi v Robinson*:

> There were a number of perceived problems in applying to foreign [non-resident] entertainers and sportsmen the charging provisions [relating to trades]. Section 108 [ICTA] imposed a Schedule D charge to tax on the profits or gains of any person, whether or not resident in the UK, from any trade, profession or vocation carried on in the UK.
>
> The first problem related to the concept of carrying on a trade, profession or vocation. Was a person who made only single or infrequent visits to this country, eg, playing in, say, two tennis tournaments, carrying on a trade, profession or vocation in this country?
>
> Second, would income arising from commercial endorsements, eg wearing Nike tennis shoes and playing with a Head tennis racquet, be regarded as part of the profits or gains of carrying on the trade, profession or vocation?
>
> Third, the section 108 charge only applied to the person carrying on the trade, profession or vocation. Would payments made to a foreign company, albeit controlled by the person exercising the trade, profession or vocation, be caught by the charge?
>
> And, fourth, collection of the tax from a foreign entertainer or sportsman, whose visits to this country might be sporadic and who would often have no assets in this country, was not always practicable.
>
> ...
>
> These were the problems that were addressed in the [entertainers/ sportspeople code] ...
>
> The problem of collecting the tax charged ... was addressed by ... paragraph 2(1) (section 555(2) of the 1988 Act) which required a person making a payment which had "a connection of a prescribed kind with the relevant activity" to deduct a sum representing income tax and account to the Inland Revenue for the sum...

[2] HMRC, "A Guide to paying Foreign Entertainers" *https://www.gov.uk/pay-tax-on-payments-to-foreign-performers*

> The problem about the scale of activities that could constitute the conduct of a trade, profession or vocation was addressed by paragraph 6(1) and (4) of the Schedule (section 556(1) of the 1988 Act) and the problem about payments to companies owned and controlled by the entertainer or sportsman was dealt with by paragraph 7 of the Schedule (section 556(2) of the 1988 Act). Paragraph 6 and paragraph 7 each had a sub-paragraph (6(2) and 7(4)) which said that the paragraph was not to apply unless the payment was one to which paragraph 2 applied. These provisions became, on consolidation, the first part of section 556(5).[3]

23.2 Definitions

It is helpful first to deal with some definitions. Because the legislation is scattered, most definitions have to be repeated or cross referenced; but we muddle through.

23.2.1 *"Entertainer" and "performer"*

Reg 2(1) ITESR defines "entertainer":

> In these Regulations unless the context otherwise requires ...
> "entertainer" means any description of individuals (and whether performing alone or with others) who give performances in their character as entertainers or sportsmen in any kind of entertainment or sport;
> and "entertainment or sport" in this definition includes any activity of a physical kind, performed by such an individual, which is or may be made available to the public or any section of the public and whether for payment or not.

ITTOIA and ITA use the expression:

> an entertainer, sportsman or sportswoman[4] of a prescribed description ("a performer")

This incorporates the above definition.

Performers guidance provides:

> **Which entertainers and sportsmen are involved?**
> The following list is not exhaustive. athletes, golfers, cricketers,

[3] [2006] UKHL 23 at [8] - [12].

[4] Note the change from the "sportsmen" of the 1987 regulations: gender neutral drafting was one of the policies of the Tax Law Rewrite.

> footballers, tennis players, boxers, snooker players, darts players, motor racing drivers, jockeys, ice skaters, contestants in chess tournaments, singers, musicians, conductors, models, dancers, actors, TV and radio personalities, variety entertainers. The person may appear alone or with others in a team, choir, band, group, orchestra, opera company, ballet company, troupe or circus.

23.2.2 *Relevant (taxable) activity*

Section 13(8) ITTOIA provides the definition of "relevant activity":

> In this section and section 14—
> "relevant activity" means an activity of a prescribed description[5]

We turn to reg 6(1) ITESR to find the "prescribed description" of a relevant activity:

> Subject to this regulation, any activity performed in the UK by an entertainer (whether alone or involving others) of any of the descriptions in paragraph (2) is an activity of a prescribed description ("relevant activity") for the purposes of paragraph 1 of [Schedule 11 FA 1986], that Schedule and these Regulations.

That is, the definition in reg. 6 applies for all relevant purposes. So we read on to reg 6(2) ITESR:

> A relevant activity to which paragraph (1) refers is an activity
> [a] performed in the UK by an entertainer
> [b] in his character as entertainer
> on or in connection with a commercial occasion or event ...

The regulation goes on to expand this:

> and includes—
> (a) any appearance of the entertainer by way of or in connection with the promotion of any such occasion or event;
> (b) any participation by the entertainer in or for sound recording, films,[6] videos, radio, television or other similar transmissions (whether live or recorded).

[5] Section 966(7)(a) ITA repeats the definition for ITA.

[6] Defined reg. 6(4) ITESR: "film" includes any record (with or without sound), however made, of a sequence or series of one or more visual images, which is a record capable of being used as a means of showing part or all of that sequence or series as a moving or still picture..."

Regulation 6(3) ITESR provides a commonsense definition of "commercial occasion or event":

> A commercial occasion or event to which paragraph (2) refers includes any description of occasion or event—
> (a) for which an entertainer (or other person) might receive or become entitled, for or by virtue of the entertainer's performance of the activity, to receive anything by way of cash or any other form of property; or
> (b) which is designed to promote commercial sales or activity by advertising, the endorsement of goods or services, sponsorship, or other promotional means of any kind.

"Relevant activity" is an opaque term; I gloss it as **"relevant [taxable] activity"**.

23.2.3 *"Payment" and "transfer"*

Section 13 ITTOIA provides:

> (9) In this section and section 14—
> (a) references to a payment include references to a payment by way of loan of money, and
> (b) references to a transfer do not include references to a transfer of money but, subject to that, include references to—
> (i) a temporary transfer (as by way of loan), and
> (ii) a transfer of a right (whether or not a right to receive money).
> (10) This section does not apply to payments or transfers of a kind prescribed in regulations under section 966(6) of ITA 2007.

ITA added s.13(9) ITTOIA but that merely preserved the subsection; it had been in s.555(5) ICTA 1988, which ITA repealed.

23.3 Charge independent of withholding tax

Section 13(8) ITTOIA formerly provided:

> *payment" means a payment from which income tax is to be deducted under section 555(2) of ICTA*
> *"transfer" means a transfer in respect of which income tax is to be accounted for under section 555(3) of ICTA*

In short, unless there was a duty to impose withholding tax, there was no liability on the individual entertainer/sportsperson. The two were linked.

ITA deleted those definitions so there can be a personal liability on the individual even if there is no duty to impose withholding tax (though the two will almost always go together). EN ITA provides:

> **Change 156: Deduction of tax: visiting performers: Schedule 1 (section 556 of ICTA and section 13 of ITTOIA)**
> This change ... gives statutory effect to the majority decision of the House of Lords in *Agassi v Robinson.*[7] ...
> The amendments to section 13 of ITTOIA make it explicit that when a payment or transfer of the type referred to in section 555 of ICTA is made, it is not necessary for there to be a duty to deduct under section 966 of this Act in order for the performer to be liable to income tax on the payment or transfer under Chapter 2 of Part 2 of ITTOIA (income taxed as trade profits). As part of this amendment, section 555(5) of ICTA has been incorporated into section 13[9] of ITTOIA to make clear that there is no link between the primary liability to income tax under Chapter 2 of Part 2 of ITTOIA (income taxed as trade profits) and the duty to deduct tax under section 966 of this Act.

23.4 Deemed UK trade

Section 13(1) ITTOIA provides:

> This section applies if an entertainer, sportsman or sportswoman of a prescribed description (a "performer")—
> (a) is non-UK resident in a tax year, and
> (b) performs a relevant [taxable] activity in the UK in the tax year.

If the conditions of s.13(1) are met, there are three deemings:

(1) A deemed trade, which is:
    (a) deemed to be a UK trade
    (b) deemed to be a separate trade
(2) Payment to prescribed third parties deemed made to performer.

Firstly the deemed UK trade. Section 13(2) ITTOIA provides:

> If a payment or transfer connected[8] with the relevant [taxable] activity is made, the performer is treated for income tax purposes as performing the relevant [taxable] activity in the course of a trade, profession or vocation carried on in the UK.

[7] The EN's explanation of the decision in *Agassi* is not set out here, and is not completely accurate, but the point is of no current interest. For *Agassi*, see App 16.12 (Territorial principle: Application).

[8] See 23.5 (Connected payment/transfer).

I refer to this as the **“notional UK trade”**. ITESR refers to it as “Schedule 11 trade”. I use the word “trade” to include a profession or vocation.

EN ITTOIA explains the reason for this:

> 92. A visiting performer may not be in the UK long enough to become resident for tax purposes. And any relevant activities may not be part of a trade, profession or vocation carried on in the UK. So, without this section, there would be no liability to tax on the activities in the UK.

The income of the notional UK trade is taxed as UK source trading income. The remittance basis does not apply because the income is UK source and the taxpayer is non-resident.

The notional UK trade is deemed to be a separate trade. Section 13(7) ITTOIA provides:

> If—
> (a) income tax is chargeable on profits arising from payments or transfers (made to any person), and
> (b) the payments or transfers are connected with the relevant [taxable] activity,
>
> the tax is charged as if the payments or transfers were received in the course of a separate trade, profession or vocation (distinct from any other trade, profession or vocation carried on by the performer).

I am not quite sure why this is needed; perhaps to emphasise that expenses of non-UK activity cannot be deducted in computing the profits of the notional UK trade.

23.5 Connected payment/transfer

The expression “connected with” the relevant [taxable] activity matters because payments/transfers connected with the relevant [taxable] activity are taxed as part of the notional UK trade, and subject to withholding tax.

Section 13(8) ITTOIA provides:

> In this section and section 14 a payment or transfer is connected with a relevant [taxable] activity if it has a connection of the prescribed kind with that activity.[9]

Regulation 2 IETSR defines the convenient terms connected payment/transfer:

[9] Section 966(7)(b) ITA repeats the definition for ITA.

> 2.—(1) In these Regulations unless the context otherwise requires ...
> a payment or transfer to which reg 3 ITESR applies is described as "connected".

We turn to reg 3(1) ITESR to find the "prescribed kind" of connection:

> This regulation applies for the purposes of and subject to the provisions of [para 2 sch 11 FA 1986], the other provisions of that Schedule and these Regulations.

That is, the definition applies for all relevant purposes. So we read on to reg 3(2) ITESR:

> Subject to paragraph (3) a payment or a transfer made or, in respect of or which in any way derives either directly or indirectly from, the performance of a relevant [taxable] activity, has a connection of a prescribed kind with the relevant [taxable] activity.

Reg 3(3) ITESR provides three exceptions where a payment/transfer is not connected with the relevant [taxable] activity. The significance is to disapply all the rules.

The first exception is where a withholding tax regime already applies:

> (3) The following are descriptions of payments to which paragraph (2) shall not apply—
>
> (a) a payment out of which a sum representing tax is or falls to be deducted under the Taxes Act [1970] apart from [Schedule 11 FA 1986] or these Regulations;

Other withholding taxes have priority over the entertainers/sportspeople code. This would apply to royalties.

The second exception concerns payments to UK residents (which should constitute a taxable receipt of the UK resident):

> (3) The following are descriptions of payments to which paragraph (2) shall not apply...
>
> (b) (i) a payment (to which paragraph (ii) applies) made to a person who is resident in the UK, not being a person who is connected[10] with or an associate[11] of the entertainer concerned;

[10] Regulation 2(2) incorporates the standard definition: "S.533 of the Taxes Act [1970] (meaning of connected persons) applies for the purposes of these Regulations."

[11] Regulation 13 ITESR incorporates the standard definition: "associate" has the meaning given to it by section 303(3) of the Taxes Act [1970]; see 104.6 (Associates).

> (ii) a payment to which paragraph (i) refers is a payment—
>
> (a) which falls to be made for the provision of services ancillary to the performance of a relevant [taxable] activity, and
>
> (b) which is of an amount or value which does not exceed what would be reasonable for that provision between persons dealing with each other at arms' length[12];

The third exception concerns royalties for sound recordings:

> (3) The following are descriptions of payments to which paragraph (2) shall not apply...
>
> (c) any payment made to an entertainer in respect of the proceeds of sale of records[13] deriving from a sound recording made by the entertainer, being payments calculated by reference to those proceeds or payments on accounts of those proceeds.

The reason for this is, perhaps, that (1) records (unlike concerts and sports events) could be made anywhere; or (2) royalties are covered by an entirely different tax regime.

23.6 Activity otherwise taxable

Section 13(4) ITTOIA provides two exceptions where there is no notional UK trade:

> (4) Subsection (2) [deemed notional UK trade] does not apply—
>
> (a) so far as the performer would otherwise be performing the relevant [taxable] activity in the course of a trade, profession or vocation carried on in the UK, or

In this case the charge is on the actual trade, not a notional UK trade. The second exception is:

> (4) Subsection (2) [notional UK trade] does not apply...
>
> (b) if the relevant [taxable] activity is performed in the course of an employment or office.

In this case the charge is on the employment income, not a notional UK trade.

[12] This expression is always written *arm's length*; one arm is all that is required. The reading *arms' length* must be a slip, and the expression has its normal meaning; see App 4.10 (Arm's length).

[13] Defined reg. 6(4) ITESR: "record" in this definition includes video.

These two exceptions disapply the deemed notional UK trade under s.13(2), but not the third party rules under s.13(5) to which I now turn.

23.7 Payment to third parties

Section 13(3) ITTOIA provides:

> It does not matter whether the payment or transfer is made to the performer or anyone else.

Section 13(5) ITTOIA provides:

> If a payment or transfer connected with the relevant [taxable] activity is made to—
> (a) a person other than the performer, and
> (b) that person is of a prescribed description,
> the payment or transfer is treated for income tax purposes as made instead to the performer in the course of a trade, profession or vocation carried on in the UK.

An argument that a territorial principle prevented the application of the charge where the payment was made between non-resident companies was rightly rejected in *Agassi v Robinson*.[14] This is now confirmed by statutory amendment.

I refer to the person of a prescribed description as "**a prescribed third party**".

23.7.1 *Prescribed third parties*

Regulation 7(1) ITESR provides:

> Any description of person in paragraph (2) is a person (not being the entertainer) to whom [para 7(1) sch 11 FA 1986 = s.13(5) ITTOIA] refers.

So we read on to reg 7(2) ITESR. There are four categories of prescribed third party.

The first category is controlled persons:

> (2) The descriptions of persons to whom paragraph (1) refers are-
> (a) any person who is under the control[15] of the entertainer;

[14] 77 TC 678; See 16.12 (Territorial principle: Application).

[15] Reg 2 ITESR incorporates the ultra-wide definition: "control" shall be construed in accordance with s.302(2) to (6) of the Taxes Act [1970]; see 104.3 (Control: Ultra-

The second category is certain non-residents:

> (2) The descriptions of persons to whom paragraph (1) refers are ...
>
> (b) any person who is—
>
> (i) not resident in the UK, and
>
> (ii) not liable to tax by reason of residence, domicile, place of management or otherwise, in a territory outside the UK where the rate of tax charged on the profits or income of such a person is a rate exceeding 25%;[16]

The third category is certain settlements:

> (2) The descriptions of persons to whom paragraph (1) refers are ...
>
> (c) (i) subject to paragraph (ii), any person in receipt (whether directly or indirectly) of
>
> [A] a connected payment or
>
> [B] value transferred[17] by a connected transfer
>
> which is, is treated as, or falls to be included in the computation of, income arising under a settlement in relation to which the entertainer is a settlor;[18]

The fourth category concerns arrangements under which the performer may benefit:

> (2) The descriptions of persons to whom paragraph (1) refers are ...
>
> (d) (i) any person
>
> [A] to whom paragraph (2) of this regulation does not otherwise apply[19]
>
> [B] who receives any connected payment or connected transfer (whether directly or indirectly) at or in respect of a time when there is in force between that person and the entertainer concerned a contract or arrangement

wide sense).

[16] The figure of 25% ought to be reduced in line with the reduction of CT rates since 1987 (when the CT rate was 35%).

[17] Defined reg 2 ITESR: "value transferred" in relation to a transfer means the gross amount to which regulation 17(1) refers.

[18] Para (c)(ii) incorporates the settlement-arrangement definitions of these terms:
"for the purposes of paragraph (i):—
"income arising under a settlement" and "settlor" have the meanings given to them by section 454 of the Taxes Act [1970], and
"settlement" has the meaning given to it by section 444(2) of the Taxes Act [1970]".

[19] Para [A] seems otiose, but it does not matter.

to which paragraph (ii) applies;

(ii) a contract or arrangement to which paragraph (i) refers is a contract or arrangement by or under which it is reasonable to suppose that the entertainer (or other person who is connected with or is an associate of the entertainer) is, will or may become, entitled to receive amounts, whether by way of cash or other value, not substantially less than the appropriate amount of profits or gains arising from the connected payment or connected transfer to which [para 8(1) sch 11 FA 1986 = s.13(2) ITTOIA] applies.

23.8 Notional UK trade: profit computation

Regulation 8 ITESR provides some self-explanatory rules for the computation of the profits of the notional UK trade:

> (1) Subject to the provisions of these Regulations, the profits or gains (to which [para 7(2) sch 11 FA 1986] refers) shall be computed in accordance with the provisions of the Taxes Act [1970] relating to the charging of profits or gains under Case I or II (as the case may be) of Schedule D, so that a just and reasonable amount of such a payment or value transferred by such a transfer is charged to tax as such profits or gains; and
> (2) Notwithstanding any provision of the Taxes Act [1970], in computing the said profits or gains such deductions of expenses incurred by any person (not being the entertainer) in relation to the payment or transfer concerned shall be made as are just and reasonable.

Regulation 16 ITESR provides for apportionment:

> (1) The provisions of paragraph (2) are by way of supplementation of the provisions of section 127 of the Taxes Act [1970] .
> (2) Where, in the case of any payment, value transferred or profits or gains to which Schedule 11 or these Regulations apply, it is necessary, in order to arrive at the appropriate amount of such payment, value or profits or gains for any tax year or other period, to make any apportionment, division or aggregation of any amounts or values, any such apportionment, division or aggregation, shall be made as is just and reasonable.

23.9 Trading loss

Regulation 15 ITESR provides:

> (1) In this regulation–

> (a) "world-wide trade" means a trade of an entertainer which is a trade apart from Schedule 11 and these Regulations, and a "Schedule 11 trade" means a trade which is a separate trade of an entertainer only by virtue of Schedule 11 and these Regulations;
>
> (b) "trade" includes profession or vocation.
>
> (2) For the purposes of section 171 of the Taxes Act [1970] (carry forward of losses) the world-wide trade and the Schedule 11 trade shall be treated as the same trade.
>
> (3) For the purposes of section 174 of the Taxes Act [1970] (carry back of terminal losses) a loss sustained for any relevant period under a Schedule 11 trade (to which otherwise that section would apply) shall not be a terminal loss except where the world-wide trade is permanently discontinued in that period, in which case such a loss in either trade shall be available under that section to be deducted or set off against profits or gains of those trades.
>
> (4) For the purposes of section 30 of the FA 1978 (losses in early years of trade) the world-wide trade and the Schedule 11 trade shall be treated as the same trade, but that section shall ap-ply to any such loss of an entertainer only in the tax year in which the world-wide trade was first carried on and in the next 3 succeeding tax years.

23.10 Withholding tax

Section 966 ITA provides:

> (1) This section applies if—
>
> (a) an entertainer, sportsman or sportswoman of a prescribed description ("a performer") who is non-UK resident for a tax year performs a relevant [taxable] activity in the UK in the tax year, and
>
> (b) a payment or transfer connected with the relevant [taxable] activity is made.
>
> (2) It does not matter—
>
> (a) whether the payment or transfer is made to the performer or anyone else, or
>
> (b) when the payment or transfer is made...
>
> (6) This section does not apply to payments or transfers of such a kind as may be prescribed.

23.10.1 *Deduction on making payment*

Section 966(3) ITA provides:

> If a payment within subsection (1)(b) is made the person who makes the payment must, on making it, deduct from it a sum representing income tax and account to HMRC for the sum.

The Courts rejected an argument that the principle of territoriality prevented this from applying to a non-resident made a payment to another non-resident.[20]

23.10.2 *Deduction on making transfer*

Section 966(4) ITA provides:

> If a transfer within subsection (1)(b) is made the person who makes the transfer must account to HMRC for a sum representing income tax.

23.10.3 *Amount of tax deducted*

Regulation 4(1) ITESR provides:

> Each of the sums mentioned in [para 2(2),(3) sch 11 FA 1986 = s.966(3)(4) ITA] ("tax payment") shall be calculated in accordance with the rules prescribed by this regulation.

Regulation 4(2) ITESR sets out the usual rule:

> Except where
> [a] it is otherwise provided by these Regulations or
> [b] there is an arrangement to which this regulation refers,
> the tax payment shall be a proportion
> [i] of the connected payment or
> [ii] of the value transferred by a connected transfer
> equal to the basic rate of income tax for the tax year in which the payment or transfer is made.

Regulation 17(1) ITESR provides grossing up:

> (a) The actual worth of what is transferred by a transfer to which [para 2(3) sch 11 FA 1986 = s.966(4) ITA] applies ("the net value") shall be treated as a net amount corresponding to a gross amount from which income tax at the basic rate has been deducted; and
> (b) the said gross amount shall be treated as the value of what is transferred for the purposes of paragraph 2(4) of Schedule 11.

Regulation 17(2) ITESR defines net value:

[20] See 16.11 (Territorial principle).

> (a) The net value to which paragraph (1) refers shall be the cost of what is transferred, and
> (b) the cost of what is transferred to which sub-paragraph (a) refers is the cost in or in connection with its provision (including its provision to the person who makes the transfer) or transfer, less so much of that cost which has been borne by the entertainer.

23.10.4 *Personal allowance*

Regulation 4(3) ITESR (in short) exempts payments and transfers within the IT personal allowance:

> (a) Subject to sub-paragraph (b), where the connected payments and the value transferred by connected transfers for a tax year made to an entertainer, or to a person who is connected with him or who is an associate of his, do not together exceed the relevant amount[21] the tax payment shall be a nil amount;

Para 4(3)(b) deals with fragmentation schemes:

> (b) connected payments and the value transferred by connected transfers made by any person who is connected with any other person by whom connected payments or connected transfers are made to the entertainer, or by any associate of such other person, shall together be treated as constituting a single connected payment in determining whether they exceed the relevant amount.

23.11 Arrangements with HMRC

The usual rule in regulation 4(2) ITESR applies unless "there is an arrangement to which this regulation refers." This anticipates regulation 4(4)-(6) ITESR which allow HMRC to make different arrangements:

> (4) An arrangement to which paragraph (2) refers is an arrangement in writing between
> [a] the Board and
> [b] the person by whom the connected payment or connected transfer is made, the entertainer, or the recipient of the connected payment or connected transfer,
>
> made following a decision by the Board on an application to which regulation 5 refers, under which the tax payment is an amount which, as

[21] Reg 2 ITESR defines this: "the relevant amount" means the amount of the personal allowance in section 35(1) ITA 2007 which applies for the tax year in which the payment or transfer is made.

a proportion of the connected payment or value transferred by the connected transfer, is an amount less than the said basic rate ("reduced tax payment").

(5) The reduced tax payment may be arrived at by reference to

[a] a percentage of the connected payment or of the value transferred by a connected transfer or

[b] as a lump sum calculated without reference to any such percentage.

(6) In making an arrangement of the kind to which paragraph (2) refers the Board–

(a) shall, subject to sub-paragraph (b) and paragraph (7) below, at all times aim at securing that the tax payment shall be, as nearly as may be, the amount of the liability to tax of the entertainer or other person arising in relation to the connected payment or connected transfer under the Tax Acts, Schedule 11 and these Regulations, and

(b) may take into account the fact that the liability to the Board for tax has, in a manner satisfactory to them, been secured or otherwise provided for, whether by a guarantee (of whatever person) or other means.

Performers guidance provides:

Application to HMRC to limit the amount of tax withheld

An application may be made in writing by the entertainer or anyone else authorised to do so on their behalf. Where the application is agreed, it allows the payer to deduct an amount other than the basic rate of tax which corresponds as near as to the entertainer's final UK liability on that payment.

An application to HMRC to limit the amount of tax withheld may be made in writing or on form FEU 8. Any letter which advises the Unit that detailed figures are to follow is considered to constitute an advance notification of an application **but does not constitute the application itself**.

Applications to the Foreign Entertainers Unit must be made no less than 30 days before the date the payment is due.

If the application is not agreed tax must be accounted for at the basic rate on all related payments.

How to make a reduced tax payment application (RTPA)

The information required to enable an agreement to be made includes:

- dates of arrival in and departure from the UK
- whether the entertainer is likely to return to the UK again before the 5 April

- a projection of actual or estimated total income due from all sources
- a schedule confirming; the date of each performance/event, the name and address of the venue and the name and address of the promoter
- a schedule of the projected actual or estimated expenses which will be incurred
- a copy of each relevant engagement contract or agreement (these do not need to be signed copies).

The application should give sufficient information to show how figures have been arrived at (including the basis for any estimates) and how expenditure appropriate to several countries has been apportioned.

In some cases you may be authorised to deduct a reduced rate of tax, a fixed sum or no tax from the gross payment. This could apply, for example, where an entertainer has to meet substantial expenditure out of a gross fee thus reducing the expected UK tax liability.

In reaching an agreement the Foreign Entertainers Unit will make allowances for admissible expenses. What can be allowed depends on the general rules covering expenditure allowable in arriving at taxable business profits under Section 34 Income Tax (Trading and Other Income) Act 2005 and the facts of each case. Normally allowances will be made for:

- general subsistence expenses
- commission, manager’s and agent’s fees
- UK travel
- international air fares to and from the UK where the entertainer comes to the UK to perform and returns directly to his or her home country

Other expenses may be allowable. What is allowable in each case will need to be agreed with the Foreign Entertainers Unit including the proportion of any costs appropriate to several countries.

Further information can be obtained about Reduced Tax Payment Applications including further advice regarding the preparation of an entertainer RTPA.

If the point you wish to check is not covered in this guidance or at the above link then contact the Foreign Entertainers Unit.

How do you know that a reduced tax payment has been authorised?

The Foreign Entertainers Unit will authorise you to deduct a reduced amount of tax by sending you a form FEU 4. Even where you have been a party to the agreed arrangement with HMRC you must wait until you get the form FEU 4.

If you have not received an authorisation form FEU 4 by the time the payment is due you must deduct tax at the basic rate on all related payments.

23.12 Chains of payments

Regulation 4(7) ITESR provides:

> Where–
>
> (a) a person makes a connected payment or connected transfer in relation to a relevant [taxable] activity, and
>
> (b) in respect of the same relevant [taxable] activity that person has received a connected payment or connected transfer in respect of which the amount of the tax payment has been paid under these Regulations,
>
> the person concerned shall not be required to deduct out of the connected payment or pay in respect of the connected transfer (to which sub-paragraph (a) refers) any sum to which paragraph 2 of Schedule 11 applies unless, and to the extent that, the tax payment which then falls to be made exceeds the amount of the tax payment to which sub-paragraph (b) refers.

The default rule is that deduction is made at the start of the chain. Performers guidance provides:

> **How do you deal with payment chains?**
>
> Some activities may give rise to a chain of payments. Every payer in the chain must deduct tax as required by law unless the payment is exempt.
>
> *Example*
>
> A concert is arranged at a venue. The venue owners control the box office and pay over the ticket proceeds to the promoter less their costs and Withholding Tax. The promoter is then required to deduct Withholding Tax from the fee payable to the entertainer. The promoter should deal with this as follows:
>
> He must deduct Withholding Tax (where it is due) from the payment made to the entertainer and pay over the net amount.
>
> He must issue a tax deduction certificate form FEU 2, to the entertainer confirming the pay and tax details.
>
> He declares the payment made and the tax deducted on the form FEU 1 (boxes 5 & 6) and shows the tax already withheld from the payment made to him in box 8.
>
> *Example*
>
> A Promoter engages a non-resident entertainer to appear at a UK venue. The Entertainer is the only non-resident entertainer the promoter engages in the quarter. The sequence of payments is as follows:
>
> The Venue pays £100,000 less £20,000 tax to the Promoter
>
> The Promoter pays £60,000 less £12,000 tax to the Entertainer

> The Promoter is liable to account to HMRC for £12,000 but as the payment he has received has had £20,000 Withholding Tax deducted from it he can treat the £12,000 as paid.
>
> *Entries on the Promoter's return form FEU 1*
>
> The amount and income tax columns of the Promoter's return for the relevant period should be completed as follows:
>
> | Payment | Amount | Tax |
> |---|---|---|
> | | 60,000 | 12,000 |
> | Less tax already paid by Venue | | 12,000 |
> | Tax payable now | | Nil |
>
> Evidence of the tax already paid must be provided with the FEU1 return by including part 3 of the FEU2 tax deduction certificate which is supplied by the Venue.

However it is possible to agree a different rule. Regulation 5 ITESR provides:

> (1) Where a connected payment or connected transfer falls to be made subject to a tax payment to which regulation 4(2) refers the person by whom the connected payment or connected transfer is made, the entertainer, or recipient of the connected payment or connected transfer, may make an application in writing to the Board, not later than 30 days before the connected payment or connected transfer falls to be made, that it shall be subject instead to a reduced tax payment (within the meaning of regulation 4).
>
> (2) Unless and until there is in force an arrangement under which such a reduced tax payment falls to be made regulation 4(2) shall at all times continue to apply to the connected payment or connected transfer.

Performers guidance provides:

> **Middleman Applications**
>
> Payers can ask for an arrangement which moves the withholding point further down the chain so that payments between specified payers can be made without deduction of tax. This can only be done with the Foreign Entertainers Unit's approval.
>
> If the concert promoter makes a 'Middleman' application, the Unit may agree to the promoter being the withholding point, therefore the venue will not have to withhold tax. The promoter will then have to deduct tax at basic rate on his or her payment or a reduced amount if an entertainer's application for a reduced tax payment has been made and agreed.
>
> The Unit will ask for certain information in support of any 'Middleman'

> application you make, for example, a copy of any contract, dates of appearances, and probably a copy of the budget. If you are submitting a 'Middleman' application for the first time the Unit will be happy to advise you on the procedure and level of information required....[22]

23.13 Position of payor

Reg 12 ITESR provides:

> (1) Where under these Regulations there is accounted for and paid to the Board an amount of tax which is–
>
> (a) in respect of a connected payment or connected transfer, or
>
> (b) paid under an assessment made under paragraph 11,
>
> that amount shall, subject to this regulation, be treated as a payment of tax on account of the tax liability (of whatever person) in respect of the connected payment or connected transfer concerned.
>
> (2) Where, in respect of a connected payment or connected transfer, there is a liability to tax under the Tax Acts as well as under Schedule 11 or these Regulations, the Board shall allocate any payment made to them to which paragraph (1) refers as is just and reasonable in discharge of some or all of those liabilities of the entertainer or other person concerned to whom these Regulations apply.
>
> (3) Where–
>
> (a) by virtue of paragraph 8 of Schedule 11 and these Regulations a connected payment or the value transferred by a connected transfer falls to be included in the amount of profits or gains to which paragraph 8(1)(a) refers, and
>
> (b) the amount of the connected payment or the value transferred (or an amount in respect of that value) is charged to tax under Schedule E
>
> the amount charged under Schedule E (to which sub-paragraph (b) refers) shall be treated as expenditure which falls to be deducted in computing the profits or gains to which sub-paragraph (a) refers.
>
> (4) Where a payment is a connected payment–
>
> (a) which is, is treated as, or falls to be included in a computation of, income of the entertainer chargeable to tax by virtue of the provisions of Part XVI of the Taxes Act [1970] , or
>
> (b) which is a receipt of a company which provides the services of the entertainer to perform the relevant [taxable] activity, being

[22] *http://webarchive.nationalarchives.gov.uk/20140109143644/http://www.hmrc.gov.uk/feu/appromers.htm*

> a receipt which falls to be included in the computation of its profits which are chargeable to tax under Schedule D,
>
> the charge under Schedule 11 shall have effect and the charges to which sub-paragraphs (a) and (b) refer shall be disregarded.
>
> (5) A person making a connected payment or connected transfer in respect of which a tax payment has been made by virtue of these Regulations shall furnish the recipient with a certificate showing the gross amount of the payment or the value transferred, the amount of the tax payment, and the amount actually paid.

Performers guidance provides:

> **How are payments dealt with in your Self Assessment or Corporation Tax accounts?**
>
> If the income you receive is attributed to the entertainer under the rules set out in Regulation 7 ITESR then the tax withheld from the payment you receive will be treated as a payment on account of the entertainer's UK liability.
>
> You will not be charged to UK tax on that income and there will be no repayment of the Withholding Tax to you.
>
> But if:
>
> - you are UK resident and
> - the income you receive is not attributed to the entertainer under the above rules then the payment you receive will be a receipt of your own business
>
> The amount of the assessable income will be the payment received plus the amount of the Withholding Tax which has been deducted. You will be able to claim the gross payment you make as a deduction in your UK Income Tax or Corporation Tax accounts.
>
> 'Gross payment' means the payment to the entertainer or intermediary plus the tax accounted for to HMRC.
>
> If you make the payment in a series of payments as described at How to work out the tax, you may be entitled to set off tax withheld from payments you receive against your UK tax liabilities or claim a repayment of tax.
>
> *Example*
>
> A UK Venue pays box office income of £100,000 to a UK Promoter in respect of the performance of a non-UK resident entertainer. The Entertainer is paid a fee of £60,000 by the Promoter
>
> **Withholding Tax**
>
> A venue pays £80,000 to the promoter. This is £100,000 less £20,000 which is 20% tax. The £20,000 tax is paid to HMRC.
>
> The promoter pays £48,000 to the entertainer. This is £60,000 less

£12,000 which is 20% tax. The £12,000 tax is paid to HMRC.

Treatment in the accounts

The Venue is allowed the expense of £100,000 (that is the gross payment shown in his accounts).

The Promoter has a receipt of £100,000 as income and is allowed £60,000 as an expense in its accounts.

Tax set offs

The Promoter can claim to set the excess Withholding Tax of £8,000 against its Income Tax/Corporation Tax liability for that accounting period. i.e. £20,000 less the payment of £12,000.

If the Promoter had a tax liability of less than £8,000 it can claim a repayment of the amount by which £8,000 exceeds its Income Tax/Corporation Tax liability for that accounting period.

Performers guidance provides:

Is Withholding Tax due on payments made to Groups, Theatre Companies, Productions, etc, which include both UK resident and non-resident entertainers?

For example, a music group or a theatre company which includes both UK resident and non-resident performers.

Yes, Withholding Tax is due

Unless advised otherwise by the Foreign Entertainers Unit the payer must account for Withholding Tax on the total payment, including expenses, made to or in respect of the group or theatre company.

If the payee/group/theatre company want the payer to calculate and deduct tax only on the non UK resident performers, the payee/group/theatre company must apply to the Foreign Entertainers Unit for agreement to do this.

How to work out the Withholding Tax

Where you are paying or transferring money it is very straightforward to work out the tax.

Assuming the basic rate percentage for the year of payment is 20 per cent then you should deduct this percentage from each payment made.

Example

Gross Payment	£10,000
Tax (10,000 × 20%)	£2,000
Net amount paid to entertainer	£8,000

The same applies to a loan of money. You should deduct tax from the amount of the loan.

All payments of Withholding Tax made to HMRC must be made in sterling. If you make a payment directly or indirectly to an entertainer in a foreign currency you should calculate the Withholding Tax due using the rate of exchange at the time when the payment is made or at the rate used at the time the foreign currency was purchased. The rate of exchange used should be shown on your return form FEU 1.

If the transfer of an asset is involved (for example, a motor car for a 'hole in one' during a golf competition) you must account for the tax as if the asset's cost to you or in connection with providing it was the net amount of the payment.

Withholding Tax is also due on expenses provided for an entertainer. For example, hotel accommodation, airfares, UK transport etc.

In the absence of an agreement with the Foreign Entertainers Unit, Withholding Tax must be accounted for and paid by the payer, from its own funds, on payments made in respect of expenses provided for an entertainer.

The Withholding Tax due must be calculated as follows:

The cost of the expenses, to the payer, must be grossed up, at the basic rate of tax, to give the true cost of the benefit to the artiste.

Withholding Tax due must be calculated at the basic rate on the grossed up value of the expenses.

The withholding tax calculated must be paid by the payer from its own funds: it must not be deducted from the overall payment made to the artiste.

Example

The airline ticket costs you £1,000. You need to work out the gross amount of the payment and pay tax on that amount. To work out the gross amount you do the following sum.

Net amount of payment £1000 × 20 (basic rate of tax) divided by 80 (100% − 20% basic rate of tax) = £250

Add the tax amount £250 to the net payment £1000 to get the gross payment £1250

Add the result to the net payment to get the gross payment.

£250 + £1,000 = £1,250

Tax (£1,250 × 20%) = £250

VAT Implications

VAT is not chargeable on Withholding Tax and you should therefore exclude the VAT when calculating Withholding Tax due.

When calculating the amount of tax due on a payment to be made either to, or in respect of an entertainer you must not include VAT (if any) charged to you.

If you are a venue paying the gross ticket sales to a promoter or entertainer, the VAT element of each individual ticket price must be taken out.

23.14 Administration

Reg 9 ITESR deals with returns:

> (1) A person who makes a connected payment or connected transfer shall, in accordance with this regulation, make a return to the Board of the connected payment or connected transfer which he makes and of any tax payment (including a nil amount) for which he is accountable to the Board.
> (2) A return shall be made in the tax year for each successive period ending on 30th June, 30th September, 31st December and 5th April.
> (3) The return for each period shall be made within 14 days after the end of the period.
> (4) [This deals with notices requiring information, but is now effectively superseded by more general HMRC information powers]
> (5) The [TMA 1970] shall apply to a return to which this regulation relates as it applies to a return under the Taxes Acts.

Reg 10 ITESR deals with the due date for tax payments:

> (1) A tax payment (including any reduced tax payment), whether any deduction out of a connected payment or provision in respect of a connected transfer has been made or not, shall be due at the time by which the return under regulation 9(1) is to be made ("the due date") and payment shall be made before, or at the time when, that return is made.
> (2) A payment at any time so due shall be payable by the person who makes the connected payment or connected transfer concerned, without the making of any assessment in respect of it.
> (3) Subject to the provisions of regulation 11, tax which has become due and payable under this regulation (whether or not it has been paid when the assessment is made) may be assessed on the per-son from whom it is due if that tax, or any part of it, is not paid on or before the due date.

Reg 11 ITESR deals with assessments, Reg 13 ITESR deals with tax overpayments of tax and reg. 14 incorporates the TMA rules. These need not be set out here.

23.15 DT Relief

Article 17 OECD Model Convention provides:

> 1. Notwithstanding the provisions of Article 15 [Employment income], income derived by a resident of a Contracting State
> [a] as an entertainer, such as a theatre, motion picture, radio or

> television artiste, or a musician, or
> [b] as a sportsperson,
> from that resident's personal activities as such exercised in the other Contracting State, may be taxed in that other State.

This article was amended in 2014 following an OECD report ("the OECD Art.17 report").[23]

I refer to income within article 17(1) as **"entertainment income"**.

OECD Model Commentary explains why there is a special rule for entertainment income:

> 2. This provision [Article 17] makes it possible to avoid the practical difficulties which often arise in taxing entertainers and sportspersons performing abroad.

The commentary does not say what these difficulties are but OECD Art.17 report identifies 2 difficulties:

> ... residence taxation should not be assumed given
> [1] the difficulties of obtaining the relevant information,
> [2] that Article 17 allows taxation of a number of high-income earners who can easily move their residence to low-tax jurisdictions ... [24]

23.15.1 *"Entertainer"/"Sportsperson"*

The International Manual comments on the terminology:

> **INTM153190 Artistes/entertainers/athletes** [Jun 2016]
> This Article is generally entitled artistes and athletes, but the terms entertainers and sportsmen[25] can also be used. We do not consider there is any difference between the terms artistes and entertainers and sportsmen and athletes.

OECD Commentary discusses these terms:

> 3. Paragraph 1 refers to entertainers and sportspersons. It is not possible to give a precise definition of "entertainer", but paragraph 1 includes examples of persons who would be regarded as such. These examples should not be considered as exhaustive. On the one hand, the term

[23] OECD, "Issues related to Article 17 of the model tax convention" (2014) *http://www.oecd.org/tax/treaties/report-article%2017-model-tax-convention.pdf*

[24] OECD Art.17 report para 5.

[25] Author's footnote: In keeping with contemporary values, the 2014 OECD Model update changed to gender neutral language.

> "entertainer" clearly includes the stage performer, film actor, actor (including for instance a former sportsperson) in a television commercial. The Article may also apply to income received from activities which involve a political, social, religious or charitable nature, if an entertainment character is present. On the other hand, it does not extend to a visiting conference speaker (e.g. a former politician who receives a fee for a speaking engagement), to a model performing as such (e.g. a model presenting clothes during a fashion show or photo session) rather than as an entertainer or to administrative or support staff (e.g. cameramen for a film, producers, film directors, choreographers, technical staff, road crew for a pop group etc.). In between there is a grey area where it is necessary to review the overall balance of the activities of the person concerned.
>
> 4. An individual may both direct a show and act in it, or may direct and produce a television programme or film and take a role in it. In such cases it is necessary to look at what the individual actually does in the State where the performance takes place. If his activities in that State are predominantly of a performing nature, the Article will apply to all the resulting income he derives in that State. If, however, the performing element is a negligible part of what he does in that State, the whole of the income will fall outside the Article. In other cases an apportionment should be necessary.
>
> 5. Whilst no precise definition is given of the term "sportspersons" it is not restricted to participants in traditional athletic events (e.g. runners, jumpers, swimmers). It also covers, for example, golfers, jockeys, footballers, cricketers and tennis players, as well as racing drivers.

The Commentary discusses the concept of sports or entertainment:

> 6. The Article also applies to income from other activities which are usually regarded as of an entertainment character, such as those deriving from billiards and snooker, chess and bridge tournaments.
>
> 7. Income received by impresarios, etc. for arranging the appearance of an entertainer or sportsperson is outside the scope of the Article, but any income they receive on behalf of the entertainer or sportsperson is of course covered by it.

23.15.2 *Income from performance*

OECD Commentary provides:

> 8. Paragraph 1 applies to income derived directly and indirectly from a performance by an individual entertainer or sportsperson. In some cases the income will not be paid to the individual or his impresario or agent,

> directly with respect to a specific performance. For instance, a member of an orchestra may be paid a salary rather than receive payment for each separate performance: a Contracting State where a performance takes place is entitled, under paragraph 1, to tax the proportion of the musician's salary which corresponds to such a performance. Similarly, where an entertainer or sportsperson is employed by e.g. a one person company, the State where the performance takes place may tax an appropriate proportion of any remuneration paid to the individual. In addition, where its domestic laws "look through" such entities and treat the income as accruing directly to the individual, paragraph 1 enables that State to tax income derived from performances in its territory and accruing in the entity for the individual's benefit, even if the income is not actually paid as remuneration to the individual.
>
> 8.1 The paragraph applies regardless of who pays the income. For example, it covers prizes and awards paid by a national federation, association or league which a team or an individual may receive in relation to a particular sports event.

The commentary considers the boundary between (1) entertainment income and (2) trading, royalty and employment income:

> 9. Besides fees for their actual performances, entertainers and sportspersons often receive income in the form of royalties or of sponsorship or advertising fees. In general, other Articles would apply whenever there is no close connection between the income and the performance of activities in the country concerned. Such a close connection will generally be found to exist where it cannot reasonably be considered that the income would have been derived in the absence of the performance of these activities. This connection may be related
>
> [1] to the timing of the income-generating event (e.g. a payment received by a professional golfer for an interview given during a tournament in which she participates) or
>
> [2] to the nature of the consideration for the payment of the income (e.g. a payment made to a star tennis player for the use of his picture on posters advertising a tournament in which he will participate).
>
> Royalties for intellectual property rights will normally be covered by Article 12 rather than Article 17 (see paragraph 18 of the Commentary on Article 12), but in general advertising and sponsorship fees will fall outside the scope of Article 12. Article 17 will apply to advertising or sponsorship income, etc. which has a close connection with a performance in a given State (e.g. payments made to a tennis player for wearing a sponsor's logo, trade mark or trade name on his tennis shirt during a match). Such a close connection may be evident from

contractual arrangements which relate to participation in named events or a number of unspecified events; in the latter case, a Contracting State in which one or more of these events take place may tax a proportion of the relevant advertising or sponsorship income (as it would do, for example, in the case of remuneration covering a number of unspecified performances; see paragraphs 9.2 and 9.3). Similar income which could not be attributed to such performances would fall under the standard rules of Article 7 or Article 15, as appropriate. Payments received in the event of the cancellation of a performance are also outside the scope of Article 17, and fall under Article 7 or 15, as the case may be. Various payments may be made as regards merchandising; whilst the payment to an entertainer or sportsperson of a share of the merchandising income closely connected with a public performance but not constituting royalties would normally fall under Article 17, merchandising payments derived from sales in a country that are not closely connected with performances in that country and that do not constitute royalties would normally be covered by Article 7 (or Article 15, in the case of an employee receiving such income).

9.1 Apart from the above examples, there are a number of cases where it may be difficult to determine whether a particular item of income is derived by a person as an entertainer or sportsperson from that person's personal activities as such. The following principles may be useful to deal with such cases:

– The reference to an "entertainer or sportsperson" includes anyone who acts as such, even for a single event. Thus, Article 17 can apply to an amateur who wins a monetary sports prize or a person who is not an actor but who gets a fee for a once-in-a-lifetime appearance in a television commercial or movie.
– As noted in the previous paragraphs, the activities of an entertainer or sportsperson do not include only the appearance in an entertainment or sports event in a given State but also, for example, advertising or interviews in that State that are closely connected with such an appearance.
– Merely reporting or commenting on an entertainment or sports event in which the reporter does not himself participate is not an activity of an entertainer or sportsperson acting as such. Thus, for instance, the fee that a former or injured sportsperson would earn for offering comments during the broadcast of a sports event in which that person does not participate would not be covered by Article 17.
– Preparation, such as rehearsal and training, is part of the normal activities of entertainers and sportspersons. If an entertainer or sportsperson is remunerated for time spent on rehearsal, training or

> similar preparation in a State (which would be fairly common for employed entertainers and sportspersons but could also happen for a self-employed individual, such as an opera singer whose contract would require participation in a certain number of rehearsals), the relevant remuneration, as well as remuneration for time spent travelling in that State for the purposes of performances, rehearsal and training (or similar preparation), would be covered by the Article. This would apply regardless of whether or not such rehearsal, training or similar preparation is related to specific public performances taking place in that State (e.g. remuneration that would be paid with respect to the participation in a pre-season training camp would be covered).

For a US view of the royalty/personal services divide, see *Garcia v Commissioner of Internal Revenue*.[26]

23.15.3 *Performer income computation*

OECD Commentary provides:

> 10. The Article says nothing about how the income in question is to be computed. It is for a Contracting State's domestic law to determine the extent of any deductions for expenses. Domestic laws differ in this area, and some provide for taxation at source, at a low rate based on the gross amount paid to entertainers and sportspersons. Such rules may also apply to income paid to groups or incorporated teams, troupes, etc. Some States, however, may consider that the taxation of the gross amount may be inappropriate in some circumstances even if the applicable rate is low. These States may want to give the option to the taxpayer to be taxed on a net basis. This could be done through the inclusion of a paragraph drafted along the following lines ...

Apportionment issues have often proved controversial. OECD Art.17 report discusses the issue of preparation and training activities:

> 34. One commentator indicated that the practice of the UK tax authorities was "to tax a proportion of income earned under contracts for services – even if that income is earned by a personal service company – on the basis of competition days in the UK." The commentator argued, however, that it would be inappropriate to tax endorsement income of a sportsperson on that basis since a sportsperson has to train the rest of

[26] 140 TC 6 (2013).

the year. Using the example of a marathoner, the commentator argued that "if the athlete was in the UK for a week for the London Marathon and did not return in a given tax year, but could demonstrate that he/she trained on every day of the year (as many marathon runners do) then 1/52 of global income for services should fall within the UK tax net." The Committee, however, disagreed with that suggestion, which does not take into account the consideration for the payments received: where a marathoner derives all of her income from her participation and performance during races held in one country, it is difficult to consider that any part of that remuneration is paid for training in another country. It also disagreed with the argument that the proposal "seems to grant preferential status to employed, rather than self-employed sportspeople": under the proposed interpretation, self-employed individuals who are paid to train or rehearse are treated like employed individuals who are paid to train or rehearse. The Committee simply noted that it seemed more unusual for self-employed entertainers and sportspersons to be paid for training or preparation.

35. Two commentators, however, objected to that last observation and referred to the following situations where they argued that self-employed individuals were paid for preparation or training:

– "Self-employed sportspeople have contracts which include the fact that products must be used in training as well as competition".

- "Actors may need to undertake preparation for specific roles (e.g. a role requiring him/her to ride a horse); in that case they will need to train for the role, but the days spent in training will form part of the work in relation to the film fee."
- Some self-employed persons performing in plays, operas and concerts may be contractually required to participate in rehearsals.

36. Whilst it was unclear, in the first two examples, whether or not the person was paid for the training or preparation period, the Committee agreed that the last example involved payments for preparation made to a self-employed person.

37. Based on these comments, the Committee concluded that the reference to rehearsals and the example of a self-employed person being paid for rehearsing should be added to proposed paragraph 9.1.

The following revised version of the relevant part of the paragraph was therefore adopted by the Committee:

Add the following subparagraphs to proposed paragraph 9.1 (see above) of the Commentary on Article 17:

> [9.1 Apart from the above examples, there are a number of cases where it may be difficult to determine whether a particular item of income is derived by a person as an entertainer or sportsperson from

that person's personal activities as such. The following principles may be useful to deal with such cases:]

- […]
- Preparation, such as rehearsal and training, is part of the normal activities of entertainers and sportspersons. If an entertainer or sportsperson is remunerated for time spent on preparation, rehearsal, training or similar preparation in a State (which would be fairly common for employed entertainers and sportspersons but could also happen for a self-employed individual, such as an opera singer whose contract would require participation in a certain number of rehearsals), the relevant remuneration, as well as remuneration for time spent travelling in that State for the purposes of performances, rehearsal and training (or similar preparation), would be covered by the Article. This would apply regardless of whether or not such rehearsal, training or similar preparation is related to specific public performances taking place in that State (e.g. remuneration that would be paid with respect to the participation in a pre-season training camp would be covered).

23.15.4 *Receipts by third parties*

Para 17(2) OECD Model provides:

> 2. Where income in respect of personal activities exercised by an entertainer or a sportsperson acting as such accrues not to the entertainer or sportsperson but to another person, that income may, notwithstanding the provisions of Article 15, be taxed in the Contracting State in which the activities of the entertainer or sportsperson are exercised.

OECD Commentary provides:

> 11. Paragraph 1 of the Article deals with income derived by individual entertainers and sportspersons from their personal activities. Paragraph 2 deals with situations where income from their activities accrues to other persons. If the income of an entertainer or sportsperson accrues to another person, and the State of source does not have the statutory right to look through the person receiving the income to tax it as income of the performer, paragraph 2 provides that the portion of the income which cannot be taxed in the hands of the performer may be taxed in the hands of the person receiving the remuneration. If the person receiving the income carries on business activities, tax may be applied by the source country even if the income is not attributable to a permanent establishment there. But it will not always be so. There are three main

situations of this kind:

a) The first is the management company which receives income for the appearance of e.g. a group of sportspersons (which is not itself constituted as a legal entity).

b) The second is the team, troupe, orchestra, etc. which is constituted as a legal entity. Income for performances may be paid to the entity. Individual members of the team, orchestra, etc. will be liable to tax under paragraph 1, in the State in which they perform their activities as entertainers or sportspersons on any remuneration (or income accruing for their benefit) derived from the performance; of these activities (see, however, paragraph 14.1 below). The profit element accruing from a performance to the legal entity would be liable to tax under paragraph 2.

c) The third situation involves certain tax avoidance devices in cases where remuneration for the performance of an entertainer or sportsperson is not paid to the entertainer or sportsperson himself but to another person, e.g. a so-called star-company, in such a way that the income is taxed in the State where the activity is performed neither as personal service income to the entertainer or sportsperson nor as profits of the enterprise, in the absence of a permanent establishment. Some countries "look through" such arrangements under their domestic law and deem the income to be derived by the entertainer or sportsperson; where this is so, paragraph 1 enables them to tax income resulting from activities in their territory. Other countries cannot do this. Where a performance takes place in such a country, paragraph 2 permits it to impose a tax on the profits diverted from the income of the entertainer or sportsperson to the enterprise. It may be, however, that the domestic laws of some States do not enable them to apply such a provision. Such States are free to agree to other solutions or to leave paragraph 2 out of their bilateral conventions.

11.1 The application of paragraph 2 is not restricted to situations where both the entertainer or sportsperson and the other person to whom the income accrues, e.g. a star-company, are residents of the same Contracting State. The paragraph allows the State in which the activities of an entertainer or sportsperson are exercised to tax the income derived from these activities and accruing to another person regardless of other provisions of the Convention that may otherwise be applicable. Thus, notwithstanding the provisions of Article 7, the paragraph allows that State to tax the income derived by a star-company resident of the other Contracting State even where the entertainer or sportsperson is not a resident of that other State. Conversely, where the income of an entertainer resident in one of the Contracting States accrues to a person, e.g. a star-company, who is a resident of a third State with which the State of source does not have a tax convention, nothing will prevent the Contracting State from taxing that person in accordance with its domestic laws.

