(ad) in the case of an account to be delivered by a person within subsection (1)(c) above [Trust IHT],	before the expiration of the period of six months from the end of the month in which the occasion concerned occurs;
(b) in the case of an account to be delivered by a person within subsection (2) above [No PRs within 1 year],	before the expiration of the period of three months from the time when he first has reason to believe that he is required to deliver an account under that subsection;
(c) in the case of an account to be delivered by any other person,	[i] before the expiration of the period of twelve months from the end of the month in which the transfer is made [ii] or, if it expires later, the period of three months beginning with the date on which he first becomes liable for tax.[22]
(7) A person liable for tax under section 32, 32A, 79 or 126 above or under Schedule 5 to this Act shall deliver an account under this section	before the expiration of the period of six months from the end of the month in which the event by reason of which the tax is chargeable occurs.

125.7 Excepted estate

The law is in the IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004, which I abbreviate to EER.

This chapter sets out the law for deaths before 1 January 2022. Reporting for deaths from that date will be affected by the IHT (Delivery of Accounts) (Excepted Estates) (Amendment) Regulations 2021, and I will update in due course.

[22] Different rules apply where there is a s.267ZA spouse election; see 5.14.11 (IHT payment/return dates).

125.7.1 *"Excepted estate"*

The legislation distinguishes between:

(1) "**Excepted estates**" and

(2) **"Standard estates"** (my term for a non-excepted estate)

Regulation 4(1) EER 2004 provides:

> An excepted estate means the estate of a person immediately before his death in the circumstances prescribed by paras (2), (3) or (5).

There are three categories of excepted estate:

Para	**Requirements (in short)**	**See para**
4(2)	Low value estate	125.7.4
4(3)	IHT spouse /charity exemption	125.7.5
4(5)	Non-domiciled deceased	125.7.7

Before considering these, it is helpful to deal with some definitions.

125.7.2 *"Specified transfer"*

Regulation 4(6) EER 2004 provides the definition:

> For the purposes of paragraphs (2) and (3)—
> "specified transfers", subject to paragraph (7A), means chargeable transfers made by a person during the period of seven years ending with that person's death where the value transferred is attributable to—
> (a) cash;
> (b) personal chattels or corporeal moveable property;
> (c) quoted shares or securities; or
> (d) an interest in or over land, save to the extent that
> [i] sections 102 and 102A(2) of the Finance Act 1986 apply to that transfer or
> [ii] the land became settled property on that transfer

125.7.3 *"Specified exempt transfer"*

Regulation 4(6) EER 2004 provides the definition:

> "specified exempt transfers" means transfers of value made by a person during the period of seven years ending with that person's death which are exempt transfers only by reason of—
> (a) section 18 (transfers between spouses or civil partners),
> (b) section 23 (gifts to charities),
> (c) section 24 (gifts to political parties),

> (d) section 24A (gifts to housing associations),
> (e) section 27 (maintenance funds for historic buildings, etc), or
> (f) section 28 (employee trusts) of the 1984 Act.

125.7.4 *Low value estate*

Regulation 4(2) EER 2004 provides:

> The circumstances prescribed by this paragraph are that—
> (a) the person died on or after 6th April 2004, domiciled in the UK;
> (b) the value of that person's estate is attributable wholly to property passing—
> (i) under his will or intestacy,
> (ii) under a nomination of an asset taking effect on death,
> (iii) under a single settlement in which he was entitled to an interest in possession in settled property, or
> (iv) by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination;

If the estate includes GWR property, it will not meet condition (b).

> (c) of that property —
> (i) not more than £150,000 represented value attributable to property which, immediately before that person's death, was settled property; and
> (ii) not more than £100,000 represented value attributable to property which, immediately before that person's death, was situated outside the UK;
> (ca) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions applies;
> (d) subject to paragraph (7A), that person died without having made any chargeable transfers during the period of seven years ending with his death other than specified transfers where, subject to paragraph (7), the aggregate value transferred did not exceed £150,000; and
> (e) the aggregate of—
> (i) the gross value of that person's estate,
> (ii) subject to paragraph (7), the value transferred by any specified transfers[23] made by that person, and
> (iii) the value transferred by any specified exempt transfers made by that person,

[23] See 125.7.2 ("Specified transfer").

did not exceed the IHT threshold.[24]

For this purpose BPR/APR is disregarded, so an IHT Account is in principle needed on the death of a person holding UK business property, even though it qualifies for 100% relief.[25]

125.7.5 *IHT spouse/charity exemption*

Regulation 4(3) EER 2004 provides:

> The circumstances prescribed by this paragraph are that—
> [Paras (a)(b) are the same as reg 42(a)(b) and need not be set out again]
> (c) of that property—
> (i) subject to paragraph (8),[26] not more than £150,000 represented value attributable to property which, immediately before that person's death, was settled property; and
> (ii) not more than £100,000 represented value attributable to property which, immediately before that person's death, was situated outside the UK;
> (ca) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions applies;
> (d) subject to paragraph (7A), that person died without having made any chargeable transfers during the period of seven years ending with his death other than specified transfers[27] where, subject to paragraph (7), the aggregate value transferred did not exceed £150,000;
> (e) the aggregate of—
> (i) the gross value of that person's estate,
> (ii) subject to paragraph (7), the value transferred by any specified transfers made by that person, and
> (iii) the value transferred by any specified exempt transfers made by that person,
> did not exceed £1,000,000;
> (ea) the total value transferred on that person's death by a spouse,

[24] "IHT threshold" is elaborately defined in reg 5A EER 2004.

[25] See 125.7.8 (BPR/APR).

[26] Regulation 4(8) EER 2004 provides: "Paragraph (3)(c)(i) does not apply to property which immediately before the person's death was settled property, to the extent that the property is transferred on that person's death by a spouse, civil partner or charity transfer."

[27] See 125.7.2 ("Specified transfer").

> civil partner or charity transfer is greater than nil; and
>
> (f) the aggregate of A − (B + C)
>
> does not exceed the IHT threshold, where—
>
> A is the aggregate of the values in sub-paragraph (e),
>
> B, subject to paragraph (4), is the total value transferred on that person's death by a spouse, civil partner or charity transfer, and
>
> C subject to paragraph (7B) is the total liabilities of the estate.[28]

125.7.6 *Deceased deemed UK-dom*

HMRC say that an individual who is deemed UK domiciled cannot qualify under the first two categories:

> **IHTM06023 What is not an excepted estate** [Sep 2018]
> There are instances when an estate cannot qualify as an excepted estate, regardless of the value. These are:
>
> [1] where the deceased held an interest in possession (IHTM16060) in more than one item of settled property (IHTM16041)
>
> [2] for deaths on or after 1 September 2006 where a charge arises under IHTA1984 s.151A-C (IHT charge on an alternatively secured pension fund),
>
> [3] where , on or after 18 March 1986, the deceased made a gift with reservation of benefit and either:
> - the reservation still subsists at the death (IHTM04072), or
> - the property ceased to be subject to the reservation within the seven years before the death - (unless this constituted a specified transfer (IHTM06018),
>
> [4] where the deceased has elected that property should be treated as part of their estate for IHT rather than pay a pre-owned asset charge,
>
> [5] where the deceased is regarded as deemed domiciled (IHTM13024) in the UK under the provisions of IHTA1984 S.267.

I am not sure about point [5], but it does not much matter.

125.7.7 *Deceased non-dom*

Regulation 4(5) EER 2004 provides:

> The circumstances prescribed by this paragraph are that—
>
> (a) the person died on or after 6 April 2004;
>
> (b) that person was never

[28] This expression is defined in reg 4(7B).

> [i] domiciled in the UK or
> [ii] treated as domiciled in the UK by section 267 [IHTA]

It is considered that a person treated as UK domiciled by a spouse election may qualify.

> (ba) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions[29] applies; and
> (c) the value of that person's estate situated in the UK is wholly attributable to
> [i] cash[30] or
> [ii] quoted shares or
> [iii] securities
> passing under his will or intestacy or by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination, the gross value of which does not exceed £150,000.

125.7.8 *BPR/APR*

Regulation 4(7) EER 2004 provides:

> For the purpose of paragraphs (2)(d) and (e) and (3)(d) and (e), sections 104 (business property relief) and 116 (agricultural property relief) of the 1984 Act shall not apply in determining the value transferred by a chargeable transfer.

Thus an IHT account is needed for an estate even if it qualifies for 100% business/agricultural property relief.

Regulation 4(7A) EER 2004 provides:

> For the purpose of paragraphs (2)(d) and (e), (3)(d) and (e) and (6) any transfers of value made by that person in any period from 6th April in any year until and including the following 5th April which—
> (i) are exempt transfers by virtue of section 21 (normal expenditure out of income) of the 1984 Act,

[29] Reg 4(9) provides:
"In this regulation 'the alternatively secured pension fund provisions' means the following sections of the 1984 Act—
(a) section 151A (person dying with alternatively secured pension fund);
(b) section 151B (relevant dependant with pension fund inherited from member over 75); and
(c) section 151C (dependant dying with other pension fund)."

[30] IHT Manual 6018 shows that HMRC sensibly construe "cash" widely, so as to include a bank account.

(ii) are made less than seven years prior to the death of that person, and

(iii) are in total more than £3,000,

shall be treated as chargeable transfers.

125.8 Reporting excepted estate

Regulation 3(1) EER 2004 provides:

> No person is required to deliver an account under section 216 of the 1984 Act of the property comprised in an excepted estate.

Regulation 6(1) EER 2004 provides:

> Subject to paragraphs (3) and (4), a person who by virtue of these Regulations is not required to deliver to the Board an account under section 216 of the 1984 Act of the property comprised in an excepted estate, must produce
>
> [a] the information specified in paragraph (2)
>
> [b] and, where the criteria specified in regulation 5A(3) and (4) are met, paragraph (2A),
>
> to the Board in such form as the Board may prescribe.

Thus the term "excepted estate" is not apt, because the estate is not excepted from all reporting requirements. An excepted estate is not required to deliver an IHT400 Account, but it is required to produce a great deal of information in what I call the "**IHT205 Account**" from the name of the relevant form.[31] The IHT205 Account is however shorter and simpler than the IHT400.

I adopt the statutory term "excepted estate", as a paraphrase is even more confusing, but quotation marks would be justified.

The main requirement is the list in reg 6(2):

> The information specified for the purpose of para (1) is—
>
> (a) the following details in relation to the deceased—
>
> (i) full name;
>
> (ii) date of death;
>
> (iii) marital or civil partnership status;
>
> (iv) occupation;
>
> (v) any surviving spouse or civil partner, parent, brother or sister;

[31] The term "excepted estate" made sense under the 2002 Excepted Estates Regulations, under which an excepted estate was not required to submit an IHT Account.

> (vi) the number of surviving children, step-children, adopted children or grandchildren;
> (vii) national insurance number, tax district and tax reference;
> (viii) if the deceased was not domiciled in the UK at his date of death, his domicile and address;
>
> (b) details of all property to which the deceased was beneficially entitled and the value of that property;
> (c) details of any specified transfers, specified exempt transfers and the value of those transfers;
> (d) the liabilities of the estate; and
> (e) any spouse, civil partner or charity transfers and the value of those transfers.

It is considered that there is no obligation to give information about excluded property. This is perhaps a purposive construction, because, strictly, excluded property is "property to which the deceased was beneficially entitled" even though it does not form part of their estate for IHT purposes immediately before death. However, it is absurd to say that there is an obligation on excepted estates to disclose excluded property, when there is no such obligation on standard estates. In practice form IHT205 does not ask about non-UK property.

125.9 Excepted settlements

125.9.1 *"Chargeable event"*

Reg 2 ESR 2008 provides:

> "a chargeable event" means an occasion on which tax is chargeable under
> [a] section 64 (charge at ten-year anniversary),
> [b] section 65 (charge at other times) or
> [c] section 71E (charge to tax on property to which s.71D applies)

125.9.2 *The relief*

Regulation 3(1) ESR 2008 provides:

> No person is required to deliver an account under section 216 of the property comprised in an excepted settlement unless the Commissioners so require by notice in writing addressed to that person.

Unlike the excepted estates regs, this is an exemption.

> (2) If in reliance on these Regulations a person has not delivered an

> account and it is discovered at any time that the settlement is not an excepted settlement, the delivery to the Commissioners within six months of that time of an account of the property comprised in that settlement shall satisfy any requirement to deliver an account imposed on that person.

125.9.3 *"Excepted settlement"*

Regulation 4(1) ESR 2008 provides:

> An excepted settlement means a settlement in which no qualifying interest in possession subsists on an occasion of a chargeable event on or after 6th April 2007 in the circumstances in paragraph (2) or (3).

Para 4(2) ESR 2008 concerns pilot trusts:

> The circumstances are that-
> (a) throughout the existence of the settlement, cash is the only property comprised in the settlement;
> (b) after making the settlement, the settlor provided no further property which became comprised in the settlement;
> (c) the trustees of the settlement are resident in the United Kingdom throughout the existence of the settlement;
> (d) the gross value of the settled property throughout the existence of the settlement does not exceed £1,000; and
> (e) there are no related settlements.

This is of no practical importance as such trusts are not found.

Para 4(3) is a set of small trust reliefs:

> The circumstances are that-
> (a) the settlor is domiciled in the United Kingdom at the time the settlement was made and throughout the existence of the settlement until either the chargeable event or the death of the settlor, whichever is earlier;
> (b) the trustees of the settlement are resident in the United Kingdom throughout the existence of the settlement;
> (c) there are no related settlements; and
> (d) the relevant condition contained in paragraph (4), (6), (7) or (8) is met.
>
> (4) On the occasion of a chargeable event under section 64, the condition is that the value transferred by a chargeable transfer of the description specified in section 66(3) does not exceed 80% of the IHT threshold.
>
> (5) Where, in reliance on these Regulations, no person was required to

deliver an account under section 216 of the property comprised in the settlement on an occasion of a chargeable event under section 65 in respect of the settlement in the ten years before the chargeable event in paragraph (4), the amounts on which any charges to tax were imposed under section 65 shall, for the purpose of determining the value transferred by a chargeable transfer of the description specified in section 66(3), be without deduction for liabilities or reliefs contained in the 1984 Act.

(6) On the occasion of a chargeable event under section 65 preceding the first ten-year anniversary after the settlement's commencement, the condition is that the value transferred by a chargeable transfer of the description specified in section 68(4) does not exceed 80% of the IHT threshold.

(7) On the occasion of a chargeable event under section 65 following one or more ten-year anniversaries after the settlement's commencement, the condition is that the value transferred by a chargeable transfer of the description specified in section 66(3), taking into account section 69, does not exceed 80% of the IHT threshold.

(8) On the occasion of a chargeable event under section 71E by reason of the happening of an event within section 71F(2), the condition is that the value transferred by a chargeable transfer of the description specified in section 71F(8) does not exceed 80% of the IHT threshold.

(9) For the purposes of this regulation-

(a) trustees of a settlement shall be regarded as resident in the United Kingdom if the general administration of the settlement is ordinarily carried on in the United Kingdom and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are for the time being resident in the United Kingdom; and

(b) in determining value for the purposes of paragraph (4), (6), (7) or (8) disregard any liabilities or reliefs contained in the 1984 Act.

125.9.4 *Discharge from tax*

ESR 2008 provides:

5 (1) Paragraph (2) shall apply to an excepted settlement within regulation 4(2).

(2) The trustees of the settlement shall, on the expiration of the period of six months beginning with the date of the chargeable event, be discharged from any claim for tax on the occasion of the chargeable event and attributable to the value of the property comprised in the

> excepted settlement and any Inland Revenue charge for that tax shall then be extinguished unless, within that period, the Commissioners issue a notice requiring an account of that property.
> (3) This regulation is subject to regulation 6.
> 6 Regulation 5 does not-
> (a) discharge any person from tax in the case of fraud or failure to disclose material facts; or
> (b) affect the liability to tax of any persons other than the trustees of the settlement, or any tax that may be payable if the settlement is not an excepted settlement.

This will rarely if ever apply.

125.9.5 *Transfers reported late*

> 7 Where no account of an excepted settlement is required by the Commissioners, an account of that settlement shall, for the purposes of section 264(8) (delivery of account to be treated as payment where tax rate nil), be treated as having been delivered twelve months after the end of the month in which the chargeable event occurred.

125.10 Disclosure: Territorial limitation

The IHT provisions do not provide much of a territorial limitation on the duty to submit an IHT Account. They merely provide two regimes of disclosure, for excepted/standard estates.

The Courts may devise further territorial limitation, as they have on occasion done elsewhere.[32] It might be argued that no duty applies to foreign personal representatives, in the absence of any IHT liability. But disclosure in one form or another will be required in all cases where PRs need a UK grant of probate.

125.10.1 *Conclusion*

PRs may be required to submit an IHT205 Account for an excepted estate even though no IHT is payable on the death (eg because the chargeable property falls within the nil rate band). But in practice one would expect PRs of an excepted estate, and foreign PRs, to disregard trivial UK situate assets, if there is no need for a grant of probate in the UK.

If a foreign domiciled individual wishes to ensure that their personal representatives are under no duty to put in any IHT Account on death, they

[32] See 16.11 (General territorial principle).

should not have any UK situate property at the time of their death (and consider appointing foreign executors.) Then there is no duty to put in any IHT Account.

125.11 Correcting error in Account

Section 217 IHTA provides:

> If a person who has delivered an account under section 216 above discovers at any time that the account is defective in a material respect by reason of anything contained in or omitted from it he shall, within six months of that time, deliver to the Board a further account containing such information as may be necessary to remedy the defect.

Six months is a leisurely, long-stop time limit. There is a separate duty to take "reasonable steps" to inform HMRC of errors in an Account, with a sanction of penalties,[33] and reasonable steps will generally require a swifter response.

125.12 Payment due dates

I do not consider the rules for payment of tax by instalments.

Unlike IT/CGT, there is no specific penalty for late payment, though interest is payable.

125.12.1 *Payment by PRs*

Section 226(1) IHTA provides:

> Except as otherwise provided by the following provisions of this Part of this Act, the tax on the value transferred by a chargeable transfer shall be due
> [a] six months after the end of the month in which the chargeable transfer is made
> [b] or, in the case of a transfer made after 5th April and before 1st October in any year otherwise than on death, at the end of April in the next year.[34]

IHT is due before the IHT Account is due: a curious state of affairs. And why should the payment period be longer for deaths in the period April-

[33] See 126.9.2 (Careless: Definition).

[34] Different rules apply where there is a s.267ZA spouse election; see 4.13.10 (IHT payment/return dates).

September? But there it is.

Section 226 IHTA provides:

> (2) Personal representatives shall, on delivery of their account, pay all the tax for which they are liable and may, on delivery of that account, also pay any part of the tax chargeable on the death for which they are not liable, if the persons liable for it request them to make the payment...
> (5) The Board may in the first instance, and without prejudice to the recovery of the remainder of the tax, accept or demand payment of an amount by reference to the value stated in an account delivered to the Board under section 216 or 217 above.

125.12.2 *Tax on failed PET*

Section 226 IHTA provides:

> (3) So much of the tax chargeable on the value transferred by a chargeable transfer made within seven years of the death of the transferor as—
> (a) exceeds what it would have been had the transferor died more than seven years after the transfer,
> shall be due six months after the end of the month in which the death occurs.
> (3A) Without prejudice to subsection (3) above, the tax chargeable on the value transferred by a potentially exempt transfer which proves to be a chargeable transfer shall be due six months after the end of the month in which the transferor's death occurs.

125.12.3 *Trust tax*

Section 226 IHTA provides:

> (3B) So much (if any) of the tax chargeable on the value transferred by a chargeable transfer made under Chapter III of Part III of this Act within the period of seven years ending with the settlor's death as exceeds what it would have been had the settlor died more than seven years after the date of the transfer shall be due six months after the end of the month in which the death occurs.
> (3C) Tax chargeable under Chapter 3 of Part 3 of this Act on the value transferred by a chargeable transfer, other than any for which the due date is given by subsection (3B) above, is due six months after the end of the month in which the chargeable transfer is made.

125.13 Notice of determination

Section 221 IHTA provides:

> (1) [a] Where it appears to the Board that a transfer of value[35] has been made or
>
> [b] where a claim under this Act is made to the Board in connection with a transfer of value,
>
> the Board may give notice in writing to any person who appears to the Board to be the transferor or the claimant or to be liable for any of the tax chargeable on the value transferred, stating that they have determined the matters specified in the notice.
>
> (2) The matters that may be specified in a notice under this section in relation to any transfer of value are all or any of the following—
>
> (a) the date of the transfer;
>
> (b) the value transferred and the value of any property to which the value transferred is wholly or partly attributable;
>
> (c) the transferor;
>
> (d) the tax chargeable (if any) and the persons who are liable for the whole or part of it;
>
> (e) the amount of any payment made in excess of the tax for which a person is liable and the date from which and the rate at which tax or any repayment of tax overpaid carries interest; and
>
> (f) any other matter that appears to the Board to be relevant for the purposes of this Act.
>
> (3) A determination for the purposes of a notice under this section of any fact relating to a transfer of value—
>
> (a) shall, if that fact has been stated in an account or return under this Part of this Act and the Board are satisfied that the account or return is correct, be made by the Board in accordance with that account or return, but
>
> (b) may, in any other case, be made by the Board to the best of their judgment.
>
> (4) A notice under this section shall state the time within which and the manner in which an appeal against any determination in it may be made.
>
> (5) Subject to any variation by agreement in writing or on appeal, a determination in a notice under this section shall be conclusive for the purposes of this Act against the person on whom the notice is served; and if the notice is served on the transferor and specifies a

[35] See 74.3.1 (Transfer of value: Extended definition).

> determination of the value transferred by the transfer of value or previous transfers of value, the determination, so far as relevant to the tax chargeable in respect of later transfers of value (whether or not made by the transferor) shall be conclusive also against any other person, subject however to any adjustment under section 240 or 241 below.

"Notice of determination" is an old-fashioned expression for what would nowadays be called an assessment or closure notice. The terminology does not much matter.

Unlike closure notices, there is no provision for a taxpayer to apply to close an enquiry and obtain a notice of determination, which can then be appealed. In practice we seem to muddle through without one.

125.14 IHT recovery time limits

125.14.1 *IHT time limits: outline*

IHT recovery time limits and the IT/CGT assessment time limits are best regarded as distinct codes, though they share some rules and terminology.

Time limits for the recovery of IHT can be summarised as follows:

Time limit	**Facts**	**IHTA**	**See para**
n/a	Certificate of discharge	s.239	125.17
	IHT Account made and:		
4 years	- No culpable error	s.240(2)	125.14.2
6 years	- Careless error	s.240(4)	125.14.3
12 years	- Offshore matter	s.240B	125.15
20 years	- Deliberate error	s.240(5)	125.14.3
20 years	- DOTAS breach	s.240(5A)	125.14.4
	No IHT Account made and:		
20 years	- No deliberate error	s.240(6)(7)	125.14.4
No limit	- Deliberate error	s.240(1)	125.16

Section 240(1) IHTA provides the starting point:

> [a] Where too little tax has been paid in respect of a chargeable transfer
> [b] the tax underpaid shall be payable
> [c] with interest under section 233 above,
> [d] whether or not the amount that has been paid was that stated as payable in a notice under section 221 above [notice of determination];
> [e] but subject

> [i] to section 239 above[36] and
> [ii] to the following provisions of this section.

So the default rule is that unless one of the express time limits discussed below applies, there is no time limit for the recovery of IHT. Fortunately the default rule only rarely applies.

125.14.2 *Tax paid: 4-year limit*

Section 240(2) IHTA provides:

> Where
> [A] tax attributable to the value of any property is paid in accordance with an account duly delivered to the Board under this Part of this Act and
> [B] the payment is made and accepted in full satisfaction of the tax so attributable,
> no proceedings shall be brought for the recovery of any additional tax so attributable after the end of the period of four years beginning with the later of—
> (a) the date on which the payment (or in the case of tax paid by instalments the last payment) was made and accepted, and
> (b) the date on which the tax or the last instalment became due;
> and at the end of that period any liability for the additional tax and any Inland Revenue charge for that tax shall be extinguished.

I refer to this as the **"s.240(2) tax-paid rule"**.

Section 240(3) IHTA signposts exceptions to the s.242(2) tax-paid rule:

> Subsection (2) has effect subject to subsections (4) to (5A).

125.14.3 *Carelessness/deliberate error*

Section 240(4)/(5) IHTA extend the time limit of the s.240(2) tax-paid rule in cases of carelessness/deliberate misconduct. The rules are easier to follow if set out side by side:

Proceedings in a case involving a loss of tax brought about carelessly by	Proceedings in a case involving a loss of tax brought about deliberately by
[a] a person liable for the tax[37]	[a] [identical]

[36] See 125.17 (IHT certificate of discharge).

[37] This includes the settlor: see 125.14.6 (Culpable settlor).

[b] (or a person acting on behalf of such a person)[38]	[b] [identical]
may be brought at any time not more than 6 years after the later of the dates in subsection (2)(a) and (b).[39]	may be brought at any time not more than 20 years after the later of the dates in subsection (2)(a) and (b).

Section 240A(2)/(4) IHTA define carelessly/deliberately in the same way as the TMA does for IT/CGT.[40]

125.14.4 *Breach of DOTAS*

Section 240(5A) IHTA extends the time limit of the s.240(2) tax-paid rule in cases of breach of DOTAS:

> Proceedings in a case involving a loss of tax
> [a] attributable to arrangements which were expected to give rise to a tax advantage
> [b] in respect of which a person liable for the tax was under an obligation to make a report under section 253 of the Finance Act 2014 (duty to notify Commissioners of promoter reference number) but failed to do so,
> may be brought at any time not more than 20 years after the later of the dates in subsection (2)(a) and (b).

125.14.5 *No IHT Account delivered*

Section 240 IHTA then deals with cases where the s.240(2) tax-paid rule does not apply, ie (in short) where no IHT Account is delivered to HMRC.

> (6) Subsection (7) applies to any case
> [a] not falling within subsection (2)[41]
> [b] where too little tax has been paid in respect of a chargeable transfer,

[38] See 121.15.6 (Carelessness of agent).

[39] The dates are:
(a) the date on which the payment (or in the case of tax paid by instalments the last payment) was made and accepted, and
(b) the date on which the tax or the last instalment became due.
See 125.14.2 (Four year limit).

[40] See 121.15.4 (What is reasonable care); 121.17.2 (“Deliberate” inaccuracy).

[41] See 125.14.2 (Four year limit).

> [c] provided that the case does not involve a loss of tax brought about deliberately by
> [i] a person liable for the tax[42]
> [ii] (or a person acting on behalf of such a person).[43]
>
> (7) Where this subsection applies—
> (a) no proceedings are to be brought for the recovery of the tax after the end of the period of 20 years beginning with the date on which the chargeable transfer was made, and
> (b) at the end of that period
> [i] any liability for the tax and
> [ii] any Inland Revenue charge for that tax[44]
> is extinguished.

125.14.6 *Culpable settlor*

Section 240(8) IHTA provides:

> In relation to cases of tax chargeable under Chapter 3 of Part 3 of this Act (apart from section 79), the references in subsections (4) to (6) to a person liable for the tax are to be treated as including references to a person who is the settlor in relation to the settlement.

Thus carelessness/deliberate error of the settlor counts for time limits, even though in general the settlor is not actually liable for trust IHT.

125.14.7 *RTC time limit*

Where the requirement to correct rules apply, in short, where IHT involving offshore matters was undeclared on 5/4/2017, the time limit was extended to 5 April 2021, so IHT occasions of charge from 5 April 1997 remained recoverable until then; but this time limit has now passed.[45]

125.15 12 year limit: Offshore matter

Section 240B IHTA provides:

> (1) This section applies in a case within section 240(2) which involves a loss of tax in relation to a chargeable transfer, where—
> (a) the lost tax involves an offshore matter, or
> (b) the lost tax involves an offshore transfer which makes the lost

[42] This includes the settlor: see 125.14.6 (Culpable settlor).

[43] See 121.15.6 (Carelessness of agent).

[44] See 125.18 (Inland Revenue charge).

[45] See 121.19 (RTC time limit: 5/4/21).

> tax significantly harder to identify.
>
> (2) Proceedings for the recovery of the lost tax may be brought at any time not more than 12 years after the later of the dates in section 240(2)(a) and (b).

125.15.1 *Offshore matter/transfer*

Section 240B IHTA provides:

> (3) Lost tax "involves an offshore matter" if it is charged on or by reference to property which is situated or held in a territory outside the UK at, or immediately after, the time of the chargeable transfer.
>
> (4) Lost tax "involves an offshore transfer" if—
>
> (a) it does not involve an offshore matter, and
>
> (b) the property is transferred to a territory outside the UK at a relevant time.[46]

See too 126.23 (Offshore/Domestic Matters).

Section 240B(6) IHTA provides:

> Where lost tax involves an offshore transfer, the cases in which the transfer makes the lost tax significantly harder to identify include any case where, because of the transfer—
>
> (a) HMRC was significantly less likely to become aware of the lost tax, or
>
> (b) HMRC was likely to become aware of the lost tax only at a significantly later time.

Section 240B(7)(8) provides an exception where HMRC should have acted sooner. This is the same rule as for IT; see 121.16.2 (12-year limit: Exceptions).

> (9) This section is subject to any provision of this Act which allows for a longer period for the bringing of proceedings.

125.15.2 *12-year rule: Commencement*

Section 240B IHTA was introduced by s.81 FA 2019. Section 81(4) FA 2019 provides:

[46] Section 240B(5) IHTA provides: "In subsection (4)(b) "relevant time" means a time after the chargeable transfer but before—
(a) the date on which an account under section 216 is delivered to HMRC in relation to the chargeable transfer, or
(b) any later date on which an account under section 217 is so delivered."

> (4) The amendments made by this section have effect—
> (a) in a case involving loss of tax brought about carelessly by a person liable for the tax (or a person acting on behalf of such a person),[47] in relation to chargeable transfers taking place on or after 1 April 2013, and
> (b) in any other case, in relation to chargeable transfers taking place on or after 1 April 2015.

125.16 No time limit

None of the express time limits apply if (in short):
(1) the s.240(2) tax-paid rule does not apply (in short, no IHT Account is delivered) and
(2) the taxpayer has acted deliberately.

Then the default rule applies, so there is no time limit for collection of tax.

This is contrary to the principle of finality, and out of line with other taxes. It is suggested that there should be some cut off. 20 years seems enough, and in line with other taxes; though any figure is better than none. But after 20 years, there may be no or insufficient evidence of deliberate misconduct, as opposed to mere carelessness or innocent error. The onus of proof becomes important here.

125.17 IHT certificate of discharge

The IHT rules, drafted in an earlier era, are more concise than the IT/CGT rules, and have a number of gaps, but the standard of disclosure is similar.

125.17.1 *Certificate of IHT paid*

Section 239(1) IHTA provides:

> Where application is made to the Board by a person liable for any tax on the value transferred by a chargeable transfer which is attributable to the value of property specified in the application, the Board, on being satisfied that the tax so attributable has been or will be paid, may give a certificate to that effect, and shall do so if the chargeable transfer is one made on death or the transferor has died.

Section 239(3) IHTA explains its effect:

[47] Section 90(5) FA 2019 provides: "Section 240(8) of IHTA 1984 applies to the reference to "person liable for the tax" in subsection (4)(a)."

> Subject to subsection (4) below,—
>
> (a) a certificate under subsection (1) above shall discharge the property shown in it from the Inland Revenue charge on its acquisition by a purchaser[48]

This is of limited importance,[49] and I think references to certificates of discharge are generally to the next type of certificate, under s.239(2) IHTA.

125.17.2 *Certificate IHT due/not due*

Section 239(2) IHTA provides:

> Where tax is or may be chargeable on the value transferred by a transfer of value[50] and—
>
> (a) application is made to the Board after the expiration of two years from the transfer (or, if the Board think fit to entertain the application, at an earlier time) by a person who is or might be liable for the whole or part of the tax, and
>
> (b) the applicant delivers to the Board,
>
> [i] if the transfer is one made on death, a full statement to the best of his knowledge and belief of all property included in the estate of the deceased immediately before his death
>
> [ii] and, in any other case, a full and proper account under this Part of this Act,

If these conditions ("certificate application conditions") are met, we move on to the relief available:

> [A] the Board may, as the case requires, determine the amount of the tax or determine that no tax is chargeable;
>
> [B] and subject to the payment of any tax so determined to be chargeable the Board may give a certificate of their determination, and shall do so if the transfer of value is one made on death or the transferor has died.

I refer to this as an **"IHT certificate of discharge"**.

The application form is IHT30 (Inheritance Tax: application for a clearance certificate).

An application can only be made if there is a transfer of value. The IHT

[48] See 125.18 (Inland Revenue charge).

[49] See 125.18.5 (Purchase of charged property).

[50] See 74.3.1 (Transfer of value: Extended definition).

Manual provides:

> **IHTM40040: is a certificate appropriate?** [May 2020]
> You can issue a certificate where
> - tax would be payable if the minimum taxable threshold were exceeded
> - a relief covers the tax otherwise chargeable.
>
> You can also issue a certificate where no tax is payable because of exempt gifts
> - to spouses or civil partners
> - to charities
> - to political parties
> - for national purposes
> - for public benefit, and where
> - the estate includes government securities in foreign ownership which are exempt under IHTA84/S6 (2) [FOTRA securities].
>
> You cannot issue a certificate where the property is not chargeable to tax at all (IHTM04141), for example because of the surviving spouse exemption available under IHTA84/Sch6Para2 [Estate duty transitional rule]...

A certificate can be obtained on a death where the estate includes chargeable and excluded property (whether FOTRA securities, which are mentioned in this list, or non-UK situated property, which is not mentioned).

Where an estate consists *only* of excluded property, the certificate application conditions are not strictly satisfied, but in practice HMRC will give a domicile ruling on a death.[51]

HMRC Trusts and Estates Newsletter (Aug 2022) deals with the procedure:

> **Process for Inheritance Tax clearance**
> If you want to apply for clearance in respect of an Inheritance Tax liability, you must use form IHT30 ‘Application for a clearance certificate’. Only do this when you are sure there will be no further changes that will affect the tax position on the estate. We will not accept a letter requesting clearance.
>
> Do not send your IHT30 at the same time as amendments to the account as clearance should only be applied for after all amendments have been reported to, and accepted by, HMRC.

[51] See 4.23 (HMRC domicile ruling).

> The Inheritance Tax legislation states that it is appropriate to apply for clearance once 2 years have passed since the date of death. In practice, we will consider a request for clearance earlier than this, but only if you are sure that there will be no more changes to report. We would not normally expect you to apply until a year has passed since the date of death.
> During coronavirus (COVID-19) we replaced stamping and returning the IHT30 form with a separate certificate, SL120. We have now made this change permanent and the SL120 is being amended to remove the reference to COVID-19.

125.17.3 *Lifetime chargeable transfer*

The IHT Manual provides:

> **HTM40011: who can apply for clearance certificates?** [May 2020]
> You may receive a request for clearance in respect of a lifetime transfer that was chargeable when made (IHTM04067). You should normally tell the applicants that we do not give clearance in these circumstances. It is considered that the normal process of assessment and payment of tax are sufficient evidence that the liability has been satisfied.
> We do not issue clearance as the subsequent death of the transferor may bring failed potentially exempt transfers (IHTM14511) into cumulation. Clearance can be given if the transferor has subsequently died and you are satisfied that no further liabilities can arise in respect of the transfer.

It may happen that a person makes a gift of foreign property to a trust, but there are doubts as to their domicile. If foreign domiciled the property is excluded property and there is no transfer of value. If UK domiciled, there is a lifetime chargeable transfer. In neither case is a formal certificate available, but HMRC will, no doubt, give a ruling as to domicile if asked.

125.17.4 *Clearance certificate: PETs*

Section 239(2A) IHTA deals with PETs:

> An application under subsection (1) or (2) above with respect to tax which is or may become chargeable on the value transferred by a potentially exempt transfer may not be made before the expiration of two years from the death of the transferor (except where the Board think fit to entertain the application at an earlier time after the death).

125.17.5 *Certificate protection*

Section 239(3) IHTA explains the effect of a s.239(2) certificate:

> Subject to subsection (4) below ...
> (b) a certificate under subsection (2) above shall discharge all persons from any further claim for the tax on the value transferred by the chargeable transfer concerned and extinguish any Inland Revenue charge for that tax.

Section 239(4) IHTA provides a set of limits to certificate protection:

> A certificate under this section
> [i] shall not discharge any person from tax in case of fraud or failure to disclose material facts and
> [ii] shall not affect any further tax—
> (a) that may afterwards be shown to be payable by virtue of section 93, 142, 143, 144 or 145 above

The exceptions at [ii] concern provisions which may retrospectively increase an IHT liability:

Section	**Provision**	**See para**
s.93	Disclaimer	99.18
s.142	Instrument of variation	77.6
s.143	Compliance with testator's request	
s.144	Discretionary will trust	
s.145	*Repealed (the need to delete the reference was overlooked)*	

Section 239(4) IHTA provides:

> A certificate under this section ... shall not affect any further tax ...
> (aa) that may afterwards be shown to be payable by reason of too great an increase having been made under section 8A(3) above

This relates to the transferable nil-rate band.
Section 239(4) IHTA provides:

> A certificate under this section ... shall not affect any further tax ...
> (b) that may be payable if any further property is afterwards shown to have been included in the estate of a deceased person immediately before his death;

These limits to certificate protection do reduce the value of the certificate, though the onus of proof does shift to HMRC.

125.17.6 *Certificate protection: PRs*

HMRC practice provides a further relief for PRs who have an IHT certificate of discharge. IHTM provides:

> **IHTM30044: PETs: practice relating to PRs** [Sep 2018]
> ... The Law Societies of England and Scotland have expressed concern about the liability of personal representatives under IHTA84/S199 (2). In response HMRC have indicated that we 'will not actually pursue for inheritance tax personal representatives who
>
> - after making the fullest enquiries that are reasonably practicable in the circumstances to discover lifetime transfers, and so
> - having done all in their power to make full disclosure of them to the Board of HMRC
>
> have obtained a certificate of discharge and distributed the estate before a chargeable lifetime transfer comes to light.
> This statement of the Board's position is made without prejudice to the application in an appropriate case of IHTA84/S199 (2) Inheritance Tax Act 1984.'
> The quotation is from letters sent to the two Law Societies on 6 February 1991. It was published in the Law Society's Gazette dated 13 March 1991, page 17.

Although the heading refers to failed PETs, the same ought to apply to a lifetime chargeable transfer so far as additional tax is payable on death under s.199(2).

125.17.7 *Protection for purchaser*

A purchaser's protection under a certificate of discharge is unrestricted. Section 239(4) IHTA provides

> but in so far as the certificate shows any tax to be attributable to the value of any property it shall remain valid in favour of a purchaser of that property without notice of any fact invalidating the certificate.

125.17.8 *Discharge: Excepted estate*

Para 8 IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004, which I abbreviate to **"EER 2004"**, provides a separate rule for excepted estates:[52]

> (1) Subject to paragraph (2) and regulation 9, if the information specified in regulation 6 has been produced in accordance with these Regulations, all persons shall on the expiration of the prescribed period[53] be discharged from any claim for tax on the value transferred

[52] See 125.7 (Excepted estates).

[53] Defined reg.1 EER 2004: "'the prescribed period' in relation to any person is the period beginning with that person's death and ending—

> by the chargeable transfer made on the deceased's death and attributable to the value of the property comprised in an excepted estate and any Inland Revenue charge for that tax shall then be extinguished.
>
> (2) Paragraph (1) shall not apply if within the prescribed period the Board issue a notice to—
>
> (a) the person or persons who would apart from these Regulations be required to deliver an account under section 216 of the 1984 Act, or
>
> (b) the solicitor or agent of that person or those persons who produced the specified information pursuant to regulation 6,
>
> requiring additional information or documents to be produced in relation to the specified information produced pursuant to regulation 6.

The difference between this and the IHT certificate of discharge is that discharge for an excepted estate comes automatically on the expiry of the prescribed period, unless HMRC issue a notice to require additional information. There is no need to apply for a certificate.

Unfortunately, reg 9 EER 2004 (more or less) undoes the benefit of the automatic discharge under reg 8:

> Regulation 8
>
> [1] shall not discharge any person from tax in the case of fraud or failure to disclose material facts and
>
> [2] shall not affect any tax that may be payable if further property is later shown to form part of the estate and, in consequence of that property, the estate is not an excepted estate.

This echoes s.239(4) IHTA.

125.17.9 *Informal IHT clearance*

The IHTM provides:

> **IHTM40001: Clearance certificates: summary** [May 2020]
> **...Non-statutory assurance**
> You should treat the non-statutory assurance (IHTM40151) given by standard letter SL135 in all respects as if the taxpayer had applied for and you had issued formal clearance on form IHT30. You should

(a) in England, Wales and Northern Ireland, 35 days after the making of the first grant of representation in respect of that person (not being a grant limited in duration, in respect of property or to any special purpose); or

(b) in Scotland, 60 days after the date on which confirmation to that person's estate was first issued".

> therefore consider the instructions in this section before you issue a non-statutory assurance.
>
> Once you have issued a non-statutory assurance you should treat any further developments on the case in accordance with the instructions in this section and on the basis that clearance has been given. This paragraph does not apply to Estate Duty cases.
>
> As the non-statutory assurance letter has the same effect as a formal clearance certificate there is no need for the taxpayer to request a certificate once it has been issued. However, if they choose to submit a form IHT30 you should still issue it if they have paid all the Inheritance Tax that is due.

There are two possible advantages in seeking a formal statutory clearance.

(1) This may extend the period of administration of the estate[54]

(2) If HMRC seek to resile from the clearance, the dispute is decided by the FTT and not by way of judicial review.

125.18 Inland Revenue charge

Section 237(1) IHTA provides:

> Except as otherwise provided, where any tax charged on the value transferred by a chargeable transfer, or any interest on it, is for the time being unpaid a charge for the amount unpaid (to be known as an Inland Revenue charge) is by virtue of this section imposed in favour of the Board on—
>
> (a) any property to the value of which the value transferred is wholly or partly attributable, and
>
> (b) where the chargeable transfer
>
> [i] is made by the making of a settlement or
>
> [ii] is made under Part III of this Act [settlements],
>
> any property comprised in the settlement.

One might refer to this as the "HMRC charge"; but it is better to use the statutory term.

Section 237(2) IHTA provides:

> References in subsection (1) above to any property include references to any property directly or indirectly representing it.

If there is an Inland Revenue charge on shares of a company, that does not extend to a charge on assets of the company, as the assets do not represent

[54] See 88.2 (Period of administration).

the shares.[55]

125.18.1 *IHT residential-property code*

Section 237(2A) IHTA provides:

> Where tax is charged by virtue of Schedule A1 on the value transferred by a chargeable transfer, the reference in subsection (1)(a) to property to the value of which the value transferred is wholly or partly attributable includes the UK residential property interest (within the meaning of that Schedule) to which the charge to tax relates.

In short, the Inland Revenue charge applies to:
(1) Sch A1 property
(2) The UK residential property interest to which the charge relates
(3) Property representing (1) and (2)

The drafter no doubt had in mind cases where:
(1) T (individual or trust) holds a company which holds a UK residence.
(2) T holds a relevant (de-excluded) loan.

What if T holds residence-securities? Sch A1 Q&As provide:

> *Example 13*
> A mother resident[56] in Hong Kong guarantees a loan from the bank to her son which is made in order to enable the son to buy a property in the UK. The mother gives security to the bank over non-UK investment assets and then dies.

The investment assets (security) are chargeable (de-excluded property) up to the value of the loan.

> On the death of the mother can HMRC impose a charge over the property owned by the son as security for the payment of IHT on the collateral even though the parent has no interest in the property and is not owed any money by the son and the son may not even inherit anything from his mother?
> *Suggested answer:* Correct

HMRC agree.

My own suggested answer is that the charge to tax does not relate to the land, so there is no Inland Revenue charge.

[55] See App 2.9.6 (Do shares represent co assets).
[56] Author’s footnote: It is assumed the mother is domiciled in Hong Kong.

125.18.2 *Charge on deceased's estate*

Section 237(3) IHTA provides:

> Where the chargeable transfer is made on death, personal or movable property situated in the UK which was beneficially owned by the deceased immediately before his death and vests in his personal representatives is not subject to the Inland Revenue charge;

A Residence-company is not usually UK situate so this exemption will not apply. But it might apply in the case of a UK situate relevant loan.

125.18.3 *PETs*

Section 237(3A) IHTA provides:

> In the case of a potentially exempt transfer which proves to be a chargeable transfer—
> (a) property concerned,[57] or an interest in property concerned, which has been disposed of to a purchaser before the transferor's death is not subject to the Inland Revenue charge, but
> (b) property concerned which has been otherwise disposed of before the death and property which at the death represents any property or interest falling within paragraph (a) above shall be subject to the charge...

125.18.4 *Priority of charge*

Section 237(5) IHTA provides:

> The Inland Revenue charge imposed on any property shall take effect subject to any incumbrance on it which is allowable as a deduction in valuing that property for the purposes of the tax.

There are, at least in theory, problems for mortgagees where the debt is not deductible for IHT purposes, but perhaps in practice the issue will not arise.

125.18.5 *Purchase of charged property*

Section 237(6) IHTA provides:

[57] Subsection 3A provides a definition: "... in this subsection "property concerned" means property to the value of which the value transferred by the transfer is wholly or partly attributable."

> Except as provided by section 238 below [purchase of charged property], a disposition of property subject to an Inland Revenue charge shall take effect subject to that charge.

Section 238(1) IHTA provides:

> Where property subject to an Inland Revenue charge, or an interest in such property, is disposed of to a purchaser, then if at the time of the disposition[58]—
>
> (a) in the case of land in England and Wales, the charge was not registered as a land charge or, in the case of registered land, was not protected by notice on the register, or
>
> (b) [i] in the case of land in Northern Ireland the title to which is registered under the Land Registration Act (Northern Ireland) 1970, the charge
>
> [A] was not entered as a burden on the appropriate register maintained under that Act or
>
> [B] was not protected by a caution or inhibition under that Act or,
>
> [ii] in the case of other land in Northern Ireland, the purchaser had no notice of the facts giving rise to the charge, or
>
> (c) in the case of
>
> [i] personal property situated in the UK other than such property as is mentioned in paragraph (a) or (b) above,[59]
>
> [ii] and of any property situated outside the UK,
>
> the purchaser had no notice of the facts giving rise to the charge, or
>
> (d) in the case of any property,
>
> [i] a certificate of discharge had been given by the Board under section 239 below and
>
> [ii] the purchaser had no notice of any fact invalidating the certificate,
>
> the property or interest shall then cease to be subject to the charge

[58] In this section "the time of the disposition" means—
(a) in relation to registered land—
(i) if the disposition is required to be completed by registration, the time of registration, and
(ii) otherwise, the time of completion, and
(b) in relation to other property, the time of completion."

[59] The reference to personal property "other than such property as is mentioned in paragraph (a) or (b) above" is strange, as the property mentioned in (a)and (b) is land, not personal property; but it does not matter.

> but the property for the time being representing it shall be subject to it.

125.18.6 *Time limit for purchasers*

Section 238(2) IHTA provides:

> Where property subject to an Inland Revenue charge, or an interest in such property, is disposed of to a purchaser in circumstances where it does not then cease to be subject to the charge, it shall cease to be subject to it at the end of the period of six years beginning with the later of—
>
> (a) the date on which the tax became due, and
>
> (b) the date on which a full and proper account of the property was first delivered to the Board in connection with the chargeable transfer concerned.

The IHT Manual provides:

> **IHTM30125 Liability: Liability In Special Cases: Liability Of Purchaser** [May 2020]
>
> ... The term 'notice' in IHTA/S238(1)(c) is considered to have a wide meaning and it is not limited to cases where, for example, an actual notice was given to purchaser. It will include cases where a purchaser acquires business property where they are aware that the property was given away less than 7 years prior to their purchase. In such cases the statutory charge created by IHTA84/S237 will apply to the business property in the hands of the purchaser if the tax remains unpaid by either the transferee or personal representatives.
>
> However, this extension of liability to a purchaser only applies where the lifetime transfer was a chargeable transfer when made (IHTM04067) – most commonly this will be where relevant business property has been transferred to the trustees of a relevant property trust. The extension does not apply to a purchaser where the lifetime transfer was a potentially exempt transfer (PET) (IHTM04057) which later falls into charge by reason of death within seven years. This is because IHTA84/S237(3A)(a) excludes a PET, where the transferee has subsequently sold the gifted property, from the charge. Instead, the charge applies to the proceeds of the sale, or any other property representing the gifted property. But the charge does apply to the property given away by a PET where the transferee has disposed of the property otherwise than by a sale.
>
> It should only be in exceptional circumstances that you should need to consider recovering the tax from a purchaser or other subsequent owner

of gifted property. You should make every effort to recover the tax from the transferee, or person in whom the gifted property was vested and follow the instruction at IHTM30044 if there is any prospect that you may need to have recourse to the personal representatives. In the very rare case where it appears that there may be difficulty in recovering the tax from both the transferee and the personal representatives, you should warn the purchaser of their potential liability as soon as it is apparent that it may be necessary to have to recourse to them.

CHAPTER ONE HUNDRED AND TWENTY SIX

PENALTIES

126.1 Penalties: Introduction
126.2 Error in taxpayer document
126.2.1 Sch 24 Table
126.2.2 Multiple inaccuracies
126.3 Error due to 3rd party
126.3.1 Relevant inaccuracy
126.3.2 Interaction of para 1/1A
126.4 Uncorrected assessment
126.5 Failure to notify liability
126.6 Failure to make return
126.6.1 Sch 55 Table
126.6.2 Trustees: Who is P?
126.7 Asset-based penalty
126.7.1 "Standard offshore tax penalty"
126.7.2 Asset-based IT
126.7.3 Tax year relating to penalty
126.7.4 PLR threshold
126.7.5 Multiple asset-based penalties
126.8 RTC penalty
126.8.1 2018 reporting deadline
126.9 Culpability definitions
126.9.1 Significance of culpability
126.9.2 Careless: Definition
126.9.3 Deliberate/concealed: Definition
126.10 Reasonable excuse
126.10.1 Reasonable excuse: Significance
126.10.2 Reasonable excuse: Definition
126.10.3 Tribunal approach
126.10.4 Insufficiency of funds
126.10.5 Unreasonable reliance
126.10.6 Ignorance of law
126.10.7 Excuse ceases
126.11 Disqualified advice codes
126.11.1 Avoidance Arrangements
126.11.2 Established practice
126.11.3 Avoidance arrangements: Significance
126.12 Disqualified advice
126.12.1 Why disqualified advice matters
126.12.2 Disqualified advice: Definition
126.13 Interested person
126.13.1 "Interested person"
126.13.2 Scope of disqualification
126.14 Arrangement with interested person
126.15 Appropriate expertise
126.16 All relevant circumstances
126.16.1 Old advice
126.16.2 Second opinion
126.17 Receiver of advice
126.18 Advice not known disqualified
126.19 Disqualified advice: PRs
126.20 Egregious arrangements
126.20.1 Cond. A: DOTAS applies
126.20.2 Condition C: GAAR applies
126.20.3 Cond D: Follower notice
126.20.4 Cond. E: Avoidance-related rule
126.21 Amount of penalty
126.21.1 Navigation
126.21.2 Amount: Error in document
126.21.3 3rd party error/uncorrected assessment
126.21.4 Amount: Failure to notify
126.21.5 Amount: Failure to make return
126.21.6 Delay up to 3 months
126.21.7 Delay after 3 months
126.21.8 Delay after 6 months
126.21.9 Delay after 12 months
126.21.10 Amount: Asset-based penalty

126.21.11 Amount: RTC penalty
126.22 Categories of information/inaccuracy/failure
126.22.1 Navigation
126.22.2 Categories of information
126.22.3 Categories of inaccuracy
126.22.4 Categories of failure
126.22.5 Inaccuracy/failure categories compared
126.23 Offshore/Domestic Matters
126.23.1 Navigation
126.23.2 "Involves an Offshore Matter"
126.23.3 "Involves an Offshore Transfer"
126.23.4 Applicable condition
126.23.5 Filing/calculation/relevant date
126.23.6 Assets representing assets
126.23.7 "Involves a domestic matter"
126.23.8 Multiple categories
126.23.9 Definition of source/situs etc
126.24 Offshore Matter/Transfer: RTC
126.24.1 Involves Offshore Matter
126.24.2 Involves Offshore Transfer
126.25 Categories of territory
126.25.1 More than 1 category in point
126.26 Potential lost revenue
126.27 PLR: Error-based penalties
126.27.1 PLR: Normal rule
126.27.2 Disregarded reliefs
126.27.3 Multiple errors
126.27.4 PLR: Losses
126.27.5 PLR: Delayed tax
126.28 PLR: Failure to notify chargeability
126.28.1 No notice requiring return
126.28.2 Notice requiring tax return withdrawn
126.28.3 Other cases
126.29 Matching overpayment
126.30 Offshore PLR: Asset-based penalty
126.31 Offshore PLR: RTC
126.31.1 Combined tax non-compliance
126.32 Reductions for disclosure: Which para?
126.33 Summary
126.33.1 Error based penalties
126.33.2 Failure to notify chargeability
126.33.3 Failure to make return
126.33.4 RTC
126.34 What disclosure requires
126.34.1 Disclosure: Error-based penalty
126.34.2 Disclosure: Failure to notify
126.34.3 Disclosure: Failure to make return
126.34.4 Disclosure required: RTC
126.34.5 Reduction for asset-based penalties
126.34.6 Prompted/unprompted
126.34.7 "Quality"
126.35 Additional information
126.35.1 Enablers
126.35.2 Property holders
126.35.3 Misc provisions
126.36 Amount of reduction for disclosure
126.36.1 Benefit of disclosure: General
126.36.2 Error-based penalty reduction
126.36.3 Failure to notify reduction
126.36.4 Failure to make return reduction
126.36.5 Asset-based penalty reduction
126.36.6 RTC reduction amount
126.37 Reduction: Special circumstances
126.38 Interaction of penalties
126.38.1 Interaction of error-based and other penalties
126.38.2 Interaction of asset-based penalty/RTC
126.38.3 RTC/other penalties interaction
126.39 RTC Definitions
126.40 RTC: "Tax"
126.41 RTC: "Tax non-compliance"
126.41.1 Para (3) list
126.41.2 Para (4) list
126.42 "Offshore" non-compliance
126.43 Original tax non-compliance
126.44 Relevant tax non-compliance
126.44.1 Cond. A: Uncorrected error
126.44.2 Condition B: PLR
126.44.3 Correction in part
126.45 Cond. C: Assessable in 2017
126.45.1 The relevant date
126.46 Correcting non-compliance
126.46.1 Multiple parties
126.46.2 Trustees
126.46.3 Deceased taxpayer
126.47 RTC: Nil liability disclosure
126.48 Application of TMA rules

126.49 RTC: Interpretation
126.50 Assessment of penalties
126.51 RTC: Disguised remuneration
126.52 GAAR penalties
126.53 Public list of defaulters
126.53.1 Trustees/controlling persons
126.53.2 Process
126.53.3 Publication rule: Critique
126.54 Public attitude(s) to compliance

126.1 Penalties: Introduction

This chapter discusses a set of seven penalties:

Topic	**Provision**[1]	**See para**
Error-based penalties ("sch 24 rules")	*Sch 24 FA 07*	
Error in document	Para 1	126.2
Error due to 3rd party	Para 1A	126.3
Uncorrected assessment	Para 2	126.4
Failure by omission	-	
Failure to notify liability	Para 1 sch 41 FA 08	126.5
Failure to make return	Para 1 sch 55 FA 09	126.6
Asset-based penalties	Para 1 sch 22 FA 16	126.7
Requirement to correct (RTC)[2]	Para 1 sch 18 F2A 17	126.8
GAAR penalties	s.212A, 212B FA 13	126.52

I also discuss a related topic, publication of defaulters.

Penalties are scattered across about a dozen statutes and statutory instruments, with repetition and near-repetition making a statute-focussed discussion more difficult, though no less necessary.

I use the term **"penalty template wording"** to describe provisions (often, definitions) which are the same or substantially the same across the different penalty codes, and where possible I set out such wording once only.

A consolidation might assist - if the current law was judged to be stable. Another feature of the law has been frequent amendment, and statutory amendments as far back as FA 2015 have yet come into force - if they ever will.[3]

This chapter is mainly a sketch of the "top 7" penalties. Penalties are, I think, more litigated than any other topic. Presumably HMRC's customers object to paying them. So there is a substantial case law. A full discussion needs a book to itself.

[1] For the sake of brevity, I abbreviate statutory references as indicated in this table.

[2] This penalty is also called Failure to Correct (FTC).

[3] See, for example, changes yet to be applied to Schedule 21, FA 2015.

HMRC guidance is in the Compliance Handbook; I do not discuss that here. I do consider some RTC guidance, which I call:

- "**HMRC RTC guidance**"[4]
- "**CIOT RTC guidance**"[5]

The 2023/24 edition of this work para 123.51 (EU-law compliance) discussed EU law issues, but after Brexit this may not arise.

126.2 Error in taxpayer document

This is the most important of the three sch 24 penalties.

Para 1(1) sch 24 FA 07 provides:

> A penalty is payable by a person (P) where–
> (a) P gives HMRC a document of a kind listed in the Table below, and
> (b) Conditions 1 and 2 are satisfied.

When statute refers to "a penalty under para 1", I gloss that as an **"error in document"**, though that is not a completely accurate label.

The conditions are:

Condition	**Requirement**
1	Inaccuracy requirement
2	Culpability requirement

Para 1 sch 24 FA 07 provides:

> (2) Condition 1 is that the document contains an inaccuracy which amounts to, or leads to–
> (a) an understatement of a liability to tax,
> (b) a false or inflated statement of a loss, or
> (c) a false or inflated claim to repayment of tax.
> (3) Condition 2 is that the inaccuracy was careless (within the meaning of paragraph 3) or deliberate on P's part.

[5] CIOT, "Requirement to Correct Offshore Tax Non-Compliance - Practical Notes for CIOT and ATT members" (2018) *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/466bd776-586a-4de1-9471-d090407c3432/180829%20Practical%20Note%20for%20CIOT%20&%20ATT%20Members%20-%20Requirement%20to%20Correct%20-%20Updated%20180914.pdf*

126.2.1 *Sch 24 Table*

There about 50 items in the Table[6] ("the sch 24 Table"), including IT/CGT/CT returns, IHT Accounts, and concluding with:

> Any document which is likely to be relied upon by HMRC to determine, without further inquiry, P's liability to tax...

So most documents provided to HMRC will fall within the sch 24 Table. Para 12(1) sch 24 FA 07 provides one exception:

> The final entry in the Table in paragraph 1 excludes a document in respect of which a penalty is payable under section 98 of TMA 1970 (special returns).

I hope to deal with s.98 in a future edition.

126.2.2 *Multiple inaccuracies*

Para 1(4) sch 24 FA 07 provides:

> Where a document contains more than one inaccuracy, a penalty is payable for each inaccuracy.

126.3 Error due to 3rd party

Para 1A sch 24 FA 07 provides:

> (1) A penalty is payable by a person (T) where –
> (a) another person (P) gives HMRC a document of a kind listed in the Table in paragraph 1 [the sch 24 Table[7]],
> (b) the document contains a relevant inaccuracy, and
> (c) the inaccuracy was attributable
> [i] to T deliberately supplying false information to P (whether directly or indirectly), or
> [ii] to T deliberately withholding information from P,
> with the intention of the document containing the inaccuracy.

This penalty only arises if the 3rd party (T) acts deliberately: carelessness is not enough.
"Deliberate" is not defined.
Clearly, T acts deliberately if:

[6] I follow the statute which generally writes Table with an initial capital (though lower case *t* is used in sch 22 FA 16).

[7] See 126.2.1 (Sch 24 Table).

(1) T supplies information which T knows is false; or
(2) T withholds information which T knows is needed, ie T knows that the consequence of withholding is that P will submit an inaccurate return.

It is considered that recklessness would suffice.[8] T acts deliberately if:
(1) (a) T supplies information which T knows may be false; or
(b) T withholds information which T knows may be needed; and
(2) The risk is an unjustifiable one

The risk is in principle unjustifiable if T intentionally chose not to investigate the position. T does not act deliberately if T takes reasonable care to ensure that information supplied is true/information withhold is not needed; even if T knows it is possible that may be wrong.

In addition, T must have the intention of the document containing the inaccuracy; but if T acts deliberately, that is likely to be the case.

126.3.1 *Relevant inaccuracy*

Para 1A(2) sch 24 FA 07 provides a commonsense definition:

> A "relevant inaccuracy" is an inaccuracy which amounts to, or leads to –
> (a) an understatement of a liability to tax,
> (b) a false or inflated statement of a loss, or
> (c) a false or inflated claim to repayment of tax.

That is the equivalent to the inaccuracy requirement in para 1 condition 1.

126.3.2 *Interaction of para 1/1A*

Para 1A(3) sch 24 FA 07 provides:

> A penalty is payable under this paragraph in respect of an inaccuracy whether or not P is liable to a penalty under paragraph 1 in respect of the same inaccuracy.

For the para 1A penalty, it does not matter that the taxpayer (P) is acting with reasonable care (so that P is not subject to a penalty). Indeed, that will normally be the case, because it is envisaged the third party (T) has supplied false information to P (or T has failed to provide information to P). But it is possible that both T and P are at fault. It may be that P

[8] See 121.17.3 (Recklessness).

should have noticed that information was wrong, or lacking.

Para 12 sch 24 FA 07 provides:

> (4) Where penalties are imposed under paragraphs 1 and 1A in respect of the same inaccuracy, the aggregate of the amounts of the penalties must not exceed the relevant percentage of the potential lost revenue.
> (5) The relevant percentage is—
> (za) if the penalty imposed under paragraph 1 is for an inaccuracy in category 0, 100%,[9]
> (a) if the penalty imposed under paragraph 1 is for an inaccuracy in category 1, 125%,
> (b) if the penalty imposed under paragraph 1 is for an inaccuracy in category 2, 150%, and
> (c) if the penalty imposed under paragraph 1 is for an inaccuracy in category 3, 200%.

In tabular format (ignoring category 0, which is supposed to be forthcoming):

Category	**Penalty cap**
1	125%
2	150%
3	200%

126.4 Uncorrected assessment

Para 2(1) sch 24 FA 07 provides:

> A penalty is payable by a person (P) where –
> (a) an assessment[10] issued to P by HMRC understates P's liability to a relevant tax[11] and
> (b) P has failed to take reasonable steps to notify HMRC, within the period of 30 days beginning with the date of the assessment, that it is an under-assessment.

If the taxpayer has made a careless mistake, penalties arise under para 1.

[9] There is at present no category 0.

[10] Para 2(4) provides: "In this paragraph (and in Part 2 of this Schedule so far as relating to this paragraph) –
(a) "assessment" includes determination, and
(b) accordingly, references to an under-assessment include an under-determination."

[11] Para 2(3) provides: In sub-paragraph (1) "relevant tax" means any tax mentioned in the Table in paragraph 1.

So this penalty primarily arises where HMRC have made a mistake: the taxpayers is under a duty to assist HMRC by pointing this out.

What is reasonable cannot sensibly be defined, but the drafter has a go. Para 2(2) sch 24 FA 07 provides:

> In deciding what steps (if any) were reasonable HMRC must consider–
> (a) whether P knew, or should have known, about the under-assessment, and
> (b) what steps would have been reasonable to take to notify HMRC.

126.5 Failure to notify liability

Para 1 sch 41 FA 08 provides:

> A penalty is payable by a person (P) where P fails to comply with an obligation specified in the Table below (a "relevant obligation").

This Table ("the sch 41 Table") has 9 items. The items relevant to this work concern the duty to notify liability to IT/CGT/CT:

Tax	**Obligation**	**See para**
IT/CGT	s.7 TMA	121.2
CT	Para 2 sch 18 FA 1998	121.2

Failure to notify would not fall within para 1 sch 24 (error in document), because the taxpayer does not give any document to HMRC.

126.6 Failure to make return

Para 1(1) sch 55 FA 09 provides:

> A penalty is payable by a person ("P") where P fails to make or deliver a return,[12] or to deliver any other document, specified in the Table below on or before the filing date.[13]

[12] Para 1(4) provides commonsense definitions: "(5) In the provisions of this Schedule which follow the Table-
(a) any reference to a return includes a reference to any other document specified in the Table, and
(b) any reference to making a return includes a reference to delivering a return or to delivering any such document."

[13] Para 1(4) provides a commonsense definition: "In this Schedule "filing date" , in relation to a return or other document, means the date by which it is required to be made or delivered to HMRC".

126.6.1 *Sch 55 Table*

This Table ("the sch 55 Table") has 20 items, numbered non-numerically from 1 to 29. The items most relevant to this work are:[14]

No.	Tax	Requirement	Provision	See para
1(a)	IT/CGT	Return	s.8(1)(a) TMA 1970	121.4
(b)		Documents	s.8(1)(b) TMA 1970	121.4
2(a)	IT/CGT	Return	s.8A(1)(a) TMA 1970	121.4
(b)		Documents	s.8A(1)(b) TMA 1970	121.4
2A	CGT	Return	Sch 2 FA 2019 (except para 9, 15)	
3(a)	IT/CT	Return	s.12AA(2)(a), (3)(a) TMA	
(b)		Documents	s.12AA(2)(b), (3)(b) TMA	
4	IT	Return	Reg 67B, 67D PAYE Reg	
7	CT	Return	Para 3 sch 18 FA 1998	
8	IHT	Account	s.216, 217 IHTA	125.5, 125.11

126.6.2 *Trustees: Who is P?*

In *Trustees of the Paul Hogarth Life Interest Trust v HMRC:*[15]

> Section 8A(1) TMA allows HMRC to issue a notice to any relevant trustee to complete a tax return, and HMRC may issue a notice to each trustee (if more than one) or to any one or more trustees, but only if they are relevant trustees, and the pool of relevant trustees are those people described in s 7(9) who are relevant trustees in relation to the tax year for which the return is required. It follows that the trustee or trustees to whom the notice to file is in fact issued is or are P.

126.7 Asset-based penalty

Para 1(1) Sch 22 FA 16 provides:

> An asset-based penalty is payable by a person (P) where—
> (a) one or more standard offshore tax penalties have been imposed on P in relation to a tax year (see paragraphs 2 and 3), and
> (b) the potential lost revenue threshold is met in relation to that tax year (see paragraph 4).

126.7.1 *"Standard offshore tax penalty"*

Para 2(1) Sch 22 FA 16 provides:

[14] For brevity I have slightly abbreviated the wording of the statute.

[15] [2018] UKFTT 595 (TC) at [21].

> A standard offshore tax penalty is a penalty that falls within sub-paragraph (2), (3) (4) or (4A).

Thus there are four categories standard offshore tax penalty:

Category	**Para 2 sub-para**
Error in document	(2)
Failure to notify chargeability	(3)
Failure to make return	(4)
RTC	(4A)

It is helpful to read these side by side:

(2) A penalty falls within this sub-paragraph if-	(3) A penalty falls within this sub-paragraph if-	(4) A penalty falls within this sub-paragraph if-	(4A) A penalty falls within this paragraph if-
(a) it is imposed under paragraph 1 of Schedule 24 to FA 07 (inaccuracy in taxpayer's document),	(a) it is imposed under paragraph 1 of Schedule 41 to FA 08 (penalty for failure to notify),	(a) it is imposed under paragraph 6 of Schedule 55 to FA 09 (penalty for failure to make return more than 12 months after filing date),	(a) it is imposed on a person under paragraph 1 of Schedule 18 to F(no.2)A[16] 2017 (requirement to correct relevant offshore tax non-compliance),
(b) the inaccuracy for which the penalty is imposed involves an offshore matter or an offshore transfer,	(b) the failure for which the penalty is imposed involves an offshore matter or an offshore transfer,	(b) it is imposed for the withholding of information involving an offshore matter or an offshore transfer,	
(c) it is imposed for deliberate action (whether concealed or not), and	(c) it is imposed for a deliberate failure (whether concealed or not), and	(c) it is imposed for a deliberate withholding of information (whether concealed or not),	(b) the person was aware at any time during the RTC period that at the end of the 2016-17 tax year

[16] Sch 22 FA 2016 consistently refers to "FA 2017" but the reference should be Finance (no.2) Act 2017, so for clarity I correct this to F(no.2)A 2017.

		and	P had relevant offshore tax non-compliance to correct, and
(d) the tax at stake is (or includes) capital gains tax, inheritance tax or asset-based income tax.	(d) the tax at stake is (or includes) capital gains tax or asset-based income tax.	(d) the tax at stake is (or includes) capital gains tax, inheritance tax or asset-based income tax.	(c) the tax at stake is (or includes) capital gains tax, inheritance tax or asset-based income tax.

Para 2 sch 22 FA 16 then deals with apportionment:

> (5) In a case where the inaccuracy, failure or withholding of information for which a penalty is imposed involves both an offshore matter or an offshore transfer and a domestic matter, the standard offshore tax penalty is only that part of the penalty that involves the offshore matter or offshore transfer.
> (5A) Sub-paragraph (5) does not apply to a penalty imposed under paragraph 1 of Schedule 18 to F(no.2)A 2017.
> (6) In a case where the tax at stake in relation to a penalty includes a tax other than capital gains tax, inheritance tax or asset-based income tax, the standard offshore tax penalty is only that part of the penalty which relates to capital gains tax, inheritance tax or asset-based income tax.

126.7.2 *Asset-based IT*

Para 2(7) sch 22 FA 16 provides:

> "Asset-based income tax" means income tax that is charged under any of the provisions mentioned in column 1 of the table in paragraph 13(2).

This Table ("the sch 22 Table") has 10 items:[17]

ITTOIA Provision: Topic	**Asset**
Part 3 ITTOIA Chap	
3,7,10: Property business	The estate, interest or right in or over the land that generates the income for the business (see ss 264 to 266 ITTOIA)

[17] For clarity I set this out in tabular form and in the first two columns use my own terminology, rather than a precise quote of the statute.

8: s.12(4) concern	The estate, interest or right in or over the land that generates the rent receivable in connection with a UK s.12(4) concern (see ss 335, 336 ITTOIA)
Part 4 ITTOIA Chap	
2/2A: Interest	The asset that generates the interest
3 - 5: Dividends etc	The shares or other securities in relation to which the dividend or distribution is paid
7: Purchased life annuity	The annuity that gives rise to the payments
8: Deeply discounted security	The deeply discounted securities that are disposed of (see ss 427 - 430 ITTOIA)
9: Life policies, etc	The policy or contract from which the gain is treated as arising
11: Transaction in deposits	The deposit right which is disposed of (see ss 551, 552 ITTOIA)
Part 5 ITTOIA Chap	
2: Intellectual property	The intellectual property, knowhow or patent rights which generate the income (see ss 579, 583, 587 ITTOIA)
4:Telecommunications	The relevant telecommunication right from which the income derives (see s.614 ITTOIA)
5: Settlor-interested trust	The settlement which gives rise to the income or capital sums treated as income of a settlor

126.7.3 *Tax year relating to penalty*

Para 3 Sch 22 FA 16 provides:

> (1) Where a standard offshore tax penalty is imposed under paragraph 1 of Schedule 24 to FA 07, the tax year to which that penalty relates is-
>
> (a) if the tax at stake as a result of the inaccuracy is income tax or capital gains tax, the tax year to which the document containing the inaccuracy relates;
>
> (b) if the tax at stake as a result of the inaccuracy is inheritance tax, the year, beginning on 6 April and ending on the following 5 April, in which the liability to tax first arose.
>
> (2) Where a standard offshore tax penalty is imposed under paragraph 1 of Schedule 41 to FA 08 for a failure to comply with an obligation specified in the table in that paragraph, the tax year to which that penalty relates is the tax year to which the obligation relates.
>
> (3) Where a standard offshore tax penalty is imposed under paragraph 6 of Schedule 55 to FA 09 for a failure to make a return or deliver a document specified in the table of paragraph 1 of that Schedule, the tax year to which that penalty relates is-

(a) if the tax at stake is income tax or capital gains tax, the tax year to which the return or document relates;

(b) if the tax at stake is inheritance tax, the year, beginning on 6 April and ending on the following 5 April, in which the liability to tax first arose.

(4) Where a standard offshore penalty is imposed under paragraph 1 of Schedule 18 to F(no.2)A 2017, the tax year to which that penalty relates is-

(a) if the tax at stake in relation to the uncorrected relevant offshore tax non-compliance is income tax or capital gains tax, the tax year or years to which the failure or inaccuracy constituting the relevant offshore tax non-compliance in question relates;

(b) if the tax at stake in relation to the uncorrected relevant offshore tax non-compliance is inheritance tax, the year, beginning on 6 April and ending on the following 5 April, in which the liability to tax first arose.

(5) In sub-paragraph (4) references to uncorrected relevant offshore tax non-compliance are to the relevant offshore tax non-compliance in respect of which the standard offshore penalty is imposed.

126.7.4 *PLR threshold*

Para 4(1) Sch 22 FA 16 provides:

The potential lost revenue threshold is reached where the offshore PLR in relation to a tax year exceeds £25,000.

126.7.5 *Multiple asset-based penalties*

Para 6 sch 22 FA 16 provides:

(1) Sub-paragraphs (2) and (3) apply where-

(a) a standard offshore tax penalty (other than one imposed under paragraph 1 of Schedule 18 to F2A 2017) has been imposed on P, and

(b) the potential lost revenue threshold is met,

in relation to more than one tax year falling within the same investigation period.

(2) Only one asset-based penalty is payable by P in the investigation period in relation to any given asset.

(3) The asset-based penalty is to be charged by reference to the tax year in the investigation period with the highest offshore PLR.

(4) An "investigation period" is-

> (a) the period starting with the day on which this Schedule comes into force and ending with the last day of the last tax year before P was notified of an asset-based penalty in respect of an asset, and
> (b) subsequent periods beginning with the day after the previous period ended and ending with the last day of the last tax year before P is notified of a subsequent asset-based penalty in respect of the asset,
>
> and different investigation periods may apply in relation to different assets.

126.8 RTC penalty

Para 1 sch 18 F2A 17 provides:

> A penalty is payable by a person who-
> (a) has any relevant offshore tax non-compliance to correct at the end of the tax year 2016-17, and
> (b) fails to correct the relevant offshore tax non-compliance within the period beginning with 6 April 2017 and ending with 30 September 2018 (referred to in this Schedule as "the RTC period").

The RTC code applies for years up to 2015/16. It does not apply to the year 2016/17 because at the end of that year (ie at 5 April 2016) there could not yet be anything to correct.

I consider the terms "relevant offshore tax non-compliance" and "failure to correct" separately, later in this chapter.[18]

The RTC code also provided an extended time limit (up to 5 April 2021) for assessments.[19]

While the RTC code is strictly of historical interest only, RTC penalties will continue to occupy practitioners for some years, as non-compliance comes home to roost, so the topic is considered in detail here.

126.8.1 *2018 reporting deadline*

HMRC RTC guidance provides:

> 30 September 2018 was chosen as the final date for corrections as this is the date by which more than 100 countries will exchange data on financial accounts under the Common Reporting Standard.

[18] See 126.39 (RTC Definitions).

[19] See 121.19 (RTC time limit: 5/4/21).

HMRC RTC guidance provided a minor extension:

> You will not be liable to penalties for failing to correct by 30 September 2018 in the following limited circumstances where information is provided later:
>
> - if by midnight on 30 September 2018 you notify your intention to make a disclosure via HMRC's Worldwide Disclosure Facility (WDF) ...
> - or before 30 September 2018 you email a completed form CDF1 to HMRC ... and inform HMRC that you wish to make a disclosure of deliberate behaviour involving offshore tax non-compliance ...
> - HMRC is already undertaking any enquiry or intervention[20] into your affairs and on or before 30 September 2018 you inform the person conducting the enquiry that you wish to make a disclosure of offshore tax non-compliance...[21]

Although the 2018 deadline has passed, and the extended deadline for assessment expires on 5 April 2021, penalties will continue to be imposed as pre-2018 omissions come to light, so the law will continue to be important.

126.9 Culpability definitions

126.9.1 *Significance of culpability*

Culpability is relevant to whether a penalty is due, and to the amount of a penalty if one is due. There are broadly four levels of culpability. In summary:

	Careless	Reasonable excuse	Deliberate not concealed	Deliberate & concealed
Error in document	x		x	x
3rd party error			x	x
Uncorrected assessment	Reasonable steps			
Failure to notify			x	x

[20] CIOT RTC guidance states this includes COP8 (fraud) investigations.

[21] I set out this statement in full in the 2019/20 edition of this work, but abbreviate it here as these details are now becoming less important.

Failure to make return	x	x	x
Asset-based penalty		x	
RTC	x		

126.9.2 *Careless: Definition*

For the definition of careless, see 121.15 (6 year limit: Carelessness). Certain inaccuracies are deemed to be careless where the person is subject to a special measures notice.[22] This topic is not discussed here.

126.9.3 *Deliberate/concealed: Definition*

The definitions are effectively the same, with minor differences of wording and clause order:

Para 3 sch 24 FA 07	**Para 5 sch 41FA 08**	**Para 27 Sch 55 FA 09**
(1) For the purposes of a penalty under paragraph 1, inaccuracy in a document given by P to HMRC is ...	(1) A failure by P to comply with a relevant obligation is- ...	(2) The withholding of information by P is—...
(b) "deliberate but not concealed" if the inaccuracy is deliberate on P's part but P does not make arrangements to conceal it	(b) "deliberate but not concealed" if the failure is deliberate but P does not make arrangements to conceal the situation giving rise to the obligation.	(b) "deliberate but not concealed" if P deliberately withholds the information but does not make arrangements to conceal the fact that the information has been withheld.
(c) "deliberate and concealed" if the inaccuracy is deliberate on P's part and P makes arrangements to conceal it (for example, by submitting false evidence in support of an inaccurate figure)	(a) "deliberate and concealed" if the failure is deliberate and P makes arrangements to conceal the situation giving rise to the obligation	(a) "deliberate and concealed" if P deliberately withholds the information and makes arrangements to conceal the fact that the information has been withheld

[22] Para 47 sch 19 FA 16.

See 121.17.2 (“Deliberate” inaccuracy).

126.10 Reasonable excuse

126.10.1 *Reasonable excuse: Significance*

Para 23(1) sch 55 FA 09	**Para 23(1) sch 18 F2A 17**
Liability to a penalty under any paragraph of this Schedule does not arise in relation to a failure to make a return if P satisfies HMRC or (on appeal) the First-tier Tribunal or Upper Tribunal that there is a reasonable excuse for the failure.	Liability to a penalty under paragraph 1 [RTC penalty] does not arise in relation to a particular failure to correct any relevant offshore tax non-compliance within the RTC period if the person concerned (P) satisfies HMRC or the relevant tribunal (as the case may be) that there is a reasonable excuse for the failure.

For RTC, the date of the failure to correct is 30 September 2018, so that is the date on which there must be a reasonable excuse for the failure.

126.10.2 *Reasonable excuse: Definition*

Apart from the statutory provisions, there is no difference between reasonable excuse and carelessness, which is also a reasonableness test. Perhaps the term “reasonable excuse” is preferred because it seems wrong to put the onus of proof on the individual to show that they were not careless?

There is no general definition, but certain matters are deemed not to be a reasonable excuse. The exclusions mostly concern matters which would probably not be reasonable excuses in any event, ie they are only for the avoidance of doubt. So they set a standard of reasonableness which can be regarded as a fair one.

Archer v HMRC[23] adopted the same general approach to establishing whether a taxpayer has made out a reasonable excuse for s.118(2) TMA purposes as for the penalty regime.

126.10.3 *Tribunal approach*

Perrin v HMRC set out a recommended process for considering whether

[23] [2022] UKUT 61 (TCC) .

a person has a reasonable excuse:[24]

> (1) First, establish what facts the taxpayer asserts give rise to a reasonable excuse (this may include the belief, acts or omissions of the taxpayer or any other person, the taxpayer's own experience or relevant attributes, the situation of the taxpayer at any relevant time and any other relevant external facts).
> (2) Second, decide which of those facts are proven.
> (3) Third, decide whether, viewed objectively, those proven facts do indeed amount to an objectively reasonable excuse for the default and the time when that objectively reasonable excuse ceased. In doing so, the Tribunal should take into account the experience and other relevant attributes of the taxpayer and the situation in which the taxpayer found himself at the relevant time or times. It might assist the Tribunal, in this context, to ask itself the question "was what the taxpayer did (or omitted to do or believed) objectively reasonable for this taxpayer in those circumstances?"
> (4) Fourth, having decided when any reasonable excuse ceased, decide whether the taxpayer remedied the failure without unreasonable delay after that time. In doing so, the Tribunal should again decide the matter objectively, but taking into account the experience and other relevant attributes of the taxpayer and the situation in which the taxpayer found himself at the relevant time or times.

That seems obvious, but perhaps it is helpful to see it expressed.

There have been thousands of reasonable excuse cases, and I do not attempt to review them here.

126.10.4 *Insufficiency of funds*

Para 23(1)(a) sch 55 FA 09/Para 23(2) sch 18 F2A 17 provides:

> an insufficiency of funds is not a reasonable excuse, unless attributable to events outside P’s control

126.10.5 *Unreasonable reliance*

Para 23(1)(b) sch 55 FA 09/Para 23(2) sch 18 F2A 17 provides:

> where P relied on any other person to do anything, that cannot be a reasonable excuse unless P took reasonable care to avoid the failure

That seems obvious and otiose, but it does no harm.

[24] [2018] UKUT 156 at [81].

126.10.6 *Ignorance of law*

In *Perrin v HMRC*:[25]

> One situation that can sometimes cause difficulties is when the taxpayer's asserted reasonable excuse is purely that he/she did not know of the particular requirement that has been shown to have been breached. It is a much-cited aphorism that "ignorance of the law is no excuse", and on occasion this has been given as a reason why the defence of reasonable excuse cannot be available in such circumstances. We see no basis for this argument. Some requirements of the law are well-known, simple and straightforward but others are much less so. It will be a matter of judgment for the FTT in each case whether it was objectively reasonable for the particular taxpayer, in the circumstances of the case, to have been ignorant of the requirement in question, and for how long.

126.10.7 *Excuse ceases*

Para 23(1)(c) sch 55 FA 09/Para 23(2) sch 18 F2A 17 provides:

> where P had a reasonable excuse but the excuse has ceased, P is to be treated as continuing to have the excuse if the failure is remedied without unreasonable delay after the excuse ceased

Contrast 121.15.2 (Failure to correct error).

126.11 Disqualified advice codes

The expression “disqualified advice” is relevant to two penalties. I coin the following terminology:

Code (my terminology)	**Penalty**	**Provision**
Sch 24 disqualified advice code	Error in document	Para 3A, 3B sch 24 FA 07
Sch 18 disqualified advice code	RTC	Para 23(2)(d) sch 18 F2A 17

There are differences in the scope of the rules, and they are best considered as two distinct codes, albeit with substantial overlap. The most important difference is that para 3A sch 24 FA 07 begins:

> (1) This paragraph applies where a document of a kind listed in the Table in paragraph 1 [the sch 24 Table[26]] is given to HMRC by a person (“P”) and the document contains an inaccuracy which –

[25] [2018] UKUT 156 at [82].

[26] See 120.2.1 (Sch 24 Table).

(a) falls within paragraph 1(2) [causes a loss of tax][27], and
(b) arises because the document is submitted on the basis that particular avoidance arrangements (within the meaning of paragraph 3B) had an effect which in fact they did not have.

So:

(1) The sch 24 disqualified advice code only applies when there are (unsuccessful) Avoidance Arrangements.

(2) The RTC code does not have the equivalent provision. As will be seen, *parts* of the RTC disqualified advice code apply only in the case of Avoidance Arrangements; but other parts apply even in the absence of Avoidance Arrangements. Of course, the RTC code only applies if there is offshore tax non-compliance, but that need not involve Avoidance Arrangements.

The rules overlap with and reinforce general principles of when a taxpayer can properly rely on advice; see 121.15.7 (Relying on advisers).

126.11.1 *Avoidance Arrangements*

The definitions are essentially the same in both codes:

Para 3B sch 24 FA 07	**Para 23(6) sch 18 F2A 17**
(1) In paragraph 3A "avoidance arrangements" means, subject to sub-paragraph (3), arrangements which fall within sub-paragraph (2).	
(2) Arrangements[28] fall within this sub-paragraph if, having regard to all the circumstances, it would be reasonable to conclude[29] that the obtaining of a tax advantage was the main purpose, or one of the main purposes, of the arrangements.	In this paragraph "avoidance arrangements" means arrangements as respects which, in all the circumstances, it would be reasonable to conclude that their main purpose, or one of their main purposes, is the obtaining of a tax advantage.

Para 3B(10) sch 24 FA 07/Para 23(9) sch 18 F2A 17 provide something

[27] See 126.2 (Error in taxpayer document). Disqualified advice is not relevant in relation to the penalties in para 1A and 2 (3rd party errors and uncorrected assessments).

[28] Para 3A(9) sch 24 FA 07/Para 23(9) sch 18 F2A 17 provide the standard (unnecessary) IT definition: see App 2.2.3 (Definitions of "arrangement").

[29] See App 2.24 (Reasonable-to-assume).

close to the GAAR definition of tax advantage.[30]

The terminology ("avoidance arrangements") is tendentious because the arrangements need not constitute "avoidance" in the strict sense of the word. I write Avoidance Arrangements with initial capitals to reflect the technical nature of the expression. But the concept is a familiar one.[31]

126.11.2 *Established practice*

Para 3B(3) sch 24 FA 07	**Para 23(7) sch 18 F2A 17**
Arrangements are not avoidance arrangements for the purposes of paragraph 3A if (although they fall within sub-paragraph (2))—	But arrangements are not avoidance arrangements for the purposes of this paragraph if (although they fall within sub-paragraph (6))-
(a) they are arrangements which accord with established practice, and	[Identical]
(b) HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice.	[Identical]

I refer to this as the "**established-practice defence**".[32]

HMRC RTC guidance provides:

> There will be cases where HMRC have agreed the correct treatment for an issue (for example during the course of an enquiry, via a ruling or through discussion with a CRM).
>
> Provided there has been no material change to the relevant facts or legislation and that all relevant information requested at the time was provided, HMRC will accept that any returns subsequently submitted in line with the agreed treatment were made in accordance with established practice and the arrangements concerned will not be considered avoidance arrangements for the purposes of the RTC. This is in line with the acceptance of established practice in relation to advice from an interested person.

[30] See 3.19.1 (Tax advantage: Definitions). For completeness, the term is extended to include:

> (g) in relation to VAT, anything which is a tax advantage for the purposes of Schedule 18 to FA 16 under paragraph 5 of that Schedule.

VAT is not discussed here.

[31] See 3.19 ("Tax advantage").

[32] See 121.9.3 (Prevailing practice defence).

126.11.3 *Avoidance arrangements: Significance*

The rule is in para 3A(2) but it needs to be read with para (1) to follow the sense:

> (1) This paragraph applies where a document of a kind listed in the Table in paragraph 1 [the sch 24 Table[33]] is given to HMRC by a person ("P") and the document contains an inaccuracy which –
>
> (a) falls within paragraph 1(2) [causes a loss of tax][34], and
>
> (b) arises because the document is submitted on the basis that particular avoidance arrangements (within the meaning of paragraph 3B) had an effect which in fact they did not have.
>
> (2) It is to be presumed that the inaccuracy was careless, within the meaning of paragraph 3, unless –
>
> (a) the inaccuracy was deliberate on P's part, or
>
> (b) P satisfies HMRC or (on an appeal notified to the tribunal[35]) the tribunal that P took reasonable care to avoid inaccuracy.

One consequence of Avoidance Arrangements for the Sch 24 disqualified advice code is that the onus of proof on carelessness/reasonable care is on P. This is distinct from the disqualified advice rules considered separately below: this rule applies even if there is no disqualified advice.

There is no equivalent rule in the RTC code, as the onus of proof is already on the taxpayer.

126.12 Disqualified advice

126.12.1 *Why disqualified advice matters*

Sch 24 code: Para 3A(3) sch 24 FA 07	**RTC: para 23(2)(d) sch 18 F2A 17**
In considering whether P took reasonable care to avoid inaccuracy, HMRC and (on an appeal notified to the tribunal) the tribunal must take no account of any evidence of any reliance by P on advice where the advice is disqualified.	reliance on advice is to be taken automatically not to be a reasonable excuse if it is disqualified under sub-paragraph (3).

[33] See 122.2.1 (Sch 24 Table).

[34] See 126.2 (Error in taxpayer document). Disqualified advice is not relevant in relation to the penalties in para 1A and 2 (3rd party errors and uncorrected assessments).

[35] "The tribunal" has the same meaning as in paragraph 17 (see paragraph 17(5A)).

The rules appear to be the same: In short, disqualified advice is ignored in determining carelessness/reasonable excuse, so a taxpayer who in fact took reasonable care (relying on advisers) may be deemed careless/not have a reasonable excuse. But as noted above, the Sch 24 disqualified advice code only applies where there are Avoidance Arrangements.

I refer to advice that is not disqualified as **"independent advice"**.

Advisers need to consider whether their advice is disqualified, within the scope of these rules, and if it is, they should advise the client to take independent advice.

What happens if this is not done? The fact that the taxpayer relies on disqualified advice does not necessary mean that they are careless. The circumstances may be such that a reasonable taxpayer might have proceeded without advice in which case they are not careless. Or it may be that an independent adviser would have given the same advice as the disqualified adviser, in which case the taxpayer may be held to be careless, but the carelessness does not cause the loss of tax.

126.12.2 *Disqualified advice: Definition*

Sch 24 code: para 3A(4) sch 24 FA 07	**RTC: para 23(3) sch 18 F2A 17**
Advice is "disqualified" if any of the following applies ... but this is subject to sub-paragraphs (5) and (7).	Advice is disqualified (subject to sub-paragraph (4)) if-

There are five categories of disqualified advice.

126.13 Interested person

Para 3A(3)(a) sch 24 FA 07/Para 23(3)(a) sch 18 F2A 17 provides advice is disqualified if:

> (a) the advice was given to P by an interested person

It is necessary to identify the person who gives the advice. HMRC RTC guidance provides:

> HMRC's view is that when considering who the interested person is, person includes a body of persons both corporate or unincorporate. It therefore follows that the interested person might be an individual, or an organisation such as a limited company, firm of accountants or a limited liability partnership.

In fact a firm (ie a partnership) is not a person, but para (a) and (b) are wide enough that the point is not likely to arise.

126.13.1 *"Interested person"*

"Interested person" matters because their advice is disqualified. The basic definitions are effectively identical:

Sch 24 code: para 3A(6) sch 24 FA 07	**RTC: para 23(5) sch 18 F2A 17**
In sub-paragraph (4) "an interested person" means –	In sub-paragraph (3) "an interested person" means, in relation to any relevant offshore tax non-compliance-
(a) a person, other than P, who participated in the avoidance arrangements or any transaction forming part of them, or (b) a person who for any consideration (whether or not in money) facilitated P's entering into the avoidance arrangements.	(a) a person (other than P) who participated in relevant avoidance arrangements[36] or any transaction forming part of them, or (b) a person who for any consideration (whether or not in money) facilitated P's entering into relevant avoidance arrangements.

The object is to prevent an adviser marking their own homework; and what amounts to "facilitating" should be understood in that context. Para 3A(7) sch 24 FA 07 provides an exception:

> Where (but for this sub-paragraph) advice would be disqualified under paragraph (a) of sub-paragraph (4) [advice by disqualified person] because it was given by a person within sub-paragraph (6)(b) [a person who facilitates the arrangements], the advice is not disqualified under that paragraph if –
> (a) the person giving the advice had appropriate expertise for giving it,
> (b) the advice took account of P's individual circumstances, and
> (c) at the time when the question whether the advice is disqualified arises–

[36] Para 23(8) sch 18 F2A 17 provides: "Where any relevant offshore tax non-compliance arose originally because information was submitted to HMRC on the basis that particular avoidance arrangements had an effect which they did not have, those avoidance arrangements are "relevant avoidance arrangements" in relation to that tax non-compliance."

> (i) Condition E in paragraph 3B(5) is met in relation to the avoidance arrangements [avoidance related rule], but
> (ii) none of Conditions A to D in paragraph 3B(5) is or has at any time been met in relation to them.

I find this rather strange. Perhaps HMRC thought so too, because it has no RTC counterpart.

126.13.2 *Scope of disqualification*

Advice by an interested person which does not relate to Avoidance Arrangements is not disqualified.
CIOT RTC guidance provides:

> The adviser is only disqualified as respects the advice they gave on the tax avoidance. But their advice can be relied on in relation to other matters, e.g. whether the taxpayer's behaviour was deliberate or careless, e.g. if the adviser helps the person disclose and that disclosure is on the basis that 4 years' tax was due (reasonable care) then this is not disqualified advice if it later turns out that the person was careless, so 6 years' tax is due.

HMRC RTC guidance provides an example relating to domicile advice:

> **Example 9: advice not related to avoidance arrangements (not disqualified) (Ian ("N"))**
> N was unsure as to his correct domicile status and sought advice from a large firm of accountants. The firm thoroughly reviewed his circumstances and advised that in their view he was not domiciled in the UK for tax purposes.
> The firm then advised N on how to structure his affairs to pay less tax on his foreign income. N did not make a correction under the RTC because he believed, based on the advice he had received, that he had no correction to make.
> Some years later HMRC challenged N's domicile status and after a lengthy enquiry established that he was actually domiciled in the UK. Because of this N owed tax in relation to his offshore income for tax years 2013 to 2014, 2014 to 2015 and 2015 to 2016. N should have made a correction under the RTC.
> N claimed that he had a reasonable excuse because he had taken and followed appropriate advice and claimed that the incorrect advice is not disqualified. The incorrect advice related to his domicile status.
> The advice was given by someone with the appropriate expertise, took account of all of his relevant circumstances and did not relate to

> avoidance arrangements. The advice was not therefore disqualified and N did have a reasonable excuse.
> It is important that the inaccurate advice related to N's domicile status but that the domicile status did not involve avoidance arrangements facilitated by the advisor. N did not take any steps to alter his domicile status based on the advice.
> In these circumstances his domicile status does not fall within the definition of avoidance arrangements. Although the subsequent steps do fall within the definition of avoidance arrangements, the advice relating to the avoidance arrangements was correct.

CIOT RTC guidance provides:

> Example 9 in the updated RTC guidance is correct only if the taxpayer gave the adviser all correct and complete relevant information to use when providing the advice on his domicile status. If this did not happen then there is no reasonable excuse

Bearing in mind that there is no limit to evidence which may be relevant to domicile, this requirement is impossible to satisfy, if it is applied strictly. Though there is always the defence in 126.18 (Advice not thought disqualified).

126.14 Arrangement with interested person

Para 3A(3)(b) sch 24 FA 07/Para 23(3)(b) sch 18 F2A 17 provides advice is disqualified if:

> (b) the advice was given to P as a result of arrangements made between an interested person and the person who gave the advice

HMRC RTC guidance provides:

> [1] HMRC accepts that if a person gives all of the advice after all of the avoidance arrangements have taken place that advice cannot relate to the facilitation of those avoidance arrangements and will not be disqualified on the grounds of it being from an interested person (as long as the adviser did not participate in the relevant avoidance arrangements).
> [2] HMRC will also not seek to argue that the new advice is disqualified because it is as a result of arrangements made between an interested person and the person who gave the advice.

Point [1] is self-evident, but point [2] is important.

126.15 Appropriate expertise

Para 3A(3)(c) sch 24 FA 07/Para 23(3)(c) sch 18 F2A 17 provides advice is disqualified if:

> (c) the person who gave the advice did not have appropriate expertise for giving the advice,

HMRC RTC guidance provides:

> **CH123300 circumstances when a penalty is not due** [Jan 2022]
> HMRC will accept that anyone who is a member of a UK recognised legal, accounting, or tax advisory body will have the appropriate expertise to give advice on UK tax matters.

At first sight this seems generous, as CIOT note in the CIOT RTC guidance:

> However, if it questionable whether the member genuinely has the appropriate expertise on the area of tax concerned or if the client knows he lacks the expertise, HMRC's guidance may not offer protection.

But the individual may reasonably expect a competent and qualified adviser to know whether he has the expertise, and to refuse to act if not; and so the individual should in principle be protected; see 126.18 (Advice not thought disqualified).

126.16 All relevant circumstances

Advice is disqualified if:

Sch 24 code: para 3A sch 24 FA 07	**RTC: para 23 sch 18 F2A 17**
(d) the advice took no account of P's individual circumstances;	(d) the advice failed to take account of all P's individual circumstances (so far as relevant to the matters to which the advice relates)

The RTC wording seems to have a more stringent nuance, but it comes to the same thing.

RTC advice continues:

> Advice needs to take account of all of the taxpayer's relevant circumstances
> You can only claim that you have a reasonable excuse for not making a correction because you relied on advice if the advice that you are

> relying on takes account of all your relevant individual circumstances. This means that the adviser must have been given full and accurate details of all matters that are relevant to the issue.
>
> Care should be taken if you have relied on advice that was given before the transactions took place. Such advice runs the risk of failing to take account of all of your relevant circumstances.
>
> If you rely on advice that was given before the transactions took place and the transactions then took place in a slightly different way and that slight difference means tax is due, it will be HMRC's position that the advice failed to take account of all of your relevant circumstances. This will particularly be the case if you have failed to correctly follow the advice.
>
> Whether advice takes account of all your relevant individual circumstances is a continuing requirement. For example, if advice that takes account of all your circumstances was taken in 2011, it is reasonable for you to be able to rely on that advice when completing your next tax return.
>
> However, as time passes it is increasingly likely that your circumstances, or the legislation that the advice is based on, will have changed and the advice may no longer be correct.
>
> If you rely on advice that, whilst originally accurate, becomes wrong because of a change in your circumstances or a change in the legislation you cannot claim to have a reasonable excuse based on the advice that has become out of date.
>
> For this reason, if you are relying on old advice, you should check your position carefully before deciding whether or not a correction is needed.

CIOT RTC guidance provides:

> Even one unknown or ignored fact therefore may disqualify the advice or otherwise mean that the taxpayer will not be deemed to have a reasonable excuse for failing to correct (unless the taxpayer provided all the information/documentation that the adviser requested and did not know that the other piece of information was needed/relevant)

CIOT RTC guidance provides:

> Fresh advice is difficult to rely on in any case where there is a risk that facts could come to light later of which account should have been taken.
>
> This means that nil liability disclosures will normally need to be used as a route to providing certainty for taxpayers.

126.16.1 *Old advice*

HMRC RTC guidance provides:

> **Example 13: disqualified advice: failure to take account of all circumstances (Larry)**
> L is not domiciled in the UK and took advice from an accountant in 2006 about what tax he should pay on his foreign income. He was correctly advised on how to structure his affairs and what income to declare if he did this.
> L followed this advice and completed his return for tax year 2006 to 2007 and subsequent years accordingly but never took any further advice.
> Because of changes to the rules on tax payable by people who are not domiciled in the UK, all of L's returns since tax year 2008 to 2009 have been incorrect. L was unaware of the changes, and did not make a correction under the RTC.
> In 2019 HMRC opened an enquiry and established the correct position.
> L has not acted deliberately but cannot be said to have taken reasonable care in relation to his returns submitted some years after the advice was taken.
> His failure to take further advice means he has been careless and should have corrected his non-compliance for the tax years 2011 to 2012 through to 2016 to 2017. L cannot claim to have a reasonable excuse as the advice that he relied on failed to take account of all of his relevant circumstances.

L should not have completed his own returns. He should have instructed accountants to do this for him. The experience of Belloc's Lord Finchley comes to mind. But perhaps this does not often happen.

CIOT RTC guidance provides:

> Historic advice may be difficult to rely on as a reasonable excuse because
> (1) Risk facts may come to light which are relevant circumstances of which account was not taken
> (2) Uncertainty over whether what the advice related to does or does not fall within the definition of avoidance
> (3) Law may have changed as a result of subsequent decided cases
>
> HMRC consider that a change in law or practice since the advice was given is a relevant circumstance and thus invalidates the advice or the reasonable excuse

126.16.2 *Second opinion*

HMRC give some advice on how to obtain advice:

> If the advice you intend to rely on is disqualified as it was given by an interested person, or someone who has made arrangements with the interested person, you should consider either disclosing the matter to HMRC so it has been corrected and no FTC [failure to correct] penalty could be due, or taking further advice from a person who did not participate in, and was not involved in facilitating, the avoidance arrangements.
>
> In particular, taxpayers with more complex structures including those where the purported tax advantages are reliant on commerciality or the interpretation of complicated anti avoidance provisions are encouraged to consider seeking specialist tax advice from someone not involved in the original arrangements. This will enable them to identify the potential risks associated with a structure to identify whether there is an obligation to correct. By taking these steps, a taxpayer may well assist any future reasonable excuse claim should a challenge by HMRC be forthcoming.
>
> *Further advice from the same adviser*
>
> The legislation makes it clear that advice given to the taxpayer as a result of arrangements made between an interested person and the person who gave the advice is disqualified.
>
> You should therefore take care when seeking further advice to ensure it is not disqualified on this basis.

126.17 Receiver of advice

Para 3A(4) sch 24 FA 07/Para 23 sch 18 F2A 17 provides advice is disqualified if:

> (e) the advice was addressed to, or was given to, a person other than P.

I do not think there is any meaningful difference between addressed to and given to; in the discussion below I refer to "given" and leave "addressed" to be understood.

It is necessary to identify the person to whom advice is given. In formal written advice this should be stated expressly but the contract between adviser and client (in the form of a client care letter) will generally identify to whom advice is given. That will generally be the same as the person to whom the adviser owes contractual or common law duties of care.

CIOT RTC advice notes:

> Trustees cannot therefore rely on advice given to the settlor or beneficiaries.

And vice versa. But an adviser can give advice to trustees and to settlor/beneficiaries at the same time, and (unless there are separate advisers, or conflicts) that is what an adviser should do. In that case they can all rely on the advice. Advice is not disqualified if it is given to a number of persons including P. That would be absurd.

126.18 Advice not known disqualified

Sch 24 code: para 3A(5) FA 07	**RTC: para 23(5) sch 18 F2A 17**
Where (but for this sub-paragraph) advice would be disqualified under any of paragraphs (a) to (c) of sub-paragraph (4), the advice is not disqualified under that paragraph if at the relevant time[37] P –	Where advice would otherwise be disqualified under any of paragraphs (a) to (d) of sub-paragraph (3) the advice is not disqualified if at the end of the RTC period P –
(a) has taken reasonable steps to find out whether or not the advice falls within that paragraph, and (b) reasonably believes that it does not.	[Identical]

This defence does not apply:

(1) for the Sch 24 disqualified advice code only: to disqualification (d) (advice took no account of P's individual circumstances)

(2) to disqualification (e) (advice addressed to P).

I wonder if that is just a drafting error.

126.19 *Disqualified advice: PRs*

Para 3A(8) sch 24 FA 07 provides:

> If the document mentioned in sub-paragraph (1) is given to HMRC by P as a personal representative of a deceased person ("D")–
>
> (a) sub-paragraph (4) is to be read as if–
>
> (i) the references in paragraphs (a) and (b) to P were to P or D;

[37] Para 3A(9) provides: In this paragraph ... "the relevant time" means the time when the document mentioned in sub-paragraph (1) is given to HMRC".

(ii) the reference in paragraph (d) to P were to D, and

(iii) the reference in paragraph (e) to a person other than P were to a person who is neither P nor D,

(b) sub-paragraph (6) is to be read as if–

(i) the reference in paragraph (a) to P were a reference to the person to whom the advice was given, and

(ii) the reference in paragraph (b) to P were to D (or, where P also participated in the avoidance arrangements, P or D), and

(c) sub-paragraph (7) is to be read as if the reference in paragraph (b) to P were to D.

Amended as para 3A(8) directs, para 3A sch 24(4)(6)(7) FA 07 provide:

(4) Advice is "disqualified" if any of the following applies –

(a) the advice was given to P or D by an interested person;

(b) the advice was given to P or D as a result of arrangements made between an interested person and the person who gave the advice;

(c) the person who gave the advice did not have appropriate expertise for giving the advice;

(d) the advice took no account of P's individual circumstances;

(e) the advice was addressed to, or given to, a person ~~other than P~~ who is neither P nor D;

but this is subject to sub-paragraphs (5) and (7).

...

(6) In sub-paragraph (4) "an interested person" means –

(a) a person, other than ~~P~~ the person to whom the advice was given, who participated in the avoidance arrangements or any transaction forming part of them, or

(b) a person who for any consideration (whether or not in money) facilitated ~~P's~~ D's (or, where P also participated in the avoidance arrangements, P's or D's) entering into the avoidance arrangements.

(7) Where (but for this sub-paragraph) advice would be disqualified under paragraph (a) of sub-paragraph (4) [advice by disqualified person] because it was given by a person within sub-paragraph (6)(b) [a person who facilitates the arrangements], the advice is not disqualified under that paragraph if –

(a) the person giving the advice had appropriate expertise for giving it,

(b) the advice took account of ~~P's~~ D's individual circumstances, and

(c) at the time when the question whether the advice is disqualified arises–

(i) Condition E in paragraph 3B(5) is met in relation to the avoidance arrangements [avoidance related rule], but

(ii) none of Conditions A to D in paragraph 3B(5) is or has at any time been met in relation to them.

126.20 Egregious arrangements

Para 3B sch 24 FA 07 provides:

> (4) If, at any time, any of Conditions A to E is met in relation to particular arrangements–

I refer to this as **"egregious arrangements"**. In such cases:

> (a) for the purposes of this Schedule the arrangements are to be taken to fall within (and always to have fallen within) sub-paragraph (2)

That is, egregious arrangements are taken to be Avoidance Arrangements.

> (b) in relation to the arrangements, sub-paragraph (3) (and the reference to it in sub-paragraph (1)) are to be treated as omitted.

That is, the established-practice defence does not apply. Para 3B(4) concludes:

> This does not prevent arrangements from falling within sub-paragraph (2) other than by reason of one or more of Conditions A to E being met.

126.20.1 *Cond. A: DOTAS applies*

Para 3B sch 24 FA 07 provides:

> (5) Conditions A to E are as follows–
>
> (a) Condition A is that the arrangements are DOTAS arrangements within the meaning given by section 219(5) and (6) of FA 2014;

That takes us to s.219 FA 2014:

> (5) "DOTAS arrangements" means—
>
> (a) notifiable arrangements to which HMRC has allocated a reference number under section 311 of FA 2004,
>
> (b) notifiable arrangements implementing a notifiable proposal where HMRC has allocated a reference number under that section to the proposed notifiable arrangements, or
>
> (c) arrangements in respect of which the promoter must provide prescribed information under section 312(2) of that Act by reason of the arrangements being substantially the same as notifiable arrangements within paragraph (a) or (b).

> (6) But the notifiable arrangements within subsection (5) do not include arrangements in relation to which HMRC has given notice under section 312(6) of FA 2004 (notice that promoters not under duty imposed to notify client of reference number).

Condition B relates to VAT and indirect tax, and is not discussed here.

126.20.2 *Condition C: GAAR applies*

Para 3B(5) sch 24 FA 07 provides:

> (c) Condition C is that both of the following apply–
> (i) P has been given a notice under a provision mentioned in sub-paragraph (6) stating that a tax advantage arising from the arrangements is to be counteracted, and
> (ii) that tax advantage has been counteracted under section 209 of FA 2013;
>
> (6) The provisions referred to in sub-paragraph (5)(c)(i) are–
> (a) paragraph 12 of Schedule 43 to FA 2013 (general anti-abuse rule: notice of final decision);
> (b) paragraph 8 or 9 of Schedule 43A to that Act (pooled or bound arrangements: notice of final decision);
> (c) paragraph 8 of Schedule 43B to that Act (generic referrals: notice of final decision).

126.20.3 *Cond D: Follower notice*

Para 3B(5) sch 24 FA 07 provides:

> (d) Condition D is that a follower notice[38] under section 204 of FA 2014 has been given to P by reference to the arrangements (and not withdrawn) and–
> (i) the necessary corrective action for the purposes of section 208 of FA 2014 has been taken in respect of the denied advantage, or

[38] Para 3B(7) provides: "In sub-paragraph (5)(d) the reference to giving a follower notice to P includes giving a partnership follower notice in respect of a partnership return in relation to which P is a relevant partner; and for the purposes of this sub-paragraph–
(a) "relevant partner" has the meaning given by paragraph 2(5) of Schedule 31 to FA 2014;
(b) a partnership follower notice is given "in respect of" the partnership return mentioned in paragraph 2(2)(a) or (b) of that Schedule."

> (ii) the denied advantage has been counteracted otherwise than as mentioned in sub-paragraph (i);

Para 3B sch 24 FA 07 provides:

> (8) For the purposes of sub-paragraph (5)(d) it does not matter whether the denied advantage has been dealt with–
>
> (a) wholly as mentioned in one or other of sub-paragraphs (i) and (ii) of sub-paragraph (5)(d), or
>
> (b) partly as mentioned in one of those sub-paragraphs and partly as mentioned in the other;
>
> and "the denied advantage" has the same meaning as in Chapter 2 of Part 4 of FA 2014 (see section 208(3) of and paragraph 4(3) of Schedule 31 to that Act).

126.20.4 *Cond. E: Avoidance-related rule*

Para 3B(5) sch 24 FA 07 provides:

> (e) Condition E is that a tax advantage asserted[39] by reference to the arrangements has been counteracted (by an assessment, an amendment of a return or claim, or otherwise) on the basis that an avoidance-related rule applies in relation to P's affairs.

Para 3B(10) sch 24 FA 07 provides:

> In this paragraph–
>
> "avoidance-related rule" has the same meaning as in Part 4 of Schedule 18 to FA 16 (see paragraph 25 of that Schedule)

So we turn to para 25 sch 18 FA 16:

> (1) In this Part of this Schedule "avoidance-related rule" means a rule in Category 1 or 2.
>
> (2) A rule is in Category 1 if it refers (in whatever terms)—
>
> (a) to the purpose or main purpose or purposes of a transaction, arrangements or any other action or matter, and
>
> (b) to whether or not the purpose in question is or involves the avoidance of tax or the obtaining of any advantage in relation to tax (however described).
>
> (3) A rule is also in Category 1 if it refers (in whatever terms) to—
>
> (a) expectations as to what are, or may be, the expected benefits

[39] Para 3B(9) provides: "For the purposes of sub-paragraph (5)(e) a has been "asserted by reference to" the arrangements if a return, claim or appeal has been made by P on the basis that the results from the arrangements."

of a transaction, arrangements or any other action or matter, and

(b) whether or not the avoidance of tax or the obtaining of any advantage in relation to tax (however described) is such a benefit.

For the purposes of paragraph (b) it does not matter whether the reference is (for instance) to the "sole or main benefit" or "one of the main benefits" or any other reference to a benefit.

(4) A rule falls within Category 2 if as a result of the rule a person may be treated differently for tax purposes depending on whether or not purposes referred to in the rule (for instance the purposes of an actual or contemplated action or enterprise) are (or are shown to be) commercial purposes.

(5) For example, a rule in the following form would fall within Category 1 and within Category 2—

> "**Example rule**
>
> Section X does not apply to a company in respect of a transaction if the company shows that the transaction meets Condition A or B.
>
> Condition A is that the transaction is effected—
>
> (a) for genuine commercial reasons, or
>
> (b) in the ordinary course of managing investments."

126.21 Amount of penalty

126.21.1 *Navigation*

Type of penalty	**Amount specified in**	**See para.**
Error-based penalties	*Sch 24 FA 07*	
Error in document	Para 4	126.21.2
Error due to 3rd party	Para 4B	126.21.3
Uncorrected assessment	Para 4C	126.21.3
Failures of omission		
Failure to notify chargeability	Para 6(1) sch 41 FA 08	126.21.4
Failure to make return	Paras 3-6 sch 55 FA 09	126.21.5
Asset-based penalties	Para 7 sch 22 FA 16	126.21.10
Requirement to correct	Para 14(1) sch 18 F2A 17	126.21.11

126.21.2 *Amount: Error in document*

Para 4 sch 24 FA 07 provides:

> (1) This paragraph sets out the penalty payable under paragraph 1 [error in document].

(2) If the inaccuracy is in category 1, the penalty is—	(3) If the inaccuracy is in category 2, the penalty is—	(4) If the inaccuracy is in category 3, the penalty is—
(a) for careless action,	(a) for careless action,	(a) for careless action,

30% of the potential lost revenue, (b) for deliberate but not concealed action, 70% of the potential lost revenue, and (c) for deliberate and concealed action, 100% of the potential lost revenue.	45% of the potential lost revenue, (b) for deliberate but not concealed action, 105% of the potential lost revenue, and (c) for deliberate and concealed action, 150% of the potential lost revenue.	60% of the potential lost revenue, (b) for deliberate but not concealed action, 140% of the potential lost revenue, and (c) for deliberate and concealed action, 200% of the potential lost revenue.

In tabular form:

Category	**Careless**	**Deliberate not concealed**	**Deliberate & concealed**
1	30%	70%	100%
2	45%	105%	150%
3	60%	140%	200%

126.21.3 *3rd party error/uncorrected assessment*

Sch 24 FA 07 provides:

> 4B The penalty payable under paragraph 1A [error due to 3rd party] is 100% of the potential lost revenue.
> 4C The penalty payable under paragraph 2 [uncorrected assessment] is 30% of the potential lost revenue.

126.21.4 *Amount: Failure to notify*

Para 6(1) sch 41 FA 08 provides:

> This paragraph sets out the penalty payable under paragraph 1 [failure to notify chargeability].

Para 6(2): category 1	**Para 6(3): category 2**	**Para 6(4): category 4**
(2) If the failure is in category 1, the penalty is- (a) for a deliberate and concealed failure, 100% of the potential lost revenue, (b) for a deliberate but not concealed failure, 70% of the potential lost revenue, and (c) for any other case, 30% of the potential lost revenue.	(3) If the failure is in category 2, the penalty is- (a) for a deliberate and concealed failure, 150% of the potential lost revenue, (b) for a deliberate but not concealed failure, 105% of the potential lost revenue, and (c) for any other case, 45% of the potential lost revenue.	(4) If the failure is in category 3, the penalty is- (a) for a deliberate and concealed failure, 200% of the potential lost revenue, (b) for a deliberate but not concealed failure, 140% of the potential lost revenue, and (c) for any other case, 60% of the potential lost revenue.

This is the same as error-based penalties, though (for no obvious reason) set out in a different order. In tabular form:

Category	**Careless**	**Deliberate not concealed**	**Deliberate & concealed**
1	30%	70%	100%
2	45%	105%	150%
3	60%	140%	200%

126.21.5 *Amount: Failure to make return*

For IT/CGT/CT it makes sense that the penalties are less, because the taxpayer is by definition on the HMRC radar: a duty to make a return arises when HMRC have given the necessary notice. So the failure, unless very extended, is only administrative and the purpose is mainly to chivy compliance. But for failure to deliver an IHT Account, that is not the case and the rule is perhaps slightly generous.

Para 1 sch 55 FA 09 provides:

> (3) If P's failure falls within more than one paragraph of this Schedule, P is liable to a penalty under each of those paragraphs (but this is subject to paragraph 17(3)).

Sch 55 FA 09 provides:

> 2 Paragraphs 3 to 6 apply in the case of a return falling within any of items 1 to 3, 5 and 7 to 13 in the Table.

That list includes the IT/CT/IHT returns which concern the main themes of this book.[40]

126.21.6 *Delay up to 3 months*

Para 3 sch 55 FA 09 provides:

> 3 P is liable to a penalty under this paragraph of £100.

126.21.7 *Delay after 3 months*

Para 4 sch 55 FA 09 provides:

> 4 (1) P is liable to a penalty under this paragraph if (and only if)-
> (a) P's failure continues after the end of the period of 3 months beginning with the penalty date,
> (b) HMRC decide that such a penalty should be payable, and

[40] See 126.6.1 (Sch 55 Table).

> (c) HMRC give notice to P specifying the date from which the penalty is payable.
>
> (2) The penalty under this paragraph is £10 for each day that the failure continues during the period of 90 days beginning with the date specified in the notice given under sub-paragraph (1)(c).
>
> (3) The date specified in the notice under sub-paragraph (1)(c)-
>
> (a) may be earlier than the date on which the notice is given, but
>
> (b) may not be earlier than the end of the period mentioned in sub-paragraph (1)(a).

126.21.8 *Delay after 6 months*

Now we are getting more serious. Para 5 sch 55 FA 09 provides:

> 5 (1) P is liable to a penalty under this paragraph if (and only if) P's failure continues after the end of the period of 6 months beginning with the penalty date.
>
> (2) The penalty under this paragraph is the greater of-
>
> (a) 5% of any liability to tax which would have been shown in the return in question, and
>
> (b) £300.

126.21.9 *Delay after 12 months*

Para 6 sch 55 FA 09 provides:

> (1) P is liable to a penalty under this paragraph if (and only if) P's failure continues after the end of the period of 12 months beginning with the penalty date.
>
> (2) Where, by failing to make the return, P deliberately withholds information which would enable or assist HMRC to assess P's liability to tax, the penalty under this paragraph is determined in accordance with sub-paragraphs (3) and (4).
>
> (3) If the withholding of the information is deliberate and concealed, the penalty is the greater of-
>
> (a) the relevant percentage of any liability to tax which would have been shown in the return in question, and
>
> (b) £300.
>
> (4) If the withholding of the information is deliberate but not concealed, the penalty is the greater of-
>
> (a) the relevant percentage of any liability to tax which would have been shown in the return in question, and
>
> (b) £300.

> (3A) For the purposes of sub-paragraph (3)(a), the relevant percentage is-
> (a) for the withholding of category 1 information, 100%,
> (b) for the withholding of category 2 information, 150%, and
> (c) for the withholding of category 3 information, 200%.
>
> (4A) For the purposes of sub-paragraph (4)(a), the relevant percentage is-
> (a) for the withholding of category 1 information, 70%,
> (b) for the withholding of category 2 information, 105%, and
> (c) for the withholding of category 3 information, 140%.
>
> (5) In any case not falling within sub-paragraph (2) , the penalty under this paragraph is the greater of-
> (a) 5% of any liability to tax which would have been shown in the return in question, and
> (b) £300.

In summary tabular form:

Category	**Not deliberate**	**Deliberate not concealed**	**Deliberate & concealed**
1	5%	70%	100%
2	5%	105%	150%
3	5%	140%	200%

126.21.10 *Amount: Asset-based penalty*

Para 7 sch 22 FA 16 provides:

> (1) The standard amount of the asset-based penalty is the lower of-
> (a) 10% of the value of the asset, and
> (b) offshore PLR × 10.

I do not discuss the rules for valuation and identification of assets, in part 10-14 sch 22 FA 16, though I hope to do so in a future edition.

126.21.11 *Amount: RTC penalty*

Para 14(1) sch 18 F2A 17 provides:

> The penalty payable under paragraph 1 [RTC penalty] is 200% of the offshore PLR attributable to the uncorrected offshore tax non-compliance (subject to any reduction under a provision of this Part of this Schedule).

This is more than the normal penalties. Para 14(2) sch 18 F2A 17 provides:

In this Part of this Schedule "the uncorrected offshore tax non-compliance" means-

(a) the relevant offshore tax non-compliance, in a case where none of it is corrected within the RTC period, or

(b) so much of the relevant offshore tax non-compliance as has not been corrected within the RTC period, in a case where part of it is corrected within that period.

126.22 Categories of information/inaccuracy/failure

126.22.1 *Navigation*

Category	**Provision**	**See para.**
Information	Para 6A sch 55 FA 09	126.22.2
Inaccuracy	Para 4A sch 24 FA 07	126.22.3
Failure	Para 6A sch 41 FA 2008	126.22.4

126.22.2 *Categories of information*

This is relevant to the penalty for failure to make a return.

Para 6A sch 55 FA 09 provides:

Category 1	**Category 2**	**Category 3**
(1) Information is category 1 information if-	(2) Information is category 2 information if-	(3) Information is category 3 information if-
(a) it involves a domestic matter, or		
(b) it involves an offshore matter and-	(a) it involves an offshore matter or an offshore transfer,	(a) it involves an offshore matter or an offshore transfer,
(i) the territory in question is a category 1 territory, or	(b) the territory in question is a category 2 territory, and	(b) the territory in question is a category 3 territory, and
(ii) it is information which would enable or assist HMRC to assess P's liability to a tax other than income tax or capital gains tax.	(c) it is information which would enable or assist HMRC to assess P's liability to income tax, capital gains tax or inheritance tax	(c) it is information which would enable or assist HMRC to assess P's liability to income tax, capital gains tax or inheritance tax.

126.22.3 *Categories of inaccuracy*

Para 4A sch 24 FA 07 provides:

Category 1	**Category 2**	**Category 3**
(1) An inaccuracy is in category 1 if—	(2) An inaccuracy is in category 2 if—	(3) An inaccuracy is in category 3 if—
(a) it involves a domestic matter, or		
(b) it involves an offshore matter and—	(a) it involves an offshore matter or an offshore transfer,	(a) it involves an offshore matter or an offshore transfer,
(i) the territory in question is a category 1 territory, or	(b) the territory in question is a category 2 territory, and	(b) the territory in question is a category 3 territory, and
(ii) the tax at stake is a tax other than income tax or capital gains tax.	(c) the tax at stake is income tax, capital gains tax or inheritance tax.	(c) the tax at stake is income tax, capital gains tax or inheritance tax.

126.22.4 *Categories of failure*

Para 6A sch 41 FA 2008 provides:

Para 6A(1): Category 1	**Para 6A(2): Category 2**	**Para 6A(3): Category 3**
A failure is in category 1 if—	A failure is in category 2 if—	A failure is in category 3 if—
(a) it involves a domestic matter, or		
(b) it involves an offshore matter and—	(a) it involves an offshore matter or an offshore transfer,	(a) it involves an offshore matter or an offshore transfer,
(i) the territory in question is a category 1 territory, or	(b) the territory in question is a category 2 territory, and	(b) the territory in question is a category 3 territory, and
(ii) the tax at stake is a tax other than income tax or capital gains tax.	(c) the tax at stake is income tax or capital gains tax.	(c) the tax at stake is income tax or capital gains tax.

126.22.5 *Inaccuracy/failure categories compared*

The definitions are almost the same, substituting failure for inaccuracy, except that categories 2 and 3 are restricted to IT/CGT.

See too 126.23.8 (Multiple categories).

126.23 Offshore/Domestic Matters

126.23.1 *Navigation*

The expressions “involving an Offshore Matter/Transfer” are labels for complex sets of rules. I write these expressions with initial capitals to reflect their technical nature. There are about 20 definitions altogether, located as follows:

Term	**sch 24**	**sch 41**	**sch 55**	**sch 18**	**s.36A**	**s.240B**	**See**

involves Offshore Matter	240B(3)	125.15.1
involves Offshore Transfer	240B(4)	125.15.1

I consider

- 4 of the 5 sets of definitions here
- RTC separately in the following section
- IHT separately in 125.15.1 (Involves an offshore matter/transfer)

Unfortunately an ordinary page is not wide enough to set them all out side by side, for easy comparison.

126.23.2 *"Involves an Offshore Matter"*

Para 4A(4) sch 24	**Para 6A(4) Sch 41**	**Para 6A(4) sch 55**	**s.36A(3) TMA**
An inaccuracy "involves an offshore matter" if it results in a potential loss of revenue that is charged on or by reference to—	A failure "involves an offshore matter" if it results in a potential loss of revenue that is charged on or by reference to-	Information "involves an offshore matter" if the liability to tax which would have been shown in the return includes a liability to tax charged on or by reference to-	Lost income tax or capital gains tax "involves an offshore matter" if it is charged on or by reference to—
(a) income arising from a source in a territory outside the UK,	[Identical]	[Identical]	[Identical]
(b) assets situated or held *[Note 1]* in a territory outside the UK,	[Identical]	[Identical]	[Identical]
(c) activities carried on wholly or mainly *[Note 2]* in a territory outside the UK, or	[Identical]	[Identical]	[Identical]
(d) anything having effect as if it were income, assets or activities of a kind described above.	[Identical]	[Identical]	[Identical]

Note 1

This would apply if a UK situate asset is held by a non-resident nominee or trustee.

Para 4A sch 24 FA 07 provides:

> "Where the tax at stake is inheritance tax, assets are treated for the purposes of sub-paragraph (4) as situated or held in a territory outside the UK if they are so situated or held immediately after the transfer of value by reason of which inheritance tax becomes chargeable."

Note 2

Presumably "activities" means trading.

If the trade is carried on *wholly* outside the UK, the income is foreign source income within para (a), and para (c) is not needed.

It the trade is carried on mainly (not wholly) outside the UK, it is UK source income and it is not obvious why it should regarded as an offshore matter; perhaps the reason is that the trade may be harder for HMRC to identify; or the trader might mistakenly think that the income is foreign source.

I do not think that the words in para (d) has any meaningful content. It suggests, perhaps, that the drafter was concerned that the terms of para (a)-(c) might be too narrow, but did not know what to do about it.[42]

126.23.3 *"Involves an Offshore Transfer"*

Para 4A(4B) sch 24	**Para 6A(4A) Sch 41**	**Para 6A(4B) sch 55**	**s.36A(4) TMA**
An inaccuracy "involves an offshore transfer" if—	A failure "involves an offshore transfer" if-	Information "involves an offshore transfer" if-	Lost income tax or capital gains tax "involves an offshore transfer" if—
(a) it does not involve an offshore matter,	[Identical]	[Identical]	[Identical]
		(b) it is information which would enable or assist HMRC to assess P's liability to income tax, capital gains tax or inheritance tax,	
(b) it is deliberate (whether or not concealed) and results in a potential loss of revenue,	[identical to sch 24]	(c) by failing to make the return, P deliberately withholds the information (whether or not the withholding of the information is also concealed), and	
(c) the tax at stake is income tax,	(c) the tax at stake is income tax or		

[42] See too 49.15.1 (Substance); App.7.6 (Real nature of transaction); 126.23.9 (Definition of source/situs etc).

capital gains tax or inheritance tax, and	capital gains tax, and		
(d) the applicable condition in paragraph 4AA is satisfied.	(d) the applicable condition in paragraph 6AA is satisfied.	(d) the applicable condition in paragraph 6AA is satisfied.	(b) the income or the proceeds of the disposal on or by reference to which it is charged, or any part of the income or proceeds, is transferred to a territory outside the UK before the relevant date.

126.23.4 *Applicable condition*

This term is a key part of the definition of "involves an Offshore Transfer".

Para 4AA sch 24	**Para 6AA sch 41**	**Para 6AA sch 55**
(1) This paragraph makes provision in relation to offshore transfers.	[Identical]	[Identical]
(2) Where the tax at stake is income tax,	[Identical to sch 24]	(2) Where the liability to tax which would have been shown in the return is a liability to income tax,
the applicable condition is satisfied if the income on or by reference to which the tax is charged, or any part of the income— (a) is received in a territory outside the UK, or	[Identical]	[Identical]
(b) is transferred before the filing date to a territory outside the UK.	(b) is transferred before the calculation date to a territory outside the UK.	(b) is transferred before the relevant date to a territory outside the UK.
(3) Where the tax at stake is capital gains tax,	[Identical to sch 24]	(3) Where the liability to tax which would have been shown in the

		return is a liability to capital gains tax,
the applicable condition is satisfied if the proceeds of the disposal on or by reference to which the tax is charged, or any part of the proceeds— (a) are received in a territory outside the UK, or	[Identical to sch 24]	[Identical]
(b) are transferred before the filing date to a territory outside the UK.	(b) are transferred before the calculation date to a territory outside the UK.	(b) are transferred before the relevant date to a territory outside the UK.
(4) Where the tax at stake is inheritance tax, the applicable condition is satisfied if—		(4) Where the liability to tax which would have been shown in the return is a liability to inheritance tax,
(a) the disposition that gives rise to the transfer of value by reason of which the tax becomes chargeable involves a transfer of assets, and		[Identical]
(b) after that disposition but before the filing date the assets, or any part of the assets, are transferred to a territory outside the UK.		(b) after that disposition but before the relevant date the assets, or any part of the assets, are transferred to a territory outside the UK.[43]

126.23.5 *Filing/calculation/relevant date*

The filing/calculation/relevant dates are as follows:

[43] This condition is not met a resident of a foreign state is entitled to income, and receives it in the foreign state, unless they transfer it to another foreign state.

Para 4AA(7) sch 24 Filing date	**Para 6AA(6) sch 41 Calculation date**	**Para 6AA(7) sch 55 Relevant date**	**s.36A(5) TMA Relevant date**
"Filing date" means the date when the document containing the inaccuracy is given to HMRC.	In this paragraph "calculation date" means the date by reference to which the potential lost revenue is to be calculated (see paragraph 7).	"Relevant date" means the date on which P becomes liable to a penalty under paragraph 6.	In subsection (4) "relevant date" means— (a) in a case where the taxpayer (or a person acting on the taxpayer's behalf) delivered a return under the Taxes Acts to HMRC for the year of assessment to which the lost tax relates and in which information relating to the lost tax was required to be provided, the date on which the return was delivered, and (b) in any other case, 31 January in the year of assessment after that to which the lost tax relates;

126.23.6 *Assets representing assets*

Penalty template wording provides a definition:

> In the case of a transfer falling within sub-paragraph (2)(b), (3)(b) or (4)(b), references to the income, proceeds or assets transferred are to be read as including references to any assets derived from or representing[44] the income, proceeds or assets.

All the penalties discussed here include the same or a substantially similar provision.[45]

126.23.7 *"Involves a domestic matter"*

Para 4A(5) sch 24 FA 07	**Para 6A(5) sch 41 FA 08**	**Para 6A sch 55 FA09**
An inaccuracy "involves a domestic matter" if it results in a potential loss of revenue and does not involve either an offshore matter or an offshore transfer.	[identical to sch 24]	Information "involves a domestic matter" if it does not involve an offshore matter or an offshore transfer.

[44] See App.2.9.3 (Derive from/represent compared).

[45] Para 4B(5) sch 24 FA 07; para 6A sch 55 FA 09; 36A(5) TMA.

126.23.8 *Multiple categories*

Para 4A(6) sch 24 FA 07	**Para 6A(6) sch 41 FA 08**	**Para 6A(6) sch 55 FA09**
If a single inaccuracy is in more than one category (each referred to as a "relevant category")—	If a single failure is in more than one category (each referred to as a "relevant category")—	If the information which P withholds falls into more than one category-
(a) it is to be treated for the purposes of this Schedule as if it were separate inaccuracies, one in each relevant category according to the matters or transfers that it involves, and	(a) it is to be treated for the purposes of this Schedule as if it were separate failures, one in each relevant category according to the matters or transfers that it involves, and	(a) P's failure to make the return is to be treated for the purposes of this Schedule as if it were separate failures, one for each category of information according to the matters or transfers which the information involves, and
(b) the potential lost revenue is to be calculated separately in respect of each separate inaccuracy.	(b) the potential lost revenue in respect of each separate failure is taken to be such share of the potential lost revenue in respect of the single failure (see paragraphs 7 and 11) as is just and reasonable.	(b) for each separate failure, the liability to tax which would have been shown in the return in question is taken to be such share of the liability to tax which would have been shown in the return mentioned in paragraph (a) as is just and reasonable.

126.23.9 *Definition of source/situs etc*

CGT definitions of situs apply for CGT, and IHT/common law definitions apply for IHT/IT.

For completeness: Para 21B Sch 24 FA 07 provides:

> (1) The Treasury may by regulations make provision for determining for the purposes of paragraph 4A where-
>
> (a) a source of income is located,
> (b) an asset is situated or held, or
> (c) activities are wholly or mainly carried on.
>
> (1A) The Treasury may by regulations make provision for determining for the purposes of paragraph 4AA where-
>
> (a) income is received or transferred,
> (b) the proceeds of a disposal are received or transferred, or

(c) assets are transferred.

Although para 21B is expressed to apply for the purposes of para 4A/4AA, the provision is repeated or incorporated by reference elsewhere.

It is difficult to see why this is needed. Perhaps the drafter had some inchoate concern which, when they subsequently tried, they found they were unable to express in words. *Wovon man nicht sprechen kann, darüber muss man schweigen.* For that or some other reason, no regulations have been made: Para 21B should be repealed.

126.24 Offshore Matter/Transfer: RTC

In the RTC code, the expressions "involving an Offshore Matter/Transfer" are each defined 3 times. In outline:

Failure	**Para**
Failure to notify IT/CGT	9
Failure to deliver return	10
Inaccurate return	11

Para 9(1) sch 18 F2A 17	**Para 10(1)**	**Para 11(1)**
This paragraph applies to	This paragraph applies where-	This paragraph applies to any tax non-compliance by a person if—
any tax non-compliance consisting of a failure to comply with an obligation under section 7[46] of TMA 1970 to notify chargeability to income tax or capital gains tax.	(a) any tax non-compliance by a person consists of a failure to comply with an obligation to deliver a return or other document, and	(a) the tax non-compliance consists of delivering or giving HMRC a return or other document which contains an inaccuracy, and
	(b) a complete and accurate return or other document would have included information that would have enabled or assisted HMRC to assess the person's liability to tax.	(b) the inaccuracy relates to information that would have enabled or assisted HMRC to assess the person's liability to tax.

[46] See 121.2 (Duty to notify HMRC).

126.24.1 *Involves Offshore Matter*

I set out the wording in this section, but the wording is based on the provisions set out in the last section, so see above for discussion.

Sch 18 F2A 17 provides:

Para 9(2): Failure to notify	*Para 10(2): No return*	*Para 11(2): Incorrect return*
The tax non-compliance "involves an offshore matter" if	same as para 9	The tax non-compliance to which this paragraph applies "involves an offshore matter" if the information that should have been given in the tax document relates to—
the potential loss of revenue is charged on or by reference to-	the liability to tax that would have been shown in the return or other document is or includes a liability to tax charged on or by reference to-	
(a) income arising from a source in a territory outside the UK, (b) assets situated or held in a territory outside the UK, (c) activities carried on wholly or mainly in a territory outside the UK, or (d) anything having effect as if it were income, assets or activities of a kind described above.	same	same
	(3) Where the tax at stake is inheritance tax, assets are treated for the purposes of sub-paragraph (2) as situated or held in a territory outside the UK if they are so situated or held immediately after	(3) same as para 10

	the transfer of value by reason of which inheritance tax becomes chargeable.	

126.24.2 *Involves Offshore Transfer*

Sch 18 F2A 17 provides:

Para 9(3): Failure to notify	**Para 10(4): No return**	**Para 11(4): Incorrect return**
The tax non-compliance "involves an offshore transfer" if-	same as para 9	Tax non-compliance to which this paragraph applies "involves an offshore transfer" if—
(a) it does not involve an offshore matter, and	same	same
(b) the applicable condition is satisfied (see sub-paragraphs (4) and (5)).	(b) the applicable condition is satisfied in respect of the liability to tax that would have been shown by the return or other document (see sub-paragraphs (5) to (7)).	(b) the applicable condition is satisfied in respect of the liability to tax that would have been shown by the return or other document (see sub-paragraphs (5) to (7)).

So we turn to the definition(s) of "applicable condition". There are three sets of definitions, for the separate taxes:

Tax	**Definition of "applicable condition" in para:**
IT	9(4), 10(5), 11(5)
CGT	9(5), 10(6), 11(6)
IHT	9(6), 10(7), 11(7)

For IT, the same definition is repeated 3 times, so it need only be set out once. Para 9(4)/10(5)/11(5) sch 18 F2A 17 provide:

> Where the tax at stake is income tax the applicable condition is satisfied if the income on or by reference to which tax is charged, or any part of the income-
>
> (a) was received in a territory outside the UK, or
>
> (b) was transferred on or before 5 April 2017 to a territory outside the UK.

For the CGT/IHT, the definitions differ, and need to be set out side by side:

(5) Where the tax at stake is capital gains tax, the applicable condition is satisfied if	(6) [identical]	[identical]
		(a) the information that should have been given in the tax document relates to the proceeds of the disposal on or by reference to which the tax is charged, and
the proceeds of the disposal on or by reference to which the tax is charged, or any part of the proceeds-	[identical]	(b) the proceeds, or any part of the proceeds—
(a) were received in a territory outside the UK, or	(a) was received in a territory outside the UK, or	(i) were received in a territory outside the UK, or
(b) were transferred on or before 5 April 2017 to a territory outside the UK.	was transferred on or before 5 April 2017 to a territory outside the UK.	(ii) were transferred on or before 5 April 2017 to a territory outside the UK.
	(7) Where the liability to tax which would have been shown in the document is a liability to inheritance tax, the applicable condition is satisfied if—	(7) Where the tax at stake is inheritance tax, the applicable condition is satisfied if—
	(a) the disposition that gives rise to the transfer of value by reason of which the tax becomes chargeable involves a transfer of assets, and (b) after that disposition but on or before 5 April 2017 the assets, or any part of the assets, are transferred to a territory outside the UK.	(a) the information that should have been given in the tax document relates to the disposition that gives rise to the transfer of value by reason of which the tax becomes payable relates to a transfer of assets, and (b) after that disposition but on or before 5 April 2017 the assets or any part of the assets are transferred to a territory outside the UK.

126.25 Categories of territory

Para 21A sch 24 FA 07 provides:

> (1) A category 1 territory is a territory designated as a category 1 territory by order made by the Treasury.
> (2) A category 2 territory is a territory that is neither—
> (a) a category 1 territory, nor
> (b) a category 3 territory.
> (3) A category 3 territory is a territory designated as a category 3 territory by order made by the Treasury.[47]

This takes us to the schedule of Penalties, Offshore Income etc (Designation of Territories) Order 2011 which provides:

Category 1 territories
Anguilla
Aruba
Australia
Belgium
Bulgaria
Canada
Cayman Islands
Cyprus
Czech Republic
Denmark (not including Faroe Islands & Greenland)
Estonia
Finland
France
Germany
Greece
Guernsey
Hungary
Ireland
Isle of Man
Italy
Japan
Korea,
Latvia
Liechtenstein
Lithuania
Malta
Montserrat
Netherlands (not including Bonaire, Sint Eustatius & Saba)
New Zealand (not including Tokelau)
Norway
Poland
Portugal
Romania
Slovakia
Slovenia
Spain
Sweden
Switzerland

[47] For completeness: para 21A(4) sch 24 FA 07 explains the principles of categorisation: "In considering how to classify a territory for the purposes of this paragraph, the Treasury must have regard to—
(a) the existence of any arrangements between the UK and that territory for the exchange of information for tax enforcement purposes,
(b) the quality of any such arrangements (in particular, whether they provide for information to be exchanged automatically or on request), (c) the benefit that the UK would be likely to obtain from receiving information from that territory, were such arrangements to exist with it,
(d) the existence of any other arrangements between the UK and that territory for co-operation in the area of taxation, and
(e) the quality of any such other arrangements (in particular, the extent to which the co-operation provided for in them assists or is likely to assist in the protection of revenue raised from taxation in the UK)."

United States of America
(not including overseas
territories &
possessions)

Category 3
territories
Albania
Algeria
Andorra
Bonaire, Sint
Eustatius and Saba
Brazil
Cape Verde
Colombia
Congo, Republic of
Cook Islands
Costa Rica
Curaçao
Cuba
Democratic People's
Republic of Korea
Dominican Republic
South Ecuador
El Salvador
Gabon
Guatemala
Honduras
Iran
Iraq
Jamaica
Kyrgyzstan
Lebanon
Macau
Marshall Islands
Micronesia, Federated
States of
Monaco
Nauru
Nicaragua
Niue
Palau
Panama
Paraguay
Peru
Seychelles
Sint Maarten
Suriname
Syria
Tokelau
Tonga
Trinidad and Tobago
United Arab Emirates
Uruguay

Everywhere else is category 2.

