- If beneficial ownership of the UK payer changes or it is the subject of a merger or other restructuring, and it notifies of the changes, HMRC Residency will ask the UK payer's tax office whether or not there is any objection to the issue of a new Direction, without a fresh application being required. A new Direction would, so far as possible, be worded to provide cover for the UK payer from the time of any changes.

Reasoning: the tax office is alerted to any emerging tax consequences for the UK tax base (for example transfer pricing) and can in return flag up any prejudicial elements for the basis of the DT claim (for example a special relationship question). This should identify at an early stage cases where a fresh application for treaty relief is needed, or where the extent or form of the relief must be otherwise re-assessed.

Changes affecting the non-resident payee

- If the non-resident payee simply changes its name and there is no change of ownership, and advises to this effect, HMRC Residency will ask for documentation of the name change and consider issuing a fresh Direction with the new payee details. Such a Direction would cover the period from the changes in payee details.

Reasoning: no fresh application is likely to be justified, using the same assumptions as within bullet one above.

- If beneficial ownership of the non-resident payee changes or it is the subject of a merger or business restructuring, HMRC Residency will require a fresh application from the payee. It will process this in the normal way, and where it is satisfied treaty relief is due will issue a new Direction, subject to the normal rules about retrospection: see the article ‘Treaty Claims and Loan Interest’ in Tax Bulletin Number 12 of August 1994 - the principles underlying which are now applied to all forms of UK source income, and not just interest.

Reasoning: the overseas concern that was previously successful in claiming treaty relief has changed in a sufficiently substantial and material way as to justify a re-establishment of that entitlement.

Conclusion

UK payers especially should take careful note of the wording and terms of any SI 1970/488 Direction issued to them in order to understand fully their obligations to deduct tax at the appropriate treaty rate.

Prompt notification of changes of name or beneficial ownership etc. will allow HMRC Residency to give fresh consideration to the terms of the Direction and enable it to issue a new notice where appropriate at the earliest opportunity and so give the UK payer or non-resident payee certainty of treatment.

If you consider that you may be affected by such changes, you should contact HMRC Residency caseworkers immediately, quoting the HMRC Residency ‘FD…’ reference given on the Direction or used in correspondence with this office.”[195]

26.34 No notice to pay gross

INT Manual provides:

> **INTM413220 Consequences of failing to deduct withholding tax** [Feb 2020]
>
> ...
>
> An application by the overseas lender under a DTA or under the EU Interest & Royalties Directive (INTM400000), is likely to be made up of

[195] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/606556/Double_Taxation_Treaty_Passport_Scheme_-_Terms_and_Conditions_and_Guidance.pdf*

two elements, depending largely on how promptly the claim follows the making of the loan. These are:

- A clearance application - for S874 no longer to apply (or only to apply to a lower rate of withholding specified in the relevant tax treaty) to a specific loan. If the application is successful, the payer will receive a notice issued under SI488/1970 advising them that they may henceforth, for a specified period, pay interest gross or at the lower rate on the income named in the notice;
- A repayment claim - for the lender to have paid to them tax which the payer of the interest has accounted for to HMRC in compliance with their S874 obligation, prior to the notice being issued.

Forms available on the HMRC website cater for both aspects on a single form.

It is vital to understand that until the payer receives a clearance notice directing them to do otherwise, the payer must continue to withhold and account for the income tax on interest payments made to an overseas lender. The UK payer is not entitled to anticipate either the lender making an application or the outcome of them doing so. It is immaterial whether the lender is a fellow group company to the borrower, or a vast European lending institution for which the borrower is just another customer.

If the payer fails to observe the obligation to withhold and pay, or only does so late, HMRC can assess and recover the tax, and charge late payment interest under TMA70/S87 on the outstanding income tax, running from the tax due date to the date of payment. See INTM413240 for what may happen in circumstances where a valid clearance/repayment claim is received...

Assessing the unpaid income tax

Chapter 15, Part 15 of Income Tax Act 2007 ... provides for returns and collection of income tax in respect of payments falling within ITA07/S946, which specifically includes payments of yearly interest where a deduction is required under s874.

The rules, under ITA07/S951 are that:

- the income tax at the basic rate on the interest is due on the same date as the return reporting the payment,
- both the return and tax are due within 14 days of the end of the quarter within which the payment of interest was made
- no assessment is required for collection of this tax.

This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment.

ITA07/S957 sets out what should happen if it appears that a section 946

payment (which this is) has not been included in a return, and the tax arising on the payment has not been paid ...
Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

26.35 Grossing-up: Not interest

If the loan agreement provided for grossing up where withholding tax applies, the creditor may compensate the debtor for over-payment.
INT Manual provides:

> **INTM413220 Consequences of failing to deduct withholding tax** [Feb 2020]
> **Grossing up clauses**
> "Grossing up clauses" appear in loan agreements, requiring borrowers to pay over interest without withholding income tax, irrespective of the clearance position, so that domestic withholding obligations are at the expense of the borrower and the lender gets 100% of their interest. From a loan relationships point of view HMRC accepts that any additional amount paid under a grossing up clause is a loan relationship expense, but it is not interest. If the borrower received the grossing up amount back from the lender, possibly after the lender had made a successful treaty claim, the repayment would be treated as a loan relationship credit.
> If £100 of interest is paid over, representing the full amount of interest due, the withholding tax is £20, assuming the rate to be 20%. There is a school of thought that treats the amount paid over as if it were the net amount, so that the £100 should be "grossed up" to £125 with income tax of £25 (20% × £125). This is incorrect.
> The existence of a grossing-up clause does not affect the obligation to withhold income tax.

26.36 Failure to withhold

INT Manual provides:

> **INTM413230. The interaction between UK taxing rights and double taxation agreements** [Jan 2020]
> ...If the lender obtains clearance before any interest has been paid, then for the period of the clearance all the interest accruing on the loan can be paid without deduction, or paid subject to a lower rate of income tax, depending on the DTA. However, a problem arises when the benefits set out in the DTA have not yet been obtained and the company paying the yearly interest does so - for whatever reason - without withholding and accounting for the income tax.
> Once treaty clearance has been granted (following a successful certified

DTA application), income tax will either no longer be withheld or may be withheld at a lower rate, it must also be recognised that clearance applies only to arm's length interest payments made after the clearance is granted. The obligation to deduct income tax from yearly interest paid prior to clearance will not have been removed, and therefore remains enforceable. For payments of interest made before clearance is notified, double taxation is relieved by the lender making a claim for repayment of the income tax withheld. Forms available on the HMRC website allow repayment claims to be made at the same time as the certified application for treaty benefits, although the repayment relief can only go back 5 years after the 31st January next following the year of assessment to which it relates (TMA70/S43(1)).

TMA70/S87 - late payment interest

In addition to the unpaid income tax remaining due and payable on payments of yearly interest not covered by a treaty clearance notice, late payment interest will accrue under TMA70/S87 on any unpaid tax, from the due date (normally 14 days after the quarter in which the yearly interest was paid) until payment. It will accrue whether or not the income tax has been assessed, and while any income tax paid can be repaid if it is subject to a valid repayment claim from the lender. For non intra EU loans and royalty transactions, there is no relief or discharge from the TMA70/S87 interest charge on the payer.

The TMA70/S87 late payment interest charge is both mechanical and neutral, and accrues at the same rate irrespective of the reason for late payment. While it is not a penalty (though penalties are available for failure to make a return under Part X of TMA70), it stands to reason that if the loan is large, and the tax is outstanding for a long time, the interest charge will be correspondingly greater than in other circumstances.

This is the position for pre-clearance interest payments which have been made gross, even after a DTA clearance application has been made, and clearance granted. While the UK may give up its taxing rights, HMRC does not give up its right to recompense for the late payment of the income tax from the time when it was due. UK taxing rights do not simply disappear following a DTA clearance application, taking with them all associated obligations. HMRC surrenders primary taxing rights to the tax authority of the claimant's country of residence, but retains the power to assess income tax which has not been accounted for and which has not been paid gross under a notice giving permission to do so. Interest payments made before the date on which clearance takes effect are not subject to the clearance. This is the statutory position, unaffected by the fact that assessment and collection of the tax might take place after a certified DTA clearance application has been lodged, in circumstances where it would be immediately repayable to the applicant (assuming a successful claim).

However, in circumstances where there is an established entitlement to repayment, HMRC will by concession, circumvent the assessment and repayment process, and if assessments are raised, they will be "interest only" assessments to collect the TMA70/S87 interest.

Assessing only the TMA70/S87 late payment interest - concession

Despite the existence of the powers mentioned above to recover the tax owing, HMRC considers that in circumstances where it is clear that

- the overseas recipient of the interest has applied for, and has been granted, clearance to receive future interest payments from the source in question without deduction of income tax under SI 1970/488; and
- the lender would be entitled to repayment of the tax for the period for which income tax should have been withheld, so that it is clear that if tax had been accounted for each period concerned, ultimately HMRC would not have retained it

the right to assess and collect the tax will be set aside and only the TMA70/S87 interest will be sought. This will of course be limited to tax which is at the time of the concession both collectible and repayable. For more detail, see the Thin Cap Practical guidance from INTM510000 onwards.

The notion that tax collected from the payer will inevitably be repayable to the overseas recipient is not one that may be assumed. It must be established as a fact and a legal right. It is not a reason for not withholding. ...

26.37 Claim procedure: Critique

The deduction scheme for royalties allows self-certification in all cases. It is suggested that a similar system should be introduced for interest.

CHAPTER TWENTY SEVEN

EXEMPT INTEREST OF NON-RESIDENTS

27.1 Exempt interest: Introduction
27.2 “FOTRA securities”
27.2.1 The exemption condition
27.3 Interest withholding tax
27.4 FOTRA exemption
27.4.1 s.624/s.720

27.6.2 Discretionary trust
27.7 FOTRA exemption and DT relief
27.8 Exempt foreign currency securities
27.8.1 Securities qualifying for relief
27.8.2 Tax exemption
27.8.3 Withholding tax exemption
27.8.4 Ss.624 and 720
27.8.5 Critique
27.9 International organisation security
27.9.1 Inter-American Development Bank
27.9.2 Designated organisations

27.1 Exempt interest: Introduction

This chapter considers exemptions for interest received by non-residents on securities issued by the UK or public bodies:

(1) FOTRA securities
(2) Foreign currency securities
(3) International securities

For the policy issues here, see 26.18 (Non-residents on UK interest: Outline).

27.2 “FOTRA securities”

Section 713(2) ITTOIA provides:

> In this Chapter “FOTRA security” means—
> (a) a security issued with a condition about exemption from taxation authorised by section 22 of F(No.2)A 1931,
> (b) a gilt-edged security which was issued before 6th April 1998 and without any such condition (other than 3½% War Loan 1952 Or After), or
> (c) 3½% War Loan 1952 Or After.

FOTRA stands for ‘Free of Tax to Residents Abroad’.

27.2.1 *The exemption condition*

Section 713 ITTOIA provides:

> (3) In this Chapter "the exemption condition" has the meaning given by subsections (4) to (6), according to the kind of FOTRA security involved.
> (4) In relation to a security within subsection (2)(a), it means the condition authorised by section 22 of F(No 2)A 1931.
> (5) In relation to a security within subsection (2)(b), it means a condition with which 7.25% Treasury Stock 2007 was first issued, being a condition treated by section 161(1) of FA 1998 (non-FOTRA securities)—
> (a) as a condition with which the security within subsection (2)(b) was issued, and
> (b) as a condition authorised in relation to its issue by section 22 of F(No 2)A 1931.
> (6) In relation to 31/2% War Loan 1952 Or After, it means a condition of its issue authorised by section 47 of F(No 2)A 1915.

For these provisions see 75.5 (FOTRA exemption conditions).

27.3 Interest withholding tax

Withholding tax on public revenue dividends is governed by Chapter 5 Part 15 ITA. I do not discuss this here in full. However note that s.893(1) ITA provides:

> A payment of a UK public revenue dividend is payable gross if—
> (a) it is a payment of interest on gross-paying government securities, and
> (b) no deduction at source application has effect in respect of the securities at the time the payment is made (see section 895).

Thus there are three conditions for gross payment. First the security must be a UK public revenue dividend, defined s.891 ITA:

> In this Chapter "UK public revenue dividend" means any income from securities which—
> (a) is paid out of the public revenue of the UK or Northern Ireland, but
> (b) is not interest on local authority stock.

Secondly the security must be a gross-paying government security, defined s.893(2) ITA:

> In this Chapter "gross-paying government securities" means—
> (a) gilt-edged securities (see section 1024), or
> (b) securities which are the subject of a Treasury direction under section 894(1) or (3).

Thirdly, holders may ask for tax to be deducted at source. It must be rare to want to apply for tax to be deducted, though it might perhaps be convenient for a basic rate taxpayer who does not otherwise have to put in a return.

See too 26.19 (Withholding taxes: Introduction).

27.4 FOTRA exemption

Section 714 ITTOIA provides:

> (1) No liability to income tax arises in respect of profits from a FOTRA security if conditions A and B are met. ...
> (3) Condition A is that the profits are stated in the exemption condition to be exempt from income tax.
> (4) Condition B is that any requirements for obtaining the exemption imposed by the security's conditions of issue are met.

A non-resident individual or company would qualify for non-resident IT relief on the interest, so the FOTRA exemption only matters in unusual cases, such as split years (where non-resident IT relief does not apply).

27.4.1 *s.624/s.720*

Section 714 ITTOIA provides:

> (5) Whatever the exemption condition provides, amounts charged under the provisions specified in subsection (6) are not exempted by subsection (1).
> (6) The provisions are—
> Chapter 5 of Part 5 (settlements: amounts treated as income of settlor) so far as it applies to income within section 619(1)(a) or (b), and
> Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

These anti-avoidance provisions override FOTRA exemption.

27.4.2 *Trading receipts/deductions*

It may happen that:

(1) A non-resident is carrying on a trade in the UK through a UK branch or PE, and
(2) FOTRA interest is a trading receipt.

In these circumstances, the FOTRA exemption in principle applies.[1]
Section 716 ITTOIA provides:

> (1) A person who meets conditions A and B may not bring into account for income tax purposes—
> (a) any amount relating to changes in the value of a FOTRA security, or
> (b) expenses related to holding it or to any transaction concerning it.
> (2) Condition A is that the person is the beneficial owner of the security.
> (3) Condition B is that the person is a person who would be exempt from tax on the security under this Chapter.

The trade receipt may be excluded from computations of profit, but previously, related expenses may still be deductible in computing trade profits; see *Hughes v Bank of New Zealand* 21 TC 472.

27.5 Beneficial ownership

For a general discussion of beneficial ownership, see App. 6.2 (English-law beneficial ownership). The International Manual provides:

> **INTM368040. The FOTRA condition** [Dec 2019]
> ...
> *Beneficial ownership of the security*
> To demonstrate beneficial ownership of the security, the claimant must hold the security on the interest date. In strictness a person who has sold a FOTRA security but receives the next interest payment due (an ex-dividend sale) ceases to be the beneficial owner of the security when he sells it.

It would be strange if an ex-dividend sale caused the interest received post sale to become taxable, and I doubt if that can really be correct. In practice perhaps it does not often happen.[2]

[1] See 71.20 (Characterisation). At one time, gilt prospectuses restricted the FOTRA exemption so it did not apply to interest received as part of a UK trade, but this practice ceased in 1996.

[2] For completeness, The INT Manual continues:
“There is a column on the A1 claim form with the heading ‘If sold, date of sale or

27.6 FOTRA securities: Trust

27.6.1 *Interest in possession trust*

The TSE Manual formerly provided:

> **Interest in possession trust**
> For any beneficiary who is not ordinarily resident in the UK the interest is not taxable. Trustees should not include it on the returns. The authority for this is *Williams v Singer* 7 TC 387 (TSEM7070).
> In any other circumstances the interest is taxable. It must go on the trust returns.

This book formerly commented:

> Thus (although not clear from the statute) all that matters is the residence of the life tenant. That is sensible.

The Manual passage was deleted in 2014. If HMRC wish to change a longstanding practice[3] their customers might reasonably expect a little more than to quietly delete a sentence or two from the Manual. But it is unclear whether HMRC seek to resile from the former Manual position. ESC B18 is consistent with the former HMRC view.[4]

27.6.2 *Discretionary trust*

The position has altered by the abolition of ordinary residence in 2013. In order to follow the transitional rules, one needs to know the original and the current versions of s.715 ITTOIA. It is helpful to set them out in track change format:

> (1) This section applies if—
> (a) a FOTRA security is held on trust, and
> (b) apart from this section, interest payable on the security would

write still held'. Entries in this column will alert you to a sale before the interest date. You should obtain guidance from Technical Advice Group before you take any action if
- a FOTRA security was sold before the interest date
- that column is left blank" ...

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed.

[3] I do not know when the practice originated, but it predates the Taxhub archive which started in 2006.

[4] See 41.10 (ESC B18: non-resident trust).

> not be exempt from income tax under section 714 because of the security not being in the beneficial ownership of a ~~person not ordinarily UK resident~~ non-UK resident person.
>
> (2) For the purposes of determining whether the interest is exempt under section 714 it is to be assumed that the security is in the beneficial ownership of a ~~person not ordinarily UK resident~~non-UK resident person if none of the beneficiaries of the trust[5] ~~is ordinarily UK resident at the time when~~is UK resident for the tax year in which the interest arises.

Para 52 sch 46 FA 2013 provides the transitional relief:

> In relation to a FOTRA security issued before 6 April 2013, the amendments made by this paragraph apply only if the security was acquired by the trust on or after that date.

EN ITTOIA change 116 provides:

> **Change 116: Interest from FOTRA securities held on trust: s.715**
>
> This change gives statutory effect to a practice relating to interest arising from FOTRA securities held on trust.
>
> FOTRA exemptions apply where gilt-edged securities are in the beneficial ownership of persons who are not ordinarily resident in the UK. The source legislation, principally section 154 of FA 1996, is rewritten in Chapter 6 of Part 6 of this Act. The beneficial ownership test lies within the definition of "FOTRA security" as it is part of the exemption condition of the securities. (See, in particular, section 22 of F(No 2)A 1931).
>
> Although in the case of bare trusts and trusts with an interest in possession, it is fairly clear where the beneficial ownership lies, in the case of discretionary or accumulation trusts it can be difficult to apply the beneficial ownership test. In some types of trust the beneficial ownership of an asset is, in effect, in suspense. In others, while it may be clear where the beneficial ownership lies, it may belong to a different

[5] Defined in s.715:

> (3) In subsection (2) "beneficiaries of the trust" includes any person known to the trustees as a person—
>
> (a) who is, or will or may become, entitled under the terms of the trust to receive income under the trust, or
>
> (b) to whom or for whose benefit such income may be paid or applied.
>
> (4) In subsection (3) "income under the trust" includes any property held on the terms of the trust and falling to be treated as capital so far as it is or represents amounts received by the trustees as income.

> person from the person entitled to the income.

The author does not have a sound grasp of the English law concept of beneficial ownership, but it does not matter, as the passage continues:

> In practice, where interest from FOTRA securities held in trust arises to trustees and none of the beneficiaries of the trust is ordinarily resident in the UK, the beneficial ownership test is regarded as met whatever kind of trust is involved and no account is taken of whether the trustees themselves are resident or ordinarily resident. So if all the potential beneficiaries of a discretionary or accumulation trust (that is, those who have the right, at the discretion of the trustees, to benefit from the trust income or accumulated income) are not ordinarily resident in the UK, the FOTRA beneficial ownership test is treated as having been met.
> Section 715 of this Act gives effect to this practice. So, for the purposes of determining whether interest arising from a FOTRA security held in trust is exempt from income tax under section 714 of this Act, it is to be assumed that the security is in the beneficial ownership of a person who is not ordinarily resident if none of the beneficiaries of the trust is resident when the interest arises. (See section 715(1) and (2)). Section 715(3) defines "beneficiaries of the trust" widely so as to cover all potential income beneficiaries of discretionary and accumulation trusts. Section 715(4) brings in beneficiaries receiving accumulated income. This change is in taxpayers' favour in principle. But it is expected to have no practical effect as it is in line with current practice.

This applies even to a UK resident trust.

The TSE Manual provides:

> **TSEM3185 Trust income: FOTRA securities - resident trustees** [Mar 2018]
>
> ...
>
> **Trustees of non-bare trusts**
>
> Trustees in receipt of FOTRA income need to know whether or not to Self-Assess liability on the trust return. ITTOIA/S715 provides that where:
>
> - all the beneficiaries are not ordinarily resident in the UK (where securities were acquired before 6 April 2013) or
> - all the beneficiaries are not resident in the UK (where securities were acquired after 5 April 2013).
>
> the trustees are treated as being the beneficial owner of the securities, and exempt from tax on the income. S715(3) and (4) define 'beneficiaries of the trust' widely so as to cover beneficiaries of

> discretionary and accumulation trusts as well as IIP beneficiaries. The trustees should exclude from the income from the trust return income. In any other circumstances the interest is taxable. It must go on the trust returns.

Relief is available under ESC B18 in a case where:

(1) some beneficiaries are UK resident (so the requirements of this relief are not met) but

(2) the trustees distribute income to a non-resident beneficiary.[6]

27.7 FOTRA exemption and DT relief

A person who is treaty-resident in a foreign state may qualify for DT relief on UK source interest. However DT relief is not needed where FOTRA exemption applies or where non-resident IT relief gives exemption. There are a few gaps where DT relief could be useful, for instance, an individual who is UK-law UK resident but is treaty-resident outside the UK (under the tie-breaker). The International Manual provides:

> **INTM368110. FOTRA and DT claims** [Dec 2019]
> A person entitled to exemption from UK income tax on interest payments from a FOTRA security may claim repayment of some or all of the tax deducted under the terms of an interest article in a DTA. You should treat any such claim as a claim under the interest article. It follows that the claimant must satisfy the conditions of the DTA rather than the conditions for FOTRA exemption. In effect the payment loses the label of FOTRA and is treated in the same way as any other interest payment.
> In practical terms it makes no difference if the claimant is entitled to full relief under the DTA. However the person who received the FOTRA interest may be able to claim repayment of the tax deducted by meeting the requirements of the DTA without meeting the beneficial ownership condition for FOTRA exemption.
> If the claimant is only entitled to partial repayment of the tax deducted under the DTA he will probably receive credit for the UK tax retained against his liability to tax on the interest in his country of residence. You should therefore make the payment as claimed because to increase the payment may cause the claimant inconvenience when settling his liability to tax in the country of residence. You could explain to the claimant that full repayment would be available if he made a claim on

[6] See 41.9.2 (ESC B18: UK trust).

form A1.

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed. But the underlying points are still correct.

27.8 Exempt foreign currency securities

27.8.1 *Securities qualifying for relief*

Section 755 ITTOIA provides:

> (1) This section applies to interest on—
>
> (a) such foreign currency securities issued by a local authority or a statutory corporation as the Treasury direct, and
>
> (b) such foreign currency loans made to a statutory corporation[7] as the Treasury direct.

I refer to securities within s.755 as "**exempt foreign currency securities**". Section 756 ITTOIA defines "foreign currency" security:

> (1) For the purposes of section 755, a security or loan is a foreign currency one if under its terms the currency to be used for repayment is not sterling.
>
> (2) Subsection (1) is subject to the following qualifications.
>
> [Subsections (3) and (4) are transitional rules for securities issued before 6 April 1982.]
>
> (5) If in the case of a security there is an option as to the currency to be used for repayment, the security is only to be treated as a foreign currency one if the option is exercisable only by its holder.
>
> (6) If in the case of a loan there is an option as to the currency to be used for repayment, the loan is only to be treated as a foreign currency one if the option is exercisable only by the person for the time being entitled

[7] Terms are defined in s.755(4) ITTOIA:

> In this section—
>
> "company" means a company, as defined in section 1(1) of the Companies Act 2006 (c 46),
>
> 'foreign currency', in relation to loans and securities, has the meaning given by section 756, and
>
> 'statutory corporation' means—
>
> (a) a corporation incorporated by an Act (other than a company), or
>
> (b) any other corporation on which functions connected with carrying on an undertaking are conferred by an Act or by an order made under or confirmed by an Act.

to repayment or eventual repayment.

27.8.2 *Tax exemption*

Section 755(2) ITTOIA provides:

> No liability to income tax arises in respect of interest to which this section applies if—
> (a) in the case of interest on a security, its beneficial owner is a non-UK resident, and
> (b) in the case of interest on a loan, the person for the time being entitled to repayment or eventual repayment is a non-UK resident.

A non-resident individual or company would qualify for non-resident IT relief on the interest, so the exemption does not matter in practice.

27.8.3 *Withholding tax exemption*

Section 981 ITA provides:

> Despite the provisions of this Part there is no duty to deduct a sum representing income tax from a payment of interest within section 755(1) of ITTOIA 2005 (interest on foreign currency securities etc owned by non-UK residents).

27.8.4 *Ss.624 and 720*

Section 755(3) ITTOIA provides:

> But interest is not exempt under subsection (2) because a person is a non-UK resident if it is treated as another person's income under—
> Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), or
> Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

This is the same as the rule for FOTRA securities.[8]
EN ITTOIA provides:

> Subsection (3) of the section is an anti-avoidance provision. Section 581(3) of ICTA is very widely drafted: "where any income of any person is by virtue of any provision of the Income Tax Acts to be deemed to be income of any other person, that income shall not be

[8] See 27.4.1 (Ss. 624 and 720).

> exempt ..". In fact, there are only two sets of provisions under which this type of income could be deemed to be income of another person. The relevant provisions are listed in subsection (3) of the section.

27.8.5 *Critique*

If the aim is to encourage investment in local authority and similar securities, why should the exemption be limited to foreign currency securities? It seems the object when the rules were introduced in 1969 was to encourage loans from foreign lenders who would not wish to lend in sterling; borrowers fared badly because of the devaluation in the subsequent sterling crisis.

Alignment of the foreign currency security with the FOTRA rules would be a small but worthwhile simplification. However the Treasury when asked for a list of exempt foreign currency securities stated that they did not hold the information and could locate no record of a direction having been given under s.755 ITTOIA! It may well be that no exempt foreign currency securities exist, and the legislation is dead letter law. I would be grateful for readers comments on that.

27.9 International organisation security

27.9.1 *Inter-American Development Bank*

Section 773 ITTOIA provides:

> (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by the Inter-American Development Bank if the liability only arises because one or more of circumstances A to C apply.
> (2) Circumstance A is that the security is issued in the UK or in sterling.
> (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
> (4) Circumstance C is that the Bank maintains an office or other place of business in the UK.

This reflects Section 9 of the Agreement Establishing the IDB:

> (c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
> (i) which discriminates against such obligation or security solely because it is issued by the Bank; or
> (ii) if the sole jurisdictional basis for such taxation is the place or

> currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.
>
> (d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:
>
> (i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or
>
> (ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.[9]

27.9.2 *Designated organisations*

Section 774 ITTOIA provides:

> (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by an organisation if—
>
> (a) the organisation has been designated by the Treasury for the purposes of this section, and
>
> (b) the liability only arises because one or more of circumstances A to C apply.
>
> (2) Circumstance A is that the security is issued in the UK or in sterling.
>
> (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
>
> (4) Circumstance C is that the organisation maintains an office or other place of business in the UK.

These are the same circumstances as for the IDB. Section 774 ITTOIA continues:

> (5) The Treasury may by order designate for the purposes of this section—
>
> (a) any of the Communities,
>
> (b) the European Investment Bank,
>
> (c) any international organisation that meets conditions A and B.
>
> (6) Condition A is that one of its members is the UK or any of the Communities.
>
> (7) Condition B is that the agreement under which that member became a member provides for the same kind of exemption from tax for income from securities issued by the organisation as this section provides.

Cross references

The following topic is discussed elsewhere:
97.11 (Unremittable accrued income profits)

28.1 Accrued income profits

This chapter discusses Part 12 ITA, which I call the **"accrued income code"**.

The subject needs a book to itself. In 2000 the rules were "widely ignored by both taxpayers, their advisers and within HMRC".[1] Is that still

[1] Inland Revenue, "Responses to Consultation Exercise on Reform of the AIP" (2004); consistent with that, several of the worked examples in the SAI Manual are difficult to justify.

the case? Discuss.

This chapter focuses on the questions closest to the themes of this book, but one can only approach those questions after understanding how the provisions operate.

I do not consider specialist topics such as variable rate securities or conversions of securities.

The provisions apply on a transfer of securities. The accrued income code does not apply for corporation tax.

28.2 AIP securities

Section 619(1) ITA defines "securities":

> In this Chapter "securities" includes—
> (a) any loan stock or similar security other than an excluded security, and
> (b) shares in a building society which are qualifying shares for the purposes of section 117(4) of TCGA 1992 (qualifying corporate bonds),
>
> but (subject to para (b)) it does not include any shares in a company.[2]

I refer to securities within this definition as "**AIP securities**". Section 619(3) ITA sets out seven categories of "excluded securities":

> In this section "excluded securities" means—
> (a) national savings certificates (including Ulster Savings Certificates as defined in section 693(7) of ITTOIA 2005),
> (b) war savings certificates,
> (c) uncertificated eligible debt security units as defined in section 986,
> (d) certificates of deposit (see section 1019),
> (e) a security which is a right falling within section 552(1)(c) of ITTOIA

Reform was promised in 2006 but radical change was rejected and the matter was dropped.

[2] Section 619(2) ITA adds:

"(2) For the purposes of subsection (1)(a), it does not matter—
(a) whether the security is of the government of the UK, any other government, any public or local authority in the UK or elsewhere, or any company or other body,
(b) whether or not the security is secured,
(c) whether or not the security carries a right to interest of a fixed amount or at a fixed rate percentage of the nominal value of the security, or
(d) whether or not the security is in bearer form."

This can only be for the avoidance of doubt, because it only expresses the usual meaning of "security". See App 2.11 (Securities).

> 2005 at the time of the transfer in question,
> (f) a security that meets the redemption conditions (see subsection (5))[3], and
> (g) a security that is a deeply discounted security within the meaning of Chapter 8 of Part 4 of ITTOIA 2005.[4]

Thus deeply discounted securities are not AIP securities: (subject to the 2003 transitional rule) the DDS rules take priority over the AIP rules.

28.3 "Transfer"

In outline, the definition is in s.620(1) ITA:

> References in this Chapter to the transfer of securities are—
> (a) to the transfer of securities by way of sale, exchange, gift or otherwise,
> (b) to the conversion of securities in any case where there is no transfer of the securities within para (a),
> (c) to the redemption of variable rate securities in any case where there has been a transfer of the securities at any time before redemption, or
> (d) to a transaction or event treated as a transfer under—
> (i) section 648(1) or (3) (strips of gilt-edged securities),
> (ii) section 649(4) (new securities issued with extra return),
> (iii) section 650(2), (4) or (6) (trading stock appropriations etc),
> (iv) section 651(2) (owner becoming entitled to securities as trustee), or
> (v) section 652(2) (securities ceasing to be held on charitable trusts).

Thus there are altogether eight types of transfer. In this book I focus on the first type, which are transfers in the normal sense of the word. Section 620(2) provides one exception:

> But subsection (1)(a) does not include—

[3] Defined s.619(5) ITA:
"The redemption conditions are that—
(a) the security is redeemable,
(b) the amount payable on its redemption exceeds its issue price, and
(c) no return other than the amount of that excess is payable on it."

[4] Section 619(4) ITA contains a transitional rule for pre-2003 DDS (not discussed here).

(a) the vesting of securities in personal representatives on death...[5]

28.4 Transfer "with accrued interest"

28.4.1 *The commercial background*

The Debt Management Office explains the terminology **"clean"** and **"dirty"** price:

> The following example is taken from the DMO website for 30 November 2004 and shows close of business data for 5% Treasury Stock 2014:
> **5TY145 | Treasury 2014 | GB0031829509 | 103.17 | 104.344033 | 4.592604**
> The first three fields are all means of identifying the gilt. The first is the DMO's internal identifier code and the second a shortened form of the gilt's name. The third field is the ISIN number (the International Security Identification Number – an identifier number used by the London Stock Exchange).
> The next three fields give price and yield information. The two prices shown of £103.17 and £104.344033 are known as the 'clean' and 'dirty' price respectively. Clean prices do not include accrued interest whereas dirty prices do (see the section on accrued interest on page 15). The clean price is typically the price, which is quoted when agreeing a purchasing or selling price. However, the actual amount of money which will change hands is based on the dirty price and will reflect settlement on the business day after the transaction.
> So, on the basis of the reference price on 30 November 2004, every £1,000 nominal of 5% Treasury Stock 2014 was worth £1,043.44.[6]

Note that for tax purposes the consideration for a gilt is "the actual amount of money which will change hands" - the dirty price.

SAI Manual explains the terminology ex-dividend and cum-dividend:

> **SAIM4020. Transfers "with accrued interest" and "without accrued interest"** [Oct 2022]
> **... Sales with accrued interest ("cum div")**
> Most sales of marketable securities are "cum div". That is, the buyer is entitled to the next interest due. As an interest payment date on a security approaches, its market price increases to reflect the increase in

[5] Paragraph (b) is a transitional rule for pre-2003 DDS (not discussed here).

[6] A Private Investor's Guide to Gilts, Dec 2004 *https://docs.londonstockexchange.com/sites/default/files/documents/dmo-private-investor-guide-to-gilts.pdf*

> value of the buyer’s right to the interest. In other words, the price reflects accrued interest.
>
> For example, £100,000 8% Treasury Stock 2002–06 is transferred cum div on 19 April. 14 days’ interest has accrued since interest was last paid on 6 April. Accrued interest is £307 (14/365 × 8% × 100,000)...
>
> **Sales without accrued interest (“ex div”)**
>
> Not all sales of securities are “cum div”. This is because gilt-edged securities, and some corporate bonds, have an “ex div” or “ex coupon” date. The next interest coupon is paid to the person who is registered as the holder of the security at that date. So if the security is sold in the “ex div” period, the seller collects and keeps the next interest due after the sale. For gilts, the “ex div” period is 7 business days before the coupon date. Other securities may have a similar, or shorter, “ex div” period.
>
> Consequently the market price of a security sold “ex div” reflects the fact that the purchaser will own the security for a short period from the date of purchase to the next interest payment date. This is a period over which interest accrues but for which the interest is received not by him but by the seller. The interest accrued over such a period is known as rebate interest. It is treated in the opposite way to the more normal accrued interest associated with a “cum div” sale.
>
> For example, £100,000 8% Treasury Stock 2002–06 is transferred ex div on 29 March. 7 days’ interest has accrued from the day after the transfer to the next interest date, 6 April. Accrued interest is £153 (7/365 × 8% × 100,000). ...

28.4.2 *“With/without accrued interest”*

623(1) ITA: with accrued interest	**s.624(1) ITA: without accrued interest**
The general rule is that securities are transferred with accrued interest for the purposes of this Chapter if they are transferred with the right to receive interest payable— (a) in a case where the settlement day is an interest payment day, on the settlement day, and (b) in any other case, on the first interest payment day after the settlement day.	The general rule is that securities are transferred without accrued interest for the purposes of this Chapter if they are transferred without the right to receive interest payable as mentioned in section 623(1)(a) or (b).

The definitions are comprehensive so every transfer must be with/without accrued interest, and they are simply English paraphrases of the technical expressions *cum/ex dividend* (or cum-div/ex-div).

The terms "interest" "settlement day" and "interest period" are defined but the definitions are not considered here.

Thus whether a market sale is with or without accrued interest depends only on the date of the sale, whether it is before or after the ex div date. Vendors and purchasers have no choice in the matter except by timing the sale. Whether an off-market sale is with or without accrued interest is a matter for the parties to agree.

28.5 Deemed interest/credit/debit

Section 632(1) ITA provides:

> In the case of a transfer of securities with accrued interest, for the purposes of this Chapter a payment is treated as made by the transferee to the transferor in the interest period in which the settlement day falls.

It is useful to have some terminology to describe this. I refer to this payment as a "**deemed interest payment**". The transferor (deemed to receive the payment) has a **"deemed interest credit"**. The transferee (deemed to make the payment) has a **"deemed interest debit"**.

Section 632 then defines the amount of the deemed payment. In outline:

> (2) The amount of that payment depends on whether the transfer is under an arrangement by which the transferee accounts to the transferor separately—
> (a) for the consideration for the securities, and
> (b) for gross interest accruing to the settlement day.
> (3) If the transfer is under such an arrangement, the amount of the payment is the amount of gross interest which the transferee accounts for.
> (4) If—
> (a) the transfer is not under such an arrangement, and
> (b) the settlement day is itself an interest payment day for the securities,
> the amount of the payment is the amount of interest payable on the securities on that day.
> (5) If—
> (a) the transfer is not under such an arrangement, and
> (b) the settlement day is not an interest payment day for the securities,
> the amount of the payment is an amount equal to—
> $I \times (A \div B)$
> where—
> I is the interest payable on the securities on the first interest payment day after the settlement day ("the payment day"),
> A is the number of days in the period beginning with the first day on which that interest accrues and ending with the settlement day, and
> B is the number of days in the period beginning with the first day on which

> that interest accrues and ending with the payment day.

Why are there two alternative methods of ascertaining the amount of the deemed interest payment, in subsections (3) and (4)(5)? SAI Manual provides:

> **SAIM4140. Payments on transfers with accrued interest** [Mar 2022]
> ... The [deemed interest] payment is the amount of the gross interest accruing to the settlement day, which in most cases is shown separately from the consideration for the securities, under the arrangement (that is, the contract note) by which the transferee accounts to the transferor. This is commonly known as the "clean price" basis.
> In exceptional cases – for example, sales off market, gifts, settlements, and deemed transfers – there will be no contract note and it will it be necessary to compute the amount of the [deemed interest] payment. Where this is done, the formula I × A/B is used...

The Manual offers a straightforward example of the two methods of computation on a single sale with accrued interest:

> *Example*
> Harriet sells corporate bonds to Howard on 15 March 2015. Interest is paid on the bonds on 31 March, 30 June, 30 September and 31 December. Howard will receive the interest coupon due on 31 March 2015, that is, the sale is cum div. The interest Howard receives is £200.
> If Harriet agrees to sell the bond to Howard for a "clean price" of £10,000 plus an additional £165 for accrued interest, she is taxable on accrued income profits of £165 in 2014–15. Howard will reduce his accrued income profits by £165.
> Suppose that, instead, Harriet simply agrees to sell the bond to Howard for £10,165. The relevant interest period is 1 January to 31 March 2015, so B is 90 days. The number of days up to and including 15 March (A) is 74. So the "accrued amount" is £200 × 74/90 = £164.44. Again, Harriet's taxable accrued income will be £164, and Howard's reduced by £165 (following the principle of rounding in the taxpayer's favour).

In an arm's length sale the two methods normally give the same result (as is the case in the HMRC example) though there could be cases where the parties account for accrued interest in some manner which is not the same as the formula I × A/B.

It is possible for the amount of the deemed interest payment to be nil, eg in the case of a transfer on the interest payment day.

Section 633 ITA contains corresponding rules on a transfer without accrued interest.

The SAI Manual gives a straightforward example of a sale with accrued interest:

> **SAIM4160. Examples of transfers with and without accrued interest** [Jul 2023]
>
> *Example 1*
>
> Anthony has a holding of £100,000 Treasury Stock 8¼% 2007, a British Government security which pays interest on 16 January and 16 July each year. He arranges for his holding to be sold on the Stock Exchange on 19 March 2006. The contract note from his stockbroker, dated 19 March 2006 contains the following information:
>
> | | |
> |---|---|
> | £100,000 Treasury Stock 8¼% 2007 sold @ 114 | £114,000 |
> | Plus 56 days' accrued interest | £1,315 |
> | Payable to you on 20 March 2006 | £115,315 |
>
> The contract note contains all the information that is needed for the purposes of the AIS.
>
> - Treasury Stock 8¼% 2007 falls within the definition of "securities" – Section 619 ITA 2007
> - the securities have been transferred, and the transfer is treated as taking place on 19 March because there was a contract for their sale made on that date – Section 620 ITA 2007
> - the settlement day for the transfer is 20 March because under Stock Exchange rules bargains in gilt-edged securities are settled on the next business day – Section 674 ITA 2007
> - the transfer is with accrued interest because the purchaser gets the right to the interest payable on 16 July 2006, the next interest payment day to fall after 20 March 2006 – Section 623 ITA 2007
> - under Stock Exchange rules, accrued interest on gilts is accounted for separately from the bargain price, so the accrued amount is £1,315 – Section 632 ITA 2007
> - the interest period in which the settlement day falls is the period 17 January 2006–16 July 2006 – Section 673 ITA 2007.
>
> Accordingly in this interest period Anthony (the transferor) is treated as having received a payment £1,315 and the transferee as having made a payment of £1,315 (Section 632 ITA 2007).

The Manual then gives a straightforward example of a sale without accrued interest (ex-div):

> *Example 2*
>
> Facts as in Example 1, except that the sale takes place on 1 July 2006 which falls within the "ex-dividend" period for the stock.[7] The contract note from the

[7] This is not factually correct: a sale 15 days before the interest payment date would not be ex dividend. That does not spoil the illustrative force of the example but using

> stockbroker shows:
>
> | | |
> |---|---|
> | £100,000 Treasury Stock 8¼% 2007 sold @ 114 | £114,000 |
> | Minus 15 days' rebate interest | - £352 |
> | Payable to you on 2 July 2006 | £113,648 |
>
> The transfer of securities is treated as made on 1 July 2006. The settlement day is 2 July 2006. The transfer is without accrued interest because this is an "ex-div" sale where the seller retains the right to the interest payable on 16 July 2006 (Section 633 ITA 2007). The rebate amount is £352 and the relevant interest period is that from 17 January–16 July 2006
>
> Accordingly in this interest period Anthony (the transferor) is treated as having made a payment of £352 and the transferee as having received a payment of £352.

The Manual then gives a straightforward example of an off-market sale with accrued interest (cum-div):

> *Example 3* (Joe and Matilda)
>
> Stuffed Dodos Ltd is a UK company which has issued unquoted unsecured loan stock paying interest each year on the Tuesday following Easter Day. Thus in 2015 interest is payable on 7 April and in 2016 interest is payable on 29 March. J Smith owns £10,000 nominal of this stock and agrees to sell £4,000 to his aunt M. Under the agreement, which was made on 8 July 2015, M is to pay £5,000 for the stock on 19 August. The interest payable on 29 March 2016 is at the rate of £5.50 per £100 nominal (5.5%).
>
> Even though the loan stock is unsecured, it constitutes 'securities' for the purpose of the scheme. The securities are treated as transferred on 8 July 2015 – ITA07/S620(3).
>
> The settlement day is 19 August because that is the day M has agreed to pay for the securities and it falls before the next interest payment day following the agreement– ITA07/S674 (3). The transfer is with accrued interest (ITA07/S623). Because the accrued interest is not accounted for separately, in calculating the accrued amount, the formula in ITA07/S632 (5) is used. A is the period from 7 April 2015 to 19 August 2015. B is the period from 7 April 2015 to 29 March 2016. I is the interest applicable to the securities for the period (5.5%× £4,000 = £220). The accrued amount is thus 135/361 × £220 = £82.
>
> The interest period in which the settlement day falls is that from 7 April 2015 to 6 April 2016. Accordingly in that interest period J is treated as receiving as payment of £82 and M as having made a payment of £82.

28.6 Accrued income profits and losses

Tax is *not* charged on deemed interest credits. But armed with the concept of deemed interest payments, we can turn to the terms "accrued income profits" (and "accrued income losses") which are defined in ss.628 and

correct figures would emphasise the triviality of the amounts involved, even in substantial transactions.

629 ITA:

> **628 Making accrued income profits and losses: general rule**
> (1) This section sets out the general rule for determining whether a person is treated as making accrued income profits or accrued income losses where securities are transferred by or to the person. ...
> (3) A separate calculation is to be made for each kind of security that is transferred by or to the person and for each interest period of each such kind of security.
> (4) Each such calculation is to find—
> (a) the total amount ("A") of the payments treated under this Chapter as made to the person in the interest period in question in respect of transfers of securities of the particular kind, and
> (b) the total amount ("B") of the payments treated under this Chapter as made by the person in that period in respect of such transfers.
> (5) A person is treated as making accrued income profits in an interest period as a result of transfers of securities of a particular kind if A exceeds B.
> (6) A person is treated as making accrued income losses in an interest period as a result of transfers of securities of a particular kind if B exceeds A. ...
> **629 Calculating accrued income profits and losses where section 628 applies**
> (1) If section 628(5) applies, the amount of the accrued income profits treated as made is equal to the excess mentioned in section 628(5).
> (2) If section 628(6) applies, the amount of the accrued income losses treated as made is equal to the excess mentioned in section 628(6).

Thus deemed interest debits are first set against deemed interest credits of the interest period for securities of the same kind. If or so far as they cannot be set against those interest credits, they constitute accrued income losses.

28.6.1 *Securities "of the same kind"*

This expression is strictly understood. Section 619(6) ITA provides:

> Securities are treated as being of the same kind for the purposes of this Chapter if they—
> (a) are treated as being of the same kind by the practice of a recognised stock exchange,[8] or

[8] See App 2.18 (Listed/Recognised stock exchange).

> (b) would be so treated if dealt in on such an exchange.

SAI Manual provides:

> **SAIM4040 Accrued Income Scheme: what are "securities"** [Mar 2022]
> ... For example, Treasury 5% 2004 is not the same kind as Treasury 5% 2012. This is similar to the capital gains tax concept of securities of a particular class. ...

28.7 Charge on AIP income

I refer to the accrued income profits treated as made under s.628 ITA as "**AIP income**".

Section 616 ITA imposes the charge on AIP income:

> Income tax is charged on accrued income profits.

28.8 Accrued income loss relief

Section 679 ITA allows accrued income losses to be set against interest from securities of the same kind:

> (1) This section applies if—
> (a) a person is liable for income tax on interest on securities of any kind which is due at the end of an interest period of the securities,
> (b) in that period accrued income losses are made as a result of transfers of those securities, and
> (c) the period ends with an interest payment day.
>
> (2) No liability to income tax arises in respect of the interest to the extent that it does not exceed the losses.

SAI Manual provides:

> **SAIM4120. Calculating accrued income profits and losses: relief for losses** [Jul 2023]
> ... In other words, the losses always reduce the interest subsequently received on those securities, and cannot be used to offset accrued income profits for earlier interest periods or arising on securities which have different interest periods. Where the interest period spans the tax year, losses are therefore not allowed until the interest on the securities is taxed in the following tax year.

For the interaction of loss relief and DTR, see 28.16 (DT relief: AIP income).

28.8.1 *HMRC examples*

SAI Manual provides 3 examples. The first example is a straightforward sale and purchase of one kind of security with accrued interest, looking at the position of the seller:

> **SAIM4130 Calculating accrued income profits and losses: examples** [May 2022]
>
> ... Antoinette has £100,000 Treasury Stock 7¾ % 2006, which has interest dates of 8 March and 8 September. She makes the following transactions in the stock.
>
> | **Transaction** | **Profit/loss**[9] |
> |---|---|
> | 19 March 2006 sells £100,000 | £2,107 |
> | 21 March 2006 buys £50,000 | (£1,361) |
> | 12 May 2006 sells £50,000 | (£131) |
> | | **£615** |
>
> The aggregate [accrued income] profit is £615, taxable for 2006–07, the tax year in which the interest period ended, even though two of the transactions occur in 2005–06.