11.2 Paragraph 2 does not apply, however, to prize money that the owner of a horse or the team to which a race car belongs derives from the results of the horse or car during a race or during races taking place during a certain period. In such a case, the prize money is not paid in consideration for the personal activities of the jockey or race car driver but in consideration for the activities related to the ownership and training of the horse or the design, construction, ownership and maintenance of the car. Such prize money is not derived from the personal activities of the jockey or race car driver and is not covered by Article 17. Clearly, however, if the owner or team receives a payment in consideration for the personal activities of the jockey or race car driver, that income may be taxed in the hands of the jockey or race car driver under paragraph 1 (see paragraph 7 above).

23.15.5 *Foreign tax credit relief*

The INTM provides:

INTM168063 Foreign tax paid on trade income: limitation on credit: Artistes/athletes/sportsmen [Jan 2018]

As indicated in INTM153190, the country in which an entertainer or sportsman performs has primary taxing rights over the income he derives from his performances in that country. Many foreign countries impose a withholding tax on the payments made for such performances at a fixed percentage of the gross payments. These are final taxes and normally claims cannot be made to the foreign country to have the expenses incurred in earning the payments deducted from the gross amounts. Where a resident entertainer or sportsman is charged to UK Income Tax on profits or gains arising from any profession or vocation, he is entitled to credit for these foreign taxes against the UK tax on the UK measure of that income, that is, the income less the expenses incurred in earning it. The credit will be the lesser of the foreign tax and the tax at his marginal rate (see INTM165040 onwards).

Where, however, a resident entertainer or sportsman is employed by a service company, the income from his performances is income of that company and he is paid a salary out of that income. Credit for the foreign tax paid on the payments for his performances is due against the Corporation Tax payable by the company on its profits. The income of the entertainer or sportsman is remuneration from the service company and not the original fees paid to the company and he is not therefore entitled to credit for such foreign tax against the UK tax on his salary. Nonetheless, it is possible that that a different treatment may be available where the foreign tax is imposed in a personal capacity on the entertainer etc notwithstanding that the performance payments are made to the service company. This treatment is intended to put the entertainer etc in a similar position when receiving remuneration from a service company in respect of overseas income that can be matched to a particular source, to the one he would have been in had he received the income direct. For instance, if a clear and direct link can be made between the fees for the performance in the overseas country and the income arising to the performer in the form of remuneration from the service company then it may be that the remuneration derived by the entertainer can be identified with the income taxed by the foreign tax authority. Where there such a link can be made, and the interval between the two events is short, it may be possible to allow the tax credit against income tax charged on the entertainer etc. Any credit given to the entertainer etc must be restricted in accordance with TIOPA10/S36 and S37, by reference to expenses (see INTM168010 onwards.)[27]

Please therefore refer to Personal Tax International (PTI) Advisory. (part of Charity, Assets & Residence) where (i) a claim to credit for foreign tax is made by the entertainer or sportsman and (ii) the foreign tax has been imposed on the income received by the service company but (iii) the overseas tax authority has disregarded the existence of the service company and taxed the income as if it belonged to the entertainer or sportsman. This treatment will not be available where a deduction for the foreign tax has been allowed to the company under S112 TIOPA10.

23.15.6 *Cultural exemption*

OECD Model Commentary provides:

> 2. ... too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement, limit the application of paragraph 1 to business activities.

About a dozen UK treaties contain a cultural exemption.

[27] See 111.23 (Limit on credit relief).

CHAPTER TWENTY FOUR

PROPERTY INCOME

24.1 Property income: Introduction
24.2 Property business terminology
  24.2.1 "UK property business"
  24.2.2 "Overseas property business"
  24.2.3 "Property business"
  24.2.4 Generating income from land
24.3 Territorial limits: Property income
  24.3.1 IT territorial limits
  24.3.2 Property income of split year
  24.3.3 CT territorial limits
  24.3.4 Loan relationships charge
24.4 Non-resident co: Transitional rules
  24.4.1 Commencement
  24.4.2 Accounting period across 6/4/20
  24.4.3 Losses
  24.4.4 Company in partnership
24.5 Quantum of property income
  24.5.1 Property income: IT computation
24.6 Overseas property business: Loss
  24.6.1 Losses from 2008/09
  24.6.2 Losses before 2008/09
24.7 DT relief: Property income
  24.7.1 "Immovable property"
  24.7.2 Property income or other income
24.8 Non-resident landlord scheme
  24.8.1 Background
  24.8.2 "Non-resident landlord income"
  24.8.3 "Landlord representative"
24.9 Non-resident landlord
  24.9.1 Partnerships
  24.9.2 Joint owners
  24.9.3 Husband and wife
  24.9.4 Armed forces, Crown servants
24.10 Definitions
  24.10.1 "Agent"
  24.10.2 "Non-resident" (place of abode)
  24.10.3 "Schedule A business"
  24.10.4 Quarters and other time periods
  24.10.5 "Payments to the board"
24.11 Prescribed persons
  24.11.1 Agent/tenant has HMRC notice
  24.11.2 Agent without HMRC notice
  24.11.3 Power to select agent
  24.11.4 UK tenant
  24.11.5 Prescribed person a partnership
  24.11.6 Agent with multiple principals
  24.11.7 Agent duty to register
24.12 Tax computation: Agent
  24.12.1 Rental income
  24.12.2 Expenses
  24.12.3 Financing costs election
24.13 Tax computation: Tenant
24.14 Returns and administration
  24.14.1 HMRC letters to tenants
  24.14.2 Quarterly returns
  24.14.3 Payment
  24.14.4 Interest on tax
  24.14.5 Assessment
  24.14.6 Annual returns
  24.14.7 Record keeping
  24.14.8 Certificate for landlord
24.15 Gross payment of property income
24.16 Credit for withholding tax
24.17 Agent indemnity

Cross references

The following topics are considered elsewhere:

  14.7.3 (Property/trade income overlap).

111.20.2 (FTC: Property income)

24.1 Property income: Introduction

The Taxes Acts use the term "**property income**" to mean income from land.[1] The taxation of property income is governed by Part 3 ITTOIA/Part 4 CTA 2009. A full discussion needs a book to itself. This chapter focuses on matters closest to the themes of this book.

From 2020/21, property income of non-UK resident companies is subject to CT rather than IT.

The development of the rules can be traced through:

- HMRC "Non-resident companies chargeable to Income Tax and non-resident CGT: Consultation Document" (Mar 2017)[2]
- HMRC "Non-resident companies chargeable to income tax and non-resident CGT: summary of responses" (Dec 2017)[3]
- Draft FB clauses (July 2018)

[1] TLR Exposure Draft No. 13 discusses the terminology:

> "*Finding a suitable name*
>
> 223. Letting income has long been referred to as 'Schedule A income' by tax professionals. But that is not an informative label for the non-specialist and we are removing references to the Schedules.
>
> 224. We considered several possible new names for this type of income including 'land income', 'letting income', 'rental income', 'property business income' and 'property income'. We concluded that 'property income' offered the best compromise because:
>
> - it matches the names that are proposed for the other types of income: 'trading income', 'employment income' and 'savings and investment income';
> - for most people, it is likely to appear the most appropriate name; and
> - it links directly with what we think is the most appropriate name for the business activity ('property business'): 'land business' and 'rental business' might be particularly misleading.
>
> 225. The disadvantage is that it might appear to go wider than income just from land; that is, strictly, 'property' means more than just land and buildings. But we do not think that most people will find this confusing as the proposed use corresponds broadly to the popular use."

[2] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/601032/Non-resident_companies_chargeable_to_Income_Tax_and_non-resident_CGT_-_consultation.pdf*

[3] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/664178/Non-resident_companies_chargeable_to_income_tax_and_non-resident_CGT_summary_of_responses.pdf*

But these are now of historical interest only.

The change will add to complexity. CT is a more sophisticated tax than IT, in many respects, in particular:

(1) Treatment of interest (loan relationships)
(2) Corporate interest restriction (cap on debt funding deductions by reference to a percentage of the company's profits); Part 10 TIOPA
(3) Taxation of hybrids

Private client practitioners advising foreign companies will have to master CT rules which hitherto they could leave for corporation tax practitioners. Sarah Squires[4] comments:

> Schedule 5 FA 2019 is not particularly lengthy (14 pages only) - but it just deals with the basics (commencement, transitional provisions and the charge itself). The "consequential" provisions are basically the entirety of the Corporation Tax Acts - and although corporation tax is based on income tax principles, developments since the early 1990s mean that there are significant differences between the two taxes (particularly in relation to financing arrangements) - with these differences extending to compliance. For many non-resident landlords, the move to corporation tax brings with it a rather steep learning curve.[5]

See 121.23 (CT registration).

24.2 Property business terminology

The definitions are in s.263 ITTOIA/s.204 CTA 2009.

The CT definitions are applied (with modifications) in ATED rental business relief.[6]

24.2.1 *"UK property business"*

s.264 ITTOIA	**s.205 CTA 2009**
A person's UK property business consists of—	A company's UK property business consists of—
(a) every business which the person carries on for generating income from land in the UK, and	(a) every business which the company carries on for generating income from land in the UK, and

[4] Barrister, in practice at Taxchambers, 15 Old Square, Lincoln ‘s Inn. I am indebted to Sarah Squires for her comments and assistance on this topic.

[5] Lecture to CIOT Sept 2019.

[6] See 98.18 (ATED rental relief).

(b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.	(b) every transaction which the company enters into for that purpose otherwise than in the course of such a business.

At first sight para (b) is puzzling. EN ITTOIA explains:

> 1049. … the concept of the "property business" is, to a certain extent, an artificial one. Unlike the term "trade" it may not always correspond to an activity organised in a way that the proprietor would necessarily describe as a business. As such, the term has to cover:
> - "real" businesses where the lettings are organised in a professional way;
> - lettings which are not so organised; and
> - casual and one-off transactions which may have very little of the qualities normally associated with a business.
>
> Then all of these lettings of different types must be treated as part of the same, single business.

24.2.2 *"Overseas property business"*

s.265 ITTOIA	**s.206 CTA 2009**
A person's overseas property business consists of—	A company's overseas property business consists of—
(a) every business which the person carries on for generating income from land outside the UK, and	(a) every business which the company carries on for generating income from land outside the UK, and
(b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.	(b) every transaction which the company enters into for that purpose otherwise than in the course of such a business.

EN ITTOIA explains:

> 1056. The definition is identical to that of "UK property business" except that the land from which the income arises is outside the UK. That is the only difference between a UK and an overseas property business: income from land outside the UK can arise only in an overseas property business; income from land in the UK can arise only in a UK property business.
>
> 1057. For the purpose of deciding whether there is an overseas property business, overseas land law is interpreted in accordance with section

363.

See 24.6 (Overseas property business: loss) for a refinement to this definition.

24.2.3 *"Property business"*

Section 263(6) ITTOIA/s.204(1) CTA 2009 provide a commonsense definition:

> In this Act "property business" means a UK property business or an overseas property business.

ITTOIA/CTA take foreign income of a non-resident out of charge. They adopt the somewhat clumsy technique of amending the definitions of overseas property business/property business (it makes no practical difference):

s.263 ITTOIA	**s.204 CTA 2009**
(4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).	(2) References in this Act to a property business are to a property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, the rules about territorial scope in section 5).
(5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits concerned would not be chargeable to tax under Chapter 3.	(3) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of a property business if the profits concerned would not be chargeable to tax under Chapter 3.

24.2.4 *Generating income from land*

Section 266 ITTOIA/s.207 CTA 2009 provide:

> (1) In this Chapter "generating income from land" means exploiting an estate, interest or right in or over land as a source of rents or other receipts.
> (2) "Rents" includes payments by a tenant for work to maintain or repair leased premises which the lease does not require the tenant to carry out.
> (3) "Other receipts" includes—
> (a) payments in respect of a licence to occupy or otherwise use land,

> (b) payments in respect of the exercise of any other right over land, and
> (c) rentcharges and other annual payments reserved in respect of, or charged on or issuing out of, land.
> (4) For the purposes of this section a right to use a caravan or houseboat at only one location is treated as a right deriving from an estate or interest in land.

s.267 ITTOIA	**s.208 CTA 2009**
For the purposes of this Chapter the following activities are not carried on for generating income from land—	[identical]
(a) farming or market gardening in the UK (but see section 9 (UK farming or market gardening treated as trade)),	(a) farming or market gardening in the UK (but see section 36 (UK farming or market gardening treated as trade)),
(b) any other occupation of land (but see section 10 (certain commercial occupation of UK land treated as trade)), and	(b) any other occupation of land (but see section 38 (certain commercial occupation of UK land treated as trade)), and
(c) activities for the purposes of a concern to which section 12 applies (profits of mines, quarries etc).	(c) activities for the purposes of a concern to which section 39 applies (profits of mines, quarries etc).

24.3 Territorial limits: Property income

The charge is as follows:

s.268 ITTOIA	**s.209 CTA 2009**
Income tax is charged on the profits of a property business.	The charge to corporation tax on income applies to the profits of a property business.

The territorial scope of the charge is in s.269 ITTOIA/s.5 CTA 2009, but these provisions are not drafted in the same way.

24.3.1 *IT territorial limits*

Section 269 ITTOIA provides:

> (1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a

> non-UK resident.
> (2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.
> **270 Income charged**
> (1) Tax is charged under this Chapter on the full amount of the profits arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 270(2) ITTOIA feeds into s.832 which incorporates the remittance basis.

24.3.2 *Property income of split year*

Section 270(3) ITTOIA provides the usual split-year rule:

> If, as respects an individual carrying on an overseas property business, the tax year is a split year—
> (a) tax is charged under this Chapter on so much of the profits referred to in subsection (1) as arise in the UK part of the tax year, and
> (b) the portion of the profits arising in the overseas part of the tax year is, accordingly, not chargeable to tax under this Chapter.

Section 270(4) (not discussed here) deals with capital allowances.

24.3.3 *CT territorial limits*

The key provision is s.5(3A) CTA 2009, but it is necessary to read this in the context of the whole of section 5:

> (1) A UK resident company is chargeable to corporation tax on income on all its profits wherever arising (but see Chapter 3A for an exemption from charge in respect of profits of foreign permanent establishments).
> (2) A non-UK resident company is within the charge to corporation tax only if—
> (a) [dealing in or developing UK land]
> (b) [trade in UK through a UK PE],
> (c) it carries on a UK property business, or
> (d) it has other UK property income.[7]

[7] Section 5(5) CTA 2009 provides: "In this Part "other UK property income" means income dealt with by any of the following Chapters of Part 4—
(a) Chapter 7 (rent receivable in connection with a UK section 39(4) concern);
(b) Chapter 8 (rent receivable for UK electric-line wayleaves);
(c) Chapter 9 (post-cessation receipts arising from a UK property business)."

> (2A) [concerns dealing in or developing UK land]
> (3A) A non-UK resident company which carries on a UK property business is chargeable to corporation tax on income on all its profits that are—
> (a) profits of that business, or
> (b) profits arising from loan relationships or derivative contracts that the company is a party to for the purposes of that business.

Section 5(3B) CTA 2009 deals with the quantum of the charge:

> (3B) A non-UK resident company which has other UK property income is chargeable to corporation tax on income on all its profits that—
> (a) consist of that income, or
> (b) are profits arising from loan relationships or derivative contracts that the company is a party to for the purposes of enabling it to generate that income.

24.3.4 *Loan relationships charge*

Section 5(3A) CTA 2009 imposes two charges to CT:
(1) s.5(3A)(a): charge on profits of a UK property business
(2) s.5(3A)(b): charge on loan relationship/derivative contract profits

The reason for the second charge is s.211(1) CTA 2009 which provides:

> The profits of a property business are calculated without regard to items giving rise to—
> (a) credits or debits within Part 5 (loan relationships), or
> (b) credits or debits within Part 7 (derivative contracts).

Interest[8] is not taken into account in calculating profits of a UK property business for CT purposes. Instead the loan relationship /derivative codes apply. These give rise to non-trading credits and debits: and hence the need for a specific charging section to apply s.299 CTA 2009.[9]

The CT loan relationship charge applies so that non-trading profits[10] arising to a non-resident company from its loan relationships/derivative contracts are charged to CT - but only where the relevant amounts arise

[8] I use the term loosely, to include other financing amounts.

[9] The position of a non-resident company carrying on a property business is different from a non-resident company dealing/developing UK land, where credits/debits are brought into account as trading receipts/losses; see s.297 CTA 2009.

[10] See s299 and 301 CTA 2009.

from a loan relationship to which the non-resident is party for the purposes of its UK property business.

"For the purposes of" requires a link between interest income and property business. So for example, interest on late rent should be within s.5(3A)(a). But, if say, the non-resident company is also a holding company and has, independently of its property business, made a loan to a subsidiary, interest on that loan would be outside CT (although potentially subject to IT if the interest has a UK source).

Similarly, the loan relationship code governs the deductibility of interest payable by non-resident companies for CT purposes.[11] But again relief under the loan relationship code is only available where the nonresident company is party to the loan/derivative for the purposes of its UK property business.[12]

If a company's non-trading debits exceed its non-trading credits in an accounting period, a nontrading deficit arises - and relief can only be obtained on the making of a claim for sideways relief.[13]

The charge to tax under s.5(3A) CTA 2009 is subject to any applicable DTA.

24.4 Non-resident co: Transitional rules

24.4.1 *Commencement*

Para 35 sch 5 FA 2019 provides:

> This Schedule comes into force on 6 April 2020 ("the commencement date").

Para 49 sch 5 FA 2019 contains a forestalling TAAR, which is not discussed here.

24.4.2 *Accounting period across 6/4/20*

Para 36 sch 5 FA 2019 provides:

> 30 Where a period of account of a company begins before and ends on or after the commencement date, it is to be assumed for the purposes of

[11] See s.464 and s.1301A CTA 2009. Note: s.300(3) CTA 2009 means that a loan relationship can be brought into account under Part 5 CTA 2009 even if it is not itself a source of income.

[12] See s.301 CTA 2009.

[13] See s.463D CTA 2009.

the amendments made by this Schedule-

(a) that the period ("the straddling period of account") consists of two separate periods of account-

(i) the first beginning with the date on which the straddling period of account begins and ending with 5th April 2020, and

(ii) the second beginning with the commencement date and ending with the date on which the straddling period of account ends, and

(b) that separate accounts have been drawn up for each of those separate periods in accordance with generally accepted accounting practice.

24.4.3 *Losses*

Para 37 sch 5 FA 2019 provides:

> (1) This paragraph applies if—
>
> (a) in a tax year ending before the commencement date a company makes a loss in a UK property business that is within the charge to income tax,
>
> (b) relief for the purposes of income tax is not given to the company for an amount of the loss ("the unrelieved amount"), and
>
> (c) on the commencement date the UK property business ceases to be within the charge to income tax and comes within the charge to corporation tax as a result of section 5(3A) of CTA 2009.
>
> (2) Relief for the purposes of corporation tax is given to the company under this paragraph for the unrelieved amount.
>
> (3) For this purpose—
>
> (a) the unrelieved amount is carried forward to post-commencement accounting periods of the company (for so long as the company continues to carry on the UK property business), and
>
> (b) the profits of any such accounting period that are mentioned in subparagraph (4) are to be reduced by the unrelieved amount (so far as that amount cannot be used under this paragraph to reduce the profits of an earlier period).
>
> (4) The profits are—
>
> (a) profits of the UK property business, and
>
> (b) profits arising from loan relationships or derivative contracts that the company is a party to for the purposes of that business.
>
> (5) In this paragraph "post-commencement accounting period" means an accounting period ending after the commencement date.

24.4.4 *Company in partnership*

Para 38 sch 5 FA 2019 provides:

> (1) This paragraph applies if—
> (a) in the tax year 2019-20 a non-UK resident company is a partner in a firm which—
> (i) carries on a trade, and
> (ii) has untaxed income or relievable losses from a UK property business, and
> (b) accordingly, the company is treated under section 854 of ITTOIA 2005 as having a notional business for the tax year.
> (2) The basis period for the notional business for the tax year is taken to end with 5th April in that tax year (if it would not otherwise do so).
> (3) In this paragraph "untaxed income" has the meaning given by section 854(6) of ITTOIA 2005.

24.5 Quantum of property income

The quantum of property income is dealt with in a series of provisions from s.271A ITTOIA/s.210 CTA 009 onward; this is not discussed here, though I hope to address it in a future edition.

24.5.1 *Property income: IT computation*

The Property Income Manual provides:

> **2105. Introduction** [Mar 2018]
> **... Interest rate hedging instruments**
> Where an interest rate hedging contract such as a swap or cap is taken out to hedge interest payments which are deductible in computing the profits or losses of a rental business, then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that rental business. This is because trading principles are imported into the property income computation rules. Profits and losses on such instruments should normally be computed on an accruals basis so that payments and receipts are allocated to the periods to which they relate, without regard to the periods in which they are made or received or become due and payable, in accordance with normal accounting practice. For more on the tax treatment of swaps held by IT payers see PIM2066.

24.6 Overseas property business: Loss

24.6.1 *Losses from 2008/09*

Chapter 4 Part 4 ITA provides loss relief for a property business. There are three classes of loss relief:

(1) Carry forward against subsequent property business profits: ss.118–119 ITA.

(2) (a) Capital allowance losses and
(b) agricultural estate losses.
Sections 120–124 ITA.

(3) Post-cessation property relief: ss.125–126 ITA.

In this chapter I consider only the first of these reliefs. Section 118 ITA provides:

> (1) Relief is given to a person under this section if the person—
> (a) carries on a UK property business or overseas property business (alone or in partnership) in a tax year, and
> (b) makes a loss in the business in the tax year.
> (2) The relief is given by deducting the loss in calculating the person's net income for subsequent tax years (see Step 2 of the calculation in section 23).
> (3) But a deduction for that purpose is to be made only from profits of the business.[14]

The Property Income Manual correctly summarises:

> **4703 CT** [Apr 2018]
> *Losses*
> As part of the changes made by FA95, the taxable profits and losses of

[14] For completeness, the ITA continues:
"(4) In calculating a person's net income for a tax year, deductions under this section from the profits of a business are to be made before deductions of any other reliefs from those profits.
(5) No relief is to be given under this section so far as relief for the loss is given under section 120.
(6) This section needs to be read with section 119 (how relief works).
119 How relief works
This section explains how the deductions are to be made.
The amount of the loss to be deducted at any step is limited in accordance with section 25(4) and (5).
Step 1 Deduct the loss from the profits of the business for the next tax year.
Step 2 Deduct from the profits of the business for the following tax year the amount of the loss not previously deducted.
Step 3 Continue to apply Step 2 in relation to the profits of the business for subsequent tax years until all the loss is deducted."

> overseas let property were ring fenced for IT purposes. The effect was that:
>
> - losses of an overseas property business cannot, for IT purposes, be set against profits of a UK property business carried on by the same individual,
> - similarly, losses of UK property business cannot for IT purposes be set against profits of an overseas property business carried on by the same individual.

The definitions of UK property business and overseas property business in ITTOIA were only ITTOIA-wide definitions (they do not apply for all the Income Tax Acts) so the drafter of the ITA had to repeat them. Section 989 ITA extends them to the Income Tax Acts:

> The following definitions apply for the purposes of the Income Tax Acts—
>
> "overseas property business" has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005,
>
> "UK property business" has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005

At this point we need to consider s.263(4)(5) ITTOIA which restricts the meaning of "overseas property business":

> (4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).
>
> (5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits concerned would not be chargeable to tax under Chapter 3.

I refer to this provision as the **"non-chargeable overseas property business rule".** This rule applies for the purposes of "this Act" (ITTOIA). However it is suggested that this applies for the purposes of loss relief in the ITA, s.989 ITA incorporates the s.263 rule, because it incorporates the definition of Chapter 2 Part 3 ITTOIA, and s.263 is in Chapter 2.

Suppose T carries on an overseas property business and:

(1) Year 1: T is non-resident and realises losses;

(2) Year 2: T is UK resident and realises profits.

The losses of Year 1 are disallowed since the profits of that year are not chargeable under Chapter 3 (or at all) so there is no overseas property business. In short, losses of non-residents are not relievable. *Quaere* whether this would apply if T were resident in an EU member state.

What about an overseas property business carried on by a remittance basis taxpayer? An overseas property business which is taxed under the remittance basis is (from 2008/09) taxed under Chapter 3 (even though the amount of income taxed is determined by s.832 ITTOIA which is not in chapter 3.) So the non-chargeable overseas property business rule does not disallow loss relief. Presumably this change was intentional as it was not desired to introduce an equivalent of the incomprehensible CGT loss rules into this context.[15]

24.6.2 *Losses before 2008/09*

The position was different before 2008/09. This is still relevant in relation to the question of whether pre-2008 losses can be carried forward and set against post 2008 profits. The relevant legislation in ITTOIA provided:

> **268 Charge to tax on profits of a property business**
> Income tax is charged on the profits of a property business.
> **269 Territorial scope of charge to tax**
> (1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.
> (2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.
> *(3) But, in the case of an overseas property business carried on by a UK resident to whom the remittance basis applies, the only profits of the business chargeable to tax under this Chapter are those in respect of land in the Republic of Ireland.*
> *(4) For a UK resident to whom the remittance basis applies, see also Chapter 11 (charge to tax on overseas property income other than income arising in Republic of Ireland).*

(Words in italics repealed by the FA 2008.) Thus for a remittance basis taxpayer, and ignoring the special case of land in Ireland,[16] the charge was not under Chapter 3. Instead it was in Chapter 11 (also repealed in the FA 2008). This provided:

> ***357 Charge to tax on overseas property income***
> *Income tax is charged on the overseas property income of a person to*

[15] See 65.16 (Loss of remittance basis taxpayer).

[16] I do not discuss Irish property income here, but note that the pre-2008 legislation was in breach of EU law; see 17.22 (RFI from Ireland).

> *whom the remittance basis applies.*
>
> ***358 Meaning of "overseas property income"***
>
> *In this Chapter "overseas property income", in relation to a person to whom the remittance basis applies, means amounts which*
>
> *(a) are not brought into account in calculating the profits of any overseas property business of the person, but*
>
> *(b) would be if section 269(3) (charge to tax on profits of an overseas property business of a person to whom the remittance basis applies only in respect of land in the Republic of Ireland) were omitted.*
>
> ***359 Income charged***
>
> *Tax is charged under this Chapter on the amount specified by section 832 (relevant foreign income charged on the remittance basis).*

So before 2008, the remittance basis taxpayer did not have an "overseas property business" so there could not be loss relief. In the 2007/08 edition of this book I commented:

> This is consistent with the CGT treatment of losses. It may be desirable for a foreign domiciliary not to claim remittance basis treatment in the year that a loss accrues in order to obtain that loss relief. Though the cost of that claim must be set against the benefit of the remittance basis in that year.
>
> Suppose the loss is allowable in the year it accrues but in a subsequent year the owner claims remittance basis treatment. The loss is not allowable in that year. However, it is suggested that the loss can be carried forward and set against profits of other years if the arising basis applies to those years.

It is suggested that a loss which did not qualify for relief in the year that it accrued cannot be carried forward to 2008/09 or subsequently. HMRC may well agree. The Property Income Manual provides:

> **4705. IT cases up to 2004-05** [April 2018]
>
> No loss can ever arise on income taxed on the remittance basis.

Offshore property business losses from before 1998/99 are allowable under ESC B25, but it seems unlikely that any such losses will still be available to be carried forward to the present time.

24.7 DT relief: Property income

Article 6(1) OECD Model provides:

> Income derived[17] by a resident of a Contracting State from immovable property (including income from agriculture or forestry) situated in the other Contracting State may be taxed in that other State.

The significance of this is that income from immovable property does not fall within article 21 ("Other Income", which is taxed only in the state of residence).[18] Instead, it is taxed in the source state with credit given in the state of residence.

OECD Model Commentary provides:

> 1. Paragraph 1 gives the right to tax income from immovable property to the State of source, that is, the State in which the property producing such income is situated. This is due to the fact that there is always a very close economic connection between the source of this income and the State of source. ... Article 6 deals only with income which a resident of a Contracting State derives from immovable property situated in the other Contracting State. It does not, therefore, apply to income from immovable property situated in the Contracting State of which the recipient is a resident within the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 [other income] shall apply to such income.

24.7.1 *"Immovable property"*

The definition of immovable property is important for article 6 and for article 13 (capital gains).

Article 6(2) OECD Model Convention provides:

> [a] The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated.
> [b] The term shall in any case include
> [i] property accessory to immovable property,
> [ii] livestock and equipment used in agriculture and forestry,
> [iii]rights to which the provisions of general law respecting landed property apply,[19]
> [iv] usufruct of immovable property and
> [v] rights to variable or fixed payments as consideration for the

[17] See 15.11.1 ("Deriving" income).

[18] See 33.20 (DT relief: "Other Income").

[19] This wording was designed to address an issue concerning property rights attached to Italian landed estates; see *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 at [46].

> working of, or the right to work, mineral deposits, sources and other natural resources;[20]
>
> [c] ships, and aircraft shall not be regarded as immovable property.

OECD Model Commentary provides:

> 2. Defining the concept of immovable property by reference to the law of the State in which the property is situated, as is provided in paragraph 2, will help to avoid difficulties of interpretation over the question whether an asset or a right is to be regarded as immovable property or not. The paragraph, however, specifically mentions the assets and rights which must always be regarded as immovable property. In fact such assets and rights are already treated as immovable property according to the laws or the taxation rules of most OECD member countries. ... No special provision has been included as regards income from indebtedness secured by immovable property, as this question is settled by Article 11.[21]

24.7.2 *Property income or other income*

Article 6(3) elucidates "derived from" immovable property:

> 3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property.

OECD Model Commentary provides:

> 3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property....

Mortgage interest is classified as interest income rather than property income.[22]

OECD Model Commentary comments on the border between property income and company distribution income:

> 3. ... Income in the form of distributions from Real Estate Investment Trusts (REITs), however, raises particular issues which are discussed in paragraphs 67.1 to 67.7 of the Commentary on Article 10.

Article 6(4) deals with the overlap of business income and property income:

[20] See *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 at [54] - [67].

[21] See 26.27.5 (DTA definition of interest).

[22] The definition of interest in OECD Model article 11(3) expressly includes income secured by mortgage: see 26.27.5 (Definition of interest).

> 4. The provisions of paragraphs 1 and 3 shall also apply to the income from immovable property of an enterprise.

OECD Model Commentary provides:

> 3. ... Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises. ...
> 4. It should be noted in this connection that the right to tax of the State of source has priority over the right to tax of the other State and applies also where, in the case of an enterprise, income is only indirectly derived from immovable property.[23] This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of an enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudge the application of domestic law as regards the manner in which income from immovable property is to be taxed.

24.8 Non-resident landlord scheme

24.8.1 *Background*

Section 971(1) ITA 2007 provides:

> HMRC may by regulations make provision for—
> (a) the collection, from non-resident landlord representatives of a prescribed description, of prescribed amounts of income tax in respect of non-resident landlord income, and
> (b) the assessment and recovery of the income tax on or from such persons.

This is known as the non-resident landlords scheme ("NRLS").

The regulations are the Taxation of Income from Land (Non-residents) Regulations 1995, which I abbreviate to **NRLR**. The policy of the Tax Law Rewrite was not to rewrite or update statutory instruments, so the regulations retain out of date references to the former legislation in ICTA

[23] *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 follows this and adds at [48]: "The reference here to "indirectly" is presumably to the fact that, for a trader, the income may simply form a component of the trader's taxable profit, but nonetheless for Article 6 purposes it is not to be treated as losing its character as income from immovable property."

1988, and use the old terminology. (I add the current references in brackets).

HMRC have issued guidance which I call the **"NRLS guidance"**.[24] This guidance was first published in 2014, with the most recent edition published in 2023. However, the former edition is still of interest as it contains guidance not found elsewhere.

See too 26.19 (Withholding taxes: Introduction).

24.8.2 *"Non-resident landlord income"*

Section 971(2) ITA 2007 provides:

> "Non-resident landlord income" means income
> [a] of a person whose usual place of abode is outside the UK ("the non-resident") and
> [b] which is or may become chargeable as the profits of a UK property business under Chapter 3 of Part 3 of ITTOIA 2005 or Chapter 3 of Part 4 of CTA 2009.

24.8.3 *"Landlord representative"*

Section 971(3) ITA 2007 provides:

> "Non-resident landlord representative" means—
> (a) a person by whom any sums are payable to the non-resident which are to be treated as receipts of a UK property business (within the meaning of Chapter 2 of Part 3 of ITTOIA 2005 or Chapter 2 of Part 4 of CTA 2009) carried on by the non-resident, or
> (b) a person who acts on behalf of the non-resident in connection with the management or administration of any such business.

I refer to a person within (a) as the **"tenant"** and a person within (b) is the **"letting agent"**.

24.9 Non-resident landlord

24.9.1 *Partnerships*

The NRLS guidance provides:

[24] HMRC, "The Non-resident Landlords Scheme: Guidance notes for letting agents and tenants" (last updated 10 November 2023) *https://www.gov.uk/government/publications/non-resident-landord-guidance-notes-for-letting-agents-and-tenants-non-resident-landlords-scheme-guidance-notes*

> For the purposes of the NRLS, landlords may include: individuals, companies, trustees, partnerships. Each partner is treated as a separate landlord for their share of the rental income.

24.9.2 *Joint owners*

The PI Manual provides:

> **PIM4810 summary of the non-resident landlord scheme** [May 2020]
> ... For jointly owned property (e.g. husband and wife), each individual is treated as a separate landlord. It is possible for some of those landlords and not others to be NRLs for the purposes of the NRL scheme. For example it is possible for one spouse to be a NRL and within the scheme, while the other lives in the UK and is unaffected by the scheme.

The former NRLS guidance provides:

> **Jointly owned property**
> 2.7 Where a property is jointly owned and one or more of the joint owners has a usual place of abode outside the UK, the share of rental income attributable to those joint owners falls within the NRL Scheme. The share attributable to joint owners who do not have a usual place of abode outside the UK does not fall within the Scheme.

24.9.3 *Husband and wife*

The NRLS guidance provides:

> **Joint ownership by spouses or civil partners**
> The NRLS applies to both spouses and each are treated as a separate landlord, if: the spouses or civil partners jointly own a UK property [and] they both have their usual place of abode outside the UK.
> If they both wish to receive the rental income with no tax deducted, both must complete a separate application form and send it to HMRC.
> Letting agents and tenants only pay rental income with no tax deducted to the person named on a HMRC authorisation.
> You should not pay rent without tax deducted to a person who does not hold authority to do so, even if their spouse or civil partner does.
> If only one spouse or civil partner has a usual place of abode outside the UK, the NRLS applies to only that person's share of the rental income.
> The Scheme will not apply to the rental income belonging to the UK-resident spouse or civil partner. They will not need HMRC approval to receive income without tax deducted, but must notify HMRC that they receive UK property income.

24.9.4 *Armed forces, Crown servants*

The NRLS guidance provides:

> **Members of HM Armed Forces and other Crown Servants**
> Members of HM Armed Forces and other Crown Servants are treated the same as any other non-resident landlord. If they receive UK rental income and have a usual place of abode outside the UK, the NRLS applies to them.
> If their usual place of abode is outside the UK and they wish to receive rental income with no tax deducted, they'll need to apply to HMRC for approval.

24.10 Definitions

24.10.1 *"Agent"*

Reg 2 NRLR provides:

> In these Regulations unless the context otherwise requires—
> "agent" means a person falling within [s.42A(2)(b) ICTA = s.971(3)(b) ITA, a person who acts on behalf of the non-resident in connection with the management or administration of a UK property business]

I use the term **"letting agent"** (following the NRLS guidance). The NRLS guidance provides:

> For example, a solicitor would be an excluded person if their only action in relation to a UK property was either to:
> - receive apportioned rental income or a premium in the course of a conveyance
> - take legal proceedings for the recovery of arrears of rental income.
>
> Solicitors who draw up a lease and collect the rent for the first period are not excluded persons.
> Drawing up a lease is providing a legal service, but collecting the rent means the solicitor is also acting as a letting agent.
> Banks and building societies are not treated as letting agents for the purposes of the NRLS if they only provide an account where:
> - rental income is paid into
> - withdrawals are made from.
>
> People who find tenants for non-resident landlords are not treated as letting agents for the purposes of the Scheme if they either:
> - receive fees for that service but do not handle or control any rental income
> - handle or control income only for short periods - for example, a tenant-finder.

The NRLS guidance provides:

> **Tenant-finders**
>
> Some people enter into arrangements with non-resident landlords where they find a tenant for the landlord's property.
>
> The tenant-finder then collects rent for a period from which they recover the fee. The tenant then pays rental income to the landlord. In these circumstances, the tenant-finder does not have to operate the NRLS for the landlord, provided the:
>
> - period for which rent is collected is no more than 3 months
> - tax which would be payable would be no more than £100.
>
> The non-resident landlord will receive rental income with no tax deducted for a period where tenant-finders:
>
> - collect that period's rent
> - do not have to operate the Scheme
>
> As a result tenants will pay rent directly to the landlord and may have to operate the Scheme. In these circumstances tenant-finders should tell the tenant of their obligations under the NRLS.

The former NRLS guidance provides:

> 3.28 **Example 1**
>
> Janet finds a tenant for a non-resident landlord in respect of a property rented at £500 per month. Janet collects two months' rent in order to recover her fee, £700. The tenant pays the rent direct to the landlord from the third month.
>
> If Janet were required to operate the scheme, her tax calculation would be (see Chapter 4 below):

Rental income received	£1000
Less deductible expenses	£700
	£300
Basic Rate tax on £300	£60
(20% for 2010/11)	

> As the tax is less than £100, Janet does not have to operate the Scheme.
>
> 3.29 **Example 2**
>
> John finds a tenant for a non-resident landlord in respect of a property rented at £2000 a year. John collects six months' rent in advance from which he recovers his fee of £500. John also pays insurance and repairs of £400.
>
> John's tax calculation is (see Chapter 4 below):

Rental income received	£1000
Less deductible expenses	£900
	£100

Basic Rate tax on £100 (20% for 2010/11)	£20

The tax is only £20 but because John collects more than three months' rent he must operate the Scheme. He should deduct the tax of £20 and pay it with his quarterly return (see Chapter 4 below).

24.10.2 *"Non-resident" (place of abode)*

> In these Regulations unless the context otherwise requires—
> "non-resident" means a person who has his usual place of abode outside the UK;

The place of abode matters on two occasions:

(1) The landlord is only within the regulations if their place of abode is outside the UK.

(2) The agent or tenant is only a prescribed person if their place of abode is in the UK.

For the meaning of the expression, see 26.22 (Usual place of abode).

24.10.3 *"Schedule A business"*

Reg 2 NRLR sends the reader on a wild goose chase:

> "Schedule A business" shall be construed in accordance with subsection (8)(a) of section 42A [ICTA 1988]

Section 42A(8) was repealed in 1998: It provided that:

> *This section shall have effect—*
> *(a) as if references in this section to a Schedule A business included references to any activities which would be comprised in a Schedule A business if they were carried on by an individual, rather than by a company...*

That rule was needed for the short period from 1995 when individuals were taxed on the profits of a schedule A business, but companies were still taxed under the former schedule A. Now companies are taxed on a UK property business, as individuals, this rule has no effect.

The Tax Law Rewrite replaced the expression "schedule A business" with "UK property business", which is how the expression must now be understood.

These irritations are bound to arise under the rewrite project, under which statutes were rewritten but statutory instruments were not; but it does not ultimately matter.

24.10.4 *Quarters and other time periods*

Reg 2 NRLR provides:

> "annual period" means the period commencing on 1st April and ending on the following 31st March;
> "quarter" means—
> (a) the period from 6th April 1996 to 30th June 1996;
> (b) any subsequent period of 3 months ending with the last day of September, December, March or June;
> "year" means year of assessment.

24.10.5 *"Payments to the board"*

The regulations refer to payments being made "to the Board" of HMRC. Para 169 sch 2 ITA provides:

> (1) Sub-paragraph (2) applies to any references in the Taxation of Income from Land (Non-residents) Regulations 1995 (SI 1995/2902) to payments to be made to the Board in respect of tax that is or may become chargeable as the income from a business of a non-resident (as defined in those regulations).
> (2) On and after 6 April 2007 those references are to be read as references to income tax to be paid to the Commissioners for Her Majesty's Revenue and Customs in respect of non-resident landlord income (as defined in section 971(2)).

24.11 Prescribed persons

Reg 1(2) NRLR provides:

> These Regulations shall have effect with respect to any payment[25] made on or after 6th April 1996 which—
> (a) constitutes income of a Schedule A [UK property] business carried on by a non-resident, and
> (b) either—
> (i) is made by a person
> [A] falling within subsection 42A(2)(a) ICTA [= s.971(3)(a) [a tenant]
> [B] who is a prescribed person in respect of the non-resident, or
> (ii) is received by an agent who is a prescribed person in respect

[25] For the meaning of payment, see 15.3 (Recognition/attribution: Analysis),

> of the non-resident or by another person at the direction of that agent.

Thus being a prescribed person is a key to the application of the scheme. There are three categories of prescribed person. In order of priority:

(1) Agent or tenant with HMRC notice
(2) Agent without HMRC notice
(3) Tenants without HMRC notice

24.11.1 *Agent/tenant has HMRC notice*

Regulation 3(1) NRLR provides:

> (1) In any case where
> [a] a person falling within [42A(2)(a)(b) ICTA = s.971(3) ITA, an agent or tenant]
> [b] is issued with a notice by the Board stating that he is a prescribed person for the purposes of [s.42A(1) = s.971(1) ITA] in respect of the Schedule A [UK property] business of a non-resident, or a part of that business,
> that person is prescribed for the purposes of subsection (1) of that section in respect of that business or, as the case may be, the part referred to in the notice.

Regulation 3(2) NRLR deals with the content of the notice:

> (2) Except where it relates to a part of a non-resident's Schedule A [UK property] business , a notice under paragraph (1) above need not specify the name of the non-resident concerned or describe his Schedule A [UK property] business.

The NRLS guidance provides:

> You cannot transfer a notice you hold to a new letting agent or tenant if either:
> - a non-resident landlord changes letting agents
> - a tenant does not have a letting agent
>
> In these circumstances, the landlord should write to HMRC with details of the new letting agent or tenant.
> We will then send a notice to the new letting agent or tenant. New letting agents or tenants must deduct tax until they receive a notice from HMRC.

24.11.2 *Agent without HMRC notice*

Regulation 3(3) NRLR provides:

> In any case where—
> (a) no notice has been issued by the Board under paragraph (1) above in respect of a non-resident's Schedule A [UK property] business , or there is a part of his business in respect of which no notice has been issued under that paragraph; and
> (b) a person whose usual place of abode is in the UK—
> (i) is an agent in respect of that business or that part,
> (ii) has power to receive income in respect of that business or that part or has control over the direction of that income, and
> (iii) is not an excluded person,
>
> that person is, subject to paragraph (4) below, prescribed for the purposes of subsection (1) of section 42A in respect of that business or, as the case may be, that part.

Regulation 4 provides protection for lawyers by making them excluded persons:

> (1) In regulation 3—
> (a) "excluded person" means an agent whose activity on behalf of the non-resident in connection with the management or administration of his Schedule A [UK property] business or part thereof (as the case may be) is confined to the provision of legal advice or legal services;

24.11.3 *Power to select agent*

Regulation 3(4) NRLR provides:

> Where in a case falling within paragraph (3) above there is more than one person to whom sub-paragraph (b) of that paragraph applies as respects the same business or the same part of a business, the person who is the elected agent or, if there is no elected agent, the last agent is the person prescribed for the purposes of subsection (1) of section 42A in respect of that business or, as the case may be, that part.

The NRLS guidance provides:

> **Elected letting agents**
> Where there's a chain of letting agents, responsibility for operating the Scheme can be transferred. It can be transferred from the last agent to any other agent in the chain, by making a joint election to transfer.

Regulation 4 provides:

> (1) In regulation 3—

> (b) "elected agent" means the agent who is elected jointly by the last agent and himself to assume the responsibilities of a prescribed person for the purposes of [s.42A(1) ICTA = s.971(1) ITA] in relation to the Schedule A [UK property] business or part thereof (as the case may be);

Regulation 4 then deals with procedural aspects of an election:

> (2) An election shall be made by notice to the Board signed by the last agent and the person to be elected, and any such notice shall state—
> (a) the name and address of the agent elected, and
> (b) the date from which the election has effect, not being a date earlier than the first day of the quarter in which the election is made.
>
> (3) An election may be revoked by notice to the Board given by either of the agents who made the election, and any such revocation shall have effect—
> (a) from the first day of the quarter next following the date on which the notice is received by the Board, or
> (b) after the expiry of 30 days following the date on which the notice is received by the Board,
> whichever is the later to occur.

The NRLS guidance provides:

> To make an election, write to HMRC and give the following details:
> - name and address of the elected letting agent
> - name and address of the other letting agent
> - name and address of the non-resident landlord or landlords
> - date from when the election is to take effect (the letting agents can choose this date but it cannot be before the first day of the quarter in which the election is made).
>
> The election must be signed by both letting agents by either:
> - sending in one letter signed by both parties
> - writing in separately and each providing the same information
>
> There is no special form for making an election.
>
> Letting agents may wish to make an election for only part of a landlord's rental business. They can do this by specifying the property to which the election relates.
>
> Either letting agent may revoke the election by writing to HMRC. This will take effect from whichever date is later, either:
> - the first day of the quarter following the date the notice of revocation is received
> - 30 days after the date the notice of revocation is received

> HMRC will write to both letting agents telling them the date from when the revocation is effective.

In the absence of an election we fall back on the last agent. Regulation 4(1) defines the expression:

> (1) In regulation 3—
>
> (c) "last agent" means the agent by whom sums constituting income from the non-resident's Schedule A [UK property] business or part thereof (as the case may be) are paid directly to the non-resident or to an agent whose usual place of abode is outside the UK or to a person who is not an agent.

24.11.4 *UK tenant*

In the absence of an agent, we fall back on the tenant. Regulation 3(5) NRLR provides:

> In any case where—
>
> (a) no notice has been issued by the Board under paragraph (1) above in respect of a non-resident's Schedule A [UK property] business , or there is a part of his business in respect of which no notice has been issued under that paragraph;
>
> (b) there is no person to whom paragraph (3)(b) above applies in respect of that business or that part; and
>
> (c) a person whose usual place of abode is in the UK—
>
> (i) is a tenant of premises owned by the non-resident in connection with that business or that part, and
>
> (ii) is liable to pay to the non-resident in respect of his occupation of those premises sums exceeding in the aggregate £5,200 per annum or, where he occupies the premises for less than one year, the proportionate amount of that sum which is determined by the duration of his occupation,
>
> that person is prescribed for the purposes of subsection (1) of section 42A [= s.791 ITA] in respect of that business or, as the case may be, that part.

£5200 per annum is equivalent to £100 per week. The figure has not been increased since 1995.

The NRLS guidance provides:

> If you share a property with other tenants and each of you is named on the lease, the £5,200 limit will apply separately to each of you for your share of the rent. This will apply even if each of you are jointly and

> severally liable for all the rent payable under the lease. If you share a property with other tenants but only one of you is named on the lease, the £5,200 limit will apply to that person for all the rent payable.
> The limit of £5,200 applies for each landlord. If you have several non-resident landlords, you must operate the Scheme only for those landlords who you need to pay more than £5,200 per year.

24.11.5 *Prescribed person a partnership*

Regulation 5 NRLR provides:

> In any case where a liability to make any payment to the Board under these Regulations arises from amounts payable or things done in the course of a business carried on by any persons in partnership, that partnership as such shall be treated for the purposes of these Regulations as a person falling within subsection (2)(a) or (b) (as the case may be) of section 42A.

24.11.6 *Agent with multiple principals*

Regulation 6(1) provides:

> In any case where an agent—
> (a) is a prescribed person by virtue of regulation 3 in respect of the Schedule A [UK property] business , or part thereof, of more than one non-resident,
> (b) acts on behalf of those non-residents through branches[26] of his business in circumstances where the average number of non-residents in each branch at the relevant time[27] is not less than five, and
> (c) is a person approved by the Board for the purposes of this regulation,
>
> that person shall be treated for the purposes of these Regulations as if in respect of each branch he were a separate and distinct person.

Each branch puts in its own return. It is not clear to me why the agent should find that useful.

[26] Regulation 6(11) provides a wide definition: "In this regulation ... references to branches of an agent's business are references to the units (of whatever kind) into which the agent has divided his business."

[27] Defined reg 6(11): "In this regulation ... references to "the relevant time" are references to the time at which an application for approval is made by the prescribed person."

The rest of reg 6 deals with the procedure for application and approval:

> (2) An application for approval under paragraph (1) above shall be made to the Board in a form provided or authorised by the Board which shall contain—
>
> (a) such information as is necessary to identify the branches concerned,
>
> (b) the number of non-residents in each branch, and
>
> (c) a declaration by the prescribed person that he does not act on behalf of any non-residents other than those whose business is managed by the branches so identified.
>
> (3) An approval under paragraph (1) above shall, unless revoked or withdrawn, have effect for the quarter following that in which it is given and for any subsequent quarter.
>
> (4) An approval may be revoked by the prescribed person by notice to the Board and, subject to paragraph (5) below, such revocation shall have effect for the quarter following that in which it is given and for any subsequent quarter.
>
> (5) Notwithstanding the revocation of approval under paragraph (4) above, a further application for approval may be made by the prescribed person in accordance with paragraph (2) above at any time following the revocation; and paragraph (3) above shall apply accordingly in relation to an approval given in response to that application.
>
> (6) The Board may, by notice to the prescribed person, refuse approval where they have reason to believe that—
>
> (a) the average number of non-residents in each branch is less than five at the relevant time, or
>
> (b) there is likely to be a failure on the part of the prescribed person to comply with the obligations imposed on him under these Regulations in relation to any branch, or
>
> (c) the declaration given by the prescribed person pursuant to paragraph (2)(c) above is incorrect.
>
> (7) The Board may, by notice to the prescribed person, withdraw approval where they have reason to believe that—
>
> (a) the average number of non-residents in each branch was at the relevant time, or has since become, less than five, or
>
> (b) there has been a failure on the part of the prescribed person to comply with the obligations imposed on him under these Regulations in relation to any branch, or
>
> (c) the declaration given by the prescribed person pursuant to paragraph (2)(c) above was, or has become, incorrect.
>
> (8) The prescribed person may appeal against a notice under paragraph

> (6) above refusing approval, or a notice under paragraph (7) above withdrawing approval, by notice to the Board within 30 days of the date of issue of the notice of refusal or, as the case may be, the notice of withdrawal.
> (10) The tribunal shall, on an appeal notified to it, confirm the notice of refusal or withdrawal unless . . . satisfied that it ought to be quashed.

For the procedure, see the NRLS guidance 'Which agents should operate the Non-resident Landlords Scheme'. It does not seem of sufficient importance to set it out here.

24.11.7 *Agent duty to register*

Regulation 7 NRLR provides:

> (1) The person prescribed by paragraph (2) below shall, within the period of 30 days following the date specified in paragraph (3) below, register with the Board the following details—
> (a) his name and address, and
> (b) his tax office reference, if he has one.
> (2) The person prescribed by this paragraph is any person who is—
> (a) an agent in respect of the Schedule A [UK property] business, or part thereof, of a non-resident, and
> (b) a person prescribed by regulation 3 in respect of that business or that part.
> (3) The date specified in this paragraph is the date on which the agent became a person prescribed by regulation 3 in respect of that business or that part.

Registration is done by form NRL4.

24.12 Tax computation: Agent

The NRLS guidance provides:

> The amount of tax shown on the certificate may not be the same as the non-resident landlord's tax liability for the profits of their rental business. The rules of the NRLS are not the same as the rules for taxing the profits of a rental business.

There are different rules for tenants and for agents. I deal with agents first, as that is the usual case.

Regulation 9(1) NRLR provides:

> An agent who is a prescribed person in respect of the Schedule A [UK property] business , or part thereof, of a non-resident shall calculate for

> each quarter the amount of any payment to be made to the Board in respect of tax which is or may become chargeable on the income from that business or that part.

Regulation 9(2)(3) explains the computation:

> (2) The amount of the payment to be calculated is the amount of tax at the basic rate on the amount which results after deducting from the income specified in paragraph (3) below—
> (a) the expenses specified in paragraph (4) below, and
> (b) any excess amount of expenses falling to be deducted from that income in accordance with paragraph (5) below.
> (3) The income specified is all income which falls to be treated as a receipt of that business or that part, other than income specified in regulation 8(3), and which either—
> (a) was received by the prescribed person in the quarter concerned, or
> (b) was income which it was in his power to receive or over whose direction he had control but which was paid at his direction to another person in that quarter without being received by him.

The exception in reg 8(3) NRLR relates to non-resident companies with a UK branch within the scope of CT:

> The income specified in this paragraph is any income which—
> (a) is attributable to a branch of the non-resident in the UK, and
> (b) is chargeable to corporation tax.

24.12.1 *Rental income*

The NRLS guidance provides:

> You should take into account all rental income received or paid in the quarter, even if it relates to rent due for an earlier or later period. You should not calculate tax for a quarter on rental income that was due in the quarter, but was not paid in the quarter.
>
> ...
>
> **When rental income is received or paid by cheque**
>
> If you're a letting agent you'll receive income by cheque on the day the cheque is paid into your account, not on the day it is cleared. If the cheque is dishonoured, you should not take the amount into account in your calculation of tax due.
>
> If you're a tenant paying rental income by cheque the payment is made on the day you send the cheque to the landlord, not on the day it is cashed or cleared. If the cheque is dishonoured, you should not take the amount into

account in your calculation of tax due.