Penalty template wording incorporates these rules elsewhere if needed:[48]

> For the purposes of this Schedule-
> (a) paragraph 21A of Schedule 24 to FA 07 (classification of territories) has effect, but
> (b) an order under that paragraph does not apply to a failure if the filing date is before the date on which the order comes into force.

126.25.1 *More than 1 category in point*

There may be more than one "territory in question".

Para 4AA(6) sch 24 FA 07	**Para 6AA(5) sch 41 FA 08**	**Para 6AA(6) Sch 55 FA 09**
In relation to an offshore transfer, the territory in question for the purposes of paragraph 4A is the highest category of	In relation to an offshore transfer, the territory in question for the purposes of paragraph 6A is the highest category of	[identical to sch 41]

[48] Para 6A(7) sch 55 FA 09 (quoted); para 6A(7) sch 41 FA 2008 (minor variations).

territory by virtue of which the inaccuracy involves an offshore transfer.	territory by virtue of which the failure involves an offshore transfer.

126.26 Potential lost revenue

Potential lost revenue ("PLR") matters because for most of the penalties the amount of penalty is a percentage of PLR or offshore PLR. For asset-based penalties, one requirement is a minimum offshore PLR threshold of £25k.

The definitions are located as follows:

Term	**sch 24**	**sch 41**	**sch 22**	**sch 18**	**See para.**
	FA 07	**FA 08**	**FA 16**	**F2A 17**	
Potential lost revenue	5-8				126.27
		7-10			126.28
Offshore PLR			5		126.30
				15	126.31

126.27 PLR: Error-based penalties

126.27.1 *PLR: Normal rule*

Para 5 sch 24 FA 07 provides:

> (1) "The potential lost revenue" in respect of an inaccuracy in a document or a failure to notify an under-assessment is the additional amount due or payable in respect of tax[49] as a result of correcting the inaccuracy or assessment.
>
> (2) The reference in sub-paragraph (1) to the additional amount due or payable includes a reference to—
>
> (a) an amount payable to HMRC having been erroneously paid by way of repayment of tax, and
>
> (b) an amount which would have been repayable by HMRC had the inaccuracy or assessment not been corrected.

126.27.2 *Disregarded reliefs*

Para 5 sch 24 FA 07 provides:

> (4) The following shall be ignored in calculating potential lost revenue

[49] Defined para 5(3) sch 24 FA 07:In sub-paragraph (1) "tax" includes national insurance contributions."

> under this paragraph—
>
> (a) group relief, and
>
> (b) section 419(4) of ICTA (close company: relief for loans);
>
> (but this sub-paragraph does not prevent a penalty being charged in respect of an inaccurate claim for relief).

Another unfair rule.

126.27.3 *Multiple errors*

Para 6 sch 24 FA 07 provides:

> (1) Where P is liable to a penalty in respect of more than one inaccuracy, and the calculation of potential lost revenue under paragraph 5 in respect of each inaccuracy depends on the order in which they are corrected—
>
> (a) careless inaccuracies shall be taken to be corrected before deliberate inaccuracies, and
>
> (b) deliberate but not concealed inaccuracies shall be taken to be corrected before deliberate and concealed inaccuracies.
>
> (2) In calculating potential lost revenue where P is liable to a penalty in respect of one or more understatements in one or more documents relating to a tax period, account shall be taken of any overstatement in any document given by P which relates to the same tax period.
>
> (3) In sub-paragraph (2)—
>
> (a) "understatement" means an inaccuracy that satisfies Condition 1 of paragraph 1, and
>
> (b) "overstatement" means an inaccuracy that does not satisfy that condition.
>
> (4) For the purposes of sub-paragraph (2) overstatements shall be set against understatements in the following order—
>
> (a) understatements in respect of which P is not liable to a penalty,
>
> (b) careless understatements,
>
> (c) deliberate but not concealed understatements, and
>
> (d) deliberate and concealed understatements.

126.27.4 *PLR: Losses*

Para 7 sch 24 FA 07 provides:

> (1) Where an inaccuracy has the result that a loss is wrongly recorded for purposes of direct tax and the loss has been wholly used to reduce the amount due or payable in respect of tax, the potential lost revenue is calculated in accordance with paragraph 5.

> (2) Where an inaccuracy has the result that a loss is wrongly recorded for purposes of direct tax and the loss has not been wholly used to reduce the amount due or payable in respect of tax, the potential lost revenue is—
>
> (a) the potential lost revenue calculated in accordance with paragraph 5 in respect of any part of the loss that has been used to reduce the amount due or payable in respect of tax, plus
>
> (b) 10% of any part that has not.
>
> (3) Sub-paragraphs (1) and (2) apply both—
>
> (a) to a case where no loss would have been recorded but for the inaccuracy, and
>
> (b) to a case where a loss of a different amount would have been recorded (but in that case sub-paragraphs (1) and (2) apply only to the difference between the amount recorded and the true amount).
>
> (4) Where an inaccuracy has the effect of creating or increasing an aggregate loss recorded for a group of companies—
>
> (a) the potential lost revenue shall be calculated in accordance with this paragraph, and
>
> (b) in applying paragraph 5 in accordance with sub-paragraphs (1) and (2) above, group relief may be taken into account (despite paragraph 5(4)(a)).
>
> (5) The potential lost revenue in respect of a loss is nil where, because of the nature of the loss or P's circumstances, there is no reasonable prospect of the loss being used to support a claim to reduce a tax liability (of any person).

126.27.5 *PLR: Delayed tax*

Para 8 sch 24 FA 07 provides:

> (1) Where an inaccuracy resulted in an amount of tax being declared later than it should have been ("the delayed tax"), the potential lost revenue is—
>
> (a) 5% of the delayed tax for each year of the delay, or
>
> (b) a percentage of the delayed tax, for each separate period of delay of less than a year, equating to 5% per year.
>
> (2) This paragraph does not apply to a case to which paragraph 7 applies.

126.28 PLR: Failure to notify chargeability

Para 7(1) sch 41 FA 08 provides:

> "The potential lost revenue" in respect of a failure to comply with a relevant obligation is as follows.

126.28.1 *No notice requiring return*

We will normally be considering para 7(2)(3) sch 41 FA 08 which provide:

para 7(2): IT/CGT	**para 7(3): CT**
In the case of a relevant obligation relating to income tax or capital gains tax and a tax year (not falling within subparagraph (1A)), the potential lost revenue is so much of any income tax or capital gains tax to which P is liable in respect of the tax year as by reason of the failure is unpaid on 31 January following the tax year.	In the case of a relevant obligation relating to corporation tax and an accounting period, the potential lost revenue is (subject to sub-paragraph (4)) so much of any corporation tax to which P is liable in respect of the accounting period as by reason of the failure is unpaid 12 months after the end of the accounting period.

Para 7(4) sch 41 FA 08 provides for one disregarded relief for CT

> In computing the amount of that tax no account shall be taken of any relief under section 458 of CTA 2010 (relief in respect of repayment etc of loan) which is deferred under subsection (5) of that section.

"By reason of" is a causation test; see *Fuller v HMRC* [2020] UKFTT 189 (TC).

126.28.2 *Notice requiring tax return withdrawn*

Para 7 sch 41 FA 08 deals with what is (I think) an usual case:

> (1A) In the case of an obligation under section 7[50] of TMA 1970 which arises by virtue of subsection (1B) of that section, the potential lost revenue is so much of any income tax or capital gains tax to which P is liable in respect of the tax year in question as is, by reason of the failure to comply with the obligation-
>
> (a) where the period specified in subsection (1C)(b)(ii) of that section applies and ends after the relevant date, unpaid at the end of that period, or
>
> (b) in any other case, unpaid on the relevant date.
>
> (1B) For the purposes of sub-paragraph (1A) the relevant date is-

[50] See 121.2 (Duty to notify HMRC).

> (a) 31 January following the tax year, or
> (b) if, after that date, HMRC refund a payment on account in respect of the tax year to P, the day after the refund is issued.

126.28.3 *Other cases*

Para 7(10) sch 41 FA 08 provides:

> In the case of a failure to comply with a relevant obligation relating to any other tax, the potential lost revenue is the amount of any tax which is unpaid by reason of the failure

126.29 Matching overpayment

Para 6 sch 24 FA 07	**Para 7 sch 41 FA 08**
(5) In calculating potential lost revenue in respect of a document given by or on behalf of P no account shall be taken of the fact that a potential loss of revenue from P is or may be balanced by a potential over-payment by another person (except to the extent that an enactment requires or permits a person's tax liability to be adjusted by reference to P's).	(1) In calculating potential lost revenue in respect of a relevant act or failure[51] on the part of P no account is to be taken of the fact that a potential loss of revenue from P is or may be balanced by a potential over-payment by another person (except to the extent that an enactment requires or permits a person's tax liability to be adjusted by reference to P's).

126.30 Offshore PLR: Asset-based penalty

Para 5 sch 22 FA 16 provides:

> (1) The offshore PLR, in relation to a tax year, is the total of—
> (a) the potential lost revenue (in the case of a standard offshore tax penalty imposed under Schedule 24 to FA 2007 or Schedule 41 to FA 2008 or Schedule 18 to FA 2017), and
> (b) the liability to tax (in the case of a standard offshore tax penalty imposed under Schedule 55 to FA 2009),
>
> by reference to which all of the standard offshore tax penalties imposed on P in relation to the tax year are assessed.
>
> (2) Sub-paragraphs (3) to (5) apply where—
> (a) a penalty is imposed on P under paragraph 1 of Schedule 24

[51] Defined Para 7(2) sch 41 FA 08 "In this Schedule "a relevant act or failure" means (a) a failure to comply with a relevant obligation ..."

to FA 2007, paragraph 1 of Schedule 41 to FA 2008 or paragraph 6 of Schedule 55 to FA 2009, and

(b) the potential lost revenue or liability to tax by reference to which the penalty is assessed relates to a standard offshore tax penalty and one or more other penalties.

In this paragraph, such a penalty is referred to as a "combined penalty".

(3) Only the potential lost revenue or liability to tax relating to the standard offshore tax penalty is to be taken into account in calculating the offshore PLR.

(4) Where the calculation of the potential lost revenue or liability to tax by reference to which a combined penalty is assessed depends on the order in which income or gains are treated as having been taxed, for the purposes of calculating the offshore PLR—

(a) income and gains relating to domestic matters are to be taken to have been taxed before income and gains relating to offshore matters and offshore transfers;

(b) income and gains relating to taxes that are not capital gains tax, inheritance tax or asset-based income tax are to be taken to have been taxed before income and gains relating to capital gains tax, inheritance tax and asset-based income tax.

(5) In a case where it cannot be determined—

(a) whether income or gains relate to an offshore matter or offshore transfer or to a domestic matter, or

(b) whether income or gains relate to capital gains tax, asset-based income tax or inheritance tax or not,

for the purposes of calculating the offshore PLR, the potential lost revenue or liability to tax relating to the standard offshore tax penalty is to be taken to be such share of the total potential lost revenue or liability to tax by reference to which the combined penalty was calculated as is just and reasonable.

(6) Sub-paragraph (7) applies where—

(a) a standard offshore tax penalty or a combined penalty is imposed on P, and

(b) there are two or more taxes at stake, including capital gains tax and asset-based income tax.

(7) Where the calculation of the potential lost revenue or liability to tax by reference to which the penalty is assessed depends on the order in which income or gains are treated as having been taxed, for the purposes of calculating the offshore PLR, income and gains relating to asset-based income tax are to be taken to have been taxed before income and gains relating to capital gains tax.

126.31 Offshore PLR: RTC

PLR is **P**otential **L**ost **R**evenue.

Offshore PLR matters for:

(1) RTC condition C

(2) the quantum of the RTC penalty

(3) the RTC assessment time limit

Para 15(1) sch 18 F2A 17 provides:

> In this Schedule “offshore PLR”, in relation to any offshore tax non-compliance means the potential loss of revenue attributable to that non-compliance, to be determined as follows.

The PLR depends on the nature of the non-compliance.

Para 15 Sch 18 F2A 17 provides:

> (2) The potential lost revenue attributable to any offshore tax non-compliance is (subject to sub-paragraphs (5) and (6))-

(a) if the non-compliance is a failure to notify chargeability,	(b) if the non-compliance is a failure to deliver a return or other document,	(c) if the non-compliance is delivering a return or other document containing an inaccuracy,
[i] the potential lost revenue under the applicable provisions of paragraph 7 of Schedule 41 to FA 08	[i] the amount of the liability to tax under the applicable provisions of paragraph 24 of Schedule 55 to FA 09	[i] the potential lost revenue under the applicable provisions of paragraphs 5 to 8 of Schedule 24 to FA 07
[ii] (or, where the original offshore tax non-compliance took place before 1 April 2010, the amount referred to in section 7(8) of TMA 1970)	[ii] (or, where the original offshore tax non-compliance took place before 1 April 2011, the amount of liability to tax that would have been shown in the return as defined in section 93(9) of TMA 1970),	[ii] (or, where the original offshore tax non-compliance took place before 1 April 2008, the difference described in section 95(2) of TMA 1970).

Para 15 sch 18 F2A 17 provides:

> (3) In its application for the purposes of sub-paragraph (2)(c) above, paragraph 6 of Schedule 24 to FA 07 has effect as if-
>
> (a) for sub-paragraph (1) there were substituted-
>
> "(1) Where-
>
> (a) P is liable to a penalty in respect of two or more inaccuracies (each being an inaccuracy in a return or other document listed in paragraph 8(3) or (4) of Schedule 18) to F(No 2)A 2017) in relation to a tax year or, in the case of inheritance tax, a single transfer of value,
>
> (b) in relation to any one (or more than one) of those inaccuracies, the delivery of the return or other document containing it constitutes offshore tax non-compliance, and
>
> (c) the calculation of potential lost revenue attributable to each of those inaccuracies depends on the order in which they are corrected,
>
> the potential lost revenue attributable to any offshore tax non-compliance constituted by any one of those inaccuracies is to be taken to be such amount as is just and reasonable.
>
> (1A) In sub-paragraph (1) "offshore tax non-compliance" has the same meaning as in Schedule 18 to F(No2)A 2017."; and
>
> (b) in sub-paragraph (4), for paragraphs (b) to (d) there were substituted-
>
> "(b) other understatements."
>
> (4) In sub-paragraphs (5) and (6) "combined tax non-compliance" is tax non-compliance that-
>
> (a) involves an offshore matter or an offshore transfer, but
>
> (b) also involves an onshore matter.

I discuss PLR above. The amendments relate to the rules for multiple errors. Amended as para 15 sch 18 F2A 17 requires, para 6 sch 24 FA 07 provides:

> **6 Potential lost revenue: multiple errors**
>
> ~~(1) Where P is liable to a penalty under paragraph 1 in respect of more than one inaccuracy, and the calculation of potential lost revenue under paragraph 5 in respect of each inaccuracy depends on the order in which they are corrected—~~

~~(a) careless inaccuracies shall be taken to be corrected before deliberate inaccuracies, and~~

~~(b) deliberate but not concealed inaccuracies shall be taken to be corrected before deliberate and concealed inaccuracies.~~

(1) Where-

(a) P is liable to a penalty in respect of two or more inaccuracies (each being an inaccuracy in a return or other document listed in paragraph 8(3) or (4) of Schedule 18) to F(No 2)A 2017) in relation to a tax year or, in the case of inheritance tax, a single transfer of value,

(b) in relation to any one (or more than one) of those inaccuracies, the delivery of the return or other document containing it constitutes offshore tax non-compliance, and

(c) the calculation of potential lost revenue attributable to each of those inaccuracies depends on the order in which they are corrected,

the potential lost revenue attributable to any offshore tax non-compliance constituted by any one of those inaccuracies is to be taken to be such amount as is just and reasonable.

(1A) In sub-paragraph (1) "offshore tax non-compliance" has the same meaning as in Schedule 18 to F(No2)A 2017.

(2) In calculating potential lost revenue where P is liable to a penalty under paragraph 1 [RTC penalty] in respect of one or more understatements in one or more documents relating to a tax period, account shall be taken of any overstatement in any document given by P which relates to the same tax period.

(3) In sub-paragraph (2)—

(a) "understatement" means an inaccuracy that satisfies Condition 1 of paragraph 1, and

(b) "overstatement" means an inaccuracy that does not satisfy that condition.

(4) For the purposes of sub-paragraph (2) overstatements shall be set against understatements in the following order—

(a) understatements in respect of which P is not liable to a penalty,

~~(b) careless understatements,~~

~~(c) deliberate but not concealed understatements, and~~

~~(d) deliberate and concealed understatements.~~

(b) other understatements.

(5) In calculating for the purposes of a penalty under paragraph 1 [RTC penalty] potential lost revenue in respect of a document given by or on

> behalf of P no account shall be taken of the fact that a potential loss of revenue from P is or may be balanced by a potential over-payment by another person (except to the extent that an enactment requires or permits a person's tax liability to be adjusted by reference to P's).

126.31.1 *Combined tax non-compliance*

Para 15 sch 18 F2A 17 provides:

> (5) Any combined tax non-compliance is to be treated for the purposes of this Schedule as if it were two separate acts of tax non-compliance, namely-
> (a) the combined tax non-compliance so far as it involves an offshore matter or an offshore transfer (which is then offshore tax non-compliance within the meaning of this Schedule), and
> (b) the combined tax non-compliance so far as it involves an onshore matter.
> (6) The potential lost revenue attributable to the offshore tax non-compliance referred to in sub-paragraph (5)(a) is to be taken to be such share of the potential lost revenue attributable to the combined tax non-compliance as is just and reasonable.

126.32 Reductions for disclosure: Which para?

126.33 *Summary*

The penalty provisions adopt a verbose template, and it is helpful to summarise the position in a table:

Penalty	**Matter**	**Governed by**	**Reduction under**
Sch 24			
Para 1: error in taxpayer doc	Domestic	Para 9(A1)	Para 10(1)
Para 1A: error due to 3rd party			Para 10(1A)
Para 2: uncorrected assessment			Para 10(2)
Para 1: error in taxpayer doc	Offshore	Para 9(A2)	Para 10A
Sch 41			
Para 1: failure to notify	Domestic	Para 12(1)(a)	Para 13(1)
ditto	Offshore	Para 12(1A)	Para 13A
Sch 55			
failure to make return	Domestic	Para 14(1)	Para 15
ditto	Offshore	Para 14 (1A)	Para 15A
Sch 18: RTC			Para 16

The provisions in full detail are as follows:

126.33.1 *Error based penalties*

Para 9 sch 24 FA 07 provides:

> (A1) Paragraph 10 provides for reductions in penalties—
>
> (a) under paragraph 1 [Error in document] where a person discloses an inaccuracy that involves a domestic matter,
>
> (b) under paragraph 1A [Error due to 3rd party] where a person discloses a supply of false information or withholding of information, and
>
> (c) under paragraph 2 [uncorrected assessment] where a person discloses a failure to disclose an under-assessment.
>
> (A2) Paragraph 10A provides for reductions in penalties under paragraph 1 [Error in document] where a person discloses an inaccuracy that involves an offshore matter or an offshore transfer.

126.33.2 *Failure to notify chargeability*

Para 12 sch 41 FA 08 provides:

> (1) Paragraph 13 provides for reductions in penalties—
>
> (a) under paragraph 1 where P discloses a relevant failure that involves a domestic matter, and
>
> (b) under paragraphs 2 to 4 where P discloses a relevant act or failure.[52]
>
> (1A) Paragraph 13A provides for reductions in penalties under paragraph 1 where P discloses a relevant failure that involves an offshore matter or an offshore transfer.
>
> (1B) Sub-paragraph (2) applies where P discloses—
>
> (a) a relevant failure that involves a domestic matter,
>
> (b) a non-deliberate relevant failure that involves an offshore matter, or
>
> (c) a relevant act or failure giving rise to a penalty under any of paragraphs 2 to 4.

126.33.3 *Failure to make return*

Para 14 sch 55 FA 09 provides:

> (1) Paragraph 15 provides for reductions in the penalty under paragraph 6(3) or (4) where P discloses relevant information that involves a domestic matter or 11(3) or (4) where P discloses relevant information.
>
> (1A) Paragraph 15A provides for reductions in the penalty under paragraph 6(3) or (4) where P discloses relevant information that

[52] Defined Para 7(2) sch 41 FA 08 "In this Schedule "a relevant act or failure" means (a) a failure to comply with a relevant obligation ..."

involves an offshore matter or an offshore transfer.

126.33.4 *RTC*

Para 16 sch 18 F2A 17 provides:

> (1) This paragraph provides for a reduction in a penalty under paragraph 1 [RTC penalty] for any uncorrected relevant offshore tax non-compliance if the person ("P") who is liable to the penalty discloses any matter mentioned in sub-paragraph (2) that is relevant to the non-compliance or its correction or to the assessment or enforcement of the offshore tax attributable to it.
> (2) The matters are-
> (a) chargeability to income tax or capital gains tax (where the tax non-compliance is a failure to notify chargeability),
> (b) a missing tax return,
> (c) an inaccuracy in a document,
> (d) a supply of false information or a withholding of information, or
> (e) a failure to disclose an under-assessment.

126.34 What disclosure requires

126.34.1 *Disclosure: Error-based penalty*

Para 9 sch 24 FA 07 provides two definitions of what is required:

(A3) Sub-paragraph (1) applies where a person discloses—	(1A) Sub-paragraph (1B) applies where a person discloses—
(a) an inaccuracy that involves a domestic matter,	
(b) a careless inaccuracy that involves an offshore matter,	(a) a deliberate inaccuracy (whether concealed or not) that involves an offshore matter, or
(c) a supply of false information or withholding of information, or	
(d) a failure to disclose an under-assessment.	
	(b) an inaccuracy that involves an offshore transfer.
(1) A person discloses an inaccuracy, a supply of false information or withholding of information, or a failure to disclose an under-assessment by—	(1B) A person discloses the inaccuracy by—
(a) telling HMRC about it,	[identical]

(b) giving HMRC reasonable help in quantifying the inaccuracy, the inaccuracy attributable to the supply of false information or withholding of information, or the under-assessment, and	(b) giving HMRC reasonable help in quantifying the inaccuracy,
(c) allowing HMRC access to records for the purpose of ensuring that the inaccuracy, the inaccuracy attributable to the supply of false information or withholding of information, or the under-assessment is fully corrected.	(c) allowing HMRC access to records for the purpose of ensuring that the inaccuracy is fully corrected, and
	(d) providing HMRC with additional information.

126.34.2 *Disclosure: Failure to notify*

Para 12 sch 41 FA 08 provides two definitions of what is required:

(1B) Sub-paragraph (2) applies where P discloses-	(2A) Sub-paragraph (2B) applies where P discloses-
(a) a relevant failure that involves a domestic matter,	
(b) a non-deliberate relevant failure that involves an offshore matter, or	(a) a deliberate relevant failure (whether concealed or not) that involves an offshore matter, or
(c) a relevant act or failure giving rise to a penalty under any of paragraphs 2 to 4. [These paras not discussed here]	
	(b) a relevant failure that involves an offshore transfer.
(2) P discloses the relevant act or failure by-	(2B) P discloses the failure by-
(a) telling HMRC about it,	[identical]
(b) giving HMRC reasonable help in quantifying the tax unpaid by reason of it, and	[identical]

(c) allowing HMRC access to records for the purpose of checking how much tax is so unpaid.	[identical]
	(d) providing HMRC with additional information.

126.34.3 *Disclosure: Failure to make return*

Para 14 sch 55 FA 09 provides two definitions of what is required:

(1B) Sub-paragraph (2) applies where-	(2A) Sub-paragraph (2B) applies where
(a) P is liable to a penalty under paragraph 6(3) or (4) and P discloses relevant information that involves a domestic matter, or	P is liable to a penalty under paragraph 6(3) or (4) and P discloses relevant information that involves an offshore matter or an offshore transfer.
(b) P is liable to a penalty under any of the other provisions mentioned in sub-paragraph (1) and P discloses relevant information.	
(2) P discloses relevant information by-	(2B) P discloses relevant information by-
(a) telling HMRC about it,	[identical]
(b) giving HMRC reasonable help in quantifying any tax unpaid by reason of its having been withheld, and	[identical]
(c) allowing HMRC access to records for the purpose of checking how much tax is so unpaid.	[identical]
	(d) providing HMRC with additional information.

126.34.4 *Disclosure required: RTC*

Para 16(3) sch 18 F2A 17 provides only one definition:

> A person discloses a matter for the purposes of this paragraph only by–
> (a) telling HMRC about it,
> (b) giving HMRC reasonable help in relation to the matter (for example by quantifying an inaccuracy in a document),

> (c) informing HMRC of any person who acted as an enabler[53] of the relevant offshore tax non-compliance or the failure to correct it, and
>
> (d) allowing HMRC access to records-
>
> (i) for any reasonable purpose connected with resolving the matter (for example for the purpose of ensuring that an inaccuracy in a document is fully corrected), and
>
> (ii) for the purpose of ensuring that HMRC can identify all persons who may have acted as an enabler of the relevant offshore tax non-compliance or the failure to correct it.

126.34.5 *Reduction for asset-based penalties*

Para 8(1) sch 22 FA 16 provides:

> HMRC must reduce the standard amount of the asset-based penalty where P does all of the following things
>
> (a) makes a disclosure of the inaccuracy or failure relating to the standard offshore tax penalty;
>
> (b) provides HMRC with a reasonable valuation of the asset;
>
> (c) provides HMRC with information or access to records that HMRC requires from P for the purposes of valuing the asset.

126.34.6 *Prompted/unprompted*

A commonsense penalties template definition provides:

> Disclosure—
>
> (a) is "unprompted" if made at a time when the person making it has no reason to believe that HMRC have discovered or are about to discover the inaccuracy, the supply of false information or withholding of information, or the under-assessment, and
>
> (b) otherwise, is "prompted".[54]

[53] Para 16(7) sch 18 F(no2)A 2017 provides a definition: "For the purposes of sub-paragraph (3) a person "acted as an enabler" of relevant offshore tax non-compliance by another if the person encouraged, assisted or otherwise facilitated the conduct by the other person that constituted the offshore tax non-compliance. or otherwise facilitated the conduct by the other person that constituted the offshore tax non-compliance."

[54] Para 9(2) sch 24 FA 07/Para 12(3) sch 41 FA 08; Para 14(3) sch 55 FA 09 is effectively the same.

For asset based penalties, para 8 sch 22 FA 16 provides:

> (5) A case involves only unprompted disclosures where
>
> (a) in a case where the asset-based penalty relates to only one standard offshore tax penalty, that standard offshore tax penalty was reduced on the basis of an unprompted disclosure, or
>
> (b) in a case where the asset-based penalty relates to more than one standard offshore tax penalty, all of those standard offshore tax penalties were reduced on the basis of unprompted disclosures.
>
> (6) A case involves prompted disclosures where any of the standard offshore tax penalties to which the asset-based penalty relates was reduced on the basis of a prompted disclosure.

The Compliance Handbook provides:

> **CH82421 Determining unprompted or prompted disclosure** [Apr 2018]
>
> You must check the date from which these rules apply for the tax or duty you are dealing with. See CH81011 for full details.
>
> Whether a disclosure is unprompted or prompted is an objective test. The particular facts and circumstances of the disclosure are the basis of the test, not the belief that it was either unprompted or prompted.
>
> A national campaign highlighting an area of the trading community on which HMRC will be concentrating would not stop a disclosure from being unprompted. However a disclosure would be prompted if a person made the disclosure after
>
> - we contacted them to tell them we wished to make a compliance check of their return
> - we arranged to visit their premises to explore the risks we had identified, or
> - we told them that we had asked the Valuation Office Agency to consider the value of a property included in an inheritance tax account, or
> - HMRC has been supplied with information, under an automatic exchange of information agreement that would, when reviewed, lead to the discovery of the issue being disclosed. This would not apply where the person had no reason to believe that the information had been supplied to HMRC
>
> It will be exceptional for a disclosure to be unprompted if a compliance check is in progress. The disclosure will be unprompted only if it is about something the compliance officer has not discovered or is not

about to discover.

A disclosure may be made during the course of a compliance check. If it is related to the subject matter being reviewed then it will be considered to be a related disclosure and therefore prompted.

Some companies will be in continuous dialogue to share a Risk Profile with HMRC. A disclosure can be unprompted if it relates to an

- an area of risk identified by the company, or
- an area identified as part of risk profile discussions that is not yet the subject of a specific enquiry. ...

A person is only able to disclose something they know is wrong. They may be genuinely unaware that they have done anything wrong. However, a disclosure made after we challenge a particular issue cannot be unprompted.

An unprompted disclosure can be made for both inaccuracies and under-assessments.

CH82422 Examples of unprompted or prompted disclosure [Apr 2018]

...

Example 1

Jemima returned a capital gain which is the subject of a compliance check. There is no intention to expand the scope of the compliance check during the review. She discloses that she has not declared her car benefit. This is an unprompted disclosure.

Example 2

During a VAT assurance visit considering the credibility of Alphonse's sales records, he discloses that his sales have also been understated for income tax. This would be related to the subject under review and so is a prompted disclosure.

Example 3

During an Employer Compliance review the employer makes a disclosure that the basis of the transfer pricing calculation for Corporation Tax is wrong. This is unrelated to the subject under review and so there is an unprompted disclosure.

Example 4

During an enquiry into an inheritance tax account, we referred the value of the deceased's house to the Valuation Office Agency and tell the personal representatives that we have done so. The personal representatives subsequently correct the value upwards saying that they sold the property for the higher value shortly before submitting the account. This is a prompted disclosure.

Example 5

During an audit of a winery, the manager discloses to the officer that the duty declared on the previous return was actually incorrect. He admits that this had been incorrectly calculated on the strength of wine at 13% abv instead of 16% abv. The manager had made no previous attempt to inform HMRC about this inaccuracy before the stock records were checked. This is a prompted disclosure.

Example 6

On 17 May 2010 a central assessment is raised because Banner Ltd's VAT return for the quarter end 31 March 2010 has not been received. On 1 August 2010 a compliance check is arranged with the company and a visit takes place on 15 August. During the visit the directors produce the completed VAT return for the period to 31 March 2010 showing a liability in excess of the central assessment. The assessment based on the completed return replaced the assessment raised on 17 May 2010. The production of the return is a prompted disclosure of an under-assessment.

Note that if a disclosure of an under-assessment is made within 30 days of the date the assessment is issued there will be no penalty in respect of the under-assessment, see CH81170.

Example 7

Darren, a Trustee of a Settlement, included a capital gain in the SA Trust return. The gain is the subject of a compliance check. During the check, Darren discloses that he has used the wrong acquisition value as there was a held-over gain on the transfer of the asset to the Settlement. This is related to the subject under review and so is a prompted disclosure.

Example 8

David holds funds received from consultancy income earned abroad in a bank account in a CRS (Common Reporting Standard) reporting country. The overseas bank wrote to David to tell him that details of his account were being exchanged under CRS. His disclosure includes the undeclared income, interest received and income from other offshore structures. Details of these offshore bank accounts have been given to HMRC under CRS and there has been significant activity promoting this exchange. HMRC expect most people who are affected will be well aware of these changes and David was explicitly told by his bank that they were reporting his account under CRS. We will treat this as a prompted disclosure as David knew the information had been supplied to HMRC and he therefore had reason to believe HMRC were about to find out about the undeclared income.

Example 9

Sarah had a bank account in a CRS reporting country and has not declared the interest she receives in that account. The account was

> closed in 2015 and because of this HMRC will not receive information about it under the Common Reporting Standard (CRS). Sarah becomes aware of the CRS and although her account will not be reported she decides to make a disclosure to HMRC. Because Sarah made her disclosure at a time when she had no reason to believe her undisclosed income was about to be discovered her disclosure will be treated as unprompted.

Disclosure following an HMRC "nudge letter" is prompted.

126.34.7 *"Quality"*

Penalty template wording provides:[55]

> In relation to disclosure "quality" includes timing, nature and extent.

126.35 Additional information

The additional information is set out in regulations[56] whose full name is too long to be used: Penalties Relating to Offshore Matters and Offshore Transfers (Additional Information) Regulations 2017. I refer to the "Additional Information Regs".
Reg 3 Additional Information Regs provides:

> The additional information required for the purposes of
> [1] paragraph 9(1B)(d) of Schedule 24 to the Finance Act 2007,
> [2] paragraph 12(2B)(d) of Schedule 41 to the Finance Act 2008 and
> [3] paragraph 14(2B)(d) of Schedule 55 to the Finance Act 2009,
> is that a person ("P") must
> (a) tell HMRC whether or not regulations 4 or 5 (or both) apply to P; and
> (b) provide HMRC with the information specified in relation to those regulations set out in regulations 6 and 7 (as appropriate).

This concerns:
(1) Enablers
(2) Property holders

[55] Para 9(3) sch 24 FA 07/para 12(4) sch 41 FA 08/ para 14(4) sch 55 FA 09. Para 15(6) sch 18 F2A 17 is substantially the same: "In relation to disclosure or assistance, "quality" includes timing, nature and extent."

[56] Authorised by Para 9(1C) sch 24 FA 07; para 12(2C) sch 41 FA 08; Para 14(2C) sch 55 FA 09

126.35.1 *Enablers*

Reg 4 Additional Information Regs provides:

> 4 This regulation applies to P if there is a person ("the enabler") who encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question.

If so, reg 6 sets out the information required:

> The additional information to be provided to HMRC where regulation 4 applies to P is
> (a) the name and address of the enabler;
> (b) a description of the enablers conduct that encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question;
> (c) a description of how the first contact between P and the enabler was made and how the contact was maintained during the times when the enablers conduct encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question; and
> (d) a description of all documents held by P relating to the enablers conduct that encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question.

126.35.2 *Property holders*

Reg 5 Additional Information Regs provides:

> This regulation applies to P if
> (a) P is the sole or a joint beneficial owner of an asset ("the asset") situated or held in a territory outside the United Kingdom; and
> (b) the person holding the asset ("the asset holder") is not P.

If so, reg 7 sets out the information required:

> The additional information to be provided to HMRC where regulation 5 applies to P is
> (a) the name and address of any other joint beneficial owner of the asset; (b) the extent of Ps share of the beneficial ownership of the asset;
> (c) a description of all documents of title or other documents indicating Ps beneficial ownership of the asset;
> (d) details of where the asset is situated or held;

(e) details of when and how P became a beneficial owner of the asset (including a description of all documents held by P relating to the acquisition of Ps beneficial ownership of the asset);

(f) a description of all changes in the arrangements for the ownership of the asset since P became a beneficial owner of it (including the date of any change in the arrangements and a description of all documents held by P relating to such changes);

(g) the names and last known addresses of all persons who have been asset holders of the asset during Ps beneficial ownership of it; and

(h) in relation to an asset holder who is not an individual, the name and business address (if known) of any director, senior manager, employee or agent of the asset holder who has advised or assisted P in relation to Ps beneficial ownership of the asset.

126.35.3 *Misc provisions*

Reg 2 Additional Information Regs provides:

> In these Regulations
> “asset” has the meaning given in section 21(1) of the Taxation of Capital Gains Act 1992, but also includes sterling;
> “document” includes part of a document.

Reg 8 Additional Information Regs provides:

> 8 (1) A description of a document provided in accordance with regulations 6 or 7 must (as far as it is reasonably practicable to do so) state in relation to the document
>
> (a) the latest of the date when the document was made, prepared or, if appropriate, signed or executed;
>
> (b) the person who made or prepared it (and the person on whose behalf it was made or prepared if different);
>
> (c) the person who signed or executed the document (if appropriate);
>
> (d) the person to whom the document was given or sent (if appropriate);
>
> (e) a summary of its contents or the information recorded in the document;
>
> (f) the location of the document or where it may be inspected.
>
> (2) The requirement to provide a description of a document in

> accordance with regulations 6 or 7 may be met by the provision of the document in question to HMRC or a suitable copy of it.
> (3) The provision of a document (or a copy of it) to HMRC as described in paragraph (2) is without prejudice to any requirement to produce the document in question to HMRC or power of HMRC to require the production of the document.

126.36 Amount of reduction for disclosure

126.36.1 *Benefit of disclosure: General*

Penalty template wording provides:[57]

> (1) If a person who would otherwise be liable to a penalty of a percentage shown in column 1 of the Table (a "standard percentage") has made a disclosure, HMRC must reduce the standard percentage to one that reflects the quality of the disclosure.
> (2) But the standard percentage may not be reduced to a percentage that is below the minimum shown for it—
> (a) in the case of a prompted disclosure, in column 2 of the Table, and
> (b) in the case of an unprompted disclosure, in column 3 of the Table.

Thus in each case we have two Tables. It would have been easier to have just one, but there it is.

Para 13(3) and 13A(3) sch 41 FA 08 provide:

> (3) Where the Table shows a different minimum for case A and case B-
> (a) the case A minimum applies if-
> (i) the penalty is one under paragraph 1, and
> (ii) HMRC become aware of the failure less than 12 months after the time when the tax first becomes unpaid by reason of the failure, and
> (b) otherwise, the case B minimum applies.

For asset-based penalties, para 8 sch 22 FA 16 provides:

> (2) A reduction under sub-paragraph (1) must reflect the quality of the disclosure, valuation and information provided (and for these purposes "quality" includes timing, nature and extent).

[57] This wording (with trivial variants) is found 6 times: Para 10, 10A sch 24 FA 07;Para 13,13A sch 41 FA 08; Para 15,15A sch 55 FA 09.

126.36.2 *Error-based penalty reduction*

The para 10 sch 24 FA 07 table provides:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	15%	0%
70%	35%	20%
100%	50%	30%

The para 10A sch 24 FA 07 table provides:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	15%	0%
37.5%	18.75%	0%
45%	22.5%	0%
60%	30%	0%
70%	45%	30%
87.5%	53.75%	35%
100%	60%	40%
105%	62.5%	40%
125%	72.5%	50%
140%	80%	50%
150%	85%	55%
200%	110%	70%

126.36.3 *Failure to notify reduction*

The para 13 sch 41 table is as follows:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	case A: 10%	case A: 0%
	case B: 20%	case B: 10%
70%	35%	20%
100%	50%	30%

The para 13A sch 41 table is as follows:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	case A: 10%	case A: 0%
	case B: 20%	case B: 10%
37.5%	case A: 12.5%	case A: 0%
	case B: 25%	case B: 12.5%
45%	case A: 15%	case A: 0%
	case B: 30%	case B:15%
60%	case A: 20%	case A: 0%
	case B: 40%	case B: 20%

70%	45%	30%
87.5%	53.75%	35%
100%	60%	40%
105%	62.5%	40%
125%	72.5%	50%
140%	80%	50%
150%	85%	55%
200%	110%	70%

126.36.4 *Failure to make return reduction*

The para 15 sch 55 table is as follows:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
70%	35%	20%
100%	50%	30%

Para 15(3) sch 55 FA 09 provides a minimum penalty:

> But HMRC must not under this paragraph reduce a penalty below £300.

Subject to the £300 cap, the para 15A table is:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
70%	45%	30%
87.5%	53.75%	35%
100%	60%	40%
105%	62.5%	40%
125%	72.5%	50%
140%	80%	50%
150%	85%	55%
200%	110%	70%

126.36.5 *Asset-based penalty reduction*

Asset-based penalties do not follow the template of the others, so I deal with this separately, though the outcome is not so different.

Reg 2 Asset-based Penalty for Offshore Inaccuracies and Failures (Reductions for Disclosure and Co-operation) Regulations:

> The maximum amount by which the standard amount of the asset-based penalty determined in accordance with paragraph 7 of Schedule 22 to the Finance Act 2016 (standard amount of asset-based penalty) may be reduced as required by paragraph 8 of that Schedule (reductions for disclosure and co-operation) is—
>
> (a) 50% of the standard amount in a case involving only

unprompted disclosures, and
(b) 20% of the standard amount in a case involving prompted disclosures.

126.36.6 *RTC reduction amount*

RTC does not need a table. Para 16 sch 18 F2A 17 provides:

> (4) Where a person liable to a penalty under paragraph 1 [RTC penalty] discloses a matter HMRC must reduce the penalty to one that reflects the quality of the disclosure.
> (5) But the penalty may not be reduced below 100% of the offshore PLR.

126.37 Reduction: Special circumstances

Para 11(1) sch 24 FA 07	**Para 17 sch 18 F2A 17**
If they think it right because of special circumstances, HMRC may reduce a penalty[58] under paragraph 1,1A or 2 [Error-based penalties].	(1) If they think it right because of special circumstances, HMRC may reduce a penalty under paragraph 1 [RTC penalty].

Para 11(2) sch 24 FA 07/para 17(2) sch 18 F2A 17 provide two exceptions:

> In sub-paragraph (1) "special circumstances" does not include—
> (a) ability to pay, or
> (b) the fact that a potential loss of revenue from one taxpayer is balanced by a potential over-payment by another.

Does this apply if the over-payment is actual and not potential?

An example of special circumstances is HMRC delay: *Fuller v HMRC* [2020] UKFTT 189 (TC).

126.38 Interaction of penalties

126.38.1 *Interaction of error-based and other penalties*

Para 12 sch 24 FA 07 provides:

> (2) The amount of a penalty for which P is liable under paragraph 1 or 2 in respect of a document relating to a tax period shall be reduced by

[58] Para 11(3) sch 24 FA 07/para 17(3) sch 18 F2A 17 provide a definition:
"In sub-paragraph (1) the reference to reducing a penalty includes a reference to—
(a) staying a penalty, and
(b) agreeing a compromise in relation to proceedings for a penalty."

> [a] the amount of any other penalty incurred by P, or
> [b] any surcharge for late payment of tax imposed on P,
>
> if the amount of the penalty or surcharge is determined by reference to the same tax liability.
>
> (2A) In sub-paragraph (2) "any other penalty" does not include a penalty under Part 4 of FA 2014 (penalty where corrective action not taken after follower notice etc) or Schedule 22 to FA 16 (asset-based penalty)
>
> (3) In the application of section 97A of TMA 1970 (multiple penalties) no account shall be taken of a penalty under paragraph 1 or 2.

126.38.2 *Interaction of asset-based penalty/RTC*

Para 6A sch 22 FA 16 provides:

> Where-
> (a) a penalty has been imposed on a person under paragraph 1 of Schedule 18 to FA 2017, and
> (b) the potential loss of revenue threshold has been met,
>
> only one asset-based penalty is payable by the person in relation to any given asset.

126.38.3 *RTC/other penalties interaction*

Para 24 sch 18 F2A 17 provides:

> (1) Where by reason of any conduct[59] a person-
> (a) has been convicted of an offence, or
> (b) is liable to a penalty otherwise than under paragraph 1 [RTC penalty] for which the person has been assessed (and the assessment has not been successfully appealed against or withdrawn),
>
> that conduct does not give rise to liability to a penalty under paragraph 1.

This relief is narrowed by a limited definition of penalties to which it applies:

> (2) In sub-paragraph (1) the reference to a penalty otherwise than under paragraph 1—
> (a) includes a penalty under paragraph 6 of Schedule 55 to FA 2009, but does not include penalties under any other provision of that Schedule, and

[59] Para 24(4) provides: "In sub-paragraph (1) "conduct" includes a failure to act."

> (b) includes a penalty under subsection (5) of section 93 of TMA 1970 but, does not include penalties under any other provision of that section.

Para 24 sch 18 F2A 17 provides another cap:

> (3) But the aggregate of-
> (a) the amount of a penalty under paragraph 1, and
> (b) the amount of a penalty under paragraph 5 of Schedule 55 which is determined by reference to a liability to tax,
> must not exceed 200% of that liability to tax.

126.39 RTC Definitions

Para 2 sch 18 F2A 17 provides:

> Paragraphs 3 to 13 have effect for the purposes of this Schedule.

The heavy lifting is in these definitions. The key term is "relevant offshore tax non-compliance" but that is reached by a cascade of definitions. I deal with these in their logical order (rather than the statutory order):

Term	**Defined**	**See para**
Tax	Para 12	126.40
Tax non-compliance	Para 8	126.41
Offshore tax non-compliance	Para 7	126.42
Involves Offshore Matter	Para 9-11	126.24
Original offshore tax non-compliance	Para 3	126.43
Relevant offshore tax non-compliance	Para 3	126.44

126.40 RTC: "Tax"

Para 12(1) sch 18 F2A 17 provides:

> References to "tax" are (unless in the context the reference is more specific) to income tax, capital gains tax or inheritance tax.

CIOT RTC guidance provides:

> Tax payable by the employee (e.g. on benefits in kind) is within RTC. PAYE is included if the employer no longer exists e.g. because it is liquidated. Otherwise PAYE is not within RTC.

NICs are outside RTC.

CT is also outside RTC, and para 12(2) sch 18 F2A 17 extends this to the former NRCGT (which was payable by companies but classified as CGT, not CT):

> References to "capital gains tax" do not include capital gains tax payable by companies[60] in respect of chargeable gains accruing to them to the extent that those gains are NRCGT gains in respect of which the companies are chargeable to capital gains tax under section 14D or 188D of TCGA 1992 (see section 1(2A)(b) of that Act).

126.41 RTC: "Tax non-compliance"

Para 8(1) sch 18 F2A 17 provides:

> "Tax non-compliance" means any of the following-
>
> (a) a failure to comply on or before the filing date[61] with an obligation under section 7 of TMA 1970[62] to give notice of chargeability to income tax or capital gains tax,
>
> (b) a failure to comply on or before the filing date with an obligation to deliver to HMRC a return or other document which is listed in sub-paragraph (3), or
>
> (c) delivering to HMRC a return or other document which
>
> [A] is listed in sub-paragraph (3) or (4) and
>
> [B] contains an inaccuracy which amounts to, or leads to-
>
> (i) an understatement of a liability to tax,
>
> (ii) a false or inflated statement of a loss,[63] or
>
> (iii) a false or inflated claim to repayment of tax.[64]

126.41.1 *Para (3) list*

Failure to deliver a document in this list, or delivering an inaccurate document, counts as tax non-compliance. Para 8(3) sch 18 F2A 17 provides:

> The documents relevant for the purposes of both of paragraphs (b) and

[60] Para 12(3) sch 18 F2A 17 provides: "In sub-paragraph (2) "company" has the same meaning as in TCGA 1992."

[61] Para 8(2) sch 18 F2A 17 provides: "In sub-paragraph (1) -
(a) "filing date", in relation to a notice of chargeability or a return or other document, means the date by which it is required to be given, made or delivered to HMRC".

[62] See 121.2 (Duty to notify HMRC).

[63] Para 8(2) sch 18 F2A 17 provides: "In sub-paragraph (1)...
(b) "loss" includes a charge, expense, deficit and any other amount which may be available for, or relied on to claim, a deduction or relief".

[64] Para 8(2) sch 18 F2A 17 provides: "In sub-paragraph (1) ...
(c) "repayment of tax" includes a reference to allowing a credit against tax."

> (c) of sub-paragraph (1) are (so far as they relate to the tax or taxes shown in the first column)-[65]

Tax	**Document**	**Provision**	**See para**
IT/CGT	personal return	s.8(1) TMA	121.4
IT/CGT	trust return	s.8A(1) TMA	121.4
IT	partnership return	s.12AA(2)(3) TMA	
IT	pension scheme return	s.254 FA 2004	
IT	pension scheme information	reg 12 Retirement Benefits Schemes (Information Powers) Regs 1995	
CGT	NRCGT return	s.12ZB TMA [now abolished]	
IHT	IHT Account	s.216, 217 IHTA	125.5, 125.11

126.41.2 *Para (4) list*

Delivering an inaccurate document in the para (4) list counts as tax non-compliance. Para 8(4) sch 18 F2A 17 provides:

> The documents relevant for the purposes only of paragraph (c) of sub-paragraph (1) are (so far as they relate to the tax or taxes shown in the first column)-

Tax	**Document**[66]
IT/CGT	Return statement or declaration in connection with a claim for an allowance, deduction or relief
IT/CGT	Accounts in connection with ascertaining liability to tax
IT/CGT	Statement or declaration in connection with a partnership return
IT/CGT	Accounts in connection with a partnership return
IHT	Information/document under regulations under s.256 IHTA 1984
IHT	Statement or declaration in connection with a deduction exemption or relief.
IT/CGT/IHT	Any other document given to HMRC by a person ("P") which is likely to be relied on by HMRC to determine, without further inquiry, a question about– (a) P's liability to tax; (b) payments by P by way of or in connection with tax; (c) any other payment by P (including penalties); (d) repayments or any other kind of payment or credit to P.

The list is wide, as one would expect, but it does not cover everything.

[65] I have slightly tweaked the layout and wording of this list, for clarity.

[66] I have slightly tweaked the layout and wording of this list, for clarity.

126.42 "Offshore" non-compliance

Para 7 sch 18 F2A 17 provides:

> (1) "Offshore tax non-compliance" means tax non-compliance which involves
> [a] an offshore matter or
> [b] an offshore transfer,
> whether or not it also involves an onshore matter.
> (2) Tax non-compliance "involves an onshore matter" if and to the extent that it does not involve an offshore matter or an offshore transfer.

See 126.24 (Offshore Matter/Transfer: RTC).

126.43 Original tax non-compliance

This term is defined in passing in para 3(1)(a) sch 18 F2A 17:

> At the end of the 2016-17 tax year a person has "relevant offshore tax non-compliance" to correct if-
> (a) Conditions A and B[67] are satisfied in respect of any offshore tax non-compliance committed by that person on or before 5 April 2017 ("the original offshore tax non-compliance")

126.44 Relevant tax non-compliance

Armed with these definitions, we can turn to the definition of "relevant offshore tax non-compliance". Para 3(1) sch 18 F2A 17 provides:

> At the end of the 2016-17 tax year a person has "relevant offshore tax non-compliance" to correct if-
> (a) Conditions A and B are satisfied in respect of any offshore tax non-compliance committed by that person on or before 5 April 2017 ("the original offshore tax non-compliance"), and
> (b) Condition C will be satisfied on the relevant date (see paragraph 6).

126.44.1 *Cond. A: Uncorrected error*

Para 4 sch 18 F2A 17 provides:

> Condition A is that the original offshore tax non-compliance has not been fully corrected before the end of the tax year 2016-17 (see paragraph 13).

[67] See 126.20.1 (Cond. A: Uncorrected error); 126.44.2 (Condition B: PLR).

126.44.2 *Condition B: PLR*

Para 5 sch 18 F2A 17 provides:

> Condition B is that-
> (a) the original offshore tax non-compliance involved a potential loss of revenue when it was committed, and
> (b) if the original offshore tax non-compliance has been corrected in part by the end of the tax year 2016-17, the uncorrected part at that time involved a potential loss of revenue.

126.44.3 *Correction in part*

Para 3(2) sch 18 F2A 17 provides:

> Where the original offshore tax non-compliance committed by a person has been corrected in part by the end of the tax year 2016-17, the person's "relevant offshore tax non-compliance" is the uncorrected part of the original offshore tax non-compliance.

126.45 Cond. C: Assessable in 2017

Para 6 sch 18 F2A 17 provides:

> (1) Condition C is that
> [i] on the relevant date
> [ii] it is lawful, on the assumptions set out in sub-paragraph (2),
> [iii] for HMRC to assess the person concerned to any tax
> [iv] the liability to which would have been disclosed to or discovered by HMRC if on that date-
> (a) where none of the original offshore tax non-compliance was corrected before the end of the 2016-17 tax year, HMRC were aware of the information missing as a result of the failure to correct that tax non-compliance, or
> (b) where the original offshore tax non compliance was corrected in part before that time, HMRC were aware of the information missing as a result of the failure to correct the rest of that tax non-compliance.

This brings in time limits.

Para 6 sch 18 F2A 17 provides:

> (2) The assumptions are-
> (a) that paragraph 26 [extended time limit][68] is to be disregarded,

[68] See 121.19 (RTC time limit: 5/4/21).

> and
>
> (b) where the tax at stake is inheritance tax, that the relevant offshore tax non-compliance is not corrected before the relevant date

What is the point of para (b)?

126.45.1 *The relevant date*

Para 6(3) sch 18 F2A 17 provides:

> In this paragraph "the relevant date" is-
>
> (a) where the tax at stake is income tax or capital gains tax, 6 April 2017, and
>
> (b) where the tax at stake is inheritance tax, the day after the day on which this Act is passed.[69]

2016–17 is not within the scope of RTC, as non-compliance did not exist on 5 April 2017. Errors in this year are governed by the normal penalty provisions.

126.46 Correcting non-compliance

Para 13 sch 18 F2A 17 provides:

> (1) This paragraph sets out how offshore tax non-compliance may be corrected.
>
> (2) References to the correction of offshore tax non-compliance of any description are to the taking of any action specified in this paragraph as a means of correcting offshore tax non-compliance of that description.

The concept of "correcting" offshore tax non-compliance is defined 3 times:

Failure	**Para**
Notify IT/CGT	13(3)(4)
Deliver return	13(5)(6)
Inaccurate return	13(7)(8)

The legislation may be easier to follow if these sub-paragraphs are set out side by side.

Para 13(3): Failure to notify	*Para 13(5): No return*	*Para 13(7): Incorrect return*
Offshore tax non-compliance	Offshore tax non-compliance	Offshore tax non-compliance

[69] The Act was passed on 16 Nov 2017 so the relevant date for IHT is 17 Nov 2017.

consisting of a failure to notify chargeability may be corrected by-	consisting of a failure to make or deliver a return or other document may be corrected by giving HMRC the relevant information by-	consisting of making and delivering a return or other document containing an inaccuracy may be corrected by giving HMRC the relevant information by-
(a) [i] giving the requisite notice to HMRC (unless before doing so the person has received a notice requiring the person to make and deliver a tax return) and		
[ii] giving HMRC the relevant information by any means mentioned in paragraph (b),		
(b) giving HMRC the relevant information-		
(i) by making and delivering a tax return,	(a) making or delivering the requisite return or document,	(a) in the case of an inaccurate tax document, amending the document or delivering a new document,
(ii) using the digital disclosure service or any other service provided by HMRC as a means of correcting tax non-compliance,	(b) using the digital disclosure service or any other service provided by HMRC as a means of correcting tax non-compliance,	(b) using the digital disclosure service or any other service provided by HMRC as a means of correcting tax non-compliance,
(iii) communicating it to an officer of Revenue and Customs in the course of an enquiry into the person's tax affairs, or	(c) communicating it to an officer of Revenue and Customs in the course of an enquiry into the person's tax affairs, or	(c) communicating it to an officer of Revenue and Customs in the course of an enquiry into the person's tax affairs, or
(iv) using a method agreed with an officer of Revenue and Customs.	(d) using a method agreed with an officer of Revenue and Customs.	(d) using a method agreed with an officer of Revenue and Customs.

"Relevant information" is also defined three times:

Para 13(4): Failure to notify	*Para 13(6): No return*	*Para 13(8): Incorrect return*
In sub-paragraph (3) "relevant information" means information relating to offshore tax that-	(6) In subsection (5) "relevant information" means information relating to offshore tax that–	(8) In sub-paragraph (7) "relevant information" means information relating to offshore tax that–
(a) had the requisite notice been given in time and the person given a notice to make and deliver a tax return, would have been required to be included in the tax return, and	(a) should have been included in the return or other document, and	(a) should have been included in the return but was not (whether due to an omission or the giving of inaccurate information), and
(b) would have enabled or assisted HMRC to calculate the offshore tax due.	(b) would have enabled or assisted HMRC to calculate the offshore tax due.	(b) would have enabled or assisted HMRC to calculate the offshore tax due.

While this is not completely clear, it is suggested that relevant information means information in para (a) or (b) (it does not have to be both (a) and (b).

CIOT RTC guidance provides:

> If an estimated liability is provided in the absence of accurate information (e.g. because the taxpayer could not obtain the information or because another figure was used rather than getting a professional asset valuation) then this should be explained. The figure provided should be correct to the best of the taxpayer's knowledge and belief
> If the eventual tax liabilities are materially higher, then HMRC may revisit FTC [failure to correct] penalties as this might indicate the taxpayer was not compliant with RTC. HMRC recommend erring on the side of caution when stating the amounts of tax owed

Para 13(9) sch 18 F2A 17 provides:

> In this paragraph "offshore tax", in relation to any offshore tax non-compliance, means tax corresponding to the offshore PLR in respect of the non-compliance.

126.46.1 *Multiple parties*

CIOT RTC guidance provides:

> In the case of a single report being prepared for multiple parties (for

> example trustee, underlying companies and beneficiaries) it will still be necessary for each party to register separately for the WDF and for the report to be submitted for each party

126.46.2 *Trustees*

CIOT RTC guidance provides:

> In the case of a change of trustees but where the trust remains the same settlement, the new trustees can and should make the correction even if the non-compliance occurred during the trusteeship of a previous trustee. The liability is that of the trust and anyone authorised to act on behalf of the trust, including new trustees, can make the correction.

More analytically, new trustees can and should correct non-compliance of old trustees because trustees are treated as a single and continuing body.

126.46.3 *Deceased taxpayer*

CIOT RTC guidance provides:

> Personal representatives (PRs) do not inherit the deceased's "relevant offshore tax non-compliance" so they have nothing to correct
> If a taxpayer dies after the end of the RTC period without having corrected "relevant offshore tax non-compliance", in line with their normal practice, HMRC will not charge FTC penalties on the deceased's estate
> There may be occasions where other parties (not the PRs) may have a requirement to correct – such as trustees – and this should always be considered

126.47 RTC: Nil liability disclosure

HMRC RTC guidance provides:

> If the advice you have received is that no further tax is due, but the matter is not clear cut, you can use the internet to provide HMRC with the relevant information without accepting that you have unpaid liabilities.
> To do this you should register to make an offshore disclosure via HMRC's digital disclosure service. Once you have done this you will be sent a Disclosure Reference Number (DRN).
> The DRN will consist of the letters 'WDF' followed by a series of numbers. When you receive your DRN you should then complete the disclosure process on the digital disclosure service showing that you owe no tax.

> At the same time as you submit your disclosure via the digital disclosure service you should send a report that contains all of the relevant information to ocu.hmrc@hmrc.gsi.gov.uk.
>
> Your email must include your DRN and the words 'Requirement to Correct' in the subject heading.
>
> Provided you give HMRC all the relevant information about the matter you will have made a correction under the RTC even if you do not agree that additional tax is due. As you have made a correction no FTC [failure to correct] penalty can be due.
>
> HMRC will then consider the information you have provided to decide whether or not they agree that no tax is due....
>
> **Information you must supply when making a disclosure that no tax is due**
>
> HMRC can see no reason for you to make a disclosure that no tax is due except where you have doubt about whether tax is correctly due.
>
> When making such a disclosure you should therefore
>
> [1] set out a full explanation of why you have doubt about whether tax is due and
>
> [2] set out all of the relevant facts that you took into account in deciding that no tax is due.
>
> You should also provide an indication of the amount of income, gains and similar that you think are not liable to tax as a result of your decision.
>
> If you do this, provided the information you supply is accurate, the penalties for a Failure to Correct will not be due if it later transpires that additional tax is due as a result of the issue you have told us about (other existing penalties may apply).
>
> HMRC will acknowledge the information has been supplied but the offer to pay no tax will not be formally accepted. HMRC will only contact you for further information if they are concerned that your conclusion is incorrect.

CIOT RTC guidance provides:

> This process is a concession provided in the guidance that allows taxpayers, in limited circumstances, to provide less information than might strictly be required by the legislation and is designed to facilitate nil liability disclosures
>
> HMRC will look at all nil disclosures and may query/investigate them
>
> HMRC will not seek a FTC penalty if all relevant facts are disclosed as in effect the taxpayer will be treated as having made a correction
>
> This route is only for taxpayers not under enquiry and should not be used where the taxpayer is under enquiry. Here the case officer should

be contacted with a view to agreeing what should be supplied before 30 September

126.48 Application of TMA rules

Para 25 sch 18 F2A 17 provides:

> Subject to the provisions of this Part of this Schedule, the following provisions of TMA 1970 apply for the purposes of this Part of this Schedule as they apply for the purposes of the Taxes Acts-
> (a) section 108 (responsibility of company officers),
> (b) section 114 (want of form), and
> (c) section 115 (delivery and service of documents).

126.49 RTC: Interpretation

Para 32 sch 18 F2A 17 provides minor definitions:

> (1) In this Schedule (apart from the amendments made by Part 3)-
> "tax period" means a tax year or other period in respect of which tax is charged (or in the case of in-heritance tax, the year beginning with 6 April and ending on the following 5 April in which the liability to tax first arose);
> "tax year", in relation to inheritance tax, means a period of 12 months beginning on 6 April and ending on the following 5 April;
> "United Kingdom" means the UK, including its territorial sea.
> (2) A reference to making a return or doing anything in relation to a return includes a reference to amending a return or doing anything in relation to an amended return.
> (3) References to delivery (of a document) include giving, sending and any other similar expressions.
> (4) A reference to delivering a document to HMRC includes–
> (a) a reference to communicating information to HMRC in any form and by any method (whether by post, fax, email, telephone or otherwise, and
> (b) a reference to making a statement or declaration in a document.
> (5) References to an assessment to tax, in relation to inheritance tax, are to a determination.
> (6) An expression used in relation to income tax has the same meaning as in the Income Tax Acts.
> (7) An expression used in relation to capital gains tax has the same meaning as in the enactments relating to that tax.
> (8) An expression used in relation to inheritance tax has the same meaning as in IHTA 1984.

126.50 Assessment of penalties

Para 18 sch 55 FA 2009 provides:

> (1) Where P is liable for a penalty under any paragraph of this Schedule HMRC must—
>
> (a) assess the penalty,
> (b) notify P, and
> (c) state in the notice the period in respect of which the penalty is assessed.
>
> …
>
> (3) An assessment of a penalty under any paragraph of this Schedule—
>
> (a) is to be treated for procedural purposes in the same way as an assessment to tax (except in respect of a matter expressly provided for by this Schedule),
> (b) may be enforced as if it were an assessment to tax, and
> (c) may be combined with an assessment to tax.

The rules for assessing a penalty are not the same as for assessing tax. In *Trustees of the Paul Hogarth Life Interest Trust v HMRC:*[70]

> Paragraph 18(1) says it is P who must be assessed. Not only is that an express provision, it is a mandatory one, unlike it seems s 30AA TMA. Thus it is the relevant trustee or trustees who were given the s 8A(1) TMA notice who are to be assessed. This is also consistent with the requirements in s 8A(5) to read relevant references in other parts of TMA (notably s 29) by reference to the identity of the s 8A(1) notice recipient.

126.51 RTC: Disguised remuneration

CIOT RTC guidance provides:

> HMRC are updating both the RTC Guidance and the DR Settlement Terms Guidance to explain what will happen where a taxpayer has not finished the correction process on a DR settlement by 30 September 2018; indeed, the aim is for people to settle by 31 March 2019 in advance of the 5 April 2019 loan charge. The updated guidance will be published soon. It seems likely that HMRC's position will be that the DR Settlement Terms will fall to be treated as "any other service provided by HMRC as a means of correcting tax non-compliance" (para 13 (3)(b)(ii)) but this will not be confirmed until the updated guidance

[70] [2018] UKFTT 595 (TC) at [26].

is published.

Some DR settlements must include liabilities by way of "voluntary restitution". HMRC's view is that any amounts that fall within "voluntary restitution" are not liabilities in need of correction at April 2017 (para 3(1)(b)). Consequently, they are outside the scope of RTC and no FTC [failure to correct] sanctions can arise in relation to them.

126.52 GAAR penalties

I consider this topic in outline only.

Section 212A FA 2013 provides:

> (1) A person (P) is liable to pay a penalty if—
> (a) P has been given a notice under—
> (i) paragraph 12 of Schedule 43
> (ii) paragraph 8 or 9 of Schedule 43A, or
> (iii) paragraph 8 of Schedule 43B,
>
> stating that a tax advantage arising from particular tax arrangements is to be counteracted,

These notices are:

Provision	**Notice**
Para 12 sch 43	HMRC counteraction after GAAR advisory panel opinion
Para 8 or 9 sch 43A	Pooling notices
Para 8 sch 43B	Generic referral of tax arrangements

Section 212A FA 2013 continues:

> (b) a tax document has been given to HMRC on the basis that the tax advantage arises to P from those arrangements,
> (c) that document was given to HMRC—
> (i) by P, or
> (ii) by another person in circumstances where P knew, or ought to have known, that the other person gave the document on the basis mentioned in paragraph (b), and
> (d) the tax advantage has been counteracted by the making of adjustments under section 209.
>
> (2) The penalty is 60% of the value of the counteracted advantage.
>
> (3) Schedule 43C—
> (a) gives the meaning of "the value of the counteracted advantage", and
> (b) makes other provision in relation to penalties under this section.
>
> (4) In this section "tax document" means any return, claim or other document submitted in compliance (or purported compliance) with any

> provision of, or made under, an Act.
> (5) In this section the reference to giving a tax document to HMRC is to be interpreted in accordance with paragraph 11(g) and (h) of Schedule 43C.

Section 212B FA 2013 makes equivalent provision for partnerships, not discussed here.

126.53 Public list of defaulters

In 1905, the Departmental Committee on Income Tax reported:

> Besides the pecuniary penalties, publicity would be the most effectual and appropriate penalty for fraud. We recommend that the Board of Inland Revenue or the General Commissioners should be empowered to publish names and details in cases of gross fraud, whenever and in so far as they consider that course desirable.[71]

Statutory "naming and shaming" was introduced a century later. Section 94 FA 2009 provides:

> (1) The Commissioners may publish information about any person if—
> (a) in consequence of an investigation conducted by the Commissioners, one or more relevant tax penalties[72] is found to have been incurred by the person, and
> (b) the potential lost revenue[73] in relation to the penalty (or the aggregate of the potential lost revenue in relation to each of the

[71] Report para 37.

[72] Defined s.94(2) FA 2009: "A "relevant tax penalty" is—
(a) a penalty under paragraph 1 of Schedule 24 to FA 07 (inaccuracy in taxpayer's document) in respect of a deliberate inaccuracy on the part of the person,
(b) a penalty under paragraph 1A of that Schedule (inaccuracy in taxpayer's document attributable to deliberate supply of false information or deliberate withholding of information by person),
(c) a penalty under paragraph 1 of Schedule 41 to FA 08 (failure to notify) in respect of a deliberate failure on the part of the person, or
(d) a penalty under paragraph 2 (unauthorised VAT invoice), 3 (putting product to use attracting higher duty etc) or 4 (handling goods subject to unpaid excise duty) of that Schedule in respect of deliberate action by the person."

[73] Defined s.94(3) FA 2009: ""Potential lost revenue", in relation to a penalty, has the meaning given by—
(a) paragraphs 5 to 8 of Schedule 24 to FA 07, or
(b) paragraphs 7 to 11 of Schedule 41 to FA 08,
in relation to the inaccuracy, failure or action to which the penalty relates."

penalties) exceeds £25,000.

(4) The information that may be published is—

(a) the person's name (including any trading name, previous name or pseudonym),

(b) the person's address (or registered office),

(c) the nature of any business carried on by the person,

(d) the amount of the penalty or penalties and the potential lost revenue in relation to the penalty (or the aggregate of the potential lost revenue in relation to each of the penalties),

(e) the periods or times to which the inaccuracy, failure or action giving rise to the penalty (or any of the penalties) relates, and

(f) any such other information as the Commissioners consider it appropriate to publish in order to make clear the person's identity.

The list is online, for readers who are curious, with about 300 names.[74]

126.53.1 *Trustees/controlling persons*

Section 94 FA 2009 provides:

Body corporate/partnership	**Trustees**
(4A) Subsection (4B) applies where a person who is a body corporate or a partnership has incurred—	(4C) Subsection (4D) applies where one or more trustees of a settlement have incurred—
(a) a penalty under paragraph 1 of Schedule 24 to FA 2007 in respect of a deliberate inaccuracy which involves an offshore matter or an offshore transfer (within the meaning of paragraph 4Aof that Schedule), or (b) a penalty under paragraph 1 of Schedule 41 to FA 2008 in respect of a deliberate failure which involves an offshore matter or an offshore transfer (within the meaning of paragraph 6A of that Schedule).	[identical]

[74] *https://www.gov.uk/government/publications/publishing-details-of-deliberate-tax-defaulters-pddd/current-list-of-deliberate-tax-defaulters*

(4B) The Commissioners may publish the information mentioned in subsection (4) in respect of any individual who—
(a) controls the body corporate or the partnership (within the meaning of section 1124 of CTA 2010) [strict-sense control], and
(b) has obtained a tax advantage[75] as a result of the inaccuracy or failure.

(4D) The Commissioners may publish the information mentioned in subsection (4) in respect of any trustee who is an individual and who has obtained a tax advantage as a result of the inaccuracy or failure....

126.53.2 *Process*

Section 94 FA 2009 provides:

> (6) Before publishing any information about a person under subsection (1) the Commissioners—
> (a) must inform the person that they are considering doing so, and
> (b) afford the person reasonable opportunity to make representations about whether it should be published.
>
> (6A) Before publishing any information about an individual under subsection (4B) or (4D), the Commissioners—
> (a) must inform the individual that they are considering doing so, and
> (b) afford the individual reasonable opportunity to make representations about whether it should be published.
>
> (7) No information may be published before the day when the penalty becomes final (or the latest day when any of the penalties becomes final).
>
> (8) No information may be published for the first time after the end of the period of one year beginning with that day (or that latest day).
>
> (9) No information may be published (or continue to be published) after the end of the period of one year beginning with the day on which it is first published.
>
> (10) No information may be published if the amount of the penalty is reduced under—[76]

[75] Section 94(16) FA 2009 Para 6(2) incorporates the GAAR definition of tax advantage by reference: "In this section ... "tax advantage" has the meaning given by section 208 of FA 2013."

[76] For clarity I have set this out in tabular form rather than the layout of the statute.

Provision	**See para**
Para 10 sch 24 FA 2007	126.36.2
Para 10A sch 24 FA 2007 to the full extent permitted following an unprompted disclosure	126.36.2
Para 13 sch 41 FA 2008, to the full extent permitted, or	126.36.3
para 13A sch 41 FA 2008 to the full extent permitted following an unprompted disclosure.	126.36.3

126.53.3 *Publication rule: Critique*

We have seen the usual mission creep, together with an erosion of the minimum limit by inflation. The House of Lords Economic Affairs Committee say:

> Naming and shaming provisions have subsequently been introduced to allow HMRC to publish the names of large corporations whose behaviour is consistently uncooperative and of promoters and participants in failed avoidance schemes.
> 114. The extension of the naming sanction to taxpayers and promoters whose behaviour is legal, but of which HMRC disapproves, blurs an important boundary between those who break the law and those who do not.
> 115. We recommend that naming and shaming provisions should be restricted to those who have broken the law.[77]

But no-one has taken any notice of that.

126.54 Public attitude(s) to compliance

One wonders what the public think of all this. In *Ruddigore*, Robin is examined to see if he has complied with an ancestral obligation to commit a crime every day:

> **Sir Roderic.** It is our duty to see that our successors commit their daily crimes in a conscientious and workmanlike fashion. It is our duty to remind you that you are evading the conditions under which you are permitted to exist.
> **Robin.** Really, I don’t know what you’d have. I’ve only been a bad baronet a week, and I’ve committed a crime punctually every day.
> **Sir Roderic.** Let us inquire into this. Monday?

[77] House of Lords Economic Affairs Committee “HMRC: Treating Taxpayers Fairly” (2018) *https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf*

Robin. Monday was a Bank Holiday.
Sir Roderic. True. Tuesday?
Robin. On Tuesday I made a false income-tax return.
All. Ha! ha!
Sir Rupert. That's nothing.
Sir Jasper. Nothing at all.
Sir Conrad. Everybody does that.
Sir Gilbert. It's expected of you.

That was 1887. Since 2007 we have seen new penalty regimes culminating in 2017 with RTC and the attempt to change corporate culture by the criminal offence of failing to prevent tax evasion.[78] Has the joke had its day? Discuss.

[78] See 120A.1 (Failure to prevent evasion).

CHAPTER ONE HUNDRED AND TWENTY SEVEN

FAILURE TO PREVENT TAX EVASION

127.1 Failure to prevent evasion
127.2 Definitions
127.2.1 Relevant body
127.2.2 Associated person

127.26 Application of TMA 1970
127.27 Interpretation of Part 1
127.28 Naming and shaming

127.1 Failure to prevent evasion

The main topic of this chapter is the offence of failure to prevent tax evasion; or, viewing the same topic from a different perspective, the requirement for businesses to have evasion prevention policies and procedures. I also discuss a variety of other tax offences.

The law is in Part 3 Criminal Finances Act 2017.

HMRC have issued 50 pages of guidance (**"CFA guidance"**).[1] This is statutory guidance.[2] I am not sure that has added to its quality; but the disclaimer is more than a page long, which is, I think, a record.

HMRC's guidance is supplemented by industry guidance from:

Law Society[3]
Financial Services Sector[4]
London & International Insurance Brokers' Association

A full discussion would require a book to itself.

The background is in HMRC consultation papers,[5] now of mainly historical interest.

As at July 2023 no charges have been brought.[6] But the measure of success should be whether the legislation has changed behaviour and reduced facilitation of evasion. Has that happened? Is it possible to tell?

[1] HMRC, "Tackling tax evasion: Government guidance for the corporate offences of failure to prevent the criminal facilitation of tax evasion" (2017).
https://www.gov.uk/government/publications/corporate-offences-for-failing-to-prevent-criminal-facilitation-of-tax-evasion
This draws at points on guidance relating to the Bribery Act 2010.

[2] It is required by s.47 CFA.

[3] *https://www.lawsociety.org.uk/en/topics/tax/criminal-finances-act-2017*

[4] "Failure to prevent the criminal facilitation of tax evasion: Guidance for the financial services sector on the corporate criminal offences within the Criminal Finances Act 2017"
https://www.ukfinance.org.uk/system/files/Corporate-Criminal-Offences-guidance-clean-version-as-approved-by-UK-Finance.pdf
This in turn draws on Joint Money Laundering Steering Group guidance entitled "Prevention of money laundering and combating terrorist financing".

[5] HMRC, "Tackling offshore tax evasion: A new corporate criminal offence of failure to prevent the facilitation of evasion" (July 2015)
HMRC, "Tackling offshore tax evasion: A new criminal offence for offshore evaders Summary of Responses" (Dec 2015)
https://www.gov.uk/government/consultations/tackling-offshore-evasion

[6] HMRC FOI release, "Number of live Corporate Criminal Offences investigations" 27 July 2023
https://www.gov.uk/government/publications/number-of-live-corporate-criminal-offences-investigations/number-of-live-corporate-criminal-offences-investigations

Discuss.

The Law Commission consider the possibility of new failure to prevent style offences in the report "Corporate Criminal Liability" (2022).[7]

127.2 Definitions

CFA is not part of the Taxes Acts, so the usual Taxes Acts definitions do not apply.

127.2.1 *Relevant body*

Section 44 CFA 2017 provides:

> (1) This section defines expressions used in this Part [Part 3 CFA].
> (2) "Relevant body" means a body corporate or partnership (wherever incorporated or formed).

That covers all businesses other than individual sole traders (such as barristers in private practice).

Section 44(3) CFA 2017 provides:

> "Partnership" means-
> (a) a partnership within the meaning of the Partnership Act 1890, or
> (b) a limited partnership registered under the Limited Partnerships Act 1907,
>
> or a firm or entity of a similar character formed under the law of a foreign country.

The definition is from s.1208 Companies Act 2006.[8] An LLP is not a partnership, but it is a body corporate and so a relevant person.

127.2.2 *Associated person*

Section 44(4) CFA 2017 provides:

> A person (P) acts in the capacity of a person associated with a relevant body (B) if P is-
> (a) an employee of B who is acting in the capacity of an employee,
> (b) an agent of B (other than an employee) who is acting in the capacity of an agent, or
> (c) any other person who performs services for or on behalf of B who is acting in the capacity of a person performing such

[7] *https://www.lawcom.gov.uk/project/corporate-criminal-liability/*

[8] See 90.3.3 (Foreign-entity clauses).

services.

Section 44(5) CFA 2017 provides:

> For the purposes of subsection (4)(c) the question whether or not P is a person who provides services for or on behalf of B is to be determined by reference to all the relevant circumstances and not merely by reference to the nature of the relationship between P and B.

I am not sure what (if anything) the drafter had in mind here, but it shows that the phrase "for or on behalf of B" is not to be narrowly understood.

The wording draws on s.8 Bribery Act 2010 and guidance/discussion on that provision may be helpful here.

A director is not an employee.[9] But they probably perform services for their company, so a director may be an Associate under para (c).

127.3 The CFA offences

s.45 CFA (UK tax evasion)

(1) A relevant body (B) is guilty of an offence if a person commits a UK tax evasion facilitation offence when acting in the capacity of a person associated with B.

s.46 CFA (foreign tax evasion)

(1) A relevant body (B) is guilty of an offence if at any time-
(a) a person commits a foreign tax evasion facilitation offence when acting in the capacity of a person associated with B, and
(b) any of the conditions in subsection (2) is satisfied.

(2) The conditions are-
(a) that B is a body incorporated, or a partnership formed, under the law of any part of the UK;
(b) that B carries on business or part of a business in the UK;
(c) that any conduct constituting part of the foreign tax evasion facilitation offence takes place in the UK;
and in paragraph (b) "business" includes an undertaking.

[9] Unless in addition to the office of director, they have also entered into a contract of employment.

In this chapter:

Term	**Meaning**
Facilitation Offence	UK/foreign tax evasion facilitation offence
Facilitation Offender	Person who commits that offence
Failure to prevent evasion offence	Offence under s.45(1)/46(1) CFA

127.4 Facilitation Offence

This term has a (relatively) straightforward meaning:

s.45(5) CFA (UK tax evasion)	**s.46(6) CFA (foreign tax evasion)**
In this Part [Part 3 CFA] "UK tax evasion facilitation offence" means	In this Part [Part 3 CFA] "foreign tax evasion facilitation offence" means
an offence under the law of any part of the UK consisting of—	conduct which- (a) amounts to an offence under the law of a foreign country,
(a) being knowingly concerned in, or in taking steps with a view to, the fraudulent evasion of a tax by another person, (b) aiding, abetting, counselling or procuring the commission of a UK tax evasion offence, or (c) being involved art and part[10] in the commission of an offence consisting of being knowingly concerned in, or in taking steps with a view to, the fraudulent evasion of a tax.	(b) relates to the commission by another person of a foreign tax evasion offence under that law, and (c) would, if the foreign tax evasion offence were a UK tax evasion offence, amount to a UK tax evasion facilitation offence (see section 45(5) and (6)).

It is difficult to see what paras (b)/(c) add to para (a); but it does not matter.

Section 45(6) CFA provides:

> Conduct carried out with a view to the fraudulent evasion of tax by another person is not to be regarded as a UK tax evasion facilitation offence by virtue of subsection (5)(a) unless the other person has

[10] "Art and part" is a term of Scots law meaning to aid or abet an offence.

committed a UK tax evasion offence facilitated by that conduct.

127.4.1 *"Tax evasion offence"*

The term "tax evasion offence" matters because it is a requirement of a Facilitation Offence under s.45(5)(b) and s.46(5).

s.45(4) CFA (UK tax evasion)	**s.46(5) CFA (foreign tax evasion)**
In this Part [Part 3 CFA] "UK tax evasion offence" means- (a) an offence of cheating the public revenue, or (b) an offence under the law of any part of the UK consisting of being knowingly concerned in, or in taking steps with a view to, the fraudulent evasion of a tax.[11]	In this Part [Part 3 CFA] "foreign tax evasion offence" means conduct which— (a) amounts to an offence under the law of a foreign country, (b) relates to a breach of a duty relating to a tax imposed under the law of that country, and (c) would be regarded by the courts of any part of the UK as amounting to being knowingly concerned in, or in taking steps with a view to, the fraudulent evasion of that tax.

127.4.2 *"Knowingly concerned"*

"Knowingly concerned" matters for:
(1) the definition of Facilitation Offence
(2) statutory offences of fraudulent evasion

What knowledge is required by "knowingly", and what conduct is required by "concerned in"? Or is it a question of fact for the magistrate/jury?

127.4.3 *"Tax*"

Section 45(7) CFA provides:

> For the purposes of this section "tax" means a tax imposed under the law of any part of the UK, including national insurance contributions under-
> (a) Part 1 of the Social Security Contributions and Benefits Act 1992, or
> (b) Part 1 of the Social Security Contributions and Benefits (Northern Ireland) Act 1992.

[11] See 127.8 (Fraudulent evasion).

127.5 Prevention procedures

s.45(2) CFA (UK tax evasion)	**s.46(3) CFA (foreign tax evasion)**
It is a defence for B to prove that, when the UK tax evasion facilitation offence was committed-	It is a defence for B to prove that, when the foreign tax evasion facilitation offence was committed-
(a) B had in place such prevention procedures as it was reasonable in all the circumstances to expect B to have in place, or (b) it was not reasonable in all the circumstances to expect B to have any prevention procedures in place.	[Identical]

Parallels may be drawn with:

(1) Adequate procedures defence under s.7 Bribery Act 2010
(2) The senior accounting officer regime; sch 46 FA 2009
(3) AML requirements

127.5.1 *"Prevention procedures"*

s.45(3) CFA (UK tax evasion)	**s.46(4) CFA (foreign tax evasion)**
In subsection (2) "prevention procedures" means procedures designed to prevent persons acting in the capacity of a person associated with B from committing UK tax evasion facilitation offences.	In subsection (3) "prevention procedures" means procedures designed to prevent persons acting in the capacity of a person associated with B from committing foreign tax evasion facilitation offences under the law of the foreign country concerned.

A key issue is what is required by *reasonable* prevention procedures. HMRC CFA guidance states six times:

> [The Principal's] compliance with any applicable published guidance, its contractual terms for its staff, the training it provides, and any steps taken to monitor and ensure compliance would all be relevant to the assessment of whether it had reasonable prevention procedures.

That does not take us far. Industry guidance should be more specific.

127.6 Procedural aspects

127.6.1 *Penalty*

Section 45(8)/46(7) CFA provides:

> A relevant body guilty of an offence under this section is liable-
> (a) on conviction on indictment, to a fine;
> (b) on summary conviction in England and Wales, to a fine;
> (c) on summary conviction in Scotland or Northern Ireland, to a fine not exceeding the statutory maximum.

Section 48(2)-(4) deal with jurisdiction. The offences are tried in magistrates courts (in Scotland, sheriff's courts). Criminal practitioners doubt whether this is appropriate, but there it is.

127.6.2 *Extra-territorial application*

Section 48(1) CFA provides:

> (1) It is immaterial for the purposes of section 45 or 46 (except to the extent provided by section 46(2)) whether-
> (a) any relevant conduct of a relevant body, or
> (b) any conduct which constitutes part of a relevant UK tax evasion facilitation offence or foreign tax evasion facilitation offence, or
> (c) any conduct which constitutes part of a relevant UK tax evasion offence or foreign tax evasion offence,
>
> takes place in the UK or elsewhere.

127.6.3 *Offence by partnership*

Section 50 CFA provides:

> (1) Proceedings for an offence under section 45 or 46 alleged to have been committed by a partnership must be brought in the name of the partnership (and not in the name of any of the partners).
> (2) For the purposes of such proceedings-
> (a) rules of court relating to the service of documents have effect as if the partnership were a body corporate, and
> (b) the following provisions (which concern procedure in relation to offences by bodies corporate) apply as they apply to a body corporate-
> (i) section 33 of the Criminal Justice Act 1925 and Schedule 3 to the Magistrates' Courts Act 1980, and
> (ii) section 18 of the Criminal Justice Act (Northern Ireland)

> 1945 (c 15 (NI)) and Schedule 4 to the Magistrates' Courts (Northern Ireland) Order 1981 (SI 1981/1675 (NI 26)).
>
> (3) A fine imposed on a partnership on its conviction for an offence under section 45 or 46 is to be paid out of the partnership assets.

In short, a partnership is treated as a legal person.

127.6.4 *Terminology*

Before turning to the examples, it is helpful to set out my terminology:

Term	**Meaning**
Taxpayer Evader	Person committing tax offence /fraudulent evasion
Facilitation Offence	UK/foreign tax evasion facilitation offence
Facilitation Offender	Person who commits that offence
Principal	Person for whom Associate is working
Associate	Person working for Principal

127.7 HMRC CFA guidance

I do not address the whole of the guidance. I do however consider its anodyne examples. I am not sure that one adds more to the next, but an adviser in this area will start by reading these, so I set them out here.

The guidance was not, I think, written by a lawyer.

127.7.1 *Branches*

HMRC CFA guidance provides:

> Gladstone Bank is a bank incorporated and headquartered in Switzerland.
>
> The bank has branches in a number of jurisdictions, including the UK and Germany. Whilst the bank has several branches across the world, the branches are not separate legal entities (they are branches not subsidiaries): the bank is a single legal entity, a company incorporated under Swiss law. All the bank's branches comprise a single legal person.
>
> The Bank chooses not to put in place procedures to prevent persons providing services for or on its behalf facilitating tax evasion. However, the UK branch does its best to put in place UK focused procedures aimed purely at staff working in its UK offices.
>
> The UK Branch consists of a small number of employees whose functions are restricted to:
>
> - attracting and on-boarding clients for Gladstone Bank;
> - providing minor administrative services; and
> - acting as a first point of contact for UK based customers.

> The UK branch attracts and on-boards a number of clients for Gladstone Bank resident in London, including Freya who has UK tax liabilities and Larry who has German tax liabilities.
>
> The employees of the UK branch attract the clients in good faith believing that Gladstone Bank is providing routine financial services to its clients. Once the clients have been attracted all financial services are provided by either the bank's headquarters in Switzerland or employees in the German Branch.
>
> Employees of the German Branch, deliberately and dishonestly help Larry to evade his German tax liabilities. The employees:
>
> - advise Larry on structures that allow him to hide his assets and income from the German tax authorities;
> - provide false certification to hide the true owners of accounts; and
> - deliberately fail to comply with the applicable Anti Money Laundering Regulations.
>
> Employees of the Swiss headquarters deliberately and dishonestly help Freya to evade her UK tax liabilities. The employees:
>
> - advise Freya on structures to help her hide overseas income from the UK tax authorities;
> - deliberately set up a bank account in Switzerland knowing it is going to be used to hide the overseas income from the UK tax authorities.

The example might have been easier to follow if it had been split into two examples, one for the UK taxpayer and another for the German taxpayer. But there it is.

The HMRC analysis is as follows:

Freya

> Stage 1: Taxpayers
>
> Freya has deliberately and dishonestly failed to declare her taxable income and assets to HMRC with the intention of not paying the tax that she legally owes. She has committed [inter alia] the offence of being knowingly concerned in the fraudulent evasion of income tax contrary to section 106A of the Taxes Management Act 1970.

Freya is a Taxpayer Evader.

Gladstone Employees

> Stage 2: Associated persons of Gladstone Bank and criminal facilitation
>
> Employees of Gladstone's Swiss Head Office have deliberately and dishonestly provided services to Freya to help her to hide her taxable income and assets in order to help her evade her UK tax liability. They

are also guilty [inter alia] of being knowingly concerned in the fraudulent evasion of income tax, an offence contrary to section 106A of the Taxes Management Act 1970.

The associated person was providing services (advice to clients) for or on behalf of the bank when they committed the tax evasion facilitation offence.

Gladstone employees (Associates) are Facilitation Offenders.

Gladstone Bank

Stage 3: Liability for Gladstone Bank for failing to prevent the criminal facilitation of tax evasion

Gladstone Bank is not guilty of the section 106A Taxes Management offence. It is not possible to attribute the requisite guilty mind to the bank itself in respect of the criminal act committed, because none of the people considered to be the bank's directing mind and will (typically the Board of Directors) were involved in the offence.

However, the bank is liable for having failed to prevent its associated persons operating in its Swiss Head Office from criminally facilitating Freya's UK tax liability (the new UK tax offence) unless it is able to establish the reasonable prevention procedures defence.

Gladstone Bank may struggle to mount a reasonable prevention procedures defence, its procedures were arguably not reasonable because it had only implemented procedures for a small number of UK-based staff. It is no defence to claim that it should not be expected to put in place prevention procedures designed to prevent its associated persons from being complicit in fraud resulting in a tax loss outside of Switzerland.

Turning to Larry, the analysis is the same:

Larry

B. Liability for the Overseas Fraud Offence

Stage 1: taxpayers

Larry has deliberately and dishonestly failed to declare his taxable income and assets to the German revenue authorities with the intention of not paying the tax that he legally owes. There is 'dual criminality' as there are equivalent offences at the taxpayer level in the UK and Germany.

Larry is a Taxpayer Evader.

Gladstone employees

Stage 2: Associated persons of Gladstone Bank and criminal facilitation

> Employees of Gladstone's German branch have deliberately and dishonestly provided services to Larry to help him hide his taxable income and assets in order to help him evade his German tax liability. The associated person was providing services (advice to clients) for or on behalf of the bank. There is 'dual criminality' at the facilitator level as there equivalent offences in both the UK and Germany.

Gladstone employees (Associates) are Facilitation Offenders.

Gladstone Bank

> Stage 3: As Gladstone Bank has a UK branch and the bank is a single legal entity it is within scope of the new foreign tax evasion facilitation offence, because it is a relevant body conducting part of its business in the UK. Gladstone Bank has also failed to prevent its associated person, i.e. employees of its German Branch, from criminally facilitating the evasion of German tax by Larry.
>
> Gladstone Bank is likely to struggle to put forward a defence of having put in place reasonable procedures to prevent the criminal facilitation of tax evasion because its procedures were arguably not reasonable as it decided to only introduce prevention procedures for staff dealing with UK taxpayers. Claiming that it does not believe that it should have to exercise due diligence over employees of its branches in other countries provides no defence to this.

127.7.2 *Example 1: introductions*

HMRC CFA guidance Example 1 provides:

> Sarah was referred by her bank to Malus GmbH, a Swiss adviser, to create a tax efficient structure for potential future investment into UK property. Malus was an approved intermediary[12] of a UK high street bank (with the referral made in good faith after they carried out appropriate due diligence on Malus), and Sarah planned to put her post-tax employment earnings into this structure.
>
> Sarah had a relative, Maisie, who was neither resident nor domiciled in the UK. Malus advised Sarah that she should set up a Swiss trust using Maisie as the settlor. This was done, although Maisie was never asked to sign anything and was not aware that a trust was being set up with her named as the settlor. Sarah was advised that she retained beneficial ownership of all the assets despite the trust arrangement.
>
> The trust had bank accounts with Lunar Bank in Monaco. Sarah

[12] "Intermediary" does not seem to be an apt word.

> admitted her actions following initial contact with Malus were deliberate.

Sarah is a Taxpayer Evader.
The HMRC analysis is as follows:

> *UK high street bank*
> The UK high-street bank did not know that Malus would help Sarah to evade UK tax, and the 'vanilla' referral to Malus was made in good faith. Under these circumstances Malus was not acting as an 'associated person' of the UK high-street bank, so the UK High Street Bank is not liable under the new offences.

More analytically, Malus was not an Associate of the UK bank, as it (and its employees) did not provide services to that bank.

Malus' employees

> Malus's staff, however, by providing advice, as well as professional trustee services to Sarah's trust which they knew was not properly constituted, have deliberately facilitated Sarah's acts to hide her assets and evade tax. In doing so, the staff of Malus were acting in the capacity of persons associated with it.

Malus employees are Facilitation Offenders.

Malus GmbH

> If Malus had not taken reasonable steps to prevent their staff from facilitating Sarah's tax evasion then Malus would be guilty of the new offence....

Lunar Bank

> Lunar Bank's staff have performed acts that in fact facilitated Sarah's tax evasion. However, they did so without being aware of any tax evasion. They may have been negligent and failed to comply with their anti-money laundering obligations, but they lack the requisite guilty state of mind to commit an offence relating to facilitating Sarah's tax evasion. Therefore, there is no tax evasion facilitation offence that Lunar Bank has failed to prevent.

More analytically, Malus was not an Associate of Lunar, as it (and its employees) did not provide services to that bank.

127.7.3 *Advice on jurisdictions/investments/structures*

HMRC CFA guidance Example 2 provides:

> John ran a UK business. John opened a Channel Islands bank account in which he could hide untaxed business income from HMRC.
>
> John took his untaxed funds on a regular basis to a business contact, Michael, who travels regularly to the Channel Islands. Michael would take the money in a suitcase to the Channel Islands and deposit it in John's bank account.
>
> In 2004, following unsolicited advice from the Channel Island bank to help him continue hiding his untaxed wealth from HMRC, John transferred the bank accounts to a nominee Foundation in Panama thereby avoiding reporting under the EU Savings Directive and retaining secrecy over his funds. The Foundation was operated by other Channel Island professionals to whom the bank subcontracted the work.

The HMRC analysis is as follows:

Michael

> Michael was knowingly helping John to physically move funds offshore for tax evasion purposes. Michael was happy to do this because it fostered continued good business relations with John. Michael is guilty of a tax evasion facilitation offence by virtue of facilitating John's actions but, as he is an individual and not an associated person of a relevant body, no question of his committing the new offence arises.

John is a Taxpayer Evader, and Michael is a Facilitation Offender.

CI Bank employees

> The Channel Island bank's staff initially opened the account for John knowing that he wanted his activities to remain hidden from HMRC. Many years later the Channel Island bank staff actively advised John on how he could continue to hide his money. This conduct amounts to the criminal facilitation of tax evasion.

The CI Bank employees are Facilitation Offenders.

CI Bank

> The Channel Island bank would be guilty of the new offence unless it had taken reasonable steps to prevent its staff facilitating John's tax evasion. ... The Channel Island bank professionals helped John to maintain a structure which facilitated his evasion activities. These professionals were asked by the bank to assist others in John's position and knew they were assisting people evading UK tax. This conduct amounts to the criminal facilitation of tax evasion.
>
> The bank therefore failed to prevent this conduct occurring and would be guilty of the new offence if it could not show that it had taken

reasonable steps to prevent its associated persons from facilitating John's tax evasion.

127.7.4 *Company/trust/banking services*

HMRC CFA guidance Example 3 provides:

> Manjit was the owner and Director of a UK-based interior design business. He generated false invoices and drew cheques with fictitious payee details logged in the company records, in order to divert proceeds offshore and reduce taxable profits in the UK. These cheques were in fact made payable to an extensive network of offshore discretionary trusts and corporate vehicles in Gibraltar, Belize, Seychelles, and the British Virgin Islands ("BVI").
>
> In particular, the trustees invested the funds in a portfolio of bank accounts and investment properties held in the name of "off the shelf" corporate vehicles in the Seychelles and BVI. The properties, acquired with the proceeds of tax evasion, were then rented out commercially with UK taxes paid on the rental income under the non-resident landlord scheme ("NRLS") to give the appearance of a genuine offshore ownership arrangement. The NRLS arrangement had been accepted by HMRC, being the only contemporaneous information that was available at the time.

Manjit

> Following an HMRC investigation, Manjit accepted that these transactions were fraudulent. Manjit admitted he deliberately committed offshore tax evasion.

Manjit is the Taxpayer Evader

The Trustees

> The trustees claimed that they believed everything they were doing was "above board" - but they also stated that "the affairs of their clients were none of their business". HMRC's view was that the trustees turned a blind eye to the true beneficial ownership of the structure in order to retain Manjit's business. If the trustees in truth had knowledge of, but decided to ignore, Manjit's tax evasion, their conduct would amount to the criminal facilitation of Manjit's tax evasion

In practice the trustee is likely to be a company ("Trustco"). References to "the trustees" would make more sense if the reference is to the employees of Trustco.

> *Trustco*
>
> ... any trust company or partnership for which they worked would be guilty of the new offence if it had not taken reasonable steps to prevent the facilitation of Manjit's tax evasion...
>
> Of course, if the trustees [that is, the employees of TrustCo] were truly unaware of the tax evasion (whether out of negligence or otherwise) their assistance would not amount to a tax evasion facilitation offence (as these cannot be committed negligently) and the new offence would not be committed.

127.7.5 *Trust/company/legal services*

HMRC CFA guidance Example 4 provides:

> Paula was domiciled in Australia, but had been resident in the UK since the 1970s. In 2017, Paula wanted to regularise her affairs and disclosed to HMRC that she had been hiding substantial UK taxable income for a prolonged period. She had been using companies in Bermuda and the Bahamas to shelter both business and private assets and to facilitate the movement of funds through a variety of jurisdictions.
>
> The network of companies had been set up by Paula's lawyer, a partner in a Guernsey-based legal partnership, in total secrecy, meaning that Paula had never paid UK taxes for more than 30 years of UK residence.

Paula is the Taxpayer Evader.

> *Paula's Lawyer*
>
> The lawyer actively assisted Paula in evading UK taxes, knowing that the structures would enable her to evade UK tax.

The lawyer is the Facilitation Offender.

> *The lawyer's partnership*
>
> Any company or partnership for which the lawyer was an associated person would be guilty of the new offence if it had not taken reasonable steps to prevent him facilitating Paula's tax evasion. ...

127.7.6 *Financial assistance*

HMRC CFA guidance Example 5 provides:

> Christoph was a wealthy non-domiciled individual who was a long-term UK resident. His job entitled him to significant bonus payments, related to duties performed wholly in the UK, on which he did not want to pay UK tax.
>
> His UK accountant put him in touch with an adviser in Israel.

> The Israeli adviser set up a number of bank accounts in Singapore in the names of BVI-registered companies, under the control of a discretionary trust. Christoph arranged for his bonus payments to be lodged in the accounts operated in Singapore. As well as evading income tax on his employment income over a number of years, Christoph's settlements also attracted significant Inheritance Tax liabilities.[13]

Christoph is the Taxpayer Evader.

> *UK accountant*
>
> The UK accountant knew what Christoph was trying to achieve, and for many years acted as a conduit through which Christoph contacted the Israeli adviser. This amounts to a tax evasion facilitation offence.

The accountant is the Facilitation Offender.

> *The UK accountant's Principal*
>
> The company or partnership that the accountant worked for would be guilty of the new offence if it had not taken reasonable steps to prevent him or her facilitating the tax evasion. ...
>
> *Israeli adviser*
>
> The Israeli adviser also knew Christoph's aims, and knew that secrecy was key to achieving those aims. He provided advice, and also set up and maintained the structure. This conduct facilitated Christoph's tax evasion.

The Israeli adviser is a Facilitation Offender.

> *The Israeli adviser's Principal*
>
> The company or partnership that the adviser worked for would be guilty of the new offence if it had not taken reasonable steps to prevent the adviser facilitating the tax evasion...
>
> *Singapore bank employees*
>
> The Singapore bank's staff were unaware that the structure was being used to evade UK tax. As such they would not have the requisite state of mind to be guilty of facilitating Christoph's tax evasion.
>
> *Singapore bank employees*
>
> Therefore the Singapore bank could not be guilty of failing to prevent its staff from facilitating tax evasion.

[13] It appears that Christoph was deemed domiciled when he made the settlement. But there is no IHT if the trusts were shams or otherwise invalid.

127.7.7 *Example 6: Payroll services*

HMRC CFA guidance Example 6 provides:

> Bruce is contractually employed by Warrington Ltd and has worked for them for many years. Warrington Ltd provides skilled workers for offshore oil and gas platforms around the UK.
>
> After many years of working in the oil and gas industry, Bruce becomes disillusioned with his pay and a perceived difference in lifestyle between himself and his colleagues. Bruce airs his grievances with some of his colleagues. Bruce's colleague Nick tells him that the easiest way to take home more pay is to have some of his wages paid into an account in a tax efficient jurisdiction and not to tell the tax man about it.
>
> Nick tells Bruce to speak to Sandra who is responsible for payroll and to mention that they have spoken and that he is looking to mitigate his tax liabilities.
>
> Bruce speaks to Sandra in Warrington Ltd's payroll department and [Sandra][14] agrees that for an administrative fee she can pay a portion of Bruce's pay into an offshore account of his choice and remove that pay from his payslip. Bruce expresses some concerns about losing his job if the company finds out that he is being partially paid "off the books". Sandra reassures Bruce that she helps lots of people in the company to mitigate their taxes and that the company understands that it is just the price that has to be paid to retain long serving employees like Bruce.
>
> With the help of his colleague and friend Nick, Bruce opens an account with a bank in Jersey, falsifying information about his identity and tax residency so that the account is not reportable to the UK, where he has a tax liability. As promised Sandra ensures that 40% of Bruce's pay is kept off the balance sheet, taking a fee for her services before paying the remainder into Bruce's account in Jersey with MJS Bank.
>
> Through a joint investigation with the Jersey authorities HMRC identify the undeclared accounts of Bruce, Nick and other employees of Warrington Ltd at MJS Bank. During an interview under caution Bruce admits everything and fully co-operates with HMRC.

Bruce is the Taxpayer Evader.

Sandra

Sandra knew that Bruce was seeking to evade tax and that in order to achieve this he required her assistance and she provided that assistance. This amounts to a tax evasion facilitation offence. Sandra undertook

[14] The original reads: "Jess".

these activities whilst acting in the capacity of a person associated with Warrington Ltd.

Sandra is a Facilitation Offender (as is Nick).

Warrington Ltd

Warrington Ltd would be liable for the new domestic tax evasion offence if it had not taken reasonable steps to prevent Sandra from facilitating the tax evasion...

MJS Bank

MJS Bank are not liable under the new offence as persons associated with it were acting in good faith when opening bank accounts for Bruce, Nick and other employees of Warrington Ltd. They performed the customer checks required by law and did not know that their provision of financial services were being used to further criminal activity.

It is assumed that Sandra and Nick are not providing services to MJS.

127.8 Fraudulent evasion offences

The most common offences involving fraudulent evasion will be:

(1) cheating the Revenue
(2) s.106A TMA 1970 and s.72 VATA (from which s.106A derives):

s.106A(1) TMA	**s.72 VATA**
A person commits an offence if that person is knowingly concerned in the fraudulent evasion of income tax by that or any other person.	(1) If any person is knowingly concerned in, or in the taking of steps with a view to, the fraudulent evasion of VAT by him or any other person, he shall be liable— (a) on summary conviction, to a penalty of the statutory maximum £20,000 or of three times the amount of the VAT, whichever is the greater, or to imprisonment for a term not exceeding 6 months or to both; or (b) on conviction on indictment, to a penalty of any amount or to imprisonment for a term not exceeding 7 years or to both.

It seems strange to refer to a person as knowingly concerned in his own evasion. How could they not be? But it does not matter.

127.9 A change in corporate culture?

The object of the CFA is to require businesses to set up prevention procedures, and the sanction for failing to do that is that they are otherwise at risk of committing an offence of strict liability. It is, I think, a very contemporary mix of regulatory and criminal law. The aim is to change corporate culture.[15]

HMRC CFA guidance examples give a somewhat jaded impression of a flourishing offshore evasion industry. After CRS, and vast fines on banks facilitating US tax evasion, how much of this activity goes on today, and where? Discuss.

127.10 Offshore tax offences

127.10.1 *Non-fraudulent offences*

The legislation is in s.106B-106H TMA, introduced by FA 2016, supplemented by the Taxes Management Act 1970 (Specified Threshold Amount) Regulations 2017. The offences are:

Section	**Offence**
106B	Failing to give notice of being chargeable to tax
106C	Failing to deliver return
106D	Making inaccurate return

I do not refer to these offences as "evasion" as they do not require dishonesty/fraudulent intent, and I would reserve the word "evasion" for the offences which do.[16] The word "evasion" has a complicated history, but from about the 1970s it has generally been used to mean only fraudulent evasion.[17]

It would be possible to use the word "evasion" broadly, to include a negligent failure to pay tax, even if there is no deliberate concealment or other dishonesty. There is indeed some historical precedent for that usage.[18] But greater precision of terminology would aid precision of thought. There is an important difference between those who are dishonest/fraudulent, and those who make innocent (non-fraudulent) mistakes.

It is not just a semantic point which is being made here. Evasion is now an essentially contested concept. HMRC would like to stigmatise as tax

[15] See 126.54 (Public attitude(s) to compliance).

[16] For those offences, see 127.8 (Fraudulent evasion offences).

[17] See 2.2.2 (Avoidance/evasion distinction)

[18] See above footnote.

evaders those who make innocent (non-fraudulent but perhaps negligent) errors. But this expansion of the concept of evasion erodes its value. If the word "evasion" is used in this sense, it would be appropriate to put it in scare quotation marks.

I refer to the three offences as "**offshore tax offences**".

127.10.2 *No notice of chargeability*

Section106B(1) TMA provides:

> A person
> [i] who is required by section 7 to give notice of being chargeable to income tax or capital gains tax (or both) for a year of assessment and
> [ii] who has not given that notice by the end of the notification period[19]
> commits an offence if—
> (a) the tax in question is chargeable (wholly or in part) on or by reference to offshore income, assets or activities, and
> (b) the total amount of income tax and capital gains tax that is chargeable for the year of assessment on or by reference to offshore income, assets or activities exceeds the threshold amount.

127.10.3 *Failing to make return*

Section 106C(1) TMA provides:

> A person who is required by a notice under section 8 to make and deliver a return for a year of assessment commits an offence if-
> (a) the return is not delivered by the end of the withdrawal period,[20]
> (b) an accurate return would have disclosed liability to income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities, and
> (c) the total amount of income tax and capital gains tax that is chargeable for the year of assessment on or by reference to offshore income, assets or activities exceeds the threshold amount.

[19] Defined by reference in s.106B (3) TMA: "In this section "the notification period" has the same meaning as in section 7 (see subsection (1C) of that section).

[20] Defined by reference in s.106C(3): "In this section "the withdrawal period" has the same meaning as in section 8B (see subsection (6) of that section)."

127.10.4 *Inaccurate return*

Section 106D(1) TMA provides:

> A person who is required by a notice under section 8 to make and deliver a return for a year of assessment commits an offence if, at the end of the amendment period[21]-
> (a) the return contains an inaccuracy the correction of which would result in an increase in the amount of income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities, and
> (b) the amount of that increase exceeds the threshold amount.

127.10.5 *Reasonable excuse defences*

s.106B(2) TMA	**S.106C(2)TMA**	**s.106D(2) TMA**
It is a defence for a person accused of an offence under this section to prove that the person had a reasonable excuse for failing to give the notice required by section 7.	It is a defence for a person accused of an offence under this section to prove that the person had a reasonable excuse for failing to deliver the return	It is a defence for a person accused of an offence under this section to prove that the person took reasonable care to ensure that the return was accurate.

The reader may think it is astonishing that in a civil case the onus of proving carelessness is on HMRC; but in a *criminal* case the onus is on the defendant to prove that they were not careless.
See 126.10 (Reasonable excuse).

127.10.6 *Exemption for trustees/executors*

Section 106E(1) TMA provides:

> A person is not guilty of an offence under section 106B, 106C or 106D if the capacity in which the person is required to give the notice or make and deliver the return is-
> (a) as a relevant trustee of a settlement, or
> (b) as the executor or administrator of a deceased person.

[21] Defined by reference in s.106D (3) “In this section "the amendment period" means the period for amending the return under section 9ZA.”

127.10.7 *Time extension*

Section 106F(1) TMA provides:

> Where a period of time is extended under subsection (2) of section 118 by HMRC, the tribunal or an officer (but not where a period is otherwise extended under that subsection), any reference in section 106B, 106C or 106D to the end of the period is to be read as a reference to the end of the period as so extended.

127.11 "Offshore income/assets/activities"

This term is used in all three offshore tax offences:

s.106B(1) TMA	**s.106C(1)TMA**	**s.106D(1) TMA**
(a) the tax in question is chargeable (wholly or in part) on or by reference to offshore income, assets or activities	(b) an accurate return would have disclosed liability to income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities,	(a) the return contains an inaccuracy the correction of which would result in an increase in the amount of income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities,

Section 106F(4) TMA provides:

> In sections 106B to 106D and this section "offshore income, assets or activities" means-
> (a) income arising from a source in a territory outside the UK,
> (b) assets[22] situated or held in a territory outside the UK, or
> (c) activities carried on wholly or mainly in a territory outside the UK.

127.12 Offshore tax offences penalties

Section 106G TMA provides:

> (1) A person guilty of an offence under section 106B, 106C or 106D is liable on summary conviction-
> (a) in England and Wales, to a fine or to imprisonment for a term

[22] Defined s.106F(4): "(5) In subsection (4), "assets" has the meaning given in section 21(1) of the 1992 Act, but also includes sterling."

> not exceeding 51 weeks or to both, and
> (b) in Scotland or Northern Ireland, to a fine not exceeding level 5 on the standard scale or to imprisonment for a term not exceeding 6 months or to both.
>
> (2) In relation to an offence committed before the coming into force of section 281(5) of the Criminal Justice Act 2003, the reference in subsection (1)(a) to 51 weeks is to be read as a reference to 6 months.

127.12.1 *Offshore offences: Critique*

In the absence of dishonesty, which has hitherto been regarded as central to tax offences, one wonders what is the point of the provisions or of a prosecution. Presumably they are intended to operate *in terrorem*. Perhaps there will never be a prosecution?

127.13 Enablers of offshore tax offences

The legislation is in sch 20 FA 2016.

127.14 Liability for penalty

Para 1 sch 20 FA 2016 provides:

> (1) A penalty is payable by a person (P) who has enabled another person (Q) to carry out offshore tax evasion or non-compliance, where conditions A and B are met.

127.14.1 *Offshore evasion/non compliance*

Para 1 sch 20 FA 2016 provides:

> (2) For the purposes of this Schedule-
> (a) Q carries out "offshore tax evasion or non-compliance" by-
> (i) committing a relevant offence, or
> (ii) engaging in conduct that makes Q liable (if the applicable conditions are met) to a relevant civil penalty,
>
> where the tax at stake is income tax, capital gains tax or inheritance tax, and

127.14.2 *Enabling*

Para 1(2)(b) sch 20 FA 2016 provides:

> (b) P "has enabled" Q to carry out offshore tax evasion or non-compliance if P has encouraged, assisted or otherwise facilitated conduct by Q that constitutes offshore tax evasion or non-compliance.

127.14.3 *Relevant offences*

Para 1 sch 20 FA 2016 provides:

> (3) The relevant offences are-
> (a) an offence of cheating the public revenue involving offshore activity, or
> (b) an offence under section 106A of TMA 1970 (fraudulent evasion of income tax) involving offshore activity,
> (c) an offence under section 106B, 106C or 106D of TMA 1970 (offences relating to certain failures to comply with section 7 or 8 by a taxpayer chargeable to income tax or capital gains tax on or by reference to offshore income, assets or liabilities).

Para 1 sch 20 FA 2016 provides:

> (4) The relevant civil penalties are-
> (a) a penalty under paragraph 1 of Schedule 24 to FA 2007 (errors in taxpayer's document) involving an offshore matter or an offshore transfer (within the meaning of that Schedule),
> (b) a penalty under paragraph 1 of Schedule 41 to FA 2008 (failure to notify etc) in relation to a failure to comply with section 7(1) of TMA 1970 involving offshore activity,
> (c) a penalty under paragraph 6 of Schedule 55 to FA 2009 (failure to make return for 12 months) involving offshore activity,
> (d) a penalty under paragraph 1 of Schedule 21 to FA 2015 (penalties in connection with relevant offshore asset moves),

127.14.4 *Condition A*

Para 1 sch 20 FA 2016 provides:

> (5) Condition A is that P knew when P's actions were carried out that they enabled, or were likely to enable, Q to carry out offshore tax evasion or non-compliance.

127.14.5 *Condition B*

Para 1 sch 20 FA 2016 provides:

> (6) Condition B is that-
> (a) in the case of offshore tax evasion or non-compliance consisting of the commission of a relevant offence, Q has been convicted of the offence and the conviction is final, or
> (b) in the case of offshore tax evasion or non-compliance consisting of conduct that makes Q liable to a relevant penalty-

(i) Q has been found to be liable to such a penalty, assessed and notified, and the penalty is final, or

(ii) a contract has been made between the Commissioners for Her Majesty's Revenue and Customs and Q under which the Commissioners undertake not to assess the penalty or (if it has been assessed) not to take proceedings to recover it.

(7) For the purposes of sub-paragraph (6)(a)-

(a) "convicted of the offence" means convicted of the full offence (and not for example of an attempt), and

(b) a conviction becomes final when the time allowed for bringing an appeal against it expires or, if later, when any appeal against conviction has been determined.

(8) For the purposes of sub-paragraph (6)(b)(i) a penalty becomes final when the time allowed for any appeal or further appeal relating to it expires or, if later, any appeal or final appeal relating to it is determined.

(9) It is immaterial for the purposes of condition B that-

(a) any offence of which Q was convicted, or

(b) any penalty for which Q was found to be liable,

relates also to other tax evasion or non-compliance by Q.

(10) In this Schedule "other tax evasion or non-compliance by Q" means conduct by Q that-

(a) constitutes an offence of cheating the public revenue or an offence of fraudulent evasion of tax, or

(b) makes Q liable to a penalty under any provision of the Taxes Acts,

but does not constitute offshore tax evasion or non-compliance.

(11) Nothing in condition B affects the law of evidence as to the relevance if any of a conviction, assessment of a penalty or contract mentioned in sub-paragraph (6) for the purpose of proving that condition A is met in relation to P.

(12) In this Schedule "conduct" includes a failure to act.

127.15 "Involving offshore activity" and related expressions

Para 2 sch 20 FA 2016 provides:

(1) This paragraph has effect for the purposes of this Schedule.

(2) Conduct involves offshore activity if it involves-

(a) an offshore matter,

(b) an offshore transfer, or

(c) a relevant offshore asset move.

(3) Conduct involves an offshore matter if it results in a potential loss

of revenue that is charged on or by reference to-

(a) income arising from a source in a territory outside the United Kingdom,

(b) assets situated or held in a territory outside the United Kingdom,

(c) activities carried on wholly or mainly in a territory outside the United Kingdom, or

(d) anything having effect as if it were income, assets or activities of the kind described above.

(4) Where the tax at stake is inheritance tax, assets are treated for the purposes of sub-paragraph (3) as situated or held in a territory outside the United Kingdom if they are so held or situated immediately after the transfer of value by reason of which inheritance tax becomes chargeable.

(5) Conduct involves an offshore transfer if-

(a) it does not involve an offshore matter,

(b) it is deliberate (whether or not concealed) and results in a potential loss of revenue,

(c) the condition set out in paragraph 4AA of Schedule 24 to FA 2007 is satisfied.

(6) Conduct involves a relevant offshore asset move if at a time when Q is the beneficial owner of an asset ("the qualifying time")-

(a) the asset ceases to be situated or held in a specified territory and becomes situated or held in a non-specified territory,

(b) the person who holds the asset ceases to be resident in a specified territory and becomes resident in a non-specified territory, or

(c) there is a change in the arrangements for the ownership of the asset,

and Q remains the beneficial owner of the asset, or any part of it, immediately after the qualifying time.

(7) Paragraphs 4(2) to (4) of Schedule 21 to FA 2015 apply for the purposes of sub-paragraph (6) above as they apply for purposes of paragraph 4 of that Schedule.

(8) In sub-paragraph (6) above, "specified territory" has the same meaning as in paragraph 4(5) of Schedule 21 to FA 2015.

127.16 Amount of penalty

Para 3 sch 20 FA 2016 provides:

(1) The penalty payable under paragraph 1 is (except in a case mentioned in sub-paragraph (2)) the higher of-

> (a) 100% of the potential lost revenue, or
> (b) £3,000.
>
> (2) In a case where P has enabled Q to engage in conduct which makes Q liable to a penalty under paragraph 1 of Schedule 21 to FA 2015, the penalty payable under paragraph 1 is the higher of-
> (a) 50% of the potential lost revenue in respect of the original tax non-compliance, and
> (b) £3,000.
>
> (3) In sub-paragraph (2)(a) "the original tax non-compliance" means the conduct that incurred the original penalty and "the potential lost revenue" (in respect of that non-compliance) is-
> (a) the potential lost revenue under Schedule 24 to FA 2007,
> (b) the potential lost revenue under Schedule 41 to FA 2008, or
> (c) the liability to tax which would have been shown on the return (within the meaning of Schedule 55 to FA 2009),
>
> according to whether the original penalty was incurred under paragraph 1 of Schedule 24, paragraph 1 of Schedule 41 or paragraph 6 of Schedule 55.

127.17 PLR: enabling Q to commit offence

Para 4 sch 20 FA 2016 provides:

> (1) The potential lost revenue in a case where P is liable to a penalty under paragraph 1 for enabling Q to commit a relevant offence is the same amount as the potential lost revenue applicable for the purposes of the corresponding relevant civil penalty (determined in accordance with the relevant sub-paragraph of paragraph 5).
>
> (2) Where Q's offending conduct is-
> (a) an offence of cheating the public revenue involving offshore activity, or
> (b) an offence under section 106A of TMA 1970 involving offshore activity,
>
> the corresponding relevant civil penalty is the penalty which Q is liable for as a result of that offending conduct.
>
> (3) Where Q's offending conduct is an offence under section 106B, 106C or 106D of TMA 1970, the corresponding relevant civil penalty is-
> (a) for an offence under section 106B of TMA 1970, a penalty under paragraph 1 of Schedule 41 to FA 2008,
> (b) for an offence under section 106C of TMA 1970, a penalty under paragraph 6 of Schedule 55 to FA 2009, and
> (c) for an offence under section 106D of TMA 1970, a penalty

> under paragraph 1 of Schedule 24 to FA 2007.
>
> (4) In determining any amount of potential lost revenue for the purposes of this paragraph, the fact Q has been prosecuted for the offending conduct is to be disregarded.

127.18 PLR: enabling Q's conduct incurring civil penalty

Para 5 sch 20 FA 2016 provides:

> (1) The potential lost revenue in a case where P is liable to a penalty under paragraph 1 for enabling Q to engage in conduct that makes Q liable (if the applicable conditions are met) to a relevant civil penalty is to be determined as follows.
>
> (2) In the case of a penalty under paragraph 1 of Schedule 24 to FA 2007 involving an offshore matter or an offshore transfer, the potential lost revenue is the amount that under that Schedule is the potential lost revenue in respect of Q's conduct.
>
> (3) In the case of a penalty under paragraph 1 of Schedule 41 to FA 2008 in relation to a failure to comply with section 7(1) of TMA 1970 involving offshore activity, the potential lost revenue is the amount that under that Schedule is the potential lost revenue in respect of Q's conduct.
>
> (4) In the case of a penalty under paragraph 6 of Schedule 55 to FA 2009 involving offshore activity, the potential lost revenue is the liability to tax which would have been shown in the return in question (within the meaning of that Schedule).

127.19 PLR: tax evasion/non-compliance

Para 6 sch 20 FA 2016 provides:

> (1) This paragraph applies where any amount of potential lost revenue in a case falling within paragraph 4 or 5 is attributable not only to Q's offshore tax evasion or non-compliance but also to any other tax evasion or non-compliance by Q.
>
> (2) In that case the potential lost revenue in respect of Q's offshore tax evasion or non-compliance is to be taken for the purposes of assessing the penalty to which P is liable as being or (as the case may be) including such share as is just and reasonable of the amount mentioned in sub-paragraph (1).

127.20 Reduction of penalty: disclosure

Para 7 sch 20 FA 2016 provides:

> (1) If P (who would otherwise be liable to a penalty under paragraph 1)-

> (a) makes a disclosure to HMRC of-
>
> (i) a matter relating to an inaccuracy in a document, a supply of false information or a failure to disclose an under-assessment,
>
> (ii) P's enabling of actions by Q that constituted (or might constitute) a relevant offence or that made (or might make) Q liable to a relevant penalty, or
>
> (iii) any other matter HMRC regard as assisting them in relation to the assessment of P's liability to a penalty under paragraph 1, or
>
> (b) assists HMRC in any investigation leading to Q being charged with a relevant offence or found liable to a relevant penalty,
>
> HMRC must reduce the penalty to one that reflects the quality of the disclosure or assistance.
>
> (2) But the penalty may not be reduced-
>
> (a) in the case of unprompted disclosure or assistance, below whichever is the higher of-
>
> (i) 10% of the potential lost revenue, or
>
> (ii) £1,000, or
>
> (b) in the case of prompted disclosure or assistance, below whichever is the higher of-
>
> (i) 30% of the potential lost revenue, or
>
> (ii) £3,000.

Para 8 2 sch 20 FA 2016 provides:

> (1) This paragraph applies for the purposes of paragraph 7.
>
> (2) P discloses a matter by-
>
> (a) telling HMRC about it,
>
> (b) giving HMRC reasonable help in relation to the matter (for example by quantifying an inaccuracy in a document, an inaccuracy attributable to the supply of false information or withholding of information or an under-assessment), and
>
> (c) allowing HMRC access to records for any reasonable purpose connected with resolving the matter (for example for the purpose of ensuring that an inaccuracy in a document, an inaccuracy attributable to the supply of false information or withholding of information or an under-assessment is fully corrected).
>
> (3) P assists HMRC in relation to an investigation leading to Q being charged with a relevant offence or found liable to a relevant penalty by-
>
> (a) assisting or encouraging Q to disclose all relevant facts to HMRC,

(b) allowing HMRC access to records, or
(c) any other conduct which HMRC considers assisted them in investigating or assessing Q's liability to such a penalty.

(4) Disclosure or assistance by P-
(a) is "unprompted" if made at a time when P has no reason to believe that HMRC have discovered or are about to discover Q's offshore tax evasion or non-compliance (including any inaccuracy in a document, supply of false information or withholding of information, or under-assessment), and
(b) otherwise is "prompted".

(5) In relation to disclosure or assistance, "quality" includes timing, nature and extent.

127.21 Special circumstances

Para 9 sch 20 FA 2016 provides:

> (1) If they think it right because of special circumstances, HMRC may reduce a penalty under paragraph 1.
>
> (2) In sub-paragraph 1 "special circumstances" does not include-
> (a) ability to pay, or
> (b) the fact that a potential loss of revenue from one taxpayer is balanced by a potential overpayment by another.
>
> (3) In sub-paragraph (1) the reference to reducing a penalty includes a reference to-
> (a) staying a penalty, or
> (b) agreeing a compromise in relation to proceedings for a penalty.

127.22 Procedure for assessing penalty, etc

Para 10 sch 20 FA 2016 provides:

> (1) Where a person is found liable for a penalty under paragraph 1 HMRC must-
> (a) assess the penalty,
> (b) notify the person, and
> (c) state in the notice the period in respect of which the penalty is assessed.
>
> (2) A penalty must be paid before the end of the period of 30 days beginning with the day on which notification of the penalty is issued.
>
> (3) An assessment of a penalty-
> (a) is to be treated for procedural purposes in the same way as an assessment to tax (except in respect of a matter expressly provided for by this Schedule), and

(b) may be enforced as if it were an assessment to tax.

(4) A supplementary assessment may be made in respect of a penalty if an earlier assessment operated by reference to an underestimate of the liability to tax that would have been shown in a return.

(5) Sub-paragraph (6) applies if-

(a) an assessment in respect of a penalty is based on a liability to tax that would have been shown on a return, and

(b) that liability is found by HMRC to have been excessive.

(6) HMRC may amend the assessment so that it is based upon the correct amount.

(7) But an amendment under sub-paragraph (6)-

(a) does not affect when the penalty must be paid, and

(b) may be made after the last day on which the assessment in question could have been made under paragraph 11.

127.23 Time limits

Para 11 sch 20 FA 2016 provides:

> An assessment of a person as liable to a penalty under paragraph 1 may not take place more than 2 years after the fulfilment of the conditions mentioned in paragraph 1(1) (in relation to that person) first came to the attention of an officer of Revenue and Customs.

127.24 Appeals

Para 12 sch 20 FA 2016 provides:

> A person may appeal against-
>
> (a) a decision of HMRC that a penalty under paragraph 1 is payable by that person, or
>
> (b) a decision of HMRC as to the amount of a penalty under paragraph 1 payable by the person.

Para 13 sch 20 FA 2016 provides:

> (1) An appeal under paragraph 12 is to be treated in the same way as an appeal against an assessment to the tax at stake (including by the application of any provision about bringing the appeal by notice to HMRC, about HMRC review of the decision or about determination of the appeal by the First-tier Tribunal or Upper Tribunal).
>
> (2) Sub-paragraph (1) does not apply-
>
> (a) so as to require the person bringing the appeal to pay a penalty before an appeal against the assessment of the penalty is determined,

> (b) in respect of any other matter expressly provided for by this Schedule.

Para 14 sch 20 FA 2016 provides:

> (1) On an appeal under paragraph 12(a) that is notified to the tribunal, the tribunal may affirm or cancel HMRC's decision.
> (2) On an appeal under paragraph 12(b) that is notified to the tribunal, the tribunal may-
> (a) affirm HMRC's decision, or
> (b) substitute for that decision another decision that HMRC had power to make.
> (3) If the tribunal substitutes its own decision for HMRC's, the tribunal may rely on paragraph 7 or 9 (or both)-
> (a) to the same extent as HMRC (which may mean applying the same percentage reduction as HMRC to a different starting point),
> (b) to a different extent, but only if the tribunal thinks that HMRC's decision in respect of the application of that paragraph was flawed.
> (4) In sub-paragraph (3)(b) "flawed" means flawed when considered in the light of the principles applicable in proceedings for judicial review.
> (5) In this paragraph "tribunal" means the First-tier Tribunal or Upper Tribunal (as appropriate by virtue of paragraph 13(1).

127.25 Double jeopardy

Para 15 sch 20 FA 2016 provides:

> A person is not liable to a penalty under paragraph 1 in respect of conduct for which the person-
> (a) has been convicted of an offence, or
> (b) has been assessed to a penalty under any provision other than paragraph 1.

127.26 Application of TMA 1970

Para 16 sch 20 FA 2016 provides:

> Subject to the provisions of this Part of this Schedule, the following provisions of TMA 1970 apply for the purposes of this Part of this Schedule as they apply for the purposes of the Taxes Acts-
> (a) section 108 (responsibility of company officers),
> (b) section 114 (want of form), and
> (c) section 115 (delivery and service of documents).

127.27 Interpretation of Part 1

Para 17 sch 20 FA 2016 provides:

> (1) This paragraph applies for the purposes of this Schedule.
> (2) References to an assessment to tax, in relation to inheritance tax, are to a determination.

127.28 Naming and shaming

Para 22 sch 20 FA 2016 provides:

> (1) The Commissioners for Her Majesty's Revenue and Customs ("the Commissioners") may publish information about a person if-
> (a) in consequence of an investigation the person has been found to have incurred one or more penalties under paragraph 1 (and has been assessed or is the subject of a contract settlement), and
> (b) the potential lost revenue in relation to the penalty (or the aggregate of the potential lost revenue in relation to each of the penalties) exceeds £25,000.
> (2) The Commissioners may also publish information about a person if the person has been found to have incurred 5 or more penalties under paragraph 1 in any 5 year period.
> (3) The information that may be published is-
> (a) the person's name (including any trading name, previous name or pseudonym),
> (b) the person's address (or registered office),
> (c) the nature of any business carried on by the person,
> (d) the amount of the penalty or penalties in question,
> (e) the periods or times to which the actions giving rise to the penalty or penalties relate,
> (f) any other information that the Commissioners consider it appropriate to publish in order to make clear the person's identity.
> (4) The information may be published in any manner that the Commissioners consider appropriate.
> (5) Before publishing any information the Commissioners must-
> (a) inform the person that they are considering doing so, and
> (b) afford the person the opportunity to make representations about whether it should be published.
> (6) No information may be published before the day on which the penalty becomes final or, where more than one penalty is involved, the latest day on which any of the penalties becomes final.

(7) No information may be published for the first time after the end of the period of one year beginning with that day.

(8) No information may be published if the amount of the penalty-

(a) is reduced under paragraph 7 to-

(i) 10% of the potential lost revenue (in a case of unprompted disclosure or assistance), or

(ii) 30% of potential lost revenue (in a case of prompted disclosure or assistance),

(b) would have been reduced to 10% or 30% of potential lost revenue but for the imposition of the minimum penalty,

(c) is reduced under paragraph 9 to nil or stayed.

(9) For the purposes of this paragraph a penalty becomes final-

(a) if it has been assessed, when the time for any appeal or further appeal relating to it expires or, if later, any appeal or final appeal relating to it is finally determined, and

(b) if a contract settlement has been made, at the time when the contract is made.

(10) In this paragraph “contract settlement”, in relation to a penalty, means a contract between the Commissioners and the person under which the Commissioners undertake not to assess the penalty or (if it has been assessed) not to take proceedings to recover it.

CHAPTER ONE HUNDRED AND TWENTY EIGHT

REPORTING OFFSHORE TRUSTS

128.1 Reporting offshore trusts: Introduction
128.2 IHT: Reporting creation of trust
128.2.1 Non-resident practitioner
128.2.2 Failure to report: Penalty
128.3 Reporting addition to pre-1998 trust
128.4 CGT: Reporting creation of trust
128.4.1 Deemed-domiciled settlor
128.5 Reporting: Settlor becomes UK-dom
128.6 CGT: Reporting trust emigration
128.7 Exceptions to CGT reporting
128.8 IHT/CGT reporting compared

128.1 Reporting offshore trusts: Introduction

This chapter considers:

(1) IHT reporting rules on creation of an offshore trust
(2) CGT reporting rules relating to offshore trusts

The significance of this has been overtaken by CRS and TRS, discussed in the previous chapters, and the rules ought to be repealed. Until that happens, they should strictly be observed, but I wonder how much that happens in practice.

In summary, the rules discussed here are:

Topic	Provision	See para
Creation of trust	s.218 IHTA	128.2
Addition to pre-1998 trust	Para 2 sch 5A TCGA	128.3
Creation of trust	Para 3 sch 5A TCGA	128.4
Settlor becomes UK-dom	Para 4 sch 5A TCGA	128.5
Trust emigration	Para 5 sch 5A TCGA	128.6

The CGT rules apply from the Commencement day, defined in para 1 sch 5A TCGA:

> In this Schedule “the commencement day” means the day on which the FA 1994 was passed.

128.2 IHT: Reporting creation of trust

Section 218(1) IHTA provides:

> Where any person, in the course of a trade or profession carried on by him, other than the profession of a barrister,[1] has been concerned with the making of a settlement and knows or has reason to believe—
>
> (a) that the settlor was domiciled in the UK, and
>
> (b) that the trustees of the settlement are not or will not be resident in the UK,
>
> he shall, within three months of the making of the settlement, make a return to the Board stating the names and addresses of the settlor and of the trustees of the settlement.

The duty to report rests on a person ("the practitioner") acting in the course of their trade or profession. The duty rests on the firm or company acting and not directly on its employees.

Barristers are exempt. The reason is that they will usually be instructed by others who are subject to the duty.[2]

The practitioner must be concerned with the making of a settlement. This would include not only solicitors who might draft the settlement but other advisers who advise in relation to the creation of a settlement, even if the actual execution of the settlement were delegated to foreign advisers.

The practitioner might advise on the matter generally, leaving the client to take whatever action they wish in light of the advice, perhaps in conjunction with the trustees; in such circumstances they are probably not "concerned with the making of a settlement"; this presupposes the settlement had been established. What if the client had decided against a non-resident settlement after all or wanted to think about it? The practitioner may not know what the client eventually decided to do. The obligation under s.218 must be restricted to those who are able to provide the relevant information.

The practitioner must know or have reason to believe that the settlor is domiciled in the UK. A settlement may have more than one settlor.[3]

[1] Section 272 IHTA addresses Scots terminology: "barrister" includes a member of the Faculty of Advocates.

[2] A consultation paper was published in 2009 but the proposed reforms were dropped. See HMRC Consultation Document "Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion" (2009); HMRC Consultation Response Document "Tackling Offshore Tax Evasion" (2010).

[3] "Settlor" for this purpose has the usual IHT meaning: see 99.1 (Why settlors matter). The separate settlements fiction does not apply for this purpose: see 79.5 (Separate settlement fiction).

Suppose one settlor is domiciled in the UK but the other is not. Does the reporting requirement arise? On a literal construction one could not say "the settlor" is UK domiciled and the reporting requirement would not arise. A purposive construction suggests that the duty does arise. That is the better view at least if the foreign domiciled settlor only provides a nominal amount. A practitioner should err on the side of caution.

A question also arises about the time when the settlor's domicile is relevant. Section 218 merely says that it applies if the settlor *was* domiciled in the UK. Does this mean domiciled in the UK at the time the settlement was made? Or does it mean that the settlor had at any time been domiciled in the UK? Context and common sense dictate that the provision is referring to the domicile of the settlor at the time the settlement was made because that is the date that matters for IHT.

IHT Manual formerly provided:[4]

> **IHTM42993 Section 218 notices** [April 2010]
> ***Where settlor is a company***
> ... s.218 refers to settlors domiciled in the UK
>
> - 'settlor' in relation to a settlement includes any person by whom the settlement was made (s.44 IHTA)
> - In terms of the Interpretation Act 1889 Rule 19 'the expression person shall, unless the contrary appears, include any body of persons corporate or unincorporate'[5]
> - In general a company is domiciled where it is registered – *Gasque v IRC* [1940] 2 KB 80.
>
> So where a non-UK resident [Employee Benefit Trust] is established by a company registered in the UK a s.218 notice is mandatory.

The person must know or have reason to believe that the trustees of the settlement are not or will not be resident in the UK.

In marginal cases the practitioner may be placed in difficulty. It may be necessary in some cases to report the creation of the settlement to HMRC out of caution.

There is no requirement under s.218 to notify the amount or nature of the settled property. However, HMRC have wide powers to obtain information and would know from the notification to whom further enquiries could be directed.

[4] Since April 2011 the Manual reads 'our guidance on Employee Benefit Trusts is currently being rewritten'.

[5] The reference should now be to the Interpretation Act 1978, but the point is still valid.

For the position where IHT DT relief applies see 114.7 (Claims for IHT DTA reliefs).

128.2.1 *Non-resident practitioner*

It is suggested that no duty will arise on foreign practitioners who have no UK connection; the usual territorial limitation must apply.[6] At first sight the requirement that the settlor is domiciled in the UK is sufficient to meet the territorial requirement so that no further territorial limitations should be implied. But the domicile connection may be a faint one. Suppose an individual leaves the UK in 2000 and settles in the USA, and in 2003 he makes a settlement. The individual may still be IHT deemed domiciled, but it is not realistic to expect the US practitioner to file a s.218 return (particularly having regard to the fact that the USA IHT DTA provides some IHT exemption).

128.2.2 *Failure to report: Penalty*

Failure to make the return gives rise only to a nominal penalty.[7] More seriously, the practitioner faces criminal liability for fraud on HMRC, or professional disciplinary sanctions, if:

(1) the practitioner dishonestly fails to report in breach of the duty to do so; or

(2) any person dishonestly agreed with another practitioner or a client that there shall be no report, in breach of the duty to do so.

128.3 Reporting addition to pre-1998 trust

Para 2 sch 5A TCGA provides:

> (1) This paragraph applies if—
>
> (a) a settlement was created before 17th March 1998,
>
> (b) on or after the commencement day a person transfers property to the trustees otherwise than under a transaction entered into at arm’s length and otherwise than in pursuance of a liability incurred by any person before that day,
>
> (c) the trustees are not resident in the UK at the time the property is transferred, and
>
> (d) the transferor knows, or has reason to believe, that the trustees are not so resident.

[6] *Clark v Oceanic* 56 TC 183.

[7] Section 245A(1) IHTA 1984.

> (2) Before the expiry of the period of twelve months beginning with the relevant day, the transferor shall deliver to the Board a return which—
>
> (a) identifies the settlement, and
>
> (b) specifies the property transferred, the day on which the transfer was made, and the consideration (if any) for the transfer.
>
> (3) For the purposes of sub-paragraph (2) above the relevant day is the day on which the transfer is made.

128.4 CGT: Reporting creation of trust

Para 3 sch 5A TCGA provides:

> (1) This paragraph applies if a settlement is created on or after the commencement day, and at the time it is created—
>
> (a) the trustees are not resident in the UK, or
>
> (b) the trustees are resident in the UK but fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
>
> (2) Any person who—
>
> (a) is a settlor in relation to the settlement at the time it is created, and
>
> (b) at that time fulfils the condition mentioned in sub-paragraph (3) below,
>
> shall, before the expiry of the period of three months beginning with the relevant day, deliver to the Board a return specifying the particulars mentioned in sub-paragraph (4) below.
>
> (3) The condition is that the person concerned is domiciled in the UK and is resident in the UK.
>
> (3A) Section 835BA of ITA 2007 (deemed domicile) applies for the purposes of sub-paragraph (3).
>
> (4) The particulars are—
>
> (a) the day on which the settlement was created;
>
> (b) the name and address of the person delivering the return;
>
> (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.
>
> (5) For the purposes of sub-paragraph (2) above the relevant day is the day on which the settlement is created.

128.4.1 *Deemed-domiciled settlor*

Para 9 sch 12 FA 2017 provides:

> (1) In Schedule 5A (settlements with foreign element: information), in paragraph 3, after sub-paragraph (3) insert—

> "(3A) Section 835BA of ITA 2007 (deemed domicile) applies for the purposes of sub-paragraph (3)."
>
> (2) The amendment made by this paragraph has effect in relation to settlements created on or after 6 April 2017.

Thus for settlors who are deemed domiciled for IT/CGT, the obligation to report the creation of a trust only applies for a post-2017 trust. But a person cannot be deemed domiciled before 6/4/2017, so the issue does not arise for pre-2017 trusts.

More importantly, perhaps, deemed domicile does not apply elsewhere in sch 5A,[8] so there is no duty to report under other paragraphs of sch 5A.

128.5 Reporting: Settlor becomes UK-dom

Para 4 sch 5A TCGA provides:

> (1) This paragraph applies if a settlement is created on or after 19th March 1991, and at the time it is created—
>
> (a) the trustees are not resident in the UK, or
>
> (b) the trustees are resident in the UK but fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
>
> (2) Any person who—
>
> (a) is a settlor in relation to the settlement at the time it is created,
>
> (b) at that time does not fulfil the condition mentioned in sub-paragraph (3) below, and
>
> (c) first fulfils that condition at a time falling on or after the commencement day,
>
> shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying the particulars mentioned in sub-paragraph (4) below.
>
> (3) The condition is that the person concerned is domiciled in the UK and is resident in the UK.
>
> (4) The particulars are—
>
> (a) the day on which the settlement was created;
>
> (b) the name and address of the person delivering the return;
>
> (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.
>
> (5) For the purposes of sub-paragraph (2) above the relevant day is the day on which the person first fulfils the condition as mentioned in paragraph (c) of that sub-paragraph.

[8] The deemed domicile rules do not apply: see 5.3.1 (Scope of IT/CGT deemed-dom).

128.6 CGT: Reporting trust emigration

Para 5 sch 5A TCGA provides:

> (1) This paragraph applies if—
>
> (a) the trustees of a settlement cease at any time (the relevant time) on or after the commencement day to be resident in the UK, or
>
> (b) the trustees of a settlement, while continuing to be resident in the UK, become at any time (the relevant time) on or after the commencement day trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
>
> (2) Any person who was a trustee of the settlement immediately before the relevant time shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying—
>
> (a) the day on which the settlement was created,
>
> (b) the name and address of each person who is a settlor in relation to the settlement immediately before the delivery of the return, and
>
> (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.
>
> (3) For the purposes of sub-paragraph (2) above the relevant day is the day when the relevant time falls.

See 12.4 (Charge on emigration of trust).

128.7 Exceptions to CGT reporting

There are minor exceptions in para 6 sch 5A TCGA:

> (1) Nothing in paragraph 2, 3, 4 or 5 above shall require information to be contained in the return concerned to the extent that—
>
> (a) before the expiry of the period concerned the information has been provided to the Board by any person in pursuance of the paragraph concerned or of any other provision, or
>
> (b) after the expiry of the period concerned the information falls to be provided to the Board by any person in pursuance of any provision other than the paragraph concerned.
>
> (2) Nothing in paragraph 2, 3, 4 or 5 above shall require a return to be delivered if—
>
> (a) before the expiry of the period concerned all the information concerned has been provided to the Board by any person in pursuance of the paragraph concerned or of any other provision, or

(b) after the expiry of the period concerned all the information concerned falls to be provided to the Board by any person in pursuance of any provision other than the paragraph concerned.