The second example includes purchases and sales, with and without accrued interest, and involving two different kinds of security, looking at the position of the seller:

> Jean made the following transactions in securities between 28 February 2005 and 5 April 2006:
>
> | | |
> |---|---|
> | 19 Mar 2005 | bought £100,000 Treasury Stock 7½% 2006 (interest payment dates 7 June and 7 December) |
> | 26 May 2005 | bought £50,000 Treasury Stock 7½% 2006 ex div |
> | 15 Sept 2005 | sold £20,000 Treasury Stock 7½% 2006 |
> | 22 Sept 2005 | bought £50,000 Treasury Stock 4½ % 2007 (interest payment dates 7 March and 7 September) |
>
> The [accrued income] profits and losses arising on these transactions are:
>
> | **Transaction date** | **Interest period** | **Profit/loss** |
> |---|---|---|
> | 19 March 2005 | 08/12/04–07/06/05 | (£1,395) |
> | 26 May 2005 | 08/12/04–07/06/05 | £82 |
> | 15 Sept 2005 | 08/06/04–07/12/05 | £271 |
> | 22 Sept 2005 | 08/09/04–07/03/05 | (£778) |
>
> The profits and losses for 2005–06 are:
>
> - Loss of £1,313 (£1,395 minus 82) against interest of £3,750 (£100,000 × 7½% × ½) received on Treasury Stock 7½% 2006 on 7 June 2005.

[9] This refers to deemed interest credits/debits, not the commercial profit/loss but I am unable to see how the figures of 2107, 1361 and 131 are derived: can any reader explain?

- Profit of £271 (Treasury Stock 7½% 2006, interest period 8 June 2005–7 December 2005)
- Loss of £778 against interest of £2,250 received on Treasury Stock 4½ % 2007 on 7 March 2006.

The third example is a straightforward sale of a security with accrued interest, looking at the position of the purchaser:

> *Example 3*
> See Example 3 in SAIM4160 [set out below]. J sells £4,000 unsecured loan stock in Stuffed Dodos Ltd to his M on 19 August 2015. Interest is payable on 5 April 2015 and 18 April 2016. Neither J nor M had any other transactions in securities.
> The settlement day falls within the interest period 5 April 2015 to 4 April 2016. J is taxable on £79 for 2015–16 in respect of this interest period.
> M's loss of £79 is carried forward to 2016–17 to be set against the interest receivable for the period 5 April 2015 to 18 April 2016 (Section 637 ITA 2007 – see SAIM4120).

28.9 AIP remittance basis

Section 670A ITA provides:

> (1) This section applies if—
> (a) accrued income profits are made by an individual as a result of a transfer of foreign securities, and
> (b) section 809B, 809D or 809E (remittance basis) applies to the individual for the tax year in which the profits are made.
> (2) Treat the accrued income profits as relevant foreign income of the individual. ...
> (4) For the purposes of this section securities are "foreign" if income from them would be relevant foreign income.

This brings in the remittance basis. AIP income is fictional, deemed income, which could not be remitted. This is dealt with by s.670A(3) ITA which provides different rules depending on whether the individual receiving the AIP income is the transferor (the usual case of a sale with accrued interest) or the transferee. It is helpful to consider these two cases separately.

For the transferor, s.670A(3) ITA provides:

> For the purposes of Chapter A1 of Part 14 (remittance basis)—
> (a) if the individual[10] is the transferor—

[10] That is, the individual to whom the accrued income profits arise.

> (i) treat any consideration for the transfer as deriving from the accrued income profits...

In short, the proceeds of sale of the securities are treated as containing the AIP income.

> (ii) if on the transfer the individual does not receive consideration of an amount equal to or exceeding the market value of the securities, treat the securities as deriving from the accrued income profits

Section 670A(3)(a)(ii) is the equivalent of the CGT rule for deemed gains on non-market value disposals.[11]

For the transferee, s.670A(3) ITA provides:

> (b) if the individual[12] is the transferee, treat the securities as deriving from the accrued income profits.

In short, if the taxpayer is the transferee, the AIP securities in the hands of the transferee are deemed to contain the AIP income. It makes no difference whether or not the sale is for market value.

The SAI Manual provides:

> **SAIM4380 - Accrued Income Scheme: remittance basis** [Dec 2019]
> ... In some cases, a remittance basis taxpayer will make an accrued income profit on a transfer of securities, but will not receive consideration equal to the market value of the securities.
> [1] This may happen when the securities are transferred 'ex-div' and the taxpayer is the transferee.
> [2] It may also happen where the taxpayer is the transferor, and makes a gift of the securities, or where the AIS rules treat an event as a transfer (for example, an appropriation of securities to trading stock).
> In such cases ITA07/S670A(3) provides that the securities themselves are treated as deriving from the accrued income profits. This means that a charge will arise on the taxpayer when they, or some other 'relevant person', either bring the securities to the UK (if they are held in bearer form) or remit money or property deriving from the securities. ...

28.9.1 *Relief for losses*

What about accrued income losses accruing to a remittance basis taxpayer? The SAI Manual provides:

[11] See 18.45 (Gain on disposal at undervalue).

[12] That is, the individual to whom the accrued income profits arise.

> **SAIM4380 - Accrued Income Scheme: remittance basis** [Dec 2019]
> ... Remittance basis taxpayers are able to obtain relief for accrued income losses. Losses arising on transfers of securities of a particular kind are set against interest received on securities of the same kind at the end of the relevant interest period, and will therefore reduce the amount of an individual's interest on those securities. There is an example of the interaction of the accrued income loss rules and the remittance basis rules at SAIM4390.

28.9.2 *Mixed fund: Transferor*

The consideration received by the transferor (vendor) for the sale of AIP securities with accrued interest will be a mixed fund, consisting in part of AIP income, and the mixed fund rules will apply. In strict law one cannot separate the AIP income from the other proceeds of sale. There are three reasons for this.

First, assume that:

(1) P will pay a single sum for the security to V's broker (the total price).
(2) The broker will then divide the total price into two parts (accrued interest and clean price) and pay the two parts into two separate accounts of the vendor.

There is already a mixed fund on receipt of the payment by the broker on behalf of the client at stage (1), and the broker's act in transferring the single payment into two accounts is an offshore transfer under the mixed fund rules. In theory one might avoid this difficulty if P could pay two separate sums, one in respect of accrued interest and one in respect of the clean price; but in practice on a market sale that would not be possible.

Secondly, the AIP income is a fictional, notional amount which is distinct from the sum paid for the accrued interest. It is like the CFC income in *Bricom*.[13]

Even if that were wrong, however, there is a third obstacle in s.670A(3) ITA, which provides:

> For the purposes of Chapter A1 of Part 14 (remittance basis)
> (a) if the individual is the transferor –
> (i) treat *any* consideration for the transfer as deriving from the accrued income profits.

Thus even if (contrary to my view) the amount that V, the transferor,

[13] See 107.22 (Characterisation).

received for the accrued interest could in principle be separated and did in principle constitute the AIP income, the effect of s.670A(4) is that any consideration for the securities sold by V is treated as deriving from the AIP income.

However HMRC do not take that view. The RDR Manual provides:

> **RDRM33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [May 2022]
>
> Where a security is sold with accrued income and the proceeds paid into an account, the part of the proceeds representing accrued income will be taxable as income and subject to income tax under the Accrued Income Scheme (AIS)....
>
> Where an individual is chargeable on the remittance basis, accrued income profits arising from on transfers of a 'foreign security' are treated as relevant foreign income...
>
> For consistency of treatment between the AIS and the remittance basis regime, HMRC will follow the tax treatment delivered by the AIS and accept that an 'income amount' can be transferred to a separate 'income account' immediately upon transfer, that is, the proceeds are 'split' into two separate accounts immediately upon receipt into the individual's account. This 'income' could then be identified and taxed as such, without creating a mixed fund....
>
> To the extent that the remainder of the proceeds consist of capital or UK or non-taxable income (as opposed to, say, untaxed foreign income or gains) originally used in the purchase of the security ... the remainder of the proceeds could therefore be separately identified and remitted as such.[14] ...

28.9.3 *Mixed fund: Transferee*

The Manual does not expressly consider the alternative situation where a

[14] Similarly SAI Manual:

> "**SAIM4400. Remittance basis: Further examples** [May 2022]
>
> ... The disposal of a bond may be structured such that separate payment is made for the capital and the accrued income elements which may be paid into separate accounts. In this situation Section 632 ITA 2007 provides that the taxable amount shall be taken as the amount of gross interest accruing to the settlement day, which is separately identified as such.
>
> An individual who has received separate payments into two separate accounts in this way will not be regarded as having two mixed funds. In this situation a remittance of the capital element will not be regarded as a remittance of relevant foreign income."

security is sold without accrued interest and the transferee makes an accrued income profit. There is no difference between the two situations, so the purchaser (transferee) could divide up the purchased securities into an AIP income fraction and a clean capital fraction and hold the two in separate security accounts. However the amounts involved will generally be trivial.

28.9.4 *Mixed fund: Actual interest*

A similar problem arises on receipt of the interest payment after the sale. I refer to this as the **"actual interest payment"**. The recipient will be the purchaser (on a sale with accrued interest) or the seller (on a sale without accrued interest). Either way, the recipient will not normally be subject to income tax on the full amount of the interest as an deemed interest debit will normally generate an accrued income loss which can be set against the interest. The actual interest payment will therefore be a mixed fund. It is suggested that one can separate the actual interest payment on receipt into income and capital elements.

28.9.5 *HMRC examples*

The SAI Manual provides:

> **SAIM4390 - Accrued Income Scheme: remittance basis: examples**
> [May 2022]
> The application of the remittance basis to the AIS is not without complication.

The problem is identifying what is or represents the AIP income where there are deemed interest debits (in the statutory terminology, amount B's) to set against deemed income credits (amount A's.) There is no statutory solution.

> The following examples set out line HMRC takes in particular circumstances.
> *Example 1*
> Ann holds foreign securities 'of the same kind' X and Y which are disposed of in an interest period. They realise the following A and B amounts. ...

Security	**Proceeds**	**Amount A**	**Amount B**
X	100	10	
Y	60		(5)

> There is an accrued income profit of £5,000 which will be treated as

deriving from the proceeds of sale of security X. Assuming the proceeds are paid into a new bank account, there will be a mixed fund comprising capital of £95,000 and an accrued income profit of £5,000.

Example 2
Isabelle has 3 holdings of the same kind of foreign security, X, Y and Z. They are disposed of in an interest period and the proceeds are paid into separate accounts. They realise the following A and B amounts.

Security	Proceeds	Amount A	Amount B
X	100	7	
Y	200	-	(10)
Z	70	4	

In this situation there is an accrued income profit of £1,000. If the proceeds of disposal of all 3 bonds are paid into a single account there will be a mixed fund with capital of £369,000 and an accrued income profit of £1,000.

That is the easy case as there is only one possible answer.

If the proceeds were paid into separate accounts HMRC would expect the accrued income profit to be allocated pro rata in proportion to the Amount A of securities X and Z or, if this would create an unreasonable result, by any reasonable method.

Careful time of purchases and sales would avoid the problem. The last example is somewhat theoretical and I set it out for completeness only:

SAIM4400. Remittance basis: Further examples [May 2022]
It is unlikely that there are many situations where UK and foreign securities will be 'securities of the same kind' for the purposes of the AIS scheme. It may, however, happen in the case of bearer securities. The following example outlines such a situation.
Sam has both overseas and UK bonds 'of the same kind' and they are disposed of in the same interest period with the following results.

Example 3

Security	Proceeds	Amount A	Amount B
X (overseas)	100,000	7,000	
Y (overseas)	200,000	-	(10,000)
Z (UK)	70,000	4,000	

In this case the accrued income profit of £1,000 does not arise as the result of a transfer of foreign securities. There is a net Amount B of £3,000 as the result of the transferred foreign securities. There is

> therefore no relevant foreign income which Sam might remit to the UK. There is a UK accrued income profit of £1,000 which is taxable on an arising basis.

There are several odd things in this example. First it is assumed that if the bearer security is in the UK, the interest is UK source. That is not the test of the location of a source of interest. Perhaps it is assumed that the income is received in the UK. Secondly, one would have expected the deemed interest debit (amount B) to be set against the deemed interest credits pro rata, not set against foreign income first. But since in practice the point will never arise, it is not necessary to pursue that further.

28.9.6 *Pre-2008 transitional rules*

Until 2008/09 a foreign domiciled individual was wholly outside the scope of the AIP rules on foreign securities.

Para 160 Sch 7 FA 2008 provides:

> The amendments made by paras 156 to 159 have effect in relation to transfers of securities where the settlement day is on or after 6 April 2008.

The new rules therefore catch all AIP securities even if held before the law changed in 2008.

28.9.7 *AIP remittance basis: Critique*

When one contemplates the complications of the AIP remittance basis, one appreciates the wisdom of the rule, which applied from the inception of the accrued income scheme in 1985 until 2008, under which the accrued interest scheme did not apply to foreign securities of remittance basis taxpayers. CGT filled the gap. The problems were not discussed, and as far as is known were not even considered, when the law was changed in 2008.

Most if not all readers who have studied the text to this point will agree that the current rule does not give sufficient weight to the desiderata of simplicity and administrative workability. The pre-2008 rule ought to be restored. But that is not likely to happen.

28.10 Excluded persons

The AIP exemptions use the concept of excluded transferor/transferee.

Section 638 ITA provides:

> (1) This section applies if there is a transfer of securities in relation to which a person ("P") is an excluded transferor or excluded transferee.
> (2) In determining whether P has made accrued income profits or accrued income losses under section 628 (making accrued income profits and losses: general rule) and the amount of any such profits or losses, no account is to be taken of any payment treated as made by or to P on the transfer.

A person is not an excluded transferor/transferee in isolation. One is excluded in relation to a transfer of securities. An excluded person is broadly outside the AIP scheme.

28.11 AIP arising to non-resident

Section 643 ITA provides:

> (1) A person is—
> (a) an excluded transferor in relation to a transfer by the person, and
> (b) an excluded transferee in relation to a transfer to the person,
> if the person is non-UK resident throughout the tax year in which the transfer occurs.

The exemption avoids the AIP charge on UK and foreign AIP securities.[15] It also withholds the AIP relief. EN ITA explains the policy behind the rule:

> 1897. In practice it would be very difficult to apply the scheme to such non-residents consistently. While non-residents could take the benefit of relief for accrued income losses to get repayments of tax suffered if tax is deducted at source, it would be difficult to enforce the charge to tax on accrued income profits.

A person coming to or leaving the UK might time disposals to obtain AIP relief while UK resident, while making disposals on which a charge would apply while non-resident.

The temporary non-residence rules do not apply. However CGT may fill some of the gap. The gain on the disposal of AIP securities may be subject to CGT if the CGT temporary non-residence rules apply.

[15] Section 1015 ITA (if needed) could also restrict the territorial scope of the AIP charge, but the rules discussed here leave it no room to operate.

28.12 Trusts

28.12.1 *Application to trustees*

The TSE Manual provides:

> **TSEM3325. Do AIS provisions apply to trustee or beneficiary?** [Sep 2021]
>
> ***Accrued Income Scheme charge***
>
> If trustees (other than bare trustee – TSEM3320) transfer securities, any Accrued Income Scheme profit is that of the trustees. The trustees are chargeable at the trust rate, under Sections 481 and 482 ITA.
>
> The Accrued Income Scheme profit on a transfer of securities does not form the income of any beneficiary.
>
> ***Accrued Income Scheme losses***
>
> The treatment of the loss depends on who received the income interest against which relief is due. If the trustees received the interest, they are entitled to the relief.
>
> The trustees may have mandated the interest to a beneficiary. The beneficiary should claim the loss against the interest.

28.12.2 *Transfer to trust*

The TSE Manual provides:

> **TSEM3330.Securities go into trust: Accrued Income Scheme** [Sep 2021]
>
> When securities go into trust there is a transfer, for Accrued Income Scheme purposes. The transfer is from the settlor to the trustee.
>
> This includes:
>
> - a settlor creates a new trust by transferring securities to the trustee
> - a person who holds securities for his own benefit declares he will in future hold them as trustee
> - at the end of an administration period, a personal representative starts to hold securities as trustee of a will trust.

28.12.3 *Transfer from trustees*

The TSE Manual provides:

> **TSEM3335. Beneficial interest in trust changes: Accrued Income Scheme** [Mar 2017]
>
> ***Change results from the terms of the trust***
>
> The terms of a trust may often result in changes in beneficial interests. For example, on the death of a life tenant the trust assets may pass absolutely to another beneficiary. Such changes in beneficial interest

> have no accrued income scheme consequences. Either there is no actual transfer, or the transfer simply produces self-cancelling deemed profits and losses.

SAI Manual makes the same point:

> **SAIM4050. What is a transfer?** [Dec 2019]
> ... The AIS is based on transfers of the legal ownership of securities, not the transfer of the underlying beneficial ownership. Thus, for example, there is no transfer for the purposes of the AIS if a beneficiary under a trust becomes absolutely entitled as against the trustees to securities forming part of the trust fund. ...

Returning to the TSE Manual:

> **TSEM3335. Beneficial interest in trust changes: Accrued Income Scheme** [Sep 2021] ...
> ***Change follows an action by the trustees***
> Sometimes a change is not a direct result of the terms of the deed. Trustees can use their powers to advance interests or appoint property. The exercise of these powers can amount to a transfer.

That seems inconsistent with what was said above.

> ***'Stranded' Accrued Income Scheme loss***
> A change in beneficial owner can result in an Accrued Income Scheme loss being 'stranded'. It is no longer available to set against the interest. For example, the trustee could have bought securities 'cum dividend' (with a right to the dividend). Shortly afterwards a beneficiary could become absolutely entitled to the trust assets following a contingency. The contingency does not involve any transfer for Accrued Income Scheme purposes. This means the trustee's Accrued Income Scheme loss is lost. The beneficiary was never entitled to the loss, so cannot set it against subsequent interest.

28.12.4 *Appointment of new trustees*

The TSE Manual provides:

> **TSEM3340. Accrued income scheme: change of trustees** [Sep 2021]
> ***Trustees remain resident in the UK***
> There are no Accrued Income Scheme consequences when trustees change, but the trustees of the settlement remain resident in the UK. The change simply produces self-cancelling deemed profits and losses.
> ***Trustees change from resident to non-resident***
> As the new trustees are not resident, they do not satisfy the 'residence

> requirement' of the Accrued Income Scheme. The appointment of non-resident trustees is a transfer of the securities by the resident trustees. ...
>
> ***Trustees change from non-resident to resident***
>
> As the old trustees were not resident, they do not satisfy the 'residence requirement' of the Accrued Income Scheme. The change of trustees is a transfer of securities to the resident trustees.

This may have been right before 2006, but now that trustees are treated as a single person (distinct from the actual trustees) it is considered that the appointment of new trustees (wherever resident) is not a transfer for AIS purposes.

28.12.5 *Nominees/bare trustees*

For completeness: s.666 ITA applies for the AIS the bare trust disregard which applies for CGT:[16]

> (1) Transfers of securities by or to a person as nominee for another person ("A") are treated for the purposes of this Chapter as transfers by or to A.
> (2) Transfers of securities by or to a person ("T") as trustee for another person ("B") are treated for the purposes of this Chapter as transfers by or to B if B is absolutely entitled as against T.
> (3) For the purposes of subsection (2) where T is the transferor, B is absolutely entitled as against T if immediately before the transfer B has the exclusive right to direct how the securities are to be dealt with.
> (4) For the purposes of subsection (2) where T is the transferee, B is absolutely entitled as against T if immediately after the transfer B has that exclusive right.
> (5) For the purposes of subsections (3) and (4), a right to direct how securities are to be dealt with is treated as an exclusive right despite being subject to satisfying any outstanding charge, lien or other right of the trustee to resort to the securities for payment of duty, taxes, costs or other outgoings.
> (6) Subsection (1) applies to a transfer of securities by or to a person as nominee for two or more persons as it applies to a transfer of securities by or to a person as nominee for one person, taking the references to A as references to the two or more persons.
> (7) This section applies to a transfer of securities by or to a person as trustee for two or more persons as it applies to a transfer of securities as trustee for one person, taking—
> (a) the references to B as references to the two or more persons, and
> (b) the references to B being absolutely entitled as references to the two or more persons being jointly absolutely entitled.
> (8) The fact that a person is an infant or otherwise lacks legal capacity is to be

[16] See 87.7.3 (Entitled against trustee).

> disregarded in determining for the purposes of this section whether the person is absolutely entitled as against T.

28.13 Settlor-interested trusts

28.13.1 *UK resident trust*

Section 667(1) ITA provides:

> If the trustees[17] of a settlement are treated as making qualifying accrued income profits,[18] those profits are to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

I am not sure if this is necessary. Perhaps it could have been argued that although "tax is charged on accrued income profits" (s.616) such profits are nevertheless not "income arising under a settlement". Perhaps the provision is just for symmetry with the provision which follows for non-resident trusts.

The rate of tax in the absence of s.624 is the trust rate, 45%, so s.624 can only reduce the tax rate (or make no difference).

28.13.2 *Non-resident trust*

In the absence of express provision, AIP income of non-resident trustees would not fall within the settlor-interested trust code because the trustees are non-UK resident. However s.667 ITA deals with this and so the provisions apply to AIP income:

> (2) Subsection (3) applies if the trustees of a settlement—
>
> (a) are non-UK resident or domiciled[19] outside the UK throughout a tax year in which an interest period or part of an interest period falls, and

[17] Defined in s.667(4)(b) ITA.

[18] Defined in s.667(4)(a) ITA:

"'qualifying accrued income profits' means accrued income profits which are treated as made—
(i) under section 628(5), or
(ii) under section 630(2) in respect of a transfer of variable rate securities."

The drafting is misleading: as far as I can see, all accrued income profits are "qualifying" accrued income profits.

[19] The references to domicile in s.667(2) are otiose, but they do no harm. They are there for historical reasons, as before 2008 foreign domiciled trustees qualified for the remittance basis on trust income.

> (b) would have been treated as making an amount or an additional amount[20] of qualifying accrued income profits in the interest period if the trustees had been UK resident or domiciled in the UK during a part of each such tax year.
>
> (3) The amount or additional amount of qualifying accrued income profits that the trustees would have been treated as making is to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005.

Thus the AIP income of a settlor-interested trust is in principle within the scope of s.624 ITTOIA.[21]

Non-resident trustees would not qualify for AIP loss relief,[22] so s.680 ITA extends the relief:

> (1) This section applies if—
>
> (a) the trustees of a settlement are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period of securities falls,
>
> (b) the trustees' income is or includes interest from those securities,
>
> (c) the interest falls due at the end of that interest period, and
>
> (d) had the trustees been UK resident, or domiciled[23] in the UK, during a part of each such tax year the interest would have been wholly or partly exempt from income tax under section 679.
>
> (2) No liability to income tax arises as a result of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor) in respect of so much of the interest as would have been exempt from income tax under section 679.

28.14 ToA rules/AIP income

In the absence of express provision, AIP income would not fall within the transfer of asset abroad provisions because the person abroad would qualify for the AIP non-residence defence (or more accurately, the person abroad would not receive income).[24] However, s.747 ITA deals with this and so the ToA provisions apply to AIP income:

[20] The references to "an additional amount" are otiose but they do no harm.

[21] Subject to s.624 protected-trust relief, if applicable; see 28.15 (AIP: Protected-trust relief).

[22] See 28.8 (Accrued income loss relief).

[23] The references to domicile in ss.667 and 680 ITA is otiose from 2008 but it does no harm.

[24] See 48.15 (Income of person abroad).

> (1) This subsection applies if a person—
>
> (a) would have been treated as—
>
> (i) making qualifying accrued income profits, or
>
> (ii) making qualifying accrued income profits of a greater amount,
>
> in an interest period, but
>
> (b) is not so treated because of being resident or domiciled[25] outside the UK throughout any tax year in which the interest period (or part of it) falls.
>
> (2) If subsection (1) applies, this Chapter applies as if the amount which the person would be treated as making or, as the case may be, the additional amount were income becoming payable to the person.
>
> (3) Accordingly, any reference in this Chapter to income of (or payable or arising to) a person abroad must be read as including a reference to such an amount.

It has been suggested that this leaves a gap where AIP securities are held by a non-resident company. Section 747(1) ITA applies only if the company would have fallen within the AIP rules but did not do so "because of being resident outside the UK". But if the company had been UK resident, it would be within the charge to corporation tax and outside the scope of AIP. That is correct on a literal construction. However, the context shows that the deeming is not intended to be applied to that extent, and a comparable argument in a CGT context was resoundingly dismissed in *de Rothschild v Lawrenson* 67 TC 300 ("I do not believe that our processes of statutory construction are so wanting in technique and imagination ...").[26]

The person abroad (if non-resident) would not qualify for AIP loss relief, so s.747(4)(5) ITA extends the relief:

> (4) This subsection applies if income consisting of interest which falls due at the end of an interest period—
>
> (a) would have been income as respects which a person is entitled to an exemption, or an exemption of a greater amount, from liability to income tax under section 679 (interest on securities involving accrued income losses: general), but
>
> (b) is not such income because it is income of a person who is resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.

[25] The reference to domicile is otiose from 2008 but it does no harm.

[26] See App 8.2 (Deeming provisions: Construction).

> (5) If subsection (4) applies, for the purposes of this Chapter the interest is treated as reduced by the amount of the exemption or, as the case may be, the additional exemption.

28.14.1 *Definitions*

Section 747 ITA provides definitions for s.747:

> (6) In this section—
> (a) expressions which are also used in Chapter 2 of Part 12 (accrued income profits) have the same meaning as in that Chapter (but see subsection (7)), and
> (b) "qualifying accrued income profits" means accrued income profits which are treated as made—
> (i) under section 628(5), or
> (ii) under section 630(2) in respect of a transfer of variable rate securities.
>
> (7) In the case of qualifying accrued income profits within sub-paragraph (ii) of the definition of that expression in subsection (6)(b)—
> (a) references in subsection (1)(a) to making qualifying accrued income profits in an interest period are to be read as making them in the tax year in which the settlement day falls, and
> (b) the reference in subsection (1)(b) to the interest period is to the period—
> (i) beginning with the day after the last day of the only or last interest period of the securities, and
> (ii) ending with the settlement day.

The expression "qualifying" accrued income profits is misleading: as far as I can see, all accrued income profits are qualifying.

For the interaction with s.731, see 50.21.2 (Stock dividend/accrued income).

28.15 AIP: Protected-trust reliefs

The wording is (more or less) the same as for offshore income gains,[27] which suggests that the position is as follows:

(1) If the settlor/transferor makes a remittance basis claim, AIP income is protected income, and qualifies for s.624/s.720 protected-trust reliefs.

(2) If the transferor does not make that claim (either because they are

[27] See 67.12.2 (OIG: Protected s.720 income?).

deemed domiciled and cannot claim the remittance basis; or because they chose not to do so) then AIP income is not protected income; so it is taxable on the transferor/settlor on an arising basis.

The CIOT argument relating to OIG and deemed source does not arise in this context.[28] But a purposive construction is just about arguable.

28.16 DT relief: AIP income

28.16.1 *DT exemption*

OECD Commentary provides:

> 20.1 The amount that the seller of a bond will receive will typically include the interest that has accrued, but has not yet become payable, at the time of the sale of the bond. In most cases, the State of source will not attempt to tax such accrued interest at the time of the alienation and will only tax the acquirer of the bond or debenture on the full amount of the interest subsequently paid (it is generally assumed that in such a case, the price that the acquirer pays for the bond takes account of the future tax liability of the acquirer on the interest accrued for the benefit of the seller at the time of the alienation). In certain circumstances, however, some States tax the seller of a bond on interest that has accrued at the time of the alienation (e.g. when a bond is sold to a tax-exempt entity). Such accrued interest is covered by the definition of interest and may therefore be taxed by the State of source. In that case, that State should not again tax the same amount in the hands of the acquirer of the bond when the interest subsequently becomes payable.

See 26.27.5 (DTA definition of interest).

28.16.2 *AIP: Foreign Tax Credit*

In the absence of express provision there would be no Foreign Tax Credit, as the AIP income is not taxable in the other state.

Section 10 TIOPA provides relief:

> (1) Subsection (2) applies if—
>
> (a) a person is treated under section 628(5) of ITA 2007 as making accrued income profits in an interest period,
>
> (b) the person would, were the person to become entitled in the

[28] Because that argument rests on s.830(2)(o) ITTOIA, and there is no equivalent provision in s.830(2) for accrued income profits. See 67.12.3 (Deemed source argument).

> relevant tax year[29] to any interest on the securities concerned, be liable in respect of the interest to tax chargeable under ITTOIA 2005 on relevant foreign income, and
>
> (c) the person is liable under the law of the territory to tax in respect of interest payable on the securities at the end of the interest period or the person would be so liable if the person were entitled to that interest.

I cannot see the need for (b) as it will be satisfied whenever (a) is satisfied. Section 10(2) provides the relief:

> (2) Credit is to be allowed against income tax calculated by reference to the accrued income profits.
> (3) The amount of the credit allowed under subsection (2) is given by—
>
> AIP × FTR
>
> where—
> AIP is the amount of the accrued income profits, and
> FTR is the rate of tax to which the person is or would be liable as mentioned in subsection (1)(c)...

Section 39 TIOPA restricts DT relief where there is relief for accrued income losses.[30]

The SAI Manual provides:

> **SAIM4370. Double taxation relief** [May 2022]
> Where an AIS charge arises on a foreign stock on which the interest would have suffered foreign tax eligible for credit relief if interest had been received, credit for foreign tax is allowable for the lower of
>
> - the rate of UK tax charged on the accrued income profit, and
> - the rate of foreign tax suffered on the interest payable at the end of the interest period for which the charge arises.
>
> If there is an accrued income loss to be set against foreign interest, reduce the credit for foreign tax in the proportion which the allowance bears to the interest.
> *Example*
> Taxpayer holds foreign stock on which the interest suffers tax eligible for credit at 15%. Interest paid on 30 June and 31 December.
> In the interest period to 30 June 2015, the taxpayer makes transactions

[29] Defined subsection (5): "In subsection (1)(b) 'the relevant tax year' means the tax year in which, under section 617(2) of ITA 2007, the accrued income profits are treated as made."

[30] See 28.8 (Accrued income loss relief).

resulting in an AIS loss of £200. He receives interest (gross) of £1,000 less £150 foreign tax.
In August 2016 he sells the entire holding and there is an AIS profit of £300. He is liable to UK tax at 22%. His double taxation relief is as follows

Foreign interest		£1,000
Less Accrued Income relief		- £200
		£800
Foreign tax deducted	£150	
Credit restricted to	£1000 −£200 × £150/£1000	= £120
Accrued income profit		£300
Allow credit for foreign tax		
on AIS charge £300 @ 15%		= £45
Total double taxation relief £120 + £45		= £165

The double taxation relief given can exceed the foreign tax suffered (£165 exceeds the £150 suffered).

28.17 AIP/CGT interaction

Section 119(1) TCGA disapplies the normal CGT rules in ss.37 and 39 TCGA:

> (1) Where there is a transfer of securities within the meaning of Chapter 2 of Part 12 of ITA 2007 (accrued income profits)—
>
> (a) if a payment is treated as made to the transferor under section 632 of that Act or by the transferor under section 633 of that Act, section 37 shall be disregarded in computing the gain accruing on the disposal concerned;
>
> (b) if a payment is treated as made by the transferee under section 632 of that Act or to the transferee under section 633 of that Act, section 39 shall be disregarded in computing the gain accruing to the transferee if he disposes of the securities;
>
> but subsections (2) and (3) below shall apply.

Section 119 TCGA goes on to set out its own rules:

> (2) Where the securities are transferred with accrued interest (within the meaning of that Chapter)—
>
> (a) if a payment is treated as made to the transferor under section 632 of ITA 2007, an amount equal to the amount of that payment shall be excluded from the consideration mentioned in subsection (8) below;
>
> (b) if a payment is treated as made by the transferee under that section, an amount equal to the amount of that payment shall be

> excluded from the sums mentioned in subsection (9) below. ...
>
> (8) The consideration is the consideration for the disposal of the securities transferred which is taken into account in the computation of the gain accruing on the disposal.

Section 119(3)(9) contains corresponding rules for a transfer without accrued interest:

> (3) Where the securities are transferred without accrued interest (within the meaning of that Chapter)—
>
> (a) if a payment is treated as made by the transferor under section 633 of ITA 2007, an amount equal to the amount of that payment shall be added to the consideration mentioned in subsection (8) below;
>
> (b) if a payment is treated as made to the transferee under that section, an amount equal to the amount of that payment shall be added to the sums mentioned in subsection (9) below...
>
> (9) The sums are the sums allowable to the transferee as a deduction from the consideration in the computation of the gain accruing to him if he disposes of the securities.

28.18 Foreign currency securities

SAIM provides:

> **SAIM4310. Special calculations: Foreign currency securities** [Dec 2019]
>
> **Foreign securities: Translation into sterling**
>
> Section 664 ITA 2007 provides rules for translation into sterling of the payments made on the transfer of securities where the interest on securities is payable in a currency other than sterling.
>
> If the interest is accounted for separately between transferor and transferee, and the parties specify in their contact what the sterling equivalent of the accrued or rebate interest is, the sterling amount so specified is to be used in the AIS calculations. Otherwise, the amount is to be determined in the foreign currency according to the usual rules, and then translated into sterling at the rate of exchange prevailing on the settlement day for the transfer, calculated by reference to the London closing rate of exchange for the day concerned.
>
> The nominal value of foreign securities is also determined (under Section 677 ITA 2007) as the sterling equivalent of that value on any day, calculated by reference to the London closing rate for that day.
>
> Where unrealised interest is payable in a foreign currency, Section 665 ITA 2007 provides that the amount of the accrued income profits under

Section 631 ITA 2007 is the sterling equivalent on the settlement day, or in the case of interest in default (SAIM4290), the value on the day of receipt.

Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently.

CHAPTER TWENTY NINE

DEEPLY DISCOUNTED SECURITIES

29.1 DDS code
29.2 "Deeply discounted security"
29.3 "Issued"
29.4 Foreign currency security
29.4.1 Foreign currency security: DDS
29.4.2 Foreign currency DDS
29.5 Excluded occasions of redemption
29.5.1 Third-party option conditions
29.5.2 Commercial protection conditions
29.5.3 Connected third party
29.6 Securities outside DDS code
29.6.1 Securities under other regime

29.12.2 UK settlor-interested trust
29.13 Non-resident individual
29.14 Non-resident trust
29.15 Transfer of assets abroad
29.15.1 s.731 ITA
29.16 Non-resident company
29.17 Interaction with CGT
29.17.1 DDS is a QCB
29.17.2 Significance of QCB status
29.18 DDS/CGT compared

29.1 DDS code

Deeply discounted securities are governed by Chapter 8 Part 4 ITTOIA (**"DDS code"**).

A full discussion of this topic would need a book to itself. This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole.

In outline, profits arising on the disposal of a deeply discounted security ("DDS") are subject to income tax (rather than CGT).

The following specialist topics are not discussed:

- securities issued in tranches
- earn-out rights

- strips
- exchanges and conversions

I do not discuss the position of companies which issue or hold deeply discounted securities, which is governed by the loan relationship rules.

29.2 "Deeply discounted security"

For the meaning of "security" see App. 2.17 ("Security" in DDS code).

Section 430(1) ITTOIA provides:

> The general rule is that a security is a "deeply discounted security" for the purposes of this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] if, as at the time it is issued,
> [a] the amount payable on maturity or any other possible occasion of redemption ("A")
> [b] exceeds or may exceed the issue price
> [c] by more than A × 0.5% × Y,
> where Y is the number of years in the redemption period or 30, whichever is the lower.

I refer to this as the **"0.5% DDS test"**.

Section 430 ITTOIA defines "redemption period":

> (2) If the redemption period is not a number of complete years, for the purposes of subsection (1) the incomplete year is expressed as twelfths, treating each complete month and any remaining part of a month as one-twelfth.
> (3) In this section "redemption period" means the period between the date of issue and the date of the occasion of redemption in question.

Interest is disregarded for the purpose of the 0.5% DDS test. Section 430(4) ITTOIA provides:

> Interest payable on an occasion of redemption is ignored in determining for the purposes of this section the amount payable on that occasion.

In other words, the profit on redemption must be a capital premium, rather than interest. For the distinction, see 26.4 (Premium).

SAI Manual gives three examples. The first example is an RPI-index bond. Note that HMRC here accept that RPI indexation is not interest:

> **SAIM3020 Meaning of deeply discounted security** [Dec 2019
> *Example 1*
> Company A issues securities for £1,000 which are redeemable in 10

> years time for the subscription amount increased by the percentage movement in the Retail Price Index over the same period. As the linkage to the RPI may give more than a 5% increase in value (10 years × 0.5%) over that period, the securities are deeply discounted securities.

In the next example there is just a possibility of a fixed premium:

> *Example 2*
> Company B issues a 12-month security for £950. It is redeemable for £950 at maturity or, depending on events, for £1,000 after 6 months. The occasion of early redemption is not disregarded under Section 431 ITTOIA 2005 (SAIM3030). The difference between the issue and early redemption prices is £50 and is therefore more than £2.50 (£1,000 × 0.5% × 6/12). The security is therefore a DDS.

The next example is a FTSE 100 indexed bond:

> *Example 3*
> Bank C issues a 5-year security that is linked to the FTSE 100 share index. Each security has a nominal value to £100. If the index rises, the investor receives on redemption £100 multiplied by the percentage rise in the index. For example, the index has risen to 150% of its starting value, the investor receives £150. If the index falls, the investor is guaranteed to receive back his or her £100, so the security is not an excluded indexed security (SAIM3050). Since the security may give more than a 2.5% increase in value over the period (5 years × 0.5%), it is a DDS, even though there is no certainty as to the redemption amount.

29.3 "Issued"

Savva v HMRC comments on this word:[1]

> What will amount to an "issue" of a security in a given case is likely to be highly fact-specific, and the case law shows that it can be a very difficult question to answer. For present purposes, it is enough to say that, if the rights which Mr Savva received from UBS did constitute a separate security, we doubt whether there is any demonstrable error of law in the FTT's conclusion that the security was "issued" by UBS.

29.4 Foreign currency security

In the following discussion a **"foreign currency security"** is one issued

[1] [2015] UKUT 141 (TCC) at [40].

for a foreign currency and redeemable in that currency.

29.4.1 *Foreign currency security: DDS*

Consider for instance a US Treasury Note issued for $1,000 and redeemable on maturity at $1,000 and carrying interest at a market rate. Is the security deeply discounted? The question (in short) is whether:

> the amount payable on maturity may exceed the issue price

This raises a currency translation issue. If:

(1) "issue price" means the sterling equivalent of the issue price at the time of issue; and

(2) "amount payable on maturity" means the sterling equivalent of that amount at the time of maturity

then a foreign currency security is a DDS, because currency fluctuations could lead to a gain measured by £ sterling.

If "issue price" means the dollar price and "the amount payable on maturity" means the dollar amount, then the two are equal and the security is not a DDS.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is for several reasons. First, the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations. The absence of relief on losses would operate very unfairly. Secondly, if that were not the case, all foreign currency securities would be within the DDS regime.[2] That would be surprising (and not EU-law compliant).[3]

HMRC agree. The SAI Manual provides:

> **SAIM3020 Meaning of deeply discounted security** [Mar 2017]
> The test for deep discount is carried out in the currency of issue.

29.4.2 *Foreign currency DDS*

The above paragraph is considering a security whose dollar issue price

[2] Unless they contained a cap to limit the gain to a sterling amount, which would not normally be the case.

[3] The arguments are more fully set out in Ghosh, "Corporate Bonds: If The Cap Does Not Fit" Taxation Magazine, 7 February 2002 p.439; but since HMRC have accepted this view since the publication of Tax Bulletin 9, it is not necessary to consider that here.

equals its dollar maturity price. Of course, a foreign currency security would in principle be a DDS if the redemption price may sufficiently exceed the issue price. It is understood that US treasury bills (which do not carry interest) are normally DDSs. I refer to such a security as a "**foreign currency DDS**".

How does one compute the profit on the disposal of a foreign currency DDS? The profit is:

> the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.

This raises another currency translation issue. Suppose a person acquires a security on issue for dollars and redeems it for dollars. Is the amount paid to acquire the security:

(1) The sterling equivalent of the purchase price at the time of issue? Or
(2) The dollar amount? If so, it is deducted from the dollar amount payable on disposal, to give a dollar profit, translated into sterling at the time of disposal.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is consistent with the approach to the definition of a DDS: see above. The same point applies: the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations.

The solution to the same problem for CGT is different.[4] The reason for this is explained in *Capcount Trading v Evans* 65 TC 545. One important factor in that decision was the provision in the CGT legislation that currency other than sterling is an asset for CGT. There is no similar provision for IT. However HMRC may not agree. SAIM provides:

> **SAIM3070 Taxation: Profit On Disposal** [Dec 2019]
> Where a security is denominated in a foreign currency the profit is the difference between the sterling equivalents of the acquisition and disposal amounts, using the spot rates at the material dates.

29.5 Excluded occasions of redemption

Section 431(1) ITTOIA provides:

> An occasion of redemption of a security other than maturity is ignored

[4] See 95.2 (CGT: currency conversion date).

> for the purposes of section 430(1) if the third-party option conditions or the commercial protection conditions are met.

Section 431(4) ITTOIA provides:

> Subsection (1) does not apply to an occasion just because the occasion coincides or may coincide with an occasion meeting the third-party option conditions or the commercial protection conditions.

29.5.1 *Third-party option conditions*

Section 431(2) ITTOIA provides:

> The third-party option conditions are that—
> (a) the security may be redeemed on the occasion at the option of a person other than its holder,
> (b) the security is issued to a person who is not connected with the issuer, and
> (c) the obtaining of a tax advantage by any person is not the main benefit, or one of the main benefits, that might have been expected to accrue from the provision in accordance with which the security may be redeemed on the occasion.

29.5.2 *Commercial protection conditions*

Section 431(3) ITTOIA provides:

> The commercial protection conditions are that—
> (a) the security may be redeemed on the occasion as the result of an exercise of an option that is exercisable only on the occurrence of—
> (i) an event adversely affecting the holder (see subsection (8))[5], or
> (ii) a default by any person, and
> (b) as at the time of the security's issue it appears unlikely that the option will be exercisable on the occasion.

29.5.3 *Connected third party*

Section 431 ITTOIA provides:

[5] "(8) In this section "event adversely affecting the holder", in relation to a security, means an event the occurrence of which appears, as at the time of the security's issue, likely to have an adverse effect on the interests of its holder at the time of the event if there were no provision for redemption on its occurrence."

> (5) If—
>
> (a) the only reason that a security is not a deeply discounted security is that an occasion on which it may be redeemed is ignored because the third-party option conditions are met, and
>
> (b) at some time after its issue the security is acquired by, or its holder becomes, a person connected with the issuer,
>
> in relation to that time and later this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] applies as if the security were a deeply discounted security.
>
> (6) If a person ("P") who is not connected with the issuer acquires—
>
> (a) a security which is only a deeply discounted security because it was issued to a person connected with the issuer and so fails to meet the condition specified in subsection (2)(b), or
>
> (b) a security within subsection (5),
>
> this Chapter applies in relation to P as if the security ceased to be a deeply discounted security on the acquisition.
>
> (7) For the purposes of the application of this section to a security, the question whether persons are connected is determined without regard to the security or any other security issued under the same prospectus.

29.6 Securities outside DDS code

29.6.1 *Securities under other regime*

Section 432(1) ITTOIA provides:

> The following are not deeply discounted securities—
>
> (a) shares[6] in a company,
>
> (b) gilt-edged securities that are not strips,
>
> (c) life assurance policies, and
>
> (d) capital redemption policies.[7]

29.6.2 *Securitised derivatives*

The SAI Manual provides:

> **SAIM3040. Securities not deeply discounted securities** [Dec 2019] [The Manual sets out s.432(1) and continues:] In practice, therefore, most deeply discounted securities will be securities in the nature of debts, that is, where the issuer has an obligation to make some form of return to the investor.

[6] Defined s.460(1) ITTOIA: "In this Chapter "share", in the case of a share in a company, means any share under which an entitlement to receive distributions may arise, but does not include a share in a building society."

[7] See 70.2.3 ("Capital redemption policy").

Until 2011, this SAI Manual paragraph provided:

> **Securitised derivatives**
> Securitised derivatives present particular problems. These are investment products where the amount which the investor gets back at the end depends on the performance of a share index, or a particular share or shares, or (less commonly) some other asset. The capital initially subscribed by the investor may be completely or partly protected, or it may be possible for the investors to lose the whole of their money.
> Some such products, properly analysed, are options, for which the investor pays a premium (these are often described as 'warrants'). Others may be contracts for differences, or other derivatives. These will not be deeply discounted securities; disposal of an option, or of a financial future within Section 143 TCGA 1992, will give rise to a capital gain or allowable loss. See also SAIM7000 on the tax treatment of derivatives that generate an interest-like return.
> Other securitised derivatives, however, create a debt (in technical terms, they are structured as a debt security plus one or more options or other derivatives). These will be deeply discounted securities, unless they fulfil the stringent conditions to be 'excluded indexed securities' (SAIM3050). You should seek advice from CT & VAT (Financial Products and Services Team) if it is unclear whether or not a particular instrument is a deeply discounted security.

It is, I think, implied that a DDS must be a debt security as opposed to a non-debt security. There are some deep conceptual issues here.

29.7 Excluded indexed security

Section 432(2) ITTOIA provides:

> An excluded indexed security (see section 433) is only a deeply discounted security if treated as such under section 431(5) (acquisition by a person connected with the issuer or holder becoming such a person).

For the s.431(5) exception, see 29.5.3 (Connected third party).

29.7.1 *"Excluded indexed security"*

Section 433(1) ITTOIA provides:

> In this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] "excluded indexed security" means a security under the terms of which the amount

> payable on redemption[8] is determined by applying to the amount for which the security was issued the percentage change (if any) over the security's redemption period in—
> (a) the value of chargeable assets of a particular description, or
> (b) an index of the value of such assets.

The SAI Manual provides:

> **SAIM3050 excluded indexed securities** [Dec 2019]
> ... **The percentage change**
> The percentage change is the full percentage change in the value of the chargeable assets, or of any index of the value of such assets, over the redemption period. The percentage change is to be applied to the full issue price - that is without issue costs having been deducted.

29.7.2 *Capital protection*

Section 433(2) ITTOIA provides for a security which pays at least a minimum amount, but only a small one:

> The fact that the terms under which the security is issued include a provision to the effect that the amount payable on its redemption must be at least a specified percentage of the amount for which it was issued only prevents it from falling within the definition in subsection (1) if that percentage exceeds 10%.

The SAI Manual provides:

> **SAIM3050 excluded indexed securities** [Dec 2019]
> ... **Capital protection**
> The terms of the security may provide for the investor to get back a percentage of his or her original stake money, even if the value of the relevant chargeable assets plummets. This will not prevent it being an excluded indexed security provided the specified percentage is not more than 10% of the issue price. It should be noted this does not mean investors can invest £100 and get a minimum of £110 back; it means they can invest £100 and get not more than £10 back, losing the other £90 of their original capital. Unless they can lose at least 90% of the amount invested it is not an excluded indexed security, and will be a deeply discounted security.

[8] Section 433(7) ITTOIA provides: For the purposes of this section ... (b) "redemption", in relation to a security, does not include its redemption on an occasion which is to be ignored under section 431(1) (excluded occasions of redemption).

> Some products provide that the investor's principal will be fully at risk if an index such as the FTSE 100 falls below a specified threshold. Provided that there is a realistic prospect of such an event occurring, such products will be regarded as having capital protection of 10% or less in determining whether or not they are excluded indexed securities.
> Some products are structured so that the security issued to the investor is linked to the value of shares in a special purpose vehicle, warrants or other instruments. HMRC's view is that the effect of any instruments linked to the security must be taken into account in determining whether or not the terms under which that security is issued includes a provision that provides capital protection.