Examples of rental income

Rental income includes a variety of receipts from land and property. Rental income includes:

- income from letting furnished, unfurnished, commercial and domestic premises, and from any land
- where property is let furnished, any separate sums from the tenant for the use of the furniture
- rent charges, ground rents and feu duties
- premiums and other similar lump sums received on the grant of certain leases
- income arising from the grant of sporting rights, such as fishing and shooting permits
- income arising from allowing waste to be buried or stored on land;
- income from letting others use land - for example, where a film crew pays to film inside a person's house or on their land
- grants received from local authorities or others contributing to expenditure which is an allowable expense, such as repairs to a let property
- rental income received through enterprise investment schemes
- income from caravans or houseboats where these are not moved around various locations
- insurance recoveries under policies providing cover against non-payment of rent
- service charges received from tenants in respect of services ancillary to the occupation of property (other than those falling within Section 42 of the Landlord & Tenant Act 1987).

Premiums

Lump sums received up front for the grant of a lease of 50 years or less are liable to Income Tax. These receipts are generally called 'premiums'. They are treated wholly or partly as rental income.

[The guidance summarises the lease premium rules]

...

Income which is not rental income

There are certain receipts which come from the use of land that are not rental income. These include:

- income from woodlands managed on a commercial basis
- income from the types of concerns listed below
  - mines and quarries (including gravel pits, sand pits and brickfields)
  - ironworks, gasworks, salt springs or works, alum mines or works and water works and streams of water

  - canals, inland navigations, docks, and drains or levels
  - rights of markets and fairs, tolls, bridges and ferries
  - railways and other ways
  - lettings of tied premises by traders
- income from carrying out a trade — for example, running a hotel.

24.12.2 *Expenses*

Deduction is allowed for expenses paid by the agent. Regulation 9(4) NRLR provides:

> The expenses specified are all amounts paid in the quarter by the prescribed person or by another person at the direction of the prescribed person that—
>
> (a) the prescribed person is reasonably satisfied are deductible expenses, and
>
> (b) in relation to financing costs,[28] where the prescribed person elects, do not exceed the financing costs allowance.

The NRLS guidance provides:

> **'Reasonably be satisfied'**
>
> HMRC does not expect you to be a tax expert to operate the NRLS. The test is that an expense should be deducted only where you can 'reasonably be satisfied' that it is allowable in calculating the profits of the landlord's rental business. This provides protection for you in 2 ways:
>
> - Where you have reason to be uncertain whether an expense is an allowable expense of the non-resident landlord's rental business, you are justified under the rules in not deducting it when calculating the tax due.
> - Where you can reasonably be satisfied that an expense is an allowable expense of the non-resident landlord's rental business, you can deduct the expense without fear of being penalised if it is later found that the expense is not allowable.
>
> You cannot reasonably be satisfied that an expense is allowable in calculating the profits of the landlord's rental business solely because the landlord says that it is allowable. If you have reason to believe it may not be an allowable expense you should not deduct it.

[28] Regulation 9(10) NRLR provides: "(10) For the purposes of this regulation, "financing costs" and "the financing costs allowance" have the meanings given in regulation 9A(5)."

There is provision to carry back excess expenses:

> (5) Where in any quarter in an annual period the expenses specified in paragraph (4) above exceed the income specified in paragraph (3) above—
>
> (a) the amount of the excess shall first be deducted from the income specified in paragraph (3) above for previous quarters in that annual period, taking later quarters before earlier quarters, and

Failing that, there is provision for carry-forward of excess expenses:

> (b) any balance remaining of that amount shall be carried forward and deducted from the income specified in paragraph (3) above for subsequent quarters, including quarters after the end of that annual period, taking earlier quarters before later quarters.

The former NRLS guidance gives some examples:

> 4.11 **Example: carry back**
>
> ABC Ltd, a letting agent, acts for a non-resident landlord, Juan. In the quarter to 30 September 2010 it receives rental income of £2000 and pays deductible expenses of £500. In the quarter to 31 December 2010 it receives rental income of £2000 and pays deductible expenses of £3000. ABC Ltd's calculation for the quarter to 31 December 2010 is as follows:
>
> **Quarter to 31.12.10**

Rental income received	£2000
Less deductible expenses paid	£3000
Excess expenses	(£1000)

> ABC Ltd should set off the excess expenses against rental income received in the quarter immediately before the quarter to 31 December 2010, that is the quarter to 30 September 2010. Its revised calculation for that quarter will then be:
>
> **Quarter to 30.9.10**

Rental income received	£2000
Less deductible expenses paid	£500
Less excess expenses brought back from quarter to 31.12.10	£1000
Revised net income on which basic rate tax is due	£500

> ABC Ltd will have paid tax of £300 for the quarter to 30 September 2010 ((£2000 - £500) @ 20%).
>
> Paragraph 4.14 below describes how to recover the repayable amount.
>
> 4.12 **Example: carry forward**
>
> ABC Ltd, a letting agent, receives £2000 rental income for a non-

resident landlord, Juanita, in the quarter ending on 30 June 2010 and pays £3000 deductible expenses. In the quarter to 30 September 2010 it receives £500 and pays no expenses.

Quarter to 30.6.10

Rental income received	£2000
Less deductible expenses paid	£3000
Excess expenses	(£1000)

ABC Ltd cannot carry back the excess expenses because carry back is restricted to earlier quarters in the same year to 31 March.

Quarter to 30.9.10

Rental income received	£500
Less excess expenses brought forward	£1000
Balance of excess expenses available to ABC Ltd to carry forward	(£500)

4.13 Letting agents must not deduct excess expenses paid for one landlord from the rental income of another landlord. In the above examples, ABC Ltd cannot deduct excess expenses paid for Juanita from Juan's rental income.

Carry back allows a reclaim of withholding tax:

(6) Where an amount paid by a prescribed person in a previous quarter becomes repayable as a result of an excess amount being deducted from income pursuant to paragraph (5)(a) above, the amount repayable—

(a) shall first be set off by the prescribed person against payments due under this regulation in respect of other non-residents in respect of whose Schedule A [UK property] business or part thereof he is a prescribed person for the quarter in which the excess amount arises, and

(b) any balance remaining shall, on a claim being made to the Board by the prescribed person, be repaid to him.

The former NRLS guidance gives some examples:

4.15 Example 1

	Landlord A	Landlord B
Quarter to 30.6.10		
Rental income	£1000	£2000
Less deductible expenses	£200	£1000
	£800	£1000
Basic Rate tax (20% for 2010/11)	£160	£200
Total tax payable (£160 + £200)	£360	
Quarter to 30.9.10		
Rental income	£1000	£2000

Less deductible expenses	£1500	£1400
	(£500)	£600
Basic Rate tax (20% for 2010/11)	Nil	£120
Excess expenses carried back	£500	

When the letting agent carries back the excess expenses of £500 to quarter 1, his tax liability for quarter 1 will be reduced by £100 (£500 @ 20%).

He can set off this £100 against the tax calculated for quarter 2, £120. This leaves £20 (£120 less £100) payable.

4.16 Example 2

	Landlord A	Landlord B
Quarter to 30.6.10		
Rental income	£1000	£2000
Less deductible expenses	£600	£1000
	£400	£1000
Basic Rate tax (20% for 2010/11)	£80	£200
Total tax payable (£80 + £200)	£280	
Quarter to 30.9.10		
Rental income	£1000	£2000
Less deductible expenses	£1200	£1950
	(£200)	£50
Basic Rate tax (20% for 2010/11)	Nil	£10
Excess expenses carried back	£200	

When the letting agent carries back the excess expenses £200 to the earlier quarter, his tax liability for that quarter will be reduced by £40 (£200 @ 20%).

He can set off this £40 against the tax calculated for the quarter to 30.9.10, £10. This leaves £30 repayable. The letting agent should show £30 as repayable on his form NRLQ for the quarter to 30.9.10 and the Accounts Office will repay £30.

The rest of the regulation deals with minutiae of a repayment claim:

(7) A claim under paragraph (6)(b) above ("a repayment claim") shall be made in a quarterly return under regulation 10.

(8) An appeal from the Board's decision on a repayment claim shall be brought by giving notice to the Board within 30 days of receipt of notice of the decision.

(9) All such assessments, payments and repayments shall be made as are necessary to give effect to the Board's decision on a repayment claim or to any variation of that decision on appeal.

24.12.3 *Financing costs election*

The background can be found in

- HMRC Policy paper, "Income tax: Changes to the regulations for the Non-residents Landlord Scheme"[29]
- a Guidance note ("the 2020 changes guidance note")[30]

Regulation 9A NRLR provides:

> (1) This regulation applies where an election is made under regulation 9(4)(b).
> (2) The election—
> (a) must be notified to Her Majesty's Revenue and Customs with the annual return which relates to the first quarter to which the election applies, and
> (b) is irrevocable.
> (3) Where in any quarter in an annual period, the financing costs that the prescribed person is reasonably satisfied are deductible expenses exceed the financing costs allowance, the amount of the excess is carried forward and treated as financing costs in the next quarter, including a quarter after the end of that annual period.
> (4) Where in any quarter in an annual period, the financing costs allowance exceeds the financing costs that the prescribed person is reasonably satisfied are deductible expenses, the amount of the excess ("the unused allowance") is carried forward and included in the financing costs allowance in the next quarter, including a quarter after the end of that annual period.
> (5) For the purposes of this regulation—
> "financing costs" has the meaning given in section 544(4) and (5) of the Corporation Tax Act 2010, but in applying subsection (5) the reference to "accounting period" is to be read as a reference to "annual period";
> "the financing cost allowance" for a quarter is the sum of—
> (a) an amount equal to 30% of the relevant amount for that quarter, and
> (b) the unused allowance for the previous quarter;
> "the relevant amount" for a quarter is the greater of—

[29] *https://www.gov.uk/government/publications/income-tax-changes-to-the-regulations-for-the-non-residents-landlord-scheme/income-tax-changes-to-the-regulations-for-the-non-residents-landlord-scheme* (2020).

[30] *https://www.gov.uk/government/publications/income-tax-changes-to-the-regulations-for-the-non-residents-landlord-scheme/guidance-note* (2020).

(a) zero, and

(b) the difference of I-OE,

where—

I is the amount of income for that quarter specified in regulation 9(3), and

OE is the amount of expenses for that quarter specified in regulation 9(4) other than financing costs.[31]

(6) For the purposes of this regulation and regulation 9, in applying the definition of "deductible expense", the reference to the Tax Acts is to be treated as not including Part 10 of the Taxation (International and Other Provisions) Act 2010 (corporate interest restriction).

The 2020 changes guidance note provides:

Once non-UK resident company landlords become chargeable to Corporation Tax from 6 April 2020, Corporate Interest Restriction at Part 10 of TIOPA will apply to them. These rules apply a cap to the amount of financing costs that can be deducted from rental income...

These rules also apply to those non-UK resident company landlords that have an amount withheld on account of tax from their rents under the Non-residents Landlord Scheme. Corporate Interest Restriction is complex and being reasonably satisfied about its application may require an agent to obtain information about the non-UK resident company landlord and its funding arrangements.

Some agents would be able to apply Corporate Interest Restriction but many others may not. For those agents that have difficulties in applying Corporate Interest Restriction, the existing Regulations would typically prevent a deduction for financing costs paid by the agent which would increase the amount to be withheld on account of tax.

Consequently, the non-UK resident company landlord would file a company tax return to directly claim a deduction for its financing costs, resulting in a refund of tax, and increasing the administrative burden on both HMRC and non-UK resident company landlords.

To avoid this, a simpler alternative to Corporate Interest Restriction is provided to enable the agent to calculate the financing cost deduction which is limited to a fixed allowance (30%) of the UK rental income, net of deductible expenses other than financing costs. Any unused allowance may be carried forward from one quarter period to the next. Any

[31] Reg 6 Taxation of Income from Land (Non-residents) (Amendment) Regulations 2020 is a transitional provision:

"(1) Where an election is made under regulation 9(4)(b) of the principal Regulations, inserted by regulation 4(a) of these Regulations, financing costs attributable to any time before 6th April 2020 may be included as a deductible expense but must not be taken into account in determining the extent, if any, to which financing costs exceed the financing costs allowance for any quarter in an annual period.

(2) The amount of financing costs attributable to any time before 6th April 2020 must be determined on a just and reasonable basis."

unused financing costs above the allowance may also be carried forward. It is to be subject to an irrevocable election which is made by the agent.

The rule does not apply to rental income paid by a tenant who is a prescribed person to non-UK resident company landlords since tenants are in a different position under the Regulations.

The non-UK resident company landlord must check whether the amount withheld on account of tax under the Non-residents Landlord Scheme Regulations actually meets its underlying Corporation Tax liability in respect of its UK property income.

Chapter 3: How the alternative Corporate Interest Restriction rule works

3.1 Being reasonably satisfied and Corporate Interest Restriction

The financing costs of a non-UK resident company landlord will be subject to the corporation tax rules on deductibility of financing costs. In particular, the Corporate Interest Restriction rules may give agents who are prescribed persons reason to be uncertain as to whether financing costs (as a non-trade loan relationship deficit) can be set against the profits of the UK property business of the non-UK resident company landlord, and, therefore, whether they may be deducted in determining the amount to withhold under the Non-residents Landlord Scheme.

It is recognised that Corporate Interest Restriction can be complex and further that it may require agents to obtain information from non-UK resident company landlords to be reasonably satisfied that financing costs are not restricted by Corporate Interest Restriction, or if restricted, by what amount. The test that is applied here is one of reasonable satisfaction.

This guidance does not seek to be prescriptive in what constitutes reasonable satisfaction. However, in getting to a position of reasonable satisfaction an agent may make judgements as to the likely position of a non-UK resident company landlord provided that the agent takes reasonable steps to test such judgements, and that the agent does not have knowledge to the contrary.

For instance, agents may make judgements as to the likely application of the de minimis limit in the Corporate Interest Restriction rules taking into account the amount of rental income, the nature of the investment in UK property by, and the investment profile of, the non-UK resident company landlord.

Where agents do not have enough information to be reasonably satisfied that there will not be a restriction under Corporate Interest Restriction, or cannot determine the amount of the restriction, they cannot be reasonably satisfied that the expense is a "deductible expense" and no deduction of the financing costs is permitted.

Agents may choose, instead, to make an irrevocable election to use the alternative rule for Corporate Interest Restriction for the purpose of the Non-residents Landlord Scheme.

When bringing financing costs into account under the alternative rule agents must still be reasonably satisfied that the costs would be deductible for the non-UK resident company landlord if Corporate Interest Restriction were to be disregarded.

3.2 How to make an election

The election can only be made by the prescribed person who:

- is an agent of the non-UK resident company landlord, where either:
- the agent has paid financing costs in the quarter, or
- financing costs have been paid in the quarter by another person at the direction of the agent

The election is irrevocable. It must be notified to HMRC with the annual return that the agent sends to HMRC for the annual period which relates to the first quarter to which the election applies.

3.3 How the alternative to Corporate Interest Restriction works

In all of the following, it is assumed that the agent is reasonably satisfied that the financing costs are tax-deductible, ignoring the effect of Corporate Interest Restriction.

The maximum amount of financing costs that can be deducted ("the financing costs allowance") when calculating the amount to withhold for a particular quarter is calculated as follows:

Step 1:

Apply the following calculation:

30% × (I − OE)

where:

'I' is rental income in that quarter, and 'OE' is total of all deductible expenses for that quarter, other than financing costs.

Step 2:

Add the amount of any unused allowance brought forward from the last quarter to the sum of the above calculation. The result is the financing costs allowance for the quarter.

If the financing costs paid out in a quarter are less than the financing costs allowance, then the full amount of the financing costs can be deducted in that quarter. If there are restricted financing costs that have been carried forward to the quarter, these are added to the financing costs of this quarter when working out the amount of financing costs to deduct and any amount which may be restricted.

If the total financing costs exceed the financing costs allowance, the amount to be deducted in that quarter is capped at the maximum of the financing costs allowance.

3.4 Unused financing costs allowance

Where the financing costs allowance for a quarter is greater than the amount of the financing costs in that quarter, the difference between the two, the unused allowance, is carried forward to the next quarter and added at Step 2 of the calculation to give the financing costs allowance for that next quarter.

3.5 What happens to excess financing costs

To the extent that the amount of financing costs in a quarter is more than the financing costs allowance for that quarter, the excess amount, that is the amount restricted which the agent cannot take into account, is carried forward to the next quarter and added to the financing costs paid out in that quarter.

The calculation shown above at 3.3 is then applied to this total amount to work out the amount of financing costs that can be deducted from the rents in that quarter.

The restricted amount of financing costs cannot be carried back to earlier quarters.

To the extent that the amount of financing costs in a quarter falls within the financing costs allowance, but the agent cannot take them into account against the rental income of that quarter, the agent can take them into account under regulation 9(5).

3.6 Example (John)

J, an agent, acts for a non-UK resident company landlord, ABC Ltd, and elects to apply the alternative financing costs rule.

- in the quarter to 30 June 2020, J collects rental income of £2,000 and pays financing costs of £600 and other expenses of £500 out of those rents.
- in the quarter to 30 September 2020, J receives rental income of £2,000 and pays financing costs of £400 and other expenses of £100.

- in the quarter to 31 December 2020, J receives rental income of £3,000 and pays financing costs £100 and other expenses of £100.
- in the quarter to 31 March 2021, J receives rental income of £500 and pays financing costs £600 and other expenses of £500.

J is reasonably satisfied that all expenses are tax-deductible, ignoring the effect of Corporate Interest Restriction. It is also assumed that there are no financing costs attributable to any time before 6 April 2020.

Quarter to 30 June 2020

The amount of financing costs that can be deducted by J in the quarter to 30 June 2020 is as follows:

Restricted financing costs brought forward (N/A)	£0
Financing costs paid out	£600
Total financing costs for the quarter	£600
Rental income received (I)	£2,000
Less deductible expenses paid, other than financing costs (OE)	(£500)
Net amount of income (I−OE)	£1,500
Initial financing costs allowance calculation (30% × £1,500)	£450
Unused financing costs allowance brought forward	£0
Financing costs allowance for the quarter	£450
Financing costs allowance used for the quarter	£450
Unused financing costs allowance carried forward	£0

The maximum amount of financing costs that can be deducted in the quarter to 30 June 2020 is £450. The remaining £150 of the financing costs that were paid out will be carried forward to the next quarter and added to the financing costs for that quarter.

J's calculation of the amount to withhold for the quarter to 30 June 2020 is as follows:

Rental income received	£2,000
Less deductible expenses (other than financing costs)	(£500)
Total chargeable profits for the quarter	£1,500
Less financing costs	(£450)
Net amount on which basic rate tax is applied	£1,050
Tax withheld £1,050 × 20%	£210
Restricted financing costs carried forward to the next quarter (£600 − £450)	£150
Unused financing costs allowance carried forward	£0

Quarter to 30 September 2020

The amount of financing costs that can be deducted by J in the quarter to 30 September 2020 is as follows:

Restricted financing costs brought forward	£150
Financing costs paid out	£400
Total financing costs for the quarter	£550
Rental income received (I)	£2,000
Less deductible expenses paid, other than financing costs (OE)	(£100)
Net amount of income (I−OE)	£1,900
Initial financing costs allowance calculation (30% × £1,900)	£570
Unused financing costs allowance brought forward	£0
Financing costs allowance for the quarter	£570
Financing costs allowance used for the quarter	£550
Unused financing costs allowance carried forward	£20

Since the financing costs allowance is more than the sum of the financing costs for the quarter, the deduction is allowed for the full amount of financing costs (£550). The unused financing costs allowance £20 (£570 less £550) is carried forward to the next quarter.

J’s calculation of the amount to withhold for the quarter to 30 September 2010 is as follows:

Rental income received	£2,000
Less deductible expenses (other than financing costs)	(£100)
Total chargeable profits for the quarter	£1,900
Less financing costs	(£550)
Net amount on which basic rate tax is applied	£1,350
Tax withheld £1,350 × 20%	£270
Restricted financing costs carried forward to the next quarter	£0
Unused financing costs allowance carried forward	£20

Quarter to 31 December 2020

The amount of financing costs that can be deducted by J in the quarter to 31 December 2020 is as follows:

Restricted financing costs brought forward	£0
Financing costs paid out	£100
Total financing costs for the quarter	£100
Rental income received (I)	£3,000
Less deductible expenses paid, other than financing costs (OE)	(£100)
Net amount of income (I−OE)	£2,900
Initial financing costs allowance calculation (30% × £2,900)	£870
Unused financing costs allowance brought forward	£20
Total financing costs allowance for the quarter	£890
Financing costs allowance used for the quarter	£100
Unused financing costs allowance carried forward	£790

Since the total financing costs allowance available for the quarter is more than the sum of the financing costs for the quarter, the deduction is allowed for the full amount of financing costs (£100). The unused financing costs allowance of £790 is carried forward to the next quarter.

J’s calculation of the amount to withhold for the quarter to 31 December 2020 is as follows:

Rental income received	£3,000
Less deductible expenses (other than financing costs)	(£100)
Total chargeable profits for the quarter	£2,900
Less financing costs	(£100)
Net amount on which basic rate tax is applied	£2,800
Amount withheld £2,800 × 20%	£560
Restricted financing costs carried forward to the next quarter	£0
Unused financing costs allowance carried forward	£790

Quarter to 31 March 2021

The amount of financing costs that can be deducted by J in the quarter to 31 March 2021 is as follows:

Restricted financing costs brought forward	£0
Financing costs paid out	£600

Total financing costs for the quarter	£600
Rental income received (I)	£500
Less deductible expenses paid, other than financing costs (OE)	(£500)
Net amount of income (I−OE)	£0
Initial financing costs allowance calculation for the quarter (30% × £0)	£0
Unused financing costs allowance brought forward	£790
Total financing costs allowance for the quarter	£790

Since the rental income for this period is reduced to zero by the other specified expenses, there is no amount on account of tax to withhold and the initial calculation of the amount of financing costs allowance for this quarter is nil.

However, because it is possible to carry forward unused financing costs allowance, the financing costs allowance for the quarter is £790. J can apply the financing costs allowance brought forward to the amount of financing costs paid in the quarter so that the financing costs become specified expenses for the purposes of regulation 9(4) of the Non-residents Landlord Scheme Regulations.

Financing costs allowance for the quarter	£790
Financing costs allowance used for the quarter	£600
Unused financing costs allowance carried forward	£190

Because there is now an excess of specified expenses above the specified income for this quarter, J can deduct this excess from the income of the previous quarter under regulation 9(5) and claim a repayment when he sends in his quarterly return. The amount of unused financing costs allowance to carry forward to the quarter to 30 June 2021 is reduced to £190.

The revised figures for the quarter to 31 December 2020 become:

Rental income received	£3,000
Less deductible expenses (other than financing costs)	(£100)
Total chargeable profits for the quarter	£2,900
Less unrestricted financing costs as before	(£100)
Net amount on which basic rate tax is applied	£2,800
Less excess specified expenses carried back	£600
Updated net amount on which basic rate tax is applied	£2,200
Amount withheld £2,200 × 20%	£440
Amount previously withheld	£560
Repayment due	£120

Note that the costs carried back under regulation 9(5) are simply deducted against the rental income for the period. There is no need to recalculate the financing costs allowance for the quarter to 31 December 2020. Nor is there any need to include the costs carried back to 31 December 2020 in the tested amount of financing costs for the quarter ended 31 December 2020.

If these circumstances had arisen in the following quarter (quarter to 30 June 2021), any excess of specified expenses could only be carried forward to the next quarter because the quarter ended 31 March 2021 is in a different annual period to the annual period in which the quarter to 30 June 2021 falls. Under regulation 9(5) it is not possible to carry back an amount of specified expense to a quarter period of a different annual period.

When J sends the annual return to HMRC for the annual period ended on 31 March 2021, he must tell HMRC that he has made the election under regulation 9A to use the alternative financing costs rule. He must continue to use the alternative financing costs rule in the next annual period and so on.

24.13 Tax computation: Tenant

If, exceptionally, the agent is not the prescribed person, we turn to reg 8 NRLR which deals with tenants. Regulation 8(1) is the equivalent of regulation 9(1) set out above:

> A person falling within [s.42A(1)(a) ICTA = s.971(3)(a) ITA, the tenant] who is a prescribed person in respect of the Schedule A [UK property] business , or part thereof, of a non-resident shall calculate for each quarter the amount of any payment to be made to the Board in respect of tax which is or may become chargeable on the income from that business or that part.

Regulation 8(2) NRLR explains the computation:

> The amount of the payment to be calculated by that person is the amount of tax at the basic rate on the aggregate of all income which falls to be treated as a receipt of that business or that part, other than income specified in paragraph (3) below, and which either—
> (a) was paid by him in the quarter to the non-resident, or
> (b) was paid by him in the quarter to a person other than the non-resident, not being a payment which he can reasonably be satisfied is a deductible expense.[32]

It is usually better to appoint an agent as prescribed person as:
(1) Withholding tax is (in short) limited to net profits rather than gross rent.
(2) There is provision for carry forward and back of excess expenses.
In any case, tenants will not normally want to take on the duty of payment and quarterly returns.

The former NRLS provides some examples:

> **7.4 Example 1**
> Joan is due to pay rent of £1600 per quarter to a non-resident landlord. In the quarter to 30 September 2010 she can manage to pay only £1000. As the calculation is based on rental income paid (not due), her

[32] Regulation 2 NRLR provides a commonsense definition: "deductible expense" means, subject to regulation 9A(6),
[1] an expense which is deductible under the Tax Acts in computing the profits or gains of a non-resident's Schedule A [UK property] business or
[2] or is capable of being offset against those profits under the Tax Acts".

calculation for the quarter is:

Rental income paid	£1000
Basic Rate tax on £1000 (20% for 2010/11)	£200
	£800

As a result Joan pays £800 to the non-resident landlord and £200 to HMRC.

7.5 Example 2

Jack pays rental income of £1500 per quarter to a non-resident landlord. In the quarter to 30 June 2010 the landlord tells him to pay £400 to a third party in settlement of a loan (which is not a deductible expense) and to pay the £1100 balance to the landlord.

Jack's calculation for the quarter to 30 June 2010 is:

Rental income paid to landlord	£1100
Plus rental income paid away to third party at landlord's direction	£400
	£1500
Basic Rate tax on £1500 (20% for 2010/11):	£300

7.6 Example 3

Julie pays rental income of £1500 per quarter. In the quarter to 30 September 2010 she pays out

- £200 for plumbing repairs;
- £100 to a third party, on the instruction of her landlord, in settlement of a loan (which is not a deductible expense); and
- £1200 direct to her landlord.

As the plumbing repairs are a deductible expense (see Chapter 10 below) but the settlement of the loan is not, Julie's calculation will be:

Rental income paid to landlord	£1200
Plus rental income paid to third parties, where the payment is not a deductible expense	£100
	£1300
Basic Rate tax on £1300 (at 20% for 2010/11):	£260

24.14 Returns and administration

24.14.1 *HMRC letters to tenants*

In August 2019 HMRC sent questionnaires to tenants of property owned by overseas companies. CIOT have published the following Q&A:

1. **It is unclear why HMRC would send this letter and the list of questions to a tenant, as it would seem unlikely the tenant would know the answers to many of the questions (particularly the ones about trusts).**

The letter and questionnaire have been designed to gather information to ensure the correct tax is paid. This includes situations where the tenant may be connected to the offshore entity. In those cases, we would expect the tenant to know the answers to many of the questions asked. The tenant should reply "not known" if they do not know the information.

2. **It is unclear why the tenant is being asked to provide their personal details (NINO and UTR, email address and telephone number for example). Perhaps the form should caveat that not all this personal information is a requirement/it is voluntary.**

The information requested from tenants is required to ensure HMRC can accurately confirm the identity of the tenants and ensure we have the most up-to-date contact details on file. As the tenant may have personal responsibility for deducting tax on the rents paid, it is important that HMRC has the most up-to-date and accurate information.

3. **It would appear that there is no legal obligation on the tenant to respond to the letter and questionnaire. Would HMRC confirm this to be the case, or not?**

There is no legal obligation to respond to the letter and questionnaire but the response will enable HMRC to help the tenant if further action is required or to quickly tell them that no further action is required.

4.**If the tenant is unable or unwilling to complete the questionnaire, would a letter providing the information they know about the tenancy suffice?**

Absolutely. We are asking the questions to help work out whether the correct tax has been paid. Any and all information (regardless of its form) will assist us with this.

5. **A tenant who receives this letter may be worried about how to respond particularly if they do not have enough information or knowledge to answer the questions. Perhaps the letter could have included wording such as "we recognise that you may not be able to answer all the questions we have asked. Please supply the information requested to the best of your ability and knowledge".**

Throughout the letter, we offer support to occupants to help them understand this complicated area of taxation and how it might impact upon them, depending on the circumstances of their rental or occupancy arrangement. Contact details are provided for any occupants who require further information or support in responding to the letter which they have received. The helpline number to call is 03000 554444.

6. **The wording at the end about errors and penalties could alarm the recipient especially if they are not able to answer all the questions.**

It is not our intention to cause distress, we are simply asking occupants of the property to provide information to enable HMRC to ensure the correct amount of tax is paid.

We would not look to charge a penalty if mistakes have been made in the completion of the form attached to the letter to tenants. The penalties mentioned in the letter to tenants are only relevant to situations where the tenant has chosen not to deduct tax at the right time or neglected to do so.

The tenant should answer the questions to the best of their knowledge. If they have any questions or need help, they can phone us on the dedicated helpline.

CIOT follow-up comment: In the perhaps less common situation where there is no letting agent, a third party tenant wholly unconnected to the non-resident landlord may have no knowledge, or means of establishing that deduction of tax is required. In such cases the tenant cannot be said to have chosen not to deduct tax or necessarily have been neglectful in doing so.

It is recognised that if there is no agent, and subject to the de minimis (of an annual rent of £5200 or less), the tenant must withhold basic rate tax and account to HMRC quarterly unless the property owner applies to HMRC for permission to receive income gross. However, we suspect that few tenants, especially those who have no connection with the landlord beyond that of the landlord/tenant relationship, are likely to become aware of these obligations. It is difficult to see, in practical terms, how they might become aware that these obligations exist. The GOV.UK guidance on 'Landlord and tenant rights and responsibilities in the private rented sector' makes no reference to the tax obligations of tenants (except for council tax).

We recognise that there is tax guidance on GOV.UK for Paying tax on rent to landlords abroad . However, there is nothing to point a tenant to that guidance. It was last published in December 2014. There does not appear to have been any efforts to alert tenants to their obligations in advance of the 'nudge' letters and the potential imposition of penalties for failure to meet those obligations that may arise as a consequence of the letters.

HMRC Further Response

We would reiterate that the penalties mentioned in the letter to tenants are only relevant to situations where the tenant has chosen not to deduct tax at the right time or neglected to do so. Therefore, whilst the technical position regarding penalties is correct, we have decided to remove the reference to penalties in any future letters to avoid causing any potential distress to the majority of tenants who have made genuine mistakes. Tenants who didn't make a genuine mistake may still be liable to a penalty.

7. **The tenant may decide to seek professional advice before answering the letter (particularly given the threat of penalties). It might help to mention that if they have an agent, they might want to show it to their agent before responding.**

Customers are always advised to consult tax specialists on any areas of tax with which they are not familiar to ensure they are complying with their tax obligations...

9. **What action will HMRC be taking where no response is received to the letter?**

Where we have had no response from either the tenant or the landlord, our process is to register the property for the ATED charge and to issue the offshore company with a tax determination. The company is liable for this tax demand, not the tenant, however if tenants have any concerns at all they should contact the helpline provided.

10. **What are HMRC intending to do with the information provided by tenants? There is some misgiving amongst our members that the information requested might be used for more than the stated purpose of checking whether tax should be deducted from rents paid.**

It is HMRC's role to ensure that everyone pays the tax they owe to ensure the continued funding of the UK's vital public services. In some cases, the tenants we have contacted may have a beneficial interest in the property which they are renting, requiring follow up activity to understand the tenant's situation in relation to the offshore landlord/company.

11. **Are any further mailings planned, and if so, when?**

HMRC regularly sends letters to customers to educate, remind or prompt them to review their tax affairs, particularly where we have information that suggests there are specific risks to the payment of tax owed.

This is a commonly-used and targeted compliance approach which forms part of HMRC's Promote, Prevent, Respond strategy and has been positively received by many of our customers in helping them ensure their tax affairs are correct and the correct amount of tax is paid on time...

24.14.2 *Quarterly returns*

Regulation 10 NRLR provides:

> (1) In the circumstances specified in paragraph (2) below and within 30 days after the end of a quarter, a prescribed person shall make a return to the Board, in such form as the Board may prescribe, containing the information specified in paragraph (3) below and the declaration specified in paragraph (4) below.
>
> (2) The circumstances specified are where—
>
> (a) an amount is payable by the prescribed person in respect of the quarter, calculated in accordance with regulation 8 or 9 as the case may be, or
>
> (b) a repayment of tax is due under regulation 9(6)(b), or
>
> (c) the Board have issued a notice to the prescribed person requiring a return to be made in respect of that quarter.
>
> (3) The information specified is—
>
> (a) the name and address of the prescribed person;
>
> (b) where the prescribed person is a person falling within [s.42A(2)(a) ICTA = s.971(3)(a), the tenant], the aggregate of the amounts payable by him for that quarter, calculated in accordance with regulation 8, in respect of all non-residents in respect of whose Schedule A [UK property] business es (or parts thereof) he is a prescribed person;
>
> (c) where the prescribed person is an agent, the aggregate of the amounts payable by him for that quarter, calculated in accordance with regulation 9, in respect of all non-residents in respect of whose Schedule A [UK property] business es (or part thereof) he is a prescribed person, after set off of any amounts repayable pursuant to paragraph (6)(a) of that regulation; and
>
> (d) a claim for repayment of an amount pursuant to regulation 9(6)(b), where appropriate.
>
> (4) The declaration specified is a declaration by the prescribed person that the particulars given in the return are to the best of his knowledge correct and complete.

The NRLS guidance provides:

> **Quarterly returns and payment of tax**
>
> You must pay any tax due each quarter to HMRC, using form NRLQ. Quarterly returns are due for the periods ending:
>
> - 30 June
> - 30 September

> - 31 December
> - 31 March
>
> If you do not need to make a payment of tax for any quarter you do not need to complete a quarterly return form. However, you should complete one if you receive a notice from HMRC telling you to do so.
>
> On the return form you must include:
>
> - the total amount of tax due for all your non-resident landlords for that quarter
> - where there is no tax due in the quarter but you are due a repayment, the amount of the repayment claimed
>
> If you act for more than one non-resident landlord you should:
>
> - Calculate the tax due for each landlord separately.
> - You should then add together the amounts due.
> - Then subtract any repayable amount.
>
> You should show the result of this calculation on form NRLQ.
>
> The form explains how to send payment for the amount due to HMRC.
>
> The return form NRLQ must be sent in time to arrive at HMRC no later than 30 days after the end of the quarter to which it relates. For example, form NRLQ for the quarter ending 30 September must arrive by 30 October of the same year.
>
> ...
>
> **Interest payable on late payment**
>
> If you do not pay tax by the due date, HMRC may charge interest from the date when tax became due until it is paid.
>
> If interest is charged for late payment of tax and that tax is later repaid, you cannot recover any of the interest.

24.14.3 *Payment*

Regulation 10(5) NRLR provides:

> The aggregate amount referred to in paragraph (3)(b) or (c) above shall be due at the time by which the return under paragraph (1) above is to be made, and that amount so due—
>
> (a) shall be payable by the prescribed person without the making of an assessment, and
>
> (b) may be assessed on the prescribed person (whether or not it has been paid when the assessment is made) if it, or any part of it, is not paid on or before the due date.

24.14.4 *Interest on tax*

Regulation 10 NRLR provides:

> (6) The amount so due shall carry interest at the rate applicable under section 178 of the FA 1989 to section 87 of the Management Act from the date when the amount becomes due until payment.
>
> (7) Where an amount paid by a prescribed person in a previous quarter is repaid pursuant to a claim under regulation 9(6)(b), the repayment shall not affect interest under paragraph (6) above on the amount repaid for such time as is specified in paragraph (8) below but, subject to that, paragraph (6) above shall apply as if any such amount which is repaid had never become payable.
>
> (8) The time for which interest is not affected is—
>
> (a) any time before the expiration of the period of 30 days from the end of the quarter in which the excess of expenses giving rise to the repayment arose, unless the return for that quarter is made earlier in that period; and
>
> (b) if that return is made earlier in that period, any time ending before the date on which the return is made.

24.14.5 *Assessment*

Regulation 10 NRLR provides:

> (9) If it appears to the Board that there is an amount which ought to have been but has not been included in a quarterly return as payable to the Board, or if the Board are dissatisfied with any quarterly return, they may make an assessment on the prescribed person to the best of their judgment in respect of that amount.
>
> (10) The like provisions as are contained in paragraph 10 of Schedule 16 to the Taxes Act (assessments and due date of tax) shall have effect in relation to an assessment under paragraph (9) above as if—
>
> (a) for references to an assessment under that Schedule there were substituted references to an assessment under paragraph (9) above;
>
> (b) the references to paragraphs 4(1) and 9 of that Schedule were omitted;
>
> (c) sub-paragraph (5) were omitted.
>
> (11) Any income tax due under an assessment made by virtue of paragraph (9) above shall carry interest at the rate applicable under section 178 of the FA 1989 to section 87 of the Management Act from the date when the tax becomes due until payment; and for that purpose the tax shall be treated as having become due at the time when it would have become due if a correct return had been made.

24.14.6 *Annual returns*

Regulation 11 NRLR provides:

> (1) Not later than the 5th July following the end of an annual period, a prescribed person, other than a person specified in paragraph (3) below, shall make a return to the Board for that period—
>
> (a) in respect of the non-resident or, if more than one, each non-resident separately, in respect of whose Schedule A [UK property] business (or part thereof) he was a prescribed person at any time falling within that period, and
>
> (b) containing the information specified in paragraph (4) below and the declaration specified in paragraph (5) below.
>
> (2) A return under paragraph (1) above shall be in such form as the Board may prescribe.
>
> (3) The person specified is any tenant who, as a result of a notice given by the Board under regulation 17(5)(b), was not obligated to make payments to the Board in respect of any payments made to a non-resident in that period.
>
> (4) The information specified is—
>
> (a) the name of the non-resident;
>
> (b) where the non-resident is—
>
> (i) an individual, or
>
> (ii) a trustee other than a corporate or a professional trustee,
>
> the principal residential address of the non-resident;
>
> (c) where the non-resident is a company, the address of its registered office or its principal place of business;
>
> (d) where the non-resident is a professional trustee,[33] the address of his employment or principal place of business;
>
> (e) where the prescribed person is an agent, the amount of income which, before deduction of any expenses, fell to be taken into account in the annual period in calculating under regulation 9 amounts of tax payable by him in respect of the Schedule A [UK property] business (or part thereof) of the non-resident, or which would have fallen so to be taken into account if the non-resident had not been an approved person for the purposes of regulation 17 in that period;

[33] Regulation 11 NRLR provides: a commonsense definition: “professional trustee” means a person who carries on, or is employed by, a business which consists of or includes the management of trusts, and who acts as trustee in the course of that business or employment.

(f) where the prescribed person is a person falling within [s.42A(2)(a) = s.971(3)(a) ITA, the tenant], the aggregate of the following amounts of income—

(i) the amount of income which fell to be taken into account in the annual period in calculating under regulation 8 amounts of tax payable by him in respect of the Schedule A [UK property] business (or part thereof) of the non-resident, or which would have fallen so to be taken into account if the non-resident had not been an approved person for the purposes of regulation 17 in that period, and

(ii) the amount of income which did not fall so to be taken into account because it was paid to a person other than the non-resident in circumstances where the prescribed person could reasonably be satisfied that the amount of the payment was a deductible expense;

(g) except where the non-resident is an approved person for the purposes of regulation 17, the aggregate of—

(i) all amounts paid during the annual period on behalf of the non-resident by or at the direction of the prescribed person which the prescribed person could reasonably be satisfied constituted deductible expenses, and

(ii) amounts carried forward to that period from a previous period pursuant to regulation 9(5)(b);

(h) the aggregate of the amounts specified as payable to the Board in quarterly returns made by the prescribed person for the annual period;

(j) the reference number relating to an approval by the Board of the non-resident under regulation 17.

(5) The declaration specified is a declaration by the prescribed person that the particulars given in the return are to the best of his knowledge correct and complete.

The NRLS guidance provides:

If you have to operate the NRLS you must send an information return to PTI by 5 July for the year to 31 March on form NRLY.

You must provide the following details separately for each non-resident landlord:

- the landlord’s name and address
- the amount of rental income for the year to 31 March, before the deduction of expenses
- if you’re not authorised to pay rental income to the landlord with no

tax deducted:
    - the deductible expenses for the year to 31 March
    - the total of the tax shown as payable in your quarterly returns for the year to 31 March
- if you're authorised to pay rental income to the landlord with no tax deducted, the landlord's approval reference number

If you're unable to download the form or complete the online return, contact HMRC.

Form NRLY may need to be sent with continuation sheets if you have more than 5 landlords to report.

You can attach your own schedules to the form rather than use the continuation sheets. For example, you may want to do this where you can produce computer-generated schedules. However, your schedules must contain all the details needed for each non-resident landlord. In these instances you must use the downloadable form, not the online service.

You should always include on the annual return either an approval reference number, or a figure of deductible expenses (if there were any).

Where you receive a notice authorising you to pay rental income with no tax deducted part way through the year, you should show:

- the approval reference number
- the tax shown on the quarterly returns up to the quarter in which the approval notice was issued

You should provide the landlord's address as follows where the non-resident landlord is:

- an individual, his or her principal residential address
- a trust, the address of one of the trustees and:
    - in the case of a corporate trustee, the address of its registered office or its principal place of business
    - in the case of a professional trustee, the address of his or her employment or principal place of business
    - in any other case, the trustee's principal residential address
- a company, the address of its registered office or its principal place of business.

The former NRLS guidance provides:

5.4 Example

ABC Ltd has to operate the scheme for two non-resident landlords, Jordi and Jan. On 17 March 2009 ABC Ltd receives a notice from the HMRC authorising it to pay rental income to Jordi with no tax deducted. The notice shows that Jordi's approval number is 0123456 (see paragraph 11.12 below). In the year to 31 March 2011, ABC Ltd keeps the following records.

Jan

Quarter to	Rental Income	Deductible Expenses	Tax Due	Repayable Amount
30.06.10	2000	500	£300	
30.09.10	2000	3000	-	£2000
31.12.10	2000	1000	£200	-
31.03.11	2000	1000	£200	-
TOTAL	8000	5500	£700	£200

Jordi

Year to	Rental Income	Deductible Expenses	Tax Due	Repayable Amount
30.03.11	16000	Not applicable*	-	-

* Letting agents do not have to record deductible expenses for landlords who are approved to receive rental income with no tax deducted.

ABC Ltd should complete the annual return as follows:

Name and address	Approval No	Rental Income	Deductible expenses	Tax
Jordi Doe [Address]	0123456	16000		-
Jan Doe [Address]	-	8000	5500	500

The total tax is the amount included in quarterly returns for the year in respect of the non-resident landlord. That is, the tax less any repayable amounts. In this example, the amount for Jan, £500, is the total of the three amounts of tax (£700) less the repayable amount (£200).

5.5 Letting agents should always include on the annual return either an approval reference number, or a figure of deductible expenses (if there were any). Where they receive a notice authorising them to pay rental income with no tax deducted part way through the year they should show:

- the approval reference number; and
- the tax shown on the quarterly returns up to the quarter in which the approval notice was issued.

5.6 Letting agents should provide the landlord's address as follows:

- where the non-resident landlord is an individual, his or her principal residential address;
- where the non-resident landlord is a trust, the address of one of the trustees
  - in the case of a corporate trustee, the address of its registered office or its principal place of business,

  - in the case of a professional trustee, the address of his or her employment or principal place of business
  - in any other case, the trustee's principal residential address;
- where the non-resident landlord is a company, the address of its registered office or its principal place of business.

The former NRLS gives an example where the prescribed person is a tenant:

8.5 **Example**
James is a tenant due to pay rental income of £2000 in each quarter to his non-resident landlord, Julia. For the four quarters in the year to 31 March 2011, James keeps the following records.

Deductible expenses paid (1)	Non-deductible expenses paid (2)	Balance of rental payment (3)	Tax on (2) & (3) @ 20%	Net rent paid to Julia
-	£500	£1500	£400	£1100
£600	£1400	£280	£1120	
-	-	£2000	£400	£1600
-	-	£2000	£400	£1600
£600	£500	£6900	£1480	£5420

James should complete the annual return as follows:

Name and	Approval No	Rental	Deductible	Tax
Address	Income	Expenses		
Julia [Address]	-	£8000 *	£600	£1480

* James must show the total amount he pays, both to Julia and to third parties. In this example he pays out £2000 each quarter, £8000 in total.

24.14.7 *Record keeping*

The NRLS guidance provides:

Records
The rules of the NRLS mean you do not need to use prescribed record keeping systems. Records must show that you have met your obligations under the Scheme. For each non-resident landlord, you should keep:

- a record of rental income received by the letting agent or paid by the tenant
- copies of any correspondence with the landlord regarding his or her usual place of abode.

Unless you are authorised to pay rental income with no tax deducted, you should also keep:

- a record of expenses paid
- invoices and receipts (or copies) to provide evidence of expenses paid.

Landlords need to keep records to allow them to submit correct and complete tax returns.

Failure by a landlord to keep proper records could result in the landlord having to pay a penalty. You should discuss this with a landlord before disposing of any records relating to that landlord's business.

You must keep a record of the rental income you received or paid, which should show the date and amount of each receipt or payment.

The record of expenses should show:

- the date of the payment
- the amount of each payment
- a description of the expense

For example:

- 16 September 2019
- gardening
- £25

You may keep records on:

- microfilm
- microfiche
- any other medium that preserves an exact copy of the original document

If you wish to keep documents in this way, contact HMRC before you destroy the originals.

If possible you should keep records for the last 6 tax years, until 31 March of that year.

However, unless auditors visit you for the first time it's unlikely they will ask to see records older than the last 4 tax years.

24.14.8 *Certificate for landlord*

Regulation 12 NRLR provides:

> (1) Not later than the 5th July following the end of an annual period, a prescribed person who is liable under these Regulations to make any payments to the Board for any quarter falling within that period in respect of tax chargeable on the income of a non-resident, shall provide the non-resident with a certificate which shall include the particulars specified in paragraph (2) below and the declaration specified in paragraph (3) below.
>
> (2) The particulars specified are—
>
> (a) the name of the non-resident;

> (b) where the non-resident is—
> (i) an individual, or
> (ii) a trustee other than a corporate or a professional trustee,
> the principal residential address of the non-resident;
> (c) where the non-resident is a company, the address of its registered office or its principal place of business;
> (d) where the non-resident is a professional trustee, the address of his employment or principal place of business;
> (e) the name and address of the prescribed person;
> (f) the annual period to which the certificate relates;
> (g) the aggregate amount of the liability referred to in paragraph (1) above for all quarters falling within the annual period.
>
> (3) The declaration specified is a declaration by the prescribed person that the certificate is to the best of his knowledge correct and complete.

24.15 Gross payment of property income

Regulation 17 NRLR provides:

> (1) A non-resident may apply to the Board for the obligation imposed under these Regulations to make payments to the Board not to apply in relation to payments falling to be treated as receipts of a Schedule A [UK property] business carried on by him.
>
> (2) An application under paragraph (1) above shall be made on a form provided by the Board and shall contain the information specified in paragraph (3) below and the undertakings specified in paragraph (4) below.
>
> (3) The information specified is—
> (a) the name of the applicant;
> (b) the date of the application;
> (c) where the applicant is—
> (i) an individual, or
> (ii) a trustee other than a corporate or a professional trustee,
> the principal residential address of the applicant;
> (d) where the applicant is a company, the address of its registered office or its principal place of business, and the names and principal residential addresses of its directors;
> (e) where the applicant is a professional trustee, the address of his employment or principal place of business;
> (f) the applicant's national insurance number, if he has one;
> (g) the applicant's UK tax office reference, if he has one;
> (h) the name and address of the prescribed person or, if more than one, each of the prescribed persons by or through whom

payments falling to be treated as receipts of the applicant's Schedule A [UK property] business are made;

(j) a statement that—

(i) the applicant has complied with all obligations imposed on him by or under the Tax Acts or the Management Act prior to the date of the application; or

(ii) the applicant has not had any obligations imposed on him by or under the Tax Acts or the Management Act prior to the date of the application; or

(iii) he does not expect to be liable to pay any amount by way of UK income tax for the year in which the application is made.

(4) The undertakings specified are that—

(a) where the applicant makes a statement falling within paragraph (3)(j)(iii) above, he will notify the Board in writing if he becomes liable to pay any such amount;

(b) the applicant will fully comply with all obligations imposed on him by or under the Tax Acts or the Management Act;

(c) the applicant will inform the Board if his usual place of abode ceases to be outside the UK.

(5) Where the Board approve an application under paragraph (1) above, they shall give—

(a) notice of the approval to the non-resident, and

(b) notice to the prescribed person or, if more than one, each prescribed person, specifying the date from which the obligations referred to in paragraph (1) above shall cease to apply in relation to payments falling to be treated as receipts of the applicant's Schedule A [UK property] business and made on or after that date.

(6) The Board may, by notice to the applicant, refuse an application under paragraph (1) above where—

(a) they are not satisfied that the statement contained in the application and falling within paragraph (3)(j)(i), (ii) or (iii) above, as the case may be, is correct; or

(b) they are not satisfied that the applicant will comply with the undertakings contained in the application.

(7)The applicant may appeal against the Board's refusal of his application under paragraph (6) above by giving notice to the Board within 90 days of receipt of the notice of refusal.

(9) The tribunal shall, on an appeal notified to it, confirm the notice refusing approval unless satisfied that the notice ought to be quashed.

Regulation 19 allows withdrawal of approval:

> (1) An approval of an application under regulation 17 may be withdrawn by the Board by notice to the non-resident by whom the application was made specifying—
>
> (a) the reasons for the withdrawal, and
>
> (b) the date from which the withdrawal of approval shall take effect.
>
> (2) The Board may withdraw their approval of an application where—
>
> (a) they cease to be satisfied that the statement contained in the application and falling within regulation 17(3)(j)(i), (ii) or (iii), as the case may be, is correct; or
>
> (b) they cease to be satisfied that the non-resident will comply with the undertakings contained in the application; or
>
> (c) the non-resident fails to furnish information to the Board in accordance with regulation 18.
>
> (3) Where the Board withdraw their approval of an application under paragraph (1) above, they shall give notice to the prescribed person or, if more than one, each prescribed person, specifying the date from which the obligations imposed under these Regulations to make payments to the Board shall apply in relation to payments falling to be treated as receipts of the applicant's Schedule A [UK property] business and made on or after that date.
>
> (4) A non-resident may appeal against the Board's withdrawal of approval under paragraph (1) above by giving notice to the Board within 90 days of the date of issue of the notice withdrawing approval.
>
> (6) The tribunal shall, on an appeal notified to it, confirm the notice withdrawing approval unless . . . satisfied that the notice ought to be quashed.

The NRLS guidance provides:

> **Sovereign immunity**
>
> You must apply to HMRC to receive your UK rental income with no tax deducted if you're exempt from UK tax because of sovereign immunity. You do not need to complete an application form. You should apply by writing to HMRC. If possible, enclose a copy of the letter in which HMRC confirms your 'sovereign immune' status.
>
> **When an application can be made**
>
> If you're leaving the UK to live abroad you should apply no more than 3 months before you leave the UK.
>
> HMRC cannot consider an application before then. If your usual place of abode is already outside the UK you can apply immediately.

How to complete the application form

There are explanatory notes on the application forms NRL1i, NRL2i and NRL3i. The notes tell non-resident landlords how to complete the forms.

The following information supplements the explanatory notes.

Who can sign the application form

Downloaded Application forms must be signed as follows:

- form NRL1i must be signed by the non-resident landlord
- form NRL2i must be signed by the company secretary or a duly-authorised officer of the company
- form NRL3i must be signed by a trustee

Customers will need to verify their identity before completing the form.

Principal residential address: 'care of' and PO Box addresses

Some non-resident landlords may live in parts of the world where the only address they can provide is a 'care of' or 'PO Box' address. In these circumstances, HMRC will accept a correspondence address instead of a principal residential address. Non-resident landlords should attach an explanation to the form of why they've not given a residential address. Other non-resident landlords may have a principal residential address that is not a postal address. In these circumstances they should provide both the:

- principal residential address
- a correspondence address.

UK Tax Office, tax reference number and National Insurance number

Non-resident landlords should give details of their most recent UK tax reference number, if known. Individual non-resident landlords should also give their National Insurance number, if they have one.

Without this information HMRC may not be able to process applications made on the basis that the non-resident landlord's tax affairs are up to date. Where a non-resident landlord's tax affairs have been dealt with in the past through a letting agent or tenant, the application should show, where known, the reference number for the letting agent or tenant.

Approval of applications

HMRC will normally approve an application if:

- the application form is complete and correct
- it is satisfied that the non-resident landlord making the application will follow all their UK tax obligations.

The approval does not mean the rental income is exempt from UK tax. While the rental income will be paid with no tax deducted, it is still liable to UK tax and the non-resident landlord must include it on any tax return.

HMRC will approve applications after an initial check. Applications will be checked later in more detail. Non-resident landlords may need to supply more information at a later date when the application is checked. Failure to provide extra information may result in the withdrawal of approval.