128.8 IHT/CGT reporting compared

Sch 5A TCGA imposes overlapping reporting requirements. But s.218 IHTA is wider in some respects. It applies to IHT-settlements which are not necessarily non-resident, and not necessarily trusts, under the CGT definitions.[9] The main differences are:

	IHT	**CGT**
Duty on:	Professional adviser	Settlor/trustees
When applies	Creation of trust	Creation/addition/migration/settlor becomes UK domiciled

[9] For IHT Trust residence, see 7.19 (Trust residence for IHT). This is quite different from the IT/CGT definition.

CHAPTER ONE HUNDRED AND TWENTY NINE

INTERNATIONAL MOVEMENT OF CAPITAL: REPORTS

129.1 IMOC: Introduction
129.1.1 "UK corporate parent"
129.1.2 Contents of report
129.2 Definitions of "Reporting body"
129.2.1 Reporting body: Sch 17 definition
129.2.2 Condition A: no foreign control
129.2.3 Condition B: one UK parent
129.2.4 Condition C/D: > 1 UK parent
129.2.5 Nomination of reporting body
129.2.6 Nomination procedure
129.2.7 Reporting body: IMOCR definition
129.3 Reportable event/transaction
129.3.1 Valuation of event/transaction
129.4 Reportable transactions
129.4.1 Issue of shares/debentures
129.4.2 Transfer of shares/debentures
129.4.3 Change of partnership control
129.4.4 Regulations
129.5 Excluded transactions
129.5.1 Ordinary course of trade
129.5.2 All parties resident in same territory
129.5.3 Security
129.5.4 Cash pooling arrangement
129.5.5 Issue of shares inter-group
129.5.6 Issue of shares to unconnected person
129.5.7 Rights issue
129.5.8 Debenture issue intra-group
129.5.9 Debenture issue to unconnected person
129.5.10 Transfer of securities to unconnected person
129.5.11 Inter-group transfer of securities
129.5.12 Security over shares
129.6 Information in report
129.7 Penalties
129.8 Definitions
129.8.1 Control
129.8.2 "Connected"
129.8.3 Other definitions

129.1 IMOC: Introduction

Para 4(1) sch 17 FA 2009 provides:

> If a UK corporate parent is a reporting body at the time a reportable event takes place or a reportable transaction is carried out, it must, within 6 months of that time, make a report to an officer of Revenue and Customs.

The INT Manual provides:

> **INTM700310: International movements of capital: Reporting requirement: where should reports be sent?** [May 2020]
> The recommendation is that businesses should address the reports directly to the customer compliance manager ('CCM') dealing with their affairs. In cases where a business does not have a CCM appointed the reports should be sent to the office to which corporation tax returns are made.

129.1.1 *"UK corporate parent"*

Para 7 sch 17 FA 2009 provides the definition:

> In this Schedule "UK corporate parent" means a body corporate that-
> (a) is resident in the UK,
> (b) controls one or more bodies corporate that are not resident in the UK, and
> (c) s not controlled by-
> (i) a body corporate that is resident in the UK, or
> (ii) two or more bodies corporate taken together each of which is resident in the UK.

129.1.2 *Contents of report*

Para 4 sch 17 FA 2009 provides:

> (2) The report must contain such information relating to the event or transaction, or persons connected with the event or transaction, as is specified in regulations made by the Commissioners.
> (3) The purpose of the report is to enable the Commissioners to consider whether the event or transaction results, directly or indirectly, in an advantage for any person in respect of corporation tax or any other tax or duty.

The INT Manual provides:

> **INTM700800: International movements of capital: What information should the report include?** [May 2020]
> The report must include such information relating to the event or transactions as is specified in the regulations made by HMRC. The purpose of the report is to enable HMRC to consider whether or not the event or transaction gives rise to an advantage in relation to UK taxation.
> Regulation 3 deals with the information which a reporting body is required to provide. It provides that the information required as it relates to a foreign subsidiary is its name and the territory from which it derives its status as a body corporate. The report should also contain

a full description of the steps taken in the course of a transaction including in particular the date, the names of the parties, the reasons for it, and an estimate of its effect on liability to UK tax.

It can be seen from these provisions that the new reporting requirement takes a different approach to that under S.I. 1990 / No. 1671 which set out in some detail what was to be supplied under ICTA88/S765A (see INTM700110). When compiling a report under Schedule 17 businesses should bear in mind the purpose of that report when viewed from HMRC's perspective.

The legislation states that the reports are intended to enable HMRC to consider whether or not the event or transaction gives rise to an advantage in relation to UK taxation. This is a fundamental element of the department's work in assessing UK tax risks. The reports are therefore intended to play a part in the ongoing risk assessments carried out on all major groups. With this in mind a business needing to make a report ought to ensure that it is sufficiently detailed to make the consequences of the transaction clear. There is no advantage for either HMRC or businesses if additional information has to be sought (whether under formal information powers or not) because the report is insufficient.

To this end, for example, the inclusion of key documents relating to a particular transaction is to be encouraged. A particular agreement is likely to contain a great deal of factual information about the parties involved and the steps taken. Similarly, in multi-stage transactions a diagrammatic approach setting out what has happened will in most cases provide a more effective report than one that relies solely on description, although a narrative element will usually be required.

The extent to which the tax effect of a particular transaction can be estimated will vary from case to case. A distinction might be drawn between transactions planned and intended to generate a UK tax advantage and those which might well have such an effect but not in a precisely quantifiable manner. An estimate may therefore not necessarily be expressed in terms of a certain sum of money each year but as a narrative of the likely consequences. HMRC recognises that a reasonable estimate of the tax effect of some transactions may not be possible. In such cases it would be appropriate to include a brief description of the reasons for this.

129.2 Definitions of "Reporting body"

There are two definitions of reporting body, one in sch 17 and one in International Movement of Capital (Required Information) Regulations 2009 ("IMOCR"). It is bad drafting to use the same term differently in what is in effect one single code of rules; but there it is.

129.2.1 *Reporting body: Sch 17 definition*

Para 5(1) sch 17 FA 2009 provides:

> For the purposes of this Schedule a body corporate ("body A") is a reporting body at any time if, at that time-
> (a) it is a UK corporate parent, and
> (b) condition A, B, C or D is met.

129.2.2 *Condition A: no foreign control*

Para 5(2) sch 17 FA 2009 provides:

> Condition A is that body A is not controlled by a body corporate resident outside the UK.

129.2.3 *Condition B: one UK parent*

Para 5(3) sch 17 FA 2009 provides:

> Condition B is that-
> (a) body A is controlled by a body corporate resident outside the UK ("the foreign parent"), and
> (b) no other relevant UK body corporate is controlled by the foreign parent.

129.2.4 *Condition C/D: > 1 UK parent*

Conditions C and D concern nomination arrangements, and are conveniently read side by side:

Para 5(4): Condition C	**Para 5(5): Condition D**
(4) Condition C is that-	(5) Condition D is that-
(a) body A is controlled by a body corporate resident outside the UK ("the foreign parent"),	[Identical]
(b) one or more other UK corporate parents are controlled by the foreign parent, and	[identical]
(c) body A is not a party to an arrangement under paragraph 6.	(c) body A is a party to an arrangement under paragraph 6 and is the nominated reporting body under that arrangement.

129.2.5 *Nomination of reporting body*

The INT Manual provides:

> **INTM700400: International movements of capital: Who should make reports?** [May 2020]
> ... If a group is structured as, for example, two or more parallel sub-groups controlled by a foreign parent then the UK resident parents of each sub-group will be reporting bodies in respect of their subsidiaries unless between them they nominate a single reporting body (see INTM700410).

Para 6 sch 17 FA 2009 provides:

> (1) Sub-paragraph (2) applies where-
> (a) a UK corporate parent is controlled by a body corporate resident outside the UK ("the foreign parent"), and
> (b) one or more other UK corporate parents are controlled by the foreign parent.
> (2) Two or more of the UK corporate parents controlled by the foreign parent may enter into an arrangement under which one of their number ("the nominated reporting body") is nominated to exercise, on behalf of all of them, the functions conferred under this Schedule on a reporting body.
> (3) A party to an arrangement under this paragraph may withdraw from the arrangement.
> (4) The Commissioners may by regulations make provision about entering into and withdrawing from an arrangement under this paragraph.
> (5) Regulations under sub-paragraph (4) may, in particular, include provision-
> (a) as to the form and manner in which bodies may enter into, or a body may withdraw from, an arrangement,
> (b) requiring a person to give information to HMRC in connection with entering into or withdrawing from an arrangement, and
> (c) as to circumstances in which a body is to be treated as having withdrawn from an arrangement.

129.2.6 *Nomination procedure*

Article 6 IMOCR provides:

> (1) This regulation contains provision about an arrangement under paragraph 6 of Schedule 17.
> (2) The parties to an arrangement must give notice to an officer of

> Revenue and Customs within 28 days of entering into it.
> (3) The notice must be in writing and signed by all the parties to the arrangement.
> (4) The notice must state-
> (a) the name of each party,
> (b) the tax reference of each party, and
> (c) which party is the nominated reporting body.
> (5) The parties to an arrangement are treated as having withdrawn from it if they fail to give notice in accordance with paragraphs (2) to (4).
> (6) A party to an arrangement is treated as having withdrawn from it if that party ceases to be controlled by the foreign parent.
> (7) A party which withdraws from or is treated as having withdrawn from an arrangement must give notice in writing of that fact to an officer of Revenue and Customs and to any other party to the arrangement within 28 days of the date of withdrawal or, as the case may be, the date on which it ceases to be controlled by the foreign parent.

129.2.7 *Reporting body: IMOCR definition*

Article 2(3) IMOCR provides:

> In these Regulations, references to a reporting body include a body corporate which would be a reporting body if it had not entered into an arrangement under paragraph 6 of Schedule 17.

129.3 Reportable event/transaction

Para 8(1) sch 17 FA 2009 provides:

> For the purposes of this Schedule an event or transaction is "reportable", in relation to a reporting body, if-
> (a) it is of a value exceeding £100 million,
> (b) it is within sub-paragraph (2), and
> (c) it is not an excluded transaction (see paragraph 9).

129.3.1 *Valuation of event/transaction*

£100m is a substantial amount; but it has not been increased for inflation, so gradually more corporate groups are coming within the scope of IMOC.
Article 4 IMOCR provides:

> (1) The value of an event or transaction is to be determined for the purposes of paragraph 8 of Schedule 17 in accordance with this regulation.

> (2) The value of an issue or transfer of shares or debentures is the market value of the shares or debentures.
> (3) The value of an event or transaction which results in a foreign subsidiary becoming, or ceasing to be, a controlling partner in a partnership is the market value of the share of the subsidiary in the assets of the partnership immediately after it becomes a controlling partner or, as the case may be, immediately before it ceases to be a controlling partner.
> (4) For the purposes of paragraphs (2) and (3), the value of an event or transaction that is one of a series is the aggregate of the value of all the events and transactions in the series.

129.4 Reportable transactions

Para 8 sch 17 FA 2009 provides:

> (2) An event or transaction is within this sub-paragraph if-

A set of 5 categories of reportable transaction then follow.

129.4.1 *Issue of shares/debentures*

Para 8 sch 17 FA 2009 provides:

> (2) An event or transaction is within this sub-paragraph if-
> (a) it is an issue of shares or debentures by a foreign subsidiary,

129.4.2 *Transfer of shares/debentures*

Para 8 sch 17 FA 2009 provides:

> (2) An event or transaction is within this sub-paragraph if ...
> (b) it is a transfer by the reporting body, or a transfer caused or permitted by the reporting body, of shares or debentures of a foreign subsidiary in which the reporting body has an interest,
> (c) where the reporting body is a party to an arrangement under paragraph 6, it is a transfer by another party to the arrangement, or a transfer caused or permitted by such a party, of shares or debentures of a foreign subsidiary in which that party has an interest,

129.4.3 *Change of partnership control*

Para 8 sch 17 FA 2009 provides:

> (2) An event or transaction is within this sub-paragraph if ...

> (d) it results in a foreign subsidiary becoming, or ceasing to be, a controlling partner in a partnership.

Para 8(3) sch 17 FA 2009 provides:

> For the purposes of sub-paragraph (2)(d) a foreign subsidiary is a "controlling partner" in a partnership if, whether alone or taken together with one or more other partners that are subsidiaries, it controls the partnership.

Para 12(3) sch 17 FA 2009 provides:

> For the purposes of this Schedule "control" in relation to a partnership, means the right to a share of more than 50% of the assets, or of more than 50% of the income, of the partnership.

This is the standard definition.[1]

Para 12(4) sch 17 FA 2009 provides an (unnecessary) foreign-entity definition of partnership:[2]

> In this Schedule-
> "partnership" includes an entity established under the law of a country or territory outside the UK of a similar character to a partnership, and "partner" is to be read accordingly;

129.4.4 *Regulations*

Para 8 sch 17 FA 2009 provides:

> (2) An event or transaction is within this sub-paragraph if ...
> (e) it is of a description specified in regulations made by the Commissioners.

No further events/transactions have been specified.

129.5 Excluded transactions

Excluded transactions are not reportable.

Para 9 sch 17 FA 2009 provides:

> (1) For the purposes of this Schedule a transaction is "excluded" if-

A set of five excluded transactions then follow:

[1] See 104.11 (Control of partnership).

[2] See 90.3.3 (Foreign-entity clauses).

129.5.1 *Ordinary course of trade*

Para 9 sch 17 FA 2009 provides:

> (1) For the purposes of this Schedule a transaction is "excluded" if-
> (a) it is carried out in the ordinary course of a trade,

129.5.2 *All parties resident in same territory*

Para 9 sch 17 FA 2009 provides:

> (1) For the purposes of this Schedule a transaction is "excluded" if ...
> (b) all the parties to the transaction are, at the time the transaction is carried out, resident in the same territory,

129.5.3 *Security*

Para 9 sch 17 FA 2009 provides:

> (1) For the purposes of this Schedule a transaction is "excluded" if ...
> (c) it consists in giving to the bankers of a foreign subsidiary any security for the payment of any sum due or to become due from it to them by reason of any transaction entered into with it by them in the ordinary course of their business as bankers,
> (d) it consists in a foreign subsidiary giving to an insurance company any security for the payment of any sum due or to become due from that subsidiary to that company by reason of any transaction entered into with that subsidiary by that company in the ordinary course of that company's business by way of investment of its funds, or

129.5.4 *Cash pooling arrangement*

Para 9 sch 17 FA 2009 provides:

> (1) For the purposes of this Schedule a transaction is "excluded" if ...
> (e) it is of a description specified in regulations made by the Commissioners.

Article 5 IMOCR and the schedule specify the other excluded transactions. Article 5 IMOCR provides:

> (1) A transaction is excluded for the purposes of Schedule 17 if-
> (a) it is a transaction within paragraph 8(2)(a) to (c) of Schedule 17 that is entered into pursuant to cash pooling arrangements in respect of which the conditions specified in paragraph (2) have been met ...

> (2) The conditions mentioned in paragraph (1)(a) are that before the transaction takes place-
>
> (a) the parties to the cash pooling arrangements notify an officer of Revenue and Customs in writing of the terms of the arrangements;
>
> (b) an officer of Revenue and Customs gives notice in writing to the parties that transactions entered into pursuant to the cash pooling arrangements after the date of the notice will be excluded transactions for the purposes of Schedule 17.

The INT Manual provides:

> **INTM700710: International movements of capital: Exclusions: cash pooling arrangements** [May 2020]
>
> **Cash Pooling Arrangements**
>
> The legislation does not define 'cash pooling arrangements'. Broadly they are arrangements which enable companies to minimise expenditure in connection with banking facilities. Entities within a group may transfer their surplus cash to a single account overnight and, in return, draw on that account for their cash flow needs. The central account is usually held by a group treasury company.
>
> The detail of such arrangements will vary enormously but in general the result is a frequently changing network of very short term intra-group loans reflecting the needs of operating companies. Where such transactions are not otherwise excluded from the scope of the reporting requirement regulation 5(1)(a) may be of value. Due to the £100 Million limit (see INTM700600) it is not expected that many groups will need to consider this exclusion.
>
> **Notifying HMRC**
>
> Where a group wishes to take advantage of the exclusion for cash pooling arrangements it should in the first place approach its CCM or the office to which its corporation tax returns are made.
>
> The business should supply sufficient information concerning the terms on which group cash is pooled to enable HMRC to consider the risks attached to excluding the related transactions from the reporting requirement. The process will involve description and discussion of a group's procedures and it is very likely that the provision internally prepared documentation describing those processes will be of value.
>
> **Changes to arrangements**
>
> Where changes are made to cash pooling arrangements subsequent transactions will not be excluded from the scope of the reporting requirement. Groups will therefore need to notify HMRC of such changes. However, this should only be necessary where such changes

> have a material impact on the arrangements.
> For example, the variation of an interest rate should not be regarded as a change if the previously notified arrangements provide for a floating rate and the variation reflects an underlying movement in LIBOR. It would be a change to move interest rates from a floating to a fixed basis where such a change was not a provision of the original arrangements.

Article 5 IMOCR provides:

> (1) A transaction is excluded for the purposes of Schedule 17 if ...
> (b) it is described in one of the paragraphs in the Schedule (excluded transactions) to these Regulations and meets such conditions (if any) as are specified there.

We journey on to sch IMOCR:

> 1 The following transactions are excluded transactions mentioned in regulation 5(1)(b).

It seems strange drafting not to define all the excluded transactions in one place; but there it is.

129.5.5 *Issue of shares inter-group*

Para 2 sch IMOCR provides:

> (1) The first transaction is the issue of shares by the foreign subsidiary to the reporting body or to a group company.
> (2) The conditions are that the issue-
> (a) is of shares that are not redeemable; and
> (b) is either-
> (i) at market value and for consideration paid in cash to the foreign subsidiary, or
> (ii) in or towards payment for any business undertaking or property acquired by the foreign subsidiary at market value.

129.5.6 *Issue of shares to unconnected person*

Para 3 sch IMOCR provides:

> (1) The second transaction is the issue of shares by the foreign subsidiary to a person not connected with the reporting body.
> (2) The conditions are-
> (a) that the issue-
> (i) is at market value and for consideration paid to the foreign subsidiary, and

> (ii) is not to a nominee or trustee for a person who is connected with the reporting body;
>
> (b) that no arrangements exist as a consequence of which the reporting body or a person connected with the reporting body, or a nominee or trustee for that person or the reporting body, is or may become entitled to the shares so issued or to any of them or to any interest in them or in any of them.

129.5.7 *Rights issue*

Para 4 sch IMOCR provides:

> (1) The third transaction is the issue of shares by the foreign subsidiary to all persons who are its shareholders at the time of the issue.
>
> (2) The conditions are that the issue-
>
> (a) is in respect of and in proportion to the shares held by the shareholders in the foreign subsidiary at the time of the issue; and
>
> (b) either-
>
> (i) is of shares that are not redeemable, or
>
> (ii) where no shares are issued to a company which is resident in the UK or to a nominee or trustee for such a company, is at market value for consideration paid in cash to the foreign subsidiary.

129.5.8 *Debenture issue intra-group*

Para 5 sch IMOCR provides:

> (1) The fourth transaction is the issue of debentures by the foreign subsidiary to the reporting body or to a group company.
>
> (2) The condition is that the circumstances specified in sub-paragraph (3) are not associated with or present in connection with the issue of the debentures.
>
> (3) The circumstances are that a loan, whether or not of the same amount as that secured by the debentures, is made by a company which is not resident in the UK to a company which is resident in the UK.

129.5.9 *Debenture issue to unconnected person*

Para 6 sch IMOCR provides:

> (1) The fifth transaction is the issue of debentures by the foreign subsidiary to persons not connected with the reporting body.
>
> (2) The conditions are-
>
> (a) that the issue-

> (i) is at market value and for consideration paid to the foreign subsidiary, and
> (ii) is not to a nominee or trustee for a person who is connected with the reporting body;
>
> (b) that no arrangements exist as a consequence of which the reporting body or a person connected with the reporting body, or a nominee or trustee for that person or the reporting body, is or may become entitled to the debentures so issued or to any of them or to any interest in them or in any of them.

129.5.10 *Transfer of securities to unconnected person*

Para 7 sch IMOCR provides:

> (1) The sixth transaction is the transfer by the reporting body or a company (whether or not it is resident in the UK) of shares or debentures of the foreign subsidiary to a person not connected with the reporting body.
>
> (2) The conditions are-
>
> (a) that the transfer-
> (i) is at market value for consideration paid to the transferor company, and
> (ii) is not to a nominee or trustee for a person who is connected with the reporting body;
>
> (b) that no arrangements exist as a consequence of which-
> (i) the reporting body, or
> (ii) a nominee or trustee for the reporting body, or
> (iii) a person connected with the reporting body, or
> (iv) a nominee or trustee for a person connected with the reporting body,
>
> is or may become entitled to the shares or debentures transferred or to any of them or to any interest in them or in any of them.

129.5.11 *Inter-group transfer of securities*

Para 8 sch IMOCR provides:

> The seventh transaction is a transfer by the reporting body of shares or debentures of the foreign subsidiary to a group company.

Para 9 sch IMOCR provides:

> (1) The eighth transaction is a transfer within sub-paragraph (2) to the reporting body or a group company.

> (2) A transfer is within this sub-paragraph if it-
>
> (a) is not by the reporting body,
>
> (b) is of shares or debentures of a foreign subsidiary in which the reporting body has an interest, and
>
> (c) is permitted or caused by the reporting body.

129.5.12 *Security over shares*

Para 10 sch IMOCR provides:

> The ninth transaction consists in the reporting body or a group company giving security over the shares of a foreign subsidiary in connection with borrowing money from a lender who is unconnected to the reporting body or the group company.

129.6 Information in report

Article 3 IMOCR provides:

> (1) Paragraphs (2) and (3) specify the information (in this regulation referred to as "the required information") to be contained in the report which is required to be made to an officer of Revenue and Customs under paragraph 4(1) of Schedule 17.
>
> (2) The required information as it relates to a foreign subsidiary connected with the event or transaction is-
>
> (a) its name, and
>
> (b) the territory from the laws of which it derives its status as a body corporate.
>
> (3) The required information as it relates to an event or transaction is a full description of the event or transaction (and, in the case of a transaction, a full description of all the steps taken in the course of the transaction) and includes in particular-
>
> (a) the date on which the event took place or the transaction was carried out,
>
> (b) for a transaction, the name of each party to it,
>
> (c) the reason for the event or transaction, and
>
> (d) an estimate of the effect of the event or transaction on the liability to tax in the UK of the reporting body and of any group company

129.7 Penalties

Penalties arise under s.98 TMA 1970 (special returns etc). The amounts are nominal: presumably company groups in excess of £100m are not thought to need the sanction of substantial penalties.

129.8 Definitions

129.8.1 *Control*

Para 12(1) sch 17 FA 2009 provides:

> For the purposes of this Schedule "control", in relation to a body corporate, means the power of a person to secure-
> (a) by means of the holding of shares or the possession of voting power in or in relation to the body or any other body corporate, or
> (b) by virtue of any powers conferred by the articles of association or other document regulating the body or any other body corporate,
> that the affairs of the body are conducted in accordance with that person's wishes.

This is strict-sense control.[3]
Para 12(2) sch 17 FA 2009 provides:

> Where two or more persons, taken together, have the power mentioned in sub-paragraph (1), they are taken for the purposes of this Schedule to control the body corporate.

129.8.2 *"Connected"*

Article 2(2) IMOCR cuts down the standard definition of connected person:

> [a] For the purposes of these Regulations, whether a person is connected with another shall be determined
> [b] as it would in accordance with the provisions of subsections (2) to (8) of section 839 (connected persons) of ICTA [now s.1122 CTA 2010]
> [c] if the words "paragraph 12 of Schedule 17 to the Finance Act 2009" were substituted for the words "section 416" in the definition of "control" in subsection (8).

The effect of [c] is now to substitute the words "paragraph 12 of Schedule 17 to the Finance Act 2009" for the words "sections 450 and 451" in s.1123(1) CTA 2010.

[3] See 104.9 (Control: Strict sense).

129.8.3 *Other definitions*

Para 12 sch 17 FA 2009 provides:

> (4) In this Schedule-
> "foreign" means resident outside the UK;
> "subsidiary", in relation to a reporting body, means a body corporate that is controlled by-
> (a) the reporting body, or
> (b) where the reporting body is a party to an arrangement under paragraph 6, any party to the arrangement.
> (5) Section 150 of TIOPA 2010 (meaning of "transaction" and "series of transactions") applies for the purposes of this Schedule.[4]

Article 2 IMOCR provides:

> (1) In these Regulations-
> "group company" means any company which is resident in the UK and which would be deemed to be a member of the group of companies which includes the reporting body for the purposes of Chapter IV of Part X of the Income and Corporation Taxes Act 1988 if in section 413(3) of that Act the words "51 per cent" were substituted for the words "75 per cent";
> ...
> "redeemable", in relation to shares, means that the shares satisfy one or both of the following conditions-
> (a) that, by virtue of the terms of their issue or the exercise of a right by any person or the existence of any arrangements, they are liable to be redeemed, cancelled or repaid, in whole or in part;
> (b) that, by virtue of any material arrangements, the holder has a right to require another person to acquire the shares or is obliged in any circumstances to dispose of them or another person has a right or is in any circumstances obliged to acquire them;
> and arrangements are material arrangements if the company which issued the shares or a company connected with that company is a party to the arrangements.

130.1 CRS & other information sources

HMRC obtain information about Beneficial Ownership/Controlling Persons from the following:[1]

(1) Automatic Exchange of Information (AEOI) agreements:
  (a) CRS (Common Reporting Standard)[2]
  (b) FATCA (the US Foreign Account Tax Compliance Act)
(2) Beneficial Ownership registers:
  (a) UK companies/LLPs: Persons with Significant Control register[3]
  (b) Equivalents in foreign jurisdictions[4]
  (c) The Trust Register, known as TRS
  (d) Register of Overseas Entities owning UK land[5]

This chapter considers CRS and touches on FATCA. The next chapter considers TRS and MLR; I hope to consider the others in a future edition. But a full discussion would need several volumes.

CRS also addresses the topic of AML/KYC (anti-money laundering/

[1] Also, until Brexit, Council Directive 2011/16/EU (Administrative co-operation in the field of taxation) provided for exchange of information between member states (it applies CRS throughout the EU).

[2] Standard for Automatic Exchange of Financial Account Information *http://www.oecd.org/tax/automatic-exchange/common-reporting-standard/*

[3] Part 21A (s.790A-790ZG) Companies Act 2006.

[4] British Overseas Territories are required to establish public registers of company beneficial owners; s.51 Sanctions and Anti-Money Laundering Act 2018. But the EC decision in Joined Cases C-37/20 | *Luxembourg Business Registers* and C-601/20 | *Sovim* will cause rethinking and delay here.

[5] Economic Crime (Transparency and Enforcement) Act 2022.

know your client), also known as due diligence; but the topic of this chapter is the reporting of Beneficial Ownership/Controlling Persons.

130.2 Common Reporting Standard

In outline, there are two basic types of entity:

(1) *Financial Institutions* (FIs) who make reports to their local tax authority; in more detail, they report to their Competent Authority, on Reportable Accounts, held by Reportable Persons, resident in Reportable Jurisdictions.

(2) *NFEs* who do not make reports, but FIs make reports for them

Competent Authorities exchange this information between themselves.

CRS has vocabulary and concepts of its own, and it is not possible to discuss it without using its terminology.

130.2.1 *Implementation in UK law*

CRS is implemented in international law by a treaty, CRS Multilateral Competent Authority Agreement (MCAA) for the automatic exchange of information between tax authorities.

CRS is implemented in UK law by s.222 FA 2013 and International Tax Compliance Regulations 2015 (ITCR).[6]

Of course a foreign entity is concerned with the law and practice in the jurisdiction where it is located, rather than UK law. But I wonder how much the different jurisdictions actually vary. The major jurisdiction which has not implemented CRS is, needless to say, USA.

130.2.2 *CRS guidance*

CRS has attracted what readers may regard as a surfeit of guidance.

OECD guidance:

- A commentary ("CRS commentary")
- CRS Implementation Handbook 2nd edition April 2018
- OECD CRS FAQ[7]

[6] The OECD has recently released amendments to the CRS in 2023, the full report is titled "International Standards for Automatic Exchange of Information in Tax Matters: Crypto-Asset Reporting Framework and 2023 Update to the Common Reporting Standard" *https://www.oecd-ilibrary.org/sites/896d79d1-en/index.html?itemId=/content/publication/896d79d1-en*

[7] The full title is: CRS-related Frequently Asked Questions *http://www.oecd.org/tax/automatic-exchange/common-reporting-standard/*

- Model disclosure rules concerning CRS avoidance[8]
- Cryptoasset Reporting Framework and 2023 Update To the Common Reporting Standard contains a commentary on its provisions[9]

HMRC guidance

- International Exchange of Information Manual

STEP guidance: two guidance notes which I call:

- STEP CRS guidance[10]
- STEP CRS guidance (2016)[11]

For the background, see Casi *et al.,* "A Call to Action: From Evolution to Revolution on the CRS" [2019] BTR 166.

See too Jackson & Brown, *A Practitioner's Guide To International Tax Information Exchange Regimes.*

130.2.3 *FATF recommendations*

CRS refers at times to the FATF recommendations on money laundering ("FATF Recommendations").[12] This was issued in 1990 and revised in 1996, 2003 and 2012. The 2012 edition is the current one, though that has been subsequently revised.

130.3 FATCA

FATCA is governed by a USA/UK Intergovernmental Agreement. I refer to this as the FATCA IGA, or just FATCA.[13] This is implemented in UK

[8] The full title is: OECD, "Model Mandatory Disclosure Rules for CRS Avoidance Arrangements and Opaque Offshore Structures" (2018) *http://www.oecd.org/tax/automatic-exchange/common-reporting-standard/*

[9] *https://www.oecd.org/tax/international-standards-for-automatic-exchange-of-information-in-tax-matters-896d79d1-en.htm*
This was preceded by an OECD consultation document, "Crypto-Asset Reporting Framework and Amendments to the Common Reporting Standard" (2022).

[10] The full title is: STEP Guidance Note: CRS and trusts (2017) *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

[11] The full title is: STEP Guidance Note: Common Reporting Standard. *https://www.step.org/system/files/media/files/2020-03/Guidance_Note_CRS.pdf*

[12] The full title is: International Standards on Combating Money Laundering and the Financing of Terrorism & Proliferation: The FATF Recommendations *https://www.fatf-gafi.org/content/dam/fatf-gafi/recommendations/FATF%20Recommendations%202012.pdf.coredownload.inline.pdf*

[13] The full title is: Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the United States of America to Improve International Tax Compliance and to Implement FATCA (2012).

law by ITCR 2015. FATCA is not identical to CRS but they share a common framework.

In outline: FATCA requires financial institutions outside the USA to provide information about US persons to the IRS. The US provides data on US accounts of UK residents to HMRC.

The professional bodies have produced guidance ("PB FATCA guidance").[14] They have also produced a flowchart[15] but that can only be an outline sketch of the position.[16]

130.4 CRS/FATCA navigation

130.4.1 *Index of provisions*

The provisions of CRS are laid out as follows:

Section	**Topic**
I	Reporting Requirements
II - VII	Due Diligence Requirements
VIII	Definitions
IX	Implementation

130.4.2 *Definitions*

CRS capitalises the initial letter of defined terms and I adopt that here.

Section VIII CRS (definitions) is divided into parts (A to E) which are subdivided into numbered sections. In FATCA the definitions are in art 1:

CRS	***FATCA***	***Para***	***CRS***	***FATCA***	***Para***
A. Reporting Financial Institutions					
1 Reporting Financial Institution		130.32	5 Depository Institution	1(i)	130.10
2 Participating Jurisdiction FI		130.14	6 Investment Entity	1(j)	130.11

https://www.gov.uk/government/publications/agreement-between-the-uk-and-the-usa-to-improve-international-tax-compliance-and-to-implement-fatca

[14] *https://www.step.org/system/files/media/files/2020-03/Updated_FATCA_Guidance_14_August_2014.pdf* (Aug 2014).

[15] *https://www.step.org/system/files/media/files/2020-03/fatca-flowchart-iga.pdf*

[16] The IEIM provides:

> **EIM400820 Trusts Managed by a Financial Institution** [Dec 2021]
> STEP in conjunction with the Law Society for England and Wales and ICAEW have produced a series of questions and a supporting flowchart that may be useful when considering the status of a trust. Please note that use of this flowchart will in no way take the place of HMRC guidance and it should be used as a supplementary tool only.

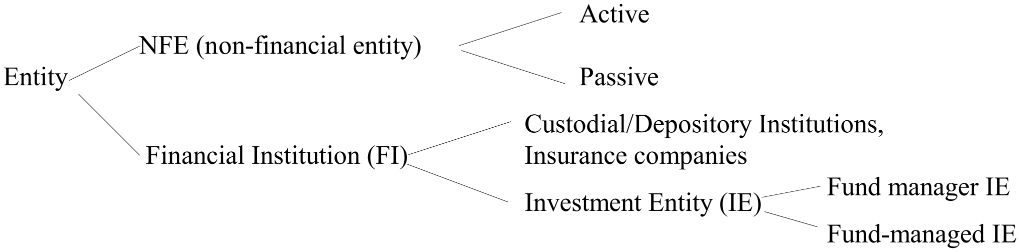
3 Financial Institution	1(g)	130.9	7 Financial Asset		130.16
4 Custodial Institution	1(h)	130.10	8 Specified Insurance Co	1(k)	
B. Non-Reporting Financial Institutions					
1 Non-Reporting FI		130.33	6 Narrow Participation Retirement Fund		
2 Governmental Entity		130.8.3	7 Governmental Pension Fund, etc		
3 International Organisation		130.8.3	8 Qualified Credit Card Issuer		130.35
4 Central Bank			9 Exempt Collective Investment Vehicle		
5 Broad Participation Retirement Fund					
C. Financial Accounts					
1 Financial Account	1(s)	130.17	10 New Account		
2 Depository Account	1(t)	130.17.1	11 Pre-existing Individual Account		
3 Custodial Account	1(u)	130.17.2	12 New Individual Account		
4 Equity Interest	1(v)	130.17.3	13 Pre-existing Entity Account		
5 Insurance Contract	1(w)		14 Lower Value Account		
6 Annuity Contract	1(x)		15 High Value Account		
7 Cash Value Insurance Contract	1(y)		16 New Entity Account		
8 Cash Value	1(z)		17 Excluded Account		
9 Pre-existing Account	1(aa)	130.34.6			
D. Reportable Accounts					
1 Reportable Account	1(bb)	130.19	6 Controlling Persons	1(mm)	130.23
2 Reportable Person		130.20	7 NFE		130.7
3 Reportable Jurisdiction Person		130.22	8 Passive NFE		130.9
4 Reportable Jurisdiction		130.21	9 Active NFE		130.8
5 Participating Jurisdiction		130.21			
E. Miscellaneous					
1 Account Holder	1(ee)	130.17.6	4 Related Entity	1(kk)	130.5.1
2 ML/KYC Procedures			5 TIN		
3 Entity 1(hh)		130.5	6 Documentary Evidence		

Terms which are undefined, or only defined indirectly, include:

Term	**See para**
Beneficiary	130.18
Distribution	130.18.1
Income	130.6

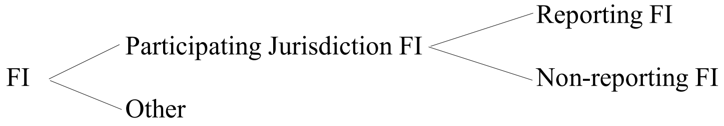
130.4.3 *Types of Entity: Summary*

Types of CRS Entity may be summarised by this table:



Active
NFE (non-financial entity)
Entity
Passive
Custodial/Depository Institutions,
Insurance companies
Financial Institution (FI)
Fund manager IE
Investment Entity (IE)
Fund-managed IE

Financial Institutions may also be categorised as follows:



130.5 Entity

Entity is a broad term. Section VIII (E)(3) CRS provides:

> 3. The term "**Entity**" means a legal person or a legal arrangement, such as a corporation, partnership, trust, or foundation.

An individual is not an entity. A trust with individual trustees is an entity, the trust. A trust with a corporate trustee involves two entities, the trust and the trustee.[17]

It may be difficult to identify the dividing line between what is and what is not an entity. Co-ownership is not an entity in UK law, in the absence of further features which might turn it into a partnership or unit trust, which are entities. In US law co-ownership may give rise an entity.

What about a non-express trust (which is outside TRS)? What about a bare trust (generally within TRS)?

130.5.1 *Related Entity*

Section VIII (E)(4) CRS provides:

> An Entity is a **"Related Entity"** of another Entity if either Entity controls the other Entity, or the two Entities are under common control. For this purpose control includes direct or indirect ownership of more than 50% of the vote and value in an Entity.

130.6 "Income"

Income is relevant in determining the type of Entity.

Income is not defined but should be ascertained by accountancy principles.

Ryan[18] suggests that income includes repaying debt to a shareholder, but that would not normally be regarded as income.

[17] Duplication of reporting is avoided as if the trustee reports, the trust is a non-reporting FI; see 130.33.3 (Trust with reporting trustee).

[18] "A crash course in the CRS" *https://www.step.org/journal/tqr-march-2016/crash-course-crs*

130.6.1 *Passive income*

Income may be passive or non-passive/active. The distinction matters for determining whether a NFE is passive or active.

Commentary on Section VIII CRS provides:

> 126. In determining what is meant by "passive income", reference must be made to each jurisdiction's particular rules. Passive income would generally be considered to include the portion of gross income that consists of:
>
> *a)* dividends;
> *b)* interest;
> *c)* income equivalent to interest;
> *d)* rents and royalties, other than rents and royalties derived in the active conduct of a business conducted, at least in part, by employees of the NFE;
> *e)* annuities;
> *f)* the excess of gains over losses from the sale or exchange of Financial Assets that gives rise to the passive income described previously;
> *g)* the excess of gains over losses from transactions (including futures, forwards, options, and similar transactions) in any Financial Assets;
> *h)* the excess of foreign currency gains over foreign currency losses;
> *i)* net income from swaps; or
> *j)* amounts received under Cash Value Insurance Contracts.
>
> Notwithstanding the foregoing, passive income will not include, in the case of a NFE that regularly acts as a dealer in Financial Assets, any income from any transaction entered into in the ordinary course of such dealer's business as such a dealer.[19]

[19] The text at (f)-(g) will be updated by the 2023 CRS Amendments when they take effect to read: "f) income derived from Relevant Crypto-Assets; g) the excess of gains over losses from the sale or exchange of Financial Assets or Relevant Crypto-Assets; h) the excess of gains over losses from transactions (including futures, forwards, options, and similar transactions) in any Financial Assets or Relevant Crypto-Assets". There is a similar insertion of "or Relevant Crypto-Assets" after "Financial Assets" in the paragraph beginning with "Notwithstanding the foregoing".
By the same amendments, there will also be a new paragraph after the paragraph beginning with "Notwithstanding the foregoing" which reads: " To facilitate effective implementation of the Standard, a jurisdiction's definition of passive income should in substance be consistent with the list provided in paragraph 126. Each jurisdiction

The "passive income" is not used (or at least not much) in domestic UK tax law, but it is used in international tax law.[20]

130.7 Non-financial Entity (NFE)

Section VIII (D)(7) CRS provides:

> 7. The term **"NFE"** means any Entity that is not a Financial Institution.

NFEs may be active or passive.

130.8 Active NFE

Section VIII (D)(9)(a) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria:

There follow 8 categories of active NFE:

Para	**Topic**
(a)	Mainly active income
(b)	Listed NFE
(c)	Government/international Entity
(d)	Entity holding assets for NFE
(e)	Entity providing services to NFE
(f)	Non-FI in liquidation
(g)	Group treasury company
(h)	Non-profit organisation

130.8.1 *Mainly active income*

Section VIII (D)(9)(a) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria:
>
> a) [i] less than 50% of the NFE's gross income for the preceding calendar year or other appropriate reporting period is passive income[21] and

may define in its particular rules the items contained in the list of passive income (such as, income equivalent to interest and dividends) consistent with domestic rules."

[20] See for instance Katz Commission 5th Report "Basing the South African Income Tax System on the Source Or Residence Principle - Options and Recommendations" Chapter 4 - Definition of Active and Passive Income *http://www.treasury.gov.za/publications/other/katz/5.pdf*

[21] See 130.6.1 (Passive income).

> [ii] less than 50% of the assets held by the NFE during the preceding calendar year or other appropriate reporting period are assets that produce or are held for the production of passive income;

For the purposes of this book, this is the most important category.

130.8.2 *Listed NFE*

Section VIII (D)(9)(b) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> b) the stock of the NFE is regularly traded on an established securities market or the NFE is a Related Entity of an Entity the stock of which is regularly traded on an established securities market;

130.8.3 *Government/international Entity*

Section VIII (D)(9)(c) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> c) the NFE is a Governmental Entity, an International Organisation, a Central Bank, or an Entity wholly owned by one or more of the foregoing;

130.8.4 *Holding/services to NFE*

Section VIII (D)(9)(d) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> d) [i] substantially all of the activities of the NFE consist of holding (in whole or in part) the outstanding stock of, or providing financing and services to, one or more subsidiaries that engage in trades or businesses other than the business of a Financial Institution,
>
> [ii] except that an Entity does not qualify for this status if the Entity functions (or holds itself out) as an investment fund, such as a private equity fund, venture capital fund, leveraged buyout fund, or any investment vehicle whose purpose is to acquire or fund companies and then hold interests in those companies as capital assets for investment purposes;

Section VIII (D)(9)(e) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> e) the NFE is not yet operating a business and has no prior operating history, but is investing capital into assets with the intent to operate a business other than that of a Financial Institution, provided that the NFE does not qualify for this exception after the date that is 24 months after the date of the initial organisation of the NFE;

130.8.5 *Non-FI in liquidation*

Section VIII (D)(9)(f) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> f) [i] the NFE was not a Financial Institution in the past five years, and
>
> [ii] is in the process of liquidating its assets or is reorganising with the intent to continue or recommence operations in a business other than that of a Financial Institution;

130.8.6 *Group treasury company*

Section VIII (D)(9)(g) CRS provides:

> 9. The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> g) the NFE primarily engages in financing and hedging transactions with, or for, Related Entities that are not Financial Institutions, and does not provide financing or hedging services to any Entity that is not a Related Entity, provided that the group of any such Related Entities is primarily engaged in a business other than that of a Financial Institution; or

130.8.7 *Non-profit organisation*

Section VIII (D)(9)(h) CRS provides:

> 9.The term "**Active NFE**" means any NFE that meets any of the following criteria ...
>
> h) the NFE meets all of the following requirements:
>
> i) it is established and operated in its jurisdiction of residence exclusively for religious, charitable, scientific, artistic, cultural,

athletic, or educational purposes; or it is established and operated in its jurisdiction of residence and it is a professional organisation, business league, chamber of commerce, labour organisation, agricultural or horticultural organisation, civic league or an organisation operated exclusively for the promotion of social welfare;

ii) it is exempt from income tax in its jurisdiction of residence;

iii) it has no shareholders or members who have a proprietary or beneficial interest in its income or assets;

iv) the applicable laws of the NFE's jurisdiction of residence or the NFE's formation documents do not permit any income or assets of the NFE to be distributed to, or applied for the benefit of, a private person or noncharitable Entity other than pursuant to the conduct of the NFE's charitable activities, or as payment of reasonable compensation for services rendered, or as payment representing the fair market value of property which the NFE has purchased; and

v) the applicable laws of the NFE's jurisdiction of residence or the NFE's formation documents require that, upon the NFE's liquidation or dissolution, all of its assets be distributed to a Governmental Entity or other non-profit organisation, or escheat to the government of the NFE's jurisdiction of residence or any political subdivision thereof.

130.9 Passive NFE

"Passive NFE" matters because:

(1) It is not a FI and does not have direct reporting duties

(2) Its accounts may be (and if the Passive NFE is a trust, will be) Reportable Accounts[22] so other FIs have the reporting duties.

There are two categories of Passive NFE.

Section VIII (D)(8) CRS provides:

> 8. The term "**Passive NFE**" means any:
>
> *(i)* NFE that is not an Active NFE,,,

A trust that is not a FI is likely to be a Passive NFE, but it depends on the type of income which it receives, active or passive.

Section VIII (D)(8) CRS provides:

[22] See 130.19 (Reportable Account).

> 8. The term "**Passive NFE**" means ...
>
> *(ii)* an Investment Entity
>
> [a] described in subparagraph A(6)(b) [fund-managed IE][23]
>
> [b] that is not a Participating Jurisdiction Financial Institution.[24]

In practice FIs outside Participating Jurisdictions (and outside USA) are few, so this category of Passive NFE will be rare.

130.10 Financial Institution

"Financial Institution" (FI) matters, as:

Reason	**See para**
Reporting Financial Institution has reporting duties	130.34
FI is not an NFE, so the FI's own accounts are not Reportable	130.7; 130.19

FI is, needless to say, a technical term. Section VIII (A)(3) CRS provides:

> 3. The term "**Financial Institution**" means
>
> [a] a Custodial Institution,
>
> [b] a Depository Institution,
>
> [c] an Investment Entity, or
>
> [d] a Specified Insurance Company.

Custodial Institutions are (in short) security and brokerage firms.[25] Depositary Institutions are banks.[26] These are all financial institutions in

[23] See 130.13 (Fund-managed IE).

[24] See 130.14 (Participating Jurisdiction FI).

[25] Section VIII (A)(4) CRS provides:

"4.[a] The term "Custodial Institution" means any Entity that holds, as a substantial portion of its business, Financial Assets for the account of others.

[b] An Entity holds Financial Assets for the account of others as a substantial portion of its business if the Entity's gross income attributable to the holding of Financial Assets and related financial services equals or exceeds 20% of the Entity's gross income during the shorter of:

(i) the three-year period that ends on 31 December (or the final day of a non-calendar year accounting period) prior to the year in which the determination is being made; or

(ii) the period during which the Entity has been in existence.

[26] Section VIII (A)(5) CRS provides: "The term "Depository Institution" means any Entity that accepts deposits in the ordinary course of a banking or similar business." This section will be updated by the 2023 CRS Amendments when they take effect to read: "The term "Depository Institution" means any Entity that: a) accepts deposits

the general sense of the term. But the important category, for this work at least, is Investment Entity (IE). An Investment Entity is a "Financial Institution" in the defined sense.

130.11 Investment Entity

"Investment Entity" matters as an IE is a Financial Institution and not a NFE.

There are two categories of Investment Entity. I coin the following terminology:

CRS term	**My Term**	**See para**
Investment Entity described in subpara A(6)(a) of Section VIII	Fund-manager IE	130.12
Investment Entity described in subpara A(6)(b) of Section VIII	Fund-managed IE	130.13

130.11.1 *Exclusions*

Section VIII (A)(6) CRS provides a rule which applies for both types of IE:

> ... The term "Investment Entity" does not include an Entity that is an Active NFE because it meets any of the criteria in [section VIII] subparagraphs D(9)(d) through (g).

That excludes:

Para	**Topic**
(d)	Entity holding assets for NFE
(e)	Entity providing services to NFE
(f)	Non-FI in liquidation
(g)	Group treasury company

See 130.8 (Active NFE).

130.11.2 *FATF Recommendations*

Section VIII (A)(6) CRS provides:

> ... This paragraph [Section VIII (A)(6) CRS, definition of IE] shall be interpreted in a manner consistent with similar language set forth in the definition of "financial institution" in the Financial Action Task Force Recommendations.[27]

in the ordinary course of a banking or similar business; or b) holds Specified Electronic Money Products or Central Bank Digital Currencies for the benefit of customers."

[27] See 130.2.3 (FATF recommendations).

130.12 Fund-manager IE

These are two requirements:
(1) A fund-manager requirement
(2) An income requirement

130.12.1 *Fund-manager requirement*

Section VIII (A)(6)(a) CRS provides:

> The term "**Investment Entity**" means any Entity:
> *a)* that primarily conducts as a business one or more of the following activities or operations for or on behalf of a customer:
> *i)* trading in money market instruments (cheques, bills, certificates of deposit, derivatives, etc.); foreign exchange; exchange, interest rate and index instruments; transferable securities; or commodity futures trading;
> *ii)* individual and collective portfolio management; or
> *iii)* otherwise investing, administering, or managing Financial Assets or money on behalf of other persons;[28]

I refer to activities within para (a)(i)-(iii) as **"Investment Activities"** and an entity carrying on investment activities is a **"professional fund-manager"**.

130.12.2 *Income requirement*

Section VIII (A)(6) CRS provides:

> An Entity is treated as primarily conducting as a business one or more of the activities described in subparagraph A(6)(a) [Investment Activities]...
> if the Entity's gross income attributable to the relevant activities equals or exceeds 50% of the Entity's gross income during the shorter of:
> *(i)* the three-year period ending on 31 December of the year preceding the year in which the determination is made; or
> *(ii)* the period during which the Entity has been in existence.

What if there is no income? The Entity is not likely to be carrying on a business.

[28] Section VIII (A)(6)(a)(iii) CRS will be updated by the 2023 CRS Amendments when they take effect to read: "otherwise investing, administering, or managing Financial Assets, money, or Relevant Crypto-Assets on behalf of other persons".

130.12.3 *Professional trust co*

In the following discussion a "professional trust company" is one carrying on the business of managing trusts. It is typically a Fund-manager IE, on the basis that:

(1) It has customers.
(2) It manages Financial Assets on behalf of customers.
(3) Its income is attributable to Investment Activities.

It is conceivable that a professional trust company is not a Fund-manager IE, eg, if the company is managing trusts (or mainly managing trusts) whose assets are not Financial Assets.

A family (SPV) trust company (a company set up to manage the trusts of one family) may not be carrying on a business, on the basis that it does not charge but acts gratuitously.

130.13 Fund-managed IE

Section VIII (A)(6)(b) CRS provides:

> The term "**Investment Entity**" means any Entity...
> *b)*[A] the gross income of which is primarily attributable to investing, reinvesting, or trading in Financial Assets,[29]
> [B] if the Entity is managed by another Entity that is
> [i] a Depository Institution,
> [ii] a Custodial Institution,
> [iii] a Specified Insurance Company, or
> [iv] an Investment Entity described in subparagraph A(6)(a) [Fund-manager IE]

I refer to an IE which meets these requirements as a **"fund-managed IE"**. There are two requirements here:

(1) An income requirement
(2) A managed-funds requirement

130.13.1 *Income requirement*

The relevant part of the definition of Fund-managed IE requires:

> *b)* [A] the gross income of [the Entity] is primarily attributable to

[29] This text will be updated by the 2023 CRS Amendments when they take effect to read: "... or trading in Financial Assets or Relevant Crypto-Assets, if the Entity is managed by another Entity ...".

> investing, reinvesting, or trading in Financial Assets,

Section VIII (A)(6)(b) CRS provides:

> [c] ... [ii] an Entity's gross income is primarily attributable to investing, reinvesting, or trading in Financial Assets[30] for purposes of subparagraph A(6)(b),
>
> if the Entity's gross income attributable to the relevant activities equals or exceeds 50% of the Entity's gross income during the shorter of:
>
> *(i)* the three-year period ending on 31 December of the year preceding the year in which the determination is made; or
>
> *(ii)* the period during which the Entity has been in existence.

130.13.2 *Managed-funds requirement*

The relevant part of the definition of Fund-managed IE requires:

> the Entity is managed by another Entity that is
>
> [i] a Depository Institution,
>
> [ii] a Custodial Institution,
>
> [iii] a Specified Insurance Company, or
>
> [iv] an Investment Entity described in subparagraph A(6)(a) [Fund-manager IE]

130.13.3 *"Managed"*

OECD Commentary on Section VIII (A)(6)(b) provides an artificially wide definition:

> 17. ...
>
> [a] An Entity is "managed by" another Entity if the managing Entity performs, either directly or through another service provider, any of the activities or operations described in subparagraph A(6)(a) [Investment Activities] on behalf of the managed Entity.
>
> [b] However, an Entity does not manage another Entity if it does not have discretionary authority to manage the Entity's assets (in whole or part).

I write "Managed" with an initial capital, to reflect the technical nature of the term.

An Entity may be "Managed" by more than one person. OECD Commentary addresses this:

[30] The 2023 CRS Amendments insert "or Relevant Crypto-Assets" here.

> 17. ... Where an Entity is managed by a mix of Financial Institutions, NFEs or individuals, the Entity is considered to be managed by another Entity that is a Depository Institution, a Custodial Institution, a Specified Insurance Company, or an Investment Entity described in subparagraph A(6)(a) [Fund-manager IE], if any of the managing Entities is such another Entity.[31]

STEP CRS guidance provides:

> In a typical trust example, the PTC or the holding company (owned by the trust) enters into a contract with a corporate service provider to provide services that include ‘investing, administering, or managing Financial Assets or money’ on behalf of the trust or underlying holding company. As part of the services provided, the corporate service provider will provide a director (either and individual or corporate director) who will be directly responsible (with the other directors) for the investment of the underlying assets of the trust or holding company. The corporate service provider will charge a fee for such services. The corporate service provider will, in many circumstances, provide services to other third parties. On occasion, the corporate service provider may provide such services only to the trust, holding company and other related entities.
>
> 10.3 The guidance in some IGA jurisdictions in relation to US FATCA confirmed that a trust can be treated as an FI if it receives services from a Trust and Corporate Service Provider (TCSP) that is itself an FI.
>
> 10.4 The guidance also considers the provision of directors to a company. While noting that the provision of individual employees or partners of a company services provider to serve as directors of an entity will not usually (on its own) cause the company to fall within the

[31] The text will be updated by the 2023 CRS Amendments when they take effect to continue to read: “For example, a private trust company that acts as a registered office or registered agent of a trust or performs administrative services unrelated to the Financial Assets, Relevant Crypto-Assets or money of the trust, does not conduct the activities and operations described in subparagraph (A)(6)(a) on behalf of the trust and thus the trust is not “managed by” the private trust company within the meaning of subparagraph (A)(6)(b). Also, an Entity that invests all or a portion of its assets in a mutual fund, exchange traded fund, or similar vehicle will not be considered “managed by” the mutual fund, exchange traded fund, or similar vehicle. In both of these examples, a further determination needs to be made as to whether the Entity is managed by another Entity for the purpose of ascertaining whether the first-mentioned Entity falls within the definition of Investment Entity, as set out in subparagraph (A)(6)(b).”

> 'managed by' test, the guidance notes that a company with individual or corporate directors provided by a corporate services provider may, should it wish to do so, elect to be treated as being managed by such corporate service provider and so be an investment entity itself.
>
> HMRC take the view that the provision of individual employees or partners of a company services provider (or similar) to serve as directors of an entity in the circumstances outlined above will cause the company to fall within the 'managed by' test.

The IEI Manual provides:

> **EIM400820 Trusts Managed by a Financial Institution** [Dec 2021]
>
> A trust is typically regarded as being managed by a Financial Institution where either
>
> [1] one or more of the trustees is a Financial Institution [see IEIM400600] or
>
> [2] the trustees have appointed a Financial Institution, such as a discretionary fund manager, to manage the trust's assets or to manage the trust.
>
> **Does a Financial Institution Manage the Trust?**
>
> A Financial Institution will manage the trust where it has been appointed by the trustees to carry out the day to day functions of the trust on behalf of the trustees. This goes beyond managing the investment of the trust's assets and includes other management functions that the trustees have to perform but which are contracted to the Financial Institution.
>
> **Does a Financial Institution Manage the Financial Assets of the Trust?**
>
> A Financial Institution manages the financial assets of the trust where it has discretion to manage the investments or investment strategy for the assets. This will usually be where the trust has appointed a discretionary fund manager to manage their portfolio or a part thereof.
>
> The appointment of a discretionary fund manager will be evidenced by an agreement between the parties that provides for discretionary management.
>
> Where the trustees of a trust invest in retail investments and the trustees make the decision on what investments to make, the arrangement will not amount to discretionary management. The Glossary of Definitions in the Financial Services Handbook defines both retail investment and retail investment activity.

130.13.4 *Trusts*

A trust is typically a Fund-managed IE on the basis that:

(1) It holds Financial Assets; and
(2) It is Managed by a Fund-manager IE.

But not all trusts meet the requirements. If not, then the trust is a NFE.

130.13.5 *Trusts: Underlying company*

An underlying company held by a trust is typically a Fund-managed IE, on the basis that:
(1) The company holds Financial Assets and
(2) It is managed by a Fund-manager IE.

But not all underlying companies meet the requirements. If not, then the underlying company is a NFE.

130.14 Participating Jurisdiction FI

Section VIII (A)(2) CRS provides:

> 2. The term "**Participating Jurisdiction Financial Institution**" means
> *(i)* [A] any Financial Institution that is resident in a Participating Jurisdiction,
> [B] but excludes any branch of that Financial Institution that is located outside such Participating Jurisdiction, and
> *(ii)* any branch of a Financial Institution that is not resident in a Participating Jurisdiction, if that branch is located in such Participating Jurisdiction.

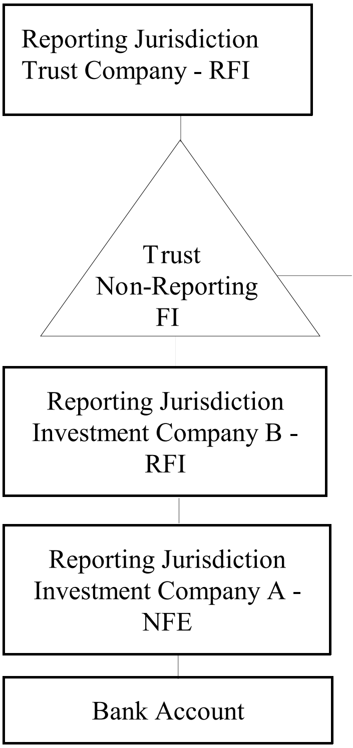
130.14.1 *Branch*

OECD Commentary on para VIII (A)(2) CRS provides:

> 6. A "branch" is a unit, business, or office of a Financial Institution that is treated as a branch under the regulatory regime of a jurisdiction or that is otherwise regulated under the laws of a jurisdiction as separate from other offices, units, or branches of the Financial Institution. A branch includes a unit, business, or office of a Financial Institution located in a jurisdiction in which the Financial Institution is resident, and a unit, business, or office of a Financial Institution located in the jurisdiction in which the Financial Institution is created or organised. All units, businesses, or offices of a Reporting Financial Institution in a single jurisdiction shall be treated as a single branch.

130.15 Passive NFE held by a trust

STEP CRS guidance provides:



Reporting Jurisdiction
Trust Company - RFI
Trust
Non-Reporting
FI
Settlor and beneficiaries in
Reporting Jurisdiction A
Reporting Jurisdiction
Investment Company B -
RFI
Reporting Jurisdiction
Investment Company A -
NFE
Bank Account

11.1 In the above example, the Bank will obtain AML information about Company A.

Company A is an NFE in a jurisdiction that has implemented the CRS. Company A is owned by Company B. Company B is an RFI in a jurisdiction that has implemented the CRS. Company B is owned by a trust of which a corporate RFI is trustee.

(a) The Bank will want to identify Controlling Persons for Company A. Under current guidance, it is unclear who the Controlling Persons of Company A are.

(b) As a threshold matter, because Company A is owned by a Reporting FI in a Participating Jurisdiction, it is not entirely clear whether Company A should (as a policy matter) be required to identify its Controlling Persons, because Company B and the trust will have to identify their Account Holders and report them, if they are reportable.

(c) Assuming that Company A is required to identify its Controlling Persons, it is unclear whether any individual would hold a controlling interest by ownership. Arguably, each Controlling Person of the trust may be treated as a

Controlling Person of Company A. Alternatively, the senior managing official of Company A might be seen as the Controlling Person.

11.2 Company B will need to identify its Account Holders. In this example, its Account Holder is the trust, which is not a Reportable Person because it is an RFI.

Company B therefore has nothing to report.

11.3 The trustee will identify the Account Holders of the trust. This will include in the example in Figure 1: the settlor, any mandatory beneficiaries, and any discretionary beneficiaries who have received distributions. The trustee will report the full value of the trust assets in relation to the settlor and any mandatory beneficiaries, and the amounts distributed to any mandatory and discretionary beneficiaries.

11.4 Note: As pointed out above, there is no advantage in the Bank having to look through Company A, Company B, and the trust to the Controlling Persons of the trust. If the Bank is required to look through the trust, the Bank would disclose the value of the account by reference to the settlor and all of the beneficiaries, whether or not they have received a distribution. It should be noted that, under the US FATCA regulations, it is not necessary to look through Financial Institutions (such as the trust in this example). We understand that the OECD is still considering further guidance on the reporting of Controlling Persons in an ownership chain of entities.

130.16 Financial Asset

The term "Financial Asset" is used in many places, in particular, the definitions of:

(1) Investment Entity
(2) Custodial Institution
(3) Custodial Account
(4) Excluded Account

130.16.1 *Categories of Financial Asset*

Section VIII (A)(7) CRS identifies 7 categories of Financial Asset. The first 6 are:

> 7. The term "**Financial Asset**" includes
> [a] a security (for example,
> [i] a share of stock in a corporation;
> [ii] partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust;

> [iii] note, bond, debenture, or other evidence of indebtedness),
>
> [b] partnership interest,
>
> [c] commodity,
>
> [d] swap (for example,
>
> [i] interest rate swaps,
>
> [ii] currency swaps,
>
> [iii] basis swaps,
>
> [iv] interest rate caps,
>
> [v] interest rate floors,
>
> [vi] commodity swaps,
>
> [vii] equity swaps,
>
> [viii] equity index swaps,
>
> [ix] and similar agreements),
>
> [e] Insurance Contract or
>
> [f] Annuity Contract

The last category is an interest in any of the above. Section VIII (A)(7) CRS provides:

> 7. The term "**Financial Asset**" includes ...
>
> [g] any interest (including a futures or forward contract or option) in
>
> [i] a security,[32]
>
> [ii] partnership interest,
>
> [iii] commodity,
>
> [iv] swap,
>
> [v] Insurance Contract, or
>
> [vi] Annuity Contract.

This is an inclusive definition so other Financial Assets may be included. OECD Commentary on Section VIII CRS provides:

> 23. ...While ["Financial Asset"] does not refer to assets of every kind, it intends to encompass any assets that may be held in an account maintained by a Financial Institution with the exception of a non-debt, direct interest in real property.
>
> 24. ... the term "Financial Asset" does not include a non-debt, direct interest in real property; or a commodity that is a physical good, such as wheat.
>
> 25. Negotiable debt instruments that are traded on a regulated market

[32] The 2023 CRS Amendments will add "Relevant Crypto-Asset,".

> or over-the-counter market and distributed and held through Financial Institutions, and shares or units in a real estate investment trust, would generally be considered Financial Assets.[33]

130.16.2 *Land not Financial Asset*

Section VIII (A)(7) CRS provides:

> The term "Financial Asset" does not include a non-debt, direct interest in real property.

An underlying company is not transparent, so it may convert a non-Financial Asset (eg, land) into a Financial Asset (shares). OECD FAQ provides:

> [1] An Entity the gross income of which is primarily attributable to investing, reinvesting, or trading real property is not an Investment Entity (irrespective of whether it is professionally managed) because real property is not a Financial Asset...
> [2] If, instead, an Entity is holding an interest in another Entity that directly holds real property, the interest held by the first-mentioned Entity is a Financial Asset, and the gross income derived from that interest is to be taken into account to determine whether the Entity will meet the definition of Investment Entity under Section VIII, subparagraph (A)(6)(a)(iii) [Fund-manager IE] or paragraph (A)(6)(b) [Fund-managed IE].

130.17 Financial Account

Section VIII (C)(1) CRS provides the definition. There are six or so categories of Financial Account:

> 1. The term **"Financial Account"** means an account maintained by a Financial Institution, and includes a Depository Account, a Custodial Account and:
>
> a) [i] in the case of an Investment Entity other than an Investment Entity that is a Financial Institution solely because it manages an Investment Entity described in subparagraph A(6)(b) [Fund-managed IE],
> [ii] any equity or debt interest in the Financial Institution;

[33] The text will be updated by the 2023 CRS Amendments when they take effect to continue to read: "In each case, the determination of whether an asset is a Financial Asset is independent from the form in which such asset is issued. Therefore, an asset issued in the form of a Crypto-Asset may simultaneously be a Financial Asset."

b) [i] in the case of a Financial Institution not described in subparagraph C(1)(a),

[ii] any equity or debt interest in the Financial Institution, if the class of interests was established with a purpose of avoiding reporting in accordance with Section I; and

c) any Cash Value Insurance Contract and any Annuity Contract issued or maintained by a Financial Institution, other than a noninvestment-linked, non-transferable immediate life annuity that is issued to an individual and monetizes a pension or disability benefit provided under an account that is an Excluded Account.

The term "Financial Account" does not include any account that is an Excluded Account.

130.17.1 *Depository Account*

A Depository Account is a Financial Account.

Section VIII (C)(2) CRS provides:

> 2. The term **"Depository Account"** includes any commercial, checking, savings, time, or thrift account, or an account that is evidenced by a certificate of deposit, thrift certificate, investment certificate, certificate of indebtedness, or other similar instrument maintained by a Financial Institution in the ordinary course of a banking or similar business. A Depository Account also includes an amount held by an insurance company pursuant to a guaranteed investment contract or similar agreement to pay or credit interest thereon.[34]

130.17.2 *Custodial Account*

A Custodial Account is a Financial Account.

Section VIII (C)(3) CRS provides:

> 3. The term **"Custodial Account"** means an account (other than an Insurance Contract or Annuity Contract) for the benefit of another person that holds one or more Financial Assets.

[34] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... or other similar instrument maintained by a Depository Institution. A Depository Account also includes: a) an amount held by an insurance company pursuant to a guaranteed investment contract or similar agreement to pay or credit interest therein; b) an account or notional account that represents all Specified Electronic Money Products held for the benefit of a customer; and c) an account that holds one or more Central Bank Digital Currencies for the benefit of a customer."

130.17.3 *Equity Interest: Partnership*

Section VIII (C)(4) CRS provides:

> 4. The term **"Equity Interest"** means,
> [a] in the case of a partnership that is a Financial Institution, either a capital or profits interest in the partnership.

130.17.4 *Equity Interest: Trust*

Section VIII (C)(4) CRS provides:

> 4. The term **"Equity Interest"** means ...
> [b] In the case of a trust that is a Financial Institution, an Equity Interest is considered to be held by
> [i] any person treated as a settlor or beneficiary of all or a portion of the trust, or
> [ii] any other natural person exercising ultimate effective control over the trust.

This is an artificial definition, as even a settlor who is excluded has an Equity Interest.

It is considered that "any person *treated as* a settlor" just means any person who is a settlor.[35] In other words, the words "treated as" do not add much (if anything) to the meaning, but they do indicate that the word settlor is not to be understood strictly, ie it includes an economic settlor as well as a nominal settlor.

STEP CRS guidance provides:

> **1.8 settlors who cannot be beneficiaries of trust**
> There are many cases in which settlors will have established trusts from which they are formally and completely excluded as beneficiaries at inception (or subsequently). HMRC are of the view that in these circumstances the settlor's equity interest (if the trust is a Reporting Financial Institution) should be reported as the full value of the trust assets and cannot be regarded as having a zero value. STEP has pointed out it will be helpful in future to be able to add information that the individual has been permanently excluded in order to avoid unnecessary enquiries by the settlor's home tax authority.

130.17.5 *Pre-existing account*

Section VIII (C)(9) CRS provides a commonsense definition:

[35] See App 8.4 (Deemed/treated misused).

> 9. The term “Pre-existing Account” means a Financial Account maintained by a Reporting Financial Institution as of [xx/xx/ xxxx].[36]

130.17.6 *“Account Holder”*

Section VIII (E)(1) CRS provides

> 1. [a] The term “Account Holder” means the person listed or identified as the holder of a Financial Account by the Financial Institution that maintains the account.
>
> [b] A person, other than a Financial Institution, holding a Financial Account for the benefit or account of another person as agent, custodian, nominee, signatory, investment advisor, or intermediary, is not treated as holding the account for purposes of the Common Reporting Standard, and such other person is treated as holding the account.
>
> [c] In the case of a Cash Value Insurance Contract or an Annuity Contract, the Account Holder is any person entitled to access the Cash Value or change the beneficiary of the contract. If no person can access the Cash Value or change the beneficiary, the Account Holder is any person named as the owner in the contract and any person with a vested entitlement to payment under the terms of the contract. Upon the maturity of a Cash Value Insurance Contract or an Annuity Contract, each person entitled to receive a payment under the contract is treated as an Account Holder.

130.18 “Beneficiary”

Section VIII (C)(4) CRS provides a commonsense definition:

> 4. ... A Reportable Person will be treated as being a beneficiary of a trust if such Reportable Person
>
> [a] has the right to receive directly or indirectly (for example, through a nominee) a mandatory distribution or
>
> [b] may receive, directly or indirectly, a discretionary distribution from the trust.

OECD CRS commentary provides:

[36] The text will be updated by the 2023 CRS Amendments when they take effect to continue: “or, if the account is treated as a Financial Account solely by virtue of the amendments to the Common Reporting Standard, as of [effective date of the revised CRS-1 day].”

> For these purposes, a beneficiary who may receive a discretionary distribution from the trust only will be treated as a beneficiary of a trust if such person receives a distribution in the calendar year or other appropriate reporting period (i.e. either the distribution has been paid or made payable).[37]

STEP CRS guidance refers to this and continues:[38]

> Note that this limitation is contained in the Commentary and not the Standard itself, which has a wider definition of beneficiary. Although jurisdictions implementing the Standard are encouraged to follow the Commentary when applying and interpreting the relevant domestic law provisions, jurisdictions may not do so, so the local law must always be considered.

130.18.1 *"Distribution"*

This term is used in the definition of "beneficiary". It is not defined. STEP CRS guidance provides:

> 12.1 There is guidance in the context of the UK IGAs (in the Jersey notes) that states that a payment to a beneficiary by way of loan is not a distribution in the year the loan is made, but only when it is written off...[39]

[37] p.178 para 70.

[39] The reference is to Taxation (International Tax Compliance) (Jersey) Regulations 2014 Guidance Notes (2016) p.58 *https://www.gov.je/SiteCollectionDocuments/Tax%20and%20your%20money/ID%20IGA%20Guidance%20Notes%2020160520%20jc3.pdf*
The relevant passage provides:

> "Where a loan has been made to a settlor or beneficiary, the outstanding loan is considered a debt due to the trustees for the benefit of the trust.
> The debt due is an asset of the trust, and no distribution arises. If and when the loan is written off, then there is a distribution of that amount (written off) to the debtor, which should be reported.
> For example:
> - Trustee A (as Trustee of The 1 Trust) makes a loan to Mr B (who is a beneficiary of The 1 Trust) of £500,000 on 1 January 2016
> - The terms of the loan are that the sum of £500,000 is repayable to Trustee A on demand

> 12.2 A loan that is on commercial terms (i.e. a loan that is not on beneficial terms) should not be treated as a distribution.
> 12.3 HMRC have been asked to consider whether an interest-free loan or a loan made on other than commercial terms (e.g. in circumstances where a beneficiary, if UK resident, would be treated as receiving a capital benefit from the trust for the purposes of Section 87 TCGA 1992) would be disclosable as a distribution in the year it is made or the year it is written off (but not the years when the loan remains outstanding).

130.18.2 *Arrangement similar to trust*

OECD CRS commentary continues:

> The same is applicable with respect to the treatment of a Reportable Person as a beneficiary of a legal arrangement that is equivalent or similar to a trust, or foundation.[40]

STEP CRS guidance (2006) provides:

> In paragraph 196 there is reference to 'other similar legal arrangements'. It would be helpful to understand what is meant by this. It is not uncommon to set up partnerships as a vehicle for holding family wealth. For example: a grandfather contributes to a partnership for the primary benefit of his grandchildren. His son is appointed as general partner and controls the allocation of income and capital among the limited partners. The grandfather is not a controlling person, but if this were a trust (which is not the case) he would be. Is there any intention to treat a family partnership such as this 'legal arrangement' similar to a trust?
> The OECD Secretariat confirmed that in the example given the partnership would be treated as a partnership and not a 'legal arrangement' similar to a trust.

130.19 Reportable Account

"Reportable Account" matters, because, as its name suggests, it will be

- Mr B does repay £100,000 of the loan during the calendar year 2017
- On 30 June 2018 Trustee A decides that the balance of the loan (£400,000) will be written off
- For the purposes of reporting under the IGAs, Trustee A will make a report, relating to the calendar year 2018, detailing the distribution to Mr B of £400,000 during the calendar year 2018."

[40] p.178 para 70.

reported.

Section VIII (D)(1) CRS provides:

> 1. The term “**Reportable Account**” means an account held by
>
> [a] one or more Reportable Persons or
>
> [b] [i] by a Passive NFE with one or more Controlling Persons that is a Reportable Person,
>
> [ii] provided it has been identified as such pursuant to the due diligence procedures described in Sections II through VII.

130.20 Reportable Person

“Reportable Person” matters because the term is used in the definition of Reportable Account. As the name suggests, the details of Reportable Persons, and of a Passive NFE controlled by such persons, will be reported.

Section VIII (D)(2) CRS provides:

> 2. The term “Reportable Person” means a Reportable Jurisdiction Person other than:

There follow a list of 6 exceptions:

> (i) a corporation the stock of which is regularly traded on one or more established securities markets;
>
> (ii) any corporation that is a Related Entity of a corporation described in clause (i); [41]
>
> (iii) a Governmental Entity;
>
> (iv) an International Organisation;
>
> (v) a Central Bank; or
>
> (vi) a Financial Institution.

130.21 Reportable/Participating Jurisdictions

Section VIII (D)(4) CRS	**Section VIII (D)(5) CRS**
4. The term “Reportable Jurisdiction” means a jurisdiction	5. The term “Participating Jurisdiction” means a jurisdiction
(i) with which an agreement is in place pursuant to which there is an	(i) with which an agreement is in place pursuant to which it will

[41] The text will be updated by the 2023 CRS Amendments when they take effect to read “Entity” instead of “corporation” in (i) and (ii).

obligation in place to provide the information specified in Section I, and	provide the information specified in Section I, and
(ii) which is identified in a published list.	(ii) which is identified in a published list.

OECD keep a list with links to local legislation and guidance.[42] IEIM402340 has a list of Reportable Jurisdictions and IEIM400090 has a list of Participating Jurisdictions.

130.22 Reportable Jurisdiction Person

Section VIII (D)(3) CRS provides:

> 3. The term "Reportable Jurisdiction Person" means
>
> [a] an individual or Entity that is resident in a Reportable Jurisdiction under the tax laws of such jurisdiction, or
>
> [b] an estate of a decedent that was a resident of a Reportable Jurisdiction.

Para (3) goes on to define residence of partnerships:

> For this purpose, an Entity such as a partnership, limited liability partnership or similar legal arrangement that has no residence for tax purposes shall be treated as resident in the jurisdiction in which its place of effective management is situated.

STEP CRS guidance (2016) discusses dual resident trusts:

> We note the guidance about trusts being resident where the trustee is resident. We note that, in the case of corporate trustees (including both PTCs and regulated trust companies), the corporate trustee might well be incorporated and licensed in Jurisdiction A, but effectively managed and tax resident in Jurisdiction B. If one refers to Paragraph 97 in the context of guidance on the tax residence of entities, we consider that it would be correct to treat the trusts in these cases as essentially resident in both jurisdictions A and B with the necessary dual reporting. Is it possible in these circumstances for the trustee to rely on Paragraph 211 and only report in one of Jurisdictions A and B assuming both are Reporting Jurisdictions?

[42] *https://www.oecd.org/tax/automatic-exchange/crs-implementation-and-assistance/crs-by-jurisdiction*

We note that this is permitted, for example, under the IGA between the Cayman Islands and the United Kingdom.
The OECD Secretariat confirmed that reporting would be required in both jurisdictions. The accommodation provided in paragraph 211 would only apply where the trust itself is treated as a separate tax resident person in a jurisdiction, and undertakes the required reporting. This is likely to be of limited application. However the option to allow the use of service providers may provide similar relief.

130.23 Controlling person

Section VIII (D)(6) CRS begins with a commonsense definition:

> [a] The term "Controlling Persons" means the natural persons who exercise control over an Entity.

CRS then extends this so it becomes an artificial definition:

> [b] In the case of a trust, such term means[43]
> [i] the settlor,
> [ii] the trustees,
> [iii] the protector (if any),
> [iv] the beneficiaries or class of beneficiaries, and
> [v] any other natural person exercising ultimate effective control over the trust, and
> [c] in the case of a legal arrangement other than a trust, such term means persons in equivalent or similar positions.

It follows that "Controlling Person" is not a wholly apt label for this concept. One should not carp. It is a better term than "beneficial owner".[44] But it merits initial capitals, to reflect the technical nature of the expression.

OECD CRS commentary provides:

> In addition, any other natural person(s) exercising ultimate effective control over the trust (including through a chain of control or ownership) must also be treated as a Controlling Person of the trust.

[43] The word "includes" would be more apt. OECD CRS commentary provides: "The settlor(s), the trustee(s), the protector(s) (if any), and the beneficiary(ies) or class(es) of beneficiaries, must always be treated as Controlling Persons of a trust, regardless of whether or not any of them exercises control over the trust. It is for this reason that the second sentence of subparagraph D(6) supplements the first sentence of such subparagraph."

[44] See 131.15 (Beneficial Owner: MLR meaning).

> With a view to establishing the source of funds in the account(s) held by the trust, where the settlor(s) of a trust is an Entity, Reporting Financial Institutions must also identify the Controlling Person(s) of the settlor(s) and report them as Controlling Person(s) of the trust.

130.23.1 *FATF Recommendations*

Section VIII (D)(6) CRS provides:

> [d] The term "Controlling Persons" must be interpreted in a manner consistent with the Financial Action Task Force Recommendations.[45]

OECD CRS commentary provides:

> 132. Subparagraph D(6) sets forth the definition of the term "Controlling Persons". This term
> [1] corresponds to the term "beneficial owner" as described in Recommendation 10 and the Interpretative Note on Recommendation 10 of the [FATF Recommendations] and
> [2] must be interpreted in a manner consistent with such Recommendations,
> with the aim of protecting the international financial system from misuse including with respect to tax crimes.

130.23.2 *Settlor*

FATF Recommendations, which, as noted above, is relevant to CRS, provides a definition in its General Glossary:

> *Settlors* are natural or legal persons who transfer ownership of their assets to trustees by means of a trust deed or similar arrangement.

For nominal settlors, see 99.5 (Nominal settlor).

130.23.3 *Joint settlors*

STEP CRS guidance provides:[46]

> ... an alternative scenario where (C) and (D) are joint settlors. For example, it may not be uncommon for a husband and wife to make a

[45] See 130.2.3 (FATF recommendations).

[46] CRS and Trusts (2017) para 1.4 *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

> transfer of assets to a trust for their children and wider family. If, in these circumstances, C and D contribute assets to the trust from assets that they hold jointly, then it would be fair to regard both parties as 'joint' settlors for CRS purposes.[47]
>
> HMRC confirmed that in this case they consider that both C and D would be disclosed as settlors and that the full value of the trust assets should be reported with respect to both C and D, notwithstanding the fact that each had added only a proportion of the trust assets.
>
> In circumstances where an entity is jointly owned by two or more persons it is necessary to identify all of the relevant Controlling Persons as settlors or as 'any other natural person exercising effective ultimate control' for CRS purposes.

130.23.4 *Co settlor: change of owner*

STEP CRS guidance provides:[48]

> **1.5 Example 4: settlors who are entities**
>
> We note the guidance set out at paragraph 134 of the Commentary in the context of settlors who are entities.[49] In most cases, the ownership of an entity that acts as a settlor will remain with the same individual. It is however possible that during the lifetime of that individual, ownership of the entity that served as the settlor could change. In these circumstances, it is necessary to consider the Controlling Person of the entity at the time it contributes assets to the trust in order to determine who should be regarded as the settlor for CRS purposes. HMRC are of the view that it is also necessary to identify the Controlling Persons of the entity during each relevant year with respect to which the report is made. This is viewed as important on the basis that the entity may still have some continuing role with respect to the trust, e.g. powers of the trust assets or a power of revocation. In this case, however, the Controlling Persons with respect to the entity could be disclosed within the category of 'any other natural person exercising effective ultimate control'.

[47] But see 94.4 (Trust from joint account: Who is settlor).

[48] CRS and Trusts (2017) 1.4 *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

[49] This passage provides: "With a view to establishing the source of funds in the account(s) held by the trust, where the settlor(s) of a trust is an Entity, Reporting Financial Institutions must also identify the Controlling Person(s) of the settlor(s) and report them as Controlling Person(s) of the trust."

130.23.5 *Sub-funds*

STEP CRS guidance provides:[50]

> 2.1 Example 8:
> A establishes a trust for the benefit of A's three children X, Y and Z on discretionary trust. The trust is irrevocable and A is excluded from benefit. At the time of creation of the trust, X, Y and Z are teenage children and the trust is administered for them in undivided shares.
> Some years later, X, Y and Z are now adults and the trustees take a decision to appoint specific assets to separate subfunds (i) one for the benefit of X and his children; (ii) one for the benefit of Y and his children; (iii) one for the benefit of Z and his children; and (iv) the remaining fund being held for the benefit of all of X, Y and Z and their children.
> In these circumstances, for CRS purposes there could be one composite trust or there could be four, depending on the facts and circumstances as to how the trusts are administered.
> (a) If the trustee (or trustees) administers the sub-funds as one trust, any CRS reporting should be on the basis that it is one composite trust, notwithstanding the fact that separate sub-funds have been set up.
> (b) If the trustee (or trustees) administers some or all of the sub-funds as separate trusts, any CRS reporting should be on the basis that those subfunds are separate trusts.
> 2.2 Trustees could be regarded as treating the sub-funds as separate trusts where, for example (and this is not an exhaustive list),
> [a] a replacement or additional trustee is appointed in relation one sub-fund but not all;
> [b] different protectors are appointed in relation to each sub-fund;
> [c] there is no cross-over of beneficiaries in each sub-fund;
> [d] the trustees treat the sub-funds as separate trusts for tax purposes [ie the trustees make a sub-fund election].
> HMRC's position is that the identification of sub-funds as one trust or separate trusts should follow the facts in each case and should be reported as separate trusts only where the facts demonstrate that separate trusts have been created.

It is considered that the normal sub-fund/separate trust distinction should

[50] CRS and Trusts (2017) 2.1, 2.2 *https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf*

be applied.[51] HMRC's comment in the last paragraph seems consistent with that view.

130.23.6 *Beneficiaries*

OECD CRS commentary provides:

> For beneficiary(ies) of trusts that are designated by characteristics or by class, Reporting Financial Institutions should obtain sufficient information concerning the beneficiary(ies) to satisfy the Reporting Financial Institution that it will be able to establish the identity of the beneficiary(ies) at the time of the pay-out or when the beneficiary(ies) intends to exercise vested rights. Therefore, that occasion will constitute a change in circumstances and will trigger the relevant procedures.
>
> When implementing the Common Reporting Standard, a jurisdiction may allow Reporting Financial Institutions to align the scope of the beneficiary(ies) of a trust treated as Controlling Person(s) of the trust with the scope of the beneficiary(ies) of a trust treated as Reportable Persons of a trust that is a Financial Institution (see paragraphs 69-70 above).[52]

OECD CRS FAQ provides:

> **6. Intermittent distributions to discretionary beneficiaries of a trust that is a Reporting Financial Institution**
>
> In the case of a trust that is a Financial Institution, an Equity Interest is considered to be held by any person treated as the settlor or beneficiary of all or a portion of the trust. For these purposes, a beneficiary who may receive a discretionary distribution from the trust only will be treated as a beneficiary of the trust if such person receives a distribution in the calendar year or other appropriate reporting period (see Section VIII (C)(4) and related commentary). If a discretionary beneficiary of a trust that is a Financial Institution receives a distribution from the trust in a given year, but not in a following year, should the absence of a distribution in such following year be treated as an account closure?
>
> No, the absence of a distribution does not constitute an account closure, as long as the beneficiary is not permanently excluded from receiving future distributions from the trust.

[51] For the distinction between (1) separate trusts and (2) sub-funds of one trust, see 99.22.2 (Variation or resettlement?).

[52] Commentary on Section VIII, para 134.

STEP CRS guidance provides:

> There is no need to report the death of a discretionary beneficiary as an 'account closed' matter as distinct from circumstances in which the beneficiary is formally excluded as a beneficiary during lifetime.
>
> Further, in circumstances where a trust is wound up because all of the assets are appointed for the benefit of one of the discretionary beneficiaries, it is not then expected that all beneficiaries who have previously received distributions in prior years (who can no longer benefit from the trust assets) would be referenced in the year of the distribution of the trust fund to another beneficiary.
>
> **4.2 Identifying the class of discretionary beneficiaries for the purposes of reporting**
>
> There are a number of cases where it is necessary under CRS to identify discretionary beneficiaries who may not have received a distribution in a particular accounting year. This is specifically the case in circumstances where the trust is a passive NFE where the relevant jurisdiction has not permitted the option of allowing FIs to identify discretionary beneficiaries as Controlling Persons only when they receive a distribution. In order to make the reporting of discretionary beneficiaries sensible and manageable, it would seem sensible that a discretionary beneficiary should only be treated as a Controlling Person where the discretionary beneficiary concerned is eligible to receive a distribution in the year concerned. We set out below some common scenarios below. In many cases these contingent or default beneficiaries may be totally unaware of the fact that they are named as beneficiaries in such a trust. HMRC's view is that where a trust is a passive NFE, it is a requirement of the EU Directive that all beneficiaries be identified as Controlling Persons, including named discretionary beneficiaries, regardless of any contingencies under which they might receive a benefit. In STEP's view, consideration should be given to the specific terms of the trust to determine whether any named individual can be regarded as a beneficiary of the trust in the relevant year.
>
> **Beneficiaries include individuals X and Y and their children and remoter issue.**
>
> The children and remoter issue are identified by reference to a class and not named individually and no distributions are made to them during the year. In this case it is only necessary to identify X and Y. Current, contingent or default beneficiaries who are only described by reference to a class and are not named and have not received distributions do not need to be identified as Controlling Persons.

5. Beneficiaries receiving mandatory distributions

5.1 This category of beneficiary may, if the income interest has been provided for the duration of their lifetime, be known as having a ‘life interest’ or ‘fixed interest’ in the trust income. It will be necessary to consider carefully the terms of the trust instrument to form a judgement as to whether an unqualified right to receive trust income does exist as opposed to one that is dependent upon the exercise of a trustee’s discretion.

5.2 The Implementation Handbook makes reference to values being reported by a Reporting Financial Institution in the context of mandatory beneficiaries.

5.3 The Implementation Handbook states (at paragraph 220) in relation to trusts that are RFIs: ‘The account balance is the value calculated by the Reporting Financial Institution (the trust) for the purpose that requires the most frequent determination of value. For...mandatory beneficiaries, for example, this may be the value that is used for reporting to the Account Holder on the investment results for a given period. If the Financial Institution has not otherwise recalculated the balance or value for other reasons, the account balance for…mandatory beneficiaries may be the value of the interest upon acquisition or the total value of all trust property’.

5.4 For trusts that are passive NFEs, the Implementation Handbook states (at paragraph 236) that ‘The financial information to be reported will be the account balance or value of the account held by the trust and payments made or credited to such account. Each Controlling Person is attributed the entire value of the account, as well as the entire amounts paid or credited to the account, as shown below in Table 8.’

5.5 It is understood that if there is a class of one or more beneficiaries who are:

(a) entitled to part of the income of a common trust fund; or

(b) entitled to all the income of a separate sub-fund

then any reporting that needs to be made by reference to the mandatory beneficiary should be based on the relevant sub-fund or proportion of common fund that the beneficiary has an income interest in. HMRC’s position is that the identification of sub-funds as one trust or separate trusts should follow the facts in each case and should be reported as separate sub-funds only where the facts demonstrate that separate sub-funds have been created.

5.6 **Beneficiary A has a right to receive all the income from Trust A.** In this case A is reported as having a mandatory interest in the whole of Trust A.

5.7 **Beneficiary A has a right to receive X% of the income from the trust and B has the right to receive Y% of the income from the trust and the trustee reports to them on this basis.**

(a) If the trust is an RFI, A is reported as having a mandatory interest in X% of the value of the trust assets and B is reported as having a mandatory interest in Y% of the value of the trust assets.

(b) If the trust is a passive NFE, the full value of the trust assets are reported with respect to both A and B.

5.8 **A is treated as the grantor of Trust X for US tax purposes.**
A has a power of revocation (or equivalent) over the assets of Trust X. The income of Trust X is payable to, or on the order or direction of, A. A may direct the trustees to distribute the income to him or to other persons. No distributions are made to A or any other person. In this case, A is not reported as having a mandatory interest in the assets of Trust X as there is no mandatory obligation to distribute income to him (although he will be reported as the settlor and may be reportable as a person who has the power to exercise effective control over the trust).

130.23.7 *Protector*

"Protector" matters as a protector is a Controlling Person.
STEP CRS guidance provides:

> 6.3 In the drafting of the CRS framework surrounding trusts, protectors are dealt with very differently if one compares the situation of a trustee who acts as an RFI compared with a situation where the trustee is a passive NFE.
>
> 6.4 In the former case, the CRS framework provides for reporting in the context of trustees who are RFIs to be made of persons who are treated as having an 'equity interest' in the trust fund. In this context, Section VIII.C.4 of the Standard states that an equity interest is held 'by any person treated as a settlor or a beneficiary of all or a portion of the trust or any other natural person exercising ultimate effective control over the trust'.
>
> 6.5 By contrast, in relation to a trust that is a passive NFE, it is necessary to identify Controlling Persons in relation to the trust. In the Standard, Section VIII D(6) defines 'Controlling Person' on the basis that the expression is intended to correspond to the term 'beneficial owner' as described in Recommendation 10 and the interpretative note on Recommendation 10 of [FATF Recommendations][53]. In the case of

[53] See 130.2.3 (FATF recommendations).

a trust, Controlling Persons means 'settlor, the trustees, the protector (if any) 1 the beneficiary or class of beneficiaries and any other natural person exercising ultimate effective control over the trust'.

6.6 We note that in its FAQ issued in June 2016, OECD takes the position that where a trust is a Reporting Financial Institution, a protector 'must be treated as an account holder irrespective of whether it has effective control over the trust'. This response does not address the clear distinction in the Standard itself between the holders of equity interests in a trust that is an RFI (see paragraph 6.4 above – which only includes protectors if they actually exercise ultimate effective control), when contrasted with the Controlling Persons definition of a trust that is a passive NFE (see paragraph 6.5 above which includes protectors regardless of the powers they hold). In this context, we note that the OECD's guidance does not constitute a legally binding interpretation of the Standard and that the RFIs should seek their own legal counsel before determining their formal reporting position, given that the legal basis for the position taken by OECD is unclear to us. We note that the OECD Secretariat has confirmed that it is the intention that protectors of trusts that are RFIs should be reported and the FAQ was discussed and approved in the relevant Working Party of the OECD. Until the legal basis for this is made clear in the CRS treaty, it is considered that there is a reasonable basis for forming the opposite conclusion.

STEP CRS guidance (2016) provides:

a. In some cases, there will be corporate protectors appointed with respect to a trust where an RFI is the trustee. If these corporate protectors have sufficiently wide powers, such that they would be potentially be regarded as Reportable Persons with respect to the trust if they were individuals (see comments in section 8 above on NPEECs), will it then be necessary to identify the distinct Controlling Persons of the corporate protector?

b. It is not uncommon for corporate protectors to be appointed who are regulated trustee service providers in their 'home' jurisdiction. Is it going to be necessary to perform an analysis on the Controlling Persons of such Entities (which is meaningless in tax reporting terms1), or would they not be regarded as Reportable Persons either because they are in effect Reporting Financial Institutions by analogy to the classification set out at paragraph 99 of the Handbook or because they are active NFEs?

In the OECD Secretariat's view it would be necessary to identify Controlling Persons in these circumstances. There was a discussion about certain types of structure where this could give rise to a problem,

> e.g. a corporate protector administered by a law firm which is owned by discretionary trusts established by the partners of that law firm. Following OECD Secretariat guidance would mean that Controlling Persons in relation to those discretionary trusts would also need to be disclosed even though they have no beneficial interest or control in the underlying trust of which the corporate protector acts as trustee. However, as noted in question 4, where the Reporting Financial Institution has information on the type of Controlling Person (such as being a protector), this must be included in the report. Doing so will enable the tax administration receiving the information to[54] make appropriate use of the information in tax compliance actions.

130.24 Change of controlling persons

130.24.1 *Discretionary beneficiaries*

STEP TRS guidance provides:

> 4.1 **Excluding discretionary beneficiaries from a trust**
> The answer to FAQ 6 in Section 1 of the June 2016 publication addresses the question of intermittent distributions to discretionary beneficiaries of a trust that is an RFI. It notes in particular that if discretionary beneficiary receives a distribution in a particular year but not in subsequent years, the absence of a distribution should not be treated in effect as an account closure 'as long as the beneficiary is not permanently excluded from receiving future distributions from the trust'.
> There is no need to report the death of a discretionary beneficiary as an 'account closed' matter as distinct from circumstances in which the beneficiary is formally excluded as a beneficiary during lifetime.
> Further, in circumstances where a trust is wound up because all of the assets are appointed for the benefit of one of the discretionary beneficiaries, it is not then expected that all beneficiaries who have previously received distributions in prior years (who can no longer benefit from the trust assets) would be referenced in the year of the distribution of the trust fund to another beneficiary.

[54] [Footnote original] To give an example, we are aware of a corporate protector controlled by the partners of a Bermuda law firm which is owned by trusts set up for the benefit of their families. If it is necessary to provide information about the Controlling Persons relating to the Protector it may be necessary to provide information about Controlling Persons in relation to these trusts. This information is totally meaningless in tax terms for determining who has a financial interest in the Trust of which the corporate protector acts as protector.

4.2 Identifying the class of discretionary beneficiaries for the purposes of reporting

There are a number of cases where it is necessary under CRS to identify discretionary beneficiaries who may not have received a distribution in a particular accounting year. This is specifically the case in circumstances where the trust is a passive NFE where the relevant jurisdiction has not permitted the option of allowing FIs to identify discretionary beneficiaries as Controlling Persons only when they receive a distribution. In order to make the reporting of discretionary beneficiaries sensible and manageable, it would seem sensible that a discretionary beneficiary should only be treated as a Controlling Person where the discretionary beneficiary concerned is eligible to receive a distribution in the year concerned. We set out below some common scenarios below. In many cases these contingent or default beneficiaries may be totally unaware of the fact that they are named as beneficiaries in such a trust.

HMRC's view is that where a trust is a passive NFE, it is a requirement of the EU Directive that all beneficiaries be identified as Controlling Persons, including named discretionary beneficiaries, regardless of any contingencies under which they might receive a benefit. In STEP's view, consideration should be given to the specific terms of the trust to determine whether any named individual can be regarded as a beneficiary of the trust in the relevant year.

(a) **Example 9**: Beneficiaries include individuals X and Y and their children and remoter issue. The children and remoter issue are identified by reference to a class and not named individually and no distributions are made to them during the year. In this case it is only necessary to identify X and Y. Current, contingent or default beneficiaries who are only described by reference to a class and are not named and have not received distributions do not need to be identified as Controlling Persons.

130.24.2 *Deceased settlor*

STEP CRS guidance provides:

Example 5: dead settlors – there is no express guidance on the position where a person regarded as the settlor of a trust for CRS is deceased. We understand if one considers both paragraph 222 and table 7 in the Implementation Handbook and one of the responses to the FAQs issued in June 2016 (at page 2 on reporting requirements in year of closure of a trust account), that one should reference the 'fact of closure'. We consider it is correct to say by analogy that in the year in which a settlor dies, his equity interest in relation to the trust will be

> regarded as having ‘closed’. Logically, in subsequent years, a dead settlor will have no equity interest that is capable of being reported and equally cannot be a Controlling Person of a trust. This position is understood to be accepted by HMRC.

STEP CRS guidance provides:

> 13.1 Table 7 in the Handbook implies that if the equity interest comes to an end in a CRS Reporting Year, no information needs to be given by the trustee about the prior payments to a beneficiary. This could arise because
> (a) a beneficiary is excluded (see FAQs on discretionary beneficiary);
> (b) a settlor dies;
> (c) a protector resigns (if the protector is reportable);
> (d) a trustee retires; or
> (e) the trust is wound up completely.
> 13.2 In this event, HMRC confirmed that they consider it is necessary also to report all other relevant activity during the calendar year.

130.25 Inter-trust transfer

STEP CRS guidance provides:

> 14.1 Normally a transfer from one trust to another is not reportable because there is no distribution to a beneficiary of the trust where the trustee is exercising an express power or overriding power of appointment to make a trust to trust transfer.
> 14.2 The same considerations should apply where the recipient trust is a charitable trust.
> 14.3 However, HMRC note that a distribution to an entity recipient will result in the recipient entity being regarded as a beneficiary of the trust, so due diligence should be carried out by an RFI to identify whether the entity is a reportable person.
> 14.4 Whether a recipient is an entity or a natural person will be relevant where the recipient is a beneficiary of a trust that is a passive NFE and the RFI is identifying Controlling Persons. The entity is still identified and due diligence carried out on the entity, but additionally the RFI must establish and carry out due diligence on the Controlling Persons of that entity. The only difference would come where the beneficiary is a charity, because the charity would usually be an active NFE, where not an RFI in its own right.

130.26 Controlling person: Non-trusts

CRS guidance provides:

> 133. For an Entity that is a legal person, the term “Controlling Persons” means the natural person(s) who exercises control over the Entity. “Control” over an Entity is generally exercised by the natural person(s) who ultimately has a controlling ownership interest in the Entity. A “control ownership interest” depends on the ownership structure of the legal person and is usually identified on the basis of a threshold applying a risk-based approach (e.g. any person(s) owning more than a certain percentage of the legal person, such as 25%). Where no natural person(s) exercises control through ownership interests, the Controlling Person(s) of the Entity will be the natural person(s) who exercises control of the Entity through other means. Where no natural person(s) is identified as exercising control of the Entity, the Controlling Person(s) of the Entity will be the natural person(s) who holds the position of senior managing official.

130.27 Controlling person: Foundation

CRS guidance provides:

> 136. In relation to legal persons that are functionally similar to trusts (e.g. foundations), Reporting Financial Institutions should identify Controlling Persons through similar customer due diligence procedures as those required for trusts, with a view to achieving appropriate levels of reporting.
>
> 137. Where a Reporting Financial Institution relies on information collected and maintained pursuant to AML/KYC Procedures for purposes of determining the Controlling Persons of an Account Holder of a New Entity Account (see subparagraph A(2)(b) of Section VI), such AML/KYC Procedures must be consistent with Recommendations 10 and 25 of the FATF Recommendations,[55] including always treating the settlor(s) of a trust as a Controlling Person of the trust and the founder(s) of a foundation as a Controlling Person of the foundation. For purposes of determining the Controlling Persons of an Account Holder of a Pre-existing Entity Account (see subparagraph D(2)(b) of Section V), a Reporting Financial Institution may rely on information collected and maintained pursuant to the Reporting Financial Institution’s AML/KYC Procedures.

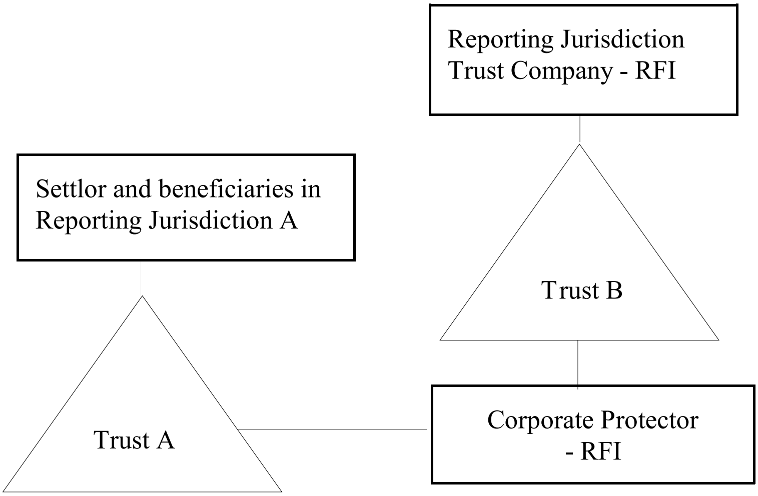
130.28 Control of controlling person

STEP CRS guidance provides:

[55] See 130.2.3 (FATF recommendations).

Paragraphs 214 and 230 of the Implementation Handbook confirm it is necessary to look through any entity that is a settlor, trustee, protector, etc to identify those holding an equity interest or being regarded as a Controlling Person of the trust.

7.1 Example 12: Trust A has a corporate trustee (RFI) and a corporate protector (RFI). Under the guidance it appears to be necessary to identify the Controlling Persons in relation to both the trustee and the protector, regardless of whether the trust is an RFI or a Passive NFE. In the example below (Figure 2), the corporate protector of Trust A is a professional protector administered by a law firm in a jurisdiction that has implemented the CRS. The corporate protector is owned by Trust B for the benefit of the partners of the law firm. The trustees of Trust B are the individual partners of the law firm. The Implementation Handbook suggests that it would be necessary to treat the individual trustees of Trust B as Controlling Persons of Trust A and disclose the full value of Trust A's assets in relation to such persons, even though they have no interest in nor any control over such assets. The OECD are considering the extent to which it is necessary to identify Controlling Persons in a chain of entities. One way to mitigate the burden in this situation would be to provide guidance that it is not necessary to look through an RFI in these circumstances (assuming that, in this case, the corporate protector is an RFI because it conducts one of the enumerated activities as a business on behalf of customers). If that guidance were provided, the due diligence and reporting obligations would fall on (and only on) the RFI that is closest to the individuals to be reported.



7.2 Example 13: There are also a number of professional trust and

> protector companies where a controlling interest is held by an independent private equity fund. For example, an interest in a global fiduciary service provider corporate and fund services group has been acquired by a private equity house. The acquired company is a multi-jurisdictional business that provides trust and corporate services to a wide range of clients across the globe, administering over 10,000 structures for almost 6,000 clients from nine locations. The business has three core service lines: Corporate Administration, Trust Administration and Fund Services. This investment was made by a buyout fund. If you follow the above analysis, it would be necessary to identify and provide information about the Controlling Persons of the private equity fund as ultimate owners of the trust company, which include the investors in the buyout fund and private equity fund personnel. None of these people have any connection with the underlying trusts managed by the trust company that holds the relevant financial account. As the trust company, in this case, is an RFI (which is likely to be the case, save in relation to US service providers) and it was not necessary to look through the RFI, this information would not need to be disclosed.
>
> 7.3 We suggest that the solution to this issue is to conclude that in circumstances where a Controlling Person in relation to a trust is itself a regulated service provider that offers professional trustee services, as a practical matter there should be no need to identify the natural persons who own that regulated service provider but only the directors (or similar) who control that regulated service provider. We understand that the OECD is still considering the reporting of Controlling Persons in an ownership chain of entities.

130.29 Charities

A charity is typically an Active NFE,[56] but it may be a FI.

STEP CRS guidance provides:

> 8. Charitable trusts
>
> ... many charities fall within the definition of FIs because they hold endowment funds that are professionally managed. It appears that under the CRS, these charities would be treated as RFIs. FATCA treats such charities as non-reporting. In HMRC’s view, there are sound policy reasons for treating certain charities as RFIs. For further guidance on this point, see HMRC’s charity guidance.[57]

[56] See 130.8.7 (Non-profit organisation).

[57] *https://www.gov.uk/guidance/automatic-exchange-of-information-guidance-for-charities*

130.30 Private trust companies

130.30.1 *Trust law background*

A private trust company (one might use the term family trust company) is a SPV set up to act as trustee of family trusts. It may or may not be carrying on a business.

STEP CRS guidance provides:

> 9.1 The only existing commentary that exists in OECD materials with regard to private trust companies is in the Implementation Handbook on page 113. This comments on the role of a private trust company in the context of a 'managed by' test for the purposes of when an entity will be managed by another entity. This ignores the fact that many families use PTCs to act as trustee of trusts in a manner where the PTC conducts activity in its trustee capacity that is synonymous with that undertaken by professional trustee companies, i.e. the PTC would oversee in its trustee capacity the investment activity being undertaken by the trust, which would be regarded as an investment entity for this purpose.
>
> 9.2 It should be noted that, typically, the administration of the PTC will be required to be carried on by a trust and corporate service provider (TCSP) who is generally a person regulated in that capacity in many jurisdictions. Many of the offshore jurisdictions in their guidance on US FATCA make it clear that PTCs could, on the basis set out above, elect to be treated as FIs if, in similar circumstances, a professional trust company would be an FI.
>
> 9.3 There are many ownership structures associated with a PTC. A typical holding structure is where the shares in the PTC are owned by a purpose trust, the trustee of which is an independent professional trustee. In this case, the professional trustee has the power to change the directors of the PTC but otherwise has no control, influence over or interest in the trusts of which the PTC acts as trustee.

130.30.2 *Status for CRS*

STEP CRS guidance provides:

> 9.4 **Example 21**: A private trust company acts as trustee of Trust A. The directors of the PTC are Z, X and Y and they alone exercise control over PTC. The shares in the PTC are owned by Professional Trustee as trustee of Purpose Trust B. Professional Trustee is one of the services provided by a law firm in offshore jurisdiction. Professional Trustee is owned by Trust C for the benefit of the partners of that law

firm. The partners of the law firm are trustees of Trust C.

If you follow through the guidance, it would be necessary to identify as Controlling Persons of Trust A, Trust B, Professional Trustee, Trust C and Individual Trustees. None of these persons exercises control over Trust A or has any financial interest in Trust A.

Conclusion: In this scenario it would be helpful to have guidance that only individuals or entities who actually exercise effective control over PTC should be identified – in this case the directors of PTC X, Y and Z but not the shareholders.

It should be noted that the OECD is still considering the reporting of Controlling Persons in an ownership chain of entities.

130.31 CRS-residence

130.31.1 *General principles*

OECD Commentary on Section VIII (A)(2) CRS para 4 provides:

> For this purpose, a Financial Institution is "resident" in a Participating Jurisdiction if it is subject to the jurisdiction of such Participating Jurisdiction (i.e. the Participating Jurisdiction is able to enforce reporting by the Financial Institution).

The question whether a FI is subject to the jurisdiction of a participating jurisdiction is a matter of private international law. The OECD commentary offers a shortcut:

> In general, where a Financial Institution is resident for tax purposes in a Participating Jurisdiction, it is subject to the jurisdiction of such Participating Jurisdiction and it is, thus, a Participating Jurisdiction Financial Institution.

I refer to residence for the purposes of CRS as **"CRS-residence"**.

Para [a] provides a jurisdiction test to determine CRS-residence, and para [b] provides a tax residence test to determine jurisdiction. Thus where a FI is tax-resident in a jurisdiction, it is CRS-resident there.

An entity may be subject to the jurisdiction of two states, in which case it is in principle dual resident for CRS.

130.31.2 *CRS-residence of trust*

OECD Commentary on Section VIII (A)(2) CRS provides:

> [1] In the case of a trust that is a Financial Institution (irrespective of whether it is resident for tax purposes in a Participating Jurisdiction), the trust is considered to be subject to the jurisdiction of a Participating Jurisdiction if one or more of its trustees are resident in such Participating Jurisdiction
>
> [2] except if the trust reports all the information required to be reported pursuant to the CRS with respect to Reportable Accounts maintained by the trust to another Participating Jurisdiction because it is resident for tax purposes in such other Participating Jurisdiction.

Para [2] deals with cases of dual CRS-residence.

What about a trust with trustees resident in different places, one of which is the UK? The trustees may be deemed non-resident for UK tax purposes. If so it is non-resident for CRS purposes if it complies with CRS in another Participating Jurisdiction. If it does not, it must comply with CRS in the UK, even though not tax-resident.

130.31.3 *FI without residence*

OECD Commentary on Section VIII (A)(2) CRS provides:

> However, where a Financial Institution (other than a trust) does not have a residence for tax purposes (e.g. because it is treated as fiscally transparent, or it is located in a jurisdiction that does not have an income tax), it is considered to be subject to the jurisdiction of a Participating Jurisdiction and it is, thus, a Participating Jurisdiction Financial Institution if:
>
> *a)* it is incorporated under the laws of the Participating Jurisdiction;
> *b)* it has its place of management (including effective management) in the Participating Jurisdiction; or
> *c)* it is subject to financial supervision in the Participating Jurisdiction.
>
> In this context, the term "Participating Jurisdiction" refers to a jurisdiction that has implemented the Common Reporting Standard.

130.31.4 *Dual CRS-residence*

OECD Commentary on Section VIII(5) CRS provides:

> 5. Where a Financial Institution (other than a trust) is resident in two or more Participating Jurisdictions, such Financial Institution will be subject to the reporting and due diligence obligations of the Participating Jurisdiction in which it maintains the Financial Account(s).

130.32 Reporting Financial Institution

"Reporting Financial Institution" matters because, as its name suggests, it must make reports.

Section VIII (A)(1) CRS provides a negative definition:

> 1. The term "Reporting Financial Institution" means any Participating Jurisdiction Financial Institution that is not a Non- Reporting Financial Institution.

130.33 Non-reporting FI

Section VIII (B) CRS provides:

> 1. The term "Non-Reporting Financial Institution" means any Financial Institution that is:

There follows a list of 5 categories of entities

130.33.1 *Governmental entities etc*

The first three categories concern governments and other major players:

> 1. The term "Non-Reporting Financial Institution" means any Financial Institution that is:
>   a) a Governmental Entity, International Organisation or Central Bank, other than with respect to a payment that is derived from an obligation held in connection with a commercial financial activity of a type engaged in by a Specified Insurance Company, Custodial Institution, or Depository Institution;[58]
>   b) a Broad Participation Retirement Fund; a Narrow Participation Retirement Fund; a Pension Fund of a Governmental Entity, International Organisation or Central Bank; or a Qualified Credit Card Issuer;
>   c) any other Entity that presents a low risk of being used to evade tax, has substantially similar characteristics to any of the Entities described in subparagraphs B(1)(a) and (b), and is defined in domestic law as a Non-Reporting Financial Institution, provided that the status of such Entity as a Non-Reporting Financial Institution does not frustrate the purposes of the Common Reporting Standard;

130.33.2 *Exempt Collective Investment Vehicle*

> 1. The term "Non-Reporting Financial Institution" means any Financial Institution that is ...
>   d) an Exempt Collective Investment Vehicle; or

The definition is in section VIII (B) (9) CRS:

> The term "Exempt Collective Investment Vehicle" means an Investment Entity that is regulated as a collective investment vehicle, provided that all of the interests in the collective investment vehicle are held by or through individuals or Entities that are not Reportable Persons, except a Passive NFE with Controlling Persons who are Reportable Persons.

[58] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... other than: i) with respect to a payment that is derived from an obligation held in connection with a commercial financial activity of a type engaged in by a Specified Insurance Company, Custodial Institution, or Depository Institution; or ii) with respect to the activity of maintaining Central Bank Digital Currencies for Account Holders which are not Financial Institutions, Governmental Entities, International Organisations or Central Banks."

An Investment Entity that is regulated as a collective investment vehicle does not fail to qualify under subparagraph B(9) as an Exempt Collective Investment Vehicle, solely because the collective investment vehicle has issued physical shares in bearer form, provided that:

a) the collective investment vehicle has not issued, and does not issue, any physical shares in bearer form after [xx/xx/xxxx];
b) the collective investment vehicle retires all such shares upon surrender;
c) the collective investment vehicle performs the due diligence procedures set forth in Sections II through VII and reports any information required to be reported with respect to any such shares when such shares are presented for redemption or other payment; and
d) the collective investment vehicle has in place policies and procedures to ensure that such shares are redeemed or immobilised as soon as possible, and in any event prior to [xx/xx/xxxx].

130.33.3 *Trust with reporting trustee*

1. The term "Non-Reporting Financial Institution" means any Financial Institution that is ...

e) a trust to the extent that the trustee of the trust is a Reporting Financial Institution and reports all information required to be reported pursuant to Section I with respect to all Reportable Accounts of the trust.

130.34 Reporting duties

Armed with these definitions, we can turn to the reporting duties.

Section I (A)(1) CRS provides:

A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution:

130.34.1 *Account Holder details*

Section I (A)(1) CRS provides:

A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution:

1. [a] the name, address, jurisdiction(s) of residence, TIN(s)[59] and

[59] Taxpayer Identification Number(s).

date and place of birth (in the case of an individual) of each Reportable Person that is an Account Holder of the account and,[60]

[b] in the case of any Entity

[i] that is an Account Holder and

[ii] that, after application of the due diligence procedures consistent with Sections V, VI and VII, is identified as having one or more Controlling Persons that is a Reportable Person,

the name, address, jurisdiction(s) of residence and TIN(s) of the Entity and the name, address, jurisdiction(s) of residence, TIN(s) and date and place of birth of each Reportable Person;[61]

130.34.2 *Account details*

Section I (A)(2)-(4) CRS provides:

> A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution ...
>
> 2. the account number (or functional equivalent in the absence of an account number);[62]
> 3. the name and identifying number (if any) of the Reporting Financial Institution;
> 4. [a] the account balance or value
>
>   [b] (including, in the case of a Cash Value Insurance Contract or Annuity Contract, the Cash Value or surrender value)
>
>   as of
>
>   [i] the end of the relevant calendar year or other appropriate reporting period

[60] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... that is an Account Holder of the account and whether the Account Holder has provided a valid self-certification;".

[61] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... and place of birth of each Reportable Person, as well as the role(s) by virtue of which each Reportable Person is a Controlling Person of the Entity and whether a valid self-certification has been provided for each Reportable Person; and
c) whether the account is a joint account, including the number of joint Account Holders."

[62] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... in the absence of an account number), the type of account and whether the account is a Preexisting Account or a New Account;".

[ii] or, if the account was closed during such year or period, the closure of the account;

STEP CRS guidance (2016) comments on account value:

> a. We note the reference to the 'value calculated by the RFI for the purpose that requires the most frequent determination of value' is to be used for reporting the account value. There is no unified standard for the preparation of trust accounts and it is rare that trust accounts are subject to an audit. In many cases, the directly held trust assets may be shares in a holding company that is an Investment Entity and therefore a Financial Institution. It is also not unusual for the trust assets to be shown in trust accounts at historic cost, and there is no general requirement to 'mark to market' the trust assets annually. In such cases, can the trustee, as RFI, use the value of assets on acquisition either
> i. where the trust accounts show trust assets at historic cost; or
> ii. where the directly held trust asset are shares in one or more holding companies that are carried at historic cost.
> b. It is also not clear, where the trustee is an RFI, whether the obligation to report the value of the trust requires them to report the full value of all trust assets or just the value of financial assets. This would not be the case for a trust that is an NFE, where the RFI in relation to the relevant accounts would only report the value of the financial assets held by that trust. We assume that the intention is that a trustee that is an RFI is only required to provide financial information about the financial assets and not the non-financial assets. If this is correct, it would be helpful if this could be made clear.
> The OECD Secretariat advised that it would be necessary to disclose the full value of all assets in the trust, both financial and non-financial assets.

130.34.3 *Reporting: Exceptions*

Section I (D)-(E) CRS provides minor exceptions for TINs and dates of birth:

> D. Notwithstanding subparagraph A(1), the TIN is not required to be reported if
> *(i)* a TIN is not issued by the relevant Reportable Jurisdiction or
> *(ii)* the domestic law of the relevant Reportable Jurisdiction does not require the collection of the TIN issued by such Reportable Jurisdiction.
> E. Notwithstanding subparagraph A(1), the place of birth is not required to be reported unless the Reporting Financial Institution is otherwise

required to obtain and report it under domestic law and it is available in the electronically searchable data maintained by the Reporting Financial Institution.

130.34.4 *Custodial/Depositary A/c*

Section I (A)(5)-(6) CRS provides:

> A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution:
> 5. in the case of any Custodial Account:
>   *a)* [i] the total gross amount of interest, the total gross amount of dividends, and the total gross amount of other income generated with respect to the assets held in the account,
>   [ii] in each case paid or credited to the account (or with respect to the account) during the calendar year or other appropriate reporting period; and
>   *b)* [i] the total gross proceeds from the sale or redemption of Financial Assets paid or credited to the account during the calendar year or other appropriate reporting period
>   [ii] with respect to which the Reporting Financial Institution acted as a custodian, broker, nominee, or otherwise as an agent for the Account Holder;
> 6. in the case of any Depository Account, the total gross amount of interest paid or credited to the account during the calendar year or other appropriate reporting period;[63]

130.34.5 *Reporting: Other account*

Section I (A)(7) CRS provides:

> 7. [i] in the case of any account not described in subparagraph A(5) or (6), [ie not a Custodial/Depositary Account]
>   [ii] the total gross amount paid or credited to the Account Holder with respect to the account during the calendar year or other appropriate reporting period
>   [iii] with respect to which the Reporting Financial Institution is the obligor or debtor,

[63] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... other appropriate reporting period; in the case of any Equity Interest held in an Investment Entity that is a legal arrangement, the role(s) by virtue of which the Reportable Person is an Equity Interest holder; and".

> [iv] including the aggregate amount of any redemption payments made to the Account Holder during the calendar year or other appropriate reporting period.

Section I (F) CRS provides:

> F. Notwithstanding paragraph A, the information to be reported with respect to [xxxx] is the information described in such paragraph, except for gross proceeds described in subparagraph A(5)(b).

130.34.6 *Pre-existing account*

Section I (C) CRS provides a minor transitional relief:

> C. Notwithstanding subparagraph A(1), with respect to each Reportable Account that is a Pre-existing Account, the TIN(s) or date of birth is not required to be reported if such TIN(s) or date of birth is not in the records of the Reporting Financial Institution and is not otherwise required to be collected by such Reporting Financial Institution under domestic law. However, a Reporting Financial Institution is required to use reasonable efforts to obtain the TIN(s) and date of birth with respect to Pre-existing Accounts by the end of the second calendar year following the year in which such Accounts were identified as Reportable Accounts.[64]

130.34.7 *Currency*

Section I (B) CRS provides:

> B. The information reported must identify the currency in which each amount is denominated.

130.35 CRS TAAR

Section IX(A)(1) CRS provides:

> A. A jurisdiction must have rules and administrative procedures in place to ensure effective implementation of, and compliance with, the reporting and due diligence procedures set out above including:
>
> 1. rules to prevent any Financial Institutions, persons or

[64] The text will be updated by the 2023 CRS Amendments when they take effect to read: "... identified as Reportable Accounts and whenever it is required to update the information relating to the Preexisting Account pursuant to domestic AML/KYC Procedures."

> intermediaries from adopting practices intended to circumvent the reporting and due diligence procedures;

Regulation 23 ITCR 2015 provides:

> If--
> (a) a person enters into any arrangements, and
> (b) the main purpose, or one of the main purposes, of the person in entering into the arrangements is to avoid any obligation under these Regulations,
>
> these Regulations are to have effect as if the arrangements had not been entered into.

This wording is authorised by CRS, so is not *ultra vires*.[65]

OECD Commentary on Section IX(4) CRS provides:

> 5. The following are examples of situations where it is expected that an anti-avoidance rule would apply:
>
> *Example 1 (Shift Maintenance of an Account):*
>
> A Reporting Financial Institution advises a customer to maintain an account with a Related Entity in a non-Participating Jurisdiction that enables the Reporting Financial Institution to avoid reporting while offering to provide services and retain customer relations as if the account was maintained by the Reporting Financial Institution itself. In such a case, the Reporting Financial Institution should be considered to maintain the account and have the resulting reporting and due diligence requirements.
>
> *Example 2 (Year-end amounts):*
>
> Financial Institutions, individuals, Entities or intermediaries manipulate year-end amounts, such as account balances, to avoid reporting or being reported upon.
>
> *Example 3 (Park Money with Qualified Credit Card Issuers):*
>
> Individuals or Entities park balances from other Reportable Accounts with Qualified Credit Card Issuers for a short period at the end of the year to avoid reporting.
>
> *Example 4 (Electronic records and computerised systems):*
>
> A Reporting Financial Institution deliberately does not create any electronic records (such that an electronic record search would not yield any results) or maintains computerised systems artificially dissociated (to avoid the account aggregation rules).

[65] Unlike the equivalent rule in the Country by Country reporting regulations: see 2.8.2 (Rule of law v. other values).

Conduct of this kind[66] generally involves fraudulent concealment from Revenue authorities, which has implications beyond CRS.

[66] *https://www.oecd.org/tax/exchange-of-tax-information/public-consultation-document-crypto-asset-reporting-framework-and-amendments-to-the-common-reporting-standard.pdf*

131.38 Legitimate interest

131.1 MLR: Introduction

This chapter and the next consider the Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017. The name is too long to use even as an abbreviation ("MLTFTFIPR"); I abbreviate it to "MLR".

MLR derives from the 5th Money Laundering Directive (2018/843) which the UK will continue to apply post-Brexit.

The extent and complexity of the obligations imposed by MLR is dispiriting. Some readers may use stronger language. They were introduced under a government which claimed to wish to cut red tape![1]

[1] *The Times* records on 7 January 2021: "Boris Johnson has declared the "time is now" to deregulate Britain's economy as he invited business leaders to propose areas where his government can cut red tape."

But if the object is to discourage trusts by making them more onerous to administer, Perhaps belatedly, a consultation published March 2024 is now to review the MLR generally, including a review of TRS.

131.2 TRS: Introduction

The main topic of this chapter is trust registration (TRS). I also discuss: trust record keeping and supply of trust data to third parties.

The rules are in Part 5 (reg 42-45ZB) MLR.

Reg 42(1) MLR provides:

> This Part [Part 5, Beneficial Ownership Information] applies to
> [a] UK bodies corporate and
> [b] relevant trusts.

The term relevant trust brings in the territorial limits of Part 5, as relevant trusts must have UK links of some kind.

Similar rules apply to companies and so I consider companies here too, but the focus of the chapter is on trusts. I do not discuss enforcement provisions in Part 9 but note they include criminal offences and unlimited penalties.

The rules changed in 2020 and now require (almost) all trusts to register if they were not required to register under the pre-2020 rules.

I do not consider penalties.

131.2.1 *TRS: Guidance*

The following guidance is available:

HMRC:
- Trust Registration Service Manual (TRSM)
- "Register a trust as an agent" (entry-level guidance)[2]

Law Society: TRS legal sector guidance:[3]
- Non-corporate guidance ("Law Soc non-corporate TRS guidance")
- Corporate guidance

LSAG:[4]
Anti-Money Laundering Guidance for the Legal Sector ("LSAG TRS guidance")
Articles

TRS has been a success.

Morton & Doukova, "The Trust Registration Service: the next iteration of the regime"[5]

The background can be found in HM Treasury consultation and response papers, now of historical interest only:

- Transposition of the Fifth Money Laundering Directive: consultation
- Transposition of the Fifth Money Laundering Directive: response to the consultation[6]
- Fifth Money Laundering Directive and Trust Registration Service: Technical consultation document[7]

131.3 MLR: EU law background

Chapter 3 of the 4th money laundering directive[8] deals with companies in art 30 and trusts in art 31. It is easier to follow if the two are set out side by side:

Article 30 (companies)	***Article 31 (trusts)***
	1. Member States shall ensure that this Article applies to [a] trusts and [b] other types of legal arrangements, such

[5] [2021] BTR 142.

[7] *https://www.gov.uk/government/consultations/technical-consultation-fifth-money-laundering-directive-and-trust-registration-service* (Jan 2020).

[8] The full title is: Directive (EU) 2015/849 of the European Parliament and of the Council of 20 May 2015 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, amending Regulation (EU) No 648/2012 of the European Parliament and of the Council, and repealing Directive 2005/60/EC of the European Parliament and of the Council and Commission Directive 2006/70/EC See
https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32015L0849
The 4th directive was amended by the 5th moneylaundering directive, which took effect on 10 January 2020. Its full title is Directive (EU) 2018/843 of the European Parliament and of the Council of 30 May 2018 amending Directive (EU) 2015/849 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, and amending Directives 2009/138/EC and 2013/36/EU
https://eur-lex.europa.eu/eli/dir/2018/843/oj
The 2021/22 edition of this work para 122.2 set out a track change version identifying the changes of the 5th directive, but this is now of historical interest only.

	as, inter alia, fiducie, certain types of Treuhand or fideicomiso, where such arrangements have a structure or functions similar to trusts. Member States shall identify the characteristics to determine where legal arrangements have a structure or functions similar to trusts with regard to such legal arrangements governed under their law.
1. Member States shall ensure that corporate and other legal entities incorporated within their territory are required to obtain and hold adequate, accurate and current information on their beneficial ownership, including the details of the beneficial interests held.	Each Member State shall require that trustees of any express trust administered in that Member State obtain and hold adequate, accurate and up-to-date information on beneficial ownership regarding the trust. That information shall include the identity of: (a) the settlor(s); (b) the trustee(s); (c) the protector(s) (if any); (d) the beneficiaries or class of beneficiaries; (e) any other natural person exercising effective control of the trust.
Member States shall ensure that breaches of this Article are subject to effective, proportionate and dissuasive measures or sanctions.	Member States shall ensure that breaches of this Article are subject to effective, proportionate and dissuasive measures or sanctions.
Member States shall ensure that those entities are required to provide, in addition to information about their legal owner, information on the beneficial owner to obliged entities when the obliged entities are taking customer due diligence measures in accordance with Chapter II. Member States shall require that the beneficial owners of corporate or other legal entities, including through shares, voting rights, ownership interest, bearer shareholdings or control via other means, provide those entities with all the information necessary for the corporate or other legal entity to comply with the requirements in the first subparagraph.	

	2. Member States shall ensure that trustees or persons holding equivalent positions in similar legal arrangements as referred to in paragraph 1 of this Article, disclose their status and provide the information referred to in paragraph 1 of this Article to obliged entities in a timely manner, where, as a trustee or as person holding an equivalent position in a similar legal arrangement, they form a business relationship or carry out an occasional transaction above the thresholds set out in points (b), (c) and (d) of Article 11.
2. Member States shall require that the information referred to in paragraph 1 can be accessed in a timely manner by competent authorities and FIUs.	3. Member States shall require that the information referred to in paragraph 1 can be accessed in a timely manner by competent authorities and FIUs.
3. Member States shall ensure that the information referred to in paragraph 1 is held in a central register in each Member State, for example a commercial register, companies register as referred to in Article 3 of Directive 2009/101/EC of the European Parliament and of the Council (16), or a public register. Member States shall notify to the Commission the characteristics of those national mechanisms. The information on beneficial ownership contained in that database may be collected in accordance with national systems.	3a. Member States shall require that the beneficial ownership information of express trusts and similar legal arrangements as referred to in paragraph 1 shall be held in a central beneficial ownership register set up by the Member State where the trustee of the trust or person holding an equivalent position in a similar legal arrangement is established or resides. Where the place of establishment or residence of the trustee of the trust or person holding an equivalent position in similar legal arrangement is outside the Union, the information referred to in paragraph 1 shall be held in a central register set up by the Member State where the trustee of the trust or person holding an equivalent position in a similar legal arrangement enters into a business relationship or acquires real estate in the name of the trust or similar legal arrangement. Where the trustees of a trust or persons holding equivalent positions in a similar legal arrangement are established or reside in different Member States, or where the trustee of the trust or person holding an equivalent position in a similar legal

	arrangement enters into multiple business relationships in the name of the trust or similar legal arrangement in different Member States, a certificate of proof of registration or an excerpt of the beneficial ownership information held in a register by one Member State may be considered as sufficient to consider the registration obligation fulfilled.
4. Member States shall require that the information held in the central register referred to in paragraph 3 is adequate, accurate and current, and shall put in place mechanisms to this effect. Such mechanisms shall include requiring obliged entities and, if appropriate and to the extent that this requirement does not interfere unnecessarily with their functions, competent authorities to report any discrepancies they find between the beneficial ownership information available in the central registers and the beneficial ownership information available to them. In the case of reported discrepancies, Member States shall ensure that appropriate actions be taken to resolve the discrepancies in a timely manner and, if appropriate, a specific mention be included in the central register in the meantime.	5. Member States shall require that the information held in the central register referred to in paragraph 3a is adequate, accurate and current, and shall put in place mechanisms to this effect. Such mechanisms shall include requiring obliged entities and, if appropriate and to the extent that this requirement does not interfere unnecessarily with their functions, competent authorities to report any discrepancies they find between the beneficial ownership information available in the central registers and the beneficial ownership information available to them. In the case of reported discrepancies Member States shall ensure that appropriate actions be taken to resolve the discrepancies in a timely manner and, if appropriate, a specific mention be included in the central register in the meantime.
5. Member States shall ensure that the information on the beneficial ownership is accessible in all cases to: (a) competent authorities and FIUs, without any restriction; (b) obliged entities, within the framework of customer due diligence in accordance with Chapter II; (c) any member of the general public.	4. Member States shall ensure that the information on the beneficial ownership of a trust or a similar legal arrangement is accessible in all cases to: (a) competent authorities and FIUs, without any restriction; (b) obliged entities, within the framework of customer due diligence in accordance with Chapter II; (c) any natural or legal person that can demonstrate a legitimate interest; (d) any natural or legal person that files a written request in relation to a trust or similar legal arrangement which holds or owns a controlling interest in any corporate

	or other legal entity other than those referred to in Article 30(1), through direct or indirect ownership, including through bearer shareholdings, or through control via other means.
The persons referred to in point (c) shall be permitted to access at least the name, the month and year of birth and the country of residence and nationality of the beneficial owner as well as the nature and extent of the beneficial interest held. Member States may, under conditions to be determined in national law, provide for access to additional information enabling the identification of the beneficial owner. That additional information shall include at least the date of birth or contact details in accordance with data protection rules.	The information accessible to natural or legal persons referred to in points (c) and (d) of the first subparagraph shall consist of the name, the month and year of birth and the country of residence and nationality of the beneficial owner, as well as nature and extent of beneficial interest held. Member States may, under conditions to be determined in national law, provide for access of additional information enabling the identification of the beneficial owner That additional information shall include at least the date of birth or contact details, in accordance with data protection rules. Member States may allow for wider access to the information held in the register in accordance with their national law. Competent authorities granted access to the central register referred to in paragraph 3a shall be public authorities with designated responsibilities for combating money laundering or terrorist financing, as well as tax authorities, supervisors of obliged entities and authorities that have the function of investigating or prosecuting money laundering, associated predicate offences and terrorist financing, tracing, and seizing or freezing and confiscating criminal assets.
5a. Member States may choose to make the information held in their national registers referred to in paragraph 3 available on the condition of online registration and the payment of a fee, which shall not exceed the administrative costs of making the information available, including costs of maintenance and developments of the register.	4a. Member States may choose to make the information held in their national registers referred to in paragraph 3a available on the condition of online registration and the payment of a fee, which shall not exceed the administrative costs of making the information available, including costs of maintenance and developments of the register.

6. Member States shall ensure that competent authorities and FIUs have timely and unrestricted access to all information held in the central register referred to in paragraph 3 without alerting the entity concerned. Member States shall also allow timely access by obliged entities when taking customer due diligence measures in accordance with Chapter II.	
Competent authorities granted access to the central register referred to in paragraph 3 shall be those public authorities with designated responsibilities for combating money laundering or terrorist financing, as well as tax authorities, supervisors of obliged entities and authorities that have the function of investigating or prosecuting money laundering, associated predicate offences and terrorist financing, tracing and seizing or freezing and confiscating criminal assets.	
7. Member States shall ensure that competent authorities and FIUs are able to provide the information referred to in paragraphs 1 and 3 to the competent authorities and to the FIUs of other Member States in a timely manner and free of charge.	7. Member States shall ensure that competent authorities and FIUs are able to provide the information referred to in paragraphs 1 and 3 to the competent authorities and to the FIUs of other Member States in a timely manner and free of charge.
8. Member States shall require that obliged entities do not rely exclusively on the central register referred to in paragraph 3 to fulfil their customer due diligence requirements in accordance with Chapter II. Those requirements shall be fulfilled by using a risk-based approach.	6. Member States shall ensure that obliged entities do not rely exclusively on the central register referred to in paragraph 4 to fulfil their customer due diligence requirements as laid down in Chapter II. Those requirements shall be fulfilled by using a risk-based approach.
9. In exceptional circumstances to be laid down in national law, where the access referred to in points (b) and (c) of the first subparagraph of paragraph 5 would expose the beneficial owner to	7a. In exceptional circumstances to be laid down in national law, where the access referred to in points (b), (c) and (d) of the first subparagraph of paragraph 4 would expose the beneficial owner to

disproportionate risk, risk of fraud, kidnapping, blackmail, extortion, harassment, violence or intimidation, or where the beneficial owner is a minor or otherwise legally incapable, Member States may provide for an exemption from such access to all or part of the information on the beneficial ownership on a case-by-case basis. Member States shall ensure that these exemptions are granted upon a detailed evaluation of the exceptional nature of the circumstances. Rights to an administrative review of the exemption decision and to an effective judicial remedy shall be guaranteed. A Member State that has granted exemptions shall publish annual statistical data on the number of exemptions granted and reasons stated and report the data to the Commission.	disproportionate risk, risk of fraud, kidnapping, blackmail, extortion, harassment, violence or intimidation, or where the beneficial owner is a minor or otherwise legally incapable, Member States may provide for an exemption from such access to all or part of the information on the beneficial ownership on a case-by-case basis. Member States shall ensure that these exemptions are granted upon a detailed evaluation of the exceptional nature of the circumstances. Rights to an administrative review of the exemption decision and to an effective judicial remedy shall be guaranteed. A Member State that has granted exemptions shall publish annual statistical data on the number of exemptions granted and reasons stated and report the data to the Commission. Where a Member State decides to establish an exemption in accordance with the first subparagraph, it shall not restrict access to information by competent authorities and FIUs.
Exemptions granted pursuant to the first subparagraph of this paragraph shall not apply to credit institutions and financial institutions, or to the obliged entities referred to in point (3)(b) of Article 2(1) that are public officials.	Exemptions granted pursuant to the first subparagraph shall not apply to the credit institutions and financial institutions, and to obliged entities referred to in point (3)(b) of Article 2(1) that are public officials.
10. Member States shall ensure that the central registers referred to in paragraph 3 of this Article are interconnected via the European Central Platform established by Article 22(1) of Directive (EU) 2017/1132 of the European Parliament and of the Council (17). The connection of the Member States' central registers to the platform shall be set up in accordance with the technical specifications and procedures established by implementing acts adopted by the Commission in accordance with Article 24 of Directive (EU) 2017/1132 and with Article 31a of this Directive.	9. Member States shall ensure that the central registers referred to in paragraph 3a of this Article are interconnected via the European Central Platform established by Article 22(1) of Directive (EU) 2017/1132. The connection of the Member States' central registers to the platform shall be set up in accordance with the technical specifications and procedures established by implementing acts adopted by the Commission in accordance with Article 24 of Directive (EU) 2017/1132 and with Article 31a of this Directive.

Member States shall ensure that the information referred to in paragraph 1 of this Article is available through the system of interconnection of registers established by Article 22(1) of Directive (EU) 2017/1132, in accordance with Member States' national laws implementing paragraphs 5, 5a and 6 of this Article.	Member States shall ensure that the information referred to in paragraph 1 of this Article is available through the system of interconnection of registers established by Article 22(2) of Directive (EU) 2017/1132, in accordance with Member States' national laws implementing paragraphs 4 and 5 of this Article.
	Member States shall take adequate measures to ensure that only the information referred to in paragraph 1 that is up to date and corresponds to the actual beneficial ownership is made available through their national registers and through the system of interconnection of registers, and the access to that information shall be in accordance with data protection rules.
The information referred to in paragraph 1 shall be available through the national registers and through the system of interconnection of registers for at least five years and no more than 10 years after the corporate or other legal entity has been struck off from the register. Member States shall cooperate among themselves and with the Commission in order to implement the different types of access in accordance with this Article.	The information referred to in paragraph 1 shall be available through the national registers and through the system of interconnection of registers for at least five years and no more than 10 years after the grounds for registering the beneficial ownership information as referred to in paragraph 3a have ceased to exist. Member States shall cooperate with the Commission in order to implement the different types of access in accordance with paragraphs 4 and 4a.
	10. Member States shall notify to the Commission the categories, description of the characteristics, names and, where applicable, legal basis of the trusts and similar legal arrangements referred to in paragraph 1 by 10 July 2019. The Commission shall publish the consolidated list of such trusts and similar legal arrangements in the Official Journal of the European Union by 10 September 2019. By 26 June 2020, the Commission shall submit a report to the European Parliament and to the Council assessing whether all trusts and similar legal arrangements as

referred to in paragraph 1 governed under the law of Member States were duly identified and made subject to the obligations as set out in this Directive. Where appropriate, the Commission shall take the necessary steps to act upon the findings of that report.

131.4 MLR definitions

131.4.1 *Definitions: Navigation*

A table of defined expressions may be helpful:

Term	**Defined**	**See para**
Business relationship	Reg 4(1)	132.4
Residence	Reg 42(3)	131.4.2
Interest in Land*	Reg 42(5)	131.4.4
Body corporate	Reg 3(1)	131.4.5
UK body corporate	Reg 42(2)	131.4.6
Eligible Scottish partnership	Reg 3(1)	131.4.7
Firm	Reg 3(1)	131.4.8
Trusts:		
Relevant trust	Reg 42(2)	131.5
Relevant trust type (i)	*My terminology*	131.7
Relevant trust type (ii)	*My terminology*	131.8
Relevant trust type (iii)	*My terminology*	131.9
Type 10A/B/C trust	*My terminology*	131.24
UK/Non-UK trust	Reg 42(2)	131.7
Type A/B/C trust	Reg 45ZA(2)	131.25
Taxable relevant trust	Reg 45(14)	131.14
EEA registered trust	Reg 42(4)	131.4.3
Excluded trust	Sch 3A	131.11
Relevant [regulated] person	Reg 3(1)	131.4.11, 132.5
Tax adviser	Reg 11(d)	132.6
Independent Legal Professional*	132.7	
Beneficial Owner:	-	131.16
of company	Reg 5(1)	131.16
of partnership	Reg 5(3)	131.18
of trust	Reg 6(1)	131.19
of estate	Reg 6(6)	131.20
Control:		
of company	Reg 5(2)	131.17
of beneficiary/settlor	Reg 6(4)	131.19.3

Significant control	Reg 5(2)/CA 06	131.17.1
Subsidiary undertaking	Reg 5(2)/CA 06	131.17.1
Entity: Controlling interest	Reg 42(6)	131.4.10
Third country entity	Reg 42(6)	131.4.9

* Note: these expressions have a technical meaning, not a commonsense meaning

131.4.2 *Residence for MLR*

I use the term "MLR-residence" to mean residence for the purposes of the MLR.

Reg 42(3) MLR defines MLR-residence for trustees and settlors:

> A trustee or settlor is resident in the UK—
> (a) in the case of a body corporate, if it is a UK body corporate;
> (b) in the case of an individual, if the individual is resident in the UK for the purposes of one or more of the taxes referred to in regulation 45(14).

In the case of a trustee/settlor which is a company, MLR-residence is not quite the same as UK tax residence, but it will normally come to the same thing, and it is a simpler test.

In the case of a trustee/settlor who is an individual, the test is residence for the purposes of the taxes referred to, which are IT, CGT, IHT and stamp taxes.[9] The test of residence for the first three of these is the SRT.[10] SDLT has a different (simpler) residence test, but that only applies for specific purposes, not for SDLT as a whole, so perhaps that does not count. So the test for MLR-residence for a trustee/settlor appears to be the SRT. The reader may think it would have been easier if the MLR had stated this directly; but there it is.

In relation to individual Beneficial Owners of a trust, the trust must disclose "the individual's country of residence". Here there is no definition of residence of an individual. Reg 42(3) does not apply. Strictly the test should be the common law test which applied pre-SRT. But as far as residence in the UK is concerned, the SRT comes to more or less the same thing, and no-one would be criticised for adopting the SRT as the test of an individual's residence in the UK. An individual may of course be dual resident.