The SAI Manual provides:

> **SAIM3055 excluded indexed securities: chargeable assets** [Dec 2019]
> ... **Amount payable on redemption**
> The investor must have an entitlement to the issue price increased by the relevant change in the value of the chargeable assets (or index). Where the redemption value is to be satisfied by receipt of the linked chargeable assets themselves, with the result that the investor obtains more than the percentage change, the conditions would not be met. Nor is the condition satisfied if the return to the investor is geared, for example, if on redemption the investor receives twice the increase in the index (or some other multiple).
> **Total return index**
> The value of a 'total return' equity index reflects not only the price of the shares comprised in the relevant index, but also a measure of income in the computation of the level of that index. The value of the index may, for example, reflect an amount in respect of rolled-up dividends. Provided the index is a standard, commercially used index of the total return from shares, HMRC consider that it will be an index of the value of chargeable assets for the purposes of ITTOIA05/S433.

The SAI Manual provides:

> **SAIM3055 excluded indexed securities: chargeable assets** [Dec 2019]
> Where a security is linked to an index of chargeable assets, changes in the components of the index can be ignored so long as the index continues to reflect the population it was set up to mirror.
> Cases where the condition may not be satisfied, for example, where
> [1] a new index is used, or

[2] the linkage is to shares in only one company, which then changes, should be referred to BAI (Financial Products and Services Team).

29.7.3 *Interest payable on redemption*

Section 433(3) ITTOIA provides:

> Interest payable on redemption is ignored in determining for the purposes of this section the amount payable on redemption.

29.7.4 *"Redemption period"*

Section 433(4) ITTOIA provides:

> In subsection (1) "redemption period" means—
> (a) the period beginning with the date of issue and ending with the date of redemption, or
> (b) a period which is or includes almost all that period and only differs from it for purposes connected with giving effect to a valuation in relation to rights or liabilities under the security.

The SAI Manual provides:

> **SAIM3050 excluded indexed securities** [Dec 2019]
> ...**The redemption period**
> This is the period between the date of issue and the date of redemption. The rules allow slightly different dates to be used where there are difficulties in obtaining valuations on the issue or redemption dates, and for no other reason.

29.7.5 *"Chargeable asset"*

Section 433 ITTOIA provides:

> (5) An asset is a chargeable asset for the purposes of subsection (1) if a gain accruing to a person on its disposal would be a chargeable gain for the purposes of TCGA 1992 on the assumptions specified in subsection (6).
> (6) The assumptions are that—
> (a) the asset is an asset of the person,
> (b) the person is not entitled to the exemption conferred by section 100 of TCGA 1992 (exemption for authorised unit trusts etc),
> (c) disposal of the asset by the person would not be treated for income tax purposes as a disposal in the course of a trade, profession or vocation, and
> (d) section 116(10) of TCGA 1992 is ignored (chargeable gains on

subsequent disposals of qualifying corporate bonds acquired in reorganisations, conversions and reconstructions).

29.7.6 *Exclusion of RPI indexation*

Section 433(7) ITTOIA provides:

> For the purposes of this section—
> (a) neither the retail prices index nor any similar general index of prices published by the government of a territory or by an agent of such a government is an index of the value of chargeable assets

29.8 "Disposal"

Section 437(1) ITTOIA provides:

> References in this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] to the disposal of a deeply discounted security are—
> (a) to its redemption,
> (b) to its transfer by sale, exchange, gift or otherwise, including a transfer treated as made by subsection (3) [death of holder], and
> (c) so far as not covered by para (a) or (b), to its conversion under its terms into shares in a company or other securities (including other deeply discounted securities).

29.8.1 *"Person making a disposal"*

Section 437(2) ITTOIA provides:

> The person treated as making a disposal is—
> (a) in the case of a disposal within subsection (1)(a), the person entitled as the security's holder to any payment on the disposal,
> (b) in the case of a disposal within subsection (1)(b), the transferor, and
> (c) in the case of a disposal within subsection (1)(c), the person who would be entitled as the security's holder to any payment on the disposal, if such a payment were made.

29.8.2 *Death of holder*

Section 437(3) ITTOIA provides:

> A person who dies while entitled to a deeply discounted security is treated as transferring it immediately before death to the personal representatives.

29.8.3 *Date of disposal/acquisition*

Section 438 ITTOIA provides:

> (1) This section applies if—
> (a) a transfer or acquisition of a deeply discounted security is made under an agreement, and
> (b) the transferee or the person making the acquisition becomes entitled to the security at the time the agreement is made.
> (2) The transfer or acquisition is treated as occurring at that time.
> (3) For this purpose a conditional agreement is taken to be made when the condition is met.

This is a Plain English rewrite of the CGT rules.[9]

29.9 "Profit"

Section 439 ITTOIA provides:

> (1) A person's profit on a disposal is the amount by which
> [a] the amount payable on the disposal exceeds
> [b] the amount paid by the person to acquire the security.
> (2) No account is to be taken of any incidental expenses incurred in connection with the disposal or acquisition.

I refer to this profit as **"DDS income"**.

29.9.1 *Deemed MV disposal*

Section 440 ITTOIA provides:

> (1) On the disposal of a deeply discounted security by a transfer of a kind specified in subsection (2), for the purposes of this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] an amount equal to the market value[10] at the time of the disposal is treated as payable.
> (2) The transfers are—
> (a) a transfer made otherwise than by a bargain at arm's length,
> (b) a transfer between connected persons,
> (c) a transfer for a consideration which is not wholly in money or money's worth,
> (d) a transfer treated as made by section 437(3) (death), and
> (e) a transfer by personal representatives to a legatee.[11]

[9] See 56.10 (Date of disposal/acquisition).

[10] CGT valuation rules are incorporated by reference: s.460(3) ITTOIA.

[11] The definition of legatee in s.440(6)(7) is a Plain English rewrite of the CGT definition; see 88.7.2 ("Legatee").

Items (a) and (b) are the same as the CGT market value rule[12] but the rest of the list is different.

I refer to the profit on a disposal within this section as "**deemed DDS income**".

29.9.2 *Deemed MV acquisition*

Section 441 ITTOIA provides:

> (1) A person who acquires a deeply discounted security on a disposal of a kind specified in subsection (2) is treated for the purposes of this Chapter as acquiring it by the payment of an amount equal to its market value at the time of the disposal.
> (2) The disposals are—
> (a) a transfer within section 440(2)...[13]

What is the position if a security is issued for no consideration or at an undervalue? One would expect a market value acquisition cost, for the purpose of computing the holder's profit on a disposal; though it needs a purposive construction to reach a sensible conclusion.

29.10 Charge to tax on DDS income

Sections 427 and 428 ITTOIA impose the charge:

> **427 Charge to tax on profits from deeply discounted securities**
> (1) Income tax is charged on profits on the disposal of deeply discounted securities.
> (2) The profits are treated as income for income tax purposes if they would not otherwise be income.
> **428 Income charged**
> (1) Tax is charged under this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] on the full amount of profits arising in the tax year.
> (2) The profits on a disposal are to be taken to arise when the disposal occurs.
> **429 Person liable**
> (1) The person liable for any tax charged under this Chapter is the person making the disposal.

29.11 DDS remittance basis

Section 428(3) ITTOIA provides:

[12] See App 4.8 (CGT market value rule).

[13] Section 441 also deals with conversions but conversions are not discussed here.

> If the profits arise on a disposal of securities that are outside the UK—
> (a) they are treated for the purposes of section 830 (meaning of "relevant foreign income") as arising from a source outside the UK,[14] and
> (b) subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis for a DDS that is outside the UK.

The section uses the words "treated as" because it may be said that DDS income does not have a source, at least in the normal UK tax sense.[15]

How does one decide whether a security is "outside the UK"? The wording is from the former schedule D case III.[16]

In the HMRC view the test is the residence of the issuer. The former Inspectors Manual para 1541 provided:

> Where the security was issued by a UK resident any profit is assessable under Case III of Schedule D. Where the security was issued by a non-UK resident, any profit is assessable under Case IV of Schedule D.

This is not obviously right, but it is as good a test as any other and (in relation to a non-resident issuer) at least we should know where we stand.[17] This passage is omitted in the SAIM but there is no indication that HMRC practice has changed.

This approach is consistent with the rule that interest from a security with a non-resident issuer is (at least generally) regarded as non-UK source income.[18] This will usually come to the same thing and I doubt if the point will ever need to be decided.[19]

[14] For this wording, see 16.6 (No source/deemed source).

[15] See 16.6 (Income without a source).

[16] See 26.10 (The situs approach).

[17] The position should not change if the issuer changes residence is less clear, by analogy with the *Bank of Greece* case: see 26.10.3 (*Bank of Greece*).

[18] See 26.15 (Source of interest: conclusion). Because the rules concerning the location of the source of interest are so unclear, it is impossible to say in what (if any) circumstances the source of the income might be different from the residence of the issuer.

This would be consistent with the AIP scheme, where the test is whether income from the security has a foreign source: see 28.9 (AIP remittance basis). However, the two cases are not the same, because a DDS may not yield any income, so the question whether income from the DDS has a foreign source could be a hypothetical question.

[19] If it mattered, the view that income source was the test should be rejected, for if the drafter intended to apply an income-source test, one would have expected the wording

For completeness: another possible approach is that "outside the UK" means situated outside the UK applying common law situs rules. This view is less attractive since (1) common law situs do not always produce a sensible result; (2) common law situs is not generally relevant for IT; (3) one would have expected the drafter to use the word "situate" if it was intended to incorporate a situs rule.

Strictly, one cannot segregate income from capital (for no identifiable part of the proceeds represents the income). But since HMRC do not apply that rule for the accrued income scheme,[20] they should logically not take the point in this context either. There is however no discussion in the RDR Manual.

Deemed DDS income (eg on a gift) cannot be remitted and so is tax free.[21]

29.12 UK resident trust

29.12.1 *UK trust not settlor-interested*

A UK resident trust is in principle subject to income tax on its DDS income. Tax is charged at the trust rate.[22]

29.12.2 *UK settlor-interested trust*

DDS income accruing to UK trustees is not "income" in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However s.427(2) ITTOIA directs that the profits are "treated as income for income tax purposes" so it does fall within s.624 ITTOIA. For good measure, s.457 ITTOIA provides:

> (1) This section applies if profits are taken to arise on a disposal of a deeply discounted security by trustees.
> (2) For the purposes of Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), the profits are to be taken to be income arising under the settlement from the security. ...

Thus DDS income does fall within the settlor-interested trust code.

If the settlor is a remittance basis taxpayer the s.624 remittance basis is

to match that used elsewhere for income-source tests. The wording is not very far from the former case IV in s.18 ICTA 1988 ("income arising from securities out of the UK") but there the words "out of the UK" govern "arising" and not "securities".

[20] See 28.9 (AIP remittance basis).

[21] The CGT rule does not apply here; see 18.45 (Gain on disposal at undervalue).

[22] See 41.2.3 (Trust-rate income).

available, ie the settlor is not taxed on unremitted foreign DDS income.[23]

The rate of tax in the absence of s.624 is the trust rate, ie the top rate, so s.624 can only reduce the tax rate (or make no difference).

29.13 Non-resident individual

Section 368 ITTOIA provides the necessary exemption for non-residents.[24] In short non-resident individuals are not chargeable if the security is out of the UK. They are theoretically chargeable if the security is in the UK but non-resident IT relief is usually available.[25]

29.14 Non-resident trust

In the absence of express provision, non-resident trustees would not be charged on foreign DDS income but could be charged on UK DDS income. However s.458(1) ITTOIA provides:

> Tax is not charged under this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] if the disposal is made by the trustees of a settlement[26] and they are non-UK resident.

So non-resident trusts are not subject to tax on DDS, whether UK or foreign.

It is considered that s.624 applies to non-resident settlor-interested trusts as it applies to UK resident trusts. Section 458 does not provide relief since the charge on settlor-interested trusts is not a charge "under this Chapter".

29.15 Transfer of assets abroad

A DDS profit accruing to a non-resident is not "income" so in the absence of express provision it would not fall within the ToA provisions even if it accrued to a person abroad within s.720 or 731. However s.427(2) ITTOIA directs that the profits are "treated as income for income tax purposes" so it does fall within the ToA provisions. For good measure, s.459 ITTOIA provides:

[23] See 47.8 (s.624 remittance basis).

[24] See 16.2 (Source: IT territorial limit).

[25] See 45.1 (Non-residents IT relief: Introduction).

[26] "Settlement" here means settlement-arrangement: see s.458(3) which provides:
"In this section 'settlement' has the same meaning as in Chapter 5 of Part 5 (see section 620)."

> (1) This section applies if profits are taken to arise on the disposal of a deeply discounted security by a person resident or domiciled outside the UK ("A").
> (2) For the purpose of determining whether a UK resident individual is liable for income tax in respect of the profits, Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) has effect as if the profits, when arising, constituted income becoming payable to A.
> (3) For this purpose it does not matter if A is not liable to income tax under this Chapter [Chapter 8 Part 4 ITTOIA, DDS code] because of section 458 (non-UK resident trustees).

Thus DDS profits do fall within the scope of the ToA provisions.

29.15.1 *s.731 ITA*

The charge is on the actual profit, not a fictional profit. The proceeds of the disposal represent that profit.

How does the rule that distributed income is not relevant income[27] operate in this context? Is it necessary merely to distribute an amount equal to the DDS profit or is it necessary to distribute the entire proceeds of the transfer (sale) of the security? The matter is analogous to the CGT issue which arose when a UK resident foreign domiciled beneficiary sold a non-UK situate asset and realised a chargeable gain. Prior to the 2008 mixed fund rule, if the individual remitted (say) one-half of the proceeds of sale, their were regarded as remitting one-half of the gain.

Inspectors Manual para 1567 explained:

> This is because, whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The same reasoning would apply here. Thus the only way to avoid relevant income by distribution would be to distribute the entire proceeds of an arm's length disposal. It is conceivable that HMRC will not apply the law on this point strictly, but do not rely on this without clearance.

If there are only fictional profits, because the market value rule applies[28] then s.731 does not apply because fictional income cannot be used to

[27] See 50.29 (Income distributed as income in year it arises) to 50.27 (Distributed income: HMRC view).

[28] See 29.9 ("Profit").

benefit a beneficiary, so it cannot be relevant income.

29.16 Non-resident company

Section 368 ITTOIA provides the necessary exemption for non-residents.[29] In short, they are not chargeable if the security is outside the UK. They are theoretically chargeable if the security is in the UK, but see 45.1 (Non-resident IT relief). The company DDS income is within the scope of the ToA provisions.

29.17 Interaction with CGT

29.17.1 *DDS is a QCB*

Section 117(1) TCGA provides the usual definition of corporate bond. Section 117(2AA) provides:

> For the purposes of this section "corporate bond" also includes any asset
> [i] which is not included in the definition in subsection (1) above and
> [ii] which is a deeply discounted security for the purposes of Chapter 8 of Part 4 of ITTOIA 2005 (see section 430).

Thus a DDS is a corporate bond.

Section 117(7) TCGA defines "qualifying" corporate bond as (in short) any corporate bond issued after 13 March 1984.

Thus (in short) a DDS is in principle a qualifying corporate bond ("QCB").

29.17.2 *Significance of QCB status*

Section 115(1) TCGA provides exemption for QCBs:

> A gain which accrues on the disposal by any person of—
> (a) gilt-edged securities or qualifying corporate bonds, or
> (b) any option or contract to acquire or dispose of gilt-edged securities or qualifying corporate bonds,
> shall not be a chargeable gain.

The DDS profit is subject to income tax, and so would not be subject to CGT in any event. One consequence of QCB status is that a loss on a DDS is not an allowable loss for CGT purposes. QCB status is also relevant for conversions/reorganisation relief (not discussed here).

[29] See 16.2 (Source: IT territorial limit).

29.18 DDS/CGT compared

Although the DDS code occasionally adopts CGT-type rules, there are many differences, in particular:

(1) Expenses of acquisition/disposal are disallowed.

(2) Death, and transfer from PR to legatee, are occasions of charge.

(3) There is no group relief so an inter-group transfer may give rise to a charge.

CHAPTER THIRTY

DIVIDEND INCOME

30.1 Dividends and distributions
30.2 Dividends a separate source
30.3 UK dividend regime
30.3.1 The charge to IT
30.3.2 Dividend of capital nature

Cross references

The following topics are considered elsewhere:
10.3.1 (Split year: Pt 4/5 ITTOIA Income)
11.11 (TNR dividend code)
15.6 (When are dividends recognised)
43.5.7; 43.10 (Dividend rates)
55.1 (Transactions in securities)

30.1 Dividends and distributions

A full discussion of the taxation of dividends and distributions needs a book to itself. This chapter focuses on matters closest to the themes of this book.

The taxation of dividends/distributions is scattered across 3 Chapters of ITTOIA:

My term	Type of income	Company	ITTOIA
UK dividend regime	Dividend/distribution	UK resident	Chap 3 Pt 4
Offshore dividend regime	(a) Dividend	Non-resident	Chap 4 Pt 4
	(b) Income-distribution	Non-resident	Chap 8 Pt 5

Unfortunately there are (at least) *five* definitions of dividend/distribution! Each set of provisions discussed here has a distinct definition, with CT (not discussed here) different again. The definition of distribution for company law purposes is different from the tax definitions. I have considered devising distinct terminology, but it is clearest to follow the statutory terminology – as long as one bears in mind that dividend/ distribution have distinct meanings in each context.

Where appropriate I abbreviate dividend/distribution to dividends, leaving distribution to be understood. There are distinctions here, but in general commercial use the two terms are used interchangeably.

I do not discuss the corporation tax treatment of dividends received by UK resident companies.

30.2 Dividends a separate source

Dividend income received by a shareholder is not the same income as that of the company. In *Barnes v Hely-Hutchinson*:[1]

> The English company is taxed on the balance of its profits or gains, that is on its income; the shareholder is taxed on his own income. The shareholder is never taxed on the company's fund of profits, but only on the dividend which comes to him in payment of the debt which is created when the company declares the dividend. The tax is in every case on the individual's income, not on a fund possessed by another person, the company, even though it is the fund of profits of that company, from which the individual's income or part of it will be paid ... The fund which is taxed in the hands of the company and the dividend which is declared by the company in favour of the shareholder are separate items for taxation law. It is only the latter which is the shareholder's income.

In *Vestey v IRC*:[2]

> The income of the company and the income derived from the company by the shareholders are two quite different incomes.

30.3 UK dividend regime

30.3.1 *The charge to IT*

Section 383(1) ITTOIA imposes the charge:

> Income tax is charged on dividends and other distributions of a UK resident company.

It does not matter whether the receipt is a dividend or "other distribution"; hence I refer to "dividends/distributions".

Section 384(1) ITTOIA provides:

[1] 22 TC 655 at p.676.

[2] 54 TC 503 at p.562. Likewise *Canadian Eagle Oil v The King* 27 TC 205 at p.257: "for the purposes of Income Tax, the income of a foreign company and the income received from it in dividends by its British shareholders are not to any extent or effect one and the same income, but are two distinct incomes".
Likewise *Anson v HMRC* [2015] UKSC 44 at [92]:
"A dividend is a paradigm case of income which does not have the same source, under UK or US tax law, as the profits out of which it is paid"
See too 107.4 (Co/shareholder double taxation).

> Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year. ...

There is no reference to the remittance basis rules in Part 8 ITTOIA, so dividends/distributions from UK resident companies are taxed on the arising basis (even for remittance basis taxpayers). This is because dividends/distributions from UK resident companies are regarded as UK source income.[3]

For rates of tax, see 43.10 (Application of dividend rates).

30.3.2 *Dividend of capital nature*

Section 383 ITTOIA extends the charge to distributions of a capital nature, for instance, bonus issues of shares or securities, and purchase of own shares:

> (2) For income tax purposes such dividends and other distributions are to be treated as income.
> (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

30.4 "Distribution"

30.4.1 *Definition in outline*

In ordinary language, dividend and distribution are used synonymously,[4] but in tax the term distribution is defined. The tax definition is different from the definition which applies for company law purposes, though the differences do not usually matter.

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "distribution" has the meaning given by Chapters 2 to 5 of Part 23 of CTA 2010, disregarding section 1027A of that Act.

I refer to the CTA definition as the "standard tax definition". It is a wide and artificial definition. A full discussion would need a long chapter. I only attempt an outline here. I do not consider the special rules for Building Societies.

[3] For the source of dividend income, see 30.8.1 (Dividend: IT charge).

[4] This is self-evident, but if authority is needed, see *Beard v HMRC* [2022] UKFTT 129 (TC) at [198].

The starting point is s.1000(1) CTA 2010 which provides:

> In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs.

There are 8 paragraphs, numbered A to H:

Para	**Topic**
A	Dividends
B	Other distributions
C, D	Issue of securities
E, F	Interest
G	Transfer of assets/liabilities
H	Bonus issue & repayment

Clipperton v HMRC[5] described the purpose of the distributions code:

> to tax shareholders on value which a company delivers to them out of its assets, directly or indirectly, by some non-prescribed means.

It is helpful first to deal with the definitions used in s.1000.

30.5 "In respect of shares/securities"

These expressions are used in para B (other distributions) and elsewhere. The legislation gives commonsense definitions:

s.1113 CTA 2010: in respect of shares	**s.1114: in respect of securities**
(3) For the purposes of this Part a thing is regarded as done in respect of a share if it is done to a person—	(4) For the purposes of this Part a thing is regarded as done in respect of a security if it is done to a person—
(a) as the holder of the share, or (b) as the person who held the share at a particular time.	(a) as the holder of the security, or (b) as the person who held the security at a particular time.
(4) For the purposes of this Part a thing is also regarded as done in respect of a share if it is done in pursuance of a right granted, or an offer made, in respect of a share.	(5) For the purposes of this Part a thing is also regarded as done in respect of a security if it is done in pursuance of a right granted, or an offer made, in respect of a security.

Section 1117 CTA 2010 provides:

[5] [2022] UKUT 351 (TCC) at [58].

s.1117(7): in respect of shares	**s.1117(8): in respect of securities**
For the purposes of this Part, if something done in respect of shares is done by reference to share holdings at a particular time, it is regarded as done—	(8) For the purposes of this Part, if something done in respect of securities is done by reference to holdings of securities at a particular time, it is regarded as done—
(a) to the then holders of the shares, or (b) to the personal representatives of any holder then dead.	(a) to the then holders of the securities, or (b) to the personal representatives of any holder then dead.

In *Clipperton v HMRC*:[6]

> the requirement for a distribution out of assets to be "in respect of shares" refers to a situation where the relevant asset or value is put into the hands of a shareholder in [the shareholder's] capacity as such, in effect, as a return on or by reference to [the shareholder's] shareholding as an investment in the company, and not in some other capacity and for some other reason.

The textbook *Taxation of Companies & Company Reconstructions* provides:[7]

> even a benefit conferred by a company on a non-shareholder may be "in respect of shares" if it is conferred at the request or wishes of a shareholder. A presumption to this effect may arise if, for example, an asset is transferred to an associate of a member and there is no apparent commercial reason for the transfer other than that person's connection with the shareholder.

There is a multi-factorial test. In *HMRC v Conran*:[8]

> ... the issue will inevitably call for an assessment of all the facts and circumstances.
> That exercise, of looking at the whole picture, would tend to point against the sort of analysis which singles out a particular factor as determinative. As well as the labelling of the payment by the party being inconclusive ... other features which cannot necessarily be assumed to be determinative will include the legal nature of the transaction by

[6] [2022] UKUT 351 (TCC) at [58].

[7] Paragraph E1.2.6) [footnotes omitted].

[8] [2023] UKUT 166 (TCC) at [101]

which the sum is delivered to the recipient, or the means, if different, by which the sum (said to give rise to the distribution) emerges from the relevant company.

30.5.1 *Groups*

Section 1113 CTA 2010 also deals with groups:

s.1113 CTA 2010: in respect of shares	**s.1114: in respect of securities**
(1) In this Part [Part 23 Company Distributions] "in respect of shares in the company", in relation to a company which is a member of a 90% group,[9] means	(1) In this Part "in respect of securities of the company", in relation to a company which is a member of a 90% group, means
in respect of shares in— (a) that company, or (b) any other company in the group	in respect of securities of— (a) that company, or (b) any other company in the group.
(2) Nothing in subsection (1) requires a company to be treated as making a distribution to any company which is in the same group and is UK resident.	[Identical]

30.5.2 *"New consideration"*

New consideration matters for:
(1) Para B (other distributions); and
(2) Para C/D: issue of securities

New consideration is elaborately defined in s.1115 CTA 2010:

> (1) In this Part, unless the context otherwise requires—
> (a) "new consideration" means consideration not provided (directly or indirectly) out of assets of the company, and
> (b) in particular, "new consideration" does not include amounts retained by the company by way of capitalising a distribution.
> But paragraph (a) is subject to the other subsections of this section.
> (2) Subsection (3) applies if—

[9] Defined s.1113(6)/1114(6): "In this section "90% group" means a company and all its 90% subsidiaries."

(a) share capital has been issued at a premium representing new consideration, and
(b) any part ("the applied part") of that premium is afterwards applied in paying up share capital.

(3) The applied part of the premium is also treated as new consideration for that share capital.

But the premium is not so treated so far as it has been taken into account under section 1025(2) so as to enable a distribution to be treated as a repayment of share capital.

(4) The general rule is that no consideration derived from the value of any share capital or security of a company, or from voting or other rights in a company, is to be treated for the purposes of this Part as new consideration.

(5) The general rule in subsection (4) applies unless the consideration consists of—

(a) money or value received from the company as a non-CD distribution,
(b) money received from the company as a payment which for the purposes of this Part constitutes a repayment of the share capital in question, or of the principal secured by the security in question, or
(c) the giving up of the right to the share capital or security on its cancellation, extinguishment or acquisition by the company.

This is subject to subsection (6).

(6) No amount is regarded as new consideration by virtue of subsection (5)(b) or (c) so far as it exceeds—

(a) any new consideration received by the company for the issue of the share capital or security in question, or
(b) in the case of share capital which constituted a non-CD distribution on issue, the nominal value of that share capital.

(7) In this section "non-CD distribution" means any distribution other than one which is a distribution for the purposes of the Corporation Tax Acts only because it falls within paragraph C or D in section 1000(1) (redeemable share capital or security issued as bonus in respect of shares in, or securities of, the company).

30.5.3 *Out of assets*

Section 1117(4) CTA 2010 provides:

For the purposes of this Part consideration is treated as provided out of assets of a company if the cost falls on the company.

30.5.4 *Shares*

Section 1117 CTA 2010 provides:

> (1) In this Part, except where the context otherwise requires—
> "share" includes stock, and any other interest of a member in a company.
> (5) References in this Part to issuing share capital as paid up also apply to the paying up of any issued share capital.

30.5.5 *"Securities"*

On the meaning of "security" see App. 2.13 (Security: 5 statutory definitions).

A money debt which is not a security is effectively deemed to be a security. Section 1114(3) CTA 2010 provides:

> For the purposes of this Part, except where the context otherwise requires—
> (a) interest paid by a company on money advanced without the issue of a security for the advance, or
> (b) other consideration given by a company for the use of money so advanced,
> is treated as if paid, or given, in respect of a security issued for the advance by the company.

Section 1117(6) CTA 2010 provides:

> If securities—
> (a) are issued at a price less than the amount repayable on them, and
> (b) are not listed on a recognised stock exchange,[10]
> then, for the purposes of this Part the principal secured is not taken to exceed the issue price, unless the securities are issued on terms reasonably comparable with the terms of issue of securities listed on a recognised stock exchange.

30.6 Definition of distribution

30.6.1 *Para A: Dividends*

Armed with these definitions we can turn to the definition of distribution.

Section 1000(1) CTA 2010 provides:

[10] See App 2.18 (Listed/Recognised stock exchange).

> In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs.
> A Any dividend paid by the company, including a capital dividend.

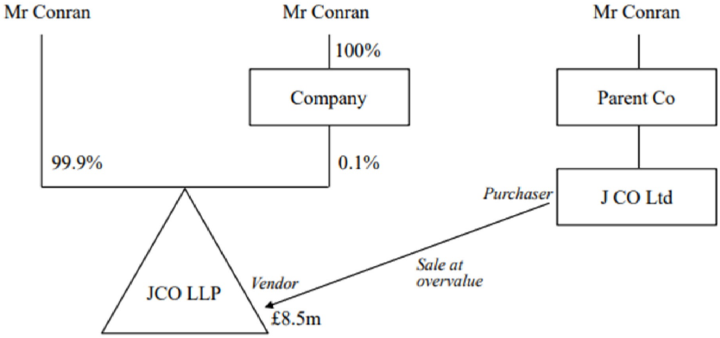
On the meaning of dividend, see 30.8.3 (Definition of "dividend"). But the point does not usually arise, since something which is not a dividend under para A may fall within para B.

30.6.2 *Para B: Other distributions*

Section 1000(1) CTA 2010 provides:

> In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs...
> B Any other distribution out of assets of the company in respect of shares in the company,

"Distribution" in para B[1] presumably has its company law meaning. In *HMRC v Conran*[11] the structure was as follows:



JCO Ltd purchased an asset from JCO LLP at an overvalue. The asset was sold for £8.5m but was found to be worth £1. So £8.5m of value passed from the company to Mr Conran. This was a distribution under para B. The FTT held that the payment was made to the taxpayer in his capacity as partner of JCO LLC and not as shareholder (so the payment was not "in respect of shares"). The UT held the payment was made to him as (indirect) shareholder and not as partner (so it was "in respect of shares"). I would have thought the correct answer was that it was both: it

[11] [2023] UKUT 166 (TCC).

was a payment to Mr Conran as partner *and* as (indirect) shareholder: the two are consistent. But the important point is whether the payment was in respect of shares, and it was:[12]

> (1) A basic point was to step back and recognise Mr Conran's ultimate ownership of the various entities. In relation to the selling LLP, JCO, Mr Conran was a member of the LLP and owner of the other member (JCE). In relation to the purchaser and paying entity JCV Ltd. Mr Conran was also shareholder and sole director. Mr Conran was thus wearing many different hats. HMRC are right to say the taxpayer's case requires him to say that he had no regard to himself as ultimate owner of JCV Ltd when agreeing a price that might have turned out to be excessive.
> (2) There was also no evidence that the OPLA business was offered to anyone other than entities owned and controlled by Mr Conran. In other words Mr Conran was simply moving his assets/ cash around wholly controlled vehicles.

It made no difference that Mr Conran was not an indirect and not a direct shareholder of JCV Ltd.

30.6.3 *Para B: Exceptions*

Para B sets out two exceptions ("Exception B(a) and B(b)"):

> except however much (if any) of the distribution—
> (a) represents repayment of capital on the shares or
> (b) is (when it is made) equal in amount or value to any new consideration received by the company for the distribution.
> For the purposes of this paragraph it does not matter whether the distribution is in cash or not.

Something within exemption B(a) is also not an income-distribution chargeable to IT under s.687.

HMRC comment in relation to this exemption:

> **What is the capital on the shares?**
> For companies incorporated in the UK under the Companies Act 2006 or its predecessors, this will usually comprise nominal share capital. In addition, where shares are issued at a premium Part 23 CTA 2010 (see section 1025), consistently with section 610(4) Companies Act 2006, makes it clear that share premium is treated as part of the share capital

[12] at [112].

for this purpose. Amounts subscribed for share capital or paid as share premium will be treated as "capital on the shares".

For companies that do not have share capital, for example, companies limited by guarantee, Part 23 CTA 2010 extends the definition of share to include stock or any other interest of a member of the company.

For foreign companies, it may be less clear what capital on the shares consists of. The facts may vary between cases, but HMRC would normally expect to treat as a distribution an amount that:

- is distributable in accordance with the relevant company law, and
- is not made on winding up or as part of a procedure under the relevant company law for reducing share capital.

This is subject to section 1027A CTA 2010 which for the purposes of determining whether an amount is a repayment of capital on the shares, treats a distribution out of a reserve arising from a reduction of share capital as if it were made out of profits available for distribution otherwise than by virtue of the reduction. This will depend on whether section 1027A(4) applies or not to the reduction of share capital.

With regard to application of section 1025 CTA 2010, which treats a repayment of share premium as forming part of the share capital where the premium account was created in respect of new consideration received on the issue of the share capital, HMRC will normally, depending on application of the foreign company law, not treat a payment of out of a share premium account as a repayment of share capital in circumstances where under the foreign company law share premium is fully distributable and is not treated as forming part of the share capital.

30.6.4 *Para C/D: Issue of securities*

Section 1000(1) CTA 2010 provides:

> In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs...

Para C: redeemable share capital	**Para D: security**
C Any redeemable share capital issued by the company—	D Any security issued by the company—
(a) in respect of shares in, or securities of, the company, and (b) otherwise than for new consideration (see sections 1003 and 1115).	(a) in respect of shares in, or securities of, the company, and (b) otherwise than for new consideration (see sections 1004 and 1115).

30.6.5 *Para E/F: Interest*

Section 1000(1) CTA 2010 provides:

> In the Corporation Tax Acts “distribution”, in relation to any company, means anything falling within any of the following paragraphs...

Para E: Non-commercial securities	**Para F: Special securities**
E Any interest or other distribution out of assets of the company in respect of securities of the company which are non-commercial securities (as defined in section 1005), except—	F Any interest or other distribution out of assets of the company in respect of securities of the company which are special securities (as defined in section 1015), except—
(a) however much (if any) of the distribution represents the principal secured by the securities, and (b) however much (if any) of the distribution represents a reasonable commercial return for the use of the principal.	(a) however much (if any) of the distribution represents the principal secured by the securities, and (b) however much (if any) of the distribution falls within paragraph E.

I do not pursue the definition of non-commercial/special securities. Non-commercial securities are, broadly, those carrying more than a reasonable commercial return. In *Shinelock v HMRC*:[13]

> the purpose of paragraph F, its purpose is (broadly) to deny treatment as a deductible borrowing cost for payments which are in substance a distribution of profit. It is, to that extent, an example of a dividing line between returns on debt and returns on equity. Its concern is not with whether a payment represents a reasonable return, but with whether it depends on the profits or results of the company’s business. If it does so depend, then the entire amount is treated as a distribution. To take a straightforward example, if a reasonable commercial return on a security was 10%, but that 10% return was expressed to be contingent on the availability of distributable reserves, or the profitability of part of the business, then the entirety of the payment would fall within paragraph F, whereas on [the taxpayer’s] construction it would fall entirely outside the distribution provisions. We therefore reject this argument.

[13] [2023] UKUT 107 (TCC) at [89].

30.6.6 *Para G: Transfer of assets/liabilities*

Section 1000(1) CTA 2010 provides:

> In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs...
> G Any amount treated as a distribution by section 1020 (transfers of assets or liabilities).

That takes us to s.1020 CTA 2010:

> (1) This section applies if on a transfer of assets or liabilities—
> (a) by a company to its members, or
> (b) to a company by its members,
> the amount or value of the benefit received by a member exceeds the amount or value of any new consideration given by the member.
> (2) The company is treated for the purposes of the Corporation Tax Acts as making a distribution to the member of an amount equal to the excess.
> (2A) But the company is not treated as making a distribution under subsection (2) if the transfer of assets or liabilities—
> (a) is a distribution by virtue of paragraph B in section 1000(1), or
> (b) would be such a distribution in the absence of sub-paragraph (a) of that paragraph (distribution representing repayment of capital on the shares).
> (3) For the purposes of subsection (1) the amount or value of a benefit, or of any consideration, is determined in accordance with the market value.

30.6.7 *Para H: Bonus issue & repayment*

Section 1000(1) CTA 2010 provides:

> In the Corporation Tax Acts "distribution", in relation to any company, means anything falling within any of the following paragraphs...
> H Any amount treated as a distribution by section 1022 (bonus issues following repayment of share capital).

That takes us to s.1022 CTA 2010:

> (1) Subsection (3) applies if a company—
> (a) repays or has repaid any share capital, and
> (b) at or after the time of the repayment issues any share capital as paid up otherwise than by the receipt of new consideration.
> (2) But subsection (3) does not apply so far as any provision of the Corporation Tax Acts makes contrary provision.

> (3) The amount paid up as mentioned in subsection (1)(b) is treated for the purposes of the Corporation Tax Acts as a distribution made in respect of the shares on which it is paid up, except so far as that amount exceeds the adjusted amount of the repaid share capital.
> (4) The reference in subsection (3) to the adjusted amount of the repaid share capital is to—
> (a) the amount, or total amount, of share capital repaid as mentioned in subsection (1)(a), minus
> (b) any amounts previously paid up as mentioned in subsection (1)(b) and treated as distributions by virtue of subsection (3).

Section 1023 CTA 2010 sets out a number of exceptions not discussed here.

30.7 Non-resident recipient

Section 399 ITTOIA provides:

> (1) This section applies if—
> (a) a person's income for a tax year includes a distribution of a company, and
> (b) the person is non-UK resident.
> (2) The person is treated as having paid income tax at the dividend ordinary rate on the amount or value of the distribution.
> (6) The income tax treated as paid under subsection (2) is not repayable.

Does s.399 apply if a distribution is received by a person abroad, within the scope of s.720 ITA?

The non-resident recipient should be entitled to credit relief, ie to set the UK IT which is treated as paid against foreign tax in the person's country of residence. But that is a matter for the foreign tax law to determine.

Section 399 does not apply to income of a split year, even if it arises in the overseas part of the year.

Does s.399 apply to foreign source distributions? Presumably not.

30.8 Offshore dividend regime

30.8.1 *Dividend: IT charge*

Section 402(1) ITTOIA imposes a charge to tax on dividends from non-resident companies:

> Income tax is charged on dividends of a non-UK resident company.

Section 403(1) ITTOIA provides:

> Tax is charged under this Chapter on the amount of the dividends arising in the tax year.
>
> (2) Subsection (1) is subject to
>
> [a] section 406(2) and (3) (later charge where cash dividends retained in SIPs are paid over),
>
> [b] section 407(3) (dividend payment when dividend shares cease to be subject to SIP), and,
>
> [c] Part 8 (foreign income: special rules).

Section 403(2)[c] ITTOIA incorporates the remittance basis for foreign source dividends.

30.8.2 *Location of source of dividend*

When do dividends have a foreign source? There are many possible connecting factors, but *Bradbury v English Sewing Cotton*[14] decided that the source of income from shares is situated in the place where the company is resident – not where it is incorporated or where the share register is kept.[15]

Thus the application of a DTA (which affects company residence) may also affect the location of a source. EN ITTOIA discusses the point in relation to OEICs:

> 50. The definition of an open-ended investment company ... carries a limitation that the company should be incorporated in the UK[16] ... All open-ended investment companies within the definition ... are therefore subject to the company residence rule [the incorporation rule]. Open-ended investment company interest distributions treated as made by a UK resident company will be UK source income. [The company DTA residence rule] could in theory also apply to make such companies non-resident ...[17] In that case interest distributions made will be treated as dividends from non-resident companies.

30.8.3 *Definition of "dividend"*

The term "dividend" is (sensibly) undefined so it has its ordinary meaning,

[14] 8 TC 481.

[15] This illustrates how IT source rules may differ from IHT/private international law situs rules. Why a residence test for source? Given that the UK taxes the profits of a UK resident company before distribution, it seems consistent that residence should also determine the source of distributed profits.

[16] See 66.1.2 (Open-ended investment co).

[17] See too 26.17 (Co-operative & community benefit society income).

whatever that is. There is no definition in tax or company legislation. EN ITTOIA provides:

> 187. ... "Dividend" is a widely used and understood term and is defined only in very specific circumstances not applicable in this context... It is not thought appropriate to attempt to define "dividend" here. It will usually be a matter of referring to the relevant company law to determine whether or not a payment made by a company is a dividend.

In *HMRC v PA Holdings*:[18]

> A dividend is a payment-out of a part of the profits for a period in respect of a share in a company.

Beard v HMRC commented:[19]

> (1) The test is to be looked at from the perspective of the paying company.
> (2) The source of the payment is not determinative.
> (3) The labels applied by the paying company are not determinative.
> (4) The broad description of a dividend set out by Harman J in *Esso*[20] is a starting point for the definition of a dividend, providing "general words but not legislation"
> (5) Each case needs to be considered on its particular facts, including, as a relevant fact, whether the "dividend" in question is debited to a capital account.

Section 402(4) ITTOIA provides:

> In this Chapter [Chapter 4 Part 4, dividends from non-UK resident companies] "dividends" does not include dividends of a capital nature.

30.8.4 *Income-distribution: IT charge*

Section 402 only applies to dividends. Depending on how widely one understands the term "dividend", it is possible, or may be possible, to have a receipt from a non-resident company which:

[18] [2011] EWCA Civ 1414 at [46] citing *Esso Petroleum v Ministry of Defence* 62 TC 253 at p.255-6 and *Memec v IRC* 71 TC 77.

[19] [2022] UKFTT 129 (TC) at [187].

[20] *Esso Petroleum Co v Ministry of Defence* [1990] Ch 163 at p.165:
"In ordinary language today among people having some understanding of business a "dividend" refers to a payment out of part of the profits for a period in respect of a share in a company."

(1) is not a dividend and
(2) is of an income nature (not a capital receipt)

This is charged under s.687 ITTOIA (Misc Sweep-up Income).[21] I refer to that as an **"income-distribution"** as the receipt (though not a dividend) will be a distribution in the general sense of the word. (The terminology is not ideal, as a receipt which a distribution in the standard tax sense may not be an income-distribution, ie may be of a capital nature. But I cannot think of better terms.)

The remittance basis applies for foreign source income-distributions.[22] Income-distributions have a foreign source if the company is non-UK resident: the same test applies as for dividends.

Thus we have three distinct charging provisions for receipts from a company:

ITTOIA	**Company**	**Charge on**
s.383	UK resident	Dividends, distributions (in standard tax sense)
s.402	Non-resident	Dividends
s.687	Non-resident	Income-distributions (my term)

EN ITTOIA Vol. II explains why:

> 184. Income which, under the source legislation, is charged to tax under Schedule D Cases IV or V, has, where appropriate, been fully integrated with the equivalent income arising from a UK source. In the case of dividends from non-UK resident companies there is no exact equivalent in terms of UK source income. The closest equivalent is the charge to tax on dividends and other distributions from UK resident companies (section 20 of ICTA, Schedule F in the source legislation). But there is no precise overlap. The UK charge, by the adoption of the definition of "distribution"[23] ... can include dividends or distributions of a capital nature and can also operate to convert payments that would otherwise be treated as interest into distributions. Any charge on distributions from non-UK resident companies must be confined to income only. For this reason ... it is not thought appropriate to integrate the charges. So a separate charge is needed to cover dividends from non-UK resident companies. ...
>
> 186. ... It is possible that a non-UK resident company may make a

[21] See 33.1 (Misc Sweep-up Income).
[22] See 33.18 (Sweep-up income: Remittance basis).
[23] See 30.4 ("Distribution").

> distribution of income which would not fall within Chapter 4 of Part 4 of this Act because it is not a "dividend". But if the distribution comprises income it will fall to be dealt with either under alternative specific charges (eg interest) or within "income not otherwise charged", the charge on which appears in Chapter 8 of Part 5 of this Act.

For non-resident companies, it does not usually matter whether a receipt from a company is classified as

(1) a dividend, chargeable under s.402) or
(2) an income-distribution (my terminology), chargeable under s.687.

In either case the receipt is taxable if it is income and not capital in nature. But there is an important difference between UK companies and non-resident companies, because:

(1) for UK companies the charge is on "distributions" (in the standard tax sense which is very wide)
(2) for non-resident companies the charge is on dividends/income distributions (undefined). That is, for a non-resident company one can ignore the wide standard tax definition of "distribution".

30.9 Non-resident company: Income/capital

30.9.1 *Why income/capital matters*

It is no longer a universal truth that "Income tax is a tax on income"[24] but the principle still applies for the charges on non-resident companies:

(1) The charge on dividends excludes dividends of a capital nature.
(2) The charge on income-distributions applies only to "income"; this comes to the same thing: it excludes receipts of a capital nature.

The question then is how to distinguish income/capital. There is a large body of case law. The discussion here draws on the Law Commission Consultation Paper, "Capital and Income in Trusts".[25]

[24] See 14.5 (Income Tax: a tax on income?)

[25] *https://www.lawcom.gov.uk/project/capital-and-income-in-trusts-classification-and-apportionment/* (2004) part II. The subsequent report (Law Com 315, 2009) contains a shorter discussion. The report lead to the Trusts (Capital and Income) Act 2013 but this Act does not have much effect on the tax issues discussed here.
Scots trust law is discussed in Scot Law Com Discussion Paper No 124, *Apportionment of Trust Receipts and Outgoings* (2003) para 2.2-2.7
https://www.scotlawcom.gov.uk/files/4512/7816/0465/dp124_trust_receipts.pdf
It seems clear that the same principles apply in both jurisdictions.

After 1965, the income/capital distinction ceased to matter for the taxation of distributions from UK resident companies, because distributions of a capital nature were brought into the income tax charge.[26] (The distinction still matters for trust law). However pre-1965 tax cases relating to UK resident companies remain relevant to the classification of distributions from non-resident companies.

30.9.2 *Corpus intact*

This goes back to *IRC v Reid's Trustees*:

> I cannot imagine a safer or better [basis], where the question is as to income arising from a foreign possession, than to ask whether the corpus of the asset remains intact in the hands of the taxpayer. That question can, in the case of the shares here in question, only be answered in the affirmative. The shares the Respondents held before the distribution of dividend they still hold intact. The dividend they received was income arising out of those shares.
> ...the dividend cannot be capital because the Respondents' foreign possessions, the shares, remain intact and. therefore, the dividend must be income. It is admitted that if the money had been paid by way, of reduction of the share capital, that would not have been income; the shares would not have remained the same. It is also admitted that if the surplus profits had been used to create bonus shares, or even it may be bonus debentures, there would have been no receipt of income; new capital assets would have been created. But it is said that, so long as the capital asset abroad remains the same, anything received by the shareholder in this country must be income ...

This is just another version of trees and fruit.[27]

It would be best to avoid the Latin word "corpus" which is (I think) just another word for shares, share capital, or capital (as opposed to income).

30.9.3 *Trust law principles applied*

The income/capital issue first arose in a trust law context: if trustees hold shares on trust for A for life, and receive a distribution from a company, the distribution is payable to A if it is income, and not if it is capital.

Except where there are specific statutory rules, or specific terms in a trust

Discussion in trust law textbooks is also relevant here.

[26] See 30.3.2 (Dividend of capital nature).

[27] See 14.5.2 (Tree and fruit).

(which is not usual), the income/capital distinction is one of the general law. That is, UK tax law adopts UK trust law rules. Hence many of the cases are trust cases, not tax cases.

30.9.4 *Company-law background*

In UK company law, and in jurisdictions which follow UK law, the position is as follows.

(1) Profits of a company may be:
   (a) Income profits (eg trading income)
   (b) Capital profits (ie a gain on the sale of a capital asset)

(2) Both sorts of profit are available for distribution to shareholders; company law does not distinguish between income and capital profits.

(3) Company law does distinguish between:
   (a) share capital[28] (which can only be distributed in a winding up or by an authorised reduction of capital) and
   (b) undistributed profits.

(4) A company which makes a profit (whether an income or a capital profit) has various courses of action:
   (a) *Retention:* It may retain the profits (in accountancy terms, transferring profits to reserves). Since there is no distribution at all, no issue arises.
   (b) *Distribution:* It may distribute the profit to the company's shareholders in the form of a dividend.
   (c) *Capitalisation*: It may "capitalise" the profit by issuing shares to the shareholders (thus increasing the share capital of the company by the amount of profit capitalised).[29]
   (d) *Liquidation/reduction of share capital:* It may put the company into liquidation or (if authorised) reduce its share capital (making payments to shareholders accordingly)

(5) A shareholder has the right to participate in:

[28] See 90.55.4 ("Share capital").