Who receives notification of approval

HMRC will send a notice of approval to receive rental income without deduction of tax to either the:

- non-resident landlord
- non-resident landlord's account or tax adviser where they hold written authority to do so

They'll also send a separate notice to you if you're named on the application form, authorising you to pay rental income to the non-resident landlord without deducting tax.

These notices will show an approval reference number.

All notices will give the date from when rental income should be paid without deducting tax. The date will usually be on the first day of the quarter where the landlord's application is received.

Refusal of applications for approval

HMRC may refuse an application from a non-resident landlord if it is not satisfied that the:

- information given in the application is correct
- non-resident landlord will follow their UK tax obligations

We will refuse an application by notice in writing. The notice will explain how the landlord can appeal against the refusal. Landlords should appeal in writing within 90 days of the date of the notice. If the appeal cannot be settled by agreement between both parties, an independent appeal tribunal will hear it.

...

Changes of letting agent or tenant

If HMRC has not been told about a change, the new letting agent or tenant will not hold a notice from them that lets them pay rent without deducting tax. In such cases tax should be deducted from the rental income of a landlord that has a valid approval.

If these circumstances apply after 31 March in any year, you as the letting agent or tenant should complete an annual return and provide a certificate showing the tax deducted.

If you receive a notice before 31 March and have deducted tax from the landlord's rental income at any time since the previous 1 April, you can either:

- contact HMRC to discuss the recovery of any tax deducted for the relevant quarters (recording transactions where any money is recovered and paid to the landlord)

- agree with the landlord to issue a certificate after the end of the year to cover the tax deducted and to make no further deductions during the year.

If a non-resident landlord dies

If a non-resident landlord dies, any HMRC approval to pay rent without tax deducted does not apply. If you have to continue paying the same rent to someone else after a landlord's death you should deduct tax unless the new payee either:

- does not have a usual place of abode outside the UK (for example, a UK executor)
- is someone who already holds an approval notice (for example, the landlord's surviving spouse).

The new payees can apply for HMRC approval to receive their rent without deduction of tax.

Use form NRL3i to get UK rental income without deduction of tax if the following apply:

- you're an executor or trustee
- your usual place of abode is outside the UK.

Irish charities, superannuation schemes and insurance companies

Under Article 14A of the UK/Republic of Ireland Double Taxation Convention, the following types of Irish tax-exempt landlords are exempt from UK tax on their rental income:

- charities
- superannuation schemes
- insurance companies (for their pension business).
- These landlords should not fill in forms NRL1i, 2i and 3i.

These landlords should not fill in forms NRL1i, 2i and 3i. They should claim exemption under the Double Taxation Convention by filling in a form Ireland-Company.

24.16 Credit for withholding tax

Regulation 20 NRLR provides:

> Section 59A of the Management Act (payments on account of income tax) ("section 59A") shall have effect in relation to payments to be made to the Board by virtue of section 42A in respect of any tax as if any reference in section 59A to income tax deducted at source included a reference to such payments.

Regulation 21 NRLR provides:

> (1) A non-resident may set off against either of the amounts specified

in paragraph (2) below the aggregate amount of the payments which—

(a) were liable to be made to the Board under these Regulations for each quarter ending in a year by any person who is a prescribed person in respect of the Schedule A [UK property] business (or part thereof) carried on by the non-resident in that year, and

(b) were retained by the prescribed person out of sums due from him to the non-resident in order to meet that liability.

(2) The amounts specified are—

(a) the amount in which the non-resident is chargeable to income tax for the year in question, and

(b) the amount of the first payment on account of his liability to income tax for that year.

(3) Where pursuant to paragraph (1) above an amount is set off against the amount specified in paragraph (2)(a) above, section 59A (as modified by regulation 20) shall have effect as if the reference in subsection (1) of that section to the amount which is the assessed amount were a reference to that assessed amount reduced by the amount set off.

(4) Where pursuant to paragraph (1) above an amount is set off against the amount specified in paragraph (2)(b) above, section 59A (as so modified) shall have effect as if the reference in subsection (2) of that section to the first payment on account were a reference to the amount of that payment reduced by the amount set off.

(5) In any case where—

(a) by virtue of regulation 17 the obligations imposed under these Regulations to make payments to the Board do not apply in any year in relation to payments falling to be treated as receipts of a Schedule A [UK property] business carried on by a non-resident in that year, and

(b) those obligations applied to such payments in the immediately preceding year,

subsection (1) of section 59A (as so modified) shall have effect as if those obligations did not apply in the immediately preceding year.

24.17 Agent indemnity

Section 971 ITA 2007 provides:

(4) A non-resident landlord representative who must pay prescribed amounts of income tax to HMRC under regulations under this section is entitled—

(a) to be indemnified by the non-resident for all such payments, and

(b) to retain out of any sums otherwise due from the representative to the non-resident, or received by the representative on behalf of the non-resident, sums representing income tax sufficient for meeting any liabilities under the regulations to make such payments.

(5) Subsection (4)(b) applies whether the liability is one which the representative has discharged or to which the representative is subject.

CHAPTER TWENTY FIVE

DEDUCTION OF INTEREST FROM PROPERTY INCOME

25.1 Deduction of interest
25.2 Basis for deduction
25.3 Capital expenditure
25.4 Wholly and exclusively
25.4.1 Interest at uncommercial rate
25.4.2 Non-resident co pays interest

For questions of the location of the source of interest, and deduction at source, see 26.1 (Interest income)

25.1 Deduction of interest

This chapter considers the deduction of interest for the purposes of income taxation of property income and trading income.

A great deal of tax and planning depends on obtaining that deduction. See *Langsam v Beachcroft LLP* [2011] EWHC 1451 (Ch) for an interesting negligence case, where a dissatisfied remittance basis taxpayer obtained damages against solicitors who failed to advise on tax avoidance possibilities dignified with the label "equity release arrangement".

I do not discuss:

(1) UK resident companies (subject to corporation tax and governed by the loan relationship rules)
(2) Restrictions on interest deduction for residential property[1]

The significance of the topic will greatly decrease in 2020/21, when non-resident companies become subject to corporation tax on UK property income. It will continue to matter for individuals and trusts, but they are not likely to have a significant UK property business.

25.2 Basis for deduction

Section 272(1) ITTOIA is the starting point for property income:

> The profits of a property business are calculated in the same way as the profits of a trade.

Section 272(2) provides a long list of statutory provisions which apply to a property business, including the sections discussed below. Thus I can deal with property income and trading income in the same chapter, though my focus here is on property income.

25.3 Capital expenditure

Section 33 ITTOIA provides:

> In calculating the profits of a trade, no deduction is allowed for items of a capital nature.

In the early days of income tax, the courts ruled that where a loan was used as capital in a trade, interest on the loan was a capital expense and so disallowed.[2] That seems a strange result, but the courts wished to avoid the anomaly, which broadly still holds today, and was a contributing factor to the 2008 financial crisis,[3] that debt finance gives rise to deductible interest but equity finance does not, as there is no deduction for dividends or the cost of share capital.

The old rule was however reversed by statute and s.29 ITTOIA now provides:

[1] Section 272A ITTOIA.

[2] See for instance *European Investment Trust v Jackson* 18 TC 1.

[3] The issue is discussed briefly in Report of the Parliamentary Commission on Banking Standards, *Changing banking for good* (2013) Volume II para 185-188 *http://www.parliament.uk/documents/banking-commission/Banking-final-report-vol-ii.pdf*

> For the purpose of calculating the profits of a trade, interest is an item of a revenue nature, whatever the nature of the loan.

Interest is in principle a deductible expense if incurred wholly and exclusively for the purpose of the property business.

A premium (if not interest) is not deductible for IT purposes. That rule is preserved by s.58 ITTOIA, which allows relief for incidental costs of loan finance, but s.58(4) ITTOIA provides:

> But the following are not incidental costs of obtaining finance ...
>
> (c) the cost of repaying a loan or loan stock so far as attributable to its being repayable at a premium or having been obtained or issued at a discount...

25.4 Wholly and exclusively

Section 34 ITTOIA provides:

> (1) In calculating the profits of a trade, no deduction is allowed for—
>
> (a) expenses not incurred wholly and exclusively for the purposes of the trade,

The Property Income Manual provides:

> **PIM2105. Introduction** [Mar 2018]
>
> ***Overview***
>
> ... For income tax, for tax years up to and including 2016/17, interest payable on loans used to buy land or property which is used in the rental business, or on loans to fund repairs, improvements or alterations, is deductible in computing the profits or losses of the rental business in the same way as other expenses.
>
> Similarly, interest payable under hire purchase agreements or on an overdraft is deductible where the asset is used for business purposes.
>
> [The manual discusses the rules for residential let property, and continues] The normal rental business rules apply, see PIM1100 onwards, including the "wholly and exclusively" rule and the rules governing the timing of relief (see PIM1100 onwards). A taxpayer cannot, for example, deduct interest on a private loan, such as a loan used to buy their private residence. Where part of the taxpayer's own residence is let see PIM2100.
>
> Similarly, the interest on a loan or overdraft may not be allowable, or only part may be allowable, where the taxpayer, for example, uses the borrowing:
>
> - to buy non-rental business investments (which may be shown in the

balance sheet as assets),

- to buy private assets or assets for their family,
- for the provision of private funds to be taken out from the rental business.

Deciding what interest, if any, can be deducted may be difficult, particularly where the taxpayer's account with the business is overdrawn. That is, where the taxpayer has drawn out more money than the profits of the rental business. The loan may have, for example, partly financed the rental business and partly met private living expenses. Interest on a borrowing that is used to fund private living expenses or other non-business expenditure isn't allowable.

For advice regarding the incidental costs of loan finance see PIM2050.

Interest on a partner's capital account with the business isn't deductible. It is merely an allocation of the rental business profit and is taxed as property income.

For more detailed guidance about the deduction of interest see BIM45650 onwards.[4]

Interest payable on property only partly used for rental business

A property may be let for short periods in a tax year or only part of it may be let throughout a tax year (or both); the rest of the time the property is used for private or non-business purposes. Here the interest charged on a qualifying loan on that property has to be split between the rental business use and the private or non-business use. The split is done in whatever way produces a fair and reasonable business deduction, taking account of both the proportion of business use and the length of business use.

You don't have to split the interest if the taxpayer is genuinely trying to let the property but it is empty because they have not been able to find a tenant. In this case the interest will meet the "wholly and exclusively" test. It won't meet this test if they have not been trying to let the property or they have been using it for private or non-business purposes .

[***Interest and rent-a-room*** - *passage not printed here*]

Legislation

The profits of a rental business are calculated in the same way as the profits of a trade. Therefore interest may be deducted in computing the profits of a rental business provided that it meets the following criteria.

- It must be payable wholly and exclusively for the purposes of the rental business.

[4] This material is not set out here for reasons of space, but it is well worth reading, particularly where the interest is deducted from trading income rather than property income.

> [• If it is paid to a person not resident in the UK, the deductible element must not be at more than a reasonable commercial rate - see PIM2130.][5]
>
> Remember that under the rental business rules, relief is given for interest payable on the accruals basis (not interest paid unless, exceptionally, the cash basis is used - see PIM1090).
>
> The guidance on interest as a trade expense at BIM45650 onwards applies equally to interest as a rental business expense.
>
> ***Interest rate hedging instruments*** [See 24.5.1 (Property income: computation)]
>
> **PIM2064. Paid abroad** [Mar 2018]
>
> ***Business deduction and deduction of tax***
>
> The residence status of the lender does not affect the taxpayer's right to an interest deduction in computing the profits or losses of their rental business. But where they pay interest to a lender whose usual place of abode is outside the UK, they should normally deduct IT at the basic rate from the payments they make and account for it to HMRC ...

25.4.1 *Interest at uncommercial rate*

The Property Income Manual provides:

> **PIM2064. Paid abroad** [Mar 2018]
>
> ...
>
> ***Interest paid at uncommercial rates***
>
> Interest paid to a lender not resident in the UK over and above a commercial rate isn't allowable as a deduction even if it would otherwise qualify (perhaps because the loan was used to buy a rental business property). Generally, HMRC will accept the interest charged by the lender as an allowable deduction where it is paid on an arm's length loan made on a normal commercial basis.
>
> Take a broad view of what is a reasonable commercial rate. You should not normally seek an adjustment where the payer and recipient are at arm's length. If interest is payable in the UK on an advance from a foreign bank carrying on a bona fide banking business in the UK through a branch, treat it as if it were interest payable to a UK bank...

This is referring to the former s.74(1)(n) ICTA 1988, which disallowed interest paid to a non-resident so far as it was at more than a reasonable commercial rate. The provision was repealed in 2004, so the Manual is almost a decade out of date. However if interest is paid at more than a

[5] This passage is out of date: see 25.4.1 (Interest at uncommercial rate).

commercial rate, whether or not to a non-resident, the deduction would in principle be disallowable on transfer pricing or on "wholly and exclusively" principles.

25.4.2 *Non-resident co pays interest*

Lastly, for completeness, the Manual refers to (what is now) 1301A CTA 2009:

> In calculating a company's income from any source for corporation tax purposes, no deduction is allowed for interest otherwise than under Part 5 (loan relationships).

That only applies for CT and does not disallow a deduction for interest for IT. HMRC agree. The PI Manual states:

> **PIM2110. Paid abroad** [Jan 2018]
> ...
> ***Non-resident companies***
> ... Section 337A does not preclude a deduction for interest for companies chargeable to IT such as non-resident companies with income from UK property.

25.5 Tax relief schemes

Section 809ZG(1) ITA provides the general rule:

> Relief is not to be given under any provision of the Income Tax Acts to a person in respect of a payment of interest if
> [a] a tax relief scheme has been effected, or
> [b] tax relief arrangements have been made,
> in relation to the transaction under which the interest is paid.

Section 809ZG(2) ITA is a small point:

> Subsection (1) applies whether the tax relief scheme is effected, or the tax relief arrangements are made, before or after the transaction.

I do not see how a transaction could take place before the scheme is effected, but it does not matter.

Section 809ZG(3) ITA defines tax relief scheme:

> A scheme is a tax relief scheme in relation to a transaction for the purposes of subsection (1) if it is such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(4) ITA defines tax relief arrangements in the same way:

> Arrangements are tax relief arrangements in relation to a transaction for the purposes of subsection (1) if they are such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(5) ITA provides a commonsense definition of relief:

> In this section "relief" means relief by way of—
> (a) deduction in calculating profits or gains, or
> (b) deduction or set off against income.

Corporate Finance Manual provides:

> **CFM39030. Artificial payments of interest: Sole or main benefit** [Nov 2019]
> [The Manual summarises the legislation and continues:] The sole or main benefit test is an objective, rather than a subjective test: the subsection focuses on the result to be expected from the transaction rather than its purpose. (See *The Crown Bedding Co v IRC* 34 TC 107 at pp 115, 118-120, followed in *Ackland & Pratten v IRC* 39 TC 649 at p662, and approved in *IRC v Brebner* 43 TC 705 at p718).
> Ordinary borrowings involving funds, which are genuinely invested or re-lent, are not affected because the tax relief on the interest paid is incidental to the transaction.

The International Manual formerly provided:

> **INTM509120. Section 787 ICTA 1988** [Mar 2012]
> *Part XVII ICTA 1988 includes various anti-avoidance provisions including Section 787. This restricts relief for interest paid under a scheme from which the sole or main benefit which might be expected to accrue is the reduction of tax resulting from the relief, including group relief. Although this appears to be a far reaching section which could be used against many avoidance schemes, its usefulness is somewhat restricted.*
> *The provision was introduced to counteract a specific domestic avoidance scheme to get relief on 'manufactured' interest by paying interest in advance on a borrowing which was effectively immediately repaid. It is necessary to distinguish between an out-and-out avoidance scheme and a judiciously arranged borrowing scheme. The section is not, therefore, easily invoked but it may still be legitimate to use it in some cases involving intra-group funding transactions.*

The entry has been deleted but there seems to be no reason to believe that HMRC practice has changed. HMRC's reluctance to use the section goes back to an assurance given in parliament:

> **Mr. Robert Sheldon (financial secretary to the Treasury)**: The hon. Member for Guildford (Mr. Howell) rightly asked for some assurance that there would be no problems for innocent parties seeking arrangements whereby they undertook to pay interest for genuine business purposes. I can give the hon. Gentleman the assurance that those paying true interest for genuine business purposes will not be caught by this scheme. To give him the definition, which I think also deals with the question put by the hon. Member for Cirencester and Tewkesbury (Mr. Ridley), in a genuine commercial scheme the main benefit is to secure finance. If that is applicable, those people will not be caught by the main benefit test and they will be perfectly free to go about seeking and undertaking any transactions which fall within that definition.
>
> The natural anxiety of the hon. Member for Guildford is that these matters are closely watched. I can give him that assurance. That is to the advantage of the kind of people mentioned in this debate so that we do not entrap those perfectly legitimate and proper cases where people are prepared to pay the interest and get it allowable against tax. We are concerned about people who resort to some of those very peculiar devices of the kind which show an immense amount of ingenuity and, as the hon. Member for Guildford said, with such unfortunate results.[6]

25.6 Transfer pricing/thin capitalisation

The transfer pricing rules are in Part 4 TIOPA, supplemented by OECD transfer pricing guidelines, nearly 700 pages in the 2022 edition. This is a vast topic, and a full discussion would need many volumes. I focus on matters closest to the themes of this book.

Assuming interest is paid at market rates, one would not expect transfer pricing issues to arise. However the effect of some deft deeming provisions is that transfer pricing rules also serve as thin capitalisation rules, ie rules which restrict the deduction of interest by companies funded primarily by borrowing, having limited share capital or net value. It is therefore necessary to consider these rules in some detail.

The International Manual explains the background as it appears to

[6] Hansard, 13 July 1976.

HMRC:

> **INTM413010. Definition of thin capitalisation** [Mar 2022]
> In the commercial world, a company is said to be thinly capitalised when it has more debt than equity, and many thin cap cases boil down to a company with more debt than it could and would have borrowed on its own resources, because it is borrowing either from or with the support of connected persons.
>
> However, the amount of interest payable may be excessive for one or more reasons - interest rate, excessive duration of lending, restrictions on repayment, etc - so all terms and conditions should be considered in a thin capitalisation review. Other less obvious issues of possible interest are the appropriateness of the currency of the loan (e.g. forex risk) and the presence of guarantees. For HMRC, thin cap means looking at every aspect of lending and borrowing from a transfer pricing angle...
>
> **How thin capitalisation arises**
>
> When a company operates at arm's length from its sources of funding, commercial considerations drive the decision to raise funds either through debt, equity, or a mixture of the two. There is a marked difference in tax treatment between debt finance and equity, in that interest on debt is deductible from profits, whereas dividends on shares are not. This is explored in more detail in the Practical Thin Cap Guidance from INTM510000 onwards.
>
> When a company borrows from or with the support of other group companies, funding decisions may not be driven by commercial considerations alone. The connection between the parties involved might allow them to change the way in which the funding is obtained in ways unavailable or unattractive to the borrower at arm's length, or to take on funding risks which an independent borrower would avoid. Factors such as group policy, strategy, and tax planning will sit alongside commercial considerations.
>
> As a result of the differences in tax treatment between interest and dividends, a company which increases its indebtedness, and thereby increases its interest payments, reduces the tax it has to pay.
>
> Thin capitalisation is just a form of transfer pricing, and is not limited to companies, except where the legislation says so, but this guidance concentrates largely on corporate relationships.
>
> **Thin capitalisation and tax planning**
>
> As with transfer pricing more generally, thin capitalisation does not require a tax avoidance motive. The aim of applying transfer pricing legislation is to ensure that arm's length prices are recognised for goods, services, etc, for tax purposes. However, company finance is an easy and attractive way for groups to change the jurisdiction within which profits

arise, and tax planning will be an aspect of the financing plans for any major corporate acquisition.

Corporate thin capitalisation is usually seen in a group context, since it would be counter-productive (though not unheard of) for a company to increase its interest costs payable to a third party, just to reduce its tax liability. Besides, a borrower cannot borrow more (or pay more interest) than an arm's length lender is willing to lend, unless that money is guaranteed, usually by group members. Where the borrowing is intra-group, the interest remains within the group; the group as a whole is no less profitable, but the borrower has paid less tax, and, where the lender is in a country with a lower corporation tax rate than the borrower or has losses to absorb interest received, the group can end up far better off overall. At the same time, there may be arbitrage (INTM590000) or other opportunities to further reduce tax.

With third party borrowing supported by a group guarantee, interest is paid to a third party and value leaves the group, but in that case the issue may be a matter of where it is most tax efficient for the group's interest costs to arise. The inference is that the world-wide group has capacity to borrow but not necessarily within the UK entity, which is where it wishes to place the debt. However, guarantees, including less formal support such as a letter of comfort, can enable a company to borrow more cheaply than would be possible on a standalone basis.

25.6.1 *Thin capitalisation: EU law*

The EC comment on the EU law aspects of thin capitalisation:

> *Thin capitalisation rules*. There are many different approaches to the design of thin cap rules which reflect the different views and legal traditions of MSs. However, the background to these rules is similar. Debt and equity financing attract different tax consequences. Financing a company by means of equity will normally result in a distribution of profits to the shareholder in the form of dividends, but only after taxation of such profits at the level of the subsidiary. Debt financing will result in a payment of interest to the creditors (who can also be the shareholders), but such payments generally reduce the taxable profits of the subsidiary. Dividend and interest may also attract different withholding tax consequences. The difference in treatment between debt and equity financing under national tax law (and at bilateral level), as a result of which the source state's taxing rights on interest are generally more limited than those on dividends, make debt financing considerably more attractive in a cross-border context and can therefore lead to the erosion of the tax base in the state of the subsidiary.
>
> By abolishing their thin cap rules altogether or by carving out dealings with lenders resident in other MSs and EEA States from their scope, the difference in treatment between resident subsidiaries according to the seat of their parent company within the EU/EEA would be removed. The Commission is of the opinion that MSs should, however, be able to protect their tax bases from artificial erosion through structured debt financing, also within the EU/EEA. Following *Lankhorst*, some MSs have tried to avoid

the charge of discrimination by extending the application of their thin cap rules to cover also purely national relations. As discussed above, this is not desirable development.

In *Thin Cap* the ECJ acknowledged that measures to prevent thin capitalisation are not per se impermissible. Their application must however be confined to purely artificial arrangements. This may be achieved by ensuring that the terms of the debt financing arrangements between related companies remain within the limits of what would have been agreed upon between unrelated parties or that they are based on otherwise valid commercial reasons. The Commission considers that the principles laid down by the ECJ in relation to thin cap rules also apply to transfer pricing rules, which are essential to the continued existence of individual national tax systems. MSs cannot operate effective tax systems unless they are able to ensure that their tax bases are not eroded through non-commercial arrangements between associated companies.

4. APPLICATION OF ANTI-ABUSE RULES IN RELATION TO THIRD COUNTRIES

CFC rules determine the tax treatment of the profits of a foreign company controlled by a resident. As such rules are directed at, and thus only affect resident shareholders with definite influence over a foreign company (usually a parent in a corporate group) their centre of gravity lies with the ability of companies (and as the case may be, individuals) to establish themselves, through subsidiaries, in other countries. Similarly, MSs' thin cap rules are directed exclusively at group debt financing arrangements, i.e. they are only applied in situations where a foreign shareholder holds a substantial participation in the resident subsidiary. Thus, the centre of gravity in respect of thin cap rules also lies clearly with the freedom of establishment and as in the case of CFC rules their application is therefore to be examined solely from the perspective of Article 43 of the EC Treaty.[7]

As Community law does not require MSs to avoid discrimination in relation to the establishment of their nationals outside the Community, or the establishment of third-country nationals in a MS[8] the issue of discrimination does not arise in the cases of a controlled company or a creditor/shareholder resident in a third country. MSs should therefore not be precluded from applying CFC and thin cap rules in relation to third countries. Community law does not impose any particular requirements on the legitimacy of the application of such legislation to transactions outside the EU.[9]

However, should the application of those rules not be confined to situations and transactions between companies in a corporate group (or otherwise related parties where one has definite influence over the other) and to the extent that this was the case, they would need to comply with Article 56 of the EC Treaty, and also in relation to third countries, be applied to wholly artificial arrangements only (with the exception of situations where there is no adequate information exchange relationship with the third country concerned).

The corporate tax directives only apply to companies incorporated in the MSs and their

[7] *Lasertec Gesellschaft für Stanzformen v Finanzamt Emmendingen*, C-492/04 at [20].

[8] As the ECJ noted in *ICI v Colmer* C-264/96 at [34]: “When deciding an issue concerning a situation which lies outside the scope of Community law, the national court is not required, under Community law, either to interpret its legislation in a way conforming with Community law or to disapply that legislation.”

[9] Their application may however be precluded by the relevant Double Tax Convention.

overall objective is to create *within the Community* conditions analogous to those of an internal market by removing tax obstacles to cross-border reorganisations and to payments of dividends, interest and royalties. It would therefore not appear to fall within their ambit to, for instance, facilitate arrangements intended to avoid withholding taxes on payments to non-European entities, if such structuring does not serve any commercial purpose.[10]

25.6.2 *Other provisions*

The International Manual provides:

> **INTM413010. Definition of thin capitalisation** [Mar 2022]
> **... Other legislation on finance**
> There is other legislation - and this is not an exhaustive list - which may result in a restriction of the interest deduction, including:
>
> - Arbitrage provisions - see INTM590000
> - Unallowable purpose legislation - s.441-442 CTA - see CFM38010
> - Remaining provisions of pre-2004 legislation (s.209 ICTA) - now around s.1000 CTA - such as interest in excess of a commercial rate of return - see below and CTM15502
> - World-wide debt cap - Part 7 TIOPA 2010 - see CFM90100 onwards
>
> The first two represent anti-avoidance legislation, so the choice of applicable legislation depends on the facts and circumstances of the particular case, and transfer pricing concerns may sit alongside avoidance concerns. Section 155(6) TIOPA says that the CTA10/S1000 list and the world-wide debt cap legislation shall be disregarded when calculating the transfer pricing tax advantage. The debt cap applies after any transfer pricing adjustment has been made.

These provisions concern corporation tax only, and so are not discussed here.

25.7 "The basic pre-condition"

Section 147(1) TIOPA provides:

> For the purposes of this section "the basic pre-condition" is that—
>
> (a) provision ("the actual provision") has been made or imposed as between any two persons ("the affected persons") by means of a transaction or series of transactions,
>
> (b) the participation condition is met (see section 148),

[10] EC Communication "The application of anti-abuse measures in the area of direct taxation" COM(2007) 785
http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:52007DC0785

> (c) the actual provision is not within subsection (7) (oil transactions), and
> (d) the actual provision differs from the provision ("the arm's length provision") which would have been made as between independent enterprises.

Thus the "basic pre-condition" actually consists of four conditions or sets of conditions. I refer to them as **"basic pre-conditions (a) to (d)"** though condition (b) has its own label (the participation condition). Condition (c) (which concerns oil transactions) is not discussed here.

Section 151(1) TIOPA defines **"arm's length provision"** in line with the commonsense usage in basic pre-condition (a):

> In this Part "the arm's length provision" has the meaning given by section 147(1).

25.7.1 *Transaction/series*

This expression is used in basic pre-condition (a). Section 150(1) TIOPA provides a wide definition of transaction:

> In this Part "transaction" includes arrangements,[11] understandings and mutual practices (whether or not they are, or are intended to be, legally enforceable).

Section 150 TIOPA provides a wide definition of series of transactions:

> (2) References in this Part to a series of transactions include references to a number of transactions each entered into (whether or not one after the other) in pursuance of, or in relation to, the same arrangement.
> (3) A series of transactions is not prevented by reason only of one or more of the matters mentioned in subsection (4) from being regarded for the purposes of this Part as a series of transactions by means of which provision has been made or imposed as between any two persons.
> (4) Those matters are—
> (a) that there is no transaction in the series to which both those persons are parties,
> (b) that the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or

[11] Section 150(5) TIOPA provides (with minor contextual modifications) the standard (unnecessary) IT definition ": see App 2.2.3 (Definitions of "arrangement").

both of those persons, and

(c) that there is one or more transactions in the series to which neither of those persons is a party.

The International Manual provides:

> **INTM413060. Transaction or series of transactions** [Sep 2021]
> Transactions within a series do not have to occur in a recognisable sequence. They may be simultaneous or removed in time from one another, but they have to be part of an overall arrangement or scheme.
> The meaning of series of transactions is further widened by Section 150(4) TIOPA 2010 [the Manual sets out s.150(4) and continues:]
> By recognising a series of transactions, the transfer pricing legislation can apply to more complex and indirect financial structures in the same way that it does to the most straightforward borrower/lender situation.
> However, irrespective of the complexity or number of transactions which make up the "series", it should always be borne in mind that this legislation is still about a provision within TIOPA10/S147 between two persons that results in a tax advantage; see INTM412020 and. INTM413050
> *Examples of "series of transactions"*
> A simple example of indirect finance which would fall within the definition of a series of transactions is a UK borrower being lent money by an entirely unconnected third party bank, with a party connected to the borrower guaranteeing the loan.
> A more complex example is where
> [1] a company in the same group as the UK borrower has provided a guarantee to one bank,
> [2] which then provides a guarantee to a second bank, and
> [3] the second bank then lends money to the UK borrower.
> Here there is a step - between the first and second banks - which does not involve either the parent or the borrower. This is still a series of transactions, and one which, though difficult to detect, would fall within the scope of the thin capitalisation legislation. Apart from the provision of a guarantee, the most likely situations where the provision might consist of a series of transactions would be where an intermediary is acting in a nominee or agency capacity in providing finance cross border between group companies.
> In guarantee cases of this nature, the questions to ask in considering the provision are:
>
> - Without the guarantee(s) would the borrower have been able and willing to borrow on these terms?
> - Had the borrower and the guarantor been at arm's length from one

another, would they have entered into the guarantee?

25.7.2 *Basic pre-condition (a)*

With that definition in mind we can turn to basic pre-condition (a). Section 147(1) TIOPA provides:

> For the purposes of this section "the basic pre-condition" is that—
> (a) provision ("the actual provision") has been made or imposed as between any two persons ("the affected persons") by means of a transaction or series of transactions ...

At first sight, this is not so much a condition as a convenient way of defining the terms "actual provision" and "affected persons".

It is considered that the condition only applies when both persons are carrying on an enterprise, which is sometimes important.[12]

25.8 Participation condition

We turn to basic pre-condition (b), the participation provision.

Section 147(1) TIOPA provides:

> For the purposes of this section "the basic pre-condition" is that ...
> (b) the participation condition is met (see section 148)

Section 148(1) TIOPA provides:

> For the purposes of section 147(1)(b), the participation condition is met if—
> (a) condition A is met in relation to the actual provision so far as the actual provision is provision relating to financing arrangements, and
> (b) condition B is met in relation to the actual provision so far as the actual provision is not provision relating to financing arrangements.

I refer to **"participation conditions A and B"**. It is helpful to consider condition B first.

25.8.1 *Participation condition B*

Section 148(3) TIOPA provides:

> Condition B is that, at the time of the making or imposition of the actual provision—

[12] See 39.42 (Transfer pricing & BiK).

> (a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or
> (b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

25.8.2 *Participation condition A*

Section 148(2) TIOPA provides:

> Condition A is that, at the time of the making or imposition of the actual provision or within the period of six months beginning with the day on which the actual provision was made or imposed—
> (a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or
> (b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

Participation condition A is the same as B, except for the underlined words: the participation test can be satisfied at the time of the arrangement in the following 6 months. This wider test applies to financing arrangements. That term is given a commonsense definition in s.148(4) TIOPA:

> In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

For the participation tests, see 105.1 (Participation).

25.9 The general rule

If the "basic pre-condition" is met, we move on. Section 147(2) TIOPA provides:

> Subsection (3) applies if—
> (a) the basic pre-condition is met, and
> (b) the actual provision confers a potential advantage in relation to UK taxation on one of the affected persons.

If that is the case we come to the general rule:

> (3) The profits and losses of the potentially advantaged person are to be calculated for tax purposes as if the arm's length provision had been

> made or imposed instead of the actual provision.

Similarly if there are several affected persons:

> (4) Subsection (5) applies if—
> (a) the basic pre-condition is met, and
> (b) the actual provision confers a potential advantage in relation to UK taxation (whether or not the same advantage) on each of the affected persons.
> (5) The profits and losses of each of the affected persons are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

The International Manual provides:

> **INTM413020. Introduction** [Sep 2021]
> ...Paragraph 1.65 of the OECD Transfer Pricing Guidelines is particularly helpful in finding the appropriate approach towards the arm's length provision in thin capitalisation cases. This says that the basic transfer pricing approach considers economic substance versus form in thin capitalisation cases:
>
> > "[In cases] where the economic substance of a transaction differs from its form... the tax administration may disregard the parties' characterisation of the transaction and re-characterise it in accordance with its substance. An example of this circumstance would be an investment in an associated enterprise in the form of interest-bearing debt when, at arm's length, having regard to the economic circumstances of the borrowing company, the investment would not be expected to be structured in this way. In this case it might be appropriate for a tax administration to characterise the investment in accordance with its economic substance with the result that the loan may be treated as a subscription of capital."[13]
>
> This means that where a borrower obtains an actual loan of £100m from a non-arm's length source, but would only be able to borrow £60m at arm's length, the tax deduction for the interest costs should be restricted to those accruing on £60m of the £100m actually borrowed. The balance would have had to be provided in some other form, most likely as equity. This is an explanation, not a literal recharacterisation in the way that excessive interest was once reclassified as a distribution for tax purposes (see INTM413260). Debt which is found to be excessive may be treated as equity for the purposes of a thin cap analysis, but the interest on the

[13] OECD, *Transfer Pricing Guidelines for Multinational Enterprises and tax Administration* (July 2010).

> £40m excess remains interest for tax purposes; it is simply disallowed in the computation.
>
> There will be variations in the way debt is treated as equity. There may be negotiations which result in an amount of debt being recognised as serving an equity function, as if that debt had actually been permanently converted into equity, but there will be other instances, for example the application of a debt: equity ratio in an advance agreement, where equity will in effect vary from year to year.
>
> This sort of "recharacterisation" should be uncontroversial, assuming the level of disallowance is agreed. It is a case of finding an explanation, should one be needed, for the presence and treatment of funds that have been deemed "excessive" as debt in thin cap terms. However, if the argument goes further, for example towards saying that the loan transaction would not have taken place at all and something different would have happened at arm's length, it is recommended that the matter be discussed with CSTD Business, Assets International Transfer Pricing Team before the case is developed,
>
> It is important to remember that thin capitalisation considerations are not limited to determining simply the amount which would have been borrowed at arm's length, but also extend to the other terms attached to the actual provision, such as the interest rate, duration and repayment terms. Any of these is capable of creating or extending a tax advantage for the UK borrower.

25.9.1 *Separate entity basis*

The International Manual provides:

> **INTM413070. Separate entity basis for determining borrowing capacity** [Sep 2021]
>
> The separate entity principle is part of the basic pre-condition in TIOPA10/S147(1)(d). This defines the arm's length provision as that "which would have been made as between independent enterprises". The arm's length borrowing capacity of the borrower is therefore the debt which it could and would, as a stand-alone entity, have taken on from an independent lender. To establish this, it is necessary to consider the borrower separately from other members of the same group of companies This is the "separate entity" or stand-alone basis for determining borrowing capacity.
>
> This approach is derived from OECD Transfer Pricing Guidelines, as expressed in paragraph 1.6 of the Guidelines:
>
> > By seeking to adjust profits by reference to the conditions which would have obtained between independent enterprises in comparable transactions and comparable circumstances, the arm's

> length principle follows the approach of treating the members of an MNE group as operating as separate entities rather than as inseparable parts of a single unified business. Because the separate entity approach treats the members of an MNE group as if they were independent entities, attention is focussed on the nature of the dealings between those members.[14]

The "borrowing unit"

The main impact of the "separate entity" basis for determining borrowing capacity is that no account is taken of any guarantees, explicit or implicit, from connected companies (INTM413130). However, it is recognised that, without offending the "separate entity" principle, negotiations with a third party lender would include an assessment of the financial strength of the borrower. This would take into account the income, assets and liabilities of the company, but also of its subsidiaries. In broad terms, this will be based on the strength (or otherwise) of the borrower's consolidated balance sheet and profit and loss account, subject to some analysis of what underlies the figures on the face of the accounts. This grouping is known as the "borrowing unit".

HMRC follows a practical approach and, if consolidated accounts are not drawn up as a matter of course, will request a consolidated presentation of the relevant figures. The borrower is not obliged to produce audited consolidated accounts purely for HMRC, so properly drawn up schedules reflecting the consolidated position will be acceptable. This may not be a straightforward task if the exercise embraces companies resident in a number of countries and using a variety of accounting conventions. In such cases it may be helpful to discuss how HMRC may be satisfied without creating major expense and difficulty.

There may be companies that need to be excluded from the consolidation and dealt with according to their own characteristics e.g. finance companies which are likely to have higher proportions of debt to equity than ordinary trading companies. Some subsidiaries may need to be excluded altogether e.g. companies with a dividend block, which a lender might not recognise as assets against which they would be willing to lend. This whole question must be viewed pragmatically.

Further practical guidance on the separate entity measure of borrowing capacity is at INTM542050. The next page gives some background on the pre-2004 treatment; this shows the contrast between the previous statutory approach to the borrowing unit with the practical, analytical

[14] OECD, *Transfer Pricing Guidelines for Multinational Enterprises and tax Administration* (July 2010).

> approach which has been adopted to deal with the separate entity basis. UK companies under common ownership with the borrowing unit may be able to make a compensating adjustment claim if they have spare borrowing capacity...

25.10 "Provision otherwise made"

Section 151(2) TIOPA provides:

> For the purposes of this Part, the cases in which provision made or imposed as between any two persons is to be taken to differ from the provision that would have been made as between independent enterprises include the case in which
> [a] provision is made or imposed as between two persons but
> [b] no provision would have been made as between independent enterprises;
> and references in this Part to the arm's length provision are to be read accordingly.

The International Manual provides:

> **INTM413030. The "would" and "could" arguments** [Sep 2021]
> The test of thin capitalisation is to test the actual borrowing position against the arm's length borrowing position.
> The arm's length principle recognises that connected parties may enter into transactions with each other on terms which differ from those which would be found in the open market between entirely unconnected persons. Where profits arise and the extent to which those profits are taxed may also differ from the arm's length position.
> The application of the arm's length principle requires a judgement on the merit of each individual case to establish what would have happened at arm's length; the terms on which the company in question could have borrowed and would have borrowed (if anything),
>
> - as a separate entity
> - from a third party lender unconnected with the borrower, and
> - without guarantees or other forms of comfort from any party connected with the borrower.
>
> There are two main ways of looking at the borrowing: what the lender would do and what the borrower would do if the circumstances were as outlined above, and these are expressed as:
>
> - the "could" argument - what a lender would have lent and therefore what a borrower could have borrowed - and
> - the "would" argument - what a borrower acting in the best interests of their own business would have borrowed.

The "could" argument

This is generally the less subjective issue. The could argument focuses on what a lender would be prepared to lend to the company and on what terms, taking into account the borrower's capacity to borrow, the risk of default, assets (as security) and liabilities (additional drains on the borrower's resources), and its ability to service the debt: in short, how much and on what terms a lender would lend.

Risk elements will include amount, duration of lending, purpose, security, currency and the economic climate at a sector, national and international level.

The "would" argument

This issue is more subjective, since it can involve the whole basis on which the business is run. The "would" argument considers the borrower's perspective: whether the borrower would have entered into the actual transaction in the absence of a special relationship (INTM412020) with the lender. Therefore, when trying to establish the amount and terms of arm's length debt, the "would" argument relates to how much, and on what terms, the borrower would have borrowed at arm's length bearing in mind the sort of issues mentioned below.

So, the "would" argument requires consideration as to what terms a borrower would have agreed at arm's length, such as

- the amount of debt, and whether that leaves headroom to allow the borrower to absorb cyclical or seasonal variations, an unforeseen event or a fluctuation in interest rates or profits, and ultimately repay the principal;
- the costs of borrowing, and whether forecasts indicate that the borrower is likely to be able to service the debt fully and still have sufficient cash to operate as a profitable going concern;
- whether the other terms, such as the interest rate or provision for early repayment are ones to which the borrower would have agreed in the absence of a special relationship;
- whether the borrower would have taken out the loan at all.

Consideration of all aspects of the "could" and "would" arguments should highlight situations such as where

- an arm's length interest rate is being applied, but the amount of debt is more than the borrower could have borrowed from an independent lender, or
- an arm's length interest rate is applied to an arm's length amount of debt, but the borrower appears to have no purpose of its own for borrowing the money (and therefore no reason to borrow other than the group relationship).

Debt is not necessarily paid down to nil. A certain level of debt is acceptable, even desirable in most companies, and while higher levels of acquisition debt tend to be reduced in the years following the transaction, there is likely to be a level of debt appropriate to the needs of the business, year on year, appropriate to achieving the right balance between debt, equity and profitability...

25.11 Securities (loans)

Section 152 TIOPA provides:

> (1) This section applies where—
> (a) both of the affected persons are companies, and
> (b) the actual provision is provision in relation to a security issued by one of those companies ("the issuing company").
>
> (2) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring account to be taken of all factors, including—
> (a) the question whether the loan would have been made at all in the absence of the special relationship,
> (b) the amount which the loan would have been in the absence of the special relationship, and
> (c) the rate of interest and other terms which would have been agreed in the absence of the special relationship.

The International Manual provides:

> **INTM413040. Summary of sections specific to thin capitalisation** [Sep 2021]
>
> There are specific sections within TIOPA10/Part 4 that apply only to loans between two companies:
>
> - TIOPA10/S152 requires that in the case of lending between companies, certain factors to be considered when comparing the arm's length provision with the actual provisions in TIOPA10/S147(1)(d). See INTM413100
> - TIOPA10/S181 to TIOPA10/S184 sets out the conditions required for a lender to make a valid compensating adjustment claim where a disallowance has been made in the borrower's computations. See INTM413140
> - TIOPA10/S153 deals with the factors that are taken into account when a loan is supported by a guarantee, and the borrower and the guarantor have a special relationship. See INTM413160
> - TIOPA10/S191 to TIOPA10/S194 sets out the conditions required for a guarantor to make a valid compensating adjustment claim. See INTM413150
>
> **Non-corporates**
>
> TIOPA10/Part 4 applies to loans made to companies by non-corporates

> where the participation condition in TIOPA10/S148 is met. However, the explicit instructions regarding factors to be considered as part of evaluating the arm's length provision in TIOPA10/S152 and TIOPA10/S153 do not apply directly as legislation to loans by non-corporates. Even so, the factors that are set out in TIOPA10/S152 and TIOPA10/S153 are generally those which are taken into account by lenders and borrowers acting at arm's length, so in practice the nature of the lender, corporate or non-corporate will have little if any impact on how the arm's length provision is determined.
> Claims for compensating adjustments by non-corporates can be made under the conditions in TIOPA10/S174 to TIOPA10/S178 (Para 6 of Sch 28AA)....

25.11.1 *Disregard: Non-business loan*

Section 152(3) TIOPA introduces two disregards:

> Subsection (2) has effect subject to subsections (4) and (5).

Section 152(4) TIOPA provides:

> If—
> (a) a company ("L") makes a loan to another company with which it has a special relationship, and
> (b) it is not part of L's business to make loans generally,
> the fact that it is not part of L's business to make loans generally is to be disregarded in applying subsection (2).

Why is this needed? The International Manual explains:

> **INTM413100. Special rules for lending between companies** [Sep 2021]
> TIOPA10/S152(4) ensures that the fact that the lender is not generally in the business of making loans cannot be taken into account when evaluating the terms.

25.11.2 *Disregard: Guarantee*

Section 152(5) TIOPA provides:

> (5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.
> (6) The matters are—

> (a) the appropriate level or extent of the issuing company's overall indebtedness,
> (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
> (i) the issue of a security by the issuing company, or
> (ii) the making of a loan, or a loan of a particular amount, to the issuing company, and
> (c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

Section 153 TIOPA repeats the same material:

> (1) This section applies where the actual provision is made or imposed by means of a series of transactions which include—
> (a) the issuing of a security by a company which is one of the affected persons ("the issuing company"), and
> (b) the provision of a guarantee by a company which is the other affected person.
> (2) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring account to be taken of all factors, including—
> (a) the question whether the guarantee would have been provided at all in the absence of the special relationship,
> (b) the amount that would have been guaranteed in the absence of the special relationship, and
> (c) the consideration for the guarantee and other terms which would have been agreed in the absence of the special relationship.
> (3) Subsection (2) has effect subject to subsections (4) and (5).
> (4) If—
> (a) a company ("G") provides a guarantee in respect of another company with which it has a special relationship, and
> (b) it is not part of G's business to provide guarantees generally,
> the fact that it is not part of G's business to provide guarantees generally is to be disregarded in applying subsection (2).
> (5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.
> (6) The matters are—
> (a) the appropriate level or extent of the issuing company's overall

indebtedness,

(b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—

(i) the issue of a security by the issuing company, or

(ii) the making of a loan, or a loan of a particular amount, to the issuing company, and

(c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

The International Manual provides:

> **INTM413110. Guarantees - what they do and what they are** [Sep 2021]
>
> As explained in INTM413060, a provision may arise from a series of transactions rather than just a single transaction between two connected companies. A loan from a third party which is guaranteed by a connected person constitutes a provision consisting of a series of transactions. The same would apply to a loan from a connected party which is guaranteed by another connected party. The most common instance will be a single loan supported by a single guarantee but the provision could consist of any number and combinations of loans and cross guarantees.
>
> **The effect of a guarantee**
>
> Guarantees most commonly support third party borrowing, but can be used to support loans between group companies: for example, a European group treasury company might provide finance to a fellow group company resident in the UK, but under guarantee from the UK borrower's parent company.
>
> With the additional comfort offered to the lender by a guarantor, the lender might provide a loan on more advantageous terms than the borrower could have obtained otherwise, because the guarantee will reduce the risk to the lender. In the event of a failing borrower and no guarantee, a third party lender's prospects of recovering its outlay would be at risk. However, with a guarantee in place, the lender should have greater and more immediate success in recovering debt and interest, simply by exercising its rights under the guarantee and seeking payment from the guarantors, than it would by waiting for a distribution of assets in a liquidation, or having to write off all or part of the loan. The guarantor would of course have to demonstrate that it could make good its pledge, and probably provide security in relation to its commitment.
>
> The effect of a guarantee on loan terms is varied. Guarantees may help secure:
>
> - a larger loan

- a lower rate of interest
- an increase in duration
- less demanding covenants on the borrower

Any of these may have implications for the transfer pricing of the transaction e.g. a larger loan may be obtainable, but it may be more than the borrower would be able or willing to take on at arm's length. Also, the guarantee may secure preferable terms as compared to what would be otherwise on offer. A lower interest rate on a larger amount of debt might be regarded as a more attractive and not a more expensive deal. See INTM413120.

The presence of a guarantee does not necessarily signify a change in lending terms, and in any case larger, longer, etc, do not mean "better" for the borrower; a larger loan may be more than the borrower would or could borrow without this help, and therefore more than the borrower could or would borrow at arm's length. Lenders may seek guarantees as part of a "belt and braces" approach: not a crucial factor, but better to have than not have. A typical example being the cross guarantees required by lenders when they lend to a group of companies.

INTM413120. Evaluating guarantees: starting with the arm's length cost of debt [Sep 2021]

TIOPA10/S153 (SCH28AA/Para 1B) is about considering the effect of, and consequently the issue of allowing the costs of pricing guarantees between connected companies. It adopts a similar approach to the way transfer pricing of securities between companies operates - see TIOPA10/S152 (INTM413100). However to understand how the section works it is better to start by looking at the factors that have to be disregarded before looking at the factors that are specifically to be taken into account.

TIOPA10/S153(4) has the same effect for guarantees as TIOPA10/S152(4) has for loans. It ensures that where the guarantor is not generally in the business of making guarantees, that circumstance cannot be taken into account when evaluating what the guarantee fee would be at arm's length.

TIOPA10/S153(5) and (6) ensure that guarantees from connected companies are ignored, so that the borrower's borrowing capacity is evaluated on a separate entity basis (INTM413070). These subsections repeat what was said atTIOPA10/S152(5) and (6), except with different intent. S152 is about how the arm's length provision is calculated for the borrower, for the purposes of testing whether a security is on arm's length terms. S153 repeats the same test, but as a precursor to working out whether a guarantee has an arm's length value to the borrower. The exercise should isolate and exclude the effect of the guarantee to identify what would have been achieved without it.

Looking at the loan whilst ignoring the effect of any guarantees establishes the amount the borrower would have been able to borrow in its own right, and the terms on which it would have done so. The legislation specifically states that guarantees should be disregarded in considering the following specific issues:

- the level or extent of overall debt
- whether a loan would have been entered into
- the rate of interest or other terms

Once this is established, the legislation considers the transfer pricing of the guarantee fee itself - see INTM413110.

INTM413130. Establishing the arm's length value of a guarantee [Sep 2021]

This is about guarantee fees and their worth to the borrower, where the borrower is actually charged for the provision of a guarantee. This is therefore about:

- what value the guarantee brings to the borrower, compared to what it could and would obtain without it
- What is the appropriate level for the guarantee fee which the borrower pays

S153 (Para 1B) first establishes the arm's length price of the loan without guarantees. This does not necessarily mean that guarantees will be permanently ignored in pricing the debt. In considering what guarantee, if any, would have been provided at arm's length. TIOPA10/S153(2) (PARA1B(2)) asks that "all factors" be taken into account in working this out, and particularly asks what would have happened in the absence of the special relationship between the borrower and the provider of the guarantee (i.e. at arm's length):

- would the guarantee have been provided at all
- what amount would have been guaranteed
- what consideration (fee, etc) and other terms would have been agreed

This is simply a matter of applying a transfer pricing test to guarantee costs.

At arm's length, a company would not take on the extra cost of a guarantee unless that guarantee makes the overall cost of finance cheaper than it would be on a stand-alone basis. If the cost of the guarantee itself is greater than the saving it brings, it will be disallowed to the extent that it causes the total finance costs relating to the guaranteed debt to exceed the stand-alone arm's length price.

When does a guarantee provide an arm's length benefit?

The scenarios below set out how TIOPA10/S153 operates for the borrowing company. The "cost of loan" in the headings below refers to actual costs of borrowing excluding guarantee fees and not adjusted by transfer pricing provisions. These scenarios do not demonstrate the arm’s length price of a guarantee, but will show whether the guarantee has brought a benefit when the borrowing is considered on an arm’s length basis.

1. Guarantee fee charged and cost of loan exceeds arm’s length

The borrower is already paying more than it would if borrowing on a separate entity basis. Considered at arm’s length, the value of the guarantee is nil and it simply represents an additional cost. The terms of the loan are adjusted for transfer pricing purposes to the arm’s length amount, the non-arm’s length element of the loan costs is disallowed, and the guarantee fee is disallowed.

There is no apparent benefit from this guarantee, so any claim that there is value meriting a guarantee fee should be subject to a thorough analysis to identify whether the guarantee provides any other, less obvious commercial benefit that would justify the payment of a fee. A guarantee might enable a borrower to spread its finance costs over a longer period, which might be advantageous in certain circumstances.

2. Guarantee fee charged and cost of loan is equal to the arm’s length

The cost of the loan is arm’s length so no adjustment is required with respect to the loan itself, but as in 1 above, it would be difficult to justify a guarantee fee. It appears to provide no benefit by way of cheaper financing and is likely to be disallowed unless some less obvious benefit can be demonstrated.

3. Guarantee fee charged and cost of loan is less than arm’s length

This situation may arise where the guarantee is taken into account in setting the terms of the loan. For example, the presence of the guarantee may have the effect of improving the credit rating of the borrower and achieve a lower interest rate. As the guarantee has reduced the cost of the loan to below the stand-alone cost, there is a clear benefit to the borrower in entering into the guarantee. It is therefore likely that at arm’s length a fee would be paid, as there is a genuine benefit to the borrower. However, the borrower would only agree to pay a fee at arm’s length if there was an overall saving, and the level of the fee should reflect this.

4. No guarantee fee charged and cost of loan is less than arm’s length

Where there is a guarantee in place but no fees have been charged, the guarantee may still provide the borrower with beneficial terms, such as a reduced interest rate. The arm’s length cost of the loan will exceed the actual cost of the loan, because the guarantee reduces finance costs without itself costing anything. It might be argued that, at arm’s length, a fee would be charged for such an effective guarantee, but one cannot be imputed in the computations of the borrower, because transfer pricing legislation operates as a one way street. This scenario creates no tax advantage, so the basic transfer pricing conditions are absent. Of course if the guarantor negotiated a fee, that would be considered on its merits.

> Evaluating the arm's length value of a guarantee fee should be more than a simple mathematical comparison of actual and arm's length costs. It is worth emphasising that all relevant factors should be considered:
>
> - the obligations of the guarantor
> - its ability to fulfil them
> - an analysis of the improvement to the borrower's credit worthiness
> - consideration as to whether the guarantee brings the borrower something beyond the implicit parental or group support provided by passive association with fellow group members.
>
> It may be that the benefits provided by a guarantee, particularly informal understandings, are such that a guarantee fee would not normally be justified. Furthermore, where the guarantor is unable to honour its commitments under the guarantee because of the state of its own finances, the guarantee will in practice have no value.

25.12 Definitions

25.12.1 *Special relationship*

Section 154 TIOPA provides some definitions introduced by s.154(1)

> Subsections (3) to (7) apply for the purposes of sections 152 and 153....