[9] For this list of taxes, see 131.14 (Taxable relevant trust).

[10] See 6.3 (Scope of SRT).

A trust must also disclose "the country where it is considered to be resident for tax purposes". Whether a trust is resident in the UK for tax purposes should be determined by the standard IT/CGT test. There are also some other, somewhat niche, tests of trust residence, eg for IHT, but these can be ignored.) Whether a trust is resident in some other country for tax purposes will depend on the tax law of that country. But trustees should generally know where their trust is resident for tax purposes.

This is a complex picture, if one tries to address it analytically and in full detail, but in practice we will no doubt muddle through.

131.4.3 *EEA registered trust*

Reg 42(4) MLR 2007 provides:

> For the purposes of this Part, an "EEA registered trust" is a trust
> [1] established in a country or territory other than the UK
> [2] where national legislation applies having a broadly equivalent effect to the requirements laid down in the fourth money laundering directive.

For brevity I shorten this to **"EEA trust"**. This would include all EU countries. It would include the other members of the EEA (Iceland/ Liechtenstein/Norway) if they have legislation similar to the 4th money laundering directive, which no doubt they do.

TRSM provides:

> **TRSM23150 trusts registered on EEA register** [Sep 2022]
> There is no statutory definition of 'establishment' for TRS purposes: a trust can be considered as established in an EEA member state for TRS purposes if that is where the trustees are resident or where the administration of the trust is carried out.

That may not be right,[11] and on that definition a trust could be established in two places, but in practice the problem will not often arise.

131.4.4 *Interest in UK land*

Reg 42(5) MLR 2007 restricts this term to major interests:

> For the purposes of this Part, the trustees acquire an interest in land in the UK where at least one of the trustees becomes registered—[12]

[11] See 38.10.1 ("Pension scheme").

[12] For clarity I have set this out in a tabular format.

England	**Scotland**	**Northern Ireland**
(a) in the register of title kept under the Land Registration Act 2002	(b) in the Land Register of Scotland	(c) in the register kept under the Land Registration Act (Northern Ireland) 1970
as the proprietor of— (i) a freehold estate in land; or (ii) a leasehold estate in land granted for a term of more than 7 years from the date of the grant;	as the proprietor or as the tenant under a lease ("lease" and "proprietor" having the meanings given by section 113(1) of the Land Registration etc (Scotland) Act 2012); or	as the owner of— (i) a freehold estate in land; or (ii) a leasehold estate in land granted for a term of more than 21 years from the date of the grant.

I write this term with initial capitals, to reflect the technical nature of the expression. Trustees do not have an Interest in UK Land if the land is registered in the name of nominees for the trustees. But that will not normally matter. Law Soc non-corporate TRS guidance provides (p.5):

> If the interest in UK land is held by a nominee for the trustees, the trustees will not need to register the trust but it is likely that the nominees will need to register the nominee arrangement. ... nominee holdings are only excluded where the nominee is a FCA authorised person involved with safeguarding and administering assets. Legal professionals who act, or whose vehicles act, as nominees to hold client assets, (for example for valid confidentiality reasons) will need to register such arrangements with the TRS. However, non-UK trustees who acquire an interest in UK land are likely to become subject to UK tax at some point and therefore will need to register if the trust becomes a relevant taxable trust.

131.4.5 *Body corporate*

Reg 3(1) MLR provides:

> In these Regulations ...
> "body corporate"—
> (a) includes—
> (i) a body corporate incorporated under the laws of the UK or any part of the UK, and
> (ii) a body corporate constituted under the law of a country or territory outside the UK;
> (b) but does not include—
> (i) a corporation sole, or

> (ii) a partnership that, whether or not a legal person, is not regarded as a body corporate under the law by which it is governed;

Leaving aside the specialist topic of a corporation sole, this means that a body corporate includes a body corporate, but does not include something which is not a body corporate. The definition is based on wording in s.1173 Companies Act 2006.

In this chapter where brevity is needed I use the word "company" to refer to a body corporate, as the meaning is (more or less) the same.

131.4.6 *UK body corporate*

Reg 42(2)(a) MLR provides:

> (2) For the purposes of this Part—
> (a) a "UK body corporate" is
> [i] a body corporate which is incorporated under the law of the UK or any part of the UK,
> [ii] and includes an eligible Scottish partnership;

131.4.7 *Eligible Scottish partnership*

This term matters as an eligible Scottish partnership counts as a UK body corporate.

Reg 3(1) MLR provides:

> In these Regulations ...
> "eligible Scottish partnership" has the meaning given in regulation 3 of the Scottish Partnerships (Register of People with Significant Control) Regulations 2017 (key terms)

That takes us to reg 3(2) of the 2017 Regulations ("SLR 2017"), which provides:

> An "eligible Scottish partnership" is—
> (a) a limited partnership registered in Scotland (a "Scottish limited partnership"), or
> (b) a general partnership constituted under the law of Scotland, during any period in which it is a qualifying partnership (a "Scottish qualifying partnership").

Reg 2 SLR 2017 provides:

> "qualifying partnership" has the meaning given in regulation 3 of the

> Partnerships[13] (Accounts) Regulations 2008

So we turn to reg 3(1) Partnerships (Accounts) Regulations 2008 which provides:

> A "qualifying partnership" is a partnership formed under the law of any part of the UK each of whose members or, in the case of a limited partnership, each of whose general partners is—
> (a) a limited company;
> (b) an unlimited company each of whose members is a limited company;
> (c) a Scottish partnership which is not a limited partnership, each of whose members is a limited company; or
> (d) a Scottish partnership which is a limited partnership, each of whose general partners is a limited company.

The regulation then sets out statutory foreign-entity definitions but that is of limited significance.[14]

131.4.8 *Firm*

Reg 3(1) MLR provides:

> "firm" means any entity that, whether or not a legal person, is not an individual and includes a body corporate and a partnership or other unincorporated association;

131.4.9 *Third country entity*

Reg 42(6)(b) MLR provides:

[13] The original erroneously reads: partnership.

[14] Reg 3 Partnerships (Accounts) Regulations 2008 provides:
"(2) Each reference in paragraph (1) to a limited company includes a reference to any comparable undertaking incorporated in a country or territory outside the UK.
(3) The reference in paragraph (1)(b) to an unlimited company includes a reference to any comparable undertaking incorporated in a country or territory outside the UK.
(4) The reference in paragraph (1)(c) to a Scottish partnership which is not a limited partnership includes a reference to any undertaking comparable to such a Scottish partnership incorporated in or formed under the law of a country or territory outside the UK.
(5) The reference in paragraph (1)(d) to a Scottish partnership which is a limited partnership includes a reference to any undertaking comparable to such a Scottish partnership incorporated in or formed under the law of a country or territory outside the UK; and in relation to such an undertaking the reference in that paragraph to the general partners is to be construed as a reference to the members of the undertaking comparable to general partners." See 90.3.3 (Foreign-entity clauses).

> "third country entity" means a body corporate, partnership or other entity that —
> (i) is governed by the law of a country or territory other than the United Kingdom and (in each case) is a legal person under that law, and
> (ii) is not subject to national legislation having a broadly equivalent effect to the requirements laid down in Article 30 of the fourth money laundering directive.

131.4.10 *Controlling interest in entity*

Reg 42(6) MLR provides:

> For the purposes of this Part—
> (a) the trustees have a controlling interest in a third country entity if they meet any of the specified conditions in paragraphs 2 to 5 of Schedule 1A to the Companies Act 2006[15] (people with significant control over a company) where that Schedule is read with the following modifications—
> (i) references to X having or holding a share in or a right in relation to, or exercising significant influence or control over, company Y are to be read as references to the trustees (in their capacity as such) having or holding a share in or a right in relation to, or exercising significant influence or control over, the third country entity;
> (ii) for "25%" wherever it occurs in each of paragraphs 2 (ownership of shares), 3 (voting rights), 13 (calculating shareholdings), and 14 (voting rights), read "50%";

131.4.11 *Relevant person*

For the definition, see 132.5 (Relevant person). I do not deal with this topic here as "relevant person" has limited importance for TRS. The obligation to register rests on trustees whether or not they are relevant (regulated) persons.

131.5 Relevant Trust

"Relevant trust" is a key term because only relevant trusts are within the scope of Part 5 MLR and so subject to its registration, record keeping and 3rd party access rules.

Reg 42(2)(b) MLR provides:

[15] See 131.17.1 (Significant control).

a "relevant trust" is—

The regulation then sets out three categories of relevant trust:

(i) a UK trust which is an express trust;
(ii) a non-UK trust which is an express trust; and
(aa) receives income from a source in the UK; or
(bb) has assets in the UK,
on which it is liable to pay one or more of the taxes referred to in regulation 45(14); or
(iii) any other non-UK trust which
[A] is an express trust,
[B] is not a trust listed in Schedule 3A (excluded trusts)
[C] and whose trustees (in their capacity as such)—
(aa) acquire an interest in land in the UK; or
(bb) enter into a business relationship with a relevant [regulated] person, where at least one of those trustees is resident in the UK and the trust is not an EEA registered trust;

I refer to these as "**relevant trust types (i) -(iii)**". In short:

Description	**Type**	**See para**
UK trust	(i)	131.7
Non-UK trust:		
Taxable in UK	(ii)	131.8
Other UK link:	(iii)	131.9
- UK land		
- one or more UK trustees		

The term relevant trust brings in two sets of limitations to Part 5:
(1) It excludes non-express trusts
(2) It brings in territorial limitations: relevant trusts must have UK links of the specified kinds

"Trust" is not defined. The Money Laundering Directive is expressed to apply to:
(1) Trusts; and
(2) "Other types of legal arrangements, such as, inter alia, fiducie, certain types of Treuhand or fideicomiso, where such arrangements have a structure or functions similar to trusts"[16]

[16] Art 31(1); see 131.3 (MLR: EU law background).

I would regard arrangements within (2) as trusts in the general sense; but even if that were wrong, they constitute trusts for the purposes of the MLR.[17]

A bare trust is a relevant trust (assuming it is an express trust with one of the specified UK links) and so within the scope of Part 5 MLR. However it is not a taxable trust.[18]

A family investment partnership is not a trust (or similar to a trust).[19]

131.6 Express trusts

A non-express trust is not a relevant trust and so is outside the scope of Part 5 MLR.

The term "express trust" is not defined. It is an established concept of trust law, though until the MLR its role was limited to the topic of limitation, so private client practitioners may not have been familiar with the term. *Lewin on Trusts* provides:[20]

> A distinction may be drawn between express trusts and trusts arising by operation of law...
> Express trusts are created when a settlor or testator constitutes a trust with the express or inferred intention of creating a trust, whether by declaration of trust or by will, or by disposition of property to trustees, or by contract, in each case complying with any applicable formalities required by law... Express trusts may also be created by statute or by the exercise of powers of disposition over property. Trusts which are not of the above kinds are those which arise by operation of law. They are called resulting, implied and constructive trusts.

TRSM provides:

> **TRSM21030: what is an express trust** [May 2021]
> An express trust is a trust created deliberately by a settlor, usually in the form of a document such as a written deed or declaration of trust. Express trusts can be created:
>
> - to take effect during the settlor's lifetime, or
> - by will, to take effect on death.
>
> Express trusts can be contrasted with trusts that come into being through the operation of the law and that do not result from the clear intent or

[17] See 90.18 (Civil law trust equivalents) ff.

[18] See 121.5 (Reporting bare trusts).

[19] See 130.18.2 (Arrangement similar to trust).

[20] 20th edition para 1-033; 8-001 (Express trusts and trusts arising by operation of law).

> decision of a settlor to create a trust or similar legal arrangement (for example, implied or constructive trusts).[21]

Law Soc non-corporate TRS guidance provides (p.1):

> the following are not express trusts ...
> - trusts which arise on intestacy; and
> - trusts created by court orders (such as following a dispute or on divorce).

CIOT say:

> Junior ISAs, like Child Trust Funds, are not express trusts and therefore not required to register on TRS. This would apply to all types of Junior ISAs: cash ISAs (which would have been excluded from registration under Sch3A(6A) regardless), but also stocks and shares ISAs. The confirmation that Junior ISAs are not registerable has been added to the Trust Registration Service Manual - see TRSM10030 and TRSM23160. HMRC are still considering whether premium bonds held for minors are deemed to be held on trust as a result of legislation and therefore should be excluded from registration as legislative trusts.

131.7 Relevant trust (i): UK trust

Reg 42(2)(b) MLR provides:

> (b) a "relevant trust" is—
> (i) a UK trust which is an express trust ...

Reg 42(2) MLR provides:

> (c) a trust is a "UK trust" if—
> (i) all the trustees are resident in the UK; or
> (ii) sub-paragraph (d) applies;
> (d) this sub-paragraph applies if—
> (i) at least one trustee is resident in the UK, and
> (ii) the settlor was resident and domiciled in the UK at the time when—

[21] For completeness: This view is approved in COM(2020) 560 final "Report from the Commission to the European Parliament and the Council assessing whether Member States have duly identified and made subject to the obligations of Directive (EU) 2015/849 all trusts and similar legal arrangements governed under their laws" *https://ec.europa.eu/transparency/documents-register/detail?ref=COM(2020)560&lang=en*

> (aa) the trust was set up, or
> (bb) the settlor added funds to the trust;

UK trust (as defined) is not quite the same as a UK resident trust under the standard IT/CGT definition of trust residence, but it will usually come to the same thing.

Reg 42(2)(e) MLR provides:

> a trust is a "non-UK trust" if it is not a UK trust.

131.8 Rel trust (ii): Taxable trust

Reg 42(2)(b) MLR provides:

> (b) a "relevant trust" is ...
> (ii) a non-UK trust which is an express trust; and
> (aa) receives income from a source in the UK; or
> (bb) has assets in the UK,
> on which it is liable to pay one or more of the taxes referred to in regulation 45(14)[22]

The final phrase ("on which it is liable to pay one or more of the taxes referred to in reg 45(14)") appears to govern para (bb) only, and does not govern para (aa). But the question will not often arise, as if income has a UK source, then UK tax will normally follow.

Suppose a chargeable gain from assets in the UK accrues to a trust and the trust thereby becomes taxable, either because it is a gain on a disposal of UK land or because the trust is UK resident. It is considered that the trust becomes taxable at the end of the tax year when the gain accrues, (not at the actual time when the gain accrues) because CGT is charged on net gains less losses, which is only determined at the end of the year.

The TRS Manual considers whether a settlor-interested trust is liable to pay income tax:

> **TRSM10030 common types of trusts and interaction with the register** [Jul 2022]
> Income arising to a settlor-interested trust is treated as the settlor's income for tax purposes. However, s646(8) ITTIOA 2005 provides that the trustees also have a concurrent liability to that tax[23] and therefore a settlor-interested trust is required to register for taxable purposes if it has a UK tax liability (see TRSM25000).

[22] For this list of taxes, see 131.14 (Taxable relevant trust).

[23] See 47.11.1 (Tax on trust income).

131.9 Rel trust (iii): Other UK link

There are two types of relevant trust type (iii).

131.9.1 *Trust holds UK land*

Reg 42(2)(b) MLR provides:

> (b) a "relevant trust" is ...
> (iii) any other non-UK trust which
> [A] is an express trust,
> [B] is not a trust listed in Schedule 3A (excluded trusts)
> [C] and whose trustees (in their capacity as such)—
> (aa) acquire an interest in land in the UK ...

131.9.2 *Non-UK trust with UK trustee*

Reg 42(2)(b) MLR provides:

> (b) a "relevant trust" is ...
> (iii) any other non-UK trust which
> [A] is an express trust,
> [B] is not a trust listed in Schedule 3A (excluded trusts)
> [C] and whose trustees (in their capacity as such) ...
> (bb) enter into a business relationship with a relevant [regulated] person, where
> [I] at least one of those trustees is resident in the UK and
> [II] the trust is not an EEA registered trust;

This requires a non-resident trust with one or more UK resident trustees, which will be rare.[24]

131.10 Underlying trust company

131.10.1 *Underlying co has UK residence*

Suppose a non-UK trust owns a non-UK company which owns a UK residence. It does not have a UK asset: the company owns the UK asset. So it is not a relevant trust type (ii) (one which "has assets in the UK", "on which it is liable" to pay UK taxes.

STEP wrote to HMRC as follows:[25]

[24] See 7.6 (Mixed-resident trustees).

[25] As far as TRS is concerned, the STEP letter is not important following HMRC's climb-down. But I set it out at length here as it illustrates how the IHT residence-

> We accept that, on a purposive reading, it might just about be possible to treat a trust in these circumstances as if it "has" a UK asset but frankly we think that is straining the wording of the legislation. ... Even assuming it could be said that the trust has a UK asset (which we do not think is the correct interpretation), it is quite clear that the trust is not liable to pay inheritance tax on that asset.
>
> ... the way schedule A1 IHTA works is that inheritance tax is paid on the shares in the non-UK company to the extent that the value of those shares is attributable to the value of the UK residential property. The inheritance tax is therefore being paid on a non-UK asset (which is prevented by schedule A1 IHTA from being "excluded property" for inheritance tax purposes) and not on a UK asset. ...
>
> We do understand that the purpose of the inheritance tax changes is to put taxpayers who own UK residential property through an overseas structure in broadly the same position as if they had owned it direct but the fact is that parliament chose to do that by charging tax on the shares in the overseas company and not on the UK residential property itself. Obligations cannot be imposed on trustees based on what the regulations might have said had the draftsman thought about this point. Instead, the regulations should be applied based on what they actually say...[26]

HMRC rightly accepted this, and TRSM now provides:

> **TRSM25030: when does a trust liability to UK taxation trigger the requirement to register** [Jun 2022]
>
> ... The requirement to register is not triggered by a UK tax liability arising to the trustees from non-UK assets. This includes situations where trustees are liable under Schedule A1 IHTA84 to Inheritance Tax on shares in a non-UK company to the extent that the value of those shares is attributable to the value of UK residential property, because the tax liability has arisen from non-UK assets.
>
> Where a trust owns shares in a company and that company owns UK assets which trigger a UK tax liability, this would not ordinarily trigger the requirement for the trust to register on TRS because the liability arises to the company rather than to the trustees.
>
> However, if the ownership of any asset (or receipt of income from the asset) is treated as a 'look through' for any relevant tax purposes such that any UK tax liability is the tax liability of the trustees and not the company then the trustees will need to register the trust on TRS.

property code operates, which is important. See 82.2.1 (Effect of de-exclusion).

[26] See App 7.12 (Piercing corporate veil/facade).

> **Non-UK trusts & CGT on UK Property Account**
> Though the requirement to register is not triggered by a UK tax liability arising to the trustees from non-UK assets, non-UK trusts that become liable to non-resident Capital Gains Tax (NRCGT) on a disposal of non-UK shares must register with TRS for the purpose of obtaining a Unique Taxpayer Reference (UTR) number before creating a CGT on UK Property Account. Trusts registered for this purpose are not required to keep the information on the register up to date and are not subject to the third party access provisions set out at TRSM60000.
> Where trustees need to report a disposal of property or land but there is no NRCGT liability to pay, there is no requirement to obtain a trust UTR or TRN via TRS. In this circumstance, trustees can request a CGT on UK Property Account paper return. Paper returns may be requested by contacting HMRC.

131.10.2 *Underlying Co has business relationship*

Law Soc non-corporate TRS guidance provides (p.5):

> Absent any UK tax liability, a trust is not required to register with the TRS if the trustees own a company (as a trust asset) which enters into the business relationship with the UK relevant [regulated] person. The business relationship would need to be entered into by the trustees themselves to fall within the Type B category.
> Similarly, a Type C scope trust, even one with no UK resident trustees, will not need to register with the TRS if the trust owns a company which acquires an interest in UK land.

131.11 Excluded trusts

Sch 3A MLR is headed “Excluded Trusts”. Excluded trusts are not type 10A/B/C or A/B/C trusts, so they are not subject to the duties imposed on those types of trust. Excluded trusts also fall outside relevant trust type (iii). However they may fall within relevant trust type (i) and (ii), in which case they are subject to the duties imposed on relevant trusts. If they are taxable they are required to register. So the label “excluded trust” is not entirely apt. Perhaps the drafter thought that too, as MLR generally refers to these as trusts “listed in Schedule 3A”. But we need short labels, and I use the term “excluded trust” for lack of better; the reader will have to bear in mind that (so called) excluded trusts are only excluded from *some* of the MLR obligations which normally apply to trusts.

Sch 3A MLR sets out 23 categories, or sets of categories, of excluded trust:

Sch 3A para	Category	See para
1, 2	Trusts made by statute/Court	131.12.1
3	Pension trusts	131.12.2
5	Charitable trusts	131.12.3
6	Pre-2020 pilot trusts	131.12.4
6A	Bank account trusts	131.12.5
9	Co-ownership trusts	131.12.6
10	Financial markets infrastructure	131.12.7
11	Safeguarding/administering investments	131.12.8
11	Authorised unit trusts	131.12.9
11	Escrow agreement	131.12.10
12	Client money, etc	131.12.11
13	Capital markets	131.12.12
14	Commercial transactions	131.12.13
15	Conveyancing trusts	131.12.14
16, 17, 22	IHT relieved trusts	131.12.15
18	PI trusts	131.12.16
19	Service charge funds	131.12.17
20, 21	Share schemes	131.12.18
23	Public authorities	131.12.19
4, 8	Trust holding policies	131.12.20
7	Short term will trusts	131.13.2

131.12 Excluded trust categories

131.12.1 *Trusts made by statute/Court*

Sch 3A MLR provides:

> **Legislative Trusts**
> 1 A trust imposed or required by an enactment.
> **Trusts imposed by court order**
> 2 A trust created by, or in order to satisfy the terms of, an order of a court or tribunal.

131.12.2 *Pension trusts*

Sch 3A MLR provides:

> **Pension scheme trusts**
> 3 A trust holding sums or assets of a pension scheme which is a registered pension scheme for the purposes of Part 4 of the Finance Act 2004....

131.12.3 *Charitable trusts*

Sch 3A MLR provides:

> **Charitable trusts**
> 5 A trust for charitable purposes which—
> (a) in Scotland or Northern Ireland, is registered as a charity; or
> (b) in England and Wales, is registered as a charity or not required to register by virtue of section 30(2)(a) to (d) of the Charities Act 2011.[27]

131.12.4 *Pre-2020 pilot trusts*

Sch 3A MLR provides:

> **Pilot trusts**
> 6 A trust which—
> (a) holds property with a value not exceeding £100, and
> (b) was created before the date on which regulation 42(2)(iii) of these Regulations comes into force.

HMRC identify the date on which reg 42(2)(iii) comes into force as 6 October 2020. TRSM provides:

> **TRSM23090 historic pilot trusts** [Dec 2021]
> ... There is no exclusion for trusts holding a nominal amount where that trust was created on or after 6 October 2020. These must be included on the register.
> **Example** (Jared)
> As part of his estate planning, J set up a trust in 1987 that would receive assets on his death. This trust was set up with £10 and there have been no additions to the trust since. The trustees of this trust therefore do not have to register the trust on TRS.
> J dies in 2024. As provided for under the terms of his will, the trust receives £200,000 from his estate. The trust is required to register from the date these funds are transferred into the trust. Note that the trust was created in J's lifetime, so the exclusion for trusts created by will (see TRSM23020) does not apply.

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
> **Wills that interact with existing trusts or property trusts**
> A will may direct an addition to an existing trust; this would not be a trust created by will and so would not be within the exemption.

[27] On TRS for charitable trusts, see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 47.3.1 (Trust registration service) online edition *https://taxationofcharities.co.uk*

> *Example (Sunita)*
> S sets up a trust on 1 May 2012 with a nominal £10. The trust lists her sister and her child as beneficiaries. S also amends her will so that her share portfolio will transfer to the trust on her death.
> S dies on 1 February 2023 and the shares are transferred into the trust. The exclusion from registration does not apply as the trust was not created by the will. During S's lifetime the trust was excluded from registration as a historic pilot trust (see TRSM23090), but the trust is required to register from the point the assets are transferred into the trust following her death.
> A trust on death may also interact with an existing trust.

In practice, pilot trusts are not used in this way.

131.12.5 *Bank account trusts*

Sch 3A MLR provides:

> **Bank accounts for minors etc**
> 6A(1) A trust which is created as a requirement of opening a relevant account[28]

[28] Defined in para 6A(2):

> "In this paragraph—
> "relevant account" means an account, consisting only of a sum of money, held with an authorised Part 4A person carrying on by way of business the activity specified in article 5 (accepting deposits) of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001;
> "authorised Part 4A person" means an authorised person who has a Part 4A permission, within the meaning given to that term in section 55A(5) of FSMA, to carry on that specified activity."

That takes us to art 5 Financial Services and Markets Act 2000 (Regulated Activities) Order 2001 which provides:

> "(1) Accepting deposits is a specified kind of activity if—
> (a) money received by way of deposit is lent to others; or
> (b) any other activity of the person accepting the deposit is financed wholly, or to a material extent, out of the capital of or interest on money received by way of deposit.
> (2) In paragraph (1), "deposit" means a sum of money, other than one excluded by any of articles 6 to 9A, paid on terms—
> (a) under which it will be repaid, with or without interest or premium, and either on demand or at a time or in circumstances agreed by or on behalf of the person making the payment and the person receiving it; and
> (b) which are not referable to the provision of property (other than currency) or services or the giving of security.
> (3) For the purposes of paragraph (2), money is paid on terms which are referable to the provision of property or services or the giving of security if, and only if—

> for the sole benefit of—
> (a) a person under the age of 18;

The other categories are for persons lacking capacity in a UK jurisdiction and are conveniently read side to side:

6A(1) A trust which is created as a requirement of opening a relevant account[29] for the sole benefit of—

English law: para 6A(1)(b)	**Scots law: para 6A(1)(c)**	**N.I. Law: para 6A(1)(d)**
a person who lacks capacity within the meaning of section 2 of the Mental Capacity Act 2005	a person who is incapable within the meaning of section 1 of the Adults with Incapacity (Scotland) Act 2000; or	a person who is incapable of managing and administering the person's property and affairs, by reason of mental disorder within the meaning of Article 3(1) of the Mental Health (Northern Ireland) Order 1986.

131.12.6 *Co-ownership trusts*

Sch 3A MLR provides:

> **Co-ownership**
> 9 A trust of jointly held property where the trustees and the beneficiaries are the same persons.

(a) it is paid by way of advance or part payment under a contract for the sale, hire or other provision of property or services, and is repayable only in the event that the property or services is or are not in fact sold, hired or otherwise provided;
(b) it is paid by way of security for the performance of a contract or by way of security in respect of loss which may result from the non-performance of a contract; or
(c) without prejudice to sub-paragraph (b), it is paid by way of security for the delivery up or return of any property, whether in a particular state of repair or otherwise."

[29] Defined in para 6A(2):
"In this paragraph—
"relevant account" means an account, consisting only of a sum of money, held with an authorised Part 4A person carrying on by way of business the activity specified in article 5 (accepting deposits) of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001;
"authorised Part 4A person" means an authorised person who has a Part 4A permission, within the meaning given to that term in section 55A(5) of FSMA, to carry on that specified activity."

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
> Example (Alice, Bob, Clara and David)
> A and Bob own a property with a declaration of trust confirming they own as tenants in common. This trust is excluded from registration during A's lifetime as an exempt co-ownership trust (see TRSM23050).
> A dies and by the terms of her will leaves her share of the property on trust to B to occupy for the remainder of his life; and thereafter to her daughter C. A's son D is appointed as executor and trustee of the will and also appointed as a second trustee of the property with B.
> There are two trusts: 1) the new trust created by A's will; and 2) the ongoing trust of the property.

That is correct.

> The trust created by A's will is excluded from the requirement to register for two years following A's death. If the trust is still in existence two years after A's death, the trust is required to register from that point.

That is only right if the estate is by then administered.

> The ongoing trust of the property is no longer an exempt co-ownership trust as the trustees and beneficiaries are not the same persons – see TRSM23050. Registration is required 90 days after A's death.
> If C were appointed as the second trustee of the property instead of D, then this would still be an exempt co-ownership trust as the trustees and beneficiaries would be the same persons, and therefore registration would not be required.
> The co-ownership exemption is only relevant in relation to the co-ownership trust; the will trust needs to be registered. The co-ownership exemption would not be relevant where there was no co-ownership trust.

131.12.7 *Financial markets infrastructure*

Sch 3A MLR provides:

Financial markets infrastructure

10 (1) A trust—

(a) created under, or for the purpose of, the default arrangements of a designated system or of the default rules of a recognised body, or for the purpose of any action or proceedings taken by or for such a system or body under such arrangements or rules;

(b) relating to the creation of a beneficial interest in securities belonging to a person whose name and address are maintained on a register of securities (within the meaning of regulation 3(1) of the Uncertificated Securities Regulations 2001); or

(c) created by or for a segregating entity—
 (i) for the purpose of protecting sums or assets belonging to the segregating entity's clients; or
 (ii) for the purpose of complying with a legal obligation to safeguard and segregate sums or assets belonging to the segregating entity's clients or to keep separate client records and accounts.

[Para (2) sets out definitions for para 10(1) which are not considered here].

131.12.8 *Safeguarding/administering investments*

The heading of para 11 Sch 3A MLR is "professional services" but this covers a range of trusts.

Para 11 Sch 3A MLR provides:

11 A trust created for the purpose of enabling or facilitating the holding of sums, assets or (in the case of sub-paragraph (c)), documents, belonging to a person other than the trustee, in connection with which sums, assets or documents the trustee is—

(a) carrying on by way of business the activity specified in article 40 (safeguarding and administering investments) of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001;

This takes us to para 40 which provides:

(1) The activity consisting of both—
(a)the safeguarding of assets belonging to another, and
(b)the administration of those assets,
or arranging for one or more other persons to carry on that activity, is a specified kind of activity if the condition in sub-paragraph (a) or (b) of paragraph (2) is met.
(2)The condition is that—
(a)the assets consist of or include any investment which is a security or a contractually based investment; or
(b)the arrangements for their safeguarding and administration are such that the assets may consist of or include such investments, and either the assets have at any time since 1st June 1997 done so, or the arrangements have at any time (whether before or after that date) been held out as ones under which such investments would be safeguarded and administered.
(3)For the purposes of this article—
(a)it is immaterial that title to the assets safeguarded and administered is held in uncertificated form;
(b)it is immaterial that the assets safeguarded and administered may be transferred to another person, subject to a commitment by the person safeguarding and administering them, or arranging for their safeguarding and administration, that they will be replaced by equivalent assets at some future date or when so requested by the person to whom they belong.

131.12.9 *Authorised unit trusts*

Para 11 Sch 3A MLR provides:

11 A trust created for the purpose of enabling or facilitating the holding of sums, assets or (in the case of sub-paragraph (c)), documents, belonging to a person other than the trustee, in connection with which sums, assets or documents the trustee is ...

(b) acting by way of business as the trustee of an authorised unit trust scheme (and for this purpose "trustee" and "authorised unit trust scheme" have the meanings given in section 237 of FSMA)

131.12.10 *Escrow agreement*

Para 11 Sch 3A MLR provides:

11 A trust created for the purpose of enabling or facilitating the holding of sums, assets or (in the case of sub-paragraph (c)), documents, belonging to a person other than the trustee, in connection with which sums, assets or documents the trustee is ...

(c) acting by way of business as an agent holding sums, assets or documents in escrow until the performance of a contractual condition agreed between two or more other persons, including the person for whom the sums, assets or documents are being held.

131.12.11 *Client money, etc*

Para 12 Sch 3A MLR provides

A trust created by a relevant supervised person[30] for the purpose of holding client money, securities or other assets, where that trust is incidental to the carrying on of business by the relevant supervised person.

131.12.12 *Capital markets*

Para 13 Sch 3A MLR provides:

A trust created for the purpose of enabling or facilitating an activity listed in points 2, 3, 6, 7 or 8 of Annex 1 to the capital requirements directive as set out in Schedule 2, or for protecting or enforcing rights relating to that activity, where—

(a) one or more of the participants in that activity is a relevant supervised person, and
(b) the use of the trust is incidental to the principal purpose of that activity.

131.12.13 *Commercial transactions*

Sch 3A MLR provides:

[30] This term is used in para 12 and 13, and is defined in para 24: "In this Schedule, "relevant supervised person" means—

(a) a relevant [regulated] person; or
(b) a person who is subject to requirements in national legislation having an equivalent effect to those laid down in the fourth money laundering directive on an obliged entity (within the meaning of that directive) and supervised for compliance with those requirements in a manner equivalent to section 2 of Chapter VI of the fourth money laundering directive.

> **Commercial transactions**
> 14 A trust created for the purpose of—
> (a) enabling or facilitating a transaction effected for genuine commercial reasons; or
> (b) protecting or enforcing rights relating to such a transaction,
> where the use of the trust is incidental to the principal purpose of the transaction.

131.12.14 *Conveyancing trusts*

Sch 3A MLR provides:

> **Registration of assets**
> 15 A trust created on the transfer or disposal of an asset where the purpose of the trust is to hold the legal title to the asset on trust for the person to whom the transfer or disposal is being made until the time when the procedure required by law to effect the transfer or disposal of legal title is completed.

131.12.15 *IHT relieved trusts*

Sch 3A MLR provides:

> **Trusts meeting legislative requirements**
> 16 A trust holding property to which section 71A [Bereaved minors trust] or 71D [Age 18-25 trusts] of the Inheritance Tax Act 1984 applies.

In practice a bereaved minors trust is rare, and an age 18-25 trust is best avoided.

> 22 A trust holding property for a beneficiary who is a disabled person within the meaning given by Schedule 1A to the Finance Act 2005.

This is also rare. It is difficult to see why any of these trusts should be excepted trusts.
Sch 3A MLR provides:

> 17 A trust of property in respect of which a direction under paragraph 1 of Schedule 4 [maintenance funds for historic buildings] to the Inheritance Tax Act 1984 has effect.

This is a specialist topic

131.12.16 *Personal injury trusts*

Sch 3A MLR provides:

> 18 A trust of funds derived from a payment—
> (a) made for the benefit of a person in consequence of a personal injury to that person, and
> (b) disregarded from capital under regulation 46(2) of, and paragraph 12 of Schedule 10 to, the Income Support (General) Regulations 1987.

131.12.17 *Service charge funds*

Sch 3A MLR provides:

> 19 A trust holding tenants' contributions for the purposes of section 42 of the Landlord and Tenant Act 1987.

131.12.18 *Share schemes*

Sch 3A MLR provides:

> 20 The plan trust of a share incentive plan which meets the requirements of Part 9 of Schedule 2 to the Income Tax (Earnings and Pensions) Act 2003.
> 21 A trust created under a share option scheme that meets the requirements of Parts 2 to 7 of Schedule 3 to the Income Tax (Earnings and Pensions) Act 2003.

131.12.19 *Public authorities*

Sch 3A MLR provides:

> 23 A trust created for the purposes of enabling or assisting—
> (a) a public authority, within the meaning of section 3(1) of the Freedom of Information Act 2000, or a body specified in section 80(2) of that Act;
> (b) a Scottish public authority, within the meaning of section 3(1) of the Freedom of Information (Scotland) Act 2002;
> (c) the Security Service, the Secret Intelligence Service, the Government Communications Headquarters or the National Crime Agency; or
> (d) the Welsh Assembly Government,
> to carry out its functions, including any functions as a court or tribunal and, in the case of the Bank of England, any of its functions as a monetary authority within the meaning of section 244(2)(c) of the Banking Act 2009.

131.12.20 *Trust holding policies*

Sch 3A MLR provides 4 categories of excluded trusts which relate to life or insurance policies:

> 4(1) A trust of a life policy paying out only—
>
> (a) on the death, terminal or critical illness, or permanent or temporary disablement of the person assured; or
>
> (b) to meet the cost of healthcare services provided to the person assured.
>
> (2) A trust of an insurance policy paying out only—
>
> (a) on the temporary disablement of the person assured, where that policy was applied for at the same time as a policy under sub-paragraph (1); or
>
> (b) to meet the cost of healthcare services provided to the person assured.
>
> (3) A trust of the benefits payable on the death of the person assured under a retirement policy.
>
> 8 A trust where—
>
> (a) the trust is holding only benefits received on the death of the person assured under a policy within paragraph 4, and
>
> (b) less than two years has passed since that person's death.

TRSM provides:

> **TRSM23030 Insurance Policies And Compensation Pay-Outs** [Jul 2022]
>
> **...Policies with surrender values**
>
> Some policies can be surrendered by the policyholder for a cash sum during the term of the policy. The possibility of a policy being surrendered does not in itself mean that a trust holding that policy cannot qualify for the exclusion at Sch3A(4). This is because HMRC accepts that the surrendering of a policy does not ordinarily constitute a pay out from that policy.
>
> The general position is that trusts holding policies with surrender values can remain excluded from registration under Sch3A(4) until such time as the policy is actually surrendered. If a policy is surrendered and the cash sum is retained in the trust, the trust would be required to register from that point.
>
> **Example** (Iqbal)
>
> > I takes out a whole of life insurance policy, which is written into trust at commencement. The policy will only pay out on the event of I's death, but the policy is able to be surrendered for a cash value during I's lifetime. As this meets the conditions set out above, the trust holding the policy is excluded from registration on TRS.
>
> However, some policies (such as investment bonds) are designed to

> provide regular or periodic payments to the policyholder in the form of surrenders or part-surrenders during the term of the policy, with a small life assurance element payable on death which is incidental to the benefits provided through the surrenders. In those cases, HMRC's view is that the withdrawals of cash in the event of a part or full surrender does constitute a pay out from the policy, because those withdrawals are intended from the outset as expected payments of funds from the policy. As this occurs on an occasion other than those listed at Sch3A(4), the exclusion does not apply to trusts holding these policies.
>
> **Example** (Margaret)
>
> > M takes out an investment bond which she places in trust. Under the terms of the policy, M is able to withdraw up to 5% of the funds invested per year in the form of a part-surrender of the policy. As these withdrawals are anticipated as an integral part of the design of the policy, they do constitute pay outs from that policy. As these pay outs are on occasions other than those listed at Sch3A(4), the exclusion from registration on TRS does not apply.

131.13 Estates and will trusts

131.13.1 *Estate of deceased person*

The estate of a deceased person in the course of administration does not have to register under TRS as it is not a trust.[31]

However "complex" estates need to obtain a UTR in order to submit returns, and a UTR is obtained by registering under the TRS system.[32]

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
>
> The complex estate registration is for administration period tax purposes only, and is separate from registration under TRS, which requires registration as a trust rather than an estate, even if the trust covers or relates to the period of administration of the estate. Therefore, if there is a will trust which needs to be registered as well as a complex estate, the complex estate UTR (unique taxpayer reference) should not be used when registering the will trust.

Jack Harper comments in the Trusts Discussion Forum:

> HMRC are using the TRS as a means of notifying the existence of what they call "complex" estates. This is not authorised by the TRS

[31] See 88.1.1 (Estate is not a trust).

[32] See 89.21 (Tax returns & registration).

regulations but no one, least of all HMRC, seems to be worried that this may be outside their lawful powers. The line of least resistance is to comply. But note that this action does not supersede the need to comply also with s7 TMA or precluding it by filing an estate tax return.

During the administration period there is no trust subsisting so none needs to be registered separately. HMRC acknowledge that legal analysis as correct but do not fully reflect it by their practice. It is a requirement to estimate the asset value when registering a taxable trust but that is for later.

A crunch point may arise 2 years after death or when the admin period ends as regards the trust assets if earlier. It is then that a trust declared by the Will may need to be registered. HMRC seem to regard that as necessary for a non-taxable trust at the 2 year point even if the admin period has not then ended as regards the trust assets, which is wrong in law and inconsistent with their view in e.g. TSEM6035 and 6045. Estates and trusts are even dealt with by separate departments within HMRC. Again compliance is the expedient route. But that is not how taxable trusts are to be dealt with. They must be notified via TRS by a deadline linked to the date a tax liability arises TRSM40030. They need a separate UTR and not that previously given to the estate: TRSM27030.

131.13.2 *Short term will trusts*

Sch 3A MLR provides:

> **Trusts having effect on death**
>
> 7 (1) A trust effected by will where—
>
> (a) the trust is holding only the property comprised in a person's estate on death, and
>
> (b) less than two years has passed since that person's death.
>
> (2) In this paragraph, a person's "estate" means the aggregate of all the property to which that person is beneficially entitled

In short, short term will trusts are excluded trusts. This only arises if the period of administration is less than two years.

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
>
> ... If an estate administration is completed within 2 years, but there is an ongoing express trust, this ongoing trust would need to register on TRS after two years from the date of death.
>
> *Example* (Imre, Lydia and Natalie)
>
> I dies on 10 January 2022. His will appoints L as his executor and leaves

£500,000 on trust for his minor granddaughter N.
L deals with the estate which is fully administered by 1 July 2023. The trust of the legacy continues for a further five years until N reaches the age of 18.
The trust of the legacy to N commences from the date death. However, as a trust created by will this trust is not required to register until 10 January 2024, 2 years after the date of death...

131.13.3 *Will not creating express trust*

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
> **Estates in administration for more than two years**
> A trust is only required to register on TRS if it is an express trust, so if the will does not create a trust then no registration is required.
> *Example* (Paula, Ronald and Leona)
> P dies in England on 6 July 2022. Her will states that she appoints R as her executor and directs him to pay all debts and funeral expenses and transfer her residuary estate to her daughter L.
> The executor is not appointed as a trustee and no trust is declared over the estate. Any trust which arises is through operation of law because of R’s duties as executor and so is not an express trust. No TRS registration is required regardless of the length of the administration period.

131.13.4 *Will creates express trust*

TRSM goes wrong here. It provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
> A will may create an express trust. If that trust is still in existence at two years from the date of death, it will need to be registered on TRS. A careful examination of the wording of the will is needed to understand what type of trust it creates and when it arises. Some examples are below.
> 1. A will may expressly state that the executor holds the estate upon trust as part of the administration of the estate, sometimes known as an administration trust. Example wording:
>
> > I give my estate to my executors on trust with power at their discretion to sell all or any part of parts of such property when they think fit. My executors shall pay my funeral and testamentary expenses my debts and any legacies given by this will out of such property or its proceeds of sale and hold the balance upon trust for such of Donald, Harold and Michaela as are living at my death and

> if more than one in equal shares.
>
> Whilst there may be overlap between the duties of an executor and a trustee, there is clearly an express trust which covers the administration period and therefore starts from the date of death.So, if the administration of the estate continues after 2 years from date of death it must be registered on TRS as a will trust rather than as an estate. This trust would continue until all of the assets are paid outright to Donald, Harold and Michaela.

That is not right: no trust comes into effect until the completion of administration.

> 2. A will may leave a specific amount of money or an asset as a legacy to hold on trust, rather than as part of the residuary estate. This trust is also treated as coming into effect on death and therefore, if it continues after 2 years from date of death it must be registered on TRS.

That is wrong for the same reason.

> 3. Other trusts effected by will may commence at a later date, either during or before the end of the administration period. In such cases the trust is not required to register until assets have been transferred from the estate to the trust, and only from 2 years following the date of death. *[Example* Sophie and Gisele]
>
> For example a will may appoint executors without creating a trust but confirm that the residuary estate is held on trust:
>
> > "I appoint S as my executor to pay my debts, funeral expenses and to hold the balance upon trust for G absolutely"
>
> Here, the trust technically comes into existence when the administration period has ended and Sn switches role from executor to trustee.It may be difficult to ascertain when this occurs. If the assets have not been transferred to G within 2 years of death than the trust needs to be registered at that point if the administration period has ended or at the date when the administration period ends if later.

That at least is correct. The Manual continues

> These rules may interact as various trusts can be created by one will.
>
> Example (George, Harry, Jerry, Philip and Rosa)
>
> George dies in England on 4 August 2022. His will appoints Harry as his executor and leaves £500,000 on trust for his husband Jerry, during his lifetime, and then for his son Philip. George leaves the residuary estate on trust for Philip and his daughter Rosa. The estate administration takes longer than anticipated and the residuary estate is assented by the executors to themselves as trustees of the residuary fund on 16

> December 2025.

The HMRC analysis is as follows:

> The trust of the legacy commences from death and, if still in existence two years from the date of death, it will need to be registered on TRS.

Wrong.

> The trust of the residuary estate begins when assets are appropriated (transferred) to the trustees or when the administration period ends. The trust of the residuary estate would therefore need to be registered after 16 December 2025 – until then the trust is not in existence as the trustees do not have any assets.

Correct.

> If the wording of the will had been different, so that the estate was given to the executors upon trust, the trust would need to be registered from 4 August 2024. However, provided the trustees are the same this is not a different trust from the residuary estate trust and only one registration is required.

The first sentence is wrong and the second, right.

> *Example (Charles & Debra)*
> C and D live together in a property owned outright by C. C dies and by the terms of his will creates a trust which gives D a life interest in the property, with the trustees having the power to sell and purchase a replacement property on the same terms. As a trust created by will, the trustees are not required to register the trust immediately on C's death. 12 months following C's death, the trustees sell the property and use the proceeds to purchase another property of similar value on the same terms, with D retaining her life interest.
> As the trust fund still consists only of property from C's estate (there has been a substitution but no additions), the trust is still excluded from registration. If the trust is still in existence two years after C's death, the trust will be required to register from that point.

131.13.5 *Deeds of variation*

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
> **Trusts created by Deeds of Variation**
> If the beneficiaries under a will or intestacy create a Deed of Variation which includes a trust, the trust is created by the Deed of Variation and

> not by the will, so the exclusion from registration [for short term will trusts] will not apply.
>
> *Example* (Caroline & Martha)
>
> C leaves her estate to M. M decides to enter into a Deed of Variation to give her entitlement to a trust for her sisters and their two children. Although certain tax provisions may apply as if this trust was included in the will (see IHTM35011), in general law a variation takes effect from the date of the deed. The settlor of this trust is M (see TRSM32040) and it comes into existence when the deed of variation is made (if assets are already available for the trust, or when assets are transferred to be held on the trusts if the estate has not yet been fully administered). This is not a trust created by will and therefore the 2 year exemption does not apply.

131.13.6 *Intestacy*

TRSM provides:

> **TRSM23020 Estates And Trusts Created On Death** [Oct 2022]
>
> **Intestacy and trust creation**
>
> In some cases in England and Wales, trusts may be created in the absence of a will under the intestacy rules. These will hold the assets on behalf of the individuals, often minors. These trusts are statutory trusts, imposed by legislation. Trusts for bereaved minors can be created on intestacy in this way.
>
> As these were not intentionally created by the settlor, trusts created in these instances are not express trusts and therefore not registrable express trusts for the purposes of TRS, see TRSM21030.

131.14 "Taxable" relevant trust

Reg 45(14) MLR provides:

> For the purposes of this regulation, a taxable relevant trust is
>
> [a] a relevant trust[33]
>
> [b] in any year in which its trustees are liable to pay any of the following taxes in the UK in relation to assets or income of the trust—

This definition only applies for the purposes of reg 45, but it is incorporated by reference elsewhere.

There are 7 taxes in this list:[34]

[33] See 131.5 (Relevant trust).

[34] For clarity I have set this out in tabular form and with my own wording, rather than that in the statute.

(1) Income tax
(2) Capital gains tax
(3) Inheritance tax
(4) Stamp taxes:
 (a) stamp duty land tax
 (b) land and buildings transaction tax (Scotland)
 (c) land transaction tax (Wales)
 (d) stamp duty reserve tax

I refer to these together as "UK taxes".

Corporation tax is not included as a trust will not be liable to CT.

Section 1(3) amounts (trust gains) and foreign income within s.624/720 do not count, as non-resident trustees are not taxable on that.

A trust may be a taxable relevant trust in one year but not in another year.

131.15 Beneficial Owner: MLR meaning

Beneficial Owner is elaborately defined. To an English practitioner, the label seems inapt, as the MLR definition does not correspond to the English property/trust law meaning, or indeed to the natural meaning, if there is such a thing.[35] But in the context of moneylaundering the wide usage of this term is long established.[36] I write the term with initial capitals, to reflect the technical nature of the expression.

131.16 Beneficial Owner: Company

Reg 5(1) MLR provides an artificially wide definition of "beneficial owner" of a body corporate:

> In these Regulations, "beneficial owner", in relation to a body corporate which is not a company whose securities are listed on a regulated market, means—
> (a) any individual who exercises ultimate control over the management of the body corporate;
> (b) any individual who ultimately owns or controls (in each case whether directly or indirectly), including through bearer share holdings or by other means, more than 25% of the shares or voting rights in the body corporate; or
> (c) an individual who controls the body corporate.

[35] See App App 6.1 (Beneficial ownership: Meanings). CRS uses the more apt term "Controlling Persons"; see 130.23 (Controlling person).

[36] I give references in the 2018/19 edition of this work para 67.14.1 (Beneficial ownership: Meanings) but omit that material here as it is of historical interest only.

131.17 Control of company

"Control" matters because if a person (a controller) "controls" a company:

(1) the controller is a Beneficial Owner of the company
(2) If the company has control of a trust, the controller has control of the trust.

Needless to say, "control" has a wide definition which goes far beyond "control" in the normal sense.

There are two categories of control, which I call:

(1) Significant control
(2) Subsidiary undertaking

131.17.1 *Significant control/subsidiary*

Reg 5(2) MLR provides:

> For the purposes of paragraph (1)(c),[37] an individual controls a body corporate if—
>
> (a) [i] the body corporate is a company or a limited liability partnership and
> [ii] that individual satisfies one or more of the conditions set out in Part 1 of Schedule 1A to the Companies Act 2006 (people with significant control over a company)
>
> (b) the body corporate would be a subsidiary undertaking of the individual (if the individual was an undertaking) under section 1162 (parent and subsidiary undertakings) of the Companies Act 2006 read with Schedule 7 to that Act.

It is helpful to read sch 1A/s.1162 CA 2006 side by side:

sch 1A: Significant control	**s.1162: subsidiary undertaking**
1 Introduction This Part of this Schedule specifies the conditions at least one of which must be met by an individual ("X") in relation to a company ("company Y") in order for the individual to be a person with "significant control" over the company.	(1) This section (together with Schedule 7) defines "parent undertaking" and "subsidiary undertaking" for the purposes of the Companies Acts. (2) An undertaking is a parent undertaking in relation to another undertaking, a subsidiary undertaking, if—
2 Ownership of shares The first condition is that X holds,	

[37] See 131.16 (Beneficial Owner: Company).

directly or indirectly, more than 25% of the shares in company Y.	
3 Ownership of voting rights The second condition is that X holds, directly or indirectly, more than 25% of the voting rights in company Y.	(a) it holds a majority of the voting rights in the undertaking, or (d) it is a member of the undertaking and controls alone, pursuant to an agreement with other shareholders or members, a majority of the voting rights in the undertaking.
4 Ownership of right to appoint or remove directors The third condition is that X holds the right, directly or indirectly, to appoint or remove a majority of the board of directors of company Y.	(b) it is a member of the undertaking[38] and has the right to appoint or remove a majority of its board of directors, or
5 Significant influence or control The fourth condition is that X has the right to exercise, or actually exercises, significant influence or control over company Y.	(c) it has the right to exercise a dominant influence over the undertaking— (i) by virtue of provisions contained in the undertaking's articles, or (ii) by virtue of a control contract, or
6 Trusts, partnerships etc The fifth condition is that— (a) the trustees of a trust or the members of a firm that, under the law by which it is governed, is not a legal person meet any of the other specified conditions (in their capacity as such) in relation to company Y, or would do so if they were individuals, and (b) X has the right to exercise, or	(4) An undertaking is also a parent undertaking in relation to another undertaking, a subsidiary undertaking, if— (a) it has the power to exercise, or actually exercises, dominant influence or control over it, or (b) it and the subsidiary undertaking are managed on a unified basis.

[38] Section 1162 CA 2006 provides the following definitions:

> (3) For the purposes of subsection (2) an undertaking shall be treated as a member of another undertaking—
>
> (a) if any of its subsidiary undertakings is a member of that undertaking, or
>
> (b) if any shares in that other undertaking are held by a person acting on behalf of the undertaking or any of its subsidiary undertakings...
>
> (6) Schedule 7 contains provisions explaining expressions used in this section and otherwise supplementing this section.
>
> (7) In this section and that Schedule references to shares, in relation to an undertaking, are to allotted shares.

actually exercises, significant influence or control over the activities of that trust or firm.

(5) A parent undertaking shall be treated as the parent undertaking of undertakings in relation to which any of its subsidiary undertakings are, or are to be treated as, parent undertakings; and references to its subsidiary undertakings shall be construed accordingly.

DBEIS have issued 19 pages of guidance on sch 1A.[39]

Schedule 7 CA 2006 provides:

1 Introduction

The provisions of this Schedule explain expressions used in section 1162 (parent and subsidiary undertakings) and otherwise supplement that section.

2 Voting rights in an undertaking

(1) In section 1162(2)(a) and (d) the references to the voting rights in an undertaking are to the rights conferred on shareholders in respect of their shares or, in the case of an undertaking not having a share capital, on members, to vote at general meetings of the undertaking on all, or substantially all, matters.

(2) In relation to an undertaking which does not have general meetings at which matters are decided by the exercise of voting rights the references to holding a majority of the voting rights in the undertaking shall be construed as references to having the right under the constitution of the undertaking to direct the overall policy of the undertaking or to alter the terms of its constitution.

3 Right to appoint or remove a majority of the directors

(1) In section 1162(2)(b) the reference to the right to appoint or remove a majority of the board of directors is to the right to appoint or remove directors holding a majority of the voting rights at meetings of the board on all, or substantially all, matters.

(2) An undertaking shall be treated as having the right to appoint to a directorship if—

(a) a person's appointment to it follows necessarily from his appointment as director of the undertaking, or

(b) the directorship is held by the undertaking itself.

(3) A right to appoint or remove which is exercisable only with the consent or concurrence of another person shall be left out of account unless no other person has a right to appoint or, as the case may be, remove in relation to that directorship.

Right to exercise dominant influence

(1) For the purposes of section 1162(2)(c) an undertaking shall not be regarded as having

[39] "Statutory Guidance on the Meaning of 'Significant Influence or Control' over Companies in the Context of the Register of People with Significant Control" (2017) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/675104/psc-statutory-guidance-companies.pdf*

the right to exercise a dominant influence over another undertaking unless it has a right to give directions with respect to the operating and financial policies of that other undertaking which its directors are obliged to comply with whether or not they are for the benefit of that other undertaking.

(2) A “control contract” means a contract in writing conferring such a right which—

(a) is of a kind authorised by the articles of the undertaking in relation to which the right is exercisable, and

(b) is permitted by the law under which that undertaking is established.

(3) This paragraph shall not be read as affecting the construction of section 1162(4)(a).

5 Rights exercisable only in certain circumstances or temporarily incapable of exercise

(1) Rights which are exercisable only in certain circumstances shall be taken into account only—

(a) when the circumstances have arisen, and for so long as they continue to obtain, or

(b) when the circumstances are within the control of the person having the rights.

(2) Rights which are normally exercisable but are temporarily incapable of exercise shall continue to be taken into account.

Rights held by one person on behalf of another

6 Rights held by a person in a fiduciary capacity shall be treated as not held by him.

7(1) Rights held by a person as nominee for another shall be treated as held by the other.

(2) Rights shall be regarded as held as nominee for another if they are exercisable only on his instructions or with his consent or concurrence.

8 Rights attached to shares held by way of security

Rights attached to shares held by way of security shall be treated as held by the person providing the security—

(a) where apart from the right to exercise them for the purpose of preserving the value of the security, or of realising it, the rights are exercisable only in accordance with his instructions, and

(b) where the shares are held in connection with the granting of loans as part of normal business activities and apart from the right to exercise them for the purpose of preserving the value of the security, or of realising it, the rights are exercisable only in his interests.

9 Rights attributed to parent undertaking

(1) Rights shall be treated as held by a parent undertaking if they are held by any of its subsidiary undertakings.

(2) Nothing in paragraph 7 or 8 shall be construed as requiring rights held by a parent undertaking to be treated as held by any of its subsidiary undertakings.

(3) For the purposes of paragraph 8 rights shall be treated as being exercisable in accordance with the instructions or in the interests of an undertaking if they are exercisable in accordance with the instructions of or, as the case may be, in the interests of any group undertaking.

10 Disregard of certain rights

The voting rights in an undertaking shall be reduced by any rights held by the undertaking itself.

11 Supplementary

References in any provision of paragraphs 6 to 10 to rights held by a person include rights falling to be treated as held by him by virtue of any other provision of those paragraphs but not rights which by virtue of any such provision are to be treated as not held by him.

131.18 Beneficial Owner: Partnership

Reg 5(3) MLR provides:

> In these Regulations, "beneficial owner", in relation to a partnership (other than a limited liability partnership[40]), means any individual who—
> (a) ultimately is entitled to or controls (in each case whether directly or indirectly) more than 25% share of the capital or profits of the partnership or more than 25% of the voting rights in the partnership;
> (b) satisfies one or more the conditions set out in Part 1 of Schedule 1 to the Scottish Partnerships (Register of People with Significant Control) Regulations 2017 (references to people with significant control over an eligible Scottish partnership); or
> (c) otherwise exercises ultimate control over the management of the partnership.

131.19 Beneficial Owner: Trust

131.19.1 *Five categories*

Reg 6(1) MLR provides:

> In these Regulations, "beneficial owner", in relation to a trust, means each of the following—

There follows a list of five categories of Beneficial Owner:

> (a) the settlor;[41]
> (b) the trustees;
> (c) the beneficiaries;
> (d) where the individuals (or some of the individuals) benefiting from the trust have not been determined, the class of persons in whose main interest the trust is set up, or operates;
> (e) any individual who has control over the trust.

We have moved a long way from beneficial ownership in the natural

[40] LLPs are governed by the rules for bodies corporate.
Reg 5(4) MLR provides: "In this regulation "limited liability partnership" has the meaning given by the Limited Liability Partnerships Act 2000." But this is otiose: see 85.21.1 (Definition and nature of LLP).

[41] "Settlor" is not defined; see 99.2.16 (Settlor: Non-tax definitions).

sense. "In some way connected with" would be more apt.

131.19.2 *Individual controlling trust*

Reg 6(1) MLR provides:

> In these Regulations, "beneficial owner", in relation to a trust, means...
> (e) any individual who has control over the trust.

Reg 6(2) MLR provides:

> In paragraph (1)(e), "control" means a power (whether exercisable alone, jointly with another person or with the consent of another person) under the trust instrument or by law to—
> (a) dispose of, advance, lend, invest, pay or apply trust property;
> (b) vary or terminate the trust;
> (c) add or remove a person as a beneficiary or to or from a class of beneficiaries;
> (d) appoint or remove trustees or give another individual control over the trust;
> (e) direct, withhold consent to or veto the exercise of a power mentioned in sub-paragraphs (a) to (d).

This is a wide definition: some element of control is sufficient.

131.19.3 *Control of co involved in trust*

Reg 6(4) MLR provides:

> (4) For the purposes of paragraph (1)—
> (a) where an individual is the beneficial owner of a body corporate which is entitled to a specified interest in the capital of the trust property or which has control over the trust, the individual is to be regarded as entitled to the interest or having control over the trust

It may be convenient to have a label to refer to a company within (a), and I call it a company "involved" with the trust.

There are two rules here:

Control of company with specified interest in trust:

> (a) where an individual is the beneficial owner of a body corporate which is entitled to a specified interest[42] in the capital of the trust

[42] Regulation 6(5) MLR provides: "For the purposes of paragraph (4), "specified interest" means a vested interest which is—
(a) in possession or in remainder or reversion (or in Scotland, in fee); and

> property ... the individual is to be regarded as entitled to the interest
>
> *Controller of company with control over trust*
>
> (a) where an individual is the beneficial owner of a body corporate which ... has control over the trust, the individual is to be regarded as having control over the trust

131.19.4 *Control: Exceptions*

Reg 6(4) MLR sets out 4 powers which are not sufficient to amount to "control". Three of these are statutory powers, and the fourth is the power of beneficiaries under the rule in *Saunders v Vautier*:

> For the purposes of paragraph (1) ...
>
> (b) an individual ("P") does not have control solely as a result of—
> (i) P's consent being required in accordance with section 32(1)(c) (power of advancement) of the Trustee Act 1925;
> (ii) any discretion delegated to P under section 34 (power of investment and delegation) of the Pensions Act 1995;
> (iii) the power to give a direction conferred on P by section 19(2) (appointment and retirement of trustee at instance of beneficiaries) of the Trusts of Land and Appointment of Trustees Act 1996; or
> (iv) the power exercisable collectively at common law to vary or extinguish a trust where the beneficiaries under the trust are of full age and capacity and (taken together)
> [A] absolutely entitled to the property subject to the trust
> [B] (or, in Scotland, have a full and unqualified right to the fee).

131.19.5 *Foundation/trust equivalent*

Reg 6(3) MLR provides:

> In these Regulations, "beneficial owner", in relation to a foundation or other legal arrangement similar to a trust, means those individuals who hold equivalent or similar positions to those set out in paragraph (1).[43]

131.20 Beneficial Owner: Estate

Reg 6(6) MLR provides:

(b) defeasible or indefeasible."

[43] See 131.19.1 (Five categories).

> In these Regulations, "beneficial owner", in relation to an estate of a deceased person in the course of administration, means—
> (a) in England and Wales and Northern Ireland, the executor, original or by representation, or administrator for the time being of a deceased person;
> (b) in Scotland, the executor for the purposes of the Executors (Scotland) Act 1900).

A beneficiary is not the Beneficial Owner of an estate. That seems surprising, but it does not much matter.

131.21 Beneficial Owner: Other entities

Reg 6(7) MLR provides:

> In these Regulations, "beneficial owner", in relation to a legal entity or legal arrangement which does not fall within regulation 5 [body corporate] or paragraphs (1) [trust], (3) [entity similar to trust] or (6) [estate] of this regulation, means—
> (a) any individual who benefits from the property of the entity or arrangement;
> (b) where the individuals who benefit from the entity or arrangement have yet to be determined, the class of persons in whose main interest the entity or arrangement is set up or operates;
> (c) any individual who exercises control over the property of the entity or arrangement.
> (8) For the purposes of paragraph (7), where an individual is the beneficial owner of a body corporate which benefits from or exercises control over the property of the entity or arrangement, the individual is to be regarded as benefiting from or exercising control over the property of the entity or arrangement.

131.21.1 *Other cases*

Reg 6(9) MLR provides:

> In these Regulations, "beneficial owner", in any other case, means the individual who ultimately owns or controls the entity or arrangement or on whose behalf a transaction is being conducted.

When could this apply?

131.22 Trusts register (TRS)

With the above 50 pages of definitions in mind, we can turn to consider

TRS and other duties imposed by MLR. I consider TRS first.

131.22.1 *The trusts register*

Reg 45 MLR provides:

> (1) The Commissioners must maintain a register ("the register") of—
> (a) beneficial owners of taxable relevant trusts[44]; and
> (b) potential beneficiaries (referred to in regulation 44(5)(b)) of taxable relevant trusts....

I refer to that as the "**trusts register**".

131.22.2 *Information in register*

Reg 45(10) MLR provides:

> The register must contain the information referred to in—

There are three categories of information:[45]

Para	**Applies to**
44(2)(b), (5)(b)	Taxable relevant trusts
44(2)(b), (5)(b), (10E) -(10G)	Type 10A/B/C trusts
45ZA(3)(4)	Type A/B/C trusts

131.23 TR trust: Duty to register

Reg 45(2) MLR provides:

> The trustees of a taxable relevant trust[46] must within the time specified in paragraph (3) provide the Commissioners with—

There follow four categories of information required. In outline:

Para	**Information about**
45(5)	The trust/trust assets
45(6)	Beneficial Owners of the trust who are individuals, & potential beneficiaries
45(7)	Beneficial Owners of the trust who are legal entities
45(8)	Classes of beneficiaries

I refer to that as **"TR trust data"**.

[44] See 131.14 (Taxable relevant trust).

[45] For clarity I have set this out in tabular form and not a precise quote of the statute.

[46] See 131.14 (Taxable relevant trust).

131.23.1 *Trust/trust asset data*

Regulation 45 MLR provides:

> (2) The trustees of a taxable relevant trust must within the time specified in paragraph (3) provide the Commissioners with-
> (a) the information specified in paragraph (5) in relation to the trust;
>
> (5) The information specified in this paragraph is—
> (a) the full name of the trust;
> (b) the date on which the trust was set up;
> (c) a statement of accounts for the trust,
> [i] describing the trust assets and
> [ii] identifying the value of each category of the trust assets
> at the date on which the information is first provided to the Commissioners (including the address of any property held by the trust);
> (d) the country where the trust is considered to be resident for tax purposes;
> (e) the place where the trust is administered;
> (f) a contact address for the trustees;
> (g) the full name of any advisers who are being paid to provide legal, financial or tax advice to the trustees in relation to the trust.

131.23.2 *Individual Ben. Owner data*

Reg 45 MLR provides:

> (2) The trustees of a taxable relevant trust must within the time specified in paragraph (3) provide the Commissioners with ...
> (b) [i] the information specified in paragraph (6) in relation to each of the individuals referred to in regulation 44(2)(b) and (5)(b)

The individuals referred to at (b)[i], in respect of whom information is required, are:

Para	**Category**	**See**
44(2)(b)	Beneficial Owners	131.31
44(5)(b)	Potential beneficiaries	131.35

The regulation continues with an exception:

> [ii] (but if sub-paragraph (d) applies,[47] this information does not

[47] See 131.23.4 (Class of beneficiaries data).

need to be provided in relation to the beneficiaries of the trust);

Since sub-para (d) will normally apply, this head of disclosure does not normally apply to beneficiaries, but only to Beneficial Owners who are not beneficiaries, such as trustees, settlors and protectors.

Reg 45(6) MLR provides:

> The information specified in this paragraph is—
> (a) the individual's full name;
> (b) the individual's national insurance number or unique taxpayer reference, if any;
> (c) if the individual does not have a national insurance number or unique taxpayer reference, the individual's usual residential address;
> (d) if the address provided under sub-paragraph (c) is not in the UK—
> (i) the individual's passport number or identification card number, with the country of issue and the expiry date of the passport or identification card; or
> (ii) if the individual does not have a passport or identification card, the number, country of issue and expiry date of any equivalent form of identification;
> (e) the individual's date of birth;
> (f) the nature of the individual's role in relation to the trust.

131.23.3 *Corporate Ben. Owner data*

Reg 45 MLR provides:

> (2) The trustees of a taxable relevant trust must within the time specified in paragraph (3) provide the Commissioners with ...
> (c) the information specified in paragraph (7) in relation to each of the legal entities referred to in regulation 44(2)(b);

The legal entities referred to are those which are Beneficial Owners of the trust.[48]

Reg 45(7) MLR provides:

> The information specified in this paragraph is—
> (a) the legal entity's corporate or firm name;
> (b) the legal entity's unique taxpayer reference, if any;
> (c) the registered or principal office of the legal entity;

[48] See 131.31 (Disclosure to relevant person).

> (d) the legal form of the legal entity and the law by which it is governed;
> (e) if applicable, the name of the register of companies in which the legal entity is entered (including details of the country in which it is registered), and its registration number in that register;
> (f) the nature of the entity's role in relation to the trust.

131.23.4 *Class of beneficiaries data*

Reg 45 MLR provides:

> (2) The trustees of a taxable relevant trust must within the time specified in paragraph (3) provide the Commissioners with ...
> (d) the information specified in paragraph (8), where the beneficial owners include a class of beneficiaries, not all of whom have been determined.

Reg 45(8) MLR provides:

> The information specified in this paragraph is a description of the class of persons who are beneficiaries or potential beneficiaries under the trust.

It may be advantageous to ensure that the class is not determined, so as to fall within para (d), but that would normally be the case in any event.

131.23.5 *Annual statement*

Reg 45(9) MLR provides:

> The trustees of a taxable relevant trust must ...
> (b) if the trustees are not aware of any change to any of the information provided under paragraph (2), confirm that fact to the Commissioners on or before 31st January after the tax year in which the trustees are liable to pay any UK taxes.

131.24 Type 10A/B/C trusts

Reg 45 provides:

UK relevant trust	**Non-UK relevant trusts**	
Type 10A trust	***Type 10B trust***	***Type 10C trust***
(10A) The trustees of a taxable relevant trust which	(10B) This paragraph applies to the trustees of a taxable relevant trust which	(10C) This paragraph applies to the trustees of a taxable relevant trust which
[i] is a UK trust, and	[i] is a non-UK trust,	[i] is a non-UK trust and

	[ii] has at least one trustee resident in the UK and	
[ii] is not an EEA registered trust or a trust listed in Schedule 3A [excluded trust],	[iii] is not an EEA registered trust or a trust falling within Schedule 3A [excluded trust],	[ii] is not a trust listed in Schedule 3A [excluded trust],
	[iv] where the trustees of that trust, in their capacity as such— (a) enter into a business relationship with a relevant [regulated] person; or (b) acquire an interest in land in the UK.	[iii] where [A] none of the trustees are resident in the UK and [B] those trustees, in their capacity as such, acquire an interest in land in the UK.
must provide the Commissioners	(10D) Where paragraph (10B) or (10C) applies, the trustees must provide the Commissioners	
with the information specified in paragraph (10E), apart from any information already provided to the Commissioners under regulation 45ZA (at a time when the trust was not a taxable relevant trust)—	[identical]	

I refer to trusts within (10A)-(10C) as **"type 10A/B/C trusts"**.

131.24.1 *Relevant trusts/10A/B/C trusts compared*

Type 10A/B/C trusts are taxable relevant trusts which meet further criteria. Thus type 10A/B/C trusts are taxable relevant trusts, but taxable relevant trust is not necessarily type 10A/B/C.
It may be helpful to compare trust type 10A with relevant trust type (i).

Rel trust type (i)	**Type 10A**
a UK trust which is an express trust	a taxable relevant trust which [i] is a UK trust, and [ii] is not an EEA registered trust

or a trust listed in Schedule 3A
[excluded trust]

The difference is that EEA/excluded trusts are not type A but may still be a relevant trust type (i).

It may be helpful to compare trust types 10B/C with relevant trust type (iii).

Rel trust type (iii)	**Type10 B**	**Type 10C**
A non-UK trust which is an express trust, is not a trust listed in Schedule 3A (excluded trusts) and whose trustees (in their capacity as such)— (aa) acquire an interest in land in the UK; or (bb) enter into a business relationship with a relevant [regulated] person, where at least one of those trustees is resident in the UK and the trust is not an EEA registered trust;	a taxable relevant trust which [i] is a non-UK trust, [ii] has at least one trustee resident in the UK and [iii] is not an EEA registered trust or a trust falling within Schedule 3A [excluded trust], [iv] where the trustees of that trust, in their capacity as such— (a) enter into a business relationship with a relevant [regulated] person; or (b) acquire an interest in land in the UK.	a taxable relevant trust which [i] is a non-UK trust and [ii] is not a trust listed in Schedule 3A [excluded trust], [iii] where [A] none of the trustees are resident in the UK and [B] those trustees, in their capacity as such, acquire an interest in land in the UK.

The difference between relevant trust type (iii) and type B is that type B requires at least one UK trustee.

The difference between relevant trust type (iii) and type C is that type C requires UK land.

131.24.2 *Type 10A/B/C: Duty to register*

As type 10A/B/C trusts are relevant trusts they already require the TR trust data to be registered.[49] I refer to that as **"10A/B/C trust data".**

Reg 45 MLR specifies 3 items of information for this:

> (10E) The trustees must provide the Commissioners with the following information
>
> [i] in relation to each of the beneficial owners of the trust who is an

[49] See 131.23 (TR trust: Register data).

> individual, and
>
> [ii] in relation to any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes—
>
> (a) the individual's country of residence;
>
> (b) the individual's nationality;
>
> (c) the nature and extent of the individual's beneficial interest,
>
> but if paragraph (10F) applies, this information does not need to be provided in relation to the beneficiaries of the trust.
>
> (10F) Where the beneficial owners include a class of beneficiaries, not all of whom have been determined, the information to be provided under paragraph (10E) is a description of the class of persons who are beneficiaries or potential beneficiaries under the trust.

Para 10F is the equivalent of para 45(2)(b)[ii].[50]

131.24.3 *3rd country entity data*

Reg 45(10G) MLR provides:

> The trustees of a trust to which paragraph (10A) or (10B) applies must—
>
> (a) if they have a controlling interest in a third country entity, provide the Commissioners with the following information, apart from any information already provided under regulation 45ZA(4), at the same time as providing the information under paragraph (10E)—
>
> (i) the third country entity's corporate or firm name;
>
> (ii) the country or territory by whose law the third country entity is governed;
>
> (iii) the registered or principal office of the third country entity;
>
> (b) if they acquire an interest in a third country entity after providing the information under paragraph (10E), provide the Commissioners with the information specified in this paragraph within 90 days of the date on which they acquired that interest.

131.25 Type A/B/C trusts

131.25.1 *Types A/B/C*

Reg 45ZA(2) MLR identifies 3 types of trusts for the purposes of reg 45ZA. These are similar to relevant trust types (i) and (iii). It is helpful

[50] See 131.23.2 (Individual Ben. Owner data),

to see them side by side:

Type A trust	Type B trust	Type C trust
(a) a "type A trust" is a UK trust which	(b) a "type B trust" is a non-UK trust which	(c) a "type C trust" is a non-UK trust which
	has at least one trustee resident in the UK,	
is an express trust and	is an express trust and	is an express trust and
is not an EEA registered trust or	is not an EEA registered trust or	
a trust listed in Schedule 3A [excluded trust];	a trust listed in Schedule 3A [excluded trust],	is not a trust listed in Schedule 3A [excluded trust],
	where the trustees of that trust, in their capacity as such— (i) enter into a business relationship with a relevant [regulated] person; or (ii) acquire an interest in land in the UK;	where none of the trustees are resident in the UK and those trustees, in their capacity as such, acquire an interest in land in the UK.

131.25.2 *Relevant trusts/Types A/B/C compared*

It may be helpful to compare trust type A with relevant trust type (i).

Rel trust type (i)	Type A
a UK trust which is an express trust	a UK trust which is an express trust and is not an EEA registered trust or a trust listed in Schedule 3A [excluded trust];

The difference is that EEA/excluded trusts are not type A but may still be a relevant trust type (i).

It may be helpful to compare trust types B/C with relevant trust type (iii).

Rel trust type (iii)	Type B	Type C
A non-UK trust which is an express trust, is not a trust listed in Schedule 3A	a non-UK trust which has at least one trustee resident in the UK, is an	a "type C trust" is a non-UK trust which is an express trust and is not a

(excluded trusts) and whose trustees (in their capacity as such)— (aa) acquire an interest in land in the UK; or (bb) enter into a business relationship with a relevant [regulated] person, where at least one of those trustees is resident in the UK and the trust is not an EEA registered trust;	express trust and is not an EEA registered trust or a trust listed in Schedule 3A, where the trustees of that trust, in their capacity as such— (i) enter into a business relationship with a relevant [regulated] person; or (ii) acquire an interest in land in the UK;	trust listed in Schedule 3A, where none of the trustees are resident in the UK and those trustees, in their capacity as such, acquire an interest in land in the UK.

The difference between relevant trust type (iii) and type B is that type B requires at least one UK trustee.

The difference between relevant trust type (iii) and type C is that type C requires UK land.

Type A/B/C trusts will always be relevant trusts but it is possible to have relevant trusts which are not type A/B/C trusts.

131.25.3 *Type A/B/C: Duty to register*

Reg 45ZA(1) MLR provides:

> In relation to trusts which are—
>
> (a) type A trusts, other than taxable relevant trusts;
> (b) type B trusts, other than taxable relevant trusts;
> (c) type C trusts, other than taxable relevant trusts,
>
> the information to be contained in the register maintained under this Part is the information referred to in paragraphs (3) and (4), and in this paragraph, "taxable relevant trust" has the meaning given in regulation 45.

I refer to this as **"type A/B/C trust data"**.

Reg 45ZA(3) MLR provides:

> The trustees of a trust to which paragraph (1) applies [in short, type A/B/C trusts] must, within the time specified in paragraph (5), provide the Commissioners with the following information, apart from any information already provided to the Commissioners under regulation 45 (at a time when the trust was a taxable relevant trust within the meaning of that regulation)—
>
> (a) the information specified in paragraphs (i) to (v)
>
> [I] relation to each of the beneficial owners of the trust who is

> an individual, and
>
> [II] in relation to any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes—
>
> (i) the individual's full name;
>
> (ii) the individual's month and year of birth;
>
> (iii) the individual's country of residence;
>
> (iv) the individual's nationality;
>
> (v) the nature and extent of the individual's beneficial interest,
>
> but if sub-paragraph (b) applies, this information does not need to be provided in relation to the beneficiaries of the trust;
>
> (b) where the beneficial owners include a class of beneficiaries, not all of whom have been determined, a description of the class of persons who are beneficiaries or potential beneficiaries under the trust;
>
> (c) the information specified in paragraphs (i) to (iii) in relation to each of the beneficial owners of the trust who is a legal entity—
>
> (i) the legal entity's corporate or firm name;
>
> (ii) the registered or principal office of the legal entity;
>
> (iii) the nature of the entity's role in relation to the trust.

131.25.4 *3rd country entity: Type A/B trusts*

Reg 45ZA(4) MLR provides:

> The trustees of a trust to which paragraph (1)(a) or (b) applies [in short, type A/B trusts] must—
>
> (a) if they have a controlling interest in a third country entity, provide the Commissioners with the following information, apart from any information already provided under regulation 45(10G), at the same time as providing the information under paragraph (3)—
>
> (i) the third country entity's corporate or firm name;
>
> (ii) the country or territory by whose law the third country entity is governed;
>
> (iii) the registered or principal office of the third country entity;
>
> (b) if they acquire an interest in a third country entity after providing the information under paragraph (3), provide the Commissioners with the information specified in this paragraph within 90 days of the date on which they acquired that interest.

131.26 UK trust holds Irish bond

To discuss TRS in other jurisdictions would require a whole book and perhaps several volumes. I do not attempt that here. But one point particularly concerns UK trustees. STEP say:

> ... STEP's GDPR group understands from Office of Revenue Commissioners Ireland guidance that a UK trust that holds an investment bond[51] in the Republic of Ireland
> [1] is deemed to have a 'business relationship' in that country and
> [2] is therefore obliged to register on Ireland's Central Register of Beneficial Ownership of Trusts (CRBOT),
> as well as the UK Trust Registration Service (TRS).[52]

It is not uncommon for UK trustees to hold such bonds.

As to point [1], it seems reasonably clear that holding an investment bond is a business relationship, as defined.[53]

As to point [2], if the facts were reversed, a trust with wholly *Irish* trustees holding a *UK* bond would not have to register under TRS. But it seems that the EU rules are more stringent. Irish Revenue guidance provides:[54]

> Trusts where none of the trustees are resident in the European Union (EU) and the trust is not administered in the EU must register with the CRBOT [Central Register of Beneficial Ownership of Trusts] if a trustee enters a business relationship in the State on behalf of the trust... This will apply as long as the business relationship exists...

Dual registration would not have been required when the UK was in the EU, it is one of the bureaucratic burdens arising from Brexit.

STEP say:[55]

> UK trustees face difficulties in registering on CRBOT. In order to do so, they first have to register with the Office of the Revenue Commissioners of Ireland's (the Revenue's) online service, which requires them to

[51] The term is not defined, but context shows it refers to life insurance policies, life annuity contracts and capital redemption policies, within the UK chargeable event regime.

[52] STEP UK News Digest (16 Aug 2022).

[53] See 132.4 (Business relationship).

[54] *https://www.revenue.ie/en/crbot/trusts-that-must-register/non-residents.aspx*
(I have not reviewed the relevant legislation which is the [Ireland] European Union (Anti-Money Laundering: Beneficial Ownership of Trusts) Regulations 2021 and am unsure if an updated version of the regulations is readily available).

[55] *https://www.step.org/industry-news/ireland-suspends-non-registration-penalties-uk-trustees-until-registration-simplified*

> already have a unique identifying number called a TAIN. Non-residents of Ireland have typically not been issued with an Irish tax number. The Revenue has recognised the problem for UK trustees. Its latest guidance says it is working on simplifying access to the CRBOT for such trustees or their representatives and it will not levy penalties on UK trustees for non-registration in this interim period. It says UK trust representatives who have not yet applied for a TAIN now need not do so, although those who have already submitted a TAIN application will soon receive confirmation that their application has been received.

Going forward, other matters being equal, UK trustees might prefer to avoid:

(1) business relationships with EU entities; and in particular
(2) investment in Irish or other EU investment bonds

131.27 Estates

Estates do not have to register under TRS as they are not trusts.[56] However "complex" estates need to register with HMRC in order to obtain a UTR and submit a return and this is done via the TRS.[57]

131.28 Unit trusts/CIS

131.28.1 *Unit trusts*

Prior to 3/2/2023, TRSM 10030 provided:

> Unit trusts (both authorised and unauthorised) are not required to register on TRS.

That was an informal concession or perhaps just a mistake. But TRSM now provides:

> **TRSM10030 common types of trusts and interaction with the register** [Feb 2023]
> Authorised unit trusts are not required to register on TRS as registrable express trusts (see TRSM23110) but may have to register for taxable purposes if they have a UK tax liability (see TRSM25000).

That is, AUTs are excluded trusts.[58] TRSM continues:

> There is no specific exclusion for unauthorised unit trusts. Unauthorised

[56] See 88.1.1 (Estate is not a trust).

[57] See 89.21 (Tax returns & registration).

[58] See 131.12.9 (Authorised unit trusts).

> unit trusts should register if they meet the general registration requirements set out at TRSM21010.

I would have thought that unauthorised unit trusts are excluded trusts.[59] But unit trusts still have to register if they become taxable relevant trusts.

131.28.2 *CIS trustees*

Reg 44(11) MLR provides:

> For the purposes of this regulation, in the case of a relevant trust which is a collective investment scheme, a reference to the trustees of a relevant trust includes a reference to the manager or operator of the collective investment scheme.

This applies only for the purposes of reg 44, so it is repeated verbatim in reg 45(15) MLR.

131.28.3 *CIS: Definition*

Reg 42(2)(f) MLR provides:

> a "collective investment scheme" has the meaning given in regulation 12H of the International Tax Compliance Regulations 2015.

That takes us to reg 12H(3) International Tax Compliance Regulations 2015, which is wider than the standard FSMA definition:

> In this regulation "collective investment scheme" means—
> (a) an investment trust within the meaning of the Corporation Tax Acts,
> (b) a venture capital trust within the meaning of Part 6 of ITA 2007, or
> (c) any arrangements that are a "collective investment scheme" within the meaning of the Financial Services and Markets Act 2000.

131.29 Data format

The same rule applies throughout Part 5 MLR:

Reg 45(4) MLR	**Reg 45(10I)**	**Reg 45ZA*(7)***
The information required under paragraphs (2) and	The information required under paragraphs (10E)	The information required under paragraphs (3), (4)

[59] See 131.12.8 (Safeguarding/administering investments).

(9)[60] must be provided in such form as the Commissioners reasonably require.	to (10H) must be provided in such form as the Commissioners reasonably require.	and (6) must be provided in such form as the Commissioners reasonably require.

131.30 Trust record keeping

Reg 44(1) MLR provides:

> The trustees of a relevant trust[61] must maintain accurate and up-to-date records in writing
> [a] of all the beneficial owners of the trust, and
> [b] of any potential beneficiaries referred to in paragraph (5)(b),[62]
> containing the information required by regulation 45(2)(b) to (d) and (5)(f) and (g).[63]

If the trust is registered, this just repeats the data required on registration. But whether or not the trust is registered, this is data which one would expect trustees to have to hand, and they will need it in order to deal with relevant (regulated) persons.

The equivalent rule for companies is in CA 2006, not in the MLR.

131.31 Disclosure to relevant person

Reg 43(1): Body corporate	**Reg 44(2): Trust**
(1) When a UK body corporate which is not listed on a regulated market [i] enters into a relevant transaction with a relevant [regulated] person, or [ii] forms a business relationship with a relevant [regulated] person, the body corporate must	When a trustee of a relevant trust, acting as trustee, [i] enters into a relevant transaction with a relevant [regulated] person, or [ii] forms a business relationship with a relevant [regulated] person, the trustee must—
on request from the relevant [regulated] person provide the relevant [regulated] person with— (a) information identifying— (i) its name, registered number, registered office and principal place of business;	(a) inform the relevant [regulated] person that it is acting as trustee; and (b) on request from the relevant [regulated] person, provide the

[60] See 131.23 (Duty to register).

[61] See 131.5 ("Relevant trust").

[62] See 131.35 (Disclosure to authority).

[63] See 131.23 (TR trust: Register data).

(ii) its board of directors, or if there is no board, the members of the equivalent management body;
(iii) the senior persons responsible for its operations;
(iv) the law to which it is subject;
(v) its legal owners;
(vi) its beneficial owners; and
(b) its articles of association or other governing documents.

(2) For the purposes of paragraph (1)(a)(v) and (vi), references to the legal owners and beneficial owners of a UK body corporate include a reference to the legal owners and beneficial owners of any body corporate or trust which is directly or indirectly a legal owner or beneficial owner of that body corporate.

(3) Paragraph (1)(a)(vi) does not apply if no person qualifies as a beneficial owner (within the meaning of regulation 5(1)) of—
(a) the UK body corporate; or
(b) any body corporate which is directly or indirectly the owner of that UK body corporate.

relevant [regulated] person with information identifying all the beneficial owners of the trust (which, in the case of a class of beneficiaries, may be done by describing the class of persons who are beneficiaries or potential beneficiaries under the trust).

This assists the relevant (regulated) person to comply with AML/KYC obligations discussed in the next chapter..

131.31.1 *"Relevant transaction"*

Reg 43(9)/44(4) MLR provide:

> For the purposes of this regulation, a "relevant transaction" means a transaction in relation to which the relevant [regulated] person is required to apply customer due diligence measures under regulation 27.

131.32 Changes to trust data

131.32.1 *TR trusts: Data changes*

Reg 45(9) MLR provides:

> The trustees of a taxable relevant trust must—
> (a) if a trustee becomes aware that any of the information provided to the Commissioners under paragraph (2) (other than

> information provided in relation to the value of the trust assets under paragraph (5)(c)) has changed, notify the Commissioners of the change and the date on which it occurred on or before 31st January—
>
> (i) after the tax year in which the change occurred; or
>
> (ii) if the trustees are not liable to pay any UK taxes in that year, after the tax year in which the trustees are liable to pay any UK taxes

131.32.2 *Type 10A/B/C: Data changes*

Reg 45(10H) MLR provides:

> The trustees of a taxable relevant trust to which paragraph (10A), (10B) or (10C) applies must, if the trustee becomes aware that any of the information provided to the Commissioners under paragraphs (10E) to (10G) has changed, notify the Commissioners of the change and the date on which it occurred within 90 days of the trustee becoming aware of the change.

131.32.3 *Type A/B/C: Data changes*

Reg 45ZA(6) MLR provides:

> If a trustee becomes aware that any of the information provided to the Commissioners under paragraph (3) or (4) has changed, the trustee must notify the Commissioners of the change within 90 days of the trustee becoming aware of the change.

131.32.4 *Changes: business relationship*

Reg 43(4): Body corporate	**Reg 44(3): Trust**
If, during the course of a business relationship, there is any change in the identity of the individuals or information falling within paragraph (1), the UK body corporate referred to in paragraph (1) must notify the relevant [regulated] person of the change and the date on which it occurred within fourteen days from the date on which the body corporate becomes aware of the change.	If, during the course of a business relationship, there is any change in the information provided under paragraph (2), the trustees must notify the relevant [regulated] person of the change and the date on which it occurred within fourteen days from the date on which any one of the trustees became aware of the change.

131.33 Time limits

131.33.1 *TR trust data: Time limit*

Reg 45(3) MLR provides:

> The information required under paragraph (2)[64] must, apart from any information already provided to the Commissioners under regulation 45ZA (at a time when the trust was not a taxable relevant trust), be provided—
>
> (a) on or before 31st January after the tax year in which the trustees were first liable to pay any of the taxes referred to in paragraph (14) ("UK taxes"),[65] in the case of a trust which is set up before 6th April 2021;
>
> (b) on or before 1st September 2022, in the case of a trust which is set up after 5th April 2021 where the trustees become liable to pay UK taxes before 4th June 2022;
>
> (c) within 90 days of the trustees becoming liable to pay UK taxes, in any other case.

It is considered that the date that the trustees "become liable" is the date the tax is due to be paid (not the date that income/gains may arise). But it would be good practice to register promptly once it is known that the trustees will have to do so.

131.33.2 *10A/B/C data: Time limit*

The 10A/B/C time limits are as follows:

UK taxable relevant trust	**Non-UK taxable relevant trusts**
(a) on or before 1st September 2022, where the trustees become liable to pay UK taxes before 4th June 2022;	[identical]
(b) within 90 days of the trustees becoming liable to pay UK taxes, in any other case.	(b) otherwise, within 90 days of the trustees acquiring the land or (where paragraph (10B)(a) applies) entering into the business relationship.

[64] See 131.23 (Duty to register).

[65] For this list of taxes, see 131.14 (Taxable relevant trust).

131.33.3 *Type A/B/C trust data: Time limit*

Reg 45ZA(5) MLR provides:

> The information required under paragraph (3)[66] must be provided—
> (a) on or before 1st September 2022, in the case of a trust which first falls within paragraph (1)(a), (b) or (c) before 4th June 2022;
> (b) in any other case, within 90 days of the trust being set up, or, if later, within 90 days of the trust first falling within paragraph (1)(a), (b) or (c).

131.34 Retention of data

Reg 44(9) MLR provides:

> If the trustees of a relevant trust are relevant [regulated] persons who are being paid to act as trustees of that trust, they must—
> (a) retain the records referred to in paragraph (1) for a period of five years after the date on which the final distribution is made under the trust;
> (b) make arrangements for those records to be deleted at the end of that period, unless—
> (i) the trustees are required to retain them by or under any enactment or for the purpose of court proceedings;
> (ii) any person to whom information in a record relates consents to the retention of that information; or
> (iii) the trustees have reasonable grounds for believing that records containing the personal data need to be retained for the purpose of legal proceedings.

Reg 45(10J) MLR provides:

> The Commissioners must keep the information referred to in paragraph (10) on the register for at least five years, and no more than 10 years, after the trust to which it relates has ceased to exist or has ceased to be a type of trust referred to in paragraph (10).

131.35 Authorities information power

Reg 43(5): Body corporate	**Reg 44(5): Trust**
The UK body corporate must on request provide all or part of the information referred to in paragraph	The trustees of a relevant trust must on request provide information to any law enforcement authority—

[66] See 131.23.3 (Type A/B/C: Register data).

(1) to a law enforcement authority.	(a) about the beneficial owners of the trust; and (b) about any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes.

HMRC and the other authorities have so many information powers one wonders whether this one is needed. But it does no harm.

Reg 43(6)/44(6) provide the time limit for this disclosure:

> Information requested under paragraph (5), must be provided before the end of such reasonable period as may be specified by the law enforcement authority.

131.35.1 *Law enforcement authority*

This term is used in reg 43(5)/44(5).

Reg 44(10) MLR provides:

> For the purposes of this regulation, any of the following authorities is a law enforcement authority—
> (a) the Commissioners;
> (b) the FCA;
> (c) the NCA;
> (d) police forces maintained under section 2 of the Police Act 1996;
> (e) the Police of the Metropolis;
> (f) the Police for the City of London;
> (g) the Police Service of Scotland;
> (h) the Police Service of Northern Ireland;
> (i) the Serious Fraud Office.

131.36 MLR disclosure immunity

Reg 43/44 MLR provide:

> (7) The provision of information in accordance with this regulation is not to be taken to breach any restriction, however imposed, on the disclosure of information.
> (8) Where a disclosure is made in good faith in accordance with this regulation no civil liability arises in respect of the disclosure on the part of the UK body corporate.

See 133.8 (POCA disclosure immunity).

131.37 Third party access

131.37.1 *3 information rights*

There are 3 information rights. In short:

Para	**Information**	**Available if**
45ZB(1)	Accessible information	Legitimate interest
45ZB(2)	To meet MLR obligations	Trustee
45ZB(3)	Accessible info about Type A/B trust	In line with objects of directive

Reg 45ZB MLR provides:

> (1) The Commissioners must make the accessible information available to a person who demonstrates to the Commissioners a legitimate interest in the beneficial ownership of a trust, where that person so requests.
> (2) The Commissioners must make available to a trustee, on a request by that trustee, such information as the trustee reasonably requires in order to enable a relevant [regulated] person to meet the relevant [regulated] person's obligations under Part 3, where that relevant [regulated] person proposes to—
> (a) form a business relationship with the trust; or
> (b) enter into a transaction with the trust in relation to which the relevant [regulated] person is required to apply customer due diligence measures under regulation 27.
> (3) The Commissioners must make the accessible information available to a person who makes a written request about a type A trust or a type B trust (within the meaning given in regulation 45ZA(2)), where the trustees of that trust have a controlling interest in a third country entity.

Type C trusts do not fall within (3).

Law Soc non-corporate TRS guidance provides (p.6):

> Where a trust holds a controlling or majority (50% plus) interest in a third country entity, a third party can request beneficial ownership information without needing to demonstrate any legitimate interest. However, HMRC has indicated that the information will only be made available if the request is in line with the objectives of the 4th and 5th Directives This means the requester will need to be able to show that the request is connected with the detection or prevention of money laundering or terrorist financing. Requesters will need to be able to identify the specific third country entity and its relationship with the trust. They will not be able to access information about a non-UK

resident trust with a controlling stake in a third country entity if the only reason the trust is registered is because it has acquired an interest in UK land on or after 6 October 2020 and has no UK resident trustees or it has no UK tax liabilities.

131.37.2 *Accessible information*

Reg 45ZB(8) MLR provides:

> For the purposes of this regulation, the "accessible information" means the details specified in paragraph (9) or (10) which are held on the register in relation to a beneficial owner of a type A trust or a type B trust (within the meaning given in regulation 45ZA(2)), or in relation to an individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes.
>
> (9) The details are, in relation to an individual—
>
> (a) the individual's full name;
> (b) the individual's month and year of birth;
> (c) the individual's country of residence;
> (d) the individual's nationality;
> (e) the nature and extent of the individual's beneficial interest.
>
> (10) The details are, in relation to a legal entity—
>
> (a) the legal entity's corporate or firm name;
> (b) the registered or principal office of the legal entity;
> (c) the nature of the entity's role in relation to the trust.

131.37.3 *Fees and procedure*

Reg 45ZB(4) MLR provides:

> The Commissioners may—
>
> (a) charge a fee to any person making a request for accessible information under paragraph (1) or (3), which must not exceed such amount as the Commissioners consider will enable them to meet any expenses reasonably incurred by them in dealing with such requests, including expenses incurred in maintaining the register;
> (b) require the person to submit the request in such a manner as the Commissioners may reasonably require, including by requiring the person to register in a manner specified by the Commissioners; and
> (c) require the person to provide such information to support the request as the Commissioners may specify.

131.37.4 *Disclosure exemptions*

There are exemptions for Beneficial Owners who are in some way vulnerable, in short:

Para	**Exemption**
(a)	Disproportionate risk of kidnapping, extortion, etc
(b)	Under 18
(c)	Mental patients

In full detail, reg 45ZB(5) MLR provides:

> Paragraphs (1) and (3) do not apply to the accessible information in a case where, and to the extent that, the Commissioners consider that the information should be exempt because—
>
> (a) the Commissioners consider that making the information available would expose the beneficial owner to a disproportionate risk of fraud, kidnapping, blackmail, extortion, harassment, violence or intimidation;
>
> (b) the beneficial owner is under the age of 18; or
>
> (c) the beneficial owner—
>
> (i) lacks capacity within the meaning of section 2 of the Mental Capacity Act 2005;
>
> (ii) is incapable within the meaning of section 1 of the Adults with Incapacity (Scotland) Act 2000; or
>
> (iii) is incapable by reason of mental disorder within the meaning of Article 3(1) of the Mental Health (Northern Ireland) Order 1986,
>
> and in this paragraph, references to the beneficial owner include references to any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes.

Regulation 45ZB(6)(7) MLR deals with procedures:

> (6) Where the Commissioners decide to exempt any of the accessible information in accordance with paragraph (5), the Commissioners must inform the person requesting the information of the decision, explain that the person is entitled to seek a review, and specify the period in which the person must inform the Commissioners that the person wishes to seek a review (which must not be less than 30 days beginning with the day on which the person is informed of the decision).
>
> (7) If the person seeks a review, the Commissioners may decide to—
>
> (a) uphold the decision to exempt the information;

(b) make the information available; or
(c) exempt less of the requested information and make more of the requested information available,

and must inform the person who made the request of their decision.

131.38 Legitimate interest

Reg 45ZB(11) MLR provides:

> For the purposes of this regulation, the Commissioners must take account of the following when determining whether a person has a legitimate interest in the beneficial ownership of a trust—
>
> (a) whether the person is involved in an investigation into money laundering, terrorist financing or proliferation financing;
> (b) whether the person is making the request for accessible information in order to further an investigation into a specified suspected instance of money laundering, terrorist financing or proliferation financing;
> (c) whether the disclosure of the information to that person would be likely to prejudice—
>   (i) any criminal investigation or criminal proceedings;
>   (ii) any other investigation mentioned in section 342(1) of the Proceeds of Crime Act 2002 (offences of prejudicing investigation); or
>   (iii) any investigation by an appropriate officer (within the meaning given in regulation 87(10)) into a potential contravention of a relevant requirement,
>
> which is or are being, or is or are about to be, conducted;
> (d) whether, having regard to the information produced by the person making the request, it is reasonable for that person to suspect that the trust is being used for money laundering, terrorist financing or proliferation financing.

Law Soc non-corporate TRS guidance provides (p.6):

> This means that third parties will need to identify a specific trust and present detailed information as to why they suspect it is being used for money laundering or terrorist financing as well as why access to information on the TRS would assist, before they are granted access to beneficial owner information.

CHAPTER ONE HUNDRED AND THIRTY TWO

CUSTOMER DUE DILIGENCE

132.1 Customer due diligence: Introduction
132.2 LSAG guidance
132.3 Regulators
132.3.1 Supervisory authority

132.29.5 High-risk countries
132.29.6 Outsourcing CDD service provider
132.30 Record-keeping

132.1 Customer due diligence: Introduction

This chapter considers:

- customer due diligence (CDD)
- associated duties: risk assessments, policies, training, etc

A full discussion would need volumes. I focus on the rules as they affect tax advisers. I do not consider penalties.

The law is in Parts 2-4 MLR.[1]

For a critique of the rules, see Saperstein *et al.*, "The Failure of Anti-Money Laundering Regulation: Where is the Cost-Benefit Analysis?"[2]

Perhaps belatedly, a consultation published March 2024 announced a

[1] See 131.1 (MLR: Introduction).

[2] *https://scholarship.law.nd.edu/ndlr_online/vol91/iss1/4/*

broad review of the MLR.[3]

132.2 LSAG guidance

The principal guidance for lawyers is Anti-money Laundering Guidance for the Legal Sector, published by LSAG ("LSAG guidance").[4]

The guidance is split into four parts, numbered 1, 2a, 2b, and 2c.

Part 2a provides:

> This is one of three "Part 2" sections of the Legal Sector Affinity Group (LSAG) anti- money laundering guidance for the legal sector in the UK. These Part 2 sections are intended to provide more tailored AML guidance for specific types of legal practices or practitioners or those providing certain services.
> • Part 2a – Barristers/Advocates
> • Part 2b – Trust or Company Service Providers (TCSP)
> • Part 2c – Notaries
> Barristers and advocates should read this part of the Guidance in the first instance, drawing on Part 1 where relevant.
> 2b and 2c are to be read alongside Part 1 of the guidance.

So Part 2a (155 pages) is meant to stand alone, but Part 1 (220 pages) might also be relevant. References below are to Part 2a unless otherwise stated. Part 1 is dated 2023 and Part 2a is dated 2021.

The LSAG guidance is supplemented by an addendum published in December 2023.

132.2.1 *Status of LSAG guidance*

LSAG guidance provides:

Guidance Part 1 para 1.1	**Guidance Part 2a (Introduction)**
In accordance with[5]	[Identical]

[3] *https://www.gov.uk/government/consultations/improving-the-effectiveness-of-the-money-laundering-regulations*
This is issued pursuant to reg 47 MLR which requires supervisory authorities to issue guidance.

[4] *https://www.barcouncilethics.co.uk/documents/money-laundering-terrorist-financing/*
At the time of writing (Mar 2023) this version (described as last reviewed 1/7/22) is more up to date than that on the Law Society website.

[5] For clarity I have adopted my usual abbreviations here rather than the wording of the guidance.

[1] ss330(8) and 331(7) POCA, [2] s.21A(6) Terrorism Act 2000, and [3] Reg 86(2)(b) MLA, the court is required to consider compliance with this guidance in assessing whether a person committed an offence or took all reasonable steps and exercised all due diligence to avoid committing the offence.	once approved the court is required to consider compliance with this guidance in assessing whether a person committed an offence or took all reasonable steps and exercised all due diligence to avoid committing the offence.

One would expect Part 2a to have been formally approved at the same time as Part 1, which was approved in 2022, but I am not sure if that happened. No doubt an updated version of Part 2a will be published in due course which will clarify the point.

Statute-recognised guidance seems like a halfway house between law and conventional guidance, but I am not sure that it makes much difference to outcomes in practice. If that is right, there is likewise no practical difference between:

(1) Guidance approved by HM Treasury (LSAG guidance part 1); and
(2) Guidance published by LSAG pending approval (LSAG parts 2a/b/c)

132.3 Regulators

132.3.1 *Supervisory authority*

Reg 3(1) MLR provides:

> "supervisory authority" in relation to-
> (a) any relevant [regulated] person, means the supervisory authority specified for such a person by regulation 7;

So we turn to reg 7(b):

> (b) each of the professional bodies listed in Schedule 1 is the supervisory authority for relevant persons who are members of it, or regulated or supervised by it

Schedule 1 MLR sets out a list of 22 professional bodies - who would have thought we had so many? This list includes, unsurprisingly, the Law Society and the Bar Council.

132.3.2 *Bar Council & BSB*

The BSB website explains:[6]

> The General Council of the Bar is the designated Professional Body Supervisor under the Regulations. In line with our Protocol for ensuring regulatory independence, supervisory responsibility is delegated to the Bar Standards Board. We have a Protocol for Anti-Money Laundering and Counter-Terrorist Financing[7] with the Bar Council which sets our respective roles under the Regulations.

The full titles of these two Protocols are:

- General Council of the Bar and Bar Standards Board: Protocol for ensuring regulatory independence and the provision of assurance
- Memorandum of Understanding: Anti-Money Laundering and Counter-Terrorist Financing

132.3.3 *OPBAS*

The Office for Professional Body Anti-Money Laundering Supervision (OPBAS) is, I think, a branch of the FCA.[8] It is governed (or at least, empowered) by The Oversight of Professional Body Anti-Money Laundering and Counter Terrorist Financing Supervision Regulations 2017. According to its website, "OPBAS supervises the 25[9] professional body supervisors in the legal and accountancy sectors". It is the regulator's regulator.

OPBAS has published a document called a "Sourcebook"[10] which "provides information for professional body supervisors on how to comply effectively with their obligations under the MLR".[11]

[6] *https://www.barstandardsboard.org.uk/for-barristers/compliance-with-your-obligations/anti-money-laundering-counter-terrorist-financing.html#:~:text=Protocol%20with%20the%20Bar%20Council&text=In%20line%20with%20our%20Protocol,respective%20roles%20under%20the%20Regulations.*

[7] The title of this document is:

[8] In its website it describes itself as "housed" within the FCA.

[9] *https://www.fca.org.uk/about/how-we-operate/who-work-with/opbas#section-opbas-sourcebook* accessed June 2023. I think 25 may be a slip for 22, but it must be difficult to keep track.

[10] *https://www.fca.org.uk/about/how-we-operate/who-work-with/opbas#section-opbas-sourcebook*
At the time of writing, the current version is dated Jan 2023.

[11] Sourcebook, para 1.1

132.3.4 *LSAG*

Legal Sector Affinity Group comprises legal sector regulators and representative bodies.[12] "Affinity" seems a strange word in this context. The label does not matter, but where does it come from?

132.3.5 *AML regulation: The future*

This topic is currently the subject of consultation; see HMT, "Reform of the Anti-Money Laundering and Counter-Terrorism Financing Supervisory Regime: Consultation" (June 2023).[13]

132.4 Business relationship

This term is used throughout MLR.

The starting point is reg 4(1) MLR which provides:

> For the purpose of these Regulations, "business relationship" means a business, professional or commercial relationship between a relevant person and a customer, which—
> (a) arises out of the business of the relevant person, and
> (b) is expected by the relevant person, at the time when contact is established, to have an element of duration.

A transaction that does not have (or more accurately, is not expected to have) an element of duration is known as an **"occasional transaction"**. A single piece of advice does not make a Business Relationship unless:

(1) the adviser expects more work from the same customer; or
(2) the work itself takes so long as to have an element of duration

LSAG guidance part 1 provides:

> **6.4 Definition of Business Relationship**
> There may be several indicators that a client is establishing a business relationship, as opposed to the matter being an "occasional transaction" including but not limited to:
> [1] an explicit expectation from the client or practice that a business relationship is being established;
> [2] the nature of the client or the transaction suggests they may wish to

[12] LSAG does not have a website, and I have not seen a list of its members, but perhaps that does not matter for present purposes.

[13] *https://www.gov.uk/government/consultations/reforming-anti-money-laundering-and-counter-terrorism-financing-supervision*

> undertake more than one transaction e.g., it is in the nature of their business;
>
> [3] or the transaction itself will inherently take time to complete e.g., the buying/selling of real property.
>
> The definition of business relationship under the Regulations requires the legal practitioner to have an expectation at the time the contact is established, that the relationship will have "an element of duration".

The guidance continues:

> ... it is reasonable to assume that any legal professional will have an expectation of possible further business from any initial contact made with a client. When dealing with a client for the first time, you should assume that a business relationship is being formed unless you have explicit reasons to know that this is not the case i.e., that there will not be an "element of duration."

This misstates the test. The test is whether the relevant person *expects* the relationship to have an element of duration. The test is not:

- an expectation of *possible* further business or that the client *may* wish to undertake more than one transaction
- *knowing* that there will not be an element of duration

It is also questionable as a matter of fact, because it is not correct to assume generically that any legal professional "will have an expectation of possible further business from any initial contact made with a client." In some cases the individual will have that expectation, and in other cases they will not.

> **6.5 Definition of an occasional transaction**
>
> A transaction that falls outside of a "business relationship," is known as an occasional transaction.
>
> By definition it can only apply where a practice-client relationship lacks an expectation of an "element of duration." For this definition to apply, the relationship must be limited to a single service provided at a certain point in time...
>
> It may apply in the case of a limited ancillary service, provided as a one-off or in some examples of notarial work in particular...

LSAG does not think this is likely:

> this will in practice be in the rarest of exceptions...
>
> Due to the ongoing duties a practice would have in most foreseeable circumstances, this definition is not likely to apply to the relationship

between a legal practice and a client for any transaction.

This is typically the case for solicitors, who offer a broad range of services, and hope the client will return whenever they need legal advice.

Tax barristers have two classes of client:

(1) The professional client; here, typically, there is likely to be an expectation that (if the barrister does a good job) the client will return on behalf of other clients, when other tax issues arise

(2) A lay client. It is possible that the lay client may regularly have tax issues on which it will instruct the barrister to advise; for instance a bank or investment manager, who will (or at least should) be concerned to consider the tax issues of their own customers from time to time. But more commonly, the lay client will be an individual, company or trust, with a single tax problem, on which the barrister is instructed to advise, and there is no reason to expect repeat work.

The LSAG guidance assumes that an adviser will have "ongoing duties". "Ongoing" suggests, or perhaps means, an element of duration. But at least in most circumstances, a tax barrister does not have ongoing duties.[14]

However this point is recognised, as this guidance is in LSAG part 1 (general) and not part 2a (specific guidance for barristers).

132.4.1 *Sufficient element of duration*

How long is required for the element of duration?

LSAG gives buying/selling real property as an example of work with an element of duration. The time taken to buy/sell real property will vary so that it is perhaps not helpful in determining what is an element of duration. But in a complex case, it might easily take three months. The LSAG view seems to be that that would constitute an element of duration (even though repeat work is not expected).

Law Soc non-corporate TRS guidance takes a different view of what is

[14] The Bar Council's Client Care Guidance provides on page 9:

> "The only ongoing duty to clients that persists after you cease to act for a client is that of client confidentiality"

https://www.barcouncilethics.co.uk/wp-content/uploads/2019/10/Client-care-guidance-.pdf

Whether solicitors or accountants have ongoing duties depends on the nature of their retainer, and the same is strictly true of a barrister, but in practice barristers do not usually undertake ongoing duties.

an element of duration:[15]

> ... the business relationship will need to have an element of duration and that this would normally involve an ongoing relationship that at the outset is expected to last for more than 12 months.

Reg 4(2)[16] supports the Law Society view, as:

(1) It assumes that the CDD transactions to which it refers do not have a sufficient element of duration.

(2) It is not consistent with the view that occasional transactions are "exceptional".

One set of instructions will not have an element of duration.

132.4.2 *Record keeping*

LSAG guidance provides:

> The nature of the relationship should be recorded in the client risk assessment. Any reasons for not applying CDD must be clearly recorded ...

132.4.3 *When duration not required*

In four circumstances an element of duration is not required, so an occasional transaction constitutes a Business Relationship:

Reg 4(2) MLR provides:

> A relationship where the relevant person is asked to provide one or more of the services described in regulation 12(2)(a), (b) or (d) is to be treated as a business relationship for the purpose of these Regulations, whether or not the relationship is otherwise expected to have an element of duration.

The services referred to are 3 of the 5 categories which I call CDD Transactions:[17]

Para	**Topic**
12(2)(a)	Forming a firm
12(2)(b)	Managing of client money or assets
12(2)(d)	Organisation of contributions for companies

[15] *https://www.lawsociety.org.uk/topics/anti-money-laundering/trust-registration-service-trs-and-aml-compliance* p.5

[16] See 132.4.3 (When duration not required).

[17] See 132.7 (Independent Legal Professional).

Regulation 4(3) MLR provides a rule for estate agents, not discussed here.

I write Business Relationship with initial capitals, to reflect the technical nature of the expression.

132.4.4 *Customer*

Customer is not defined and will have its normal meaning.

In the context of a lawyer or accountant, the customer is the client. The professional will have a client care agreement, and the parties to that agreement are clients and are so customers. For a barrister this includes professional and lay clients:

> *The "Customer"*
> 15. The Regulations do not distinguish between lay and professional clients. They apply to all clients[18] with whom you have entered into a "business relationship" within the meaning of reg. 4(1). In approving this guidance, HM Treasury has stated that, in its opinion, where you are instructed by a professional client (such as a solicitor) on behalf of a lay client, your "customer" under the Regulations is both your instructing professional client and your lay client. You should therefore carry out 'Customer Due Diligence' ["CDD"] on both your lay and professional client.

A lawyer or accountant may owe a duty of care to persons who are not clients, but these are not customers. The clients/customers of the professional person's clients are not customers of the professional person. Any other view is unworkable as it would not be possible to apply CDD measures to non-clients.

132.5 Relevant person

"Relevant person" matters for the following purposes:

Topic	**See para**
Customer due diligence	*Discussed here*
Business Relationship	132.4
Relevant trust type (iii)/trust type C	131.9.2; 131.25.1
Data retention duties	131.34
3rd party access rights	131.28

Reg 3(1) MLR provides:

[18] Note that this assumes that in the context of a professional person, customers are clients.

> In these Regulations ... “relevant person” means a person to whom, in accordance with regulation 8, Parts 1 to 6, 7A and 8 to 11 of these Regulations apply;

“Relevant person” is an opaque term, and for clarity I refer to a **“relevant (regulated) person”**.

The Parts of the MLR are as follows:

Part	**Topic**
1	Introduction
2	Money laundering and terrorist financing
3	CDD
4	Reliance & record keeping
5	Beneficial ownership information
6	Supervision & registration
7	Transfer of Funds (Information on the Payer) Regulations
7a	Cryptoasset Transfers
8	Information, Investigation and Directions
9	Enforcement
10	Appeals
11	Miscellaneous

So we turn to reg 8 MLR:

> (1) Parts 1 to 6, 7A and 8 to 11 apply to the persons (“relevant persons”) acting in the course of business carried on by them in the UK, who—
> (a) are listed in paragraph (2); and
> (b) do not come within the exclusions set out in regulation 15.

132.5.1 *Listed persons*

Reg 8(2) MLR provides:

> The persons listed in this paragraph are—

There follows a list of 11 categories or sets of categories:

> (a) credit institutions;
> (b) financial institutions;
> (c) auditors, insolvency practitioners, external accountants and tax advisers;
> (d) independent legal professionals (“ILPs”);
> (e) trust or company service providers; (“TCSPs”)
> (f) estate agents and letting agents;
> (g) high value dealers;

(h) casinos;
(i) art market participants;
(j) cryptoasset exchange providers;
(k) custodian wallet providers.

I consider the definitions of tax advisers, ILPs, and TCSPs, but not the other definitions.

132.6 Tax adviser

"Tax adviser" matters because a tax adviser is a relevant (regulated) person.

Reg 11(d) MLR provides:

> "tax adviser" means a firm[19] or sole practitioner who
> [a] by way of business
> [b] provides material aid, or assistance or advice,
> [c] in connection with the tax affairs of other persons,
> [d] whether provided directly or through a third party,
> [e] when providing such services.

SRA have issued guidance ("SRA Tax Adviser guidance").[20] This provides:

> The definition of 'tax adviser' is broad, extends beyond providing advice and includes providing assistance and material aid. Activities known informally by other terms, such as 'estate planning', 'tax planning' and 'tax mitigation' are likely (?) to be in scope of the regulations through this definition.
> ... The definition of 'tax adviser' is very broad, and any firm providing a service that addresses or might impact the tax affairs of a client should carefully consider whether their services fall within it.

For the meaning of "tax adviser" see *Online Tax Rebate Ltd v HMRC*.[21]

132.6.1 *Generic advice*

"SRA Tax Adviser guidance provides:

[19] See 131.4.8 (Firm).

[20] "Tax Adviser Guidance" (18 March 2021) *https://www.sra.org.uk/solicitors/resources/money-laundering/guidance-support/tax-adviser-guidance/#:~:text=The%20definition%20of%20'tax%20adviser,the%20regulations%20through%20this%20definition*

[21] [2019] UKUT 167 (TCC).

> With regards the ‘advice’ component, when contrasting this with providing information, a useful way to think about it is whether information you are providing has been tailored in any way to the tax-relevant circumstances of the client. If the information you are providing is only relevant due to the client’s particular circumstances (eg a specific transaction they are involved in or issue you are otherwise advising them on), it will be more likely to fall within the definition.
> For example, sending an internet link to something like a HMRC web page about income tax is unlikely to meet this threshold as it is unlikely to contain any tailored advice.

Generic or untailored information is actually advice, and even if not, is clearly assistance, but it does not count. Perhaps the underlying intuition is some sort of de minimis test.[22]

> However, sending someone a link to a HMRC website about something very specific (eg a tax credit they may receive for having invested in a venture capital trust), alongside some commentary or explanation as to its relevance for the client, is much more likely to be tax advice in scope of the regulations.
> ‘Assistance’ includes non-advisory services, such as drawing up documents on behalf of your clients eg tax covenants between entities.
> ‘Material aid’ is likely (?) to include, for example, administering tax filings and payments on behalf of your client.
> ‘Through a third party’ is also a very wide definition and may include scenarios such as:
>
> - a tax specialist, such as a sole practitioner, freelancer or an accountant, being instructed by a firm on the client’s behalf
> - a firm that is in common ownership with a wealth management firm, providing tax advice to the wealth management firm’s client.
>
> This means that it does not matter if the contractual relationship is between your firm and the underlying client. When you are providing tax adviser services, the person to whom the tax affairs being advised on

[22] An information/advice distinction does not work: *BPE Solicitors v Hughes-Holland* [2017] UKSC 21 at [39]:

> “Turning to the distinction between advice and information, this has given rise to confusion largely because of the descriptive inadequacy of these labels. On the face of it they are neither distinct nor mutually exclusive categories. Information given by a professional man to his client is usually a specific form of advice, and most advice will involve conveying information”.

This was followed in *Khan v Meadows* [2021] UKSC 21 at [41].

> relate to is your client for the purposes of the regulations.[23]

132.6.2 *Litigation exemption*

SRA Tax Adviser guidance provides a litigation exemption:

> Litigation and dispute resolution services are not generally in scope, but you should consider carefully whether the services you provide stray into the definition of tax advice services. This is ultimately for you to determine.
>
> HMRC might engage with, investigate or negotiate with individuals and corporate entities about their tax affairs. Being involved with services in this regard, may fall within the definition, depending on the service provided.
>
> Advice and services provided in relation to a criminal investigation or prosecution by HMRC in our view is a litigation service and is likely to be out of scope.

132.6.3 *Policy*

SRA discuss the policy background:

> **Why are tax advisers in scope?**
>
> Evasion of tax is a crime and any proceeds from this become by definition the proceeds of crime. Many services, transactions and activities may have tax implications. Criminals might seek to avoid any and all forms of tax, creating proceeds of crime from many different kinds of activity, hence the risks involved in providing tax adviser services.
>
> Some criminals might also seek to pay tax on the proceeds of crime, in an effort to make it seem more legitimate.
>
> So including tax advisers in scope of the regulations addresses a channel criminals might look to exploit.

The reader may be unconvinced. But there it is.

132.7 Independent Legal Professional

"Independent Legal Professional" matters because an Independent Legal Professional is a relevant (regulated) person.

Regulation 12(1) MLR provides:

[23] SRA, "Tax Adviser guidance" (Nov 2020) *https://www.sra.org.uk/solicitors/resources/money-laundering/money-laundering/tax-adviser-guidance/*

> In these Regulations, "independent legal professional" means a firm or sole practitioner who by way of business provides legal or notarial services to other persons, when participating in financial or real property transactions concerning-
>
> (a) forming a firm;[24]
> (b) the managing of client money, securities or other assets;
> (c) the opening or management of bank, savings or securities accounts;
> (d) the organisation of contributions necessary for the creation, operation or management of companies; or
> (e) the creation, operation or management of trusts, companies, foundations or similar structures,

I refer to transactions within (a)-(e) as **"CDD Transactions"** and I write "Independent Legal Professional" with initial capitals, to reflect the technical nature of the expression.

132.7.1 *Participating in transaction*

Reg 12(1) MLR explains the meaning of "participate" in a transaction:

> and, for this purpose, a person participates in a transaction by assisting in the planning or execution of the transaction or otherwise acting for or on behalf of a client in the transaction.

LSAG guidance provides:

> 23. The provision of legal advice by a barrister or advocate, instructed to advise or give an opinion in relation to specific aspects of a transaction and not otherwise carrying out or participating in the transaction, would not generally be viewed as participation in a financial transaction for the purposes of the Regulations...
> For example, where your involvement in the matter amounts to giving legal advice only in relation to the risk of enforcement action succeeding and the need for an indemnity against such an action, then you would not generally be considered to be "assisting in the planning or execution of the transaction" or "acting for or on behalf of a client in the transaction".
> 26 ... However, if you were to go on to draft a term of the agreement there is at least an argument to say that you are "acting for or on behalf of a client in the transaction", and a strong argument to say that you are

[24] See 131.4.8 (Firm).

> "you are assisting the client in the planning…of a transaction". In those circumstances you should consider that the obligations under the Regulations apply, and that you need to undertake CDD, to monitor the level of risk that arises in relation to your instructions and to maintain records of the same.

A barrister is not likely to be an Independent Legal Professional because:
(1) a barrister does not typically "participate" in a CDD transaction in this sense
(2) the litigation exemption may apply

132.7.2 *Litigation exception*

In *Ordre des Barreaux Francophones et Germanophones v Conseil des Ministres:*[25]

> 33. [These obligations apply] only insofar as they advise their client in the preparation or execution of certain transactions—essentially those of a financial nature or concerning real estate, as referred to in Art.2a(5)(a) of that directive—or when they act on behalf of and for their client in any financial or real estate transaction. As a rule, the nature of such activities is such that they take place in a context with no link to judicial proceedings and, consequently, those activities fall outside the scope of the right to a fair trial.[26]
> 34. Moreover, as soon as the lawyer acting in connection with a transaction as referred to in Art.2a(5) of Directive 91/308 is called upon for assistance in defending the client or in representing him or her before the courts, or for advice as to the manner of instituting or avoiding judicial proceedings, that lawyer is exempt, by virtue of the second sub-paragraph of Art.6(3) of the directive, from the obligations laid down in Art.6(1), regardless of whether the information has been received or obtained before, during or after the proceedings. An exemption of that kind safeguards the right of the client to a fair trial.

LSAG guidance provides:

> 24 ... "participating in a transaction", for example, is a broad term. Whilst the Regulations do not apply to contentious matters, non-contentious trust, company, corporate and matrimonial matters may engage areas of activity by your lay clients that come within the scope of the Regulations.

[25] Case C-305/05; [2007] ECR I-5305

[26] Article 6 ECHR.

132.7.3 *Application to bar*

A barrister could be a "Independent Legal Professional" but only if:
(1) The work concern a CDD transaction (possible but unusual)
(2) The work is not "legal advice only" (which is unlikely); and
(3) The litigation exception does not apply (which it often will)

132.8 Trust/company service provider

"Trust/company service provider" ("TSCP") matters because they are relevant (regulated) persons.

Regulation 12(2) MLR provides:

> In these Regulations, "trust or company service provider" means a firm or sole practitioner who by way of business provides
> [a] any of the following services to other persons,
> [c] when that firm or practitioner is providing such services-

The services are:

> (a) forming a firm;[27]
> (b) acting, or arranging for another person to act-
> (i) as a director or secretary of a company;
> (ii) as a partner of a partnership; or
> (iii) in a similar capacity in relation to other legal persons;
> (c) providing a registered office, business address, correspondence or administrative address or other related services for a company, partnership or any other legal person or legal arrangement;
> (d) acting, or arranging for another person to act, as-
> (i) a trustee of an express trust or similar legal arrangement; or
> (ii) a nominee shareholder for a person other than a company whose securities are listed on a regulated market.

132.9 Relevant person: Exclusions

There are 8 exceptions, or sets of exceptions, to the definition of relevant (regulated) person. These are all of specialist interest but I set them out for completeness.

Reg 15 MLR provides:

> (1) Parts 1 to 4, 6 and 8 to 11 do not apply to the following persons when carrying on any of the following activities—

[27] See 131.4.8 (Firm).

(a) a registered society within the meaning of section 1 of the Co-operative and Community Benefit Societies Act 2014 (meaning of "registered society"), when it—
   (i) issues withdrawable share capital within the limit set by section 24 of that Act (maximum shareholding in society); or
   (ii) accepts deposits from the public within the limit set by section 67(2) of that Act (carrying on of banking by societies);

(b) a society registered under the Industrial and Provident Societies Act (Northern Ireland) 1969, when it—
   (i) issues withdrawable share capital within the limit set by section 6 of that Act (maximum shareholding in society); or
   (ii) accepts deposits from the public within the limit set by section 7(3) of that Act (carrying on of banking by societies);

(c) a person who is (or falls within a class of persons) specified in any of paragraphs 2 to 23, 26 to 38 or 40 to 49 of the Schedule to the Financial Services and Markets Act 2000 (Exemption) Order 2001, when carrying out any activity in respect of which that person is exempt;

(d) a local authority within the meaning given in article 3(1) of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001, when carrying on an activity which would be a regulated activity for the purposes of FSMA but for article 72G of that Order;

(e) a person who was an exempted person for the purposes of section 45 of the Financial Services Act 1986 (miscellaneous exemptions) immediately before its repeal, when exercising the functions specified in that section;

(f) a person whose main activity is that of a high value dealer, when engaging in financial activity on an occasional or very limited basis as set out in paragraph (3); or

(g) a person preparing a home report, which for these purposes means the documents prescribed for the purposes of section 98, 99(1) or 101(2) of the Housing (Scotland) Act 2006 (duties: information and others).

132.9.1 *De minimis exception*

Reg 15(2) MLR provides:

> These Regulations do not apply to a person who falls within regulation 8 [definition of relevant (regulated) person] solely as a result of that person engaging in financial activity on an occasional or very limited basis as set out in paragraph (3).

Reg 15(3) MLR provides:

> For the purposes of paragraphs (1)(f) and (2), a person is to be considered as engaging in financial activity on an occasional or very limited basis if all the following conditions are met—
>
> (a) the person's total annual turnover in respect of the financial activity does not exceed £100,000;

(b) the financial activity is limited in relation to any customer to no more than one transaction exceeding 1,000 euros, whether the transaction is carried out in a single operation, or a series of operations which appear to be linked;
(c) the financial activity does not exceed 5% of the person's total annual turnover;
(d) the financial activity is ancillary and directly related to the person's main activity;
(e) the financial activity is not the transmission or remittance of money (or any representation of monetary value) by any means;
(f) the person's main activity is not that of a person falling within regulation 8(2)(a) to (f) or (h) to (k);
(g) the financial activity is provided only to customers of the main activity of the person and is not offered to the public.

132.9.2 *Exceptions for government*

Reg 15(4) MLR provides:

> Chapters 2 and 3 of Part 2, and Parts 3 to 9, do not apply to—
> (a) the Auditor General for Scotland;
> (b) the Auditor General for Wales;
> (c) the Bank of England;
> (d) the Comptroller and Auditor General;
> (e) the Comptroller and Auditor General for Northern Ireland;
> (f) the Official Solicitor to the Supreme Court, when acting as trustee in his or her official capacity;
> (g) the Treasury Solicitor.

132.10 Risk assessments

The authors of the MLR believed strongly in the value of risk assessments. The following are required:

Risk assessment	**Carried out by**	**Reg**	**See**
Government risk assessment	Treasury/Home office	16, 16A	*Not discussed*
Sector risk assessment	Supervisory authority	17	*Not discussed*
Practice risk assessments	Firm	18, 18A	132.11
Client risk assessment	Firm	28(12)(13)	132.20

MLR frequently refers to "information made available by the supervisory authority under regulations 17(9) and 47". I gloss that as "sector risk assessment/guidance".

132.11 Practice risk assessments

132.11.1 *Need for risk assessments*

Regulation 18 deals with money laundering and terrorist financing. Regulation 18A deals with proliferation financing. That is a somewhat specialist topic. The definition is in reg 16A(9) MLR:

> In this regulation, "proliferation financing" means the act of providing funds or financial services for use, in whole or in part, in the manufacture, acquisition, development, export, trans-shipment, brokering, transport, transfer, stockpiling of, or otherwise in connection with the possession or use of, chemical, biological, radiological or nuclear weapons, including the provision of funds or financial services in connection with the means of delivery of such weapons and other CBRN-related goods and technology, in contravention of a relevant financial sanctions obligation.

Lawyers will not be concerned with proliferation financing, but I deal with them both. It is helpful to consider the two side by side:

Reg 18(1) MLR	**Reg 18A(1) MLR**
A relevant [regulated] person must take appropriate steps to identify and assess the risks of money laundering and terrorist financing to which its business is subject.	A relevant person must take appropriate steps to identify and assess the risks of proliferation financing to which its business is subject.

I refer to these together as **"practice risk assessments"**.

132.11.2 *Risk assessment considerations*

Reg 18(2)(3) MLR	**Reg 18A(2)(3) MLR**
(2) In carrying out the risk assessment required under paragraph (1), a relevant [regulated] person must take into account	[Identical]
(a) information made available to them by the supervisory authority under regulations 17(9) and 47 [sector risk assessment/guidance], and	(a) information in the report referred to in regulation 16A (risk assessment by the Treasury); and

(b) risk factors including factors relating to- (i) its customers; (ii) the countries or geographic areas in which it operates; (iii) its products or services; (iv) its transactions; and (v) its delivery channels.	[identical]
(3) In deciding what steps are appropriate under paragraph (1), the relevant [regulated] person must take into account the size and nature of its business.	[identical]

132.11.3 *Record keeping & supervision*

Regulation 18 MLR provides:

> (4) A relevant [regulated] person must keep an up-to-date record in writing of all the steps it has taken under paragraph (1) [practice risk assessment], unless its supervisory authority notifies it in writing that such a record is not required.
> (5) A supervisory authority may not give the notification referred to in paragraph (4) unless it considers that the risks of money laundering and terrorist financing applicable to the sector in which the relevant [regulated] person operates are clear and understood.
> (6) A relevant [regulated] person must provide the risk assessment it has prepared under paragraph (1), the information on which that risk assessment was based and any record required to be kept under paragraph (4), to its supervisory authority on request.

Regulation 18A(4)(5) MLR repeat reg 18(4)(6) MLR. There is no equivalent of reg 18(5) but it does not matter.

132.12 Policies and procedures

132.12.1 *Need for AML policy*

Reg 19(1) MLR provides:

> A relevant [regulated] person must-
> (a) establish and maintain policies, controls and procedures to mitigate and manage effectively the risks of money laundering and terrorist financing identified in any risk assessment

> undertaken by the relevant [regulated] person under regulation 18(1) [practice risk assessments];
>
> (b) regularly review and update the policies, controls and procedures established under sub-paragraph (a);
>
> (c) maintain a record in writing of-
>
> (i) the policies, controls and procedures established under sub-paragraph (a);
>
> (ii) any changes to those policies, controls and procedures made as a result of the review and update required by sub-paragraph (b); and
>
> (iii) the steps taken to communicate those policies, controls and procedures, or any changes to them, within the relevant [regulated] person's business.

I refer to the policies, controls and procedures as the "AML policy".

132.12.2 *Content of AML policy*

Reg 19 MLR provides:

> (2) The policies, controls and procedures adopted by a relevant [regulated] person under paragraph (1) must be-
>
> (a) proportionate with regard to the size and nature of the relevant [regulated] person's business, and
>
> (b) approved by its senior management.
>
> (3) The policies, controls and procedures referred to in paragraph (1) must include-
>
> (a) risk management practices;
>
> (b) internal controls (see regulations 21 to 24);
>
> (c) customer due diligence (see regulations 27 to 38);
>
> (d) reliance and record keeping (see regulations 39 to 40);
>
> (e) the monitoring and management of compliance with, and the internal communication of, such policies, controls and procedures.
>
> (4) The policies, controls and procedures referred to in paragraph (1) must include policies, controls and procedures-
>
> (a) which provide for the identification and scrutiny of-
>
> (i) any case where-
>
> (aa) a transaction is complex or unusually large, or there is an unusual pattern of transactions, or
>
> (bb) the transaction or transactions have no apparent economic or legal purpose, and
>
> (ii) any other activity or situation which the relevant [regulated] person regards as particularly likely by its nature to be

> related to money laundering or terrorist financing;
>
> (b) which specify the taking of additional measures, where appropriate, to prevent the use for money laundering or terrorist financing of products and transactions which might favour anonymity;
>
> (c) which ensure that when new new products, new business practices (including new delivery mechanisms) or new technology are adopted by the relevant [regulated] person, appropriate measures are taken in preparation for, and during, the adoption of such products, practices or technology to assess and if necessary mitigate any money laundering or terrorist financing risks this new product, practice or technology may cause;
>
> (d) under which anyone in the relevant [regulated] person's organisation who knows or suspects (or has reasonable grounds for knowing or suspecting) that a person is engaged in money laundering or terrorist financing as a result of information received in the course of the business or otherwise through carrying on that business is required to comply with-
>
> (i) Part 3 of the Terrorism Act 2000; or
>
> (ii) Part 7 of the Proceeds of Crime Act 2002;
>
> (e) [applies to money service business that uses agents]

132.12.3 *Guidance*

Regulation 19(5) MLR provides:

> In determining what is appropriate or proportionate with regard to the size and nature of its business, a relevant [regulated] person may take into account any guidance which has been-
>
> (a) issued by the FCA; or
>
> (b) issued by any other supervisory authority or appropriate body and approved by the Treasury.

This includes LSAG guidance and the BSB risk assessment.

The BSB risk assessment places the risk of money laundering for barristers as low.[28] Readers may think that self-evident.

LSAG guidance provides:

> However, that does not mean that the risk in your practice or any matter in which you are instructed is at the same level. You must determine

[28] *https://www.barstandardsboard.org.uk/for-barristers/compliance-with-your-obligations/anti-money-laundering-counter-terrorist-financing.html*

> what is appropriate or proportionate in relation to the risk of your practice and avail of any risk assessments undertaken by the relevant supervisor in your jurisdiction.

In practice I expect (more or less) every barrister assesses the risk as low.

132.13 Internal controls

132.13.1 *Compliance officer/screening/audit*

Regulation 21 MLR provides:

> (1) Where appropriate with regard to the size and nature of its business, a relevant [regulated] person must-

Three duties follow:
(a) Compliance officer
(b) Screening employees
(c) Audit

132.13.2 *Compliance officer*

Regulation 21 MLR provides:

> (1) Where appropriate with regard to the size and nature of its business, a relevant [regulated] person must-
>
> (a) appoint one individual who is a member of the board of directors (or if there is no board, of its equivalent management body) or of its senior management as the officer responsible for the relevant [regulated] person's compliance with these Regulations;

132.13.3 *Screening employees*

Regulation 21 MLR provides:

> (1) Where appropriate with regard to the size and nature of its business, a relevant [regulated] person must ...
>
> (b) carry out screening of relevant employees[29] appointed by the

[29] Reg 21(2) provides: "For the purposes of paragraph (1)(b)-
(a) "screening" means an assessment of-
(i) the skills, knowledge and expertise of the individual to carry out their functions effectively;
(ii) the conduct and integrity of the individual;
(b) a relevant employee is an employee whose work is-

> relevant [regulated] person, both before the appointment is made and during the course of the appointment;

LSAG guidance provides:

> 36. If you directly employ your clerk(s), or any other employee or agent that falls within the definition of reg. 21(2)(b), the "internal controls" requirements of reg. 21 may be of application to your practice (reg. 21(6)). You will need to make an assessment of the factual circumstances and the application of the regulation. Such an assessment would include considering the nature of your professional relationship with your clerk (or other relevant third-party) and the level of involvement that person has in your AML/CTF policies and procedures. Even where reg. 21 does not apply you should be aware of your broader obligations with regards to appropriate risk management procedures (see, for example, in relation to practitioners in England and Wales, the BSB Handbook, rC 89.8).

Rule rC89 says:

> Taking into account the provisions of Rule rC90, you must take reasonable steps to ensure that ...
> appropriate risk management procedures are in place and are being complied with

That takes us to Rule rC90:

> For the purposes of Rule rC89 the steps which it is reasonable for you to take will depend on all the circumstances, which include, but are not limited to:
> .1 the arrangements in place in your chambers for the management of chambers;
> .2 any role which you play in those arrangements; and
> .3 the independence of individual members of chambers from one another.

(i) relevant to the relevant [regulated] person's compliance with any requirement in these Regulations, or

(ii) otherwise capable of contributing to the-

(aa) identification or mitigation of the risks of money laundering, terrorist financing and proliferation financing to which the relevant [regulated] person's business is subject, or

(bb) prevention or detection of money laundering, terrorist financing and proliferation financing in relation to the relevant [regulated] person's business."

These generalities do not take us much further.

132.13.4 *Audit*

Regulation 21 MLR provides:

> (1) Where appropriate with regard to the size and nature of its business, a relevant [regulated] person must ...
> (c) establish an independent audit function with the responsibility-
> (i) to examine and evaluate the adequacy and effectiveness of the policies, controls and procedures adopted by the relevant [regulated] person to comply with the requirements of these Regulations;
> (ii) to make recommendations in relation to those policies, controls and procedures; and
> (iii) to monitor the relevant [regulated] person's compliance with those recommendations.

LSAG guidance provides:

> 36. If you directly employ your clerk(s), or any other employee or agent that falls within the definition of reg. 21(2)(b), the "internal controls" requirements of reg. 21 may be of application to your practice (reg. 21(6)). You will need to make an assessment of the factual circumstances and the application of the regulation. Such an assessment would include considering the nature of your professional relationship with your clerk (or other relevant third-party) and the level of involvement that person has in your AML/CTF policies and procedures. Even where reg. 21 does not apply you should be aware of your broader obligations with regards to appropriate risk management procedures (see, for example, in relation to practitioners in England and Wales, the BSB Handbook, rC 89.8).

Rule rC89 says:

> Taking into account the provisions of Rule rC90, you must take reasonable steps to ensure that ...
> appropriate risk management procedures are in place and are being complied with

That takes us to Rule rC90:

> For the purposes of Rule rC89 the steps which it is reasonable for you to take will depend on all the circumstances, which include, but are not limited to:

> .1 the arrangements in place in your chambers for the management of chambers;
> .2 any role which you play in those arrangements; and
> .3 the independence of individual members of chambers from one another.

That does not take us much further.

132.14 Nominated officer

132.14.1 *Appointing nominated officer*

Reg 21(3) MLR provides:

> An individual in the relevant [regulated] person's firm must be appointed as a nominated officer.

132.14.2 *Reporting to regulator*

Regulation 21(4) MLR provides:

> A relevant [regulated] person must, within 14 days of the appointment, inform its supervisory authority of-
> (a) the identity of the individual first appointed under paragraph (1)(a);
> (b) the identity of the individual first appointed under paragraph (3); and
> (c) of any subsequent appointment to either of those positions.

132.14.3 *Duties of nominated officer*

Reg 21(5) MLR provides:

> Where a disclosure is made to the nominated officer, that officer must consider it in the light of any relevant information which is available to the relevant [regulated] person and determine whether it gives rise to knowledge or suspicion or reasonable grounds for knowledge or suspicion that a person is engaged in money laundering or terrorist financing.

LSAG guidance provides:

> 46. Self-employed barristers are individually responsible for their own professional practices (see, for example in relation to practitioners in England and Wales, in the BSB Handbook, each of the Core Duties, gC2, and rC20) and, where applicable, chambers staff provide administrative support only (as opposed to being fee-earners). It is

therefore not considered necessary or desirable for self-employed barristers or their chambers to appoint a nominated officer to whom other barristers must report.

132.14.4 *Record keeping*

Reg 21 MLR provides:

> (8) A relevant [regulated] person must establish and maintain systems which enable it to respond fully and rapidly to enquiries from any person specified in paragraph (9) as to-
> (a) whether it maintains, or has maintained during the previous five years, a business relationship with any person; and
> (b) the nature of that relationship.
> (9) The persons specified in this paragraph are-
> (a) financial investigators accredited under section 3 of the Proceeds of Crime Act 2002 (accreditation and training);
> (b) persons acting on behalf of the Scottish Ministers in their capacity as an enforcement authority under that Act; and
> (c) constables or equivalent officers of any law enforcement authority.

132.14.5 *What is appropriate*

Reg 21(10) MLR provides:

> In determining what is appropriate with regard to the size and nature of its business, a relevant [regulated] person-
> (a) must take into account its risk assessment under regulation 18(1) and 18A(1) [practice risk assessments]; and
> (b) may take into account any guidance which has been-
> (i) issued by the FCA; or
> (ii) issued by any other supervisory authority or appropriate body and approved by the Treasury

This includes LSAG guidance and the BSB risk assessment.

132.14.6 *Exemption for individuals*

Reg 21(6) MLR provides:

> Paragraphs (1) and (3) do not apply where the relevant [regulated] person is an individual who neither employs nor acts in association with any other person.