[29] For company law reasons, this has to be done by a convoluted process:
(1) The company declares a dividend
(2) The company simultaneously resolves to apply the dividend in paying up shares which are then issued to shareholders.
This is necessary because a company cannot issue shares by way of gift. The dividend declared prior to paying up and issuing new share capital is regarded as consideration transferred from the shareholders to the company in return for the new shares.

(a) distributable profits while the company is a going concern
(b) the distribution of company assets in a liquidation
(c) a distribution to shareholders on a reduction of share capital[30]

30.9.5 *Company-law approach*

Bouch v Sproule[31] laid down the general rule for classifying receipts from companies as capital or income. The classification in trust law follows company law principles. Profits which are distributed by way of dividend are received as income. Shares allotted following capitalisation are received as capital:

> When a testator or settlor directs or permits the subject of his disposition to remain as stocks or shares in a company which has the power either of distributing its profits as dividend or of converting them into capital, and the company validly exercises this power, such exercise of its power is binding on all persons interested under the testator or settlor in the shares, and consequently what is paid by the company as dividend goes to the tenant for life, and what is paid by the company to the shareholder as capital, or appropriated as an increase of the capital stock of the concern, enures to the benefit of all who are interested in capital.[32]

I refer to this as the **"company-law approach"** to the capital/income distinction. It is commonly called "the rule in *Bouch v Sproule*".

The rule applies to distributions of any assets (not just money or shares).[33]

Courtaulds Investments v Fleming identified the shareholder rights set out in (5) above and summarised the law as follows:[34]

> Anything received under the first head [distributable profits while the company is a going concern] is treated by English law as income of the recipients for both tax purposes and trust purposes (but subject as to the latter to any special provision of the trust) notwithstanding that the source of the distribution may be a profit not of the company's business but on capital account...
>
> Anything received under the second head [liquidation] is treated by

[30] See s.829, 830 Companies Act 2005, and, for point (5), *Courtaulds Investments v Fleming* 46 TC 111 at p.124..

[31] (1885) 12 App Cas 385.

[32] at p.397-398.

[33] *Re Outen's Will Trusts* [1963] Ch 291.

[34] 46 TC 111 at p.124.

> English law as capital both for tax purposes and, subject as aforesaid, for trust purposes. So also is anything received under the third head [reduction of share capital].

In *Hill v Permanent Trustee Company of New South Wales:*

(1) A farming company sold almost all of its land, livestock and other assets, and ceased to carry on business.
(2) Subsequently the company declared a dividend of its (capital) profits.

The dividend was income. *Hill* sets out an oft-cited summary of the rules:[35]

> (1) A limited company when it parts with money available for distribution among its shareholders is not concerned with the fate of those moneys in the hands of any shareholder. The company does not know and does not care whether a shareholder is a trustee of his shares or not. It is of no concern to a company which is parting with money to a shareholder whether that shareholder (if he is a trustee) will hold them as a trustee for A absolutely or as trustee for A for life only.
> (2) A limited company not in liquidation can make no payment by way of return of capital to its shareholders except as a step in an authorised reduction of capital. Any other payment made by it by means of which it parts with money to its shareholders must and can only be made by way of dividing profits. Whether the payment is called “dividend” or “bonus”, or by any other name, it still must remain a payment on division of profits.
> (3) Moneys so paid to a shareholder will (if he be a trustee) prima facie belong to the person beneficially entitled to the income of the trust estate. If such moneys or any part thereof are to be treated as part of the corpus of the trust estate there must be some provision in the trust deed which brings about that result. No statement by the company or its officers that moneys which are being paid away to shareholders out of profits are capital, or are to be treated as capital, can have any effect upon the rights of the beneficiaries under a trust instrument which comprises shares in the company.
> (4) Other considerations arise when a limited company with power to increase its capital and possessing a fund of undivided profits so deals with it that no part of it leaves the possession of the company, but the whole is applied in paying up new shares which are issued and allotted proportionately to the shareholders, who would have been entitled to receive the fund had it been, in fact, divided and paid away as dividend.

[35] [1930] AC 720 at p.730–732. Perhaps influenced by the fact that distribution had taken place immediately prior to liquidation, the court below had held that the dividend was a capital receipt.

(5) The result of such a dealing is obviously wholly different from the result of paying away the profits to shareholders. In the latter case the amount of cash distributed disappears on both sides of the company's balance sheet. It is lost to the company. The fund of undistributed profits which has been divided ceases to figure among the company's liabilities; the cash necessary to provide the dividend is raised and paid away, the company's assets being reduced by that amount. In the former case the assets of the company remain undiminished, but on the liabilities side of the balance sheet (although the total number remains unchanged) the item representing undivided profits disappears, its place being taken by a corresponding increase of liability in respect of issued share capital. In other words, moneys which had been capable of division by the company as profits among its shareholders have ceased for all time to be so divisible, and can never be paid to the shareholders except upon a reduction of capital or in a winding up. The fully paid shares representing them and received by the trustees are therefore received by them as corpus and not as income.[36]

Similarly, in *IRC v Reid's Trustees*:[37]

(1) The company realised capital gains on the sale of properties.
(2) The company distributed the capital gains by dividend.

The dividend was of an income nature.

> There are many ways in which a company can deal with its profits. If it adopts certain methods, the result is the creation of new capital assets. If it adopts other methods, the result is the receipt of income by its shareholders. In either case it is immaterial whether the profits were trading profits or capital profits...
> if a foreign company chooses to distribute its surplus profits as dividend, the nature and origin of those profits does not and cannot be made to affect the quality of the receipt for the purposes of income tax.[38]

30.9.6 *Form not substance*

In *Hill v Permanent Trustee Company of New South Wales*:[39]

> moneys paid in respect of shares in a limited company may be income or corpus of a settled share according to the procedure adopted, ie

[36] [1930] AC 720 at p.730–732.

[37] 30 TC 431 at p.446.

[38] 30 TC 431 at p.450. This is the first of the three categories identified in *Courtaulds Investments*. If further authority is needed, see *re Doughty* [1947] Ch 263.

[39] [1930] AC 720 at p.730–732.

> according as the moneys are paid by way of dividend before liquidation or are paid by way of surplus assets in a winding up

In *Rae v Lazard*:[40]

> In deciding whether a shareholder receives a distribution as capital or income our law goes by the form in which the distribution is made rather than by the substance of the transaction.

In *Beard v HMRC*:[41]

> the critical question which determines the character of a payment from a company to its shareholders is the mechanism by which the payment is made

In *Associated Insulation Products v Golder*: [42]

> It is for the company which proposes to make a distribution to decide whether or not the distribution is to take the form of a capital distribution or an income distribution and to translate its decision into action. Its decision so translated into action is conclusive. The action taken by the company, considered in relation to the surrounding circumstances, is the decisive matter.

It is necessary to decide whether a company has distributed profits or capitalised them by issuing shares. One might think that is always clear, but sometimes it is not. In *Bouche v Sproule:*

(1) For several years the company transferred profits to reserve.
(2) The company then issued partly paid up bonus shares to its shareholders of a value equivalent to that reserve. It did so by a roundabout route: it declared a dividend and a new issue of shares, giving the shareholders the option of taking the dividend in the form of cash or shares.[43]

The Court of Appeal considered that this procedure did not amount to capitalisation of profits. Although no rational shareholder would choose

[40] 41 TC 1 at p.26.

[41] [2022] UKFTT 129 (TC) at [245].

[42] Payment by issue of note; for the facts of this case see 15.5.12 (Payment by issue of note).

[43] This was done for company law reasons. It was necessary to declare a dividend because a company may not use its own funds to pay up its shares, or issue them by way of gift. Unless the dividend was declared, no consideration would be transferred from the shareholders to the company.

to receive the dividend in the form of cash there was in principle an option to do so. The House of Lords disagreed, concluding that the option was illusory and that the company's intention was to capitalise the profits. The outcome on the facts in *Bouch v Sproule* had regard to the substance of what the directors achieved by their resolutions, and was not illogical.

30.9.7 *Company statement*

A company's statement that a distribution is not to be treated as dividends or as income is irrelevant to the proper classification. The court looks to the intention of the company as manifested by its actions (i.e. resolutions) rather than its words.

In *Re Bates*[44] a company operated steam trawlers. It sold some of its vessels realising a capital gain (a company profit). It distributed these profits to shareholders as cash dividends and sent a circular to shareholders explaining that the payments were made out of capital and were not in the nature of a dividend or bonus upon the shares. The company's intention in making this statement was to protect the shareholders from liability for income tax. The dividend was income notwithstanding that the profits themselves were of a capital (rather than trading) nature.

In *Hill v Permanent Trustee Company of New South Wales*,[45] the company stated that:

> the dividend is being paid out of profits arising from the sale of breeding stock, being assets of the company not required for resale at a profit, and that is free of income tax.

What mattered was what the company showed "not by its statements, but by its acts".

In *Associated Insulation Products v Golder*:[46]

> any statement made by the company as regards the distribution is relevant and must be taken into account, though a statement which does not correspond with the reality of the distribution in fact made is of little, if any, value. The company may paint the picture but not decide that it is a masterpiece. The substance of the transaction is to be looked

[44] [1928] Ch 682.

[45] [1930] AC 720 at p.732.

[46] Payment by issue of note; for the facts of this case see 15.5.12 (Payment by issue of note).

at and its nature ascertained by the Court.

30.9.8 *Reduction in share value*

Reduction in share value is not relevant. In *IRC v Reid's Trustees*:

> This may seem a technical argument which neglects the real fact that the capital value of the Respondents' foreign asset has been reduced by the making of the payment. But a company can, and often does, reduce considerably the market value of its shares by paying a dividend out of accumulated trading profits, and there. can be no doubt that such a dividend would fall within Case V, if it came from a foreign company.[47]

Re Sechiari[48]is one of several cases arising from the nationalisation of transport in 1947:

(1) Tilling Ltd was obliged to sell its road transport interests in return for stock in the British Transport Commission.[49]

(2) The company distributed this stock to its shareholders as a capital profits dividend. As a result the value of Tilling shares fell from £6 to under £2.

Although the value of the shares fell by over 75% the distribution was held to be income.

30.9.9 *Exceptions*

There are exceptions or apparent exceptions to the rule that a dividend is income:

(1) A distribution will be treated as capital when the life tenant assented to the purchase of the original shares *as a capital investment* in the knowledge that the investment was motivated by the contemplated distribution.[50]

(2) When a distribution is made after the testator's death but relates to a transaction completed before the testator's death, income must be treated as accruing before death.[51]Accordingly the distribution of a dividend relating to a period which ended before the testator's death

[47] 30 TC 431 at 449.

[48] [1950] 1 All ER 417.

[49] The British Transport Commission was not a success and was in turn abolished in 1963.

[50] Re Maclaren's Settlement Trusts [1951] 2 All ER 414 (Harman J).

[51] Re Winder's Will Trust [1951] Ch 916.

should be treated as trust capital.

(3) A dividend in breach of company law is not income. Where a company purports to accumulate profits as capital although it has no power to increase its capital, such profits when distributed by way of dividend are received by trustee-shareholders as capital.[52]

(4) Similarly, a dividend to trustees is a capital receipt if the trustees act in breach of trust in procuring what would otherwise be an income distribution. *Hill* itself is an example.[53] In *Re Rudd's Will Trusts*[54]the trustees again held shares in Tilling Ltd. Following an announcement by the company, the trustees could have sold the trust's shareholding cum dividend, but they had not realised that the distribution of British Transport Stock would be income. The capital beneficiaries contended that this was a breach of trust and, as a result, that there should be an apportionment between the capital and income of the trust, but failed to show that the trustees ought to have sold the stock cum dividend.

30.9.10 *Issue of debenture/loan stock*

An issue of debenture stock, or unsecured loan stock, is capital.[55] This is

[52] Irving v Houston (1803) 4 Paton Sc App 521 (HL), distinguished in *Bouch v Sproule* on the basis that the company in the earlier case (the Bank of Scotland) had no power to increase its capital. See 15.9 (Income recognition: Breach of trust).

[53] *Hill v Permanent Trustee* [1933] NSWStRp 52.

[54] [1952] 1 All ER 254.

[55] *Re Outen* [1963] Ch 291. The probability of redemption of the stock was irrelevant provided that capitalisation had taken place. *IRC v Blott*, 8 TC 101; *Whitmore v IRC* 10 TC 645; *IRC v Fisher's Executors*, 10 TC 302; *IRC v Wright* 11 TC 181. The former Inspectors Manual provided:

> **1615. Dividend reinvestment plans** [Published: 9/95]
> Some foreign companies, particularly in North America and Australia, establish dividend reinvestment plans for their shareholders. Such plans can be structured in a number of different ways, some of which result in liability under Case V when a dividend is declared, and others which do not. At one extreme is the pure bonus issue, when a dividend is declared payable in shares with no option for the shareholder to take cash. Alternatively a company may arrange for cash dividends to be paid to a third party, typically a bank, which then applies the dividends in the purchase of additional company shares in the market on behalf of the shareholder. The first situation falls within the principle of IRC v Blott (8 TC 107) – see IM1612. The second gives rise to a Case V charge because the reinvestment in the company is regarded as a voluntary application of income which has already arisen to the shareholder.

so even if the period during which redemption is postponed is short so the issue is economically similar or identical to a distribution of income.[56]

30.9.11 *Role of foreign law*

Foreign law plays its usual role. It does not determine the capital/income issue. In *First Nationwide*:

> It will be noted that, under our approach and analysis, the categorisation under Cayman law of the share premium account as capital or profit is not relevant. Nor is it relevant whether Cayman law would treat a dividend paid out of the share premium account as income or capital in the hands of the recipient.

30.9.12 *Demerger*

In a direct demerger Company A distributes the shares of Company B in specie to its shareholders by way of dividend. These shares are received by shareholders as income, though s.2 Trusts (Capital and Income) Act 2013 alters the position if it applies.

In an indirect demerger:

(1) Company A transfers the shares in Company B to another holding company ("Company C").
(2) In consideration for this transfer of shares, Company C issues its own shares to the shareholders of Company A.

This arose in *Sinclair v Lee*/.[57] ICI wished to demerge its bioscience activities:

(1) ICE consolidated its bioscience activities into a wholly owned subsidiary company.
(2) ICI transferred the shares of this subsidiary company to a newly created holding company ("Zeneca").
(3) Zeneca then issued its own shares to ICI shareholders.

It was held that the Zeneca shares were received by the shareholders as capital. This avoided an absurd result.

> Between these two extremes lies a variety of situations, each of which must be considered by reference to their own facts to determine whether a Case V charge arises...

[56] *Commissioner of Income-Tax, Bengal v Mercantile Bank of India Ltd* [1936] AC 478.

[57] [1993] Ch 497.

30.9.13 *Scrip dividends*

Scrip dividends are dividends which offer shareholders the choice of being paid in the form of cash or shares. When a company declares a conventional scrip dividend each shareholder has the option to take the dividend in cash or in additional shares of equal value. Such dividends will almost always be treated as income in the hands of the shareholder whichever option is chosen.

The situation is more complicated when the company declares an "enhanced" scrip dividend. Enhanced scrip dividends give shareholders the option of taking the distribution either in cash or in additional shares of greater value than the cash alternative. If (unusually) the shareholder opts for cash the receipt will clearly be income under the rule in *Bouch v Sproule*. The position is more difficult if the shareholder takes the option of receiving shares. In the majority of cases, especially where (as is common practice) the company arranges for a third party to offer to purchase the new shares at market value to enable shareholders to realise their cash value immediately, the substance of the arrangement will be such that the shares will be received as income.

On occasion, the courts have retreated from the strict dichotomy of the general rule and ordered an apportionment of receipts from scrip dividends between income and capital. In *Re Malam*[58] the company resolved to increase its capital by the issue of new shares. The directors were empowered to offer new shares to existing shareholders in satisfaction of a dividend. The company declared a dividend. The company would have been able to meet its obligations to shareholders in cash. In respect of half the declared dividend shareholders were offered the option of shares or cash. The trustees accepted the allotment of shares.

It was held that the company intended to distribute its accumulated profits as a dividend and not to capitalise them. Prima facie the rule in *Bouch v Sproule* would demand that such receipts be treated as income. However following the distribution there had been a sharp fall in the value of the shares as a result of the distribution of the accumulated profits. The court decided that in these circumstances the tenant for life should only be entitled to a lien in respect of the amount of cash dividend foregone. The balance was attributable to capital. Stirling J proceeded on the basis that the shares had been bought partly by the cash dividend foregone and partly

[58] [1894] 3 Ch 578.

by the fall in the value of the original shares.

The classification of scrip dividends is therefore uncertain. It is unclear whether the solution in *Re Malam* will always be correct or whether it is limited to the precise facts of that case. *Re Malam* also raises the issue of how tax will be levied in such circumstances, although HMRC have stated that they will accept all reasonable decisions by trustees.[59] Identifying the intention of the company is not always easy since there are competing considerations. Shareholders can usually be expected to opt for the share option in an enhanced scrip situation. This suggests that the company intended to capitalise.[60] In the past, however, enhanced scrip dividends were declared in order to avoid the payment of advance corporation tax on simple dividends.[61] This would point towards a distribution of income.

30.9.14 *Partial liquidation*

In *Rae v Lazard Investment Co*, a Maryland company hived off part of its business by a procedure, unknown to UK company law, called partial liquidation: shares in a new company to which the hived off business was sold were distributed to shareholders in the Maryland company. The House of Lords held that the receipt by the shareholders on the partial liquidation was of a capital nature, not income:

> In deciding whether a shareholder receives a distribution as capital or income, our law goes by the form in which the distribution is made rather than by the substance of the transaction. Capital in the hands of the company becomes income in the hands of the shareholders if distributed as a dividend, while accumulated income in the hands of the company becomes capital in the hands of the shareholders if distributed in a liquidation. In the present case, the form of the distribution was one unknown to our law - distribution in a partial liquidation. By the law of

[59] Statement of Practice 4/94, para 6.

[60] On the basis that the terms of the offer make it so unrealistic that any shareholder would take the cash option, this option is in fact illusory. This was the view that the House of Lords took in *Bouch v Sproule* (although that distribution did not take the form of an enhanced scrip dividend since only partly paid-up shares were available).

[61] Advance corporation tax has now been abolished but it was stated in "Capital and Income of Trusts" (1999) Trust Law Committee Consultation Paper, para 2.3 that this change "will not make the position any clearer. It and other tax changes may well breed new ways of making distributions to shareholders that will throw up new questions about whether they are capital or income of a trust, to which the existing principles will not prove strong or clear enough to give any certain answers."

> Maryland, which governs the company and which authorised this distribution, the shares distributed were capital in the hands of the shareholders. Why, then, should we regard them as income? It is said that, if this had been an English company and it had done what [the Maryland company] did, these shares would have been income in the hands of the shareholders. But an English company could not do what [the Maryland company] did, for it could not distribute in a partial liquidation.[62]

30.9.15 *Burden of proof*

In *Associated Insulation Products v Golder*:[63]

> the burden of making out that the transaction intended and made, when considered in light of the surrounding circumstances, is in truth a capital distribution, lies upon those who assert it.

I would have thought that the usual rule should apply, ie the burden is on the taxpayer. But the burden of proof is not likely to be important.

30.10 Share premium/share capital

30.10.1 *UK Company*

A company's share premium account consists of the amount by which its issued shares are paid up in excess of their value. In *Re Duff*[64] the Court of Appeal held that any distribution made from a company's share premium account will constitute capital in the hands of shareholders. The court held that such a distribution is tantamount to an authorised reduction of capital.

In *HMRC v First Nationwide:*[65]

> 11. In the UK, prior to 1948, share premium was freely distributable as 'profits'. It was not assimilated to paid-up share capital. It did not fall within the scope of rules designed to protect against reduction of capital...

UK company law changed in 1948:

> 12. By [what is now s.610 Companies Act 2006] share premium was

[62] 41 TC 1 at p.26.

[63] Payment by issue of note; for the facts of this case see 15.5.12 (Payment by issue of note).

[64] [1951] Ch 923 at p.929.

[65] [2012] EWCA Civ 278. I omit some references in the original.

> assimilated to a company's subscribed capital and protected as if it were the paid-up capital of the company. ... in *Re Duff's Settlement*[66] ... concerned the question whether payments out of share premium account should be treated as income or capital, lies in the emphasis the courts placed upon the mechanism of payment in order to draw the distinction between capital and income. By virtue of [s.610], the repayment of share premium, in that case, was made by order of the court on a petition under that section. It followed, the courts agreed, that in contrast to the position before the 1948 Act... the payments out of share premium account were payments of capital and not income.
>
> 13. [Section 610 is] the essential provision on which the distinction between share capital and divisible profit depends.
>
> > "... A company ... can ... make a distribution amongst its members (otherwise than in a winding-up) in one of two ways - but only in one of two ways: that is
> >
> > [a] by a distribution of divisible profit, that is, by way of dividend; and
> >
> > [b] by way of a return of capital pursuant to an order of the court upon a petition for reduction of capital in accordance with the Act."
>
> 14. The court continued by reflecting upon the nature of share premium. It recognised that it was essentially capital profit and not income. But,
>
> > "if distributed in cash before [s.610] came into operation (it) would…have been income in the hands of the shareholders, notwithstanding its capital character when considered as a receipt of the company".

30.10.2 *Italian company*

The same applies for an Italian company, where the company law is similar to post-1948 UK law. In *HMRC v First Nationwide:*[67]

> 18.The principle that it is the machinery by which the assets are distributed which determines whether they are capital or income finds expression, yet again, in *Courtaulds Investments Ltd. v Fleming* 46 TC 111. Italian law identified the distribution from a share premium reserve as a distribution of capital. It brought share premium within the scope of the rules for protection of capital in a manner similar to [s.610 Companies Act 2006]. Share premium could not be distributed while the legal reserve fell below 20% of the company's capital. Italian law

[66] [1951] Ch 923.

[67] [2012] EWCA Civ 278. I omit some references in the original.

> introduced a new tax on the payment of dividends. To avoid that tax, the Italian company transferred profits of the year, which would have been distributed as dividends, to the legal reserve and thereby freed the share premium for distribution to shareholders. Such a distribution was, under Italian law, a distribution of capital free from the new imposta cedolare. ... Buckley J rejected the Revenue's contention that once the share premium was freely distributable it was, as in the UK before 1948, income. Italian law regarded the distribution as capital, and grafted the share premium onto the paid-up capital of the company.

30.10.3 *Cayman company*

The position is different for a Cayman Island company whose law is similar to pre-1948 UK law. In *HMRC v First Nationwide:*

> 19. Cayman Island Companies Law has followed the reverse route to that adopted under UK company law. Prior to 1989, the law protected share premium as if it were paid-up share capital, in the same way as it was protected after [what is now s.610] was introduced in the UK. But by amendment in 1989, share premium was distributable by dividend. ...
> 20. If, as is clear, prior to 1948 share premium was distributable by way of dividend as income in the UK, it seems equally plain that it was distributable as income in the Cayman Islands following the freedom from restriction in 1989...
> 25. The character of the payment in the hands of First Nationwide is a matter for UK law, the law of the Cayman Islands being relevant, not determinative... UK law recognises only two species of payment in respect of shares: capital or income payments. Further, the jurisprudence establishes that it is the form by which the payments are made which determines their character. It is true that, under Blueborder's Articles of Association, had the First and Second Preference Dividends not been paid, the share premium would have been returned as capital on a winding-up or on a redemption. It is also true that, since those dividends were paid, the value of the capital rights which remained, on a winding-up or otherwise, was drastically diminished to £1m. But those features tell one nothing other than, had the mechanism or machinery adopted for distribution of the share premium account been a return of capital on a winding-up or otherwise, the payments would have been capital. Since the payments were made adopting the mechanism of distribution by way of dividend ... that mechanism dictates the conclusion that the payments were income and not capital.

30.10.4 *Delaware company*

For completeness: in *Buckingham v HMRC*[68] a dividend was held to be partly income and partly capital. However the authority of the case is limited, as neither party was represented by Counsel, there was no expert evidence. It is unclear how far this case should be followed on another occasion.

30.10.5 *No restriction on distributing capital*

What is the position if the applicable foreign company law is different, and a company *can* distribute in excess of its distributable profits? In Jersey, BVI, and many other offshore jurisdictions, a distribution is (in short) permitted as long as the company remains solvent. The principle of maintenance of capital is of very limited application in these countries. The discussion of share premium suggests that a dividend should be treated as income, even if it is actually paid out of share capital. These countries have assimilated share capital to distributable profits. But perhaps the issue will not often arise, as such companies are not likely to have a substantial share capital.

30.11 Consolidation of accounts

HMRC say:

> **Fiscal and Administrative consolidation (Organschaft)**
> Some jurisdictions provide for individual entities to enter into arrangements enabling those entities to consolidate their results for tax or administrative purposes. Such arrangements often involve the transfer or payment of amounts between the parties to consolidate results. HMRC takes the view that payments or transfers made as part of such arrangements and under the terms of a contract can be distributions provided that the:
>
> - arrangement is dependent on the existing shareholder relationship for its existence, and
> - payments / transfers between the members of the consolidated unit are made in respect of shareholdings (such that transfers or payments are in proportion to shareholdings).[69]

[68] [2023] UKFTT 358 (TC).

30.12 Co law approach: Critique

In some cases the company-law approach produces the right result:

(1) When a company capitalises its profits by an issue of shares (whether income or capital profits), the company-law approach reflects the commercial reality. The capitalised profits remain within the company. The sum total of the company's assets remains unchanged. As the overall number of issued shares increases so the value of each individual share decreases. In these circumstances it would be wrong to classify the additional allotted shares as income.

(2) Income profits, distributed to shareholders as dividends reasonably promptly after they arise, should be considered income; what the company received as income is distributed as income.

In some cases the company-law approach produces the wrong result.

(1) Where a company distributes long-accumulated profits to shareholders by way of dividend. The company-law approach classifies these dividends as income even though the capital value of the company falls as a result of the distribution. Where a shareholder has purchased shares in the company after the profit has arisen, but before it is distributed, the price paid is likely to reflect the value of the reserves. The accumulated trading profits may represent a large proportion of the value of a company. The distribution of these profits may drastically reduce the value of the shares. Treating such distributions as income can operate to the serious disadvantage of those beneficiaries entitled to capital.

(2) Where the distribution is of capital profits, the rule may cause greater unfairness.

The Law Commission say:

Questionable relevance of company law principles
2.41 ... the rule in *Bouch v Sproule* conflates the concepts of share capital and trust capital. There is no reason why only those profits which become share capital (following capitalisation) should be treated as trust capital. Share capital, which cannot be returned to shareholders except by way of an authorised reduction or during a winding up, exists to protect creditors and other people who deal with a limited company. Trust capital on the other hand represents the full extent of the trust property. Where trust property consists of shares the capital value of the fund will be the combined market value of all the shares which are held. The value of those shares is in turn influenced by the total worth of the underlying companies. The total value of a company is not limited to the

> nominal value of the issued share capital. A company will often accumulate profits which are capable of distribution to use as "working capital". If these accumulated profits are distributed as a dividend the share price of the company is likely to fall significantly with the result that the capital value of the trust fund will be diminished. Under the rule in *Bouch v Sproule* the distribution will nevertheless be treated as income....
>
> C***omplexity and uncertainty in application to novel rearrangements of capital***
>
> Whether or not they operate fairly, the legal principles on which the rule in *Bouch v Sproule* is based are at least relatively clear. However, the application of the rule in *Bouch v Sproule* to particular novel factual situations becomes far less certain as corporate law develops new ways of rearranging capital in order to obtain commercial or tax advantages.
>
> As a result of this uncertainty, trustees may be forced to apply to the court for directions as to the proper classification of corporate receipts in new situations. The expense of such an application, which may be considerable, will usually be borne by the trust fund to the detriment of all beneficiaries. Alternatively, trustees may seek to avoid such difficulties by selling their shareholding before the rearrangement of capital takes place. The upshot of this is that trustees may sell a potentially lucrative investment in order to maintain a fair balance between the life tenant and the remainderman.
>
> ***Ignorance or disregard of the rule***
>
> Although it is not practical to measure compliance, it is questionable how often in practice trustees allocate corporate receipts in accordance with the strict rules in *Bouch v Sproule*. It seems likely that in many cases trustees (especially those who are not legally advised) will, as a matter of practice, allocate in accordance with common sense rather than the technical analysis set out in this Part.

That is a critique of the company-law approach as applied to trusts. The same points apply where the same rules are applied for tax. It is certainly true that the rules do not produce satisfactory answers, because capital-like distributions are categorised as income.

The application of the company-law approach may be defended. It can at least be said to be a practical rule. In *IRC v Reid's Trustees*:[70]

> The officers of the Crown do not know and do not care what is the character of the sources from which the money comes. ... as a general rule, the Inland Revenue authorities cannot have the same facilities for investigating the affairs of a foreign company and checking its statement that a dividend is paid out of "capital profits". They must work upon a broader basis

[70] 30 TC 431 at p.440.

Today, it may be less difficult to establish what are the capital profits of a company, and whether a dividend was paid out of them, but it would still be far from easy.

One might say that we have a formal rule rather than a substantive one.[71] It is the usual trade-off between rules which are easy to apply and rules which better track the economic reality. It is not obvious, to say the least, that any other capital/income rule would work better. The Law Commission did not come up with answers to solve the problem, but only tinkered with the position on demergers.

In a tax context, the current rules produce a closer alignment between the taxation of UK distributions (where all capital distributions are taxed) and foreign distributions (where capital distributions are not taxed, but capital is understood very narrowly).

However that may be, the law is settled.

There is something to be said for aligning the taxation of UK/foreign dividends, by extending the distribution rules which apply to UK companies to foreign company distributions. We would then tax all foreign distributions as income, whether income or capital, except for winding up and such other distributions as are recognised as capital receipts in the case of UK companies. That would be a simplification. We should avoid the income/capital distinction so far as we can. As the economist John Hicks observed, these are "bad tools, which break in our hands".

30.13 Gift to non-shareholder

30.13.1 *UK company law background*

A gift from a company to a non-shareholder is not a dividend.

The question arises as to whether it might be a distribution for company law purposes. The question arises because of the UK company law rule that a distribution must be made out of distributable profits, and in the absence of distributable profits, there is an unlawful (invalid) distribution.[72] It is well established UK company law that:

[71] See 16.5 (Formal/substantive source rules).

[72] The rule that a sale at an undervalue is a company law distribution has been modified by s.845 CA 2006, to facilitate sales at book value. But that does not affect the rule that
(1) a payment from a company to a non-shareholder
(2) a sale for less than book value

(1) Whether a transaction constitutes a distribution is not a matter of form (unlike the question of whether a payment is a dividend, for which certain formalities are required).
(2) The label which the parties use (eg gift, sale or remuneration) is not decisive.
(3) A transaction between a company and a non-shareholder may constitute a distribution, if the company and the non-shareholder have the same ultimate beneficial owner.[73]

The classic cases involve a sale at an undervalue from one company to another with the same ultimate beneficial owner. A fortiori, a gift to or for the benefit of a shareholder or ultimate beneficial owner in principle constitutes a distribution.[74] See *Clydebank Football Club Ltd v Steedman*:

> "Distribution" is not further defined than by [s.829 CA 2006] but it would appear that generally a distribution will be a transfer without consideration given by the recipient. The object of the statutory code is to prohibit the (gratuitous) return to shareholders, other than by specified means, of subscribed capital or assets representing the same. However, ... a transfer involving the passing of some consideration may in certain circumstances give rise to a distribution. That is because a transfer, albeit some consideration is given, may involve in substance a gift of capital to the transferee.[75]

How does one reconcile this with s.829 CA 2006 which provides:

> In this Part [Part 23 CA 2006] "distribution" means every description of distribution of a company's assets *to its members*...

The word "to" might be read loosely, as "to or at the direction of" or "to or for the benefit of". Alternatively as there are two sets of company law rules governing distributions, statutory rules and common law rules, a distribution to a non-shareholder could be said to be a "distribution" for the purposes of the latter.

may be classified as a distribution for UK company law purposes, and so unlawful, in the absence of distributable profits.

[73] See *Aveling Barford v Perion* [1989] BCLC 626: "The fact that the distribution was to Perion rather than to Dr. Lee or his other entities which actually held the shares in Aveling Barford is in my judgment irrelevant."

[74] Further consideration is needed in the case of a charitable gift.

[75] [2000] ScotCS 250 at [55] approved in *Progress Property v Moorgarth Group* [2010] UKSC 55.

This does not mean that all gifts by companies are distributions. For instance, a gift by a company to a charity (not its shareholder) is not a distribution.[76] But where one draws the line does not seem to be at all clear.

30.13.2 *Relevance of company law to company gift*

What is the tax position when a non-resident company makes a gift to a non-shareholder? The question is whether the receipt is of an income nature, in my terminology, an income-distribution.

On analogy with the company-law approach, one might have thought that company law principles apply to answer this question: if the gift is a distribution, for company law purposes, it is an income receipt. But this was not the approach adopted in *Kerrison v HMRC*.[77] Capital/income is decided by reference to a broad review of the facts. This seems a better solution because the relevant company law seems somewhat obscure and vague.

30.14 Winding-up TAAR

Section 396B/404A ITTOIA provide an exception to the general rule that a distribution in a winding up is a capital receipt:

s.396B(1): UK co	**s.404A(1): non-UK co**
For the purposes of this Chapter, a distribution made to an individual in respect of share capital in the winding up of a UK resident company is a distribution of the company if—	For the purposes of this Chapter, a distribution made to an individual in respect of share capital in a winding up of a non-UK resident company is a dividend of the company if—
(a) Conditions A to D are met, and (b) the distribution is not excluded (see subsection (7)).[78]	[identical]

I refer to this rule as the "**winding-up TAAR**", and the conditions are

[76] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 17.9 (Position of charity receiving company gift) online version *https://www.taxationofcharities.co.uk*

[77] [2019] UKUT 8 (TCC). See 32.5 (Source/voluntary transaction). See too 30.15.10 (Benefits to non-shareholder).

[78] See 29.8.5 (Excluded distribution).

“**winding-up conditions A to D**”. It is sometimes called the “phoenixing TAAR”.

A distribution in a winding up is a transaction in securities, and so the TiS rules also need consideration.[79]

The winding-up TAAR does not apply to a distribution made to a trustee or other non-individual, but in cases where the winding-up TAAR does not apply, the TiS rules may still apply.

The deemed dividend is RFI and so may qualify for the remittance basis.

The winding-up TAAR was preceded by shallow HMRC consultation and response documents[80] but these shed little light on the provisions.

HMRC have published guidance in the CTM, but this has had poor reviews from the profession[81] and is not set out in detail here.

30.14.1 *Condition A: 5% interest*

Section 396B/404A ITTOIA provide:

> (2) Condition A is that, immediately before the winding up, the individual has at least a 5% interest in the company.

s.396B(9): UK co	**s.404A(9): non-UK co**
(9) For the purposes of this section, an individual has at least a 5% interest in a company if—	For the purposes of this section, a person[82] has at least a 5% interest in a company if—
(a) at least 5% of the ordinary share capital of the company is held by the individual, and	(a) at least 5% of the ordinary share capital of the company is held by the individual, and
(b) at least 5% of the voting rights in the company are exercisable by	(b) at least 5% of the voting rights in the company are exercisable by

[79] See 55.1 (Transactions in securities).

[80] HMRC, “Company distributions: consultation document” (2015) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/483547/Company_distributions_-_consultation_document__7029_.pdf*
HMRC, “Company distributions: summary of responses” (2016) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510263/Company_distributions_-_summary_of_responses.pdf*

[81] “Almost universally panned”, “pretty atrocious”, and “disgracefully jejune”: see Miller, “HMRC's guidance on the company winding up TAARs” Tax Journal, 4 Aug 2017. But it seems to me that those who expect HMRC guidance to clarify vague anti-avoidance legislation will always be disappointed.

[82] This appears to be a slip for “individual”, but it does not matter.

the individual by virtue of that holding.	the individual by virtue of that holding.

Section 396B/404A ITTOIA provide:

> (10) For the purposes of subsection (9) if an individual holds any shares in a company jointly or in common with one or more other persons, he or she is to be treated as sole holder of so many of them as is proportionate to the value of his or her share (and as able to exercise voting rights by virtue of that holding).

A life tenant would not meet condition A.

30.14.2 *Condition B: Close company*

Section 396B/404A ITTOIA provide:

> (3) Condition B is that the company—
> (a) is a close company when it is wound up, or
> (b) was a close company at any time in the period of two years ending with the start of the winding up.

Section 404A(8) ITTOIA provides:

> In this section—
> "close company" includes[83] a company which would be a close company if it were a UK resident company;

30.14.3 *Condition C: Phoenixing*

Section 396B/404A ITTOIA provide:

> (4) Condition C is that, at any time within the period of two years beginning with the date on which the distribution is made—
> (a) the individual carries on a trade or activity which is the same as, or similar to, that carried on by the company or an effective 51% subsidiary of the company,[84]

[83] This is standard form wording; see 104.29.1 (Non-resident close company). In the context of s.404A, which only concerns non-resident companies, the standard form is slightly inapt. The word "includes" means "means"; that is, this is an exclusive definition, not an inclusive definition. But it does not matter and perhaps the objection is pedantic. There is no equivalent in s.396B, as it is not needed.

[84] Defined by reference in s.396B(8)/404A(8) ITTOIA incorporates the standard definition: "In this section ... "effective 51% subsidiary" has the meaning given by section 170(7) of TCGA 1992".See 64.26 ("51/75/90 % subsidiary").

"Similar" is a vague term.

> (b) the individual is a partner in a partnership which carries on such a trade or activity,
>
> (c) the individual, or a person connected with him or her, is a participator[85] in a company in which he or she has at least a 5% interest and which at that time—
>
> (i) carries on such a trade or activity, or
>
> (ii) is connected with a company which carries on such a trade or activity, or
>
> (d) the individual is involved with the carrying on of such a trade or activity by a person connected with the individual.

"Involved with" is an un-lawyerlike expression. Presumably it means personally involved, in which case an individual is not involved if they only provide a loan.

30.14.4 *Condition D: Motive defence*

Section 396B/404A ITTOIA provide a motive defence:

> (5) Condition D is that it is reasonable to assume,[86] having regard to all the circumstances, that—
>
> (a) the main purpose or one of the main purposes of the winding up is the avoidance or reduction of a charge to income tax, or
>
> (b) the winding up forms part of arrangements[87] the main purpose or one of the main purposes of which is the avoidance or reduction of a charge to income tax.

"Avoidance or reduction of a charge to tax" is one of the four limbs of the standard definition of tax advantage.[88] It is strange that the usual definition of tax advantage is not set out in full, but perhaps it makes little difference.

The requirement is to test (a) the purpose of the winding up *and* (b) the purpose of the arrangements is non-standard wording; para (a) is needed

[85] Section 396B(8)/404A(8) ITTOIA incorporates the standard definition: "In this section ... "participator" has the meaning given by section 454 of CTA 2010"; see 104.22 (Definitions of participator).

[86] See App. 2.24 (Reasonable-to-assume).

[87] Section 396B(8)/404A(8) ITTOIA provides the standard (unnecessary) IT definition of "arrangements"; see App 2.2.3 (Definitions of "arrangement").

[88] See 3.19.1 (Tax advantage: Definitions).

for the case where the arrangement consists only of the winding up, ie it is not part of wider arrangements.

There must be IT avoidance: avoidance of IHT or CGT would not count.

Conditions C and D to some extent overlap, as phoenixing is suggestive of avoidance. The CTM makes some general comments which deal with them together:

> **CTM36340: company winding up TAAR: condition D** [Sep 2018]
> Ultimately, the legislation is asking whether the recipient of the distribution is continuing what amounts to the same business having extracted the accumulated profits in a capital form. This is inevitably a question of judgment to be made on the basis of facts in individual cases. The following issues are likely to be relevant:
>
> - Is there a tax advantage, and if so, is its size consistent with a decision to wind-up a company to obtain it?
> - To what extent does the trade or activity carried on after the winding-up resemble the trade or activity carried on by the wound-up company?
> - What is the involvement in that trade or activity by the individual who received the distribution? To what extent have their working practices changed?
> - Are there any special circumstances? For example, is the individual merely supplying short-term consultancy to the new owners of the trade?
> - How much influence did the person that received the tax advantage have over the arrangements? Is it a reasonable inference that arrangements were entered into to secure this advantage?
> - Is there a pattern, for instance have previous companies with similar activities been wound-up?
> - What other factors might be present to lead to a decision to wind-up? Are these commercial and independent of tax benefits?
> - Are there any events apparently linked with the winding-up that might reasonably be taken into account? For example, was the only trade sold to a third party, leaving just the proceeds of the sale?
>
> It is impossible to give an exhaustive list or comprehensive examples as individual facts and circumstances will be paramount. The aim is to establish whether it is reasonable to assume that the company was wound-up as a way of converting into a capital transaction what would otherwise have been paid out as income. The essential question is whether an individual may reasonably be regarded as carrying on or continuing to be involved in the carrying on of the same business as before, having extracted the profits in a capital form. ...

30.14.5 *Excluded distribution*

Section 396B(1)/404A(1) ITTOIA provides a distribution in a winding up is a dividend if:

> ... (b) the distribution is not excluded (see subsection (7)).

"Excluded" is a label for two distinct reliefs.

Section 396B/404A ITTOIA provide:

> (7) A distribution to an individual is excluded if or to the extent that—
> (a) the amount of the distribution does not exceed the amount that would result in no gain accruing for the purposes of capital gains tax, or

Thus distributions will not be treated as income to the extent that they represent the CGT base cost.

Section 396B/404A ITTOIA provides:

> (7) A distribution to an individual is excluded if or to the extent that ...
> (b) the distribution is a distribution of irredeemable shares.

Thus the TAAR should not apply to a demerger which takes the form of liquidation and distribution of irredeemable shares. It is suggested that distribution is used informally to include an issue of shares; though since demergers will generally have HMRC clearance for other reasons, the point is probably academic.

30.14.6 *Clearance*

The CTM provides:

> **CTM36350 Requests For Clearance** [Feb 2018]
> ITTOIA05/S396B/404A provides no statutory clearance procedure. Although there is a non-statutory clearance procedure (see the ONSCG manual), the applicant would not be uncertain about purpose, (!) which is a subjective matter.[89] It follows that a clearance application would not be appropriate unless it is limited to the application of specific rules in the legislation where there is genuine uncertainty about their application to a specific proposed transaction.

See 55.18 (TiS clearance).

[89] Author's footnote: Note that HMRC do not consider the words "reasonable to assume, having regard to all the circumstances" impose an objective test.

30.14.7 *Sale of company: GAARable?*

HMRC say:

> Some scheme promoters claim to have come up with schemes that avoid the Income Tax charge and get around the TAAR legislation.
>
> They claim that by making an artificial modification of the arrangements aimed at defeating the intention of the legislation (by selling the company to a third party rather than winding it up, for example) the TAAR will not apply.
>
> These schemes do not work because:
>
> - in many cases, the actual outcome is that the individual is receiving distributions in a winding up - as the individual carries on trading using a different vehicle these schemes are within the scope and purpose of the TAAR legislation
> - phoenixism arrangements that claim to involve payments to shareholders taxed as capital instead of income are caught by the TAAR, or other provisions
>
> HMRC will investigate any attempts to avoid the Income Tax charge.
>
> If it's claimed that the phoenixism TAAR does not cover the arrangements, HMRC will consider whether the GAAR applies to these schemes.[90]

This gives only a vague indication of the arrangement which HMRC regard as caught by the GAAR. But it suggests that a relatively straightforward sale of a company with undistributed profits might be regarded as the same as a liquidation and so potentially within the TAAR. If that were right it would be pushing the boundaries of the GAAR far beyond what has hitherto been regarded as abusive.[91] The transactions envisaged seem far from the themes of this book, but the outcome could have far-reaching implications for every aspect of taxation: it illustrates how in tax, everything is connected.

There have been no material developments since publication of this statement, so perhaps that was not what HMRC had in mind, or at least, HMRC do not pursue the point.

[90] HMRC, Spotlight 47 (2019) *https://www.gov.uk/guidance/attempts-to-avoid-an-income-tax-charge-when-a-company-is-wound-up-spotlight-47*
The following three paragraphs, not set out here, threaten various penalties.

[91] See 2.4.2 (Why distinctions matter). For well-aimed criticism, see Miller, "Misplaced spotlight" Taxation Magazine, 21 Feb 2019, p.10.

30.15 DT relief: Dividend income

It is necessary to consider separately:

(1) A person treaty-resident in a foreign State who receives UK source dividends.

(2) A person treaty-resident in the UK who receives dividends from a company resident in the foreign State; the person may be entitled to tax relief in the foreign State, but that is not discussed here.

(3) A person who is UK-law UK resident but treaty-resident in a foreign State, and who receives dividends from a company resident in a third country.

30.15.1 *OECD Model art10*

Article 10 OECD Model provides:

> 1. Dividends paid[92] by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
>
> 2. [1] However, dividends paid by a company which is a resident of a Contracting State may also be taxed in that State according to the laws of that State,
>
> [2] but if the beneficial owner[93] of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
>
> a) 5% of the gross amount of the dividends if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends;
>
> b) 15% of the gross amount of the dividends in all other cases...

I use the following terms:
Source State: the State where the company is resident
Residence State: the State where the shareholder is resident
Treaty cap: the 5/15 % limit on tax contained in art 10(2)

Thus there are two types of shareholder:

Label (traditional)	Form	Treaty Cap	Capital Holding	See
Direct investor	Company	5%	at least 25%	art10(2)(a)
Portfolio investor	Any person	15%	if co, under 25%	art10(2)(b)

[92] See 15.11.2 (“Paid” and “payment”).

[93] See 108.10 (DTA beneficial owner rule).

The traditional labels, “direct/portfolio investors”, are opaque; but it is best to follow the established usage. Where used in connection with actual treaties (as opposed to the OECD Model) the details vary according to the wording of the treaty concerned.

Art 10 may be easier to follow if one specifies which State is which:

Company UK resident; shareholder non-resident:

> 1. Dividends paid by a company which is a resident of the UK to a resident of the foreign State may be taxed in the foreign State.
> 2. However, dividends paid by a company which is a resident of the UK may also be taxed in the UK ... , but if the beneficial owner of the dividends is a resident of the foreign State, the tax so charged shall not exceed [the 5%/15% cap]

Company non-resident; shareholder UK resident:

> 1. Dividends paid by a company which is a resident of the foreign State to a resident of the UK may be taxed in the UK.
> 2. However, dividends paid by a company which is a resident of the foreign State may also be taxed in the foreign State ... but if the beneficial owner of the dividends is a resident of the UK, the tax so charged shall not exceed [the 5%/15% cap].

30.15.2 *2017 changes to art 10*

The wording of the treaty cap changed in 2017:

Pre-2017 Model art 10(2)(a)	**Post-2017 Model art 10(2)(a)**
5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;	5 per cent of the gross amount of the dividends if the beneficial owner is a company ~~(other than a partnership)~~ which holds directly at least 25 per cent of the capital of the company paying the dividends throughout a 365 day period that includes the day of the payment of the dividend (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend);

There are two changes.

(1) The words "other than a partnership" are deleted.[94]

(2) The minimum 365 day holding period. Article 8 BEPS MLI[95] proposed this, to prevent avoidance via dividend transfer transactions, but the UK opted out of that. There are no current treaties with this wording, and it seems unlikely that the wording will be used much in future UK treaties.