Section 154(3) TIOPA provides:

> "Special relationship" means any relationship by virtue of which the participation condition is met (see section 148) in the case of the affected persons concerned.

The term "special relationship" is used in OECD Model without definition (though discussed in the commentary) but the definition here is narrower.

25.12.2 *Guarantee*

Section 154(4) TIOPA provides:

> Any reference to a guarantee includes—
>
> (a) a reference to a surety, and
>
> (b) a reference to any other relationship, arrangements, connection or understanding (whether formal or informal) such that the person making the loan to the issuing company has a reasonable expectation that in the event of a default by the issuing company the person will be paid by, or out of the assets of, one or more companies.

The International Manual has an interesting passage on implicit guarantees which is not set out here as it is not relevant to the themes of this book.

25.12.3 *Participatory relationship*

Section 154(5) TIOPA provides:

> One company ("A") has a "participatory relationship" with another ("B") if—
> (a) one of A and B is directly or indirectly participating in the management, control or capital of the other, or
> (b) the same person or persons is or are directly or indirectly participating in the management, control or capital of each of A and B.

25.12.4 *Security*

Section 154 TIOPA provides:

> (6) "Security" includes securities not creating or evidencing a charge on assets.
> (7) Any—
> (a) interest payable by a company on money advanced without the issue of a security for the advance, or
> (b) other consideration given by a company for the use of money so advanced,
> is to be treated as if payable or given in respect of a security issued for the advance by the company, and references to a security are to be read accordingly.

Subsection (6) is standard form. However subsection (7) means that all loans are "securities." It would have been clearer to use the word "loan" rather than to (mis)use the word "securities", but there it is.

25.13 Potential advantage for UK tax

Section 155 TIOPA provides:

> (1) Subsection (2) applies for the purposes of this Part.
> (2) The actual provision confers a potential advantage on a person in relation to UK taxation wherever, disregarding this Part, the effect of making or imposing the actual provision, instead of the arm's length provision, would be one or both of Effects A and B.
> (3) Effect A is that a smaller amount (which may be nil) would be taken for tax purposes to be the amount of the person's profits for any chargeable period.
> (4) Effect B is that a larger amount (or, if there would not otherwise have been losses, any amount of more than nil) would be taken for tax

> purposes to be the amount for any chargeable period of any losses of the person.

25.13.1 *Disregarded income*

Section 155(5) provides a disregard for disregarded income:

> In determining for the purposes of subsection (3) or (4) the amount that would be taken for tax purposes to be the amount of the profits or losses for a year of assessment in the case of a non-UK resident, there is to be left out of account any income of that person which is—
> (a) disregarded income within the meaning given by section 813 of ITA 2007 (limits on liability to income tax of non-UK residents), or
> (b) disregarded company income within the meaning given by section 816 of that Act.

Subsection (6) provides two more disregards:

> For the purposes of subsections (2) to (4)—
> (a) Part 7 (tax treatment of financing costs and income), and
> (b) paragraph E of the list in section 1000(1) of CTA 2010 (excessive interest etc treated as a distribution),
> are to be disregarded.

25.14 SME exemption

Section 166(1) TIOPA provides what appears to be a wide exemption, which is then restricted by significant exceptions.

> Section 147(3) and (5) do not apply in calculating for any chargeable period the profits and losses of a potentially advantaged person if that person is a small or medium-sized enterprise for that chargeable period (see section 172).

I refer to this as the "**SME exemption**".

The definition of small and medium-sized enterprises is by reference to EU law.[15] This is not discussed here.

25.15 Election into transfer pricing

I mention the first exception to the SME exemption for completeness. Section 167(1) TIOPA provides:

[15] *http://ec.europa.eu/growth/smes/business-friendly-environment/sme-definition/index_en.htm* See s.172 TIOPA.

> (1) Subsections (2) and (3) set out exceptions to section 166(1).
> (2) The first exception is if the small or medium-sized enterprise elects for section 166(1) not to apply in relation to the chargeable period. Any such election is irrevocable.

Why would one want to elect into transfer pricing?

25.16 Non-qualifying territory resident

The next exception to the SME exemption is more important. Section 167(3) TIOPA provides:

> The second exception is if—
> (a) the other affected person, or
> (b) a party to a relevant transaction,
> is, at the time when the actual provision is or was made or imposed, a resident of a non-qualifying territory (whether or not that person is also a resident of a qualifying territory).

In short, residents of non-qualifying territories do not qualify for the SME exemption.

Section 167(4) TIOPA provides some general definitions:

> For the purposes of subsection (3)—
> (a) a "party to a relevant transaction" is a person who, if the actual provision is or was imposed by means of a series of transactions, is or was a party to one or more of those transactions, and
> (b) "qualifying territory" and "non-qualifying territory" are defined in section 173.

Section 167(5) TIOPA defines "resident":

> In subsection (3) "resident", in relation to a territory—
> (a) means a person who, under the law of that territory, is liable to tax there by reason of the person's domicile, residence or place of management, but
> (b) does not include a person who is liable to tax in that territory in respect only of income from sources in that territory or capital situated there.

The drafting is based on OECD Model wording.[16]

25.17 Qualifying territory

Section 173(1) TIOPA provides:

[16] See 9.3 (Residence under art 4(1)); 9.8 (Liable to source tax only).

> In section 167(3)—
> "non-qualifying territory" means any territory which is not a qualifying territory, and
> "qualifying territory" means—
> (a) the UK, or
> (b) any territory in relation to which condition A or condition B is met.

I refer to **"qualifying territory conditions A and B"**.

A similar definition is found in s.931C CTA 2009 (exemption of distributions for CT).

25.17.1 *Condition A: Non-discrimination*

Section 173(2) TIOPA provides:

> Condition A is that—
> (a) double taxation arrangements[17] have been made in relation to the territory,
> (b) the arrangements include a non-discrimination provision, and
> (c) the territory is not designated as a non-qualifying territory for the purposes of this subsection in regulations made by the Treasury.

For the meaning of "Non-discrimination provision" see 112.8 ("Non-discrimination provision").

25.17.2 *Condition B: Designated territory*

Section 173(3) TIOPA provides:

> Condition B is that—
> (a) double taxation arrangements have been made in relation to the territory, and
> (b) the territory is designated as a qualifying territory for the purposes of this subsection in regulations made by the Treasury.

No regulations have been issued, so condition B does not apply.

[17] Section 173(6) TIOPA provides the standard definition: "In this section "double taxation arrangements" means arrangements that have effect under section 2(1) (double taxation relief by agreement with territories outside the UK)."

CHAPTER TWENTY SIX

INTEREST INCOME

26.1 Interest: Introduction
26.2 Definition of interest
26.2.1 Tax law rewrite
26.2.2 What is not interest
26.2.3 Label does not matter

Cross references

The following topics are considered elsewhere:
10.3.1 (Split year: Pt 4/5 ITTOIA Income)
15.6 (When are dividends recognised).
27.1 (Exempt interest: Introduction)
43.5.6 (Savings income rates)
43.10 (Application of savings rates)

26.1 Interest: Introduction

This chapter considers:
(1) The taxation of interest income[1]

[1] One normally refers to interest, not interest income. I use the expression to distinguish two distinct topics: (1) taxation on the receipt of interest, considered in

(2) Interest withholding tax

I go beyond the themes of this book and address the topic as a whole, but a full discussion requires a book to itself.

I do not consider:

(1) Corporation taxation of interest (loan relationships)
(2) EU interest and royalties directive,[2] which applied to interest/royalty payments between associated companies in different member states, and was repealed, in short, from 1 June 2021.[3]

For a brief history of the taxation of interest from 1799, see *re Lehman Bros*.[4]

26.2 Definition of interest

This section considers the meaning of interest in UK law. For the DTA meaning, see 26.27.5 (DTA definition of interest).

26.2.1 *Tax law rewrite*

Most of the cases cited below are pre-ITTOIA cases. The statutory wording has changed, but the old cases are still good law. A Tax Law Rewrite paper provides:

> 2. ... We do not propose to define interest. “Interest” is a concept of common and contract law and has developed its own natural meaning rather than being a concept of the Tax Acts. Decided cases have considered whether particular payments are interest and the qualities needed to make a payment interest but they have not provided a separate meaning of interest for tax purposes.
> 3. The charge to tax in [the old legislation] Schedule D Case III(a) is on “any interest of money, whether yearly or otherwise”. Case law demonstrates that the reference to “of money” is to the debt upon which the interest itself is payable. This comes back to the ordinary meaning of interest. ... We have concluded that the words “of money” add nothing to “interest” and can be dropped.
> 4. We have also decided to dispense with the words “yearly or otherwise”. These follow the historical recognition by tax legislation of

this chapter; and (2) deduction for the payment of interest, considered in the previous chapter.

[2] 2003/49/EC (3 June 2003).

[3] Section 34 FA 2021.

[4] [2016] EWHC 2492 (Ch) (appendix).

a distinction between yearly and short interest. Until the Income Tax Act 1918 there were separate charging rules for yearly interest and short interest. Although these were merged in 1918 the reference to "yearly or otherwise" was retained. The distinction between yearly and short interest is still relevant in some areas, for example the deduction of tax provisions ... but the words do not appear to add anything to the charge to tax on "any interest ..." in Schedule D Case III(a).

5. The removal of the words referred to in paragraphs 3 and 4 is a change in the statute, but not in the underlying law.[5]

26.2.2 *What is not interest*

It is helpful first to clear off the table some items which are not interest. The SAI Manual provides:

> **SAIM2040 Interest: when does interest run?** [Dec 2019]
>
> **Interest cannot be back-dated**
>
> Since interest on a loan or debt can normally only run where there is an agreement to pay interest (SAIM2030), it follows that interest cannot be back-dated.
>
> ***Example (Deborah)***
>
> D is a controlling shareholder in Deb's Fashions Ltd. When the company started in 2011, she made a loan of £10,000 to the company. There was no agreement in 2011 that the loan should pay interest. In preparing the company accounts for year ended 31 December 2015, the company's accountant advises that the company can now afford to pay interest, and accordingly it is agreed on 4 February 2016 that the loan will carry interest at 3% per annum.
>
> The agreement will have effect only from 4 February 2016. The company may make a payment to D to compensate her for the period when she received no interest on the £10,000. Such a payment is not interest, even if it is calculated on a time basis, or if it is described in the company accounts as 'interest'. The tax treatment of such a payment will depend on the exact nature of the arrangements between D and the company.
>
> **SAIM2050 Interest: voluntary payments** [Mar 2017]
>
> **Voluntary payments are not interest**
>
> Since interest can only accrue by virtue of some right, a voluntary or gratuitous payment cannot be interest, even if it is expressed as in lieu of or 'equivalent to half the interest', as in the case of *Seaham Harbour*

[5] *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/rewrite/exposure/second/p62.htm#1*

> *Company v Crook* (16 TC 333). Rowlatt J's comment that
>
> > "interest or an annual sum which is paid really benevolently each time is merely an allowance, and not taxable at all"
>
> is a reflection of that common-law principle.
>
> Truly voluntary payments are likely to be rare. For instance where compensation is paid, labels such as 'ex gratia' may only mean that the payer settled out of court, or 'without admitting liability'. Such a payment is not voluntary or gratuitous if made in consideration of the claimant giving up the right to take proceedings for the damage suffered. See SAIM2330 for more on compensation or damages generally.

See too 26.35 (Grossing-up: Not interest).

26.2.3 *Label does not matter*

The label does not matter. It rarely does. Interest may be called something else; non-interest may be (mis)described as interest. This is self-evident, but the SAI Manual provides some authorities:

> **SAIM2060 Interest: case law** [Dec 2019]
>
> **... What is interest is a question of substance**
>
> What constitutes interest is a question of legal substance, not terminology. In the *Westminster Bank* case Lord Wright said its 'essential quality…depends on substance not on the mere name'. Lord Simonds, with Lord Porter concurring, said that what needed to be considered was 'what is its intrinsic character'.
>
> That substantive test was reaffirmed in *Re Euro Hotel (Belgravia) Ltd*, in which Megarry J said
>
> > "It has, quite rightly, not been suggested that the language used by the parties to an instrument in describing payments to be made under it can bind the Inland Revenue, or affect the operation of a statute. The question must always be one of the true nature of the payment."
>
> The contract in that case was one in which it was provided that one party would 'pay to the Bank interest'. It was held that what was paid was not 'interest of money' despite the wording of the contract quoted above, because the Bank in question had not advanced money as a loan, but instead as out and out non-returnable payments for building works. The 'interest' was not 'interest of money'.

26.2.4 *What is interest*

The SAI Manual provides:

> **SAIM2030 Interest: meaning of interest** [May 2017]
>
> **The legal concept of interest**
>
> Interest is not defined in the Taxes Acts. It is a concept of common and contract law. Halsbury's Laws of England defines it as follows.
>
> > "Interest is the return or compensation for the use or retention by one person of a sum of money belonging to or owed to another..."[6]
>
> ...
>
> **SAIM2060 Interest: case law** [Dec 2019]
>
> The definition of interest has been the subject of much judicial interpretation over the years. In *Westminster Bank v Riches* (28 TC 159), Lord Wright observed
>
> > "...the essence of interest is that it is a payment which becomes due because the creditor has not had his money at the due date. It may be regarded either as representing the profit he might have made if he had had the use of the money, or, conversely the loss he suffered because he had not had that use. The general idea is that he is entitled to compensation for the deprivation."
>
> The leading case on the meaning of 'interest of money' is now *Re Euro Hotel (Belgravia)* (51 TC 293). In that case, Megarry J considered that in general the case-law showed there were two requirements which had to be satisfied for a payment to amount to interest
>
> - there must be a sum of money by reference to which the payment which is said to be interest is to be ascertained - a payment cannot be 'interest of money' unless there is the requisite 'money' for the payment to be said to be 'interest of';
> - those sums of money must be due to the person entitled to the alleged interest.
>
> He did not suggest that the two requirements are exhaustive or inescapable but that in the ordinary case they sufficed...

The Corporate Finance Manual also discusses this issue; omitting parts

[6] Author's footnote: See *Halsbury's Laws of England* Vol 49 (2021) (5th ed., 2008), para 59 (Interest in general). Halsbury's footnote at this point refers to: *Re Farm Security Act 1944* [1947] SCR 394 at 411; *Dunn Trust Ltd v Feetham* [1936] 1 KB 22; *Bennett v Ogston* 15 TC 374; *Bond v Barrow Haematite Steel Co* [1902] 1 Ch 353; *Westminster Bank v Riches* 28 TC 159; and adds: Money paid in lieu of interest is not itself interest: *Tomkins v Tomkins* (1978) Times, 24 May. See also *Director General of Fair Trading v First National Bank plc* [2001] UKHL 52, [2002] 1 AC 481, [2002] 1 All ER 97 (contractual term that, if the borrower should default on his repayments, interest would continue to be payable at the contractual rate until any judgment obtained by the bank was discharged; held not to be unfair under the Unfair Terms in Consumer Contracts Regulations 1994, SI 1994/3159 (now revoked)).

which repeat the SAI Manual, this provides:

> **CFM33030 what is interest?** [Aug 2018]
> ... The question of what constitutes interest has been the subject of much case law over the years. Perhaps the best known quotation on what interest is comes from Rowlatt J in *Bennett v Ogston* (15 TC 374). He described interest as 'payment by time for the use of money'.
> ... The concept that interest is something that accrues over time is supported by the cases of *Wigmore v Thomas Summerson* (9 TC 577) and *Willingale v International Commercial Bank* (52 TC 242). These cases indicated that true interest accrues from day to day or at periodic intervals.

26.2.5 *Sum indivisible or dissected?*

The SAI Manual provides:

> **SAIM2060: Interest: case law** [Dec 2019]
> **... 'Single indivisible sums'**
> Another important case on the nature of interest is *Chevron Petroleum (UK) v BP Petroleum Development* (57 TC 137). Payments between the companies included 'an interest factor' and were calculated in accordance with a complex formula. BP made the payments to Chevron after deducting income tax from the interest factors. The point at issue was whether the payments were true interest. [Sir Robert] Megarry's view was that the 'interest factor' was, in law, 'interest of money' and that because of the substantive nature of the test the Court would, if necessary, dissect lump-sum payments into interest of money and other sums. He said
> "If in its nature a sum is 'interest of money', I think it retains that nature even if the parties to a contract provide for it to be wrapped up with some other sum and the whole paid in the form of a single indivisible sum. The wrappings may conceal the nature of the contents but they do not alter them. Were the law otherwise, strong contractual wrappings might become remarkably popular."

In *Howard de Walden v Beck*[7] the taxpayer purchased for £250k a series of promissory notes of £3,750, payable at three-monthly intervals over 30 years (total £450k). In *Vestey v IRC*[8] the taxpayer sold shares worth £2m for £5.5m payable by 125 yearly instalments. In each case the payments

[7] 23 TC 384. On the same facts today the deeply discounted security rules would need to be considered.

[8] 40 TC 112.

were expressed to be interest free. but were dissected into interest and capital.

But in *IRC v Church Commissioners* 50 TC 516:

> [*Vestey*] represents, so far, the high water mark of dissection cases ... I would, for myself, accept this decision as correct, even though I would be unable to follow those portions of the judgment in which the learned Judge appears to favour a general rule of dissection wherever there is a deferred payment of a purchase price.

The reader may think this was a good win for the Church Commissioners and less meritorious taxpayers need to stand back from an unclear dividing line.

26.2.6 *Summary*

Pike v HMRC provides a convenient summary of the above:

> It was possible to identify certain characteristics of an amount payable by way of interest. First, it is calculated by reference to an underlying debt. Second, it is a payment made according to time, by way of compensation for the use of money. Third, the sum payable accrues from day to day or at other periodic intervals. Fourth, whilst the payment so accrues, it does not, in order for it to be interest, have to be paid at any intervals: it is possible for interest not to become payable until the principal becomes payable ... Fifth, what the payment is called is not determinative; the question must always be one as to its true nature. Sixth, the fact that an interest payment may be aggregated with a payment of a different nature does not 'denature' the interest payment.[9]

In *Pike*, the CoA regarded the issue as one of fact, concluding: "the FTT was entitled to find that it was interest and made no error of law in doing so." I would have thought the issue one of law: the facts were all recorded in the relevant loan stock document. But the fact/law distinction is fraught.

26.3 Discount

26.3.1 *Meaning of "discount"*

The SAI Manual provides:

[9] [2014] EWCA Civ 824 at [18].

> **SAIM2220 Interest: Specific Inclusions: Discounts** [Dec 2019]
> **Discounts and premiums**
> Paying interest is only one way in which a borrower may 'reward' a lender. Debt securities, such as government or corporate bonds, may be issued at a discount. For example, a 5-year bond may have a nominal value of £1,000, but be issued for £800. When the investor redeems the bond at maturity, he or she will receive £1,000 - the £200 profit, or 'original issue discount', represents the investor's reward for lending. A security that is issued at a discount may carry interest as well, or it may be interest-free (a zero coupon bond).
>
> ...
>
> But many investors will - rather than subscribing for a security and then holding it to maturity - buy and sell securities in the market. The difference between the purchase price and the face value of the security is called 'market discount'.

A Tax Law Rewrite paper explains:

> 4. In *Brown v National Provident Institution* 8 TC 57, the House of Lords held that the whole difference between
> [1] the price paid for a Treasury Bill and
> [2] the sum realised by holding the Bill until maturity, or by selling it or converting it before maturity,
> represented a profit chargeable to income tax under Schedule D Case III and that no part of that profit was an accretion of capital. However, more recent cases ... have made the position less straightforward.
> 5. It is clear that discount is different from interest, although they can be difficult to distinguish. Broadly, "the difference between the price at which the bank buys the bill [of exchange], and the bill's face value is something referred to as 'a discount'".[10] But the cases do not provide an easy definition of the term "discounts" which could be included in the rewritten legislation. Accordingly, we have not attempted to define the term and its meaning must continue to be explained by the case law.[11]

"Discounts" means profits arising from a transaction on a security bought at, or involving, a discount.

Leeds Design Innovation Centre v HMRC[12] should be mentioned for

[10] *Willingale v International Commercial Bank* 52 TC 242, at p.269.

[11] *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/rewrite/exposure/second/p62.htm#1*

[12] [2014] UKFTT 9 (TC).

completeness but perhaps the less said about it the better. The case states that the meaning of discount in a tax context is different from its commercial meaning.[13] But interest carries its normal (non-tax) meaning, and it is considered that the same should apply to "discount". The concept of discount is quite vague enough already without having to distinguish between tax and commercial meanings of the word. In discussing the meaning of discount, *Leeds Design* wrongly draws on cases such as *Pike* which have nothing to do with discounts. It is doubtful whether on the facts of the case the FTT should have concluded that the payment was interest rather than discount; though the outcome would have been the same in either case.

26.3.2 *Types of discount*

There are three categories of discount:

(1) DDS discount, ie a discount in a deeply discounted security
(2) Non-DDS discount, which may be:
 (a) income
 (b) capital

26.3.3 *DDS discount*

If applicable, the DDS code has priority.[14] Section 367(1) ITTOIA provides:

> Any income, so far as it falls within Chapter 2 (interest) and Chapter 8 (profits from deeply discounted securities), is dealt with under Chapter 8.

26.3.4 *Non-DDS discount*

Section 381(1) ITTOIA provides:

> All discounts, other than discounts in deeply discounted securities, are treated as interest for the purposes of this Act.

EN ITTOIA provides:

> **Change 83: Discounts: charge to tax as interest: clause 381**
> This change provides for discounts currently taxed under section 18(1)(b) of ICTA and Schedule D Case III (b) to be taxed as interest. Discounts have been part of the charge to tax under Schedule D Case III

[13] at [27].
[14] See 29.1 (DDS code).

> since at least 1805. Several tax cases have considered aspects of their tax treatment including the difficulties in determining the nature of a "discount" as compared with "interest". It has emerged from this case law that while the line between the terms can be difficult to identify, they are distinguishable in nature.
>
> Discounts are nevertheless taxed in much the same way as interest. ... Chapter 2 of Part 4 of this Bill [ITTOIA] includes a specific charge to tax for interest which is extended to include other types of income which are currently treated as interest.
>
> Clause 381 provides that discounts, other than those in relevant discounted securities within Schedule 13 to FA 1996 [now, deeply discounted securities], are taxed under Chapter 2 of Part 4 of this Bill as interest, so removing the necessity to distinguish between them for the purposes of the charge to income tax. It follows that the separate charge for these discounts is not rewritten in the Bill.

Section 381(1) is not well drafted. It refers to "all" discounts as that was the wording of the pre-rewrite legislation.[15] "All discounts" means discounts (ie profits from discounts) of an income nature.[16] Profits of a capital nature are not within s.381(1) and so are not subject to IT as deemed interest.

Non-DDS discounts are deemed to be interest only for the purpose of ITTOIA. They are not deemed to be interest for other purposes, so they are not subject to withholding tax (which is in ITA). In this context the discount/interest distinction continues to matter.[17]

26.4 Premium

The SAI Manual provides:

> **SAIM2220 Interest: Specific Inclusions: Discounts** [Mar 2017]
> **Discounts and premiums**
> ... A third way of rewarding an investor is by redeeming the security at a premium. The nominal value of the security is, say, £800, and any interest is calculated on a principal amount of £800, but when the security matures the investor will get back (say) £1,000.

A premium is an additional sum (above the amount borrowed) paid on repayment of the loan.

[15] Section 18 ICTA 1988.

[16] This was accepted in *Healey v HMRC* [2015] UKUT 140 (TCC) at [40].

[17] See Gabbai, "Withholding tax planning: Should it be disclosed and how might it be challenged?" [2020] BTR 335.

There are three types of premium:

(1) A premium may of an income nature. Then it is interest (even if not described as such).

(2) A premium may be of a capital nature. Then it is not interest; it may be:

   (a) A DDS premium (a premium under a deeply discounted security) or

   (b) Not a DDS premium, subject to tax under CGT rules.

A premium commonly arises where a loan is index-linked. The capital/interest-income distinction is fraught here, as so often, but this topic is not considered here, as I have considered it elsewhere.[18]

Sometimes the word premium is reserved to describe only payments within (2), of a capital nature, but I am inclined to think a payment may be correctly described as a premium even though it constitutes interest-income rather than capital. Like a discount, a premium may be of an income or a capital nature. The word itself is neutral. But context will generally show what meaning is intended. See too 33.11.2 (Lender's fee).

26.5 Deemed interest

Section 369(2) ITTOIA provides a list of cases where sums are treated as interest:

ITTOIA	**Topic**	**See para**
s.372	Building society dividends	
s.373	OEIC distributions	
s.376	Authorised unit trust distributions	
s.378A	Offshore fund distributions	68.2
s.379	Registered societies & co-operatives	26.17
s.380	Funding bonds	26.6
s.380A	FSCS payments representing interest	
s.381	Discounts	26.3

See too 26.25 (Disguised interest) and 26.26 (Loan or credit transaction).

26.6 Funding bonds

26.6.1 *Funding bonds: definition*

Section 380(3) ITTOIA/s.413(3) CTA 2009 provides a wide definition:

[18] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), App. 4 (Tax on payment of index-linked nil rate sum).

> In this section “funding bonds” includes any bonds, stocks, shares, securities or certificates of indebtedness (but does not include any instrument providing for payment in the form of goods or services or a voucher).

This is a section-wide definition but it is repeated where needed elsewhere.

26.6.2 *Issue of funding bond*

s.380 ITTOIA	**s.413 CTA 2009**
(1) This section applies to the issue of funding bonds to a creditor in respect of a liability to pay interest on a debt incurred by a government, public institution, other public authority or body corporate.	[identical]
(2) The issue is treated for income tax purposes as if it were the payment of so much of that interest as equals the market value of the bonds at their issue.	(2) The issue is treated for the purposes of the Corporation Tax Acts as if it were the payment of so much of that interest as equals the market value of the bonds at their issue.

This reverses the former rule that the issue of a funding bond would not count as a payment of interest; see 15.5.2 (Issue of bond).
For the deduction at source rules, see s.939-940A ITA 2007.
See too 92.7.10 (Borrower funds interest payment).

26.6.3 *Redemption of funding bond*

Section 414(1) CTA 2009 provides:

> The redemption of funding bonds is not treated as the payment of interest on a debt for the purposes of the Corporation Tax Acts if their issue was treated as the payment of interest on the debt under—
> (a) section 413, or
> (b) section 380 of ITTOIA 2005 (which makes provision corresponding to section 413 for income tax purposes).

Perhaps this is needed in the context of the CT loan relationship rules. There no IT equivalent, but no-one suggests that the redemption of a funding bond would be interest, if the receipt of the bond is interest.

26.7 Part payment: Interest or principal

If a debtor owes both interest and principal (capital), the question may arise as to whether a part payment of the total due is interest or principal. The question is one of general law (contract law) and not tax law, though it may arise most often in a tax context.

A solvent debtor can[19] direct that a part payment is to be treated as a payment of the interest, or a payment of the principal.[20] That is, if the debtor chooses to pay interest, the receipt is interest; if the debtor chooses to repay principal, the receipt is not interest.

Similarly, a solvent debtor who owes two debts can direct that any payment is to be treated as a payment of one debt or a payment of the other.

If the creditor is dissatisfied with that, their remedy is to sue for remaining sums due.

In the absence of a direction, the creditor may chose.

If the debtor is bankrupt, the same applies if the payment is made with the consent of the creditor and the debtor. For instance, if the creditor waives the interest, a payment of the remaining outstanding debt will be principal.

For completeness, there is a complication if:

(1) The creditor is an interest in possession trust
(2) The debtor is bankrupt, and
(3) The trustee-creditor does not expressly agree to attribute a part payment of a debt to interest or to principal.

The position[21] is governed by the rule in *Re Atkinson*.[22] The rule is summarised by Gregory Hill:

> ... the rules in *Re Atkinson* and *Re Bird* ... prescribe apportionments between trust capital and income where the realisation of a fixed interest security, such as a mortgage debt or debenture stock, produces a sum which is less than the total amount owing for principal and arrears of

[19] Unless the contract otherwise provides.

[20] *Cory Bros v Owners of the Turkish Steamship "Mecca"* [1897] AC 286; *Kriticos v HMRC* [2019] UKFTT 0677 (TC) discussed at 122.10.1 (HMRC/taxpayer relationship).

[21] Unless the trust otherwise provides.

[22] [1904] 2 Ch 16.

> interest.
> ... *Re Atkinson* applies where the deficient security was an authorised investment, [this will be usual the case] and requires the amount actually realised (A) to be divided between capital and income in the proportion which the amount due for capital (B) and that due for arrears of interest (C) bear to one another, but the income beneficiary's entitlement to the interest actually received is not in any way affected. The relevant formulae, where the investment was authorised, are thus:
> Capital = (A × B) ÷ (B + C)
> Income = (A × C) ÷ (B + C)[23]

The rule in *re Atkinson* was applied in a case where, under a scheme approved by the court, interest on debentures was cancelled and what was paid was regarded as principal (not interest) for tax purposes.[24] But that was a case where the trustees did not consent to treating the payment in that way (they had no choice in the matter as they held only a small holding of the debenture stock concerned). So the application of the rule was necessary if one was to be fair to the life tenant. But the fairness is not tax-efficient. The life tenant's receipt is not interest but it is subject to income tax under the category of "annual payment".

26.8 Interest: Charge to tax

Section 369(1) ITTOIA imposes the charge on interest:

> Income tax is charged on interest.

Section 370 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the interest arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 370(2) incorporates the remittance basis for foreign source interest.

The SAI Manual comments on deductible expenditure:

> **SAIM2440: when interest arises** [Feb 2020]
> ITTOIA05/S370 provides that tax is charged on the full amount of interest arising in the tax year. This means that a person receiving

[23] Hill, "Successive Interests and Deficient Fixed-Interest Securities" [2012] TQR *http://www.step.org/successive-interests-and-deficient-fixed-interest-securities*

[24] *Re Morris* [1960] 1 WLR 1210.

interest cannot set off any interest payable, bank charges or similar amounts against sums chargeable under ITTOIA05/S369.

A reference to the "full amount" of profits or gains, or income, does not preclude deductible expenditure, because the question is, what are the profits or gains (or what is the income).[25] But the wording here refers to the full amount of the *interest* which does seem to preclude deductions. And whatever the reason, no-one doubts that is the rule.

Section 371 incorporates the standard rule that liability rests on the person receiving/entitled to the income: see 15.2.1 (Identifying person liable)' 15.5 (When interest arises).

26.9 Interest: Location of source

I refer to the person paying interest as the "**debtor**" and the recipient as the "**creditor**".

Foreign source interest is outside the scope of withholding tax and qualifies for the remittance basis, so the question of source matters to both creditor and debtor.

For source issues generally, see 16.3 (Approach to locating source) ff.

Statute provides virtually no guidance on the location of a source of interest, so one falls back on principle and case law. There are four rival tests, or approaches, to the source of interest:

Approach	**Outline**	**Application**
Situs approach	Source is in principle[26] the situs of the debt determined by the IHT/international law situs rules (**"debt situs rules"**[27])	Accepted until 1993 but now rejected
Multifactorial approaches[28]	Source is identified by weighing up relevant factors.	Adopted by HMRC in 1993, and (in amended form) 2007; upheld in *Ardmore*

[25] See 25.11 (Sweep-up income: Computation).

[26] I say "in principle" as a situs approach allows for points of detail where the rules for the location of the source may differ from debt situs rules.

[27] For these rules see 102.1 (Concepts of situs).

[28] I use the plural as there are many ways to identify and weigh up relevant factors,

Place of credit test	Source is the place that credit was provided	International case law adopts this test but UK case law does not
OECD model test	Residence of debtor/branch	Used in DTAs

26.10 The situs approach

26.10.1 *Source in pre-ITTOIA legislation*

The situs approach is readily understandable when one recalls the terms of the legislation in force before the ITTOIA rewrite in 2005. Section 18 ICTA 1988 provided (I omit references to trade which are not relevant here):

> (1) The Schedule referred to as Schedule D is as follows:—
> "SCHEDULE D
> Tax under this Schedule shall be charged in respect of—
> (a) the annual profits or gains arising or accruing—
> (i) to any person residing in the UK from any kind of property whatever, whether situated in the UK or elsewhere, and
> (ii) [this concerns trading income] and
> (iii) to any person, whether a Commonwealth citizen or not, although not resident in the UK from any property whatever in the UK ... and
> (b) all interest of money, annuities and other annual profits or gains not charged under Schedule A, B, C or E, and not specially exempted from tax."
>
> (2) Tax under Schedule D shall be charged under the Cases set out in subsection (3) below, and subject to and in accordance with the provisions of the Tax Acts applicable to those Cases respectively.
>
> (3) The Cases are—
> [Cases I and II concern trading income]
> Case III: tax in respect of... any interest of money...[29]
> Case IV: tax in respect of income arising from securities out of the UK...;

[29] Case III was not expressed to have any territorial limitation at all! That had to be read in: interest arising from securities or possessions "outside the UK" was taxed under case IV or case V and did not fall within case III.

Case V: tax in respect of income arising from possessions out of the UK

Case VI: tax in respect of any annual profits or gains not falling under any other Case of Schedule D and not charged by virtue of Schedule A, B, C or E.

Now, the important point to take out of this jumble was that the charge on interest did not apply to a non-resident if the income arose from property in the UK; and (which comes to the same) the charge did not apply to income from securities/ possessions "out of the UK" and so taxed under case IV/V (now, relevant foreign income, but the term was not used in the pre-ITTOIA legislation).[30]

The natural reading of the phrase "in/out of the UK" was *situate* inside/ outside the UK, ie, the situs approach.

The pre-rewrite legislation did not refer to interest arising from a *source* inside/outside the UK. The word *source* was used as a paraphrase of the statutory words, but it was only a paraphrase.

26.10.2 *Consensus until 1993*

From the earliest times, up to about 1993, the situs approach was universally adopted. In argument and in the decisions, the textbooks cited were private international law textbooks on situs; and case law cited was situs case law.

The IR consultative document "Tax Treatment of Interest paid by Companies to Non-residents"[31] confirmed a situs approach to location of a source of interest was applied up to 1979:

> In the case of a simple contract debt it is settled law that the source is where the debtor is resident. Before the ending of exchange control, the Revenue was normally able to accept that interest paid abroad in a foreign currency[32] under a specialty contract (ie a contract under seal governed by foreign law) to a non-resident could have a foreign source, even though the payer was a UK resident company.

The situs approach survives in the Double Taxation Relief Manual (which

[30] For this issue, see too 33.1.1 (Current/previous charging clause); 33.19.2 (Source: Income from services).

[31] January 1983 *https://www.kessler.co.uk/tfd-archive*

[32] The currency is not relevant for situs; but it was relevant for exchange control, as a UK resident needed Bank of England consent to buy, or issue, foreign currency securities.

has not been properly updated since the publication of RI 55 in 1993):

> **DT1730. Interest** [February 2006]
> There is sometimes some difficulty in deciding whether interest is treated as having a UK source where the borrowing is made by a UK branch. ...
> The leading case on this subject is a Privy Council decision on a Hong Kong estate duty matter (*Kwok Chi Leung Karl*[33] (1988) STC 728). The Privy Council decided that where a debtor company has two places of residence where a debt may be enforced, the locality of the debt (and its source for tax purposes in the absence of statutory provision to the contrary) falls to be determined by reference to the place of residence where under the contract creating the debt the primary obligation is expressed to be performed (that is where the creditor would apply first for his money).

The 14th edition of this work gave further references, which are omitted here as the point is now of mainly historical interest.

26.10.3 *Bank of Greece*

Against that background, we can consider the *Bank of Greece* case.[34] The key facts were straightforward:

(1) A Greek bank issued bearer bonds.
(2) The bank defaulted and the guarantor[35] paid the interest.[36]

The Revenue took the situs approach: the "basic test" for the source of interest was the IHT/private international law situs test:[37]

> The basic test for determining whether the payments are income arising in the UK is to be found in *Dicey and Morris on The Conflict of Laws*, 8th ed. (1967), p.508, rule 79, on the determination of the situs of

[33] Author's footnote: *Kwok* is a situs case, see 102.14.2 ("Jurisdiction-residence").

[34] *Westminster Bank Executor and Trustee Co v National Bank of Greece* 46 TC 472.

[35] For completeness: Following an amalgamation, the payments were made by a company which succeeded to the original guarantor, and which was subject to the same obligations as the original guarantor; but that made no difference.

[36] For completeness: it was not completely clear that guarantee payments should be classified as "interest". However even if it was not interest it is sensible that location of the source of guarantee income should be determined on principles similar to those which apply to interest income, and the House of Lords proceeded on the basis that there is no difference.

[37] [1970] 1 QB 256, at p.266; the Revenue were not called on to argue the point in the House of Lords but there is no reason to think they changed their view.

> things.[38]

The Revenue argued that although the debt was originally situate in Greece, it had moved and become situate in the UK:

> Applying that rule here, the debt is enforceable only in England where it is situate and this is the place where the income arises.

The difficulty which the Revenue argument faced - if one accepts the premise of the situs approach - was that the usual test of situs is residence, and the guarantor was not UK resident! The Revenue answer was that where residence and enforceability differed, situs was in the place of enforceability, not residence:[39]

> Residence is important because in most cases it is where the debtor is resident that the debt can be enforced. But the true test is: in what country is the obligation primarily enforceable? The answer to the question: ... this was an English contract governed by English law; and under English law the Income Tax Act, 1952, requires tax to be deducted before payment. *New York Life Insurance Co. v Public Trustee*[40] shows that if the test of residence leaves one with a choice between an English and a Greek situs, the English situs must be preferred because the proper law of the contract is English. It would be patently absurd to attribute a Greek situs to the obligation when Greece is the one country where it has been abolished.[41]

The House of Lords held that the interest had a foreign source. First they summarised the facts:

> [1] I have come to the conclusion that the source of the obligation in question was situated outside the UK.
>
> [a] This obligation was undertaken by a principal debtor which was a foreign corporation.
>
> [b] That obligation was guaranteed by another foreign corporation which, as was conceded before us, had at no time any place of business within the UK.

[38] Now Dicey, Morris & Collins (16th ed., 2022), rule 136; see 102.14.7 (Place-of--enforceability: Synonym of place-of-debtor rule). The text has not materially changed.

[39] Where residence and enforceability differ, the correct view is that situs is in the place of *residence*, not enforceability; but in 1971 the point was arguable.

[40] [1924] 2 Ch 101; *New York Life Insurance* is a situs case; see 102.14 (Simple contract debt).

[41] [1970] 1 QB 256 at p.267

> [c] It was secured by lands[42] and public[43] revenues in Greece.
>
> [d] Payment by the principal debtor of principal or interest to residents outside Greece was to be made in sterling[44] and either at the offices of [UK banks in London] or (at the option of the holder) at the National Bank of Greece in Athens, Greece, by cheque on London. Whichever method of payment was selected, ... discharge of the principal debtor's obligation would have involved in the ordinary course either a remittance from Greece to the paying agents specified in the bond or, at the option of the holder, a cheque issued within Greece though drawn on London, and presumably payable there out of funds remitted by the debtors from abroad.[45]
>
> [e] ... the bond contained no provision for payment by the guarantor at any particular place or in any particular country.

This is a straightforward case of a foreign company raising funds by issuing debentures. Why was it argued the interest had a UK source?

> [2] The only circumstances relied on by the Appellants as supporting their contention that the obligation was located inside the UK were as follows.
>
> [a] Although the original guarantor had no branch in the UK, the present Appellants had acquired one on their universal succession in London.[46]
>
> [b] Moreover, it was urged that, since discharge of the obligations under the bond in Greece had been caught by the moratorium enacted by the Greek Government, it followed that the only place at which the obligation could have been discharged or enforced was in London.

[42] For completeness. The debt was originally secured on land in Greece but these properties were taken over or destroyed following the German and Italian occupation of Greece in 1941. But nothing turns on that.

[43] For completeness: The interest was payable out of income of the Bank of Greece. That is "public" revenues in a loose sense, as the National Bank of Greece was publically owned. The bonds were bank bonds and not government bonds.

[44] For completeness: in 1935 this changed so that Greek residents could only be paid in drachmas: see *National Bank of Greece v Metliss* [1958] AC 509 at p.510. But nothing turns on that.

[45] The point is that payment would in the ordinary course have ultimately derived from funds situate in Greece.

[46] That is, the guarantors who succeeded to the original guarantor acquired a branch in London on their succession to the original guarantor.

That is, circumstances had changed, and

(1) The guarantor (who originally had no branch in the UK) now had a branch in the UK.

(2) The bonds (which were originally enforceable in Greece) were now enforceable in the UK.[47]

These changes (though seemingly fundamental) did not change the location of the source of the interest:

> [3] Speaking for myself, I do not see how an obligation originally situated in Greece for the purposes of British income tax could change its location either by reason of the fact that
>
> [a] one guarantor had been substituted for another, or
>
> [b] ... the second guarantor so substituted subsequently acquired a London place of business, or
>
> [c] ... the Government of Greece had by retrospective legislation altered by moratorium and substitution of a new guarantor for the purposes of Greek law the obligations imposed upon the principal debtor and the guarantor.
>
> The Appellants acquired no obligation different from that of the original guarantors, and that was the obligation imposed on the original guarantors by the terms of the bonds.
>
> [4] In my view, the bond itself is a foreign document, and the obligations to pay principal and interest to which the bond gives rise were obligations whose source is to be found in this document.

Only one (quite narrow) proposition of law can be inferred from this. *Bank of Greece* is authority for the (sensible) proposition that the location of a source of interest is fixed and does not move with changes of circumstances.[48] I refer to that as the **"stability principle"**.

It was clear, and all sides accepted, that interest paid by the principal debtor (the Bank of Greece, which issued the bonds) had a Greek source.[49]

[47] *National Bank of Greece v Metliss* [1958] AC 509.

[48] More accurately, the case is authority for the proposition that the changes which occurred in the *Bank of Greece* case did not change the location of the source. However the changes which occurred there were so fundamental that there will be few if any cases where the location of a source of interest does move.

[49] In the CoA at p.487 "it has been common ground both in this Court and at first instance that if the payments of the coupons had been made by the principal debtors (the Mortgage Bank) they would have fallen within Case IV as being in respect of foreign securities." Likewise the case for the respondents in the House of Lords states at para 6: "It is common ground that if payment of the interest due on presentation of

The question whether the interest on the bonds originally had a UK source was not raised, not argued, and not answered. The practice at the time that interest paid by a non-resident was in principle within case IV or V was applied without need for consideration. In any event, almost[50] all the features of the debt pointed to Greece.

HMRC have argued since 1993, and the taxpayer conceded in *Ardmore* at the CoA, that paragraph [1] of the quoted passage supports a multifactorial approach: all the features listed in the paragraph were relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise. The CoA said:

> [1] [Bank of Greece] was the only binding authority on the meaning of the statutory phrase "interest arising in the" UK...
>
> [2] Lord Hailsham, with whom the other members of the House of Lords agreed, approached the matter experientially by weighing and comparing the factors, and this process has become known as the multifactorial test.[51]

Both propositions are wrong:

(1) The current statutory phrase "arising in the UK" was not in the law before 2005.

(2) *Bank of Greece* provides no support for a multifactorial approach. That is not surprising, as the House of Lords had no need to say anything about the location of the source of interest paid by the Bank of Greece. The court heard no argument about the principles of identifying the location of the source of interest. The relevant cases were not cited. In short: the passage sets out a list of *facts*, not *factors*.

The CoA misreading in *Ardmore v HMRC* is (more or less) binding, in our doctrine of precedent;[52] so the analysis above is of somewhat academic

the coupons had been made by the principal debtor, those payments would have fallen within case IV of Schedule D as being in respect of foreign securities."

[50] The following features in *Bank of Greece* did not cause the interest to have a UK source:
(1) payment made in sterling
(2) English proper law
(3) interest paid in England.
(4) The loan was "raised in London": 46 TC at p.489.

[51] [2018] EWCA Civ 1438 at [11].

[52] Strictly speaking, a statement in a judgement on a matter that was not the subject of argument is not binding authority. This is basic, but if authority is needed, see

interest. But I think it is still worth pointing out, because a diligent practitioner who actually reads *Bank of Greece* will otherwise emerge very puzzled.

26.10.4 *Hafton Properties*

Hafton Properties v McHugh[53] is another case where the location of the source of interest was straightforward until the circumstances of the debt changed:

(1) Under the original loan agreement, a US company borrowed from a US bank, the loan being secured on US property.
(2) Hafton (UK resident) acquired the property subject to the mortgage. It paid the interest due under the original loan agreement.

At the time of *Hafton Properties* (1986) the Revenue still maintained the situs approach. They argued that IHT/international law situs was the test of source:

> [The Revenue] maintained that, notwithstanding the arrangements made for the servicing of the debt, the residence of the debtor fixed the situs of the debt. See the citation from Atkin LJ's judgment in *New York Life Insurance Company v Public Trustee* [1924] 2 Ch 101 at page 119[54] in Cheshire and North, Private International Law (10th ed.) at page 537[55].

The difficulty for the Revenue was that the debtor (the US company) was not UK resident, so the interest should have been foreign source! The Revenue answer was that the US company was not the debtor:

> [The Revenue] submitted, ... there was a novation of the personal debt: so that Hafton became ... the debtor under the Note. [The Revenue] accordingly submitted that Hafton is the ultimate debtor, that Hafton is resident in the UK, and therefore that the debt is located in the UK. The situs of the debt locates, in her submission, the source of income, and therefore the source of income is a UK source.[56]

Interest under the original loan was not UK source, and the Special

Scrivens v Ethical Standards Officer [2005] All ER (D) 78 (Apr) at [52] citing long established authorities. But in practice one can expect the courts to follow *Ardmore's* lead.

[53] 59 TC 420.

[54] *New York Life Insurance* is a situs case, see 102.14 (Simple contract debt).

[55] See Cheshire and North, *Private International Law* (15th ed., 2017) p.1280.

[56] 59 TC 420 at p.426.

Commissioner held it did not acquire a UK source when the payor changed:

> In one respect the Greek Bank case is different from this one, in that in that case the debtors (both original and substituted) were at all times essentially Greek in character. Nevertheless I collect from Lord Hailsham's speech a clear disinclination to regard sources of income as being peripatetic.[57]

This correctly identifies the basis (or at least, one basis) of *Bank of Greece*: the location of a source of interest does not change. One started here with foreign source interest. The change (a change to the identity of the debtor) did not change the source.

The actual facts of *Hafton Properties* (purchase of property subject to mortgage) are unusual. A mortgage is almost always paid off at the time of purchase. A possible case is on the death of an individual in a civil law jurisdiction, where the heir becomes liable for the debts of the deceased.

A common situation is that an individual who has borrowed funds later changes his or her residence, and continues to pay interest; or the debtor dies and PRs with a different residence continue to pay the interest. The stability principle (the location of a source of interest is fixed and does not move with changes of circumstances) suggests that interest does not become UK source merely because the debtor becomes UK resident. Conversely interest does not cease to be UK source just because a debtor becomes non-resident.

Hafton is only a decision at Special Commissioner level but it neatly illustrates the stability principle, and reminds us it is soundly based on *Bank of Greece*, so the case does continue to have some relevance to the current law.

26.11 Rejection of situs approach

There were some difficulties in applying a situs approach to the source of

[57] 59 TC 420 at p.426. For completeness: The Special Commissioner added that the Revenue argument failed even if Hafton was the debtor, because the situs was still outside the UK:

> "That is fortified, of course, by the fact that the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found. The mortgage deed is, and so far as I know always has been, in the United States."

See 59 TC 420 at p.426.

interest:

(1) There were some discrepancies between a strict situs approach and HMRC practice, which perhaps mattered more after the abolition of exchange control in 1979.

(2) *Bank of Greece* was inconsistent with a strict situs approach. If the basis, or a basis, of the decision is that the source of interest does not move, there is already one inconsistency.[58]

(3) Debt situs rules did not always give a sensible answer to the location of the source of interest. That is not surprising, as the rules were not devised for that purpose, or indeed for any tax purpose.

If it is accepted that the situs approach is to be abandoned, the question arises as to what should be the new test for the source of interest.

HMRC first made the break from the situs approach in RI 58 (1993). This adopted a multifactorial approach.

If the situs approach is rejected, it followed that the old legislation (which suggests a situs test) was not appropriately worded. The Tax Law Rewrite recognised this. EN ITTOIA cited s.18(3) ICTA,[59] and explained why they replaced the expression securities/possessions "out of the UK" with the expression "*source* outside the UK":

> 3079. Section 18(1) and (3) of ICTA require that, for an amount to fall within the charge under[cases IV and V] as opposed to another charging provision, it has to be (a) income, (b) which arises from, (c) securities or possessions, (d) out of the UK ....
> 3080. Case law establishes that "securities" are a sub-set of "possessions". The definition of "relevant foreign income"[60] does not maintain any distinction between income which, in the source legislation, is within Schedule D Case IV and income which is within Schedule D Case V.
> 3081. The definition [in the rewrite legislation, ITTOIA] uses "source" rather than "possessions" (the expression in Schedule D Case V). "Possessions", in the context of Schedule D Cases IV and V, appeared

[58] The security in that case was a bearer security, and under the situs test should have been regarded as situate wherever the document was held. It would obviously be impractical to apply that rule for the source of interest, though I do find it puzzling that the case makes no mention of this difficulty.

[59] See 26.10.2 (Consensus until 1993).

[60] The EN is considering the definition of relevant income in s.830 ITTOIA, but the comments on source apply to the source of interest generally.

> in the first income tax Act of 1799 when the word carried associations with, in particular, colonial property that it no longer has. The definition employs the more widely used term "source".
>
> 3082. The meaning of "possessions" [out of the UK] in Schedule D Case V has been interpreted by case law. It covers any and every source of income arising outside the UK. Income charged to tax under Schedule D Cases IV and V by virtue only of section 18(3) of ICTA (that is, excluding amounts treated as income by another provision in the source legislation and charged under Schedule D Case IV or V) has an identifiable source.
>
> 3083. In *Colquhoun v Brooks* (1889), 2 TC 490 HL (where the subject was how to tax a partner's share of a foreign trade), Lord Macnaghten dealt with the meaning of "possessions" in terms of a source of income (page 508):
>
>> ...The word "possessions" is not a technical word. It seems to me that it is the widest and most comprehensive word that could be used. Why, for instance, should not possessions in Ireland mean everything, every source of income that the person chargeable has in Ireland, whatever it may be? Why should not "profits from possessions out of Great Britain," which is to be found in [Income Tax Act 1842] Schedule G., No. XI., ... mean profits from every source of income abroad? I use the expression "source of income" because it is as a source of income that the Act contemplates and deals with property and everything else that a person chargeable under the Act may have, and the [Income Tax Act 1842] itself, in section 52, uses the expressions "sources chargeable under [this] Act" and "all the sources contained in the said several schedules" as describing everything in respect of which the tax is imposed.

The current wording, referring to interest arising in the UK, removes the inference of the former wording, that a situs approach should be the test for the source of interest. But it sheds no light on what the test for source actually is or ought to be.

26.12 Modern case law

26.12.1 *Multifactorial test established*

The issue finally reached the CoA in *Ardmore Construction v HMRC*.[61] As noted, the CoA adopted a multifactorial test, and even though it was wrong

[61] EWCA Civ 1438

to cite *Bank of Greece* as support,[62] this approach is now established.[63]

26.12.2 *What multifactorial test?*

The question then is: What are the relevant factors, and how does one weigh them up? The court's comments are discouraging:

> ... the correct approach is not merely multifactorial but also acutely fact-sensitive. The court or tribunal must examine all the available facts both singly and cumulatively.

That does not take us very far.

26.12.3 *Fact or law?*

The CoA in *Ardmore* cite the familiar dictum:

> The Legislature in using the word "source" meant, not a legal concept, but something which a practical man would regard as a real source of income. Legal concepts must, of course, enter into the question when we have to consider to whom a given source belongs. But the ascertainment of the actual source of a given income is a practical, hard matter of fact.[64]

The statement that the issue is one of fact is code for saying that (1) the matter is not, or not easily, appealable, and (2) no further attempt is to be made to clarify what the test actually is.[65]

[62] See 26.10.3 (*Bank of Greece*).

[63] Pre-*Ardmore* decisions at tribunal level are now inconsequential and not considered here.

[64] *Nathan v FCT* [1918] HCA 45; [1918] 25 CLR 183 at p.189-190 cited for instance in *Rhodesia Metals v CT* [1940] AC 774 at p.789. The adjectives "practical, hard" are meaningless. The point is made discreetly by Lockhart J at first instance in *CT v Spotless Services* ("... a little opaque..."). For criticism of the "practical man" test see Stack et al, "Commissioner for Inland Revenue v Lever Brothers and Unilever Ltd: A practical problem of source" ("a practical man would say the obvious thing to do was to ask a lawyer... not so much a test as an attitude of mind in which the Court should approach the task of judgment"). *https://www.researchgate.net/publication/331046971_Commissioner_for_Inland_Revenue_v_Lever_Brothers_and_Unilever_Ltd_A_practical_problem_of_source*

[65] See *Tariff Reinsurances v Comr of Taxes* (1938) 59 CLR 194 at p.208: "We are frequently told... that such a question is "a hard, practical matter of fact". This means, I suppose, that every case must be decided on its own circumstances, and that screens, pretexts, devices and other unrealities, however fair may be the legal appearance which on first sight they bear, are not to stand in the way of the court charged with the duty of deciding these questions. But it does not mean that the question is one for a jury or that it is one for economists set free to disregard every legal relation and

In *Ardmore Construction v HMRC* at the Upper Tribunal:

> 62. The jurisdiction of this Tribunal is limited to points of law arising out of a decision...
> 65. The question for us is whether we find any error in the approach of the FTT in *Perrin*. We can identify no material error. [UT reviewed the facts and concluded:] In summary, therefore, the FTT was, in our view, fully entitled on the evidence to find that the substantive source in Mr Perrin's case was in the UK.