The disapplied rules are:

Para	**Topic**	**See para**
(1)	Compliance officer/screening/audit	127.13
(3)	Nominated officer	132.14.1

132.15 Training

Reg 24 MLR provides:

> (1) A relevant [regulated] person must-
>
> (a) take appropriate measures to ensure that its relevant employees, and any agents it uses for the purposes of its business whose work is of a kind mentioned in paragraph (2), are-
>
> (i) made aware of the law relating to money laundering, terrorist financing and proliferation financing, and to the requirements of data protection, which are relevant to the implementation of these Regulations; and
>
> (ii) regularly given training in how to recognise and deal with transactions and other activities or situations which may be related to money laundering, terrorist financing or proliferation financing;
>
> (b) maintain a record in writing of the measures taken under sub-paragraph (a), and in particular, of the training given to its relevant employees and to any agents it uses for the purposes of its business whose work is of a kind mentioned in paragraph (2).
>
> (2) For the purposes of paragraph (1), a relevant employee is an employee whose work is-
>
> (a) relevant to the relevant [regulated] person's compliance with any requirement in these Regulations, or
>
> (b) otherwise capable of contributing to the-
>
> (i) identification or mitigation of the risk of money laundering, terrorist financing and proliferation financing to which the relevant [regulated] person's business is subject; or
>
> (ii) prevention or detection of money laundering, terrorist financing and proliferation financing in relation to the relevant [regulated] person's business.

132.15.1 *What is appropriate*

Reg 24 MLR provides:

> (3) In determining what measures are appropriate under paragraph (1), a relevant [regulated] person-

> (a) must take account of-
> (i) the nature of its business;
> (ii) its size;
> (iii) the nature and extent of the risks of money laundering, terrorist financing and proliferation financing to which its business is subject; and
>
> (b) may take into account any guidance which has been-
> (i) issued by the FCA; or
> (ii) issued by any other supervisory authority or appropriate body and approved by the Treasury.

This includes LSAG guidance and the BSB risk assessment.

132.16 Types of CDD

In short, a relevant (regulated) person is generally required to carry out CDD for their customers. There are four types of CDD:

Type of CDD	**Reg**	**See para**
Standard CDD	28	132.18
Enhanced CDD	33	132.26
PEP CDD	35	132.27
Simplified CDD	37	132.28

LSAG guidance provides:

> 82. There is no obligation under the Regulations to conduct CDD for work that is not within the scope of the Regulations.

132.17 When CDD required

132.17.1 *Establishing Business Relationship*

Reg 27 MLR provides:

> (1) A relevant [regulated] person must apply customer due diligence measures if the person-
> (a) establishes a business relationship;

132.17.2 *Transfer of funds over* €1k

Reg 27 MLR provides:

> (1) A relevant [regulated] person must apply customer due diligence measures if the person ...
> (b) carries out an occasional transaction that amounts to a transfer of funds within the meaning of Article 3.9 of the funds transfer

> regulation exceeding 1,000 euros;

That takes us to art 3.9 of the funds transfer regulation:[30]

> 'transfer of funds' means any transaction at least partially carried out by electronic means on behalf of a payer through a payment service provider,[31] with a view to making funds available to a payee through a payment service provider, irrespective of whether the payer and the payee are the same person and irrespective of whether the payment service provider of the payer and that of the payee are one and the same, including:
>
> (a) a credit transfer as defined in point (1) of Article 2 of Regulation (EU) No 260/2012;
>
> (b) a direct debit as defined in point (2) of Article 2 of Regulation (EU) No 260/2012;
>
> (c) a money remittance as defined in point (13) of Article 4 of Directive 2007/64/EC, whether national or cross border;
>
> (d) a transfer carried out using a payment card, an electronic money instrument, or a mobile phone, or any other digital or IT prepaid or postpaid device with similar characteristics;

There is a morass of references here, but in short, any bank transfer is caught. If a person advises for a fee above €1k, is that caught? The answer is, no. LSAG guidance provides:

> **6.5 Definition of an occasional transaction**
>
> It will still be necessary to undertake CDD for an occasional transaction where it has a value of 15,000 Euros or more. 15,000 Euros relates only to the sums involved in the transaction(s) and does not include legal fees or distributions.

132.17.3 *Suspicions*

Reg 27 MLR provides:

> (1) A relevant [regulated] person must apply customer due diligence

[30] Reg 3 MLR provides: "Funds transfer regulation" means Regulation 2015/847/EU of the European Parliament and of the Council of 20th May 2015 on information accompanying transfers of funds;

[31] 'Payment service provider' means the categories of payment service provider referred to in Article 1(1) of Directive 2007/64/EC, natural or legal persons benefiting from a waiver pursuant to Article 26 thereof and legal persons benefiting from a waiver pursuant to Article 9 of Directive 2009/110/EC of the European Parliament and of the Council (19), providing transfer of funds services;

> measures if the person ...
> (c) suspects money laundering or terrorist financing; or
> (d) doubts the veracity or adequacy of documents or information previously obtained for the purposes of identification or verification.

132.17.4 *Transaction above €15k*

Reg 27(2) MLR provides:

> A relevant [regulated] person who is not
> [a] a letting agent,
> [b] a high value dealer
> [c] an art market participant,
> [d] a cryptoasset exchange provider of the kind referred to in paragraph (7D) or (7E),
> [e] a custodian wallet provider of the kind referred to in paragraph (7E) or
> [f] a casino
> must also apply customer due diligence measures if the person carries out an occasional transaction that amounts to 15,000 euros or more, whether the transaction is executed in a single operation or in several operations which appear to be linked.

132.17.5 *Reviews, changes, appropriate times*

Reg 27(8) MLR provides:

> A relevant [regulated] person must also apply customer due diligence measures-
> (za) when the relevant [regulated] person has any legal duty in the course of the calendar year to contact an existing customer for the purpose of reviewing any information which-
> (i) is relevant to the relevant [regulated] person's risk assessment for that customer, and
> (ii) relates to the beneficial ownership of the customer, including information which enables the relevant [regulated] person to understand the ownership or control structure of a legal person, trust, foundation or similar arrangement who is the beneficial owner of the customer;
> (zb) when the relevant [regulated] person has to contact an existing customer in order to fulfil any duty under the International Tax Compliance Regulations 2015;
> (a) at other appropriate times to existing customers on a risk based approach;

(b) when the relevant [regulated] person becomes aware that the circumstances of an existing customer relevant to its risk assessment for that customer have changed.

132.17.6 *Appropriate time*

Reg 27(9) MLR provides:

> For the purposes of paragraph (8), in determining when it is appropriate to take customer due diligence measures in relation to existing customers, a relevant [regulated] person must take into account, among other things-
>
> (a) any indication that the identity of the customer, or of the customer's beneficial owner, has changed;
>
> (b) any transactions which are not reasonably consistent with the relevant [regulated] person's knowledge of the customer;
>
> (c) any change in the purpose or intended nature of the relevant [regulated] person's relationship with the customer;
>
> (d) any other matter which might affect the relevant [regulated] person's assessment of the money laundering or terrorist financing risk in relation to the customer.

132.18 CDD: Standard information

132.18.1 *Information in outline*

Reg 28(1) MLR provides:

> This regulation applies when a relevant [regulated] person is required by regulation 27 to apply customer due diligence measures.

Reg 28(2)-(6) and (10) require information which I call "standard CDD information":

Reg	**Information**	**See para**
28(2)(a)(b)	Identify/verify customer	132.18.2
28(2)(c)	Business/transaction	132.18.3
28(3)	Body corporate customer	132.18.4
28(3A)	Ownership/control structure	132.18.5
28(4)	Beneficial owner of customer	132.18.6
28(5)	Listed company	132.18.7
28(6)(7)	Beneficial owner unknown	132.18.8
28(10)	Agent for customer	132.18.9

132.18.2 *Identify/verify customer*

Reg 28(2) MLR provides:

> The relevant [regulated] person must-
>
> (a) identify the customer unless the identity of that customer is known to, and has been verified by, the relevant [regulated] person;
>
> (b) verify the customer's identity unless the customer's identity has already been verified by the relevant [regulated] person;

132.18.3 *Information about business/transaction*

Reg 28(2) MLR provides:

> The relevant [regulated] person must...
>
> (c) assess, and where appropriate obtain information on, the purpose and intended nature of the business relationship or occasional transaction.

132.18.4 *Body corporate customer*

Reg 28(3) MLR provides:

> Where the customer is a body corporate-
>
> (a) the relevant [regulated] person must obtain and verify-
>
> (i) the name of the body corporate;
>
> (ii) its company number or other registration number;
>
> (iii) the address of its registered office, and if different, its principal place of business;
>
> (b) subject to paragraph (5), the relevant [regulated] person must take reasonable measures to determine and verify-
>
> (i) the law to which the body corporate is subject, and its constitution (whether set out in its articles of association or other governing documents);
>
> (ii) the full names of the board of directors (or if there is no board, the members of the equivalent management body) and the senior persons responsible for the operations of the body corporate.

132.18.5 *Ownership/control structure*

Reg 28(3A) MLR provides:

> Where the customer is a legal person, trust, company, foundation or similar legal arrangement the relevant [regulated] person must take reasonable measures to understand the ownership and control structure of that legal person, trust, company, foundation or similar legal arrangement.

"Legal person, trust, company, foundation or similar legal arrangement" means anything other than an individual.

If ownership and control are dealt with separately, where is the role of an ownership/control structure.

132.18.6 *Beneficial owner of customer*

Reg 28(4) MLR provides:

> Subject to paragraph (5), where the customer is beneficially owned by another person, the relevant [regulated] person must-
> (a) identify the beneficial owner;
> (b) take reasonable measures to verify the identity of the beneficial owner so that the relevant [regulated] person is satisfied that it knows who the beneficial owner is; and
> (c) if the beneficial owner is a legal person, trust, company, foundation or similar legal arrangement take reasonable measures to understand the ownership and control structure of that legal person, trust, company, foundation or similar legal arrangement.

See 131.15 (Beneficial Owner: MLR meaning).

132.18.7 *Listed company customer*

Reg 28(5) MLR provides:

> Paragraphs (3)(b), (3A) and (4) do not apply where the customer is a company which is listed on a regulated market.

The disapplied rules are:

Reg	**Topic**	**See para**
28(3)(b)	Governing law/directors names	132.18.4
28(3A)	Ownership/control structure	132.18.5
28(4)	Beneficial ownership	132.18.6

132.18.8 *Beneficial owner unknown*

Reg 28MLR provides:

> (6) If the customer is a body corporate, and paragraph (7) applies, the relevant [regulated] person may treat the senior person in that body corporate responsible for managing it as its beneficial owner.
> (7) This paragraph applies if (and only if) the relevant [regulated] person has exhausted all possible means of identifying the beneficial owner of the body corporate and-

> (a) has not succeeded in doing so, or
> (b) is not satisfied that the individual identified is in fact the beneficial owner.
>
> (8) If paragraph (7) applies, the relevant [regulated] person must-
> (a) keep records in writing of all the actions it has taken to identify the beneficial owner of the body corporate;
> (b) take reasonable measures to verify the identity of the senior person in the body corporate responsible for managing it, and keep records in writing of-
> (i) all the actions the relevant [regulated] person has taken in doing so, and
> (ii) any difficulties the relevant [regulated] person has encountered in doing so.

132.18.9 *Agent for customer*

Reg 28(10) MLR provides:

> Where a person ("A") purports to act on behalf of the customer, the relevant [regulated] person must-
> (a) verify that A is authorised to act on the customer's behalf;
> (b) identify A; and
> (c) verify A's identity on the basis of documents or information in either case obtained from a reliable source which is independent of both A and the customer.

That will include the director of a company.

132.19 How to get CDD data

132.19.1 *How to verify*

Reg 28 MLR provides:

> (18) For the purposes of this regulation-
> (a) except in paragraph (10), "verify" means verify on the basis of documents or information in either case obtained from a reliable source which is independent of the person whose identity is being verified;
> (b) documents issued or made available by an official body are to be regarded as being independent of a person even if they are provided or made available to the relevant [regulated] person by or on behalf of that person.
>
> (19) For the purposes of this regulation, information may be regarded as obtained from a reliable source which is independent of the person

whose identity is being verified where-

(a) it is obtained by means of

[i] an electronic identification process, including by using electronic identification means or

[ii] by using a trust service (within the meanings of those terms in Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23rd July 2014 on electronic identification and trust services for electronic transactions in the internal market); and

(b) that process is secure from fraud and misuse and capable of providing assurance that the person claiming a particular identity is in fact the person with that identity, to a degree that is necessary for effectively managing and mitigating any risks of money laundering and terrorist financing.

132.19.2 *How to verify professional client*

LSAG guidance provides:

> 133. In relation to partnerships such as law firms, the necessary enquiries should be met by confirming the solicitor's regulated status through reference to the current membership directory of the relevant professional association (for example, law society or accountancy body).
> 134. Where you are required to conduct CDD upon an instructing solicitor, such a check is the standard requirement and, given the regulatory position of solicitors, will usually be sufficient. Where the person instructing you is understood to be a solicitor practising in England and Wales, a check should be made of the SRA's database of organisations and people providing legal services in England and Wales who are regulated by the SRA (see here). Advocates in Scotland and barristers in Northern Ireland should perform the equivalent check with their corresponding Law Societies and other relevant regulatory authorities.
> 135. Where an instructing solicitor has instructed you in the recent past, the application of a risk-based approach may mean that you are not required to re-apply CDD measures in relation to the solicitor upon receipt of fresh instructions. In such circumstances what is required is that you keep a record that a risk-based approach was taken and that due to the existing relationship and the low-level of money laundering/terrorist financing risk, fresh CDD measures did not need to be applied. Your obligation to undertake CDD upon your lay client would remain.

132.19.3 *No reliance on registers*

Reg 28(9) MLR provides:

> Relevant [regulated] persons do not satisfy their requirements under paragraph (4) by relying solely on the information-
>
> (a) contained in-
>
> (i) the register of people with significant control kept by a company under section 790M of the Companies Act 2006 (duty to keep register);
>
> (ii) the register of people with significant control kept by a limited liability partnership under section 790M of the Companies Act 2006 as modified by regulation 31E of the Limited Liability Partnerships (Application of Companies Act 2006) Regulations 2009; or
>
> (iii) the register of people with significant control kept by a UK Societas (within the meaning of the Council Regulation 2157/2001/EC of 8 October 2001 on the Statute for a European Company) under section 790M of the Companies Act 2006 as modified by regulation 5 of the European Public Limited Liability Company (Register of People with Significant Control) Regulations 2016;
>
> (b) referred to in sub-paragraph (a) and delivered to the registrar of companies (within the meaning of section 1060(3) of the Companies Act 2006 (the registrar)) under any enactment; or
>
> (c) contained in required particulars in relation to eligible Scottish partnerships delivered to the registrar of companies under regulation 19 of the Scottish Partnerships (Register of People with Significant Control) Regulations 2017.

132.19.4 *Ongoing monitoring*

Reg 28(11) MLR provides:

> The relevant [regulated] person must conduct ongoing monitoring of a business relationship, including-
>
> (a) scrutiny of transactions undertaken throughout the course of the relationship (including, where necessary, the source of funds) to ensure that the transactions are consistent with the relevant [regulated] person's knowledge of the customer, the customer's business and risk profile;
>
> (b) undertaking reviews of existing records and keeping the documents or information obtained for the purpose of applying customer due diligence measures up-to-date.

132.20 Client risk assessment

Reg 28 MLR provides:

> (12) The ways in which a relevant [regulated] person complies with the requirement to take customer due diligence measures, and the extent of the measures taken-
>
> (a) must reflect-
>
> (i) the risk assessment carried out by the relevant [regulated] person under regulation 18(1) [practice risk assessments];
>
> (ii) its assessment of the level of risk arising in any particular case;
>
> (b) may differ from case to case.
>
> (13) In assessing the level of risk in a particular case, the relevant [regulated] person must take account of factors including, among other things-
>
> (a) the purpose of an account, transaction or business relationship;
>
> (b) the level of assets to be deposited by a customer or the size of the transactions undertaken by the customer;
>
> (c) the regularity and duration of the business relationship.

A risk assessment is required for every client.

132.21 CDD/Tipping off

Reg 28 MLR provides:

> (14) If paragraph (15) applies, a relevant [regulated] person is not required to continue to apply customer due diligence measures under paragraph (2) or (10) in respect of a customer.
>
> (15) This paragraph applies if all the following conditions are met-
>
> (a) a relevant [regulated] person has taken customer due diligence measures in relation to a customer;
>
> (b) the relevant [regulated] person makes a disclosure required by-
>
> (i) Part 3 of the Terrorism Act 2000, or
>
> (ii) Part 7 of the Proceeds of Crime Act 2002; and
>
> (c) continuing to apply customer due diligence measures in relation to that customer would result in the commission of an offence by the relevant [regulated] person under-
>
> (i) section 21D of the Terrorism Act 2000 (tipping off: regulated sector); or
>
> (ii) section 333A of the Proceeds of Crime Act 2002 (tipping off: regulated sector).

132.22 Supervision of CDD

Reg 28(16) MLR provides:

> The relevant [regulated] person must be able to demonstrate to its supervisory authority that the extent of the measures it has taken to satisfy its requirements under this regulation are appropriate in view of the risks of money laundering and terrorist financing, including risks-
>
> (a) identified by the risk assessment carried out by the relevant [regulated] person under regulation 18(1) [practice risk assessment];
>
> (b) identified by its supervisory authority and in information made available to the relevant [regulated] person under regulations 17(9) and 47 [sector risk assessment/guidance].

132.23 CDD time limits

Reg 30(1) MLR provides:

> This regulation applies when a relevant [regulated] person is required to take any measures under regulation 27, 28 or 29.

The references are:

Regulation	**Topic**	**See**
27	When CDD required	132.17
28	Standard CDD	132.10
29	Additional CDD: credit/financial institutions	-

Reg 30(2) MLR provides:

> Subject to paragraph (3) or (4), a relevant [regulated] person must comply with the requirement to verify the identity of
>
> [a] the customer,
>
> [b] any person purporting to act on behalf of the customer and
>
> [c] any beneficial owner of the customer
>
> before the establishment of a business relationship or the carrying out of the transaction.

132.23.1 *Cases of urgency*

Reg 30(3) MLR provides:

> Provided that the verification is completed as soon as practicable after contact is first established, the verification of the customer, any person purporting to act on behalf of the customer and the customer's beneficial owner, may be completed during the establishment of a business relationship if-

(a) this is necessary not to interrupt the normal conduct of business; and

(b) there is little risk of money laundering and terrorist financing.

132.23.2 *Verifying non-corporate*

Reg 30 MLR provides:

> (6) Paragraph (7) applies if-
>
> (a) the relevant [regulated] person is required to apply customer due diligence measures in the case of a trust, a legal entity (other than a body corporate) or a legal arrangement (other than a trust); and
>
> (b) the beneficiaries of that trust, entity or arrangement are designated as a class, or by reference to particular characteristics.
>
> (7) If this paragraph applies, the relevant [regulated] person must establish and verify the identity of any beneficiary before-
>
> (a) any payment is made to the beneficiary; or
>
> (b) the beneficiary exercises its vested rights in the trust, legal entity or legal arrangement.

132.24 Duty to check register

132.24.1 *Duties to check*

Reg 30A(1)(2A) MLR imposes duties to check the register:

Reg 30A(1) MLR: Initial check

Before establishing a business relationship with—

(a) a company which is subject to the requirements of Part 21A of the Companies Act 2006 (information about people with significant control);

(b) an unregistered company which is subject to the requirements of the Unregistered Companies Regulations 2009;

(c) a limited liability partnership which is subject to the requirements of the Limited Liability Partnerships (Application of Companies Act 2006) Regulations 2009;

(d) an eligible Scottish partnership which is subject to the requirements of the Scottish Partnerships (Register of People with Significant Control) Regulations 2017,

Reg 30A(2A) MLR: Ongoing checks

(2A) When taking measures to fulfil the duties to carry out customer due diligence and ongoing monitoring of a business relationship (including enhanced customer due diligence and enhanced ongoing monitoring) under Part 3 of these Regulations after a business relationship with a customer of a type described in paragraph (1)(a) to (f) has been established,

(e) a trust which is subject to registration under Part 5 of these Regulations, or
(f) an overseas entity which is subject to registration under Part 1 of the Economic Crime (Transparency and Enforcement) Act 2022,

a relevant person must collect an excerpt of the register which contains full details of any information specified in paragraph (1A) held on the register at the relevant time before the business relationship is established, or must establish from its inspection of the register that there is no such information held on the register at that time.

a relevant person must also collect an excerpt of the register which contains full details of any information specified in paragraph (1A) which is held on the register at that time, or must establish from its inspection of the register that there is no such information held on the register at that time.

132.24.2 *Data required*

Reg 30A(1A) MLR provides:

> The information specified in this paragraph is as follows—
> (a) in relation to a firm of a type described in paragraphs (1)(a) to (e), information relating to beneficial owners of the customer; and
> (b) in relation to an overseas entity of a type described in paragraph (1)(f), required information relating to registrable beneficial owners specified under Schedule 1 to the Economic Crime (Transparency and Enforcement) Act 2022.

132.24.3 *Reporting discrepancy*

Reg 30A(2) and (2A) MLR imposes duties to report errors in the register:

Reg 30A(2) MLR

The relevant person must report to the person mentioned in paragraph (3) any material discrepancy the relevant person finds between information relating to the beneficial ownership of the customer—
(a) which the relevant person collects under paragraph (1), and
(b) which otherwise becomes

Reg 30A(2B) MLR

The relevant person must report to the person mentioned in paragraph (3) any material discrepancy the relevant person finds between information relating to the beneficial ownership of the customer—
(a) which the relevant person collects under paragraph (2A), and
(b) which otherwise becomes

available to the relevant person in the course of carrying out its duties under these Regulations when establishing a business relationship with the customer.	available to the relevant person in the course of carrying out its duties under these Regulations.

132.24.4 *To whom report made*

Reg 30A(3) MLR provides:

> A material discrepancy referred to in paragraphs (2) and (2B) must be reported—
>
> (a) if it relates to a company, an unregistered company, a limited liability partnership an eligible Scottish partnership or an overseas entity, to the registrar[32]; or
>
> (b) if it relates to a trust, to the Commissioners.

132.24.5 *Legal privilege*

Reg 30A(4) MLR provides:

> The relevant person is not required under paragraph (2) or (2B) to report information which that person would be entitled to refuse to provide on grounds of legal professional privilege in the High Court (or in Scotland, on the ground of confidentiality of communications in the Court of Session).

132.24.6 *Supplemental*

Reg 30A MLR provides:

> (5) The person to whom a material discrepancy is reported must take such action as that person considers appropriate to investigate and, if necessary, resolve the discrepancy in a timely manner.
>
> (6) A discrepancy which is reported to the registrar under paragraph (3) is material excluded from public inspection for the purposes of—
>
> (a) section 1087 of the Companies Act 2006 (material not available for public inspection), including for the purposes of that section as applied—
>
> (i) to unregistered companies by paragraph 20 of Schedule 1 to the Unregistered Companies Regulations 2009;

[32] Defined reg 30A(7) MLR: "A reference to the registrar in this regulation is to the registrar of companies within the meaning of section 1060(3) of the Companies Act 2006."

> (ii) to limited liability partnerships by regulation 66 of the Limited Liability Partnerships (Application of Companies Act 2006) Regulations 2009; and
>
> (iii) to eligible Scottish partnerships by regulation 61 of the Scottish Partnerships (Register of People with Significant Control) Regulations 2017; and
>
> (b) section 22 of the Economic Crime (Transparency and Enforcement) Act 2022 (material unavailable for inspection).

132.24.7 *Material discrepancy*

Regulation 30A(8) MLR provides:

> In this regulation, a "material discrepancy" is one described in Schedule 3AZA.

That takes us to schedule 3AZA which provides:

> A material discrepancy in this Schedule may arise, as the case may be,
>
> [a] in relation to information about a beneficial owner within the meaning of regulation 3 of these Regulations (including about a person of significant control within the meaning of Part 21A of the Companies Act 2006) and
>
> [b] in relation to information about a registrable beneficial owner within the meaning of Part 3 of Schedule 1 to the Economic Crime (Transparency and Enforcement) Act 2022.
>
> 1. A material discrepancy in this Schedule is one which satisfies the condition in paragraph 2, including one which is in a form listed in paragraph 3.
>
> 2. The condition in this paragraph is that the discrepancy, by its nature, and having regard to all the circumstances, may reasonably be considered—
>
> (a) to be linked to money laundering or terrorist financing; or
>
> (b) to conceal details of the business of the customer.

The test is objective; it does not matter if the discrepancy is deliberate or not.

> 3. Discrepancies listed in this paragraph are in the form of—
>
> (a) a difference in name;
>
> (b) an incorrect entry for nature of control;
>
> (c) an incorrect entry for date of birth;
>
> (d) an incorrect entry for nationality;
>
> (e) an incorrect entry for correspondence address;
>
> (f) a missing entry for a person of significant control or a registrable beneficial owner;

(g) an incorrect entry for the date the individual became a registrable person.

132.24.8 *Guidance*

HMRC say:[33]

You can submit a report to HMRC if you are a relevant person and either:

- there's a material discrepancy in the information you have about the trust and what is on the proof of registration
- the trust is not registered with HMRC and you think it should be

You should first try to contact the trustee or agent of the trust to resolve any discrepancies. You might be able to do this by:

- encouraging them to register the trust with HMRC
- asking them to correct out of date information and manage the trust's details online

If you cannot resolve any material discrepancies with the trustee, you should report them to HMRC.

What a material discrepancy is

A material discrepancy happens when the relevant person both:

- holds information about a trust that is significantly different from the proof of registration given by the trustee or agent — this includes when the trust is a registrable express trust that is not registered (the trustee cannot provide proof of registration)
- reasonably believes the discrepancy has occurred from money laundering, terrorist financing or concealing the business of the trust (whether deliberately or by accident)

Examples of when you should report a material discrepancy include if:

- you have not seen a proof of registration, even though the trust is supposed to be registered
- you believe proof of registration information you have been given is fake
- you have information which leads you to suspect money laundering or terrorist financing in the proof of registration:
- there are clear differences in the trust name, Unique Tax Reference, trust start date or correspondence address
- personal information about the beneficial owner is wrong (for example, their month or year of birth is incorrect)
- any of the beneficial owners are missing or wrongly included and should be removed
- none of the trust information matches what you expect to see

What you do not need to report

You do not need to tell us about:

- spelling errors (for example, Jon Smith instead of John Smith)
- missing, or slightly different spellings of, middle names
- slight differences in the trust name

Companies House say:[34]

[33] *https://www.gov.uk/guidance/report-a-trust-discrepancy-to-hmrc*

[34] *https://www.gov.uk/guidance/report-a-discrepancy-about-a-beneficial-owner-on-the-psc-register-by-an-obliged-entity*

Examples of material discrepancies

When you conclude that the discrepancy is linked to the conditions of money laundering, terrorist financing or concealment, the discrepancy is considered 'material' and is therefore reportable.

Material discrepancies that could be linked to these conditions may include the following examples.

A difference in name

The person or entity could be considered to be a different person or entity rather than a spelling error, such as an omitted, incomplete, or inverted:

- PSC surname
- registrable beneficial owner surname
- relevant legal entity (RLE) name

For example:

- Smith Maria instead of Maria Smith (forename and surname reversed)
- John Smith instead of Paul Smith (different name)
- John Smythe instead of John Smith (different spelling indicates it could be a different person)
- Amira Brown instead of Amira Wallace-Brown (part of hyphenated surname missing)
- Sunshine News Limited instead of Sunshine News International Limited (part of registered company name missing)

An incorrect entry for nature of control

The PSC's natures of control do not correctly reflect the control they hold in terms of the qualifying conditions in the Department for Business and Trade (DBT) guidance on the register of people with significant control (PDF 1,806KB).

This includes incomplete natures of control, such as missing voting rights.

For example:

- an individual who holds more than 25% of the shares is notified as a PSC with 'significant influence or control'
- an individual who holds 50% of the shares is notified as a PSC with 'ownership of shares – more than 50% but less than 75%'
- an individual who holds more than 25% of the shares and attached voting rights is notified as a PSC with ownership of shares only
- an entity is notified as a PSC with 'ownership of shares – more than 50% but less than 75%' however an individual is identified as directly owning 100% shares

This also applies if a registrable beneficial owner's natures of control do not correctly reflect the control they have.

An incorrect entry for date of birth

The PSC's or registrable beneficial owner's month or year of birth (or both), as verified by the obliged entity, does not match what is shown on the Companies House register.

For example, the date of birth on an individual's passport is 24 May 1985, but the month and year of birth shown in their PSC or beneficial owner information on the register is October 1985.

An incorrect entry for nationality

The PSC's or registrable beneficial owner's nationality, as verified by the obliged entity, does not match the nationality shown on the Companies House register.

For example, an individual has provided a French passport as proof of nationality, however the nationality shown in their PSC or beneficial owner information on the register is British.

An incorrect entry for correspondence address

The PSC's or registerable beneficial owner's address significantly differs from the address on the register, such as the property number or the postcode.

For example, the first line of an individual's correspondence address is '4 Daisy Lane', however the first line of their correspondence address is shown on the Companies House register as 'The Mill, Daisy Lane'.

A missing entry for a PSC or a registrable beneficial owner

An individual or legal entity that qualifies as a PSC or RLE is not recorded as a PSC or registrable beneficial owner.

For example, you have established that an individual holds more than 25% of the shares, however the individual is not recorded on the register as a PSC or beneficial owner.

The report should include the reason why the obliged entity believes that the individual would qualify as a PSC or beneficial owner.

An incorrect entry for the date the individual became a registrable person

The date that an individual became a PSC or registerable beneficial owner does not match the date on the register.

For example, an individual or legal entity's notification date is shown as 12 June 2019 on the Companies House register, however their notification date was 27 June 2020.

...

What you do not need to report

You do not need to report the following:

- if a discrepancy is not reasonably considered to be linked to money laundering, terrorist financing or to conceal details of a PSC or a registrable beneficial owner, it does not need to be reported to Companies House
- if you've already made a discrepancy report, you do not need to report the same material discrepancy again
- if the material discrepancy is resolved before you submit a report, you do not need to report it - see When to obtain an extract and make a discrepancy report
- when an obliged entity holds information that is not required to be included on the Companies House register
- a spelling error - for example, Jon Smith instead of John Smith, or a missing or slightly different spelling of a middle name
- a shortened name - for example, Jim instead of James
- minor variations in an address – for example, Glos Rd instead of Gloucester Road
- where the nationality of Welsh, English, Scottish or Northern Irish is given to the obliged entity, but the register shows UK
- where a company has claimed an exemption from providing their PSC details because they are trading on a regulated market, PSC details will not be shown on the register
- if a person or company owns less than 25% of shares they are not registrable as a PSC or a beneficial owner of an overseas entity - this does not affect the duty in terms of PSCs or registrable beneficial owners who control the company in another way

132.25 Unable to satisfy CDD

Reg 31 MLR provides:

(1) Where, in relation to any customer, a relevant [regulated] person is unable to apply customer due diligence measures as required by regulation 28,[35] that person-

(a) must not carry out any transaction through a bank account with the customer or on behalf of the customer;

(b) must not establish a business relationship or carry out a transaction with the customer otherwise than through a bank account;

(c) must terminate any existing business relationship with the customer;

(d) must consider whether the relevant [regulated] person is required to make a disclosure (or to make further disclosure) by-

(i) Part 3 of the Terrorism Act 2000; or

(ii) Part 7 of the Proceeds of Crime Act 2002.

(2) Paragraph (1)(a) does not prevent money deposited in an account being repaid to the person who deposited it, provided that, in any case where a disclosure is required by the legislation referred in paragraph (1)(d), the relevant [regulated] person has-

(a) consent (within the meaning of section 21ZA of the Terrorism Act 2000 (arrangements with prior consent)) to the transaction, or

(b) the appropriate consent (within the meaning of section 335 of the Proceeds of Crime Act 2002 (appropriate consent)) to the transaction.

132.25.1 *Legal advice exemption*

Reg 31(3) MLR provides:

Paragraph (1) does not apply where an independent legal professional or other professional adviser[36] is in the course of ascertaining the legal position for a client or performing the task of defending or representing that client in, or concerning, legal proceedings, including giving advice on the institution or avoidance of proceedings.

[35] See 132.18 (CDD: Standard information).

[36] Reg 31(4) provides: “In paragraph (3), “other professional adviser” means an auditor, external accountant or tax adviser who is a member of a professional body which is established for any such persons and which makes provision for-

(a) testing the competence of those seeking admission to membership of such a body as a condition for such admission; and

(b) imposing and maintaining professional and ethical standards for its members, as well as imposing sanctions for noncompliance with those standards.”

This exception only applies to litigation and contentious matters, not to CDD transactional work.

132.26 Enhanced CDD

132.26.1 *High-risk third country*

Reg 33 MLR provides:

> (3) For the purposes of paragraph (1)(b)-
> (a) a "high-risk third country" means a country named on either of the following lists published by the Financial Action Task Force as they have effect from time to time —
> (i) High-Risk Jurisdictions subject to a Call for Action;
> (ii) Jurisdictions under Increased Monitoring;

As at 27 June 2023, the list is:

> Barbados, Bulgaria, Burkina Faso, Cameroon, Croatia, Democratic People's Republic of Korea, Democratic Republic of the Congo, Gibraltar, Haiti, Iran, Jamaica, Mali, Mozambique, Myanmar, Nigeria, Philippines, Senegal, South Africa, South Sudan, Syria, Tanzania, Turkey, Uganda, United Arab Emirates, Vietnam, Yemen.

There are few surprises in the list.

132.26.2 *Other definitions*

Reg 33(3) MLR provides:

> (b) a "relevant transaction" means a transaction in relation to which the relevant [regulated] person is required to apply customer due diligence measures under regulation 27;[37]

In my terminology, that is a CDD transaction.

> (c) being "established in" a country means-
> (i) in the case of a legal person, being incorporated in or having its principal place of business in that country, or, in the case of a financial institution or a credit institution, having its principal regulatory authority in that country; and
> (ii) in the case of an individual, being resident in that country, but not merely having been born in that country.

[37] See 132.17 (When CDD required).

132.26.3 *When enhanced CDD required*

Reg 33 MLR provides:

> (1) A relevant [regulated] person must apply enhanced customer due diligence measures and enhanced ongoing monitoring, in addition to the customer due diligence measures required under
> [a] regulation 28[38]
> [b] and, if applicable, regulation 29 [additional CDD: credit/financial institutions],
> to manage and mitigate the risks arising-
> (a) in any case identified as one where there is a high risk of money laundering or terrorist financing-
> (i) by the relevant [regulated] person under regulation 18(1) [practice risk assessment], or
> (ii) in information made available to the relevant [regulated] person under regulations 17(9) and 47 [sector risk assessment/guidance];
> (b) in any business relationship with a person established in a high-risk third country or in relation to any relevant transaction where either of the parties to the transaction is established in a high-risk third country;
> (c) in relation to correspondent relationships with a credit institution or a financial institution (in accordance with regulation 34);
> (d) if a relevant [regulated] person has determined that a customer or potential customer is a PEP, or a family member or known close associate of a PEP (in accordance with regulation 35);
> (e) in any case where the relevant [regulated] person discovers that a customer has provided false or stolen identification documentation or information and the relevant [regulated] person proposes to continue to deal with that customer;
> (f) in any case where-
> (i) a transaction is complex or unusually large,
> (ii) there is an unusual pattern of transactions, or
> (iii) the transaction or transactions have no apparent economic or legal purpose, and
> (g) in any other case which by its nature can present a higher risk of money laundering or terrorist financing.

[38] See 132.18 (CDD: Standard information).

132.26.4 *Branch/group relief*

Reg 33 MLR provides:

> (2) Paragraph (1)(b) does not apply when the customer is a branch or majority owned subsidiary undertaking of an entity which is established in a third country if all the following conditions are satisfied-
>
> (a) the entity is-
>
> (i) subject to requirements in national legislation having an equivalent effect to those laid down in the fourth money laundering directive on an obliged entity (within the meaning of that directive); and
>
> (ii) supervised for compliance with those requirements in a manner equivalent to section 2 of Chapter VI of the fourth money laundering directive;
>
> (b) the branch or subsidiary complies fully with procedures and policies established for the group under requirements equivalent to those laid down in Article 45 of the fourth money laundering directive; and
>
> (c) the relevant [regulated] person, applying a risk-based approach, does not consider that it is necessary to apply enhanced customer due diligence measures.

132.26.5 *What enhanced CDD requires*

Reg 33 MLR provides:

> (3A) The enhanced due diligence measures taken by a relevant [regulated] person for the purpose of paragraph (1)(b) must include-
>
> (a) obtaining additional information on the customer and on the customer's beneficial owner;
>
> (b) obtaining additional information on the intended nature of the business relationship;
>
> (c) obtaining information on the source of funds and source of wealth of the customer and of the customer's beneficial owner;
>
> (d) obtaining information on the reasons for the transactions;
>
> (e) obtaining the approval of senior management for establishing or continuing the business relationship;
>
> (f) conducting enhanced monitoring of the business relationship by increasing the number and timing of controls applied, and selecting patterns of transactions that need further examination.
>
> (4) The enhanced customer due diligence measures taken by a relevant [regulated] person for the purpose of paragraph (1)(f) must include-
>
> (a) as far as reasonably possible, examining the background and purpose of the transaction, and
>
> (b) increasing the degree and nature of monitoring of the business

relationship in which the transaction is made to determine whether that transaction or that relationship appear to be suspicious.

(4A) Where a relevant [regulated] person provides a life insurance policy, the relevant [regulated] person must consider the nature and identity of the beneficiary of the policy when assessing whether there is a high risk of money laundering or terrorist financing, and the extent of the measures which should be taken to manage and mitigate that risk.

(4B) Where the beneficiary of a life insurance policy provided by a relevant [regulated] person-

(a) is a legal person or a legal arrangement, and

(b) presents a high risk of money laundering or terrorist financing,

the relevant [regulated] person must take reasonable measures to identify and verify the identity of the beneficial owner of that beneficiary before any payment is made under the policy.

(5) Depending on the requirements of the case, the enhanced customer due diligence measures required under paragraph (1) may also include, among other things-

(a) seeking additional independent, reliable sources to verify information provided or made available to the relevant [regulated] person;

(b) taking additional measures to understand better the background, ownership and financial situation of the customer, and other parties to the transaction;

(c) taking further steps to be satisfied that the transaction is consistent with the purpose and in-tended nature of the business relationship;

(d) increasing the monitoring of the business relationship, including greater scrutiny of transactions.

(6) When assessing whether there is a high risk of money laundering or terrorist financing in a particular situation, and the extent of the measures which should be taken to manage and mitigate that risk, relevant [regulated] persons must take account of risk factors including, among other things-

(a) customer risk factors, including whether-

(i) the business relationship is conducted in unusual circumstances;

(ii) the customer is resident in a geographical area of high risk (see sub-paragraph (c));

(iii) the customer is a legal person or legal arrangement that is a vehicle for holding personal assets;

(iv) the customer is a company that has nominee shareholders or shares in bearer form;

(v) the customer is a business that is cash intensive;

(vi) the corporate structure of the customer is unusual or excessively complex given the nature of the company's business;

(vii) the customer is the beneficiary of a life insurance policy;

(viii) the customer is a third country national who is applying for residence rights in or citizenship of a state in exchange for transfers of capital, purchase of a property, government bonds or in-vestment in corporate entities in that state;

(b) product, service, transaction or delivery channel risk factors, including whether-

(i) the product involves private banking;

(ii) the product or transaction is one which might favour anonymity;

(iii) the situation involves non-face-to-face business relationships or transactions, without certain safeguards, such as an electronic identification process which meets the conditions set out in regulation 28;[39]

(iv) payments will be received from unknown or unassociated third parties;

(v) new products and new business practices are involved, including new delivery mechanisms, and the use of new or developing technologies for both new and pre-existing products;

(vi) the service involves the provision of nominee directors, nominee shareholders or shadow directors, or the formation of companies in a third country;

(vii) there is a transaction related to oil, arms, precious metals, tobacco products, cultural artefacts, ivory or other items related to protected species, or other items of archaeological, historical, cultural or religious significance or of rare scientific value;

(c) geographical risk factors, including-

(i) countries identified by credible sources, such as mutual evaluations, detailed assessment re-ports or published follow-up reports, as not having effective systems to counter money laundering or terrorist financing;

(ii) countries identified by credible sources as having significant levels of corruption or other criminal activity, such as terrorism (within the meaning of section 1 of the Terrorism Act 2000), money laundering, and the production and supply of illicit drugs;

(iii) countries subject to sanctions, embargos or similar measures issued by, for example, the European Union or the United Nations;

(iv) countries providing funding or support for terrorism;

(v) countries that have organisations operating within their territory which have been designated-

(aa) by the government of the UK as proscribed organisations under Schedule 2 to the Terrorism Act 2000, or

(bb) by other countries, international organisations or the European Union as terrorist organisations;

(vi) countries identified by credible sources, such as evaluations, detailed assessment reports or published follow-up reports published by the Financial Action Task Force, the International Monetary Fund, the World Bank, the Organisation for Economic Co-operation and Development or other international bodies or non-governmental organisations as not implementing requirements

[39] See 132.18 (CDD: Standard information).

to counter money laundering and terrorist financing that are consistent with the recommendations published by the Financial Action Task Force in February 2012 and updated in June 2019.

(7) In making the assessment referred to in paragraph (6), relevant [regulated] persons must bear in mind that the presence of one or more risk factors may not always indicate that there is a high risk of money laundering or terrorist financing in a particular situation.

132.27 Politically exposed person (PEP)

132.27.1 *"PEP" & other definitions*

Reg 35 MLR provides:

(12) In this regulation-

(a) "politically exposed person" or "PEP" means an individual who is entrusted with prominent public functions, other than as a middle-ranking or more junior official;

(b) "family member" of a politically exposed person includes-

(i) a spouse or civil partner of the PEP;

(ii) children of the PEP and the spouses or civil partners of the PEP's children;

(iii) parents of the PEP;

(c) "known close associate" of a PEP means-

(i) an individual known to have joint beneficial ownership of a legal entity or a legal arrangement or any other close business relations with a PEP;

(ii) an individual who has sole beneficial ownership of a legal entity or a legal arrangement which is known to have been set up for the benefit of a PEP.

(d) "domestic PEP" means a politically exposed person entrusted with prominent public functions by the United Kingdom;

(e) "non-domestic PEP" means a politically exposed person who is not a domestic PEP;

(f) "enhanced risk factors", in relation to a customer or potential customer who is a domestic PEP or a family member or a known close associate of that domestic PEP, mean risk factors other than the customer's or potential customer's position as a domestic PEP or as a family member or a known close associate of that domestic PEP.

(13) For the purposes of paragraph (5), a reference to a business relationship with an individual includes a reference to a business relationship with a person of which the individual is a beneficial owner.

(14) For the purposes of paragraphs (9), (11) and (12), individuals entrusted with prominent public functions include-

(a) heads of state, heads of government, ministers and deputy or assistant ministers;

(b) members of parliament or of similar legislative bodies;

(c) members of the governing bodies of political parties;

> (d) members of supreme courts, of constitutional courts or of any judicial body the decisions of which are not subject to further appeal except in exceptional circumstances;
> (e) members of courts of auditors or of the boards of central banks;
> (f) ambassadors, charges d'affaires and high-ranking officers in the armed forces;
> (g) members of the administrative, management or supervisory bodies of State-owned enterprises;
> (h) directors, deputy directors and members of the board or equivalent function of an international organisation.
>
> (15) For the purpose of deciding whether a person is a known close associate of a politically exposed person, a relevant [regulated] person need only have regard to information which is in its possession, or to credible information which is publicly available.

132.27.2 *PEP Policy*

Reg 35(1) MLR provides:

> A relevant [regulated] person must have in place appropriate risk-management systems and procedures
> [A] to determine whether a customer or the beneficial owner of a customer is-
> (a) a politically exposed person (a "PEP"); or
> (b) a family member or a known close associate of a PEP,
> [B] and to manage the enhanced risks arising from the relevant [regulated] person's business relationship or transactions with such a customer.

I refer to the risk-management systems and procedures as a "PEP policy".

132.27.3 *"Appropriate" policy*

Reg 35(2) MLR provides:

> In determining what risk-management systems and procedures are appropriate under paragraph (1), the relevant [regulated] person must take account of-
> (a) the risk assessment it carried out under regulation 18(1) [practice risk assessment];
> (b) the level of risk of money laundering and terrorist financing inherent in its business;
> (c) the extent to which that risk would be increased by its business relationship or transactions with a PEP, or a family member or known close associate of a PEP, and
> (d) any relevant information made available to the relevant [regulated] person under regulations 17(9) and 47 [sector risk assessment/ guidance].

132.27.4 *PEP risk assessment*

Reg 35 MLR provides:

> (3) If a relevant [regulated] person has determined that a customer or a potential customer is a PEP, or a family member or known close associate of a PEP, the relevant [regulated] person must assess-
> (a) the level of risk associated with that customer, and
> (b) the extent of the enhanced customer due diligence measures to be applied in relation to that customer.
>
> (3A) For the purpose of the relevant person's assessment under paragraph (3), where a customer or potential customer is a domestic PEP, or a family member or a known close associate of a domestic PEP—
> (a) the starting point for the assessment is that the customer or potential customer presents a lower level of risk than a non-domestic PEP, and
> (b) if no enhanced risk factors are present, the extent of enhanced customer due diligence measures to be applied in relation to that customer or potential customer is less than the extent to be applied in the case of a non-domestic PEP.
>
> (4) In assessing the extent of the enhanced customer due diligence measures to be taken in relation to any particular person (which may differ from case to case), a relevant [regulated] person-
> (a) must take account of any relevant information made available to the relevant [regulated] person under regulations 17(9) and 47 [sector risk assessment/guidance]; and
> (b) may take into account any guidance which has been-
> (i) issued by the FCA; or
> (ii) issued by any other supervisory authority or appropriate body and approved by the Treasury.

This includes LSAG guidance and the BSB risk assessment.

132.27.5 *PEP CDD*

Reg 35 MLR provides:

> (5) A relevant [regulated] person who proposes to have, or to continue, a business relationship with a PEP, or a family member or a known close associate of a PEP, must, in addition to the measures required by regulation 33 [enhanced CDD]-
> (a) have approval from senior management for establishing or continuing the business relationship with that person;
> (b) take adequate measures to establish the source of wealth and source of funds which are involved in the proposed business relationship or transactions with that person; and
> (c) where the business relationship is entered into, conduct enhanced ongoing monitoring of the business relationship with that person.
>
> (6)-(8) [This concerns insurance companies]

132.27.6 *Ceasing to be a PEP*

Reg 35 MLR provides:

> (9) Where a person who was a PEP is no longer entrusted with a prominent public function, a relevant [regulated] person must continue to apply the requirements in paragraphs (5) and (8) in relation to that person-
>
> (a) for a period of at least 12 months after the date on which that person ceased to be entrusted with that public function; or
>
> (b) for such longer period as the relevant [regulated] person considers appropriate to address risks of money laundering or terrorist financing in relation to that person.
>
> (10) Paragraph (9) does not apply in relation to a person who-
>
> (a) was not a politically exposed person within the meaning of regulation 14(5) of the Money Laundering Regulations 2007, when those Regulations were in force; and
>
> (b) ceased to be entrusted with a prominent public function before the date on which these Regulations come into force.
>
> (11) When a person who was a PEP is no longer entrusted with a prominent public function, the relevant [regulated] person is no longer required to apply the requirements in paragraphs (5) and (8) in relation to a family member or known close associate of that PEP (whether or not the period referred to in paragraph (9) has expired).

132.27.7 *Interaction with other duties*

Reg 36 MLR provides:

> (1) The duty under section 30(1) of the Bank of England and Financial Services Act 2016 (duty to ensure that regulations or orders implementing the fourth money laundering directive comply with paragraphs (a) to (d) of that subsection) does not apply if, and to the extent that, the duty is otherwise satisfied as a result of any provision contained in these Regulations, or any guidance issued by the FCA under these Regulations.
>
> (2) The duty under section 333U(1) and (2) of FSMA (duty to issue guidance in connection with politically exposed persons) does not apply if, and to the extent that, the duty is otherwise satisfied as a result of guidance issued by the FCA under these Regulations.

132.28 Simplified CDD

132.28.1 *When simplified CDD applies*

Reg 37(1) MLR provides:

> A relevant [regulated] person may apply simplified customer due diligence measures in relation to a particular business relationship or transaction if it determines that the business relationship or transaction

> presents a low degree of risk of money laundering and terrorist financing...

132.28.2 *What simplified CDD requires*

Reg 37(2) MLR provides:

> Where a relevant [regulated] person applies simplified customer due diligence measures, it must-
>
> (a) [i] continue to comply with the requirements in regulations 28 and 30A, but
>
> [ii] it may adjust the extent, timing or type of the measures it undertakes under regulation 28 to reflect its determination under paragraph (1); and
>
> (b) carry out sufficient monitoring of any business relationships or transactions which are subject to those measures to enable it to detect any unusual or suspicious transactions.

This relaxes the requirements of reg 28 (standard CDD)[40] but not the requirements of reg 30A (checking the register).[41]

132.28.3 *Risk factors*

Reg 37(1) MLR provides that the risk policy is to be made:

> ... having taken into account-
>
> (a) the risk assessment it carried out under regulation 18(1) [practice risk assessment];
>
> (b) relevant information made available to it under regulations 17(9) and 47 [sector risk assessment/guidance]; and
>
> (c) the risk factors referred to in paragraph (3).

Reg 37 MLR provides:

> (3) When assessing whether there is a low degree of risk of money laundering and terrorist financing in a particular situation, and the extent to which it is appropriate to apply simplified customer due diligence measures in that situation, the relevant [regulated] person must take account of risk factors including, among other things-
>
> (a) customer risk factors, including whether the customer-
>
> (i) is a public administration, or a publicly owned enterprise;
>
> (ii) is an individual resident in a geographical area of lower risk (see sub-paragraph (c));

[40] See 132.18 (CDD: Standard information).

[41] See 132.24 (Duty to check register).

(iii) is a credit institution or a financial institution which is-

(aa) subject to requirements in national legislation having an equivalent effect to those laid down in the fourth money laundering directive on an obliged entity (within the meaning of that directive); and

(bb) supervised for compliance with those requirements in a manner equivalent to section 2 of Chapter VI of the fourth money laundering directive;

(iv) is a company whose securities are listed on a regulated market, and the location of the regulated market;

(b) product, service, transaction or delivery channel risk factors, including whether the product or service is-

(i) a life insurance policy for which the premium is low;

(ii) an insurance policy for a pension scheme which does not provide for an early surrender option, and cannot be used as collateral;

(iii) a pension, superannuation or similar scheme which satisfies the following conditions-

(aa) the scheme provides retirement benefits to employees;

(bb) contributions to the scheme are made by way of deductions from wages; and

(cc) the scheme rules do not permit the assignment of a member's interest under the scheme;

(iv) a financial product or service that provides appropriately defined and limited services to certain types of customers to increase access for financial inclusion purposes in the UK;

(v) a product where the risks of money laundering and terrorist financing are managed by other factors such as purse limits or transparency of ownership;

(vi) a child trust fund within the meaning given by section 1(2) of the Child Trust Funds Act 2004;

(vii) a junior ISA within the meaning given by regulation 2B of the Individual Savings Account Regulations 1998;

(c) geographical risk factors, including whether the country where the customer is resident, established or registered or in which it operates is-

(i) the UK;

(ii) a third country which has effective systems to counter money laundering and terrorist financing;

(iii) a third country identified by credible sources as having a low level of corruption or other criminal activity, such as terrorism (within the meaning of section 1 of the Terrorism Act 2000), money laundering, and the production and supply of illicit drugs;

(iv) a third country which, on the basis of credible sources, such as evaluations, detailed assessment reports or published follow-up reports published by the Financial Action Task Force, the International Monetary Fund, the World Bank, the Organisation for Economic Co-operation and Development or other international bodies or non-governmental organisations-

(aa) has requirements to counter money laundering and terrorist financing that are consistent with the revised Recommendations published by the Financial Action Task Force in February 2012 and updated in October 2016; and

(bb) effectively implements those Recommendations.

(4) In making the assessment referred to in paragraph (3), relevant [regulated] persons must bear in mind that the presence of one or more risk factors may not always indicate that there is a low risk of money laundering and terrorist financing in a particular situation.

132.28.4 *End to simplified CDD*

Reg 37(8) MLR provides:

> A relevant [regulated] person must not continue to apply simplified customer due diligence measures under paragraph (1)-
>
> (a) if it doubts the veracity or accuracy of any documents or information previously obtained for the purposes of identification or verification;
>
> (b) if its risk assessment changes and it no longer considers that there is a low degree of risk of money laundering and terrorist financing;
>
> (c) if it suspects money laundering or terrorist financing; or
>
> (d) if any of the conditions set out in regulation 33(1) apply.

132.29 Reliance on third party

132.29.1 *Authority to rely*

Reg 39 MLR provides:

> (1) A relevant [regulated] person may rely on a person who falls within paragraph (3) ("the third party")
>
> [a] to apply any of the customer due diligence measures required by regulation 28(2) to (6) and (10), or
>
> [b] to carry out any of the measures required by regulation 30A...

These measures are:

Reg	**Topic**	**See**
28(2)-(6) & (10)	Standard CDD data	132.18
30A	Register check	132.24

132.29.2 *Remaining liable*

Reg 39(1) MLR provides:

> but, notwithstanding the relevant [regulated] person's reliance on the

> third party, the relevant [regulated] person remains liable for any failure to apply such measures.

The rule that a person "may rely" but "remains liable for any failure" represents an uneasy compromise, if not a contradiction.

LSAG guidance provides:

> 169. Whatever approach you take, liability for carrying out the required CDD remains with you as the relevant [regulated] person. Where you rely upon another person conducting the CDD checks, the responsibility remains yours. You cannot avoid criminal sanction by the plea that you relied upon your solicitor's CDD or paid an external provider and that they failed to do the job properly - the buck stops with you.

132.29.3 *Reliance on register check*

Reg 39(2) MLR provides:

> When a relevant [regulated] person relies on the third party to apply customer due diligence measures or carry out any of the measures required by regulation 30A under paragraph (1) it—
>
> (a) must immediately obtain from the third party all the information needed to satisfy the requirements of regulation 28(2) to (6) and (10) and regulation 30A in relation to the customer, customer's beneficial owner, or any person acting on behalf of the customer;
>
> (b) must enter into arrangements with the third party which—
>
> (i) enable the relevant [regulated] person to obtain from the third party immediately on request copies of any identification and verification data and any other relevant documentation on the identity of the customer, customer's beneficial owner, or any person acting on behalf of the customer;
>
> (ii) require the third party to retain copies of the data and documents referred to in paragraph (i) for the period referred to in regulation 40.

LSAG guidance provides:

> 158. Reliance does not mean simply obtaining the third party's CDD documents. Rather, it means obtaining from them all of the "information" that you need to meet all of your CDD obligations under reg. 28. This does not mean and does not require you to obtain the underlying documentation. Even where you do obtain copy documents, the obligation upon you is to ensure that the information provided to you

permits you to meet the requirements of Regulation-compliant CDD.

159. To undertake reliance you should

[a] enquire of the third party what steps it has taken to satisfy its CDD obligations, review and

[b] check the CDD information provided to you and consider whether the steps taken by the third party are sufficient to meet the requirements of the Regulations.

You should assess whether the CDD upon which you propose to rely is sufficient for you to comply with your CDD obligations under the Regulations. If it is not, then you should not rely upon it.

160. In practice, you need to know:

- the identity of the customer or beneficial owner whose identity is being verified;
- the level of CDD that has been carried out; and
- confirmation of the third party's understanding of their obligation to make available, on request, copies of the verification data, documents or other information.

If you routinely rely on CDD checks done by a particular third party, it is good practice to request sample documents to test their reliability.

161. You must confirm that the third party is someone who can grant reliance under the Regulations and keep a written record of having done so. You should also consider whether you are required to undertake CDD upon the third party upon whom you are seeking reliance.

132.29.4 *Who can be relied on*

Reg 39 MLR provides:

> (3) The persons within this paragraph are—
>
> (a) another relevant [regulated] person who is subject to these Regulations under regulation 8;
>
> (c)[42] a person who carries on business in a third country who is—
>
> (i) subject to requirements in relation to customer due diligence and record keeping which are equivalent to those laid down in the fourth money laundering directive; and
>
> (ii) supervised for compliance with those requirements in a manner equivalent to section 2 of Chapter VI of the fourth money laundering directive;
>
> (d) organisations whose members consist of persons within sub-paragraph (a) or (c).

[42] There is no para (b).

132.29.5 *High-risk countries*

Reg 39(4) MLR provides:

> A relevant [regulated] person may not rely on a third party established in a high-risk third country, and for these purposes "high-risk third country" has the meaning given in regulation 33(3).[43]

132.29.6 *Outsourcing CDD service provider*

Reg 39 MLR provides:

> (7) Nothing in this regulation prevents a relevant [regulated] person applying customer due diligence measures, or carrying out any of the measures required by regulation 30A, by means of an agent or an outsourcing service provider provided that the arrangements between the relevant [regulated] person and the agent or outsourcing service provider provide for the relevant [regulated] person to remain liable for any failure to apply such measures.
>
> (8) For the purposes of paragraph (7), an "outsourcing service provider" means a person who—
>
> (a) performs a process, a service or an activity that would otherwise be undertaken by the relevant [regulated] person, and
>
> (b) is not an employee of the relevant [regulated] person.

132.30 Record-keeping

Regulation 40 MLR provides:

> (1) Subject to paragraph (5), a relevant [regulated] person must keep the records specified in paragraph (2) for at least the period specified in paragraph (3).
>
> (2) The records are-
>
> (a) a copy of any documents and information obtained by the relevant [regulated] person to satisfy the customer due diligence requirements in regulations
>
> [i] 28 [standard CDD],
>
> [ii] 29 [Additional CDD: credit/financial institutions] and
>
> [iii] 33 to 37
>
> [iv] and the requirements of regulation 30A [checking the register],
>
> [v] and of regulations 64C and 64G(1);
>
> (b) sufficient supporting records (consisting of the original documents or copies) in respect of a transaction (whether or not the transaction is an occasional transaction) which is the subject of customer due diligence measures or ongoing monitoring to enable the transaction to be

[43] See 132.26.1 (High-risk third country).

reconstructed;

(c) [this concerns an inter-cryptoasset business transfer]

(d) [this concerns an unhosted wallet transfer]

(3) Subject to paragraph (4), the period is five years beginning on the date on which the relevant person knows, or has reasonable grounds to believe-

(a) that the transaction is complete, for records relating to an occasional transaction; or

(b) that the business relationship has come to an end for records relating to-

(i) any transaction which occurs as part of a business relationship, or

(ii) customer due diligence measures taken in connection with that relationship.

(4) A relevant [regulated] person is not required to keep the records referred to in paragraph (3)(b)(i) for more than 10 years.

(5) Once the period referred to in paragraph (3), or if applicable paragraph (4), has expired, the relevant [regulated] person must delete any personal data obtained for the purposes of these Regulations unless-

(a) the relevant [regulated] person is required to retain records containing personal data-

(i) by or under any enactment, or

(ii) for the purposes of any court proceedings;

(b) the data subject has given consent to the retention of that data; or

(c) the relevant [regulated] person has reasonable grounds for believing that records containing the personal data need to be retained for the purpose of legal proceedings.

(6) A relevant [regulated] person who is relied on by another person must keep the records specified in paragraph (2) for the period referred to in paragraph (3) or, if applicable, paragraph (4).

(7) A person referred to in regulation 39(3) ("A") who is relied on by a relevant [regulated] person ("B") must, if requested by B within the period referred to in paragraph (3) or, if applicable, paragraph (4), immediately-

(a) make available to B any information about the customer, any person purporting to act on behalf of the customer and any beneficial owner of the customer, which A obtained when applying customer due diligence measures; and

(b) forward to B copies of any identification and verification data and other relevant documents on the identity of the customer, any person purporting to act on behalf of the customer and any beneficial owner of the customer, which A obtained when applying those measures.

(8) Paragraph (7) does not apply where a relevant [regulated] person applies customer due diligence measures by means of an agent or an outsourcing service provider (within the meaning of regulation 39(8)).

(9) For the purposes of this regulation-

(a) B relies on A where B does so in accordance with regulation 39(1);

(b) "copy" means a copy of the original document which would be admissible as evidence of the original document in court proceedings;

(c) "data subject" has the same meaning as in the Data Protection Act 2018 (see section 3 of that Act);

(d) “personal data” has the same meaning as in Parts 5 to 7 of that Act (see section 3(2) and (14) of that Act);

(e) “beneficiary”, “cryptoasset business”, “inter-cryptoasset business transfer”, “intermediary cryptoasset business” and “unhosted wallet transfer” have the meanings given by regulation 64B.

133.11.1 Territorial limitation
133.11.2 Foreign tax evasion
133.12 General defences

133.1 Money laundering: Introduction

In this chapter I consider four criminal offences relating to money laundering, which are found in Part 7 Proceeds of Crime Act 2002 ("POCA").[1]

Conviction of these offences is punishable by up to 14 years imprisonment and an unlimited fine.

Guidance can be found from various sources, and I draw on:

Issued by	My term	Full Title
LSAB	LSAB guidance	AML Guidance for the Legal Sector[2]

[1] See too 122.2 (Adviser's duties).

[2] (2021) draft guidance pending approval from HM Treasury *https://www.lawsociety.org.uk/topics/anti-money-laundering/anti-money-laundering-guidance*

CCAB	CCAB accountants guidance	AML & Counter-Terrorist Financing Guidance for the Accountancy Sector[3]
CCAB	CCAB tax guidance	Supplementary AML Guidance for Tax Practitioners[4]

A full discussion needs a long chapter. I focus on the issues relevant to tax advisors. I do not consider the NCA's general Revenue functions.[5]

133.2 "Money laundering"

In the normal sense of the expression, money laundering is the process by which proceeds of crime are disguised, so funds appear to come from a legitimate source.

POCA defines the expression more widely. It includes:

(1) Handling or possessing Criminal Property, including possessing the proceeds of one's own crime

(2) Assisting in handling/possessing of Criminal Property

Section 340 POCA provides:

> (1) This section applies for the purposes of this Part....
>
> (11) Money laundering is an act which—
>
> (a) constitutes an offence under[6]
>
> | Section | Topic | See para |
> |---|---|---|
> | 327 | Conceal/transfer criminal property | 133.5 |
> | 328 | Assisting money laundering | 133.6 |
> | 329 | Possession of criminal property | 133.7 |
>
> (b) constitutes an attempt, conspiracy or incitement to commit an offence specified in paragraph (a),
>
> (c) constitutes aiding, abetting, counselling or procuring the commission of an offence specified in paragraph (a), or
>
> (d) would constitute an offence specified in paragraph (a), (b) or (c) if done in the UK.

[6] For clarity I have set this out in tabular form and with my own wording, rather than as in the statute.

133.3 Criminal Property

Section 340 POCA provides:

> (1) This section applies for the purposes of this Part.
> (3) Property[7] is criminal property if—
> (a) [i] it constitutes a person's benefit from criminal conduct[8] or
> [ii] it represents[9] such a benefit (in whole or part and whether directly or indirectly), and
> (b) the alleged offender knows or suspects[10] that it constitutes or represents such a benefit.

I write this term with initial capitals, to reflect the technical nature of the expression.

Section 340(4) POCA continues with provisions which widen the scope of Criminal Property:

> It is immaterial—
> (a) who carried out the conduct;
> (b) who benefited from it;
> (c) whether the conduct occurred before or after the passing of this Act.

133.3.1 *Benefit from conduct*

Section 340 POCA provides:

> (5) A person benefits from conduct if he obtains property as a result of or in connection with the conduct.
> (6) If a person obtains a pecuniary advantage as a result of or in connection with conduct, he is to be taken to obtain as a result of or in connection with the conduct a sum of money equal to the value of the pecuniary advantage.
> (7) References to property or a pecuniary advantage obtained in connection with conduct include references to property or a pecuniary advantage obtained in both that connection and some other.
> (8) If a person benefits from conduct his benefit is the property obtained as a result of or in connection with the conduct.

[7] Defined widely in s.340(9)(10) POCA.

[8] Section 340 POCA provides: "Criminal conduct is conduct which—
(a) constitutes an offence in any part of the UK, or
(b) would constitute an offence in any part of the UK if it occurred there."

[9] See App.2.9 ('Representing' assets).

[10] See 133.4 (Knows or suspects).

133.3.2 *Criminal Property: Tax offences*

Dishonest non-payment of tax on income/gains is criminal conduct. But it is not obvious that the income/gains represent the benefit and so constitutes Criminal Property of the offender. The unpaid tax might have been paid from other property of the taxpayer.[11] But in *R v K*:

> To take a simplified paradigm case, let us suppose that over a two year period D fraudulently under-declares the takings of his business by £250,000 per annum with the result that he deprives the revenue of £100,000 in income tax and £25,000 in VAT in each of the two years. In each year, D has obtained a pecuniary advantage of £125,000 as a result of his cheating the revenue. That is a benefit within the meaning of section 340(3)(a) of POCA. The undeclared takings of £500,000 represent that benefit in part within the meaning of section 340(3)(a) in the sense that the undeclared takings of £500,000 should have borne tax and a sum representing or equivalent to part of that figure should have been paid in tax.[12]

Moreover, in *R v William*:[13]

> The reference to "in whole or in part" [in s.340(3)(a)[i]] is important because it shows that the whole property is treated as criminal property, even where only part of it represents benefit from criminal conduct...
> In cases where the turnover is falsely represented, the benefit is the tax due on the undeclared turnover. However, the criminal property as defined by s 340 is the entirety of the undeclared turnover and not merely the tax due because the benefit is represented in part by that sum.

The reasoning was purposive. If the profit was not Criminal Property as defined, the result would mean that the money laundering provisions could never apply to tax evasion offences. This is perhaps a stretch, but "represent" is a flexible concept.

The capital from which the income arose is not Criminal Property, but in practice there is likely to be a mixed fund.

By analogy, income of a person abroad within s.720 is Criminal Property if the transferor dishonestly fails to declare it.

In the case of a taxpayer who dishonestly fails to pay tax on a benefit due

[11] Assume that there was other property. It would be different for fraudulent tax reclaims, and for IHT (because of the Revenue charge).

[12] [2007] EWCA Crim 491 at [21].

[13] [2013] EWCA Crim 1262 at [27].

under s.731 or s.87, it is suggested that the Criminal Property is both the benefit, and the relevant income/trust gains.

LSAB guidance provides:

> 18.5.5 Tax issues
> If the purchase price is recorded incorrectly, this may be in an attempt to evade stamp duty (the saving would represent the proceeds of crime.)

It is suggested that the property represents the proceeds of crime, even though that would not normally have been used to pay the SDLT.

133.4 Knows or suspects

"Knows or suspects" is used in many places in POCA, in particular:

Context	**POCA**	**See para**
Assisting money laundering	s.328	133.6
Adequate consideration	s.329(3)	133.7
Duty to disclose money laundering	s.330(2), (5A)	133.9
Definition of Criminal Property	s.340(3)	133.3

Suspicion must be based on some evidence, even if that evidence is tentative. General assumptions do not amount to suspicion of particular individuals, eg a belief that:

(1) Underdeclaring cash takings is endemic
(2) Behind every great fortune is a great crime[14]

In *R v Da Silva*:

> ... the essential element in the word "suspect" and its affiliates, in this context, is that the defendant must think that there is a possibility, which is more than fanciful, that the relevant facts exist. A vague feeling of unease would not suffice. But the statute does not require the suspicion to be "clear" or "firmly grounded and targeted on specific facts", or based upon "reasonable grounds"
> ... the suspicion must be of a settled nature; a case might, for example, arise in which a defendant did entertain a suspicion in the above sense but, on further thought, honestly dismissed it from his or her mind as being unworthy or as contrary to such evidence as existed or as being outweighed by other considerations.[15]

[14] The thought derives from Balzac, *Le Père Goriot*: "Le secret des grandes fortunes sans cause apparente est un crime oublié, parce qu'il a été proprement fait."

[15] [2006] EWCA Crim 1654 at [16]-[17].

133.5 Conceal/transfer Criminal Property

Section 327(1) POCA provides:

> A person commits an offence if he—
> (a) conceals[16] criminal property;
> (b) disguises criminal property;
> (c) converts criminal property;
> (d) transfers criminal property;
> (e) removes criminal property from England and Wales or from Scotland or from Northern Ireland.

This would include transferring Criminal Property from a Swiss account to a trust or other entity.

A professional adviser is not likely to commit this offence but if the client has done so, or may do so, that has consequences for the professional's responsibilities for assisting/disclosing.

133.6 Assisting money laundering

Section 328(1) POCA provides:

> A person commits an offence if he enters into or becomes concerned in an arrangement which he knows or suspects[17] facilitates (by whatever means) the acquisition, retention, use or control of criminal property by or on behalf of another person.

LSAB guidance provides:

> **16.3.6 What is not an arrangement?**
> *Bowman v Fels*[18] held that s328 does not cover or affect the ordinary conduct of litigation by legal professionals, including any step taken in litigation from the issue of proceedings and the securing of injunctive relief or a freezing order up to its final disposal by judgment.
> Dividing assets in accordance with a judgment, including the handling of the assets which are criminal property, is not an arrangement. Settlements, negotiations, out of court settlements, alternative dispute resolution and tribunal representation are also not arrangements. However, the property will generally still remain criminal property and

[16] Defined in subsection (3): "Concealing or disguising criminal property includes concealing or disguising its nature, source, location, disposition, movement or ownership or any rights with respect to it."

[17] See 133.4 (Knows or suspects).

[18] [2005] EWCA Civ 226.

you may need to consider referring your client for specialist advice regarding possible offences they may commit once they come into possession of the property after completion of the settlement.

133.7 Possession of Criminal Property

Section 329(1) POCA provides:

> A person commits an offence if he—
> (a) acquires criminal property;
> (b) uses criminal property;
> (c) has possession of criminal property.

A professional adviser is not likely to commit this offence but if the client has done so, or may do so, that has consequences for the professional's responsibilities for assisting/disclosing.

Section 329(2) POCA:

> (2) But a person does not commit such an offence if ...
> (c) he acquired or used or had possession of the property for adequate consideration ...

Section 329(3) POCA defines "adequate consideration":

> For the purposes of this section-
> (a) a person acquires property for inadequate consideration if the value of the consideration is significantly less than the value of the property;
> (b) a person uses or has possession of property for inadequate consideration if the value of the consideration is significantly less than the value of the use or possession;
> (c) the provision by a person of goods or services which he knows or suspects may help another to carry out criminal conduct is not consideration.

133.8 POCA disclosure immunity

133.8.1 *Authorised disclosure*

Section 338 POCA provides:

> (1) For the purposes of this Part a disclosure is authorised if—
> (a) it is a disclosure to a constable, a customs officer or a nominated officer[19] by the alleged offender that property is

[19] Section 338(5) POCA provides: "disclosure to a nominated officer is a disclosure which—

> criminal property, and[20]
>
> (c) the first, second or third condition set out below is satisfied.
>
> (2) The first condition is that the disclosure is made before the alleged offender does the prohibited act.
>
> (2A) The second condition is that—
>
> (a) the disclosure is made while the alleged offender is doing the prohibited act,[21]
>
> (b) he began to do the act at a time when, because he did not then know or suspect that the property constituted or represented a person's benefit from criminal conduct, the act was not a prohibited act, and
>
> (c) the disclosure is made on his own initiative and as soon as is practicable after he first knows or suspects[22] that the property constitutes or represents a person's benefit from criminal conduct.
>
> (3) The third condition is that—
>
> (a) the disclosure is made after the alleged offender does the prohibited act,
>
> (b) he has a reasonable excuse for his failure to make the disclosure before he did the act, and
>
> (c) the disclosure is made on his own initiative and as soon as it is practicable for him to make it.

133.8.2 *Indemnity for authorised disclosure*

Section 338 POCA provides:

> (4) An authorised disclosure is not to be taken to breach any restriction on the disclosure of information (however imposed).
>
> (4A) Where an authorised disclosure is made in good faith, no civil liability arises in respect of the disclosure on the part of the person by or on whose behalf it is made.

133.9 Duty to disclose money laundering

Section 330(1) POCA provides:

(a) is made to a person nominated by the alleged offender's employer to receive authorised disclosures, and

(b) is made in the course of the alleged offender's employment...”

[20] There is no para (b).

[21] Section 338(6) POCA provides: “References to the prohibited act are to an act mentioned in section 327(1), 328(1) or 329(1) (as the case may be).”

[22] See 133.4 (Knows or suspects).

> A person commits an offence if the conditions in subsections (2) to (4) are satisfied.

I refer to these conditions as **"POCA disclosure conditions"**.

133.9.1 *Condition 1: Knowledge*

Section 330(2) POCA provides:

> The first condition is that he—
> (a) knows or suspects[23], or
> (b) has reasonable grounds for knowing or suspecting,
> that another person is engaged in money laundering.

133.9.2 *Condition 2: Professional*

Section 330(3) POCA provides:

> The second condition is that the information or other matter—
> (a) on which his knowledge or suspicion is based, or
> (b) which gives reasonable grounds for such knowledge or suspicion,
> came to him in the course of a business in the regulated sector.

133.9.3 *Regulated sector*

Para 1(1) sch 9 POCA provides:

> A business is in the regulated sector to the extent that it consists of—

There follows a list of 22 activities, numbered alphabetically. The list includes:

> (l) the provision to other persons of accountancy services by a firm or sole practitioner who by way of business provides such services to other persons;
> (m) the provision of material aid, or assistance or advice, in connection with the tax affairs of other persons by a firm or sole practitioner, whether provided directly or through a third party, if the firm or sole practitioner by way of business provides (as the case may be) aid, assistance or advice in connection with the tax affairs of other persons;
> (n) the participation[24] in financial or real property transactions

[23] See 133.4 (Knows or suspects).

[24] Para 9(3) provides: "For the purposes of sub-paragraph (1)(n) a person participates in a transaction by assisting in the planning or execution of the transaction or otherwise acting for or on behalf of a client in the transaction."

concerning—

(i) the buying and selling of real property (or, in Scotland, heritable property) or business entities;

(ii) the managing of client money, securities or other assets;

(iii) the opening or management of bank, savings or securities accounts;

(iv) the organisation of contributions necessary for the creation, operation or management of companies; or

(v) the creation, operation or management of trusts, companies or similar structures,

by a firm or sole practitioner who by way of business provides legal or notarial services to other persons;

(o) the provision to other persons by way of business by a firm or sole practitioner of any of the services mentioned in sub-paragraph (4);

(4) The services referred to in sub-paragraph (1)(o) are—

(a) forming companies or other legal persons;

(b) acting, or arranging for another person to act—

(i) as a director or secretary of a company;

(ii) as a partner of a partnership; or

(iii) in a similar position in relation to other legal persons;

(c) providing a registered office, business address, correspondence or administrative address or other related services for a company, partnership or any other legal person or arrangement;

(d) acting, or arranging for another person to act, as—

(i) a trustee of an express trust or similar legal arrangement; or

(ii) a nominee shareholder for a person other than a company whose securities are listed on a regulated market.[25]

133.9.4 *Condition 3: Knowledge of identity*

Section 330(3A) POCA provides:

The third condition is—

(a) that he can identify the other person mentioned in subsection (2) or the whereabouts of any of the laundered property,[26] or

[25] Para 1(5) provides: “For the purposes of sub-paragraph (4)(d) "regulated market" has the meaning given by regulation 3(1) (general interpretation) of the Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017 (SI 2017/692).”

[26] This has a commonsense definition in subsection (5A) “The laundered property is the property forming the subject-matter of the money laundering that he knows or

> (b) that he believes, or it is reasonable to expect him to believe, that the information or other matter mentioned in subsection (3) will or may assist in identifying that other person or the whereabouts of any of the laundered property.

Disclosure conditions 1 to 3 will be met by a non-compliant UK resident and domiciled individual with an undisclosed Swiss bank account.

133.9.5 *Condition 4: Disclosure*

Disclosure is one option. Section 330(4) POCA provides:

> The fourth condition is that he does not make the required disclosure[27] to—
> (a) a nominated officer, or
> (b) a person authorised for the purposes of this Part by the Director General of the National Crime Agency,
> as soon as is practicable after the information or other matter mentioned in subsection (3) comes to him.

Thus in the absence of some other defence, s.330 effectively imposes a duty to disclose the client.

Section 330(5) POCA provides:

> The required disclosure is a disclosure of—
> (a) the identity of the other person mentioned in subsection (2), if he knows it,
> (b) the whereabouts of the laundered property,[28] so far as he knows it, and
> (c) the information or other matter mentioned in subsection (3).

133.10 Professional privilege

133.10.1 *Professional advisers*

Section 330(6) POCA provides:

suspects, or has reasonable grounds for knowing or suspecting, that other person to be engaged in."

[27] Defined subsection (5) "The required disclosure is a disclosure of—
(a) the identity of the other person mentioned in subsection (2), if he knows it,
(b) the whereabouts of the laundered property, so far as he knows it, and
(c) the information or other matter mentioned in subsection (3)."

[28] Defined ss(5A): "The laundered property is the property forming the subject-matter of the money laundering that he knows or suspects, or has reasonable grounds for knowing or suspecting, that other person to be engaged in."

> But he does not commit an offence under this section if...
>
> (b) he is a professional legal adviser or relevant professional adviser and—
>
> (i) if he knows either of the things mentioned in subsection (5)(a) and (b),[29] he knows the thing because of information or other matter that came to him in privileged circumstances, or
>
> (ii) the information or other matter mentioned in subsection (3) came to him in privileged circumstances

133.10.2 *Partners/employees*

Section 330(6) POCA provides:

> (6) But he does not commit an offence under this section if...
>
> (c) subsection (7)[30] or (7B) applies to him...

Section 330(7B) POCA provides protection for employees and partners:

> This subsection applies to a person if—
>
> (a) he is employed by, or is in partnership with, a professional legal adviser or a relevant professional adviser to provide the adviser with assistance or support,
>
> (b) the information or other matter mentioned in subsection (3) comes to the person in connection with the provision of such assistance or support, and
>
> (c) the information or other matter came to the adviser in privileged circumstances.

133.10.3 *"Privileged circumstances"*

Section 330(10) POCA provides:

> Information or other matter comes to a professional legal adviser or relevant professional adviser in privileged circumstances if it is communicated or given to him—
>
> (a) by (or by a representative of) a client of his in connection with the giving by the adviser of legal advice to the client,
>
> (b) by (or by a representative of) a person seeking legal advice from the adviser, or
>
> (c) by a person in connection with legal proceedings or contemplated legal proceedings.

[29] See 133.9.5 (Condition 4: Disclosure).

[30] Subsection (7) relates to untrained employees.

This is similar to legal professional privilege.

CCAB tax guidance provides:

> 7.6 In this context 'legal advice' (as referred to in the statute) given by a tax practitioner other than a lawyer includes tax advice.

133.10.4 *Crime/fraud exception*

Section 330(11) POCA provides:

> But subsection (10) does not apply to information or other matter which is communicated or given with the intention of furthering a criminal purpose.

CCAB accountancy guidance provides:

> 6.5.31 Communications that would otherwise qualify for the privilege reporting exemption are excluded from it when they are intended to facilitate or guide someone in committing or advancing some crime or fraud. This is usually the client but could be a third party. An example of such a situation could be where a person seeks tax advice ostensibly to regularise their tax affairs but in reality, to help them evade tax by improving their understanding of the issues.
>
> 6.5.32 Someone worried that they may be guilty of tax evasion can still seek legal advice from a tax adviser without fear of the exception being invoked. This remains true even when, having received the advice, the person declines a business relationship and the business never knows if the irregularities were rectified. However, if that person's behaviour leads the business to suspect the advice has been used to further evasion, then a SAR could be required.

133.10.5 *Relevant professional adviser*

This term is defined in s.330(14) POCA:

> A relevant professional adviser is an accountant, auditor or tax adviser who is a member of a professional body which is established for accountants, auditors or tax advisers (as the case may be) and which makes provision for—
>
> (a) testing the competence of those seeking admission to membership of such a body as a condition for such admission; and
>
> (b) imposing and maintaining professional and ethical standards for its members, as well as imposing sanctions for non-compliance with those standards.

CCAB tax guidance provides:

> 7.5 The legislation does not list the professional bodies which meet the criteria but the CCAB bodies, the Chartered Institute of Taxation and the Association of Taxation Technicians meet the criteria and hence their members may be considered to be 'relevant professional advisers'.

133.10.6 *Privileged circumstances: CCAB examples*

CCAB tax guidance provides:

> **Privileged circumstances**
> You are approached by a long-standing client seeking advice on what to do about an undisclosed Swiss bank account, where the original money came from undeclared income. They are concerned about the arrangement agreed between the Swiss banks and HMRC. You explain their options and advise that they make a declaration to HMRC.
> Clearly you now know that they have been evading tax; as such, they have committed a money laundering offence. However, the client approached you seeking advice on making an unprompted disclosure under the tax legislation of their undeclared income. It does not appear that this information was disclosed to you with the intention of furthering a criminal offence so it is covered by the privilege exemption. In such circumstances, tax practitioners should also consider whether they should continue to act if they have concerns that the client has not fully disclosed and so that they do not become complicit in further money laundering offences. You must not report them to NCA.
> Having advised them to make a declaration, and explained the consequences, your advice remains privileged even if they subsequently decide not to follow your recommendation.
> **Not-privileged circumstances**
> Now contrast that with the situation whereby, during the preparation of the client's tax return, a member of staff encounters a bank statement from the Swiss bank account among the papers supplied by the client. You ask your client about this bank account; they then admit to the tax evasion. You have the same information as before, but received in a different way.
> In this situation you must report.
> **Applying the crime/fraud exemption**
> Consider the situation where you act for a wife in an acrimonious divorce that is heading for the courts. The wife is claiming 50% of her husband's assets. In preparation for the hearing she notifies you of her husband's undisclosed Swiss bank account, providing you with full details. She wishes to claim 50% of that as well!
> While this appears to be covered by litigation privilege, her intention in providing the information is to acquire criminal property (i.e. half the money in the Swiss bank account). It would fall under the crime/fraud exemption, so would not be privileged.
> You would therefore need to report.

133.11 Overseas conduct

133.11.1 *Territorial limitation*

All the money laundering offences have a territorial limitation. This is set out three times in the same words.[31] Section 327(2A) POCA provides:

> Nor does a person commit an offence under subsection (1) if—
> (a) he knows, or believes on reasonable grounds, that the relevant criminal conduct[32] occurred in a particular country or territory outside the UK, and
> (b) the relevant criminal conduct—
> (i) was not, at the time it occurred, unlawful under the criminal law then applying in that country or territory, and
> (ii) is not of a description prescribed by an order made by the Secretary of State.

The territorial limitation only applies if both conditions in (b) are satisfied. Para 2 Proceeds of Crime Act 2002 (Money Laundering: Exceptions to Overseas Conduct Defence) Order 2006 provides the latter:

> (1) Relevant criminal conduct of a description falling within paragraph (2) is prescribed for the purposes of sections 327(2A)(b)(ii), 328(3)(b)(ii) and 329(2A)(b)(ii) of the Proceeds of Crime Act 2002 (exceptions to defence where overseas conduct is legal under local law).
> (2) Such relevant criminal conduct is conduct which would constitute an offence punishable by imprisonment for a maximum term in excess of 12 months in any part of the UK if it occurred there other than—
> (a) an offence under the Gaming Act 1968;
> (b) an offence under the Lotteries and Amusements Act 1976, or
> (c) an offence under section 23 or 25 of the Financial Services and Markets Act 2000.

So the overseas conduct exemption does not amount to much. In particular, it does not exclude tax offences (the penalty for which exceeds 12 months).

133.11.2 *Foreign tax evasion*

CCAB tax guidance provides:

> 8.1.4 If the suspected evasion is of taxes outside the UK, in circumstances which would be a criminal offence if the conduct occurred in the UK, this should also be reported immediately

The guidance continues:

[31] See s.328(3), 330(7A) POCA.

[32] Defined in subsection (2B): "In subsection (2A) "the relevant criminal conduct" is the criminal conduct by reference to which the property concerned is criminal property."

> unless
> [a] it is known to be lawful under the criminal law applying in that country and
> [b] that conduct, if carried out in the UK, would attract a maximum sentence in the UK of less than twelve months, except as prescribed by Order.

But that will never be the case for tax evasion crimes.

The guidance continues:

> As in other cases, this is unless the privilege reporting exemption applies. There are other very limited exceptions regarding the reporting of overseas criminal conduct; see para 2.2.2 of AMLGAS.

133.12 General defences

Section 327(2)/338(2) POCA provide 3 defences:

> But a person does not commit such an offence if-
> (a) he makes an authorised disclosure under section 338 and (if the disclosure is made before he does the act mentioned in subsection (1)) he has the appropriate consent;
> (b) he intended to make such a disclosure but had a reasonable excuse for not doing so;
> (c) the act he does is done in carrying out a function he has relating to the enforcement of any provision of this Act or of any other enactment relating to criminal conduct or benefit from criminal conduct.

The same defences are found in s.329(2) POCA.

Section 330(6) provides a wider reasonable excuse defence:

> But he does not commit an offence under this section if-
> (a) he has a reasonable excuse for not making the required disclosure.

APPENDIX ONE

WORDS OF DISPUTE

App. 1.1 Words of dispute: Introduction
App. 1.2 Clarify/modernise/reform
App. 1.3 "Clear"
App. 1.4 "Compliant"
App. 1.5 "Customers" of HMRC
App. 1.6 Principles-based drafting
App. 1.7 Machinery/mechanism metaphor
App. 1.8 Technical
App. 1.9 Technical Notes
App. 1.10 Loophole/tax break
App. 1.11 Arbitrary

App. 1.1 Words of dispute: Introduction

This appendix considers some non-legal terms which are used in taxation in contested or rhetorical ways, and which are so common that they are more conveniently considered as discrete topics, rather than in any particular context in which they are found.

App. 1.2 Clarify/modernise/reform

The word "clarify" is a convenient cloak. To describe a reform as a clarification is a way to stifle debate. Who could object to clarification? Often, perhaps more often than not, it is used tendentiously to disguise substantive changes.[1] Tax reform by stealth is not an uncommon phenomenon and (mis)use of the word "clarify" is one way towards it.

Similar points apply to the word "modernise", a favourite of the Blair administration, which re-emerged in Spring Budget 2024 to describe FIG relief and abolition of the remittance basis.

Likewise "reform". Of course this usage is not limited to tax:

> Reform means to change things with a view to securing an improvement. Law reform sadly means changing things so as to impede access to justice and to cut funding to unsustainable levels.[2]

[1] There are many examples in ths work, see for instance 75.15 (Adding property).

[2] Professor Dominic Regan, New Law Journal, 21 Feb 2020; 18.38 (Security for debt: Amount remitted).

App. 1.3 "Clear"

Judicial rhetoric frequently describes the position as "clear" when it is not. An example is the now-obsolete case of *IRC v Gaunt,*[3] holding that the word "spouse" included a widow. The Court of Appeal said the point was "clear" (Goddard LJ), "perfectly clear" (Clausen LJ) and "obvious" (Scott LJ). Yet the High Court had reached the opposite view, and only six years later, the House of Lords held their view to be wrong, in the first *Vestey* case.[4]

App. 1.4 "Compliant"

The word "compliant" has become an essentially contested concept, that is, it admits of two distinct conceptions that are a battleground for profound substantive disagreements. HMRC use the term to mean those who comply with the legal rules of taxation and do not engage in tax avoidance (whatever that is).[5] I think practitioners would generally regard "compliant" as apt to describe those who seek to comply with the legal requirements of taxation.

App. 1.5 "Customers" of HMRC

In the 2010/11 edition of this work I summarised the tax competition argument thus:

> Where there is tax competition, the term "customer", which HMRC have (controversially) applied to taxpayers since 2001[6] is slightly less inapt. UK resident foreign domiciliaries are in principle more free than other taxpayers to take their "custom" elsewhere.

[3] 24 TC 69.

[4] See App 3.2.1 (Spouse: General meaning).

[5] Two examples will suffice to illustrate the point: the title of the HMRC paper (Mar 2019): "Tackling tax avoidance, evasion, and other forms of noncompliance"; likewise: "This measure has no impact on compliant businesses.... It is likely to affect ... non-compliant businesses ... which are currently involved in tax avoidance arrangements"; see 53.23 (PFA impact).
Contrast the two views of the taxpayer/HMRC relationship; see 122.10.1 (HMRC/taxpayer relationship),

[6] A press release at the time provided: (14/06/01) "M and C Saatchi, a leading advertising agency, has been appointed by the IR to rebrand the department. Branding and design consultants, Corporate Edge, will also be working with the IR and M and C Saatchi to 'create a customer driven department'."

As far as I am aware, no other Revenue department in the world calls its taxpayers "customers" and it is interesting to consider what the word implies for the taxpayer/HMRC relationship.

It appears to suggest that the relationship should be based on the market, but what does that entail? A person who regards himself as a customer (as opposed, say, to a "citizen") has no disposition to put public good ahead of private interest, and no moral relationship with their supplier. Customers control producers of commodities only by buying or not buying as they like.

Rowan Williams (Archbishop of Canterbury, 2003-2012) observes how the language of the market has expanded beyond a market context:

> The language of customer and provider has wormed its way into practically all areas of our social life, even education and healthcare, and we forget that it is a metaphor when we call a student, a patient or a traveller a "customer". The implication is that the most basic relation between one human being and another or one group and another is that of the carefully calibrated exchange of material resources; the most basic kind of assessment we can make about the actions of another, from the trader to the nurse to the politician, is the evaluation of how much they can increase my liberty to negotiate favourable deals and maximize my resources.[7]

But this is not of course the inference which HMRC intend. Sir Nicholas Montagu (Chair of the Board of Inland Revenue, 1997-2004) said that the reason for the change was to remind Revenue staff that the needs of the consumer of public services should be considered first.[8]

[7] Williams, "Knowing our Limits" in Williams and Elliott (eds), *Crisis and Recovery: Ethics, Economics and Justice* (2010), p.20. But is "customer" a metaphor? Robert Bellah takes it literally: "... all the primary relationships in our society, those between employers and employees, between lawyers and clients, between doctors and patients, between universities and students are being stripped of any moral understanding other than that of market exchange. Business has no obligation to its employees, the communities where it operates, or the larger society. The same forces that are uprooting decades-long practices in industry are to be found at work in medicine, education , and even in the church and the family. To put it in Pierre Bourdieu's terms, we could say that the economic field is encroaching even more than ever on the autonomy of the other fields.... Instead of medicine we have the health care industry; instead of the university we have the education industry. These are not metaphors but the direct imposition of the logic of the economic field on the other fields." Bellah, "Class Wars and Culture Wars in the University Today" (1997).

[8] See "The Customer is always right" Tax Adviser, (February 2003).

The usage has not caught on outside HMRC. A sensitivity to language (some readers may think, a sense of the ridiculous) prevents the parliamentary drafter from using the expression: for instance the SRT only uses the term "taxpayer".

In 2013, the Tribunal commented:

> I note in passing that all the reports mentioned below refer to HMRC's 'customers'. While this is a regrettable misuse of language by HMRC as it implies people have a choice whether to interact with HMRC and that therefore the payment of taxes is voluntary, nevertheless it is clear that references to 'customers' are meant to be references to taxpayers. Needless to say the payment of taxes is not voluntary despite the misnomer ....[9]

In the 2017/18 edition of this work, I said:

> The terminology will not cease to give rise to derision as long as the current generation of tax practitioners remain in practice[10]... It is conceivable that the terminology will last until a future generation sees nothing to laugh at in expressions such as "*penalties designed to change customer behaviour*"[11] but I think that unlikely. Perhaps at some point it will be dropped.

In 2017 the HMRC view was unchanged, even defiant:

> Mr Troup [HMRC chair] defended HMRC's sometimes controversial description of taxpayers as 'customers' saying that he genuinely believes the tax authority is a customer-centric business.[12]

[9] *LH Bishop Electric Co v HMRC* [2013] UKFTT 522 (TC) at [234].

[10] See Cameron, "Customer Service?" Taxation Magazine, 10 Apr 2008, p.361: "It never ceases to amaze me that HMRC have adopted the word 'customer' to describe the taxpaying public. A customer is someone who chooses to patronise a business." Andy Wells agrees: "I will never be a 'customer' of HMRC. This disregard for the English language irks just about every tax professional I come across..." Taxation Magazine, 4 June 2009, p.549. Similarly Anthony Thomas (then president of CIOT): "HMRC now refer to taxpayers as customers, but they do not treat them as customers"; "We need Trust", Taxation Magazine, 2 June 2011, p.7; Truman, "Still Not a Customer" Taxation Magazine, 14 June 2012, p.8.

[11] *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/e-learning/New_Penalties_Awareness/Inaccuracy_Pen_ext/HTML/Inaccuracy_Pen_ext_106.html*

[12] *https://www.tax.org.uk/media-centre/blog/other-areas/departing-thoughts-hmrc-chair-edward-troup* (2017).

But in 2018 the debate still rumbled on.[13]

Looking back after two decades, the reader's irritation may have faded over time to weary cynicism. It seems at present that HMRC will continue to use it, taxpayers will not adopt it, and we must leave it there.

Underlying the controversy over terminology, and perhaps concealed by it, are deeper issues, linguistic, normative and factual:

- What (if anything) do HMRC mean by "customer-centric"?[14]
- Should HMRC seek to be "customer-centric"?[15]
- To what extent are HMRC actually "customer-centric"?

On the third, factual, question: One might think it is not a customer-centric policy to insist on using a term which the majority of taxpayers/customers find objectionable. The change of terminology from taxpayer to "customer" came at a time which saw a substantial increase in HMRC's enthusiasm for civil and criminal penalties[16] a trend which has intensified

[13] HLEconomic Affairs Committee in its critical report "The Powers of HMRC: Treating Taxpayers Fairly" (2018) para 135: "HMRC describes taxpayers as 'customers' ... In this report we refer to individuals as taxpayers."
https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf

[14] "Customer-centric" is a well established marketing term. I do not know when it first arose, but books with "CustomerCentric" in the title date at least back to 2003. One definition is:"Customer centric is a way of doing business with your customer in a way that provides a positive customer experience before and after the sale in order to drive repeat business, customer loyalty and profits." In the context of HMRC's "business" the usage, as Rowan Williams says, is best regarded as a vivid metaphor, such metaphors often hinder clarity of thought.

[15] Section 1 TMA 1970 provides that HMRC are "responsible for the collection and management" of IT/CT/CGT; which one might think a different matter. See too 122.10.1 (HMRC/taxpayer relationship).

[16] "The Department expects the new [civil] penalty regime to result in higher penalties as the minimum penalty for deliberate evasion and concealment is 50%. The Department should track the level of penalties imposed to ensure that it is applying the new regime rigorously." House of Commons Committee of Public Accounts, "HM Revenue & Customs: Managing civil tax investigations" (2011)
https://publications.parliament.uk/pa/cm201011/cmselect/cmpubacc/765/76506.htm
"We have recruited an additional 200 criminal investigators to increase the number of people prosecuted for tax evasion from 165 in 2010 to 2011, to 565 in 2012 to 2013, and to 1,165 in 2014 to 2015."
https://www.gov.uk/government/policies/reducing-tax-evasion-and-avoidance
The wisdom (and cost/benefit) of the vast increase in prosecutions has never been the subject of public debate.

over the last few years. Whether that is right or wrong, it is certainly not customer-centric.[17]

Probably the terminology is (more or less) meaningless spin, with no substance or reality beyond vague aspiration. That is not necessarily a criticism: presentation, perception and aspiration are important aspects of tax administration. But they should be recognised for what they are.

If that is right, the discussion above is somewhat over-intellectualised. But it is good to know what we are talking about.

App. 1.6 Principles-based drafting

The Income Streams code and the disguised interest rules claim the high ground of "principles-based drafting". Who could object to principles? But the rhetoric fails when it moves from theory to practice. In the Income Streams code, the principle is not easy to grasp,[18] and in the disguised interest code is just a form-over-substance rule, with all the difficulties that brings. The reader may conclude that the use of the term here is inapt if not tendentious.

It is a sad truth that if tax has principles, which might be debated, they are at such a high level of generality that they cannot be used for drafting. Is the aspiration is to be commended or criticised as naive? Discuss.

App. 1.7 Machinery/mechanism metaphor

The metaphor of "machinery"[19] has been used:

(1) To describe tax collection (as opposed to tax charging) provisions, the point being that a tax collection provision only applies if there is a charge[20]

(2) To describe an author's contract for royalties, the point being that the source of the income is the author's profession, the contract being machinery lacking "independent vitality"[21]

Memec v IRC applies the metaphor in the context of whether a foreign

[17] House of Commons Treasury Committee, "Administration and effectiveness of HMRC" Sixteenth Report of Session 2010–12 at 143: "we question whether a strategy focused around shifting customers' behaviour can truly be described as customer-centric."

[18] See 54.5 (Transfer of income, not asset).

[19] The word "mechanism" is used in the same way.

[20] See 124.2 (Tax collected from UK representative).

[21] See 31.4.3 (Post-cessation Annual Payments).

entity is transparent, but with an important note of caution:[22]

> Metaphorical language is not a substitute for analysis, but it may help to explain the conclusion: adopting Lord Asquith's phrases,[23] I conclude that [the "silent partner's"] rights under the ["silent partnership" agreement] did have independent vitality and were not mere incidental machinery.

"Mere machinery" is always an expression of a conclusion; it is not an argument or basis for reaching a conclusion, or at least not an adequate one.

App. 1.8 Technical

The word "technical", used to describe an argument, or a distinction, is generally pejorative; the point might be emphasised by the collocation "narrow technical argument".

Any argument (other than purposive construction) can be castigated as technical, whether based on statutory words or common law principle. For example, there was formally a rule prohibiting references to Hansard. *Pepper v Hart* described the rule as "a technical rule of construction".[24] In a later case (qualifying if not rejecting the *Pepper v Hart* approach) the same rule was "a cardinal constitutional principle"![25]

"Technical" (in this sense) is not a technical term. It is merely a term of abuse. If not completely meaningless, it is difficult to pin down what the meaning is. It is an expression of rhetoric rather than sober analysis. Like the term "legal nicety", it may be regarded as expressing a conclusion rather than a reason for reaching a conclusion. If one substituted for "technical argument" the words "unconvincing argument", or for "technical distinction" the words "irrelevant distinction" the gap in the

[22] 71 TC 77 at p.114. Likewise *Hadee Engineering Co v HMRC* [2022] UKUT 84 (TCC) at [80]: "the issue before us [cannot] be determined by an analysis of whether paragraph 4 of Schedule 1A of TMA, or s393A of ICTA, should appropriately be labelled as "machinery" or "the governing statute in respect of tax liability". Rather the task,... is to construe the statutory provisions involved."

[23] See 31.4.3 (Post-cessation Annual Payments).

[24] [1993] AC 593 at p.616.

[25] *Wilson v Secretary of State* [2003] UKHL 40 at [67] also reported under the name *Wilson v First Country Trust (no.2)*. For another example of (mis)describing an otherwise unanswerable argument as "technical", in order to summarily reject it, see *Marshall v Kerr* 67 TC 56 at p.85: "Your Lordships were invited to accept a narrow and technical argument ... This is an invitation which is not difficult to resist..."

reasoning becomes clear. The unanswered and perhaps unasked question is: *why* is the point unconvincing or irrelevant?

Alternatively, "technical" connotes *unmeritorious*. In one case HMRC sent the notice of enquiry to the wrong address. The taxpayer was not prejudiced because a copy was sent to his accountants, and indeed no-one noticed until 9 years later. His objection was a technical point.[26] But had the taxpayer been prejudiced, the rule requiring notices to be sent to the right address would not, presumably, have been described as technical.

A variant of "technical" is the term *legalistic*. It is strange that lawyers should use *legalistic* as a pejorative term, but they do.[27]

App. 1.9 Technical Notes

HMRC say:

> HMRC do not own gov.uk and so must conform to their rules. Gov.uk aim for a reading age of 11 and they are not keen on long FAQs and examples.[28]

This explains some striking developments of recent years:

- The informal, chatty style in HMRC manuals and other guidance, eg employing informal contractions such as "isn't" for "is not".[29]
- The style of HMRC manual examples, which I describe elsewhere as childish; that may seem unkind, but is in fact an objective description of the author's intention.
- The publication of documents called "technical notes" which do not contain material which a practitioner would call "technical". A document with a reading age of 12 or above should now be described as "technical".

The policy aim of making guidance easily readable is commendable; but policy is one thing and implementation is another. Thus the term "technical note" has, perhaps ironically, become a technical expression.

[26] *Tinkler v HMRC* [2021] UKSC 39 at [85].

[27] Eg *HMRC v Parry* [2020] UKSC 35 at [94] ("narrow and legalistic approach ... which does not seem to me to be appropriate"). Note how "narrow" is again thrown in for additional rhetorical impact.

[28] Joint Expatriate Forum on Tax and NICs (Minutes, Feb 2018) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/710618/Joint_Expatriate_Forum_on_tax_and_NICs_minutes_28_February_2018.pdf*

[29] I think this began in about 2015.

App. 1.10 Loophole/tax break

"Loophole" is an irresistible pejorative term. It suggests unintended and self-evidently inappropriate rules, which facilitate tax avoidance; but may be applied to any rule which the author wishes to deprecate.

The Labour Manifesto 2019 offers an example:

> We will close the tax loopholes enjoyed by elite private schools and use that money to improve the lives of all children.

The tabloid slang "tax break" similarly hinders clarity of thought. It has no place in any serious or impartial discussion of tax policy: it is a good rule of thumb to presume slack thinking and partiality whenever we encounter it.

App. 1.11 Arbitrary

News Corp v HMRC draws an important distinction between two senses of the word "arbitrary":[30]

(1) the sense that there were no reasons for the choices made; ie irrational
(2) the weaker sense that the reasons did not compel one particular set of choices rather than another

It is inevitable that many, perhaps most, tax rules must be arbitrary in the weaker sense. I refer to that as "somewhat arbitrary". Though just how arbitrary is, obviously, a matter of degree.

[30] [2023] UKSC 7 at [112].

App. 2.1 Introduction

This and the following appendices consider some legal terms, concepts and expressions which are so common in taxation that they are more conveniently considered as discrete topics, rather than in any particular context in which they arise. The layout is as follows:

Appendix	**Topic**
2	Misc terminology (see index above)
3	Family terminology: spouse, child, etc
4	Consideration/full consideration, arm’s length, and related concepts
5	Commercial/view to profit
6	Beneficial ownership/entitlement
7	Offshore Fund/collective investment scheme/OEIC
8	Real/reality/realistic, and form v substance

These terms are used frequently in tax and non-tax law. Their meaning is mostly a question of general (non-tax) law; except for “real”, whose meaning, if any, is in more the realm of philosophy, and rhetoric.

App. 2.1.1 *Context*

The IT Codification Committee say:[1]

> One of the chief causes of difficulty in interpreting the existing Acts is that the same word is used in different senses in different places, sometimes even in the same sentence. This has often been the subject of adverse comment in the Courts. In *Kensington Income Tax Commissioners v Aramayo*[2] Lord Wrenbury said:
>
> > My Lords, this case affords a striking illustration of the involved and almost unintelligible expression of the law contained in the Statutes relating to income tax. ... The same word is used here in one sense and there in another. ... No reliance can be placed upon an assumption of accuracy in the use of language in these Acts.

I think there is an element of hyperbole in the last sentence, or perhaps the standard of drafting has improved a little since Lord Wrenbury wrote those words in 1915. But the reader will not need to be reminded that meaning is subject to context: any word may be used inaccurately, one word may be used inconsistently ie with two different meanings, and two different words may be used with the same meaning.

App. 2.1.2 *Argument from redundancy*

In *Walker v Centaur Clothes*:[3]

> I seldom think that an argument from redundancy carries great weight even in a Finance Act. It is not unusual for Parliament to say expressly what the courts would have inferred anyway.

That was before the tax law rewrite. Nowadays, I would say "... *especially* in a Finance Act".

Note that *Centaur Clothes* states that the argument is *seldom* convincing, not never. No doubt some redundancies are more natural, and others are more suggestive.

[1] (1936) Cmd 5131 at [31], cited in *Lawrence v IRC* 23 TC 333 at p.344.

[2] 6 TC 613.

[3] [2000] STC 324 at p.330. If further authority is needed, which I doubt, see *Phipson-Stow v IRC* [1961] AC 727 at p.727 and p. 749:

> "Nor, even if there is some tautology, does it have much weight with me. That is a common feature of legislation".
>
> "In so complicated a matter I do not think that the presumption that provisions are not redundant is at all strong."

Likewise *DMWSHNZ Ltd v HMRC* [2015] EWCA Civ 1036 at [38].

Anson v HMRC, discussing the USA/UK DTA,[4] seems to take a more positive view:[5]

> it is a general principle of treaty interpretation *ut res magis*[6] *valeat quam pereat*... the court would be reluctant to conclude that a provision in an agreement made between two governments was otiose, if that conclusion could reasonably be avoided.

The maxim *ut res magis valeat quam pereat*, literally, "it is better for a thing to have effect than to be void", is the argument from redundancy couched in Latin. It could be that different principles apply to DTAs but they should not. My conclusion is that the Courts are not wholly consistent in their approach to the argument from redundancy; it is an argument which appeals to some judges more than others. In a tax statute, at least, the approach of *Centaur Clothes* is to be preferred.

App. 2.1.3 *Dictionaries*

Arbuthnot v Fagan is often cited:[7]

> Dictionaries never solve concrete problems of construction. The meaning of words cannot be ascertained divorced from their context. And part of the contextual scene is the purpose of the provision.

A dictionary may provide a convenient starting point, but it rarely says anything one did not already know.

App. 2.2 Arrangement

App. 2.2.1 *"Arrangement" undefined*

It is said that "Everybody knows what is meant by an arrangement"[8] and perhaps they do; but the word may be problematic and require elucidation.

[4] See 111.11.1 (DTA credit: Exclusion of underlying tax). The reader might think that the argument from redundancy is a technical rule which should have even less role to play in a DTA.

[5] [2015] UKSC 44 at [94] approved in *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 at [75].

[6] The original reads *magit* not *magis* but that is a typo. A Latin scholar has kindly informed me that *magis* is an adverb strengthening *valeat* (it's better to have much effect). Adverbs do not change endings. Such errors are to be expected when we quote Latin without understanding it.

[7] [1995] CLC 1396 at p.1400.

[8] *Re British Slag Ltd's Application* [1963] 1 WLR 727 at p.739, a comment often cited.

(This may be true of most words which "everybody knows"? Discuss.)

In *Newton v FCT*:[9]

> the word 'arrangement' is apt to describe something less than a binding contract or agreement, something in the nature of an understanding between two or more persons - a plan arranged between them which may not be enforceable at law.

In *Farnborough Airport v HMRC*:[10]

> The concept of 'arrangements' ... involves an element of deliberate planning or co-ordination to bring about a particular state of affairs.

Basically, anything with an element of volition is an arrangement. I do not think there is a single case where a taxpayer has succeeded in arguing that an act, or transaction, or indeed anything at all, is not an arrangement. 'Arrangement' is, then, a word of wide meaning.[11]

It is possible for context to show that arrangement is to be understood more narrowly, or that at least certain matters are not intended to constitute 'arrangements' in the relevant sense. But arguments along those lines have not in practice been successful.[12]

The word is usually used in the plural (arrangements) but occasionally in the singular (arrangement). I do not think there is any difference in the meaning.[13]

[9] [1958] AC 450 at p.465. The same point is made in *Scottish and Universal Newspapers v Fisher* [1996] STC (SCD) 311 at [16]: ''arrangements' is a wide expression which will often mean something less than a legally binding contract.'

[10] [2019] EWCA Civ 118 at [74].

[11] If further authority is needed, which I doubt, see *Office of Fair Trading v Lloyds TSB Bank* [2004] EWHC 2600 (Comm) at [24]: "broad, loose language".

[12] For instance *Farnborough Airport Properties v HMRC* [2019] EWCA Civ 118 at [76]:

> "It is only by a process of circular wishful thinking ... that the concept of 'arrangements', which is of course a staple feature of much anti-avoidance legislation, could be confined in its scope by reference to an unstated statutory purpose."

But it is sometimes hard to see the difference between purposive construction and wishful thinking.

[13] This is self-evident, but if authority is needed, see *Pilkington Bros v IRC* [1982] STC 103 at p.112-113 rejecting an argument the use of the plural shed light on what constituted the arrangements; one might also cite the Interpretation Act rule that the singular includes the plural and vice versa.

App. 2.2.2 *Scheme or arrangement*

'Scheme' and 'arrangement' are (more or less) synonymous:

> The term 'scheme' has a normal dictionary meaning: 'a plan, a design; a project, an enterprise; a programme of work or action to attain an objective, a plan for regular contributions towards a pension etc' ... I accept [counsel's] definition of 'arrangement' ('structure or combination of thing for a purpose'). So it is inherently unlikely that a combination of circumstances which amount to a 'scheme' will not also be an 'arrangement' (and vice versa).[14]

"Scheme or arrangement" is a doublet; it does not refer to two distinct things.

Scheme is (sensibly) not usually defined; when there is a definition[15] it adds nothing to the meaning.

App. 2.2.3 *Definitions of 'arrangement'*

There are two standard definitions of 'arrangements' in tax legislation:

Standard IT/CGT definition	**Standard IHT definition**
'arrangements' includes any agreement, understanding, scheme, transaction or series of transactions (whether or not legally enforceable).	'arrangements' includes any scheme, transaction or series of transactions, agreement or understanding, whether or not legally enforceable, and any associated operations

The standard IT/CGT definition (my terminology) was first used in 2005[16]

[14] *HMRC v Barclays Bank* [2005] UKSPC SPC00520 at [73] (not questioned in the subsequent appeals); likewise *Snell v HMRC* [2006] EWHC 3350 (Ch) at [28].
For completeness: "arrangement" is discussed in an old Restrictive Trade Practices case, but *Farnborough Airport Properties v HMRC* did not find that very helpful, see [2016] UKFTT 431 (TC) at [50]:

> Nor do I regard the discussion of the meaning of 'arrangements' in *In re British Basic Slag Ltd* as helpful, since the discussions in that case ... are predicated on the definition of 'agreement' in section 6 of the Restrictive Trade Practices Act 1956, which makes express reference to 'acceptance by two or more parties', and hence connotes an element of mutuality or meeting of minds. The CTA 2010 contains no such qualification.

The point was taken, and *British Basic Slag* has hardly been cited since then.

[15] Eg in the definition of "employer-financed employee benefit scheme"; see 84.8 (EFURBS).

[16] Section 144ZD(8) TCGA, introduced by F(No.2) Act 2005.

and it must have found its way into an (unpublished) OPC Finance Bill handbook, as it has now been repeated in Finance Acts on about 100 occasions, but is not found elsewhere.

The standard IHT definition (my terminology) was first used in 2013,[17] and again must have found its way into the drafter's IHT handbook, as it has been used subsequently.[18] This definition reshuffles the words, and adds associated operations; but I do not think there is any identifiable difference in meaning between the definitions.

Neither definition adds anything to the normal meaning of the word, which has been used without definition in tax legislation since at least 1922.

Why then do we have a definition? Perhaps some lobbyist objected to the vagueness of the word, and the drafter provided the definition in response, without realising (or, cynically, realising) that it did not provide any clarification. Once it was there, of course it had to be followed later. Thus on one occasion HMRC said, I think without conscious irony:

> The government will amend the draft legislation so that ... 'arrangements' is clearly defined.[19]

Why we have more than one definition is harder to explain. They do not do much harm. Such is the patchwork nature of taxation.

App. 2.2.4 *Identifying the arrangement*

It is necessary to distinguish two distinct questions:
(1) Is there an arrangement?
(2) If so, what steps are included in, or constitute, the arrangement?

Question (1) is usually easy. But question (2) is often imponderable, and the answer is context-dependent: what solution fits the provisions?

It may be necessary, or at least, helpful, to identify what is the arrangement for the following purposes:[20]

(1) Where the settlement-arrangement definition is in point, to identify:

[17] Section 162A IHTA.

[18] Para 6 sch 1A IHTA.

[19] HMRC 'Company distributions: Summary of Responses' (2016) para 2.51 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510263/Company_distributions_-_summary_of_responses.pdf*
In due course the standard definition was supplied.

[20] See too 87.4.2 (Trust + steps arrangement).

(a) Whether the arrangement has bounty (gratuitous intent) so as to qualify as a "settlement"
(b) The settlor and the beneficiaries of the settlement
(c) The income arising under/property comprised in the settlement
(d) Whether the settlement is an outright gift

(2) In a TAAR, to identify the purpose(s) of the arrangement[21]

App. 2.2.5 *Sufficient unity test*

An arrangement may take the form of a series of steps planned from the outset, but taking place over a period of time. This may still constitute one arrangement (and so, one settlement under the settlement-arrangement definition). That is self-evident.

An arrangement may take the form of a series of steps which are developed over time, without every aspect of the arrangements being planned or determined from the outset. This too can still constitute one arrangement (and so, one settlement under the settlement-arrangement definition). *Crossland v Hawkins*[22] is an example. The facts were as follows:

Step 1: setup of company with services contract (Dec 1954)

(a) On 3 December 1954 the actor Jack Hawkins caused a company to be formed; two shares were issued.[23]
(b) On 10 December 1954 he agreed with the company to make his services available, as the company may direct, for a salary (£50 per week[24]).

Step 2: settlement of company (Mar 1955)

On 3 March 1955 the actor's father-in-law settled £100 on trust for the actor's minor children, and the trustees used this money to subscribe for 98 shares in the company.

Step 3: operation of company - filming and distribution of profit (1956)

(a) The company was paid £25,000 for the actor's services in a film, (called "Fortune is a Woman")
(b) The company paid a dividend of £500 to the trustees, most of which

[21] See 3.4 (View arrangement as a whole).

[22] 39 TC 493.

[23] For completeness; these two shares were issued to Hawkins' solicitors, and belonged beneficially to him.

[24] This was not a nominal salary in absolute terms. In 1954 the average UK weekly wage was £9 / 9 for men and £5 for women. But it was nominal compared to the value of the services provided.

was distributed to the children.

The arrangement consisted of:

(1) step 1: the formation of the company and the service agreement, in December 1954; and

(2) step 2: the settlement and issue of the company's shares to the trust, in March 1955

At the time of step 1, when the actor agreed to supply his services to the company, step 2 (the creation of the children's trust) was allegedly not in contemplation.[25] That did not prevent the two steps from forming one arrangement:

> I do not think that ... the whole of the eventual arrangement must be in contemplation from the very outset…I think there is sufficient unity about the whole matter to justify it being called an arrangement for this purpose, because, as I have said, the ultimate object is to secure for somebody money free from what would otherwise be the burden or the full burden of surtax. Merely because the final step to secure this objective is left unresolved at the outset, and decided on later, does not seem to me to rob the scheme of the necessary unity to justify it being called an 'arrangement'.[26]

The test is evaluative: "sufficient" unity.

Incidentally, even if step 1 was not part of the arrangement (eg if the company had been set up many years before) a Court would find that:

(1) Step 2 was (obviously) a settlement (in every sense); and

(2) the actor was a "settlor" of that settlement, providing property indirectly by allowing the trustees to subscribe for shares in his valuable[27] company for a nominal £100.

So it did not actually matter whether the arrangement (settlement) was step 1 and 2, or just step 2 alone.

App. 2.2.6 *Post-arrangement steps*

A plan may envisage:

[25] That seems implausible, but it does not matter.

[26] 39 TC 493 at p.505 (emphasis added).

[27] On the facts of *Hawkins* the service contract with the company had a 3 year term. If the actor had power to revoke the contract, or if the contract had a short term, then the company would not be valuable, but the actor would provide funds by working for the company at an undervalue.

(1) a number of steps which constitute an arrangement and
(2) further (post-arrangement) steps

The further steps may not constitute part of the arrangement, even though they were envisaged from the outset.

In *Hawkins*, step 3 - Jack Hawkins' performance in the film, the payment of his fee to the company and the payment of the dividend by the company (which occurred in 1956) - was not part of the arrangement (settlement). This was the arrangement being put to its intended use:

> Normally (there may be exceptions) the arrangement is to be identified by the constituent parts or components of the legal structure designed for a purpose, and not by what is done (sometimes months or even years later) in using the structure for its intended purpose.[28]

That seems an arbitrary cut-off, but it has the helpful consequence of supporting the argument that the income arising under the settlement is the dividend income, not the company's trading income.

Perhaps the underlying idea is that arrangments are envisaged as being relatively short term. Matters which carry on for a long time are not part of the same arrangement. We still travel today along roads that the Romans built; but our journeys are not part of the arrangements made by the Roman road-planners.

App. 2.2.7 *Pre-arrangement steps*

Clipperton and *Dunsby*[29] (the "dividend replacement strategy" cases) were hare-brained (pre-GAAR) schemes intended to allow shareholders of a family company to receive a dividend free of IT.

The schemes were similar though not quite identical. In short:

Clipperton	***Dunsby***
Step 1: Co transfers share in Newco to trust: A company ("the original company") transferred a worthless B share in a new company ("Newco") to a classic trust.	*Step 1*: *co issues share to individual* The company issued a worthless S share to a non-resident individual ("G").

[28] See *Jones v Garnett* [2007] UKHL 35 at [53]. The same point is made in Jones v Garnett which I discuss elsewhere; see 87.5.4 (Applying bounty test).

[29] *Clipperton v HMRC* [2022] UKUT 351 (TCC); *Dunsby v HMRC* [2021] UKUT 289 (TCC). *Clipperton* is not yet final; the reader may be surprised that the taxpayer obtained permission to appeal.

Note: The B share was worthless because at this point Newco had no assets	The S share was worthless because its dividends depended on the decision of the ordinary shareholders.
Step 2: The original company funded Newco so that it held £200k.	*Step 2*: G gave that share to a classic trust whose beneficiaries were the company owner and G .
Note: The shareholders were entitled to (most of) the trust income but the original company was also a beneficiary	The shareholders were entitled to (most of) the trust income but G was also a beneficiary
Step 3: Newco paid a dividend on the B share to the trust, mostly received by the shareholders	*Step 3:* The company declared a dividend on the S share to the trust, mostly received by the shareholders

The intended analysis was:

Clipperton	***Dunsby***
The settlor was the original company, not the shareholders	The settlor was G, not the shareholders
Under s.624 the dividend was treated as arising to the original company. So the shareholders were not taxed	Under s.624 the dividend was treated as arising to G. So the shareholders were not taxed

The taxpayer's analysis was:

(1) The arrangement (settlement) is the creation of the classic trust, alone, not steps 1 and 2, (or 1, 2 and 3).

(2) The settlor not the company owner but someone else: the original company (in *Clipperton*) or G (in *Dunsby)* (the purported settlor)

(3) Under s.624 the dividend was treated as accruing to purported settlor. So the shareholder was not taxed! (Nor were the purported settlors taxable, G as she was non-resident, and the original company as a company is not taxable on UK dividends)

So both schemes were based on a common idea, namely, to conjure up a different (non-taxable) settlor, and then take advantage of the settlor-interested trust rule. It no doubt seemed very droll to use an anti-avoidance rule as the basis of an avoidance scheme! The schemes were marketed under the label "dividend replacement strategy" and I use that here.

As often happens with avoidance schemes, the cases raise many distinct issues and failed for many distinct reasons. Many of these issues were the same in both cases, so it is helpful to consider them together.

The s.624 issues were:

Issue	**See**
What was the arrangement (settlement)	*Discussed here*
Who was the settlor	99.2.8
If there were two settlors, what then	100.2.1

There was clearly an arrangement, but which steps did the arrangement consist of? The taxpayer argued that the arrangement consisted only of step 2: the gift to the classic trust by G.[30] But no, the arrangement consisted of steps 1 *and* 2:[31]

> 96. ... whether the act of settlement, narrowly defined, has an economic logic that is freestanding and severable from the preparatory steps leading to that settlement. If it does, then (absent unusual circumstances) that is a strong indication that the preparatory steps are not to be regarded as integral to that settlement.

"Freestanding and severable" is evaluative and leaves plenty of wiggle room. But:

> 99 ... the settlement can therefore only sensibly be defined by reference to the sequence of transactions constituting the Scheme. To describe it by reference solely to G's creation of the Trust [Step 2] is wholly artificial and unrealistic.

That is clearly right.[32]

[30] But the scheme would have failed even if the settlement-arrangement consisted only of step 2, the creation of the classic trust, because in each case the company owner was at the very least a joint settlor of the classic trust, having provided the trust property indirectly.

[31] *Dunsby v HMRC* [2021] UKUT 289.
On the other hand, step 3 was a post-arrangement step which was not part of the settlement-arrangement, see [109]: "I have not treated the payment of the dividend on the S share as part of the "arrangement". The S share became subject to the Trust. It was the property comprised in the settlement. The dividend on the S share was the income, which arose under the settlement, rather than one of the steps in its creation."

[32] The FTT took the same view: [2020] UKFTT 271 (TC) at [106], [107]. The UT could (I think, should) have also said that what is the arrangement is a question of fact for the FTT. They might then have gone on to say they would have made the same decision as the FTT, and perhaps that any other decision would be perverse.

For completeness: The reader may have puzzled over the antique case of *Chamberlain v IRC*.[33] Here the steps were:

Step 1 creation of company structure: The taxpayer:

(a) formed a company (Staffa Investment co, "the holding co") and

(b transferred shares in another company (the "underlying co") to the holding co, in consideration of cash[34] and an issue of shares by the holding co

Step 2 creation of trust structure

(a) The taxpayer established a number of classic family trusts.

(b) The trustees used cash given to those trusts to acquire shares in the holding company.

There was clearly an arrangement, but which steps did the arrangement consist of? Was step 1 part of the arrangement? Or was that a pre-arrangement step, so step 2, in short, the classic trusts, were the only arrangements (settlements)?

Lord Macmillan supports the latter view:[35]

> It is, I think, fallacious to confuse the steps taken by the Appellant with a view to effecting a settlement or arrangement with the settlement or arrangement itself.
>
> When the Appellant [at step 1] created the [holding co], and sold to it his 470 shares in [the underlying co], he made no settlement or arrangement such as the Statute contemplates... It was not until he granted the trust deeds [at step 2] that he entered the legal stage of the settlement. All that he did previously was preparatory to making settlements.

This is not authority for a general proposition that steps prior to the creation of a classic trust are always to be ignored when determining the scope of the settlement-arrangement. This is for three reasons (any one would suffice):

(1) One needs to read all the speeches, and Macmillan was the only judge who took this view. The majority preferred the view (surely more natural) that the arrangement consisted of steps 1 *and* 2.[36]

[33] 25 TC 317.

[34] Nowadays the transactions in securities rules would need consideration at this point.

[35] 25 TC 317 at p.332.

[36] But it did not matter, as the "property comprised in the settlement" was the trust property only; see 47.3 (Arising under a settlement).

(2) Nowadays, identifying an arrangement is regarded as a question of fact, so *Chamberlain* is not a binding precedent.

(3) *Chamberlain* was distinguished in *Clipperton* on the grounds that in *Chamberlain* the two steps which Lord Macmillan held not to form a single arrangement were substantial steps, involving substantial funds, and not an asset of nominal value.[37]

Chamberlain does illustrate that identifying what steps constitute an arrangement is a fact sensitive, context-dependent enquiry, on which views may differ.

App. 2.2.8 *When arrangements begin*

SP 3/93 discusses this issue in the context of group relief:

> **SP 3/93 Groups of companies—arrangements**
> 2 This statement gives general guidance on how HMRC interpret 'arrangements' in the following provisions:[38]

ICTA 1988	**now CTA 2010**	**Topic**
s.410(1)(2)	s.154-155	Group and consortium reliefs
para 5B(1) sch 18	s.173(2)	Option arrangements
s.240(11)(a)	*Now obsolete*	Surrender of ACT to subsidiary
s.247(1A)(b)	*Now obsolete*	Consortium group income elections

> 4 This statement of practice gives general guidance ... . Comprehensive guidance cannot be given about what constitutes 'arrangements' or 'option arrangements', nor about precisely when they come into existence. Particular cases depend on the particular relevant facts.
> 5 As regards 'option arrangements' the Commissioners for HMRC view is that if an agreement provides for the creation of specified option rights exercisable at some future time 'option arrangements' come into existence when the agreement was entered into.
> **Disposal of shares or securities in a company**
> 6 Where a holder of shares or securities in a company is preparing to dispose of them, straightforward negotiations for the disposal will not give rise to the existence of 'arrangements' before the point at which an offer is accepted subject to contract or on a similar conditional basis. Equally, unless there are exceptional features, an offer made to the public at large of shares or a business will not at that stage bring 'arrangements' into existence.

[37] [2022] UKUT 351 (TCC) at [143].

[38] I have amended the layout for clarity.

> 7 If a disposal requires the approval of shareholders, operations leading towards disposal will not give rise to the existence of 'arrangements' before that approval is given or until the directors become aware that it will be given.
>
> 8 If following negotiations with potential purchasers a holder of shares or securities concentrates on a particular potential purchaser this will not of itself be regarded as bringing 'arrangements' into existence. But 'arrangements' might exist if there were an understanding between the parties in the character of an option. For example, an offer, whether formally made or not, might be allowed to remain open for an appreciable period so that the potential purchaser was allowed to choose the moment to create a bargain.
>
> **Company reconstructions**
>
> 9 The approval of shareholders for a company reconstruction may be required under company law or to comply with the rules of a stock exchange. 'Arrangements' will not come into existence before approval is given or until the directors become aware that it will be given...

Fortunately, the question of exactly when arrangements begin does not arise in relation to the private client topics discussed in this book.

App. 2.3 Chargeable/liable to tax

The expressions chargeable to tax/liable to tax are common in tax legislation. The meaning is context dependent,[39] but some general observations may be made.

In their general sense there is (more or less) no difference between the words chargeable/liable; they are sometimes used interchangeably.[40]

Here is a list of places in this book where the expressions are used and discussed:

Context: expression used	**See para**
Charged/chargeable to tax	
ITTOIA	
s.318A, 683, 687: charged to IT	14.7.2
s.624: chargeable to tax if remitted	47.8
s.624: not chargeable because non-resident	47.9

[39] This is (more or less) self-evident, but if authority is needed, see *Barnes v HMRC* [2014] EWCA Civ 31 at [38]: "words similar to 'chargeable to tax' have no fixed meaning ... their meaning in a particular section needs to be determined from their immediate context...".

[40] For examples of the words being used interchangeably, see 121.2 (Duty to give notice of liability); 15.17.4 (Benefit: Motive defence applies).

s.648: chargeable/would be if received by UK resident	47.2
s.685A: settlor charged to tax under section 619(1)	47.10.1
s.830: chargeable/would be if s.832 did not apply (RFI definition)	16.9.2
ITA	
s.809AZA: charged to income tax as income of transferor	54.4
TCGA	
s.37: charged to IT as income	56.4.12
s.87: payment chargeable to IT (capital payment definition)	61.7.4

Liable to tax

s.643: benefit liable to IT	47.21.5
s.731: benefit liable to IT	50.16
OECD Model: liable to tax	9.5

Taken/brought into account

s.37 TCGA: taken into account in computing income	47.12
s.103K TCGA: brought into account in calculating profits of trade	73.19.3
s.743 ITA: taken into account in charging IT under ToA rules	51.5; 51.9
s.809AZA ITA: brought into account in calculating profits for IT	54.4
s.259BC TIOPA: brought into account in calculating profits	91.14; 91.17.3

Similar expressions

s.633/729: sum payable as income (capital sum definition)	49.24.2
s.87: payment received as income (capital payment definition)	61.7.4
s.809VH ITA: income for IT/CT or would be if liable to tax	19.14
Non-OECD model DTA: Subject to tax	108.13

The IT Codification Committee discussed the meaning of *charge* to tax:[41]

> The word "charge" is used in relation both
> [1] to the amount of the tax payable in consequence of an assessment, and
> [2] to the process of imposing upon a taxpayer liability to pay tax.

App. 2.3.1 *Unremitted RFI "chargeable"*

Everyone would agree that remitted RFI of a remittance basis taxpayer is chargeable to IT.[42]

Although less obvious, unremitted RFI is also chargeable to tax. The scheme of ITTOIA is that for every category of income there is:

(1) a charging provision; and
(2) a provision specifying the *amount on which* tax is charged.

For instance, in relation to dividends from non-resident companies, s.402

[41] (1936) Cmd 5131 at [38].

[42] See 17.13 (Charge on remitted RFI).

ITTOIA provides:

> **402 Charge to tax on dividends from non-UK resident companies**
> (1) Income tax is charged on dividends of a non-UK resident company.
> ...
> **403 Income charged**
> (1) Tax is charged under this Chapter on the...amount of the dividends arising in the tax year.
> (2) Subsection (1) is subject to ... Part 8 (foreign income: special rules).

The (perhaps subtle) point is that IT is *charged* on dividends under s.402 ITTOIA. Section 403 ITTOIA does not impose a charge. It merely quantifies the *amount on which* income tax is charged. Likewise s.832(2) ITTOIA does not impose a charge, it merely quantifies the *amount on which* income tax is charged.[43]

So references to income chargeable/liable to income tax in principle include unremitted income (un)taxed on the remittance basis.[44] Of course context may show that the word "chargeable" is used in a narrower sense so as not to include unremitted income (un)taxed on the remittance basis.

The same applies to the expression "liable" to tax. That is consistent with the well established rule that pension schemes and charities are "liable" to tax for the purposes of DTAs even though they qualify for pension or charity exemptions.[45]

App. 2.3.2 *Charge/bear tax compared*

The IT Codification Committee adopted a distinction between *charge* to tax and *bearing* tax:[46]

> The word "charge" is used in relation both
> [1] to the amount of the tax payable in consequence of an assessment, and
> [2] to the process of imposing upon a taxpayer liability to pay tax.
> In this connection, the word "charge" has, so far as practicable, been confined to a direct charge, and does not cover tax borne by deduction.

[43] Hence the legislation states that tax is charged "in accordance with" s.832 not *under* s.832. See eg ss.13, 14, 16 ITA.

[44] See 50.17.3 (Benefit remittance-basis exempt); 61.7.4 (Chargeable to IT).

[45] See 9.5.2 (Narrow exemption). *Stonor v IRC* [2001] STC (SCD) 199 might be cited against this view but a Special Commissioners decision on other provisions, and not fully argued, does not count for much.

[46] (1936) Cmd 5131 at [38].

> In the latter case the recipient of a payment from which tax has been deducted is said to "bear" tax, not to be "charged with" tax.
> On the other hand, the expression "bear tax" is used to cover the suffering of tax whether by direct charge or by deduction or otherwise...

Similarly, a permanent establishment (not being a legal person) does not directly *pay* remuneration, but is said to *bear* remuneration.[47]

However the distinction between charge (or chargeable) to tax (a direct charge), and "bear" tax (a wider term, including an indirect charge, by deduction), is not observed (or at least, not strictly observed) in contemporary tax legislation. For instance:

- s.648 ITTOIA refers to income "chargeable to income tax by deduction or otherwise".[48]
- s.13 TIOPA refers to "tax charged directly on the dividend (whether by charge to tax, deduction of tax at source or otherwise)".[49]

App. 2.3.3 *Bear tax "by deduction or otherwise"*

The IT Codification Committee comment on the expression "by deduction or otherwise".[50] In the expression "pay or bear tax by deduction or otherwise" do the words "or otherwise" add anything? Could one "bear" tax, without a direct charge, but otherwise than by deduction? I do not think the point is likely to matter, today, but for completeness, the Committee thought the answer was, yes, and offer this subtle example:

> ... the expression "bear tax" is used to cover the suffering of tax whether by direct charge or by deduction or otherwise, the expression "or otherwise" being intended to cover such cases as those where trustees pay or bear tax and distribute the net sum amongst the beneficiaries without specific deduction of tax as such.[51]

But in practice adding the words "by deduction or otherwise" makes no difference, for they will generally be implied if not there.

[47] See 37.7 (STBV payment condition (b)).

[48] See 47.2 ("Income" arising under a settlement).

[49] See 111.11 (Tax credit: Dividends).

[50] (1936) Cmd 5131 at [38].

[51] The point is perhaps that the beneficiaries could be said to bear tax, but not by deduction. This would not apply to UK trusts after 1973, but it does apply in the case of non-resident trusts who receive UK source income and distribute it to non-residents. The non-resident beneficiaries are not charged to UK tax, and do not bear tax by deduction, but they do bear tax otherwise than by way of deduction.

App. 2.4 In connection with/respect of/relating to

There is a cluster of similar (I think, more or less, identical) phrases which require a nexus of some kind between A and B: This includes:

- in respect of
- in connection with
- relating to

Exactly what that nexus requires is left to the Court to sort out from the context, but these are wide phrases. They are wider than terms of causation, such as:

- as a result of
- by virtue of
- in consequence of

That is perhaps self-evident, but some reference to case law may be helpful.

App. 2.4.1 *In respect of*

In *Albon v Naza Motor Trading*:[52]

> The words 'in respect of' are difficult of definition, but they have the widest possible meaning of any expression intended to convey some connection or relation between the two subject-matters to which the words refer.

App. 2.4.2 *In connection with*

In *Coventry Waste Ltd v Russell*:[53]

> It may be that in some contexts the substitution of the words "having to do with" will solve the entire problem which is created by the use of the words "in connection with." But I am not ... satisfied that it does so in this case ... the phrase is a protean one which tends to draw its meaning from the words which surround it.

HMRC v Barclays Bank[54] considered whether a payment was made "in

[52] [2007] 2 All ER 719 at [27]. In *Cunard's Trustees v IRC* 27 TC 122 at p.135 Lord Greene described the phrase *in respect of* as 'colourless words' meaning, I think, that they were vague words, devoid of much content (colour). Thus the adjectives good/bad are described as colourless, whereas valid/suitable/efficient and their antonyms are not. But a metaphor which needs such explanation is not a helpful one.

[53] [1999] 1 WLR 2093 at p.2103.

[54] [2007] EWCA Civ 442 at [18].

connection with past service" in the context of the charge on benefits from an employer-financed retirement benefit scheme. The Court cited that comment and continued:

> Accordingly, the other parts of the definition of "relevant benefits" and the surrounding provisions of the legislative scheme, will inform the court as to the extent of the link required by any particular provision. Thus the court must examine the function or purpose of the definition of "relevant benefits". Here, the purpose of the definition is to identify the chargeable payments under a retirement benefits scheme. At the very least, Parliament is unlikely to have intended to limit connections to direct connections. That would have left the possibility that taxpayers could easily circumvent the charging provisions. Furthermore, it must have been foreseen that, over the life of the scheme, changes might be made to benefits. The changes would not simply involve a straight exchange or substitution of one benefit for another, but, on occasion, the loss of a benefit and the rendering of some monetary recompense. The charging provisions could only fairly apply if they applied to the giving of the new benefits, or recompense, as much as to the giving of the benefit originally provided by the scheme. It is also significant that Parliament did not limit itself to payments in consideration for services. Thus I conclude that a connection may be indirect for the purpose of the definition of relevant benefits.[55]

London Luton Hotel BPRA Property Fund v HMRC reviews the cases and concludes:[56]

> the words will usually take their meaning from those which surround it and the wider context, and that courts and tribunals may have to determine whether the words have a broad or a narrow meaning, understood in context. In literal terms, both meanings are possible.

Examples where the expression is found include:

Context	**See para**
ToA code	49.24.3
TiS code	55.6, 55.7

[55] Similarly *Derby Teaching Hospitals NHS Foundation Trust v Derby City Council* [2019] EWHC 3436 (Ch) at [74]: "The concept of 'connection' [in the phrase 'the provision of services provided to individuals for or in connection with the prevention, diagnosis or treatment of illness'] is not confined to activities which are subservient to or ancillary to or incidental to the purpose of the prevention, diagnosis or treatment of illness nor confined to being a means to that end."

[56] [2023] EWCA Civ 362 at [63].

App. 2.4.3 *Relating to*

The *Derby Teaching Hospitals* case discussed the authorities:[57]

> ... the decision of the High Court of Australia in *Tooheys Ltd v Commissioner of Stamp Duties (NSW)* (1960-1961) 105 CLR 602. The issue in that case concerned the interpretation of an exemption in a statute dealing with stamp duty. The exemption referred to
>
> > 'instruments relating to the services of apprentices, clerks and servants'.
>
> The High Court was divided, with three judges holding that the exemption did not apply and two judges holding that it did. Kitto J, in the minority, reviewed a number of earlier English authorities. His judgment makes it clear that when one considers the ambit of the words 'relating to' or 'related to', one must consider the context and the object of the provision being construed. Taylor J, in the majority, said at page 620:
>
> > 'There can be no doubt that the expression 'relating to' is extremely wide but it is also vague and indefinite. Clearly enough it predicates the existence of some kind of relationship but it leaves unspecified the plane upon which the relationship is to be sought and identified. That being so all that a court can do is to endeavour to seek some precision in the context in which the expression is used. With this in mind it may be said with some certainty that an examination of the language of the exempting provision shows that it does not admit of its application to an instrument merely because it makes a reference to the existence of a relationship of master and servant between the parties to it, or still less, because it refers to the existence of a master and servant relationship between persons who are not parties to it. It is, I think, not open to argument that 'relating to', in the context in which it appears, is equivalent to 'referring to' and the 'relationship' must be based upon some more substantial ground.'
>
> In *Tooheys Ltd*, Windeyer J at page 624 referred to 'the elastic character' of the phrase 'relating to'.

Section 43(2) National Health Service Act 2006 provides:

> (2) An NHS foundation trust may provide goods and services for any purposes related to—
>
> (a) the provision of services provided to individuals for or in connection with the prevention, diagnosis or treatment of

[57] *Derby Teaching Hospitals NHS Foundation Trust v Derby City Council* [2019] EWHC 3436 (Ch) at [53].

illness, and
(b) the promotion and protection of public health.

The *Derby Teaching Hospitals* case comments:

> The phrase 'related to' is used in [s.43(2) NHS Act 2006 Act] to describe the degree of connection between 'any purposes' and the purposes of the prevention, diagnosis or treatment of illness of the purpose of the promotion and protection of public health. The phrase shows that there must be a connection but does not tell one very much about how close that connection must be. The closeness of the connection, or the relationship, which is required depends upon the perceived purpose of the statutory provision.

For an example of the phrase narrowly construed, see App 4.4.3 (Covenant incidental to sale).

App. 2.5 Loan

App. 2.5.1 *Meaning of 'loan'*

'Loan' is a technical legal term. It means a loan of money. It does not include the right to an unpaid purchase price, even if:
(1) the purchase price is left outstanding[58] or
(2) the purchase price is satisfied by the issue of a promissory note.[59]

Interest accrued and due on a loan is a debt, but is not itself a loan.

However, in practice the strict legal meaning of loan may not matter, because:
(1) The term 'loan' is often given a wider definition, to include any form of credit; or
(2) The drafter reaches the same destination by framing a rule which applies both to loans and to other debts (eg the definition of loan creditor refers to a debt for money borrowed *or capital assets acquired* by a company).

For discussion of the related concepts of debt/liability, see 80.1 (IHT deduction for debts: Introduction).

[58] *Ramsden v IRC* 37 TC 619 at p.625; *Chitty on Contracts* (34th ed., 2021), para 41-262 (Definition of loan).

[59] *Lee v IRC* 24 TC 207. This is so even if the promissory notes are called 'loan notes' (which I think is nowadays the more usual label; though in a case where s.727 may be relevant, it might be thought better to use the more accurate expression 'promissory notes'). HMRC accept this; see 49.24.2 ('Capital sum').

App. 2.5.2 *Loan or outright payment?*

The loan/outright payment distinction is a matter of general (contract/property) law and not tax law. If A transfers money to B, the transaction may be a loan or an outright transfer. That depends on the intention of the parties. There is a loan if A and B intend that B should be obliged to repay A. There is an outright transfer if they do not intend repayment.[60]

The issue arose neatly in *Sofer v Swissindependent Trustees*[61] where trustees had power to lend to the settlor but no power to make outright distributions. The trustees made payments documented as interest-free unsecured loans.[62] The trustees made no enquiry as to the ability of the settlor to repay the "loans". It was said that the intention of the parties was that the "borrower" should not have to repay if he did not wish to.