30.15.3 *Treaty-resident in foreign State*

In practice, non-resident individuals and non-resident companies do not need usually treaty relief for their UK dividends. They qualify for non-resident IT relief.[96] Treaty relief is relevant to:

(1) Non-resident trusts (if they do not qualify for non-resident IT relief, because they have UK resident beneficiaries)[97]

(2) Individuals who are UK-law UK resident, but treaty-resident in the foreign State (under the tie-breaker)

(3) Tax year of arrival and departure

30.15.4 *Company: DTA definition*

"Company" is defined, and the term is used in four places in the OECD Model:

Article	**Topic**	**See para**
10	Dividends	*Discussed here*
5(7)	Permanent establishment	106.18
16	Directors' fees	37.19
3	Definition of person	9.4

I discuss the definition here, as the article 10 context is the most important; OECD Commentary states that "The definition is drafted with special regard to the Article on dividends."

Article 3(1)(b) OECD Model provides:[98]

> 1. For the purposes of this Convention, unless the context otherwise requires ...

[94] See 30.15.4 (Partnership restriction).

[95] See 107.15 (BEPS multilateral instrument).

[96] See 45.1 (Non-resident IT relief – Introduction).

[97] See 45.10 (Trusts: UK beneficiary rule).

[98] The USA/UK DTA definition is identical.

> b) the term "company" means
> [i] any body corporate or
> [ii] any entity that is treated as a body corporate for tax purposes;

OECD Commentary provides:

> 3. The term "company" means in the first place any body corporate. In addition, the term covers any other taxable unit that is treated as a body corporate for the purposes of the tax laws of the Contracting State of which it is a resident.

Thus "company" within the DTA definition means:
(1) any body corporate (in the normal sense of the word)
(2) any entity treated as a body corporate
  (a) for the purposes of UK tax (thus the standard tax definition of company applies); and
  (b) for the purposes of tax in the foreign State.

See 90.49 (US limited partnership).

30.15.5 *Partnership restriction*

The direct investor treaty cap in its pre-2017 form restricted this relief to a company "other than a partnership".[99] I refer to this as the **"partnership restriction"**.

This wording is not in the current Model. But even before the change, the UK preferred not to include the partnership restriction, which is found only in a few pre-2017 treaties.[100] OECD Commentary provides:

> 11. Before 2017, [art 10(2)(a)] referred to a company "other than a partnership". That exception was deleted in recognition of the fact that if a partnership is treated as a company for tax purposes by the Contracting State in which it is established, it is appropriate for the other State to grant the benefits of subparagraph a) to that partnership.
> Indeed, an entity or arrangement (e.g. a partnership) that is treated as a company for tax purposes qualifies as a company under the definition

[99] See 30.15.2 (2017 changes to art 10).

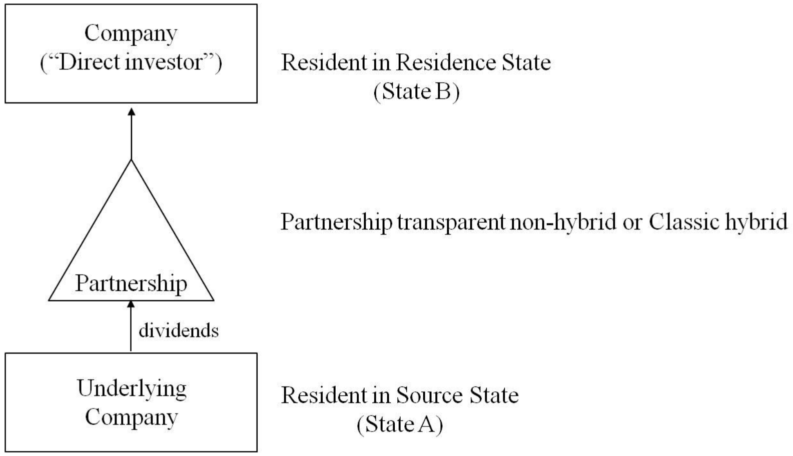
[100] 11 UK treaties have this wording: Austria, Denmark, Faroes, Germany, Iceland, Israel, Korea, Turkmenistan, Uruguay, Zambia. Presumably the treaty partner wanted it. For discussion of the wording see "Some Reflections on the Proposed Revisions to the OECD Model and Commentaries, and on the Multilateral Instrument, with respect to Fiscally Transparent Entities" [2017] BTR 295 at p.338.

in [art 3(1)(b)[101]] and, to the extent that it is a resident of a Contracting State, is therefore entitled to the benefits of [art 10(2)(a), direct investor treaty cap] with respect to dividends paid by a company resident of the other State, as long as it holds directly at least 25% of the capital of that company.[102]

This conclusion holds true regardless of the fact that the State of source of the dividends may regard that entity or arrangement as fiscally transparent. That conclusion is confirmed by the provision on fiscally transparent entities in [art 1(2), hybrid entity rule[103]].

30.15.6 *Receipt via transparent entity*

OECD Commentary considers a direct investor holding an underlying company through a partnership, thus:



Company
("Direct investor")
Resident in Residence State
(State B)
Partnership transparent non-hybrid or Classic hybrid
Partnership
dividends
Underlying
Company
Resident in Source State
(State A)

11.1[Art 1(2), hybrid entity rule] ensures that the part of the dividend received by a fiscally transparent entity or arrangement that is treated as the income of a member of that entity or arrangement for purposes of taxation by the State of residence of that member will be considered as a dividend paid to that member for the purposes of Article 10 (see paragraph 12 of the Commentary on Article 1).[104]

Where, for example, a company resident of State A pays a dividend to a partnership that State B treats as a transparent entity, the part of that dividend that State B treats as the income of a partner resident of State

[101] See 30.15.4 (Company: DTA definition).

[102] But if that is right, would the partnership restriction ever apply?

[103] See 91.4 (DTA hybrid-entity rules).

[104] See 91.6.1 (Considered as income: Effect).

> B, will, for the purposes of [art 10(2)] of the convention between States A and B, be treated as a dividend paid to a resident of State B.
> Also, for the purposes of the application of [art 10(2)(a)] in such a case, a member that is a company should be considered to hold directly, in proportion to its interest in the fiscally transparent entity or arrangement, the part of the capital of the company paying the dividend that is held through that entity or arrangement and, in order to determine whether the member holds directly at least 25% of the capital of the company paying the dividends, that part of the capital will be added to other parts of that capital that the member may otherwise hold directly.[105]

In the case of a partnership, it is possible to say that the partners hold the capital if one adopts a co-ownership analysis of a partnership share.[106]

30.15.7 *"Dividends"*

Article 10(3) OECD Model defines dividends:

> The term "dividends" as used in this Article means
> [a] income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as well as
> [b] income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident.

I think the correct reading of para [a] is:

> income from
> [i] shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or
> [ii] other rights, not being debt-claims, participating in profits

[105] The Commentary goes on to consider the 365-day rule (though that is not likely to be relevant for the UK):
"In that case, for the purposes of the application of the requirement that at least 25% of the capital of the company paying the dividends be held throughout a 365 day period, it will be necessary to take account of both the period during which the member held the relevant interest in the fiscally transparent entity or arrangement and the period during which the part of the capital of the company paying the dividend was held through that entity or arrangement: if either period does not satisfy the 365 day requirement, subparagraph a) will not apply and subparagraph b) will therefore apply to the relevant part of the dividend..."

[106] See 85.3.1 (English partnership: 2 analyses).

That is, the words "not being debt-claims, participating in profits" govern "other rights" but do not govern the 5 categories within [i].

See Avery-Jones et al "The Definitions of Dividends & Interest in OECD Model: Something Lost in Translation?" [2009] BTR 406.

For the dividend/capital gain boundary, see 56.23.7 (Share buy-back/liquidation).

OECD Commentary provides:

> 1. By "dividends" is generally meant the distribution of profits to the shareholders by
> [a] companies limited by shares, [*Sociétés anonymes*]
> [b] limited partnerships with share capital, [*Sociétés en commandite par actions*]
> [c] limited liability companies [*Sociétés à responsabilité limitée*] or
> [d] other joint stock companies [*Sociétés de capitaux*].
> Under the laws of the OECD member countries, such joint stock companies are legal entities with a separate juridical personality distinct from all their shareholders. On this point, they differ from partnerships insofar as the latter do not have juridical personality in most countries.
> 2. Many States consider that the profits of a business carried on by a partnership are the partners' profits derived from their own exertions; for them they are business profits. So these States treat the partnership as fiscally transparent and the partners are ordinarily taxed personally on their share of the partnership capital and partnership profits.
> 3. The position is different for the shareholder; he is not a trader and the company's profits are not his; so they cannot be attributed to him. He is personally taxable only on those profits which are distributed by the company (apart from the provisions in certain countries' laws relating to the taxation of undistributed profits in special cases). From the shareholders' standpoint, dividends are income from the capital which they have made available to the company as its shareholders.

OECD Commentary provides:

> 23. In view of the great differences between the laws of OECD member countries, it is impossible to define "dividends" fully and exhaustively. Consequently, the definition merely mentions examples which are to be found in the majority of the member countries' laws and which, in any case, are not treated differently in them. The enumeration is followed up by a general formula....
> 24. The notion of dividends basically concerns distributions by companies within the meaning of subparagraph b) of paragraph 1 of

> Article 3. Therefore the definition relates, in the first instance, to distributions of profits the title to which is constituted by shares, that is holdings in a company limited by shares (joint stock company). The definition assimilates to shares all securities issued by companies which carry a right to participate in the companies' profits without being debt-claims; such are, for example, "jouissance" shares or "jouissance" rights, founders' shares or other rights participating in profits.
> ... debt-claims participating in profits do not come into this category (see paragraph 19 of the Commentary on Article 11); likewise interest on convertible debentures is not a dividend.
> 25. Article 10 deals not only with dividends as such but also with interest on loans insofar as the lender effectively shares the risks run by the company, i.e. when repayment depends largely on the success or otherwise of the enterprise's business. Articles 10 and 11 do not therefore prevent the treatment of this type of interest as dividends under the national rules on thin capitalisation applied in the borrower's country. The question whether the contributor of the loan shares the risks run by the enterprise must be determined in each individual case in the light of all the circumstances, as for example the following:
>
> – the loan very heavily outweighs any other contribution to the enterprise's capital (or was taken out to replace a substantial proportion of capital which has been lost) and is substantially unmatched by redeemable assets;
> – the creditor will share in any profits of the company;
> – repayment of the loan is subordinated to claims of other creditors or to the payment of dividends;
> – the level or payment of interest would depend on the profits of the company;
> – the loan contract contains no fixed provisions for repayment by a definite date.

30.15.8 *Distribution by partnership*

OECD Commentary provides:

> 26. The laws of many of the States put participations in a *société à responsabilité limitée* (limited liability company) on the same footing as shares. Likewise, distributions of profits by co-operative societies are generally regarded as dividends.
> 27. Distributions of profits by partnerships are not dividends within the meaning of the definition, unless the partnerships are subject, in the State where their place of effective management is situated, to a fiscal treatment substantially similar to that applied to companies limited by

> shares (for instance, in Belgium, Portugal and Spain, also in France as regards distributions to *commanditaires* in the *sociétés en commandite simple*). ...

30.15.9 *Non-cash dividends*

OECD Commentary provides:

> 28. Payments regarded as dividends may include not only distributions of profits decided by annual general meetings of shareholders, but also other benefits in money or money's worth, such as
> [1] bonus shares,
> [2] bonuses,
> [3] profits on a liquidation or redemption of shares (see paragraph 31 of the Commentary on Article 13) and
> [4] disguised distributions of profits.
> The reliefs provided in the Article apply so long as the State of which the paying company is a resident taxes such benefits as dividends. It is immaterial whether any such benefits are paid out of current profits made by the company or are derived, for example, from reserves, i.e. profits of previous financial years.
> Normally, distributions by a company which have the effect of reducing the membership rights, for instance, payments constituting a reimbursement of capital in any form whatever, are not regarded as dividends.

30.15.10 *Benefits to non-shareholder*

OECD Commentary provides:

> 29. The benefits to which a holding in a company confer entitlement are, as a general rule, available solely to the shareholders themselves. Should, however, certain of such benefits be made available to persons who are not shareholders within the meaning of company law, they may constitute dividends if:
> – the legal relations between such persons and the company are assimilated to a holding in a company ("concealed holdings"); and
> – the persons receiving such benefits are closely connected with a shareholder; this is the case, for example, where the recipient is a relative of the shareholder or is a company belonging to the same group as the company owning the shares.
>
> 30. When the shareholder and the person receiving such benefits are residents of two different States with which the State of source has concluded conventions, differences of views may arise as to which of

> these conventions is applicable. A similar problem may arise when the State of source has concluded a convention with one of the States but not with the other.

The Commentary has no solution to offer:

> This, however, is a conflict which may affect other types of income, and the solution to it can be found only through an arrangement under the mutual agreement procedure.

30.15.11 *Company capital*

This term matters because a direct investor only qualifies for the lower treaty cap if it is a company holding at least 25% of the company capital. OECD Commentary provides:

> 15. In [art 10(2)(a), direct investor treaty cap], the term "capital" is used in relation to the taxation treatment of dividends, i.e. distributions of profits to shareholders. The use of this term in this context implies that, for the purposes of subparagraph a), it should be used in the sense in which it is used for the purposes of distribution to the shareholder (in the particular case, the parent company).
>
> a) As a general rule, therefore, the term "capital" in subparagraph a) should be understood as it is understood in company law. Other elements, in particular the reserves, are not to be taken into account.
>
> b) Capital, as understood in company law, should be indicated in terms of par value of all shares which in the majority of cases will be shown as capital in the company's balance sheet.
>
> c) No account need be taken of differences due to the different classes of shares issued (ordinary shares, preference shares, plural voting shares, non-voting shares, bearer shares, registered shares, etc.), as such differences relate more to the nature of the shareholder's right than to the extent of his ownership of the capital.
>
> d) When a loan or other contribution to the company does not, strictly speaking, come as capital under company law but when on the basis of internal law or practice ("thin capitalisation", or assimilation of a loan to share capital), the income derived in respect thereof is treated as dividend under Article 10, the value of such loan or contribution is also to be taken as "capital" within the meaning of subparagraph a).
>
> e) In the case of bodies which do not have a capital within the meaning of company law, capital for the purpose of

> subparagraph a) is to be taken as meaning the total of all contributions to the body which are taken into account for the purpose of distributing profits.

30.15.12 *Dividend paid through PE*

For the overlap between dividends and business profits, see 107.9.3 (Other business profit overlaps).

30.15.13 *Dividend to foreign State co*

Article 10(5) OECD Model provides:

> Where a company which is a resident of a Contracting State derives[107] profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company, except
> [a] insofar as such dividends are paid to a resident of that other State or
> [b] insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment situated in that other State,
> nor subject the company's undistributed profits to a tax on the company's undistributed profits,
> even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State.

30.15.14 *Co in 3rd State: Dual resident shareholder*

A person who is UK-law UK resident but treaty-resident in a foreign State may receive dividends from a company which is not a resident of the foreign State.

A person in this category does not qualify for relief under article 10. However relief from UK tax is available under art 21 OECD Model ("Other Income").[108]

Dividends from companies in third countries are within the Other Income article, as they are "not dealt with in the foregoing Articles".

The OECD Commentary provides:

> 8. [Art 10] deals only with dividends paid by a company which is a resident of a Contracting State and does not, therefore, apply to dividends paid by a company which is a resident of a third State. Dividends paid by a company which is a resident of a Contracting State

[107] See 15.11.1 ("Deriving" income).

[108] See 33.20 (DT relief: "Other Income").

> which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State may be taxed by the first-mentioned State under [art 10(2)] but may also be taxed by the other State under paragraph 1 of Article 7 (see paragraphs 9 and 9.1 of the Commentary on Articles 23 A and 23 B concerning relief of double taxation in such cases).

30.16 Dividend nil rate/DTA interaction

30.16.1 *UK dividends of non-resident*

HMRC say:

> **Question**
> 24.1 Please can HMRC confirm how the treaty cap should be applied in the case of a treaty non-resident individual who has UK source dividend income in excess of £5,000?[109]
> We believe there are two possible approaches. Either:
> a. the treaty cap applies to the total UK source dividend income paid, so for example, someone with £15,000 of dividends paying £3,250 UK tax (being 32.5% on £10,000) is subject to a treaty cap of £2,250 (being 15% of £15,000 and assuming a 15% treaty cap rate applies); or
> b. the treaty cap applies to only the UK source dividend income that is chargeable to UK tax at more than 0%, so in the same example the 15% treaty cap would limit the UK tax to £1,500
> (being 15% of the £10,000 UK dividend income remaining after deducting the £5,000 dividend allowance).[110]
> In cases where the treaty non-resident individual is UK resident under SRT they may receive a combination of UK source dividend income and non-UK source dividend income.
> **Answer**
> Non-UK resident individuals with UK source income can be taxed in two ways. Under the normal rules, they are subject to income tax on dividends in the same way as UK residents. The first £5,000 of dividends is tax free. The balance will be subject to tax but will be restricted in accordance with the treaty which limits the rate of tax to be applied.
> Alternatively, non-UK residents can use the special rules in ITA 2007,

[109] ie the income qualifies for the dividend nil rate. From 2018/19 the figure of £2,000 replaces the figure of £5,000. See 43.10.2 (Dividend nil rate).

[110] Author's footnote: The statutory term is dividend nil rate, not dividend allowance, but it does not matter.

> s 811 to s 814. These limit the non-resident's UK income tax liability to tax paid at source on investment and pension income. In particular, no UK tax is payable on dividends from UK companies because the tax credit is treated as paid at source. All other UK income, such as employment income, is taxed in full, but no personal allowance can be claimed (assuming a claim for personal allowances is available).[111]

This summary of the taxation of UK dividends of non-residents is not correct. But as non-residents do not pay IT on dividends (after allowing for the tax credit) it is true to say that the issue of the dividend nil rate does not arise.

30.16.2 *Foreign dividends DTA exempt*

HMRC say:

> **Question**
> 24.2 - Assuming the non-UK source dividend income is exempt from UK tax under the treaty, do HMRC accept that it does not use up any dividend allowance because it is not included in "net income" as calculated at Step 2 s23 ITA 2007 (ITA)? If that is correct, can we assume that the existence of treaty exempt non-UK source dividend income would not change the way the treaty cap applies to the UK source dividend income?
> **Answer**
> If the treaty provides full relief on dividends then they will be exempt and will not be brought into the computation. The dividend allowance will still be available to use against other dividends.[112]

This question will hardly ever arise, as circumstances in which a UK resident qualifies for treaty exemption on dividends are extremely rare. The OECD Model generally provides that the residence State has a taxing right. But if it did happen,[113] it is correct to say that the exempt dividends

[111] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

[112] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

[113] Exemption from tax on foreign dividends of a UK resident might arise in two circumstances: (1) a non OECD Model form treaty might provide exemption. (2) Exemption may be applicable under the Model treaty to an individual who is UK resident under UK domestic law, but treaty non-resident; see 30.15.14 (Co in 3rd

do not affect the dividend nil rate.

30.17 Dividend taxation: Critique

In *Shirley v HMRC*:[114]

> it is not possible to ascertain a consistent and logical basis in the legislation for the taxation of dividends. Whilst there might have been some sort of logical underpinning to the basis of taxation of dividends in the early 1970s, when the partial imputation system was introduced (with ACT and tax credits)—any such logic had long disappeared as a result of the many amendments to dividend taxation in the period leading to the enactment of ITTOIA. Parliament has chosen to legislate for a system of great complexity, involving different tax rates, tax credits, deemed payments of tax, grossing up and various other matters. There are no logically consistent principles (as it were) underpinning the taxation of dividends, against which the result of a literal interpretation can be compared—in order to reach a judgment that a literal interpretation results in an anomaly or absurdity.

There was subsequently another round of reform, introduced in breach of the Tax Consultation Framework,[115] but this gloomy assessment remains broadly valid. If one can ignore the dividend nil rate, the law is conceptually simpler than it was pre-2016; but the administrative work is greater than before as basic rate taxpayers have to pay tax, and submit returns, which they did not have to do before 2016.

Having said that, it is easier to criticise the present system than to propose a better one. As indicated by the many approaches to company tax which have been devised over the years, there is no wholly satisfactory solution to the issue of how to tax companies and shareholders,

State: Dual resident shareholder).

Cross references

The following topics are considered elsewhere:

Topic	**See**
Split year: Pt 4/5 ITTOIA Income	10.3.1
Annual Payments: transfer of income stream	54.5.1

31.1 Annual Payments: Introduction

"Annual Payment" is an opaque technical term: it is a label for a category (or perhaps a set of categories?) of income, the meaning of which is discussed in a large and in parts difficult body of case law. I write this term with initial capitals, to reflect the technical nature of the expression.

Annual Payments are subject to a set of rules which I call the " **Annual Payment code"**. The provisions are scattered across the Taxes Acts:

Topic	**Part/Chapter**	**Principal ss**	**See para**
Tax charge on payee	Chap 7 Pt 5 ITTOIA	s.683	31.5
Withholding tax on payor	Chap 6 Part 15 ITA	ss.900/901	31.10

Deduction for payor	Chap 4 Pt 8 ITTOIA	ss.448/449	31.11

The Annual Payment code gives a favourable outcome if:
(1) the payor obtains a deduction; and
(2) the payee is exempt, or the payee's tax rate is less than the payor's

This code can apply whether the payors are individuals, trusts or companies; but its application to individuals, once common, is now rare; application to trusts is also rare; so the most common case now would be its application to company payors.

I go beyond the themes of this book and address the topic as a whole.

31.2 Charge on income

In order to understand the law, one needs to understand the historical term "charge on income", and its tax treatment and rationale.

In *IRC v Frere*:[1]

> ... the annuity which is by legal right charged upon property, income primarily, capital by way of resort. A man comes in to the right to that income subject to the charge of the annuity. Under the tax system, as in ordinary thinking, his own income is reduced by the amount of the charge. The gross income accruing to him is divided in ownership right, a part equal to the annuity figure belonging to the annuitant, the balance to him. The reality of this situation was recognised and allowed for by the tax system, because, while the payer of the annuity was assessed and charged on the gross income, he was from the earliest days allowed to deduct from his payments [of the annuity] a proportionate part of the tax which he had borne or was to bear on the total. By this means his true taxable income was treated as being the residue left after the charge of the annuity, the burden of the tax being shifted from payer to recipient by the former's statutory right to recoup himself out of the payment due to the latter.
>
> This recognition of a division of ownership between two or more persons entitled to rights in a single "fund" of income was not, however, confined to such cases as those where there was ... an annuity charge. ... the tax system can be seen to go further than this, for it applied the same idea of division of proprietary right to situations in which legal distinctions draw no dividing line. Thus an annual payment secured by personal covenant only, involving no charge on any actual security, whether income or capital, was treated in the same way for tax purposes.

[1] [1965] AC 402

So the expression “charge on income” has two main senses:

(1) By etymology, and in property law, it suggests a right secured by a legal charge (or mortgage or similar security) over a right to income.

(2) In tax law, the meaning is extended to include an Annual Payment, payable out of income, under a personal covenant even though not secured by a legal charge.[2]

The history since 1969 has been a gradual reduction of charges on income within the former deduct and retain regime. Interest was taken out in 1969; and most Annual Payments were taken out by the Annual Payment exemption introduced in 1988. Gift Aid payments were taken out by the Tax Law Rewrite. Just a few dusty corners now remain.

In the Tax Law Rewrite, the term “charge on income” was sensibly retired,[3] and the old system of deduction and retention of tax was replaced by a system of deduction and relief (which is a simpler route to the same outcome).[4]

This is the historical context in which the meaning of the term Annual Payment has had to be ascertained. In taxation, as in life, the past is (almost) always present.

31.3 Annual Payment: Meaning

In *Hargreaves Lansdown v HMRC*:

> Section 683 ITTOIA 2005 imposes the charge on “annual payments” not otherwise charged but does not define the term. The predecessor legislation to section 683 did not define the term either, though an indication to its interpretation can be found to an extent in the previous language, which referred to “interest, annuities and other annual payments”, and, following the separate taxation of interest, “any annuity or other annual payment”.[5]

In the same case in the UT:

[2] The term “security” has seen a similar extension, originally suggesting secured debts but now including some unsecured debts.

[3] EN CTA 2010 comments on the old terminology: “749. For corporation tax purposes charges on income are now reduced to charitable donations only (see section 338A(2) of ICTA). A more accurate description [qualifying charitable donations] has therefore been substituted for "charges on income". The term "charges on income" was dispensed with for income tax purposes by ITA and this Act now follows that path.”

[4] See EN ITTOIA Change 82.

[5] [2018] UKFTT 127 (TC) at [39].

> [39] The term 'annual payment' is not further defined in legislation and its meaning is to be found in case law. ... the authorities establish that an annual payment is a payment which has four characteristics, as follows:
> (1) It must be payable under a legal obligation.[6]
> (2) It must recur or be capable of recurrence, although the obligation to pay may be contingent.
> (3) It must constitute income and not capital in the hands of the recipient.
> (4) It must represent 'pure income profit' to the recipient.

31.3.1 *Annual/capable of recurrence*

The word "annual" is misleading. It just means "of an income nature". Section 582(7) ITTOIA (encapsulating earlier case law) provides:

> The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of subsection (1).[7]

Hargreaves Lansdown v HMRC discusses "capable of recurrence":

> The authorities identify the characteristic in the context of establishing that a payment is not a "one-off" payment in the nature of capital, but has the "quality" of a payment which will or may recur. ...
> [74] The Loyalty Bonus payments were not only "capable of recurrence", but they did recur, over many months and for the periods in this appeal. They are not prevented from being recurrent by depending on a contingency, and, per *Smith v Smith*, were not prevented from being annual because they were made monthly provided they might continue beyond a month.[8]

31.3.2 *Pure income profit*

An Annual Payment must be assessed in the hands of the recipient as an Annual Payment. It must not be a mere item in an account from which the profits of the recipient are ascertained. This is expressed by saying the Annual Payment must be "pure income profit".[9]

In *Hargreaves Lansdown v HMRC* the FTT said:

[6] See 33.3 (Source/voluntary transaction).

[7] This only applies for the purposes of s,582(1) ITTOIA but the provision is repeated elsewhere where needed; see s.683(3) ITTOIA.

[8] This passage was approved by the UT at [43].

[9] *Earl Howe v IRC* 7 TC 289; *Re Hanbury* 38 TC 588.

> [77] The requirement for the receipt to be pure income profit lies at the heart of what is meant by an "annual payment". It is therefore critical to understand the underlying rationale which led the courts to lay down this principle. It does not focus on the position of the payer, and in particular does not depend on an element of gratuity or bounty on the part of the payer. Rather, it is driven by the application of the deduction at source mechanism to annual payments. Under that mechanism someone other than the taxpayer (namely the payer) must collect and discharge all or part of the taxpayer's liability for the receipt. That mechanism would operate improperly if the payment comprised anything other than a gross receipt of the payee. The rather archaic phrase "pure income profit" is no more than shorthand for this principle.

The UT approved this and said:

> 59. ... the category of annual payments is limited and the reason for the limitation lies in the fact that annual payments have been inseparably associated with payments from which tax is deductible. It has been thought to be inconsistent with the idea of tax being deducted at the source to allow payments that are likely to be gross receipts of the payee and not "pure income profit" to be classed as annual payments...[10]
> 60. Where the payee is a trader, the concept is easy to grasp in principle. ... the much-quoted example given by Scrutton LJ in *Earl Howe v CIR* 7 TC 289 at page 303:
>
> > It is not all payments made every year from which Income Tax can be deducted. For instance, if a man agrees to pay a motor garage £500 a year for five years for the hire and upkeep of a car, no one suggests the person paying can deduct Income Tax from each yearly payment. So, if he contracted with a butcher for an annual sum to supply all his meat for a year, the annual instalment would not be subject to tax as a whole in the hand of the payee, but only that part of it which was profits.
>
> 61. ... the question becomes more difficult where, as in this appeal, the recipient is not a trader. [Counsel for the taxpayer] relies on what was said by the Court of Appeal in *CIR v National Book League* 37 TC 455, a case concerning covenants entered into by members of the League to pay their subscriptions and whether payments made under those covenants were annual payments. The Crown had contended that the payments were received in consideration of the annual provision of goods and services and were not annual payments. At page 473 Lord

[10] See *CIR v Whitworth Park Coal Co* 38 TC 531 at p.575.

Evershed MR placed emphasis on the counter-stipulations on the part of the League to provide membership benefits as follows:

> "The question, therefore, as I see it, turns first upon this: looking at the substance and reality of the matter, can it be said that those who entered into these covenants have paid the sums covenanted without conditions or counter stipulations? On the whole I have come to the conclusion that they cannot so say. It seems to me that against the special background of this case, and having regard to the terms of the letter, there was here, in a real sense, a condition or counter stipulation on the part of the League against which the covenant was entered into. Without repeating what I said at the beginning of this judgment, I must guard myself again saying that whenever you find a covenantor in favour of a charity getting aloud to him certain privileges it therefore follows that such a covenant or no longer can say that he has paid without conditions or counter stipulations."

62. However, it is clear that the presence of counter stipulations is only one of the circumstances to be considered. This point was emphasised by the House of Lords in *Campbell v CIR*:

> "The truth is, in my opinion, that one cannot resolve the problem whether a payment is an annual payment… simply by asking the questions "Must the payee give or do something in return?" or "Did the payer make some counter-stipulation or receive some counter-benefit?" or "Was it pure bounty on his part?" Such questions come more easily to the mind perhaps where, as here, payment to a charity is involved. But there is no warrant in the Income Tax Acts for applying a special test in the case of charities. The test must be applicable to all annual payments; and the problem must continue to be resolved, in my opinion, on the lines laid down by Scrutton LJ in *Earl Howe's* case. One must determine, in the light of all the relevant facts, whether the payment is a taxable receipt in the hands of the recipient without any deduction for expenses or the like—whether it is, in other words, "pure income" or "pure profit income" in his hands, as those expressions have been used in the decided cases. If so, it will be an annual payment ... If, on the other hand, it is simply gross revenue in the recipient's hands, out of which a taxable income will emerge only after his outgoings have been deducted, then the payment is not such an annual payment…The test makes it necessary to decide each case on its own facts."[11]

[11] 45 TC 427 at p.475.

How precisely does one decide whether a payment is pure income, or whether it is a "mere item in an account from which the profits of the recipient are ascertained"?

It has been said that one must look at the "quality and nature" of the payments but that by itself does not take the matter very much further.

Where the recipient is carrying on a trade, and the payment is a trading receipt then the payment obviously cannot be pure income. The colourful examples of Scrutton LJ are in this category

British Commonwealth International Newsfilm Agency Ltd v Mahany 40 TC 550 is another example of trading receipts. Payments to subsidise losses of the agency were held to be trading receipts. The payments were not for consideration and the payer did not receive any direct benefit; this might have suggested the payments were Annual Payments, but was overridden by other factors: both payer and payee were traders; the documentation suggested the payments were trade receipts; the payee was not a charity and not restricted to charitable activity.

However, the test is not simply to ask whether a receipt is a trading receipt. While no trading receipt can be an Annual Payment, other factors may show that a non- trading receipt may also fail to qualify as an Annual Payment. In *Essex County Council v Ellam* 61 TC 632 covenanted payments were made to the council which used them to pay a child's school fees. It was held that the council could deduct the school fees from its receipt under the covenant; so the covenanted payments were not "Annual Payments". The key factor in the decision, it is submitted, was that (i) the payments were "earmarked" for the purpose: (ii) the covenanted payment was fixed by reference to the school fees and (iii) there was no benevolent or charitable intention.

There are two cases on the other side of the line, both reported in 34 TC. Both were trading cases; in each case the Annual Payment was held not to be a trading receipt and to qualify as "pure income".

The first is *IRC v Corporation of London (as Conservators of Epping Forest)* 34 TC 293. Here the recipient received payments to cover its losses in managing Epping Forest. The receipt was an Annual Payment. The deciding factor was that the payments were not in return for services, but"of a benevolent nature... primarily to achieve a public benefit of a charitable nature."

The other case is *Leahy v Hawkins* 34 TC 28. Here a doctor received payments in lieu of a pension scheme. It was a condition of the payment that the doctor paid his own pension premiums. The payment was an Annual Payment. The deciding factor was that the amount of the payment bore no close relation to the amount the doctor had to pay under his own pension arrangements.

Unfortunately for taxpayers and their advisers, the Courts have declined to follow "the slippery slope of trying to define what 'Annual Payment' means".[12] It seems there is no single general principle at all, but rather, a number of different considerations which may apply in different circumstances. The best guidance in the context of normal charitable covenants is in Lord Reid's speech in *Epping Forest*, where he drew a distinction between:

(1) "business payments, whether or not the payor gets any direct return" and

(2) "payments of a benevolent nature - not of a business nature".

It has to be said that this is a vague test. In a marginal case, the charity fundraising literature will be relevant and should be reviewed by someone familiar with the law before fundraising commences.

The mere fact that a person receives a benefit as a consequence of making a covenant does not of itself prevent the covenanted payment from qualifying as an Annual Payment.

Ball v National & Grindlays Bank is an illustration. In this case, the bank made covenants to children of employees. The CoA noted that the bank had obtained "very considerable benefit" thereby, it had "good value for its money". Nevertheless, it was accepted that the covenanted payments were "Annual Payments".

Duke of Westminster v IRC offers another illustration. The Duke made covenants to employees. He received a benefit in consequence: the employees accepted less than their full salary, because they received the covenanted payments. However, the Duke's payments under the covenants were "Annual Payments".

The source of confusion is *IRC v The National Book League* 37 TC 455 where the judgment of Lord Evershed MR is confused and confusing. At one point he expounded the Earl Howe rule in these words:

> Looking at the substance and reality of the matter, can it be said that those who entered into these covenants have paid the sums covenanted without conditions or counter-stipulations?

[12] Harman J in *Leahy v Hawkins*.

This formula was adopted as the correct test in *Taw & Torridge Festival Society v IRC* 38 TC 603. It might be taken as support for a pure bounty rule. That was, however, rejected by the House of Lords in Campbell.

Even in *The National Book League* Lord Evershed rejected a pure bounty rule:

> I must guard myself against saying that whenever you find a covenantor in favour of a charity getting allowed to him certain privileges it therefore follows that such a covenantor no longer can say that he has paid without conditions or counter-stipulations.

The question was settled by the House of Lords in *Campbell v IRC.* Campbell raises a number of difficulties. However, there is no doubt that the pure bounty rule - for which the Revenue contended - was decisively rejected. Thus Lord Donovan at p 475:

> The truth is, in my opinion, that one cannot resolve the problem whether a payment is an annual payment within Case III simply by asking the questions 'must the payee give or do something in return?' or 'did the payer make some counter-stipulation or receive some counter-benefit?' or was it 'pure bounty on his part?' Such questions come more easily to the mind perhaps where, as here, payment to a charity is involved. But there is no warrant in the Income Tax Acts for applying a special test in the case of charities. The test must be applicable to all annual payments: and the problem must continue to be resolved, in my opinion, on the lines laid down by Scrutton LJ in *Earl Howe's* case. One must determine, in the light of all the relevant facts, whether the payment is a taxable receipt in the hands of the recipient without any deductions for expenses or the like - whether it is, in other words 'pure income' or 'pure profit income' in his hands, as those expressions have been used in the decided cases. If so, it will be an annual payment under Case III. If, on the other hand, it is simply gross revenue in the recipient's hands, out of which a taxable income will emerge only after his outgoings have been deducted, then the payment is not such an annual payment.[13]

[13] Lord Guest made a similar comment: "It is apposite to note that Lord Normand [in the *Epping Forest* case 34 TC 293] did not say that if the payment was made with a condition or stipulation of a non-contractual character the payment would not be an annual payment. I can see no ground or reason or authority why there should be such a narrow construction of 'annual payment'..."
Viscount Dilhorne made similar comments at p 460, and Lord Upjohn at p 472.

31.3.3 *Dividend not Annual Payment*

In *Canadian Eagle Oil Co v The King*:[14]

> dividends, even dividends upon preference shares... are not "annual payments", their distribution depending in every instance upon a specific declaration by the company.

But this is now of historical interest only, as a new system of taxation of dividends was introduced in 1965.

31.3.4 *HMRC examples*

SAIM8050 provides 4 examples:

Example:	**Facts**	**Comment**
1:	Royalty after death of trader	See 31.4 (Post-cessation trade receipt)
2:	Foreign source covenanted payments	Annual Payments
3:	Credit card cashback	Not Annual Payments
4:	Murabaha (Islamic interest-substitute)	Annual Payments

> **Example 2** (Vivienne - Covenanted payments for consideration)
> V, a UK resident, travels to the US to negotiate with a boat-building company, and buys an ocean-going yacht from them for $2.6 million. In order to clinch the deal, the salesman makes an offer (later confirmed in writing by the company) to pay V $60,000 a year for the next 5 years. Although the payments are expressed as a contribution towards the running costs of the yacht, there is no obligation on V to spend them in any particular way. She accepts the offer.
> The agreement constitutes a legally enforceable contract, even though it is only documented informally. The payments are made in consideration of V's purchase of the boat. Once she has made the purchase, however, she does not have to do anything further in order to receive the payments (see the discussion of conditions and counter-stipulations at SAIM8040). They are therefore annual payments. Since the payments do not originate in the UK, V does not receive them with income tax taken off, and she must pay tax at both basic and higher rates on the income (although she can claim relief for any US withholding tax).

More analytically, since the payments do not arise in the UK, the Annual Payment exemption does not apply.

[14] 27 TC 205 at p.245.

Example 3 (William - Credit card cashback)
W signs up for a credit card offering a 'cashback' feature. Twice a year, the issuer credits to the card an amount equal to 1% of the payments W has made in the previous 6 months. Such credits are not annual payments. Each payment is contingent on his having charged amounts to the credit card in the previous period. In essence, each payment represents a one-off rebate of amounts that W has paid to the card issuer. Any future cashback received will be dependent on the cardholder making more purchases with the card and no further cashback will be received if there are no future card transactions.

Example 4 (Tariq & Mohammed - Murabaha (Islamic interest-substitute) outside alternative finance code)
T, a carpenter, requires £12,000 to build a workshop on to his house, for the purposes of his trade. His uncle, M, agrees to advance him the funds, but for religious reasons he does not wish to make an interest-bearing loan to T. They therefore enter into a murabaha contract (see CFM11130). Under the agreement, M buys commodities for £12,000 and sells them to T, who immediately sells the commodities back into the market for £12,000, thus realising the necessary funds. However, under the terms of his purchase from M, he is granted 'credit terms', paying 48 monthly instalments of £275, a total of £13,200.
The arrangement does not fall within the alternative finance arrangement legislation in at ITA07/S564C, because M is not a 'financial institution'. M does not habitually deal in commodities: while it is possible for an isolated transaction of purchase and resale to be a trading transaction (see BIM20230) and each case must be judged on its own merits, the return of £1,200 which he derives from the transaction is unlikely to be a trading profit.
If it is not trading income, the £300 received by M each year, which is over and above 'repayment' of the capital sum advanced, will be an annual payment - it is pure income profit in M's hands.

31.4 Post-cessation trading receipt

A number of old (pre-1960) cases discuss the position after a cessation of trade. In each case the cessation was on the death of a trader (the PRs or legatee did not carry on the deceased's trade). But the same would apply on a retirement.

31.4.1 *Post-cessation receipt formerly exempt*

Until 1960 there was no charge on post-cessation receipts, so the question was not to chose between two categories of taxable income, but whether the receipt was taxable at all. See *Bennett v Ogston*:

> When a trader or a follower of a profession or vocation dies or goes out of business - because [Counsel] is quite right in saying the same observations apply here - and there remain to be collected sums owing for goods supplied during the existence of the business or for services rendered by the professional man during the course of his life or his business, there is no question of assessing those receipts to Income Tax; they are the receipts of the business while it lasted, they are arrears of that business, they represent money which was earned during the life of the business and are taken to be covered by the assessment made during the life of the business, whether that assessment was made on the basis of bookings or on the basis of receipts.[15]

31.4.2 *Post-cessation interest*

In *Bennett v Ogston* the taxpayer carried on the trade of moneylender, and during his lifetime, interest was treated as a receipt of the trade, not as interest.[16] But interest received after the death was taxable as interest:

> When you are dealing with interest, it is true that under certain circumstances, in this case among others ... though you may treat the interest as the mere receipts of a trade and not as interest itself, I think it is quite impossible to say that interest which has to be borne next year, although you may have to secure it by a dealing this year, can be treated as a profit of this year. I do not understand that; I do not think that is possible. I think when you deal with interest as a receipt of a trade you must deal with it year by year, and the interest, as it comes in in the year as a receipt from the trade, if you like. If the trade stops then the securities which are outstanding which bear interest become securities apart from the trade, and interest upon them must bear Income Tax.[17]

31.4.3 *Post-cessation Annual Payments*

Bennett v Ogston sets the scene for 3 cases concerning professional actors/authors.

[15] 15 TC 374 at p.378. This passage was approved in *Purchase v Stainer* 32 TC at p.410 and at p.412.

[16] But during the trader's lifetime, the choice between interest/trading receipt would not have made a great deal of difference.

[17] At p.379. But in *Purchase v Stainer* HL had "some doubt" as to whether this was a correct application of the principle set out just above; and in *Carson v Cheyney*, Lord Reid shared that doubt: 38 TC at p.265.

The first was *Purchase v Stainer*. This concerned the actor/film director Leslie Howard.[18] His executors received contractual payments for his work. These were held not to be Annual Payments:

> How else could these sums come to the hands of Mr. Howard or his executors than as the remuneration for his professional activities, the reward for services rendered by him during his life and unpaid for at his death? It appears to me wholly irrelevant that they were not payable until after his death and equally so that they were not and could not be quantified until after that event. They retained the essential quality of being the fruit of his professional activity...
>
> The source of these payments was the professional activity of Mr. Howard: it was never anything else. It is true that his remuneration took the form of annual payments which, if other conditions were satisfied, might fall within Case III. But other conditions were not satisfied, for *ex hypothesi* the source of the remuneration was the exercise of a profession falling within Case II.

The decision is that these payments were not Annual Payments.

And again:

> If Mr. Leslie Howard had stipulated for payment in blocks of shares or bonds, or any other instruments which by their independent vitality generate income, the dividends or interest might well have been taxable in the hands of his executors. The contracts in the present case enjoy, in my view, no such independent vitality. The consideration for what Mr. Howard was to do - to act or manage - was not the grant of a contract or contracts but the payment of money under the terms of those contracts. Mr. Howard acted for money: he did not act for contracts. The contracts were mere incidental machinery regulating the measure of the services to be rendered by him on the one hand, and on the other, that of the payments to be made by his employers: they were not the source but the instrument of payment. and his death, in my view, did nothing to divest them of that character.[19]

In two subsequent cases the Courts expanded the scope of this principle (or, depending on one's perspective, they chose not to restrict it). I refer to these as the authorship cases.

The first of the two is *Carson v Cheyney*. This concerned the author

[18] His stage name was Leslie Howard; his full name was Leslie Howard Stainer. Howard is best known for his role as Ashley Wilkes in *Gone with the Wind*.

[19] at p.412.

Peter Cheyney, a detective fiction writer. The difference between *Stainer* and *Cheyney* was that Stainer concerned mere contractual payments for services as an actor; Cheyney received *royalties for his copyright.* An author, unlike an actor, generally holds the copyright. But it made no difference to the outcome. In both cases, the payments were post-cessation receipts of the profession, not Annual Payments, and they did not become Annual Payments after the death:

> In *Stainer's* case it could not be denied that the taxpayer acquired under his contracts certain contractual rights nor that those rights could in a certain context be called property. So it was argued that the payments were the income and the contracts were the "income-bearing assets". ... What else were these payments than the fruit of Peter Cheyney's professional activities? How is it relevant that in order to reap his harvest he had to enter into contracts under which he acquired rights and incurred obligations...? And how is it relevant that it was a term of those contracts that there should be vested in the publishers a right created by the law to protect him in the exploitation of his work? It was by entering into such contracts that he was able to carry on his profession gainfully. It was cause he did so that he was assessable to tax under Case II of Schedule D. I reject therefore the plea that the royalty payments could, whether during the carrying on of the 'profession or after its discontinuance, be regarded as "income from property" constituting "a substantive subject matter of taxation under Schedule D" - I use the words of the Crown's formal Case. I will only add, in deference to the ingenious argument of the Attorney-General, that the realities of the situation are not changed by saying that the royalties were throughout paid in consideration of the grant of a licence to use copyright and were therefore the income of property, that during the carrying on of the profession they could be regarded as income under Case VI, but that having always the character of income of property they became taxable in that character when the profession was no longer carried on. This is really only saying the same thing in other words and is to be similarly answered. First and last and all the time the payments are professional earnings, whatever be the mechanism through which they are paid.[20]

And again:

> An author is not in my opinion making a contract for services by entering into an agreement for the publication of a book already created

[20] 38 TC 240 at p.259.

by him. The position may approximate to a contract for services where the author binds himself to write a book and to transfer the copyright to a publisher, but I do not find in the agreements here any obligation to write a book. ... I prefer to treat the case from the angle of approach taken by the learned Attorney-General, that these are agreements relating to property of Mr. Cheyney already in existence or to come into existence.

In principle there is no difference between the case where an author sells the copyright and the case where he retains the copyright. What he has produced is not copyright but a book. Copyright is an incident attached by law to the book, fortifying that which he has produced and giving it a value which it would not have if it could be reproduced illegitimately in the shape of pirated editions. The property then from which the author obtains his income is the work produced by him, and the method by which that work can be turned to profit during his life is in his own hands and is but a projection of his professional activities, the means by which he earns his livelihood from his professional work. If I take the case where he retains the rights in his work and takes the profits to himself, it seems to me clear that when he dies any profits that come in afterwards from any issue published during his life are still the profits of what was his profession. It is not possible to say that they are mere income of property, "pure income profit" as it has been called. They are profits not only from writing the book but from bearing all the expenses of selling the book to the public, including the expenses of printing and publishing. They are akin to the profits of a trade but are more properly called the profits of a profession. So it is in my opinion where he sells his rights in return for royalties. It is quite unreal to regard these royalties merely as a return from property. They are the reward for all he has put into his work, his labour, his thought, his skill as a writer, and the expenses incurred in creating his book. The position is materially different where rights in a book in return for royalties are granted by another than the author. The elements to which I have referred are entirely absent in such a case. The book is there already made, and the idea of royalties as merely the income of property is a more intelligible conception. In Mr. Cheyney's case the position is in my opinion accurately and concisely summed up in the words of Jenkins, L.J., when he says

"it was just as much part of his profession to turn his literary lab ours to account by licensing the copyright he had created to publishers as it was to write the books in which the copyright subsisted."

He was treated by the Crown as earning money in the exercise of his profession by means of the contracts he made. It is not now said, nor

> could it in my opinion be said, that any change in the character of the payments received took place on his death.