CA agree but express themselves more strongly:

> The evaluative nature of the exercise of applying the source principle means also that the appellate tribunal should be slow to interfere, especially as in this case the Tribunals[66] are specialist tribunals. Consequently, in my judgment, Ardmore has to satisfy this Court that the Tribunals were wrong in the sense that they left a material factor out of account or took a matter into account that should have been left out, or misdirected themselves in law or fact or reached a perverse conclusion.[67]

The CoA judgment gives very little indication of how to approach the test. The judgement extensively sets out arguments of HMRC and taxpayer, but without expressing much if any view itself, so that takes us no further. The CoA just makes a few brief comments on specific factors, discussed below, and concludes:

> I see no basis, therefore, for holding that the Tribunals left out of account any material factor or took any immaterial factor into account.

In the circumstances the decision of the Upper Tribunal in *Ardmore* remains the best guidance currently available.

26.13 Relevant factors

There are many possible connecting factors. It is not possible to compile a full list but the main factors are as follows:
(1) The debtor:

penetrate into the recesses of the causation of financial results, nor does it mean that the court is to treat contracts, agreements and other acts, matters and things existing in the law as having no significance."

[66] Footnote added: The reference to "the Tribunals" skates over important issues of the roles and relationship of the first-tier and Upper Tribunals, but it was not necessary or appropriate for the CoA to address that.

[67] at [40].

   (a) residence of debtor
   (b) place where debtor carries on business[68]

(2) The interest:
   (a) place of fund used to pay interest (looking before payment)
   (b) place where interest is received (looking after payment)

(3) The money borrowed or credit provided:
   (a) Place of money used to make loan (looking before payment)
   (b) Place where money is received (looking after payment)
   (c) Place where money is used by debtor (eg if used to purchase UK/non-UK asset or in UK/non-UK business)
   (d) The place where credit is provided

(4) The contract under which interest is paid:
   (a) proper law
   (b) place where contract would be enforced
   (c) place where contract is made

(5) The debt, regarded as an asset: situs under IHT/international law principles (eg location of deed if debt is a specialty)

(6) The security for debt (if any): situs under international law principles

(7) The guarantor (if any): residence of guarantor

(8) The creditor:
   (a) residence of creditor
   (b) place where creditor carries on business

(9) In the case of registered securities, the place of the register

In *Ardmore* the UT described some factors as irrelevant. The CoA thought there was no such thing as an irrelevant factor,[69] but it hardly matters, as there is no effective difference between an irrelevant factor and one of very little weight. Perhaps one should say "generally irrelevant" rather than "irrelevant".

26.13.1 *What is the source?*

One problem in deciding which factors to apply is the difficulty or ambiguity in identifying what actually is the "source" of interest. One might say that the source is:

[68] Place of incorporation is another conceivable connecting factor but no-one has ever suggested it should be relevant.

[69] At [41]: "HMRC urged on us that some factors were "irrelevant" whereas on a multifactorial test a factor is still relevant even if it carries little weight."
But it turns on what one means by "factor".

(1) The debtor who pays the interest
(2) The funds used to pay the interest
(3) The money borrowed or credit provided
(4) The contract
(5) The debt (regarded as an asset)

If one identifies the source as any one of these, then identifying the location of the source may become easier: but of course all of them are intimately connected to the existence of the interest.

In *Ardmore v HMRC*:

> 43. ... in normal cases of a simple loan, the debt which will be the source of the interest, and not any underlying activity of the creditor. That may not hold good in particular circumstances, for example
> [1] where a debt arises in the course of a trade, where the trade might be regarded as the source,
> [2] or in special circumstances, such as those which arose on the *Lever Bros* case,[70]
> but where the case is one of a simple loan, the asset of the creditor, on which the interest arises, is the debt, and it is that debt which will be the source.

26.13.2 *Some principles*

Principle cannot identify the "right" connecting factor(s) but it can identify some approaches to the issue as unsatisfactory, at least in some cases.

The location needs to be known by the debtor (who may have to deduct withholding tax) and creditor (who may be taxable). This suggests no weight should be given to factors not likely to be known by both parties.

Factors which the parties can manipulate without commercial cost or inconvenience are not suitable (at least from HMRC's viewpoint, and the courts will sympathise).

Many of the connecting factors may change, and it is possible that the source of interest can change its location. However, it would not be

[70] *IRC v Lever Bros* [1946] AD 441; 14 SATC 1
https://www.kessler.co.uk/wp-content/uploads/2014/07/1202_001.pdf
But *Ardmore* rejected the source test proposed in *Lever* (where credit was provided). See Stack et al, "Commissioner for Inland Revenue v Lever Brothers and Unilever Ltd: A practical problem of source"
https://www.researchgate.net/publication/331046971_Commissioner_for_Inland_Revenue_v_Lever_Brothers_and_Unilever_Ltd_A_practical_problem_of_source

convenient for location of a source to change very often. There are two ways to deal with this:

(1) to place little or no weight on features which may easily change; or

(2) to look at the situation at the time the debt arises, and to ignore later changes.

The two solutions are not incompatible.

Debts are frequently assigned, and it is suggested that:

(1) assignment should not alter the location of the source; and

(2) facts not likely to be known by an assignee should not affect the location.

26.13.3 *Debtor residence/place of business*

Residence of the debtor, whatever the test of residence, is in principle a satisfactory connecting factor.

In *Ardmore Construction v HMRC* at the Upper Tribunal:

> 49. That the residence of the debtor is a material factor is clear from the Greek Bank case. There is, however, a question as to the weight which should be placed on that factor...
> 52... the residence of the debtor is a factor regardless of whether that place of residence is the jurisdiction in which the parties may bring proceedings [because of an exclusive jurisdiction clause].
> 53. Residence is, on the other hand, only one factor, and it cannot be elevated into the most important factor, whether alone or when combined with the question of the location of the debtor's assets. ... The question is simply a multifactorial one, having regard to all the circumstances and all the relevant factors.[71]

In the case of a dual resident debtor, or joint debtors resident in different places, this test would not work, but other factors such as the place of business connected with the loan would fill the gap.[72]

A difficulty arises if debtors change their residence, which if not common is by no means impossible. This was pointed out in *Philips*.[73] The stability

[71] [2015] UKUT 633 (TCC).

[72] Contrast the situs rules: 94.12.2 (Dual resident debtor); 94.12.4 (Joint debtors).

[73] *IRC v Philips' Gloeilampenfabrieken* [1955] NZLR at p.898: "In my opinion, the fallacy in the able argument presented by [counsel for the Revenue] was exposed when he felt obliged to submit (as indeed he was if he was to be consistent) that if a New Zealand citizen, while in London, found himself in financial difficulties and had to obtain from a London money-lender a loan, which he was able to repay over a

principle would suggests one should ignore subsequent changes of residence.

26.13.4 *The interest*

The next two possible connecting factors are:
(a) place of fund used to pay interest (looking before payment)
(b) place where interest is received (looking after payment)

These could be useful connecting factors if they were stable, but they can and often will change from year to year. This difficulty is noted in *IRC v Philips*' *Gloeilampenfabrieken*:

> It is not sufficient to ascertain the fund out of which the income was in fact paid, which is no more than the reservoir from which it was drawn. It is not whence it was paid, but why it was paid, that is the determining factor. The emphasis is not upon the receipt, but upon the derivation of the income. Consequently, it does not constitute the source within the meaning of the section that the money [used to pay the interest] was drawn from or provided by the trading profits in New Zealand. The New Zealand company [the debtor] was free to obtain the funds with which to perform its obligation anywhere it chose, from deposits in England, if it had any, or from borrowing in England, or from the profits of its trading in New Zealand. That was a domestic matter. The money could "come from" any of these "sources", but none of them would be the source from which the [creditor] derived what it received as income.[74]

In other words, one should not equate the location of the source of the interest with the situs of the *resources* that the debtor uses to pay the interest.

But in *Ardmore v HMRC* the CoA considered this was important:

> The funds paid over as interest derived from funds generated in the UK... The importance of [proper law and jurisdiction] clauses is also undermined by the fact that the enforcement of any judgment following default on assets of Ardmore would be in the UK (and it is not necessary to go further than to note that all the available assets to meet the liabilities to the lender were in the UK).[75]

period of years only after he had returned to his own country, the London money-lender could be assessed with [New Zealand] income tax ..."

[74] See 26.13.7 (Situs of debt).

[75] EWCA Civ 1438 at [42].

Likewise the UT in *Ardmore* identify "the ultimate, or substantive, source of discharge of the debtor's obligation" as a relevant factor for "normal cases of a simple loan".

On the other hand the UT in *Ardmore* identify as irrelevant "the place of payment of the interest".

26.13.5 *Money borrowed/credit provided*

The next possible set of connecting factors are:

(a) Place of money used to make loan (looking before payment)
(b) Place where money is received (looking after payment)
(c) Place where money is used by debtor
(d) In cases where money is not lent, where credit is provided

These seem sensible connecting factors.

It may be objected that place of receipt allows tax planning where money is lent in one jurisdiction and then immediately transferred to another. But the courts could look through transient arrangements of that kind to identify the place where the money is substantially received.

However the UT in *Ardmore* identify as irrelevant "the place where credit was advanced".

26.13.6 *Loan contract*

The next possible set of connecting factors are:

(a) proper law
(b) place a contractual jurisdiction clause requires the contract to be enforced
(c) place where contract is made

These are less suitable connecting factors as they are within the control of the parties.[76] Also the Courts would not want to discourage use of UK proper law and courts, by risking imposing a tax charge on interest.

In *Ardmore* the CoA agreed:

> There was no default and the Gibraltarian exclusive jurisdiction and governing law clauses would only matter if there was default.

[76] Place of enforceability may also be unsuitable as a contract may be enforceable in more than one place, or the place of enforceability may be unclear.
The place the contract is made is also unsuitable because the place the contract is made is sometimes difficult to identify; see 21.20 (Where is contract made).

26.13.7 *Situs of debt*

The situs of a debt under IHT/international law rules is (1) the location of the document if a specialty,[77] or a bearer security or negotiable instrument,[78] or (2) for a simple debt, the residence of the debtor.

The location of a document is obviously an unsuitable connecting factor. The debtor will not have possession of the deed and may not know its location. The location is easily changeable, and the rule would allow easy tax planning.

It is not illogical or inconsistent to say that the situs of a debt for IHT/international law purposes is in one country, but the location of the source of interest on that debt for income tax purposes is in another. This is the case for shares: the source of dividends is the place where the company is resident, but the situs of shares is the place where the shares are registered. One might simply say that the location of a source of income and the situs of assets are distinct concepts governed by distinct rules. Alternatively, and more subtly, one might say that the source of interest (for IT purposes) is not the debt but the transaction which gives rise to the debt (which may be located in a different place from the location of the debt).[79] Either way, the IHT/international law situs rule is not the test of source.

In *Ardmore Construction v HMRC* the UT said:

> 46. In addition, it was accepted before us, and we consider rightly, that the legal situs of the debt is not a relevant factor for income tax purposes. Thus, the fact that the situs of a simple debt is where the debtor resides is not a factor independent of the residence of the debtor itself...
> 47. It would follow from this that the situs of a specialty debt would likewise also be of no relevance. The distinction between the situs of a simple debt and that of a specialty debt was one of the principal reasons why the New Zealand courts in *Philips* rejected the proposition that source should be determined according to situs.[80] Although situs is

[77] See 102.15 (Specialty obligation).

[78] See 102.9 (Bearer documents and negotiable instruments).

[79] *Philips* takes this approach.

[80] "If the location of the debt were to be selected as the test, the source would be located differently according as whether the contract was a simple contract or a specialty; and, in the latter case, its location would arbitrarily change with the actual situation of the deed itself. Such a test would, indeed, be far from the practical commonsense test prescribed by the authorities; and I cannot think it proper to apply it here if some

> relevant in connection with certain taxes... it is not appropriate for source for income tax purposes to depend on whether the debt instrument is a simple contract or by deed.

CA accepted this view (though the less one says about the reasoning the better):

> The parties are agreed that the situs of the debt (that is, the place where a debt is located) for the purpose of the conflict of law rules is of little or no weight as the rules as to situs are legal rules only.[81]

26.13.8 *Situs of security for debt*

A rule that source of interest on a secured debt depends on the location of the property on which the debt is secured is not sensible because in normal circumstances the security will not be called upon. It would often not be appropriate:[82]

(1) The rule does not work if a large debt is secured on an asset of a small value. Would one say that a £100 million debt is situate in Jersey if it is secured on property there worth £100,000? Also, one cannot have a rule where the location of interest depends on the relative value of the debt or the security, which may fluctuate from time to time (though that might be resolved by looking only at the position at the time the debt arises.)
(2) If land determines the location of interest from of a debt secured on land, then a debt charged on (say) shares should be situate where the shares are situate.
(3) A debt may be charged on property in two different countries.
(4) This rule would sometimes allow scope for tax planning.

But the UT in *Ardmore* disagree and identify the residence of the original guarantor as a relevant factor for "normal cases of a simple loan" the location of the security originally provided.[83]

other is available." *IRC v Philips' Gloeilampenfabrieken* 10 ATD 435 [1955] NZLR 868 *https://www.kessler.co.uk/wp-content/uploads/2012/04/CIRvPhilips.pdf*
I discuss *Philips* in detail in the 14th edition of this work para 18.9.1 (*IRC v Philips*). The High Court of Australia rejected the situs approach for similar reasons in *Studebaker Corporation of Australasia v CT*.

[81] at [16].

[82] Similar issues arise for IHT situs of secured debts: see 102.19 (Debt secured on land).

[83] The view that even a former security is a relevant factor is consistent with the stability principle (that the location of a source of interest is fixed and does not move with

26.13.9 *Residence of guarantor*

No weight should be given to the residence of a guarantor, since in the normal course of events a guarantor would not be called on to make any payment. Even if it a guarantee is called on, it does not alter the source of the interest. But the UT in *Ardmore* disagree and identify the residence of the original guarantor as a relevant factor for "normal cases of a simple loan" .

26.13.10 *Residence of creditor*

No weight should be given to the residence of the creditor, since one is looking for the source and not the destination of the interest; also this may change easily as debts are usually assignable and frequently assigned.[84] In *Ardmore v HMRC* CoA agree:

> In this case, however, the conclusion of the Upper Tribunal that the residence of the creditor should carry little weight cannot be criticised. The immediate search is for the source of the interest rather than a search indirectly for the source of the loan.[85]

Likewise the UT in *Ardmore* identify as irrelevant "the residence of the creditor or the place of activity of the creditor".

26.13.11 *Branch/agency/PE*

It seems that a branch is regarded as a separate person. The SAI Manual provides:

> **SAIM9095. Yearly[86] interest: UK source: companies** [Mar 2017]
> *Interest paid by companies*
> In deciding whether or not interest has a UK source, in addition to the factors described in SAIM9090, there are other matters to be taken into account for companies.

changes of circumstances).

[84] A further objection to this factor might be that a single debt may be owed to joint creditors resident in different places, Interest on that debt cannot have two different sources. But that would not preclude any regard to the residence of the creditor where there is only one creditor.

[85] STC 1487 at[42].

[86] Author's footnote: Although the Manual heading refers to yearly interest, the same rules should apply to short interest.

> **Companies and branches**
> Where the debtor is a company it may of course have more than one residence – for example it may be registered in a US state but managed and controlled from the UK.[87] Jurisdiction in relation to a corporation will in general depend on where the corporation does business (except where the EU Regulation or the 1968 Convention apply – see SAIM9090). So for these purposes it will be resident where it carries on business. If a debtor company has a number of places of residence/business then to decide the location of the debt you have to look at the terms of the loan agreement. The loan agreement should say where the interest and loan are payable, which (if the company is also resident in that place) will determine whether or not the interest has a UK source.
> When it comes to considering loans made to a branch of a UK company the source of the interest is overseas if all the following factors apply:
> [1] an overseas branch of a UK resident company has entered into a loan agreement overseas;
> [2] the loan is for the business of the overseas branch;
> [3] the overseas branch pays the interest from its income;
> [4] the loan agreement obligations are enforceable in the jurisdiction in which the branch is situated.

The paragraph does indicate a "safe haven" situation where one may be confident that the interest paid by a person who is UK tax-resident does not have a UK source, at least so far as one can rely on HMRC manuals and practice.

The SAI Manual continues:

> Conversely, where a branch of a non-UK resident company enters into a loan agreement in the UK for the business of its UK branch and the UK branch pays the interest then the interest is regarded as having a UK source.

26.13.12 *Changes in international law*

The background law (that is, private international law) has changed since the date of the situs cases which underlie the HMRC view of the meaning of jurisdiction-residence which is a factor in determining the source of interest. For instance, *New York Life Insurance* was decided in 1924. Jurisdiction is now largely governed by international conventions, under which it is only approximately correct to say that residence of the debtor

[87] The example given is using "Residence" in the sense of jurisdiction-residence.

is the test of jurisdiction, (though in most cases the end result will be the same). In short, it is not the case that the residence or place of business of the debtor is the place the debt will be enforced.[88] So if jurisdiction-residence is the test, or at least a relevant factor in the test, there is a choice. Does interest arise:

(1) in the place where the debtor has jurisdiction-residence; or
(2) in the place where the debt is actually enforceable.

The author of the SAI is aware of the question, but does not give the answer:

> **SAIM9090. Yearly interest: UK source: The general rule** [Dec 2019]
> *Duty to deduct tax from interest with a UK source*
> **EU rules**
> If the debtor is resident within the EU, the Council Regulation (EC) 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial matters, ["Brussels I Regulation"] and the 1968 'Brussels Convention',[89] may have an impact on the general rule described above.

There are different rules for individuals, corporations, and trusts.

> The usual rule is that where an individual is domiciled in a contracting state, then they should be sued in the courts of that state (Article 2 of the Regulation/Convention).[90] Domicile is defined according to the rules of that contracting state but for these purposes only, it is, in the UK, linked to the individual's residence. Under these rules an individual is domiciled in England for example if he is resident there and the nature and circumstances of his residence indicate that he has a substantial connection with England.[91] So an individual resident in England would

[88] See 102.14 (Simple contract debt). In *Bank of Greece* the debt was enforceable in the UK but the interest was not UK source.

[89] Author's footnote: Brussels I Regulation applies in EU Member States. It supersedes the 1968 Brussels Convention except for some territories which fall within the scope of the Convention and which are excluded from the Regulation pursuant to Article 349 TFEU.

[90] Author's footnote: Article 2 Brussels I Regulation provides: "Subject to this Regulation, persons domiciled in a Member State shall, whatever their nationality, be sued in the courts of that Member State."

[91] Author's footnote: Article 59 Brussels I Regulation provides:
"1. In order to determine whether a party is domiciled in the Member State whose courts are seised of a matter, the court shall apply its internal law.
2. If a party is not domiciled in the Member State whose courts are seised of the

> in general terms only be sued in the courts in that country. However this is a complex area and there are exceptions. For example it may be argued that:
>
> [1] the case does not fall within the Regulation;
> [2] another convention or international agreement gives jurisdiction to another state's courts
> [3] proceedings have already begun in another state's courts; or
> [4] it has been agreed under Article 22 of the Brussels Convention[92] that the courts of a particular state have exclusive jurisdiction.

Point [4] is common, as the parties may agree any jurisdiction which suits them. What happens then? The Manual does not say:

> In any case in which it is argued that a UK resident debtor can be sued in a Member State in precedence to the UK courts please refer the case to BAI (Financial Products Team).

The SAI Manual then turns to consider the impact of modern private international law on companies:

> **SAIM9095. Yearly interest: UK source: Companies** [Mar 2017]
> *Interest paid by companies*
> **Companies within the EU**
> Under both the EU Regulation and 1968 Convention, domicile is the main ground of jurisdiction and will, at first sight, determine the rules for the recoverability of debts. EU regulation 44/2001 provides for a definition of domicile for corporations so that the company is domiciled where it has its statutory seat (in the UK its registered office), central administration or its principal place of business.[93] However it is

matter, then, in order to determine whether the party is domiciled in another Member State, the court shall apply the law of that Member State."

In England, s.41(3) CJJA 1982 provides:

"... an individual is domiciled in a particular part of the UK if and only if—
(a) he is resident in that part; and
(b) the nature and circumstances of his residence indicate that he has a substantial connection with that part."

[92] Author's footnote: I think the reference should be Article 23 Brussels I Regulation, which provides:

"1. If the parties, one or more of whom is domiciled in a Member State, have agreed that a court or the courts of a Member State are to have jurisdiction to settle any disputes which have arisen or which may arise in connection with a particular legal relationship, that court or those courts shall have jurisdiction..."

[93] Author's footnote: Article 60 Brussels I Regulation provides:

"1. For the purposes of this Regulation, a company or other legal person or

> important to note that a corporation is not domiciled in a country for these purposes merely because it does business there.

The Manual does express a view on the location of a source in a case where the debtor is jurisdiction-resident in one place but domiciled (in the sense of the Regulation) in another:

> If an EU based company carries on business in a country in which it is not domiciled you have to consider the terms of the loan agreement to determine the situation of the debt. For example, if a company which has its principal place of business in the UK also carries on business in another Member state, where the interest and loan are payable in that other Member state and that member state's courts have jurisdiction then the interest will be non-UK source.
> For branches of EU companies the position is as described above for branches generally.[94]

Thus in the Manual's view, the place of jurisdiction-residence has priority.

In the 14th edition of this work, I said: "it is suggested that the better approach is to pay no regard to modern conflicts law in determining the source of interest, even if the place where the debt is enforceable is not the place where the debtor resides." CoA agree: see above.

26.13.13 *Interest after debtor death*

I refer only for completeness to *IRC v Viscount Broome's Executors*. This was another case where the circumstances of the loan had changed:

association of natural or legal persons is domiciled at the place where it has its:
(a) statutory seat, or
(b) central administration, or
(c) principal place of business.
2. For the purposes of the UK and Ireland 'statutory seat' means the registered office or, where there is no such office anywhere, the place of incorporation or, where there is no such place anywhere, the place under the law of which the formation took place."

Thus Brussels I Regulation provides *three* places where a company is domiciled and may be sued. There is no single place where the debt can be enforced which would serve as a test for the location of a source.

[94] Author's footnote: Article 5(5) Brussels I Regulation provides:
"A person domiciled in a Member State may, in another Member State, be sued:
... 5. as regards a dispute arising out of the operations of a branch, agency or other establishment, in the courts for the place in which the branch, agency or other establishment is situated;"

(1) The original debtor was primarily[95] resident in Kenya.
(2) The original debtor died. His executors were UK resident.
(3) The loan was enforceable in Kenya. The UK executors who became liable for the debt paid the interest in the UK out of funds in the UK.

Both sides agreed, and the judge accepted, that the situs approach was the test of source:

> There was really very little dispute between [counsel for the Revenue] and [counsel for the taxpayer] as to the law (particularly perhaps as to the Income Tax law) which is applicable. There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... This also seems to me to be clear, and it is elaborately explained in the case of the *English, Scottish and Australian Bank, Limited v IRC,*[96] this, I say, was not questioned, that the locality of a simple contract debt is the place where the debtor is to be found.[97]

The dispute concerned where the situs actually was. Since the executors were resident in the UK, one would expect that the situs of the debt would also be in the UK. The taxpayer's argument to the contrary was curtly dismissed:

> I think the executors were resident in this country. Mr. Latter [counsel for the taxpayer] contended that it was not the question of the executors; it was a question of the executorship. I hardly ever fail to understand Mr. Latter, but I am not perfectly certain that I did exactly understand what he meant by the residence of the executorship.[98]

[95] Also UK resident, but that does not matter.

[96] *English, Scottish and Australian Bank* is a situs case, see 102.14 (Simple contract debt).

[97] 19 TC 667 at p.678.

[98] at p.679.
For completeness: The judge added (at p.680):
"There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... I think it was payment out of a source here. The first two payments are perhaps a little more clear, because there the payment was actually made to [the creditor] personally in this country. He happened to be here; he was resident abroad, but he happened to be here, and he was actually paid by the executors in London; and equally [the other payments] were made in London, were sent to a bank in London, and were remitted by the bank in London to Kenya to be paid there. In these circumstances I am of opinion that this was a payment made by persons resident in London out of sources in London."
This passage adopts uncritically the view that the funds used to pay interest constitute

More analytically, an executorship is not a person and does not have a residence. Only executors do.

Broome has no relevance to the current law because it is inconsistent with the subsequent cases of *Bank of Greece* and of course *Ardmore*.

Accepting (as the judge did) that interest on the original debt was not UK source, it should not have changed following the death of the debtor, as interest sources are not peripatetic.

26.13.14 *HMRC view*

As noted, HMRC first adopted a multifactorial approach in RI 58 (1993). HMRC did not announce a change of view, but from 2008 the SAI Manual adopts a revised version of the multifactorial test, and RI 58 is described as "superseded by SAIM 9090 onwards".[99] I take that to be notice that HMRC have withdrawn from it.[100] This version of the multifactorial approach expanded the list of relevant factors from four to eight, and gave an inkling of priority:

SAIM9090	**Comment**
9090. Yearly interest: UK source: The general rule [Dec 2019] ... Whether or not interest has a UK source depends on all the facts and on exactly how the transactions are carried out. HMRC consider the most important factor[s]* in deciding whether or not interest has a UK source to be [1] the residence of the debtor and	SAIM refers to *yearly* interest, but the same rules should apply to short interest.

the source of interest. In the 4th edition of this work, I said: "It is suggested that no guidance should be taken from *Broome* on this point." This view is now supported by *Ardmore.*

[99] See the HMRC online version of Tax Bulletin 9 *webarchive.nationalarchives.gov.uk/20101006151632/http:/www.hmrc.gov.uk/bulletins/tb9.htm* also recorded in Tolley's Yellow Tax Handbook.

[100] INT Manual still supports RI 58:
INTM342030 UK source [May 2019]
The onus is on the payer to decide whether tax is properly to be deducted having regard to settled case law principles [!] and all the facts surrounding the loan. In particular, the payer should refer to the approach and criteria endorsed by the House of Lords in the *National Bank of Greece* case (46 TC 472). HMRC's position in that case is outlined in Tax Bulletin 9 of November 1993 [RI 58].
Presumably this has not been properly updated since 2008.

[2] the location of his/her assets.
Other factors to take into account are

[3] the place of performance of the contract and

[4] the method of payment;

[5] the competent jurisdiction for legal action and

[6] the proper law of contract;

[7] the residence of the guarantor and

[8] the location of the security for the debt

HMRC consider the residence of the debtor to be most important because this, along with the location of the debtor's assets,[101] will influence where the creditor will sue for payment of the interest and repayment of the loan.

* SAIM refers to factor (in the singular) but then refers to 2 distinct factors.

The SAI Manual then defines "residence":

> 'Residence' in these circumstances is not the same as tax residence. Residence of the debtor is residence for the purposes of jurisdiction.

I refer to the concept as "**jurisdiction-residence**" to distinguish it from tax-residence. It seems surprising to use the term residence in a non-tax sense but this arises for historical reasons: the concept comes from common law/IHT debt situs rules[102] which in the past governed the rules for the source of interest.[103]

What is the test of jurisdiction-residence? In the case of an individual it is the same as tax-residence (or as near as makes no difference); but in the case of a company, it is place of business, which may be different from tax-residence.

[101] The location of the debtor's assets will not influence the place where the creditor sues for payment, as to which there may be no choice; but it may influence the place of enforcement. The location of assets which are security for the debt would have an influence on where the creditor seeks recovery of payment of the interest, but that is mentioned separately at [8].

[102] See 102.14.2 ("Jurisdiction-residence").

[103] See 26.10.2 (Consensus until 1993).

26.14 Weighing up factors

In *Ardmore Construction v. HMRC*:

> 60. The FTT took the view that the following factors were relevant:
>
> "(1) The proper law of the agreement. This was that of the Isle of Man. This factor however I judge to be of very little weight.
>
> (2) The place in which payment was actually made, namely, for the two payments at issue, the Isle of Man. I regard this as of little weight.
>
> (3) The jurisdiction in which judgement could be obtained, namely the Isle of Man.
>
> (4) The country in which Mr Perrin was resident, namely the UK.
>
> (5) The country from or in which Mr Perrin's obligations to pay would be contemplated to be enforced or would substantively originate, namely the UK."
>
> 61. The FTT concluded that the interest arose in the UK and did not arise from a source outside the UK. It found that the factors of residence and the source of funds for payment or enforcement outweighed that of jurisdiction and actual payment. As regards the actual payments made by Mr Perrin from his Isle of Man bank account, this factor was discounted by the FTT on the basis that what was required by the Greek Bank case to be ascertained was the source of the obligation and that this was the totality of the loan obligations and not simply the source of payment of the interest.

26.15 Source of interest: Conclusion

Accepting, in the light of *Ardmore*, that a multifactorial approach shouild be adopted, it is suggested that the position should be as follows:

(1) Suppose a debt were wholly non-UK connected but secured on UK land; that is, the UK situate security is the only UK aspect of the debt. For instance, a debt from one non-resident to another non-resident, which arises under a contract governed by a foreign proper law. It is suggested that interest on such a debt has a foreign source. It would be wiser to avoid the issue.

By contrast, suppose a debt was made unsecured (or secured on non-UK assets) and later became secured on UK land. It is considered that this would not turn a non-UK source into a UK source.

(2) Suppose a debt were wholly non-UK connected but paid out of funds derived from UK source income (eg rents of UK land). This cannot be enough to make the interest UK source. The origin of funds used to pay

interest is a weak connecting factor. (I would submit it should not be a connecting factor at all.)

(3) Suppose a debt were wholly non-UK connected but had a UK resident debtor. It is suggested that this alone does not give the source of interest a UK location.

(4) Different considerations apply in the case of securities issued by a company as (particularly in the case of publicly issued securities, held by many investors) many of the other connecting factors do not work so well. In these cases the residence of the company should play a more significant role. The RDR Manual provides:

> **RDRM33550 Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [Jan 2019]
> ... Securities are "foreign" where income (in practice, interest) from them would be relevant foreign income. This will include, for example, a security issued in registered form by a non-UK company, which maintains the register of note-holders outside the UK.[104]

The rule that the source of interest on registered bonds of a foreign company is the location of the register seems a sensible rule but that will normally be the same as the place of residence.

The same applies to bearer securities: that is consistent with *Bank of Greece*.

26.15.1 *Source of interest: Critique*

After reading many pages on this issue, the reader will agree with HMRC who say:

> The current tests in UK law of whether ... payment of interest is made from a UK source are unclear and cause confusion.[105]

That is as true now as when it was written in 2003.[106]

[104] The comment is made in relation to the AIS remittance basis, but the point made here relating to the source of interest has a more general application. The text is also found in EN FB 2008.

[105] Inland Revenue, "Income tax: Meaning of UK Source for Payments of Interest and Royalties" Consultation document (2003), para 1.1.

[106] The difficulty is acknowledged in *CT v Spotless Services* (which adopted a multifactorial approach) at [52]: "Where ... the transaction is complex in terms of its background, its nature and its execution, and where ... important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated." 71 ALJR 81; 34 ATR 183; 141 ALR 92

It is not actually an answer to ask what a "practical man" would regard as the "real source". The only way in which a man, practical or otherwise, can locate the source of interest (other than tossing a coin) is to apply a theory as to the priority of rival connecting factors.[107] The exhortation to adopt a "practical approach" is harmless. It is just not helpful. No-one advocates that the law should adopt an impractical approach. Those who stress the practical approach should bear in mind that the first thing that a practical man will ask of the law is that it will provide a clear *answer* to the question of where is a source. There is nothing more impractical than uncertainty. What Kurt Lewin said of psychology is also true of tax: there is nothing so practical as a good theory.

It is not satisfactory to say that many or all factors are relevant, and if different factors point in different ways, it is a matter of carrying out a balancing exercise. We need rules on which factors have priority or there is no law on the subject at all.

The OECD Model source rule is superior to the multifactorial approach (or any other approach).[108] However legislation (with appropriate transitional provisions) would be needed to make this reform. The gap between the existing case law and this solution is too great to be bridged by the courts, except by the Supreme Court, and the Supreme Court ought to follow the international case law rather than adopting a new solution.

A HMRC consultation document in 2003 proposed this sensible reform[109]

http://www.uniset.ca/other/css/96ATC5201.html. I could not find the case on *http://www.austlii.com* so have put it on *https://www.kessler.co.uk/tfd-archive* *Spotless* went on to the High Court of Australia but the Revenue wisely abandoned their appeal on the source issue.

A test which will "usually be difficult" to apply is not a satisfactory one for something as basic as identifying the source of interest.

I discuss *Spotless* in the 2013/14 edition of this work para 20.7.4 (Spotless).

[107] 'Everyone is in the grip of some theory - even those who affect to despise theory'; thus John Kay, when asked why it was not possible to define income using common sense: Kay, "Tax Policy: A Survey" (1990) 100 Economic Journal 18, 20.

See *IRC v Philips' Gloeilampenfabrieken* 10 ATD 435 [1955] NZLR 868 at p.896-6 I discuss *Philips* in detail in the 14th edition of this work, para 18.9.1 (*IRC v Philips*).

[108] See 26.27.6 (Source of interest for DTA). If we adopted OECD Model test one modification might be desirable: that where a debtor changes residence, the source of interest does not change (ie the source is determined and fixed at the time the debt arises). But that point could be argued both ways.

[109] Inland Revenue, "Income tax: Meaning of UK Source for Payments of Interest and Royalties" Consultation document (2003).

but the proposal was quietly dropped. The reason why was never announced. Tax reform generally has winners and losers. Losers cry louder than winners, and that is an obstacle for many tax reforms. It is not clear that this was the problem here. It is hard to identify obvious "losers", ie persons who could say with any confidence that they were not taxable under the present law. But there may have been a lobby on behalf of taxpayers who could argue in favour of foreign source at present, and who would lose under a clearer set of rules. If so, there was never a lobby more misguided.

In 2012 HMRC again promised to consider reform,[110] but if that was ever intended seriously, it was subsequently dropped.

In the 14th edition of this work I discussed the foreign case law in detail, and argued the case for a place of credit test. That still seems to me to be superior to the multifactorial approach. But I omit this now, as *Ardmore* has settled the law for the time being.

26.16 Building society income

Building society income will have a UK source. EN ITTOIA Vol II explains:

> 48. Under [what is now s.14 and s.15 CTA 2009] a society incorporated under the Building Societies Act 1986 will be resident in the UK through incorporation. As long as dividends are paid by a UK resident company they have a UK source under the principle in *Bradbury v The English Sewing Cotton Company* 8 TC 481.
>
> 49. But a society may be non-resident where it satisfies a residence test in the territory of a treaty partner and the treaty awards residence to that other territory. [What is now s.18 CTA 2009] will then apply to treat the society as non-resident. Theoretically dividends paid by a building society may therefore arise from a source outside the UK. This would be most unlikely, however, since a building society may only be incorporated under the Building Societies Act 1986 if its principal office is in the UK. With the place of incorporation and the principal office in the UK a residence test is unlikely to be satisfied in another territory.

26.17 Co-operative & community benefit society income

EN ITTOIA Vol 2 explains the source of income from a co-operative and

[110] HMRC, "Possible Change to IT rules on Interest: Summary of Responses" (2012) para 3.15 accessible *http://webarchive.nationalarchives.gov.uk/20121002231638/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_032340*

community benefit society:

> 52. Under [what is now s.14 and s.15 CTA 2009] a society registered under the Industrial and Provident Societies Acts[111] will be resident in the UK through incorporation. A society may, however, be non-resident where it also satisfies a residence test in the territory of a treaty partner of the UK and the treaty awards residence to that other territory. [What is now s.18 CTA 2009] will then apply to treat the society as non-resident.
>
> 53. Section 486(4) of ICTA [now s.379 ITTOIA] provides that share or loan interest is chargeable under Schedule D Case III. Theoretically therefore payments by a registered society may arise outside the UK but be charged under Schedule D Case III and not able to benefit from treatment specific to Schedule D Cases IV and V. For the sake of consistency this section [s.369 ITTOIA] treats such income arising outside the UK as relevant foreign income and therefore able to benefit from the special rules in Part 8 of this Act.

See Kessler, Wong & Borlace, *Taxation of Charities & Nonprofit Organisations* (13th ed., 2022-23), chapter 42 (Clubs and Mutual Concerns).[112]

26.18 Non-resident's interest: Outline

The general principle is that non-residents are subject to UK tax on UK source interest, as they are on any other UK source income. There are however exceptions of such breadth that the general principle rarely applies. The exceptions are:

(1) The non-residents IT exemption. By itself, this limits UK tax to withholding tax. Where withholding tax exemptions apply, interest is therefore not taxable at all. There are many such exemptions.
(2) DTA agreements sometimes confer exemption.
(3) FOTRA and similar state issued securities.

Policy issues concerning deductibility of interest overlap with policy issues on the taxability of UK source interest received by non-residents. In short: restrictions on deductibility and extensions of taxability each increase effective capital costs which in principle should have the consequence of reducing investment. Two irreconcilable policy choices are at play here,

[111] Author's footnote: now rebranded Co-operative and Community Benefit Societies and Credit Unions Acts.

[112] *https://www.taxationofcharities.co.uk*

on one hand to collect UK tax from non-residents on UK source income; and on the other to encourage investment in the UK by non-residents.

The former International Tax Handbook para 876 explained the policy reason behind the exemption for non-residents for interest from deposit-takers:

> There were moreover compelling policy considerations. An attempt to tax the interest could have harmed the balance of payments by discouraging foreigners from putting their money into the UK. For the same reason no attempt has been made to require banks to deduct tax from interest paid to non-residents and interest belonging to persons not [ordinarily[113]] resident is now excluded from the arrangements for deduction of tax from bank interest.

In the case of FOTRA and similar state-issued securities, the case for exemption is stronger and this is reflected in the exemptions for FOTRA securities which are wider. OECD summarises:

> 7.5 Where the payer of the interest happens to be the State itself, a political subdivision or a statutory body, the end result may well be that the tax levied at source may actually be borne by that State if the lender increases the interest rate to recoup the tax levied at source. In that case, any benefits for the State taxing the interest at source will be offset by the increase of its borrowing costs. For that reason, many States provide that such interest will be exempt from any tax at source.[114]

The Katz commission makes an interesting comment on the policy issues:

> 6.2.2.1 Most worldwide or residence based systems of taxation subject non-residents to taxation on income derived from a source within their jurisdiction, and, in principle, there should be no objection against doing the same as regards interest accruing to or being received by a non-resident from a South African source. However, in this instance, the high mobility of capital militates against the adoption of a pure approach. Most countries refrain from so taxing interest, at least as regards interest on debts with unrelated parties (so-called portfolio interest). At the same time, most of those systems tax interest flowing between related parties.

[113] Under the SRT reforms, references to ordinary residence in the tax code have been replaced by references to residence. But that change does not affect the point made here.

[114] OECD Commentary to article 11 OECD Model. OECD are considering exemption provided in a DTA, but the policy points to a general exemption.

> The reason is that in the latter situations interest merely represents another form of extracting profits from the jurisdiction where they were earned, and of course would enjoy a deduction in appropriate circumstances. In following these tendencies South Africa will ensure that it remains competitive in international capital markets, while still, like most other countries, protecting the tax base on income arising from South African operations.[115]

The UK however does not adopt this approach: it does not apply a rule that seeks to tax UK source interest paid to non-resident related parties (as distinguished from unrelated parties). Similarly, the UK does not disallow interest deductions paid to related parties. CIOT say:

> There is no reason ... why a well-capitalised and cash rich group headquartered in a relatively low taxed jurisdiction should be penalised by financing a subsidiary by debt, if that subsidiary could raise the debt externally if it were an independent entity.[116]

26.19 Withholding taxes: Introduction

A note on terminology. I use the term **"withholding tax"** (WHT) which seems to me the clearest. Statute uses a variety of expressions which carry the same meaning:

> The duty to deduct a sum representing income tax[117]
> Deduction of tax at source[118]
> The obligation to deduct or account for tax[119]

HMRC guidance refers to WHT as a receipt "with income tax taken off". When withholding tax does not apply, the interest may be said to be **"paid gross"**.

Interest withholding tax is one of a set of withholding taxes. The withholding taxes discussed in this work are:

[117] Eg s.884(1) ITA.

[118] Eg s.13 TIOPA.

[119] See 3.19.1 (Tax advantage: Definitions).

Type of withholding tax	**See para**
Rent	24.8
UK public revenue dividends	27.3
Annual Payments	31.10
Intellectual property income	32.10
Trust income distributions	41.5

The payment of WHT is not a benefit, eg for the purposes of s.87 or s.731.[120]

Suppose:

(1) X pays interest to Y, and deducts withholding tax, and
(2) Y gets a tax reclaim

It is considered that X does not have a restitutionary claim to recover the tax from Y, even if X has a charge or lien over the interest.

26.20 Interest withholding tax

Interest withholding tax is governed by Chapter 3 Part 15 ITA. Section 874(1) ITA provides:

> This section applies if a payment[121] of yearly interest arising in the UK is made—
> (a) by a company,
> (b) by a local authority,
> (c) by or on behalf of[122] a partnership of which a company is a member, or
> (d) by any person to another person whose usual place of abode is outside the UK.

If these any of conditions are satisfied, we move on; s.874(2) ITA provides:

> The person by or through whom the payment is made must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

WHT is a collection mechanism for tax payable by the recipient.[123]

[120] Contrast 101.4 (Tax on indemnity payment).

[121] For the meaning of payment, see 15.3 (Recognition/attribution: Analysis).

[122] The words "on behalf of" are otiose. Perhaps the drafter was concerned by the fact that a partnership is not a legal person; if that were the concern, the wording does not seem wholly apt. But it does not matter.

[123] This is self-evident, but if authority is needed, see *HMRC v Lomas (Administrators of Lehman Brothers International* [2017] EWCA Civ 2124 at [6]-[8].

26.20.1 *Non-residents withholding tax*

For individuals, trustees and PRs, withholding tax arises under s.874(1)(d) when the following conditions are satisfied:

(1) Payment
(2) Yearly interest
(3) Interest arises in the UK
(4) Payment to a person whose usual place of abode is outside the UK

In the following discussion:

- a person whose usual place of abode is outside the UK is described (for brevity) as "**outside the UK**"
- Withholding tax under para (d) is **"Non-residents withholding tax"**

Withholding tax is particularly important if the recipient is not UK resident, as non-resident IT relief provides effective exemption except so far as withholding tax applies.[124]

26.20.2 *Collection of withholding tax*

The rules for the collection of withholding tax are in Chapters 15-17 Part 15 ITA, s.945-964 ITA. I do not address them here, though I hope to do so in a future edition.

INT Manual provides:

> **INTM413220 Consequences of failing to deduct withholding tax** [Mar 2020] ...
> ***Assessing the unpaid income tax***
> Chapter 15, Part 15 of Income Tax Act 2007 ... provides for returns and collection of income tax in respect of payments falling within ITA07/S946, which specifically includes payments of yearly interest where a deduction is required under s.874.
> The rules, under ITA07/S951 are that:
> - the income tax at the basic rate on the interest is due on the same date as the return reporting the payment
> - both the return and tax are due within 14 days of the end of the quarter within which the payment of interest was made
> - no assessment is required for collection of this tax.
>
> This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment.

[124] See 45.1 (Non-resident IT relief – Introduction).

> ITA07/S957 sets out what should happen if it appears that a s.946 payment (which this is) has not been included in a return, and the tax arising on the payment has not been paid:
>
> > (1) This section applies if an officer of Revenue and Customs thinks—
> >
> > (a) that there is a section 946 payment which should have been included in a return under this Chapter and which has not been so included, or
> >
> > (b) that a return under this Chapter is otherwise incorrect.
> >
> > (2) An officer of Revenue and Customs may make an assessment, to the best of the officer's judgement, on the person who made the return, or who should have made one.
>
> Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

26.21 To whom is interest paid

Since withholding tax arises on a payment to a person who is not in the UK, it is necessary to identify the person to whom the payment is made.[125]

Suppose interest is paid to a transparent (*Baker*-style) IIP trust which is not a settlor-interested trust. It is suggested that the interest is paid "to" the trustees (who have a lien). So if the trustees are in the UK but the life tenant is outside the UK the person paying the interest to the trustees need not deduct; but the trustees must do so when they pay the interest to the life tenant. But if the trustees mandate the income to the life tenant, the payer has an obligation to deduct.

Suppose:

(1) interest is paid to a settlor-interested trust; and
(2) the trustees are outside the UK and the settlor is in the UK.

At first sight, if s.624 applies, there is no obligation to deduct as the interest is treated as income of the settlor "and of the settlor alone". Following the deeming, the payment should be treated as paid to the settlor. Conversely, if the settlor is outside the UK, there is an obligation to deduct even if the trustees are in the UK. It is suggested that that is the correct view. This is consistent with the position for deposit-takers. The former TDSI Guidance Notes provided:

> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong

[125] Similar issues arise elsewhere: see 21.5 (To whom trading income arises).

> to the settlor[126] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.[127]

This result is surprising: the payer may be expected to know whether the payee is outside the UK, but they cannot be expected to know if the recipient is a settlor-interested trust, and if so, who is the settlor and is the settlor outside the UK. But the trust may be a protected trust, outside the scope of s.624 in which case this problem will not arise.

Section 646(8) ITTOIA provides:

> Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.

This is not entirely to the point but it illustrates the view that the deeming of s.624 does not apply in all cases.

Suppose:

(1) interest is paid to a non-resident company within s.720; and
(2) the transferor is in the UK.

The transferor is taxable under s.720 on income treated as arising to them, but the interest is still the income of the company. So there is an obligation to deduct. Of course, if the income of the company is protected company income, s.720 will not apply.

26.22 Usual place of abode

26.22.1 *Introduction*

The expression "usual place of abode" occurs in the context of rent/royalty withholding tax, as well as in the context of interest withholding tax. The

[126] Author's footnote: It is assumed that the Stiftung is a settlor-interested trust.

[127] HMRC, "Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 2.3.
https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions
TDSI was abolished from 2016/17, and the Guidance Notes withdrawn. But the general point made here remains relevant.

meaning in all cases is the same.[128]

The phrase “settled or usual abode” was often used as an explanation or paraphrase of the concept of tax-residence before the SRT, which was said to mean residence in the normal sense of the word.[129] So one might think that there is no difference between residence (at least in the usual sense of the word) and “usual place of abode”. But there is a difference, though the concepts are close. The SAI Manual provides:

> **SAIM9080. Yearly interest: ‘place of abode’ of recipient** [Mar 2017]
> *Meaning of ‘place of abode’*
> ITA07/S874 (1)(d) requires deduction of tax from a payment to a person “whose usual place of abode is outside the UK”. This phrase is distinguishable from the concept of “residence”...

Likewise EN ITA para 2648:

> The term “usual place of abode” is consciously retained, because it is a technical term, distinct from residence.

One difference is that under the SRT an individual is UK resident (or not) for an entire tax year, but the usual place of abode can change at any time.

26.22.2 *Place of abode: Individual*

The PI Manual provides:

> **PIM4810: summary of the non-resident landlord scheme** [May 2020]
> **Meaning of ‘usual place of abode’**
> ... The rules of the NRL Scheme are concerned with the landlord’s usual place of abode, not their residence status for UK tax purposes. Although there is no statutory definition of ‘usual place of abode’ the NRL Scheme will apply to all landlords leaving the UK for a period that is expected to, or will, exceed six months.
> Individuals have a usual place of abode outside the UK if they usually live outside the UK.
> You should still regard the term as applying to them even if in a

[128] This view is adopted by EN ITA para 2648: “The term ‘usual place of abode’ is consciously retained, *because it is a technical term*, distinct from residence” (emphasis added).

[129] See the 2012/13 edition of this work para 3.8. Some hint of the meaning can also be taken from s.1(1) Immigration Act 1971: “All those who are in this Act expressed to have the right of abode in the UK shall be free to live in, and to come and go into and from, the UK without let or hindrance...”.

> particular year they are resident in the UK for tax purposes, as long as the usual place of abode is outside the UK. (For example the individual may count as resident in the UK in a particular year because of
> [1] a six months' visit, or
> [2] a visit of a shorter time when he or she has a place of abode available in the UK.)[130]
> Do not treat someone as having their usual place of abode outside the UK if they are only temporarily living outside the UK, say for six months or less.

The SAI Manual makes the same point more tersely:

> **SAIM9080. Yearly interest: 'place of abode' of recipient** [Mar 2017]
> An individual's usual place of abode is outside the UK if he or she usually lives abroad, unless that arrangement is temporary.

The NRLS guidance provides:

> The NRLS applies to you if your usual place of abode is outside the UK. This may be the same as your place of residence for tax purposes, but not always.
> For individuals, HMRC normally regard an absence from the UK of 6 months or more as meaning you have a usual place of abode outside the UK. It is possible for you to be resident in the UK but have a usual place of abode outside the UK.

There is some parallel between "usual" place of abode and "ordinary residence, but the analogy does not help, as the concept of ordinary residence was (more or less) abolished for tax purposes in 2013, and even before then its meaning was vague and contested.

The PI Manual formerly provided:

> **PIM4800 Overseas landlords** [deleted 2018]
> *Meaning of 'usual place of abode'*
> ... a person who is not resident in the UK should normally be treated as having their usual place of abode outside the UK.

This passage was deleted in 2018, though there was no announcement to say that HMRC practice has changed.

[130] Author's footnote: Para [2] refers to the supposed "available accommodation rule" which was an aspect of the pre-SRT residence test abolished in 1993. The passage was no doubt written before 1993 and has not been updated since.

26.22.3 *Place of abode: Company*

The PI Manual provides:[131]

> **PIM4810: summary of the non-resident landlord scheme** [May 2020]
> ... Companies that have their main office or other place of business outside the UK, and companies incorporated outside the UK, normally have a usual place of abode outside the UK. However, companies regarded as resident in the UK for tax purposes do not have a usual place of abode outside the UK for the purposes of the scheme, even if incorporated outside the UK. The UK branch of a non-resident company, where that branch is within the charge to Corporation Tax, does not have a usual place of abode outside the UK for the purposes of the scheme.

The SAI Manual addresses the question of UK branches of non-resident companies:

> **SAIM9080 Yearly interest: 'place of abode' of recipient** [Mar 2017]
> *Companies*
> A non-UK resident company that has a UK permanent establishment that is within the charge to corporation tax does not have a usual place of abode abroad.[132]

This practice seems surprising, but it favours the taxpayer so it will not be challenged.

26.22.4 *Place of abode: Trust/PRs*

The SAI Manual provides:

> **SAIM9080 Yearly interest: 'place of abode' of recipient** [Mar 2017]
> *Trustees*
> Trustees, including personal representatives, have a usual place of abode abroad if each trustee, considered as an individual or a company as the case may be, has a usual place of abode there. So if one trustee does not have a usual place of abode abroad, neither does the trust.[133]

[131] NRLS guidance has the same substantial text, albeit phrased differently.

[132] The NRLS guidance likewise provides:
"The usual place of abode is within the UK for the purpose of the NRLS where... a UK branch of a non-resident company must pay Corporation Tax."
https://www.gov.uk/government/publications/non-resident-landord-guidance-notes-for-letting-agents-and-tenants-non-resident-landlords-scheme-guidance-notes

[133] The same point is in NRLS guidance and PIM4810. This view is supported by *Dawson v IRC* 62 TC 301.

This text was probably composed before the statutory residence rules for trustees and PRs. One might have thought that the usual place of abode for trustees and PRs is where they are resident under those rules. But the HMRC practice favours the taxpayer so it will not be challenged. It is also satisfactory for HMRC; as long as one trustee is here, HMRC can collect tax from that trustee and do not need the assistance of a withholding tax.

26.22.5 *Usual place of residence*

Article 56 VAT directive provides in relation to persons not carrying on a business:

> 1. The place of supply of the following services to customers established outside the Community, or to taxable persons established in the Community but not in the same country as the supplier, shall be ... the place where he has his permanent address or usually resides:

Section 9(5) VATA 1994 provides in relation to individuals:

> A person who is not a relevant business person is to be treated as belonging-
> (a) in the country in which the person's usual place of residence or permanent address is ...

VAT is outside the scope of this work, but discussion of this provision may shed some light on residence issues more generally.

VAT Place of Supply of Services Manual provides:

> **VATPOSS04600 Belonging: Usual place of residence** [Aug 2019]
> **Private individual**
> The usual place of residence of a private individual is not defined in the law. We interpret the phrase as meaning the one country where the individual spends most of their time for the period in question. It is likely to be the country where the individual has set up their home, lives with their family and is in full time employment. As far as possible, this should coincide with the actual economic situation. Individuals are not treated as belonging in a country if they are short term, transitory visitors (for example if they are visiting as tourists, to receive medical treatment or for a short term language/other course).
> For VAT purposes, persons who have not been granted a right or permission to remain in the UK should be treated as belonging in their country of origin. This will apply to, for example, asylum seekers and those entering without permission. Belonging in this context involves something more than mere presence. In these circumstances, the country in which individuals have their usual or permanent place of residence can only reasonably be seen to be their country of origin unless and until they are granted the right to remain in the UK.
> Once an individual is granted leave or permission to remain in the UK, then the

place of supply of any services they receive, for example legal services supplied to a person that has been granted asylum in relation to obtaining a work permit, will be on the basis they are regarded as belonging in the UK.

Where an individual is granted the right or permission to remain in the UK and this expires or is subsequently revoked for whatever reason, they should be treated, for VAT purposes, as resident in the UK until such time as the issue is concluded (including the time taken to go through any appeal process). VAT should be charged on all relevant services supplied to such a person, subject to the normal rules.