Needless to say, repayment was not forthcoming. The Court dealt with the position very briefly:[63]

> whether a payment is made by way of gift[64] or by way of loan is primarily a question of fact as to the intentions of the parties.

That does not take us very far. There are various issues here.

(1) Sham: It is possible that the parties may not intend repayment, but pretend that they do, in which case the document, not reflecting the parties' intention, may be invalid as a sham. In what circumstances can a party to a formal deed ignore it on the basis that it was not the intention of the parties? Does sham operate inter partes?

(2) If so, how does one ascertain intention here?

The second issue turns on one's understanding of "intention", which is not the simple concept it may appear to be. In philosophical terms, this raises Kavka's toxin puzzle: can a person intend to do something which they know they will later decide not to do? or more simply, can a person intend to do something which they know they will not do?

[60] Further consideration may be needed if the applicable law is not English law, or if A or B do not have legal power to enter into transactions of loan or transfer.

[61] [2020] EWCA Civ 699.

[62] The proper law of the loans was not discussed, but English law principles would be assumed to apply unless the contrary is proven.

[63] [2020] EWCA Civ 699 at [42].

[64] CA used the term "gift" loosely, to mean "outright distribution". Strictly speaking, "Gift" is not apt to describe a distribution by trustees, as trustees have no gratuitous intent; but nothing turns on that.

If the case goes all the way to trial, the judgement may shed light on these issues - or it may skate past them. Time will tell.

App. 2.5.3 *Loan unlikely to be repaid*

The INT Manual provides:

> **INTM601640 Examples of amount or value of loan** [Jul 2023]
> ... The above assumes that monies made available to the individual were in fact by way of loan and, in appropriate cases, evidence of a loan having been made, should be obtained. If, on enquiry, it transpires that the payment was not a loan, then the payment should be treated as [an outright] cash payment...
> From 6 April 2017, rules were introduced in ITA07/S742C regarding the calculation of the value of the benefit relating to loans. Guidance on this can be found at INTM603640.

Similarly, in *Wildbirds Food v HMRC*:

> 39. What [HMRC's] argument essentially boils down to is this: given that, at the time each relevant payment was advanced, BFL could not have repaid it (or the interest on it) and had no plausible plan for doing so, it cannot properly be said that the resultant debt 'arises from a transaction for the lending of money' ....
> 40. I disagree. The modern business world has many famous examples of companies, especially in the technology sector, with no cash and no immediate prospect of generating a profit which go on to be very successful. Clearly the appellant considers BFL potentially to be such a company and is therefore prepared to subsidise its running costs by way of loan for the time being in the hope of obtaining repayment of some or all of its loans in due course, possibly with a gain on its share investment as well.
> 41. ... there is no requirement that for a loan relationship to exist, interest must be charged; were it otherwise, many perfectly normal intra-group loans would fall foul of that requirement ... Nor is there any requirement that, for a loan relationship to exist, the lender must have any degree of certainty that the debt will be repaid – normal commercial loans are inherently hedged about with uncertainty about whether repayment will be made and save in degree, the present situation is no different. Lack of a fixed repayment date for a loan is perfectly commonplace. ... The loans have been advanced as a matter of arm's length negotiation between the two parties, there is an obligation to repay (as recognised by both companies in their respective audited accounts and confirmed in evidence), and the fact that the appellant may well not recover some or

> all of its money is neither here nor there.[65]

An argument that a long term interest-free loan from a company to a shareholder should be characterised as a company distribution was rejected in *CT Audit v Cigarette Company of Jamaica*.[66]

App. 2.5.4 *Who is the borrower?*

Bayonet Ventures LLP v HMRC concerned a loan agreement between A and B; the sum borrowed was paid to a 3rd party, C.[67] But the 3rd party was not the borrower to whom the lender made the loan:

> the mere fact that funds flow from person A to person C, notwithstanding that the loan agreement is between person A and person B is certainly not unusual, for example, where the funds are paid to the borrower's agent or solicitor to be used or deployed on behalf of the borrower...
>
> [The borrower] was at liberty to cause or permit that money to be paid to [C]... The mere fact that the monies actually passed from [the lender] to [C] does not mean that the loan was made to [the member] ... The identity of the parties to a loan is a matter of law; albeit informed by the factual matrix within which the loan is made and documented.[68]

App. 2.5.5 *Loans: Non-tax aspects*

A loan should be documented by a written agreement made at or before the time of the loan.

If a party to a loan is a trust or company, the loan should be recorded in the trust/company accounts.

If a party to a loan is a trust, or a company held by a trust, the trustees need to consider whether they can properly enter into the loan, or permit the company to do so.

If a company lends to directors/connected persons, company law restrictions on loans may need to be considered. This will depend on the applicable company law.

The position following the death of an individual borrower/lender may

[65] [2018] UKFTT 341 (TC).

[66] [2012] UKPC 9 at [24]. The loan was recorded in the company accounts. The loan was not even "artificial"; see 3.21.2 ('Artificial'/ 'devices').
See too 52.29.2 (Methods of distribution).

[67] The recipient was a member of the LLP borrower, but nothing turned on that.

[68] [2018] UKFTT 262 (TC) at [17], [26].

need thought, preferably at the time the loan is made, not after the death.

Consider whether any party to the loan needs independent legal advice.

Take care the loan does not accidentally become time-barred: diarise the limitation period.[69]

These may seem basic points, but it is remarkable how often they are overlooked.

App. 2.6 Person/legal personality

Legal personality has generated a lively scholarship. This section draws on:

Twining, *General Jurisprudence*[70]

Bryant Smith, "Legal Personality" 1928 Yale Law Journal, p. 283[71]

App. 2.6.1 *Legal person: UK law*

The starting point is that 'person' has a legal sense, distinct from the ordinary meaning (if there is such a thing). A person is:

> any being[72] whom the law regards as capable of rights and duties. Any being that is so capable is a person, whether a human being or not.[73]

In *JH Rayner (Mincing Lane) v Department of Trade and Industry*:[74]

> A body which, as distinct from the natural persons composing it, can have rights and be subject to duties and can own property must be regarded as having a legal personality, whether it is or is not called a corporation.

A (more or less) equivalent way of expressing the point is that an entity has legal personality if it has the ability to own property in its name, and to sue and be sued in its name.

An entity may have some rights and duties and not others. For example a body may have the right to enter into an employment contract but not to hold real property. A minor has fewer rights than an adult; and a newborn

[69] See 80.8 (Time-barred debt).

[70] (2009) *http://www.cambridge.org/download_file/167999*

[71] *https://www.google.com/search?q=Legal+Personality%2C+Bryant+Smith&oq=Legal+Personality%2C+Bryant+Smith&aqs=chrome..69i57j0i546l5.741j0j7&sourceid=chrome&ie=UTF-8*

[72] I think that nowadays the word "entity" (or even "thing") would be more appropriate than "being": a company is a legal person, but not normally called a "being".

[73] Salmond, *Jurisprudence* (12th ed, 1966), p. 299.

[74] [1990] 2 AC 418 at p.504.

baby only has duties in the artificial sense that a person representing it may have duties. An English partnership cannot hold property, but it can sue and be sued in the partnership name.

It might be that an entity which has some rights and duties does not have enough of them to be a legal person. Legal personality is all or nothing, and not regarded as a matter of degree. Avery Jones states:

> there are, with few exceptions, no degrees of legal capacity.[75]

So the question should strictly be whether the entity has *sufficient* rights and duties. But in practice this issue has not arisen.

There are two express definitions of 'person':

Definition	**Applies for**	**See**
Interpretation Act definition	Acts of Parliament	85.14.1
OECD Model definition	DTAs	9.4

But these definitions do not take us far, so we fall back on the normal legal meaning. Of course that meaning as always is subject to context.

Statute may deem an entity to be a legal person for tax purposes. For instance, as a matter of general law an unincorporated association is not a legal person. But an unincorporated association is a company, for tax purposes, which may be taken to imply that it is a legal person for tax purposes. But this only goes to show the importance of context.

The concept of legal personality is distinct from the concept of transparency/opacity.[76]

App. 2.6.2 *Person: Terminology*

We begin as usual with terminology.

[75] Footnote original: It is possible in the UK that a registered trade union (which has the power to contract in its own name, be sued in its name and a judgment against the name could be enforced only against property held for its benefit, but not the power to hold property in its name), and friendly societies, are legal persons, although not corporations, see Salmond on Jurisprudence (12th ed., 1966), p.306 quoted in *Bumper Development Corporation v Comr of Police* [1991] 1 WLR 1362. A registered trade union is sufficiently a separate person to enable a member to sue it without its being said that he is suing himself and others on the ground that any wrong was done by an agent for himself, as would be the case with a common law partnership see *Bonsor v Musicians Union* [1956] AC 104 in which Lord Porter described the trade union as 'a thing created by statute, call it what you will, an entity, a near-corporation, which by statute has in certain respects an existence apart from its members' (p.131) ...

[76] See 90.6 ('Transparent' and 'opaque').

An individual is a legal person in a sense, since an individual has rights and duties, but usual usage is to refer to an individual as a "natural person", and "legal person" is restricted to legal entities.

When the word "person" is used in this sense, it may assist clarity to use the expression 'legal person' (ie something that the law regards as a person); this avoids confusion with the ordinary sense of the word.[77] But the word "person" in a legal context will be taken to mean legal person.

Similarly 'legal personality' is the characteristic of being a legal person. To be a legal person, and to have legal personality, are two different ways of saying the same thing.

Twining says:[78]

> Bearers of legal rights, duties and other relations have been variously known in jurisprudence as 'legal units', 'legal subjects', 'legal entities', and 'legal persons'.[79] Not much turns on the choice between these terms, except that the idea of 'person' has associations with philosophical issues concerning human identity, individuality, moral personality, gender, and character that have muddied the waters of the extensive theoretical debates about the nature of legal personality.
>
> ... So much of modern law is expressed in terms of legal personhood, legal persons, and legal personality that it is difficult to avoid these terms altogether. However, I shall here follow the German tradition of using the word 'subject' as a more useful analytical concept.

When discussing the DTAs, or statutes, which do use the word 'person', it is best to stick to the treaty or statutory terminology; so 'person' is the term used in this work. Though Twining is right that it is necessary to avoid confusion between:

(1) *Legal* questions (does the entity have rights, can it own property)

(2) *Philosophical* questions (does the entity have other attributes of a natural (human) person, such as consciousness).

Both sets of questions may arise, eg in the debate whether AI should have

[77] It has occasionally been suggested that the law distinguishes between person and legal person; eg an English partnership may be said to be a person but not a legal person. But this is, I think, based on a conceptual muddle. "Legal person" is just a way to clarity that one is using the word person in its legal sense. Legal person and person are not two different things, unless context shows that person is being used in some sense which is not the standard legal meaning.

[78] Para 15.2; I omit the footnotes.

[79] Author's footnote: or 'juristic person' but that is less common and I suspect mainly used in translation of the German *juristische Person*.

legal personality;[80] and in that case the use of different terms would assist clarity of thought. But in relation to legal entities discussed in this book, the second set of issues does not arise. No-one thinks that conferring legal personality on a company or Scots partnership means that it has consciousness.[81] Hohfeld's principal of legal contamination may be at work here.

App. 2.6.3 *Legal personality jurisprudence*

Legal personality raises issues which do not arise for a natural person, such as determining what is its purpose or intention in entering into a transaction. Twining says:

> English[82] law does not have a general theory of legal personality and is better off without one. Rather it ... treats ... legal persons as juridical extensions of individual human personality (corporate body, will, property), and approaches practical problems arising from this extension in a pragmatic, largely case-by-case fashion without guidance from or regard to any general theory. .. In fact, in the United States the old debates had been declared dead by 1930 ... partly because legal personality was one of the indeterminate abstract concepts that had been subject to effective critique by Legal Realists.
>
> Of course, practical legal issues surrounding corporations and other nonhuman entities continued to trouble specialists in company law, criminal law, labour law, public corporations and latterly in public international law and human rights ...

I would add tax law to this list.

> ... but typically without much assistance from legal theory, and without much communication with each other.

Legal personality has been described as a fiction, but:

> The fact of the matter surely is that the law's *non-personification* of certain types of social collectivity is far more a matter of fiction than its conferment of personality is in the case of others. The fiction is not that

[80] See Turner, *Robot Rules* (2019) chap 5 (Legal personality for AI).

[81] Garner, *Dictionary of Legal Usage* (3rd ed., 2011), entry under *Person*, defends the traditional terminology: "Lon Fuller, among others, has questioned whether *person* is the most desirable word for the concept. What term might be better? Fuller suggests *legal subject* or *right-and-duty bearing unit*. On second thought, perhaps *person* is not quite so bad."

[82] Author's footnote: The concept of legal personality in Scots law is the same as England, though Scots partnership law differs as a Scots partnership is a legal person.

> the Royal Bank of Scotland has corporate identity, but that the National Union of Bank Employees lacks it. Indeed, clubs, trade unions and other unincorporated associations often have (as F W Maitland noted[83]) much more reality than some such legally incorporated bodies as the one-man company in the celebrated case of *Salomon v Salomon and Co Ltd*.[84]

Avery Jones makes the same point:

> A proposal has been made to make an English partnership a legal person in line with a Scots partnership with no suggestion that whether it is a legal person or not is fundamental to its nature.[85] In practice, from the commercial, as opposed to the strictly legal, point of view, a common law partnership has many characteristics of a legal person: it will normally have a name, a bank account in that name, it can issue invoices and receive cheques in that name, receive and deliver goods and services in that name, partnership accounts are drawn up in form similar to company accounts showing partners as debtors and creditors to the partnership, partners appear to act as agents for the firm, and appear liable in practice only to the extent that the partnership assets are insufficient to meet its liabilities because a creditor will normally proceed against the partnership (or, more accurately, the partners jointly) first. In this way, the appearance, rather than the legal position, is closer to a civil law formal partnership.

I do not think it is helpful to use the word "fiction" in this area. As Bryant Smith says, "The legal personality of a corporation is just as real as and no more real than the legal personality of a normal human being. In either case it is an abstraction, one of the major abstractions of legal science, like title, possession, right and duty."[86]

App. 2.7 Ascertaining whether entity a legal person

The question whether specific entities have legal personality/constitute legal persons is discussed in the context of the entity concerned. I here make some general comments.

[83] Maitland, 'Moral Personality and Legal Personality' (1903) *https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland_0242-03_EBk_v6.0.pdf*

[84] MacCormick, *Institutions of Law* (2007), p 84. See too Scottish Law Commission, *Discussion Paper on Unincorporated Associations* (2008) *https://www.scotlawcom.gov.uk/files/8412/7877/4124/dp140.pdf*

[85] Law Commission *Partnership Law* (2003) para. 4.17. But this recommendation was rejected.

[86] Contrast 102.2.1 (Is situs fictional?).

App. 2.7.1 *UK entities*

Sometimes statute states that an entity has legal personality, which answers the question. Sometimes statute states that an entity is a body corporate, which answers the question as one of the attributes of a body corporate is that it has legal personality.[87] Sometimes we see both.[88]

Otherwise it is a question of looking to see whether the entity is capable of rights and duties, or sufficient rights and duties. If so, it is a legal person in UK law..

App. 2.7.2 *Legal person: Foreign law*

As to whether a foreign entity is a legal person, in the UK law sense, it is again a question of looking to see whether the entity is capable of rights and duties, a question of the foreign law. If so, the entity is a legal person in UK law.

Avery Jones says:[89]

> Legal person - like partnership - is a concept that each country understands within its own legal system, and one tends to assume, wrongly, that it means much the same everywhere...[90]
>
> In some countries, bodies which other countries would say had all the attributes of a legal person do not, in the country in which they are created, qualify as a legal person because in the country concerned a legal person has different requirements or attributes. We can illustrate these differences by reference to a body which is identical in all European countries (except for whether it is a legal person), the European Economic Interest Grouping.[91]...

Avery Jones refers to art 1 EEIG Regulation:[92]

> (2) A grouping shall ... have the capacity, in its own name, to have rights and obligations of all kinds, to make contracts or accomplish other legal acts, and to sue and be sued.
>
> (3) The Member States shall determine whether or not groupings

[87] See 90.9.3 (What is a body corporate?).

[88] Section 1(2) LLPA 2000, stating that a LLP is “a body corporate (with legal personality separate from that of its members)”; though I think the words in brackets are not strictly needed.

[89] ‘Characterisation of Other States’ Partnerships for Income Tax’ [2002] BTR 375. Some footnotes are omitted or abbreviated.

[90] See 99.3 (How labels may mislead).

[91] See 90.38 (European Economic Interest Grouping).

[92] Council Regulation (EEC) No. 2137/85 of July 25, 1985.

> registered at their registries ... have legal personality.

An EEIG is clearly a legal person in the UK law sense. Avery Jones continues:

> In general, European states have decided that it has legal personality, but in Germany and Italy it does not. What is a legal person can be illustrated by comparing the approach of various European countries to deciding this question. The reason why Germany and Italy have not made an EEIG a legal person is that in the German legal tradition, which in this respect also applies in Italy, the state recognises as legal persons entities which continue in being despite changes in their members. This results in a strict separation between the assets of the legal person and its members, with the result that the members of a legal entity cannot be liable for the entity's liabilities. Since the members of an EEIG are so liable it does not conform to the German and Italian domestic concept of a legal person, and so those countries do not categorise an EEIG as a legal person in spite of its capacity.
>
> In contrast, in some other countries, the liability of the members is not a factor of any relevance to this question.[93] In the French and Scandinavian legal traditions, as in England, being a legal person and having legal capacity go together. So in these traditions the EEIG's capacities are such that it is naturally categorised as a legal entity. In England, there is no intermediate category of reduced legal personality into which an EEIG can be put so it is a legal person... Thus, an EEIG which is identical in all European countries in respect of its legal capacity, the liability of its members and all other attributes, may, therefore, be a legal person or not according to each country's concept of legal person.
>
> ... These differences are merely differences in what is meant by a legal person in different countries. It is not clear that asking the question whether another state's partnership is a legal person and obtaining the answer based on the other state's meaning of the term will result in a meaningful answer.[94]

[93] Footnote original: In common law countries, corporations whose members had unlimited liability existed long before the introduction of limited liability and so the connection between the limited liability and the legal personality is less strong; in Australia and the UK unlimited companies exist today. The EEIG is unique in the UK because it is a legal person whose members are liable in the first instance for the EEIG's liabilities in the same way as partners in England...

[94] Footnote original: As was said in a Belgian tax case concerning a Michigan (US) partnership (Court of Appeals Brussels, April 30, 1998, discussed in 1998 European

One should not ask whether a foreign entity has legal personality in the abstract. The question should be whether it has legal personality
- *in the English law sense (that it can hold property, sue and be sued)*
or if appropriate
- *in the (say) German law sense that it has perpetual succession, (ie will not come to an end on the death of a member) and/or separation of entity/member liabilities (liabilities rest on the entity and not on the members).*

Of course, the context may show which sense is intended.

Applying the German conception, a Scots partnership or an unlimited company might not be legal persons, as the former does not have perpetual succession and neither has a complete separation of member/entity liabilities.

App. 2.8 Individual

Everyone knows that "individual" is used in legal English to mean human beings, and excludes companies, but perhaps one authority should be cited to nail the point home. In *Jasmine Trustees v Wells & Hind*:[95]

> ... in a legal context the more natural meaning of the word "individual" is that it equates to a natural person, and would therefore exclude corporations. In everyday parlance that is a more natural meaning. I would not consider it natural for even a lawyer to refer to a company as an individual.

Of course that is subject to context.[96] But I am not aware of any tax statute where "individual" includes a company. The distinction is so ingrained and so fundamental to taxation that the drafter is unlikely to overlook it.

Similarly, everyone knows that "individual" excludes a trustee[97] and excludes a personal representative, (even if the trustee or PR is an individual in their private capacity).

Taxation 249) 'with respect to the issue whether the plaintiff possessed a permanent establishment in the US, [the Michigan partnership] does not have legal personality under the standards of the USA, nor under the standards of Belgium.'

[95] [2007] EWHC 38 (Ch) at [22].

[96] The passage cited continues: "Having said that, the word when used in legislation takes its colour from its surroundings ... the word is capable of including a corporation if the context requires it."

[97] See 7.3 (Trustees a distinct person).

App. 2.9 “Representing” assets

This section considers the following family of expressions:

- property *representing* other property
- property *deriving* from other property
- property which *represents the value of* other property or *whose value is attributable* to other property

One sometimes sees “assets” instead of “property” but the words are synonymous.

Of course the meaning of the phrase may depend on the context, but it is useful to consider these phrases together as a topic in itself. In each case there must be a nexus between one asset and another asset, but the nexus is at least more precisely defined than in vague expressions such as “relating to”.

App. 2.9.1 *Representation of assets*

I start with the concept of assets representing assets (“representation of assets”) The general idea is that of a continuing fund, not merely the specific assets at any moment, but with an identity of its own.

A paradigm example of a fund with an identity of its own is a trust fund,[98] but assets may represent assets whether or not they are trust property.

Context may show that references to property should be read as referring to a continuing fund even without a reference to assets representing other assets.[99]

[98] Maitland, “Trust and Corporation” put the point poetically:

> “the “trust fund” can change its dress, but maintain its identity. To-day it appears as a piece of land; tomorrow it may be some gold coins in a purse; then it will be a sum of Consols; then it will be shares in a Railway Company, and then Peruvian Bonds.”

For the essay see
https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland_0242-03_EBk_v6.0.pdf

Maitland went further and described a trust fund as “an incorporeal thing”. But while sometimes a trust fund may be regarded as a single thing (eg for the situs of an equitable interest), on other occasions (perhaps most occasions) it should be regarded as a collection of separate things. See Nolan, “Property in a fund” [2004] LQR 108. But pursuing this point is not going to shed much light on representation of assets.

[99] For an example, see 79.10 (Same-settlement fiction: s.81).

App. 2.9.2 *Directly or indirectly*

Sometimes the words *directly or indirectly* are missing, but they do not add much, for indirect representation is still a kind of representation. They emphasise that the phrase is not to be narrowly understood.

The paradigm case of one asset representing another asset is:

(1) T sells an asset ('asset 1') for cash ('asset 2').
(2) T uses the cash to purchase a new asset ('asset 3').
(3) And so on for assets 4, 5, etc.

One might say that asset 2 (the cash) directly represents asset 1 and assets 3, 4, etc indirectly represent asset 1.[100] But if the words *directly or indirectly* are missing, one would still say that assets 3, 4 etc represent asset 1.

If substitute property (asset 2) represents the original property (asset 1) it would usually follow that asset 1 no longer represents the property.[101]

If money is spent maintaining an asset, the asset does not represent the money. But if money is spent improving an asset, the asset may be said to represent the money, at least in part.

App. 2.9.3 *Derive from/represent compared*

If asset A represents asset B, it may also be said to derive from asset B. In the paradigm case above, one would say that assets 2, 3, etc are *derived from* asset 1 as well as *representing* asset 1. Derivation and representation are (more or less) the same.

Occasionally statute refers to property/assets *derived from or representing* other property/assets.[102] What the drafter is trying to say by this expression is perhaps that the concept of derivation/ representation is not to be narrowly understood. But the phrase is a relapse to the old style of legal drafting which heaped synonym on synonym without much

[100] This is self-evident, but if authority is needed, see *IRC v Stype Investments (Jersey) Ltd* discussed at app 2.9.6 (Do shares represent co assets).

[101] See 18.18.6 (T sells asset to P).

[102] Section 439 ITA 2007; examples relevant to this book include:

Topic	**See para**
Penalty template wording	126.23.6
Onward gift template wording	61.31.6

In the disguised trade receipts code we have "represents, or has arisen or derives from, or is otherwise connected with...". We can infer that the drafter felt particularly strongly. But the reader may hope that such language does not become standard.

thought as to their meaning.

The expression 'derived property' may be used as a defined term when it is convenient to have a short label for:

(1) property derived from other property; or
(2) property representing other property[103]

As derive from/represent are (more or less) the same, this label seems apt in both cases.

The issue of derivation arises in the context of remittances, where the wording is: *derives wholly or in part, and directly or indirectly from*. There is a discussion at para 18.18 (Derived property), which is also relevant where the word used is *representing*.

App. 2.9.4 *Income from assets*

Where income arises from an asset the income does not represent the asset. Where the drafter refers to property representing property, and wishes to include the income from the property, this is stated expressly.[104] In the absence of such a provision, that would not be the case.

Although income (eg, a dividend) does not represent the asset from which it arises (eg, shares), the income may be said to *derive from* the asset.[105] This is the only point I can think of where *represent* and *derive from* may differ.

App. 2.9.5 *Borrowing charged on asset*

Suppose T borrows and charges the debt on an asset. Does the borrowed money represent the asset?

In *Trennery v West* trustees borrowed money on the security of shares in the trust fund. One question was whether the borrowed money was

[103] For statutory examples, see s.77(8) TCGA, discussed below; para 9(1) sch 4ZA TCGA discussed at 63.7 (Cond. 4: Distinct beneficiaries).

[104] For an example, see 99.2.11 (Settlor: CGT s.86 definition): "references to property representing other property include references to property representing accumulated income from that other property". For two more examples, see 74.11.2 (ToA/IHT assoc ops compared), in short, referring to: "property which represents ... [a] that property, or [b] income arising from that property, or [c] any property representing accumulations of any such income".
It is also assumed in the wording of para 5(5) sch 20 FA 1986 that income from an asset derives from an asset but does not represent the asset: see 78.22.4 (Accumulated income).

[105] Subject of course to context: see 18.18.15 (Income from income/gains).

derived property for the purposes of s.77 TCGA (now repealed). So far as relevant, s.77(8) TCGA at that time provided:[106]

> 'derived property', in relation to any property, means ... any ... property directly or indirectly representing proceeds of ... that property ...

So the question was whether the borrowed money (directly or indirectly) represented 'proceeds' of the mortgaged shares. The court said:[107]

> The final question is whether the Revenue are correct in contending that the [borrowed] moneys ... constituted derived property within the meaning of s 77(8) in relation to the Einkorn shares. There can be only one answer to this: of course they do. The [borrowed] moneys ... directly represented the proceeds of a mortgage of the Einkorn shares ... It will be observed that I have equated the proceeds of a mortgage of property with the proceeds of the property itself. But the subsection does not refer to 'the proceeds of a sale of that property', but to 'the proceeds of that property'; and this covers any proceeds, whether sale or mortgage or otherwise howsoever, by which value is extracted from one property and transferred to another.[108]

The wording here was non-standard (not *property representing property* but *property representing proceeds of property.* That makes a difference. Obviously, in this case, the avoidance context pre-determined the outcome.

App. 2.9.6 *Do shares represent co assets*

Do shares in a company represent the assets of the company?

The answer in strictness must be no. On first principles, the *value* of the shares is attributable to the *value* of assets of the company; but it does not follow that the shares *represent* the assets: the whole basis of company law is that company shares and company assets are distinct, and one does not lightly pierce the corporate veil.

This view is to an extent supported by the extended definition of 'representing' in s.717(b) ITA:

> references to assets representing any assets … include references to ...

[106] In 2006 the provision was amended with retrospective effect, only to be repealed in 2008.

[107] [2005] UKHL 5 at [16].

[108] Likewise Lord Walker at [42]: 'In my opinion the [borrowed money] started off as derived property...'

> shares in or obligations of any company to which the assets… are or have been transferred

The point arose in *IRC v Stype Investments (Jersey) Ltd.*[109] The case discusses the Inland Revenue charge. Section 237(1) IHTA (in short) imposes the charge on "any property" transferred.[110] Section 237(2) IHTA provides:

> References in subsection (1) above to any property include references to any property directly or indirectly representing it.

The article provides:

> The Inland Revenue had a charge under s 237(1) on the company's shares … [The Revenue] argued that s 237(2) must be read as extending the charge to the underlying assets of the company.

This argument met with no success:

> Vinelott J was not persuaded that this was a tenable construction. In his judgment subs (2) was not intended and was not apt to create a double charge [ie a charge on the company shares, and a charge on the company assets] in such circumstances.
> The word 'indirectly' was used in subs (2) to make it clear that the charge extends not only to the proceeds of sale of property purchased with those proceeds (which may be said to represent that property 'directly') but also to any property into which the property subject to the charge or the proceeds of sale can be traced.[111]

The point also arose in *Coombes v HMRC.*[112] An individual provided property to a company held by a trust ('the underlying company'). The question was whether the individual was a settlor within the s.86 TCGA definition. The definition is non-standard:

> a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.

[109] This case was decided 15 November 1983. It is unreported but discussed in Capital Taxes News and Reports, March 1987 Vol 7, No.17
see *https://www.kessler.co.uk/case-law-archive*

[110] See 125.18 (Inland Revenue charge).

[111] This is not self-evidently right, but the decision has stood for so long that it should not be challenged now. It is also assumed to be right in s.237(2A) IHTA; see 125.18.1 (IHT residential-property code).

[112] [2007] EWHC 3160 (Ch).

> References ... to property originating from a person are references to—
> (a) property provided by that person;
> (b) property representing property falling within paragraph (a) above ...

The judge said:

> [24] The appellant argues that he could not be treated as a settlor in relation to the settlement, because no part of the settled property, held on the trust of the settlement, was provided by him or represents property provided by him. The only relevant property provided by him was the £700,000 provided by him to enable [the underlying company] to purchase the farm. The land disposed of by [the underlying company] ... admittedly represented the £700,000 provided by the appellant, but (submits the appellant) that land was not held on any trust arising under the ... Settlement. It was the absolute beneficial property of [the underlying company].
> [25] HMRC seeks to counter this submission by pointing to the fact that, by providing [the underlying company] with the means of acquiring the land, the appellant increased the value of the shares in [the underlying company], which clearly are settled property subject to the trust of the settlement. So, the value of those shares (submits the Revenue) was provided by the appellant...
> [28] HMRC points out that the appellant's argument emasculates the anti-tax avoidance effect of s 86 ... That may be,[113] but that fact does not, of course, (!) enable me to do violence to the actual provisions of ... the 1992 Act.
> [29] ... the land disposed of by [the underlying company] was not settled property originating from the appellant as settlor, because it was not at any stage held on the trust of the ... Settlement and did not represent property ever held on those trusts.

In the s.86 context, that decision binds the first-tier tribunal, and should be followed in the Upper Tribunal and above, given that the decision has not been questioned. But the reasoning at [28] is (to say the least) not the

[113] At first sight one might think that there is considerable scope for tax avoidance, avoiding s.86 by providing funds to a company held by a trust, rather than providing funds to the trust. But a gift to a company held by a trust is in principle a chargeable transfer for IHT purposes. That would have been the case in *Coombes* itself, if anyone noticed. An interest-free loan to a company avoids a chargeable transfer, but the company's gains may be attributed to the lender under s.3 TCGA; see 64.9 (Participators overlap: Loan creditors).

contemporary approach to construction of tax legislation, so its approach is not likely to be followed in other contexts where to do so would 'emasculate the anti-tax avoidance effect'. In other words, the context may show that company shares do indirectly represent the company assets.

Suppose a company is sold or wound up. The proceeds of sale or liquidation represent the shares. Do they also represent the assets of the company? It is suggested that the answer may be yes or no, depending on what makes better sense in the context of the provision. Perhaps in the absence of context the better answer is that they do represent the assets, but that can give rise to anomalies.

App. 2.9.7 *Apportionment*

Occasionally one sees the form:

> so much of any property representing both [derived property] and other property as, on a just apportionment, can be taken to represent [the derived property].[114]

But apportionment must be possible in all cases, so this adds nothing.

App. 2.9.8 *Derive/represent value*

A variety of phrases are found:

Phrase/Example of context	**See para**
Property which *derives its value* from other assets	
Pre-owned assets	83.16
Transactions in land	22.8; 22.10.1; 22.11
CGT: land-rich assets	57.2; 57.4
Property which *represents the value* of other assets	
Transactions in securities	55.9.1
Value of property which is *attributable* to other assets	
IHT Residential-Property	82.3.1
Value which *derives* from the profits of a business	
Profit fragmentation	53.6

These phrases have (more or less) the meaning.

This concept is similar to representation of assets but not quite the same:

(1) Shares do not represent the underlying assets of the company, but

(2) The value of shares is derived from the value of the underlying assets and the shares represent the value of underlying assets.

[114] For example, para 8 sch 5 TCGA, set out in 99.2.11 (CGT s.86 definition of settlor)..

App. 2.10 Withdrawal from mixed fund

Suppose a person holds a mixed fund which includes or derives from:
(1) asset A (or a set of assets, fund A); and
(2) asset B (or a set of assets, fund B).

If the person withdraws some asset out of the mixed fund, it may be necessary to know whether the withdrawn property is represented by (1) asset A, or (2) asset B, or (3) a mixture of the two. Likewise the property remaining in the mixed fund.

In theory, one might apply:
(1) FIFO (first in first out)
(2) LIFO (last in first out)
(3) A proportional approach
(4) A power of election: The person withdrawing the property may choose what the withdrawn property represents

In the context of remittances, the statutory mixed fund rules usually govern this question. In other contexts, it is considered that the rule in *Clayton's case* should be applied:[115]

> ... this is the case of a banking account, where all the sums paid in form one blended fund, the parts of which have no longer any distinct existence.

In modern terminology, a mixed fund.

> In such a case, there is no room for any other appropriation than that which arises from the order in which the receipts and payments take place, and are carried into the account. Presumably, it is the sum first paid in, that is first drawn out. It is the first item on the debit side of the account, that is discharged, or reduced, by the first item on the credit side. The appropriation is made by the very act of setting the two items against each other. Upon that principle, all accounts current are settled, and particularly cash accounts....
> If the usual course of dealing was, for any reason, to be inverted, it was surely incumbent on the creditor to signify that such was his intention. He should either have said to the bankers,—"Leave this balance altogether out of the running account between us,"—or,—"Always enter your payments as made on the credit of your latest receipts, so as that the oldest balance may be the last paid."[116]

[115] (1816) 1 Mer 529 at p.608.
[116] at p.608, 609.

The rule is therefore that:

(1) The withdrawn assets are taken from that part of a mixed fund as the person making the transfer may direct.
(2) Subject to that, a FIFO basis applies.

It appears that HMRC accept this.

Likewise, prior to the statutory mixed fund rules, where an overseas mixed fund contained some UK source income, which had suffered UK tax, a taxpayer was entitled to remit that income in priority to foreign income which was assessable if remitted.[117]

App. 2.11 Securities

The word 'securities' is often used, in tax and elsewhere.

I consider its meaning in the following contexts:

Context	**See para**
General meaning	App.2.12
Statutory definitions:	App.2.14
s.132 TCGA definition	
Distribution code definition	
Transactions in securities code definitions	
Repo code definition	
Debt on a security: s.251 TCGA	App.2.14.1
Deeply discounted securities	App.2.17
Accrued income scheme	28.2
CGT situs of securities	103.2.3

App. 2.12 Security: general meaning

App. 2.12.1 *History of word "security"*

To understand the word we need to understand its history. The following discussion draws on Joanna Benjamin's books *Financial Law* and *Interests in Securities*, and *Gore-Browne on Companies.*[118]

The meaning of the term 'securities' has varied over time.[119]

[117] See 20.17.1 (Fund: taxed/untaxed income). It is also comparable to the rule that a debtor paying part of a debt may determine whether the payment is interest or capital; see 26.6 (Part payment: Interest or principal).

[118] Benjamin, *Interests in Securities* (1st ed., 2000) para 1.03, 1.10; *Financial Law* (1st ed 2007), para 8.63; *Gore-Browne,* Looseleaf, para 27(5), p. 27-14.

[119] *Re Rayner* [1904] 1 Ch 176 at p.185: 'The word [securities] is not a term of art ... It is a commercial word which will vary with the history of commerce.'

Originally the term meant secured debt obligations. In the early modern period, companies and governments began to raise capital from the public by issuing transferable debt obligations, the repayment obligation being secured on assets of the issuer. By a process of elision, these secured debt obligations came to be known as 'securities'.[120] I am not sure if government obligations were secured on assets in the strict sense, but they did not need to be, and were "secure" in the sense of "safe".

Since late medieval times, commercial companies have raised funds by issuing participations or shares. In the Victorian era the transferability of these shares was put beyond doubt. As shares became more readily transferable, their functional likeness to debt securities became clearer, and both forms of investment became known as 'securities'.[121]

More recently, the term 'securities' has been extended to include units in investment funds and other forms of readily transferable investment.

Futures, options, swaps and cash are not "securities" in the general sense of the word.

App. 2.12.2 *Security terminology*

If referring specifically to securities which take the form of debts, rather than shares, it is convenient to refer to **"debt-securities"**. A debt which is not a security is a **"simple debt"**.

It is unfortunate that (for historical reasons) the word 'security' is used in two different senses:

(1) A debt-security (or share/financial investment)

(2) Where an obligation is supported by a charge (or mortgage pledge or lien) giving priority over unsecured creditors. One needs terminology to describe:

   (a) the obligation *(Taylor Clark* coined the term 'proprietary security')

   (b) the property subject to the charge (security or 'collateral')[122]

   (c) the interest of the chargee in the charged property (a "security interest".)

It is not too confusing as long as one bears the two situations in mind.

[120] See *Re Smithers* [1939] Ch 1015 at p.1017-1020.

[121] *Re Douglas' Will Trusts* [1959] WLR 744 at p.749: 'I am prepared to make a declaration that 'securities' includes any stocks or shares or bonds by way of investment'; *Re Rayner* [1904] 1 Ch 176 at p.189, 191.

[122] See 82.10.1 (Security/collateral).

Once it is realised that the word ‘security’ is being used in different senses, there is nothing inconsistent, or even incongruous, in saying that:

- a secured debt may not be a security
- an unsecured debt may be a security; it may be referred to as a personal security

App. 2.12.3 *Security: range of meaning*

Thus “securities” may mean:

(1) Debt-securities only
(2) Debt-securities and also shares
(3) Debt-securities, shares, and also other financial investments[123]

In one case it was said that the normal meaning was debt-securities, and it did not include shares unless the context showed otherwise.[124] Another case considering the word in a home-made Will said the word “is used frequently, if not universally, in the extended meaning of investments.”[125] I think that is the better view, at least in ordinary speech, but it does not matter, and Gore-Browne splits the difference:

> Determining which meaning is applicable is merely a matter of construing the context, with no presumption one way or the other.

In tax statutes, at least, the context (or, sometimes, a definition) will normally make it clear whether “securities” includes shares.

It is often said that the word is imprecise. In *Taylor Clark International v Lewis*:[126]

> “security” is an imprecise term which takes its colour from its setting

In *Parker v IRC*[127]

> Securities is not a term of art, and it has no precise meaning.

No doubt. But is the term is significantly more imprecise than most other common legal terms? I don’t think so, particularly in the light of more

[123] This is self-evident but if authority is needed, see *IRC v Parker* 43 TC 396 at p.408.

[124] *IRC v Parker* 43 TC 396 at p.408.

[125] *Re Scorer,* [1924] All ER 330 at p.333.

[126] [1997] STC 499 at p.519. The related concept of ‘debenture’ is similarly imprecise: see 103.2.4 (‘Debenture’).

[127] 43 TC 396 at p.405. If further authority is needed, which I doubt, see *Re Scorer*: [1924] All ER 330 at p.333:

> “at the present day the word "securities" has a flexible meaning”.

recent cases which clarify the debt-security/simple debt borderline.

There are many cases[128] but it is not necessary, or practical, to discuss them all. And of course they need to be read in their context. In *Singer v Williams*:[129]

> The word "securities" has no legal signification which necessarily attaches to it on all occasions of the use of the term. It is an ordinary English word used in a variety of collocations: and it is to be interpreted without the embarrassment of a legal definition and simply according to the best conclusion one can make as to the real meaning of the term as it is employed in, say, a testament, an agreement, or a taxing or other statute, as the case may be. The attempt to transfer legal definitions derived from one collocation to another leads to confusion and sometimes to a defeat of true intention.

App. 2.13 Security: 5 statutory definitions

s.132(3) TCGA	**s.1117(1) CTA 2010** *Distribution code*	**s.263AA(8) TCGA** *Repo code*
For the purposes of this section and section 133...	In this Part [Part 23 Company Distributions], except where the context otherwise requires—	In section 263A and this section "securities" means—
		(a) shares in a company wherever resident,
(b) 'security' includes any loan stock or similar security whether [A] of the Government of the UK or [B] of any other government, or [C] of any public or local authority in the UK or elsewhere, or		(b) loan stock or other securities of— (i) the government of the UK, (ii) a local authority in the UK, (iii) another public authority in the UK, (iv) a company resident in the UK or other body

[128] In addition to cases cited elsewhere in this section Gore-Browne cites: *Bristol Airport plc v Powdrill* [1990] Ch 744; *Tarmac Roadstone Holdings Ltd v Williams* [1996] STC (SCD) 409; *Brown, Shipley & Co v IRC* [1895] 2 QB 598; *Re Rayner* [1904] 1 Ch 176; *Re Gent and Eason's Contract* [1905] 1 Ch 386; *Re United Law Clerks Society* [1947] Ch 150 at p.152; *IRC v Henry Ansbacher & Co Ltd* [1963] AC 191 at p.207.

[129] 7 TC 419 at p.435.

[D] of any company,		resident in the UK, or (c) shares, loan stock, stock or other securities issued by— (i) a government, local authority or other public authority of a territory outside the UK, or (ii) another body of persons not resident in the UK.
[ii] and whether secured or unsecured.	'security' includes securities not creating or evidencing a charge on assets	

The transactions in securities code has two definitions:

s.713(1) ITA	**s.685(9) ITA**
In this Chapter [Chapter 1 Part 13] ...	In this section—
"securities"— (a) includes shares and stock...	"security" includes securities not creating or evidencing a charge on assets;

There is no standard definition, but there are some common themes.

The s.132 definition is said to apply for the purposes of s.132, 133, but is incorporated by reference in other contexts. The s.1117 definition is also incorporated by reference in some other contexts.

It is well settled that a charge or mortgage is not required: a security may be unsecured. The definitions do not add anything by saying that expressly, and the absence of a definition makes no difference on that point But perhaps that was less clear when the definitions were first used

App. 2.14 Security: s.132 definition

The s.132 definition is not very different from the normal meaning of 'security'.

A CCAB statement provides:

> [1] The definition of 'security' in [s.132(3)(b) TCGA] ... is regarded as exhaustive

> [2] so that the debt must be a loan stock or a similar security of a government, public or local authority or company...[130]

It seems reasonably arguable from the statutory definition that point [2] is correct; that is, only securities issued by companies or state entities within s.132(3)(b)[i] are within the s.132 definition; securities issued by individuals, trusts, and other non-state non-company entities are not within the s.132 definition. If that is right, the s.132 definition should be regarded as exhaustive, ie the word "includes" actually means "means".

App. 2.14.1 *Debt on a security*

There is a CGT exemption for (first-hand) debts - except in the case of a 'debt on a security (as defined in s.132)'.[131]

'Debt on a security' has been described as 'particularly obscure',[132] 'baffling', 'a strange phrase' and 'the expression... is not one which is familiar to either lawyers or, I think, business men.'[133] But perhaps expectations of clarity in tax legislation have fallen since these observations were made in 1980. Although the phrase was a neologism when first used in the CGT legislation in 1965, it seems straightforward to me: it means a debt which is a security; as opposed to:

(1) a simple debt (a debt which is not a security) or
(2) a share (which is a security but not a debt).

App. 2.15 Debt-security or simple debt

The question of when a debt is a security needs further elucidation. What distinguishes a debt-security from a simple debt? A security must be something more than a simple debt. What is the something more?

In *Parker v IRC* (a TiS case):[134]

> It is submitted ... that even if securities secured by covenant without a charge on property were [securities within TiS], yet these particular

[130] The statement was made in 1969. LexisNexis states 'Confirmed as current in 1989, but in the light of case law (*Ramsay v IRC* 54 TC 101) the Revenue take a less restrictive view than they did in 1969.' No reference is given for this. *Ramsay* (1981) does not give reason to cast doubt on the CCAB statement; I think HMRC were right to confirm it in 1989.

[131] See 56.22.1 (CGT debt exemption).

[132] *Aberdeen Construction Group v IRC* [1978] AC 885, at p.902

[133] *Ramsay v IRC* 54 TC 101 at p.329, p.333. Similarly *Savva v HMRC* [2015] UKUT at [35]: an 'enigmatic phrase'.

[134] This passage was approved in the House of Lords.

> debentures are not securities on the ground
> [1] that they do not give any advantage over a mere debt,
> [2] that they do not involve a creditor/debtor relationship and
> [3] that they do not provide for the payment of interest.

I do not understand point [2] but the judge rejected all three points:

> They confer the advantage over a mere debt that consideration need not be proved and that the proof of the document establishes the company's obligation. ... liability to pay interest is not an essential feature of a security. In my view, it could not be said that the conditions of the debentures and the absence of obligation to pay interest would prevent these debentures, if secured by a charge on property, from being a security; nor do I understand that to be suggested. And it is not suggested that these debentures are not in every other respect than those which I have mentioned debentures and securities of the company. The nub of the Respondents' case is that it is the absence of a charge on property that prevents this debenture being a security. In my view, neither that nor the other features relied on by the Respondents prevent the debentures being securities at any rate in an appropriate context, and my conclusion is that these debentures in the context of [the transactions in securities code] are securities within the meaning of that section.

In *IRC v Laird Group* (a TiS case):[135]

> The word ‘securities’ includes not only stocks and shares of every description, including preference shares, but also debentures and unsecured loan notes.

App. 2.15.1 *Legal charge irrelevant*

The CCAB statement provided in 1969 that:

> the words [in the s.132 definition] ‘whether secured or unsecured’ in the definition made the existence of a charge immaterial.

The CG Manual refers to the s.132 definition and continues:

> **CG53421 definition of debt on a security** [Jul 2019]
> This definition is of limited use because there is no statutory guidance on the meaning of ‘loan stock or similar security.’ However, the final words make it clear that the debt does not have to be secured to be the debt on a security. Therefore ‘debt on a security’ is not the same as ‘secured debt.’

[135] [2003] UKHL 54 at [29].

But it is well-established that a debt-security need not be a secured debt. In *Taylor Clark International v Lewis*[136] a debt repayable on demand was held *not* to be a debt on a security, even though the debt *was* charged (secured) on assets.

App. 2.15.2 *Marketability*

The CG Manual provides:

> **CG53423 Debt on a security: *Ramsay v CIR* 54 TC 101** [Jul 2019]
> The *Ramsay* case involved a company which had incurred an agreed gain on the sale of a farm. It then entered into an avoidance scheme designed to produce an allowable loss to set off against the gain. The scheme removed value from a chargeable asset (shares) to produce an allowable loss on their disposal. The value passed into a loan, known as L2. This loan was also disposed of. If L2 was not a debt on a security, it would not be a chargeable asset. Therefore the gain on the disposal of the loan would not have been chargeable. However, the House of Lords held that the loan L2 did amount to a debt on a security. The gain on the disposal of L2 was thus a chargeable gain and the scheme failed.
> **CG53424 House of Lords decision: marketability** [Jul 2019]
> In *Ramsay* the House of Lords considered the underlying purpose of the distinction between debts and debts on a security in TCGA92/S251 (1). Both Lord Fraser and Lord Wilberforce suggested the essential feature of the debt on a security is that it should be marketable.
> At page 194 Lord Fraser says
>
> > 'the distinction ... is, I think, between a simple unsecured debt and a debt of the nature of an investment, which can be dealt in and purchased with a view to being held as an investment.'
>
> Later having analysed the essential features of the loan he says 'it possessed the characteristic of marketability.'
> At page 189 Lord Wilberforce says
>
> > 'it can be seen, however, in my opinion, that the Legislature is endeavouring to distinguish between mere debts, which normally (though there are exceptions), do not increase but may decrease in value, and debts with added characteristics such as may enable them to be realised, or dealt with at a profit.'

Benjamin, *Interests in Securities* states:[137]

[136] 71 TC 226.

[137] 1st ed., 2000, para 1.03, 1.10.

> Transferability is an essential characteristic of securities.[138]

Clearly, transferability is required for marketability and to be an investment.

App. 2.15.3 *Investment/profitability*

The CG Manual provides:

> **CG53425 Debt on a security: essential characteristics of** [Jul 2019]
> Both speeches in the House of Lords emphasised that for a debt to be the debt on a security it should be capable of being
> - held as an investment; and
> - realised at a profit.
>
> These conditions are, to some extent, interrelated, but it is important that both should be satisfied. For example, a debt may be regarded as a good investment. But if it cannot be realised at a profit it cannot be a debt on a security. These points are discussed in the following paragraphs.
> **CG53426 held as an investment** [Jul 2019]
> For a debt to be held as an investment it should either
> - carry a commercial rate of interest; or
> - carry a premium on repayment, equivalent to the interest which would have been paid; or
> - be issued at a discount, so that repayment at face value again reflects the interest which would have been paid on the debt.
>
> Where these criteria are not met and the return on the investment is clearly uncommercial, debt on a security status should not be accepted.
> **CG53427 sold at a profit** [Jul 2019]
> Whether a debt can be realised at a profit will depend, in part, on the premium, or rate of interest which the debt carries. But even if a debt carries an attractive rate of interest, it may not be regarded as a worthwhile investment by a potential purchaser. For example, the terms of the loan may enable the borrower to repay the debt early. A potential purchaser would need to consider whether the loan would last long enough to cover the costs of acquisition, and obtain a worthwhile return on the investment.

This overlaps with the structure of permanence requirement below.
The CG Manual provides:

> **CG53433 Debt on security: exchange gains** [Jul 2019]
> If a debt is denominated in a foreign currency, exchange gains (or losses)

[138] Footnote original: Indeed, the repackaging of relatively illiquid assets into readily transferable assets is known as ‘securitisation’.

can arise if the currency fluctuates against the pound. You should consider whether any such debt is the debt on a security purely in terms of the currency in which the debt is denominated. Neither realised, nor potential, exchange gains or losses should be taken into account in deciding whether a debt is the debt on a security.

App. 2.15.4 *Structure of permanence*

The CG Manual provides:

> **CG53428 structure of permanence** [Jul 2019]
> This point was made by Lord Wilberforce, in *Ramsay*, where he commented (at page 190) that the relevant loan had 'a structure of permanence such as fitted it to be dealt in ....' In fact, the loan in that case was repaid early. But it had been issued on terms which meant that a large penalty would be payable in the event of early repayment. It is not possible to set any precise limits for the 'life' of a debt, which would enable it to be regarded as a debt on a security. The attractiveness of any particular debt will depend upon the other terms of the loan, and on the type of market in which the debt would normally be traded. You can accept that any loan which could not be terminated by the borrower within a year from the date of commencement will have the required 'structure of permanence'. But a debt will not have a 'structure of permanence' merely because the borrower is not in a position to repay the debt in the foreseeable future.
> **CG53429 repayment at short notice** [Jul 2019]
> You cannot say that a debt is not a debt on a security simply because it can be repaid at short notice. But it is reasonable to suggest that in such cases there should be some compensation for the creditor to counterbalance the uncertainty as to the term of the loan. For example, a penalty can turn an otherwise uncertain, and therefore inherently unattractive, loan into a worthwhile investment. If a loan can be repaid at short notice, but there is no compensating benefit for the creditor, this would count against accepting the loan as a debts on a security.
> **CG53430 events of default** [Jul 2019]
> Some agreements include standard clauses requiring the debt to be repaid immediately if certain events happen. For example, if the borrower defaults on repayment, or goes into liquidation. These standard clauses should not be taken as displacing any stated terms for repayment for the debt set out in the agreement.

App. 2.15.5 *Documentation*

The CG Manual provides:

> **CG53434 Debt on security: documentation** [Jul 2019]
> The existence of a formal document constituting or evidencing the debt is not an essential feature of the debt on a security. At page 194 in *Ramsay* Lord Fraser says 'Further consideration has satisfied me that the existence of a document or certificate cannot be the distinguishing feature between the two classes of debt'. However, cases where debt on a security status is claimed for debts where no documentation exists need to be examined carefully to check whether or not the required features are present. Equally you should resist any suggestion that a debt MUST be a debt on a security if it is acknowledged by a document described as loan stock. This would be inconsistent with the approach taken in *Ramsay*, that the marketability test will be appropriate in deciding in ANY case whether a debt amounts to the debt on a security.

App. 2.15.6 *Loan stock/similar security*

The CCAB statement provides:

> The view is also taken that the reference to loan 'stock' implies in general a class of debt the holdings in which are transferable by purchase and sale...

The CG Manual provides:

> **CG53435 Debt on security: loan stock or similar security** [Jul 2019]
> In *Ramsay* Lord Wilberforce did not regard it as necessary to decide whether the loan L2 was, in fact, within the meaning of 'loan stock'. He observed that TCGA92/S132 (3)(b)
>
> > 'includes within 'security' any 'similar security' to loan stock: in my opinion these words cover the facts. This was a contractual loan, with a structure of permanence such as fitted it to be dealt in ...' (page 190).
>
> Lord Fraser took a similarly broad approach in his judgment (page 194).

App. 2.15.7 *Inter-group loan*

The CG Manual provides:

> **CG53436 Debt on security: loan accounts** [Jul 2019]
> Debt on loan account, for example between associated companies, may well not amount to the debt on a security. ...

Informal inter-company loan is not likely to take the form of a debt on a security. The loans are likely to be repayable on demand. In the case of UK companies, of course, the loan relationship rules would need consideration, and the debt on a security issue would not arise.

App. 2.15.8 *Date to test security*

Market conditions change over time. The CG Manual provides:

> **CG53431 Debt on security: when conditions satisfied** [Jul 2019]
> You should consider whether any debt amounts to the debt on a security by reference to the circumstances prevailing at the time the debt was created. For example, you should consider whether a rate of interest is commercial by reference to the market conditions at the time the debt was created. Thus, you may take into account any market opinion, at the time the debt was created, as to the likely future changes in the market rate of interest. Changes in the rate of interest which were not anticipated at the time the debt was created cannot be taken into account.

The terms of a debt may change over time, for instance on a specified date a debt may become payable. Clearly the debt does not cease for that reason to be a debt on a security (though it ceases to have any structure of permanence).

The terms of a debt may change by agreement between the parties:

(1) If the change constitutes a novation, (a disposal of the old loan and the creation of a new loan)[139] then the position is self-evident: the question of whether the debt is a debt on a security is decided at the date of the creation of the new debt.

(2) If the change is a variation of the existing loan, but not a novation, it is considered that the change should not alter the question of whether the debt is a debt on a security; this question is to be decided at the time the debt came into existence.[140]

The CG Manual skims over deep waters, but it suggests that HMRC agree:

> **CG53432 changes in terms** [Jul 2019]
> You should not accept that a debt can be regarded as the debt on a security because the terms of the loan could have been amended to make the debt marketable. If the terms of the debt have changed this cannot affect the status and tax treatment of the debt prior to the changes. You may, however, need to consider whether or not the changes had the effect of bringing to an end the original debt, and creating a new one, to which a different tax treatment may apply.

On contract law aspects of changes to the terms of a debt, see *Chitty on*

[139] See 70.18.1 (Novation/variation distinction).

[140] Further thought would be needed if changes to the terms of the loan were in contemplation at the time the loan was originally made.

Contracts (34th ed., 2021), para 25-030 (Substituted contract).

App. 2.16 Deemed security

This topic is somewhat niche, but I mention it for completeness. Perhaps it also sheds light on the general meaning.

App. 2.16.1 *Security in reorganisations*

Section 251(6) TCGA provides:

> For the purposes of this section a debenture issued by any company on or after 16th March 1993 shall be deemed to be a security (as defined in section 132) if—

A set of 6 categories then follow:

> (a) it is issued on a reorganisation (as defined in section 126(1)) or in pursuance of its allotment on any such reorganisation;
>
> (b) it is issued in exchange for shares in or debentures of another company and in a case to which section 135 applies and which is unaffected by section 137(1);
>
> (c) it is issued under any such arrangements as are mentioned in subsection (1)(a) of section 136 and in a case unaffected by section 137 where section 136 requires shares or debentures in another company to be treated as exchanged for, or for anything that includes, that debenture; or
>
> (d) it is issued in pursuance of rights attached to any debenture issued on or after 16th March 1993 and falling within paragraph (a), (b) or (c) above.
>
> [e] and any debenture which
>
> [i] results from a conversion of securities within the meaning of section 132, or
>
> [ii] is issued in pursuance of rights attached to such a debenture,
>
> shall be deemed for the purposes of this section to be a security (as defined in that section).

App. 2.16.2 *Deeply discounted security*

Section 251 TCGA provides:

> (7) Where any instrument specified in subsection (8) below is not a security (as defined in section 132), that instrument shall be deemed to be such a security for the purposes of this section, other than the purposes of determining what is or is not an allowable loss in any case.

> (8) The instruments mentioned in subsection (7) above are—
>
> (b) any instrument which
>
> [i] is not a loan relationship of a company
>
> [ii] but which would be a deeply discounted security for the purposes of Chapter 8 of Part 4 of ITTOIA 2005 if section 432(2) of that Act (excluded indexed securities) were omitted.

App. 2.17 'Security' in DDS code

SAI Manual states:

> **SAIM3010 Introduction** [Mar 2022]
> ... The term 'security' is not defined in the [deeply discounted securities] legislation. It may be taken to have a broad meaning comparable to the definition in s.132(3)(b) TCGA (CG53420) ...

This follows from the fact that the s.132 definition broadly reflects the normal meaning of the word. In the DDS case of *Savva v HMRC*[141] the Tribunal referred to *Taylor Clark International* (a debt on a security case) for guidance on the meaning of 'security' in the DDS code.

App. 2.17.1 *Security of non-company*

A security is normally debt owed by a company, but debt owed by a non-company (individual or trust) may be a security. The word 'issued' may be more usual for a corporate issuer, but a non-company may 'issue' a security.[142]

A security issued by an individual or trust is not a security within the s.132 definition, if the CCAB statement is right to say that the s.132 definition is an exclusive definition; but it is still a security in the general sense, and a security for the purposes of the DDS code. The SAI Manual passage set out above states that the meaning of 'security' in the DDS code is 'comparable' to the s.132 definition which admits the possibility that there can be a security for the DDS code which is not a security within the s.132 definition. In Hansard it was stated that the DDS provisions apply

[141] *Savva v HMRC* [2015] UKUT 141 (TCC).

[142] The drafter took this view in para 2(1)(c) sch 4B TCGA (issue of security by trustees); see 62.7 (Issue of security). See too Fuller, *Law & Practice of International Capital Markets* (3rd edition, 2012) at 1.15 (Distinctions between debt and equity securities): "A debt security may be issued by any type of issuer whether or not it is a company)."

to *corporate* debt, but the passage does not bear any weight.[143]

App. 2.18 Listed/Recognised stock exchange

The expression ‘listed on a recognised stock exchange’ occurs throughout the Taxes Acts, too often to give a full list. Examples are:

(1) Securities must be listed to qualify as investments which may be held in Individual Savings Accounts and for the quoted Eurobond exemption.

(2) Securities must not be listed to qualify for remittance investment relief, and IHT business property relief.

The HMRC guidance set out in this section is found on the HMRC website[144] rather than in a Manual.

App. 2.18.1 *Recognised stock exchange*

Section 1005(1) ITA provides:

> In the Income Tax Acts “recognised stock exchange” means—
> (a) any market of a recognised investment exchange[145] which is for the time being designated as a recognised stock exchange for the purposes of this section by an order made by the Commissioners for Her Majesty's Revenue and Customs, and
> (b) any market outside the United Kingdom which is for the time being so designated.[146]

In short, a recognised stock exchange is one recognised and approved by HMRC. HMRC say:

> HMRC will consider the designation of a stock exchange as a recognised stock exchange under S1005 ITA 2007 on receipt of a request made by a stock exchange. The fact that a particular exchange is not recognised

[143] Hansard 26/4/1996 col 1360 (Lord Mackay, then Lord Chancellor: ‘Clauses 80 to 105 cover the measures in this Bill which relate to the taxation of corporate debt.’) *http://hansard.millbanksystems.com/lords/1996/apr/26/finance-bill*

[144] Unless otherwise stated, quotes are from: *https://www.gov.uk/government/publications/recognised-stock-exchanges-definition-legislation-and-tables/recognised-stock-exchanges-definition-legislation-and-tables-of-recognised-exchanges*

[145] Section 1005(6) ITA provides: “In this section “recognised investment exchange” has the same meaning as in FISMA 2000 (see section 285)”.

[146] Section 1005 ITA continues with further provisions about designation orders, which need not be set out here.

> may simply mean that recognition has not been requested.[147]
>
> **What recognition means for a stock exchange**
>
> Recognition under section 1005 Income Tax Act (ITA) 2007 is for tax purposes only and confers no other status on the exchange concerned. It does not constitute any form of recognition or approval for regulatory or other purposes nor does it provide any form of approval or recommendation of any of the investments which are listed or traded on that exchange...

The expression sometimes used is "a designated UK market".[148] This has a distinct meaning, and is not discussed here.

App. 2.18.2 *"Listed" on exchange*

Section 1005(3) ITA provides:

> References in the Income Tax Acts to securities[149] which are listed on a recognised stock exchange are to securities—
>
> (a) which are admitted to trading on that exchange, and
>
> (b) [i] which are included in the official UK list[150] or
>
> [ii] are officially listed in a qualifying country outside the UK[151] in accordance with provisions corresponding to those generally applicable in EEA states.

HMRC say:

> ... while some securities (for example a depositary receipt) could meet the HMRC definition of 'listed on a recognised stock exchange' for the purposes of section 1005 ITA, certain HMRC tax treatments, such as Individual Savings Accounts, require that the underlying investment represented by the security must meet the HMRC definition of 'listed on a recognised stock exchange'. It is therefore necessary to check the guidance or legislation for the particular tax treatment to check whether

[147] *https://www.gov.uk/guidance/recognised-stock-exchanges* (last updated Dec 2020).

[148] See 432(1)(a)ITA/s.204 CTA 2010, and s.421L(6)(b) ITEPA.

[149] Section 1005(6) ITA provides: "In this section ... "securities" includes shares and stock".

[150] Section 1005(5) ITA provides:

"References in the Income Tax Acts to securities which are included in the official UK list are to securities which are included in the official list (within the meaning of Part 6 of FISMA 2000) in accordance with the provisions of that Part."

[151] Section 1005(4) ITA provides:

"For this purpose "qualifying country outside the UK" means any country outside the UK in which there is a recognised stock exchange."

there are any additional requirements.

App. 2.18.3 *AIM shares*

The alternative investment market ("AIM") is part of the London Stock Exchange. AIM shares are not regarded as "listed" because they are not included in the Official List maintained by the Financial Services Authority as the UK listing authority.[152] Thus AIM shares may qualify for, inter alia, remittance investment relief and IHT business property relief.

App. 2.18.4 *"Dealt in" on exchange*

Sometimes the expression used is "dealt in" on a stock exchange, rather than "listed". HMRC say:

> HMRC recognise that in certain cases markets use terms such as 'listed', 'admitted to trading', or 'quoted'. Both Table 1 and Table 2 identify the markets which we consider would meet the HMRC definition of 'listed'. Where HMRC legislation uses the term 'dealt in on a recognised stock exchange' shares dealt in on the recognised stock exchanges named in Table 1 or Table 2 would meet 'dealt in on a recognised stock exchange' whether the shares meet the HMRC definition of 'listed' or not (unless the specific legislation further qualifies the term 'dealt in on a recognised stock exchange).

App. 2.18.5 *HMRC tables*

HMRC website contains lengthy tables which I do not set out here:[153]

- 3 tables specifying recognised stock exchanges, and what qualifies as "listed" (I am not sure why the material is in 3 separate tables)
- Table of Stock exchanges recognised for s.48A FA 2005 (alternative finance investment bonds/sharia finance)

The tables come with a disclaimer:

[152] For the history, see CG50255 London stock exchange: History: The Alternative Investment Market (now archived).

[153] For the first three tables see *https://www.gov.uk/government/publications/recognised-stock-exchanges-definition-legislation-and-tables/recognised-stock-exchanges-definition-legislation-and-tables-of-recognised-exchanges#tables-of-recognised-stock-exchanges*
For the last table see *https://www.gov.uk/government/publications/designated-recognised-stock-exchanges-section-1005-income-tax-act-2007/designated-recognised-stock-exchanges-section-1005-income-tax-act-2007-v3*

> While HMRC tries to maintain an up to date list this is not always possible because markets frequently rename, re-structure or merge. It is possible that you may identify stock exchanges within the law of a named jurisdiction (table 2) which we have not yet identified, but which would meet recognised stock exchange status. Equally you may identify a market of a recognised stock exchange where we have not given an opinion as to whether it meets the HMRC definition of listed.[154]

App. 2.19 'UK' and related expressions

App. 2.19.1 *UK*

Interpretation Act 1978 sch 1 provides:

> 'UK' means Great Britain and Northern Ireland.

Section 1313(1) CTA 2009 provides:

> Activities in UK sector of continental shelf
> (1) Any profits—
> (a) from exploration or exploitation activities carried on in the UK sector of the continental shelf, or
> (b) from exploration or exploitation rights,
> are treated for corporation tax purposes as profits from activities or property in the UK.

In *Royal Bank of Canada v HMRC*:[155]

> [HMRC] submitted that because the concept of immovable property is generally defined in accordance with the law of the Contracting State in which the property is situated ... it is appropriate to have recourse to s.1313 CTA 2009, on the basis that income falling within that provision should be treated as deriving from UK immovable property. Effectively, s.1313 represented an exercise of the UK's right to determine what amounted to immovable property. That cannot be right. Section 1313 says nothing about the concept of immovable property under English (or Scottish) law. It simply establishes a domestic tax charge in respect of profits from certain activities. To the extent that it is necessary to spell out that the UK sector of the continental shelf comprises UK immovable

[154] *https://www.gov.uk/government/publications/recognised-stock-exchanges-definition-legislation-and-tables/recognised-stock-exchanges-definition-legislation-and-tables-of-recognised-exchanges*

[155] [2023] EWCA Civ 695 at [104].

property, that is addressed by Article 3 of the Treaty.

App. 2.19.2 *British Isles/Crown dependencies*

Interpretation Act 1978 sch 1 provides:

> 'British Islands'[156] means the UK, the Channel Islands and the Isle of Man.

So the Isle of Man and the Channel Islands do not form part of the UK. In *Barclay (R, oao) v Lord Chancellor*:[157]

> The Channel Islands consist of two Bailiwicks, Jersey and Guernsey. The Channel Islands are Crown dependencies but they are not part of the UK nor are they colonies. When King Philippe Auguste retook possession of continental Normandy in 1204, King John retained the Channel Islands. His right as Duke of Normandy lapsed and a separate title grew up by force of occupation, which attached to him as King of England. This was confirmed by the Treaty of Brétigny[158] in 1360.

See too 4.22.2 (Bailiwick of Guernsey).

App. 2.19.3 *Great Britain*

'Great Britain' means England, Wales and Scotland: s.1 Union with Scotland Act 1706 provides:

> That the two Kingdoms of England and Scotland shall upon the First day of May which shall be in the year 1707 and forever after be united into one Kingdom by the name of Great Britain …

App. 2.19.4 *England*

The definition of 'England' is not usually an issue for tax. However, for completeness, para 5(a) sch 2 Interpretation Act 1978 provides:

> in any Act passed before 1st April 1974, a reference to England includes Berwick upon Tweed and Monmouthshire and, in the case of an Act passed before the Welsh Language Act 1967, Wales.

[156] The terms British Isles/Islands are synonymous. 'British Islands' is mostly found in very formal legal writing.

[157] [2009] UKSC 9 at [8].

[158] The treaty was signed at Brétigny, and later ratified as the Treaty of Calais on 24 October 1360. It marked the end of the first phase of the Hundred Years' War (1337–1453) – as well as the height of English power on the Continent.

App. 2.19.5 *Territorial sea*

‘Territorial sea’ extends 12 nautical miles from shore.[159]

Section 1013 ITA provides:

> The territorial sea of the UK is treated for the purposes of the Income Tax Acts as part of the UK.

The same applies for CGT, CT and NIC.[160]

There is no equivalent provision in the IHT legislation so territorial sea is not part of the UK for IHT purposes. This is perhaps a consequence of art 26(1) United Nations Convention on the Law of the Sea:

> No charge may be levied upon foreign ships by reason only of their passage through the territorial sea.

In the Dover Strait, the southerly shipping lane is territorial sea, and so counts as part of the UK, but this may not matter, given the exemption for property in transit.[161]

App. 2.20 Land

The Interpretation Act 1978 provides (for Acts after 1 Jan 1979):

> ‘Land’ includes
> [a] buildings and other structures,
> [b] land covered with water, and
> [c] any estate, interest, easement, servitude or right in or over land.

This provision seems to have been forgotten, as it is repeated in recent statutory provisions (with insignificant variations of wording); see for instance, s.6B(3) ITTOIA; s.717S(1) ITA; s.1C(6) TCGA; para 4(7) sch 4B TCGA. These do no harm, but the point of the Interpretation Act is to prevent repetition in statutory drafting.

App. 2.21 Interest in land/chargeable interest

This section considers the following statutory definitions:

Term	**Definition**	**Relevant for**[162]
Interest in UK land	s.1C TCGA	CGT/CT charge on non-residents *also:* IHT residential-property code

[159] It is more precisely defined in the United Nations Convention on the Law of the Sea.

[160] See s.276 TCGA, s.1170 CTA 2010; s.172 SSCBA.

[161] See 18.14.5 (Property in transit).

[162] This list is not comprehensive.

Interest in land	Para 4 sch 1B TCGA	Meaning of Residential Property Gain
Chargeable interest	s.48 FA 2003	SDLT
Chargeable interest	s.107 FA 2013	ATED

The definitions are very similar so they are conveniently considered together.

App. 2.21.1 *Scope of definitions*

Section 1C(1) TCGA provides:

> For the purposes of section 1A(3)(b) an ‘interest in UK land’ means ...

This definition is said to apply for the purposes of s.1A(3)(b) but it is applied elsewhere when needed for CGT,[163] and is also incorporated by reference for the IHT residential-property code.[164]

Para 4(1) sch 1B TCGA provides:

> For the purposes of this schedule an ‘interest in land’ means ...

This definition applies for schedule 1B.

For ATED, s.107(1) FA 2013 provides:

> In this Part [Part 3 FA 2013, ATED] ‘chargeable interest’ means–

The definition applies for ATED.

Similarly for SDLT, s.48(1) FA 2003 provides:

> In this Part [part 4 FA 2003, SDLT] ‘chargeable interest’ means—

The definition applies for SDLT.

App. 2.21.2 *Interest in land: Definitions*

s.1C(1) TCGA	**Para 4(1) sch 1B TCGA**
For the purposes of section 1A(3)(b) an ‘interest in UK land’ means	For the purposes of this Schedule an ‘interest in land’ means—

[163] Para 7 sch 1A TCGA provides: ‘For the purposes of this Part of this schedule [Part 2, land-rich asset test] ‘interest in UK land’ has the meaning given by section 1C.’ Para 47 sch 5AAA TCGA (UK property-rich collective investment vehicles): ‘’interest in UK land’ is to be read in accordance with section 1C’; similarly s.25ZA(7) TCGA; s.80A TCGA; s.159A TCGA; s.168A TCGA; s.187B TCGA. The definition also applies for CT: s.2B(5) TCGA provides: ‘Section 1C applies for the purposes of subsection (4)(a) as it applies for the purposes of section 1A(3)(b) (disposing of interests in UK land).’

[164] See 82.19 (‘Residential property interest’).

(a) an estate, interest, right or power in or over land[165] in the UK, or	(a) an estate, interest, right or power in or over land, or
(b) the benefit of an obligation, restriction or condition affecting the value of an estate, interest, right or power in or over land in the UK,	(b) the benefit of an obligation, restriction or condition affecting the value of an estate, interest, right or power in or over land
other than an excluded interest.	other than an excluded interest.

The sch 1B and s.1C definitions are the same, except the sch 1B definition extends to non-UK land; so references to the UK are deleted, and para 4(6) sch 1B TCGA is added. This provides:

> In applying the domestic concepts of law mentioned in this paragraph to land outside the UK, this paragraph is to be read so as to produce the result most closely corresponding with that produced in relation to land in the UK.[166]

The SDLT/ATED provisions are more or less the same:

s.48(1) FA 2003: SDLT	**s.107 FA 2013: ATED**
(1) In this Part 'chargeable interest' means—	(1) In this Part 'chargeable interest' means—
(a) an estate, interest, right or power in or over land in England or Northern Ireland, or	(a) an estate, interest, right or power in or over land in the UK, or
(b) the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power,	(b) the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power.
other than an exempt interest.	(3) An exempt interest is not a chargeable interest for the purposes of this Part.

[165] Section 1C(6) TCGA and para 4(7) sch 4B TCGA (more or less) duplicate the Interpretation Act 1978 definition of land, so they add nothing; see App.2.20 (Land).

[166] Para 4(6) has no particular effect, see 90.3.3 (Foreign-entity clauses); but presumably the point is to prevent an inference that 'land' in the sch 1B definition might be restricted to UK land.

The definitions are the same as the CGT definitions set out above, except that the SDLT definition is restricted to land in England/Northern Ireland, and the term "exempt interest" is used instead of "excluded interest". (It is a pity that the terminology is not aligned; I refer where appropriate to an exempt/excluded interest).

App. 2.21.3 *Exempt/excluded interest*

Section 1C(2) TCGA provides:

> The following interests are 'excluded interests'-
> (a) any interest or right held for securing the payment of money or the performance of any other obligation,
> (b) a licence to use or occupy land,
> (c) in England and Wales or Northern Ireland,
> [i] a tenancy at will or
> [ii] an advowson, franchise[167] or manor, and
> (d) such other descriptions of interest or right in relation to land in the UK as may be specified in regulations made by the Treasury.[168]

A tenancy at will can have no value, and the items in (c)[ii] are of very specialist interest.

For completeness, s.1C(3) TCGA provides:

> An interest or right is not within subsection (2)(a) if it is-
> (a) a rentcharge, or
> (b) in Scotland, a feu duty or a payment mentioned in section 56(1) of the Abolition of Feudal Tenure etc (Scotland) Act 2000.[169]

Rentcharges cannot be created after 1977,[170] and feu duty (a Scots law concept) was abolished in 2004,[171] so this provision is (more or less) obsolete; I expect the drafter was following old precedents without giving much thought to the matter.

[167] Section 1C(6) TCGA provides: 'In this section-
'franchise' means a grant from the Crown such as the right to hold a market or fair, or the right to take tolls'.
Para 4(7) sch 1B TCGA is identical.

[168] Para 4(2) sch 1B TCGA is identical.

[169] Para 4(3) sch 1B TCGA is identical.

[170] Rentcharges Act 1977. Any remaining pre-1977 rentcharges will be extinguished in 2037.

[171] Abolition of Feudal Tenure etc. (Scotland) Act 2000.

The SDLT/ATED provisions are effectively identical.

s.48(2) FA 2003: SDLT	**s.107(4) FA 2013: ATED**
The following are exempt interests–	The following are exempt interests–
(a) any security interest;	[Identical]
(b) a licence to use or occupy land;	[Identical]
(i) a tenancy at will; (ii) an advowson, franchise or manor.	in England and Wales or Northern Ireland, a tenancy at will.[172]

Section 107(5) FA 2013 provides the definition:

> In subsection (4) 'security interest' means an interest or right (other than a rentcharge[173]) held for the purpose of securing the payment of money or the performance of any other obligation.

If A lends to B unsecured, A has an asset (the debt) but the asset is not an interest in land/chargeable interest. If the loan is secured on land, the asset is an interest in land, as a matter of general (land) law; but it is an exempt/excluded interest and so it does not count as an interest in land/chargeable interest, as defined.

App. 2.22 Dwelling/residential property

This section considers the following statutory definitions:

Defined term	**Provision**	**My term: Relevant for**
Dwelling	sch 1B TCGA	**TCGA definition,** relevant for: UK land rebasing Meaning of "residential property gain" IHT residential-property code
Residential Property	s.116 FA 2003	**SDLT definition**: SDLT
Dwelling	s.112 FA 2013	**ATED definition:** ATED

The definitions are (mostly) the same, so they are conveniently considered together. I focus on the TCGA and SDLT definitions.

The TCGA definition is expressed to be for the purposes of sch 1B

[172] The rule that an advowson, franchise or manor is an exempt interest is not needed for ATED, as these are not dwelling-interests.

[173] Section 107(6) FA 2013 makes provision for Scotland which did not use the term 'rentcharge'. But as noted above, the reference is obsolete.

TCGA, but it is incorporated elsewhere when needed.[174] It is also incorporated by reference in the IHT residential-property code.[175]

The terms dwelling/residential property are elaborately defined; for the general meaning of the words, see 6.21.2 (Home/dwelling compared); 6.21.3 (Home/residence compared).

TCGA definition: **para 5(1) sch 1B TCGA**	**SDLT definition:** **s.116(1) FA 2003**
For the purposes of this Schedule a building[176] is a dwelling at any time when—	In this Part [Part 4, SDLT] "residential property" means—
(a) it is used, or suitable for use, as a dwelling, or	(a) a building that is used or suitable for use as a dwelling,
(b) it is in the process of being constructed or adapted for use as a dwelling,	or is in the process of being constructed or adapted for such use, and
	(b) [garden & grounds, see below] and
[For equivalents to para (c), see App.2.21.2 (Interest in land: Definitions); 82.19.1 (Easement/restrictive covenant).]	(c) an interest in or right over land that subsists for the benefit of a building within paragraph (a) or of land within paragraph (b);
	and "non-residential property" means any property that is not residential property.
and, in each case, it is not an institutional building.	This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.

Whether a building is used/suitable for use as a dwelling is a question of fact, depending on the facts at the time of the charge; for an example, see

[174] Para 21(3) sch 4AA TCGA provides: 'For the purposes of this Schedule, whether a building is a dwelling is determined in accordance with Schedule 1B.'

[175] See 82.19 ('Residential property interest').

[176] Para 8(3) sch 1B TCGA provides: In this Schedule 'building' includes a part of a building.

P N Bewley Ltd v HMRC:[177]

> No doubt a passing tramp or group of squatters could have lived in the bungalow as it was on the date of purchase. But taking into account the state of the building ... with radiators and pipework removed and with the presence of asbestos preventing any repairs or alterations that would not pose a risk to those carrying them out, we have no hesitation in saying that in this case the bungalow was not suitable for use as a dwelling.

App. 2.22.1 *Garden or grounds*

Para 5(2) sch 1B TCGA	**s.116(1) FA 2003**
Land that at any time is, or is intended to be, occupied or enjoyed with a dwelling as a garden or grounds (including any building or structure) is taken to be part of the dwelling at that time.	In this Part [Part 4, SDLT] "residential property" means ... (b) land that is or forms part of the garden or grounds of a building within paragraph (a) (including any building or structure on such land) ...

The wording of the definitions has drifted apart slightly. It is theoretically possible that garden or grounds could be included under the SDLT definition (because it is garden and grounds) and not TCGA definition (because it is not intended to be enjoyed as such). But that will rarely if ever happen. I wonder if that is deliberate?

What is important is the concept of garden and grounds, which is the same in both definitions.

The wording is derived from CGT private residence relief, and HMRC PRR guidance[178] is relevant here. There is also SDLT guidance.

In the context of PRR, taxpayers will wish to argue that land *is* garden or grounds, in order to qualify for the relief, and HMRC will argue that it is not. In other contexts, such as IHT and SDLT, the position is reversed: taxpayers will wish to argue that land is *not* garden or grounds, and HMRC will argue that it is.

Whether land is garden/grounds is a question of fact. There have been a flurry of recent cases, in some of which estate agent particulars described the land as garden or grounds, and SDLT was paid at that basis; but a repayment claim was subsequently made on the basis that some part of the land which was not garden/grounds. (SDLT residential property rates are payable only if the land consists *entirely* of residential property. This

[177] [2019] UKFTT 65 (TC) at [53].

[178] See 59.2.6 (Garden or grounds).

"cliff-edge" rule would seem suitable for review but I do not pursue that here).

Hyman v HMRC makes some general comments:[179]

> 37. The SDLT legislation does not define the expression "garden or grounds" so I must give it its ordinary meaning. It is common ground, if I may use that word, that the hedged-in cultivated garden and the additional fenced and mown area are "garden or grounds". "Grounds" must be something different from, and additional to, "gardens".
> 38. The Oxford English Dictionary defines "grounds" as "An area of enclosed land surrounding a large house or other building". The Cambridge Dictionary's definition is "land that surrounds a building".

But dictionary definitions of ordinary English words almost never help.[180]

> 62. In my view "grounds" has, and is intended to have, a wide meaning. It is an ordinary word and its ordinary meaning is land attached to or surrounding a house which is occupied with the house and is available to the owners of the house for them to use. I use the expression "occupied with the house" to mean that the land is available to the owners to use as they wish. It does not imply a requirement for active use. "Grounds" is clearly a term which is more extensive than "garden" which connotes some degree of cultivation. It is not a necessary feature of grounds that they are used for ornamental or recreational purposes. Grounds need not be used for any particular purpose and can, as in this case, be allowed to grow wild. I do not consider it relevant that the grounds and gardens are separated from each other by hedges or fences. This may simply be ornamental, or may serve the purpose of delineating different areas of land as being for different uses. Nor is it fatal that other people have rights over the land. The fact that there is a right of way over grounds might impinge on the owners' enjoyment of the grounds and even impose burdensome obligations on them, but such rights to not make the grounds any the less the grounds of that person's residence. Land would not constitute grounds to the extent that it is used for a separate, eg commercial purpose. It would not then be occupied with the residence, but would be the premises on which a business is conducted.

In *Myles-Till v HMRC*[181]

> What indicates that a piece of adjoining land has become part of the

[179] FTT's comments cited and approved on appeal: [2021] UKUT 68 (TCC) at [14].
[180] See App 2.1.3 (Dictionaries).
[181] [2020] UKFTT 127 (TC) at [44] -[45].

> “grounds” of a dwelling building? Technically, fact that a dwelling building is sold together with adjoining land, as a single chargeable transaction for SDLT purposes, does not make that adjoining land, necessarily, part of the grounds of the dwelling building: s55 clearly envisages the possibility that the subject matter of a single chargeable transaction will include both residential and non-residential land. Common ownership is a necessary condition for the adjacent land to become part of the grounds of the dwelling building - but not, in my view, a sufficient one. To that extent I cannot accept HMRC’s submission that it is sufficient that the adjacent land is available to the owners to use as they wish. One must, in addition, look at the use or function of the adjoining land to decide if its character answers to the statutory wording in s116(1) - in particular, is the land grounds “of” a building whose defining characteristic is its “use” as a dwelling? The emphasised words indicate that that the use or function of adjoining land itself must support the use of the building concerned as a dwelling. For the commonly owned adjoining land to be “grounds”, it must be, functionally, an appendage to the dwelling, rather than having a self-standing function... Quite how the commonly held adjoining land “supports” the dwelling building (in my formulation) will be a matter of fact and degree - ranging from pure ornamentation (simply improving the view from the house) to on-site leisure activities (a horse-riding paddock and stables for use by the house-dwellers).

In *Hyman*, a barn, meadow and bridleway were held to be grounds of the dwelling building (or buildings on those grounds). In *Goodfellow,* paddocks and stables used for recreational activity were held to be grounds.[182] In *Myles-Till*, a paddock formed part of the grounds.

There is no requirement that the garden must be needed for reasonable enjoyment of the dwelling.[183]

App. 2.22.2 *Institutional building*

An institutional building does not count as a dwelling within the TCGA definition.

Para 5(3) sch 1B TCGA provides the definition. There are 10 categories of institutional building:

[182] *Goodfellow v HMRC* [2019] UKFTT 750 (TC); and see Sheldon, “A stable proposition” Tax Adviser, April 2020.

[183] This is self-evident, but if authority is needed, see *Hyman v HMRC* [2021] UKUT 68 (TCC).

> A building is an institutional building if—
> (a) it is used as residential accommodation for school pupils,
> (b) it is used as residential accommodation for members of the armed forces,
> (c) it is used as a home or other institution providing residential accommodation for children,
> (d) it is used as a home or other institution providing residential accommodation with personal care for persons in need of personal care because of old age, disability, past or present dependence on alcohol or drugs or past or present mental disorder,
> (e) it is used as a hospital or hospice,
> (f) it is used as a prison or similar establishment,
> (g) it is used as a hotel or inn or similar establishment,
> (h) it is otherwise used, or suitable for use, as an institution that is the sole or main residence of its residents...

App. 2.22.3 *Student accommodation*

Para 5 sch 1B TCGA provides:

> (3) A building is an institutional building if ...
> (i) it falls within—
> (i) paragraph 4 of Schedule 14 to the Housing Act 2004 (buildings in England or Wales occupied by students and managed or controlled by educational establishment etc), or
> (ii) any provision having effect in Scotland or Northern Ireland that is designated by regulations made by the Treasury as provision corresponding to paragraph 4 of that Schedule, or
> (j) it qualifies in accordance with the next sub-paragraph as student accommodation.
>
> (4) A building qualifies as student accommodation in accordance with this sub-paragraph at any time if the time falls in a tax year in which—
> (a) the accommodation provided by the building includes at least 15 bedrooms,
> (b) the accommodation is purpose-built, or is converted, for occupation by students, and
> (c) the accommodation is occupied by students on at least 165 days.
>
> (5) Accommodation is to be regarded as occupied by persons as students if they occupy it wholly or mainly for undertaking a course of education (otherwise than as school pupils).

App. 2.22.4 *Temporarily unsuitable*

Para 6(1) sch 1B TCGA provides:

> A building is treated for the purposes of paragraph 5 as continuing to be suitable for use as a dwelling at any time when it has become temporarily unsuitable for use as a dwelling.

App. 2.22.5 *Accidental damage*

Para 6 sch 1B TCGA provides:

> (2) There is an exception to this rule if—
> (a) the temporary unsuitability resulted from accidental damage to the building, and
> (b) the damage resulted in the building becoming unsuitable for use as a dwelling for a period of at least 90 consecutive days ('the 90 day period').
>
> (3) This exception does not apply if the damage occurred in the course of work that—
> (a) was being done for the purpose of altering the building, and
> (b) itself involved, or could be expected to involve, making the building unsuitable for use as a dwelling for at least 30 consecutive days.
>
> (4) If the exception applies, work done in the 90 day period to restore the building to suitability for use as a dwelling is not to count for the purposes of paragraph 5 as constructing or adapting the building for use as a dwelling.
>
> (5) For the purposes of this paragraph—
> (a) references to accidental damage include damage otherwise caused by events beyond the control of the person disposing of the interest in land,
> (b) references to alteration of a building include its partial demolition, and
> (c) the 90 day period does not include the day of the disposal (or later days).

This level of detail seems absurd; but there it is.

App. 2.22.6 *Work on building*

Para 6(6) sch 1B TCGA provides:

> For the purposes of this paragraph a building's unsuitability for use as a dwelling is not regarded as temporary if paragraph 7 applies (disposal of a building that has undergone works).

Para 7 sch 1B TCGA provides:

(1) If—

(a) a person disposes of an interest in land on which a building has been suitable for use as a dwelling, and

(b) as a result of qualifying works, the building has, at or before the time of completion[184] of the disposal, ceased to exist[185] or become unsuitable for use as a dwelling,

the building is to be regarded for the purposes of paragraph 5 as unsuitable for use as a dwelling throughout the works period.

(2) For the purposes of this paragraph works are 'qualifying' works if—

(a) any planning permission[186] or development consent required for the works, or for any change of use with which they are associated, has been granted (whether before or after completion), and

(b) the works have been carried out in accordance with the permission or consent.

(3) In this paragraph 'the works period' means—

(a) the period when the works were in progress, and

(b) such period (if any) ending immediately before the start of the works throughout which the building was, for reasons connected with the works, not used as dwelling.

(4) If at any time when qualifying works are in progress—

(a) the building was undergoing any other work, or put to any other

[184] Para 8(2) sch 1B TCGA provides: 'For the purposes of this Schedule the completion of the disposal of an interest in land is regarded as occurring—
(a) at the time of the disposal, or
(b) if the disposal is under a contract which is completed by a conveyance, transfer or other instrument, at the time when the instrument takes effect.'

[185] Para 8(1) Sch 1B TCGA provides: 'For the purposes of this Schedule a building is regarded as ceasing to exist from the time when either—
(a) it has been demolished completely to ground level, or
(b) it has been demolished to ground level except for a single facade (or a double facade if it is on a corner site) the retention of which is a condition or requirement of planning permission or development consent.'

[186] Para 8(3) sch 1B TCGA provides: 'In this Schedule ... 'planning permission'—
(a) in the case of land in England or Wales, has the meaning given by section 336(1) of the Town and Country Planning Act 1990,
(b) in the case of land in Scotland, has the meaning given by section 227(1) of the Town and Country Planning (Scotland) Act 1997,
(c) in the case of land in Northern Ireland, has the meaning given by Article 2(2) of the Planning (Northern Ireland) Order 1991, and
(d) in the case of land outside the UK, means permission corresponding to any planning permission in relation to land anywhere in the UK.'

use, in relation to which planning permission or development consent[187] was required but has not (at any time) been granted, or

(b) anything else was being done in contravention of a condition or requirement attached to a planning permission or development consent relating to the building,

the works period does not include that time.

(5) If sub-paragraph (1) would have applied but for the fact that, at the completion of the disposal, the works are not qualifying works, the works are regarded as not affecting the building's suitability for use as a dwelling at any time before the disposal.

App. 2.23 Trade

App. 2.23.1 *Introduction*

A full discussion on what is a trade needs a chapter to itself. But I am not sure how easy that would be to write, or how satisfying to read. 'Trade' is a varied and vague concept. The case law began in the first volume of Tax Cases,[188] and has continued ever since. No tax issue has generated more litigation, except, perhaps, the income/capital distinction, to which it is related, where case law is 'thick as autumn leaves'.[189] Almost any proposition asserted in one case may be contradicted, or appear to be contradicted, in other cases.

> The law has never succeeded in establishing precise rules which can be applied to all situations to distinguish between trading stock and capital assets.[190]

[187] Para 8(3) sch 1B TCGA provides: 'In this Schedule ... 'development consent' means—
(a) in the case of land in the UK, development consent under the Planning Act 2008, and
(b) in the case of land outside the UK, consent corresponding to development consent under that Act'.

[188] *Erichsen v Last* (1881) 1 TC 351 and 4 TC 422.

[189] *London & Thames Haven Oil Wharves Ltd v Attwooll* 43 TC 491 at p.513; the reference is to Paradise Lost.

[190] *Waylee Investment v IRC* [1990] STC 780 at p.784g. Nothing has changed since 1881; in *Erichsen v Last* 4 TC 422: "I do not think there is any principle of law which lays down what carrying on of trade is. There are a multitude of incidents which together make the carrying on a trade, but I know of no one distinguishing incident which makes a practice a carrying on of trade, and another practice not a carrying on of trade. If I may use the expression, it is a compound fact made up of

This section contains general comments. But the topic is context-sensitive, so the question of whether specific types of activity constitute a trade is best discussed separately, in the context in which it may arise:[191]

Topic	**See para**
Rent or trading income	14.7.3
Chattel hire trading	21.18.1
Trading in land	22.2
Trading royalties	32.3.1
Financial trade	72.15
Gambling	72.15.4
Cryptoassets	96.7

See *Taxation of Charities and Nonprofit Organisations*[192] for discussion of:

- Trading by charities and clubs
- Mutual trading

Hopscotch v HMRC provides a case law reading list:[193]

> 23... So far as principles that have been found, they remain best expressed in the decision of the House of Lords in *Ransom v Higgs* and the decision of the High Court in *Marson v Morton*.
> 24. That was confirmed as much by the Court of Appeal in *Degorce v HMRC* where reference was made to the earlier decisions of the Court of Appeal in *Eclipse Film Partners (No 35) LLP v HMRC* and *Samarkand Film Partnership No 3 v HMRC* as providing "an authoritative and recent re-statement of the principles which should be applied in deciding whether activities undertaken by a taxpayer constitute a trade for tax purpose.

App. 2.23.2 *Statutory definition*

The pre-rewrite definition provided that:

> "trade" includes every trade, manufacture, adventure or concern in the nature of trade.

a variety of incidents."

[191] For trading by charities, see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 8.2 (What is a trade) online version *https://www.taxationofcharities.co.uk*

[192] Kessler, Wong & Shah, (14th ed., 2024-25), online *https://www.taxationofcharities.co.uk*

[193] [2020] UKUT 294 (TCC).

The tax law rewrite recast this. Section.989 ITA/ s.1119 CTA 2010 provide:

> trade includes any venture in the nature of trade[194]

The pre-rewrite case law continues to apply.

App. 2.23.3 *Concept of trade*

Modern law on this topic starts with *Ransom v Higgs*:[195]

> ... the legal concept of 'trade'... may be called a concept of common law. Trade has for centuries been, and still is, part of the national way of life: everyone is supposed to know what 'trade' means: so Parliament, which wrote it into the law of income tax in 1799, has wisely abstained from defining it and has left it to the Courts to say what it does or does not include. Trade is infinitely varied; so we often find applied to it the cliché that its categories are not closed. Of course they are not: but this does not mean that the concept of trade is without limits, so that any activity which yields an advantage, however indirect, can be brought within the net of tax. ...

That does not take us far, but it sets the scene.

App. 2.23.4 *Fact or law*

As usual, trade involves a mixture of both. In *Ransom v Higgs*:

> Sometimes the question whether an activity is to be found to be a trade becomes a matter of degree, of frequency, of organisation, even of intention, and in such cases it is for the fact-finding body to decide on the evidence whether a line is passed. The present is not such a case: it involves the question as one of recognition whether the characteristics of trade are sufficiently present. I do not think that we need here to get enmeshed in the intricacies - I am tempted to say sophistries - of primary or secondary facts or inferences. We are clearly in the realm of principle and of law.

In *Eclipse Film Partners (No 35) LLP v HMRC*:[196]

> ... Its meaning in tax legislation is a matter of law. Whether or not a particular activity is a trade, within the meaning of the tax legislation,

[194] Section 288(1) TCGA incorporates this definition by reference: 'Trade' has the same meaning as in the Income Tax Acts.

[195] 50 TC 1 at p.88.

[196] [2015] EWCA Civ 95 at [112].

> depends on the evaluation of the activity by the tribunal of fact. These propositions can be broken down into the following components. It is a matter of law whether some particular factual characteristic is capable of being an indication of trading activity. It is a matter of law whether a particular activity is capable of constituting a trade. Whether or not the particular activity in question constitutes a trade depends upon an evaluation of all the facts relating to it against the background of the applicable legal principles. To that extent the conclusion is one of fact, or, more accurately, it is an inference of fact from the primary facts found by the fact-finding tribunal.

App. 2.23.5 *One-off transactions*

The statutory definition (that trade includes a venture in the nature of trade) is taken to mean that a one-off transaction may constitute a trade, if it is in the nature of trade; but that does not take one very far.

In *CIR v Livingston*:[197]

> I think the test, which must be used to determine whether a venture such as we are now considering is, or is not, 'in the nature of trade,' is whether the operations involved in it are of the same kind, and carried on in the same way, as those which are characteristic of ordinary trading in the line of business in which the venture was made, If they are, I do not see why the venture should not be regarded as 'in the nature of trade,' merely because it was a single venture which took only three months to complete.

App. 2.23.6 *Novel trade*

In *Ransom v Higgs*:[198]

> I attach no importance to the fact that, if there was trade, there is a difficulty in knowing what to call it. Christening normally follows some time after birth, and if Mr. Higgs's activities were found to be trading activities, a description would soon be found.

App. 2.23.7 *Trade needs customers*

In *Ransom v Higgs*:[199]

> Trade involves, normally, the exchange of goods or of services for reward - not of all services, since some qualify as a profession or employment or

[197] 11 TC 538 at p.542.

[198] 50 TC 1 at p.88.

[199] 50 TC 1 at p.88.

> vocation, but there must be something which the trade offers to provide by way of business. Trade, moreover, presupposes a customer (to this too there may be exceptions, but such is the norm), or, as it may be expressed, trade must be bilateral - you must trade with someone...

There is some vagueness here, not only because of the possibility of exceptions, but because the concept of "customers" is imprecise.[200]

App. 2.23.8 *Trade: Commerciality*

In *British Legion, Peterhead Branch, Remembrance and Welcome Home Fund v IRC*:[201]

> ... a person cannot be said to be engaged in carrying on a trade or a concern in the nature of trade within the meaning of the Income Tax Acts unless, in a reasonable sense, he is conducting business on commercial principles.

Wannell v Rothwell concluded that it had to be possible for an non-commercial activity to be a trade, because (what is now) s.66 ITA would otherwise be redundant.[202] But an argument from redundancy carries little weight,[203] the relevant cases were not cited, and the point did not arise for decision. So the issue remains open to argue, and the authorities still support the view that an non-commercial activity is not a trade.

However, it seems to me that the question whether a trade has to be commercial is not well framed unless one clarifies what is meant by the somewhat vague concept of commercial. Suppose for instance:

(1) For charitable or other reasons a person charges low prices when they could charge high prices.
(2) The activity is profitable but not as profitable as it could be.
(3) It is not the object of the person to make a profit.

No doubt that can constitute trading.[204] Is the activity commercial? It is not wholly commercial, but one might regard commerciality as a matter of degree.[205] If one regards the activity as non-commercial, then that is an

[200] See App.1.5 ("Customers" of HMRC).

[201] 35 TC 508 at p.514.

[202] 68 TC 719 at p.732; see 5.1.1 (Trade/commercial/profit compared).

[203] See App.2.1.2 (Argument from redundancy).

[204] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25) para 8.1 (Trade carried on by charity*)*.

[205] Some ambiguity is recognised in the quote set out above, which refers to commercial principles 'in a reasonable sense'.

example of a non-commercial trade.

HMRC pay due respect to the decision:

> **BIM85705 uncommercial trades – not on a commercial basis** [Jan 2019]
> ... following the High Court decision in *Wannell v Rothwell* [1996] 68 TC 719 we now accept that in very unusual cases the activities may constitute a trade even though they are uncommercial...

It is at least clear that an activity which cannot objectively make a profit, and not intended subjectively to make a profit, is not a trade or business.

As to the significance of tax avoidance in determining whether there is a trade, see *Thomson v HMRC*.[206] As *Thomson* illustrates, if a trade is needed in order for a tax avoidance scheme to succeed, and not for its own sake, it may be more difficult to prove the required element of commerciality, because the decision to trade is not itself made for commercial reasons.

App. 2.23.9 *Trade: view to profit*

In *Hoey v HMRC*:[207]

> it is not a requirement of the concept of a trade for tax purposes, unless the legislation in question expressly says so, that the relevant activities should be carried on with a view to profit. For example, a trade may be carried on as a hobby, or on a not-for-profit basis.

App. 2.23.10 *The badges of trade*

The charming term 'badges of trade' comes from the Royal Commission on the Taxation of Profits and Income,[208] which identified six badges (ie, indicia) of trade. Nowadays one would call it a multifactorial test.

Marson v Morton 59 TC 381 is the leading case and identifies 9 badges, in the context of trading in land;[209] no doubt one can devise more. The traditional badges are focussed on activities involving the sale of assets, rather than activities involving the provision of services, which are equally if not more important.

[206] [2018] UKFTT 396 (TC) at [187].

[207] [2022] EWCA Civ 656 at [192].

[208] Final Report (1955) (Cmd. 9474), para. 116.

[209] See 22.2 (What is trading in land); and see BIM20200 onwards.

App. 2.24 Reasonable-to-assume

App. 2.24.1 *Reasonable-to-assume wording*

As far as I know, the forms of words discussed here first appeared in the 2005[210] rewrite of the ToA motive defence[211]:

Old condition A (pre-2005)	New condition A (post-2005)
the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.	*it would not be reasonable to draw the conclusion, from all the circumstances of the case*, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.[212]

This wording, or equivalent, migrated from there to:
- a selection of TAARs
- the GAAR
- In DTAs, the PPT (which is just a TAAR with a more accurate name)[213]

In these provisions the issue is not whether an arrangement has a tax avoidance/advantage purpose, but is said to be whether it is *reasonable to assume* such a purpose.[214]

It is found in other provisions, primarily but not exclusively anti-avoidance, where the issue is not whether specified circumstances exist, but is said to be whether it is reasonable to assume that they do. For instance:

Topic	Text (in short)	Da te	See para
Disguised remuneration	Reasonable to suppose arrangement a means of providing remuneration[215]	2011	-

[210] The provisions enacted in FA 2006 with effect from 2005.

[211] See 52.3 (Motive defence condition A); 52.4 (Motive defence condition B).

[212] The wording is repeated in Motive Defence condition B:

Old condition B (pre-2005)	New condition B (post-2005)
the transfer and any associated operations... (b) were not designed for the purpose of avoiding liability to taxation.	*it would not be reasonable to draw the conclusion, from all the circumstances of the case*, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

[213] See 108.8 (Principal purpose test).

[214] For the GAAR, see s.207 FA 2013. For a list of TAARs with reasonable-to-assume wording, see 3.2.1 (Types of unallowable purpose).

[215] Section 554A ITEPA.

Tainted donations	Reasonable to assume donation & arrangement not entered into independently[216]	2011	-
Remittance investment relief	Reasonable to assume benefit would not be available in the absence of the investment	2012	19.11.3
Disguised interest	Reasonable to assume return is by reference to time value of money	2013	26.25.2
Mixed partnerships	Reasonable to suppose:	2014	86.6
	- A's deferred profit included in B's profit share		
	- B's profit share attributable to A's power to enjoy		
	- A's profit share lower than in absence of A's power to enjoy		
	- A would have been a partner but for s.809C	2014	86.13
	Amount as is reasonable to suppose attributable		
Salaried members code	Reasonable to expect:	2014	
	- 80% of remuneration disguised salary		
	- time when arrangements will end		
Disguised IM fees	Reasonable to assume:		
	-Absent arrangements,sum would have arisen to A	2015	73.17.2
	-Main purpose is avoidance of tax	2015	73.17.2
Hybrid entities	Reasonable to suppose a hybrid payee mismatch[217]	2016	91.17
Disqualified advice	Reasonable to conclude tax advantage is a purpose	2017	126.11.1
Onward gifts	Reasonable to expect onward gift to UK resident	2018	61.31.2
Profit fragmentation	Reasonable to conclude value transferred relates to something done by an individual	2019	53.8.1
UK land of non-resident[218]	Reasonable to conclude UK land used for trading	2019	57.8
	Reasonable to conclude trade will continue		57.8
Loss reliefs[219]	Profits reasonably expected/trade carried on with reasonable expectation of profit		App.5.4

There are variations of wording. We have reasonable to assume/ suppose/expect/conclude/draw the conclusion; but the meaning must be the same.

I refer to these forms as **"reasonable-to-assume wording"**.

App. 2.24.2 *From all the circumstances*

The ToA provision added *from all the circumstances of the case;* but that

[216] Section 809ZJ ITA; see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 7.8 (Donation-dependent arrangement), online version *https://www.taxationofcharities.co.uk*

[217] Reasonable to suppose/ expect is used in further places in the hybrid mismatch code not listed here.

[218] This is the first time I am aware that the expression "reasonable to conclude" has ventured from its usual (anti-avoidance) context; let us hope it will not happen often.

[219] Loss relief is slightly from other items in this list, in that it is considering a future prediction (future profit) not a present state of affairs (such as present intention); but it is not necessary to pursue that.

cannot add anything to the meaning. Presumably the OPC agreed, as this phrase was not used subsequently, until it resurfaced in the GAAR and in the PPT.[220]

The drafter of DOTAS Description 9 (Financial products) tried harder:

> it would be reasonable *to expect an informed observer (having studied the arrangements and having regard to all relevant circumstances)* to conclude...[221]

But again, the additional words add nothing to the meaning. Let us hope, in the interests of brevity, that this verbiage does not become standard.

App. 2.24.3 *Effect of wording*

What (if anything) does reasonable-to-assume wording mean? Is there a difference between the propositions *X is the case* and *it is reasonable to assume that X is the case?*; and if so, what is it?

Perhaps we should look first to see what HMRC said they intended to achieve when the wording was first used:

> 59. The new section 741A ICTA [New Conditions A and B] aims to ensure that all relevant factors are taken into account in deciding whether exemption is due. That is the normal way of applying any purpose test, but in relation to section 741 [Old Conditions A and B] the view is sometimes expressed by tax practitioners that the present test should be interpreted more narrowly. They contend that
> [1] it is only necessary to look at the subjective intentions of the individual, and
> [2] that no account need be taken of any other circumstances, even if they included for example the fact that a particular transaction might have been structured in such a way that it directly resulted in a significant tax reduction that was not on the face of it intended by Parliament.

There are two distinct contentions here:

(1) It is only necessary to ascertain the subjective intentions of the individual. That is correct.

[220] In the GAAR we have ("... if, having regard to all the circumstances, it would be reasonable to conclude ..."); see 3.26.2 (Tax arrangements).
In the PPT we have: "reasonable to conclude, *having regard to all relevant facts and circumstances...*"; see 108.8 (Principal purpose test). Perhaps this was not drafted by the OPC.

[221] Reg 19 Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations 2006 (inserted 2016); again, probably not drafted by the OPC.

(2) In ascertaining that attention, no account need be taken of any other circumstances, such as that the transaction resulted in the avoidance of tax. That is not correct. It cannot even be taken seriously.[222]

> 60. HMRC has consistently taken the view that such a narrow interpretation of section 741 is not a correct reading of the law. If such an interpretation is accepted, the purpose of the transfer of assets abroad legislation to prevent individuals avoiding income tax ... could not be properly achieved. The new test makes it the condition for exemption that the individual must broadly show that it would not be reasonable to conclude from all the circumstances of the case that any of the transactions had a tax avoidance purpose. The wording of the test is intended to put it beyond doubt that exemption will not be due *solely* on the basis of an assertion by individuals that tax avoidance was not their subjective intention. Evidence of individuals' subjective intention will be one factor to take into account. However, all other relevant circumstances of the particular case must also be considered, including the actual objective outcome of the transactions.[223]

I think this is making the point made at 3.9 (How to identify purpose). All relevant circumstances must be taken into account in order to identify an individual's purpose. A particularly significant fact is whether the transaction resulted in a significant tax reduction, that is, the effect of the transactions.

The INT Manual makes my point:

> **INTM602960 Avoidance purpose exemption: Purposes** [Jul 2023]
> ...Over the years there has been long debate about exactly how a test of purpose should be construed, in particular whether the test is an objective or a subjective one. ...
> HMRC take the view that the proper way to apply a purpose test is to consider all the facts in an objective manner, but that is not the same as saying the test is 'objective'. It is clearly wrong to assert that it is only necessary to look at the purpose individuals ascribe to their actions in deciding whether exemption is due; but it is equally wrong to say that only the outcome is relevant. It is essential to consider both. Thus, purpose or intention is essentially a subjective concept, but in practice the objective facts must be examined to draw an inference: see Pennycuick J in *Lloyd's Bank v Marcan* (2 All ER 359) at 367-8:
>
> The word 'intent' denotes a state of mind. A man's intention is a

[222] See 3.9 (How to identify purpose).

[223] EN Draft Clauses (2005). The point is made more briefly in EN FB 2006 para 66.

> question of fact. Actual intent may unquestionably be proved by direct evidence or may be inferred from surrounding circumstances. Intent may also be imputed on the basis that a man must be presumed to intend the natural consequences of his own act.[224]

This approach is borne out by the construction of the exemption test, referring as it does to 'all the circumstances of the case' in considering purposes including the intentions and purposes of any person who designs, effects, or provides advice in relation to the relevant transactions or any of them.

There was a helpful discussion around 'purpose' by the First-tier Tribunal in the case of *Fisher v HMRC* ([2014] UKFTT 804 (TC)) at paragraphs [241] - [289]. At [287], the court summarised that discussion in these terms:

> From the above, we summarise the following propositions in relation to the motive defence:
>
> (1) The test is subjective. (*Carvill*)
>
> (2) Evidence of a person's reactions to what is said to them and circumstances as well what they say their purpose is may be relevant. (*Philippi*)
>
> (3) It is not enough to show a tax avoidance effect.
>
> (4) Knowledge that less tax is paid does not equate to a tax avoidance purpose (but knowledge is a pre-requisite to having a purpose.)
>
> (5) Awareness of tax aspects does not equate to having a tax avoidance motive. (*Willoughby*)
>
> (6) The mere fact of taking tax advice does not mean there is a tax avoidance motive. (*Beneficiary v IRC*)
>
> (7) Picking a lower tax route over a higher tax route does not equate to tax avoidance (but equally does not preclude tax avoidance). (*Brebner / Willoughby*)

At the time that the reasonable-to-assume wording was devised, in 1995, HMRC were arguing that "purpose of a transaction", in the motive defence, was an objective concept, meaning the effect of the transaction. (Subsequently, HMRC wisely abandoned this argument, but that came later.[225]) I think what happened here is that parliamentary counsel misunderstood what this objective/subjective argument was actually about, and used the statutory wording to defeat a rather different, and completely

[224] [1973] 2 All ER 359 at p.367-8 citing *Freeman v Pope* (1870) 5 Ch App 538. I set out here the precise words of the quoted text (the drafter of the 2009 guidance changed "man" to "person").

[225] See 3.8 (A subjective test).

ridiculous, argument. It is possible that some taxpayer did try to raise just the argument to which the EN refers. If so, the correct response would have been to laugh, not to legislate.

I originally wondered whether the drafter's aim here is something different: to replace the subjective purpose test (which applies to the Old Conditions) with an objective results test. However this is inconsistent with what the EN actually said. If it were the intention to replace the subjective purpose test with an objective results test, then "evidence of individuals' subjective intention" should cease to be "one factor to take into account". It will be irrelevant. However, the EN is unclear. It is wrong to construe a muddled explanatory note in order to understand a statutory provision. We do not wish to move to the position, sometimes said to apply in the USA, that "if the legislative history is unclear, you read the words of the statute".

Turning, as we must, to the legislation itself, we find that the ToA motive defence still depends on the purpose of the transactions. It is reasonably clear that:

(1) this means the purpose of those who carried out the transactions, and
(2) purpose means subjective purpose.

What the reasonable-to-assume wording stresses (one might say, charitably, for the avoidance of doubt) is that all the circumstances of the case must be taken into account in order to ascertain the subjective purpose. It allows for the possibility of rejecting the transferor's claimed purpose in cases of deception, (including, perhaps, self-deception in exceptional cases).

The same view is taken in CTM comments on comparable wording in the winding-up TAAR[226]:

> **CTM36340: company winding up TAAR: condition D** [Sep 2018]
> The purpose test is subjective but the purpose may be inferred from objective characteristics having regard to all the circumstances surrounding the winding-up to which the test is being applied, much as Lord Brightman was able to draw an inference in a different context. In *Mallalieu v Drummond* (1983) 57 TC 330 he was able to distinguish between the motive the barrister asserted of maintaining a wardrobe of a certain type and standard, and the object or purpose of the purchase of it.

[226] See 30.14 (Winding-up TAAR).

It is significant that *Mallalieu v Drummond* managed to reach its conclusion in the absence of any reasonable-to-assume wording.

The Partnerships Manual attempts to explain reasonable-to-assume wording in the context of the mixed partnerships code:[227]

> **PM218000 - Condition X** [Jul 2019]
> Condition X applies where it is reasonable to suppose that amounts representing the individual member's deferred profit are included in the non-individual member's profit share.
> [1] Reasonable to suppose means that you take a realistic view of the facts and use a balanced common sense approach.
> [2] Reasonable to suppose does not mean that it has to be certain.
> [3] Reasonable to suppose means you should ignore an improbable or extreme outcome.

While points [1] to [3] are no doubt correct, would anyone say that the position would be different in the absence of the reasonable-to-assume wording?

In the context of the DTA principal purpose test, OECD Commentary on art 29 provides:

> 179. A person cannot avoid the application of this paragraph by merely asserting that the arrangement or transaction was not undertaken or arranged to obtain the benefits of the Convention. All of the evidence must be weighed to determine whether it is reasonable to conclude that an arrangement or transaction was undertaken or arranged for such purpose. The determination requires reasonableness, suggesting that the possibility of different interpretations of the events must be objectively considered.

This is self-evident. It echos HMRC guidance on the ToA motive defence.

App. 2.24.4 *Reasonable-to-assume: Critique*

Reasonable-to-assume wording is discussed in HMRC Unallowable Purpose Tests Draft Guidance:

> An alternative test to a "main purpose" test would be to assess whether "it is reasonable to assume that the main, or one of the main purposes is unallowable". In this way, purpose can be assessed objectively and the test can potentially penetrate purported subjective purposes which do not stand up to objective scrutiny. The potential impact of such drafting is

[227] See 86.6 (Condition X: Deferred profit).

> currently being examined. In the future, such an approach may be recommended if the outcome of internal consideration and external comment is positive.[228]

The response to the consultation was not positive, and the response document provided:

> There was widespread opposition to any use of a 'reasonable to believe' test in respect of any purpose threshold.
> The proposed framework will therefore recommend that policy owners do not use a 'reasonable to believe' test.[229]

But this recommendation has been forgotten, or rejected, in many subsequent anti-avoidance provisions.

The conclusion of the discussion is that reasonable-to-assume wording is otiose; and an uncharitable commentator would call it verbiage. It may reflect an awareness that the provision in point is imponderable, or disputable; but adding "reasonable to assume" does not help.

Perhaps it does not matter, as tax statutes often contain material which is redundant.[230] But it is good to know what we are talking about.

App. 2.24.5 *"It is shown that"*

Occasionally statutes provide rules which apply where *it is shown that* X is the case (not just that *X is the case*). Examples include:

Provision	**Topic**	**See para**
3A(1) TCGA	s.3 motive defence	64.16
48(4) IHTA	FOTRA securities exempt	75.11.2
3(3) IHTA	Omissions/transfers of value	74.5
103 FA 1986	Debts for IHT	80.12.6, 80.12.10
s.10 IHTA	Arm's length transaction	74.13

As the burden of proof is already on the taxpayer,[231] the words are clearly otiose. And as the drafter uses this form, albeit rarely and perhaps sometimes for historical reasons, it is easier to conclude that reasonable-to-assume wording is likewise redundant.

A similar wording (from the ToA motive defence) is if a person *satisfies*

[228] p.18.

HMRC that ...[232]

App. 2.25 Highest part of income

Section 1012 ITA provides:

> (1) This section makes provision about the relationship between rules requiring particular income to be treated as the highest part of a person's total income.
> (2) It has effect for the purposes of the Income Tax Acts except sections 535 to 537 of ITTOIA 2005 (gains from contracts for life insurance etc: top slicing relief).
> (3) If more than one of the provisions listed in subsection (4) applies in relation to a person, a provision mentioned earlier in the list has priority over a provision mentioned later in the list.
> (4) The provisions are–[233]

Section	**Topic**	**See para**
s.465A ITTOIA	Chargeable events	-
s.685A(5A) ITTOIA	Settlor-interested trusts	47.10.2
s.404A ITEPA	Termination of employment	-
s.16 ITA	Savings/Dividend Income	43.4.3

Section 1012(5) ITA provides:

The provisions listed in subsection (4) have priority over–[234]

Section	**Topic**	**See para**
s.619A(2) ITTOIA	Settlor-interested trusts	47.11.4
s.768(6)(7) ITA[235]	Pre-2016 transactions in land	22.5
786(6)(7) ITA	Sale of Occupation Income	-

any other provisions of the Income Tax Acts requiring income of any description to be treated as the highest part of a person's total income.

Section 1012(6) ITA provides:

> The effect of one provision having priority over another is that the second provision has effect subject to the first.

See too 64.20.1 (Amount of distribution tax: s.3 TCGA distribution relief.

[232] See 52.34.1 ("Satisfies an officer").

[233] For the sake of clarity, I set this out in table format with my own topic descriptions.

[234] For the sake of clarity, I set this out in table format with my own topic descriptions.

[235] This provision was deleted when rewriting the TiL provisions, now in Part 9A ITA; the need to delete the reference here was overlooked.

App. 3.1 Family terms: Introduction

This chapter considers the meaning of terminology relating to the family (spouse, civil partner, etc).

These terms are used frequently in tax and non-tax legislation, and their meaning is a matter of general (non-tax) law; though of course meaning is always subject to context.

App. 3.2 "Spouse"

App. 3.2.1 *Spouse: General meaning*

The IHT Manual provides:

> **IHTM11032. Definition of spouse and civil partner** [Jan 2020]
> The IHT legislation does not define 'spouse' or 'civil partner' so the

> definitions come from general law...
>
> Spouses include
>
> - people who are legally married but separated
> - parties to a valid polygamous marriage. The marriage confers the IHTA84/S18 exemption on all transfers to all the spouses of the transferor or deceased who qualify under IHTA84/S18. Where the IHTA84/S18 (2) limit applies because of foreign domicile of those spouses (IHTM11033), the total exemption (including any similar lifetime exemptions) may not exceed the IHTA84/S18 (2) limit of £55,000 when the date of transfer was before 6 April 2013, and the applicable nil-rate band when the date of transfer was on or after this date.
>
> The following are not spouses
>
> - people who are living together but not lawfully married, however long the relationship may have lasted (in England, Wales and Northern Ireland)
> - In Scotland the one form of irregular marriage that has been recognised by Scots law is that by cohabitation with habit and repute. This arises where a man and woman cohabit together as husband and wife and behave towards each other as such for a considerable length of time, so it is generally believed by the society and neighbourhood in which they live, and among their friends and relatives that they are married. They are then presumed to be married, although it is impossible to state precisely the place and a time when they exchanged the consent which is essential for marriage. Marriage by cohabitation with habit and repute was abolished by The Family Law (Scotland) Act 2006. It will remain an issue for the Courts for some time to come, however, since claims can still be admitted if based on a period of cohabitation that occurred before the commencement of the Act. If it is claimed that this common law style of marriage entitles the parties to the exemption under IHTA84/S18 (1) in either a death or lifetime situation you should refer the file to Technical.
> - parties to a bigamous marriage
> - people who were formerly lawfully married but divorced before the date of death/transfer

Likewise the CG Manual provides:

> **CG22070 Transfer Of Assets Between Husband And Wife: Definitions** [Jul 2019]
>
> ... A polygamous marriage may be recognised as valid in UK law if it was valid in the country in which the ceremony occurred and, broadly, it was contracted by persons domiciled in that country. In these

circumstances the spouses will be connected with each other under s.286(2). A transfer between spouses living together will be within s.58 TCGA and so will be at no gain/no loss.

The courts have decided that discrimination between married and unmarried couples is human-rights compliant, though only just.[1]

The first *Vestey* case[2] decided that "spouse" in the settlor-interested trust code did not include a widow; and it is considered that this is the general meaning of the word.

App. 3.2.2 *Same-sex marriage*

The Marriage (Same Sex Couples) Act 2013 ("**M(SSC)A**") provides separate rules for:

(1) existing legislation[3] and
(2) new legislation[4]

I refer to "**pre- and post- 2013 legislation**".

For pre-2013 legislation, para 1 sch 3 M(SSC)A provides:

> (1) In existing England and Wales legislation—
> (a) a reference to marriage is to be read as including a reference to marriage of a same sex couple;
> (b) a reference to a married couple is to be read as including a reference to a married same sex couple; and
> (c) a reference to a person who is married is to be read as including

[1] *Holland v IRC* [2003] STC (SCD) 43; *Burden v UK* [2007] STC 252; *Smith v Lancashire Teaching Hospitals NHS Trust* [2016] EWHC 2208 (QB).

[2] *Vestey v IRC* 31 TC 1.

[3] Section 11(7) M(SSC)A provides a definition: "In schedules 3 and 4 "existing England and Wales legislation" means—
(a) in the case of England and Wales legislation that is primary legislation, legislation passed before the end of the Session in which this Act is passed (excluding this Act) [17 July 2013] or
(b) in the case of England and Wales legislation that is subordinate legislation, legislation made on or before the day on which this Act is passed (excluding legislation made under this Act)" [17 July 2013] .

[4] Section 11(7) M(SSC)A provides a definition: "In schedules 3 and 4 ...
"new England and Wales legislation" means—
(a) in the case of England and Wales legislation that is primary legislation, legislation passed after the end of the Session in which this Act is passed, or
(b) in the case of England and Wales legislation that is subordinate legislation, legislation made after the day on which this Act is passed."

> a reference to a person who is married to a person of the same sex.
>
> (2) Where sub-paragraph (1) requires a reference to be read in a particular way, any related reference (such as a reference to a marriage that has ended, or a reference to a person whose marriage has ended) is to be read accordingly.
>
> (3) For the purposes of sub-paragraphs (1) and (2) it does not matter how a reference is expressed.

For post-2013 legislation, para 5(1) sch 3 M(SSC)A provides:

> (1) This paragraph applies to provision made by—
>
> (a) this Act and any subordinate legislation made under it, or
>
> (b) new England and Wales legislation,
>
> including any such provision which amends existing England and Wales legislation.

Three sets of definitions follow. The first concerns the ubiquitous terms husband/wife/widow/widower:

> (2) The following expressions have the meanings given—
>
> (a) "husband" includes a man who is married to another man;
>
> (b) "wife" includes a woman who is married to another woman;
>
> (c) "widower" includes a man whose marriage to another man ended with the other man's death;
>
> (d) "widow" includes a woman whose marriage to another woman ended with the other woman's death;
>
> and related expressions are to be construed accordingly.

The other definitions concern expressions found only after the M(SSC)A:

> (3) A reference to marriage of same sex couples is a reference to—
>
> (a) marriage between two men, and
>
> (b) marriage between two women.
>
> (4) A reference to a marriage of a same sex couple is a reference to—
>
> (a) a marriage between two men, or
>
> (b) a marriage between two women.

I do not know why a distinction is drawn between pre- and post-2013 legislation. The Act's explanatory notes discuss the provisions without answering this question.[5] For instance, the definition of "relevant person"

[5] 103. Part 1 sets out details of how particular terms used in existing legislation in England and Wales are to be read once marriage of same couples becomes possible.

The particular terms mentioned in paragraph 1 are references to a marriage, a married couple or married person in existing legislation in England and Wales; these are to be read as also referring to a marriage of a same sex couple, married same sex couples or to a person married to someone of the same sex.

104. Under paragraph 1(2), such references are also to be read across to, for example, cases where a marriage has ended. A reference to a person as a widow would be read as including a reference to a woman whose marriage to another woman ended with the other woman's death, for example.

105. Paragraph 1(3) ensures that existing England and Wales legislation will be interpreted in accordance with paragraphs 1(1) and (2) no matter what language it uses in making reference to any of the relevant concepts.

106. Paragraph 2 particularly deals with references to couples living together as if married; these are to be read as also referring to a person who is living with someone of the same sex as if they are married.

107. Paragraph 3 deals with legislation where there is existing provision which deals differently with a man and a woman living together as if married, and a same sex couple living together as if civil partners. The effect of this paragraph is to preserve the current effect for same sex couples despite the introduction of marriage of same sex couples. In other words, the current distinction is maintained by which an unmarried opposite sex couple are treated as if married, while an unmarried same sex couple not in a civil partnership are treated as if in a civil partnership.

108. Paragraph 4 ensures that the terms specified in Part 1 of Schedule 3 are not the only terms whose meaning will change once marriage of same sex couples becomes possible.

Examples

- Section 105(1) of the Children Act 1989, as amended, defines the meaning of "child of the family" for the purposes of that Act:

> *""child of the family", in relation to parties to a marriage, or to two people who are civil partners of each other, means –*
> *(a) a child of both of them, and*
> *(b) any other child ... who has been treated by both of them as a child of their family;".*

The effect of paragraph 1(1)(a) of Schedule 3 means that the reference to "parties to a marriage" is to be interpreted now as including a reference to a marriage of a same sex couple.

- Section 144(4) of the Adoption and Children Act 2002 defines the meaning of "a couple" for the purposes of that Act:

> *"In this Act, a couple means –*
> *(a) a married couple, or*
> *(aa) two people who are civil partners of each other, or*
> *(b) two people (whether of different sexes or the same sex) living as partners in an enduring family relationship.".*

Paragraph 1(1)(b) allows for the reference here to a married couple now to include a married same sex couple.

- Section 2(1) of the Offices, Shops and Railway Premises Act 1963 as amended in the ITA remittance basis includes "the individual's husband or wife."[6] In new legislation that wording would include parties to a same-sex marriage. By normal rules of construction, that should not apply to pre-2013 legislation! That would be a strange result. It is suggested that the courts should apply a commonsense approach, that (where the context requires, as it normally will) references in pre-2013 legislation to husbands and wives should include same sex spouses, even though that essentially requires one to ignore the words of schedule 3. This is consistent with s.11 M(SSC)A:

> (1) In the law of England and Wales, marriage has the same effect in relation to same sex couples as it has in relation to opposite sex couples.
> (2) The law of England and Wales (including all England and Wales legislation whenever passed or made) has effect in accordance with subsection (1).

In Scotland the position is governed by the Marriage and Civil Partnership

states that: "This Act shall not apply to any premises to which it would, apart from this subsection, apply, if none of the persons employed to work in the premises is other than the husband, wife, civil partner ......of the person by whom they are so employed." The terms "husband" and "wife" here refer to a person who is married for the purposes of paragraph 1(1)(c) of Schedule 3. This means that "husband" here will be read as including a man or a woman in a marriage of a same sex couple, as well as a man married to a woman. In a similar way, "wife" will be read as including a woman married to another woman or a man married to a man. The result is that this section is to be read as including both male and female spouses in marriages of same sex couples.
Part 2 – New England and Wales legislation
109. Part 2 governs how new legislation made after the passing of this Act is to be interpreted. It sets out the meanings of specific words relating to marriage (such as "husband" and "wife"). It reflects the main principle of the Act, which is to put marriage of same sex couples on an equal footing with marriage of opposite sex couples. This will ensure that gender-specific terms such as "husband" keep their gender-specific effect.
110. It should be noted that in Part 7 of Schedule 4, paragraph 27 provides a power for the Secretary of State to modify or disapply the provisions of Schedule 3 in specified circumstances.
Example
- The term "husband" will in future legislation include a man who is married to another man (but not a woman married to another woman); and "wife" will include a woman who is married to another woman (but not a man married to another man) unless specific alternative provision is made.

[6] See 18.4 (Relevant person: Family).

(Scotland) Act 2014. In Northern Ireland the position is governed by section 8 of the Northern Ireland (Executive Formation etc.) Act 2019, which refers to "Same sex marriage and opposite sex civil partnership".

App. 3.2.3 *"Spouse" in special contexts*

For the definition of "spouse" in particular contexts, see:

Context	**See**
Settlor-interested trust code	47.6.3
USA IHT DTA	119.12.2

App. 3.2.4 *"Spouse" in general speech*

UK legislation distinguishes between a civil partner and a spouse in its terminology and, strictly, the word "spouse" does not (in the absence of special context) include a civil partner. However for (almost[7]) all legal purposes the two are in the same position. In loose language they are elided because it is tiresome to constantly refer to spouse/civil partner.

So in this book "spouse" is generally used to mean either a spouse or a civil partner. The Law Commission has done the same.[8]

In the 2018/19 edition of this work I said:

> I expect this is standard usage outside the formal context of statutes and legal documentation such as trusts and wills.

Popular usage might change following the introduction of mixed-sex civil partnerships in 2019. Those who choose civil partnership rather than marriage presumably do so specifically because they do not like the institution or vocabulary of marriage/husband/wife/spouse, and its perceived connotations. Conversely, some will champion marriage over civil partnership.[9] The legislation does not determine the social meaning of civil partnerships, except, perhaps, the prohibition of religious

[7] Under foreign law, a civil partner may not be regarded as married, even though a same sex marriage may be recognised: see 119.12.2 ("Spouse" in US/UK IHT DTA).

[8] Law Commission, *Intestacy & Family Provision Claims on Death* (2011), para 1.38: "The legal treatment of husbands, wives and civil partners is identical in the law of intestacy and family provision claims, and for brevity we use the term "spouse" in this Report to refer to all three..."

[9] For instance, "Civil Partnerships – for same sex and opposite sex couples. A pastoral statement from the House of Bishops of the Church of England" (2019) *https://www.churchofengland.org/sites/default/files/2020-01/Civil%20Partnerships%20-%20Pastoral%20Guidance%202019%20%282%29.pdf*

ceremony. But I expect "spouse" will continue to be used to include civil partners, at least as long as there is no convenient word which refers to both.

App. 3.3 "Civil partner"

Schedule 1 Interpretation Act 1978 provides:

> "Civil partnership" means a civil partnership which exists under or by virtue of the Civil Partnership Act 2004 (and any reference to a civil partner is to be read accordingly).

This takes us to s.1(1) Civil Partnership Act 2004 which provides:

> A civil partnership is a relationship between two people ("civil partners")—
> (a) which is formed when they register as civil partners of each other—
> (i) in England or Wales (under Part 2),
> (ii) in Scotland (under Part 3),
> (iii) in Northern Ireland (under Part 4), or
> (iv) outside the UK under an Order in Council made under Chapter 1 of Part 5 (registration at British consulates etc. or by armed forces personnel), or
> (b) which they are treated under Chapter 2 of Part 5 as having formed (at the time determined under that Chapter) by virtue of having registered an overseas relationship. ...

Thus there are two types of civil partnership:
(1) those made under UK law, and
(2) overseas relationships.

App. 3.3.1 *Foreign civil partnership*

Section 212(1) CPA 2004 provides:

> For the purposes of this Act an overseas relationship is a relationship which—
> (a) is either
> [i] a specified relationship or
> [ii] a relationship which meets the general conditions, and
> (b) is registered (whether before or after the passing of this Act) with a responsible authority in a country or territory outside the UK ...

Thus there are two types of overseas relationships:
(1) specified ones, and

(2) those not specified which meet the general conditions.

Section 213 and schedule 20 CPA 2004 defines "specified relationships". It was amended in 2019 to include same sex relationships.

Section 214 CPA 2004 explains the "general conditions":

> The general conditions are that, under the relevant law—
> (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
> (b) the relationship is of indeterminate duration, and
> (c) the effect of entering into it is that the parties are—
> (i) treated as a couple either generally or for specified purposes, or
> (ii) treated as married.

Section 214 CPA 2004 in Scotland is slightly different:

> The general conditions are that, under the relevant law—
> (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
> (b) the relationship is of indeterminate duration, and
> (ba) **the relationship is not one of marriage,**
> (c) the effect of entering into it is that the parties are—
> (i) treated as a couple either generally or for specified purposes, **but are not treated as married**.

App. 3.3.2 *Pre-2000 foreign civil partnership*

Section 215 CPA 2004 provides:

> (1) Two people are to be treated as having formed a civil partnership as a result of having registered an overseas relationship if, under the relevant law, they—
> (a) had capacity to enter into the relationship, and
> (b) met all requirements necessary to ensure the formal validity of the relationship.
>
> (2) Subject to subsection (3) and (5B),[10] the time when they are to be

[10] Subsection (5B) regarding the commencement date is numbered as (5F) in Northern Ireland; in Scotland, the Civil Partnership (Scotland) Bill (introduced 2019) will insert a subsection (3A) pertaining mainly to subordinate legislation to be made by Scottish Ministers.

> treated as having formed the civil partnership is the time when the overseas relationship is registered (under the relevant law) as having been entered into.
> (3) If the overseas relationship is registered (under the relevant law) as having been entered into before this section comes into force, the time when they are to be treated as having formed a civil partnership is the time when this section comes into force.

Persons with existing overseas relationships became civil partners in England law without doing anything more.

The IHT Manual provides:

> **IHTM11032 definition of spouse and civil partner** [Jan 2020]
> Civil partners are same-sex couples who have entered into a contractual partnership formally recognised by law under the Civil Partnership Act 2004, which came into effect on 5 December 2005. In addition to civil partnerships formed in the UK, the Act recognises some overseas relationships, in particular the specified relationships listed in its own Schedule 20. It should be remembered that under Section 216 of the Civil Partnership Act 2004 it is essential that both the partners were of the same sex when the partnership was formed. A relationship such as the French pacte civil de solidarité is open to partners of opposite sexes as well as partners of the same sex – in practice it has come to be seen by opposite-sex couples as an optional prelude to marriage – but the exemption available for transfers between civil partners is available only where the overseas civil partnership is formed by a same-sex couple. The same applies to the exemption for gifts on the registration of a civil partnership (IHTM14191).
> The term 'civil partners' will not apply to those individuals whose civil partnership had been dissolved by a court order before the date of death/transfer.

App. 3.3.3 *The future*

Civil partnership formations declined sharply following the introduction of same-sex marriage in 2014 in England[11] and Scotland[12], at which point it seemed that the institution might fade away for lack of use. But following the extension of civil partnership to opposite-sex couples in

[11] Marriage (Same Sex Couples) Act 2013
https://www.legislation.gov.uk/ukpga/2013/30/contents/enacted/data.htm

[12] Marriage and Civil Partnership (Scotland) Act 2014
https://www.legislation.gov.uk/asp/2014/5/contents/enacted

England in 2019[13] and in Scotland in 2020, it has become more popular.[14] In Northern Ireland, civil partnerships for opposite-sex couples both became available in 2020.[15]

7,566 opposite-sex civil partnerships were formed in England and Wales in 2020, of which 7,208 were registered in England and 358 were registered in Wales. By contrast, 785 civil partnerships were formed in England and Wales in the same year, of which 745 were in England and 40 were in Wales; this represents the lowest number recorded for England since the introduction of same-sex civil partnerships in 2005.[16]

App. 3.4 Living together as husband/wife

App. 3.4.1 *Cohabitee treated as spouse*

As noted above, the term "spouse" does not include those living together but not married. Contemporary anti-avoidance provisions referring to spouses generally extend the provision to apply to cohabitees, ie a cohabitee is treated in the same way as a spouse.

For instance, s.809M(3) ITA provides:

> For that purpose—
> (a) a man and woman living together as husband and wife are treated as if they were husband and wife;
> (b) two people of the same sex[17] living together as if they were civil partners of each other are treated as if they were civil partners of each other.

This provision treats cohabitees as married persons and so relevant persons. In 2008 this was a relatively new development in tax; but it has become standard, reflecting contemporary social practice and attitudes to cohabitation.

[13] Civil Partnerships, Marriages and Deaths (Registration etc.) Act 2019 *https://www.legislation.gov.uk/ukpga/2019/12/contents/enacted*

[14] Civil Partnership (Scotland) Act 2020 *https://www.legislation.gov.uk/asp/2020/15/enacted*

[15] Northern Ireland (Executive Formation etc) Act 2019 *https://www.legislation.gov.uk/ukpga/2019/22/contents/enacted*

[16] Office for National Statistics: Civil Partnerships in England and Wales 2020 *https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/marriagecohabitationandcivilpartnerships/bulletins/civilpartnershipsinenglandandwales/2020*

[17] The words "of the same sex" are not appropriate following the introduction of mixed sex civil partnerships, but no doubt we shall muddle through.

At first sight the reference to civil partners seems otiose after 2013, now that we have same-sex marriages; but it is appropriate for cohabitees in jurisdictions where civil partnership is recognised but same-sex marriage is not (which included Northern Ireland in the period 2015 - 2020).

App. 3.4.2 *Rules excluding separated spouse*

Conversely, statute occasionally provides rules which only apply to spouses who are living together. Examples are:

(1) CGT spouse exemption

(2) Only one residence of spouses living together can qualify for private residence relief

The definition of relevant relationship in the SRT illustrates both rules: it excludes spouses who are separated, but includes cohabitees. The expression "living together"[18] is therefore important for tax, both for married and unmarried couples.

App. 3.4.3 *Living together: Married couple*

For married couples, s.1011 ITA provides:

> Individuals who are married to, or are civil partners of, each other are treated for the purposes of the Income Tax Acts as living together unless—
>
> (a) they are separated under an order of a court of competent jurisdiction,
>
> (b) they are separated by deed of separation, or
>
> (c) they are in fact separated in circumstances in which the separation is likely to be permanent.

Section 288(3) TCGA incorporates this definition for CGT.

Section 1116 CTA 2010 repeats the definition verbatim for the purpose of Part 23 CTA 2010 (company distributions). Perhaps the expression is not found elsewhere in the CT legislation. Elsewhere the definition is incorporated by reference.

For the position where one spouse is non-resident, see 93.13 (Non-resident spouse).

App. 3.4.4 *Living together: unmarried couple*

The Law Commission consultation paper "Intestacy and Family

[18] See App 3.4.3 (Living together: married couple).

Provision" (2009) is a convenient starting point:

> 2.70 The requirement that the applicant should have been living "as" the spouse or civil partner of the deceased has been the subject of analysis by the courts. In *Re Watson*, it was said that the test is:
>
> > whether, in the opinion of a reasonable person with normal perceptions, it could be said that the two people in question were living together as husband and wife; but, when considering that question, one should not ignore the multifarious nature of marital relationships.[19]
>
> 2.71 Accordingly, it was not determinative in that case that Mr Watson and Miss Griffiths had not continued a sexual relationship during the period when they were living together, nor that they had informally agreed to share outgoings, nor that Miss Griffiths had rejected Mr Watson's marriage proposal. On the whole of the evidence the judge reached the conclusion that Miss Griffiths had been living "as the wife" of Mr Watson.
>
> 2.72 The couple must have been living in the same household, which means that it does not matter if the parties each have a separate home, provided that they have formed one joint household. It has been said that this seems:
>
> > To have elements of permanence, to involve a consideration of the frequency and intimacy of contact, to contain an element of mutual support, to require some consideration of the degree of voluntary restraint upon personal freedom which each party undertakes, and to involve an element of community of resources.[20]

The Claimant Compliance Manual provides:

> **CCM15040 Couples who are Unmarried and Not Civil Partners** [Oct 2017] ... The legislation does not say what conditions must exist before we will conclude that a couple are LTAHAW [living together as husband and wife].[21]

[19] Footnote original: [1999] 1 FLR 878, 883, by Lord Neuberger of Abbotsbury.

[20] Footnote original: *Churchill v Roach* [2002] EWHC 3230. See also *Kotke v Saffarini* [2005] EWCA Civ 221, [2005] 2 FLR 517, a case on similar wording in section 1(3)(b) of the Fatal Accidents Act 1976, where the CoA held at [59] that it was correct to distinguish between "wanting and intending to live in the same household, planning to do so, and actually doing so".

[21] The latest figures published by the Office of National Statistics (in January 2015) estimate that the number of married couple families in the UK increased by 266,000 between 2004 and 2014, to 12.5 million and that there were nearly 3 million opposite sex cohabiting couple families and 84,000 same sex cohabiting couple families in 2014. See *http://www.ons.gov.uk/ons/dcp171778_393133.pdf*

We have therefore adopted the approach used by the DWP. Using the same approach for same-sex couples means they are not treated any more or less favourably.

Since 1977 the Department for Work and Pensions (DWP - formerly the Benefits Agency) has followed a standard approach to the question of whether a man and woman are living together based on a list of criteria to be considered both individually and as a whole. Working Families' Tax Credit (WFTC) adopted the same criteria and this has continued for WTC and CTC. This approach ensures unmarried couples are not treated any more or less favourably than married couples.

Living together as husband and wife (LTAHAW) has its normal meaning in every day language, but the Courts and administrative practice have developed a number of criteria to help apply that meaning to every day situations. They are:-

- living in the same household - CCM15070-CCM15075
- stability of relationship - CCM15080
- financial support - CCM15090
- dependent children - CCM15100
- public acknowledgement - CCM15110

Remember that these are only indicators to help you form a sustainable view of whether a couple are living together for the purposes of the tax credit claim. They are not intended as a crude checklist and you should not apply a blanket "four out of five ticked" type test. The weight and worth of each indicator will vary from relationship to relationship and you should arrive at your conclusions on the balance of evidence, based on the facts (see CCM15060). However, you need to be aware of the changing nature of relationships - see CCM15045.