The second of the authorship cases is *Home v Asquith*. This concerned the author Sir James Barrie, best known for *Peter Pan*. Barry bequeathed his copyrights (though not Peter Pan) to his secretary Lady Asquith. Lady Asquith assigned them to her son. So the difference between the earlier two cases and *Asquith* was that the payments were not received by the PRs. They were received by a legatee, (or more accurately, by an assignee of the legatee, but nothing turned on that.) The income was *still* not Annual Payments, and not still chargeable under sch D III (or at all):

> Once the royalty contract comes into the hands of someone else, it is said, then the reasoning in *Stainer's* case and *Cheyney's* case has no application, one is left with a simple contract under which annual sums are payable, and in the hands of the owner of that contract the contract is a source of taxable income. I find it impossible to accept that contention consistently with the reasoning in the two cases. The reasoning in the two cases, as I understand it, is that, where an author enters into such a contract, that contract represents merely the machinery whereby he collects the return for his professional activities... It seems to me that, if that was the quality of the contracts in the hands of the author himself and of his personal representatives, who are in the same position, there could be no change in the quality of the contracts by reason of the fact that the benefit of the contracts passed from the personal representatives to a beneficiary under a will, or at a later stage from the beneficiary to someone in whose favour he disposes of the benefit of the contracts. If, immediately before the assent in favour of the beneficiary, a royalty contract possessed no in dependent vitality and was merely incidental machinery for the recovery of the payments due to the author, it seems to me that immediately after the assent the quality of the royalty contract was exactly the same. I do not see how it can be said that by reason of the assent in favour of the beneficiary the royalty contract in some way changed its character. What the beneficiary received upon the assent was a piece of machinery[21] for collecting outstanding payments due to the deceased author. Unless the contract possesses independent vitality as a source of income, it is perfectly clear that payments received under it, representing as they do no more than outstanding receipts of the discontinued profession, do not possess the

[21] See App.1.7 (Machinery/mechanism metaphor).

character of taxable income in the hands of anyone.[22]

31.4.4 *The policy background*

The reader may find these 3 decisions surprising. Of course the Courts were not then applying the contemporary purposive approach, but even a traditional approach could have gone the other way. It is likely that one factor behind the decisions was an unspoken policy consideration, that tax free post-cessation receipts were a form of retirement benefit, at a time when there was no general scheme for retirement benefits for the self-employed.[23]

There is now a charge on post-cessation receipts, which would apply to executors, legatees and assignees. However the author cases are relevant to withholding tax. They do show that the receipts are not Annual Payments, and are not subject to withholding tax as Annual Payments. They are also said to show that professional receipts in the circumstances of *Stainer*, *Cheyney* and *Asquith* are not royalties, and so not subject to withholding tax as royalties.[24]

31.4.5 *HMRC example*

The SAI Manual provides this example:

> **SAIM8050 examples of annual payments**
> **Example 1** (Peter & Teresa - Royalty after death of trader)
> P carries on a trade as a software developer and software consultant. In the course of the trade, he develops a suite of computer programs in which there is commercial interest. He sets up a company, of which he and his wife T are directors, to exploit and market the software.
> P enters into a licensing agreement granting the company a 25-year licence on the source code and intellectual property rights in the software, in exchange for a licence fee paid quarterly. The agreement does not require him to further develop or maintain the software, or supply technical advice to users - this is all done by the company.
> The licence fees received by P are agreed to form part of the income of his trade as a software developer, and are included in the amount he returns as trading profits. However, P dies, and under the terms of his will, the intellectual property and the benefit of the licence agreement

[22] 45 TC 251 at p.265.

[23] Royal Commission on the Taxation of Profits and Income Cmd. 9474 (1955) chapter 12.

[24] See 32.14 (Professional authors).

> pass to T.
>
> T does not carry on a trade of her own, and any work she does in connection with the software is done in her capacity as a director of the company. In her hands, the licence fees are annual payments. This is because the company is legally obliged under the licensing agreement to pay them, they are recurrent, and - in particular - they represent pure income profit to T. She does not have to do anything to earn them, and does not have to set outgoings against them.
>
> The company is now making annual payments, and must deduct income tax at the basic rate from the licence fee payments and account for it on form CT61 (see SAIM9000 onwards).
>
> T must enter the annual payments received in a tax year as 'other taxable income' on her self assessment return. If she is liable to tax only at the basic rate, she has no more tax to pay on the sums she receives.

In the light of the authorship cases, this is not correct. The receipts are not Annual Payments, but they are in principle taxable as post-cessation receipts. Has the author of this passage overlooked those cases? or chosen to ignore them? The author of the BIM acknowledges the question but does not stay for an answer:

> **BIM50725 Authors And Royalties To Person Other Than Author**
> [Jan 2019]
>
> Where it is claimed that royalties are not chargeable because of the decision in *Hume v Asquith* [1968] 45 TC 251, the case should be referred to Business Profits (Technical).

31.5 Charge on Annual Payments

Charging provisions on Annual Payments are scattered across ITTOIA:

ITTOIA	**Applies to**	**See para**
s.589	Royalties	32.5
Chapter 7 Part 4	Purchased life annuity	38.18
Chapter 4 Part 5	Telecommunication rights	-
s.683	Annual Payment not otherwise charged	*Discussed here*

Section 683(1) ITTOIA provides:

> Income tax is charged under this Chapter [Chapter 7 Part 5 ITTOIA] on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act.[25]

[25] For this style of charging provision, see 11A.3.1 (Priority in charging provision).

31.5.1 *Beneficiary on remittance basis*

Section 684 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the annual payments arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis if the Annual Payments have a foreign source.

Section 684(3) ITTOIA provides:

> The amount charged under this Chapter in the case of certain payments made by trustees in the exercise of a discretion is subject to section 494 of ITA 2007 (grossing up of discretionary payments from trusts).

31.5.2 *Reliefs for AP charge*

Section 683(4) signposts a list of reliefs against this charge:[26]

ITTOIA	**Outline**	**See para**
ss.727 -730	Annual Payments exemption (for individuals)	31.6
s.731	Personal injury damages	
s.732	Compensation awards	
s.734	Payments from trusts for injured persons	
ss.735 - 743	Health and employment insurance	
ss.744 - 747	Payments to adopters	
ss.757 - 767	EU Interest royalty directive	
s.776	Scholarship income	

Most of the reliefs in this list are of somewhat specialist interest, and not discussed here.

31.5.3 *Source of Annual Payments*

The location of the source of Annual Payments matters for the usual reasons, in particular:

(1) A non-resident is not taxed on foreign source Annual Payments

(2) Foreign source Annual Payments are RFI and qualify for the remittance basis

(3) Foreign source Annual Payments are outside the scope of withholding tax

[26] For clarity I have set this out in tabular form rather than the layout of the statute.

As the Annual Payment exemption only applies to UK source Annual Payments, it may happen that a taxpayer argues an Annual Payment has a UK source, and HMRC argue for foreign source.

There is not much authority. In *Bingham v IRC* 36 TC 254 a Dutch court ordered a UK resident individual to make maintenance payments to his ex-wife resident in the Netherlands. The payments were not UK source income.[27]

If Annual Payments are made in respect of the use of royalties, the situs should be the situs of the copyright.[28]

31.6 Annual Payment exemption

Section 727 ITTOIA provides:

> (1) No liability to income tax arises under Part 5 [ITTOIA Miscellaneous Income] in respect of an annual payment if it–
> (a) is made by an individual,[29] and
> (b) arises in the UK.
> (3) Subsection (1) also applies to a payment made by an individual's personal representatives if–
> (a) the individual would have been liable to make it, and
> (b) that subsection would have applied if the individual had made it.

I refer to this as the **"Annual Payment exemption"**.

The consequence of exempting Annual Payments is that withholding tax does not apply. That may suit the payor as well as the payee.

31.7 Commercial Annual Payment

Section 728 ITTOIA provides:

> A payment by an individual is not exempt from income tax under section 727(1) if it is made for commercial reasons in connection with the individual's trade, profession or vocation.

The paradigm example is an annuity payable to a retiring partner on

[27] Had the wife been UK resident, she would now qualify for the relief for foreign maintenance payments.

[28] See 32.7 (Source of non-trade IP income).

[29] Section 727(4) ITTOIA provides: "For the purposes of subsection (1) and section 728, "individual" includes a Scottish partnership if at least one partner is an individual." Strange.

purchase of a partnership share by the continuing partners. This used to be a common practice, I think. It is commercially attractive to the continuing partners, as they avoid the cash flow problems of raising a lump sum, and obtain an IT deduction. If the retiring partner's marginal IT rate is less than the continuing partners, it would be attractive from a fiscal viewpoint, and otherwise it is at least neutral in IT terms; and it avoids CGT on the disposal. But I wonder how often it is done, nowadays.

See 31.10.3 (Imposition of withholding tax).

31.8 Non-taxable consideration

Section 729 ITTOIA provides:

> (1) A payment that meets condition A is only exempt from income tax under section 727(1) if condition B or C is met.
> (2) Condition A is that–
> (a) the payment is made under a liability incurred at any time for consideration in money or money's worth, and
> (b) some or all of the consideration is not required to be brought into account in calculating the payer's income for income tax purposes.

If condition A is met, we turn to the escape conditions B and C:

> (3) Condition B is that the payment is income within section 627(1) (payments on dissolution or separation) in the recipient's hands.[30]
> (4) Condition C is that the payment is made to an individual under a liability incurred at any time in consideration of the individual surrendering, assigning or releasing an interest in settled property[31] to or in favour of a person with a subsequent interest.

Conditions B and C are of somewhat specialist interest. So an Annual Payment under a covenant made for non-taxable consideration is a trap which may unexpectedly bring the Annual Payment code into effect.

31.9 Foreign maintenance payments

The Annual Payment exemption only applies to UK source income: can

[30] See 47.6 (Settlor-interested trust: Reliefs).

[31] Section 729(5) deals with Scots terminology: "In the application of subsection (4) to Scotland, the reference to settled property is to be read as a reference to property held in trust." Is this actually necessary?

any reader explain why? The restriction may not be EU-law compliant; but the point is not likely to arise.

So s.730 ITTOIA provides a further relief, but limited to foreign maintenance payments:

> (1) No liability to income tax arises under Part 5 in respect of an annual payment if–
>
> (a) it is a maintenance payment,[32]
>
> (b) it arises outside the UK, and
>
> (c) had it arisen in the UK it would be exempt from income tax under section 727 (certain annual payments by individuals).[33]
>
> (6) Subsection (1) also applies to a payment made by an individual's personal representatives if–
>
> (a) the individual would have been liable to make it, and
>
> (b) that subsection would have applied if the individual had made it.

31.10 Annual-Payment withholding tax

For a general introduction to withholding taxes, see 26.18 (Withholding taxes: Introduction).

Section 903 ITA deals with patent royalties: I do not discuss this here.

31.10.1 *Qualifying Annual Payment*

This term matters because "qualifying Annual Payments" are subject to Annual-Payment WHT.

Section 899 ITA provides:

> (1) In this Chapter [Chapter 6 Part 15, Annual Payments withholding tax] "qualifying annual payment" means an annual payment that meets the conditions in subsections (2) to (5).

[32] Defined in ss(2) "In subsection (1) "maintenance payment" means a periodical payment which meets conditions A and B.
(3) Condition A is that the payment is made under a court order or a written or oral agreement.
(4) Condition B is that the payment is made by a person–
(a) as one of the parties to a marriage or civil partnership to, or for the benefit of, and for the maintenance of, the other party,
(b) to any person under 21 for that person's own benefit, maintenance or education, or
(c) to any person for the benefit, maintenance or education of a person under 21."

[33] See 33.5 (Settlor-interested trust: Reliefs).

(2) The payment must arise in the UK.

Subsections (3)/(4) deal with non-company/company recipients.[34] It is helpful to see them side by side:

Non-company recipient: s.899(3) ITA	**Company recipient: s.899(4)**
(3) If the recipient is a person other than a company, the payment[35] must be—	(4) If the recipient is a company, the payment must be—
(a) a payment charged to income tax under— (i) Chapter 7 of Part 4 of ITTOIA 2005 (purchased life annuity payments), (ii) section 579 of that Act (royalties etc from intellectual property), (iii) Chapter 4 of Part 5 of that Act (certain telecommunication rights: non-trading income), or (iv) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged), or	(a) a payment charged to income tax as mentioned in subsection (3)(a), [This can only apply to a non-resident company recipient as UK companies are charged to CT] or
(b) a payment charged to income tax under Part 9 of ITEPA 2003 because section 609 or 611 of that Act applies to it (certain employment-related annuities).	
	(b) a payment which is— (i) required to be brought into account under Part 5 of CTA 2009 (loan relationships) as a non-trading credit, or
	(ii) from a source in the UK and chargeable to corporation tax under [a] Chapter 7 of Part 10 of that Act (annual payments not otherwise charged) or [b] regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.

31.10.2 *Annual Payments outside WHT*

Section 899(5) ITA sets out 6 categories of payments which are not

[34] So it is necessary to ascertain the recipient; see 26.21 (To whom is interest paid).

[35] For the meaning of payment, see 15.3 (Recognition/attribution: Analysis).

qualifying, and so not subject to Annual-Payment WHT:

The payment must not be—[36]

Para	Type of payment
(a)	Interest
(b)	Corporate gift aid: qualifying payment for Chapter 2 Part 6 CTA 2010
(c)	Individual gift aid: qualifying donation for Chapter 2 Part 8 ITA
(d)	Discretionary trust income: within s.494(3) ITA[37]
(e)	A payment which would fall within paragraph (d) but for the fact that the trustees making the payment are non-UK resident
(f)	Annual payment for dividends or non-taxable consideration: s.904 ITA

Items (a)-(c) are not Annual Payments, so these paragraphs are otiose. They are there for historical reasons.

31.10.3 *WHT on Annual Payments*

Withholding tax on qualifying Annual Payments is imposed by s.900/901 ITA for individuals/non-individual payors, and it is convenient to read them side by side:

Individual payor: s.900 ITA	Non-individual payor: s.901 ITA
(1) This section applies to any payment made in a tax year if—	(1) This section applies to any payment made in a tax year if—
(a) it is a qualifying annual payment,	[identical]
(b) the person who makes it is an individual, and	(b) the person who makes it is not an individual.
	(2) But this section does not apply if— (a) an individual's personal representatives make the payment, (b) the individual would have been liable to make it if the individual had not died, and (c) the payment would not have been made for genuine commercial reasons in connection with the individual's trade, profession or vocation, had it been made by the individual.

[36] For clarity I set this out in tabular form, and in the terminology of this book, rather than the layout of the statute.

[37] See 41.4.1 (UK resident trust).

(c) it is made for genuine commercial reasons in connection with the individual's trade, profession or vocation.

The circumstances in which an individual is subject to Annual-Payment WHT are very limited. The paradigm example is an annuity payable to a retiring partner on purchase of a partnership share by the continuing partners.

Assuming Annual-Payment WHT does apply, we move on:

Individual payor: s.900 ITA	**Non-individual payor: s.901 ITA**
(2) The individual must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year.	(3) If the person who makes the payment has some modified net income for the tax year (see section 1025)— (a) the person must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year, and
(3) Income tax equal to the sum required to be deducted is to be collected through the individual's self-assessment return (see Chapter 17).	(b) income tax equal to the sum required to be deducted is to be collected through the person's self-assessment return (see Chapter 17).
	(4) If the person who makes the payment has no modified net income for the tax year the person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which the payment is made.

31.10.4 *Annual-Payment/Royalty WHT: Priority*

Section 906(8) ITA provides:

> If a payment to which this section applies is also one to which a provision of Chapter 6 applies, it is treated as not being a payment to

which a provision of Chapter 6 applies.

So if a payment falls within Chapters 6 and 7, then Chapter 7 has priority. See 32.10 (Royalty withholding tax).

31.11 Relief for payor within WHT

Relief for individual: s.448 ITA	**Relief for non-individual: s.449 ITA**
(1) This section applies to a payment made in a tax year if— (a) the person who makes it is an individual, (b) a sum representing income tax is required by section 900(2) (deduction from annual payments) to be deducted from it, and (c) the payment is not deductible in calculating the individual's income from any source.	(1) This section applies to a payment made in a tax year if— (a) the person who makes it is not an individual, (b) a sum representing income tax is required by section 901(3) (deduction from annual payments) to be deducted from it, and (c) the payment is not deductible in calculating the person's income from any source.
(2) The individual is entitled to relief for the tax year equal to the gross amount of the payment.	(2) The person who makes the payment is entitled to relief for the tax year equal to the gross amount of the payment.
(3) But this is subject to the restrictions in subsection (4)	(3) But this is subject to the restrictions in subsections (4)[38] and (5)
(4) The total amount of relief given under this section to an individual for a tax year cannot be greater than the amount of the individual's modified net income for the tax year (see section 1025).	(5) The total amount of relief given under this section to a person for a tax year cannot be greater than the amount of the person's modified net income for the tax year (see section 1025).
(5) The relief is given by deducting the amount of the relief in calculating the individual's net income for the tax year (see Step 2 of the calculation in section 23).	(6) The relief is given by deducting the amount of the relief in calculating the person's net income for the tax year (see Step 2 of the calculation in section 23).

[38] See 31.11.1 (Non-individual: additional rule).

31.11.1 *Non-individual: additional rule*

Section 449(4) ITA provides:

> Relief is not given for the payment so far as it is ineligible for relief (see section 450).

That takes us to s.450 ITA:

> (1) This section sets out the circumstances in which a payment to which section 449 applies, or part of it, is ineligible for relief.
> (2) The payment is ineligible for relief if, or so far as, it can lawfully be made only out of—
> (a) capital, or
> (b) income that is exempt from income tax.
> (3) If the payment or any part of it is charged to capital, the payment or that part is ineligible for relief.
> (4) If—
> (a) the person who makes the payment treats it or any part of it as made out of income that is exempt from income tax, and
> (b) the rights or obligations of any person are or may in the future be different from what they would have been if the payment or part had not been so treated,
> the payment, or the part concerned, is ineligible for relief.
> (5) If the payment or a part of it is not ultimately borne by the person who makes it, the payment or the part concerned is ineligible for relief.
> (6) But subsection (5) does not apply to a payment or part of a payment if—
> (a) the person who makes the payment is liable to income tax on an amount, and
> (b) it is because the person receives that amount or benefits from it in some other way that the payment or the part concerned is not ultimately borne by that person.

For the reasons for this, see EN ITA Change 82. But it will rarely if ever apply, so I do not set this material out here.

31.12 Annual Payment from RFI

Section 839 ITTOIA provides:

> (1) In calculating the amount of relevant foreign income to be charged to income tax for a tax year, a deduction is to be allowed for an annual payment other than interest if it meets conditions A, B1 or B2 and C.

> (2) Condition A is that the payment is payable out of the relevant foreign income.
>
> (3) Condition B1 is that, had the payment arisen in the UK, it would have been chargeable to income tax under one of the following provisions –
>
> section 579 (charge to tax on royalties and other income from intellectual property),
>
> Chapter 4 of Part 5 (certain telecommunication rights: non-trading income),
>
> Chapter 7 of Part 5 (annual payments not otherwise charged) , or
>
> regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.
>
> (3A) Condition B2 is that, had the payment arisen in the UK it would have been–
>
> (a) required to be brought into account under Part 5 of CTA 2009 (loan relationships) as a non-trading credit, or
>
> (b) chargeable to corporation tax under Chapter 7 of Part 10 of that Act (annual payments not otherwise charged) or regulation 15 of the Unauthorised Unit Trusts (Tax) Regulations 2013.
>
> (4) Condition C is that the payment is made to a non-UK resident.

Section 839(5) ITTOIA disapplies the relief if the remittance basis applies:

> Subsection (1) does not apply if–
>
> (a) the relevant foreign income is received in the UK, or
>
> (b) it is charged for the tax year in accordance with section 832 (relevant foreign income charged on remittance basis).

No deduction is needed when the remittance basis applies, as income used in making the Annual Payments will not be remitted.

31.13 Annual Payments: Critique

The reader who has studied the text to here will agree that there is scope for simplification.

It is suggested that the Annual Payment code ought to be abolished. In specific circumstances where a charge is needed, there ought to be an express charge, or it could fall under Misc Sweep-up Income. Annual-Payment WHT is not needed.

CHAPTER THIRTY TWO

INTELLECTUAL PROPERTY INCOME

32.1 IP income: Introduction
32.2 IP: Terminology
32.2.1 IP income/royalties
32.2.2 Intellectual property
32.2.3 Copyright
32.3 Types of IP income
32.3.1 Trade/non-trade border
32.4 Charge on non-trade IP income
32.5 IP income: Income/capital
32.5.1 Income/capital receipt: Trade
32.5.2 Income/capital receipt: Non-trade
32.6 Deductible expenditure
32.7 Source of non-trade IP income
32.8 Trade IP income
32.8.1 Trading rules apply
32.8.2 Source of trade IP income
32.8.3 IP income from UK PE
32.8.4 IP income connected to PE
32.8.5 Apportionment
32.8.6 IP income from UK PE: TAAR
32.9 IP/AP WHT: Introduction
32.9.1 IP/AP WHT compared
32.10 IP WHT conditions A&B
32.10.1 "Intellectual property"
32.10.2 2016 extension of IP WHT
32.10.3 Films
32.11 Application of IP WHT
32.11.1 Exported copies
32.11.2 IP WHT: TAAR
32.11.3 Deduction for commission
32.11.4 Timing
32.11.5 Contracting out
32.12 IP WHT: DT relief
32.13 IP WHT: Treaty override
32.13.1 "Connected"
32.13.2 DTA avoidance arrangement
32.14 Professional authors
32.14.1 Company authors
32.15 Films and sound recordings
32.16 DT relief: Royalties
32.16.1 "Royalties"
32.16.2 "Consideration for use"
32.16.3 Sale of IP
32.16.4 Royalties paid through PE
32.16.5 Transfer pricing
32.16.6 Foreign tax credit: royalties
32.16.7 Source of royalties for DTA
32.17 Offshore receipts from IP
32.17.1 Policy objective
32.18 ORIP charge
32.19 Residence
32.19.1 Resident in a territory
32.19.2 DTA which excludes relief
32.19.3 Full treaty territory
32.20 UK-derived amount
32.20.1 UK sales
32.20.2 Provision for resale
32.20.3 Online advertising
32.21 Apportionment
32.22 De minimis rule
32.23 "Intangible property"
32.23.1 Financial asset
32.24 Exemptions
32.25 UK sales below £10m
32.26 Company in specified territory
32.26.1 Residence
32.26.2 Specified territory
32.27 Business undertaken within territory of residence
32.28 Foreign tax at least half of UK tax
32.28.1 Local tax amount

Cross references

The following topics are considered elsewhere:
10.3.1 (Split year: Pt 4/5 ITTOIA Income)

32.1 IP income: Introduction

This chapter considers the income taxation of intellectual property (IP).

I focus on matters closest to the themes of this book, but it is necessary to consider the topic in the round. I do not consider:

(1) Corporation tax on IP (intangible fixed assets code)[1]
(2) EU interest and royalties directive,[2] which applied to interest/royalty payments between associated companies in different member states, and was repealed, in short, from 1 June 2021.[3]
(3) Diverted profits tax, Part 3 FA 2015
(4) Averaging fluctuating profits of creative works, Chap 16 Part 2 ITTOIA
(5) Disposal of know-how, s.584-596 ITTOIA
(6) Sale of patents, s.587 - 599 ITTOIA

I hope to address some of these items in a future edition.

The current law has a long history. Background to the 2002 reforms can be found in Inland Revenue consultation and response papers:

- Innovating for the Future: Consultation Document (1998)
- Reform of the Taxation of Intellectual Property: Technical Note (1999)
- Reform of the Taxation of Intellectual Property, Goodwill and other Intangible

[1] Part 8 CTA 2009. "Intangible fixed assets" includes royalties but excludes shares /financial assets. The intention was to avoid borderline issues between intellectual property and other intangible fixed assets; and to align the taxation of intangibles with the accountancy treatment.
For the interaction of this code and s.3 TCGA, see 64.5.5 (Derivatives and intangibles).

[2] 2003/49/EC (3 June 2003).

[3] Section 34 FA 2021.

Assets: the New Regime, Technical Note (June 2000)
- Reform of the Taxation of Intellectual Property, Goodwill and other Intangible Assets: the New Regime: the Next Stage Technical Note (November 2000)
- Taxation of Intellectual Property, Goodwill and other Intangible Assets: the New Regime, Technical Note (March 2001)

The focus of these papers is the CT regime, but there are also comments on IT, and they float the 2016 reforms which eventually came to pass.

HMRC have issued a technical note on the 2016 reforms ("**the Royalties Technical Note**").[4]

32.2 IP: Terminology

32.2.1 *IP income/royalties*

Section 579 ITTOIA refers to "royalties and other income from intellectual property". I refer to this as **"IP income"**.

Apart from the special cases of sale of patents/know-how, and trading, it is difficult to imagine income from IP which is not royalties. But the precise definition of royalties in s.579 does not normally arise.

OECD Model uses the term "royalties" in a defined sense which is (more or less) the same.

32.2.2 *Intellectual property*

Section 579(2) ITTOIA defines intellectual property:

> In this section "intellectual property" means—
> (a) any patent, trade mark, registered design, copyright, design right, performer's right or plant breeder's right,
> (b) any rights under the law of any part of the UK which are similar to rights within paragraph (a),
> (c) any rights under the law of any territory outside the UK which correspond or are similar to rights within paragraph (a), and
> (d) any idea, information or technique not protected by a right within paragraph (a), (b) or (c).

I refer to this as the "s.579 definition". This definition only applies for the purposes of s.579, so it has to be incorporated by reference in s.577A(5) ITTOIA.

[4] HMRC, "Deduction of income tax at source: Royalties - Updated Technical Note" (June 2016) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/532314/M1070_revised_TN_final.pdf*

32.2.3 *Copyright*

This is not the place to set out definitions of all IP terminology. However a note on copyright may be helpful. Section 1(1) Copyright, Designs and Patents Act 1988 provides:

> Copyright is a property right which subsists in accordance with this Part in the following descriptions of work—
> (a) original literary, dramatic, musical or artistic works,
> (b) sound recordings, films [or broadcasts], and
> (c) the typographical arrangement of published editions.

Section 3(1) Copyright, Designs and Patents Act 1988 provides:

> In this Part—
> "literary work" means any work, other than a dramatic or musical work, which is written, spoken or sung, and accordingly includes—
> (a) a table or compilation other than a database,
> (b) a computer program,
> (c) preparatory design material for a computer program and
> (d) a database

Thus computer program royalties are treated in the same way as more conventional literary work.

32.3 Types of IP income

IP income is classified for income tax purposes in one of three ways. Statute does not provide much terminology, so I coin the following terms:

My term	**Outline**	**See para**
Non-trade IP income	Not trade income, divided into:	32.4
(a) Annual Payment	Annual Payments	
(b) Non-Annual Payment IP income	Not Annual Payments	
Trade IP income	Trading receipts	32.8

These are not ideal labels, but I cannot think of better.

The three categories are recognised in *Noddy Subsidiary Rights v IRC*:

> It seems to me that, where you have this position, that a person owns an asset of any kind, whether physical or not, and grants licences under it,
> [1] the activities which he carries on in connection with the grant of those licences may amount to a trade and then Case I of Schedule D applies [trading income].
> [2] On the other hand, at the other end of the scale, the activities may amount to the mere holding of an investment, so that the receipt of

income is in the nature of pure income profit and then Case III of Schedule D applies [Annual Payments].

[3] There may be intermediate cases in which Case VI of Schedule D might apply [now non-annual payment IP income or Misc Sweep-up Income].[5]

ITTOIA replaced the schedular scheme with its own categorisation scheme. It retained the 3 distinctions identified here, but IP income from the category of Misc Sweep-up Income to its own category, taxable under s.579 ITTOIA.

32.3.1 *Trade/non-trade border*

For general discussion of the concept of trade, see App.2.23 (Trade). I consider here what constitutes a trade in the context of IP income.

One example of a non-trade is casual authorship. In 1923, *Ryall v Hoare* considered "an instance which is particularly familiar at the present moment, perhaps":

> the case of casual authorship. Now, a man may carry on no business and no profession; he may not be a journalist, he may not be an author, but he may be called upon to write an article for a paper for reward. He may find that there would be a demand for a single book from his pen, as a traveller, a soldier, a sailor, or a statesman, or what not. Now, it seems to me that all cases of that kind... are instances of casual profits [ie, not trading] ...[6]

The BI Manual provides:

> **BIM100205 authors** [Jun 2016]
> An author who:
> - organises their life so as to regularly spend time on their writing to produce work which has a commercial value, and
> - combines this with a persistent and systematic marketing of the work for their own financial benefit,
>
> is carrying on a profession and the profits are chargeable as trading income.
> Someone who writes a book or article who is not carrying on a profession is taxable on their literary earnings under the sweep-up charge as miscellaneous income.

[5] 43 TC 458 at p.474.

[6] 8 TC 521 at p.527.

> [The Manual cites the passage from *Ryall v Hoare* set out above and continues]:
> Traditionally the type of author whose activities would not amount to a trade would include those whose prime motive may be the desire for fame or personal satisfaction, what is sometimes called 'vanity publishing'.
> It also includes those motivated by the desire to enhance their reputation in a particular field or the desire to leave the benefit of their knowledge to posterity.
> **Modern technology and self publishing**
> Modern technology provides many options for small scale publication. Computers enable more people to self publish, with the availability of 'print on demand' allowing production of small numbers of books.
> The technology used does not change the position, and the same principles apply. Where the activities do not amount to a profession, any profits are taxable under the Miscellaneous Income provisions.

Another example of a non-trade is a casual inventor. In *IRC v Sangster* the taxpayer was an engineer and inventor. He received royalties for his patents, but manufacturing was done by his company, or other companies to whom he granted licences. He was not carrying on a trade or business. It would have been different if he had sold the patents he created:

> It is said ... in the argument in reply for the Crown, that it is all very well, but by giving these licences you are putting your patent on the market. So you are; but so is the man who builds a house and lets it putting it on the market, It seems to me that carrying on a business involves in a case like this the disposal of the article which you produce, as opposed to the retaining of it as a valuable thing in itself which you can treat itself as an investment, just as much as you could have treated what you bought with the money which you got for it if you had sold it.[7]

While it is well established that casual authorship is not a trade, it may be less clear whether the income should be regarded as:
(1) Payment for services, taxed as Misc Sweep-up Income;[8] or
(2) IP income

The answer should depend on the terms of the contract under which the

[7] 12 TC 208 at p.217.

[8] See 33.6 (Types of misc sweep-up income).

income arises. But HMRC seem to accept option (1); see 32.14 (Professional authors).

The BIM provides:

> **BIM50725 Authors And Royalties To Person Other Than Author**
> [Jan 2019]
> Copyright royalties received by an individual other than the author, composer etc (unless they form part of the receipts of a trade or represent post-cessation receipts - see BIM50740), are chargeable to Income Tax as miscellaneous income. A deduction should be given, where appropriate, for agents' commission...

32.4 Charge on non-trade IP income

The income taxation of IP income is governed by Chapter 2 Part 5 ITTOIA.

Section 579(1) ITTOIA provides the charge to tax:

> Income tax is charged on royalties and other income from intellectual property.

EN ITTOIA provides:

> 2262.[Section 579] sets out a new provision creating a specific charge to tax on royalties and other income from intellectual property. The source legislation uses general principles to tax such income. In the source legislation, income from intellectual property is charged:
> - as annual payments under Schedule D Case III;
> - as profits of a trade under Schedule D Case I;
> - as annual profits or gains under Schedule D Case VI; or
> - as income arising from possessions out of the UK under Schedule D Case V.
>
> The new charge covers income charged in the source legislation under the heads mentioned above, except that trading income derived from intellectual property is to be taxed not under section 579 but under Part 2 [ITTOIA]. The rules set out in the section are not intended to widen or restrict the scope of the charges under Schedule D in the source legislation.
> 2263.The charge embraces royalties which are
> [1] UK source annual payments (Schedule D Case III in the source legislation),
> [2] overseas income from intellectual property (Schedule D Case V in the source legislation) and
> [3] casual profits of an income nature from the exploitation of

> intellectual property outside the course of a trade (Schedule D Case VI in the source legislation).

Thus the charge under s.579 applies to IP income whether Annual-Payments or Non-annual Payments.

The distinction between (non-trade) Annual-Payment/ Non-Annual Payment IP income matters for:

(1) *Non-resident IT relief:* Annual-Payment IP income constitute disregarded income and qualify for that relief. Non-Annual Payment IP income does not.[9]

(2) *Withholding tax:* UK source IP income paid to a UK resident is subject to WHT if Annual-Payments, but not if it is non-Annual-Payment IP income.[10]

Section 580 ITTOIA provides:

> (1) Tax is charged under section 579 on the full amount of the income arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).
> ...

This incorporates the remittance basis for foreign-source royalty income; foreign source royalty income qualifies as RFI whether or not an Annual Payment.[11]

32.5 IP income: Income/capital

32.5.1 *Income/capital receipt: Trade*

BIM provides:

> **BIM50705 Authors And Receipts** [Jan 2016]
> Where the author etc. is chargeable to Income Tax on the profits of a profession, the profits are to be computed inclusive of all receipts from copyright and other sources, including lump sums received for the outright assignment of copyright (for example the assignment of copyright as a whole, or of serial rights or of rights in particular editions, or of film, television or radio rights). This is because the author's brain is his or her fixed capital. Copyright is a product of the author's brain. It is circulating capital and exploiting it gives rise to

[9] See 45.7 (Disregarded Annual Payments).

[10] See 31.10 (Annual-Payment withholding tax).

[11] See 16.9.2 11B("Relevant foreign income").

> income. Similarly sales of manuscripts give rise to income *(Wain v Cameron* [1995] 67 TC 324). For more on the capital/revenue divide as it relates to authors, see BIM35725 - BIM35735.

The 18th century terms circulating/fixed capital are not helpful, and they are not much used in modern case law, but the general proposition that an author's sale of copyright is an income receipt was established already by the time of the Report of the Departmental Committee on Income Tax (1905):

> 44. The profits that an author derives from the publication of his work may be received by him in more ways than one. But the more usual forms are two, viz., (a) A royalty on copies as sold, (b) A lump sum paid to him by the publisher for the purchase outright of his entire interest in the work.
> 45. Under the first plan no question can arise as regards the proper method of charging income tax. The receipts in each year constitute profits and gains for the year, and fall to be assessed in accordance with the rules of Schedule D.
> 46. Under the second, or lump sum, alternative, there is room for question whether when the purchase is made in respect of works of a permanent character the payment is not of the nature of capital rather than of income. For in that case it represents the estimated present value of a future income. There is much to be said for this view, which, in fact, is in accordance with the principle adopted in dealing with all other transactions of a similar character. But in practice it has become the well-established rule to treat such payments for copyright as income to the author, and to assess them in accordance with the rules of Schedule D...
> 48...it must be remembered as regard's the author that large payments for copyright are earned only by those who make literature their profession, either in whole; or in large part, and the money so earned is clearly in the nature of income derived from a profession, even though it is received at irregular intervals and in varying amounts.

32.5.2 *Income/capital receipt: Non-trade*

BIM provides:

> **BIM50705 Authors And Receipts** [Jan 2016]
> Where the author's income is chargeable as miscellaneous income, the profits should be similarly computed, except that lump sums received for the assignment of copyright only (see *Nethersole v Withers* [1948] 28 TC 501), as distinct from lump sum and similar payments associated

> with services (see *Hobbs v Hussey* [1942] 24 TC 153, and *Housden v Marshall* [1958] 38 TC 233), should be excluded. In this connection:
> • a lump sum does not include a sum received on account of royalties or an amount arrived at by reference to a minimum or estimated number of copies of a book or performances of a work;
> • an assignment, that is a transfer of ownership of a copyright, should be distinguished from a licence which permits the licensee to use copyrighted matter but does not involve any change in the ownership of the copyright;
> • a lump sum payment not chargeable as miscellaneous income should be considered for Capital Gains Tax liability.
> If, in an assignment case, the question of liability to Income Tax turns on whether or not a profession is being exercised, consideration should be given to the taxpayer's activities both before and after the assignment.

32.6 Deductible expenditure

Expenses are deductible from non-Annual Payment royalties. Section 582 ITTOIA provides:

> (1) This section applies for calculating the amount of income charged under section 579 other than annual payments.
> (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible...[12]

There is no equivalent for Annual-Payment royalties, because Annual Payments by definition have no deductible expenses: they are pure income profit.

32.7 Source of non-trade IP income

The location of the source of IP income matters for the usual reasons, in particular:

(1) A non-resident is not taxed on foreign source IP income
(2) Foreign source IP income is RFI and qualifies for the remittance basis
(3) Foreign source IP income is outside the scope of withholding tax[13]

So the question of source matters to both payor and recipient, though in

[12] This is a statutory codification of earlier case law: see 33.17 (Sweep-up income: Computation).

[13] Because Royalty WHT condition A(c) is not met; see 32.10 (Royalty WHT conditions A & B).

many cases a DTA may make the issue irrelevant.

What is the test to determine the source of non-trade IP income?[14]

Looking at the matter from first principles, it makes good sense to say that the source of the income is the situs of the copyright or other IP; just as the source of income from land or chattel rentals is the location of the land or chattels. The situs of copyright is where it can be exploited or enforced.[15]

This view is also supported by authority. In *Curtis Brown v Jarvis,* three authors not resident in the UK entered into contracts with UK publishers. (One of them was DH Lawrence, who contracted in 1920 to write "Women in Love"). The publishers paid royalties for the right to publish the books in the UK and elsewhere.

The authors were not carrying on a trade/profession/vocation even partly in the UK.[16] But the income was from "property in the UK" and taxable under sch D Case VI. The taxpayers' main argument seems to have been that copyright was not property; which seems strange, but presumably that was not as clear in 1929 as it is now.

The Court commented on the question of whether the copyright was property in the UK:

> whether the copyright is property within the UK, within the meaning of the enactment. Copyright is an intangible piece of property. It takes effect only as a right, it has no extension in space; but its taking effect, and its operation, is limited by locality, and when we speak, as we do in common parlance, of copyright in the UK, it seems to me that that phrase is absolutely accurate, it limits the extent - if I use the word "limits" I am using it in its technical sense - it defines the property as existing, perhaps, among places, in the UK.[17]

[14] For source issues generally, see 16.3 (Approach to locating source).

[15] See 102.30 (Intellectual property).

[16] Special Commissioners decision para 12, p.747; see 32.8.2 (Source of trade IP income).

[17] 14 TC 744 at p.751. On the question of whether the profession was carried on in the UK, it is relevant to note that (1) that the publishing contracts were made outside the UK; (2) all the writing work was done outside the UK.
For completeness: The assessment was on Curtis Brown as agent for the authors, under rule 5 of the ITA 1918 General Rules; the current UK representative rules are different. Copyright withholding tax also came in later, in s.25 FA 1927. But nothing turns on those points.

The Court did not consider whether the *contracts* might have been property in the UK. It is suggested that the contracts were mere machinery for the exploitation of the authors' copyright, and had no independent vitality, so the Revenue were right not to take that as an alternative argument.[18]

The Court did not consider whether (so far as the books were published outside the UK) the income might have been from copyright outside the UK. Perhaps the bulk of the sales were in fact made in the UK. Or perhaps the assessment was limited to UK sales, though the report does not discuss the point.

Curtis Brown v Jarvis was a pre-ITTOIA case where the issue was whether IP income was income from "property in the UK". This is not necessarily identical to the issue of source under the contemporary legislation. But the issues may be regarded as analogous. It is a small step from one to the other. Indeed the difference could be completely overlooked by a non-historically minded court.[19] So *Curtis Brown* is a case which at least supports the view that the source of income is the situs of the copyright.

The INT Manual provides:

> **INTM342520 Copyright royalties** [Jun 2018]
> If the copyright is exploited in the UK the royalty payment will be regarded as having a UK source and therefore within the provisions of [what is now s.906 ITA, withholding tax]. This is irrespective of the law governing the contract.

I refer to this as the place of exploitation test. This test is also supported in Hughes & Payne, "Payments for the use of computer software and the deduction of income tax therefrom" [2000] BTR 5 at p.10.

Another passage in the INT Manual proposes a different test:

> **INTM161130. The source rule – concessions** [Jan 2018]
> ... If the owner of a right such as a patent, trademark or copyright is not engaged in any trade to which the right relates but derives income by exploiting that right, the source of the income may be regarded for the purpose of credit as located in the country where the right is enforceable. ..

[18] The taxpayer did not argue that payment was for services, rather than a royalty for copyright; but if, hypothetically, that had been the case, the question whether the contract was the source of income would have arisen.

[19] See 26.10.1 (Source in pre-ITTOIA legislation).

I refer to this as the place of enforcement test. But in relation to copyright, at least, place of enforcement may generally be the same as place of exploitation; if so this is (generally) the same test. If the place of enforcement is different, the place of exploitation should be preferred.[20]

It is considered that the multi-factorial test applicable to interest should not be adopted for the source of IP income. The situs of a debt is determined by arbitrary factors, such as the deed. So debt situs rules do not give a sensible answer to the location of the source of interest. For interest, there is no simple solution which works. The source of interest hard to pin down. IP income is different in all these respects.

There is a statutory territorial limitation for the charge on the sale of patents, but this does not shed much light on the source of IP income.[21]

The Hong Kong Inland Revenue Department give the following guidance:

> ***Where the IPR is purchased by the licensor***
> 74. If a taxpayer has purchased the proprietary interest of an IPR and licenses that IPR to another party for use outside Hong Kong, the royalties so derived will generally be regarded as non-Hong Kong sourced income and hence will not be subject to Hong Kong tax... [22]

This is (more or less) the same as the UK position for non-trade IP income, a place of exploitation test.

32.8 Trade IP income

32.8.1 *Trading rules apply*

Trade IP income has a dual character: both a trading receipt and IP income. The charge on trading has priority.[23]

[20] See 26.13.12 (Changes in international law).

[21] Section 587 ITTOIA provides:
"(1) Income tax is charged on profits from sales of the whole or part of any patent rights.
(2) The tax is charged if–
(a) the seller is a UK resident, or
(b) the seller is a non-UK resident and the patent is granted under the laws of the UK."

[22] Departmental Interpretation and Practice Notes No. 49 (2012) *https://www.ird.gov.hk/eng/pdf/dipn49.pdf* See Mariani, "On the source and taxation of royalties in Hong Kong" Asia Pacific Tax Bulletin, 2016, Vol.22, No.3.

[23] See 11A3.8 (Part 5 ITTOIA/trade income).

32.8.2 *Source of trade IP income*

The question whether trading income has a UK source is naturally to be decided according to the rules which apply to trades/professions. This is so even if the trading receipts are or include IP income.

Thus a UK resident trader has UK source trading profits even if the IP income comes from abroad, since the trade is at least in part carried on in the UK.[24]

What about a non-resident trader? The source is where the profits substantially arise.[25] There is commonwealth authority. In *Millin v IRC* the distinguished South African author Sarah Millin received royalties from foreign publishers for books which were written by her in South Africa, but printed and published in England and the USA. This was trading income (or more accurately, professional income but the trade/profession distinction should not matter here). The Appellate Division held that the income arose wholly from a source within South Africa:

> ... the source of the whole amount received for royalties was in the Union.[26] It is true that in this case no capital in the ordinary sense of that term was employed by Mrs. Millin. It was the exercise of her wits and labour that produced the royalties. They were employed in the Union, and it matters not, on the analogy of the *Overseas Trust* case,[27] that the grant to her publishers of the right to publish her book was contained in a contract made in England. Her faculties were employed in the Union both in writing the book and in dealing with her publishers, and, therefore, on the test applied in the cases cited, the source of the whole of her income would be in the Union.[28]

A cynical reader may wonder if the same decision would be reached by a tribunal sympathetic to the Revenue:

(1) If the same facts were litigated in the UK; or

(2) If the case was litigated in South Africa, but facts were reversed, and

[24] See 21.4.1 (UK resident trader: IT).

[25] See 21.4 (IT territorial limit: Trading); 16.9 (Where is trading income source).

[26] The Union of South Africa (1910-1961) was the predecessor to the present Republic of South Africa.

[27] *Overseas Trust Corporation v IRC* [1926] AI 444, 2 SATC 71.

[28] [1928] AD 207 at p.216. The point mattered for a resident of South Africa, because at the time South Africa taxed its residents only from income from a source in South Africa, not on their worldwide income.

> Mrs Millin wrote in England but received royalties from publishers in South Africa.

In *Curtis Brown v Jarvis*, non-resident authors receiving UK royalties were likewise held not to be carrying on a profession even partly in the UK, But an assessment to UK tax was upheld on other grounds.[29]

The Hong Kong Inland Revenue Department give the following guidance:

> 72. ... The Department's views regarding the source of royalty income are set out in the following paragraphs.
>
> ***Where the IPR is created or developed by the licensor***
>
> 73. If an IPR is created or developed by a taxpayer carrying on business in Hong Kong and is licensed by the taxpayer to another party for use outside Hong Kong, the royalties so derived will generally be regarded as Hong Kong sourced income and hence will be subject to Hong Kong tax. This is because the royalty income is primarily generated by the taxpayer using his wits and labour to create or develop the IPR in Hong Kong...

The wording ("wits and labour") show that the author has read and is following *Millin*.

> ***Where the IPR is not owned by the licensor***
>
> 75. If a taxpayer only obtains a licence to use an IPR from its owner (i.e. the taxpayer has not obtained the proprietary interest of the IPR) and then sub-licenses the IPR to another party for use outside Hong Kong, the Department will, in ascertaining whether the royalties so derived are Hong Kong sourced income, take the place of acquiring and granting the licence as the source of income. As such, if the taxpayer acquires in Hong Kong the licence for use of the IPR, and grants a sub-licence also in Hong Kong, the royalties derived from sub-licensing the IPR will be regarded as derived from Hong Kong...

This is also a case of trading.

> 76. The above are some general examples which illustrate the Department's views on the application of broad guiding principle. It must be emphasised that whether royalties derived from the licensing of IPRs by taxpayers carrying on business in Hong Kong are subject to tax will be a question of fact to be determined by the totality of the facts

[29] See 32.7 (Source of non-trade IP income).

> and circumstances in each case.[30]

This is (more or less) the same approach as the UK for trades carried on by a non-resident.[31]

32.8.3 *IP income from UK PE*

Section 577A(1) ITTOIA provides:

> References in section 577[32] to income which is from a source in the UK include income arising where—
> (a) a royalty or other sum is paid in respect of intellectual property by a person who is non-UK resident, and
> (b) the payment is made in connection with a trade carried on by that person through a permanent establishment[33] in the UK.

In the following discussion:
The **IP income deemed-source rule”** is the rule in s.577A(1)
I refer to IP income within this rule as **“IP income from a PE”**
A **“UK trade”** means a trade carried on through a UK PE

This is based on the OECD model.[34]

Section 577A ITTOIA addresses apportionment when the trade is partly a UK trade:

> (2) Subsection (3) applies where a royalty or other sum is paid in respect of intellectual property by a person who is non-UK resident in connection with a trade carried on by that person only in part through

[30] Departmental Interpretation and Practice Notes No. 49 (2012) *https://www.ird.gov.hk/eng/pdf/dipn49.pdf*

[31] See 21.7 (Where is trading income source).

[32] Section 577 concerns the territorial scope of the charge under Section 579(1) ITTOIA. In particular, s.577(2) provides: “Income arising to a non-UK resident is chargeable to tax under this Part [Part 5 ITTOIA] only if it is from a source in the UK.” See 16.2 (IT territorial limit).

[33] Section 577A(5) ITTOIA applies the UK-law definition: “In this section ... “permanent establishment”—
(a) in relation to a company, is to be read (by virtue of section 1007A of ITA 2007) in accordance with Chapter 2 of Part 24 of CTA 2010, and
(b) in relation to any other person, is to be read in accordance with that Chapter but as if references in that Chapter to a company were references to that person.”
See 106.2 (PE: UK-law/OECD Model meanings).

[34] See 107.9.3 (Other business profit overlaps).

> a permanent establishment in the UK.
> (3) The payment referred to in subsection (2) is to be regarded for the purposes of subsection (1)(b) as made in connection with a trade carried on through a permanent establishment in the UK to such extent as is just and reasonable, having regard to all the circumstances.