In exceptional circumstances, an individual may not have had an identifiable country of origin. Such individuals are in effect stateless and should be treated, for VAT purposes, as belonging in the UK. For example, a situation may arise where a person is granted exceptional leave to remain in the UK on the basis that their country of origin is unknown and their claim to be a British citizen cannot readily be verified.

Case law

In the case of *USAA Ltd* (LON/92/1950A) (VTD 10369), the Tribunal considered the meaning of usual place of residence of US Forces personnel living in England. It found that such personnel living in England on a three year term of duty had their usual place of residence in the UK. During the tour of duty, if they had a permanent address in the form of a home in the USA, it was let. If they returned for training to the USA, their families remained in the UK. The US personnel could not therefore be regarded as having their usual place of residence in the USA.

In *Razzak & Mishari* (LON/97/754), [1997] VATTR 392, (VTD 15240), the Tribunal held that the supply of legal services in respect of UK proceedings by a UK solicitor to Mrs Shaik Haseena, a woman of Indian nationality, was received in India and was outside the scope of UK VAT

Mrs Haseena lived with her Kuwaiti employers as a servant for several years, first in Kuwait and later in the UK. She left their employment some three months after their arrival in the UK. She commenced an action through the UK courts for alleged cruelty against her former employers. During the period of these proceedings, some four years, Mrs Haseena lived in the UK and nowhere else.

The Tribunal found that the facts in this case were most unusual. ... It considered that there must be a sufficient degree of permanence and not merely a temporary presence. It held that, in this case, there was insufficient degree of permanence in that

- on arrival in the UK Mrs Haseena expected to stay only one month
- if she had remained in her employers' service and they had remained for the maximum permitted period, her visa was for only six months
- when she left her employers, she was prohibited by immigration law from working
- her entitlement to stay was initially not accepted by the Home Office
- when she was allowed to stay, it was for a limited period and a limited purpose with no guarantee of extension even to pursue the litigation
- during her period in the UK, she stayed in a series of hostels of temporary abode

- correspondence with the Home Office showed that if the visa had not been extended, she would have returned to India, and
- the case was distinguishable from USAA Ltd because Mrs Haseena's stay was not voluntary.

Thus it held that, throughout the relevant period, India was the country where Mrs Haseena had her usual place of residence.

1st Contact v HMRC [2012] UKFTT 84 concerned "working holidaymaker" students on an extended gap year:

> 2... young people, principally from Australia, New Zealand and South Africa, coming to the United Kingdom temporarily for a "working holiday" or "overseas experience". They come with the intention of travelling around this country and other parts of Europe, while taking on incidental, temporary work to pay for their short-term living expenses and travel plans. ... most came under the "working holidaymaker" provisions of the Immigration Rules, which allowed young persons from specified countries to come to the United Kingdom on a "working holiday" for up to two years, during 12 months of which they were permitted to undertake work "incidental to" the holiday. ... Most of the Appellant's customers in fact were in the United Kingdom for 18 to 19 months, on and off between travel elsewhere.
>
> 42. As there is no evidence that the typical customer had a permanent address in either country, for purposes of the present appeal the issue must be to determine the country in which the typical customer "usually resided" for purposes of Article 56(1) of the 2006 Directive, or the country in which the typical customer had "his usual place of residence" within the meaning of [now, s.9(5) VATA].
>
> 43. In relation to the meaning of "usual residence" for present purposes, both parties relied on *Shah*. In argument, attention was drawn to the following passages in the speech of Lord Scarman (with whom the other Lords all agreed):
>
>> Unless, therefore, it can be shown that the statutory framework or the legal context in which the words are used requires a different meaning, I unhesitatingly subscribe to the view that "ordinarily resident" refers to a man's abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or of long duration. [At 343G-H]
>>
>> And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled.
>>
>> The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of

> matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose. [344C-F]
>
> My Lords, the basic error of law in the judgments below was the failure by all the judges, save Lord Denning M.R., to appreciate the authoritative guidance given by this House in Levene v. Inland Revenue Commissioners [1928] AC 217 and Inland Revenue Commissioners v. Lysaght [1928] A.C. 234 as to the natural and ordinary meaning of the words "ordinarily resident." They attached too much importance to the particular purpose of the residence; and too little to the evidence of a regular mode of life adopted voluntarily and for a settled purpose, whatever it be, whether study, business, work or pleasure. [At 347H-348B]
>
> ... "Immigration status" ... may or may not be a guide to a person's intention in establishing a residence in this country: it certainly cannot be the decisive test, as in effect the courts below have treated it. Moreover, in the context with which these appeals are concerned, i.e. past residence, intention or expectations for the future are not critical: what matters is the course of living over the past three years.
>
> A further error was their view that a specific limited purpose could not be the settled purpose, which is recognised as an essential ingredient of ordinary residence. This was, no doubt, because they discarded the guidance of the Levene and Lysaght cases. But it was also a confusion of thought: for study can be as settled a purpose as business or pleasure. And the notion of a permanent or indefinitely enduring purpose as an element in ordinary residence derives not from the natural and ordinary meaning of the words "ordinarily resident" but from a confusion of it with domicile.
>
> I, therefore, reject the conclusions and reasoning of the courts below. And I also reject the "real home" test (and the variant of it) for which the local education authorities contended. In my view neither the test nor the variant is consistent with the natural and ordinary meaning of the words. [At 348D-F]

44. Lord Scarman uses the expression "settled purpose". This expression clearly is not intended to mean a "purpose to settle in a country" in the sense of becoming permanently resident there. Lord Scarman makes clear that a "settled purpose" may be "for a limited period" or "for the time being, whether of short or of long duration", and that it does not mean "real home" or "domicile". Rather, the expression "settled purpose" appears to refer simply to the fact that the person has voluntarily and deliberately gone to a particular place for a particular reason. Lord Scarman makes clear that the reason need not be employment, but might encompass "business, work or pleasure", or even "merely love of the place", that the reason may be specific or general, and that there may be more than one purpose. Lord Scarman also considered it to be necessary is

that there be “a sufficient degree of continuity”, and “a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences”. Lord Scarman also indicated that ordinary residence, is “ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind”. Neither party in the present case disputed that this is a question of fact and degree, depending on the circumstances of the case as a whole.

45. In *Shah*, the issue before the House of Lords was whether immigrant students who had studied in the United Kingdom for the previous three years or longer had been ordinarily resident in the United Kingdom during the previous three years. The House of Lords did not itself decide the question, but held that the decisions below contained errors of law. Lord Scarman said in respect of the correct test to be applied that:

> ... it is, therefore, my view that local education authorities, when considering an application for a mandatory award, must ask themselves the question: has the applicant shown that he has habitually and normally resided in the United Kingdom from choice and for a settled purpose throughout the prescribed period, apart from temporary or occasional absences? If a local education authority asks this, the correct, question, it is then for it, and it alone, to determine whether as a matter of fact the applicant has shown such residence. An authority is not required to determine his “real home,” whatever that means: nor need any attempt be made to discover what his long term future intentions or expectations are. The relevant period is not the future but one which has largely (or wholly) elapsed, namely that between the date of the commencement of his proposed course and the date of his arrival in the United Kingdom. The terms of an immigrant student's leave to enter and remain here may or may not throw light on the question: it will, however, be of little weight when put into the balance against the fact of continued residence over the prescribed period - unless the residence is itself a breach of the terms of his leave, in which event his residence, being unlawful, could not be ordinary. [At 349B-E]

46. *USAA* concerned the supply of services to members of the US armed forces serving in the United Kingdom. The typical case was described as a member of the US forces who had arrived in the United Kingdom on a 3 year tour of duty (which might be extended or curtailed), accompanied by spouse and children, who had let out any home they owned back in the USA for the duration of the tour, and who would leave family members in the United Kingdom if returning during the tour of duty to the US for training. The Tribunal said that:

> I do not rule out the possibility that a taxpayer may in some cases have more than one “usual place of residence”. However, it seems to me that an officer who is serving a three year term in the UK whose family are living here in a house or an apartment, whose home in the USA is let, and who may if he goes back to the USA for training leave his wife and family here, has a “usual place of residence” in the UK and has no “usual place of residence” in the USA. Although it was not put to me separately, I also think that an unmarried officer here for three years whose parents (with whom he resided when in the USA) continue to reside there, similarly has a “usual place of

> residence" in the UK being the quarters that he occupies here but not in the USA.
>
> One must concentrate on a point of time, not as in *Levine* and *Lysaght* on a year of assessment. I do not think that it can fairly be said that an officer as described with his three year residence here has "a usual place of residence" in the USA. If his house is let he has no place of residence at all in the USA.
>
> I think the question is really one of fact and degree, and in the typical case put to me I do not think the serving officer, starting without a presumption one way or the other, can fairly say that he has a "usual place of residence" in the USA at the time when, in the UK, he affects motor insurance.
>
> If I am in error in considering that a person may have two usual places of residence, I reach the same conclusion, namely that the only usual place of residence in the circumstances is in the UK.
>
> A retired officer who sets up house here and does not keep a house in the USA is plainly usually resident here. An officer being in the USA and about to move to the UK has in my view a "usual place of residence" in the USA.

47. In *Razzak*, the person to whom services were supplied was found not to be ordinarily resident in the United Kingdom in the following circumstances. She was an Indian national who had been working as a domestic servant for a family in Kuwait. She came with that family to the United Kingdom as a domestic worker on a 6 month visa. She said that she did not want to come, but was told it would be for only a month. She claimed that she was mistreated by her employers and left after 3 months and went to a refuge, where she stayed for 9 months. She brought a claim for damages against her former employers, and was eventually granted exceptional leave to remain in the United Kingdom for purposes of pursuing the claim. The claim was settled some four years after she arrived, and it appears she had left the United Kingdom by the time that the case was decided. The Tribunal said at [47] that:

> In my judgment the words in [now s.9(5) VATA] must be construed as encompassing "the place where he has his permanent address" and in particular the word "permanent", not necessarily in the literal sense but at least as the antithesis of purely temporary and as having a sufficient degree of permanence. Viewed in that way it seems to me that the presence of Mrs Haseena in the United Kingdom was not such as to make this "the country of her normal place of residence". When she arrived in August 1992 she only expected to stay for a month; even if she had remained in the Appellants' service and they had remained for the maximum permitted period, her visa was only for six months; I do not consider that the UK could have properly been described as "the country where she had her usual place of residence". When she left the Appellants she was prohibited by immigration law from working and her entitlement to stay was initially not accepted by the Home Office. When she was allowed to stay it was for a limited period and a limited purpose with no guarantee of extension even to pursue the litigation. During the period from November 1992 Mrs Haseena stayed in a series of different hostels which of their very nature were temporary places of abode. It is clear from the correspondence with the Home Office as early as March 1993 that if the visa had not been extended

> she would have returned to India. In my judgment throughout the relevant period India was the country where she had her usual place of residence although she was temporarily and effectively involuntarily present in the UK.

48. *Martin-Jenkins*, concerned a supply of goods made to a person who had been living in the United Kingdom for some 10 years, but who was in the process of moving to Mauritius where he had a residence permit, and a start date for his employment and his children's schooling. The goods were intended for use in Mauritius. He left the United Kingdom for Mauritius on 31 August 2007. The goods had been delivered to him in the UK some 2 weeks before he left, to be shipped with his other effects to Mauritius. The Tribunal found that he was "resident" in the United Kingdom at the time of the supply, since at the time he was living with his family in his home in the United Kingdom. It was held to be irrelevant that "his mind may well have been in Mauritius", since residence must be established by objective evidence and not subjective intention. It was held that a person can only be resident in one territory at a time, and that *Razzak* was of no assistance since his presence in the United Kingdom was voluntary.

49. Applying the relevant principles derived from this case law to the present case, the Tribunal finds the following.

50. Although a person may be ordinarily resident in a place for a short period, and although the purpose of ordinary residence may be "merely love of the place", an ordinary tourist in the United Kingdom for a period of days or weeks clearly could not generally be said to have their ordinary residence here. Presence in this country as a typical tourist would not be, in the words of Lord Scarman, "for settled purposes as part of the regular order of his life for the time being", and presence here in that capacity would not be a "regular, habitual mode of life in a particular place". A typical tourist would, for instance, have a home and employment in their country of origin. Typically, a tourist would not rent their home out while on holidays, and would be on annual leave from their employment at home and would not be taking up employment in the United Kingdom. However, each case would depend on its own facts. A person who spent a year in this country without working, and who spent the year here travelling and sightseeing, might well be described as a "tourist". Nevertheless, if the person had no home or employment in their country of origin, and if they rented a home in the United Kingdom for the year as a base from which to conduct travels and sightseeing, the conclusion might be reached that the person is ordinarily resident in the United Kingdom for the year in question.

51. The Tribunal finds that *Razaak* is of limited assistance due to its unusual facts. It concerned the supply of services to a person whose presence in the United Kingdom was involuntary, not only in the sense that she said that she did not want to come here in the first place, but in the sense that she remained beyond the one month period for which she initially thought she was coming due to supervening circumstances arising in this country that formed no part of her original purpose in coming here, and which she did not bring upon herself.

52. The case law indicates that a person's particular immigration status is not a particularly significant factor, and that a person's ordinary residence may be in the United Kingdom, regardless of where their "real home" or domicile may be.

The Tribunal finds that the nature of the customers' immigration status is relevant only to the extent that is instructive in establishing material facts. The Tribunal takes into account the evidence that the Appellant's customers came here with the intention to undertake such combination of work and travel that was consistent with the requirements of a working holidaymaker visa, whether they actually had a working holidaymaker visa or had some other immigration status. Apart from this, the immigration case law on working holidaymakers is not considered pertinent.

54. The evidence is that the Appellant's customers came to the United Kingdom intending to have an experience involving a combination of travel and work known as a "working holiday" or "overseas experience", and that they would typically stay some 18 months. In pursuit of that purpose, they remained regularly in the United Kingdom for that period, with temporary absences visiting other countries (including short trips back to their home countries), even if their living arrangements were short-term and transitory. The Tribunal finds that the purpose of having such a "working holiday" or "overseas experience" can in itself be a "settled purpose" in the sense used in *Shah*. A settled purpose can include more than one purpose, and there is no reason why it cannot include a combination of travel and work.

55. The evidence is that the Appellant's customers typically arrived in the United Kingdom with no fixed plans. However, the Tribunal is satisfied on the evidence that they did arrive with a general purpose of having a working holiday, which typically lasted perhaps some 18 months. It may be that they did not know at the time of arrival whether they would leave early if things did not work out, or stay longer if they did and if they could get any necessary extension of their immigration status. However, in *USAA*, the 3 year postings if US service personnel were also capable of being extended and curtailed, such that they would not know at the outset exactly how long they would stay. Lack of certainty of the duration of presence in the United Kingdom is not decisive.

56. The fact that the Appellant's customers intended that they would be in the United Kingdom only temporarily and would return to their "normal" lives in their home countries at the end of a working holiday does not mean that they could not be ordinarily resident in the United Kingdom in the meantime. It was clearly the intention of typical US service personnel in *USAA* to be in the United Kingdom for only a limited period. In *Martin-Jenkins*, the person to whom goods were supplied was actually in the process of moving to Mauritius at the time of the supply, yet was found still to be resident in the United Kingdom.

57. The service personnel in *USAA* were found to be resident in the United Kingdom, notwithstanding that throughout their posting here, they maintained very strong links with the USA. They owned homes there, which they had rented out. They remained in the service of the US armed forces. Their service in the United Kingdom was part of a continuous employment by the US employer, which existed before they came to the United Kingdom and typically continued after they left the United Kingdom.

58. It is true that in *USAA*, the US service personnel brought their spouses and children with them to the United Kingdom. However, the evidence is that the Appellant's customers typically were not married and had no children. There is

> no evidence that the typical customer maintained a home in their country of origin. There is no evidence that the typical customer had, for instance, a job in their country of origin from which they had taken leave of absence in order to have a working holiday. Furthermore, even if customers had homes in their home countries that they had rented out, or previously lived with their parents in their home country, *USAA* indicates that this would not mean that they continued to be resident in their home country while in the United Kingdom.
>
> 59. Although it may be presumed that many or most working holidaymakers have parents, siblings, and other family or friends in their country of origin, that would be equally true of the service personnel in USAA, and of many other people who take up ordinary residence in the United Kingdom. While working holidaymakers may have maintained an intention of returning to their home countries at the end of the working holiday, and although there was evidence that they might return home on short trips during their working holiday, there was no evidence that they maintained any particular types of connections or commitments in their home countries during the period that they were away.
>
> 60. It may be the case that the Appellant's customers did not remain in one place in a single employment like the US service personnel in *USAA*, or have an established home in this country as in *Martin-Jenkins*. However, it is implicit in the wording of section 9(3) VATA and Article 56(1) of the 2006 Directive that the test of residence relates to the country of usual residence, rather than a particular street address. Even if customers changed address and moved from place to place during the working holiday, that is not inconsistent with the United Kingdom being their usual place of residence for the period in question. Throughout that period, they continuously lived a working holidaymaker lifestyle, even if it was a transitory lifestyle involving a combination of travel and work.
>
> 61. The Tribunal is satisfied on the evidence that for the duration of their working holiday, the Appellant's typical customer was in the United Kingdom "for settled purposes as part of the regular order of his life for the time being", and had a "purpose of living where one does has a sufficient degree of continuity to be properly described as settled", and had a "a regular mode of life adopted voluntarily and for a settled purpose".

26.22.6 *Australian guidance*

The Australian revenue have published guidance in TR 2023/1:

> **Usual place of abode outside Australia**
>
> 88. Your usual place of abode is the place you usually live or would live but for being absent from it due to, for example, a transient lifestyle or other temporary circumstances. Despite spending the majority, or even the whole, of the income year in Australia, you may still have your usual place of abode overseas. For example, if you have lived overseas for most of your life, travel to Australia to spend 18 months experiencing Australia in transient accommodation and employment, and then return overseas, you will still have your usual place of abode overseas.
>
> 89. Given the more common situations in which this test applies, a person

will usually have an 'abode' in the sense of a dwelling overseas. However, as with the domicile test, it is not necessary for a person, while in Australia, to have and maintain a physical dwelling overseas in order for their usual place of abode to be outside Australia. For example, if you rented accommodation overseas and terminated your rental agreement before coming to Australia, but you intend to return to the same town or country after your stay in Australia, your usual place of abode is likely to be outside Australia. Ultimately, it is a question of fact. In different circumstances, relinquishing a dwelling overseas may indicate an abandonment of the usual place of abode overseas. Therefore, in determining whether you have your usual place of abode outside Australia, examine the nature and quality of the use made of any place of abode you may have overseas[134]and compare it with your living arrangements in Australia in deciding which is your usual place of abode.[135]

90. Relevant factors in considering whether your usual place of abode is outside Australia include:

- where you lived before and after your time in Australia
- the availability of your overseas dwelling to you (if you have one) while you were in Australia
- where your possessions and assets are
- the type of visa you have and the length of your intended stay
- your purpose of coming to Australia, and
- the travel arrangements you made, including whether you departed from and returned to the same place outside Australia.[136]

91. If you come to Australia and sell your home and personal possessions in the country you came from intending to remain in Australia, it is unlikely your usual place of abode remains outside Australia. However, this needs to be considered in conjunction with the other factors outlined in paragraph 90 of this Ruling.[137] Conversely, if you come to Australia for a certain period and have your overseas home available to you upon your return, and you do return to it, you are likely to have your usual place of

[134] *Commissioner of Taxation v Executors of the Estate of Santha Thevy Subrahmanyam* [2001] FCA 1836; *Applegate and Federal Commissioner of Taxation v Jenkins* (1982) 12 ATR 745.

[135] *Commissioner of Taxation v Executors of the Estate of Santha Thevy Subrahmanyam* [2001] FCA 1836.

[136] *Jaczenko v Commissioner of Taxation* [2015] AATA 125; *Koustrup v Commissioner of Taxation* [2015] AATA 126; *Clemens v Commissioner of Taxation* [2015] AATA 125.

[137] *Commissioner of Taxation v Executors of the Estate of Santha Thevy Subrahmanyam* [2001] FCA 1836.

abode outside Australia.[138]

26.22.7 *Place of abode uncertain*

The PI Manual provides:

> **PIM4810 summary of the non-resident landlord scheme** [May 2020]
> It is for the letting agent or tenant to determine the 'usual place of abode' of the landlord. If this is in doubt, the letting agent or tenant should get more information from the landlord to satisfy themselves on the point. In particular, PO Box numbers and 'care-of' addresses alone should not be relied on as evidence that the scheme does not apply. Where letting agents or tenants have no reason to believe that a landlord has a usual place of abode outside the UK, they are not required to make any special enquiry and they therefore would not have to operate the scheme.

The NRLS guidance provides:

> **How do letting agents and tenants know whether a landlord has a 'usual place of abode' outside the UK?**
> A landlord's usual place of abode will usually be clear without the need for special enquiries. If it is outside the UK, letting agents or tenants should operate the NRLS. If the usual place of abode is in doubt, you should get more information from the landlord. PO Box numbers and 'care of' addresses should not be relied on as evidence that the Scheme does not apply.
> In cases of difficulty, letting agents and tenants can contact HMRC.
> Where you have no reason to believe that a landlord has a usual place of abode outside the UK, you are not required to make any special enquiries. You do not have to operate the NRLS.

26.22.8 *Place of abode: Critique*

Do we need a concept of "usual place of abode" in addition to concepts of residence? For individuals, the statutory residence test provides a definition of "residence" which should be the starting point here and "place of abode" should be abolished. There would need to be some provision for cases where at the time of payment of the interest it is not clear whether the payee is resident or not. In practice, we muddle through.

26.23 Withholding tax: Exceptions

There are about 20 exceptions to interest withholding tax:

[138] *Stockton v Commissioner of Taxation* [2019] FC 1679.

ITA s.	**Exemption**	**See para**
875	Interest paid by building society	
876	Interest paid by deposit-taker	
877	UK public revenue dividends	27.3
878	Interest paid by bank	
879	Interest paid to UK bank	26.23.3
880	Interest paid to building society	
881	National Savings Bank interest	
882	Quoted Eurobond	26.23.7
883	Interest on loan to buy life annuity	
884	Foreign source interest	26.23.1
885	Authorised dealer in financial instruments	
886	Interest paid by recognised clearing house	
887	Payment made by registered society	
888	Statutory interest	
888A	Qualifying private placement	26.23.6
888B	Designated dividends of investment trust	
888C	Interest distribution of OEIC	
888D	Interest distribution of authorised unit trust	
888E	Interest on peer-to-peer lending	
893	Public revenue dividends	22.3

There are further exemptions which apply to interest and other withholding taxes:

933/934	Company within CT	26.24.1
936/937	Exempt recipients	26.24.2, 26.24.3
981	Foreign currency securities	27.8.3

In this work I consider only some of these exemptions, but hope to consider more in a future edition.

26.23.1 *Foreign source interest*

Section 874 ITA imposes the obligation to deduct on making:

> a payment of yearly interest arising in the UK[139]

Foreign source interest is not subject to withholding tax, as one would expect.

Section 884(1) ITA provides:

> The duty to deduct a sum representing income tax under section 874

[139] See 26.19 (Interest withholding tax).

> does not apply to a payment of interest which is chargeable to income tax as relevant foreign income.

This is otiose, because RFI by definition must be income arising from a source outside the UK,[140] so it is not income arising in the UK, and not subject to withholding tax in the first place. But it does not matter.

The SAI Manual provides:

> **SAIM9090 Yearly interest: UK source: The general rule** [Dec 2019]
> ... whether or not tax should be deducted from interest paid on an overseas loan depends on the source of the interest. If the interest has a UK source tax must be deducted, if it does not then tax should not be deducted.

26.23.2 *Withholding: Interest source*

Section 874(6A) ITA provides:

> In determining for the purposes of subsection (1) whether a payment of interest arises in the UK no account is to be taken of the location of any deed which records the obligation to pay the interest

For the purposes of s.874(1) (only) the location of a deed is disregarded; for other purposes it is not. Thus there are two definitions of the source of interest.

The disregard does not apply for the purposes of s.884(1). So if one took the provision literally, the location of the deed is taken into account in determining whether the interest is RFI, and if it is RFI, there is no obligation to deduct.

Fortunately this defect does not matter, as the location of a deed is not relevant to the location of the source of interest.[141] Section 874(6A) is otiose. What a mess!

The reason for the provision is found in a shallow HMRC consultation paper:

> 4.11 For ‘debts under seal’ or ‘specialty debt’ it is sometimes argued that case law supports the view that interest paid on such debts does not have a UK source where the loan agreement is physically held outside the UK, and hence that income tax is not required to be deducted at source.
> 4.12 HMRC does not accept this argument. However, to put the matter beyond doubt, the Government proposes to amend the relevant

[140] See 16.9.2 (“Relevant foreign income”).

[141] See 26.11 (Rejection of situs approach).

> provisions of Chapter 3 of Part 15 of ITA [withholding tax] so that the question of whether or not interest arises in the UK is established without reference to the location of the agreement or deed evidencing the debt.[142]

The need for a statutory definition of source remains unmet.

26.23.3 *Interest paid to UK bank*

Section 879(1) ITA provides:

> The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on an advance from a bank[143] if, at the time when the payment is made, the person beneficially entitled[144] to the interest
> [a] is within the charge to corporation tax as respects the interest or
> [b] is a bank that would be within the charge to corporation tax as respects the interest apart from section 18A of CTA 2009 [Exemption for profit of foreign permanent establishment].

This would apply on payment of interest to a UK branch of a non-resident bank, though it may be that such companies do not have their usual place

[142] HMRC, "Possible changes to income tax rules on interest" (2012) *http://webarchive.nationalarchives.gov.uk/20131002164136/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_031986*
The consultation paper omitted to point out that HMRC formerly accepted the view which they now reject, as did at least one Special Commissioner decision. It contained no discussion of the relevant law (beyond a cursory reference to *Bank of Greece*) and did not mention the 2003 consultation.
See too HMRC, "Possible changes to income tax rules on interest: Summary of Responses" (2012) *http://webarchive.nationalarchives.gov.uk/20131002141406/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_032340*

[143] For completeness, s.879 provides:
"(2) Section 991 (meaning of 'bank') applies for the purposes of this section.
(3) Subsection (1) applies to the European Investment Bank as if the words from 'if' to the end were omitted.
(4) An order under subsection (2)(e) of section 991 designating an international organisation as a bank may provide that subsection (1) applies to the organisation with the modification mentioned in subsection (3)."

[144] See App. 6.2 (English-law beneficial ownership).

of abode abroad.

This exemption (together with other exemptions from withholding tax not discussed here) rests on tax competition considerations.[145]

26.23.4 *Short interest*

Tax law distinguishes between:

(1) "yearly" or "annual" interest (the terms are synonymous); and
(2) other interest (known as "short" interest).

Withholding tax does not apply to short interest. The distinction between short/yearly interest is therefore important.

The SAI Manual explains the distinction:

> **SAIM9075. Yearly interest: Case law on short and yearly interest** [Aug 2017]
>
> *When is interest "short" or "yearly"?*
>
> Although tax law has made a distinction between yearly and short interest since 1806, there is no statutory definition of yearly interest. The distinction rests wholly on case law.
>
> The classic example of short interest is interest payable on a bank loan for less than a year. In the early case of *Goslings and Sharpe v Blake* (2 TC 450), the Court of Appeal confirmed that interest on such a loan, where there was no provision to extend the borrowing for more than a year, could not be yearly interest, notwithstanding the use of an annual percentage rate.
>
> It is therefore a useful starting point to say that where a loan or debt is for less than a year, there is a presumption that it gives rise to short interest. Conversely, interest on a loan or debt that exists fora year or more is likely to be yearly interest.
>
> But you cannot just apply this as a mechanical rule, with the benefit of hindsight. Particular difficulties may occur where, at the time when a loan or debt comes into existence, it is not clear how long it is going to last.
>
> For example, the case of *Bebb v Bunny* (1854) 1 K&J 216 concerned the payment into court of the purchase price of a property, with interest on the delayed payment. It would have been possible for the interest to have run for more than a year if the purchaser had been particularly late in paying. The judge held that the interest was yearly. On the other hand, the Court of Appeal held, in *Gateshead Corporation v Lumsden* [1914] 2 KB 883, that certain interest which had run for more than a year was nevertheless short interest. The interest in question was statutory interest due to Gateshead Corporation on late-paid contributions towards the cost of making up roads. The court took the view that the mere failure by the Corporation to enforce the debt within a year did not make the interest "yearly interest".
>
> To distinguish interest arising on long-term loans from that arising on apparently

[145] See 1.3 (Other tax competition).

short-term debts, the courts began to lay stress on the debt having “a measure of permanence” or being “in the nature of an investment” as opposed to being merely “temporary accommodation”. Thus in *Corinthian Securities v Cato* (46 TC 93) the Court of Appeal decided that interest on a bank loan, repayable on demand, was yearly interest because the loan had the quality of investment – even though, in the event, the loan was called in after 6 months.

However, the leading case on yearly interest is now considered to be *Cairns v MacDiarmid* (56 TC 556). In this case, the Court of Appeal saw the intention of the parties as the determining factor. If the debtor and creditor intend that the debt should subsist for a year or more, or where there is mutual acceptance that the interest may have to be paid from year to year, the interest will be yearly. This principle was applied in *Minsham Properties v Price* (63 TC 570), where a loan from a parent company, repayable on demand, gave rise to yearly interest because it was regarded by both parties as permanent finance.

It was felt in *Cairns v MacDiarmid* that merely asking whether a loan had the character of an investment was a less useful test – even an overnight deposit of money might be regarded as an “investment”.

SAIM9076. Practical application [Dec 2019]

Applying case law principles

It is always a question of fact whether, in any particular case, interest is yearly or short. The intention of the parties will be the most important factor in deciding the question (see SAIM9075). This will be the case in particular where a loan has a duration of less than 12 months but is ‘rolled over’, once or more than once, to a second year. If the intention of the parties, when the borrowing was first put in place, was for the borrowing term to be less than 12 months, HMRC will require clear evidence that this was the original intention. Without such evidence, HMRC will be unable to accept that the intention of the parties was to have a borrowing term of less than 12 months.

The question of whether interest is short interest, from which the payer has no obligation to deduct tax, is most likely to arise in the context of payments made by a UK resident to a person whose usual place of abode is outside the UK. If the interest is short, there is no need for the recipient to apply under a relevant Double Taxation Agreement to receive the interest gross (or with tax withheld at a reduced rate). There is guidance at INTM505010 onwards.

A UK resident may make a series of loans, each of less than a year, to a non-resident, and claim that the interest is short. HMRC staff should refer to the guidance at INTM413210 in such cases.

Uncertainty may also arise as to whether there is a duty to deduct tax from interest in circumstances comparable to that in *Bebb v Bunny* (SAIM9075) – where a sum of money remains outstanding for a period that may, or may not, be a year or more. For example, a manufacturer might guarantee to refund the purchase price, with interest from the date of claim, if a product proves faulty: such claims may normally be processed speedily but, in disputed cases, may drag on for over a year.

Where the parties intend at the outset that monies due will not be left outstanding for a year or more, the interest will be short – even if, in a few cases, there are delays which prolong the period over which interest accrues. If however the

> parties anticipate at the beginning that the debt will exist for a year or more, or appear to be indifferent as to whether it will or not, the interest is likely to be yearly.
>
> Where the payer of the interest is uncertain about whether it is short or yearly, they may in practice “play safe” by deducting tax. If the recipient of such interest objects to the tax deduction, HMRC staff should advise him or her to take up the matter with the payer, see SAIM9180.
>
> If, conversely, the payer decides that interest is short and pays it gross, HMRC staff should not challenge that view unless
>
> - the decision appears to be completely unjustified on the facts and in the light of relevant case law, or there is reason to suspect a definite intention of avoiding the payment of withholding tax; and
> - material sums of tax are at risk.

Overdraft interest is usually short interest.

Hargreaves Property Holdings Ltd v HMRC[146] offers the most recent discussion of a point on which there is more than a century of case law. In short:

(1) *Duration:* Interest payable in respect of a short loan is not yearly interest .Yearly interest must have a measure of permanence, AKA “a tract of future time”. If a debt is expected to last for less than a year but, in the event, it lasts for a year or longer, that does not make the interest on that debt "yearly". But the expected duration of a debt is established by way of a business-like assessment and is not determined by the terms of the document giving rise to the debt.

(2) *Investment nature:* Yearly interest has the nature of an investment. Though as “investment” is a difficult term to pin down, I am not sure this takes us much further.

Hargreaves was an avoidance scheme where the taxpayer sought to avoid yearly interest/WHT by arranging a series of short term loans. Taken together the loans formed part of long term financing. Each lender made a “continuous provision of finance” to the borrower over a lengthy period, such that the financing from each lender “had a permanency which belied the apparent short-term nature of each loan” This was held to be yearly interest, so the avoidance scheme was not successful.[147]

In 2012, a shallow consultation document proposed to extend WHT to short interest (and so to abolish the yearly/short interest distinction); but

[146] [2023] UKUT 120 (TCC).

[147] The failure of this scheme had been predicted; see Gabbai, “Withholding tax planning: Should it be disclosed and how might it be challenged?” [2020] BTR 335.

the proposal was rightly abandoned.[148]

26.23.5 *Discounts and premiums*

SAI Manual provides:

> **SAIM3070 Taxation: Profit on disposal** [Dec 2019]
> *Deduction of tax*
> Discounts payable on the redemption of relevant discounted securities[149] are not payments of interest. Consequently the payments are made without deduction of tax.

Discounts are not interest and not subject to withholding tax even if not payable on the redemption of a DDS.[150]

A premium may be interest or it may be a capital receipt, in which case it is not subject to withholding tax.

26.23.6 *Qualifying private placements*

Section 888A ITA provides:

> (1) The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on a qualifying private placement.
> (2) "Qualifying private placement" means a security—
>
> (a) which represents a loan relationship[151] to which a company is a party as debtor,

[148] HMRC, "Possible changes to income tax rules on interest" (2012) *http://webarchive.nationalarchives.gov.uk/20131002164136/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_031986*
The paper did not consider the need for the rule, or whether any modification of the rule would be better suited for its purpose. It is in fact a de minimis rule and as such serves an important purpose. The paper also did not consider international practice. Do other countries require deduction at source for interest on transient or short term loans?
HMRC, "Possible changes to income tax rules on interest: Summary of Responses" (2012).
http://webarchive.nationalarchives.gov.uk/20131002141406/http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageLibrary_ConsultationDocuments&propertyType=document&columns=1&id=HMCE_PROD1_032340

[149] The correct term is now deeply discounted securities.

[150] See 26.3 (Discount).

[151] Defined by reference in s.888A(6): "In this section "loan relationship" has the same meaning as in Part 5 of CTA 2009."

> (b) which is not listed on a recognised stock exchange,[152] and
> (c) in relation to which such other conditions as the Treasury may specify by regulations are met.

The regulations are Qualifying Private Placement Regulations 2015. This covers relevant securities between unconnected parties where the value is £10m+ and of less than 50 years duration. Dependent upon the territory in which the lender is resident, the borrower can self-assess that no WHT need be paid.

26.23.7 *Quoted Eurobond*

Section 882 ITA provides the exemption:

> The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on a quoted Eurobond (see section 987).

Section 987(1) ITA provides the definition:

> In this Part [Part 15 ITA, withholding tax] "quoted Eurobond" means a security, including a share (in particular any permanent interest bearing share as defined in section 117 of TCGA 1992), that—
> (a) is issued by a company,
> (b) is listed on a recognised stock exchange[153] or admitted to trading on a multilateral trading facility operated by an EEA-regulated recognised stock exchange,[154] and
> (c) carries a right to interest.

Partnership borrowers are excluded from the private placements exemption, and are excluded from the Quoted Eurobonds legislation. However, the Eurobond exemption may apply where a company partner issues a security as the general partner of an LP.

26.24 Excepted payment

Section 930(1) ITA provides:

[152] See App 2.18 (Listed/Recognised stock exchange).

[153] See App 2.18 (Listed/Recognised stock exchange).

[154] Section 882(2) provides the relevant definitions: "For the purposes of this section—
(a) a recognised stock exchange is an "EEA-regulated recognised stock exchange" if it is regulated in the European Economic Area, and
(b) "multilateral trading facility" has the same meaning as in Article 4.1.22 of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments."

> The duties to deduct sums representing income tax mentioned in subsection (2) do not apply to a payment if—
>
> (a) it is made by a company, local authority or qualifying partnership[155], and
>
> (b) at the time the payment is made, the company, authority or partnership reasonably believes that it is an excepted payment.

Section 930(2) ITA lists the withholding taxes which are disapplied:

> The duties to deduct are those under—

Section	**Topic**[156]
874(2)	Yearly interest
889(4)	Building society securities
901(4)	Annual payments made by persons other than individuals
903(7)	Patent royalties
906(5)	Royalties where the owner lives abroad
910(2)	Proceeds of a sale of patent rights paid to non-UK residents
919(2)	Manufactured interest on UK securities: payments by UK residents
928(2)	Chargeable payments connected with exempt distributions

Section 930 ITA then provides 2 exceptions:

> (3) Subsection (1) has effect subject to any directions under section 931.
>
> (4) Subsection (1) does not apply to a payment made by a company, or qualifying partnership, acting as trustee or agent for another person.

Subsection (4) seems odd because as a trustee is deemed to be a separate notional person. Perhaps it applies to unit trust trustees. The omission of local authorities is also odd. But these questions will rarely arise in practice.

26.24.1 *Payment to company*

Section 933 ITA provides:

> A payment is an excepted payment if the person beneficially entitled[157]

[155] Section 932 ITA provides: "For the purposes of this Chapter a partnership is a "qualifying partnership" if any partner in the partnership is a company or a local authority."

[156] For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

[157] See App. 6.2 (English-law beneficial ownership); 54.2.1 (Income effectively transferable).

> to the income in respect of which the payment is made is a UK resident company.

A UK resident company is not likely to have a place of abode abroad[158] but this can apply to other withholding taxes.

Section 994 ITA deals with a payment to a non-resident company within CT:

> (1) A payment is an excepted payment if each of the following conditions is met in relation to the payment.
> (2) The person beneficially entitled[159] to the income in respect of which the payment is made must be a non-UK resident company.
> (3) The non-UK resident company must carry on a trade in the UK through a permanent establishment.
> (4) The payment must be one that is required to be brought into account in calculating the chargeable profits (within the meaning given by section 19 of CTA 2009) of the non-UK resident company.

26.24.2 *Tax-exempt recipient*

Section 935 ITA deals with ISAs, not considered here.

Section 936 provides:

> (1) A payment is an excepted payment if it is made to, or to the nominee of, a recipient who is specified in subsection (2) as a recipient who is to be paid gross.
> (2) The following recipients are to be paid gross—

There follows a list of 10 categories of what I call "tax-exempt recipients". For clarity I set them out in my own words rather than the words of the statute:

Governmental bodies

(a) a local authority
(b) a health service body within the meaning of section 986 of CTA 2010
(c) a public office or department of the Crown (excluding commonwealth countries specified in s.978(2) ITA)

Charities & NPOs

(d) a charity
(e) four bodies listed in s.468 CTA 2010: National Heritage Memorial Fund, Historic Buildings & Monuments Commission for England, British Museum, Natural History Museum

[158] See 26.22.3 (Place of abode: Company).
[159] See App. 6.2 (English-law beneficial ownership).

(f) scientific research associations (defined s.469(1)(a) CTA 2010, complying with s.469(2)(3))

Pension schemes

(g) the scheme administrator of a registered pension scheme

(h) the sub-scheme administrator of a sub-scheme which forms part of a split scheme pursuant to the Registered Pensions (Splitting of Schemes) Regulations 2006

(i) Parliamentary pension funds within s.613(4) ICTA

(j) Colonial, etc pension funds within s.614(3) ICTA

As these bodies are generally not subject to IT, it makes sense they should not be subject to WHT.

The Treasury have power to alter this list.

26.24.3 *WHT exempt partnership*

Section 937 ITA provides:

> (1) A payment is an excepted payment if each of the following conditions are met.
> (2) A partnership must be beneficially entitled[160] to the income in respect of which the payment is made.
> (3) Each partner in the partnership must be—
> (a) a person or body mentioned in section 936,[161] or
> (b) a person or body to whom one of subsections (4) to (6) applies.[162]
> (4) This subsection applies to a UK resident company.
> (5) This subsection applies to a company that—
> (a) is non-UK resident,
> (b) carries on a trade in the UK through a permanent establishment, and
> (c) is required to bring into account, in calculating its chargeable profits (within the meaning of section 19 of CTA 2009), the whole of any share of the payment that is attributable to it because of Part 17 of that Act.
> (6) This subsection applies to the European Investment Fund.

[160] It would be more accurate to say that the partners are beneficially entitled, rather than the partnership (which is not a legal person); but the meaning is clear. See App. 6.2 (English-law beneficial ownership).

[161] See 26.24.2 (Tax-exempt recipient).

[162] Section 937(7) provides: "The Treasury may by order amend this section to add to, restrict or otherwise alter the persons or bodies falling within subsection (3)(b)."

Section 937 is needed on the basis that partnerships are not transparent for the purposes of withholding tax, ie payment to a partnership is *not* payment to the partners, ie it adopts the chose in action analysis of a partnership share.[163]

26.24.4 *Direction to deduct*

For completeness: s.931 ITA provides:

> (1) An officer of Revenue and Customs may give a direction to a company, local authority or qualifying partnership directing that section 930 is not to apply in relation to any payment that—
> (a) is made by the company, authority or partnership after the giving of the direction, and
> (b) is specified in the direction or is of a description so specified.
> (2) A direction under this section may be given only if the officer has reasonable grounds for believing, as respects each payment to which the direction relates, that the payment will not be an excepted payment at the time it is made.
> (3) A direction under this section may be varied or revoked by a later direction.
> (4) A variation or revocation of a direction under this section has effect only in relation to payments made after the date of the variation or revocation.

But I wonder if this happens much if at all.

26.24.5 *Mistake by payor*

Section 938 ITA provides:

> (1) This section applies if—
> (a) a payment is made by a company, local authority or qualifying partnership without a sum representing income tax on the payment being deducted from it,
> (b) at the time the payment is made, the company, authority or partnership reasonably believes that it is an excepted payment,
> (c) one of the duties to deduct sums representing income tax mentioned in section 930(2) would apply to the payment if the company did not so believe, and
> (d) the payment is not an excepted payment at the time it is made.
> (2) This Part has effect in relation to the payment as if section 930(1) had

[163] See 85.3.1 (English partnership: 2 analyses).

never disapplied the duties to deduct mentioned in section 930(2).

26.25 Disguised interest

Disguised interest is covered in Chapter 2A Part 4 ITTOIA.

Section 381A ITTOIA imposes the charge to tax:

> (1) This Chapter applies where a person is party to an arrangement[164] which produces for the person a return in relation to any amount which is economically equivalent to interest.
> (2) Income tax is charged on the return if the return is not charged to income tax under or as a result of any other provision of this Act or any other Act.[165]

26.25.1 *Economic equivalent to interest*

Section 381A(4) ITTOIA provides:

> For the purposes of this Chapter a return produced for a person by an arrangement in relation to any amount is "economically equivalent to interest" if (and only if)—
> (a) it is reasonable to assume[166] that it is a return by reference to the time value of that amount of money,
> (b) it is at a rate reasonably comparable to what is (in all the circumstances) a commercial rate of interest, and
> (c) at the relevant time there is no practical likelihood that it will cease to be produced in accordance with the arrangement unless the person by whom it falls to be produced is prevented (by reason of insolvency or otherwise) from producing it.

The CFM comments on the equivalent CT provision:

> **CFM42060: returns 'economically equivalent to interest'** [Aug 2018]
> The main feature of the disguised interest rules is to be able to identify interest-like returns or, as the legislation puts it 'a return in relation to any amount which is economically equivalent to interest on that amount.' CTA09/S486A(2) sets out a definition of 'economically equivalent to interest' that runs through three conditions.
> **Basic definition of interest (subsection (a))**
> The return must fit within a basic definition of interest. This basic

[164] Section 318A(6) provides the standard (unnecessary) IT definition: see App 2.2.3 (Definitions of "arrangement").

[165] For this style of charging provision, see 14.7.2 (Priority in charging provision).

[166] See App 2.24 (Reasonable-to-assume).

definition of the meaning of interest is drawn from a number of the indicia commonly cited in cases on the meaning of interest (e.g. *Euro Hotel (Belgravia) Limited* 51 TC 293 and *Bennett v Ogston* 15 TC 374) (CFM33030). This captures the familiar concepts that the return must be:

- by reference to an amount of money. This means HMRC will be looking for an investment of some sort (or an entitlement to payment of something akin to a debt) in order for the legislation to apply; and
- calculated by reference to the time value of money.

Commercial rate of interest (subsection (b))

The return must in all the circumstances be comparable to a commercial rate of interest. There are a couple of features to this condition that are worth noting.

The return must only be 'comparable'. Consequently, the return does not have to be exactly the same as a commercial rate of interest. It therefore provides a range of interest rates within which a return could be 'comparable' to a commercial rate of interest.

In deciding whether an interest rate is comparable to a commercial rate of interest, you should assume that all factors are taken into account. A commercial rate of interest would therefore take into account the identity and creditworthiness of the counterparty. It could also include such features as the relationship between the two parties, the duration of the arrangement and the currency of the transaction(s).

Practical likelihood of the return (subsection (c))

The interest-like return must be predictable. There must be 'no practical likelihood' , when viewed at the 'relevant time' that the return will not be produced in accordance with the arrangement.

It is therefore not enough that an interest-like return results from the arrangements. If the return is the product of chance or could not have been reasonably anticipated at the outset of the arrangement, then it cannot be a return 'economically equivalent to interest'.

In assessing whether there was 'no practical likelihood' that the return will not be produced in accordance with the arrangement you should ignore contingencies such as default outside of the control of the parties. This would include ignoring the possibility of default.

The 'relevant time' (S486B(3))

The 'relevant time' is defined for the purposes of S486B(2)(c), as being the later of the time when the company becomes party to the arrangements or the time when the return begins to be produced. It must therefore be clear at the outset that the return will be produced. Thus, although there is no express requirement for the arrangement to be 'designed' to produce the return, the return must be initially predictable.

26.25.2 *HMRC examples*

The CFM provides:

> **CFM42010 disguised interest: overview** [Aug 2018]
>
> **...Example**
>
> Company A purchases an asset (that is not a security) for £100m from Company B under an arrangement whereby Company A will sell that asset back to Company B in two years' time for £112M.
>
> Assuming that the return of 6% per annum (straight line) is reasonably comparable to a commercial rate of interest, then this transaction provides an interest-like return in a manner that would not, without any special rules, be taxed as interest...
>
> **CFM45020: examples of avoidance schemes** [Aug 2018]
>
> This guidance applies to companies that hold shares up to 21 April 2009
>
> The following two examples show in outline how companies could structure arrangements to generate an interest-like return which for tax purposes does not arise as interest.
>
> **Scheme 1: shares subject to third party obligations**
>
> - On day 1, a UK special purpose vehicle (SPV) company issues 100m £1 ordinary shares to a bank but only 0.001p/share is actually paid up (i.e. £10k in total). Under the terms of the share issue, the bank is obliged to pay up the balance of the capital (£100m less £10k) in one year's time, even if it sells the shares in the meantime.
> - On the same day, the bank sells the shares to UK plc (avoider) for their net present value of (say) £95m. At the end of the year, bank pays up the remaining £100m of share capital, so that the value of the SPV shares is then £100m, being the cash it has.
> - The economic effect is that the bank receives £95m from UK plc on day 1, and pays £100m to SPV (owned by UK plc) on day 365. The figures will be such that the £5m difference represents a year's interest on the initial £95m cash paid by UK plc.
> - The substance is that UK plc has invested £95m for a year and has received £5m of interest, and it is likely that this arrangement will be accounted for as a loan and the profit of £5m shown as interest income.
> - For CT purposes, the only charge would be on a capital gain of £5m (subject to indexation) if UK plc disposes of the shares. It would usually be the case that UK plc would have capital losses to cover the gain.
>
> **Scheme 2: other interest-like shares**
>
> - In this scheme, a UK SPV is set up with share capital of £95m and it uses that cash to acquire a debt of £100m due in a year's time.

£95m is the present value of the debt. This is most likely to have been a structured debt set up for the purposes of the scheme (and to avoid problems with the debt going bad).

- The shares are then sold to UK plc for £95m. UK plc knows the company will be worth £100m in a year's time.
- The substance is exactly the same as scheme 1 in that UK plc would earn a fixed profit of £5m in the form of an unrealised capital gain, it is only the mechanism which delivers the pre-ordained increase in value of the SPV's shares that differs.

The last example concerns dual currency investments:

> **SAIM2800: Disguised interest: examples** [Dec 2019]
> **...Currency movements**
> An investor may receive a return from holding deposits in more than one currency, seeking to take advantage of movements in exchange rates to generate a return. The arrangements may require the investor to enter into options involving the receipt or payment of amounts in the event of the spot rate being above or below a specified level. The return the investor actually receives may be described, for example, as a combination of a 'money market rate' (say 0.5% p.a.) plus an option premium (say 4.5%), giving an overall yield of 5%. This return will fall within the disguised interest provisions.

This is not self-evident: It would need a deeper consideration of the investment background to determine if this is correct. The position may vary from one dual currency investment to another.

26.25.3 *Foreign disguised interest*

Section 381B ITTOIA provides:

> Tax is charged under this Chapter on the full amount of the return, or any part of the return, arising in the tax year.

The remittance basis does not apply: foreign source disguised interest received by a remittance basis taxpayer is taxable on the arising basis.

A non-resident is not taxed on foreign source disguised interest. It is suggested that the test of foreign source should be similar to the test for ordinary interest.

26.25.4 *Interaction of disguised interest/CGT*

The general rule in s.37(1) TCGA is that where the person making a disposal is subject to income tax on the proceeds, IT has priority over

CGT, and there is no double charge.[167] Section 37(2A) TCGA disapplies this rule for disguised interest.[168] Instead, s.381D ITTOIA provides:

> (1) This section applies if at any time a tax other than income tax ("the other tax") is charged in relation to a return on which income tax is charged under this Chapter.
> (2) In order to avoid a double charge to tax in respect of the return, a person may make a claim for one or more consequential adjustments to be made in respect of the other tax.
> (3) On a claim under this section an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.
> (4) Consequential adjustments may be made—
> (a) in respect of any period,
> (b) by way of an assessment, the modification of an assessment, the amendment of a claim, or otherwise, and
> (c) despite any time limit imposed by or under any enactment.

It would have been simpler to leave the normal rule to apply. I cannot see the justification for a special rule. But it does not matter.

26.26 Loan or credit transaction

Chapter 5C Part 13 ITA rewrites the former s.786 ICTA 1988. This was done by TIOPA in 2010, rather than in 2007 with the rest of ITA, perhaps to link in with work on CTA 2010.[169] The consequence is that the sections were slotted in with clumsy letter/numbering: s.809CZA-809CZC.[170] Throw in the repetitive style of drafting, 6 sections by contrast to the single original, and older practitioners may have preferred to have kept the old section. But there it is.

HMRC say:

> **ICAEW question:** While the section has its history in income tax avoidance, there is no specific limitation on the ambit of the section to

[167] See 56.4.12 (Interaction of IT/CGT).

[168] Section 37(2A) provides: "Subsection (1) is not to be taken as excluding from the consideration so taken into account any money or money's worth which is, or is taken into account in computing, a return on which income tax is charged under Chapter 2A of Part 4 of ITTOIA 2005 (disguised interest) (but see section 381D of that Act)."

[169] The CT equivalent is Chapter 3 Part 16 CTA 2010, but it sits in the very different context of the CT loan relationship code.

[170] See App 13.3 (Section numbering system).

> income tax or to tax avoidance situations. This causes concern and additional complexity in a number of bona fide corporate reorganisations and transactions, including the straightforward refinancing of an insolvent company involving waivers of accrued interest. We would therefore be grateful for confirmation that the Revenue does not regard the section as applying in other than income tax avoidance situations.
>
> **Revenue response** As the Institute recalls, TA 1988 s 786(5) was introduced to tackle schemes of income tax avoidance—specifically, at attempts to circumvent the restrictions on personal tax relief for interest by a debtor substituting other income foregone for interest otherwise payable. We continue to regard the subsection as aimed at situations involving tax avoidance.
>
> Although we cannot rule out in principle its potential application to cases involving corporation tax rather than income tax, we would in practice expect this to be exceptional given the relatively less restricted relief available for interest expense of companies. We would not expect to invoke the provision in the sort of case cited by the Institute—bona fide reorganisations and straightforward refinancing of insolvent companies.[171]

The taxpayer referred to this in *Spritebeam v HMRC* but the point was an unattractive one, as the case concerned a tax avoidance scheme, albeit not the one at which the section was originally aimed. The Upper Tribunal were not impressed:

> HMRC ‘s comments cannot change the clear words of s 786 ... the scope of s 786 cannot be restricted by the mischief at which the provisions seem to have been aimed when no such restriction can be read into the words used.
>
> We note too that HMRC’s answer to the ICAEW’s question is not in any event wholly supportive of [Counsel for the taxpayer’s] analysis. It demonstrates that s.786(5) has the potential to be applied to circumstances outside the apparent mischief.[172]

26.26.1 *“Loan/credit transaction”*

Section 809CZA ITA provides:

> (1) This section defines a loan or credit transaction for the purposes of sections 809CZB and 809CZC.
>
> (2) A transaction is a loan or credit transaction if it is—

[171] [1993] STI p.1333-1334.