CCM15045 Modern-Day Relationships [August 2016]

Since the LTAHAW criteria was devised in the 1970's, the UK has undergone major social and economic changes. These have had an impact on the nature of personal relationships.

In the 1970's a typical couple might not have lived together before marriage and, after marrying, they might have pooled the whole of their income with the man as the main breadwinner and the woman possibly working part-time and responsible for childcare and running the household.

By 2004, 70% of first domestic partnerships involved unmarried couples and it is now common for each party in a couple to work full-time, keep their own incomes and bank accounts and perhaps only pay money into a joint account for items of joint responsibility. Often because of demands on time both parties share childcare and domestic tasks.

It may therefore be more difficult to identify the criteria shown at CCM15040 but you should still explore all of these items.

CCM15060 Balance of Evidence [August 2016]

It is not possible to lay down hard and fast rules about the weight and worth of the various criteria in establishing that a couple are living together. You will need to decide every case on its merits and on the balance of evidence. Sometimes the conclusion will be obvious, and at other times it will be a very fine judgement. Although you must consider each of the five criteria listed at

CCM15040 you might not be able to gather evidence for each of them. For example the customer might say they have no idea what others think of their relationship.

If you are having difficulties in making up your mind about what the evidence means, you may find it helpful to list the evidence on both sides of the argument. This should help you identify where the balance of evidence lies – though you should not base your decision on a crude numerical assessment, as some elements of the evidence may be far more critical than others.

...

App. 3.4.5 *Living in the household*

The Claimant Compliance Manual provides:

CCM15070 Living in the Same Household [Oct 2017]

The customer may admit they live in the same household as the suspected partner but that does not automatically mean they are Living Together as Husband and Wife (LTAHAW), Living Together as Civil Partners (LTACP) or Living Together as a Same Sex Couple (LTAASSC).

There may be any number of reasons why a man and woman share accommodation. They include:

- a couple with disabilities or ill health may care for and support each other
- one of them may require care/support to live a normal life
- the customer may provide accommodation for a friend, or relative or tenant
- the customer may have been provided with accommodation by a friend, relative or landlord in that person's own home.
- a formerly married or unmarried couple may still live in the same house until they reach a financial agreement. During periods when property prices or rents are high, the property market is sluggish, or negative equity is common, former couples may be compelled by economic necessity to share the same premises for some time after the relationship has ended- see CCM15395

The relevant factors to consider when determining whether a couple are living in the same household may be:-

- how/why the couple came together
- is rent received or paid? If so the income will (unless it is exempt under the rent a room scheme) be treated as income in the hands of the recipient.
- what kind of accommodation they share
- if there is no formal rent agreement how are costs shared? How would exceptional expenditure be met? For example, if major unexpected repairs had to be carried out or home improvements made.
- any absences from the household - why and how often - see CCM15073
- any other reasons for them living in the same household.

Even if you establish a couple are living in the same house this does not necessarily mean they are LTAHAW, LTACP or LTAASSC. Before you can amend the award you must therefore consider the other criteria detailed at CCM15080-CCM15110.

CCM15073 Absences From The Home [Oct 2017]

Absences from the home, whether occasional or regular, do not necessarily mean that a couple is not LTAHAW, LTACP or LTASSC. For instance, the absence could be due to:-

- work (eg. oil rig worker or long distance lorry driver)
- hospital in-patient
- holiday
- visit to relatives
- higher education
- custody of less than 52 weeks
- armed forces

This list is not exhaustive, but gives some suggestions to the types of absence. The common feature of all of these reasons for absence is their temporary nature. There is no specific period of time after which an absence ceases to be temporary and you will need to draw conclusions based on the particular facts of each case. Factors to be considered include:

- the length of the absence
- how much longer it is expected to last
- to what extent the couple have maintained contact
- their future intentions

One situation you might encounter is where the partner works away for a few days at a time and either lives with friends or in hotels/bed and breakfast accommodation. They only return to the customer's home for a couple of days at a time, the suggestion is this is purely to see the children and they stay at the customer's home as they have nowhere else to stay in the area. As well as exploring the other criteria described in CCM15080-CCM15110 you will need to establish

- the reason why they have this arrangement
- how long has the arrangement lasted
- how much longer is it likely to last?
- what would happen if the partner lost their job?

CCM15075 Undisclosed Partner has No Other Address [Oct 2017]

A customer may accept that the suspected partner uses their address for mailing purposes. This could be for:

- tax and benefit purposes
- financial purposes (bank account, credit card, loan)
- for motor vehicle purposes (insurance, vehicle registration)

The customer might suggest this is because the suspected partner has no fixed abode and simply drifts around a series of friends or because their mail is not secure at their own home.

You are entitled to ask for evidence of the suspected partner's other accommodation address and often an appeal tribunal will ask for this sort of information. However, you cannot demand that they provide such information nor can you say that if they do not provide evidence of an alternative address you will treat them as LTAHAW or LTACP and terminate their award.

The absence of such evidence is not conclusive proof that the customer is living with the suspected partner. Where the customer cannot provide such evidence you must still look at all of the other criteria and decide their various strengths and weaknesses. In addition, you should consider whether it is reasonable for the suspected partner to be using the customer's address.

App. 3.4.6 *Stability of relationship*

The Claimant Compliance Manual provides:

> **CCM15080.Stability of Relationship** [Oct 2017]
> The length of time a couple have been together does not necessarily indicate how stable the relationship is. At one end of the scale you may come across couples who have known each other only a few weeks or days, but who have moved in together with the firm intention of staying together.[22] At the other end of the scale may be couples who have divorced after say 25 years of marriage and who are still both occupying the formal marital home until they can afford to live apart. Some couples may also have a history of repeated temporary splits and reconciliations.
> Relevant factors may be:–
>
> - on what basis they split household chores and responsibilities, such as cooking, cleaning and paying bills
> - whether they are both involved in caring for any children who live in the household
> - whether they tend to spend their leisure time together or separately
> - whether they normally take joint holidays
> - whether they plan any future activities or responsibilities jointly or separately
> - whether they intend to get engaged or married
> - whether the relationship has a volatile history ie. the couple is known to have had several splits and reconciliations.
>
> An established pattern of domestic or financial activity will usually indicate an established relationship.
> **CCM15090 Financial Support** [Oct 2017]
> How a couple organise their finances will vary from couple to couple. Relevant factors may be:
>
> - the existence of joint accounts or investments. If the customer claims that the joint account is being maintained because one of them is credit blacklisted, does the pattern of transactions suggest that the other person is withdrawing his/her wages for their own use? Or are there indications that the wages are available to meet general household expenditure?
> - the extent to which money and other financial resources are pooled.
> - who pays the household expenses?
> - whether the suspected partner makes regular payments to the customer, and if so, what they are for.
> - whether the suspected partner would provide financial support if the customer's income ceased.

[22] The RDR Manual makes the same point:

> **RDRM33030. Relevant person - definition** [Jan 2019]
> ... There is a no minimum period for cohabitation; it is a question of fact as to whether two individuals are living together as spouses or civil partners.

- whether the customer would support the suspected partner if their income ceased.
- whether a set amount of maintenance to be paid by the absent parent following a decision by the CSA or a binding agreement between the parties.

At any meeting you should attempt to establish the customer's incomings and outgoings so that you can see whether they could exist on their own income. If you have already seen bank statements and household bills you should be ready to challenge suspect items. For example deposits into the bank account, direct debits, patterns of withdrawal or any expenses for which you would have expected to see bills but none have been produced.

App. 3.4.7 *Dependent children*

The Claimant Compliance Manual provides:

CCM15100 Dependent Children [Oct 2017]
Joint responsibility for a child or children (who may belong to either or both of the couple) may be an indication that the couple is LTAHAW or LTACP, but it is not conclusive proof. Relevant factors may be:

- parentage of the child or children.
- whether, and how, the couple exercises joint responsibility, for example:
  - who visits the school or delivers/collects to and from the school
  - who would the school contact in an emergency
  - who arranges and takes the children to and from medical and dental appointments
  - who exercises control of or offers guidance to the children
  - who the Child Benefit Office has as the alternative payee
  - who provides financial support/pocket money/pays for treats
  - who buys the clothes and or toys.

An intention to adopt by the non-birth partner could be a particularly telling indication of the couple's long term view of the family unit. You should not, because of its sensitivity, seek out the information; but if it is spontaneously offered you should give it proper weight in arriving at your conclusions. Be wary of drawing conclusions about the current relationship based on say the fact that the children continue to be known by the surname of the ex-husband or ex-partner as this is common practice and is not evidence of a continuing relationship between the parents. Nor does the presence of photographs of the child's father or mother indicate the customer is living with that person.

App. 3.4.8 *Public acknowledgement*

The Claimant Compliance Manual provides:

CCM15110 Public Acknowledgement [Oct 2017]
An important consideration is how the outside world (including family, friends, neighbours, social workers, employers, schools, childcare providers, etc.), perceive the couple. Relevant factors may be:

- Whether both members use the same surname

- Whether schools/child care providers/employers/others regard them as a couple
- Whether they engage in social activities together
- Whether they are joint members of clubs/leisure centres/societies
- Whether they plan and organise their lives jointly.

CCM5500 lists the third parties you can legally approach for information during the course of your examination. You cannot obtain information from family members, friends, neighbours, social workers or schools, unless they also fall into one of the categories listed at CCM5500.

For example – A family member may also be an employer, or a neighbour may also provide registered child care. But it is perfectly acceptable for you to ask the customer what their family/neighbours etc. would say if they were asked whether they regarded him/her as being a member of a couple.

App. 3.4.9 *Sexual relationship*

The Claimant Compliance Manual provides:

CCM15120 Sexual Relationship [Jan 2021]

DWP used to consider the couple's sexual relationship as one of the criteria for determining LTAHAW but this is no longer the case. The couple's sexual relationship is of little help in deciding whether they are living together as husband and wife or living together as civil partners. There may be no sexual relations in a marriage or civil partnership and sexual relationships of a casual nature, where neither partner has any lasting commitment to the other, are a common feature of contemporary life.

You must not ask any questions about a couple's sexual relationship. If the customer introduces the subject, you should take note of any information volunteered but should bear in mind (and explain to the customer) that it is unlikely to have any relevance to the question of whether they are living together as husband and wife.

Appeal tribunals sometimes ask customers about their sexual relationships, however, it remains our policy that you must not ask such questions. If a tribunal asks you why you have not established the position you should say that our internal policy, in common with that in DWP, is not to ask about this side of the relationship.

In one particular appeal case the Social Security Commissioner said that where there has never been a sexual relationship between the parties, strong alternative grounds are needed to reach the conclusion that the relationship is akin to husband and wife. However, absence of a sexual relationship at anytime where there has been one in the past is not itself indicative that the couple are not LTAHAW.

Where the customer's sole objection to your conclusion is that they have no sexual relationship with the suspected partner or they appeal against a decision on these grounds you should seek further advice via your TALLO from Technical Advice Line.

App. 3.4.10 *Reasons against living together*

The Claimant Compliance Manual provides:

CCM15150 Reasons for Failure To Report A Partner [Oct 2017]

Customers may offer a range of reasons or excuses for their failure to report the existence of a partner. These may include:

- S/he does not stay here all of the time - see CCM15073.
- S/he lives at another address but uses my address as a post box - see CCM15075.
- I thought s/he could stay 3 nights a week without it affecting my entitlement.
- S/he does not give me any money, or payments are not regular - see CCM15090.
- S/he is not the mother/father of my child (ren).
- S/he is a lodger - see CCM15070.
- S/he is just a friend.
- It is hard being a single parent.
- The Government does not pay people like me enough.
- The rules on income are not fair.
- We do not have a sexual relationship - see CCM15120.

The 3 nights rule is a popular misconception. No such legal loophole exists. If a suspected partner spends 3 nights with the customers on a regular basis, s/he may be a member of an established couple. Also, the children's parentage is not, in isolation, reliable evidence.

You will need to explain to the customers the criteria which we use to determine whether they are living together as husband and wife, living together as civil partners or living together as a same sex couple, see CCM15040. You will then need to establish the facts by considering all the evidence from all legally available sources, including the customer. Note: The Marriage (same sex couples) Act 2013 extended marriage to same sex couples. See TCTM06100 for the definition of a couple.

App. 3.4.11 *Privacy*

The Claimant Compliance Manual provides:

CCM15160 Respecting Customer's Privacy [Oct 2017]

In all your contacts with customers you must always be aware of Human Rights issues, and of the need to respect the customer's privacy. It is particularly important that you adopt this approach in any discussions which may touch on their private life.

You should avoid any impression that you are examining the customer's home or household for signs of any such relationship. You must not ask about the customer's sleeping arrangements in an attempt to find out whether s/he shares a bedroom with another adult.

Customers may however volunteer information of this kind when, for example, confirming the number of children who live there; describing how friends or relatives sometimes stay to help out with childcare or explaining that their ex-partners stays in the spare room whenever they come to visit the children. If the customer simply says their partner stays overnight when they come to visit or care for the children you must not ask where they sleep.

You should not normally ask customers about the number of bedrooms in their house but if the customer has suggested that an adult who lives in the house is a paying lodger, it is reasonable to expect the lodger would have his/her room rather than sleeping on a sofa or floor.

In the circumstances it will be appropriate to ask how many bedrooms there are and what room(s) the lodger occupies, and to test the answer in the light of other information/evidence. The number of bedrooms and the ages/sexes of the other occupants of the house will be relevant. For example the customer may live in a 3 bedroom house with 2 children, a boy of 12 and a girl of 16, and it will be reasonable to ask what arrangements have been made so that the lodger can occupy his/her own room.

It is important that any questions you need to ask should be directed at establishing the room the lodger occupies and their relationship with the customer and not at establishing who the customer sleeps with.

CCM15170 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [Oct 2017]

CCM15180 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [Oct 2017]

CCM15190 Customer Has Been Involved in Different Relationships [Oct 2017]

Where the customer has been involved in relationships with different partners at different times during the year, you should treat the ending of one and beginning of another as a CoC on each occasion. However, where the customer has split up and reconciled with the same partner, you should normally ignore the splits and treat the customer and partner as a couple throughout the period.

If the customer objects to this approach you should consider whether in spite of the temporary break in the relationship, the customer and partner would still be considered a couple in accordance with other relevant criteria eg. nature of any financial support. If you cannot establish that the couple were effectively living together throughout the period, you should apply the CoC provisions to each break in the relationship.

App. 3.4.12 *Date relationship begins*

The Claimant Compliance Manual provides:

CCM15195 Date on which Customers Became A Couple [Oct 2017]

The question of whether the customer was in reality a member of a couple is not just relevant to the date at which the claim commenced. Becoming or ceasing to be a member of a couple is a notifiable change of circumstances so it is also relevant at all other times during the year.

You will sometimes have evidence that places the suspected partner at the customer's address at one or more dates during the year for example a series of letters signed by the partner to his/her employer or tax office. However, you may not be able to point to anything which strongly indicates their presence at the beginning of the year or claim period.

When challenged about the existence of a partner, customers may be reluctant to admit to their failure to declare the partner on the claim, claiming instead that s/he only moved in some time later.

You will need to use your judgement in these cases. As a general rule if you are confident the evidence you have is reasonable proof that the customer was a member of a couple from the date the claim commenced, you should put that date forward to the customer. If you feel there is some doubt around that date, or you would have difficulty in substantiating it, but you are convinced that the customer was a member of a couple at some point during the year, you should propose to the customer an appropriate date from which they should be treated as a member of a couple. You should be prepared to negotiate the date with the customer bearing in mind the important factor of getting the claim on the right basis for the future. However, you must remember that your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.

App. 3.4.13 *Sources of information*

The Claimant Compliance Manual provides:

CCM15200 Information held by HMRC [Oct 2017]

A case identified for enquiry on the grounds of a suspected undisclosed partner will usually have been selected because information held by us indicates another adult living at the customer's address. The CCRO will have checked HMRC and other databases and other available information sources, before passing the case to you. You will therefore already have most of the evidence you will want to discuss with the customer before you open the case.

The information is likely to include some or all of the following sources.

Type	**Identifies**
Voter's List	Suspected partner listed?
HMRC address database	What address does the HMRC hold for suspected partner?
Telephone Directory	What address/phone number is listed for suspected partner?
Yellow Pages/Other	Ditto for self employed suspected partner.
SA	Ditto for self employed suspected partner.
TRP Data Mart	Any joint bank accounts etc, listed?
COP/CODA	Any additional allowances?
Child Benefit	Partner shown on original claim/as alternative payee?
Previous Claims	Was partner shown on earlier WFTC/DPTC/WTC/CTC claims?
Equifax/Experian	Is suspected partner shown at customer's address?
DWP	Intelligence suggesting a live-in partner?
CSA	Maintenance paid? Reference to partner in interview notes.
Housing or Council Tax Benefit	Details of occupants. CT reduction for single adult being received?

Letters on File	Any indication (particularly recent) of suspected partner living at customer's address?

CCM15210. Information from Customer [Oct 2017]

Despite the information that will have been given to you by the CCRO there will also be information you can only obtain from the customer or with the customer's agreement, for example:

- Bank statements - are they joint? If not, do they contain evidence of joint incomings/outgoings/spending?
- Utilities and other bills - who are these sent to?
- Council tax bills - a single occupier is entitled to a reduction, which will be identified on the statement.
- Mortgage claims/statement - whose name appears on any documentation?
- Rent book - whose name appears in the book as landlord and tenant?
- Hire purchase agreements - whose name is on the documents?
- Services and rentals eg. TV, satellite, telephone agreements - whose name are they in?
- Marriage certificate - does it show a recent marriage to the suspected partner?

(This content has been withheld because of exemptions in the Freedom of Information Act 2000)

App. 3.4.14 *Length of relationship*

The Claimant Compliance Manual provides:

CCM15220 Short Term Relationships [Oct 2017]

In some cases the customer might admit they had a partner during the period under review but says they are no longer a couple. You will need to review the facts to establish whether they are in fact still a couple.

Where the customer admits to a short term relationship which you accept has now ended you will need to decide whether the relationship amounted to them living together as husband and wife (LTAHAW), living together as civil partners (LTACP) or living together as a same sex couple (LTAASSC). You will need to explore the criteria at CCM15040.

There are no hard and fast rules as to the length of time a couple are together before we consider it to be LTAHAW, LTACP or LTAASSC. If they are LTAHAW, LTACP or LTAASSC then we will treat them as a couple for tax credit purposes even if they are only together a short time. However, in reality a short term relationship (less than 3 months) is unlikely to meet the criteria at CCM15040. They may satisfy one of the criteria but not the others. In such cases you will have to use your judgement and you should consult your manager if necessary. Remember your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.[23]

[23] Earlier versions of this guidance are (1) The Independent Taxation Manual (paragraphs now withdrawn) and (2) the ACG–WFTC/DPTC Applicant Compliance Guide para 9010 (not set out here as it adds nothing to the Claimant Compliance Manual). The text is in the 9th ed of this work.

App. 3.4.15 *Multiple cohabitees*

The Law Commission consider the salacious possibility that an individual may have more than one cohabitee:

> 4.108 ... where the deceased was a party to more than one cohabiting relationship at the date of death, it may be more difficult to determine whether the deceased "was sufficiently involved in either household for one or both to amount to cohabitation at all".[24] However, cases may arise in which it can be shown that both partners are cohabitants within the definition adopted, for example where there are religious marriages which do not qualify as legal marriages.[25]

App. 3.4.16 *Prohibited relationships*

The Claimant Compliance Manual provides:

> **CCM15025 Prohibited Relationships** [Oct 2017]
> The law prohibits certain relationships by relatives. For example a woman cannot marry or form a civil partnership with her grandfather or her uncle and a man cannot marry or form a civil partnership with his daughter or sister. A full list of prohibited relationships is contained at CCM15030.
> Where you establish that a customer is living as a couple with a relative who appears on the list of prohibited relationships we do not consider this to be an LTAHAW or LTACP situation. The reason for this is that the couple cannot marry or become civil partners in law so we cannot say they are living together as husband and wife as they could never be husband and wife or living together as civil partners as they could never be civil partners. The customer will therefore be treated as a single customer.
> **CCM15030 List of Prohibited Relationships - Marriage** [Oct 2017]
> Throughout the UK and Guernsey, Jersey and the Isle of Man, the law prohibits certain blood relatives, step relatives and relatives-in-law from getting married.
> A man cannot marry his:
>
> - mother
> - adopted mother/ former adoptive mother
> - daughter
> - adoptive daughter/ former adoptive daughter
> - grandmother

[24] Footnote original: Cohabitation: the Financial Consequences of Relationship Breakdown (2007) Law Com No 307, para 3.68.

[25] Footnote original: *Churchill v Roach* [2002] EWHC 3230. See also *Kotke v Saffarini* [2005] EWCA Civ 221, [2005] 2 FLR 517, a case on similar wording in section 1(3)(b) of the Fatal Accidents Act 1976, where the CoA held at [59] that it was correct to distinguish between "wanting and intending to live in the same household, planning to do so, and actually doing so".

- granddaughter
- sister
- aunt
- niece

A woman cannot marry her:

- father
- adopted father/ former adoptive father
- son
- adoptive son/ former adoptive son
- grandfather
- grandson
- brother
- uncle
- nephew

Additionally, people cannot marry if:

- either of them is aged less than 16, or
- in a 'step' relationship, the younger person had, before reaching age 18:
  - lived in the same household as the older person, and/or
  - been treated as a child of the older person's family, or
- in an 'in-law' relationship:
  - either person involved is aged less than 21, and/or
  - any person originally involved in creating the 'in-law' relationship' is still alive, for example we do not consider LTAHAW if a man lives in the same household as his daughter-in-law and the man's son or wife is still alive.

If you are unsure whether the customer is in a prohibited relationship you should seek further advice via your TALLO from Technical Advice Line .

CCM15032. List of Prohibited Relationships - Civil Partners [Oct 2017]

The law in the UK prohibits certain blood relatives, step relatives and relatives by civil partnership from forming a civil partnership. The legislation in Scotland is slightly different from the legislation that applies in England, Wales and Northern Ireland.

In England, Wales and Northern Ireland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent

- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

If:

- either of them is aged less than 21, or
- the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or
- been treated as a child of the older person's family, or

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of parent
- Former spouse of parent

If:

- either person involved is aged less than 21, and/or
- any person originally involved in creating the relationship is still alive, for example we do not consider LTACP if a woman lives in the same household as her daughter-in-law and the woman's son or husband is still alive.

In Scotland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

App. 3.4.17 *Same-sex cohabitees*

The M(SSC)A again provides separate rules for existing and for new legislation.

Para 2 sch 3 M(SSC)A provides:

> (1) In existing England and Wales legislation—
>
> (a) a reference to persons who are not married but are living together as a married couple is to be read as including a reference to a same sex couple who are not married but are living together as a married couple;
>
> (b) a reference to a person who is living with another person as if they were married is to be read as including a reference to a person who is living with another person of the same sex as if they were married.
>
> (2) Where sub-paragraph (1) requires a reference to be read in a particular way, any related reference (such as a reference to persons formerly living together as a married couple) is to be read accordingly.
>
> (3) For the purposes of sub-paragraphs (1) and (2) it does not matter how a reference is expressed.
>
> 3 (1) This paragraph applies to existing England and Wales legislation which deals differently with—
>
> (a) a man and a woman living together as if married, and
>
> (b) two men, or two women, living together as if civil partners.
>
> (2) If two men, or two women, are living together as if married, that legislation applies to them in the way that it would apply to them if they were living together as civil partners.

For new legislation, para 5 M(SSC)A provides:

> (1) This paragraph applies to provision made by—
>
> (a) this Act and any subordinate legislation made under it, or
>
> (b) new England and Wales legislation, including any such provision which amends existing England and Wales legislation.
>
> ...
>
> (5) A reference to a same sex couple who are not married but are living together as a married couple is a reference to—
>
> (a) two men who are not married but are living together as a married couple, or
>
> (b) two women who are not married but are living together as a married couple.

Fortunately it will rarely if ever be necessary to distinguish between living together as civil partners or as a married couple.

App. 3.5 "Child"

In the absence of a specific definition, the position is correctly explained in RDR3:

> **C15** A child can be either an individual's own natural child or a child they have adopted. It does not include step-children, unless the individual has adopted them.

In modern legislation the term child is often defined to include step-children.[26]

App. 3.6 Brother/Sister

Similarly, brother/sister does not include step-siblings. Thus the CT Manual comments on the rule that brothers and sisters are "associates"[27]:

> **CTM60150 Tests: Associates** [Nov 2019]
> Other relatives ... should be regarded as associated only if there is a blood relationship, for example, half-brothers are associated but stepbrothers are not...

App. 3.7 Illegitimacy

Section 1 FLRA 1987 provides:

> In this Act and enactments passed and instruments made after the coming into force of this section, references (however expressed) to any relationship between two persons shall, unless the contrary intention appears, be construed without regard to whether or not the father and mother of either of them, or the father and mother of any person through whom the relationship is deduced, have or had been married to each other at any time.

For exceptional cases where illegitimacy still matters, see 39.4.1 ("Family") and 4.4 (Domicile of origin).

[26] For the meaning of "step-children" see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 5.22 (Stepchildren).

[27] See 104.6.3 (Associates: Relatives).

APPENDIX FOUR

CONSIDERATION, ARM’S LENGTH, FULL VALUE

App. 4.1 Introduction
App. 4.2 Consideration
App. 4.2.1 A technical term

App. 4.10.8 Share subscription at overvalue
App. 4.10.9 Deemed non-arm’s length
App. 4.11 Market value adjustment clause
App. 4.12 Disposition conditional on tax consequences

App. 4.1 Introduction

This appendix considers a cluster of related expressions and concepts:

- consideration/value of consideration
- market value/full consideration
- arm’s length
- intention to confer gratuitous benefit
- fair bargain

There may be differences in nuance, but in practice these cover the same ground. So I consider them together here, together with the related topics of market-value adjustment clauses and disposals conditional on tax consequences.

The concept of bounty is related to the above, but I discuss that elsewhere.[1]

VAT also has a concept of consideration, but I do not consider that here.

App. 4.2 Consideration

App. 4.2.1 *A technical term*

"Consideration" is a common term in tax and other statutes. The word is not usually defined. It is a technical term in the sense that it has a legal meaning which is not used in non-legal contexts. This is, I think, self-evident but authority can be cited if needed. In *C&E v Apple and Pear Development Council*:[2]

> [1] The word "consideration" is a term of art in English law, and I think that, used in an English[3] statute, it must be assumed to bear its ordinary meaning in the law, save in so far as the provisions of the statute indicate some other meaning.

And again:[4]

> In our view the meaning of the word "consideration" must be the legal meaning of it and not any common or garden meaning; that really goes without saying. ...

The terms "price" and consideration are (more or less) synonymous and no-one suggests that "price" is a technical term.

App. 4.2.2 *Reciprocity required*

In *C&E v Apple and Pear Development Council*:[5]

[1] See 87.5 (Bounty requirement).

[2] *C&E v Apple and Pear Development Council* [1985] STC 383 at p.388.

[3] The reference to an *English* statute is questionable, as the case was concerned with the word (consideration) in a tax statute which also applies in Scotland. But reciprocity is inherent in the general sense of the word consideration. It is not a specifically English law concept; so the point does not matter.

[4] *R v Braithwaite* [1983] 1 WLR 385 at p.391.

[5] *C&E v Apple and Pear Development Council* [1985] STC 383 at p.388.

> In its usage in English law the central feature of consideration is reciprocity ... . Something is given in return for something else. It may, for example, be a promise in return for a promise or a payment in return for a promise. It can be a detriment to the promise or a benefit to the promisor. But whatever its form, I think that reciprocity is involved. It is essentially mutual.

Another example from a non-tax case:[6]

> In our judgment the word "consideration" connotes the existence of something in the shape of a contract or a bargain between the parties. ... Consideration deals with the situation where there is a contract or a bargain[7] and something moving the other way.

Reciprocity is a matter of degree.[8] In *Vaughan-Jones v Vaughan-Jones*:

(1) H died leaving property to his children.
(2) The children entered into a deed of variation giving the property to W (so H's estate qualified for the IHT spouse exemption).
(3) A contemporary note recorded the parties intentions: "the [children] are losing out on a short-term basis, but the plan is to pay as little IHT as possible at this stage and for [W] to transfer as much as she can and survive seven years."

W's plan to give "as much as she can" to the children did not constitute consideration for the gift from the children to the mother. The level of reciprocity was insufficient, or too imprecise:

> ... the expression "any consideration in money or money's worth" [in s.142(3) IHTA][9] is a technical expression which requires a bargain which is sufficiently definite. ... it does not include a generalised intention to give sums of an indefinite amount at an indefinite time in the future, which gives rise to no legally enforceable obligation, and where [W] could, without adverse consequences to herself, change her mind at any time.[10]

Context may of course show that "consideration" is used in a special

[6] *R v Braithwaite* [1983] 1 WLR 385 at p.391.

[7] The reference to a contract *or bargain* anticipates the point made below that consideration does necessarily require a contract.

[8] A similar point arises in the definition of settlor; see 99.4 (Reciprocal arrangements).

[9] See 77.6.3 (Variation for consideration).

[10] [2015] EWHC 1086 (Ch) at [50], [51].

sense.[11] But the above is the starting point.

App. 4.2.3 *Contract not required*

A valid contract in English law requires consideration. But consideration does not require a contract:

> [The reference to consideration in what is now s.5(2)(a) VATA 1984] is not necessarily contemplating the existence of a contract. A barrister, for example, receives consideration for his services from a solicitor, but there is no contract.[12]

And again:

> I reject the contention that [the words] "otherwise than for full valuable consideration" apply only to full valuable consideration under a contract ... they apply whenever full valuable consideration is given, whether under contract or otherwise...
> ... the phrase "for full valuable consideration" is not to be construed as being limited to benefits provided under a contract...[13]

App. 4.2.4 *"Amount or value"*

Statute frequently refers to "amount or value" of consideration (or of a benefit), for instance, in s.38(1) TCGA which restricts CGT deductions to:

> the amount or value of the consideration ... wholly and exclusively for the acquisition of the asset ...

This means: the amount of the consideration, if it is money; or the value of the consideration, if it is not money.[14]

[11] For instance, in the context of VAT, an EU-law concept of "consideration" is adopted in preference to the UK law meaning; though the EU-law concept is also founded on reciprocity, so it is not fundamentally different.

[12] *C&E Commissioners v Apple & Pear Development Council* [1985] STC 383 at p.389. Nowadays there normally is a contract between solicitor and barrister, but that does not affect the point made here.

[13] *Jelley v Iliffe* [1981] Fam 128 at p.136, discussing s.1(3) Inheritance (Provision for Family and Dependants) Act 1975.
Similarly in some tripartite cases the courts have been prepared to regard benefits received as consideration, in the absence of a contractual relationship between the parties, eg *Unilever v IRC* 76 TC 300 in the High Court at [46] reversing the Special Commissioners (but without any substantial discussion of the issue). The CoA did not consider the point.

[14] This is self-evident, but if authority is needed, see *Stanton v Drayton Investments* 55 TC 286 at p.314.

App. 4.2.5 *"Money or money's worth"*

Statute frequently refers to consideration "in money or money's worth". In *Secretan v Hart*:[15]

> The expression "consideration in money's worth" is of course one which is very familiar to lawyers, as being a way of expressing the price or consideration given for property where property is acquired in return for something other than money, such as services or other property. where the price or consideration which the acquirer gives for the property has got to be turned into money before it can be expressed in terms of money.

The expression *money or money's worth* excluded consideration of marriage, but marriage consideration is now an archaic concept.[16]

The expression also excludes consideration of "natural love and affection" and similar emotional benefits,[17] but that is not consideration in the true sense at all.[18]

So there is no practical difference between "consideration" and consideration "in money or money's worth". The words "in money or money's worth" do not add anything.

For completeness: In the 2017 penalty and RTC provisions we have the novel wording "consideration (whether or not in money)".[19] I guess the drafter thought that was a Plain English equivalent of "consideration in money or money's worth". It would have been better to just say consideration, or else use the established phrase. I hope that does not catch on. But it does not matter.

App. 4.3 Contract states consideration

Issues frequently arising are:

(1) Identifying the consideration

(2) Once identified (if the consideration is not money):

[15] 45 TC 701 at p.705.

[16] Marriage was formerly regarded as a contract, and agreeing to marry was consideration for the contract. However, marriage consideration is not "money or money's worth".

[17] Contrast 50.4.8 (Moral/sentimental/hard to value benefit).

[18] The phrase "in consideration of natural love and affection" seems rather inapt: it is a traditional conveyancer's expression which perhaps antecedes the modern sense of "consideration". But the phrase is not much used now.

[19] See 126.13 (Interested person).

(a) valuing the consideration or
(b) (exceptionally) whether the consideration cannot be valued

These issues are conceptually distinct, and I consider them separately. Any one case typically raises both issues, and one must identify consideration before valuing it; but discussion easily segues from point (1) to point (2), as there is not much difference between saying that something is for no consideration, or it is for consideration of nil value.

App. 4.3.1 *General principle*

The issues of identifying/valuing consideration are governed by the same principle: subject to certain ill-defined limits, the parties to a contract may identify or specify:

(1) what is the consideration
(2) what is the value of the consideration (if not money)
(3) how consideration is apportioned between different matters[20]

In *Spectros v Madden*:[21]

> What is the relevant consideration may depend upon the terms and form of the transaction adopted by the parties. The parties to a proposed transaction frequently can achieve the same practical and economic result by different methods.
> The law respects the freedom of the parties to a transaction to frame and formulate their agreement as they wish and to suit their own legitimate interests (taxation and otherwise)

The restriction on this freedom is as follows:

> and, so long as the form adopted is genuine, and not a sham, honest, and not a fraud on someone else, and does not contravene some established principle of public policy, the Court will give effect to the method adopted;

The qualifications in *Spectros* of genuine/honest, etc, allow some wiggle room.[22] But subject to that, what is sauce for the goose is sauce for the gander:

[20] This is an aspect of a broader cardinal principle; see App 7.9 (Form v substance: Cardinal principle).

[21] 70 TC 349 at p.374; this principle has often been followed, in various contexts; see eg *HMRC v Collins* [2009] EWHC 284 (Ch) at [27].

[22] See App 4.4.4 (Consideration dishonestly misapportioned).

> but as a corollary to this freedom, where the parties have chosen one method, it is not open to them to invite the Court to treat as adopted some other method because it is more advantageous to them, because it leads to the same practical and economic result and because it is the more obvious and sensible method to have adopted.

App. 4.3.2 *Examples*

There are many examples. *Spectros* gives this one:

> Take for example the position of the owners of the entire issued capital of a company with
> [1] gross assets of £2m and
> [2] net assets (after discharging a debt of £1m owed to the owner or someone else) of £1m.
> The shares are worth £1m, but would be increased to £2m if the owner at his own cost and for the benefit of the company released or discharged the debt. In this situation, the owner may agree to sell his shares
> [1] for £1m
> [2] or, on condition that he first releases or discharges the debt, for £2m.

Thus the consideration is £1m or £2m depending on the drafting. In the second case there would be no difficulty, or unfairness, if the £1m which the owner of the company spent on releasing or discharging the debt was deductible in computing the gain. It ought to be but it is not.

HMRC v Collins offers another example. Here the company being sold wished to make a pension contribution of c.£95k. If it had made the contribution, and then been sold for a correspondingly lower price, that would have been the consideration. Unfortunately it was not done that way:

> there can in my judgment be no doubt about the answer to the question whether the £95,179 formed part of the consideration for the disposal of Mr Collins' shares. The answer has to be found in the true construction of the Share Sale Agreement, read in the light of the relevant surrounding circumstances. The terms of the agreement are clear and unambiguous. The £95,179 was part of the consideration payable on completion for Mr Collins' shares. That is what [the sale contract] expressly provided. The fact that the sum was not payable to Mr Collins himself, but to the Company at his direction, is irrelevant. The sum still formed part of the consideration agreed between the parties for the sale of his shares. It is equally irrelevant that the agreement went on to

> specify what the Company was to do with the payment. If I dispose of an asset on terms that the purchase price is to be paid, at my direction, to a third party, and then applied by the third party in a specified way for my benefit, none of that alters the fact that the agreed purchase price is the consideration for my disposal of the asset.[23]

The moral is: take care on the drafting!

The same principles apply in Scotland. In *HMRC v Vermilion Holdings*[24] an agreement provided:

(1) an existing option was cancelled
(2) a new option was granted for "no consideration"

The UT said at [21]:

> Clause 2.2 states ... that no consideration is payable for the grant of the option. If the parties intention was that there was consideration and that the consideration was the cancellation of the 2006 Option they could easily have said so. We find as a matter of law that no consideration was payable for the grant of the 2007 Option.

It is significant that the existing option was said to be worthless because the company which granted the option was about to go bust. Rather than worthless, one might describe it as difficult to value, but that should make no difference.

App. 4.3.3 *Contracts construed*

As the question of what is the consideration is determined by the contract, it may be necessary to construe the contract, which should be clear; but if the drafter has not paid attention to the point, it may not be. The usual principles of construction apply:

> If the question is raised what method has been adopted and the transaction is in writing, the answer must be found in the true construction of the document or documents read in the light of all the relevant circumstances. If the terms of the documents are clear, that is the end of the question. If however there is any doubt or ambiguity upon the language used read in its proper context, it may be possible to resolve that doubt or ambiguity by reference to the inherent probabilities of businessmen entering into the transaction in one form rather than

[23] [2009] EWHC 284 (Ch) at [29]. The Judge described this as "simple and obvious"; though the Special Commissioner had reached the opposite conclusion.

[24] [2020] UKUT 162 (TCC). This point was not discussed in the subsequent appeals.

another.[25]

In *Stanton v Drayton Investments*[26] the buyer bought a portfolio of securities. The agreement identified the consideration thus:

> The vendor will sell and the purchaser will purchase ... the said portfolio
> [1] at the price of [c.£4m]
> [2] to be satisfied by the allotment by [the purchaser] to the vendor of [c.2.5m] ordinary shares of 25p each in [the purchaser], the issue price of each such share for the purpose of satisfying the consideration being 160p.

What was the consideration given by the buyer for the acquisition of the portfolio? Was it the price or the issue of shares in the buyer? It was held to be the shares issued. It was not the stated price, the cash sum, or notional cash sum, of £4m. Under the contract, properly construed, that is what the parties identified as the consideration. One might say that the wording at [2] overrode the wording at [1]. Or one might say that what mattered is what the seller actually received from the buyer. The contract described the cash sum as the "price", and "price" is a synonym of "consideration". But when one reads the whole contract, it is clear that the true consideration is the issue of shares and not the money.

(Since the consideration was not in money, it was necessary next to value the consideration; this point is considered separately below).

Hannah v HMRC[27] was a hare-brained (pre-GAAR) SDLT avoidance scheme. A buyer bought land. The purchase price was specified as £765k, but the contract provided:

> the Buyer shall be entitled to satisfy the balance of the Purchase Price (as exceeds the Deposit) by the issuance and delivery to the Seller of an annuity contract

The wording was similar to *Drayton Investments*, but in *Drayton* the buyer was *required* to satisfy the purchase price by the issue of shares; and in *Hannah* the buyer was *entitled* to satisfy the purchase price by the issue of the annuity contract. But the buyer immediately exercised its right to do that, and if the seller had retained the annuity, that should have been the consideration. However when the seller received the annuity, they

[25] 70 TC 349 at p.375.
[26] 55 TC 286.
[27] [2021] UKUT 22 (TCC).

promptly surrendered it for a cash sum equal to the specified purchase price. Blink and you missed it. The consideration was the £765k, not the annuity. The result could be explained as a "realistic view of facts" or by *Ramsay*; or is there no difference between the two?[28]

See too 56.4.6 (Chose in action analysis).

App. 4.4 Value of consideration

App. 4.4.1 *Contract stating value*

Just as a contract may identify what is the consideration,[29] a contract may identify the value of the consideration (if the consideration is not money) subject to the same ill-defined limits.

In *Stanton v Drayton Investments*[30] the consideration was an issue of shares and the question was: what was the value of the consideration for CGT purposes. It was held that this did not mean market value, but the value specified by the parties in the contract:

> ... as a pure matter of construction of [s.38(1)(a) TCGA], I see no indication that value is used as meaning market value. ... in the ordinary case under s.38(1)(a) TCGA [as opposed to the special case of non-arm's length transactions deemed to be at market value] such a value is available-namely the price agreed between the parties. Consequently there is not need to look to the market value, and no need to read in the word 'market' before 'value' where Parliament has not seen fit to use it.[31]

Again, there is a requirement of honesty and bona fides which provides some wiggle room:

> provided the agreed value has been honestly reached by a bargain at arm's length, it must, in my opinion, be final and it is not open to attack by the Inland Revenue.[32]

The reader may find that analysis surprising. One might have thought:

(1) Value means market value, not the price agreed between the parties, if different.

(2) But the fact that arm's length parties have agreed a price is (more or

[28] See App 7.8 (Realistic view of facts).

[29] See App.4.3 (Contract states consideration).

[30] For the facts of this case, see App.4.3 (Contract states consideration).

[31] 55 TC 286 at p.317.

[32] 55 TC 286 at p.317.

less) conclusive evidence that the agreed price falls within the market value range.

(3) Assuming the price agreed fell within the market value range, it should be conclusively taken as "the" market value.

But the end result is the same. In any event, the decision is binding. Of course, the qualifications "honestly" and "at arm's length" provide some wiggle room.

The decision in *Stanton v Drayton* is expressed in rather abstruse reasoning about the meaning of the word "value" in s.38, in the context of the TCGA, and the method of ascertaining the value. But a practical consideration lies beneath:

> Once it is accepted ... that market value could not necessarily be ascertained almost instantly by reference to the Stock Exchange price list, but might have to be proved by the evidence of accountants and other financial experts, the practical inconvenience of leaving agreements liable to be reopened to such inquiry becomes clear. I do not believe that Parliament can have intended to permit that inconvenience in cases where bargains have been made at arm's length.[33]

One can collect from *Stanton v Drayton* a strong inclination not to reopen a valuation agreed between parties acting at arm's length.

App. 4.4.2 *Apportionment of consideration*

A contract may apportion consideration, eg if in one contract, A agrees to purchase two different assets, it may specify what consideration is given for each. In *Booth v Bucknell*:[34]

> where parties to a composite transaction have, as a result of negotiations between themselves, provided that part of the consideration is to be paid for one part of the transaction and part for another, they cannot subsequently seek to re-allocate the consideration for tax purposes. They have chosen to carry through the transaction in a particular manner, and the taxation consequences flow from the manner adopted.

The CG Manual provides:

> **CG14773 - Apportionment** [Jul 2019]
> If you need to apportion consideration, then you should check the

[33] 55 TC 286 at p.317.
[34] 53 TC 425 at p.431,

> relevant documentation, such as the contract for disposal, to see if an apportionment is provided. We would expect to see an apportionment in a case where unconnected parties have contracted a bargain at arm's length. If they have, and if the apportionment appears reasonable by reference to the facts, then we would not expect to disturb it. There is clear authority for the proposition that the parties cannot disturb an apportionment they have agreed in a contract, see *Booth v Buckwell* 53 TC 428.
>
> In *Booth v Buckwell* it was held that the two parties to the contract could not seek to alter the agreed apportionment simply to mitigate a Capital Gains Tax liability. It was, however, acknowledged that 'in certain cases' the Inspector's position would be different. The decision did not, however, define the circumstances in which the Inspector could alter an agreed apportionment.

Section 52(4) TCGA provides:

> For the purposes of any computation of the gain any necessary apportionments shall be made of any consideration or of any expenditure and the method of apportionment adopted shall, subject to the express provisions of this Chapter [Chapter 3 Part 2, Computation of gains], be just and reasonable.

The CG Manual provides:

> **CG14773 - Apportionment** [Jul 2019]
>
> Our current thinking is that we are only justified in using our powers under Section 52(4) where:
>
> • there is no apportionment provided, or
>
> • although there is an apportionment provided, this is unreasonable on the facts of the case.
>
> We would not consider it justified to use our powers where:
>
> • there is an apportionment provided which is reasonable on the facts of the case.

App. 4.4.3 *Covenant incidental to sale*

In *Fielder v Vedlynn*[35] the essential facts[36] were:

[35] 65 TC 145.

[36] Some background facts:

(1) The purpose of the sale was that P should acquire the capital losses of the companies it acquired. (The sale of capital loss companies was held to work for CT purposes in *Shepherd v Lyntress* 62 TC 495, but sch 7A TCGA now prevents this). The contingent liability owed from the target companies to V was to pay

(1) A buyer bought 8 companies ("target companies") from a seller ("S") for market value (£19k).

(2) The target companies held subsidiaries which owed a contingent liability to S. The buyer covenanted to procure that the these liabilities would be met. The parent of the buyer in turn guaranteed performance of the buyer's guarantee.

HMRC argued that the covenants were valuable consideration in addition to the purchase price.

The Special Commissioners rejected this for two reasons. First:

> the guarantees are no more than a term of the agreements for sale of the [target] companies. They do not fall to be separated out from the other terms and conditions upon which the shares were sold or to be invested with an overwhelming importance. I would regard them [as] comparable with the warranties and covenants given by [the seller].[37]

The High Court agreed:

> the Special Commissioner was entirely entitled to reach the conclusion that there was no basis on which a separate and additional monetary value could be placed upon the guarantees as part of the consideration to be added to the undoubted monetary price paid which was the true open market price of the shares.[38]

It is not clear whether the basis of the decision is that:

(1) The guarantee was not consideration. If so, the question of its value, if any, did not matter. Or:

(2) The guarantee was of nil value. Something of nil value perhaps cannot be consideration, but this does not matter here.

The better view is that both are correct: the guarantee was held to have nil value and not to constitute consideration.

At first sight, it seems odd to say that the guarantee had *nil* value. It must have been worth *something* though it was difficult (in fact,

a sum equal to 7.5% of losses (if any) agreed by HMRC.

(2) The arrangements also included a pre-sale dividend to reduce the value of the target companies.

These facts do not affect the technical points decided in *Vedlynn*, but they may explain why HMRC tried to pursue the consideration issue.

[37] 65 TC 145 at p.160.

[38] at p.163.

impossible) to value.[39] But I think it is right to say that the consideration had nil value in this case, because the parties put a nil value on it, and the parties' valuation of consideration in good faith is binding on HMRC.[40]

The guarantee was also not for consideration, at least for the purposes of computing the chargeable gain, because the parties have freedom to determine what is the consideration for a transaction.[41]

The issue may arise in non-tax contexts. In *Muat v Betts Motors,*[42] a buyer bought a car (then in short supply, in New Zealand) for £1,207. The contract of sale included a covenant that the buyer was not to resell within 2 years unless he first offered to sell the car back to the seller. The buyer argued, ingeniously but unmeritoriously, that the covenant was void, because:

(1) the price [ie consideration] for the car was £1,207 *and* the value of the covenant, and
(2) added together, this exceeded the maximum allowed under price control legislation.

The answer was that the covenant was not part of the price:

> ... under the statutory definition,[43] the only kind of valuable consideration which comes within the "price" is a valuable consideration "which in effect relates to the sale." The special covenant in this case was, in a sense, valuable consideration - just as any collateral contract is consideration for the making of a main contract - but it did not relate to the sale (!).

Why not? The Court gave a somewhat narrow definition of what relates to a sale:

> It is of the essence of a sale that the property in the goods should be transferred from the seller to the buyer: and a valuable consideration only relates to the sale if it is given as the inducement - or one of the inducements - for the transfer of the property. In this case the sole and

[39] See App.4.4.5 (Consideration can't be valued).

[40] See App.4.4.1 (Contract may identify value).

[41] See App.4.3 (Contract states consideration).

[42] [1959] AC 71.

[43] Section 2(1) [New Zealand] Control of Prices Act 1947 provided:

> 'Price', in relation to the sale of any goods … includes every valuable consideration whatsoever, whether direct or indirect; and includes any consideration which in effect relates to the sale of any goods … although ostensibly relating to any other matter or thing.

> entire inducement for the transfer was the cash sum of £1,207. The special covenant was not given for the property but for something different. It was given for the privilege of being allowed to buy a new car. It was not expected to yield any benefit to the seller. Its purpose was to stop the purchaser taking advantage of his privileged position contrary to the interests of the trade and the public. It was a prerequisite to the transfer of the property and not part of the consideration for it. In these circumstances their Lordships think it cannot properly be said to form part of the "price" within the statutory definition.

This would nowadays be called a purposive interpretation of the (normally) wide expression "relating to". Perhaps an easier way to reach the same answer would be to say that the contract specified the price, and by implication specified that the covenant was not consideration for the sale, or the value of the covenant was nil.

App. 4.4.4 *Consideration dishonestly misapportioned*

In *Saunders v Edwards*[44] the buyer agreed to buy a lease and its chattels. The total purchase price of £45k was apportioned £40k for the lease and £5k for the chattels. The chattels were worth about £500, possibly up to £1,000. The object was to evade Stamp Duty. Whatever the limits of the principle of freedom to apportion consideration, this passed them:

> What happened in this case may well be common practice. But it cannot be condoned. If a solicitor is involved in an apportionment of this kind, which he knows not to be in accordance with the facts, then he must be guilty of professional misconduct. Furthermore, apart from this and possible criminal offences, the consequence for buyers may well be that their contract becomes unenforceable.[45]

App. 4.4.5 *Consideration can't be valued*

Consideration which cannot be valued matters, because it brings into effect the CGT market value rule.[46]

This issue arise in *Fielder v Vedlynn*. The case concerned a sale whose terms included a guarantee which was held not to be consideration for the sale, or perhaps, consideration of nil value.[47] The Special Commissioner

[44] [1987] 1 WLR 1116.

[45] [1987] 1 WLR 1116 at p.1125.

[46] See App.4.8 (CGT market value rule).

[47] See App.4.4.3 (Covenant incidental to sale).

went on to say:[48]

> If I am wrong in coming to this conclusion, the question arises what is the value of the guarantees. ... It seems to me to be quite impossible to place a rational value on the guarantees. ... How do you value the guarantees in monetary terms? I do not think you can. No evidence was led to suggest that you can. So if the guarantees are part of the consideration given by [P] for the [target] companies, that part of the consideration, in my opinion, "cannot be valued".

The High Court upheld that finding of fact.

The consequence of this analysis is not altogether attractive, because it brings into effect the CGT market value rule. But no doubt parties acting at arm's length will normally be taken to have agreed a market value price, so it makes no difference to them.

App. 4.5 Transfer on liquidation

The transfer of property to shareholders from a company in the course of liquidation is not for consideration. There is no bargain between the shareholders and the company. The liquidator is under a duty to make the transfer by virtue of the liquidation. The liquidation may require a special majority vote; but apart from that, once that is done, the winding up commences, the transfer does not depend on the wishes of any shareholder.[49]

HMRC agree. The SDLT Manual provides:

> **SDLTM04042 SDLT on de-enveloping transactions** [Feb 2020]
> ... de-enveloping may occur by a capital distribution to the shareholders following the liquidation of the company. The [SDLT] consequences of de-enveloping will depend on whether there is any consideration given by the shareholders for the transfer of the property.
>
> There will be two situations where HMRC will not consider there to be any consideration given.
>
> The first is where the company is debt free: its only asset is the property and there are no liabilities (other than issued share capital). In such a situation the shareholders have given no consideration directly or indirectly for the property and therefore there is no SDLT liability.[50]

[48] 65 TC 145 at p.161.

[49] See *Wigan Coal and Iron Co v IRC* [1945] 1 All ER 392; this is also assumed in s.53, 54 FA 2003.

[50] The material now in SDLTM04042 and SDLTM04043 was previously published as a statement on *https://www.gov.uk/business-tax/stamp-taxes* (2013).

The same reasoning applies to:
(1) A transfer by way of dividend or other company distribution
(2) A transfer from a trust

This is recognised by provisions which for CGT purposes deem these transfers to be made for consideration.[51]

App. 4.6 Transfer on divorce

The starting point is to understand the family law background.

A transfer in connection with divorce may be made:
(1) Pursuant to a court order
  (a) following a contested hearing; or
  (b) approving a settlement agreed by the parties
(2) Without a court order but under an agreement between the parties (the transferee usually agreeing to seek no (or a reduced) court order in return for the transfer)

Assume (as will normally be the case on divorce) that the transfer is made at arm’s length and with no gratuitous intent. Is a transfer of this kind made for consideration?

One might have thought that the answer was no. The word consideration is wide enough to apply in the absence of a contract, but in the case of a court order, there is no bargain of any kind. The reciprocity which is the essence of consideration is lacking.

Accordingly in *G v G*[52] the High Court held that a transfer pursuant to a court order at a contested hearing was not made for consideration, so that CGT hold-over relief was available.[53]

However in *Hill v Haines*[54] the CoA held that a transfer pursuant to a court order at a contested hearing *was* made for consideration, for the purposes of s.339 Insolvency Act 1986.

Where does this leave *G v G* and CGT hold-over relief? Either it is overruled or else a transfer might be for consideration for the purpose of one statute, but not for the purposes of CGT, or at least, not for the purpose of CGT hold-over relief.

[51] See App.4.8 (CGT market value rule).

[52] *G v G* [2002] EWHC 1339 [2003] Fam Law 14 [2002] 2 FLR 1143 at [43] *https://www.kessler.co.uk/wp-content/uploads/2012/04/GvG.pdf*

[53] See 57.32.5 (Actual consideration).

[54] [2007] EWCA Civ 1284.

Each view has some support in *Hill v Haines* (though they cannot both be right). Morritt C said:

> [30] ... the fact that a transfer ordered by the court does not give rise to a payment of consideration so as to reduce the value of hold-over relief *for capital gains tax* [does not entail] a conclusion that a property adjustment order must be regarded as made for no consideration.

In other words, "consideration" in the CGT code has a different meaning. But Rix LJ preferred the view that *G v G* was wrong.[55] Since Rix also agreed with Morritt, it is clear that he did not give a great deal of attention to this point (which did not need to be decided and which would not have been fully argued). A legal realist might say that each decision was result led, the court first deciding what is the just result and then holding that there was/was not consideration in order to reach that result. But it is considered that the two decisions can be reconciled and the view of Morritt is to be preferred. Rights under the Matrimonial Causes Act are not assets for CGT purposes: no gain arises when a spouse is awarded a capital sum. Accordingly, there is no "consideration" for CGT purposes. However that is a special case and a transfer on divorce is made for consideration in the general sense of the expression.

The rule, in short, is that a divorce payment is in principle made for consideration, but the context may show otherwise. The word "consideration", like all words, must take its meaning from its context.

The CG Manual provides:[56]

> **CG67192. Hold-over relief: Consideration** [Jul 2019]
> The disposal of an asset from one spouse or civil partner to the other in the circumstances described in CG67191 [that is, a disposal in a year after separation, which does not qualify for the CGT spouse exemption]

[55] At [81] "... As for *G v G*, the view expressed by Coleridge J at para 43 regarding potential consequences for the purposes of capital gains tax can hardly be regarded as authoritative in the absence of the revenue. As Coleridge J stated, his view that the wife gave no consideration for the shares transferred to her because 'neither party has any 'rights'… cannot, of course, ultimately bind the Inland Revenue': he merely proceeded "on the footing" that business hold-over relief would be available to the husband. In doing so, he appears to have drawn an unnecessary inference from the decision of this court in the *Xydhias* case."

[56] The passage has not been revised after *Hill v Haines,* but as several years have elapsed since that decision, it may be taken as a statement of the HMRC current view.

> is, where there is no recourse to the courts, usually made in exchange for a surrender by the donee of rights which they would otherwise be able to exercise to obtain alternative financial provision. In such cases we take the view that the value of the rights surrendered represents actual consideration of an amount which would reduce the gain potentially eligible for hold-over relief to nil. "Consideration" is not limited to money or money's worth.

After considering the case where there is gratuitous intent, which is so rare that it need not be considered here, the Manual continues:

> However, in cases where there is recourse to the courts and a court makes an order
>
> - for ancillary relief under the Matrimonial Causes Act 1973 which results in a transfer of assets from one spouse to another, or
> - for property adjustment under the Civil Partnership Act 2004, or
> - formally ratifying an agreement reached by the divorcing parties or by the civil partners of a dissolved civil partnership dealing with the transfer of assets,
>
> we take the view that the spouse or civil partner to whom the assets are transferred does not give actual consideration, in the form of surrendered rights, for their transfer. A Court Order, made in these circumstances, reflects the exercise by the court of its independent statutory jurisdiction and is not the consequence of any party to the proceedings agreeing to surrender alternative rights in return for assets. This approach represents a change in the Revenue's prevailing practice, following consideration of judicial observations made in the case of *G v G* [2002] EWHC 1339 and applies with effect from 31 July 2002. Therefore, where assets are transferred between divorcing parties or between civil partners of a dissolved civil partnership by reason of a Court Order as described above and a claim for gift hold-over relief is made, or remains unsettled, on or after that date, the relief should not be restricted in accordance with TCGA92/165(7) on the grounds that actual consideration has been given by the donee.

Thus in the HMRC view:

(1) A transfer made pursuant to a court order, including a consent or *Tomlin* order, is not made for consideration.

(2) A transfer not made pursuant to a court order is made for consideration.

It is considered that the position is in both cases the same:

(1) The transfer is made for consideration in the general sense of the

word;

(2) The transfer is not made for consideration for CGT purposes.

App. 4.7 Sale and leaseback

This section considers whether a sale and leaseback transaction is for consideration. I refer to the parties to the transaction as "purchaser/landlord" and "vendor/tenant".

The conveyancing can be done in (at least) two ways:

(1) *Transfer requiring purchaser/landlord to grant lease:*
   (a) Vendor/tenant transfers freehold to purchaser/landlord
   (b) Purchaser/landlord grants lease to vendor/tenant

(2) *Transfer subject to an existing lease:*
   (a) Vendor/tenant grants lease to nominee, and
   (b) Vendor/tenant transfers freehold subject to the lease to purchaser/landlord[57]

At first sight, the analysis should depend on the conveyancing:

(1) Route (1) involves a grant of a lease for consideration (the transfer of the freehold).

(2) Route (2) does not involves a grant of a lease for consideration.

But both conveyancing methods lead to the same result, so it is tempting to say that the same tax analysis should apply, regardless of the conveyancing. In that case one might apply either analysis, ie the lease may or may not be regarded as granted for consideration, depending on which makes better sense in the particular context.

The former CTO Advanced Instruction Manual seemed to adopt this approach:

> **E.15. Introduction**
>
> A lease for life etc is treated as a settlement under s43(3) IHTA unless the lease was granted for full consideration in money or money's worth. We do not consider that this provision applies to the common case in which an occupying owner transfers the property to another person reserving such a lease for himself.
>
> Nor do we apply it where the transfer is made on condition that the transferee grants him such a lease at less than a rack rent. Where this is

[57] There could be a transfer of a leasehold interest and a sub-lease back; but for simplicity I refer to a freehold and lease. Further consideration is needed if the land is not in England or Wales.

> done it is the transferee who grants the lease and for this the transfer is at least full consideration.

The same point was made in former SP E10:

> You were concerned that a vendor of property who wished to retain a lease for his life might be barred from the relief afforded by the exception for leases granted for full consideration if the creation of the lease was by way of a reservation out of the interest conveyed rather than by a separate grant of the leasehold interest. I can confirm that we would not seek to exclude relief solely on these grounds. Whether or not full consideration is given is a matter which depends upon the facts of the individual case, but for this purpose we would take into account a reduction in the price obtained by the vendor because of the reservation of the leasehold interest.

The Manual passage is not in the current IHT Manual. The SP is now described as "obsolete and for information only."[58] There has been no announcement that HMRC practice has changed. It seems unrealistic to expect an established HMRC practice on the grant of a lease for life, as it would not arise very often.

App. 4.8 CGT market value rule

Section 17(1) TCGA provides:

> Subject to the provisions of this Act, a person's acquisition or disposal of an asset shall for the purposes of this Act be deemed to be for a consideration equal to the market value of the asset—

I refer to this as the **"CGT market value rule"** (or where it is necessary to distinguish this rule from other market value rules, "the s.17 market value rule").

One might identify two deemings here:

(1) If the disposal/acquisition is *not* made for consideration:
  (a) it is deemed to be made for consideration, and
  (b) the value of the consideration is deemed to be market value

(2) If the disposal/acquisition *is* made for consideration, but the value of the consideration is not market value, the value of the consideration is deemed to be market value

[58] HMRC, "Obsolete statements relating to Inheritance Tax" (2014) *https://www.gov.uk/government/publications/obsolete-statements-relating-to-inheritance-tax-also-applicable-where-tax-charged-is-capital-transfer-tax*

Section 17(1) then sets out 7 circumstances where the CGT market value rule applies:

> (a) where he acquires or, as the case may be, disposes of the asset otherwise than by way of a bargain made at arm's length, and in particular where he acquires or disposes of it
> [i] by way of gift or
> [ii] on a transfer into settlement by a settlor or
> [iii] by way of distribution from a company in respect of shares in the company, or
>
> (b) where he acquires or, as the case may be, disposes of the asset
> [i] wholly or partly for a consideration that cannot be valued,
> [ii] or in connection with his own or another's loss of office or employment or diminution of emoluments,
> [iii] or otherwise in consideration for or recognition of his or another's services or past services in any office or employment or of any other service rendered or to be rendered by him or another.

The s.17 CGT market value rule is one of many rules which deem a disposal to be made for market value consideration for CGT (**"deemed market value rules"**). For instance, for CGT purposes, a transfer from a trust to a beneficiary is deemed to be made for market value consideration.[59]

It can happen that

(1) a bargain is not at arm's length but

(2) the consideration (as computed for CGT purposes) is market value.

In that case the CGT market value rule obviously has no effect. The CG Manual after noting that a gratuitous benefit indicates a non-arm's length transaction, gives an example:

> **CG14544 Market Value: Gratuitous Benefit Conferred** [Jul 2019]
> The gratuitous benefit conferred on the other party to the transaction need not be a price difference. It could consist of other favourable terms of a contract, for example a very long time to pay the consideration. However, unless the price paid differs from market value, the application of the market value rule will have no direct effect [ie for CGT on the disposal].

See too 121.11.3 (Disclosing valuations).

[59] See 56.21.5(Disposal on trust termination).

App. 4.8.1 *Acquisition without disposal*

Section 17(2) TCGA provides an exception to the CGT market value rule:

> Subsection (1) shall not apply to the acquisition of an asset if—
> (a) there is no corresponding disposal of it, and
> (b) [i] there is no consideration in money or money's worth or
> [ii] the consideration is of an amount or value lower than the market value of the asset.

So in the case of an acquisition without a corresponding disposal, the CGT base cost is the lower of:
(1) the consideration (if any) and
(2) market value

That makes some sense: the reason for the (deemed) market value acquisition cost on an acquisition is that someone has a (deemed) market value disposal, which is in principle taxable. The rule is symmetrical. Where there is no corresponding disposal there is no reason to deem the acquisition cost to be market value.

Acquisition without corresponding disposal happens on the creation of an asset. Examples are:

Asset acquired	**Acquisition on**	**See para**
Right to compensation/damages	Breach of contract/tort	18.18.2
Debt	Making a loan	
Contractual chose in action	Entering into a contract	56.4.6
Shares	Share issue	64.29.2
Interest under a trust	Gift to trust/trustee appointment	-

App. 4.9 Market value/full consideration

App. 4.9.1 *MV/full consideration compared*

The expressions market value (MV) and full consideration are ubiquitous in tax and non-tax legislation.

Market value comes up regularly in the context of deemed disposals at market value for CGT purposes.

References to full consideration relevant to the themes of this book include (this is not a full list):

Topic	**See para**
Gift with Reservation (GWR)	78.7
Remittance conditions C and D	18.29.4
Pre-owned assets	83.21

Section 272(1) TCGA provides a commonsense definition of market value:

> In this Act "market value" in relation to any assets means the price which those assets might reasonably be expected to fetch on a sale in the open market.

Full consideration is never defined. Despite the lack of a definition I think there is little if any difference between the two terms. Comment on one is relevant to the other, and so I discuss them together in this section.

To ascertain market value, one must assume that there is an open market even if none exists; but the same is true in ascertaining full consideration.

For market value of specific types of benefit see:

Benefit	**See para**
Benefits generally	50.7
Beneficial loan	50.10.2
Use of land	50.12.2

Where there are statutory valuation rules, it is necessary to distinguish between market value and statutory value; statutory valuation rules are not discussed here.[60]

App. 4.9.2 *MV/arm's length bargain compared*

If a transaction has attributes of a bargain at arm's length,[61] the consideration is more likely to be market value. Thus the two concepts overlap in practice even though they are conceptually distinct.

In a letter published 18 May 1987, the Revenue say:

> ...Whether an arrangement is for full consideration will of course depend on the precise facts. But among the attributes of an acceptable arrangement would be the existence of a bargain
> [1] negotiated at arm's length
> [2] by parties who were independently advised
> [3] and which followed the normal commercial criteria in force at the time it was negotiated...
>
> You referred to potential difficulties in determining what amounts to "full consideration" for the donor's continued enjoyment of gifted chattels, particularly pictures and paintings... These may not be

[60] See 50.9 (Statutory valuation rules).

[61] See App.4.10 (Arm's length).

insuperable, as appears from the recent case of *IRC v Macpherson,*[62] and in any event it would be difficult to overturn an arm's length, commercial arrangement entered into by parties who were independently advised.[63]

App. 4.9.3 *Market value: Separate advice*

A characteristic of a transaction at arm's length is that the parties are separately advised. Parties seeking to ensure full consideration may take advantage of this by instructing separate valuers. Edward Manisty explains HMRC practice on what constitutes full consideration for the use of chattels, in circumstances where:

(1) A donor gave chattels to a donee
(2) The donor enjoyed use of the chattels
(3) The donor paid (what was intended to be) full consideration for the use, to avoid what would otherwise be a reservation of benefit.[64]

Although the Revenue was unable provide any definitive comment, the following has emerged from correspondence:-

(1) *The need for separate advice*

(a) In reviewing the adequacy of consideration paid by the donor for the benefits enjoyed by him the Revenue attach great importance to the parties, and in particular the donee, having the benefit of entirely independant advice from agents familiar with relevant sectors of the art market, with market fluctuations in relation to relevant chattels, and with current trends relating to the letting or loan of such chattels.

(b) The Capital Taxes Office accept there can be no absolute requirement that the donor must take separate advice. However, they regard it as crucial that the parties are able to demonstrate that the arrangements were made and maintained on an "arm's length" basis. They observe that the chances of the Revenue's requirements being met in this respect will be very much stronger if both sides are so separately advised.

(c) The Capital Taxes Office have confirmed the importance they attribute to

[62] In *Macpherson*, trustees agreed that a beneficiary should have use of valuable paintings for 14 years, at a rent of £60 p/a, the beneficiary undertaking their care and insurance. The Revenue conceded this was a transaction which might have been made by unconnected parties, and not intended to confer gratuitous benefit; see [1985] STC 471. The dispute in *Macpherson* concerned associated operations; see 74.14 (Relevant operation).

[63] Christie's Bulletin (Autumn 1995). The article states: "The Capital Taxes Office have seen this article in draft and have no objection to it."

[64] See para 6 sch 20 FA 1986, discussed at 78.7 (Full consideration exemption).

> the agents instructed receiving proper instructions. This will normally involve the agents having before them a recent valuation of the open market value of the chattels concerned prepared by a valuer experienced in evaluating chattels of the kind in question on that basis with a first draft of the proposed lease/licence. The importance of preserving such instructions and other material relating to the valuation exercise is self evident.

The GWR full consideration exemption is a cliff-edge rule: GWR operates if the payment made is anything less than full consideration. Accordingly the cost of instructing two valuers may be worthwhile. That is not to say that two valuers are appropriate in every case where market value/full consideration is an issue. An alternative may be to instruct one joint valuer.

The instructions to the valuer(s) are as important as the valuation itself, and will be disclosed to HMRC, in the event of a dispute, together with the valuation.

App. 4.9.4 *Full consideration range*

References to "the" market value might suggest there is a single price which assets may be expected to fetch. In practice there is usually a range of values; and anything within the range may be said to be market value. This mitigates the cliff-edge nature of rules requiring a disposal for full consideration, such as the GWR full consideration exemption. HMRC agree. RI 55 provides:

> ... we do recognise that there is no single value at which consideration can be fixed as "full". Rather, we accept that what constitutes full consideration in any case lies within a range of values reflecting normal valuation tolerances, and that any amount within that range can be accepted as satisfying the para 6(1)(a) [sch 20 FA 1986, GWR] test.

The extent of the market value range depends on the asset; some assets may be valued precisely, or within a narrow range, and others will have a wide market value range.

Thus there is no real difference between MV/full consideration.

App. 4.9.5 *Market value: use of chattel*

Manisty explains HMRC views on what constitutes full consideration for the use of chattels:

(a) The Revenue accept that currently available evidence relating to the loan of chattels to or by public museums or by businesses established to loan chattels forming part of their stock in trade on a commercial basis to third parties is scarce and hence of little value in assessing the adequacy of the consideration paid by a donor for his continued retention of chattels in a GWR situation where it is desired to take advantage of [para 6 sch 20 FA 1986] dispensation.

(b) However, the suggestion - which has been inferred from *IRC v Macpherson*[65] - that if the donor assumes responsibility for the housing, preservation and insurance of the chattels this of itself is likely to amount to "full" consideration, receives no support from the Capital Taxes Office.

As already mentioned, the Official view is that an "arm's length" situation must be assumed if the requirements of paragraph 6 are to be fulfilled. In the Capital Taxes Office's eyes this means that neither side muse be seen to be doing the other any favours, and, in particular, that it must not be assumed in establishing the consideration to be paid by the donor that the new owner of the chattels may find possession of them a burden. He must be assumed to be willing and able to preserve and insure them: the "arm's length" hypothesis also involves assuming that the new owner would not willingly allow any third party to enjoy them unless that party were to shoulder these obligations and on top of this pay a rent for their use and enjoyment.[66] Unless such criteria are observed, the Revenue perceive no benefit so the donee of the ownership of gifted property, which is of undoubted value in the marketplace, and would not be willing to accept that the arrangements whereby the donor retains them can meet the required "arm's length" test.

(c) However, the Revenue accept that if the donor is shown to have assumed the burdens of housing, preserving and fully insuring the chattels, plus paying an appropriate (reasonable) rent ascertained and maintained by reference to current capital value of the chattels, this will "probably" (a customary Revenue precautionary word used in the giving of hypothetical advice of this kind) satisfy the requirements of [para 6 sch 20 FA 1986].

(d) As to the quantum of the rent, although the Capital Taxes Office reject any inference that might be drawn from *IRC v Macpherson* that this may be purely nominal, they have indicated that the appropriate percentage to be fixed by reference to capital value, and reviewed periodically, is not likely to be very high.

They have confirmed that the relevant percentage is likely to be greater if the chattels in question provide an element of utility and/or may depreciate in as a result of enjoyment of them pursuant to the terms of the relevant lease/licence.

Somewhat more controversially the Revenue suggest that circumstances might justify the payment of a "premium rent" for particularly important artefacts to reflect that an '"arm's length" lessee/licensee might be prepared to pay such a premium rent for the privilege of enjoying such a work of art. Although support for this line would seem sparse at the present time, this is a factor that agents instructed to negotiate full consideration for the purposes of leases or licenses of particularly important items designed to fulfil the criteria of [para 6 sch 20 FA 1986], must have in mind.

HMRC had argued that the industry standard guideline for works of art (market rent = 1% of capital value, or less for very valuable assets) is too low.[67] Valuation experts disagreed. Presumably the 2017 statutory

[65] See footnote above.

[66] Author's footnote; this is not correct.

[67] See App.4.9 (Market value/full consideration).

valuation rule reflected a realisation that they would lose that argument.[68]

App. 4.10 Arm's length

App. 4.10.1 *Why "arm's length" matters*

The term "arm's length"[69] is found in a variety of expressions:[70]

Expression	**Topic**	**See para**
Disposal:		
by way of a bargain made at arm's length	Deemed market value	App.4.8
under a bargain at arm's length	Hold-over relief	57.32
Transaction:		
entered into at arm's length	Capital payment: s.87	61.7.4
entered into on arm's length terms	Tainting protected trust	92.5.1
at arm's length	IHT arm's length transaction relief	74.13

These are not exactly the same, but they share the concept of "arm's length".

App. 4.10.2 *Arm's length: Meaning*

In *Mansworth v Jelley*:[71]

> the phrase "bargain at arm's length" ... connotes a transaction between two parties with separate and distinct interests who have each agreed terms (actually or inferentially) with a mind solely to his own respective interests.

Between transactions which obviously are/are not arm's length there is a grey area where the law must seek to find the dividing line.

Since one is looking into the mind of the parties to see if they agreed terms in their own interests, the test is subjective. HMRC agree. The CG Manual provides:

> **CG14545 Market Value Rule: Objective Indicators** [Jul 2019]
> The test which must be satisfied is subjective: the test is whether there was an intention to confer a gratuitous benefit or 'give bounty'.
>
> **CG14542 Market Value Rule: Subjective Intention Test** [Jul 2019]
> A transaction is 'otherwise than by way of a bargain made at arm's

[68] See 50.11 (Use of chattel).

[69] Not "arms' length": one arm is all that is required.

[70] Of course this is not a full list.

[71] [2002] STC 1013 at [13].

> length' when one of the persons involved in the transaction does not intend to get the best deal for themselves ... . That person enters into the transaction with the subjective intention of giving some gratuitous benefit to the other person.

There is no difference between the formulation in *Mansworth* (a "sole interests" test) and the formulation in the Manual (a "bounty" test), they come to the same thing; though it is better to adopt the language used in the case law.

Whether a transaction is at arm's length is a question of fact.[72]

App. 4.10.3 *Arm's length factors*

In the textbook *Capital Gains Tax*:[73]

> it can perhaps be suggested that the following matters would be taken into account (though the list may not be exhaustive):
> 1. the presence or absence of bona fide negotiation between the parties as to the terms of the transaction (including particularly the consideration);
> 2. the degree to which the terms of the transaction compare with those found in similar commercial transactions;
> 3. whether the parties have separate legal or other professional representation;
> 4. the relationship between the parties independently of the transaction in question; and
> 5. the character of any comparable prior dealings between the parties.

Nader v HMRC cites this and continues:[74]

> the factors listed in *Spencer-Nairn*[75] and the observations made by Lightman J in *Mansworth v Jelley* are not rules of law but simply helpful factors and guidance to be taken into account. Ultimately the question is an evaluative exercise taking account of all the relevant facts and circumstances of the particular case.

The significance of these factors varies from one case to the next. In a sale of land or a private company, for significant value, one would expect

[72] This is self evident, but if authority is needed, see *Narar v HMRC* [2018] UKFTT 294 (TC) at [180].

[73] Whiteman & Sherry, *Capital Gains Tax* (looseleaf) para 9.32.

[74] [2018] UKFTT 294 (TC) at [180].

[75] *IRC v Spencer-Nairn* [1991] STC 60 at p.75.

arm's length parties to have separate legal and valuation advice; that is needed, and normal practice. Absence of such advice would seem to indicate that the bargain is not at arm's length. (Though the existence of separate representation may be a more neutral factor). In the sale of simple assets, such as a chattel, or assets of lower value, one would not expect arm's length parties to have much legal or valuation advice, and its absence does not indicate a bargain is not at arm's length.

The CG Manual provides:

> **CG14545 Market Value Rule: Objective Indicators** [Jul 2019]
> There are objective pointers which may indicate the underlying intention. The following list (which is not exhaustive) suggests information which you may need to consider:
> [The manual paraphrases the five factors set out above and continues:]
> It is important to consider all of the available evidence.

App. 4.10.4 *Bad bargain*

The CG Manual continues:

> **CG14541: market value rule: at arm's length** [July 2019]
> This does not mean that a bad bargain cannot be a bargain made at arm's length.

The Manual gives two examples of bad bargains made at arm's length.[76] The first is a seller desperate to sell:

> For example Mr A may wish to sell his property quickly so that he can go and live in Malta. Mr B knows that Mr A wants to sell his property quickly so he offers him a low price for a quick sale. No-one else makes an offer. Mr A accepts the price Mr B has offered. This may not have been the best possible price which Mr A could have achieved if he had left the property on the market for longer but he was still trying to achieve the best deal possible for himself. It was a bargain made at arm's length.

The second example concerns information inequality: information is available to the purchaser, not to the seller. One might refer to that as a unilateral mistake:

> Another example where a bad bargain could nonetheless be a bargain

[76] The concept of bad bargain may be contrasted with "fair bargain"; see 39.35.3 ("Benefit").

> made at arm’s length is where one party to the transaction has better information about the asset than another. For example Mrs S may sell a picture from her attic to Mr T for £500. Mr T, who is an art dealer, knows that the picture is worth £5,000. There has been a bargain with both people trying to get the best deal for themselves. Again, this is a bargain made at arm’s length even if the price paid is not the ‘market value’ of the asset.[77]

Suppose in these cases the seller and buyer were connected persons. One applies the CGT market value rule, but what is the market value? Market value is assessed by reference to a hypothetical sale, but in considering that hypothetical sale, one does not assume (contrary to the facts) that
(1) In example 1, the seller Mr A is not desperate to sell
(2) In example 2, the seller Mrs S has the knowledge of an art dealer.

In the hypothetical sale, the hypothetical purchaser would pay no more than was actually paid in the actual sale; so it is suggested that the price actually received is in fact the market value.

App. 4.10.5 *Objective test*

We have noted above that “arm’s length” is a subjective test.

IHT arm’s length transaction relief[78] applies to a transaction between connected persons if it is:

> such as might be expected to be made in a transaction at arm’s length between persons not connected with each other

The point of the underlined words is to transfer what is normally a subjective test (“transaction at arm’s length”) into an objective test.

In *IRC v Spencer-Nairn*[79] the taxpayer sold asset worth £200k for £100k, to a connected person. The reason for the undervalue was that the taxpayer made a mistake relating to landlord and tenant legislation.[80] The mistake was a reasonable one because:
(1) The land was not attractive to an institutional investor, so there was a limited market.

[77] See 39.35.5 (Unintendedly bad bargain).

[78] See 74.13 (Arm’s length transaction relief); similar wording is found in the tainted donation rules.

[79] [1991] STC 60.

[80] It seems likely that the purchaser made the same mistake, but it does not matter whether the mistake was unilateral or bilateral.

(2) It was said that the value was too low to justify the cost of specialist professional advice (though a professional valuer no doubt would point out that if the seller had taken advice, it would have been worth it).
(3) The Special Commissioners found (the reader may think, somewhat implausibly) that the seller did not realise that the purchaser (a Jersey company) was owned or controlled by the son of the seller, and so a connected person.

On these (somewhat unusual) facts the Special Commissioners found that the transaction was what one would expect between unconnected persons, ie one would expect the seller to enter into a bad bargain.

One might say that the statutory wording did not really succeed in moving from a subjective test to an objective test, because the outcome still depended on subjective factors in the mind of the taxpayer. If the seller had actually known the relevant landlord and tenant law, and known that the land was worth £200k, the outcome would have been different. One might say that there is really little practical difference between the simple subjective test (arm's length) and the more wordy objective test ("such as might be expected to be made in a transaction at arm's length"). For if a bargain is at arm's length, it will surely be one which might be expected to be made at arm's length. Or if a bargain is one which "might be expected to be made at arm's length" then in practice one would expect it is made at arm's length.

App. 4.10.6 *Composite transactions*

The CG Manual provides:

> **CG14543 Market Value Rule: Apply To Each Transaction** [Jul 2019]
> The subjective intention test has to be applied to each individual transaction. If the terms of a transaction have been influenced by any other transaction or arrangement between the persons entering into the transaction then the parties may not be trying to reach the best possible deal from THAT PARTICULAR TRANSACTION. In these circumstances it is likely that one of the parties will have intended to confer a gratuitous benefit on the other as a result of that particular transaction, even if the larger, overall deal is not intended to do this. That particular transaction will be 'otherwise than by way of a bargain made at arm's length'. The other transactions within the wider deal would also have to be examined to see whether they passed the

> subjective intention test.

The Manual gives a straightforward example. Omitting irrelevant detail:[81]

> Mr B owns:
> (1) a house worth £100,000, which qualifies for private residence relief
> (2) adjacent fields worth £50,000
> Mr B agrees to sell the fields for £10,000 (an undervalue) on condition the purchaser buys the house for £140,000 (an overvalue)

The HMRC analysis is as follows:

> There are two separate transactions, the sale of the house and the sale of the fields
> Mr B gives a gratuitous benefit to the developer when he sells the fields for £10,000 because he knows they are worth more than this. Accordingly the transaction is 'otherwise than by way of a bargain made at arm's length' and the market value should be substituted.
> The developer gives a gratuitous benefit to Mr B when he buys the house for £140,000 because it is not worth this much. Accordingly this transaction is 'otherwise than by way of a bargain made at arm's length' and the market value of the house should be substituted.

This is an analysis which the FTT has repeatedly rejected. In *Bullivant Holdings v IRC*[82] the taxpayer acquired shares at a price which was less than the market value. He was able to do so because the shares had been acquired as part of a composite transaction in which the taxpayer's counterparty had obtained a benefit by virtue of another part of the transaction. The taxpayer's argument that the undervalue meant that the shares had not been acquired by way of a bargain made at arm's length failed, because there was no element of bounty involved in the seller's agreement to sell the subject shares at an undervalue:

> A process under which a party has to yield in respect of one part of a composite transaction in order to obtain the much desired benefits of

[81] The example in full, including its irrelevant detail, is as follows:
"Mr B owns a house with a walled garden and five adjacent fields. A developer wishes to buy all the property, demolish the house and build a sports centre and mini golf course. The market value of the house and garden is £100,000 and of the fields is £50,000.
Mr B agrees to sell the fields for £10,000 on condition the developer buys the house for £140,000 (Mr B will qualify for private residence relief)."

[82] [1988] STC 905.

> another part of the same transaction is of the essence of a genuine commercial bargain.

In *Conegate v HMRC*:[83]

> 85. ... it can be relevant to look at the overall or composite bargain reached when considering whether a party to a specific transaction was acting solely in his own interests. We accept that, as in *Bullivant Holdings*, there can be circumstances in which a person who is acting in his own interests might reach an apparently poor deal when looking at an individual transaction in isolation, but can be seen to be agreeing to that poor deal only in order to achieve a much better bargain overall.
> 86. So, in looking at the Appellant's acquisition or disposal of shares, we consider that the test is whether the Appellant agreed the terms of that acquisition or disposal with a mind to its own interests. In considering whether the Appellant has acted solely in its own interests, we can have regard to the overall bargain of which the specific transaction forms a part.

But the taxpayer in the Manual's house/fields example should fail for a different reason. Assuming there are two distinct contracts,[84] the two are clearly contractually linked. The consideration for entering into the contract to sell the fields at an undervalue includes the purchaser's promise to enter into the contract to buy the house at an overvalue. The consideration for the sale of the fields is £50k, not £10k.

App. 4.10.7 *Shareholder/co transaction*

The CG Manual provides:

> **CG14547 Market Value Rule: Control** [Jul 2019]
> Where one of the parties to a transaction is controlled by another person the controlled party may confer a gratuitous benefit on the other party to the transaction on the directions of the controlling person. The controlling person need not be a party to the particular transaction. But if they have exercised control so that the intention of the controlled person is to confer a gratuitous benefit by the transaction then it will have been carried out otherwise than by way of a bargain made at arm's length. For example the parent company of a group may have negotiated an overall deal to sell part of the group's business to an unconnected

[83] [2018] UKFTT 82 (TC).

[84] If there is a single contract, for the sale of two assets, the analysis is different but the outcome is the same: the parties apportionment of the total consideration between the two assets is not in good faith and does not bind HMRC.

> third party. As part of the deal one of the subsidiary companies sells two brand names at undervalue to the third party. In that particular transaction the intention of the subsidiary company was to confer a gratuitous benefit on the third party, because it was directed to do so by its parent company.
> Transactions between a company and its controlling shareholders may or may not be bargains made at arm's length. Where there is both an acquisition and a disposal the connected persons rules apply. Otherwise the subjective intention test must be applied.

App. 4.10.8 *Share subscription at overvalue*

The CG Manual provides:

> **CG14548 Market Value Rule: Share Subscriptions** [Jul 2019]
> Transactions between a company and its controlling shareholders may also be otherwise than by way of a bargain made at arm's length when the gratuitous benefit of the transaction is in the company's favour.
> EXAMPLE
> Company A is controlled by two people X and Y who each own 40 per cent of the issued share capital. Company A has not been trading profitably and has borrowed £100,000 from X and £50,000 from Y. Company T makes an offer to buy Company A for £3,000 on condition that it does not have any outstanding borrowings.
> Company A then issues 150 shares, 100 to X for £100,000 and 50 to Y for £50,000. Company A uses the money it receives for the shares to pay back its debts.
> The shareholders then sell all their shares to Company T and X and Y each claim a loss on the disposal of their shares.

The HMRC analysis is as follows:

> The purchases[85] of the 150 shares in Company A were otherwise than by way of bargains made at arm's length as X and Y purchased the shares for 150,000 knowing that they were not worth that much. They conferred a gratuitous benefit on Company A by purchasing its shares at overvalue.
> X and Y must each use the market value of their new shares at the date of issue as their acquisition cost.

Is that right? On the facts given, the bargain was at arm's length, since X

[85] Author's footnote: The apt company law term is acquisition, or issue, not purchase; but it does not matter.

and Y procured the repayment of their debt which was otherwise (more or less) worthless. Discuss.[86]

App. 4.10.9 *Deemed non-arm's length*

Section 18 TCGA provides:

> (1) This section shall apply where a person acquires an asset and the person making the disposal is connected with him.
> (2) Without prejudice to the generality of section 17(1) the person acquiring the asset and the person making the disposal shall be treated as parties to a transaction otherwise than by way of a bargain made at arm's length.

This only applies for CGT purposes. It switches on the CGT market value rule.[87]

App. 4.11 Market value adjustment clause

If values are uncertain, the parties may be in a quandary. Consider, say, a sale from an individual to a trust:

(1) If the trust pays too little:
  (a) The seller (if not the settlor) may become a settlor.
  (b) If the seller is the settlor, the sale may taint the trust.
  (c) The seller may make a transfer of value.
  (d) Assuming a sale between connected persons, CGT on the sale is computed by reference to market value, not the agreed price.[88]

(2) If the trust pays too much, there may be a benefit/capital payment to the seller.

If the underpayment is unintended and accidental, the tax risks are only slight:

(1) A bona fide sale, even between connected persons, is itself evidence (not conclusive, of course) of market value.
(2) The tax charges in (1)(a)(b)(c) above do not arise.[89]

But there may be a concern that HMRC may argue that there is an element

[86] See too s.128(2) TCGA.

[87] See App.4.8 (CGT market value rule).

[88] See App.4.10.9 (Deemed non-arm's length).

[89] See (a) 99.28 (Transaction on favourable terms); (b) 92.5.1 (Gratuitous intent: Disregards (a)(b)); (c) 74.13 (Arm's length disposal relief).

of gratuitous intent.

A market-value adjustment clause is often proposed as a way to avoid or at least to reduce these risks.[90] SP 5/92 provides:

> 13 Solely for the purposes of TCGA 1992 sch 5 para 9(3)(a) [tainting], a provision in the document governing the transaction for an appropriate adjustment to the consideration where
> [a] the value agreed by the Revenue[91]
> differs from
> [b] the original consideration arrived at by an independent valuer and specified in the sale document
> is, in general, regarded as falling within the terms of the above definition of an arm's length transaction.
> The arm's length value of the transaction is to be determined in accordance with the principles set out in para 12 above.[92] This will usually correspond to the value for CGT purposes except, for example, where TCGA 1992 s 19 would apply [assets disposed of in a series of transactions].
> 14 It would also be necessary for the terms of the contract to provide for compensating interest at a commercial rate to be paid in either direction once the arm's length value is determined. For this purpose, the official rate of interest for [employment-related loan] purposes[93] will usually be regarded as equivalent to a commercial rate of interest, although a different rate may be accepted as so equivalent if the circumstances of a particular case warrant this treatment.
> 15 This practice is, however, subject to the consideration passing on

[90] A price adjustment clause would not avoid the CGT issue at (1)(d).

[91] The passive voice may conceal ambiguity because the actor may not be identified. By whom must the value be agreed? In addition to the Revenue, there will be at least two persons interested (seller and purchaser), and there may be others (settlor, beneficiaries). In some cases HMRC may not agree a value, or there may be no appeal against a Revenue view. These issues would need to be considered when drafting a market-value adjustment clause. (Contrast 6.22.3 (Para 26(2) employment-income test) where a similar point arises in connection with the phrase "if value were received".)

[92] Para 12 contains generalities which do not take us very far: "Each case depends on its own facts and circumstances but a transaction is, in general, regarded as being at arm's length where all the facts and circumstances of the transaction are such as might have been expected if the parties to the transaction had been independent persons dealing at arm's length ie dealing with each other in a normal commercial manner unaffected by any special relationship between them."

[93] See 40.5 (Official rate of interest).

> sale being realistically based, ie on a third party valuation by a qualified valuer, all the other terms of the transaction being at arm's length and the compensating interest being timeously paid. The position in a particular case depends on all the facts and circumstances.

Tax Bulletin 16 adds:

> "One-way" adjuster clauses are satisfactory, provided that the parties are not concerned that they might face a claim that a "capital payment" had been made by the trustees if more passed out of the trust than was received in return.

Although the SP is said to be "solely for the purposes of para 9(3)(a) sch 5 TCGA", the same practice ought to apply for other purposes.

There must be doubts about the merits of a market-value adjustment clause:

(1) The clause may be taken to suggest that the parties are uncertain as to value, and so might encourage HMRC investigation and challenge.
(2) The clause brings in uncertainty over the rights of the parties to the agreement. The uncertainty will last for the period, lengthy, and potentially indefinite,[94] during which HMRC may raise the valuation issue. It is true that in the absence of the clause there might be a different uncertainty as to the tax position. But an adjustment clause does not provide certainty, it merely moves it from one sphere (taxation) to another (private rights of the parties).
(3) If trustees enter into a contract with such a clause, their potential liability may complicate trust administration.
(4) An agreement with a market-value adjustment clause is unlikely to constitute a bargain at arm's length, as arm's length parties would not be expected to allow HMRC to determine or reopen a valuation.[95]

None of these objections are overwhelming, but do the advantages of the clause outweigh these disadvantages?

If used, the drafting of a market-value adjustment clause would require some thought. It may be necessary to consider foreign Revenue authorities as well as HMRC.

[94] Because "who is the settlor" questions could arise at any time in the future. ((One might perhaps put a time limit on claims under the MV adjustment clause, but that would reduce some of the hoped-for tax efficacy of the clause.)

[95] However in practice it may not often matter whether the agreement is a bargain at arm's length.

I am inclined to think that in a bona fide transaction a market-value adjustment clause is rarely needed, or wise; and in practice if it is used I suspect it is quickly forgotten, and neither good nor harm ensues.[96]

A clause of this kind was discussed in *Iny v HMRC*[97] where a company (Castlegold) worth £2m was sold to a friendly trust for a token price of £20k:

> 58. The agreement included a price adjustment clause, which was to come into effect only if the Inland Revenue should question the price of £20,000. In that eventuality, Castlegold's auditors were to value the shares as at the date of the agreement, the valuation to be made within the six months following the first indication by the Inland Revenue of its concern. The valuation so made was to be binding on the parties and, should the value so ascertained differ from £20,000, a payment, with interest, was to be made immediately in the appropriate direction. The Commissioners argue that the inclusion in the agreement of this clause is itself an indication that the bargain was not one at arm's length. [The taxpayer] argued that the clause was explicable as a means of achieving fairness between the seller and purchaser of an asset whose value was difficult to determine.

The FTT referred, unusually, to a US case, *King v USA*[98] where a sale agreement included an upwards adjustment of the price should the Internal Revenue Service contend, as it did, that the true value of the shares was greater. The Court said:

> "The district court [found] that the parties intended that the trusts pay a full and adequate consideration for the stock and that the clause was a proper means of overcoming the uncertainty in ascertaining the fair market value of the stock. The court concluded that there was an intention to cause the trusts to pay full and fair consideration for the stock and to make an actual adjustment of the price paid upon the event of a determination by the IRS. We agree. It is important to observe that the IRS does not dispute the contention that it was difficult, if not impossible, to accurately value the stock at the time of its transfer in 1969 and that the parties inserted the specific valuation paragraph in the agreement because the transaction was intended as a sale and not as a gift..."

[96] Assuming the sale is on the basis set out in SP 5/92 para 15, ie the price is ascertained by a qualified valuer.

[97] [2010] UKFTT 457 (TC).

[98] 545 F 2d 700 at [25].

The FTT were not impressed by that:

> 59. We are not persuaded that that case offers much useful guidance here. The determination of the true value, in *King v USA*, was to be made by the IRS. Here, if there should be a challenge by the Inland Revenue, it was Castlegold's auditors who were to make the valuation. It is difficult, if not impossible, to understand why, if the auditors might be required to make a valuation, possibly several years later, in the event of a challenge, they were not asked to make one shortly before the agreement for sale was concluded. As we have said, Mr Iny told us that he believed his family had taken advice on the value of his shares; if so, it is odd that he was unable to produce the advice and, if the advice was obtained from someone competent to give it, that it was thought necessary to provide for later adjustment of the price.[99] It is also odd, though perhaps no more, that the auditors' valuation was to be binding on the parties to the agreement, whether or not the Inland Revenue accepted it and whether or not it was upheld in an appeal such as the appeal before us.
> 60. In our view the conclusion to be drawn is not that the adjustment was designed to achieve a fair balance between the vendor and the purchaser, but that its purpose was to give the impression that a genuine attempt had been made to arrive at a fair price.

Similarly, *HMRC v Conran*[100] concerned a sale for £8.5m, with a "tax reducer clause" which reduced the purchase price to £1, if or so far as HMRC denied the purchaser CT relief for amortisation of the consideration.[101] The clause was held to support HMRC's argument that the payment of the purchase price was a distribution in respect of shares:

> ... The tax reducer clause was not consistent with a party acting at arm's length, or "as if at arm's length" so there could be no question of the transaction being rationalised as a mere bad bargain (i.e. paying £8.25m for an asset worth £1). We reject [the taxpayer's] argument that the tax reducer clause was consistent with the parties being concerned about market value and a reflection of the connected nature of the parties which had nothing to say about the question of capacity. On the contrary, it shows the price was driven, not by the value of the business,

[99] The £20k price was a token payment, there was no valuation, and no negotiation; see at [79].

[100] [2023] UKUT 166 (TCC) at [112]. For this case, see 30.6.2 (Para B: Other distributions).

[101] Under Sch 29 FA 2002.

> but by the extent of favourable tax treatment to [the purchaser].

App. 4.12 Disposition conditional on tax consequences

A related topic is a provision which says that the validity of a disposition is dependent on it having a certain tax effect. In *Glowacki v HMRC*[102] a Deed of Variation provided:

> if the effectiveness of the variations in Clause 1 of this Deed is challenged by or on behalf of [HMRC] and either
>
> (1) [the parties] ... decide not to contest (or at any time decide not to continue contesting) that challenge by appeal or otherwise ... or
>
> (2) the result of any such appeal or proceedings is in favour of the Revenue challenge and such challenge is upheld—
>
> then ... the variations in [specified] Clauses of this Deed shall be deemed to be and always to have been without effect

The deed of variation (inevitably) failed to have the intended tax effect, and (without further discussion) it was held to be void. But as is the case for market value adjustment clauses, there must be doubts about the merits of clauses of this kind.

App. 5.4.1 Does objective/subjective matter
App. 5.5 Commercial/view to profit: Tax motive
App. 5.5.1 Intention to get loss relief

App. 5.1 Commercial basis/view to profit

This appendix considers the terms “commercial” and “view to profit”.

Statute frequently refers to a trade or business carried on (1) on a commercial basis and (2) with a view to profit: the two expressions are used in tandem. This is so common that I do not attempt to provide a list: a short list would be of little value, and a full list is impossible.

TAARs often refer to a transaction or arrangement made (1) for commercial reasons as well as (2) not for tax avoidance/advantage.[1] There is (more or less) no difference between “for commercial reasons” and “on a commercial basis” except that the former is more apt to describe a single transaction, and the latter for a continuing business activity.

Partnership law refers to carrying on business with a view to profit (without expressly referring to commerciality).[2]

[1] For a list, see 3.2.1 (Types of unallowable purpose).

[2] If the PA 1890 were drafted today, a commerciality test might have been included; but as will be seen, it makes little difference.

The word "commercial" is also identified as an ingredient or characteristic of other fundamental tax concepts, such as arm's length, trade, and "bounty".

Of course there are differences of wording and of context. But there are common underlying concepts, so commerciality/profitability are best addressed together, rather than in any particular context in which they may arise.

This topic has been a fruitful source of litigation.[3]

App. 5.1.1 *Trade/commercial/profit compared*

For illustration, consider s.66 ITA which provides:

> (1) Trade loss relief against general income for a loss made in a trade in a tax year is not available unless the trade is commercial.
> (2) The trade is commercial if it is carried on throughout the basis period for the tax year—
> (a) on a commercial basis, and
> (b) with a view to the realisation of profits of the trade.

The questions which arise here are:

(1) Is there a trade (the **"trading test"**)

(2) Is the trade carried on on a commercial basis (the **"commerciality test")**

(3) Is the trade carried on with a view to the realisation of profits (the **"profitability test"**)

The questions are conceptually distinct, but there is such a large degree of overlap that they seem like three ways of asking the same question.

Section 66 ITA assumes that an activity could be a trade even if it is not carried on on a commercial basis or with a view to profit. That seems far-fetched; but it depends on what is meant by commercial.[4]

If there is no view to profit, the trade is not likely to be conducted on a commercial basis; and vice versa. But one can devise instances where one test is satisfied and not the other.

Examples of a business with a view to profit but not commercial are:

[3] There have many first instance cases, turning on their own facts, and of limited or no general interest; but in addition to the cases cited in this appendix, see: *Beacon Estates (Chepstow) Ltd v HMRC* [2014] UKFTT 686 (TC); *Rowbottom v HMRC* [2016] UKFTT 9 (TC); *Scambler v HMRC* [2017] UKUT 1 (TCC).

[4] See App.2.23.8 (Trade: Commerciality).

(1) A person invests 100 with a view to receiving 101 in 10 year's time.
(2) A person provides their services at an undervalue, perhaps for philanthropic reasons.

A possible example of a business which might be commercial without a view to profit, if it has some other commercial benefit, a loss-leader perhaps, or generating a tax advantage (if that is commercial).

In the event of a dispute, HMRC are right in principle to argue on all 3 issues, as if they concede on trade, say, they have gone some way towards conceding on commerciality/profitability.

App. 5.1.2 *Loss relief: Policy background*

The Royal Commission Report on the Taxation of Profits and Income provides:

> 489. Criticism of the practical results of the right of set-off [of losses] concentrates mainly on the case of the "hobby-farmer", the man who, enjoying a substantial income from other sources, engages in farming as a part-time activity. It is said that he readily incurs farming losses because they are carried at the marginal rate of tax on his other income. As to the balance that comes out of his own pocket, various reasons are suggested why he may be indifferent to that: the supply of agricultural produce for his home consumption, the prospect of ultimately realising a capital profit on the sale of his farm, the value of which he has improved by liberal expenditure, the amusement that he derives from indulgence in his hobby, the attraction of a "hedge" against inflation.
> 490. No doubt there is something in all this. Even if farming is not the only part-time business activity which may have an element of hobby about it, it is the one that has attracted most attention. It is possible to imagine heavy expenditure on income account ripening into an appreciable gain on capital account. Though the Revenue requires farm produced consumed to be credited at cost for tax purposes, it is possible to imagine that the figures taken for cost cover some element of personal benefit, apart from the mere right of access to the supply. ...
> 494. In the result we have come to the conclusion that the complaints against the losses of the hobby-farmer are probably exaggerated and that nothing more is required than a small amendment of the existing tax code which will have the effect of making it more difficult for any abuses to be maintained or to step in. The step that we recommend is that the term "husbandry" in the statutory definition of "farm land" and "farming" in Section 526(1) Income Tax Act, 1952, should be

> strengthened by defining it as husbandry "carried on on a commercial basis and with a view to the realisation of profits", and that the term "market garden land" in the same section should be amended correspondingly by inserting after the words "for the sale of produce" the words "on a commercial basis and with a view to the realisation of profits"...
> 496. It will appear from what we have said above that we should not expect our recommendation to bring about any considerable change in the present position, or markedly to reduce the volume of loss claims in respect of out of court claims in respect of farming activities which can be seen clearly to lack commercial inspiration and to be nothing more than hobbies or private amenities.
> 497. Other activities than farming—for instance, spare-time or hobby shops or businesses—are capable of raising similar problems, though they are likely to offer less practical consolations for loss incurred. If at any time loss claims in respect of them were found to raise a serious problem, a remedy on the same lines as that which we have recommended in the case of farming ought to be considered.

Heathcoat-Amory, then Chancellor of the Exchequer, stated in Parliament:

> This Clause[5] is not designed to catch any undertaking which is run as a serious business, even if it is not very successfully managed. We are after the extreme cases which do not justify the term "farming undertaking", in which expenditure very greatly exceeds income or any possible income which can ever be made and in which, however long the period, no degree of profitability can ever be reached. ... no genuine farming enterprise, in which the aim is to run as efficiently and productively as possible, with the long-term purpose of earning a profit, can possibly be endangered by the Clause.[6]

A provision originally aimed at hobby farming losses has been used in the HMRC attack on film schemes designed to generate allowable losses.

App. 5.2 Commercial

App. 5.2.1 *A multi-factorial test*

"Commercial" is an imprecise word. Readers who struggle to comprehend it may take comfort from the comment of Viscount Dilhorne:

[5] Section 20 FA 1960, which is the predecessor of s.66 ITA.

[6] *http://hansard.millbanksystems.com/commons/1960/may/24/clause-18-restriction-of-relief-for*

> What exactly is comprehended in the phrase ... 'a bona fide commercial transaction', I do not know.[7]

The epithet "genuine" (a plain English equivalent for bona fide) does not help.[8]

It is considered that there is no single factor which determines what is "commercial" but a number of factors may indicate one way or the other. In other words, there is a multi-factorial test.

For an interesting empirical study of how the word commercial is understood, see Creative Commons, *Defining "Noncommercial"A Study of How the Online Population Understands "Noncommercial Use"*.[9]

Some more specialist issues are discussed in the context of the ToA motive defence; see 38.5.1 (Making/managing investments); 58.5.2 (Commercial: Whose viewpoint?).

App. 5.2.2 *Bounty (gratuitous intent)*

A transaction made with bounty (gratuitous intent) is not commercial.[10] By contrast, a transfer intended to make money is commercial: see below.

For instance, a gift to a trust for the benefit of the settlor's family is not a commercial transaction. The same applies even if the settlor is the principal beneficiary, and the trust is revocable. By contrast, a transfer of

[7] *IRC v Plummer* 54 TC 1 at p.48. Cf *IRC v Goodwin* 50 TC 583 at p.598.

[8] See 3.21.3 ("Genuine").

[9] *http://mirrors.creativecommons.org/defining-noncommercial/Defining_Noncommercial_fullreport.pdf* (2009)

[10] *Bulmer v IRC* [1967] Ch 145, citing *IRC v Goodwin* 50 TC 583 at p.607. HMRC adopt this approach in Venture Capital Schemes Manual, in the context of the requirement in s.165 ITA that "The relevant shares must be subscribed for by the investor for genuine commercial reasons...":

VCM11040. EIS: income tax relief: the investor: no tax avoidance [Sep 2017]

Commerciality

This requirement rules out any subscription which is motivated by considerations of benevolence. This could be the case if, for example, the company were the proprietor of an unsuccessful professional football club and a supporter of the club paid a large premium for shares in the company; that may well [interestingly, the text formerly said *would clearly*] not be a commercial subscription. Similarly, if the company is owned by a person whom the investor wishes to benefit, and the investor pays a large premium for the shares with the object of increasing the value of the other person's shares, that too would not be a commercial subscription. Deathbed investments are unlikely to be made for genuine commercial reasons."

assets to a company wholly-owned by the transferor may be a commercial transaction even if the transfer is for less than full (or nil) consideration, and a transfer to an employee trust may be commercial.[11]

App. 5.2.3 *Business transaction*

In *Carvill v IRC*:

> There was not much difference between the parties about what constituted a bona fide commercial transaction. [Counsel for the taxpayer] contended that this was any genuine transaction which implements or facilitates a business end; [counsel for HMRC] contended that the transaction must be in furtherance of commerce, ie a trade or business. I shall follow these two meanings.[12]

This seems a fair paraphrase though one should always beware of a paraphrase. At first sight it does not seem to take us very far because the word "business" is notoriously wide and slippery. Nevertheless, one can suggest examples of transactions which should not be classified as commercial because they are not in furtherance of a business:
(1) A transfer to a trust to avoid the hazards of war.[13]
(2) A transfer to avoid claims by non-business creditors, eg a claim on divorce or forced heirship.

These transfers involve an element of bounty (and may be classified as non-commercial for that reason) but in any event they should be classified as non-commercial transactions because they are not in furtherance of a business purpose.

App. 5.2.4 *Amateur/dilettante trade*

In *Wannell v Rothwell*:[14]

> I was not shown any authority in which the Court has considered the expression "on a commercial basis", but it was suggested that the best guide is to view "commercial" as the antithesis of "uncommercial", and I do find that a useful approach.

[11] This is supported by *Wannell v Rothwell* 68 TC 719 at p.733B; see too *IRC v Levy* 56 TC 68 at p.87, a case on the meaning of settlement-arrangement. The definition of settlement-arrangement does not include the word "commercial" but the case law requirement of bounty (gratuitous intent) overlaps with the concept of "commercial".

[12] [2000] STC (SCD) 143 at p.166.

[13] See 52.5 (Enactment history).

[14] 68 TC 719 at p.733.

I think the passage which follows is more useful:

> A trade may be conducted in an uncommercial way either because the terms of the trade are uncommercial (for instance, the hobby market-gardening enterprise where the prices of fruit and vegetables do not realistically reflect the overheads and variable cost of the enterprise) or because the way in which the trade is conducted is uncommercial in other respects (for instance, the hobby Art Gallery or Antique Shop where the opening hours are unpredictable and depend simply on the owner's convenience). The distinction is between a serious trader who, whatever his shortcomings in skill, experience or capital, is seriously interested in profit, and the amateur or dilettante. There may well be many borderline cases for the Commissioners to decide, and such borderline cases could as well occur in Bond Street as at a car boot sale.

The BI Manual provides:

> **BIM85705 uncommercial trades – not on a commercial basis** [Jan 2019]
> ... 'Commercial' is not the same as 'profitable'. We take it to mean, conducted in the way that we would expect a business of the same type to be carried on. A distinction may also be drawn between individual transactions and the trade itself; individual transactions may have the character of commerciality but overall the way in which the trade is conducted may lack commerciality. Indeed, even where the trader is serious about what he does but does not act in the way someone in that type of trade would act, we take the view that the trade is not being conducted on a commercial basis. ... One important question to be addressed is whether there are any non-commercial reasons for becoming involved in a particular business, for example, has the trader a general interest in sailing which might explain the venture into yacht chartering.

App. 5.2.5 *Commercial: Profit motive*

In *Samarkand Film Partnership No 3 v HMRC*:[15]

> "Commercial" and "with a view to profit" are two different tests but that does not mean that profit is irrelevant when considering whether a trade is being carried on on a commercial basis. ... the serious interest in a

[15] [2015] UKUT 211 (TCC) at [96]; the point was not discussed on appeal.

> profit is at the root of commerciality.[16]

The Court of Appeal agreed:[17]

> ... considerations of profitability cannot be divorced from an assessment of the commerciality of a business. In my judgment it is wrong to regard the profitability and commerciality tests in the legislation as mutually exclusive, and they necessarily overlap to an extent which will vary from case to case.

Again, in *Seven Individuals v HMRC*:[18]

> 40. ...As a matter of ordinary language to run a trade or business "on a commercial basis" suggests running the trade or business in a way that is at any rate designed to succeed as a commercial venture, that is one which is worth doing from a financial point of view. It is true that this means that there is an inevitable overlap between the commercial limb and profits limb, but the alternative would be to empty the commerciality limb of any connection with profit or profitability, when that is a central part of what would normally be understood by a reference to acting commercially...
> 46. ... I agree that a trader can fail the commerciality limb either because of a lack of commercial organisation ...or because of a lack of any interest in making money ... . But I do not think it follows that as long as the trade is sufficiently organised and the trader hopes to make a profit ... that is always enough. Let us assume that a trade is well organised. The question whether such a trade is being carried on on commercial lines is not to my mind answered simply by pointing to a hope by the trader to make profits. A trade run on commercial lines seems to me to be a trade run in the way that commercially-minded people run trades. Commercially-minded people are those with a serious interest in profits, or to put it another way, those with a serious interest in making a commercial success of the trade. If therefore a trade is run in a way in which no-one seriously interested in profits (or seriously interested in making a commercial success of the trade) would run it,

[16] Ambrose Bierce makes the same point in The Devil's Dictionary (1911) in his definition of "Merchant": "A commercial pursuit is one in which the thing pursued is the dollar."
Likewise *C&E v Morrison's Academy* [1978] STC 1: "I am not at all quite clear what is meant by a 'commercial element' if it is something different from the pursuit of profit...".

[17] [2017] EWCA Civ 77 at [90].

[18] [2017] UKUT 132 (TCC).

> that trade is not being run on commercial lines.

In *Seven Individuals v HMRC*:[19]

> A trade which lays out 100 in year 1 and recovers 101 in year 10 is a trade which makes a profit in the simple sense that its income exceeds its expenditure, yet it is unlikely that anyone with a serious interest in making a commercial success of the trade would regard that as a satisfactory return, even if it were virtually certain to happen.

App. 5.2.6 *Profit: Commerciality test*

In *Samarkand Film Partnership No 3 v HMRC*:[20]

> [96] ...[The FTT] were correct in regarding "profit" in the context of commerciality as a real, commercial profit, taking account of the value of money over time, and not simply an excess of income over receipts. [97] The FTT were, in our view, right to conclude that a trade that involved transactions that were intended to produce a loss in net present value terms, with no compensating collateral benefits, was not conducted on a commercial basis. No one who was seriously interested in running a business or trade on commercial lines would pay £10 for an income stream with a net present value of £7 unless there were some good reason to do so. Of course in this case the reason why the partnerships were willing to do this was because they believed that tax relief would be available to the partners.

App. 5.2.7 *Commercial: avoidance motive*

HMRC Unallowable Purpose Tests Draft Guidance states at para 10110:

> Often, a business will take the view that tax is a commercial cost and minimising it is a commercial aim. ... However, in deciding whether a "purpose test" is triggered, minimising tax is not regarded as a business or commercial purpose.

On the contrary, I would have thought that the only thing that matters, in business and indeed outside it, is post-tax profit. The fact that TAARs impose a commercial *and* a tax avoidance/advantage test also suggests that tax avoidance is or can be commercial matter, in the general sense of the word. But context can of course suggest that "commercial" reasons exclude tax advantages.

[19] [2017] UKUT 132 (TCC) at [54].

[20] [2015] UKUT 211 (TCC). The point was not discussed on appeal.

App. 5.3 A view to profit

This phrase originated in the definition of partnership[21] and (subject as always to context) the meaning should be the same in tax provisions.

The definition of partnership uses the expression "with a view *of* profit" whereas modern legislation uses the more contemporary phrase "with a view *to* profit". But nothing turns on the preposition; the two phrases have the same meaning.[22]

The BI Manual provides:

> The expression 'with a view of profit' distinguishes partnerships
> [1] from clubs and societies which do not have a profit seeking motive, and also
> [2] from arrangements only to share expenditure, where each person keeps their own income, for example some dentists or medical practitioners with joint surgeries, or some crop-sharing agreements.[23]

I would have thought that case [2] (expense sharing) is not a partnership because the persons are not carrying on business *in common*. But the end result is the same.

If there is no view of profit, there is no partnership in UK law. This issue may arise where a partnership is set up for tax rather than for commercial reasons.

App. 5.3.1 *With a view: Subjective test*

Macdonald v Dextra Accessories considered the meaning of "with a view to" in s.43 FA 1989 ("amounts ... held ... with a view to their becoming relevant emoluments"):

> the expression "with a view to" ... is a less specific expression than "for the sole purpose of…" or "with the principal or dominant intention of…"; and ... it suggests a degree of flexibility of meaning and application. That said, the word "view" plainly connotes some element (albeit undefined) of purpose, intention or contemplation.[24]

[21] See 85.5.2 ("View of profit"); 85.22.2 (LLP treated as partnership).

[22] This is self-evident, but if authority is needed, see *Ingenious Games LLP v HMRC* [2019] UKUT 226 (TCC) at [301].

[23] Author's footnote: barristers chambers are another example in this category

[24] 77 TC 146 at [64] (CA) approved at [18] (SC). This approach was applied in *Ingenious Games LLP v HMRC* [2019] UKUT 226 (TCC).

After some vacillation, the UT have decided that the test is a purely subjective one.[25]

App. 5.3.2 *View of partnership or of partners?*

In *Ingenious Games LLP v HMRC* [2019] UKUT 226 (TCC), a case on s.863 ITTOIA

> [338] The test is also to be applied at the level of the LLP. An LLP is a body corporate, and therefore a separate legal entity from its members. For the purposes of s 863 ITTOIA 2005 it is necessary to focus on the LLP, its business and the individuals who conduct that business on its behalf, rather than on the position of the LLP's members. This is in contrast with the position under s 2(1)(a) LLPA 2000, where the focus is on what view the members held at the point of incorporation

What matters is the controlling minds of the LLP (not the same as the members of the LLP).

The same applies to ordinary partnership (not a LLP). In *Samarkand Film Partnership No 3 and others v HMRC*:

> The availability of loss relief to the individual partners in their personal capacities cannot in my view be a relevant factor in assessing the commerciality of the partnership's business.[26]

This point should not apply to a sole trader (a non-partnership).

App. 5.3.3 *Mixed motives*

In *Ingenious Games LLP v HMRC*:[27]

> it will be sufficient for a taxpayer to show that there was an ancillary profit-making purpose,

And again:

> There is no need for profit to be the predominant aim. ... difficult questions can arise when any profit-making aim is subsidiary to other purposes. In those circumstances, it is necessary to consider at what point the line is crossed and there is in fact no view to profit. Some sort of 'reality check' is needed. It is necessary to identify whether there is

[25] *Ingenious Games LLP v HMRC* [2019] UKUT 226 (TCC) at [333].

[26] [2017] EWCA Civ 77 at [91].

[27] [2019] UKUT 226 (TCC) at [310].

> a 'real' intention rather than something that was not, in fact or reality, aimed for. ... Furthermore, an indifference to whether a profit is realised is not sufficient to meet the test.[28]

So:

> The question is whether there is a real and serious intention to make a profit. As noted at [344] and [345] below, the [objective] likelihood of profit may be an element of relevant evidence, but no more.[29]

App. 5.3.4 *What is profit*

In *Ingenious Games LLP v HMRC*:[30]

> 'profit' means an excess of (actual) income over expenses, that is the net amount remaining after paying out of the receipts of the business all the expenses incurred in obtaining those receipts, and that it is not determined by reference to particular methods of accounting computation.

But profit can only be determined by reference to some method of accounting. Profit is a commercial concept, and I would have thought that it should be determined in accordance with accountancy principles, ie UK GAAP or any other acceptable GAAP. A business operates with a view of profit if it expects to make a profits on accountancy principles, even though it expects to make a loss on tax principles, due say to capital allowances.

HMRC agree. The BI Manual provides:

> **BIM85710: not with a view to the realisation of profit** [Aug 2016]
> 'Profit' in this context is the commercial profit in the accounts, not the tax adjusted profit; that is, the profit before capital allowances but after depreciation and interest.

In *Ingenious Games LLP v HMRC*:[31]

> the amount of the profits intended to be realised by the venture does not matter unless it is, on a true analysis, *de minimis*.
> ... in determining whether there is a view to profit the court should not adopt or employ a purely quantitative analysis. The amount of the expected profit is only one of several factors to consider.

[28] at [333].

[29] at [340].

[30] [2019] UKUT 226 (TCC) at [303].

[31] [2019] UKUT 226 (TCC) at [304], [310].

App. 5.3.5 *A view to profit*

The BI Manual provides:

> **BIM85710: not with a view to the realisation of profit** [Aug 2016]
> ...
> There are two possible ways to displace the trader's assertion of expectation of profits: either it is not a reasonable expectation, or there is another reason for carrying on the trade.
> **It is not a reasonable expectation**
> You may be able to show that there is no possibility of profit ever regardless of however long the trade is carried on, so the expectation of profit is unfounded, by closely examining any business plan, profits projection or whatever is provided as the basis for the trader's expectations of profit. You are justified in pointing to past results when considering whether the trader's expectation of profit is reasonable...
> **There is another reason for carrying on the trade**
> A trader who makes losses with no realistic possibility of making a profit may have some other reason for carrying on the trade. For example, it may be that the trade is a hobby (which in itself may fall foul of the commercial basis part of the test see BIM85705) or gives the trader personal enjoyment. It may also be the case that the trader is simply seeking to offset personal expenditure or to increase the value of a capital asset.
> In the Special Commissioners' case of *Delian Enterprises v Ellis* [1999] SpC186 the Revenue was unable to prove that the trader was carrying on a hobby. This was specifically mentioned by the Special Commissioner as a factor in his decision. In another Special Commissioners' case *Brown v Richardson* [1997] SpC129 and TB31F the expressed intentions of the trader were not found to be conclusive. In this case the Special Commissioner found that the income generated was intended to offset expenditure rather than with a view to the realisation of profits.

App. 5.3.6 *Period of enquiry*

In *Ingenious Games LLP v HMRC*:[32]

> the law of partnership does not require a net gain over a determined period in order to establish that an activity is with a view to profit, noting that a partnership may, for example, incur initial losses during the start-up phase of its enterprise. It is sufficient that the enterprise is carried on with a view to profit in the future.

[32] [2019] UKUT 226 (TCC) at [310].

BI Manual provides:

> **BIM85710: not with a view to the realisation of profit** [Aug 2016]
> The criterion of the expectation of profit does not specify any period within which the trade must be expected to realise a profit and it is sufficient there is some realistic possibility of profit being earned at some future date, however distant. The fact that it is distant is not a ground for refusing relief. ...

App. 5.4 Reasonable expectation of profit

View to profit is a subjective test.

Statute occasionally refers to reasonable expectation of profit, which brings in an objective test, or an objective element. There is a variety of wording. It is helpful to set three sample provisions side by side as an illustration:

s.66 ITA **Trade loss relief**	**s.74 ITA** **Early trade losses relief**	**s.1(1) PA 1890** **Definition of partnership**
(1) Trade loss relief against general income for a loss made in a trade in a tax year is not available unless the trade is commercial.	(1) Early trade losses relief for a loss made by an individual in a trade in a tax year is not available unless the trade is commercial.	Partnership is the relation which subsists between persons carrying on a business in common
(2) The trade is commercial if it is carried on throughout the basis period for the tax year—	[identical]	
(a) on a commercial basis, and	[identical]	
(b) with a view to the realisation of profits of the trade.	(b) in such a way that profits of the trade could reasonably be expected to be made in the basis period or within a reasonable time afterwards.[33]	with a view of profit.
(3) If at any time a trade		

[33] The definition of "excluded company" in s.151 ITA is another example of this wording.

is carried on so as to afford a reasonable expectation of profit, it is treated as carried on at that time with a view to the realisation of profits.

There are (at least[34]) four possibilities, with different outcomes depending on whether one applies:

- the partnership test (view to profit)
- the s.74 test (reasonable expectation of profit)
- the s.66 test (view to profit + s.66(3)), which falls between the two

Case	**View to profit**	**Reasonable expect'n of profit**	**s.66 relief**	**s.74 relief**	**Partnership**
1	Yes	Yes	Yes	Yes	Yes
2	Yes	No	Yes	No	Yes
3	No	Yes	Yes	Yes	No
4	No	No	No	No	No

Section 74(1)(b) imposes an objective test. Whether the trader has a view to profit is not relevant. This would matter if a person carried on trade on a commercial basis, with a reasonable expectation of profit, but not with a view to profit; which seems highly unlikely even if logically possible.

It is possible that a trade which does not have a reasonable/objective expectation of profit is nevertheless carried on with a view to the realisation of profit: s.66(3) does not affect that.[35]

Case 2 arises if a person carried on a trade on a commercial basis but that profits could not reasonably be expected; it seems almost impossible, though perhaps not logically impossible.

App. 5.4.1 *Does objective/subjective matter*

I have some impatience with the whole objective/subjective distinction, which diverts lawyers in many contexts. The rival approaches of objective/subjective, or some combination of the two, so rarely produce a different outcome. That is especially so in the present context where the subjective test of view to profit is only part of a wider set of requirements which include objective requirements (trade/business, commerciality).

[34] To avoid too many permutations, assume that there is a trade or business carried on.

[35] If authority is needed, see *Seven Individuals v HMRC* [2017] UKUT 132 (TCC) at [35].

Ingeneous Games poses the example of a person who carries on a business to manufacture saddles for unicorns: even if he had deluded himself into having a subjective intention to make a profit, there would be no realistic or objective possibility of profit. Or so the Tribunal thought, perhaps unimaginatively. But does that actually happen? And if it did, would the saddler's trade be carried on on a commercial basis?

However that may be, adoption of a uniform test for all loss reliefs - and indeed in other tax contexts where similar language is used - would be a useful simplification.

App. 5.5 Commercial/view to profit: Tax motive

Tax motives may arise in the context of the commerciality test and the profitability test, but it is suggested that the principles are the same.

In *Newstead v Frost* a non-resident partnership was set up in order to convert (what would otherwise have been) UK source trading income into foreign source trading income taxed on the remittance basis. The Revenue contended:

(1) The business was carried on with a view to avoiding tax.
(2) Accordingly it was not carried on with a view to profit.

This was a hopeless argument: the premise was correct but the conclusion did not follow. HL dealt with it briefly:

> While it is clear that the partnership was formed with that object [tax avoidance], it must also have been formed with a view of profit. It was intended that profits should be made for if they were not made as a result of the taxpayer's activities, there would have been no tax to be avoided.[36]

That was a straightforward case of a partnership set up for mixed purposes. One of the purposes was to make a profit.

Again, in *Backman v R*:

> The question ... is whether the taxpayer can establish an intention to make a profit, whether or not he was motivated by tax considerations.[37]

On the other hand, if the *sole* reason for an activity is to give a tax advantage, and there is *no* contemplation in the parties' minds that a profit would arise from carrying on the activity, then the activity could not be

[36] [1980] STC 123 at p.128.
[37] [2001] 3 ITLR 647 at [22].

said to be carried on with a view of profit (and it might not be said to be a business).[38]

This difficulty arises if, as in *Ingenious Games*, the only serious driver for profit is to meet a tax requirement (in that case, s.863 ITTOIA) so there was no pressure from the members of the LLP to make a profit. In other words, this was not a normal business motivated by the desire for profit. The LLP's sales memorandum was prepared on a 'bottom up' basis, starting with a modest profit and working backwards, rather than starting with expected revenues. These facts do not preclude a view to profit, but they make it harder to attain.

HMRC Unallowable Purpose Tests Draft Guidance states at para 10110:

> Often, a business will take the view that tax is a commercial cost and minimising it is a commercial aim. ... However, in deciding whether a "purpose test" is triggered, minimising tax is not regarded as a business or commercial purpose.

On the contrary, I would have thought that the only thing that matters, in business and indeed outside it, is post-tax profit. The fact that TAARs impose a commercial *and* a tax avoidance/advantage test also suggests that tax avoidance is or can be a commercial matter, in the general sense of the word. But context can of course suggest that "commercial" reasons exclude tax advantages.

App. 5.5.1 *Intention to get loss relief*

An intention to obtain loss relief is a special case. In *Samarkand,* a film scheme case, a partnership activity was uncommercial and not profitable if one ignored loss relief; but if one could take loss relief into account, it was profitable for the partners and no doubt commercial. But loss relief was not allowed as relevant consideration in assessing commerciality:

> In order to obtain loss relief, the partners have to show that the trade is commercial; but they can only do this if they assume their entitlement to obtain such relief, which is the very issue under consideration. In other words, the argument is circular and proves nothing. The question of commerciality must therefore be addressed without reference to the availability or not of loss relief to the individual partners.[39]

The reasoning is invalid as:

[38] This is self-evident; but if authority is needed, see *Backman v R* 3 ITLR 647 at [23].

[39] [2017] EWCA Civ 77 at [91].

(1) The taxpayer's argument was not circular.[40]
(2) The loss was a tax loss, not a commercial loss.

But the point is settled at all levels below the Supreme Court.

Similarly, loss relief would not be allowed as a relevant factor in deciding whether there was a view to profit.

[40] In order to show that the trade was commercial; the partners did not have to assume their entitlement to loss relief. They only had to show that they expected or hoped to obtain that relief.

APPENDIX SIX

BENEFICIAL OWNERSHIP/ENTITLEMENT

App. 6.1 Beneficial ownership: Meanings
App. 6.2 English-law beneficial ownership
App. 6.3 A technical term
App. 6.4 Beneficial v bare legal ownership
App. 6.4.1 Critique of case law
App. 6.5 Beneficial owner: Partnership
App. 6.6 Beneficial ownership: Scotland

App. 6.1 Beneficial ownership: Meanings

The expression "beneficial ownership" has (at least) three distinct meanings. We need terms to describe them and I coin the following terminology:

My Term	**Context**	**See para**
English-law beneficial ownership	Property/trust/general law	*Discussed here*
DTA beneficial ownership[1]	DTAs	108.10
Money-laundering ben. ownership	Money laundering	131.15

Discussion of meaning in one context has little (if any) relevance in other contexts. While an English law beneficial owner should normally be beneficial owner for DTA and money-laundering purposes, the converse is not the case. Meanings (2) and (3) are international law concepts, shared by civil lawyers, to whom English-law beneficial ownership, a common law concept, is unfamiliar.[2]

I had thought this was self-evident, and "if authority is needed" cited *Hargreaves Property Holdings v HMRC*:[3]

> ... determining beneficial entitlement to income can depend on the context in which the phrase appears... the decision in *Indofood* [a case on DTA beneficial ownership] is of no relevance in determining the meaning of the phrase where it appears in [s.993 ITA, (Interest

[1] This is sometimes called the "international fiscal meaning".

[2] This point is made para 10.4 of the commentary on OECD Model art 11; see 108.10.4 (DTA meaning: General).

[3] [2021] UKFTT 390 (TC) at [128]. [130].

withholding tax) where the English-law beneficial ownership meaning applies].

But in a surprising decision, the UT reversed the decision in *Hargreaves* and gave (what I call) the DTA meaning to reference to "beneficial ownership" in a UK tax statute.[4] The authorities discussed below were not cited. Further discussion should wait until the decision is final.

It would have been better to have three distinct expressions, but the usage is too well established to alter that, and context should show which meaning is intended.

App. 6.2 English-law beneficial ownership

Beneficial ownership is one of a cluster of terms which are synonymous, or at least which have no discernable differences:

Term
Equitable ownership
Beneficially entitled
Ownership

These terms are found in many contexts relevant to this book:

Context	**Term**	**See para**
FOTRA: Interest relief	Beneficial owner	27.5
FOTRA: IHT relief	Beneficial ownership	73.11
Groups: Definition of subsidiary	Beneficial ownership	64.26
Definition of estate for IHT	Beneficially entitled	74.2
Interest withholding tax	Beneficially entitled	26.23.3; 26.24; 26.29.1

The meaning is more conveniently considered as a discrete topic, rather than in any particular context in which it may arise.

Where the statutory term is beneficial ownership one might abbreviate it to ownership; but terminology is confused enough already without cutting that corner.

The reference to "English law" beneficial ownership is not entirely apt, as we are discussing the meaning in the context of tax statutes which are also part of the law of Scotland, and some might prefer to refer to the "common law meaning".

The meaning of beneficial ownership has often been discussed in the context of company groups. But the question can and does arise almost

[4] [2023] UKUT 120 (TCC).

anywhere, and it is a mistake to look at the group relief cases to the exclusion of cases and guidance in other contexts. Unfortunately the case law is in disarray and a number of contradictory dicta can be found.

In the discussion below I use the term beneficial ownership but the same applies to beneficial entitlement. Reference may also be made to discussion of the word "entitled" in the context of income recognition. The underlying issue is a similar one: in what circumstances do we recognise a person as the owner of an asset?[5]

App. 6.3 A technical term

In *Sainsbury v O'Connor*:[6]

> Although I might not, with Lord Diplock, have gone so far as to think that the expression "beneficial ownership" is a term of art, it is certainly one which has for several centuries had a very well-recognised meaning amongst property lawyers. And there can be no doubt that, in enacting a provision such as [what is now s.1154 CTA 2010, definition of subsidiary], Parliament must have intended to adopt that meaning.

That meaning must of course give way to context, but there is a natural meaning, and (apart from contexts such as international treaties, such as DTAs, and moneylaundering, where there is a definition) it is not often that the context alters that.[7]

Similarly, in *BCM Cayman v HMRC*: [8]

[5] See 15.2.1 (Receipt/entitlement basis of liability); 15.3 (Recognition/attribution: Analysis).

[6] 64 TC 208 at p.250, a case on group relief.

[7] In New Zealand, *Cooper v Pinney* expresses slightly more enthusiasm for the scope of the expression to vary according to context; [2023] NZCA 62 at [56], citing English and New Zealand cases; but I do not think there is ultimately much difference between these two views.

The CG Manual offers an example of a case where context shows 'beneficial' was used in a tax statute with a wider, DTA-style meaning. The former s.210(2) TCGA provided an exemption for life policies, if (in short) the person making the disposal was the original "beneficial owner". But trustees qualified for the exemption as they were the "beneficial owner" for this purpose. The CG Manual formerly provided:

> ***CG69055 Exemption for second hand policies: Disposals before 9 April 2003*** *[Feb 2010]*
>
> *... Where trustees took out a life insurance policy ... it could be accepted that they were the beneficial owners of the policy within the old s.210(2) TCGA.*

[8] [2023] EWCA Civ 1179 at [78].

> The concepts of fiduciary ownership and beneficial interest or ownership are concepts of domestic law, but not specifically of tax law.

App. 6.4 Beneficial v bare legal ownership

The antonym of English-law beneficial ownership is bare legal ownership. In *Sainsbury v O'Connor*:[9]

> [Beneficial ownership] means ownership for your own benefit as opposed to ownership as trustee for another. It exists either where there is no division of legal and beneficial ownership or where legal ownership is vested in one person and beneficial ownership or, which is the same thing, the equitable interest in the property in another.

To an English lawyer that seems self-evident, and does not take one very far.

Two further propositions seem reasonably clear. An asset remains in the beneficial ownership of a person even if it is subject to a mortgage or charge.[10] An asset is not in the beneficial ownership of a person if it is subject to a contract of sale, even a conditional contract.[11]

An asset remains in the beneficial ownership of an individual even if they have granted put and call options, according to *Sainsbury v O'Connor*.[12] That seems a somewhat technical distinction.

App. 6.4.1 *Critique of case law*

The common meaning of beneficial ownership is to denote the sum of all the rights which a person can have over an asset; that is, beneficial ownership is a bundle of rights, or if you prefer, beneficial ownership has a number of incidents.[13] In the case of shares, the bundle (or incidents) consists principally of the right to dividends, capital, votes, and rights of disposal.

One can make some dent in the usual array of rights or incidents and still be regarded as the owner. This explains why one remains beneficial owner

[9] 64 TC 208 at p.250, a case on group relief.

[10] *English Sewing Cotton v IRC* [1947] 1 All ER 679.

[11] *Wood Preservation v Prior* 45 TC 112.

[12] 64 TC 208.

[13] For discussion, start with Rostill, *Possession, relative title, and ownership in English law*, (2021) chap 7 (Ownership). See too Turner, "Some Reflections on Ownership in English Law" (1941) 19 Can. Bar Review 342; Harris *Property and Justice* (1996) p.125; Jaffey, "Explaining the Trust" [2015] LQR 377 at p.386.

after granting a charge or licence. Where does one draw the line? The courts answer to this question has been confused because they insist that beneficial ownership must (with limited exceptions) be regarded as vested in one person or another. This causes artificial results when property is subject to a contract of sale and it is said that beneficial ownership must be vested in either the vendor or purchaser. There is no reason why that should be so, if one remembers that beneficial ownership is no more than a term for a bundle of rights. The better analysis is that beneficial ownership rights are split between vendor and purchaser. Neither need be nor should be regarded as "the" beneficial owner.[14] Likewise for property subject to an option. On this analysis, *Wood Preservation* was rightly decided but for the wrong reasons, and *Sainsbury* was wrongly decided. But perhaps *Sainsbury* leads to more satisfactory outcomes in the context of group relief, and the law on this point is settled.

App. 6.5 Beneficial owner: Partnership

The IHT Manual provides:

> **IHTM27264 Exempt securities as partnership assets** [Sep 2018]
> Very occasionally the assets of a partnership may include exempt securities which will normally constitute 'excepted assets' (see IHTA84/S112) so they will not qualify for Business Relief. In this situation a partner's transfer of their interest in the partnership will be excluded property:
>
> - to the extent that it is attributable to the exempt securities (IHTM27241)
> - and only if it satisfies the conditions specified for the security
>
> You should calculate the amount to be excluded as follows:
> (Value of exempt securities ÷ Total value of partnership) × Value of transferor's partnership interest

HMRC accept that a partnership share is for this purpose regarded as a share of the partnership assets.[15]

[14] Likewise the courts have come to reject the dogma that "where ownership is vested in a trustee, equitable ownership must necessarily be vested in someone else because it is an essential requirement of a trust that it confers upon individuals a complex of beneficial legal relations which may be called 'ownership'". See *CPT Custodian Pty v Commissioner of State Revenue* (2005) 221 ALR 196 at [25].

[15] In my terminology, this adopts the co-ownership analysis of a partnership share: see 85.3 (Nature of partnership share).

App. 6.6 Beneficial ownership: Scotland

The IHT Manual discusses the expression "beneficially entitled", in a passage which sheds a little light on beneficial ownership:

> **IHTM04031 what is meant by beneficially entitled?** [Sep 2018]
> The use of the words 'beneficially entitled' means broadly that the estate includes only property
> - to which a person is entitled, or
> - in which they have an interest for their own benefit. In England, Wales and Northern Ireland this includes property which a person owns either legally or beneficially (IHTM04441).

So far, the text is unexceptionable. The discussion then turns to Scotland:

> In Scotland, the term 'ownership' does not necessarily equate to beneficial entitlement, for example where the land that is being transferred is subject to missives of sale [or][16] there is an unrecorded disposition. This is because of the Scottish system of unitary ownership. Any case where the question is in point should be referred to Technical for advice.

No doubt the Scots law background is different: Scotland does not have the concept of equitable interests. Whether those differences have any practical effect on the meaning of "beneficial ownership" in the present context seems unlikely, but only a Scots lawyer can express an informed view on that.[17]

The passage concludes:

> A person is not beneficially entitled to property held
> - purely in a fiduciary capacity (for example as a trustee)
> - in a representative capacity (for example as an executor or a trustee in bankruptcy), or
> - by way of security (for example as a mortgagee prior to foreclosure).
>
> ...

This is clearly right.

[16] The original reads "of", but I think that is a slip for "or".

[17] I would be grateful to any Scots reader who could direct me to relevant authority. McDonald and Pagan, *Inheritance Tax in Scotland: Tax Annual* (Bloomsbury) may help.

APPENDIX SEVEN

WHAT DO WE MEAN BY "REAL"

App. 7.1 What do we mean by real
App. 7.2 Reality: JL Austin
App. 7.3 Real: Literary criticism
App. 7.4 Real used as intensifier
App. 7.5 The real world
App. 7.6 Real nature of transaction
App. 7.7 Economic reality etc
App. 7.7.1 Economic terms with antonym
App. 7.7.2 Economic reality/consequences

App. 7.9.2 Cardinal principle affirmed
App. 7.10 Reality and tax avoidance
App. 7.11 Essence/substance in tax statutes
App. 7.12 Piercing corporate veil/facade

App. 7.1 What do we mean by real

The word "real" is one of a cluster of words (including "genuine"[1] and "bona fide" and "in truth") which are casually used, by lawyers and others, but merit careful thought. In this appendix I set out comments from the context of philosophy (JL Austin); literary criticism (Christopher Ricks); and some case law on "real" and form v substance distinctions.

The question whether *legal concepts or rules* should be described as fictions or legal fictions is a distinct question, because no-one doubts the validity of such rules even if they are called legal fictions.[2] Whereas if one identifies, say, a "realistic" view of *facts*, or a "real transaction", it is implied that rival views are unrealistic/unreal and ought to be disregarded.

App. 7.2 Reality: JL Austin

JL Austin, *Sense and Sensibilia*[3] has a profound discussion which I set out

[1] See 3.21.3 ("Genuine").

[2] See 102.2.1 (Is situs fictional?); App. 2.6.3 (Legal personality jurisprudence).

[3] Chapter 7, set out here with kind permission of OUP. Footnotes are original. The text of the entire book is available on:
http://selfpace.uconn.edu/class/percep/AustinChs1-6.pdf
http://selfpace.uconn.edu/class/percep/AustinChs7-11.pdf

here. If it was required reading before anyone wrote the word "real", a great deal of confusion might be avoided.

I want to take a closer look at this little word 'real'. I propose, if you like, to discuss the Nature of Reality a genuinely important topic, though in general I don't much like making this claim.

There are two things, first of all, which it is immensely important to understand here.

1. 'Real' is an absolutely *normal* word, with nothing new-fangled or technical or highly specialized about it. It is, that is to say, already firmly established in, and very frequently used in, the ordinary language we all use every day. ... And we must always be particularly wary of the philosophical habit of dismissing some (if not all) the ordinary uses of a word as 'unimportant', a habit which makes distortion practically unavoidable. For instance, if we are going to talk about 'real', we must not dismiss as beneath contempt such humble but familiar expressions as 'not real cream'; this may save us from saying, for example, or seeming to say that what is not real cream must be a fleeting product of our cerebral processes.

2. The other immensely important point to grasp is that 'real' is *not* a normal word at all, but highly exceptional; exceptional in this respect that, unlike 'yellow' or 'horse' or 'walk', it does not have one single, specifiable, always-the-same *meaning*. (Even Aristotle saw through this idea.) *Nor* does it have a large number of different meanings - it is not *ambiguous*, even 'systematically'. Now words of this sort have been responsible for a great deal of perplexity...

Let us begin, then, with a preliminary, no doubt rather haphazard, survey of some of the complexities in the use of 'real'. Consider, for instance, a case which at first sight one might think was pretty straightforward - the case of a 'real colour'. What is meant by the 'real' colour of a thing? Well, one may say with some confidence, that's easy enough: the *real* colour of the thing is the colour that it looks to a normal observer in conditions of normal or standard illumination; and to find out what a thing's real colour is, we just need to be normal and to observe it in those conditions.

But suppose *(a)* that I remark to you of a third party, 'That isn't the real colour of her hair'. Do I mean by this that, if you were to observe her in conditions of standard illumination, you would find that her hair did not look that colour? Plainly not - the conditions of illumination may be standard already. I mean of course, that her hair has been *dyed*, and normal illumination just doesn't come into it at all. Or suppose that you are looking at a ball of wool in a shop, and I say, 'That's not its real colour.' Here I *may* mean that it won't look that colour in ordinary daylight; but I *may* mean that wool isn't that colour before it's dyed. As so often, you can't tell what I mean just from the words that I use; it makes a difference, for instance, whether the thing under discussion is or is not of a type which is *customarily* dyed.

Suppose *(b)* that there is a species of fish which looks vividly multi-coloured, slightly glowing perhaps, at a depth of a thousand feet. I ask you what its real colour is. So you catch a specimen and lay it out on deck, making sure the condition of the light is just about normal, and you find that it looks a muddy sort of greyish white. Well, is *that* its real colour? It's clear enough at any rate that we don't have to say so. In fact, is there any right answer in such a case?