There are strictly two distinct questions:
- whether a payment is made in connection with a UK trade: ss (1)
- the amount of the payment made in connection with the trade: ss(2)(3)

But in practice the two questions may overlap. The royalties technical note provides:

> 4.8 Royalties payable under licence agreements between independent parties are typically determined by reference to sales made by the licensee from using IP rather than the profits the licensee made. In most cases therefore it will be appropriate to determine the quantum of the royalty that has a UK source, because it is connected with the activity carried on in the UK through the UK PE, by reference to sales made by the non-resident through the UK PE.
> 4.9 Where the royalty is determined by reference to a factor other than sales, it might, depending on the activity carried on in the UK PE, be appropriate to determine the quantum of the royalty that comes from a source in the UK on a basis other than sales. However, in all cases the obligation to pay a royalty must be connected with the activities carried on in the UK by the UK PE in order for it to be considered that the royalty comes from a source in the UK.
> 4.10 In all cases, however, there will be no direct link between the separate rules
> [a] for attributing profits to a UK PE under section 19 CTA 2009 and
> [b] the rules for determining whether a royalty paid by a non-resident comes from a source in the UK.
>
> The test is not for a royalty to be considered to come from a source in the UK only when it is deductible directly or indirectly in computing the profits of a UK PE that are chargeable to corporation tax. Rather, the approach is for a royalty to be considered to have a UK source when the obligation of a non-resident person to make the royalty payment is connected with the activities that the non-resident person carries on in the UK through the UK PE.

32.8.4 *IP income connected to PE*

> 4.11 Where the activity carried on in UK relates to the sale of goods, services or other property by the non-resident, the obligation of the

non-resident to pay the royalty must arise because of the exploitation of the IP in carrying out those sales activities in the UK through the UK PE. That connection will be clear to see with dependent agent PEs because it is the activity of the non-resident person in concluding contracts for sale that creates the PE in the first instance. Any obligation of the non-resident to pay a royalty is clearly connected to the sales activity carried on through the UK PE.

4.12 There are other circumstances where activities carried on through the UK PE are connected to the sales by the non-resident but do not result in the conclusion of a sales contract between the non-resident and the customer. This could be, for example, because the sales process is automated and the contract is concluded online but it is the activities of personnel in the UK PE that have contributed to that customer entering into the online contract with the non-resident. The obligation of the non-resident to pay the royalty is connected to the trade it carries on in the UK through the UK PE because the activity it carries on through the UK PE that has contributed to the making of a sale by the non-resident that in turn leads to its obligation to pay a royalty.

4.13 Similarly where the activity carried on in the UK through the UK PE is to market goods, services or other products provided by the non-resident or to manage relationships with customers, that activity will be connected with the obligation of the non-resident to pay the royalty where the activity carried on through the UK PE is a part of the process that leads to a sale of goods, services or other property by the nonresident in respect of which the royalty is paid.

32.8.5 *Apportionment*

4.14 The royalty payable by the non-resident is unlikely to be restricted to sales made through the UK PE and will typically be in respect of a licence to use the IP across a wider geographical area. Subsections (2) and (3) of new section 577A ITTOIA provide that where a royalty payment is made in connection with a trade of a non-resident only carried on in part through a UK PE, only that part connected with the activities of the non-resident carried on in the UK will be considered to come from a source in the UK. In the case of a royalty related to sales made by a non-resident, only the proportion of the royalty payable in respect of sales in which the UK PE has played a part will be considered to come from a source in the UK.

4.15 Subsection (3) of new section 577A ITTOIA provides that the apportionment of a royalty to amounts connected with a trade carried on only in part in the UK through a UK PE should be calculated on a just and reasonable basis, having regard to all the circumstances. In the

> case of a royalty related to sales made by a non-resident, such a just and reasonable apportionment should be made on the basis of the proportion of the non-UK resident's total sales arise compared to the proportion of the sales in respect of which the royalties arise that are made through, or that are connected to the trade carried on through, the UK PE. This is illustrated through the following example:

The royalties technical note provides an extremely simplified example:

> The non-UK resident has income in respect of sales as follows:[35]

sales through PE in the UK	£30m
sales through PE in France	£30m
sales through PE in Germany	£30m
sales in country of residence	£30m
Total	£120m

The non-UK resident makes a royalty payment of £40m. This royalty relates only to the goods sold through its PEs in the UK and France and not those sold through its PE in Germany or in its country of residence.
A just and reasonable apportionment allocates £20m of the royalty to a UK source with reference to that part of the sales of the non-resident that create the obligation to pay the royalty. That is:

> Total royalty (£40m) × UK PE Sales (£30m) ÷ Total sales (£60m) = £20m

32.8.6 *IP income from UK PE: TAAR*

Section 577A(4) ITTOIA provides:

> In determining for the purposes of section 577 whether income arising is from a source in the UK, no regard is to be had to arrangements[36] the main purpose of which, or one of the main purposes of which, is to avoid the effect of the rule in subsection (1).

This TAAR only applies for the purposes of s.577/577A (territorial limitation), but there is another TAAR for IP withholding tax.

32.9 IP/AP WHT: Introduction

For a general introduction to withholding taxes, see 26.19 (Withholding taxes: Introduction).

[35] I have set out the date in tabular form for clarity.

[36] Section 577A(5) ITTOIA provides the standard (unnecessary) IT definition of "arrangements": see App 2.2.3 (Definitions of "arrangement").

Withholding taxes are contained in Part 15 ITA. The provisions relevant to IP income are:

Topic	**Chapter:** section	**Payment to**
Annual Payment WHT	**6**: ss.899-905	Resident or non-resident; see 31.10
IP WHT	**7:** ss.906-909	Non-resident
DTAs	**8:** ss.911-917A	

I do not discuss patents, but list the references here for completeness:

Use of patent	**6:** s.903	Resident or non-resident
Sale of patent	**7:** ss.910	Non-resident

In this book I coin the following terms:

IP WHT: withholding tax on IP income under post-2016 Chapter 6
Annual-Payment WHT: withholding tax on Annual Payments under Chapter 7[37]
Pre-2016 copyright WHT: withholding tax on (in short) copyright royalties under s.906 in its pre-2016 form

There is a set of general WHT exemptions discussed at 26.23 (Withholding tax: Exceptions).

Copyright WHT was introduced in 1927, following recommendations of the Royal Commission on Income Tax (1920),[38] and extended to IP WHT in 2016.

32.9.1 *IP/AP WHT compared*

IP WHT only applies if the payment is to a person whose usual place of abode is outside the UK. If the payment is an Annual Payment, Annual Payment WHT will in principle apply, on a payment to a UK resident.

32.10 IP WHT conditions A&B

Section 906(1) ITA provides:

> This section applies to any payment[39] made in a tax year where condition A or condition B is met.

I refer to "**IP WHT conditions A and B**".

[37] See 31.10 (Annual-Payment withholding tax). This include Annual-Payment IP income, if not caught by IP WHT.

[38] Para 160. The Royal Commission deal with the topic in a couple of brief sentences.

[39] For the meaning of payment, see 15.3 (Recognition/attribution: Analysis).

Conditions A and B are in fact sets of conditions. Condition B is a variant of condition A, in cases of assignment of intellectual property, and it is convenient to see them side by side:

Condition A: s.906(2) ITA	**Condition B: s.906(3) ITA**
Condition A is that—	Condition B is that—
(a) the payment is a royalty, or a payment of any other kind, for the use of, or the right to use, intellectual property (see section 907),	(a) the payment is a payment of sums payable periodically in respect of intellectual property,
	(b) the person entitled to those sums ("the assignor") assigned the intellectual property to another person,
(b) the usual place of abode[40] of the owner of the intellectual property is outside the UK, and	(c) the usual place of abode of the assignor is outside the UK, and
(c) the payment is charged to income tax or corporation tax.	[identical]

32.10.1 *"Intellectual property"*

This term is key to the application of WHT conditions A/B. Section 907(1) ITA provides:

> In section 906 "intellectual property" means—
> (a) copyright of literary[41], artistic or scientific work,
> (b) any patent, trade mark, design, model, plan, or secret formula or process,
> (c) any information concerning industrial, commercial or scientific experience, or
> (d) public lending right in respect of a book.

This is not worded the same way as the (standard) s.579 definition of IP;[42] but (except for films) the differences do not seem to matter.

[40] See 26.22 (Usual place of abode).

[41] `"Literary" should have the wide sense used in copyright law; see 32.2.3 (Copyright).

[42] See 32.2.2 (Intellectual property).

32.10.2 *2016 extension of IP WHT*

The royalties technical note provides:

> 1.9 ... the government decided to bring the definition of UK royalties on which non-residents are taxable into line with the internationally-accepted definition contained in the OECD model tax treaty.[43] It will do this by applying the familiar withholding requirements to those payments that are classified as royalties for the purposes of the OECD model tax treaty. At present, for example, payments for the right to use trade names and trademarks are subject to a royalty withholding tax only if they are "annual payments". Under the new approach, all such payments will be subject to withholding tax.
>
> 1.10 One effect of conforming the UK's rules to the internationally-accepted definition of royalties is that the reciprocal balance in the UK's tax treaties will be better maintained. Where a bilateral treaty preserves the right of the source state to tax a royalty payment, in whole or in part, the UK will now be able to tax the same categories of payments as its treaty partner. And where a treaty is being abused, and its benefits are disapplied by the anti-abuse rule, the UK will be able to tax in full all royalty payments, as it would where no tax treaty was in existence. ...
>
> 3.10 The clause replaces the definition of a 'relevant intellectual property right' in section 907 ITA with a broader definition of 'intellectual property'. This will follow the definition of rights, payments in respect of which are defined as royalties by the OECD model tax treaty. The withholding rules will therefore be broadly aligned with the taxing rights allocated to the UK under its tax treaties. It follows from this alignment that the UK will consider the commentary to Article 12 of the OECD model tax treaty in determining whether a payment is one to which the deduction of tax applies by virtue of the amended section 906 and 907 ITA.
>
> ...
>
> 3.12 The change will simplify (!) the rules relating to payments of royalties by requiring deduction of tax from all types of payment. Withholding will no longer depend on whether a particular type of royalty is an annual payment.

The wording of IP WHT condition A and the definition of Intellectual Property both (broadly) follow the wording of the OECD Model, and the

[43] See 32.16.1 ("Royalties").

OECD Commentary will be relevant.

The wording of IP WHT condition B was left unchanged, and follows the pre-2016 form. I wonder if that was deliberate. But it will not often matter.

32.10.3 *Films*

Section 907(2) ITA provides:

> In this section "copyright of literary, artistic or scientific work" does not include copyright in—
> (a) a cinematographic film or video recording, or
> (b) the sound-track of a cinematographic film or video recording, except so far as it is separately exploited.

This retains the exemption from copyright WHT in the pre-2016 law. The exemption goes back to the beginning of copyright WHT, in FA 1927, when the film industry was in its early days.

32.11 Application of IP WHT

Assuming IP WHT conditions A or B are satisfied, s.906(5) ITA imposes the withholding tax:

> The person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year. ...

32.11.1 *Exported copies*

Section 906(4) ITA provides:

> But this section does not apply if the payment is made in respect of copies of works, or articles, which have been exported from the UK for distribution outside the UK.

This point was discussed when copyright WHT was introduced in 1927, and Hansard gives some idea of the quality of tax debate a century ago:

Captain Macmillan:[44] "It is quite clear that the sums which are received as royalties in respect of sales effected in the United Kingdom should be subject to Income Tax if the author or owner is resident abroad, but the argument seems to me to be strained when you say that those who reside abroad and draw profits for the sales of their works abroad should contribute through the Income Tax

[44] Author's footnote: This is how Harold Macmillan was named in Hansard.

towards the general taxation of the country. It may not be within the knowledge of the Treasury that the publishing business in this country carry on their trade in many parts of the world; and what we are seeking to provide is that the sums payable to non-residents, or foreign authors, should not be liable to English Income Tax, merely because of the fact that their works are published by English publishing firms. If an English publishing house is carrying on business in France, or India, or Egypt, and a native of one of these countries, by the mere fact that he is doing business with a firm whose headquarters are in London, makes himself liable to Income Tax in this country, the result would be to drive away the business for English publishing houses, which would mean a loss to the Treasury and the publishing business. At present an English business carrying on a large part of its work in foreign countries, the profits on the business abroad and in England are subject to English Income Tax. We want to ensure that while in respect of the sales in this country it is right that Income Tax should be deducted for royalties paid to non-resident authors, there should not be brought about by this Clause a situation abroad which would reflect injuriously on the business carried on by such firms who have had the enterprise to carry their work into different parts of the world. ... I am sure it is not the intention of the Treasury to enact a Clause, the result of which would be to deprive English business firms of the opportunity of competing, in this respect, on equal terms with firms native to the countries where they are working. ... we are only seeking to tax non-resident authors in respect of the sums which they draw from sales of their works to the public of the United Kingdom.

It may be necessary to add that certain complications arise from the fact that in the case of many books by foreign authors, English publishers try to retain, where possible, the Dominions market as well as the United Kingdom market. For instance, many American books are sold to English publishers who handle them in the Canadian and Australian markets as well as in the English market. If the royalties in respect of sales made in Australia were made subject to English Income Tax—

Mr Couper: The hon. and gallant Member is referring to some Income Tax which is unknown in this country...

Captain MacMillan: I am sorry if I have offended the hon. Member. If the mere fact of dealing with a British house made the author in that case liable to British Income Tax, the tax could easily be evaded by not giving the books in question to the British firms for marketing in the Dominions. That would be a loss both to the firms and to the Treasury.

The Attorney-general (Sir Douglas Hogg): My hon. and gallant Friend has accurately stated the intention of the Government in introducing this Clause. It is to carry out the recommendations of the Royal Commission on Income Tax to ensure that foreign authors who get royalties from the sale of their works in this country shall not escape the effective charge of Income Tax. It is certainly not the intention of the Government that, under the guise of a Clause to tax foreign authors' royalties in this country, we should do anything to discourage the printing and publishing in this country of foreign works which are going to be sold in the Dominions or abroad.[45]

32.11.2 *IP WHT: TAAR*

Section 40(5) FA 2016 provides a TAAR:

> In determining whether section 906 of ITA 2007 applies to a payment, no regard is to be had to any arrangements the main purpose of which, or one of the main purposes of which, is to avoid the effect of the amendments made by this section.

The unallowable purpose which triggers this TAAR is an arrangement which seeks to avoid the effect of the *amendments* made by s.40, that is, to seek to avoid WHT which would apply under the post-2016 IP WHT, but not under the pre-2016 copyright WHT. The amendments, in short, extended the scope of withholding tax.[46] A purpose to seek to avoid the consequences of the rule in the pre-2016 s.906 is not caught. The reader may think that rather odd. Fortunately, the point will not often arise. Perhaps a purposive construction should be applied.

If the unallowable purpose condition is met, the consequence is to disregard the arrangement. In my terminology, this is a disregard-style TAAR; see 3.2.3 (Consequence of TAAR).

[45] Hansard, 30 June 1927 *https://api.parliament.uk/historic-hansard/commons/1927/jun/30/clause-23-payment-of-income-tax-on*

[46] For this purpose it could therefore be necessary to compare the pre/post-2016 law. In brief, the two versions of s.907(1) ITA are:

Post-2016 wording	**Pre-2016 wording**
In section 906 "intellectual property" means—	In section 906 "a relevant intellectual property right" means—
(a) copyright of literary, artistic or scientific work,	(a) a copyright,
(b) any patent, trade mark, design, model, plan, or secret formula or process,	(b) a right in a design, or
(c) any information concerning industrial, commercial or scientific experience, or	
d) public lending right in respect of a book.	(c) the public lending right in respect of a book.

32.11.3 *Deduction for commission*

Section 908 ITA provides a deduction for commissions:

> (1) If—
> (a) a payment to which section 906 [IP withholding tax] applies is made through an agent who is UK resident, and
> (b) the agent is entitled as against the owner of the right to deduct a sum as commission for services provided,
> section 906(5) and Chapters 8 (deduction at special rates), 15 and 16 (collection) apply as if the amount of the payment were the amount net of the sum deductible as commission.
> (2) But if the person by or through whom the payment is made does not know the commission is payable, or does not know its amount—
> (a) the sum representing income tax required to be deducted under section 906 must be calculated in the first instance on the total amount of the payment, and
> (b) the return to be made under Chapter 15 or the account of the payment under Chapter 16, must be based on that total amount.

32.11.4 *Timing*

Section 909(1) ITA is a timing provision:

> A payment to which section 906 [withholding tax] applies is treated for all income and corporation tax purposes as made when it is made by the first person who makes it, not when it is made by or through any other person.

32.11.5 *Contracting out*

Section 909(2) ITA prevents contracting out:

> If, under section 906, a sum representing income tax must be deducted from a payment, any agreement to make the payment without deduction of that sum is void.

32.12 IP WHT: DT relief

The UK operates a self-certification system. Section 911 ITA provides:

> (1) This section applies if—
> (a) a company pays a royalty from which it is required to deduct a sum representing income tax under Chapter 6 or 7,
> (b) the income tax in respect of the payment is collectible under Chapter 15 or 16, and

> (c) the company reasonably believes that, at the time the payment is made, the payee is entitled to relief in respect of the payment under double taxation arrangements.
>
> (2) The company may calculate the sum to be deducted from the payment under Chapter 6 or 7 by reference to the treaty rate.[47]
>
> (3) But, if the payee is not at the time entitled to such relief, this Part has effect as if subsection (2) had never applied in relation to the payment.

This only applies to company payors. In other cases, advance clearance is needed under the procedure discussed in the context of interest.[48]

Section 912 ITA allows HMRC to require withholding:

> (1) This section applies if an officer of Revenue and Customs is not satisfied that the payee will be entitled to relief under double taxation arrangements in respect of one or more payments of royalties that a company is to make.
>
> (2) The officer may direct the company that section 911 is not to apply to the payment or payments.
>
> (3) A direction under subsection (2) may be varied or revoked by a later direction.

Section 913 provides supplementary definitions:

> (1) In sections 911 and 912 "royalty" includes—
>
> (a) a payment received as consideration for the use of, or the right to use, a copyright, patent, trade mark, design, process or information, and
>
> (b) the proceeds of the sale of the whole or part of any patent rights.
>
> (2) In sections 911 and 912 "payee" means the person beneficially entitled to the income in respect of which the payment is made.32.13

32.13 IP WHT: Treaty override

Section 917A ITA provides what HMRC describe as an anti-treaty shopping provision.

The royalties technical note provides:

[47] Defined s.911(4) ITA: "In this section "the treaty rate" means the rate of income tax appropriate to the payee under the arrangements." Where the OECD model form is followed, 100% relief is available, and the treaty rate is 0%

[48] See 26.29 (DT relief: Withholding tax).

> 1.3 It is a feature of most countries' tax systems that non-residents are taxable on certain types of income that arise in that country. Royalties typically fall within those types of income and, to enforce their taxing right, countries will generally require the payer of the royalty to withhold tax from the payment and account for it to the tax authorities. The UK is no exception to this practice.
>
> 1.4 The tax treatment of cross-border payments of royalties is governed by ... tax treaties, also known as double taxation agreements or DTAs, of which the UK has over 120. Many of these DTAs follow the OECD model tax treaty, which stipulates that royalties are taxable only in the country of residence of the beneficial owner of the royalties. A provision of this sort therefore removes the taxing right of the country in which the royalty arises, on a reciprocal basis. The Government thinks that that this is an appropriate treatment, which removes tax obstacles to cross-border investment and provision of services.
>
> 1.5 However, countries give up their taxing rights in these circumstances in the expectation that the royalties will be paid for the benefit of a resident of a treaty partner. It is a frustration of the purpose of a tax treaty if a person resident in a third country uses a bilateral tax treaty with the UK to extract tax-free royalties from the UK, especially if no tax is paid on the receipt and no substantive activity is taking place in that third country. It is for this reason that tax treaties contain anti-abuse provisions to prevent so called "treaty shopping" by these third country residents.
>
> 1.6 In a world economy where multinational groups derive large sums from the exploitation of intellectual property (IP), cross-border royalty payments have become increasingly prevalent, and the need to ensure that they are taxed in an appropriate way is more important than ever.
>
> 1.7 The Government is concerned that some multinational groups have put in place arrangements under which IP is held by a group company in a jurisdiction where no tax is paid and no substantive activity takes place, and have structured the payments of royalties to that company in a way that takes advantage of the UK's tax treaties with other countries. This deprives the UK, as the country in which the royalty arises, of the right to tax. Had the royalty been paid direct to that ultimate jurisdiction, the UK would have retained its taxing rights on the basis that there was no treaty in place between the UK and that jurisdiction.

Section 917A(1) ITA provides:

> This section applies if and to the extent that—
>
> (a) a person ("the payer") makes an intellectual property royalty

> payment,[49]
>
> (b) the payment is received[50] by a person ("the payee") who is connected with the payer, and
>
> (c) the payment is made under DTA tax avoidance arrangements.

Where these conditions are met, s.917A(2) provides a treaty override:

> (2) Any duty under Chapter 6 or 7 to deduct a sum representing income tax at any rate applies without regard to any double taxation arrangements.
>
> (3) Any income tax deducted by virtue of subsection (2) may not be set off under section 967 or 968 of CTA 2010.

32.13.1 *"Connected"*

Section 917A(5) ITA provides a non-standard definition:

> For the purposes of this section the payer is connected with the payee if the participation condition[51] is met as between them.

It is poor drafting to use the expression "connected with" in a non-standard sense, but no harm is done.

32.13.2 *DTA avoidance arrangement*

Section 917A(4) ITA provides:

> In this section—
>
> "DTA tax avoidance arrangements" means arrangements[52] where, having regard to all the circumstances, it is reasonable to conclude that—

[49] Defined s.917A(4) ITA: In this section ... "intellectual property royalty payment" means a payment referred to in section 906(2)(a) or (3)(a)".
For these references, see 31.10 (Annual-payment withholding tax); 32.10 (Non-annual IP WHT).

[50] Widely defined in s.917A(4): "In this section ... "receive" means receive—
(a) directly or indirectly;
(b) by one payment or by a series of payments".

[51] Section 917A(6) incorporates the standard definition by reference: " Section 148 of TIOPA 2010 (when the participation condition is met) applies for the purposes of subsection (5) as for the purposes of section 147(1)(b) of that Act, but as if references to the actual provision were to the provision made or imposed between the payer and the payee in respect of the arrangements under which the payment is made."
See 105.1 (Participation).

[52] Section 917A(4) provides the standard (unnecessary) IT definition of "arrangements": see App 2.2.3 (Definitions of "arrangement").

> (a) the main purpose, or one of the main purposes, of the arrangements was to obtain a tax advantage[53] by virtue of any provisions of a double taxation arrangement, and
> (b) obtaining that tax advantage is contrary to the object and purpose of those provisions;

The royalties technical note provides:

> 2.8 ... the rule in new section 917A is modelled closely on the OECD anti-abuse rule (principal purpose test or PPT) that was designed as part of the OECD/G20 BEPS project.[54] [The OECD] commentary will help to explain how the rule will operate and how it is to be interpreted. HMRC will follow that commentary when applying new section 917A. However, the OECD rule covers treaty abuse of all types, whereas the domestic rule in new section 917A is a targeted provision confined to royalty payments between connected parties. The section 917A rule will therefore operate in a similar manner to the existing "main purpose" tests contained in the dividend, interest, royalty and other income articles of many of the UK's bilateral tax treaties. It is therefore likely that if those tests do not presently apply to a transaction or arrangement, the section 917A rule will not apply either.

Example 1 concerns a conduit arrangement:

> 2.9 An example of a case where the section 917A rule (and therefore an existing "main purpose" treaty rule) would apply would be where the payer of a UK royalty paid it as part of a conduit arrangement. Here, the payee could be a resident of a country with which the UK had a DTA that assigned exclusive taxing rights over royalties to the state where the beneficial owner was a resident. But if that person (even though he was the beneficial owner[55]) paid the royalty on, perhaps through a licence/sub-licence agreement, directly or indirectly, to an affiliate in another jurisdiction, and the main purpose of the arrangement was to obtain a tax advantage by virtue of a provision of the DTA, section 917A would apply.

Example 2 is an inter-group transfer:

[53] Defined by reference in s.917(A(4): "In this section ... "tax advantage" is to be construed in accordance with section 208 of FA 2013." See 3.19.1 (Tax advantage: Definitions).

[54] See 108.8 (Principal purpose test).

[55] Author's footnote: But as the beneficial owner rule has been hijacked to become an anti-conduit rule, the recipient in this example is not likely to be a beneficial owner.

> 2.10 Another example of circumstances where the rule could apply is where a multinational group assigned IP to an affiliate in a country with which the UK had a treaty providing for residence state only taxation of royalties. Even if that affiliate had a substantive operation and, for example, had a large R&D function of its own, if, on the facts of the case, one of the main purposes of the transfer of the IP was to obtain a tax advantage by virtue of a provision of the DTA, section 917A would apply.
>
> 2.11 In both cases, the section 917A rule would not apply where the person could show either that no tax advantage was obtained or that granting the benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of the DTA.

The technical note considers cases where the TAAR "might not apply". In example 3 there is no UK tax advantage:

> This might be the case in the following example. A multinational group develops and holds IP in Country X whose DTA with the UK provides for the taxation of royalties only in the residence state. The group then decides to consolidate its IP in a regional hub and chooses Country A, whose DTA with the UK also provides for residence state only taxation, in preference to Country B, whose treaty with the UK allows a source state taxing right. Even though one of the reasons for transferring the IP to Country A rather than Country B might have been to obtain the benefits of the DTA between Country A and the UK, section 917A would not be likely (?) to apply to deny those treaty benefits as there was no tax advantage as a result of the transfer of IP from the first country.

In example 4 there is " substantive economic activity":

> 2.12 It might also be the case in the following example. A multinational group wants to establish a research and development centre through a subsidiary in Europe. This subsidiary will develop IP in its country of residence through staff engaged for that purpose which it is then expected to licence either to other group companies or third parties. In deciding to establish its subsidiary in State Y, the group considers a number of factors, including the availability of staff with the appropriate skills, infrastructure, reliable legal system, the local tax regime and the comprehensive DTA network of State Y, including its DTA with the UK. In this example, merely reviewing the effect of the DTA between State Y and the UK on future payments of royalties does not enable a conclusion to be drawn about the purposes of the group in establishing

> the State Y subsidiary. The subsidiary will conduct substantive economic activity in State Y using real assets and controlling the economically significant risks, and will conduct that activity through its own staff located in State Y. As a result, the granting of a treaty benefit in these circumstances would be likely (?) to be in accordance with the object and purpose of the DTA and section 917A would not apply to deny treaty benefits in respect of future royalty payments unless the State Y subsidiary enters into other specific transactions to which section 917A would apply.

32.14 Professional authors

The International Manual provides:

> **INTM342590. Professional authors** [Jun 2018]
> Copyright royalties that are payable to an author/originator of a literary, dramatic, musical or artistic work that has been created in the ordinary course of his profession (an "author by profession") fall into the same category as fees for professional services and do not come under [withholding tax rules]. Payments that are made to an author by profession who usually lives overseas are therefore not subject to deduction of UK income tax at source. This follows the decisions in *Carson v Cheyney's Executor* (38 TC 240) and *Hume v Asquith* (45 TC 251) ...
> A Professional Author can be classed as such if he is clearly the originator of the work(s) concerned. If the claimant is not the originator of the work but has acquired the rights from that person they may not be treated as a professional author. ...

This practice was confirmed in a parliamentary statement in 1969:

> Mr Ashton asked the Chancellor of the Exchequer what steps he takes to recover tax on fees[56] paid to British Nationals living abroad by publishers in this country.
> Mr Roy Jenkins: [Withholding tax for royalties] requires any person making such payments to deduct tax at the [basic] rate and to pay it over to the Inland Revenue. I am advised that this does not apply to payments made to those who are authors by profession... [57]

[56] Note that Joe Ashton carefully used the word "fees" rather than "royalties".

[57] Hansard HC debate (10 November 1969) vol 791 col 31
https://hansard.parliament.uk/Commons/1969-11-10/debates/287b6ab7-aab4-48ac-8d46-c57bab8d26e3/OverseasBritishNationals(PublicationFees)
In *Curtis Brown v Jarvis* 14 TC 744 a non-resident author was taxed on UK royalties

It is obviously correct that IP withholding tax only applies to IP income, and not to fees for services. A barrister who writes an Opinion receives a fee for services, not IP income, and the fee paid to a non-resident barrister would not be subject to IP withholding tax. But the proposition that professional authors receive fees for services, rather than IP income, is a curious one. *Cheyney* and *Asquith* the cases decided a different point, that post-cessation receipts of professional authors were not taxable as Annual Payments or Misc Sweep-Up Income (then, sch D Cases III and VI); I wonder if it necessarily followed that receipts are not royalties for the purposes of IP withholding tax.

Certainly this practice, if correct, frustrated the intention of parliament in introducing copyright withholding tax in 1927, which was aimed specifically at non-resident authors.[58]

It only matters in practice where the author is resident in a jurisdiction without a DTA conferring relief. That may be unusual, which may explain why the practice has survived.

The same rule must apply to post-cessation receipts. Payments to the executors of an author which are exempt from IP withholding tax during the life of the author, (because they are not IP income) should continue to be exempt from IP WHT after the death of the author.

Hughes and Payne say:

> In terms, only professional authors are covered but it is generally considered that the scope extends to professionals other than authors, for example, professional photographers and designers whose works are also protected by copyright. It is also thought that it should extend to individuals whose profession consists in writing computer programs. They are, after all, properly called authors and their output is protected by copyright.

A similar distinction has been reached in South Africa. The South African Institute of Chartered Accountants say:

> In *Millin v CIR*,[59] it was held that the true source of royalties accruing from a book was the author s wits, labour and intellect. Therefore if

under sch D case VI (now, in my terminology, non-Annual Payment royalties); but this would not be the case under current HMRC practice and understanding of *Cheyney* and *Purchase v Stainer* 32 TC 367; see [2000] BTR 10 at p.12. But *Curtis Brown* is still cited on other points.

[58] See 32.11.1 (Exported copies).

[59] See 32.8.2 (Source of trade IP income).

> these activities are carried out in the Republic, the true source is in the Republic. The principle from Millin s case also applies to royalties accruing to inventors from patents and similar assets. If the inventor applies his wits, labour and resources in the Republic, any resulting income accruing to him is from a true source in the Republic.
>
> When a royalty is earned by a person who is not the original author or inventor, for example, by a person who has purchased the royalty-producing asset from the original author or inventor, since the royalties would then be derived not from the wits, labour or intellect of the recipient but from the ownership of the royalty-producing asset...

32.14.1 *Company authors*

Hughes and Payne consider the position of companies:

The question is: does the principle of the *Stainer* and *Cheyney* cases extend to such a trading company, with the result that the royalties would not be subject to UK tax at all? The argument in support would have to proceed along the lines that:

(a) just as copyright royalties of an overseas, professional author are not subject to UK tax because such royalties are professional earnings taxable only under Case II, which does not extend to non-residents if the profession is carried on entirely outside the UK; so also,

(b) copyright royalties of an overseas trading company are not subject to UK tax because such royalties are trading income taxable only under Case I, which does not extend to non-residents if the trade is carried on entirely outside the UK.

The phrase "taxable only under Case II" was emphatically endorsed again and again throughout the *Cheyney* and *Stainer* cases by the House of Lords because the source of the copyright royalties was held to be nothing but the professional activity of the individuals concerned. Can it be said that copyright royalties of a trading company are taxable only under Case I because the source of the royalties is nothing but the trading activity of the company? If so, with which activity of the company can the source of copyright royalties be identified?

In the cases of the professional individuals, the activity identified as the source of the royalties was held to be the actual writing of the books or the producing of or acting in the films. In the case of a professional author of computer programs, the identified activity (and therefore source) would be the actual writing of the programs.

... The parallel with the *Cheyney* and *Stainer* cases would then imply that royalties sourced from such activities were taxable only as Schedule D Case I trading income, with the result that, if the activity was carried on entirely overseas by a non-resident company, the profits would not be subject to UK taxation.

That sort of situation, where the overseas trading company itself (albeit through employees or contractees) generates copyrights in the course of its activities is at one end of a spectrum of possibilities. Towards the other end is an example such as *Noddy Subsidiary Rights Limited* referred to above. In that case the company did not actually generate any copyrights itself in the course of its activities, but it was still held to be taxable under Case I on its royalty receipts because it was actively engaged in exploiting the copyrights that it had licensed from other parties.

The authors consider that, if an overseas company operated in the same way as Noddy Subsidiary Rights Limited and received UK copyright royalties as part of its trading income, the principle of the *Cheyney* and *Stainer* cases would not extend to debar a charge to UK taxation on the grounds that the royalties were taxable by the UK only as trading income under Case I, which would not apply in the absence of a UK trade. This is because there would be no overseas activity equivalent to the professional activity in the *Cheyney* and *Stainer* cases that could be identified as the non-UK source of the company's royalties. If the principle in the *Stainer* and *Cheyney* cases did not apply, the royalties would remain taxable under Case VI as annual profits or gains arising from property within the UK. Between the two extremes there will obviously be a range of possibilities and it will be a matter of facts and circumstances as to how close to the principle in the *Cheyney* and *Stainer* cases any particular arrangements would lie.

As an analogy, take the case of an overseas bank that carries on its trade entirely outside the UK but also lends to UK borrowers. The interest on the loans is readily accepted as being UK source and a Case III assessment on the interest income of the overseas bank therefore seems entirely appropriate even though, had the bank been operating within the UK, the interest income would normally have been assimilated with its other trading income and assessed under Case I. This supports the conclusion that the principle of the *Cheyney* and *Stainer* cases does not apply generally to the trades of companies so that, if those profits include interest income or copyright royalties, it will remain open to the Inland Revenue to assess that element under Case III or Case VI as appropriate.

This is consistent with the provisions of the OECD Model Tax Convention and most UK tax treaties. Under the terms of the Business Profits Article a non-resident is not taxable in the source country if the enterprise does not carry on business there. But, if the business profits include interest or royalties, the non-resident cannot usually claim exemption under the Business Profits Article from source country tax on these items because it will usually be provided that the Interest and Royalties Articles take precedence, so that the withholding tax rates stipulated can apply. Thus, under the terms of its typical treaties, the UK retains the right to tax the UK-source interest and royalty income of non-resident businesses not carrying on business in the UK, even where those items of income constitute business profits.

While the matter is not free from doubt, the authors' conclusion is that in the same way domestic law allows the UK to charge income tax on UK-source interest income of non-residents not carrying on a trade in the UK, even where that income constitutes trading income of the non-resident, so, also, domestic law allows the UK to tax the UK copyright royalty income of non-residents not carrying on a trade in the UK, even where those royalties constitute trading income of the non-resident. Case law, however, has established that the right of the UK to tax UK-source copyright royalties does not extend to royalties of non-resident, professional authors because, on the principle of the *Stainer* and *Cheyney* cases, such royalties are professional earnings taxable only under Case II, which does not apply to non-residents. The authors consider that this principle can extend to non-resident trading companies but only if the royalties derive from copyrights generated in the course of the company's trading activity. The principle would not, however, extend generally to trading income of non-resident companies, in particular it would not apply where the royalties arose from acquired copyrights, even if those copyrights were actively exploited in the course of a trade.[60]

These issues should be covered by clear statutory rules. But there seems little prospect of that.

32.15 Films and sound recordings

Special rules apply to the exploitation of films and sound recordings. Section 609 ITTOIA provides:

> (1) Income tax is charged on income from a business involving the exploitation of films or sound recordings where the activities carried on do not amount to a trade.
> Such a business is referred to in this Chapter as a "non-trade business".
> (2) Expressions which are used in this Chapter and in Chapter 9 of Part 2 (trade profits: films and sound recordings) have the same meaning in this Chapter as they do in that Chapter.

Section 610 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the income arising in the tax year. ...
> (3) This section is subject to Part 8 (foreign income: special rules).

The charge applies to UK and foreign source income, but this incorporates

[60] [2000] BTR 1.

the remittance basis for foreign source income.

Section 612 ITTOIA provides:

> (1) This section applies for calculating the amount of income charged under this Chapter.
> (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible. ...

Section 613 ITTOIA provides:

> The provisions of Chapter 9 of Part 2 apply in relation to non-trade businesses as they apply in relation to trades but as if—
> (a) references to a basis period were to a tax year, and
> (b) references to anything not constituting trading stock of a trade were omitted.

32.16 DT relief: Royalties

Article 12 OECD Model Convention provides:

> 1. Royalties arising in a Contracting State and beneficially owned[61] by a resident of the other Contracting State shall be taxable only in that other State.

In short, the right to tax rests with the residence state and not the source state.

OECD Commentary on art 12 provides:

> 5. The Article deals only with royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State. It does not, therefore, apply
> [1] to royalties arising in a third State as well as
> [2] to royalties arising in a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State
> (for these cases see paragraphs 4 to 6 of the Commentary on Article 21).

32.16.1 *"Royalties"*

Article 12(2) OECD Model Convention provides:

> The term "royalties" as used in this Article means payments[62] of any kind received as a consideration for the use of, or the right to use,

[61] See 108.10 (DTA beneficial owner rule).

[62] See 15.11.2 ("Paid" and "payment").

> [a] any copyright of literary, artistic or scientific work including cinematograph films,
>
> [b] any patent, trade mark, design or model, plan, secret formula or process, or
>
> [c] for information concerning industrial, commercial or scientific experience.

See Avery Jones & Bobbett, "The Treaty Definition of Royalties" 60 Bulletin for International Taxation 1 (2006).

32.16.2 *"Consideration for use"*

OECD Commentary on art 12 provides:

> 8. [The commentary refers to the art 12(2) definition of royalties and continues:] The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a license and compensation which a person would be obliged to pay for fraudulently copying or infringing the right.
>
> 8.1 The definition does not, however, apply to payments that, whilst based on the number of times a right belonging to someone is used, are made to someone else who does not himself own the right or the right to use it (see, for instance, paragraph 18 below).

32.16.3 *Sale of IP*

OECD Commentary on art 12 provides:

> 8.2 Where a payment is in consideration for the transfer of the full ownership of an element of property referred to in the definition, the payment is not in consideration "for the use of, or the right to use" that property and cannot therefore represent a royalty. As noted in paragraphs 15 and 16 below as regards software, difficulties can arise in the case of a transfer of rights that could be considered to form part of an element of property referred to in the definition where these rights are transferred in a way that is presented as an alienation. For example, this could involve the exclusive granting of all rights to an intellectual property for a limited period or all rights to the property in a limited geographical area in a transaction structured as a sale. Each case will depend on its particular facts and will need to be examined in the light of the national intellectual property law applicable to the relevant type of property and the national law rules as regards what constitutes an alienation but in general, if the payment is in consideration for the alienation of rights that constitute distinct and specific property (which

> is more likely in the case of geographically-limited than time limited rights), such payments are likely to be business profits within Article 7 or a capital gain within Article 13 rather than royalties within Article 12. That follows from the fact that where the ownership of rights has been alienated, the consideration cannot be for the use of the rights. The essential character of the transaction as an alienation cannot be altered by the form of the consideration, the payment of the consideration in instalments or, in the view of most countries, by the fact that the payments are related to a contingency.

32.16.4 *Royalties paid through PE*

For the overlap between royalty income and business profits, see 107.9.3 (Other business profit overlaps).

32.16.5 *Transfer pricing*

Article 12(4) OECD Model Convention provides the usual rule:

> Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties, having regard to the use, right or information for which they are paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

32.16.6 *Foreign tax credit: royalties*

It can happen that:

(1) IP income are trading receipts, received by a person subject to UK tax on the trading profits

(2) Foreign tax may be deducted at source from the IP income

In these circumstances, ESC B8 provides:

> **B8 Double taxation relief: income consisting of royalties and "know-how" payments**
> Payments made by a person resident in an overseas country to a person carrying on a trade in the UK as consideration for the use of, or for the privilege of using, in the overseas country any copyright, patent, design, secret process or formula, trademark or other like property
> [1] may in law be payments the source of which is in the UK,
> [2] but are nevertheless treated for the purpose of credit (whether under

> double taxation agreements or by way of unilateral relief) as income arising outside the UK except to the extent that they represent consideration for services (other than merely incidental services) rendered in this country by the recipient to the payer.

[1] is wrong or poorly expressed. The payments are not "payments the source of which is in the UK". They are receipts of a trade, and the *trading profits* (which are distinct from the payments) is income whose source is in the UK.
[2] is law and not concession, but it does not matter.
INT Manual expands on this:

> **INM161130. The source rule – concessions** [Jan 2018]
> *(B) Extra-Statutory concession ESC/B8 - DTR: royalties and 'know how' payments*]
> [The Manual sets out ESC B8 and continues:]
> b) Traders resident in the UK are not entitled to claim credit for any tax which is levied in the foreign country in respect of payments for services which are rendered in the UK and are not merely incidental services. In any such case the net amount of the payment (after deduction of any foreign tax borne by them on the payments) is included in the computation of profits for UK tax purposes.
> The prohibition on credit for foreign tax charged on payments for services rendered in the UK may be overruled by the terms of those double taxation agreements which have a royalties Article which includes technical services in the definition of royalties (see INTM153130) or a separate technical fees Article (see INTM153140) and those agreements deem the source of such payments to be in the country of which the payer is a resident. In such cases, even though the services are rendered in the UK, credit is due for the foreign tax charged on these payments. ...

32.16.7 *Source of royalties for DTA*

The royalties technical note provides:

> 1.12 The OECD model tax treaty contains no definition of source for royalties because it was thought that one was unnecessary – on the basis that sole taxing rights belong to the state of residence of the beneficial owner. However, a definition is necessary where, for example, an anti-abuse measure is applied and the taxing rights are returned to the state of source.
> 1.13 In the comparable interest article of the OECD model (which provides for a 10% rate of source state taxation), the source of the

> interest payment is defined as the country where the payer is resident, except where the payer has a PE in one of the treaty partners, the interest is borne by that PE, and the debt is connected with it. In that case, the source of the interest is the state where the PE is situated.[63]
>
> 1.14 The Government has introduced a similar treatment for royalties under domestic law, so that a royalty will have a UK source where the payment is connected to a PE that the payer has in the UK. Royalties paid by a non-resident to another non-resident which are connected to a trade carried on through a UK PE of the payer will now be taxable in the UK and the non-resident payer will be expected to withhold tax and account for it to HMRC. But where there is a tax treaty between the UK and the country of residence of the beneficial owner, that treaty will govern the taxation of the payment. Where that treaty follows the OECD model and the anti-abuse rule does not apply, taxation rights will belong exclusively to that other country.

Some DTAs apply the same rule as the OECD Model applies to interest,[64] ie royalties arise in the source where the payer is resident (except for royalties from a PE). That is sensible.

Formerly, it was presumably considered that this source rule was not needed, because the royalties article provided 100% exemption (apart from interest from PEs); so the source did not matter. But as the 100% exemption is restricted by the Savings Clause and a Limitation of Benefit clause, the question of source will now arise.

32.17 Offshore receipts from IP

The code for Offshore Receipts in respect of Intangible Property (ORIP) was introduced in 2019 and is found in Chapter 2A Part 5 ITTOIA.

The provisions are numbered 806A to 806Z, with subsequent provisions slotted in.[65]

The background can be found in:

> Consultation and response papers
> HMRC policy paper "Income Tax: Offshore receipts in respect of intangible property", October 2019[66] ("ORIP policy paper")

[63] See 26.27.6 (Source of interest for DTA).

[64] In short, the source is the residence of the payer, See 26.27.6 (Source of interest for DTA).

[65] See App 13.3 (Section numbering system).

[66] *https://www.gov.uk/government/publications/income-tax-changes-to-offshore-receipts-in-respect-of-intangible-property/income-tax-offshore-receipts-in-respect-of-i*

HMRC have issued draft guidance ("ORIP draft guidance").[67]

32.17.1 *Policy objective*

ORIP draft guidance provides:

> **1.2 ORIP - Purpose and design**
> ORIP was conceived as an extension to UK withholding tax on royalties that would apply to all payments made by resident and non-resident companies in respect of low tax IP that has been used to make UK sales. However, following consultation, the measure was amended to provide for a direct income tax charge on persons in low tax territories that hold IP and where income arises from that IP where it is used to support UK sales.
> ...The measure is consistent with the UK's international obligations, and thus respects the situations in which the UK has ceded taxing rights over the income of a nonresident person under a double taxation agreement.

The ORIP policy paper provides:

> The policy targets multinational groups that generate significant income from intangible property through UK sales, and have made arrangements such that the income is received in offshore jurisdictions where it is taxed at no or low effective rates. The rules tax the proportion of that income which is referable to the sale of goods or services in the UK.
> This measure will reduce the opportunities for large multinationals to gain an unfair competitive advantage by holding their intangible property in low tax offshore jurisdictions, levelling the playing field for businesses operating in UK markets.

The rules may be aimed at multi-national groups, but they apply more widely.

32.18 ORIP charge

Section 608A ITTOIA provides:

> (1) This section applies if-
> (a) at any time in a tax year, a person is not UK resident and is not resident in a full treaty territory, and

ntangible-property

[67] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/839609/Draft_technical_guidance_Offshore_Receipts_in_respect_of_Intangible_Property__October_2019_.pdf*

> (b) UK-derived amounts arise to the person in the tax year.
>
> (2) Income tax is charged on the UK-derived amounts.

Section 608A(4) ITTOIA provides:

> References in the Tax Acts to income from a source in the UK include UK-derived amounts.

Why does source matter, given that there is a self-standing charge?

Section 608B ITTOIA imposes the charge on the arising basis in standard form:

> Tax is charged under section 608A on the full amount of the UK-derived amounts arising in the tax year.

Section 608C ITTOIA identifies the person liable in standard form:

> The person liable for any tax charged under section 608A is the person receiving or entitled to the UK-derived amounts.

32.19 Residence

Residence matters as the charge only applies to a person who is:

(1) not UK resident and

(2) is not resident in a full treaty territory

UK residence is decided by general principles of UK residence. Resident in a territory needs definition.

32.19.1 *Resident in a territory*

Section 608D ITTOIA provides a definition based on OECD model:[68]

> (1) This section applies for the purposes of this Chapter.
>
> (2) A person is "resident" in a territory if, under the laws of the territory, the person is liable to tax there-
>
> (a) by reason of the person's domicile, residence or place of management, but
>
> (b) not in respect only of-
>
> (i) income from sources in that territory or capital situated there, or
>
> (ii) such income and capital, and amounts remitted to or otherwise received in the territory.

Section 608D(3) ITTOIA provides

> Where-

[68] See 9.3 (Residence under art 4(1)).

> (a) a person is resident in a territory outside the UK generally for the purposes of the laws of the territory or for particular purposes under those laws, and
> (b) the laws of the territory have no provision for a person to be resident there for tax purposes,
>
> the person is "resident" in the territory.

That may be relevant for states with no direct tax, such as Saudi Arabia, and states which only tax income from sources in that state, such as Singapore and Hong Kong.

32.19.2 *DTA which excludes relief*

Section 608D(4) ITTOIA provides:

> Despite subsections (2) and (3), a person is treated as not resident in a full treaty territory if-
> (a) the double taxation arrangements made in relation to the territory contain provision expressly excluding persons of a particular description from relief under the arrangements, and
> (b) the person is of that description.

A Limitation of Benefit clause does not count for this purpose. Section 608D(5) ITTOIA provides:

> In subsection (4) the reference to provision of the kind mentioned there does not include provision corresponding to the provision made by paragraphs 1 to 7 of article 29 of the OECD Model Tax Convention on Income and on Capital (entitlement to benefits), published on 21 November 2017.