[172] [2015] STC 1222 at [26] - [27].

> (a) effected with reference to the lending of money or the varying of the terms on which money is lent, or
> (b) effected with a view to enabling or facilitating an arrangement concerning the lending of money or the varying of the terms on which money is lent.
>
> (3) A transaction is a loan or credit transaction if it is—
> (a) effected with reference to the giving of credit or the varying of the terms on which credit is given, or
> (b) effected with a view to enabling or facilitating an arrangement concerning the giving of credit or the varying of the terms on which credit is given.

Subsections (4)(5) are in the same terms, but one refers to the lending of money and the other to the giving of credit.

In *Spritebeam v HMRC*:

> We do not consider that the phrase: 'any transaction effected with reference to the lending of money or the giving of credit ...' requires the transaction to be something separate from the loan or credit arrangements themselves. It seems to us that this is the plain meaning of the section. Section [809CZA] is worded as it is in order to catch any arrangement for the lending of money however that arrangement may be constructed. We find nothing in its wording which could be read as limiting its application to collateral transactions, and do not agree that the subsection requires the existence of both the loan and a separate transaction if the operative provisions of the section are to be engaged.[173]

Section 809CZA ITA provides:

> (4) Subsection (2) has effect whether the transaction is effected—
> (a) between the lender and borrower,
> (b) between either of them and a person connected with the other, or
> (c) between a person connected with one and a person connected with the other.
>
> (5) Subsection (3) has effect whether the transaction is effected—
> (a) between the creditor and debtor,
> (b) between either of them and a person connected with the other, or

[173] [2015] STC 1222 at [16]. The reader may agree with the first-tier tribunal that the contrary view is the plain reading; but the point seems now settled, at least at the level of the Upper Tribunal.

> (c) between a person connected with one and a person connected with the other.

Subsections (2)(3) are in the same terms, but one refers to lender and borrower, and the other refers to creditor and debtor.

26.26.2 *Annuity deemed interest*

Armed with the definition of "loan or credit transaction" we move on. I mention s.809CZB ITA only for completeness. This provides:

> (1) This section applies if a loan or credit transaction provides for a payment which is not interest but is—
>
> (a) an annuity or other annual payment falling within Part 5 of ITTOIA 2005 and chargeable to income tax otherwise than as relevant foreign income, or
>
> (b) an annuity or other annual payment which is from a source in the UK and chargeable to corporation tax under [Chapter 7 of Part 10 of CTA 2009 (annual payments not otherwise charged) or regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.
>
> (2) The payment must be treated for the purposes of the Income Tax Acts as if it were a payment of yearly interest (see, in particular, section 874).

The SAI Manual provides:

> **SAIM9110 Artificial Arrangements** [Dec 2019]
> ... An example might be where A grants B an interest-free loan and B grants A an annuity for the life of the loan, or transfers the right to income from an asset to A for the duration of the loan. ...
> If the transaction provides for the payment of an annuity or annual payment, the payment is to be treated as annual interest for all Income Tax (ITA07/S809CZB) and Corporation Tax purposes (CTA10/S778).
> The purpose of this sub-section was to prevent persons from obtaining tax relief by paying an annuity or annual payment where no relief would have been available for payment of interest.
> Since the enactment of ITA07/S900 and ITTOIA05/S727, previously ICTA88/S347A (SAIM9050) which limited the circumstances in which the payer of an annuity or other annual payment can deduct and retain income tax, the tax treatment of annual interest and annuities/annual payments is the same in most circumstances. ...

So far, s.809CZB is dead-letter law.

> However this sub-section is still relevant where the lender is overseas. Payments by individuals and trustees of annual interest to non-residents

> should be made under deduction of tax (SAIM9070), but payments of annuities/annual payments by non-corporates (whose income has been wholly subject to income tax) can be made gross. Without this sub-section there would therefore be the opportunity for a lender to receive gross payment for what is essentially interest.

This dusty corner is outside the scope of this book.

26.26.3 *Charge on transferred interest*

Section 809CZC ITA is potentially of wider import. It provides:

> (1) This section applies if—
> (a) under a loan or credit transaction a person transfers income arising from property,
> (b) the person is not, as a result of Chapter 5B (finance arrangements), chargeable to income tax on the income transferred, and
> (c) the person is within the charge to income tax.
> (2) In such a case—
> (a) income tax is charged under this section,
> (b) the tax is charged on an amount equal to the full amount of the income transferred,
> (c) the tax is charged for the tax year in which the transfer takes place, and
> (d) the person who transfers the income is liable for the tax.
> (3) This section does not prejudice the liability of any other person to tax.

Section 809CZC(4) ITA defines "transfer":

> For the purposes of this section a person transfers income if the person surrenders, waives or forgoes it.

This does not apply to an interest-free loan. One does not "forgo" income by making such a loan. Income is only foregone if it is income to which one is otherwise entitled.[174]

Section 809CZC continues:

> (5) Subsection (6) applies for the purposes of this section if—
> (a) credit is given for the purchase price of property, and
> (b) the rights attaching to the property are such that the buyer's

[174] I would also have said that a loan is not a transaction *effected with reference to* the lending of money. It *is* the lending of money. But that is now harder to maintain after *Spritebeam.*

> rights to income from the property are suspended or restricted during the life of the debt.
>
> (6) The buyer must be treated as surrendering income of an amount equal to the income the buyer in effect forgoes by obtaining the credit.

Section 809CZC(7) ITA quantifies the amount of income:

> For the purposes of this section an amount of income payable subject to deduction of income tax must be taken as the amount before deduction of tax.

The SAI Manual provides:

> **SAIM9110 Artificial Arrangements** [Dec 2019]
> ...If the transaction is one which involves the assignment, transfer or waiver of rights to income from property (for instance a security) without the actual transfer or sale of the property itself then ITA07/S809 (CZC) (2) or CTA10/S779 (2) imposes a charge on the debtor. This charge is to income tax or to corporation tax under Schedule D Case VI on an amount equal to the income assigned. The purpose of this section is to prevent debtors from escaping tax on income corresponding to interest for which they could not have claimed relief. The person to whom the right to the income has been transferred will remain liable to tax on this income.
> ITA07/S809 (CZC) (5) and (6) and CTA10/S779 (5) and (6) provide that, if property is bought on credit and the rights attaching to the property restrict the purchaser's income from the property until it is paid for, so that there is no separate provision for waiver of rights, then the above will apply as if there was an agreement to forgo the relevant amount of income.

Although (what is now) s.809CZC was introduced in 1969, the first and only case in which it was discussed was *Spritebeam* in 2013. Clearly HMRC do not seek to apply it outside interest-avoidance contexts, and the fact that the Manual still refers to the pre-2010 provision suggests it is not considered much if at all.

26.26.4 *Waiver of interest*

It has never been suggested that s.809CZC might reverse the case law decisions[175] which held that a waiver of interest was not taxable.[176] If that

[175] See 15.7 (Waiver).

[176] *Norfolk & Montagu on the Taxation of Interest and Debt Finance* agrees: para 5.399 (looseleaf).

were wrong, then there could be a tax charge on the waiver of interest due from an insolvent debtor, even though the interest would never be paid; which would surely be absurd.

26.27 DT relief: Interest income

26.27.1 *OECD Model*

Article 11 OECD Model provides:

> 1. Interest arising in a Contracting State and paid[177] to a resident of the other Contracting State may be taxed in that other State.
> 2. [a] However, interest arising in a Contracting State may also be taxed in that State according to the laws of that State,
>   [b] but if the beneficial owner[178] of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.
>   [c] The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.

OECD Model Convention does not provide exemption but only a partial relief. UK tax is set against tax in the state of residence. So where the OECD Model rule applies, the effective tax rate is the foreign tax rate or the UK withholding tax rate (10%), whichever is the higher.

26.27.2 *DTAs with 100% interest relief*

About a third of UK DTAs provide full relief, ie UK source interest arising to a person who is treaty-resident in the foreign state is taxable only in the foreign state, and not taxed at all in the UK; this includes France, Ireland, Luxembourg, Switzerland and USA.[179] HMRC publish a convenient digest of DTAs.[180]

26.27.3 *Interest arising in 3rd state*

OECD Commentary provides:

> 6. The Article deals only with interest arising in a Contracting State and

[177] See 15.11.2 ("Paid" and "payment").

[178] See 108.10 (DTA beneficial owner rule).

[179] UK/France Art.11; UK/Ireland DTA Art.12; UK/Luxembourg DTA Art.11; UK/Switzerland DTA Art.11; UK/USA DTA Art. 11.

[180] *https://www.gov.uk/government/publications/double-taxation-treaties-territory-residents-with-uk-income*

> does not, therefore, apply to interest arising in a third State.

Interest arising in a third state (not in either treaty state) falls within the Other Income article and is taxed in the state of residence.[181]

26.27.4 *Transfer pricing*

Article 11(6) OECD Model provide the usual rule for transfer pricing/ special relationships:

> 6. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the interest, having regard to the debt-claim for which it is paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

OECD Commentary provides:

> 6. ... Interest arising in a Contracting State which is attributable to a permanent establishment which an enterprise of that State has in the other Contracting State may be taxed by the first-mentioned State under paragraph 2 but may also be taxed by the other State under paragraph 1 of Article 7 (see paragraphs 9 and 9.1 of the Commentary on Articles 23 A and 23 B concerning relief of double taxation in such cases).

26.27.5 *DTA definition of interest*

Article 11(3) OECD Model defines "interest":

> The term "interest" as used in this Article means
> [1] income from debt-claims of every kind,
> [a] whether or not secured by mortgage and
> [b] whether or not carrying a right to participate in the debtor's profits,
> [2] and in particular,
> [a] income from government securities and
> [b] income from bonds or debentures, including premiums and prizes attaching to such securities, bonds or debentures.
> [3] Penalty charges for late payment shall not be regarded as interest for

[181] See 33.20 (DT relief: "Other Income").

> the purpose of this Article.

It is necessary to distinguish:
Treaty-interest: interest within this definition
UK domestic-law interest: interest under the UK domestic law definition.

OECD Commentary provides:

> 18. ... The term "debt-claims of every kind" obviously embraces cash deposits and security in the form of money, as well as government securities, and bonds and debentures, although the three latter are specially mentioned because of their importance and of certain peculiarities that they may present. It is recognised, on the one hand, that mortgage interest comes within the category of income from movable capital (*revenus de capitaux mobiliers*), even though certain countries assimilate it to income from immovable property. On the other hand, debt-claims, and bonds and debentures in particular, which carry a right to participate in the debtor's profits are nonetheless regarded as loans if the contract by its general character clearly evidences a loan at interest.

OECD Commentary then considers the interest/dividend borderline:

> 19. Interest on participating bonds should not normally be considered as a dividend, and neither should interest on convertible bonds until such time as the bonds are actually converted into shares. However, the interest on such bonds should be considered as a dividend if the loan effectively shares the risks run by the debtor company (see *inter alia* paragraph 25 of the Commentary on Article 10). In situations of presumed thin capitalisation, it is sometimes difficult to distinguish between dividends and interest and in order to avoid any possibility of overlap between the categories of income dealt with in Article 10 and Article 11 respectively, it should be noted that the term "interest" as used in Article 11 does not include items of income which are dealt with under Article 10.

A premium is not UK domestic law interest, but it falls within the treaty definition:

> 20. As regards, more particularly, government securities, and bonds and debentures, the text specifies that premiums or prizes attaching thereto constitute interest. Generally speaking, what constitutes interest yielded by a loan security, and may properly be taxed as such in the State of source, is all that the institution issuing the loan pays over and above the amount paid by the subscriber, that is to say, the interest accruing plus any premium paid at redemption or at issue. It follows that when a bond

> or debenture has been issued at a premium, the excess of the amount paid by the subscriber over that repaid to him may constitute negative interest which should be deducted from the stated interest in determining the interest that is taxable. On the other hand, the definition of interest does not cover any profit or loss that cannot be attributed to a difference between what the issuer received and paid (e.g. a profit or loss, not representing accrued interest or original issue discount or premium, which a holder of a security such as a bond or debenture realises by the sale thereof to another person or by the repayment of the principal of a security that he has acquired from a previous holder for an amount that is different from the amount received by the issuer of the security). Such profit or loss may, depending on the case, constitute either a business profit or a loss, a capital gain or a loss, or income falling under Article 21.
>
> [For para 20.1, see 28.16 (DT relief for AIP income)]
>
> 21. Moreover, the definition of interest in the first sentence of paragraph 3 is, in principle, exhaustive. It has seemed preferable not to include a subsidiary reference to domestic laws in the text; this is justified by the following considerations:
>
> a) the definition covers practically all the kinds of income which are regarded as interest in the various domestic laws;
>
> b) the formula employed offers greater security from the legal point of view and ensures that conventions would be unaffected by future changes in any country's domestic laws;
>
> c) in the Model Convention references to domestic laws should as far as possible be avoided. ...

There is a comment on swaps:

> 21.1 The definition of interest in the first sentence of paragraph 3 does not normally apply to payments made under certain kinds of nontraditional financial instruments where there is no underlying debt (for example, interest rate swaps). However, the definition will apply to the extent that a loan is considered to exist under a "substance over form" rule, an "abuse of rights" principle, or any similar doctrine.

There is a comment on penalties:

> 22. ... Penalty charges, which may be payable under the contract, or by customs or by virtue of a judgement, consist either of payments calculated pro rata temporis or else of fixed sums; in certain cases they may combine both forms of payment. Even if they are determined pro rata temporis they constitute not so much income from capital as a special form of compensation for the loss suffered by the creditor

> through the debtor's delay in meeting his obligations. Moreover, considerations of legal security and practical convenience make it advisable to place all penalty charges of this kind, in whatever form they be paid, on the same footing for the purposes of their taxation treatment.
> ...

Annuity income is not treaty-interest:

> 23. Finally, the question arises whether annuities ought to be assimilated to interest; it is considered that they ought not to be. On the one hand, annuities granted in consideration of past employment are referred to in Article 18 and are subject to the rules governing pensions. On the other hand, although it is true that instalments of purchased annuities include an interest element on the purchase capital as well as return of capital, such instalments thus constituting "fruits civils" which accrue from day to day, it would be difficult for many countries to make a distinction between the element representing income from capital and the element representing a return of capital in order merely to tax the income element under the same category as income from movable capital. Taxation laws often contain special provisions classifying annuities in the category of salaries, wages and pensions, and taxing them accordingly.

See Avery-Jones et al "The Definitions of Dividends & Interest in OECD Model: Something Lost in Translation?" [2009] BTR 406.

26.27.6 *Source of interest for DTA*

Article 11(5) OECD Model provides:

> [a] Interest shall be deemed to arise in a Contracting State when the payer is a resident of that State.
> [b] Where, however,
> [i] the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and
> [ii] such interest is borne by such permanent establishment,
> then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

It is necessary to distinguish:
Treaty-source: the source of interest within this definition
UK domestic-law source: the source of interest under UK domestic law

I refer to interest within art 11(5)[b] as **"PE-interest"**.

OECD Commentary on art 11 (interest) provides:

> 26. [Art 11(5)] lays down the principle that the State of source of the interest is the State of which the payer of the interest is a resident. It provides, however, for an exception to this rule in the case of interest-bearing loans which have an obvious economic link with a permanent establishment owned in the other Contracting State by the payer of the interest. If the loan was contracted for the requirements of that establishment and the interest is borne by the latter, the paragraph determines that the source of the interest is in the Contracting State in which the permanent establishment is situated, leaving aside the place of residence of the owner of the permanent establishment, even when he resides in a third State.
>
> 27. In the absence of an economic link between the loan on which the interest arises and the permanent establishment, the State where the latter [ie, the permanent establishment] is situated cannot on that account be regarded as the State where the interest arises; it is not entitled to tax such interest, not even within the limits of a "taxable quota" proportional to the importance of the permanent establishment. Such a practice would be incompatible with paragraph 5.

The Commentary then considers when (in my terminology) interest counts as PE-interest, ie (in short) when is a loan connected to a PE:

> Moreover, any departure from the rule fixed in [art 11(5)[a]] is justified only where the economic link between the loan and the permanent establishment is sufficiently clear-cut. In this connection, a number of possible cases may be distinguished:
>
> a) The management of the permanent establishment has contracted a loan which it uses for the specific requirements of the permanent establishment; it shows it among its liabilities and pays the interest thereon directly to the creditor.
>
> b) The head office of the enterprise has contracted a loan the proceeds of which are used solely for the purposes of a permanent establishment situated in another country. The interest is serviced by the head office but is ultimately borne by the permanent establishment.
>
> c) The loan is contracted by the head office of the enterprise and its proceeds are used for several permanent establishments situated in different countries.
>
> In cases a) and b) the conditions laid down in [art 11(5[a]] are fulfilled, and the State where the permanent establishment is situated is to be regarded as the State where the interest arises. Case c), however, falls outside the provisions of [art 11(5)[b]], the text of which precludes the

> attribution of more than one source to the same loan. Such a solution, moreover, would give rise to considerable administrative complications and make it impossible for lenders to calculate in advance the taxation that interest would attract. ...

See 107.14 (Effectively connected with PE).

26.27.7 *Contracting state PE*

For the overlap between interest income and business profits, see 107.9.3 (Other business profit overlaps).

26.28 Interest: Pre-1963 DTAs

Pre 1963 DTAs[182] do not provide exemption for interest. They do however provide exemption for industrial or commercial profits.

The treaties are in similar form, so I take the Belize DTA as an example. Art 3(2) Belize/UK DTA provides:

> The industrial or commercial profits of a Belize enterprise shall not be subject to UK tax unless the enterprise is engaged in trade or business in the UK through a permanent establishment situated therein. If it is so engaged, tax may be imposed on those profits by the UK, but only on so much of them as is attributable to that permanent establishment.

This confers relief on interest, provided:

(1) The recipient is a Belize enterprise, defined as "an industrial or commercial enterprise or undertaking carried on by a resident of Belize"[183] (eg a Belize bank).
(2) The recipient is not engaged in trade or business in the UK through a PE in the UK (or if it is so engaged, the interest is not profits attributable to that PE).
(3) The interest is or is part of the "industrial or commercial profits".

A person who makes a simple loan by way of investment does not carry on an industrial or commercial enterprise, and interest on such a loan does not constitute industrial or commercial profits. However a business (such as a bank) which includes lending does constitute an industrial or commercial enterprise and the interest is part of its profits.[184] HMRC agree. The

[182] See 107.24 (Pre-1963 DTAs).

[183] Belize/UK DTA art.2(1)(h).

[184] The issue was discussed in more detail in the 6th edition of this work, and HMRC manual passages dealing with Jersey banks were set out in the 2019/20 edition of

International Manual provides:

> **INTM337310. Background to claims by foreign financial concerns** [Jun 2016]
>
> Under a longstanding practice, a claim by an overseas financial concern for interest which bears the character of income arising from their trading activities or forms part of their trading income may be relieved under the Business Profits Article (provided the Business Profits Article doesn't clearly exclude interest for example Kenya) in either of the following circumstances
>
> - there is no interest article, or
> - the conditions of the interest article are not satisfied.
>
> **INTM337330. How to deal with claims from foreign financial concerns** [Jun 2016]
>
> If you receive a claim or correspondence for income which can be considered under the Business Profits Article as outlined in INTM337310 you should deal with it as follows:
>
> Where there is no interest article in the relevant Double Taxation Agreement (DTA) and the claimant is not trading in the UK through a permanent establishment, exemption may be authorised under the business profits article on form 241(Int-Roys).
>
> Where in such circumstances the claimant is trading in the UK through a permanent establishment, necessitating restriction of relief under that article, and in cases where there is an interest article but claims under it are automatically restricted because the claimant is trading in the UK through a permanent establishment, you will need to consult the Officer dealing with the permanent establishment and arrange for any interest attributable to the permanent establishment to be included in his computation of liability. Form 502 should be used for this purpose. Provided the Officer has no objections the interest can then be exempted under the business profits article using form 241(Int-Roys). You should issue form 501 (amended as necessary) with the Officer's copy of the exemption notice where relief is authorised under the business profits article and there is trading in the UK through a permanent establishment. Where there is no trading through a permanent establishment you need to send a memo with the exemption notice explaining the circumstances in which relief has been authorised.
>
> Note: These provisions do not apply where the rate of relief under the business profits article is more favourable than under the interest article

this work para 21.24.7, but I omit that here as it has become less important as the Channel Island/IoM have moved from their pre-1963 treaties to the OECD model form.

and relief is available under the latter.

INTM337340. Requests to extend the provisions to other income [Jun 2018]

If the claimant asks you to extend the concession to dividends or other distributions you should ask the HMRC office for the permanent establishment (PE) to confirm that

- the payments represent trading income; and
- they are not attributable to the PE.

The reason for doing this is because dividends/distributions, unlike interest and royalties, cannot be brought into the charge to corporation tax on the PE (CTA09/S19).

26.29 DT relief: Withholding tax

26.29.1 *Procedure to obtain DT relief*

The legislation is in Double Taxation Relief (Taxes on Income) (General) Regulations 1970 (which I abbreviate to "DTRR"). Regulation 2(1) provides:

> The following provisions of these Regulations shall have effect where, under arrangements having effect under section 497 ICTA 1970 [now s.2 TIOPA], persons resident in the territory with the government of which the arrangements are made are entitled to exemption or partial relief from UK income tax in respect of any income from which deduction of tax is authorised or required by the Income Tax Acts.

This applies where interest qualifies for DT relief.

Regulation 2(2) provides exemption from withholding tax:

> Any person who pays any such income (referred to in these Regulations as "the UK payer") to a person in the said territory who is beneficially entitled[185] to the income (such person being referred to in these Regulations as "the non-resident") may be directed by a notice in writing given by or on behalf of the Board that in paying any such income specified in the notice to the non-resident he shall—
> (a) not deduct tax, or
> (b) not deduct tax at a higher rate than is specified in the notice, or
> (c) deduct tax at a rate specified in the notice instead of at the lower[186] or basic rate otherwise appropriate;

[185] See App. 6.2 (English-law beneficial ownership).

[186] The rate "otherwise appropriate" is always the basic rate, never the lower rate; the drafter has failed to amend the wording of the regulation to keep up with the changes to tax rates in 2008. But no harm arises from this error.

> and where such notice is given, any income to which the notice refers, being income for a year for which the arrangements have effect, which the UK payer pays after the date of the notice to the non-resident named therein shall, subject to the following provisions of these regulations, be paid as directed in the notice...

I refer to this as a **"DTRR notice"**.

Gross payment of interest under the terms of a treaty is permitted only if a direction has been given to the payer under the DTR Regulations.[187]

Regulations 3 DTRR dots some *i*'s and cross some *t*'s:

> 3. Where a notice given under Regulation 2(2) directs the UK payer to deduct tax at a rate specified in the notice, the provisions of the Income Tax Acts under which he would, but for the notice, have been chargeable with or liable to account for all or part of any tax deducted at the [lower or basic] rate shall apply as if those Acts required him to deduct tax at the rate so specified.

26.29.2 *Revocation of DTRR notice*

Of course, a notice is revocable. Regulation 8 DTRR provides:

> Any notice given under Regulation 2(2) may be expressed to become ineffective if certain specified events happen, or, whether so expressed or not, may be cancelled by a notice of cancellation given by or on behalf of the Board, and if to the knowledge of the UK payer any of those events happens or if such notice of cancellation is given, any payment made to the non-resident by the UK payer after the happening of that event becomes known to the UK payer or after the receipt of that notice, as the case may be, shall be subject to deduction of tax in accordance with the Income Tax Acts.

26.29.3 *DTRR notice issued in error*

Regulations 5 DTRR provides:

> 5 The UK payer shall not, in respect of any payment, be charged with or liable to account for any tax which, but for a notice given under Regulation 2(2), he would have been required by the Income Tax Acts

[187] This is self-evident, but if authority is needed, see *Hargreaves Property Holdings Ltd v HMRC* [2023] UKUT 120 (TCC) at [52]-[57]. The use of the word "may" in para 2(2) DTRR is only saying that HMRC have the power to give a direction under the regulations. It is not saying that gross payment may be made even in circumstances where that power is not exercised.

> to deduct and account for on making the payment but in compliance with the notice has not deducted.

Regulation 9 DTRR provides:

> If it is discovered after a notice has been given under Regulation 2(2) that the non-resident is not entitled to exemption or partial relief from tax in respect of income referred to in the notice, any tax which, but for the notice, would have been deductible from any payment made to the non-resident by the UK payer but in compliance with the notice has not been so deducted—
>
> (a) may be assessed on the non-resident under Case VI of Schedule D by an Inspector, or
>
> (b) shall, if a direction to that effect is given by or on behalf of the Board, be deducted by the UK payer out of so much of the first payment made to the non-resident after the date of the direction as remains after the deduction of any tax deductible therefrom under the Income Tax Acts, and any balance which cannot be deducted out of the first such payment shall be deducted, subject to the same limitation, out of the next such payment, and so on until the whole of the tax (the amount of which shall be specified in the direction) has been deducted.
>
> Any tax which the UK payer is required to deduct under paragraph (b) of this Regulation shall be accounted for as if it was tax deductible under section 53 of the Income and Corporation Taxes Act 1970 in respect of the payment from which it is deducted.

The UK payor is not at personal risk from complying with a mistaken notice, but the non-resident payee is at risk of assessment directly.

26.30 Obtaining a DTRR notice

There are two methods to obtain a DTRR notice not to pay WHT: the certified claim route and the DTT passport scheme.

26.30.1 *Certified claim*

The DTTP consultation paper provides:

> This process can be cumbersome for overseas lenders, as a Direction needs to be issued for each loan, and in each case HMRC requires the overseas lender to obtain proof of their residence for tax purposes from their own fiscal authority. This is known as the "certified claim" method. If an overseas lender makes multiple loans to the UK it needs to go through this process each time before HMRC will issue a Direction to

each borrower in the UK.[188]

26.30.2 *Partnership lender*

HMRC say:

> In deciding whether or not HMRC Residency should exercise its discretion in meeting an application for relief at source [ie an application to pay interest without deduction], it must primarily have regard to the risk that the underlying conditions for relief might change over the lifetime of a Direction (which will normally last no longer than five years). Such changes might remove the basis for relief altogether, or in some other way prejudice the amount of tax that the UK is otherwise properly entitled to receive in that period.
>
> Given its duty of care to the UK Exchequer and taxpayer, HMRC Residency have to give particular consideration to the desirability of giving DT treaty relief where transparent concerns such as partnerships and LLCs are concerned. This is because, more often than not, there is a much higher risk that the beneficial owners of such concerns will change. Or that there will be fluctuations in income or profit apportionment that might erode the amount of UK-source income that is attributable to the DT treaty-resident beneficial owners who were identified at the time the application for relief at source was made.
>
> Attention is drawn to the undertaking sought from claimants in the Declaration (Part F of the US/Company 2002) that they will notify HMRC Residency of any changes in the information given on the form. (A similar warning to notify any material changes is given to a UK payer when a Direction is issued to it.)
>
> Without calling into question the good faith of partnership or LLC claimants who give these undertakings, HMRC Residency considers that the problem of monitoring this aspect is particularly acute where there are a very large number of investors, or there is an unfeasible number of layers of participation - partners who are themselves partnerships, which contain yet more transparent partners.
>
> For these reasons, although HMRC Residency is willing to entertain any application for relief at source from partnerships or LLCs, it should be understood that it is likely to give relief in this way chiefly where:
>
> * HMRC Residency are able to accept satisfactory assurances about the monitoring and notification of membership from the claimant concern.
> * The number and type of the concern’s membership is not a problem in the first place - for example, a small and fixed number of participators, such as US corporations engaged in a joint venture. Or where the concern is the business arm of a small number of joint intellectual property owners such as a band or similar collaborative venture.
> * In response to a successful representation of special considerations or factors that would allow us to decide that relief may safely be given in this form.
>
> Each case will be considered on its merits.

[188] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/525399/Double_Taxation_Treaty_Passport_scheme_review.pdf* para 1.4

> Otherwise, HMRC Residency will consider giving relief only by meeting discrete repayment claims.[189]

Although this comment is made in relation to the USA DTA, it should apply to partnerships generally. On the other hand, it applies only to American LLCs (which are treated as transparent under the US DTA).

26.30.3 *Debtor outside UK*

HMRC Residency Double Taxation Guidance Note 1 deals with applications for relief at source on interest payments where the borrower is outside the UK:

> This Guidance Note explains how HMRC Residency Nottingham handles applications for relief at source from UK income tax under a double taxation treaty in respect of interest payments where both lender and borrower are outside the UK.
>
> [After some general comments on the law the note continues:]
>
> In its consideration of an application for relief at source in such circumstances, HMRC Residency must be satisfied that all the elements necessary to give relief are present. In the circumstance where the payer of the interest is not situated in the UK, HMRC Residency will need satisfactory evidence that the payer has concluded that the payments are to be considered as UK-source and has formed the intention of deducting and accounting for tax accordingly.
>
> HMRC Residency's claim forms ask claimants to attach copies of relevant loan documentation as part of the normal process. In cases such as those discussed in the previous paragraph, HMRC Residency would also ask claimants to enclose supporting evidence confirming the payers' intentions. This could, for example, be copies of pertinent correspondence with the borrower or other relevant documentation.
>
> Without the comfort afforded by such supporting documentation, HMRC Residency may well take the view that it should not exercise its discretion under SI 1970/488 to authorise relief at source.
>
> However, it would then be open to the non-resident payee to make a repayment claim to HMRC Residency once the interest payments have commenced and tax has been deducted. HMRC Residency will be prepared to keep the application for relief at source open and on file pending this eventuality. If the non-resident payee is then able to forward a certificate of tax deducted completed by the payer, HMRC Residency

[189] "HMRC Residency Double Taxation Guidance Note 3 partnerships and LLCs claiming relief under the 2002 UK/USA DTC."

> may then be able to accept that the UK source categorisation of the payments has been established. Assuming that all the other conditions for Double Taxation treaty relief are present, HMRC Residency should then be in a better position both to repay the tax deducted and consider in a more positive light the appropriateness of issuing a Direction under SI 1970/488 for future payments.[190]

This is the most absurd procedure which could be imagined, for in many cases the payor will want to argue that the interest is not UK source but (since one can rarely[191] be sure) will want a direction to pay gross as a safeguard. Perhaps no-one takes any notice of it in practice.

26.31 DTT passport scheme

The DTTP scheme is intended to streamline the procedure for obtaining a DTRR notice.

The scheme is explained in:

HMRC, "Double Taxation Treaty Passport Scheme" (2017) ("DTTP")[192]
HMRC, "DTTP Scheme: Technical questions and answers" ("DTTP Q&As")[193]

The background can be found in HMRC consultation and response papers:[194]

Double Taxation Treaty Passport scheme review (2016)
Double Taxation Treaty Passport scheme review consultation response (2017)

HMRC, "Double Taxation Treaty Passport Scheme" provides:

[190] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/606556/Double_Taxation_Treaty_Passport_Scheme_-_Terms_and_Conditions_and_Guidance.pdf*

[191] The guidance note states complacently that "The meaning of UK-source in this context will not normally give rise to difficulties." The author has not read the HMRC consultation paper on interest which says: "The current tests in UK law of whether … payment of interest is made from a UK source are unclear and cause confusion." See 26.15.1 (Source of interest: Critique).

[193] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/525399/Double_Taxation_Treaty_Passport_scheme_review.pdf*

[194] *https://www.gov.uk/government/consultations/double-taxation-treaty-passport-scheme-review*

DTTP30000 Introduction and general purpose

The Double Taxation Treaty Passport (DTTP) Scheme is an administrative simplification designed to assist certain foreign lenders in accessing reduced withholding tax rates on interest that are available within the UK's tax treaties with other territories. The scheme is available to all UK borrowers who are required to withhold income tax at the basic rate on certain loan interest payments to overseas lenders.

The scheme is administered by the Double Taxation Treaty Team, who can be contacted at HM Revenue & Customs, DT Treaty Team, Barkley House, Castle Meadow Road, Nottingham, NG2 1BA.

The scheme allows certain overseas lenders to be recognised by HMRC as residents of countries with which the UK has double taxation treaty. Proof of this recognition will be the granting of the status as "treaty passport holder".

Loans dealt with under the scheme can, subject to a direction issued by HMRC, be paid with deduction of withholding tax at the rate specified in the relevant treaty.

The scheme exists as an alternative to the certified claim method for reclaiming tax withheld. This method remains available for those lenders not using the DTTP scheme. Guidance on certified claims is available at

https://www.gov.uk/guidance/double-taxation-relief-for-companies

DTTP30010 Commencement of new rules

Prior 6 April 2017 the scheme was restricted to overseas corporate lenders and UK corporate borrowers.

As announced at Spring Budget 2017 the Government extended the scheme for loans entered into on or after 6 April 2017 - the following are key elements:

- The scheme will be made available to all UK borrowers that have an obligation to deduct withholding tax, including UK partnerships, individuals and charities.
- Transparent entities (including partnerships) will be admitted to the scheme as lenders where all of the constituent beneficial owners of the income are entitled to the same treaty benefits under the same treaty.
- Sovereign wealth funds and pension funds who are utilising withholding tax treaty rates will be admitted into the scheme as lenders.

DTTP30020 Overview

An eligible lender will make an application to HMRC to be awarded passport holder status A passported lender will provide the borrower with its Passport number, and the relevant rate at which it believes income tax should be withheld.

HMRC will review the application by the borrower to withhold income tax at the relevant treaty rate, and if the conditions for relief are met it will issue a Direction for the borrower to do so

DTTP30100 Overview of lender eligibility

All corporate entities and certain transparent entities may, following a successful application, be admitted to the DTTP scheme as lenders.

Transparent entities are eligible to apply under the scheme only if all of the constituent ultimate beneficial owners of the income are entitled to the same treaty benefits under the same treaty.

So any entity who is currently entitled to make use of the certified claim procedure on its own account will be able to apply for a passport under the DTTP scheme unless otherwise excluded.

HMRC retains full discretion on whether to admit these entities to the scheme.

26.31.1 *Corporate lender*

DTTP provides:

DTTP30110 Corporate entities
Any overseas corporate entity – or concern treated by its country of residence as a corporate body for tax purposes - is entitled to apply for a treaty passport as a lender.
A separate passport is needed for each entity in a group, and there are no 'group passports' which can be used at group level.
DTTP30120 Branches and permanent establishments
Where, for double taxation treaty purposes, HMRC regards a branch as being indistinguishable from its head office, then the double taxation arrangements the UK has with the country of residence of that head office governs what relief from UK withholding tax might be available to interest paid to the branch.
That being the case, if a loan is suitable for treaty passport treatment when made by the head office, then it can be considered as so eligible when made by a branch, subject to it meeting all other treaty passport criteria for suitability and any tests (such as subject to tax in the head office residence country) laid out in the relevant double taxation treaty relied on to obtain relief.

26.31.2 *Transparent lender*

DTTP provides:

DTTP30130 Transparent entities including partnerships
Transparent entities can participate in the scheme as lenders if all of the ultimate constituent beneficial owners of the income are entitled to the same treaty benefits under the same treaty.
Overseas partnerships are entitled to apply for a treaty passport, but only where all partners are resident in the same jurisdiction and entitled to the same treaty benefits.
When applying for a treaty passport, a partnership should nominate a partner to be responsible for corresponding with HMRC regarding the passport and notifying any relevant changes.

26.31.3 *S corp/LLC lender*

DTTP Q&As provides:

A United States multi-member LLC which has elected under 'check the box' to be taxed on a simple corporate basis is eligible to apply for and use a passport, as it meets the criteria of both Article 3(1)(b) of the UK/USA Double Taxation Convention and paragraphs 1 and 3 of the Treaty Passport Scheme Terms and Conditions.

That seems self-evident.

HMRC is also prepared to consider issuing a passport to a US LLC which is wholly owned by a US corporate single member, and which is treated for US tax purposes as a disregarded entity, fiscally indistinguishable from its parent.
Although US S-corporations are required to file separate US income tax returns they are

(in broad terms) required to determine and allocate 'tax attributes' (linked to business profits) to their individual owners proportionate to their share ownership; these tax attributes are then brought into account in assessing that owner's overall tax exposure.
Drawing a general analogy with the circumstances of a disregarded entity LLC, HMRC will consider issuing a passport to an S-corporation which is owned by a single US corporate owner, with the entirety of the tax attributes of the S-corporation thus attracted to that single owner.

26.31.4 *Sovereign/pension fund lender*

DTTP provides:

DTTP30140 Sovereign wealth funds and pension funds
Sovereign investors and pension funds who are utilising treaty withholding tax rates may participate in the scheme if the ultimate beneficial owner of the income is entitled to the same treaty benefits under the same treaty.
This process is separate from, and has no impact on, the process for making a claim relating to sovereign immunity.
HMRC will accept applications made by the trustees of the pension fund in their capacity as representatives of the fund's members. A copy of the Pension Trust Deed should be provided in support of the application.

26.31.5 *Syndicated loan (joint lenders)*

DTTP provides:

DTTP30160 Syndicated loans
A syndicate as such cannot be a treaty passport holder. Where the syndicate has chosen to be treated as an entity under the Syndicated Loan Scheme ("SLS"), formerly the Provisional Treaty Relief Scheme, it will be the syndicate manager who conducts the syndicate's dealings with HMRC. Possession of a passport by the overseas lender will help the syndicate manager to judge the availability of double taxation relief available to the syndicate as a whole.
If passport holders are lending members of a syndicate that is outside the SLS, then it is open to them to make use of their passport in substitution for a certified claim (assuming the satisfaction of all relevant DTTP scheme conditions – for example, beneficial ownership where relevant). The UK borrower must then tell HMRC of that use with a DTTP2 notification, leading to the issue of a Direction enabling relief at source on the interest payments to that passport holder.
Overseas lending members of a non-SLS syndicate that do not possess a passport will need to make a certified claim in the normal way.
Where a UK borrower has a loan facility with multiple lenders, and frequent buying into or trading of debt-right, then HMRC recognises that individual DTTP2 notifications may place an undue compliance burden on that borrower. As a consequence, HMRC is willing to consider entering into arrangements with that borrower whereby these individual notifications can be swept up into a monthly consolidated DTTP2A notification. This will still require a passport holder to follow the standard DTTP procedure with the borrower - for example, specifying the rate of double taxation relief it considers itself entitled to - but in a modified form appropriate to the borrower's circumstances. UK borrowers

wishing to enter into such arrangements with HMRC should contact: HM Revenue & Customs, LBS DT Treaty Team, Barkley House, Castle Meadow Road, Nottingham, NG2 1BA, telephone 03000 547584.

26.31.6 *Transfer of loan*

DTTP provides:

DTTP30170 Secondary loan market
Acquisition of a loan by a third party may create a new payer/payee relationship between the UK borrower and the overseas acquirer of the loan.
Where a passport holder acquires a loan for which withholding tax is due on the interest payments, they will be eligible to use the scheme in the normal way where all other requirements are met.

26.32 DTTP scheme: Guarantors

DTTP provides:

DTTP30180 UK guarantors
The exposure of a guarantor of a debt will be contingent on whether it will be called on to act on that guarantee in the case of default by the principal debtor, and assume the responsibility for making interest payments. Any payments not categorised as interest will not be subject to withholding tax and therefore not come into consideration in a treaty passport context.
In the case of such default, a new payer/payee relationship can then be said to exist between the guarantor and the overseas owner of the debt-right, which can then expose the guarantor to a withholding tax obligation. While the loan arrangements giving rise to the guarantee might have existed for some time, and was contracted with a UK borrower other than the guarantor, for the purposes of the DTTP scheme HMRC regards the date from which the guarantee is called upon (and the guarantor assumes liability for payments) as the beginning of a new loan relationship amenable to the use of a passport.
On this footing, and conditional on the guarantor and overseas lender otherwise meeting the conditions of the scheme, and absent any resulting changes in the overseas owner of the debt-right, the latter may make use of its passport in substitution for a certified claim in the usual way.
This is subject to there being no bar to the use of the passport found elsewhere in the DTTP scheme terms and conditions and guidance.

26.33 DTTP scheme: Application process

DTTP provides:

DTTP30200 Application process
Applications for passport holder status are made using a form DTTP1, which is available online for download and postal submission. Applicants must obtain a certificate of residence from the overseas tax authority where they are resident. This residence certificate should have been issued within the last 12 months.
If accepted onto the scheme, each passport holder is given a unique identifying reference number to be used in all DTTP scheme correspondence.

Passports are valid for a period of 5 years, after which point they may be renewed.

The consideration and acceptance of an applicant's request for passport holder status shall be entirely at the discretion of HMRC.

DTTP30300 Register of passport holders

A register of recognised passport holders is kept by HMRC and is available to the general public to verify a passport holder's status. Included on this register is the name of the lender, their unique DTTP scheme reference number and country of residence.

In participating in the DTTP scheme, passport holders agree that HMRC may publish their name and DTTP scheme identification details in the register. A lender can use the certified claims method for obtaining treaty relief to avoid the publication of their details.

26.33.1 *Conditions for use*

DTTP provides:

DTTP30400 Conditions for use

A passport holder will enter into a loan making use of the DTTP scheme only where all conditions for relief under the relevant double taxation arrangements are satisfied.

This will include (but not be restricted to) factors such as:

- where being subject to tax in the passport holder's country of residence is required
- where relief is restricted only to the amount of income remitted to that country of residence (where it is not intended to remit the entirety, then the DTTP scheme will not be available or used)
- where the passport holder cannot reasonably demonstrate that it is the beneficial owner of the interest (in the international fiscal meaning of that term), and where this is a requirement for relief.

HMRC reserves the right not to apply the DTTP scheme facility to a particular loan, in which eventuality it will notify both lender and borrower as early as possible.

26.33.2 *Change of circumstances*

DTTP provides:

DTTP30410 Material changes to lender circumstances

A passport holder will be obliged to notify HMRC if there are any material changes to its form or circumstances.

Examples of material changes include the following:

- a change in its correspondence address
- a change in its business form (such as following a merger)
- a change of its name
- a change in its country of residence
- for non-corporate entities, any changes in the country of residence of any of its constituent members
- for non-corporate entities, any changes in its underlying constituent membership
- any other change of circumstance which would potentially require HMRC's consideration when issuing a passport

Failure to do this may result in the suspension or revocation of passport holder status, at HMRC's discretion.

DTTP30420 Material changes to a loan or its ownership

In certain circumstances, where there is a material change in the terms or ownership of a loan subject to a direction, the lender should notify HMRC to ensure that relief-at-source can continue to apply.

As a general rule, and assuming that all relevant treaty passport criteria are met, if a claim form would previously have been necessary to notify HMRC of a material change in the terms of a loan then lenders may use the treaty passport process instead.

Specifically, this can cover:

- Changes in material circumstances in the lifetime of a Direction. Guidance on what constitutes a material change can be found in DT Guidance Note 2 (reproduced as Appendix C of this guidance).
- Contractual extensions of a loan (being an instance of such a material circumstance).
- The sale or assignment of a loan. If the loan commenced before 06 April 2017 (the date the new DT Treaty Passport scheme rules commenced) and is sold or assigned after that date, HMRC will for passport purposes treat the date of sale or assignment as being the date the loan commenced.
- 'UK-source' applications dealt with by DT Guidance Note 1 (reproduced as Appendix B of this guidance) and allowed for under the DTTP scheme's terms and conditions - (where the borrower believes that it would be liable to UK withholding tax on interest payments).

Where the existing or new lender is a passport holder; a borrower may then submit a DTTP2 notification in place of a claim form (certified or otherwise) from the lender that would otherwise be required.

Lenders should consider all Guidance Notes mentioned above before applying for relief at source through the treaty passport route, as compliance with them will still be incumbent to the parties to a loan.

So far as changes, extensions and transfers of debt-right are concerned HMRC would expect lenders to take particular care to judge whether the material changes involved are potentially of such a nature as would prudently merit a fresh claim or passport application (where, for example, the passport holder's name has changed).

This is a matter for the parties to the transaction to weigh up for themselves, having regard to factors including (but not limited to) the commercial terms of the new or extended loan relationship, and any cross-ownership or community of interest relationship between the parties to a deal.

In regard to the above HMRC reserves power of discretion at all times to ensure that the scheme is used appropriately.

26.33.3 *Securitisation*

DTTP provides:

DTTP30430 Securitisation of contractual debt

In certain circumstances HMRC will accept the use of the DTTP scheme process by a passport holder purchasing or acquiring securitised contractual debt-rights, such as a portfolio of poor performing or toxic debts. The circumstances HMRC is willing to extend the use of the treaty passport facility are:

- the purchase or acquisition of the debt-right by the passport holder is effected in a single transaction, and

- interest payments are gathered in and paid on under a single asset management agreement.

Particular regard should be had as to whether the basic conditions of the DTTP scheme are met, especially concerning beneficial ownership considerations (where pertinent to the availability of relief), by the parties to these sorts of transactions in judging whether the use of a treaty passport is appropriate

26.33.4 *HMRC reviews*

DTTP provides:

DTTP30440 HMRC's right to review passport holder and loan information

It is a requirement of the DTTP scheme that passport holders co-operate with HMRC when it conducts a review of lender status or any other aspect of the scheme. This means providing HMRC with all information requested in connection with such a review.

That co-operation shall extend to providing HMRC with copies of loan documentation, information about any loans entered into using a treaty passport and any other information requested.

The passport holder may be specifically required to provide a schedule of 'passported' loans contracted by it within a specified period; that schedule identifying the UK borrowers, dates of loans and amounts lent.

26.33.5 *Process for borrowers*

DTTP provides:

DTTP30500 Eligibility – borrowers

For loans entered into on or after 06 April 2017 the DTTP scheme may be used to obtain double taxation treaty relief on UK loan interest payments made by any UK resident borrower (or any non-UK resident borrower with UK source income) obliged to withhold income tax under section 874(2) Income Tax Act 2007.

For loans entered into between 1 September 2010 and 5 April 2017 only loan interest payments made by UK corporate borrowers (or non-UK resident borrowers with UK source income) fell within the scheme, subject to the old terms and conditions (see DTTP31000).

DTTP30600 Entering into a passported loan

Simply entering into a loan with a passport holder does not automatically allow the borrower to withhold tax at the treaty rate when making interest payments: the borrower must also notify HMRC that they have entered into the loan using form DTTP2.

DTTP30610 DTTP2 process

Once in possession of a treaty passport, a passport holder then has the potential to enter into a loan agreement that can be dealt with under the DTTP scheme.

The passport holder should in that case provide the borrower with its DTTP scheme reference number (verifiable by reference to the online register of passport holders), and specify the rate of relief applicable under the relevant double taxation treaty in force, so that the UK borrower (or foreign borrower with UK-source interest payments) can enter these details into the DTTP2 notification to HMRC.

The DTTP2 form can be accessed via the Gov.uk website. Borrowers have the option of printing the form and posting it, or of submitting it online.

On receipt of their online submission acknowledgement, borrowers who submit the DTTP2 online may, if they wish, provisionally withhold at the relevant treaty rate in advance of receiving a formal Direction.

If a UK resident borrower (or any non-UK resident borrower with UK source income) applies the wrong rate of relief, they will be obliged to make any corrective payments to HMRC.

HMRC reserves the right not to apply the DTTP scheme facility to a particular loan. In this eventuality the lender and borrower should be notified as soon as possible.

DTTP30630 Directions to pay tax under treaty rate

If on receipt of a DTTP2 form HMRC will check if all conditions for relief under the relevant double taxation treaty are met, the borrower will be sent a Direction under Regulation 2 SI 1970/488, instructing them to either to

- not deduct tax, or;
- not deduct tax at a higher rate than is specified in the notice, or
- deduct tax at a rate specified in the notice instead of at the lower or basic rate otherwise appropriate

The Direction will specify the period it is valid for. This will usually be no longer than 5 years.

DTTP30640 Consequences of failure to notify HMRC of entry into a passported loan

If the UK resident borrower (or non-UK borrower with UK source income) does not notify HMRC that they have entered into a loan from a passport holder that they consider to be a passported loan, they will be required to withhold tax at the basic rate regardless of the passport holder's status.

HMRC reserves the right to request payment of tax and/or interest in such cases.

If the UK borrower does not send a DTTP2 notification to HMRC before the first interest payment, then HMRC can give no assurance that any Direction will be issued in time to be applied to a particular interest payment.

The UK borrower may therefore not get a Direction before it has to make interest payments.

If HMRC is unable to issue a Direction before a particular interest payment is made, the borrower must fulfil its legal obligation to withhold tax, and the passport holder will need to make a certified repayment claim (see DTTP30650).

DTTP30650 Repayments of withholding tax

A claim for repayment of tax shall be made by the passport holder in writing and should include the name of the borrower, date(s) of payment, gross amount(s), amount of tax deducted and repayment instructions.

DTTP30700 Renewals

When granted, a passport will be valid for 5 calendar years from the date of granting.

A passport may be renewed on application to HMRC by letter to HM Revenue & Customs, LBS DT Treaty Team, Barkley House, Castle Meadow Road, Nottingham, NG2 1BA, not less than 3 months before the date of expiry.

If there have been no material changes since the original passport is granted then the passport will be renewed for a further 5 year period subject to HMRC conducting necessary checks. If an application for renewal is not received by the expiry date, then passport holder status shall be withdrawn.

Lenders will take full responsibility for ensuring that renewal applications are made timeously.

DTTP30800 Sanctions for misuse

A passport holder found to be in breach of these terms and conditions may, depending on the gravity of any breach:

- receive a formal warning that a further breach may result in the suspension or removal of their passport status; or
- have their passport status suspended for a fixed period, said period being entirely at the discretion of HMRC; or
- have their passport holder status removed, said removal and any conditions which may be attached thereon, being entirely at the discretion of HMRC.

Determination of whether a breach of these terms and conditions has taken place will be entirely at the discretion of HMRC.

DTTP30810 Effects of cancellation of a passport on an existing Direction

In the event of a lender's passport holder status being withdrawn, the borrower can rely on a Direction in the usual manner unless informed otherwise by HMRC in a notice of cancellation. The content and issuing of a notice of cancellation is entirely at the discretion of HMRC.

For the avoidance of doubt, the loss of passport holder status by a lender will not of itself be viewed as a material change invalidating a Direction.

In a connected party lending scenario, the borrower may be liable to withhold tax if it knew, or might reasonably be expected to know, that the passport holder did not qualify for relief.

DTTP30900 Interaction with other provisions

The DTTP scheme is distinct from Council Directive 2003/49/EC (EU Directive on Interest and Royalties) and s.888A ITA 2007 and SI 2015/2002 (Private Placement legislation).

For the avoidance of doubt the DTTP scheme is an administrative simplification within existing legislation covering withholding tax on payments overseas that are relievable under double taxation treaties, namely s.874 ITA 2007 (as may be amended or re-enacted) and SI 1970/488.

Accordingly the DTTP scheme should not be used in relation to withholding tax in respect of the legislative provisions such as those mentioned above.

...

26.33.6 *Change of circumstances*

DTTP provides:

DTTP31200 Appendix C – Double Taxation Guidance Note 2

Changes of name and business account details during the lifetime of a Double Taxation relief at source

This Guidance Note explains how changes in payer and payee name and business details may affect the validity of an existing Direction for UK payers to make payments of interest/royalties to non-UK residents which incorporate double taxation treaty relief. It sets out the circumstances in which such changes can trigger the need for a fresh application for relief at source from the non-resident.

Background

Under Chapter 3 of Part 15 Income Tax Act 2007 ... there is a general obligation on UK payers of interest and royalties to deduct and account for tax at a stipulated rate to HMRC.

HMRC Residency has the discretion to give Double Taxation (DT) treaty relief at source by directing, under Regulation 2 of SI 1970 No. 488, a UK payer of relievable income to make subsequent payments either without deducting income tax at the statutory rate, or by deducting an amount specified by reference to the DT treaty appropriate to the country of residence of the payee.

In the absence of a Direction, or where it may be reasonably inferred that an existing Direction has become invalid by reference to the conditions under which it was issued, the UK payer is bound to deduct and account for tax in the normal way. Failure to do so may result in the UK payer being assessed for the tax that should have been deducted from the payments in question and being charged to interest and penalties.

Both the UK payer and the non-resident payee are specifically named and identified, using the information supplied to HMRC Residency in the application for treaty relief.

The Direction itself clearly states that it will 'cease to have effect if ... the recipient of the income changes...' In strictness this means the Direction would become invalid by any change in the name or details, no matter how minor, of the account to which payments are being made by the UK payer.

That can't be correct. But the point will not often arise.

Compliance issues

Whilst HMRC Residency has to fulfil its obligations to protect the UK Exchequer and taxpayer, it seeks to keep the compliance and administrative work required from its customers to a minimum.

Changes in the name and business details of either the UK payer or the non-resident payee may signify a more fundamental change to the basis on which DT treaty relief was authorised in the first place. And this could mean that relief is either no longer available or that the terms under which the Direction was issued must be reconsidered.

The key issue that HMRC Residency must have regard to is whether there has been any change in the underlying beneficial ownership of the income in question, and of the relationship between the beneficial owner(s) and the UK payer, that could prejudice the basis on which treaty relief was initially authorised.

The HMRC Residency approach

HMRC Residency adopts the following broad tests in deciding what further action is appropriate where there have been changes in the name and business details of either the UK payer or the nonresident payee.

Changes affecting the UK payer

- If the UK payer changes its name with no change of ownership it will be unable to rely upon the cover of the existing Direction, which was issued to it under a different name. But if it advises of the change, HMRC Residency is willing to consider issuing a replacement Direction in the new name of the payer without a fresh application from the non-resident payee.

Reasoning: the assumption is that a superficial (and thus non-material) change only has taken place.