Compare: 'What is the real taste of saccharine?' We dissolve a tablet in a cup of tea and we find that it makes the tea taste sweet; we then take a tablet neat, and we find that it tastes bitter. Is it *really* bitter, or *really* sweet?

(c) What is the real colour of the sky? Of the sun? Of the moon? Of a chameleon? We say that the sun in the evening sometimes looks red - well, what colour is it *really*? (What are the 'conditions of standard illumination' for the sun?)

(d) Consider a *pointilliste* painting of a meadow, say; if the general effect is of green, the painting may be composed of predominantly blue and yellow dots. What is the real colour of the painting?

(e) What is the real colour of an after-image? The trouble with this one is that we have no idea what an alternative to its 'real colour' might be. Its apparent colour, the colour that it looks, the colour that it appears to be? - but these phrases have no application here. (You might ask me, 'What colour is it really?' if you suspected that I had lied in telling you its colour. But 'What colour is it really?' is not quite the same as 'What is its real colour?').

Or consider 'real shape' for a moment. This notion cropped up, you may remember, seeming quite unproblematic, when we were considering the coin which was said to 'look elliptical' from some points of view; it had a real shape, we insisted, which remained unchanged. But coins in fact are rather special cases. For one thing their outlines are well defined and very highly stable, and for another they have a *known* and *nameable* shape. But there are plenty of things of which this is not true. What is the real shape of a cloud? And if it be objected, as I dare say it could be, that a cloud is not a 'material thing' and so not the kind of thing which has to have a real shape, consider this case: what is the real shape of a cat? Does its real shape change whenever it moves? If not, in what posture *is* its real shape on display? Furthermore, is its real shape such as to be fairly smooth-outlined, or must it be finely enough serrated to take account of each hair. It is pretty obvious that there is *no* answer to these questions - no rules according to which, no procedure by which, answers are to be determined. Of course, there are plenty of shapes which the cat definitely is not - cylindrical, for instance. But only a desperate man would toy with the idea of ascertaining the cat's real shape 'by elimination'.

Contrast this with cases in which we *do* know how to proceed: 'Are those real diamonds?', 'Is that a real duck?' Items of jewellery that more or less closely resemble diamonds may not be real diamonds because they are paste or glass; that may not be a real duck because it is a decoy, or a toy duck, or a species of goose closely resembling a duck, or because I am having a hallucination. These are all of course quite difference cases. And notice in particular *(a)* that, in most of them 'observation by a normal observer in standard conditions' is completely irrelevant; *(b)* that something which is not a real duck is not a *non-existent* duck, or indeed a non-existent anything; and *(c)* that something existent, e.g. a toy, may perfectly well not be real, e.g. not a real duck.[4]

Perhaps by now we have said enough to establish that there is more in the use of 'real' than meets the cursory eye; it has many and diverse uses in many diverse contexts. We must next, then, try to tidy things up a little; and I shall now mention under four headings what might be called the salient features of the use of 'real' - though not *all* these features are equally conspicuous in all its uses.

1. First, 'real' is a word that we may call *substantive-hungry*. Consider:
   'These diamonds are real';
   'These are real diamonds'.

This pair of sentences looks like, in an obvious grammatical respect, this other pair:
   'These diamonds are pink';
   'These are pink diamonds'.

But whereas we can *just* say of something 'This is pink', we can't *just* say of something 'This is real'. And it is not very difficult to see why. We can perfectly well say of something that it is pink without knowing, without any reference to, what it *is*. But not so with 'real'. For one and the same object may be both a real *x* and not a real *y*; an object looking rather like a duck may be a real decoy duck (not just a toy) but not a real duck. When it isn't a real duck but a hallucination, it may still be a real hallucination - as opposed, for instance, to a passing quirk of a vivid imagination. That is, we must have an answer to the question ' A real *what*?', if the question 'Real or not?' is to have a definite sense, to get any foothold. And perhaps we should also mention here another point - that the question 'Real or not?' does not always come up, can't be raised.

[4] 'Exist', of course, is itself extremely tricky. The word is a verb, but it does not describe something that things do all the time, like breathing, only quieter - ticking over, as it were, in a metaphysical sort of way. It is only too easy to start wondering what, then, existing *is*. The Greeks were worse off than we are in this region of discourse - for our different expressions 'to be', 'to exist' and 'real' they made do with the single word .... We have not their excuse for getting confused on this admittedly confusing topic.

We *do* raise this question only when, to speak rather roughly, suspicion assails us - in some way or other things may not be what they seem; and we *can* raise this question only if there *is* a way, or ways, in which things may be not what they seem. What alternative is there to being a 'real' after-image?

'Real' is not, of course, the only word we have that is substantive-hungry. Other examples, perhaps better known ones, are 'the same' and 'one'. The same *team* may not be the same *collection of players*; a body of troops may be one *company* and also three *platoons*. Then what about 'good'? We have here a variety of gaps crying out for substantives - 'A good *what*?', Good *at* what? - a good book, perhaps, but not a good novel; good at pruning roses, but not good at mending cars.[5]

2. Next, 'real' is what we may call a *trouser-word*. It is usually thought, and I dare say usually rightly thought, that what one might call the affirmative use of a term is basic - that, to understand '*x*', we need to know what it is to be *x*, or to be an *x*, and that knowing this apprises us of what it is *not* to be *x*, not to be an *x*. But with 'real' (as we briefly noted earlier) it is the *negative* use that wears the trousers. That is, a definite sense attaches to the assertion that something is real, a real such-and-such, only in the light of a specific way in which it might be, or might have been, *not* real. 'A real duck' differs from the simple ' a duck' only in that it is used to exclude various ways of being not a real duck - but a dummy, a toy, a picture, a decoy, &c.; and moreover I don't know *just* how to take the assertion that it's a real duck unless I know *just* what, on that particular occasion, the speaker has it in mind to exclude. This, of course, is why the attempt to find a characteristic common to all things that are or could be called 'real' is doomed to failure; the function of 'real' is not to contribute positively to the characterisation of anything, but to exclude possible ways of being *not* real - and these ways are both numerous for particular kinds of things, and liable to be quite different for things of different kinds. It is identify of general function combined with immense diversity in specific applications which gives to the word 'real' the, at first sight, baffling feature of having neither one single 'meaning', nor yet ambiguity, a number of different meanings.

3. Thirdly, 'real' is (like 'good') a *dimension-word*. I mean by this that it is the most general and comprehensive term in a whole group of terms of the same kind, terms that fulfil the same function. Other members of this group, on the affirmative side, are, for example, 'proper', 'genuine', 'live', 'true', 'authentic',

[5] In Greek the case of *σοφος* [wise] is of some importance; Aristotle seems to get into difficulties by trying to use *σοφια* [wisdom] 'absolutely', so to speak, without specification of the field in which *σοφια* is exercised and shown. Compare on *δεινοτης* [cunning] too.

'natural'; and on the negative side, 'artificial', 'fake', 'false', 'bogus', 'makeshift', 'dummy', 'synthetic', 'toy' - and such nouns as 'dream', 'illusion', 'mirage', 'hallucination' belong here as well.[6] It is worth noticing here that, naturally enough, the *less* general terms on the affirmative side have the merit, in many cases, of suggesting more or less definitely what it is that is being excluded; they tend to pair off, that is, with particular terms on the negative side and thus, so to speak, to narrow the range of possibilities. If I say that I wish the university had a proper theatre, this suggest that it has at present a *makeshift* theatre; pictures are genuine as opposed to *fake*, silk is natural as opposed to *artificial*, ammunition is live as opposed to *dummy*, and so on. In practice, of course, we often get a clue to what it is that is in question from the substantive in the case, since we frequently have a well-founded antecedent idea in what respects the kind of thing mentioned could (and could not) be 'not real'. For instance, if you ask me 'Is this real silk?' I shall tend to supply 'as opposed to artificial', since I already know that silk is the kind of thing which can be very closely simulated by an artificial product. The notion of its being *toy* silk, for instance, will not occur to me.[7]

A large number of questions arises here - which I shall not go into - concerning both the composition of these families of 'reality' words and 'unreality' words, and also the distinctions to be drawn between their individual members. Why, for instance, is being a *proper* carving knife one way of being a real carving knife, whereas being *pure* cream seems not to be one way of being *real* cream? Nor to put it differently: how does the distinction between real cream and synthetic cream differ from the distinction between pure cream and adulterated cream? Is it just that adulterated cream still is, after all, *cream*? And why are false teeth called 'false' rather than, say, 'artificial'? Why are artificial limbs so-called, in *preference* to 'false'? Is it that false teeth, beside doing much the same job as real teeth, look, and are meant to look, *deceptively* like real teeth? Whereas an artificial limb, perhaps, is meant to do the same job, but is neither intended, nor likely, to be *passed off* as a real limb.

Another philosophically notorious dimension-word which has already been mentioned in another connection as closely comparable with 'real', is 'good'. 'Good' is the most general of a very large and diverse list of more specific

[6] Of course, not all the uses of all these words are of the kind we are here considering - though it would be wise not to assume, either, that any of their uses are *completely* different, *completely* unconnected.

[7] Why not? Because silk can't be a '*toy*'. Yes, but why not? Is it that a toy is, strictly speaking, something quite small, and specially made or designed to be manipulated in play? The water in toy beer-bottles is not toy beer, but *pretend* beer. Could a toy watch actually have clockwork inside and show the time correctly? Or would that be just a *miniature* watch?

words, which share with it the general function of expressing commendation, but differ among themselves in their aptness to, and implications in, particular contexts. It is a curious point, of which Idealist philosophers used to make much at one time, that 'real' itself, in certain uses, may belong to this family. 'Now this is a *real* carving knife!' may be one way of saying that this is a good carving knife.[8] And it is sometimes said of a bad poem, for instance, that it isn't really a poem at all; a certain standard must be reached, as it were, even to *qualify*.

4. Lastly, 'real' also belongs to a large and important family of words that we may call *adjuster-words* - words, that is, by the use of which other words are adjusted to meet the innumerable and unforeseeable demands of the world upon language. The position, considerably over-simplified no doubt, is that at a given time our language contains words that enable us (more or less) to say what we want to say in most situations that (we think) are liable to turn up. But vocabularies are finite; and the variety of possible situations that may confront us is neither finite nor precisely foreseeable. So situations are practically bound to crop up sometimes with which our vocabulary is not already fitted to cope in any tidy, straightforward style. We have the word 'pig', for instance, and a pretty clear idea which animals, among those that we fairly commonly encounter, are and are not to be so called. But one day we come across a new kind of animal, which looks and behaves very much as pigs do, but not *quite* as pigs do; it is somehow different. Well, we might just keep silent, not knowing what to say; we don't want to say positively that it *is* a pig, or that it is *not*. Or we might, if for instance we expected to want to refer to these new creatures pretty often, invent a quite new word for them. But what we could do, and probably would do first of all, is to say, 'It's *like* a pig'. ('Like' is *the* great adjuster-word, or, alternatively put, the main flexibility-device to whose aid, in spite of the limited scope of our vocabulary, we can always avoid being left completely speechless.) And then, having said of this animal that it's *like* a pig, we may proceed with the remark, 'But it isn't a *real* pig'. If we think of words as being shot like arrows at the world, the function of these adjuster-words is to free us from the disability of being able to shoot only straight ahead; by their use on occasion, such words as 'pig' can be, so to speak, brought into connexion with targets lying slightly off the simple, straightforward line on which they are ordinarily aimed. and in this way we gain, besides flexibility, precision; for if I can say, 'Not a real pig, but like a pig', I don't have to tamper with the meaning of 'pig' itself.

But, one might ask, do we *have* to have 'like' to serve this purpose? We have, after all, other flexibility-devices. For instance, I might say that animals of this

[8] Colloquially at least, the converse is also found: 'I gave him a good hiding' - 'a real hiding' - 'a proper hiding'.

new species are 'piggish'; I might perhaps call them 'quasi pigs', or describe them (in the style of vendors of peculiar wines) as 'pig-type' creatures. But these devices, excellent no doubt in their way, can't be regarded as substitutes for 'like', for this reason: they equip us simply with new expressions on the same level as, functioning in the same way as, the word 'pig' itself; and thus, though they may perhaps help us out of our immediate difficulty, they themselves may land us in exactly the same *kind* of difficulty at any time. We have this kind of wine, not real port, but a tolerably close approximation of port, and we call it 'port type'. But them someone produces a new kind of wine, not port exactly, but also not quite the same as what we now call 'port type'. So what are we to say? It is port-type type? It would be tedious to have to say so, and besides there would clearly be no future in it. But as it is we can say that it is *like* port-type wine (and for that matter rather like port, too); and in saying this we don't saddle ourselves with a *new word*, whose application may itself prove problematic if the vintners spring yet another surprise on us. The word 'like' equips us *generally* to handle the unforeseen, in a way in which new words invented *ad hoc* don't, and can't.

(Why then do we need 'real' as an adjuster-word as well as 'like'? Why exactly do we want to say, sometimes 'It is like a pig', sometimes 'It is not a real pig? To answer these questions properly would be to go a long way towards making really clear the use, the 'meaning', of 'real'.)[9]

It should be quite clear, then, that there are no criteria to be laid down *in general* for distinguishing the real from the not real. How this is to be done must depend on *what* it is with respect to which the problem arises in particular cases. Furthermore, even for particular kinds of things, there may be many different ways in which the distinction may be made (there is not just *one* way of being 'not a real pig')—this depends on the number and variety of the surprises and dilemmas nature and our fellow men may spring on us, and on the purposes and dilemmas we have been faced with hitherto. And of course, if there is *never* any dilemma or surprise, the question simply doesn't come up; if we had simply never had occasion to distinguish anything as being in any way like a pig but not a *real* pig, the words 'real pig' themselves would have no application—as perhaps the words 'real after-image' have no application.

Again, the criteria we employ at a given time can't be taken as *final*, not liable to change. Suppose that one day a creature of the kind we now call a cat takes to talking. Well, we say to begin with, I suppose, 'This cat can talk.' But then other cats, not all, take to talking as well; we now have to say that some cats

[9] Incidentally, nothing is gained at all by saying that 'real' is a *normative* word and leaving it at that, for 'normative' itself is much too general and vague. Just how, in what way, is 'real' normative? Not, presumably, in just the same way as 'good' is. And it's differences that matter.

talk, we distinguish between talking and non-talking cats. But again we may, if talking becomes prevalent and the distinction between talking and not talking seems to us to be really important, come to insist that a *real* cat to be a creature that can talk. And this will give us a new case of being 'not a real cat', i.e. being a creature just like a cat except for not talking.

Of course—this may seem perhaps hardly worth saying, but in philosophy it seems it does need to be said—we make a distinction between 'a real *x*' and 'not a real *x*' only if there is a way of telling the difference between what is a real x and what is not. A distinction which we are not in fact able to draw is—to put it politely—not worth making.

App. 7.3 Real: Literary criticism

Here is Christopher Ricks in *The Force of Poetry*:[10]

The *O-Scz* Supplement (1982) to the *Oxford English Dictionary* is a revelation as to the changes that have taken place for this word. One of the most important is the belated acknowledgement of usages which were perfectly available to the original compilers of the *OED* but were strikingly unrecognized. Thus the *OED* itself did not acknowledge one-hard-headed economic sense of *real*: 'Reckoned by purchasing power rather than monetary or nominal value', although this sense is (we now learn) as old as Dr. Johnson and Adam Smith. 'In real terms ...': oh yes, those terms are now understood to be all too real. And to this old but unacknowledged economic sense, the Supplement to the *OED* is able to add our characteristic extensions: *real money*, in American English (at first) as 'a large sum of money'; and *real money*, in British English, as 'the coinage or currency in which one habitually reckons, frequently as opposed to foreign currency'.

Another of the important usages with the *OED* declined to notice is *real life*, though this is as old as Thomas Jefferson and Maria Edgeworth. We should not be surprised that the Supplement's earliest citation is Jefferson's American English (if that term is altogether right for the year 1771): 'Considering history as a moral exercise, her lessons would be too infrequent if confined to real life'. 'Real life', like its brother 'the real world', has been suspected of being both soft-headed and hard-nosed. Those who believe that the bourgeoisie, or whoever, will oppressively claim that particular social arrangements are ineluctable reality are quick to put sneering quotation-marks around the word *real* ('real'). Those who, often from the opposite flank, object to the implications that factories are real whereas universities aren't, are quick to find unreal this use of 'real', especially when a university man is guilty of this *trahison des clercs*:

> The Vice-Chancellor of Lancaster University strongly believes "that the

[10] (1984), p.438; good holiday reading. Some references omitted here.

> university must keep contact with the real world outside." May I take this opportunity to ask ...: *(a)* what is real about the real world? *(b)* why is it always outside?

But then there are all those applications of *real* which were subsequent to the *OED* and which are pointers to the way we live now, the relation of our times to time. 'Real time': 'the actual time during which a process or event occurs, especially one analyzed by a computer, in contrast to time subsequent to it when computer processing may be done, a recording replayed, or the like'. ('It's rapidly rerun all the time'; 'I replay the past'.) More grimly, there is the newly-felt need for the sense of *real* which is at work in real coffee' ('coffee made, directly from ground coffee beans, as opposed to "instant" coffee' – *opposed* is good). This dates from 1964; and from 1972 there is the Campaign for Real Ale ('a name sometimes applied to draught beer that has been brewed and stored in the traditional way')...

Our world has become increasingly suspicious of both the real and the unreal. Hence the gingerly way in which the word *real* gets handled, as if the very thought of it were unreal. 'The real thing' ('True love, as distinct from infatuation, flirtation, etc. [a great *et cetera*]') goes back as far as 1857, we now learn from the Supplement (the *OED* did not acknowledge it); but as the years went by, 'the real thing' became suspected of the very unreality it was challenging. People felt that it was being capitalized upon, and the only way to protect us against this was to capitalize it back: the Real Thing. Mary McCarthy (1941): 'All that conjugal tenderness had been a brightly packaged substitute for the Real Thing '– where the capitals on the Real Thing make it look as if it too is a bit of bright packaging.

Real as meaning ' "genuine", free from nonsense, affection, or pretence' is likewise much older than one would have thought (it is in Tennyson); but it has lately been having its work cut out, stemming the tide of inauthenticity and insincerity, of illusions of feeling. Hence the escalation into the comparative form, 'realler' (not something you can usually do with the word 'real', after all).

> He [Seymour Krim] ... finds that criticism gets in the way of his 'truer, realer, imaginative bounce.' (1961)
> This was a realler America than I had known in the past, hitching on this or that bandwagon or presidential campaign. (1966)

Time Magazine gives a more wistful tone to its escalation: 'Billy is very sweet and very gentle and very real' (1977).

Then there has been the proliferation of reality-hyphenations (or -hypes, for short). Reality-content, reality-control, reality-based, reality-centred, reality-principle, reality-testing, reality-value, and reality-therapy; the stock-piling of these being enough to make reality seem, yet again, unreal. The very devices which seek to emphasise the real then have the effect of scepticizing it. Leslie

Fiedler, in his fiery emphasis, goes for the double 'really', with the second one underlined: 'what the self-appointed censors have always objected to ... is not really, *really* the act that they are violent ...' Czeslaw Milosz defines poetry as 'a passionate pursuit of the Real', whereupon Henry Gifford was drily though sincerely solicitous: 'The capital letter may increase rather than disarm the scepticism of many readers'. The 3rd edition of the *Oxford Dictionary of Quotations* (1979) no longer has room for Longfellow's 'Life is real! Life is earnest!'. I suspect that it was censored.

Which leads – finally – to a notable American invention to cope with some aspects of this, an invention which is itself then tinged with evanescence: 'for real'. *Real* no longer feeling real, American English calls into existence a demarcated variant. As meaning 'genuine, (in) earnest, true, sincere', the earliest citation in the *O-Scz* Supplement to the *OED* is Billie Holiday in 1956 ('The only joints fancy enough to have a victrola and for real enough to pick up on the best records'). If in 1984 John Glenn had one thing to offer – other than the obvious one – which none of the other Democratic Presidential hopefuls could claim, it was his having furnished the earliest *OED* Supplement citation for a sub-section of a word: under 'for real': 'adv. Really, truly, actually; in reality: 1962 J. Glen, *Into Orbit*: Everyone seemed to sense that we were going for real this time'. Senator Glenn, as he then wasn't, may claim to have put the adverbial usage into orbit. But it was John Berryman who made the most of 'for real', making real – realizing – the fact that it too is hastening towards unreality. *The Dream Songs: 7* long for the old (young) freshness which time has undone:

> 'THE PRISONER OF SHARK ISLAND'
> WITH PAUL MUNI
>
> Henry is old, old: for Henry remembers
> Mr Deeds' tuba, & the Cameo,
> & the race in *Ben Hur, – The Lost World*, with sound,
> & *The Man from Blankley's*, which he did not dig,
> nor did he understand one caption of,
> bewildered Henry, while the Big Ones laughed.
>
> Now Henry is unmistakeably a Big One,
> Fúnnee, he don't féel so.
> He just stuck around.
> The German & the Russian films into
> Italian & Japanese films turned, while many
> were prevented from making it.
>
> He wishing he could squirm again where Hoot
> is just ahead of rustlers, where William S
> forgoes some deep advantage, & moves on,
> where Hashknife Hartley having the matter taped

> the rats are flying. For the rats
> have moved in, mostly, and this is for real.

What Berryman does is combine the conviction that the reality is now known to be very ugly and is no play-acting, dummy-run or film fantasy ('For the rats / have moved in, mostly, and this is for real'), with the conviction – the instant obsolescence of a phrase like 'for real' – that these days no apprehension of the real can last for long. Even happy apprehensions of nemesis, as when Dylan sings, in 'When The Ship Comes In':

> Oh the foes will rise
> With the sleep still in their eyes
> And they'll jerk from their beds an think they're dreamin'.
> But they'll pinch themselves and squeal
> And know that it's for real,
> The hour when the ship comes in.

App. 7.4 Real used as intensifier

Applied to words which are matters of degree, "real" may be used as an intensifier (a term applied to crude expletives, as well as words such as *very*); or as a quantifier (a term applied to words such as *much, many*). For instance, *influence* is a matter of degree - one might have little or much. Thus *real influence* means substantial influence, or at least, more than tiny/de minimis amounts of influence; but how much more is not indicated.

The parliamentary drafter does not generally use the word real in this sense, the reader may think, quite rightly. There are other quantifiers or intensifiers which (though vague) give at least a slightly better indication of the meaning; such as *virtually; substantially; significant* risk.[11] For everyday conversation "real" as an intensifier is fine. But it should be banned in formal writing . Really.

App. 7.5 The real world

Ricks in the passage cited above notes battles to occupy the high ground of "the real world". In *Ramsay v IRC*:[12]

> The capital gains tax was created to operate in the real world, not that of make-belief. As I said in *Aberdeen Construction Group v IRC*,[13] it

[11] See 73.9.4 (Risk-free return).

[12] 54 TC 101 at p.187.

[13] 52 TC 281.

> is a tax on gains (or I might have added gains less losses), it is not a tax on arithmetical differences.

From the humdrum point of view of legal analysis, this is best regarded as a rhetorical flourish. It would be a mistake to analyse it as if it were a legal argument or principle. It announces a conclusion, rather than a reason for reaching a conclusion. So while, naturally, this elevated prose is often cited in argument, it has never made a difference to the outcome.

App. 7.6 Real nature of transaction

Sothern-Smith v Clancy discusses this expression in the context of the income/capital distinction:[14]

> ... whether it is in truth an income or a capital payment ... Questions of this kind are notoriously difficult and give rise to distinctions of a highly artificial character. ...
> It is no doubt true to say that in order to answer the question the real nature of the transaction must be ascertained. The proposition has an engaging appearance of simplicity but it is not so simple as it sounds. For the expression 'the real nature of the transaction' is ambiguous.
> It may mean the 'real nature' of the legal relationship of the parties which results from the transaction-a matter which may not be in doubt. Or it may include as well the 'real nature' of the transaction from a financial point of view, a matter which at once raises a number of difficulties.
> If the transaction be one under which A, being or becoming indebted to B for a sum of £1,000, agrees with B to repay this sum by ten yearly instalments, or if A being the purchaser of property from B for £1,000 agrees to pay the purchase price by ten yearly instalments, the 'real nature' of the transaction from the legal point of view is that A is contracting to pay by instalments in the one case a debt and in the other a purchase price. In such cases the very nature of the legal relationship constituted by the contract prevents the annual payments from being anything but payments of capital.

App. 7.7 Economic reality etc

App. 7.7.1 *Economic terms with antonym*

The adjective "economic" can make up useful labels, for instance:

[14] 24 TC 1, at p.6.

Label	**Antonym**	**See para**
Economic double taxation	Juridical double taxation	51.6.2; 107.3
Economic settlor	Nominal settlor	99.5
Economic employer	Formal employer	37.9.1

What grounds these expressions, and gives them reasonable precision, is that:

(1) they have an antonym, and

(2) the distinction between expression and antonym is capable of explanation and elaboration[15]

This relates to Austin's insight that the word "real" is correctly used when we have in mind some specific way in which something can be fail to be "real".

App. 7.7.2 *Economic reality/consequences*

The expression "economic reality" lacks the anchor of a clear antonym. So it is vague, evaluative, subjective and often debatable. The same applies where "economic" is in other collocations such as "economic consequences" and "economic activities".[16]

"Economic consequences/reality", I suggest, is more often than not a form/substance distinction under a more appealing name. This is a classification and not a criticism. There is nothing necessarily wrong with a form/substance distinction, but (1) it should be recognised for what it is; and (2) it does not offer a satisfactory basis for taxation unless kept firmly in place. In *Russell Baker v HMRC*:[17]

> We discount entirely any suggestion that the Appellant should be taxed on the basis of the "economic reality"[18] of what has taken place. Such a submission has a degree of unreality about it, bearing in mind the approach taken by HMRC in the sad appeals from defrauded investors in complicated life insurance bonds who have lost most or all of their investment but are still being taxed by HMRC on entirely fictitious gains arising under the life policy "chargeable events" rules.[19]

[15] I would add to this list the term "economic equivalent to interest", which though it has no short antonym, is defined with reasonable precision: see 26.25.4 (Economic equivalent to interest).

[16] See 3.20.7 (Economic consequences).

[17] [2013] UKFTT 394 (TC) at [60]; and see App.7.7 (Real nature of transaction).

[18] Author's footnote: The scare quotation marks are in the original.

[19] Is this referring to reported case law or just HMRC practise?

Incidentally, one wonders what economists would think of the terms economic consequences/purposes/reality. Lawyers are not economists, and there is some risk in what John Kay derides as "DIY economics".[20] It is said that the human sciences envy the precision of natural sciences ("physics envy"). There is no reason for lawyers to envy economists.

I think the answer to the question raised in the above paragraph is that the expressions economic consequences/purposes/reality have little to do with economics as understood by economists. These are legal expressions, not economics expressions. They are grasping for that most elusive of concepts, reality.

App. 7.8 Realistic view of facts

In *Collector of Stamp Revenue v Arrowtown Assets*:[21]

> The driving principle in the *Ramsay* line of cases continues to involve a general rule of statutory construction and an unblinkered approach to the analysis of the facts. The ultimate question is whether the relevant statutory provisions, construed purposively, were intended to apply to the transaction, viewed realistically.

The second sentence is a neat apothegm and often cited. But does "realistically" mean anything? - and if so, what does it mean? In earlier editions, I asked:

> Is it, perhaps, another euphemism for a form/substance distinction of some kind? Is there any difference between this and the *Ramsay* principle?

What it seems to mean in practice is that the Courts will do whatever it takes to defeat an artificial tax avoidance scheme of which they sufficiently disapprove. Though the GAAR ought to prevent the need for that for years from 2013/14.

Do the courts apply the same principles in non-tax cases? I think the answer until now has broadly been no.[22] This might perhaps change after

[20] *https://www.johnkay.com/2003/10/22/galileo-and-the-lure-of-amateur-economics/* Kay, *The Truth About Markets* (2003).

[21] [2003] HKCFA 46 at [35].

[22] By comparison, *Furniss v Dawson* was once or twice cited in landlord & tenant cases but its approach was subsequently rejected.

Wang, R (oao) v Secretary of State for the Home Department.[23] The opening paragraph described the facts as "a scheme designed to ensure qualification for leave to remain as a Tier 1 (Investor) Migrant in return for a payment of £200k". After that start, a reader with a tax background will not be surprised to find the scheme failed. It is noteworthy that the *Arrowtown* comment was cited at the outset of the analysis.

App. 7.9 Form v substance: Cardinal principle

In *Ramsay v IRC*:

> Given that a document or transaction is genuine [not a sham], the court cannot go behind it to some supposed underlying substance. This is the well-known principle of *IRC v Duke of Westminster*.[24] This is a cardinal principle ...

App. 7.9.1 *Cardinal principle qualified*

This well-known, cardinal principle is qualified or, some might say, heavily qualified:

> ... but it must not be overstated or overextended. While obliging the court to accept documents or transactions, found to be genuine, as such, it does not compel the court to look at a document or a transaction in blinkers, isolated from any context to which it properly belongs. If it can be seen that a document or transaction was intended to have effect as part of a nexus or series of transactions, or as an ingredient of a wider transaction intended as a whole, there is nothing in the doctrine to prevent it being so regarded: to do so is not to prefer form to substance, or substance to form. It is the task of the court to ascertain the legal nature of any transaction to which it is sought to attach a tax or a tax consequence and if that emerges from a series or combination of transactions, intended to operate as such, it is that series or combination which may be regarded.
> ... For the Commissioners considering a particular case it is wrong, and an unnecessary self-limitation, to regard themselves as precluded by their own finding that documents or transactions are not "shams", from considering what, as evidenced by the documents themselves or by the manifested intentions of the parties, the relevant transaction is. They are

[23] [2023] UKSC 21. Two years earlier, in *Uber v Aslam* [2021] UKSC 5 the *Arrowtown* comment was cited in passing, but this was not an avoidance case and it did not affect the analysis.

[24] 19 TC 490.

> not, under the *Westminster* doctrine or any other authority, bound to consider individually each separate step in a composite transaction intended to be carried through as a whole. This is particularly the case where (as in *Rawling*[25]) it is proved that there was an accepted obligation once a scheme is set in motion, to carry it through its successive steps. It may be so where (as in *Ramsay* or in *Black Nominees Ltd v Nicol*[26]) there is an expectation that it will be so carried through, and no likelihood in practice that it will not.

App. 7.9.2 *Cardinal principle affirmed*

How we draw the line between the cardinal principal and the qualification, how the line has shifted in the four decades since the *Ramsay* decision, whether the Courts have succeeded in articulating that line, and whether any line can be drawn, - these are deep questions. But one can at least say that the principle itself continues.

Khan v HMRC[27] concerned a purchase of a company. It was originally proposed that:

(1) The company should buy in its own shares for £1.95m
(2) The purchaser should purchase (what was left of) the company for £18k.

The sellers were concerned they may be liable to income tax on the purchase of own shares. So the proposal was altered and the sale carried out with an added step which might fairly be described as artificial and self-cancelling:

(1) The purchaser borrowed £1.95m from the company.
(2) The purchaser purchased the company for the sum of £1.968m and used the borrowed money to pay the purchase price.[28]
(3) Immediately on completion of the purchase:
    (a) The company bought in 99% of its own shares, for the sum of £1.95m.
    (b) That sum was used to repay the loan.

The company's purchase of its own shares at step 3(a) was of course a distribution.[29] So at the end of these steps, the hapless Mr Khan had

[25] For this case, see 99.12.1 (Transfer: A's trust to B's trust).
[26] 50 TC 229.
[27] [2021] EWCA Civ 624.
[28] Was this compliant with company law?
[29] Section 1033 CTA 2010.

received an income-taxable distribution of £1.95m but had no money to show for it, as he used it to repay the loan.[30] The taxpayer argued that the Court should:[31]

> consider the sale and buyback of the shares as a single composite transaction and consider its overall effect rather than concentrating on the machinery by which it was effected (i.e. the legal steps in the chain). In substance and in truth, Mr Khan was no more than a conduit for the selling shareholders to effect the buyback of the 98 shares themselves and his intermediate role in that aspect of the transaction should be ignored. As a matter of practical[32] reality, the 98 shares were never Mr Khan's to do with as he pleased, nor were the buyback proceeds. He never had the benefit of nor control over the £1.95 million and it was "absurd" to tax him on that sum, all the more so if the selling shareholders were liable to pay CGT on that sum (less their cost of acquiring the shares)...
>
> the overall economic outcome was precisely the same as it would have been had the deal been structured in the manner originally envisaged and most of the shares had been the subject of a direct buyback by the Company from the vendor shareholders

More analytically, the question was whether Mr Khan received/was entitled to the distribution.[33]

Note how substance, truth and reality are all thrown into the submission pot. But the Court followed the approach of *Henriksen v Grafton Hotel*:[34]

> An attempt was made to rescue this argument from shipwreck by saying that if the lessor had undertaken to bear these payments and had consequently exacted a higher rent, the full rent could have been deducted as an expense. This argument has a familiar ring. The answer to it is that this was not the contract which the parties chose to make.
>
> It frequently happens in income tax cases that the same result in a business sense can be secured by two different legal transactions, one

[30] This arrangement - foolish does not begin to do it justice - was designed so that the sellers were subject to CGT on the sale proceeds. Of course, Mr Khan may have had a claim against his advisers.

[31] at [39], [75].

[32] An analytically minder reader might ask: Is there any other type of reality? But the question would be misconceived, because the expression is the language of rhetoric, not reason, and so not susceptible to a logical analysis.

[33] See 15.6 (When are dividends recognised).

[34] 24 TC 453 at p.460.

> of which may attract tax and the other not. This is no justification for saying that a taxpayer who has adopted the method which attracts tax is to be treated as though he had chosen the method which does not or vice versa.

One might also have cited *Spectros International v Madden*[35] and *IRC v Wesleyan and General Assurance Society.*[36] With these questions of high generality there is too much authority to cite it all. Did the point need repeating? The reader may think that *Khan* should not have been given permission to appeal, even for the first of its two appeals. For if Mr Khan was not entitled to the distribution, who was? It could not be the sellers. There could not be a distribution to which no-one is entitled. And there clearly was a distribution, because £1.95m was extracted from the company. On the facts of *Khan,* a substance approach just does not work.

App. 7.10 Reality and tax avoidance

In *Khan v HMRC*:[37]

> It is unusual for a taxpayer to rely upon the *Ramsay* approach, which is generally invoked by HMRC when seeking to challenge artificial tax-avoidance schemes (which this undoubtedly was not). However, the principles in *Ramsay* are of general application,

In fact, there was an avoidance motive in *Khan*, though those who (successfully) avoided income tax were the sellers and not the purchaser. But putting that to one side, as a matter of case law, is it really true to say

[35] See App. 4.3 (Contract stating consideration).

[36] 30 TC 11 at p.16: "In dealing with Income Tax questions it frequently happens that there are two methods at least of achieving a particular financial result. If one of those methods is adopted, tax will be payable. If the other method is adopted, tax will not be payable. It is sufficient to refer to the quite common case where property is sold for a lump sum payable by instalments. If a piece of property is sold for £1,000 and the purchase price is to be paid in ten instalments of £100 each, no tax is payable. If, on the other hand, the property is sold in consideration of an annuity of £100 a year for ten years. tax is payable. The net result from the financial point of view is precisely the same in each case. but one method of achieving it attracts tax and the other method does not.

There have been cases in the past where what has been called the substance of the transaction has been thought to enable the Court to construe a document in such a way as to attract tax. That particular doctrine of substance as distinct from form was, I hope, finally exploded by the decision of the House of Lords in the case of *Duke of Westminster v IRC*, 19 TC 490..."

[37] [2021] EWCA Civ 624 at [81].

that the Courts have applied the same principles in avoidance and non-avoidance cases? And as a matter of tax policy, would it not be sensible to apply different principles? Discuss.

App. 7.11 Essence/substance in tax statutes

"Essence" is used in the disguised remuneration/disguised trading income codes, referring (in short) to:

- arrangement "in essence" a means of providing remuneration/ benefits[38]
- payments "in essence" consideration for goods/ services [39]
- "In essence" some arrangement or connection between payment and provision of goods/services, or between a step and an arrangement[40]

In the last case, one might think that "some connection" and "arrangement" are vague enough without adding the reference to essences. But there it is. The drafter does not share the view, attributed to Wittgenstein, that "there are no essences".

In practice it is very difficult to imagine that the words "in essence" would ever make any difference.[41] But the heart does sink when one sees the words "in essence".

For good measure, the statute adds:

> For the purposes of [relevant subsections] in particular, all relevant circumstances are to be taken into account in order to get to the essence of the matter.[42]

Some readers may think this is verbiage, and regrettable. But there it is. Perhaps the author felt some exasperation, and this is how he expressed it. The task of the parliamentary drafter is not an easy one.

Similarly, substance is used in the income-stream code, where "transfer" includes "an arrangement which equates in substance to a transfer".[43] I think essence and substance are used synonymously here.

App. 7.12 Piercing corporate veil/facade

One area where the Courts have rejected arguments based on reality is in the use of companies. In economic reality, or in the eyes of a non-lawyer,

[38] Section 23C(3) ITTOIA; s.554A(1) ITEPA.

[39] Section 23C(5) ITTOIA.

[40] Section 23C(5) ITTOIA; s.554A(1) ITEPA.

[41] See too 49.15.1 (Substance).

[42] 23A(7)/23C(6) ITTOIA; s.554A(11) ITEPA.

[43] See 26.25.1 (Economic equivalent to interest).

there is little if any difference between an asset held by a company and the asset being held by its shareholder. But holding an asset through a company alters the tax position, sometimes in the taxpayer's favour, and sometimes giving scope for avoidance.[44] But arguments that the Courts should ignore this and "pierce the corporate veil", ie disregard the separate personality of the company, and assess tax as if the asset were held directly, have (more or less) never succeeded; or at least, not if the argument was framed in those terms.[45]

[44] For an example, see 76.17.5 (Companies: Situs planning).

[45] See *Hurstwood Properties v Rossendale BC* [2021] UKSC 16 at [63] ff. Planning of this kind has been possible since the repeal of the Mortmain Acts (one of whose purposes was to prevent tax avoidance by vesting land in companies).

APPENDIX EIGHT

DEEMING PROVISIONS

App. 8.1 Deeming/statutory assumptions
App. 8.1.1 "Deeming provision"
App. 8.1.2 Statutory assumptions
App. 8.2 Deeming provisions: Construction
App. 8.2.1 Carry through the deeming
App. 8.2.2 But how far?
App. 8.2.3 The current position
App. 8.2.4 Deeming in non-tax cases
App. 8.3 Deeming/artificial definition compared
App. 8.4 Deemed/treated misused
App. 8.4.1 Deemed as definition
App. 8.4.2 "Deemed" meaningless

App. 8.1 Deeming/statutory assumptions

This appendix concerns the construction of deeming provisions and statutory assumptions. Such provisions are common in tax, and the topic arises at many points in this book.[1] It is therefore convenient to consider it as a discrete topic.

App. 8.1.1 *"Deeming provision"*

A "**deeming provision**" in the strict sense is one which assumes something to be a fact which is not (or may not be) the case: it creates a legal fiction.

The paradigm cases involve the word "deem". An example is the rule that the income of a married woman living with her husband was:

> deemed for income tax purposes to be his income and not to be her income.[2]

[1] It is not possible to give a full list but examples are:

Topic	**See para**
Deeming provisions	
Exempt property	19.29
DT relief: s.87 gain	61.60
Child of deemed dom parent	5.10.1
GWR on death/Spouse exemption	78.19
Divorce settlement	93.8
Legatee on transfer of shares	88.9.4
Statutory assumptions	
s.87 residence assumption	61.6.1

[2] Section 279 ICTA 1988 (repealed). The rule survived in Jersey until 2021.

The word "deem" is almost as old fashioned as joint taxation of husband and wife. OPC Drafting Guidance formerly provided:

> **deemed to be**: Treated as or perhaps regarded as, or even taken to be, might be more familiar.[3]

All three of these "more familiar" expressions are found (and more[4]) though "treated as" is most the more common:

Income which arises under a settlement	living accommodation provided ... by the employer	where property is provided by a ... company controlled by one person ...
is *treated* for income tax purposes as the income of the settlor and of the settlor alone.[5]	is to be *regarded* as provided by reason of the employment[6]	that person shall be *taken to* provide it[7]

There is no difference in meaning between deemed/treated as/regarded as/taken to be. In 2017 Parliamentary Counsel replaced "treated as" with "regarded as" in the deemed domicile rule:[8]

s.267(1) IHTA	**s.835BA ITA** (inserted 2017)
A person not domiciled in the UK ... *shall be treated* for the purposes of this Act as domiciled in the UK ... if—	An individual not domiciled in the UK ... *is to be regarded as* domiciled in the UK ... if—

Clearly, no difference in meaning was intended, and the choice is simply a matter of drafting style.

[3] (2014 edition) *http://data.parliament.uk/DepositedPapers/Files/DEP2014-0422/guidancebook_20_March.pdf* Para 2.1.24. This passage is not in the current OPC Drafting Guidance (2020) *https://www.gov.uk/government/publications/drafting-bills-for-parliament*

[4] "Assumed" may be used with the same meaning, eg in the definition of carried interest; see 73.10 (Subordinated interest: carried interest).

[5] See 47.5 (Settlor-interested trust). But "treated as" is not a modern innovation: that was the wording in the original provisions, s.21 FA 1936; s.38 FA 1938.

[6] See 39.10 (Employer-provision test).

[7] See 99.40.1 (Co settlor: s.86 definition). This wording goes back to 1991.

[8] See 5.13 (Deemed dom wording compared).

App. 8.1.2 *Statutory assumptions*

Consider two examples from TCGA:

s.87(4): s.1(3) amount (trust gain)	**s.3G(3): s.3 gain**
the amount upon which the trustees of the settlement would be chargeable to tax under s.1(3) ... *if* they were resident in the UK.	the amount of a gain ... accruing to a company is calculated *as if* the company were a company resident in the UK chargeable to corporation tax on the gain.

I would not call these deeming provisions, in the strict sense. The non-resident trustees or company are not deemed to be chargeable. But there is a fictional statutory assumption, for a more limited purpose (in this case for a computation). I refer to this as a **"statutory assumption"**[9] as the wording "on the assumption that" is common in provisions of this kind. Other expressions are also used, such is the patchwork nature of taxation:

Para 10 sch 9A FA 03: SDLT surcharge	**s.439(3) CTA 2010: Close co test**
the issued share capital in the company that A possesses ... would, *on the assumption* that the whole of the income of the company were distributed among the participators, entitle A to receive less than 5% of the income so distributed	such rights as would, *in the event of* the winding up of the company on the basis set out in section 440, entitle them to receive the greater part of the assets of the ... company which would then be available for distribution ...

In the first two examples above the statutory assumption is UK residence, and there are several other examples of that.[10] But as the next two examples illustrate, there is no limit to the content of a statutory assumption (just as there is no limit to the content of a statutory deeming).[11]

A statutory assumption amounts to or includes a deeming. Indeed, this form of drafting is sometimes called "a deeming provision", though that seems to me to be a slightly loose sense of that expression. In general, statutory assumptions apply for a limited purpose, and (what I call) deeming provisions apply generally, or at least, much more broadly.

[9] One sometimes sees the grander term, "statutory hypothesis".

[10] See 61.6.1 (S.87 residence assumption).

[11] For instance, IHTA refers to events where "tax is chargeable *as if* a transfer of value had been made"; see 74.3.1 (Transfer of value: extended definition).

However the same (purposive) principles of construction apply to both.[12] So perhaps the distinction between deeming provisions and statutory assumptions does not matter. But I think it is good to know what we are talking about.

App. 8.2 Deeming provisions: Construction

The story is the usual arc from literal to purposive construction.

App. 8.2.1 *Carry through the deeming*

The general rule of construction which applies to deeming provisions is this:

> If you are bidden to treat an imaginary state of affairs as real, you must surely, unless prohibited from doing so, also imagine as real the consequences and incidents which, if the putative state of affairs had in fact existed, must inevitably have flowed from or accompanied it.[13]
>
> ... because one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs ...[14]

App. 8.2.2 *But how far?*

The question is how far the general rule should be applied (or in other words, when should it not be applied). The answer in the 1950s was: all the way:

> The statute says that you must imagine a certain state of affairs; it does not say that having done so, you must cause or permit your imagination to boggle when it comes to the inevitable corollaries of that state of affairs.[15]

Experience shows that parliament often fails to foresee the "inevitable corollaries" of its deeming, and nowadays the courts apply deeming provisions in a purposive and context-sensitive manner.[16] This is

[12] Thus *Bricom*, discussed below, which concerns the CFC residence assumption, see 61.60.1 (DT relief: s.87 gain), is a leading case on the construction of deeming provisions.

[13] *East End Dwellings v Finsbury Borough Council* [1952] AC 109 at p.132.

[14] *Marshall v Kerr* 67 TC 56 at p.79A.

[15] *East End Dwellings v Finsbury Borough Council* [1952] AC 109 at p.132.

[16] The turning point was *Murphy v Ingram* [1973] Ch 363. At first instance, at p.446 Megarry J said:

reaffirmed in *Bricom v IRC*[17] where the CoA referred to the dictum:

> The hypothetical must not be allowed to oust the real further than obedience to the statute compels.

The CoA said:

> ... I do not read this as intending to lay down a special rule which requires a statutory hypothesis to be narrowly and literally construed. The scope of a deeming provision is a question of construction and is not subject to any special rule. As on any other question of statutory construction, the Court must attempt to ascertain the intention of Parliament from the words used in the light of the legislative purpose. A statutory hypothesis, no doubt, must not be carried further than the legislative purpose requires, but the extent to which it must be carried depends upon ascertaining what that purpose is.

And again, in *Jenks v Dickinson*:[18]

> ... when considering the extent to which one can 'do some violence to the words' and whether one can 'discard the ordinary meaning', one can, indeed one should, take into account the fact that one is construing a deeming provision. This is not to say that normal principles of construction somehow cease to apply when one is concerned with interpreting a deeming provision; there is no basis in principle or authority for such a proposition. It is more that, by its very nature, a deeming provision involves artificial assumptions. It will frequently be difficult or unrealistic to expect the legislature to be able satisfactorily to prescribe the precise limit to the circumstances in which, or the extent to which, the artificial assumptions are to be made.

And again, though perhaps slightly more tentative, in the words of Peter Gibson J giving the leading judgment in *Marshall v Kerr*:

> For my part I take the correct approach in construing a deeming provision to be to give the words used their ordinary and natural meaning, consistent so far as possible with the policy of the Act and the

> "A research student in search of a suitable topic for a thesis might do worse than to choose as his subject "the Dangers of Deeming"."

But the CoA adopted the modern approach which reduces these dangers. For another example, see *De Rothschild v Lawrenson* 67 TC 300 at p.316.

[17] 70 TC 272.

[18] [1997] STC 853; the passage is approved in *HMRC v DCC Holdings* [2010] UKSC 58 at [39].

> purposes of the provisions so far as such policy and purposes can be ascertained; but if such construction would lead to injustice or absurdity, the application of the statutory fiction should be limited to the extent needed to avoid such injustice or absurdity, unless such application would clearly be within the purposes of the fiction. I further bear in mind that because one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs, unless prohibited from doing so.

In *Barclays Wealth Trustees v HMRC*:

> This statement of principle has been cited with approval in many subsequent cases[19] ... the fact that deeming provisions are involved "does not displace the ordinary principles of statutory interpretation".[20]

We have come a long way from 1950's approach of not permitting the imagination to boggle.

App. 8.2.3 *The current position*

The most recent statement is from *Fowler v HMRC*:[21]

> (1) The extent of the fiction created by a deeming provision is primarily a matter of construction of the statute in which it appears.
> (2) For that purpose the court should ascertain, if it can, the purposes for which and the persons between whom the statutory fiction is to be resorted to, and then apply the deeming provision that far, but not where it would produce effects clearly outside those purposes.
> (3) But those purposes may be difficult to ascertain, and Parliament may not find it easy to prescribe with precision the intended limits of the artificial assumption which the deeming provision requires to be made.
> (4) A deeming provision should not be applied so far as to produce unjust, absurd or anomalous results, unless the court is compelled to do so by clear language.
> (5) But the court should not shrink from applying the fiction created by the deeming provision to the consequences which would inevitably flow from the fiction being real.

[19] citing *DV3 RS Ltd Partnership v HMRC* [2013] EWCA Civ 907 at [13] and [14].

[20] [2017] EWCA Civ 1512 at [47].

[21] [2020] UKSC 22 at [27] followed *HMRC v Vermilion Holdings* [2023] UKSC 37 at [23].

App. 8.2.4 *Deeming in non-tax cases*

The discussion above just cites tax cases. But the interpretation of deeming provisions is the same in non-tax cases:

> The intention of a deeming provision, in laying down a hypothesis, is that the hypothesis shall be carried as far as necessary to achieve the legislative purpose, but no further.[22]

App. 8.3 Deeming/artificial definition compared

A definition is "artificial" if a word is given a meaning far from its natural meaning. The use of artificial definitions has been castigated,[23] but it is very common in taxation. For instance, employment may be defined to include a trade or profession.[24] No-one calls that a deeming provision, but there is no difference (or at least no obvious difference) between that form and saying that a trade is deemed to be an employment, which *is* classified as a deeming provision. Which form is used is a matter of chance or of style.

The rule for construction of definitions is simply that they take effect subject to context. It is considered that the position is no different for deeming provisions. If that is right, the rather lengthy analysis in the cases set out above of the "principles of deeming provisions" is misconceived. There should be no special rule for deeming provisions, for the rule to apply the deeming contextually is not a special rule. We have here something akin to the error of reification: just because there is a name for something does not mean that it exists, or (here) that it requires a distinct principle of construction.

App. 8.4 Deemed/treated misused

App. 8.4.1 *Deemed as definition*

"Deemed" (and its synonyms) are sometimes used to make definitions, or at least, amount to definitions. ToA provides an example:

[22] *Szoma v Secretary of State* [2006] 1 AC 564 at [25].

[23] Eg OPC Drafting Guidance (2020) para 4.4.1: "Avoid labels that are misleading." The guidance gives this example (to avoid): *"In this Act, "child" means a young person in care".* *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/892409/OPC_drafting_guidance_June_2020-1.pdf*

[24] See 46.2.1 (Employment/employed).

> ... an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment conditions are met.[25]

The meaning is simply that an individual *has* "power to enjoy" (in the defined sense) if the enjoyment conditions are satisfied. This is equivalent to a definition of the expression "power to enjoy". But the words "treated as" are apt, because although in most cases where the enjoyment conditions are satisfied, the individual does have power to enjoy in the normal sense, there are cases where the enjoyment conditions are satisfied but the individual does not have power to enjoy in the normal sense (eg if the individual's spouse has power to enjoy).

Definitions in the common form have the helpful rule that *means* is used for an exclusive (comprehensive) definition and *includes* is used for an inclusive definition. The wording *treated as* used in a definition tends to suggest an inclusive definition: ie an individual might have power to enjoy in the general sense of the expression even if the enjoyment conditions are not met.[26] But the context may show that there is an exclusive definition, ie the individual has power to enjoy if and only if the enjoyment conditions are met.

It would be clearer to say "if *and only if*"; and not to use deeming terminology when simpler words of definition (means/includes) could be used; but it happens.

App. 8.4.2 *"Deemed" meaningless*

"Deemed" (and its synonyms) are sometimes employed as a verbose or legalese equivalent of the simple present tense. Thus s.10 Limited Partnerships Act 1907 provides that certain transactions shall "be deemed to be of no effect". The meaning would be the same without the word deemed: the meaning is that the transactions *are* of no effect.

An example from CRS:

> an Equity Interest is considered to be held by ...any person treated as a settlor[27]

"Treated as settlor" just means "settlor".

[25] See 46.7 ("Power to enjoy").

[26] For an example, see *Office of Fair Trading v Lloyds TSB Bank Plc* [2006] EWCA Civ 268 at [63] to [65].

[27] See 121.17.4 (Equity Interest: Trust).

It would be better drafting not to use deeming language in this way; but it is not uncommon. One should not strive to construe such wording as a deeming provision when the context shows that there is no deeming in the strict sense.

APPENDIX NINE

PURPOSE IN TAX STATUTES

App. 9.1 Purpose of a statute
App. 9.2 Construction of tax/non-tax statutes compared
App. 9.3 How to ascertain tax policy
App. 9.4 Difficulty of ascertaining tax policy
App. 9.5 Fowler: a case study
App. 9.5.1 The purpose in fact
App. 9.5.2 The purpose as published
App. 9.5.3 Purpose according to Courts
App. 9.5.4 Purpose of DTA
App. 9.5.5 Purpose: conclusion
App. 9.6 Purpose: Fact or law?

App. 9.1 Purpose of a statute

The interpretation (or construction) of statutes needs a book to itself, and many such books have been written. However most of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner is limited.[1] In short, language is difficult to put into words.[2] In this appendix I consider the topic of purposive construction, and in the next the narrower but related topic of deeming provisions.

When interpreting a statute, it is common to ask what is its purpose or policy (the words are here synonymous). This appendix considers:

- What is meant by purpose of a statutory provision
- How does one ascertain the purpose
- How far does a purposive approach override the apparent meaning

These are deep questions! They are best addressed as a specific topic rather than in any particular context where they may arise.

A difficulty of this enquiry is that it has to be selective - there is too much data - and a shallow dip in the data may give the impression of

[1] If authority is needed, which I doubt, see *Re Stratton's Disclaimer* [1958] Ch 42 at p.59 deprecating "sweeping generalities".

[2] This aphorism has been attributed to Voltaire, but seems to have no known source.

greater coherence than actually exists. In practice judges take different approaches, and a legal realist would say that they take the approach which justifies the conclusion which they wish to reach for other reasons. But we might at least ascertain the direction of the prevailing wind.

App. 9.2 Construction of tax/non-tax statutes compared

I start by noting a common misapprehension. In *IRC v McGuckian*:[3]

> During the last 30 years there has been a shift away from literalist to purposive methods of construction. Where there is no obvious meaning of a statutory provision the modern emphasis is on a contextual approach designed to identify the purpose of a statute and to give effect to it.

That is true as far as it goes, though the purposive approach is not limited to cases "where there is no obvious meaning".

> But under the influence of the narrow *Duke of Westminster* doctrine, tax law remained remarkably resistant to the new non-formalist methods of interpretation. It was said that the taxpayer was entitled to stand on a literal construction of the words used regardless of the purpose of the statute. Tax law was by and large left behind as some island of literal interpretation.

This Whig interpretation of tax history is often cited. But it is a fable, as even a cursory examination of tax case law in the 30 years to 1997 would reveal.[4] Does this matter? I leave the reader to consider that, and move on:

> On both fronts the intellectual breakthrough came in 1981 in the *Ramsay* case, and notably in Lord Wilberforce's seminal[5] speech ... Lord Wilberforce restated the principle of statutory construction that a subject

[3] 69 TC 1 at p.5.

[4] Lord Steyn cited 3 cases in support of his comment. One was a 19th century case. The second an early 20th century case *Cape Brandy Syndicate v IRC* (1921) 12 TC 358 at p.366 ("no equity about a tax"). A literalist approach, no doubt, but not different from that adopted for non-tax law at the time. The only case cited which actually fell in the 30 year period referred to was *IRC v Plummer* (1979) 54 TC 1. But this was an outlier, a 3:2 decision, reversed in 1993: *Moodie v IRC* (1993) 65 TC 610.
Incidentally, Lord Wilberforce, notwithstanding his "seminal" speech in *Ramsay* was one of the maligned literalists who decided the outcome in *Plummer.*

[5] The hyperbolic language, which seems to put *Ramsay* on a level with the theory of evolution or of relativity, is characteristic of judicial rhetoric.

> is only to be taxed upon clear words. To the question 'What are “clear words”?' he gave the answer that the court is not confined to a literal interpretation. He added
>
> > 'There may, indeed should, be considered the context and scheme of the relevant Act as a whole, and its purpose may, indeed should, be regarded'.[6]
>
> This sentence was critical. It marked the rejection by the House of pure literalism in the interpretation of tax statutes.

I don’t think anyone has ever said that the fundamental principles of construction are different for tax and non-tax statutes; but difference of context makes the same rules work in different ways, and that continues to be the case.

It might be that the Courts, or at least some judges, currently apply purposive construction more enthusiastically in tax cases than in non-tax cases. That would not be easy to prove or disprove, and no-one would admit to it consciously. But I do not think that non-tax cases have an equivalent of the constantly repeated exhortation in tax cases to construe purposively, and ascertain facts realistically.[7]

App. 9.3 How to ascertain tax policy

The courts ascertain the policy by using the ordinary methods of statutory construction, ie just by reading the statute, with supplemental material such as Hansard when admissible, and reflecting on it. That approach will not necessarily give a profound understanding of policy issues; what

[6] The quote is not unfair, but the passage read as a whole is more nuanced, see 54 TC 101 at 185:

“I think it opportune to restate some familiar principles and some of the leading decisions so as to show the position we are now in.

1. A subject is only to be taxed upon clear words, not upon "intendment" or upon the "equity" of an Act. ... What are "clear words" is to be ascertained upon normal principles: these do not confine the courts to literal interpretation. There may, indeed should, be considered the context and scheme of the relevant Act as a whole, and its purpose may, indeed should, be regarded...

2. A subject is entitled to arrange his affairs so as to reduce his liability to tax. The fact that the motive for a transaction may be to avoid tax does not invalidate it unless a particular enactment so provides...

4. Given that a document or transaction is genuine, the court cannot go behind it to some supposed underlying substance... [For this aspect, see App 7.9 (Form v substance: Cardinal principle).]

[7] See App 7.8 (Realistic view of facts).

would one think of an essay on tax policy which restricted itself to these limited sources? But a Court is not equipped to do more.

This makes sense if one bears in mind that the legal concept of tax policy is like the legal concept of the intention of parliament; it is a construct. Just as the legal concept of the intention of parliament may differ from what was actually the intention of those involved,[8] so too the legal concept of tax policy.

App. 9.4 Difficulty of ascertaining tax policy

It is often difficult to ascertain what is the policy. For instance, in gifts with reservation, two wildly different policies were plausibly arguable:

(1) That the policy was to prevent *Ingram* style planning (tendentiously described as "to have one's cake and eat it").

(2) That the policy was to require donors to identify precisely the interests they give away and those (if any) they keep.[9]

In this respect, GWR is not unusual. It is often difficult (perhaps more often than not) to ascertain the policy of tax provisions and sometimes it is impossible:

> In reaching these conclusions I have not attempted any purposive construction of the detailed provisions of the Act, since I am not sure what their purpose is.[10]

And again:

> it is only too often that the purposes of a fiscal provision are not apparent.[11]

This should not be a surprise. There are several powerful factors which lead to this result:

(1) The difficulty of formulating a coherent tax policy: It often happens

[8] This is well established jurisprudence, but if authority is needed, see *R v Secretary of State ex p. Spath Holme* [2001] 2 AC 349: "The phrase is a shorthand reference to the intention which the court reasonably imputes to Parliament in respect of the language used. It is not the subjective intention of the minister or other persons who promoted the legislation. Nor is it the subjective intention of the draftsman, or of individual members or even of a majority of individual members of either House."

[9] See 79.2 (Purpose of GWR).

[10] *BP Oil Development. v IRC* 64 TC 498, at p.532B.

[11] *Marshall v Kerr* (CA) [1993] STC 360. Dividend taxation is a good example; see 30.17 (Dividend taxation: Critique).

that irreconcilable policy considerations yield no satisfactory solution, or at least, no consensus on what the solution should be.

(2) The inadequate way in which tax policy and drafting has been, and continues to be, formulated in the UK.[12]

(3) The shortage of informed discussion of tax policy at journalistic level, and, with notable exceptions, at academic level (I think the quality of academic discussion may be higher in the US).

(4) The total bulk of the material, and the speed of change, make detailed examination difficult and comprehensive examination impossible.

Two factors prevent statements of this kind being made much more often. The first is a judicial desire for comity with parliament, and the second is that the courts do not consider the policy behind tax provisions in much detail.

When there are differing views on what the tax policy should be, there are inevitable differing views as to what the policy actually is. The wish may be father to the thought. In *Marshall v Kerr:*[13]

> there is a real danger that if a court in every case feels bound to commence its construction of a statutory provision by finding their purpose, it will make a self-fulfilling assumption of what the purpose is.

For all these reasons, debates about tax policy will rarely be settled. Authoritative decisions of the courts ought to resolve the question for practical purposes, on the rare occasions when they exist; but even then, the losing side may seek to chip away at the issue.

App. 9.5 *Fowler*: a case study

I take as a case study the Supreme Court decision in *Fowler v HMRC.* This raised the issue of the purpose of the strange rule that employed North Sea divers are deemed to be carrying on a trade.[14]

[12] See 1.12 (State of UK tax reform).
In some cases the policy is founded on basic misconception; eg the false premise of ATED was that taxpayers used enveloping to avoid SDLT; see 98.39.3 (ATED purpose at outset). In some cases the purpose was to prevent avoidance arrangements which the HMRC (and the drafter) are unable to articulate, or refuse to identify; eg, see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), Ch 7 (Tainted Donation Rules). In some cases the reasons given do not bear serious scrutiny; see eg 80.42.1 (s.175A disallowance: purpose).

[13] 67 TC 56 at p.78.

[14] See 37.16.1 (Deemed non-employment).

App. 9.5.1 *The purpose in fact*

John Avery Jones records:

> The deeming arose in 1978 because, whilst divers had been treated as self-employed in the past, the Revenue had made a ruling that they should be taxed as employees.
> The ruling was naturally unpopular and there were newspaper reports of a threatened strike. This would have been serious because ... divers were a highly skilled, highly mobile work force in extremely short supply. Deeming them to be self-employed was odd tax policy ... but presumably the change was considered preferable to North Sea oil production being disrupted, and ministers reluctantly agreed to it. Parliament was told at the time that the reason was that the standard way of classifying someone as employed or self-employed did not meet the rules of the industry, which does not seem to be particularly convincing.[15]

App. 9.5.2 *The purpose as published*

In Hansard:

> Mr Robert Sheldon [then Financial Secretary to the Treasury] ... these divers fall to be treated as employees under the existing law. Nevertheless, after careful examination of their particular circumstances, I recognise that there are certain distinctive features about their work, such as the danger which it entails, their vulnerability to long-term health hazards, the exceptional travelling difficulties involved and the shortness of their working life. Taking into account these and other factors, my right hon. Friend is now prepared to introduce legislation in the coming Finance Bill which will provide that earnings from diving operations in connection with exploration or exploitation activities in the UK Continental Shelf will, with effect from 1978 – 79, be assessable under Schedule D [trading income] rather than Schedule E [employment income].[16]

Office of Tax Simplification:[17]

[15] Avery Jones and Hattingh, "*Fowler v HMRC*: divers and the dangers of deeming" [2016] BTR p.417.

[16] HC Deb 3 February 1978 vol 943 c359 W.

[17] OTS, *Review of tax reliefs* (March 2011) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/198570/ots_review_tax_reliefs_final_report.pdf*

> B.108 The regime was introduced in 1978 to ensure fairness amongst divers of all nationality and employment status when engaged on the UK continental shelf. This is because at that time, the divers had to pay their costs themselves, and therefore being taxed as self employed ensured they were able to obtain relief for these expenses.
> B.109 However since then, we understand that many employers have made agreements with the trade unions that they will cover these costs. It would therefore appear that there is no ongoing rationale for this regime to be retained.[18]

App. 9.5.3 *Purpose according to Courts*

In the FTT:

> It is hard to see how dangers, vulnerability to long-term health hazards and shortness of working life, for example, are relevant to the question whether the individual should be taxed on an employment or a self-employed basis. The real purpose of section 15 ITTOIA, in my judgment, is to be found in the more relaxed rules (when compared with those for employment income) for deductibility of expenses in the calculation of trading income (and, possibly, from the timing advantage conferred by the absence of PAYE).[19]

In the Supreme Court:[20]

> the FtT found that [the reason for the rule] was because ... this class of divers commonly incurred their own costs, and therefore deserved the more generous expenses regime afforded to the self-employed, by comparison with employees. The FtT relied on an opinion to that effect published by the Office of Tax Simplification in March 2011, in preference to broader but less persuasive observations by the Financial Secretary to the Treasury in February 1978 ... There is no good reason to doubt that essentially factual finding (!)[21] by the FtT. It is clear (!) that it was not a purpose of the deeming provision ... to resolve some legal or factual uncertainty about whether such divers were genuinely employed or self-employed. On the contrary, section 15 applies only to employed divers...

[18] OTS recommended that the rule should be repealed, but no-one took any notice of that.

[19] *Fowler v HMRC* [2016] UKFTT 234 (TC) at [94].

[20] *Fowler v HMRC* [2020] UKSC 22 at [25].

[21] See App 9.6 (Purpose: Fact or law).

App. 9.5.4 *Purpose of DTA*

The Supreme Court also considered the purpose of the relevant DTA:

> 15. If one asks, as is required, for what purposes and between whom is the fiction created, it is plainly (!) not for the purpose of rendering a qualifying diver immune from tax in the UK, nor adjudicating between the UK and South Africa as the potential recipient of tax. It is for the purpose of adjusting the basis of a continuing UK income tax liability which arises from the receipt of employment income. Therefore to apply the deeming provision in [s.15(2) ITEPA] so as to alter the meaning of terms in the Treaty with the result of rendering a qualifying diver immune from UK taxation would be contrary to its purpose
> 34. Nor should article 3(2) of the Treaty[22] be construed so as to bring a qualifying diver within article 7 [business profits] rather than article 14 [employment income]. To do so would be contrary to the purposes of the Treaty... the Treaty is not concerned with the manner in which taxes falling within the scope of the Treaty are levied. Section 15 ... charges income tax on the employment income of an employed diver, but in a particular manner which includes the fiction that the diver is carrying on a trade.

The distinction between deemed trade and taxing employment income in the manner of a trade is, to say the least, a fine one.

App. 9.5.5 *Purpose: conclusion*

What I think emerges from this case study is that the search for purpose if carried out seriously can be unedifying. Laws are indeed like sausages: it is better not to see how they are made.[23] The best that can be done is for the Courts to skate over these problems - as they do.

Perhaps the purposive pendulum will swing back a little. We are at risk of reaching the position, said to pertain in America, that when legislative purpose is not clear from the enactment history, one resorts to reading the statute.

App. 9.6 Purpose: Fact or law?

In *Fowler* the purpose of the provision was said to be "essentially" a

[22] See 107.12.1 (Domestic-law meaning).

[23] This aperçu has been attributed to Bismark, but originates from the American poet, John Godfrey Saxe.

matter of fact.[24] If it is fact, it is a fact of a somewhat unusual kind. An appellate court is entitled to determine the purpose, and is not bound by findings of the lower Court. On appeal, a decision of the higher courts on purpose will bind the lower courts. On that basis the purpose is properly described as a matter of law. After all, "if it looks like a duck, swims like a duck, and quacks like a duck, then it probably is a duck."

[24] See [25] *Fowler v HMRC* [2020] UKSC 22 followed in *A Taxpayer v HMRC* TC/2020/02072 at [155].

APPENDIX TEN

PARLIAMENTARIANS

App. 10.1 Houses of parliament
App. 10.1.1 Taxation of MPs/MLs: Critique
App. 10.2 European Parliament
App. 10.3 Scottish/Welsh parliamentarian
App. 10.3.1 Parliamentarian in part of year

App. 10.1 Houses of parliament

Section 41 Constitutional Reform and Governance Act 2010 ("CRGA") provides special rules for residence and domicile of MPs and members of the House of Lords ("MLs"):

> (1) Subsection (2) applies if a person is for any part of a tax year[1]—
> (a) a member of the House of Commons, or
> (b) a member of the House of Lords.[2]
>
> (2) The person is to be treated for the purposes of the taxes listed in subsection (3) as resident and domiciled in the UK for the whole of that tax year.
>
> (3) The taxes are—
> (a) income tax,
> (b) capital gains tax, and

[1] IHT does not use the concept of tax years, so s.41(9) CRGA provides:
"In this section, in relation to inheritance tax—
(a) 'tax year' means a year beginning on 6 April and ending on the following 5 April, and
(b) 'the tax year 2010-11' means the tax year beginning on 6 April 2010."

[2] Section 41(5)(10) CRGA defines ML:
For the purposes of this section and section 42 a person is a member of the House of Lords if the person is entitled to receive writs of summons to attend that House....
(10) In determining for the purposes of this section and section 42 whether a person is entitled to receive writs of summons to attend the House of Lords, ignore—
(a) section 2 of the Forfeiture Act 1870;
(b) sections 426A and 427 of the Insolvency Act 1986.

(c) inheritance tax.

In practice this means MPs and MLs are deemed UK resident and domiciled for almost all tax purposes, though minor taxes such as NICs slip through the net. But following the introduction of 15-year deemed domicile rule in 2017, this is not likely to have any practical effect.

EN CRGA provides:

> 269.The section provides that MPs and peers are deemed ROD [resident ordinarily resident and domiciled] for the whole of each tax year in which they are a member of either House (including those tax years in which they are a member for only part of the year). This means that they will be deemed ROD from the start of the tax year in which they become a member of that House and to the end of the tax year in which they cease to be a member.

DT relief may apply where a treaty has a tie-breaker in OECD Model form.

Section 41(4) CRGA defines when a person becomes or ceases to be a MP or a ML:

> For the purposes of this section a person—
> (a) becomes a member of the House of Commons when (having been elected to that House) the person makes and subscribes the oath required by the Parliamentary Oaths Act 1866 (or the corresponding affirmation), and
> (b) ceases to be a member of that House when—
> (i) the Parliament to which the person was elected is dissolved, or
> (ii) the person's seat is otherwise vacated.

Since a person will know the exact date when they become an MP or ML, they have an opportunity for pre-appointment planning and there may even be some scope for further planning when deemed UK domiciled (eg in relation to the IHT spouse exemption if the spouse is UK domiciled).[3] Note that when a person ceases to be a ML or MP, they will continue to be deemed IHT domiciled for another three or four years.

Sinn Féin MPs do not take their seats at Westminster so happily escape deemed UK residence and domicile.

[3] See Slevin "Not Quite the Same", Taxation (19 May 2011).

Section 41(6) CRGA excludes judges[4] and bishops (the section is after all only a *political* exercise). This level of micro-detail cannot sensibly be covered even in this book which aims to be comprehensive: it would be surprising if there are more than one or two individuals concerned (if indeed there are any at all).

App. 10.1.1 *Taxation of MPs/MLs: Critique*

Stephen Timms (then Financial Secretary to the Treasury) said:

> This is how the vast majority of the UK population is taxed, so it seems right to me ... that MPs and Members of the House of Lords should be taxed on that basis and should not have access to the remittance basis. It is helpful that there is now clear, albeit rather belated, cross-party support for action, following the Conservative's change of position to supporting the principle that MPs and Members of the House of Lords should be required to pay tax in full on their overseas income, gains and assets.[5]

A great deal more could be said about the policy issues relating to these provisions. The CRGA provisions were not debated in parliament: they were a late amendment to the CRGA, which was enacted in a breathless ping pong procedure just before the dissolution of parliament. But the context of the rules is wholly political - the scrabble for public approval and to knock the opposition - so it would be unrealistic to expect cool and considered reflection. The debate is long-standing.[6]

App. 10.2 European Parliament

The deemed UK residence/domicile rule does not apply to MEPs. EN CRGA para 275 discusses the position of a MEP who is also a member of the House of Lords:

> A peer is not entitled to receive a writ of summons if they are a Member

[4] This makes sense, as a ML who holds a disqualifying judicial office is disqualified from sitting or voting in the House of Lords: s.137(7) Constitutional Reform Act 2005.

[5] Hansard, 5 Jan 2010, Column 52WH.

[6] There was a comparable debate in relation to Lord Vestey who (though resident and domiciled when ennobled in 1922) had shortly before been a tax exile: see "Vestey: Royal Commission debate" *https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey_Royal_Commission_debate.pdf*

of the European Parliament, but they do receive writs of summons once they step down from the European Parliament. Therefore, a peer who is an MEP would not be deemed ROD under section 41, but once entitled to receive writs again they would be deemed ROD.Section 42(10) allows such MEPs to avoid being deemed ROD in these circumstances by making the transitional provision available to such MEPs in the same way as to those peers currently entitled to receive writs of summons.

App. 10.3 Scottish/Welsh parliamentarian

This section considers whether parliamentarians are Scottish/Welsh taxpayers.[7] The Scottish/Welsh provisions are best read side by side:

s.80D Scotland Act 1998	**s.113E Government of Wales Act 2006**
(1) For any tax year, a Scottish taxpayer is an individual (T)— (a) who is resident in the UK for income tax purposes for that year (see Schedule 45 to the FA 2013), and (b) who, for that year, meets condition A, B or C....	(1)For any tax year, a Welsh taxpayer is an individual (T)— (a) who is resident in the UK for income tax purposes for that year (see Schedule 45 to the Finance Act 2013), and (b) who, for that year, meets condition A, B or C....
(4) T meets condition C if, for the whole or any part of the year, T is— (a) a member of Parliament for a constituency in Scotland, (b) a member of the European Parliament for Scotland, or (c) a member of the Scottish Parliament.	(4) T meets condition C if, for the whole or any part of the year, T is— (a) a member of Parliament for a constituency in Wales, (b) a member of the European Parliament for Wales, or (c) an Assembly member.
(5) Subsection (1) does not apply if T is a Scottish parliamentarian for the whole or any part of the year (see section 116F).	(4A) Subsection (1) does not apply if T is a Welsh parliamentarian for the whole or any part of the year (see section 80DA).
(6) For the purposes of subsection (5) and section 116F, T is a Scottish parliamentarian if T is a member as	(4B) For the purposes of subsection (4A) and section 80DA, T is a Welsh parliamentarian if T is

[7] See 6.43 (Scottish/Welsh taxpayers).

described in any of paragraphs (a) to (c) of section 80D(4) of the Scotland Act 1998 (definition of a Scottish taxpayer).

a member as described in any of paragraphs (a) to (c) of section 116E(4) of the Government of Wales Act 2006 (definition of a Welsh taxpayer).

App. 10.3.1 *Parliamentarian in part of year*

There are rules dealing with the rare possibility that Scottish taxpayer is a member of the Welsh assembly for part of a year (and vice versa). We are approaching a level of micro detail here such that one wonders why it was necessary to make a provision for this case. It will rarely if ever happen, and the rules make next to no difference if it does. But here it is:

s.80DA Scotland Act 1998

(1) An individual (T) who is a Welsh parliamentarian for the whole or any part of a tax year is a Scottish taxpayer for that tax year if—

(a) T is resident in the UK for income tax purposes for that year (see Schedule 45 to the FA 2013),

(b) T meets condition C in section 80D for that year, and

(c) T meets either of the following conditions for that year.

(2) T meets the first condition if—

(a) the number of days in that year on which T is a member as described in any of paragraphs (a) to (c) of section 80D(4), exceeds

(b) the number of days in that year on which T is a Welsh parliamentarian.

(3) T meets the second condition if—

(a) the number of days in that year mentioned in paragraphs (a) and (b) of subsection (2) are the same, and

(b) T meets condition A or B in section 80D for that year.

s.116F Government of Wales Act 2006

(1) An individual (T) who is a Scottish parliamentarian for the whole or any part of a tax year is a Welsh taxpayer for that tax year if—

(a) T is resident in the UK for income tax purposes for that year (see Schedule 45 to the Finance Act 2013),

(b) T meets condition C in section 116E for that year, and

(c) T meets either of the following conditions for that year.

(2) T meets the first condition if—

(a) the number of days in that year on which T is a member as described in any of paragraphs (a) to (c) of section 116E(4),

(b) the number of days in that year on which T is a Scottish parliamentarian.

(3) T meets the second condition if—

(a) the number of days in that year mentioned in paragraphs (a) and (b) of subsection (2) are the same, and

(b) T meets condition A or B in section 116E for that year.

App. 11.1 Treaty background

The taxation of visiting forces is based on the following treaties:

(1) NATO Status of Forces Agreement 1951 ("NATO SOFA")[1]

(2) Partnership for Peace Status of Forces Agreement 1995 ("PfP SOFA")[2]

(3) EU Status of Forces Agreement 2003[3]. Its taxation provisions are

Accessible *http://www.nato.int/cps/en/natolive/official_texts_17265.htm*

[2] The full title is: Agreement among the States Parties to the North Atlantic Treaty and the other States participating in the Partnership for Peace regarding the Status of their Forces, 19 June 1995.
Accessible *http://www.nato.int/cps/en/natolive/official_texts_24742.htm*

[3] The full title is: Agreement between the member states of the European Union concerning the status of military and civilian staff seconded to the institutions of the European Union, of the headquarters and forces which may be made available to the European Union in the context of the preparation and execution of the tasks referred to in article 17(2) of the treaty on European Union including exercises, and of the military and civilian staff of the member states put at the disposal of the European Union to act in this context.
http://www.official-documents.gov.uk/document/cm75/7572/7572.pdf

> similar to the existing treaties.

The PfP SOFA incorporates the 1951 treaty by reference.

A House of Commons library note explains the background:[4]

> In order to regulate the extent to which foreign military personnel have exemption from local jurisdiction, it has become the practice, particularly since the Second World War, to regulate these issues through Status of Forces Agreements (SOFAs), which are negotiated between the sending and host state.
>
> Status of Forces Agreements allow a sending State's military forces to operate within, and at the consent of, the host state. They also provide for the status of military headquarters established in other countries. They may be bilateral or multilateral and there are no formal requirements as to the form, content, length, or title that a SOFA should take.
>
> In their most basic form they establish the legal jurisdiction over military personnel and related civilians; define the exemptions of such personnel from passport and visa regulations and customs and excise duties; set out the legal right for military personnel to patrol bases, transit the host state, wear uniform and bear arms in the host nation and set out the cost arrangements for establishing and maintaining military facilities.
>
> In 1951 NATO agreed a Status of Forces Agreement to govern hosting arrangements between the Alliance's member states. From the UK's perspective, it applies equally to visiting forces in the UK and to British forces based in NATO countries, for example in Germany.
>
> The Visiting Forces Act 1952 incorporates the NATO SOFA into UK law.[5] Together, they provide the overarching framework for the stationing of US forces in the UK.
>
> The provisions of the VFA were extended to NATO military headquarters in the UK by the International Headquarters and Defence Organisations Act 1964.
>
> The Visiting Forces Agreement was extended in 1995 by the Partnership for Peace Status of Forces Agreement to cover the forces

See The Visiting Forces and International Military Headquarters (EU SOFA) (Tax Designation) Order 2012.

See Parry & Grant, Encyclopaedic Dictionary of International Law (3 ed, 2009)

[5] Author's footnote: However the tax provisions of the treaties are incorporated into UK law by the tax legislation set out below.

of states who not members of NATO but had agreed to participate in NATO's Partnership for Peace plan.

The Armed Forces Act 1996 extended the Visiting Forces Act to third countries (i.e. neither members of NATO nor members of the Partnership for Peace plan) by Order in Council. It might also be applied to Service personnel from other countries undertaking training at UK military establishments. Algeria, for example, was added to the list of countries by Visiting Forces (Designation) Order 2010 (SI 2010/2970). The EU Status of Forces Agreement applies in circumstances in which forces are not regulated by either the NATO or the Partnership for Peace Status of Forces agreement.

App. 11.2 Residence for IT and CGT

App. 11.2.1 *Who qualifies for relief*

Article 1 NATO SOFA provides:

> In this Agreement the expression
>
> 'force' means the personnel belonging to the land, sea or air armed services of one Contracting Party when in the territory of another Contracting Party in the North Atlantic Treaty area in connexion with their official duties, provided that the two Contracting Parties concerned may agree that certain individuals, units or formations shall not be regarded as constituting or included in a 'force' for the purpose of the present Agreement;
>
> 'civilian component' means the civilian personnel accompanying a force of a Contracting Party who are in the employ of an armed service of that Contracting Party, and who are not stateless persons, nor nationals of any State which is not a Party to the North Atlantic Treaty, nor nationals of, nor ordinarily resident in, the State in which the force is located.

Section 833 ITA provides:

> (1) This section applies to an individual who—
> (a) is a member of a visiting force of a designated country or of a civilian component of such a force,
> (b) is in the UK, but only because of being a member of the force or the civilian component, and
> (c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
>
> (2) For the purposes of subsection (1)—
> (a) members of the armed forces of a designated country who are

attached to a designated international military headquarters[6] are treated as a visiting force of that country, and

(b) whether an individual is a member of a civilian component of such a force is to be determined accordingly.

(2A) This section also applies to an individual within subsection (3) or (3A).

(3) An individual is within this subsection if the individual—

(a) is of a category for the time being agreed between Her Majesty's Government in the UK and the other members of the North Atlantic Council,

(b) is employed by a designated allied headquarters,

(c) is in the UK, but only because of being employed by the designated allied headquarters, and

(d) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen

(3A) An individual is within this subsection if the individual—

(a) belongs to the EU civilian staff,[7]

(b) is in the UK, but only because of serving as part of that staff, and

(c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.....

(6) Subsections (1) to (3) are to be interpreted as if—

(a) they were in Part 1 of the Visiting Forces Act 1952,[8] and

[6] Defined in s.833(7) ITA: In this section—
"allied headquarters" means an international military headquarters established under the North Atlantic Treaty, and
"designated" means designated for the purpose in question by or under an Order in Council made for giving effect to an international agreement."

[7] Defined in s.833(7) ITA: "the EU civilian staff means—
(a) civilian personnel seconded by a member State to an EU institution for the purposes of activities (including exercises) relating to the preparation for, and execution of, tasks mentioned in Article 43(1) of the Treaty on European Union (tasks relating to a common security and defence policy), as amended from time to time, and
(b) civilian personnel (other than locally hired personnel)—
(i) made available to the EU by a member State to work with designated international military headquarters or a force of a designated country, or
(ii) otherwise made available to the EU by a member State for the purposes of activities of the kind referred to in paragraph (a)."

[8] This incorporates, in particular, the definitions in s.17 Visiting Forces Act 1952:
"(1) In this Act, unless the context otherwise requires, the expression "forces", in relation to a country, means any of the naval, military or air forces of that country, the

(b) references in that Act to a country to which a provision of that Act applies were references to a designated country.

HMRC say:

> **Eligibility for SOFA status (Status of Forces Agreement)**
> My query relates to a client that needs to source a UK role at short notice. The role will be covered by/eligible for SOFA status.
> They have identified 2 individuals that are right for the role. One of them is a current US national/US resident who would be brought to the UK for the project.
> The second individual is someone who is another US national, but he is already present in the UK. He is someone who is here on an assignment, and is currently regarded as a tax resident in the UK (having been here for a few years).
> The question they have is that will SOFA status apply, as normal, to the individual that is already here in the UK? In other words will this individual be regarded as not UK resident under the SOFA status from the date of the SOFA stamp/the date at which he commences the project role until the date this ends or he returns to the US at the conclusion of the project.
> **Answer**
> The tax treatment of this individual is determined by the Agreement regarding the Status of Forces of Parties to the North Atlantic Treaty ("NATOSOFA") (Treaty Series No.3, 1955).
> Article I(a) defines a Visiting Force as the personnel of land, sea or air armed services of one Contracting Party while in the other Contracting Party in connection with their official duties.
> Article I(b) defines a Civilian Component as the civilian personnel accompanying a Visiting Force who are in the employ of the armed service and who are not stateless persons, nor nationals of any state which is not a party to the North Atlantic Treaty, nor nationals of, nor

expression "United Kingdom court" means a court exercising jurisdiction in the United Kingdom under United Kingdom law otherwise than by virtue of section two of this Act, and the expression "United Kingdom law" means the law of the United Kingdom or of any part thereof.

(2) For the purposes of this Act a member of a force of any country which (by whatever name called) is in the nature of a reserve or auxiliary force shall be deemed to be a member of that country's forces so long as, but only so long as, he is called into actual service (by whatever expression described) or is called out for training; and any reference in this Act to a person's becoming a member of a country's forces shall be construed accordingly."

ordinarily resident in, the State in which the force is located.

If the individual is a member of the armed forces then they are within Art 1(a) since they would be “in the Contracting Party in connection with their official duties.” If they are a Civilian Component, they would not be in I(b) if they were ordinarily resident in the UK. Ordinary residence for NATSOFA purposes does not have the same meaning as the tax meaning, so in this instance we take it that the individual is ordinarily resident in the UK, since they are already in the UK “on an assignment, and is currently regarded as a tax resident in the UK (having been here for a few years).”

The exemption from taxation of salary under Art X(1) will not apply because they continue to be resident in the UK because they are not here solely by being a member of the force or civilian component. They were here already.

An individual employed by a private company contracted to work on a defence contract (known sometimes as a “tech-rep”) is not a member of the “civilian component” for the purposes of NATOSOFA. The emoluments paid to him by the company which employs him for duties performed in the UK are liable to UK tax in accordance with the normal rules, as modified by the terms of the UK/US double taxation convention.

If the individual is a civilian who does not possess UK nationality but who is ordinarily resident in the UK (and are not therefore members of the civilian component), they may nevertheless qualify for exemption in respect of their earnings if they qualify as an “official agent of a foreign government” under Section 301 ITEPA 2003. Sub-section 5 defines this as a person who is not a consul, but is employed on the staff or a consulate or an official department or agency of a foreign state. It does not apply to a department or agency which carries on a trade, business or other undertaking for the purposes of profit.[9]

[13] HMRC, "Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 4.50. *https://www.gov.uk/government/publications/guidance-notes-for-financial-instituti*

App. 11.2.3 *Residence/domicile relief*

Article X NATO SOFA provides:

> 1. [a] Where the legal incidence of any form of taxation in the receiving State depends upon residence or domicile, periods during which a member of a force or civilian component is in the territory of that State by reason solely of his being a member of such force or civilian component shall not be considered as periods of residence therein, or as creating a change of residence or domicile, for the purposes of such taxation...

A period of presence would not normally create a change of actual domicile, but it could create deemed domicile, and the drafter may have had in mind a civil law concept of domicile which is more like habitual residence.

Section 833(4) ITA provides the statutory relief:

> If this section applies to an individual throughout a period, the period is not treated for income tax purposes as—
> (a) a period of residence in the UK, or
> (b) creating a change of the individual's residence or domicile.

Section 271ZA TCGA extends the relief to CGT:

> (1) This section applies for the purposes of capital gains tax if section 833 of ITA 2007 (visiting forces and staff of designated allied headquarters) applies to an individual throughout a period.
> (2) The period is not a period of residence in the UK.
> (3) The period does not create a change of the individual's residence or domicile.

See too 26.22.5 (Usual place of residence) discussing US Forces on tour of duty in England.

There are two circumstances where it is advantageous to be UK resident, and these rules are disapplied: personal allowances and CGT private residence relief.

App. 11.2.4 *Visiting forces: Personal allowances*

Section 833(5) ITA provides:

ons
TDSI was abolished from 2016/17, and the Guidance Notes withdrawn. But the general point made here remains relevant.

> Subsection (4) does not affect the operation of section 56 or 460 of this Act (residence etc of claimants) in relation to an individual for any tax year.

EN ITA explains:

> 2498. Subsection (5) ensures that an individual to whom this section applies has the benefit of the personal reliefs to which the individual would be entitled if resident in the UK. Such reliefs will, accordingly, be available in calculating the individual's liability to UK income tax on such income as, for example, UK bank interest, dividends from UK resident companies and UK-based earnings which are not exempt under section 303 of ITEPA.

App. 11.2.5 *Visiting forces: Private residence*

Section 222 B(10) TCGA provides:

> Section 271ZA(2) (visiting forces etc) is to be disregarded in determining for the purposes of this section whether or not an individual is resident in the UK.

This overrides the usual disallowance of CGT private residence relief in relation to non-residents.[14]

App. 11.3 Employment income

App. 11.3.1 *Treaty background*

Article X.1 NATO SOFA provides:

> ... Members of a force or civilian component shall be exempt from taxation in the receiving State on the salary and emoluments paid to them as such members by the sending State or on any tangible movable property the presence of which in the receiving State is due solely to their temporary presence there.

App. 11.3.2 *The relief*

Section 303 ITEPA provides:

> (1) No liability to income tax arises in respect of earnings if—
> (a) they are paid by the government of a designated country to a member of a visiting force of that country or of a civilian component of such a force, and

[14] See 59.3 (Disapplication of private residence relief).

> (b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
>
> (2) [*This is a definition provision identical to s.833(2) set out above*]
>
> (3) No liability to income tax arises in respect of earnings if they are paid by a designated international military headquarters to an employee of a category for the time being agreed between Her Majesty's government in the UK and the other members of the North Atlantic Council.
>
> (4) But where the employee is a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, subsection (3) only applies if it is necessary for it to do so to give effect to an agreement between parties to the North Atlantic Treaty.
>
> (4A) No liability to income tax arises in respect of earnings if—
>
> (a) they are paid by the government of a designated country to a person belonging to the EU civilian staff, and
>
> (b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
>
> (5) & (6) [*These are definition provisions identical to s.833(6)(7) set out above]*.

App. 11.4 IHT reliefs

App. 11.4.1 *Excluded property*

Section 155(1) IHTA provides:

> Section 6(4) above applies to—
>
> (a) the emoluments paid by the Government of any designated country to a member of a visiting force of that country, not being a British citizen, a British Dependent Territories citizen, a British National (Overseas) or a British Overseas citizen, and
>
> (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person while serving as a member of the force.

This takes us to s.6(4) IHTA:

> Property to which this subsection applies by virtue of section 155(1) or (5A) below is excluded property.

In short, emoluments and tangible movable property of visiting forces qualify as excluded property for IHT purposes.

App. 11.4.2 *IHT deemed domicile*

Section 155(2) IHTA provides:

> A period during which any such member of a visiting force as is referred to in subsection (1) above is in the UK by reason solely of his being such a member shall not be treated for the purposes of this Act as a period of residence in the UK or as creating a change of his residence or domicile.

This is not needed,[15] but it does not harm.

Thus (in short) visiting forces do not become IHT deemed domiciled even if they reside 15 or more years in the UK (but in practice I expect that hardly ever happens). It is considered that this relief does not apply to members of visiting forces who are British citizens (etc) even though on a literal reading one might say that such persons are "referred to" in s.155(1).

App. 11.4.3 *"Visiting force" and definitions*

Section 155 IHTA provides

> (3) References in subsections (1) and (2) above to a visiting force shall apply to a civilian component of a visiting force as they apply to the force itself, and those subsections shall be construed as one with Part I of the Visiting Forces Act 1952 but so that for the purposes of this section references to a designated country shall be substituted in that Act for references to a country to which a provision of that Act applies.
> (4) For the purpose of conferring on persons attached to any designated allied international military headquarters the like benefits as are conferred by subsections (1) and (2) above on members of a visiting force or civilian component, any members of the armed forces of a designated country shall, while attached to any such headquarters, be deemed to constitute a visiting force of that country, and there shall be a corresponding extension of the class of persons who may be treated as members of a civilian component of such a visiting force.
> (5A) Section 6(4) also applies to—
> (a) the emoluments paid by the Government of any designated country to a person belonging to the EU civilian staff, not being a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, and
> (b) any tangible movable property the presence of which in the UK

[15] See 5.6.3 ("Residence" for 15-year rule).

> is due solely to the presence in the UK of such a person serving as part of that staff.
>
> (5B) A period during which any such person belonging to the EU civilian staff as is referred to in subsection (5A) is in the UK by reason solely of that person belonging to that staff is not to be treated for the purposes of this Act as a period of residence in the UK or as creating a change of that person's residence or domicile.

Section 155 IHTA provides:

> (6) For the purposes of this section—
> "allied headquarters" means any international military headquarters established under the North Atlantic Council;
> "designated" means [definition identical to IT definition]
> "the EU civilian staff" means [definition identical to IT definition]
> (7) Any Order in Council made under section 73 of the Finance Act 1960 which is in force immediately before the passing of this Act shall have effect for the purposes of this section as if had also been made under this section, and may be varied or revoked accordingly.

The exemption is not available to spouses of visiting forces.

App. 11.5 SDLT

Section 74A FA 1960 provides an exemption for land acquired as barracks or for training; this is too specialist a topic to be discussed here.

APPENDIX TWELVE

STUDENTS AND TEACHERS

App. 12.1 Scholarship income
App. 12.1.1 Payment from employer of relative
App. 12.2 Student grant: DT relief
App. 12.2.1 Students: non-OECD Model
App. 12.3 DT relief: Teachers

The following topics are considered elsewhere:
50.4.9 (School/university fees - s.731)

App. 12.1 Scholarship income

Section 776 ITTOIA provides:

> (1) No liability to income tax arises in respect of income from a scholarship[1] held by an individual in full-time education at a university, college, school or other educational establishment.
> (2A) No liability to income tax arises in respect of income from a payment made
> [a] under section 23C(5A) of the Children Act 1989 (duty to make payments to former relevant children who pursue higher education) or
> [b] under sections 110(6) or 112(2) of the Social Services and Well-being (Wales) Act 2014 (duty to make payments to certain young people who pursue higher education).

Scholarships from charities would not be taxable under general principles,[2] but this exemption would be needed if a private (non-charitable) trust awarded a bursary to a beneficiary.

[1] Scholarship is widely defined in s.776(3) ITTOIA: "In this section "scholarship" includes a bursary, exhibition or other similar educational endowment."

[2] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 12.5 (Charity beneficiaries)
Online version *https://www.taxationofcharities.co.uk*

SP 4/86 provides:

> **Payments made by employers to employees when in full-time attendance at universities and technical colleges**
> Scholarships, exhibitions, bursaries etc held by a person receiving full-time instruction at university, technical college or similar educational establishment are exempted from income tax by Section 776 ITTOIA 2005.
> This Statement of Practice sets out the circumstances when payments made by an employer to an employee for periods of attendance on a full-time course (including sandwich courses) can be exempted from income tax. The following conditions and exclusion apply.
> **Conditions**
> The employer requires that the employee must be enrolled at the educational establishment for at least one academic year and must attend the course for at least twenty weeks in that academic year. Or if the course is longer the employee must attend for at least twenty weeks on average, in an academic year over the period of the course.
> The educational establishments must be recognised universities, technical colleges or similar educational establishments, which are open to members of the public generally and offer more than one course of practical or academic instruction. For example an employer's internal training school or one run by an employer's trade organisation will not satisfy the educational establishment condition for the Statement of **Practice**.
> For courses commencing on or after 1 September 2007, the payments, including lodging, subsistence and travelling allowances, but excluding any tuition fees payable by the employee to the university etc, do not exceed £15,480 for the academic year.
> **Exclusion**
> This exemption does not apply to payments of earnings made for any periods spent working for the employer during vacations or otherwise.
> If the rate exceeds £15,480 HMRC may look at the arrangements in detail. This is because the level of payment exceeds what might reasonably be described as a scholarship or training allowance. However, an increase in the rate of payment over the qualifying limit, part way through a course, will not affect the exemption applying to any payments for the earlier part of the course.

The figure of £15,480 has not been revised since 2007.

App. 12.1.1 *Payment from employer of relative*

Section 776(2) ITTOIA provides:

> This exemption is subject to section 215 of ITEPA 2003 (under which only the scholarship holder is entitled to the exemption if the scholarship is provided by reason of another person's employment).

That takes us to s.215 ITEPA which provides:

> If an employment-related benefit consists in the provision of a scholarship, section 776(1) of ITTOIA 2005 (exemption for scholarship income) applies only in relation to the holder of the scholarship.

App. 12.2 Student grant: DT relief

Article 20 OECD Model Convention provides:

> Payments which a student or business apprentice
> [1] who is or was immediately[3] before visiting a Contracting State a resident of the other Contracting State and
> [2] who is present in the first-mentioned State solely for the purpose of his education or training
> receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.

This is not restricted to trust income, but in practice trust income may be the most common case where this DT relief applies.

The OECD commentary provides:

> 3. The Article covers only payments received for the purpose of the recipient’s maintenance, education or training. It does not, therefore, apply to a payment, or any part thereof, that is remuneration for services rendered by the recipient and which is covered by Article 15 (or by Article 7 in the case of independent services). Where the recipient’s training involves work experience, however, there is a need to distinguish between a payment for services and a payment for the recipient’s maintenance, education or training. The fact that the amount paid is similar to that paid to persons who provide similar services and

[3] The OECD commentary provides: “2. The word “immediately” was inserted in the 1977 Model Convention in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State.”

are not students or business apprentices would generally indicate that the payment is a remuneration for services. Also, payments for maintenance, education or training should not exceed the level of expenses that are likely to be incurred to ensure the recipient's maintenance, education or training.

4. The Article only applies to payments arising from sources outside the State where the student or business apprentice is present solely for the purposes of education or training. Payments arising from sources within that State are covered by other Articles of the Convention: for instance, if, during his presence in the first-mentioned State, the student or business apprentice remains a resident of the other State according to Article 4, payments such as grants or scholarships that are not covered by other provisions of the Convention (such as Article 15) will be taxable only in his State of residence under paragraph 1 of Article 21. For the purpose of the Article, payments that are made by or on behalf of a resident of a Contracting State or that are borne by a permanent establishment which a person has in that State are not considered to arise from sources outside that State.

DTR Manual provides:

DT1930: Non-residents: UK income: Visiting students and apprentices [Nov 2019]

Some agreements also provide that certain remuneration which a student or business apprentice receives from employment in this country shall be exempt from United Kingdom tax. Various limitations are imposed in particular agreements, often relating to monetary limits, the student's need to supplement grant income, or the type of employment. In every case when an agreement provides an exemption of this type, details of any limitations are given in Part IV of this volume.

Claims for exemption under a students' Article are dealt with in the District which, but for the agreement, would have dealt with any tax on such payments or remuneration. In examining claims, refer to the relevant double taxation agreement to ensure that the conditions for exemption are fulfilled. The following notes give some guidance on matters to be taken into account in considering whether exemption is due

1. The exemption does not extend to income or capital gains derived by a student or business apprentice from his own investments or from trust income to which he is absolutely entitled.
2. Whether payments or remuneration are for the student's etc. maintenance, education or training, or for supplementing his resources, or are reasonably necessary, is a question of fact and the onus is on the claimant to provide the evidence. The figures quoted

in Statement of Practice SP4/86 (see SE1314)[4] can be used as a guide. Where the payments or remuneration seem to be unreasonably high, refer the case to Personal Tax Division (Schedule E), Sapphire House, Solihull.

3. If the payments or remuneration exceed the amount needed for the student's etc. maintenance, education or training, the whole amount is taxable and not merely the excess.
4. Where the Article provides that remuneration is to be exempted up to a certain monetary limit and the student or business apprentice is resident in the United Kingdom under United Kingdom domestic law, that amount is additional to the personal allowances available under United Kingdom law. For example, if the monetary limit in the agreement is 1,000 and the claimant is entitled to a personal allowance in the relevant year of 3,445, earnings of 4,445 or less will be exempt.

App. 12.2.1 *Students: non-OECD Model*

Some DTAs do not follow the OECD Model. For instance, art 19 Bangladesh/UK DTA provides a wider relief:

> (1) An individual who is a resident of one of the Contracting States at the time he becomes temporarily present in the other Contracting State and who is temporarily present in the other Contracting State for the purpose of:
>
> (a) studying in the other Contracting State at a university or other recognised educational institution; or
>
> (b) securing training at a recognised educational institution required to qualify him to practise a profession; or
>
> (c) studying or carrying out research as a recipient of a grant, allowance or award from a governmental, religious, charitable, scientific, literary or educational organisation;
>
> shall be exempt from tax in that other Contracting State on:
>
> (i) remittances from abroad for the purpose of his maintenance. education, study, research or training;
>
> (ii) the grant, allowance or award; and
>
> (iii) income from personal services rendered in the other Contracting State (other than any rendered by an articled clerk or other individual undergoing professional training to the person or partnership to whom he is articled or who is providing the training) provided that the income constitutes earnings

[4] See App 12.1 (Scholarship income).

> reasonably necessary for his maintenance and education.
>
> (2) In no event shall an individual have the benefit of the provisions of this Article for more than five years.

App. 12.3 DT relief: Teachers

There is no specific relief for teachers in either the OECD Model or the UN Model, though of course art 15 (employees) will sometimes apply. But the UN Model discusses the possibility,[5] and some DTAs do contain a relief for teachers, such as art 20 Bangladesh/UK DTA:

> (1) An individual who visits one of the Contracting States for a period not exceeding two years for the purpose of teaching or engaging in research at a university, college or other recognised educational institution in that Contracting State, and who was immediately before that visit a resident of the other Contracting State, shall be exempted from tax by the first-mentioned Contracting State on any remuneration for such teaching or research for a period not exceeding two years from the date he first visits that State for such purpose.
>
> (2) This Article shall not apply to income from research unless such research is undertaken by the individual in the public interest and not primarily for the benefit of some other private person or persons.

[5] Commentary to article 20 (Students) para 10.

APPENDIX THIRTEEN

HOW TO IMPROVE RESIDENCE AND DOMICILE TAXATION

App. 13.1 Procedural changes
App. 13.2 Technical changes
App. 13.3 Section numbering system

App. 13.1 Procedural changes

The two most significant improvements to UK tax reform would be procedural:

(1) Less change[1]

(2) Comply with the Tax Consultation Framework[2]

App. 13.2 Technical changes

The following is a list of short technical improvements, with no significant tax cost, no significant winners or losers, and not politically contentious. It represents some cheap and (relatively) easy improvements to residence and domicile tax which no-one should find objectionable or difficult: the "low lying fruit" of tax reform.

Proposal	**Reference**
English/Northern Ireland law definition of domicile should adopt the amendments made in Scotland. (This involves a general law reform, not just tax law.)	See 4.4 (Domicile of origin); 4.18 (Child's domicile: Scotland)
Repeal s.267ZA(8) IHTA	See 5.14.13 (Critique)
Repeal IHT election-domicile.	See 5.14.13 (Election domicile: Critique)

[1] See 1.11 (The promise of stability).

[2] See 1.12.1 (Tax Consultation Framework).

Repeal s.763(3) ITA which is otiose.	See 7.3 (Trustees a distinct person)
IT/CGT definition of trustee residence should apply for IHT.	See 7.19.1 (IHT trust residence: Critique)
TNR rules: exemption if foreign tax paid and annual exemptions.	See 11.23 (TNR rules: Critique)
Repeal s.82 and s.65(3) TCGA (collection of exit charge from trustees).	See 12.5.2 (Critique)
Define RFI to mean all foreign source income; repeal s.830(3) ITTOIA.	See 16.9.4 (RFI definition: Critique); 97.8 (Clawback of unremittable assets relief)
Repeal s.838 ITTOIA (relief for expense of collecting RFI).	See 16.10 (RFI collection costs).
“Relevant persons” for remittance purposes should just be the taxpayer, spouse, cohabitee and minor children; investment relief can be abolished as unnecessary.	See 18.8.1 (Corporate relevant persons: Critique) 18.12 (Relevant person rules: Critique); 18.52.2 (Gifts to charity: Reform); 19.23 (Investment relief: Critique)
Payment into UK account of non-relevant person should not (for that reason alone) be a remittance.	See 18.14.6 (Gift to non-relevant person); 18.52.2 (Gift to charity: Reform)
Repeal s.809P(13) ITA	See 18.44 (Sets)
Foreign services relief: delete condition B and repeal s.809W(5) ITA.	See 19.27.1 (Services relief condition B: Critique); 19.28 (Exceptions: s.730 & s.87 benefits)
A person remitting from a mixed fund can determine what constituent of the fund the remittance consists of.	See: 20.21 (Mixed fund rules: Critique)
Align taxation of trades and professions/vocations so the same rules apply to all.	See 21.3.1 (Profession/vocation: Critique)

Source of interest should be as specified in OECD Model.	The current test is uncertain. See 26.15.1 (Source of interest: Critique)
Define "ordinary place of abode" in line with residence.	See 26.22.8 (Place of abode: Critique)
The DTA self-certificate system for royalties should apply to interest.	See 26.37 (Claim procedure: Critique)
Repeal relief for exempt foreign currency securities.	See 27.8 (Exempt foreign currency securities)
Abolish Accrued Income remittance basis (make gains subject to CGT).	See 28.9.7 (Critique)
Delete requirement that "foreign employers" must be resident outside the UK.	See 34.15 (Foreign employer)
Repeal the remittance basis for Chargeable Overseas	See 34.16 (Incidental duties in UK).
Repeal s.721(6) ITEPA (illegitimate child not counted as a child).	See 39.4.1 ("Family")
Abolish the s.105 ITEPA charge and extend s.106 to cover all the acquisition cost.	See 39.28.6 (Critique)
Shadow directors should be taken out of the benefit in kind charge.	See 39.33 (Home BiK: Critique)
Align treatment of Baker & Garland trusts, ie extend s.464 ITA to all trusts.	See 42.9.5 (Critique)
Repeal s.56(3)(a)-(f) - an odd list of entitlements to IT personal allowances.	See 44.7.5 (IT allowances: Misc)
Transactions in financial assets should in principle be deemed non-trading. The IME, AIF and OFTR exemptions can be repealed.	See 45.11 (Critique)
Repeal s.623 ITTOIA which has no effect.	See 47.4 (Settlor deductions/ reliefs)

Collect tax on income of settlor-interested trust from the settlor.	See 47.11 (Trustees of settlor-interested trust)
Replace pay and reclaim system with a rule that the settlor/life tenant pay their tax, and the trustees are only secondarily liable (if at all).	See 47.11.7 (Critique)
Split year rule should apply for s.643A/720/731/87	See 47.24 (s.643A remittance basis); 49.26.3 (Remittance in split year); 50.39.3 (Remittance in split year); 61.18 s.87 gains of split year
Simplify the genuine transactions defence	See 48.17 (Genuine transactions: Critique)
Repeal s.748 information notices	See 48.19 (ToA information notices)
Restore motive defence old condition B.	See 50.18.10 (s.733 computation: Critique)
Section 731 remittance basis should apply only if benefit is remitted (like the s.87 remittance basis).	See 50.43 (s.731: Critique)
simplify s.731 remittance basis: s.731 income should be regarded as remitted if the benefit is received or remitted to the UK, matching to UK source relevant income should not matter	See 50.43 (s.731: Critique)
Clarify the position for benefits received by non-residents: should be within s.731 only under settlor-attribution rule (ie settlor UK resident, and benefit received by non-resident close family) and not if income payment	See 50.46 (s.731 income arising to non-resident); 50.46.3 (Pre-residence benefits); 50.16 (Capital-benefit condition)
The statutory definition of "commercial" in s.738 ITA should be repealed.	See 52.8.4 ("Commercial": Critique)

Spouses should be treated as separate persons for CGT private residence reliefs.	See 59.8 (Spouses)
Align definition of "spouse" for CGT and IT settlor-interested trust rules, ie apply s.625(4) ITTOIA for CGT.	See 60.5.2 (Civil partner/same-sex spouse)
Repeal relief for pre-1991 protected trusts: there are probably none left in existence.	See 60.8.5 (Pre-1991 trusts: Critique)
Repeal s.87 interest surcharge.	See 61.17.4 (Interest surcharge: Critique)
Capital payment when non-resident not matched to gain when resident.	See 61.25 (Non-resident disregard: Critique)
Schedule 4B & 4C TCGA should only apply where there is a purpose specifically to avoid s.87 or s.86; or (better) repeal and replace with GAAR guidance.	See 62.38 (Critique)
Abolish the sub-fund regime	See 63.11 (Sub-funds: Critique)
Repeal s.262(3) [losses on sale of chattels under £6k should not be allowable].	See 65.10.2 (Loss on disposal of chattel)
Repeal carry-back of losses on death.	See 65.12.1 (Loss accruing before death)
Personal CGT losses should be deductible against s.87 gains.	See 65.14.1 (Personal loss & s.87: Critique)
Offshore income gains/accrued income profits should be protected foreign-source income	See 67.12.2 (OIG: Protected s.720 income?); 28.15 (AIP: Protected-trust relief).
Clarify that offshore income gains can qualify as protected income.	See 67.12.2 (OIG: Protected s.720 income?)
Repeal s.80 IHTA. The cure is worse than the disease.	See 75.13.10 (s.80 fictions: Critique)
The IHT spouse exemption should be restricted to spouses living together.	See 76.5.1 (Spouse exemption: Introduction)

UK bank accounts should qualify as excluded property as non-UK accounts.	See 76.13.4 (Foreign currency: Critique)
Inter-trust transfers should be ignored for IHT.	See 79.4 (Inter-trust transfer: IHT effect).
Repeal s.173 IHTA	See 80.46 (Foreign administration expenses)
Abolish the non-PET traps	See 81.4.4 (Non-PET trap); 81.6.1 (Alteration deemed disposition)
Replace POA rules with focussed anti-avoidance rules.	See 83.39.3 (Assessment)
Define "trade" to include "profession" and align the taxation of trades and professions	See 85.18 ("Trade")
Abolish CGT spouse exemption; replace with CGT exemption on divorce.	See 88.5.5 (Rebasing on death: Planning)
PRs should be deemed to be a single and continuing body distinct from the persons who are the PRs.	See 89.2 (Meaning of "PRs" for IT)
Provision that usufruct is not an IHT-settlement.	See 90.25.6 (Usufructs: Critique)
Restrict CGT spouse exemption for non-resident spouse.	See 93.13.1 (CGT spouse exemption: Critique).
The taxation of foreign currency should be the same as foreign currency bank accounts.	See 95.11.2 (Critique)
Yearly exchange rate averaging; Currency conversion date for income remittance is date of receipt, not date of remittance.	See 95.13 (Foreign currency issues: Critique)
Abolish ATED regime.	See 98.39.5 (The way forward)
A single definition of "settlor" which	See 99.2.15 (Definitions of

applies for all taxes	“settlor”: Critique); 99.12.3 (Appointment rules: Critique); 99.24 (Property provided to co in trust)
Repeal s.473 ITA (& CGT equivalent); dead letter law.	See 99.37.6 (Settlor of IoV: Critique)
Treat all assets other than UK land and securities as non-UK situate for the purposes of IHT & CGT.	See 102.37 (Reform of IHT/CGT situs rules)
Failing that, a second best: All securities situate for CGT in the place of incorporation of the company. s.275(1)(c) should be replaced by a rule that a debt is situate where the debtor is resident (applying the UK tax definition of residence).Repeal s.s.275(1)(k) TCGA (situs of judgement debt).	See 103.8.4 (Critique); 103.13.5 (Critique)103.11 (Debt rules: Critique)
Define PE by reference to OECD Model definition.	See 106.25 (Definitions of PE: Critique)
Replace branch/agency with PE.	See 106.28 (Branch/agency: Critique)
Replace remaining pre-1963 DTAs with OECD Model treaties	See 107.24 (Pre-1963 DTAs)
A 20 year time limit for collection of IHT.	See 125.16 (No time limit)
Repeal para 21B sch 24 FA 2007 which has never been used.	See 126.23.6 (Assets representing assets)

Reforms involving tax avoidance provisions

Proposal	**Reference**
Reform of offshore anti-avoidance code	See 10.1 (Reform of anti-avoidance rules: Introduction)
Repeal POA rules; replace with IHT charge on death in case of *Eversden*,	See 83.39 (Critique); 78.10.2 (Spouse exemption restricted)

Ingram and Home Loan schemes; repeal s.102(5A)-(5C) FA 1986.	
Repeal corporate residential property regime; or allow election for transparency	See 98.39.5 (The way forward)

App. 13.3 Section numbering system

The reader will have noticed that the system of numbering sections in the Taxes Acts is idiosyncratic.

OPC drafting guidance provides:

> The following applies when inserting whole provisions between existing provisions.
>
> - New provisions inserted between 1 and 2 are 1A, 1B, 1C etc.
> - New provisions inserted between 1A and 1B are 1AA, 1AB, 1AC etc.
> - New provisions inserted between 1 and 1A are 1ZA, 1ZB, 1ZC etc. (and not 1AA etc.)
> - New provisions inserted between 1A and 1AA are 1AZA, 1AZB, 1AZC etc[3]

This is sensible if inserting individual sections. However it does not work well when inserting Chapters, particularly if inserting a Chapter adjoining an existing insertion.

For instance, the 3 Chapters dealing with income streaming: section numbering begins with 809, followed by the Chapter letters, ie one of 809A/809AA/809D. The sections are then numbered ZA, ZB, etc. Hence:

- the 1st section of Chapter 5A is s.809AZA and the last is s.809AZG
- the 1st section of Chapter 5AA is s.809AAZA and the last is s.809AAZB

These chapters should not have been slotted into Part 13 ITA. The only benefit of putting all the provisions into Part 13 ITA is that all tax avoidance provisions are in a single Part where perhaps they logically belong. The benefit (if it is a benefit) is far outweighed by the clumsy statutory numbering that had to result. They should have been set out elsewhere, where they could be numbered arithmetically, if nowhere else was suitable, in the Finance Act where they were enacted.

At present there are provisions with *five* letters used in this way, eg

[3] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/727629/drafting_guidance_July_2018.2..pdf*

s.12ABZAA TMA. In the fullness of time, if we carry on as we have, provisions with a number and six or even more letters must follow.

For provisions which have now been enacted, only consolidation will remove the problem; a desperate remedy. But it would at least be desirable to avoid adding to section numbers of this kind, not (or not just) because they are ridiculous, though they are; but because it is hard to find and to cross refer to them. A section number is a label, and these are poor labels.

Is there any other country in the world which uses numbering like this? Discuss.

APPENDIX FOURTEEN

REFORM OF OFFSHORE ANTI-AVOIDANCE LAW

App. 14.1 Reform of anti-avoidance rules
App. 14.2 Outline of reforms discussed
App. 14.3 Need for reform
App. 14.4 How to assess reforms
App. 14.5 Critique of present rules
  App. 14.5.1 Critique of s.87 regime
  App. 14.5.2 Critique of ToA regime
App. 14.6 Abolish matching trust income/gains?
App. 14.7 Aligning benefit rules
App. 14.8 IT settlor/ToA rules overlap
App. 14.9 CGT settlor/benefit rules overlap
App. 14.10 IT/CGT settlor rules alignment
  App. 14.10.1 IT /CGT settlor rules compared
  App. 14.10.2 Definitions of settlor-interested
  App. 14.10.3 Aligning settlor rules
  App. 14.10.4 A proposal

App. 14.1 Reform of anti-avoidance rules

This appendix notes some proposals towards simplification/rationalisation of the IT/CGT anti-avoidance rules which apply to non-resident trusts and companies.

The rules discussed in this appendix may be classified in 3 ways:

Classification	*Main provisions*	*Applies to*
IT rules	s.720/s.731 ITA, s.624 ITTOIA	IT
CGT rules	s.3/s.86/s. 87 TCGA	CGT

Alternatively:

Settlor rules	s.624/s.720/ s.86	settlors/transferors
Benefit rules	s.731/s.87/s.643A	receipt of benefits

Alternatively:

Basis of assessment	*Applies to:*
Arising basis	UK domiciled taxpayers
Remittance basis	Remittance basis taxpayers
Protected trust basis	Non-dom settlors/transferors

Proposals discussed in particular are:

2012 reform paper: CIOT proposals entitled "Reform of two anti-avoidance provisions".[1]
2015 reform paper: proposals from the professional bodies in 2015.[2]

Since then we have had the introduction of the protected trust regime in 2017 and 2018, the full implications of which have yet to be worked out, though it clearly represents an enormous setback to the cause of simplicity in trust taxation.

App. 14.2 Outline of reforms discussed

The main reforms discussed here are as follows:

(1) To reduce the overlap of IT rules so only one IT rule applies at any one time. At present the IT rules overlap: s.624, s.720 and s.731 rules can all operate at the same time. (CGT rules overlap rather less.)
(2) To align IT/CGT benefit rules
(3) To align IT/CGT settlor rules

Alignment is possible if and so far as the IT/CGT rules aim to achieve the same result, namely (in short) to tax income/gains arising to non resident entities in the following ways:

(a) *The individual responsible for funding the entity* (settlor/transferor) may be taxed on the entity's income/gains, on an arising or remittance basis, subject to protected-trust relief
(b) *Individuals who receive benefits from the entity* are taxed on the benefits (on a receipts basis or a remittance basis) so far as matched to the income/gains

The topic even more in need of reform is inheritance taxation of trusts; but that is not discussed here as it is too far from the themes of this book.[3]

App. 14.3 Need for reform

The burden of operating the many sets of rules has increased over the years as

(1) The application of the rules has become much wider (significant extensions of scope, for instance, in 1998, 2005, 2008, 2017[4]).

(2) The content of the rules has become much more complicated (significant complications, for instance, in 2008, 2017 and 2018[5]).

Growth in complexity can be (very roughly)[6] measured by the number of pages discussing the topics in succeeding editions of this book. The figures are shocking, indeed frightening, as a glance at the ever increasing size of this book will indicate.[7]

No reader who studies this book will doubt the need for reform.

Discussion is theoretical in that there seems to be little current prospect of serious reform. But it may be worthwhile attempting to think the matter out in anticipation of a future change of political climate.

App. 14.4 How to assess reforms

Assessment of proposed reforms raises two sets of issues.

The first is that propounded by the Brown administration in the 2008 domicile reforms: does the reform produce a system which is fairer, simpler, and/or easier to operate;[8] not in absolute terms, but measured from

[4] 1998: Extending the s.87 regime to foreign domiciled settlors; 2005: applying the ToA motive test to associated operations; 2008: the ITA remittance basis; 2017: deemed domicile. But that only lists some highlights.

[5] 2008: ITA remittance basis; 2017 and 2018: protected property regime. But that only lists some highlights.

[6] Page count is a rough proxy for the ever growing complexity of the law, but not an altogether bad one. Some page growth is due to better coverage of existing law, and does not reflect increasing complexity. However I think it would be correct to say that 90% of the growth is due to increased complexity. Any major change leads to growth over several succeeding years, as the implications and HMRC guidance gradually emerge.

[7] A historical note: The emergence of distinct IT/CGT benefit rules at the same time in the FA 1981 is puzzling. The 2012 reform paper uses stronger language: "bizarre ... inexplicable". The explanation is no doubt that those responsible for one did not liaise with those responsible for the other. There was no public consultation. But the burden of separate codes was, perhaps, acceptable (if sub-optimal) when they first emerged.

[8] See 1.8 (Assessment of reform: Metricss).

the starting point of the present system.

The second set of issues is whether there are winners and losers, and if so who they are:

(1) If there are none, or few, the reforms may be described as "**technical**" and should not be politically controversial.

(2) If reform produces a balance of winners and losers, the Treasury should not be affected.

Winners and losers need to be identified if the results are to be defendable. Even the simplest reforms tend to produce both intended and unintended (or targeted and untargeted) winners or losers, in complex patterns.[9]

If the reform produces losers, transitional issues become more important. Losers generally object more loudly than winners. As the numbers become larger the reforms become more political.[10]

My emphasis here is on more technical reforms, but little if any worthwhile reform can be achieved without some winners or losers. Tax simplification cannot be achieved by technical reform alone. That is why it has not happened.

App. 14.5 Critique of present rules

App. 14.5.1 *Critique of s.87 regime*

The Jersey Court commented on the s.87 regime, in a variation of trusts case, and was not flattering:

> In essence, as we understand it, as a result of the changes introduced in the 1998 Finance Act of the United Kingdom, [which extended the s.87 regime to trusts with foreign domiciled settlors] UK resident beneficiaries are liable to be assessed for capital gains tax on the uplift in capital value in the underlying settlement assets between the date of the Settlement and the date of any appointment to them. ... such liability might be very significant and indeed account for a major proportion of the Trust assets ever appointed to them. It appears that this particular tax regime disregards the fact that the beneficiaries were not the owners of the assets during which time the gains were made, had no control over what gains were made or how the assets were invested or whether income or capital was appointed or retained. It is not as if the underlying settlement assets

[9] For an example, see 57.9 (Non-residents allowances: reform).

[10] Though politics depends on salience as well as significance measured by the tax at stake; the lively debate on the Budget 2012 "Pasty tax" is an illustration.

> were UK beneficially owned assets either or naturally fell within the UK tax net during the period of the Settlements... this is the clearest possible case where the artificial and unduly harsh nature of the basis of taxation would indeed prompt the exercise of discretion [to vary the trusts].[11]

The essence of the criticism is that the s.87 charge in its post-1998 form is excessively wide; even more so in its post-2008 form. Before 2018 I said "it operates a very rough justice".[12] But after the introduction of the non-resident disregard, "rough justice" is too generous an assessment.

App. 14.5.2 *Critique of ToA regime*

The first-tier tribunal has described the ToA legislation as "some of the most complex in the Taxes Acts".[13] That is really saying something.

The 2012 reform paper concludes:

> Essentially the current rules [the transfer of assets code] are not fit for purpose.

I think all readers who study the topic will agree with the professional bodies, the Jersey Court and the first-tier tribunal, that at present neither the IT rules nor the CGT rules can be defended as satisfactory. But to criticise is easy. The hard part is to say how to do better. This appendix does not have the solution, if indeed a solution is possible, but contains some notes towards that end.

App. 14.6 Abolish matching trust income/gains?

Much of the difficulty of the benefit rules is the need to match benefits to trust income/gains. But if IT/CGT are taxes on income/gains, then that is unavoidable.

A HMRC consultation paper "Reforms to the taxation of non-domiciles" produced a startling proposal:

> The government intends to base the new rules on the taxable value of benefits received by the deemed domiciled individual **without reference**

[11] *Re DDD Settlement* [2011] JRC 243 at [25] *http://www.jerseylaw.je* The court approved a variation - adding the settlor as a beneficiary - whose purpose was to facilitate arrangements to avoid the s.87 charge.

[12] See the 2017/18 edition of this work app 9.5.

[13] *Williams v HMRC* TC/2011/02663, 23 January 2012 (unreported). The ToA provisions now are much more complicated than they were when that comment was made, so I think the comment remains valid.

> **to the income and gains arising in the offshore structure**. This ... means that there will be no need for trustees to have to recreate the history of the income and gains in the trust for tax purposes once an individual becomes deemed-UK domiciled.[14]

This proposal was not fair and indeed not rational, unless the rationale was to tax trusts penally so that they cease to be accessible to deemed domiciled UK residents.[15]

While it is disconcerting that this proposal could pass from brainstorming session to consultation paper, it does suggest a recognition of the difficulty of matching trust income/gains to benefits, at least in a situation where one could not expect UK tax records to have been prepared.[16]

We move on to consider some more promising approaches to reform.

App. 14.7 Aligning benefit rules

Alignment of the IT/CGT benefit rules raises the question whether to take the CGT rules or the IT rules as the starting point for an aligned system. Is one better than the other, and if so, which? It matters less which set of rules one starts with, if one goes on to tinker with them. It is suggested that an aligned regime should combine features of both.

The 2012 reform paper proposed to apply the CGT benefit rules to IT (but adding a motive defence). The 2012 reform paper provides:

> Income arising to [non-settlor-interested] trusts could... be covered by adapting TCGA 1992 section 87-97 to income, albeit preserving a motive defence.
>
> Income arising to companies could be covered by adapting TCGA 1992 section [3]....
>
> As indicated above, the adaptation of TCGA 1992 sections 87-97 to income would have to have a motive defence built into it. The reason is that many trusts, at the time of creation, have no UK connection. It would be wrong to tax a beneficiary who comes to the UK by reference to income arising before he immigrated. A motive defence would be a blunt way of doing this.

[14] *https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles/reforms-to-the-taxation-of-non-domiciles* (September 2015).

[15] This is (more or less) the case for UK domiciled settlors.

[16] Some readers may speculate whether the proposal was put forward with a view to withdrawing it in consultation as a sop to the consultation process; but that seems far-fetched.

App. 14.8 IT settlor/ToA rules overlap

The 2012 reform paper provides:

> The key point is that the ToA code is only required if the income arises to a non resident entity which is for income tax purposes opaque. If the entity is not opaque, anti avoidance legislation is not needed at all, as then the income is taxed on general principles as that of the underlying owner or owners....

In particular, a settlor-interested trust within s.624 is transparent.

It is already the case that s.720 does not apply where s.624 does apply.[17] The 2012 reform paper proposes that s.624 should exclude the ToA rules altogether, ie the s.731 benefits charge does not apply so that:

(1) income of a trust within s.624 is not relevant income.
(2) benefits conferred by a trust within s.624 do not count for the purposes of s.731.

Thus only one anti-avoidance rule applies at a time.

For this purpose a trust is within s.624 when the settlor is UK resident (whether or not a remittance basis taxpayer).

When the settlor is non-resident, the better course would be to amend s.624 so it does not apply, leaving s.731 to apply.

App. 14.9 CGT settlor/benefit rules overlap

The overlap of s.86 and s87 can be avoided by providing that a trust is not within the scope of s.87 if it is within the scope of s.86.

App. 14.10 IT/CGT settlor rules alignment

Residence of individuals is a sensible connecting factor for UK taxation: everyone will accept that an individual who is UK resident should be subject to UK tax on an arising or remittance basis. Residence of *trustees* is a matter which is chosen by the appointment of trustees, and makes very little sense as a connecting factor in the taxation of trusts.[18]

This is recognised in some contexts, where trust residence is (more or less) irrelevant for UK tax purposes:

[17] See 47.13 (s.624/s.720 compared).

[18] It might be said that UK resident trustees enjoy the benefit of the UK legal system; but it would be more accurate to say that the UK economy enjoys the benefit of work opportunities for UK resident trusts.

(1) IT settlor rules: s.624
(2) Chargeable-event gains
(3) Inheritance taxation of trusts

In these cases the main connecting factor for UK taxation is the residence or domicile of the settlor: trust residence is (more or less) irrelevant.

App. 14.10.1 *IT /CGT settlor rules compared*

The differences between the IT and CGT settlor rules (s.624 and s.86) are striking. The most important are:

(1) Definition of "settlor-interested": CGT definition much wider
(2) Foreign domiciled settlor: within s.624 but not within s.86
(3) Non-resident settlor: partly within s.624 (UK source income) but not within s.86.
(4) Definition of "settlement": Non-classic settlements within s.624 but not within s.86; non-bounteous settlements within s.86 but not s.624.

These distinctions due to contingent historical development; none are attributable to policy deliberation. There is no good policy reason why the rules should be different for the two taxes. A simpler and more rational system would apply the same rules.

App. 14.10.2 *Definitions of settlor-interested*

The rich variety of UK trust tax rules offers four possible starting points:

(1) A trust is within the scope of UK tax if:
    (a) the settlor (or close family) is a beneficiary.
    (b) the settlor/spouse is UK resident and
    This is (in short) the IT model under the IT settlor rules.
(2) Ditto but relax (a) so it sufficies if the settlor's wider family is a beneficiary. This is (in short) the CGT model under the CGT settlor rules.
(3) Ditto but delete (a): the beneficiaries do not matter. This is the chargeable event model for life policies
(4) Ditto but relax (b): a trust is within the scope of UK tax if the settlor is UK domiciled at the time the settlement is made. It does not matter who the beneficiaries are. This is (in short) the IHT model.

App. 14.10.3 *Aligning settlor rules*

Once one opens up the debate as to which is better, intractable problems appear. Changes in this area would be substantive and not merely technical, and in particular:

(1) Reform will produce losers.

(2) The other proposals made in this appendix are technical reforms on which, I think, there ought to be fairly widespread agreement among those who understand the tax system. But here there will be no general agreement, so there will be less support for any reform. If one sets out all the options, not one of them would command a majority support.

There are fundamental decisions to make, and no logical principles on which to make them; contemplation leaves one feeling giddy. The basic question is the purpose of settlor rules. In origin the purpose of the rule was to tax the settlor on benefits expected to accrue to the settlor. Hence the IT settlor rule is restricted to settlor-interested trusts. But if more widely extended, as in CGT, the purpose is rather to tax the trust. If that is the purpose, then the logic leads to the conclusion that the rule should not be restricted to *settlor-interested* trusts, as is the case for chargeable-event gains and IHT.

App. 14.10.4 *A proposal*

Tax reform, as politics, is the art of the possible. Perhaps the most realistic course is to leave the current settlor rules unaligned. Certainly that would be better if a more ambitious reform programme threatened the less controversial and badly needed technical reforms set out above. The 2012 reform paper wisely did not enter this arena.

If one were sufficiently radical, bold, or foolhardy, to enter into this arena, however, the author's solution would be as follows.

(1) Adopt the CGT definition of a settlor-interested trust.

(2) Extend the CGT rules to settlor-interested trusts.

A remittance basis settlor would qualify for the remittance basis/protected-trust relief.

Conversely, trusts should be exempt from CGT and IT on foreign income in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. At that point one falls back on the s.731/s.87 regime.

This is (I think) the basis of trust taxation in Canada, New Zealand and, I suspect, most other common law jurisdictions. HMRC made a proposal of this kind in 1972, though nothing came of it.[19]

[19] Inland Revenue, Tax Reform Committee First Report on Avoidance (1972) *https://www.kessler.co.uk/wp-content/uploads/2014/08/1437_001.pdf*

DT relief would apply where the trustees are treaty-resident in a foreign state.

Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by:

(1) transfers to individuals who are not connected to the UK, and

(2) the individual settles or resettles the property.

However this is easier to say than to do.[20]

[20] See 99.41 (Planning to create excluded property trust).

APPENDIX FIFTEEN

CITIZENSHIP-BASED TAXATION

App. 15.1 Citizenship-based taxation
App. 15.2 Citizenship-based tax: objections
App. 15.3 US exceptionalism
App. 15.4 Variant ideas
App. 15.5 When citizenship matters for UK tax

This appendix draws on an article by Dan Neidle of Tax Policy Associates[1]

Cross references

The following topics relating to citizenship are considered elsewhere.
44.7.6: Personal allowances for commonwealth citizens & human rights

App. 15.1 Citizenship-based taxation

A reform sometimes suggested is UK citizens[2] should pay UK tax regardless of residence. I am not sure that anyone familiar with tax would support the idea, but it is worth setting out the reasons which require the idea to be rejected.

Dan Neidle explains the thinking in this way:

> The problem with [residence-based taxation] from some people's perspective is that it becomes remarkably easy to stop being subject to UK tax. Simply quit the UK.

[1] Neidle, "Citizenship-based taxation. Should all UK citizens pay tax in the UK, even if they live abroad?" *https://www.taxpolicy.org.uk/2023/06/27/citizenship/*

[2] It would be necessary to define who is a British citizen and there would be some choices to make here. There are six classes of British citizenship: British citizenship, British overseas territories citizen, British overseas citizen, British subject, British national (overseas), British protected person. If it was desired to follow the US example the reform would also catch those entitled to live and work in the UK who were not citizens (equivalent to green card holders). The application of citizenship-based taxation in the Channel Islands and Isle of Man would raise further constitutional issues.

This is an exaggeration. Leaving the UK is not, for most, an easy step lightly taken. But UK tax is lost by taxpayers leaving the UK, realising capital gains or income after they go, and so far as the new country of residence does not tax the receipt, the taxpayer reaps the benefit. Just how much is involved here would be difficult to estimate; it always is.[3]

By contrast the US has "citizenship-based taxation". US citizens (and green card holders) are subject to US tax on their worldwide income and gains, no matter where they live. So a US citizen cannot avoid US tax by moving elsewhere. The individual can renounce US citizenship – but that incurs an exit tax which broadly eliminates the immediate US tax benefit.

App. 15.2 Citizenship-based tax: objections

On the face of it, if you want to stop UK residents from leaving the UK to avoid UK tax, this is the approach to adopt. But as Dan Neidle says, this is "a terrible idea".

The problem is that non-resident UK citizens would pay tax in two places.[4] A UK citizen living (say) in France would pay UK tax (as a UK citizen) and French tax (as a resident of France).

At first sight, this does not seem a problem, because the UK and most other countries allow a tax credit so that the individual may effectively pay the higher of the two taxes, but not both.[5] And in simple cases the US and UK do not usually both apply their full rate of tax to the same income.[6] But the problems go beyond simple double taxation.

We can get a sense of the issues by looking at the difficulties faced by US citizens (subject to US worldwide taxation) resident in the UK (and subject to UK worldwide taxation).

The US has the "foreign earned income exclusion" for the first c.$100k of income for citizens living abroad. An employee whose income is exempt in the US under the foreign earned income exclusion still has to file returns. And this relief does not apply to the self-employed, who do pay US self-employment tax on their income. A trader, plumber or IT

[3] Much would depend on the details of the rules which would replace the current system.

[4] Or more, if they are dual resident or have income/gains arising in a third country.

[5] In fact all UK DTAs would need to be renegotiated, as they mostly provide exemption for treaty non-residents, rather than a foreign tax credit.

[6] But sometimes the system of relief fails to work, eg, perhaps, where a UK resident receives income through a US LLC.

contractor, say, has to pay tax in both countries and claim a foreign tax credit. The computation of income is governed by different rules, for instance for what deductible expenditure.

Capital gains are a further problem. The US computes gains in US dollars. For example: an individual buys an asset for £300k and sells it a few years later for the same price. There is no UK capital gain. But if sterling appreciated over that period, so that the dollar purchase price was $380k but the dollar sale price was $450k, then you have a $70k US capital gain. And of course the UK does the same for US dollar denominated assets.

Tax returns will cover a different period: the UK tax year running from 6 April and the US tax year from 1 January. Other countries have different periods. The different filing and payment timetables may mean that you pay the full US tax, then the full UK tax, then claim a refund of the US tax.

If a couple have a joint account, and one is a US citizen and the other is not, then the joint account becomes subject to US tax. Married couples can normally not worry about the tax treatments of their family finances – but where one of the couple is a US citizen then even simple arrangements like joint accounts become complicated.

The US and UK differ on the taxation of the main private residence. The UK gives no tax relief on mortgage payments, but exempts capital gains on the sale of the home. The US gives relief on mortgage payments, but taxes the gain. A US citizen living in the UK gets the worst of both worlds. They get no tax relief on the mortgage for their UK tax, but have to pay US capital gains when they sell.

It becomes impossible to use investment funds. In the UK it is disadvantageous to hold non-reporting offshore funds. In the US it is disadvantageous for a US citizen to hold non-US funds. The US citizen living in the UK is subject to both sets of rules, and cannot realistically invest in any funds.

In the UK an ISA is a standard form of investment, and the return is exempt from tax. But it is not exempt from US tax. So a US citizen living in the UK cannot use an ISA (or, to be more accurate, if they use an ISA they get no benefit from it). It may be worse than that, as an ISA may have particularly unfavourable US tax treatment: that is part of the class of problems that arises when one country's tax system has to characterise the tax effect of another country's legal system.

FATCA was introduced to ensure that US citizens abroad declare and pay their US taxes. But that imposes a significant administrative burden on non-US financial institutions with US citizen clients and, as a result, some banks and investment managers do not allow US citizens to open accounts.

One could go on. The impact on minors. "Accidental Americans". Pension taxation. Inheritance/estate tax interaction. Social security/ national insurance interaction. You do not need to be wealthy, or to have complex personal finances, to have a terrible time navigating the US and UK tax systems at the same time. The position is hardest for those who can't afford the tax advice they need.

The problem for wealthier US citizens maybe mitigated to some extent by the remittance basis, though that of course raises its own problems, and is itself controversial.

So while the object and purpose of citizenship-based taxation would only be to bring into charge high net wealth UK citizens in low tax jurisdictions, it would at the same time inflict a heavy administrative cost on all UK citizens who choose to live abroad (and of course on HMRC who would have to administer the new rules). The difficulties would multiply if further countries adopted the same approach.

App. 15.3 US exceptionalism

That is why the US is (more or less) the only country that applies citizenship-based taxation.[7] Why does it do that? Some combination of: changing the US tax system is hard, US expats do not have valuable votes and so the campaign to change the law gets nowhere, and the US is big enough and bad enough to get away with things that other countries can't.

App. 15.4 Variant ideas

One variant idea would be to apply citizenship-based taxation only to

[7] The only other country which taxes worldwide income of non-resident citizens is Eritrea (but how effectively it does so may be open to question). A few countries (Finland, France, Hungary, Italy, Spain and Turkey) tax on citizenship, but only for a limited period or in special cases.
Ironically, in 2011 the United States condemned Eritrea at the United Nations for its "diaspora tax".
See Hammer, "Old Habits Die Hard: Should the United States Abolish Citizenship-Based Taxation?" (2016), IBFD

residents of tax havens. The problem with this is that there are many countries that may not tax expats who move there. Singapore, Portugal, Italy, Switzerland, and others, may not significantly tax the income of their resident expats and there are many more which may not tax capital gains. So the list of "tax havens" would either be very long, or ineffective.

Another idea would be to make citizenship a tie for the purposes of the residence test. That would not stop UK citizens being non-resident and so not paying UK tax, but would make it harder for them to be non-resident because they could spend less time here The tax yield of this reform would be restricted by two factors:

(1) In many (probably most) cases, individuals who are UK tax-resident only because of a citizenship tie would be treaty-resident elsewhere, and so while work of administration would be increased, no more UK tax would be paid.

(2) In other cases individuals would respond by spending less time in the UK so as to continue to be non-resident.

It seems unlikely that the tax yield would justify the downsides of the change.

I discuss some related ideas elsewhere:

Idea	**See**
Tax on citizen of nowhere	6.40
Exit tax on individual who ceases to be UK resident	12.10.

App. 15.5 When citizenship matters for UK tax

This does not mean that citizenship/nationality need never be relevant for UK tax, and in practice it occasionally is:

Topic	**See**
IT personal allowances	44.7.4
Treaty residence tie-breaker	9.15
Various IHT DTAs	*Too many to list*
Domicile	4.14

APPENDIX SIXTEEN

THE WISDOM OF PARLIAMENT

App. 16.1 Nature of parliamentary debate
App. 16.2 History of non-dom taxation
App. 16.3 Inheritance Tax
App. 16.4 Remittance investment relief

App. 16.1 Nature of parliamentary debate

The House of Lords decided in *Pepper v Hart* that the Courts should in some circumstances have regard to Parliamentary debate, recorded in Hansard, in order to understand statutes. The number of tax cases where Hansard has actually made a difference is limited.[1]

Hansard is unlikely to be on the reading list of many tax practitioners, and for good reason: the debates tend to be ill-tempered, ill-informed, and sometimes puerile.

This appendix provides a few highlights. Further contributions from readers would be welcome.

App. 16.2 History of non-dom taxation

Peter Dowd (Labour, Shadow Chief Secretary to the Treasury) misstates the early history of the remittance basis:

> Non-dom tax status was introduced in 1799 (!) to allow British colonialists with foreign property to shelter it from wartime taxes.[2]

The remittance basis goes back the Duties on Income Act 1799, but the remittance basis was available to all taxpayers until 1914, which restricted the remittance basis, in part, to foreign domiciliaries.[3] Does it matter? Discuss.

[1] Are there in fact any tax cases other than *Pepper v Hart* itself?

[2] *https://hansard.parliament.uk/commons/2017-10-31/debates/DC20529E-FB3B-4348-BB33-ED2AD0395E91/FinanceBill*

[3] See 17.2 (History of remittance basis).

Charlie Elphicke (Conservative) believes that the 2008 reforms were due to the Conservative opposition:

> in their first 12 years in power, the last Labour Government did nothing whatsoever about non-domiciled individuals, and then reacted reluctantly only when they were humiliated and forced to take action by the then Conservative Opposition.[4]

App. 16.3 Inheritance Tax

Peter Dowd thinks non-resident trusts give IHT advantages:

> The use of offshore trusts is not restricted only to inheritance tax.[5]

App. 16.4 Remittance investment relief

I thought it strange that there was no remittance investment relief, when the ITA remittance basis was introduced in 2008. Bambos Charalambous (Labour) explains there is no link between taxation and investment:

> A good business investment is a good business investment whether it gets tax relief or not, and let us not kid ourselves that the sweetener of business interest relief is anything more than a sugar-coated inducement for non-doms who have already made their money.[6]

So it was left to the Conservatives to introduce remittance investment relief in 2012.