See 110.1 (Limitation on Benefits)

32.19.3 *Full treaty territory*

Section 608E(1) ITTOIA provides:

> For the purposes of this Chapter a territory is a "full treaty territory" if-
> (a) double taxation arrangements have been made in relation to the territory, and
> (b) the arrangements contain a non-discrimination provision.

For the meaning of "Non-discrimination provision" see 112.8 ("Non-discrimination provision").

32.20 UK-derived amount

The tax charge is on UK-derived amounts.

Section 608F ITTOIA provides:

> (1) For the purposes of this Chapter an amount is a "UK-derived amount" if-
>
> (a) it is an amount (whether of a revenue or capital nature) in respect of the enjoyment or exercise of rights that constitute any intangible property, and
>
> (b) the enjoyment or exercise of those rights (or of any rights derived, directly or indirectly, from those rights) enables, facilitates or promotes UK sales (directly or indirectly).
>
> (2) It does not matter whether the amount relates to UK sales in the tax year mentioned in section 608A or any other tax year.

32.20.1 *UK sales*

Section 608F(3) ITTOIA provides:

> In this Chapter "UK sales" means any services, goods or other property-
>
> (a) provided in the UK, or
>
> (b) provided to persons in the UK.

32.20.2 *Provision for resale*

Section 608F ITTOIA provides:

> (4) In subsection (3) the reference to anything being provided does not include it being provided for resale.
>
> (5) For the purposes of subsection (4) a thing is provided "for resale" where it is provided to a person who obtains it for the purpose of providing it to another person in the following circumstances-
>
> (a) there is no change in the thing itself, and
>
> (b) if what is provided differs in any way from what was obtained, the difference is merely incidental to the provision of the thing.

32.20.3 *Online advertising*

Section 608F(6) ITTOIA provides:

> For the purposes of this Chapter a service consisting of the provision of online advertising constitutes a UK sale so far as the advertising is targeted at persons in the UK.

32.21 Apportionment

Section 608G ITTOIA provides:

> (1) This section applies where-
>
> (a) a person receives or is entitled to an amount in respect of the

> enjoyment or exercise of rights that constitute any intangible property, and that enjoyment or exercise enables, facilitates or promotes UK sales and other sales, or
>
> (b) a person receives or is entitled to an amount in respect of-
>
> (i) the enjoyment or exercise of rights that constitute any intangible property, where that enjoyment or exercise enables, facilitates or promotes UK sales, and
>
> (ii) anything else.
>
> (2) The amount is to be regarded for the purposes of this Chapter as constituting a UK-derived amount to such extent as is just and reasonable.
>
> (3) In a case within subsection (1)(a) it is to be presumed, unless the contrary is shown, that the proportion of the amount that is just and reasonable is-
>
> (X) / (X + Y)
>
> where X is the value of UK sales and Y is the value of other sales.

32.22 De minimis rule

Section 608GA ITTOIA provides:

> (1) This section applies where-
>
> (a) a person (A) receives or is entitled to a UK-derived amount,
>
> (b) the services, goods or other property in question are not provided in the UK, or to persons there, by A or a person connected with A, and
>
> (c) the UK sales in question are enabled, facilitated or promoted to an insignificant extent by the enjoyment or exercise of the rights in question.
>
> (2) For the purposes of this Chapter no account is to be taken of A's receipt of, or entitlement to, the UK-derived amount.
>
> (3) For the purposes of subsection (1)(b), anything provided by a reseller (including anything treated as so provided by virtue of this subsection) is to be treated as provided by the person who provided it to the reseller.
>
> (4) For this purpose "reseller" means a person to whom a thing is provided for resale (within the meaning of section 608F(5)).

32.23 "Intangible property"

"Intangible property" matters because a "UK-derived amount" it is an amount in respect of the enjoyment or exercise of rights that constitute any intangible property,

Section 608H ITTOIA provides:

> (1) In this Chapter "intangible property" means any property except-

A set of 6 exceptions then follow:

> (a) tangible property,
> (b) an estate, interest or right in or over land,
> (c) a right in respect of anything within paragraph (a) or (b),
> (d) a financial asset,
> (e) a share or other right in relation to the profits, governance or winding up of a company, or
> (f) any property of a prescribed[69] description.

32.23.1 *Financial asset*

A financial asset is not "intangible property". The terminology seems strange to a lawyer, but there it is.

Section 608H(2) ITTOIA provides:

> In this section-
> "financial asset" has the meaning given by section 806 of CTA 2009

That takes us to s.806(2) CTA 2009:

> In this Part "financial asset" has the same meaning as it has for accounting purposes.

That takes us to FRS 102 which defines financial asset as follows:

> Any asset that is:
> (a) cash;
> (b) an equity instrument of another entity;
> (c) a contractual right:
> (i) to receive cash or another financial asset from another entity, or
> (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or
> (d) a contract that will or may be settled in the entity's own equity instruments and is:
> (i) a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments; or

[69] Section 608H(2) CTA 2009 provides: "prescribed" means prescribed by regulations made by the Treasury.

> (ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments

Section 806(3) CTA 2009 provides:

> "Financial asset" includes—

There follows a list of 5 types of asset:

Para	**Asset**	**See para**
(a)	loan relationships (see Parts 5 and 6)	64.5.1
(b)	derivative contracts (see Part 7)	*Not discussed*
(c)	contracts or policies of insurance or capital redemption policies	70.2
(ca)	assets so far as they are derived from, or are referable to, contracts or policies of insurance or capital redemption policies, and	
(d)	rights under a collective investment scheme within the meaning of FISMA 2000 (see section 235 of that Act)	App 66.3

These types of assets are governed by separate tax regimes.

32.24 Exemptions

The ORIP code provides the following exemptions:

Section	**Exemption**	**See para**
608J	UK sales under £10m	32.25
608JA	Co resident in specified territory	32.26
608K	Business undertaken in territory of residence	32.27
608L	Foreign tax at least half of UK tax	32.28
608MA	Opaque partnership taxable in full treaty territory	32.29
608MB	Body corporate transparent in full treaty territory	32.30
608MC	Double taxation within control group	32.31

32.25 UK sales below £10m

Section 608J ITTOIA provides:

> (1) Section 608A does not apply in relation to a person for a tax year if the total value of the person's UK sales in that tax year does not exceed £10,000,000.
> (2) Where-

> (a) a person (A), or a person connected with A, receives or is entitled to an amount (whether of a revenue or capital nature), and
> (b) the amount relates (wholly or in part, and directly or indirectly) to the provision of services, goods or other property constituting UK sales,
>
> the UK sales are regarded for the purposes of subsection (1) as A's UK sales.

£10m is a substantial sum, though the reader may doubt whether the figure will ever be increased for inflation.

32.26 Company in specified territory

Section 608JA ITTOIA provides:

> (1) Section 608A does not apply in relation to a company for a tax year if-
> (a) the company is resident in a specified territory throughout the tax year,
> (b) UK-derived amounts arising to the company in the tax year are chargeable to tax under the laws of the territory,
> (c) where those amounts are chargeable only if remitted or otherwise received in the territory, the amounts are remitted or otherwise received there in the tax year,
> (d) the amount of tax which is paid in the territory in respect of the UK-derived amounts is not determined under designer tax provisions, and
> (e) the company is not, at any time in the tax year, involved in an arrangement the main purpose, or one of the main purposes, of which is to obtain a tax advantage for itself or any other person.

32.26.1 *Residence*

Section 608JA ITTOIA incorporates the s.608D definition with amendments:

> (2) For the purposes of this section-
> (a) section 608D (meaning of residence) applies as if subsections (2)(b), (4) and (5) were omitted;

Amended as directed, the relevant part of the definition provides:

> (2) A person is "resident" in a territory if, under the laws of the territory, the person is liable to tax there-
> (a) by reason of the person's domicile, residence or place of

management,

(3) Where-

(a) a person is resident in a territory outside the UK generally for the purposes of the laws of the territory or for particular purposes under those laws, and

(b) the laws of the territory have no provision for a person to be resident there for tax purposes,

the person is "resident" in the territory.

32.26.2 *Specified territory*

(b) "specified territory" means a territory specified in regulations made by the Commissioners.

32.27 Business undertaken within territory of residence

Section 608K ITTOIA provides:

(1) Section 608A does not apply in relation to a person ("the relevant person") for a tax year if-

(a) the relevant person is resident in a territory throughout the tax year,

(b) all (or substantially all) relevant activity in relation to relevant intangible property is, and has at all times been, undertaken in that territory,

(c) there is no relevant connection between relevant intangible property and a related person, and

(d) the person makes a claim under this section.

(1A) For the purposes of this section, section 608D (meaning of residence) applies as if subsections (2)(b), (4) and (5) were omitted.

(2) For the purposes of this section intangible property is "relevant" if any UK-derived amount arising to the person in the tax year relates to it.

(3) In subsection (1)(b) "relevant activity", in relation to relevant intangible property, means anything done (by any person)-

(a) for the purpose of creating, developing or maintaining any of the relevant intangible property; or

(b) for the purpose of generating, for the relevant person, amounts (whether of a revenue or capital nature) that relate, wholly or in part and directly or indirectly, to the enjoyment or exercise of rights that constitute any of the relevant intangible property.

(4) For the purposes of subsection (1)(c) there is a "relevant connection" between relevant intangible property and a related person if any relevant intangible property-

(a) has been transferred (directly or indirectly) from a person related to the relevant person,
(b) derives (directly or indirectly) from anything so transferred, or
(c) derives (directly or indirectly) from intangible property held by a person related to the relevant person.

(5) See section 608T for the meaning of two persons being "related" .

32.28 Foreign tax at least half of UK tax

Section 608L ITTOIA provides:

> (1) Section 608A does not apply in relation to a person for a tax year if-
> (a) the person is resident in a territory outside the UK in that year,
> (b) the amount of tax ("the local tax amount") which is paid in the territory in respect of UK-derived amounts arising in the tax year is at least half of the corresponding UK tax, and
> (c) the local tax amount is not determined under designer tax provisions.
>
> (2) See section 608M for provisions about the local tax amount.
>
> (3) "The corresponding UK tax" means the amount of income tax that would be charged under this Chapter in respect of UK-derived amounts arising in the tax year, calculated on the following basis-
> (a) section 608A applies in relation to the UK-derived amounts, and
> (b) the person is not entitled to any relief or allowance for the tax year.
>
> (5) For the purposes of this section, section 608D (meaning of residence) applies as if subsections (2)(b), (4) and (5) were omitted.

32.28.1 *Local tax amount*

Section 608M ITTOIA provides:

> (1) This section applies for the purposes of section 608L.
>
> (2) Where an amount of tax is paid in the territory in respect of-
> (a) UK-derived amounts arising in the tax year, and
> (b) other amounts,
>
> the amount of tax is to be apportioned between the amounts mentioned in paragraph (a) and paragraph (b) on a just and reasonable basis.
>
> (3) Where-
> (a) in the territory any tax falls to be paid in respect of UK-derived amounts arising in the tax year,
> (b) under the laws of the territory, a repayment of tax, or a payment in respect of credit for tax, is made to any person, and
> (c) that repayment or payment is directly or indirectly in respect of

the whole or part of the tax mentioned in paragraph (a),

the local tax amount is to be reduced by the amount of that repayment or payment (but this is subject to subsections (4) and (5)).

(4) Subsection (5) applies if the repayment or payment mentioned in subsection (3)(b) is in respect of-

(a) the tax mentioned in subsection (3)(a), and

(b) other tax.

(5) The amount of the repayment or payment is to be apportioned between the tax mentioned in subsection (3)(a) and the other tax on a just and reasonable basis, and the reduction under subsection (3) is limited to the amount apportioned to the tax mentioned in subsection (3)(a).

(6) Any reduction under subsection (3) is to be undertaken after any apportionment under subsection (2).

32.29 Opaque partnership taxable in full treaty territory

Section 608MA ITTOIA provides:

(1) This section applies where-

(a) under the laws of a full treaty territory, a partnership is regarded for tax purposes as an entity separate and distinct from the partners,

(b) the partnership is resident in the territory throughout a tax year,

(c) UK-derived amounts arise to the partnership in the tax year, and

(d) the UK-derived amounts are chargeable to tax under the laws of the territory.

(2) In the application of section 608A to a partner for the tax year, no account is to be taken of the UK-derived amounts.

(3) For the purposes of subsection (1)(b), the partnership is "resident" in a territory if (and only if) it is resident there by virtue of section 608D(2) (references there to be a person being read as references to the partnership).

32.30 Body corporate transparent in full treaty territory

Section 608MB ITTOIA provides:

(1) This section applies where-

(a) a body corporate formed under the laws of a full treaty territory ("the relevant territory") is not regarded under those laws, for tax purposes, as an entity separate and distinct from its members,

(b) the body is not resident, at any time in a tax year, in a territory that is not a full treaty territory,

(c) UK-derived amounts arise to the body in the tax year, and
(d) each relevant member is resident in the relevant territory throughout the tax year.

(2) In the application of section 608A to the body for the tax year, no account is to be taken of the UK-derived amounts.

(3) The relevant members are to be determined as follows-
(a) each member of the body is a relevant member (subject to paragraph (b));
(b) if a body corporate that meets the conditions in subsection (4) would otherwise be a relevant member, that body's members are relevant members (and that body is not a relevant member);
(c) paragraph (b) applies in relation to a body that would otherwise be a relevant member by virtue of that paragraph (as well as in relation to a body that would otherwise be a relevant member by virtue of paragraph (a)).

(4) The conditions referred to in subsection (3)(b) are-
(a) that the body is formed under the laws of the relevant territory;
(b) that under those laws, the body is not regarded for tax purposes as an entity separate and distinct from its members;
(c) that the body is not resident, at any time in the tax year, in a territory that is not a full treaty territory.

32.31 Double taxation on control group

Section 608MC ITTOIA provides:

(1) This section applies where-
(a) two persons (A and B) are in the same control group throughout a tax year,
(b) neither A nor B is, at any time in the tax year, involved in an arrangement the main purpose, or one of the main purposes, of which is to obtain a tax advantage for A, B or any other person,
(c) income tax is charged under section 608A on a UK-derived amount arising to A in the tax year, and A is not entitled to any relief in respect of the UK-derived amount,
(d) the UK-derived amount is a direct or indirect payment from B to A in respect of rights ("relevant rights") that-
(i) constitute any of B's intangible property, and
(ii) derive, directly or indirectly, from rights that constitute any of A's intangible property.

(2) In the application of section 608A to B for the tax year, the amount of any UK-derived amount arising to B in the tax year in respect of B's relevant rights is to be reduced (but not below nil) by the amount of the UK-derived amount mentioned in subsection (1)(c).

(3) For the purposes of this section where a UK-derived amount is in respect of relevant rights and anything else, the amount is to be regarded as being in respect of relevant rights to such extent as is just and reasonable.

32.32 Collection from control group

Section 608O ITTOIA provides:

> (1) This section applies where-
> (a) an amount of income tax has been assessed on a person ("the taxpayer") for a tax year by virtue of this Chapter, and
> (b) the whole or any part of that amount, or of any interest on that amount, is unpaid at the end of the period of 6 months after the relevant date.
> (2) A designated officer may give a notice to a relevant person requiring that person, within 30 days of the giving of the notice, to pay any unpaid tax and interest.
> (3) The notice must state-
> (a) the amount of income tax and interest that remains unpaid,
> (b) the date when the income tax first became payable, and
> (c) the relevant person's right of appeal.
> (4) A notice under this section may not be given more than 3 years and 6 months after the relevant date.
> (5) In this section "relevant person" means any person who was in the same control group as the taxpayer at any time in the tax year (see section 608S for the meaning of being in the same "control group").
> (6) In this section "the relevant date" means-
> (a) in relation to an amount of income tax determined under section 28C of TMA 1970, the date on which the determination was issued;
> (b) in relation to an amount of income tax under a self-assessment in a case where the taxpayer's return under section 8 or 8A of TMA 1970 was delivered after the last day for delivering it in accordance with that section, the date on which the return was delivered;
> (c) in any other case, the date the amount mentioned in subsection (1)(a) became due and payable.
> (7) A notice may be given anywhere in the world, to any relevant person (whether or not UK resident).
> (8) In this section-
> "assessment" : any reference to an amount of income tax that has been assessed on a person includes an amount of income tax that has been determined under section 28C of TMA 1970 in relation to the person;

> "designated officer" means an officer of Revenue and Customs who has been designated by the Commissioners for the purposes of this Chapter.

32.32.1 *Payment notice: effect*

Section 608P ITTOIA provides:

> (1) This section applies where a notice under section 608O is given to a person.
> (2) For the purposes of the recovery from the person of any unpaid tax and interest (including interest accruing after the date of the notice), the person is treated as if-
> (a) the amount of income tax assessed as mentioned in section 608O(1)(a) had been assessed on the person,
> (b) that amount became due and payable when the tax mentioned in section 608O(1)(a) became due and payable, and
> (c) any payments made in respect of the amount mentioned in section 608O(1)(a) (or in respect of interest on that amount) had been made in respect of the amount treated as assessed by virtue of paragraph (a) of this subsection (or in respect of interest on that amount).
> (3) Nothing in subsection (2) gives the person a right to appeal against the assessment mentioned in section 608O(1)(a) (or against any assessment treated as made by virtue of subsection (2) of this section).
> (4) Any appeal by the taxpayer against the assessment mentioned in section 608O(1)(a) does not affect the liabilities arising by virtue of the giving of the notice.

32.32.2 *Payment notice: appeal*

Section 608Q ITTOIA provides:

> (1) This section applies where a notice under section 608O is given to a person.
> (2) The person may appeal against the notice, within the period of 30 days beginning with the date on which it is given, on the ground that the person is not a relevant person (as defined by section 608O).
> (3) Where an appeal is made, anything required by the notice to be paid is due and payable as if there had been no appeal.
> (4) Section 56 of TMA 1970 (payment of tax where further appeal) applies in relation to any further appeal against the notice, but the relevant court or tribunal may, on the application of Her Majesty's Revenue and Customs, direct that section 56(2) does not apply to anything required by the notice to be paid.
> (5) A direction may be given if the relevant court or tribunal considers

> it necessary for the protection of the revenue.
> (6) In this section "relevant court or tribunal" has the same meaning as in section 56 of TMA 1970.

32.32.3 *Effect of making payment*

Section 608R ITTOIA provides:

> (1) This section applies where a notice under section 608O is given to a person.
> (2) A person who pays an amount in pursuance of the notice may recover that amount from the taxpayer.
> (3) In calculating the person's income, profits or losses for any tax purposes-
> (a) a payment in pursuance of the notice is not allowed as a deduction, and
> (b) the reimbursement of any such payment is not regarded as a receipt.
> (4) Any amount paid by the person in pursuance of the notice is to be taken into account in calculating-
> (a) the amount unpaid, and
> (b) the amount due by virtue of any other notice under section 608O relating to the amount unpaid.
> (5) Similarly, any payment by the taxpayer of any of the amount unpaid is to be taken into account in calculating the amount due by virtue of the notice (or by virtue of any other notice under section 608O relating to the amount unpaid).

32.33 Control group

Section 608S ITTOIA provides:

> (1) Two persons are in the same control group at any time if-
> (a) they are consolidated for accounting purposes for a period which includes that time,
> (b) one of them has a 51% investment in the other at that time, or
> (c) a third person has a 51% investment in each of them at that time.

"51% investment" is defined in s.698U ITTOIA; see 105.8 (% investment tests).

32.33.1 *Consolidated for accounting purposes*

Section 608S(2) ITTOIA provides:

> Two persons are consolidated for accounting purposes for a period if-

> (a) their financial results for the period are required to be comprised in group accounts,
> (b) their financial results for the period would be required to be comprised in group accounts but for the application of an exemption, or
> (c) their financial results for the period are in fact comprised in group accounts.
>
> (3) In this section "group accounts" means accounts prepared under-
> (a) section 399 of the Companies Act 2006, or
> (b) any corresponding provision of the law of a territory outside the UK.

32.33.2 *Related person*

Section 608T ITTOIA provides:

> (1) Two persons are "related" at any time if-
> (a) at that time-
> (i) they are in the same control group,
> (ii) one of them has a 25% investment in the other, or
> (iii) a third person has a 25% investment in both of them, or
> (b) at any time in the period of 6 months beginning or ending at that time-
> (i) one of them directly or indirectly participates[70] in the management, control or capital of the other, or
> (ii) a third person directly or indirectly participates in the management, control or capital of both of them.

See 105.8 (% investment tests).

32.34 Offshore IP receipts: TAAR

Of course there is a TAAR. Section 608W ITTOIA provides:

> (1) This section applies if a person has entered into any arrangements[71]

[70] Section 608T(2)/s.608V ITTOIA incorporate the definition by reference:

> "(1) This section applies for the purposes of section 608T.
> (2) A person is directly participating in the management, control or capital of another person at a particular time only if section 157 of TIOPA 2010 so provides.
> (3) A person is indirectly participating in the management, control or capital of another person at a particular time only if section 159 or 160 of TIOPA 2010 so provides.

See 105.1 (Participation).

[71] Section 608Z ITTOIA provides the standard (unnecessary) IT definition of "arrangements": see App 2.2.3 (Definitions of "arrangement").

> the main purpose, or one of the main purposes, of which is to obtain a tax advantage[72] for the person as a result (wholly or partly) of-
>
> (a) anything not being subject to the charge under section 608A, or
>
> (b) any provisions of double taxation arrangements having effect in a case where the advantage is contrary to the object and purpose of the provisions.
>
> (2) The tax advantage is to be counteracted by the making of such adjustments as are just and reasonable.
>
> (3) The adjustments may be made (whether by an officer of Revenue and Customs or the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.
>
> (4) Where this section applies by virtue of subsection (1)(b), the counteraction has effect despite section 6(1) of TIOPA 2010.

This is a counter-action style TAAR: see 3.2.3 (Consequence of TAAR). The treaty-override is based on the OECD principal purpose test.[73]

32.35 Interaction with other provisions

Section 608X ITTOIA provides:

> (1) This section applies where section 608A applies in relation to a person for a tax year (or would apply, if the following provisions of this section applied).
>
> (2) Part 6 (exempt income) does not apply in relation to UK-derived amounts arising to the person in the tax year.
>
> (3) For the purposes of calculating the person's liability to income tax for the tax year-
>
> (a) Chapter 1 of Part 14 of ITA 2007 (limits on liability to income tax of non-residents) does not apply in relation to UK-derived amounts arising to the person in the tax year;
>
> (b) accordingly, the person's liability is the sum of-
>
> (i) the person's liability as regards UK-derived amounts (with that Chapter not applying), and
>
> (ii) the person's liability as regards anything else (with that Chapter applying, to the extent it would otherwise apply).

32.36 ORIP appeals

Section 608Y ITTOIA provides:

[72] Section 608W(5) sets out the GAAR definition of "tax avoidance"; see 3.19.1(Tax advantage: Definitions).

[73] See 72.7 (OECD principal purpose test).

(1) This section applies where a person ("the taxpayer") makes an appeal in relation to an amount of income tax charged on the taxpayer under section 608A.
(2) Section 55(3) to (8A) of TMA 1970 (application for postponement of payment of tax pending appeal) do not apply in relation to the tax charged (and no agreement as to the postponement of payment of any of that tax, or of interest on it, may be made).
(3) In the case of a further appeal, the relevant court or tribunal (as defined by section 56 of TMA 1970) may, on the application of Her Majesty's Revenue and Customs, direct that section 56(2) of TMA 1970 does not apply to the tax charged.
(4) A direction may be given if the relevant court or tribunal considers it necessary for the protection of the revenue.
(5) Nothing in this section applies in relation to a liability arising as a result of the giving of a notice under section 608O.

32.37 Definitions

Section 608Z ITTOIA provides:

In this Chapter-

"control group" has the meaning given by section 608S;
"designer tax provisions" means provisions which appear to the Commissioners to be designed to enable persons to exercise significant control over the amount of tax which they pay in respect of UK-derived amounts;
"double taxation arrangements" means arrangements that have effect under section 2(1) of TIOPA 2010;
"full treaty territory" has the meaning given by section 608E;
"intangible property" has the meaning given by section 608H;
"related": references to two persons being related are to be read in accordance with section 608T;
"resident": references to being resident in a territory are to be read in accordance with section 608D;
"tax": any reference (however expressed) to tax payable or paid under the laws of a territory outside the UK is a reference to a tax which-
(a) is charged on income, and
(b) corresponds to income tax or corporation tax;
and for this purpose tax may correspond to income tax or corporation tax even though it is payable under the laws of a province, state or other part of a country or is levied by or on behalf of a municipality or other local body;

“tax advantage” has the meaning given by section 608W(5);

“UK-derived amount” has the meaning given by section 608F;

“UK sales” has the meaning given by section 608F.

CHAPTER THIRTY THREE

MISC SWEEP-UP INCOME

33.1 Misc Sweep-up Income
- 33.1.1 Current/previous charging clause
- 33.1.2 Income from a source
- 33.1.3 Deemed income
- 33.1.4 Priority rules

33.2 General principles
- 33.2.1 Income
- 33.2.2 Ejusdem generis
- 33.2.3 Annual
- 33.2.4 Summary

33.3 Source/voluntary transaction
- 33.3.1 Source requirement
- 33.3.2 Position post-ITTOIA

33.4 Gift/voluntary transaction

33.5 Disposal of asset

33.6 Types of Misc Sweep-up Income

33.7 Income from assets
- 33.7.1 Hire of chattels
- 33.7.2 Payment to permit filming
- 33.7.3 Tolls

33.8 Income from company
- 33.8.1 Loan waiver by company
- 33.8.2 Gift by non-resident company

33.9 Services
- 33.9.1 Significance of contract

33.10 Examples of services
- 33.10.1 Providing information
- 33.10.2 Photography
- 33.10.3 Commission for introduction
- 33.10.4 Cashback
- 33.10.5 Partnership bonus scheme

33.11 Income from finance
- 33.11.1 Guarantor fee
- 33.11.2 Lender's fee

33.12 Futures and options
- 33.12.1 Derivatives: Terminology
- 33.12.2 Futures/Options: IT relief
- 33.12.3 "Commodity/financial future"
- 33.12.4 Traded/financial options

33.13 Swaps

33.14 Restraint of trade

33.15 US economic impact payments

33.16 Tax avoidance cases

33.17 Sweep-up income: Computation

33.18 Sweep-up income: Remittance basis

33.19 Misc Sweep-up Income: Source
- 33.19.1 Source: Income from assets
- 33.19.2 Source: Income from services
- 33.19.3 Source: futures and swaps

33.20 DT relief: "Other Income"

33.1 Misc Sweep-up Income

This chapter deals with income taxed under Chapter 8 Part 5 ITTOIA/ Chapter 8 Part 10 CTA 2009 ("Income not otherwise charged"). I go beyond the themes of this book and address the topic as a whole.

Statute does not provide a name for income in this category. The heading of Part 5 is "miscellaneous income".[1] The drafter describes this

[1] For the general scheme of income categorisation in the taxes acts, see 14.6.2 (ITTOIA/CTA income categories).

category of income as “miscellaneous income: income not otherwise charged”. It is, one might say, *miscellaneous* miscellaneous income. HMRC refer to Chapter 8 as “miscellaneous income sweep-up provisions”. I refer to income within s.687/979 as **“Misc Sweep-up Income”**. That is a clumsy label, but it is difficult to think of a better one. I use initial capitals, to reflect the technical nature of the expression.

Some categories of income are charged as Misc Sweep-up Income by statute, such as OIGs[2] and gains from funds invested in non-reporting offshore funds.[3] These have nothing in common with the case law categories of Misc Sweep-up Income, and are not discussed in this chapter.

Some types of income categorised as Misc Sweep-up Income before the tax law rewrite are now taxed under other provisions; for instance, non-trade Non-Annual Payment royalties.[4]

I do not discuss:

- the small allowance in Part 6A ITTOIA
- misc sweep-up losses

33.1.1 *Current/previous charging clause*

The current law is as follows:

s.687(1) ITTOIA	**s.979(1) CTA 2009**
Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.[5]	The charge to corporation tax on income applies to income that is not otherwise within the application of that charge under the Corporation Tax Acts.

In order to follow the older cases, one needs to bear in mind that the pre-rewrite legislation was different, or at least differently worded, from the current legislation:

The term “miscellaneous income” might also be used for income of the types listed in s.1015 ITA, which includes Misc Sweep-up Income in a ragbag of about 40 types of income.

[2] See 68.4 (Taxation of reporting-fund income).

[3] Reg 85N Authorised Investment Funds (Tax) Regulations 2006.

[4] See 32.3 (Types of IP income).

[5] For this style of charging provision, see 14.7.2 (Priority in charging provision).

s.18 ICTA 1988 (sch D case VI)	**Current law: s.687 ITTOIA**
Tax under this Schedule shall be charged in respect of ...	Income tax is charged under this Chapter on
(b) all interest of money, annuities and other annual profits or gains not charged under Schedule A, B, C or E, and not specially exempted from tax (2)Tax under Schedule D shall be charged under the Cases set out in subsection (3) below... (3)The Cases are ... Case VI: tax in respect of any annual profits or gains not falling under any other Case of Schedule D and not charged by virtue of Schedule A, B, C or E.	income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.

There are two differences or apparent differences:

(1) "Annual profits or gains" (ICTA) has become "income" (in ITTOIA)

(2) ITTOIA requires that the income is "*from any source*": this is new

Of these two changes, the move from "annual profits and gains" to "income" is not significant: that phrase has always been understood to mean income[6], and is best regarded as just an archaic term for income. One only needs to bear the old terminology in mind in order to understand the older cases and modern cases which discuss them.

The new (ITTOIA) reference to source does seems significant, but pre-rewrite cases refer to "source" even though the word was not in the legislation before 2005.[7] So perhaps it only states expressly what was previously understood.

33.1.2 *Income from a source*

It is clear from the words of the charging provision that:

(1) There must be "income"; and

(2) For IT,[8] the income must be "from any source" ie:

(a) there must be a source; and

[6] See 14.2 (Terminology: Income/gains/profit).

[7] See eg the quote from *AG v Black* in 33.2 (General principles).

[8] The CT provision lacks the words "from any source" but that can be implied.

(b) the income must be from that source

EN ITTOIA provides:

> 1187. The charge under this Chapter is restricted to amounts that are "income" on first principles. That is, they are "annual profits or gains" under section 18(1) of ICTA, as that phrase has been interpreted by case law, and are not profits or gains of a capital nature ...
> This is indicated
> [1] by the use in section 687(1) of the words "from any source" and
> [2] by the disapplication of the definition of "income" in section 878(1) [ITTOIA] by section 687(4).

I would have thought that the rule that the charge only applies to amounts that are income is indicated by the word "income"; and the two points listed seem rather obscure ways to indicate that (if indeed they do). The drafter of the CTA provision possibly agreed, at least as to point [1], since it omits the words "from any source". But it does not matter.

33.1.3 *Deemed income*

s.687 ITTOIA	**s.979 CTA 2009**
(4) The definition of "income" in s.878(1) does not apply for the purposes of this section.[9]	(2) Subsection (1) does not apply to ... (c) deemed income.

Deemed income will generally be expressly charged under some other provision. But there might be deemed income without a charge (s.731 income of non-residents, for instance) and it does no harm to expressly exclude this from the Misc Sweep-up Income charge.

33.1.4 *Priority rules*

Statute sets out some priority rules:

s.687(2) ITTOIA	**s.979(2) CTA 2009**
Subsection (1) does not apply [i] to annual payments or [ii] to income falling within Chapter 2A of Part 4 [Disguised interest].	Subsection (1) does not apply to- (a) annual payments ...

[9] The disapplied definition states:
'Income' includes amounts treated as income (whether expressly or by implication).

Those types of income are taxed elsewhere.[10]

s.687 ITTOIA	**s.979 CTA 2009**
(3) Subsection (1) does not apply to income that would be charged to income tax under or as a result of another provision but for an exemption.	(2) Subsection (1) does not apply to ... (b) income in respect of which no liability to corporation tax arises because of an exemption, or

That prevents the charge from overriding tax exemptions.

33.2 General principles

33.2.1 *Income*

It is clear that the charge is on income, as the post-rewrite charging provisions says so. So case law is not needed to make the point, but the pre-rewrite case law is still traditionally cited.[11] So while it is no longer a universal truth that "Income tax is a tax on income" the principle still applies for Misc Sweep-Up Income. This raises the question on how to draw the troublesome distinction.[12]

33.2.2 *Ejusdem generis*

In *AG v Black*:[13]

> The words in [sch D case VI] are very extensive. My Brother Martin says, "It seems impossible that any net could be extended more widely; every possible source of income seems included." Not, however, that every kind of income derived by a corporation, in whatever way it may come to them, would be included in it. They would not be liable except in respect of something of the same nature and kind as what had been previously mentioned [sch D cases I - V].

[10] See 26.25 (Disguised interest); 31.1 (Annual Payments: Introduction).

[11] Authorities commonly cited on this point are *Leeming v Jones* 15 TC 333 at p.359.; *Ryall v Hoare* 8 TC 521 at p.525:

> "it is quite clear that anything in the nature of a capital accretion is outside the words "profits or gains", as used in these Acts; that, of course, follows from the scope of the Act, and it is sanctified by the usage now of a century."

[12] See 14.4 (Income Tax: a tax on income?)

[13] (1871) L.R. 6 Exch 308 at p.309, quoting Martin B at first instance (1871) LR 6 Exch 78 at p .85. The case went to a further appeal, dismissed very briefly, reported in 1 TC 54, but the TC report does not include these earlier judgments.

And in *Leeming v Jones*:

> The limitations of the words "profits and gains" were pointed out by Lord Blackburn long ago in the case of the *Attorney-General v Black* when he said that profits and gains in Case VI must mean profits and gains ejusdem generis with the profits and gains specified in the preceding five cases.

HMRC v BlueCrest Capital Management has extended this:[14]

> the necessary analogy may be found in any head of charge under the Income Tax Acts, including at least those specified in the latest version of section 18 of ICTA 1988 which section 687 replace

"Analogous" may mean little or much. The Latin terminology - to be deprecated in modern law - masks the imprecision. The UT thought the analogy was with the Misc Sweep-up Income charge on services; CoA thought the analogy was with employment income. I would have said that if the receipt is income, that is enough. It is suggested that the *ejusdem generis* rule has no role in post-ITTOIA law.

33.2.3 *Annual*

In *Andrew v HMRC*:[15]

> 147.Case VI applies to "annual profits or gains" that are not taxed under the other Cases of Schedule D. However, as Viscount Dunedin pointed out in *Leeming v Jones*, ... the word "annual" in the phrase "annual profits or gains"' does not require that a receipt or profit recurs year after year. However, it does require that the receipt must be of the nature of income...
> 149.On that basis, and as the House of Lords held in *Leeming v Jones* itself, a profit arising from an isolated purchase and sale of an asset could not fall within Schedule D Case VI. Such a profit could only be subject to tax as income if the transaction was in the nature of a trade and so within Case I ... If not, the profit arising would be of a capital nature and so not within Case VI.
> 150.The same may not apply where the transaction is not an isolated transaction but is repeated over a number of years (see *Cooper v Stubbs*) offers another example.

[14] [2023] EWCA Civ 1481 at [101].
[15] [2019] UKFTT 177 (TC).

"Profits or gains" means "income", and the word "annual" means "of an income nature":[16] it is clear that the word adds nothing. It was sensibly deleted in the tax law rewrite.

33.2.4 *Summary*

Kerrison v HMRC reviewed the old (pre-rewrite) authorities and came up with this:[17]

> The receipt must:
> (1) have the nature of "annual profits". That simply means that the receipts must be capable of being "calculated in any one year". It does not mean that the income must recur every year;
> (2) be of an income nature;
> (3) be analogous to some other head of charge under what was previously Schedule D – this is the *eiusdem*[18] *generis* principle;
> (4) be the recipient's income[19]

But points (1), (2) and (4) are 3 different ways of saying the same thing, or more or less the same thing, and they are self-evident from the current (post-rewrite) statutory words, so they need no authority.[20]

33.3 Source/voluntary transaction

33.3.1 *Source requirement*

Since the charge is on "on income from any source" it is clear that the income must (at least after ITTOIA) be from a source.[21] But the words

[16] See 14.2 (Terminology: Income/gains/profit); 31.3.1 (Annual/capable of recurrence).

[17] [2019] UKUT 8 (TCC) at [68] referring to: *Ryall v Hoare* 8 TC 521 at p.526; *Leeming v Jones* 15 TC 333 at p .359.

[18] The spelling *ejusdem* is more common, but both are found.

[19] *Spritebeam v HMRC* [2015] UKUT 75 (TCC) at [54]; reported at first instance under the name *Versteegh v HMRC* [2013] UKFTT 642 (TC). Would it not be convenient if cases did not change their name when they went on appeal?

[20] For points (1) and (2), see 33.1.2 (Income from a source); for point (4) see 15.2.1 (Receipt/entitlement basis of liability).

[21] See 33.1.2 (Income from a source). For completeness: *Kerrison v HMRC* is slightly tentative on the point:

> "... s. 687(1) expressly refers to "income from any source" which suggests (?) to us that in order for income to be taxable ... it requires a source ... although we would be minded to accept that a receipt taxable under s.687(1) ITTOIA must have a source, it is not necessary for us to reach a decision on this point."

[2019] UKUT 8 (TCC) at [70]. But even if there was doubt on this point before the *income* and *source* and *from* (suggesting a causation/derivation test) all need elucidation.

Spritebeam v HMRC concerned a CT avoidance scheme where (in short) a lender lent money to a borrower, on terms that the borrower paid interest, not to the lender but to a third party (Spritebeam).[22] The *lender* was able to enforce the borrower's obligation to pay, but did not receive anything. The third party Spritebeam received the payments, but was not entitled to enforce them.

It was common ground that the loan agreement was a source. The unusual feature in *Spritebeam* was Spritebeam did not own this property or have any interest in it. The taxpayer argued that there was a charge only if it had an interest in the source (which it did not). The reader may think that was uncontroversial. But no:

> the required connection between taxpayer and source need not be limited to legal rights but can include the situation where the payment is made pursuant to any legal duty owed by the payer.[23]

That is a sensible outcome. But what in fact is the connection required between taxpayer and source? The UT stated that what is needed is "sufficient connection" to the source (a "sufficient-connection test"). No-one had ever suggested that before: *Spritebeam* is new law.

"Sufficient connection" is evaluative and vague, and all we know that it was sufficient connection that the borrower was obliged to pay to Spritebeam. There is some risk of outcome-dependent analysis: that a tribunal first decides the outcome, and then determines the issue, whether there is a sufficient connection test, in order to reach that outcome. Income is not taxable because the tribunal decides it has has sufficient connection: it has sufficient connection because the tribunal decides it should be taxable.

For instance: No-one says that a payment from a charitable trust, or charitable company, to a beneficiary of the charity, is taxable (either as Misc Sweep-up Income or as an Annual Payment). Before *Spritebeam* one would have said that there was no charge as a beneficiary of a charity has no interest in the charity, but we now know that is not a requirement.

tax law rewrite, there can be no doubt about it now.

[22] All companies were in the same group, so the transaction made commercial sense, but nothing turned on that for present purposes.

[23] at [84].

Presumably there is insufficient connection. But why is there an insufficient connection? Perhaps because there is no equivalent of the lender, in *Spritebeam*, who could enforce the obligation. But the Charity Commission and Attorney General can enforce the charity's duties.[24] Why should that not be enough?

Spritebeam raised the example a contract between employer and employee requiring payments to a third party, and EBT:

> The employment contract obliges the employer to make contributions to an approved retirement benefit scheme. The trustees are not parties to the contract but have an absolute obligation to the employee. Trustees are not taxed on the contributions to the scheme and [Counsel for Spritebeam] maintained that this was because the trustees did not have the necessary connection to the employment contract source. However, without expressing a concluded view, we would maintain that the case ... is probably distinguishable. Even if (a moot point) the payments are regarded as the trustees' income, the basis for the employer's payment is to settle income on the employee in the form of a trust. This basis may well be insufficient to generate the necessary connection between the trustees and the source.[25]

No-one doubts the outcome; but the reader may think this a feeble analysis.

33.3.2 *Position post-ITTOIA*

Spritebeam was a pre-ITTOIA case. After ITTOIA, unlike the pre-rewrite legislation, the charge on Misc Sweep-up Income requires income *from* a source: this suggests a causation/derivation test. So *Spritebeam* might have been decided the same way today, but on the basis that its income was derived from the source (the obligations of the borrower). Though causation/derivation tests are themselves evaluative and vague, so I am not sure whether this approach could be said to be more precise, or whether it would ever give a different outcome from a sufficient connection test.

In *Kerrison*, a post-rewrite case, the UT uncritically adopted the *Spritebeam* "sufficient link" test.[26] So a "sufficient-link" test (or sufficient connection, the meaning is the same) seems settled at FTT level, likely to be followed at UT level, though still open to review at the level of the

[24] assuming English law or English law principles apply.

[25] at [87].

[26] see eg at [65].

CoA. But even if the "sufficient-link" test may be agreed, the question of what "sufficient link" actually means remains open for argument.

HMRC v BlueCrest Capital Management[27] suggests that the source must exist in the year of assessment, though the point was not necessary for the decision, and that may be doubted.

33.4 Gift/voluntary transaction

In *Ryall v Hoare*:[28]

> The other class of case that one can rule out is that of gifts. A person may have an emolument by reason of a gift ... It seems to me that all that class of cases must be ruled out, because they are not profits or gains at all.

In *Stepford v Below*:[29]

> it has been held again and again that a mere voluntary gift ... is not, in the true sense of the word, income. It is merely a casual payment which depends upon somebody else's good will... [30]

It is well established that a voluntary transaction (for brevity I use the term gift) is not taxable:

(1) as Misc Sweep-up Income or
(2) as an Annual Payment[31]

But is that because:
(1) a gift is not income (though gifts may be income for accountancy purposes)? or
(2) a gift does not have a source (though the donor's benevolence could be called a source)?

The answer is, surely, both. The concepts of gift/source/income are conceptually distinct, but they interrelate, and discussion easily segues from one to another. Having decided that a gift is not taxable, subsequent cases may simply ask if there is a gift, and may not consider the analysis

[27] [2023] EWCA Civ 1481 at [102]; but see 14.4 (Need for a source?).

[28] 8 TC 521 at p.525.

[29] 16 TC 505 at p.521

[30] This is so even for a series of gifts, which might look more like income: at p.521 "The case is only an instance of a succession of voluntary payments, each of which is voluntary and none of which need necessarily be continued."

[31] See 31.3 (Annual Payment: Meaning).

further.

Unfortunately, the concept of gift itself needs elucidation. On a number of occasions taxpayers have argued that payments are voluntary, and so not taxable; sometimes successfully and sometimes not.

Early in the history of income tax, it was argued that payments from a discretionary trust were voluntary, and so not taxable, but no:

> I do not assent to the proposition that a voluntary payment can never be charged,[32] but it is enough to say that these were not voluntary payments in any relevant sense. They were payments made in fulfilment of a testamentary disposition for the benefit of the children in the exercise of a discretion conferred by the will.[33]

Emphasis added: the underlined words recognise, which is important to remember, that "voluntary" has a range of meanings.

In *Spritebeam*, discussed above, it was argued that the company received a voluntary payment and so not taxable as Misc Sweep-up Income. But the argument failed:[34]

> it is immaterial that the recipient cannot enforce payment; what matters is whether there is an obligation on the payer to pay... the obligation was in no sense voluntary.[35]

33.5 Disposal of asset

In *Ryall v Hoare*, the income requirement for Misc Sweep-up Income:[36]

> rules out, of course, the well-known case of a casual profit made upon an isolated buying and selling of some article; that is a capital accretion, and unless it is merged with other similar transactions in the carrying on of a trade, and the trade is taxed, no tax is exigible in respect of a transaction of that kind.

Similarly *Leeming v Jones*:[37]

[32] Author's footnote: When might voluntary payments be charged? Perhaps the point here is that a gift might be charged as trading income or employment income. But there needs to be something more than just a gift.

[33] *Drummond v Collins* 6 TC 525 at p.539. The point was re-argued, hopelessly, in *Cunard's Trustees v IRC* with the same outcome: 27 TC 112 at p.133.

[34] It could not be taxed as interest for reasons related to the loan relationship rules.

[35] at [68], [85]. I would prefer to say that the payment was in one sense voluntary, but not in the relevant sense.

[36] 8 TC 521 at p.525.

[37] 15 TC 333 at p.354 in a passage approved on appeal.

> It seems to me in the case of an isolated transaction of purchase and resale of property there is no middle course open. It is either an adventure in the nature of trade, or else it is simply a case of sale and resale of property.

The BI Manual provides:

> **BIM100135 isolated sales of assets** [Jun 2016]
> Casual profits made from the isolated buying and selling of assets may be taxable as trading income: see BIM20230 for further guidance.
> If the activity falls short of a trade then the question is whether the profits come from the increase in value of a capital asset. A capital profit is not taxable as miscellaneous income.
> **Sales of single assets**
> A profit on the sale of a single item that is not a trading venture will be a capital accretion and not taxable as miscellaneous income...

The courts have found the trade/non-trade border difficult to define. *Andrew v HMRC* was a variant of a straightforward purchase and sale:

(1) Trustees were given an asset (an option over gilts)
(2) The trustees were paid a sum to release the option

The profit was not taxable as Misc Sweep-up Income:

> the transactions are akin to the isolated transaction which was the subject of the House of Lords decision in *Leeming v Jones*. The NA Trustee acquired rights to the Call Option and disposed of its rights in a single transaction by electing to cancel the Call Option for the cash cancellation price. There is no evidence before the Tribunal that these transactions were part of a repeated pattern of behaviour (as in *Cooper v Stubbs*). The receipt of the cash cancellation price was capital in nature and so cannot fall within Schedule D Case VI. The timing of the transactions, and in particular the short timeframe between the acquisition and disposal of the option rights, and the short term nature of the option rights themselves do not disturb that conclusion.[38]

33.6 Types of Misc Sweep-up Income

HMRC offer a helpful taxonomy of types of Misc Sweep-up Income:

(1) Income from services *eg:*
Providing information
Photography

[38] at [153].

Film and TV
Commission for introducing customers; cash-backs

(2) Income from finance *eg:*
Guarantee fees
Lender's fees
Swaps

(3) Income from assets *eg:*
Hire of chattels
Stock loans
Payment for allowing filming
Tolls
Distributions from a non-resident company[39]

(4) Restraint of trade

This is not a comprehensive list: one should add a "miscellaneous" category to cover income not fitting into the above neat categorisation.

33.7 Income from assets

33.7.1 *Hire of chattels*

The BI Manual provides:

> **BIM100220 hire of equipment** [Jan 2019]
> The profits from the hire of movable objects, whether or not of a casual or occasional nature, are taxable under the miscellaneous income sweep-up provisions where they are not otherwise taxable, for example because the activity does not amount to a trade.

33.7.2 *Payment to permit filming*

The BI Manual provides:

> **BIM100245 film and television** [Jun 2016]
> If someone receives a fee for allowing a property to be used for filming, then this is chargeable under the miscellaneous income sweep-up provisions if it is not taxable as income from property.

This is a straightforward licence fee for use of the property.

> However, funds paid out to local residents as compensation for the disturbance caused by filming are likely to be of a gratuitous nature and so will not be taxable as miscellaneous income.

[39] See 30.8.4 (Income-distribution: IT charge).

The point is that the victims of disturbance had no legal claim for compensation. But I wonder how often such payments are made.

33.7.3 *Tolls*

The BI Manual provides:

> **BIM100250 tolls** [Jan 2019]
> Income from tolls, dues etc which arises because the taxpayer owns or occupies the land is taxed as trading income: see BIM60201.
> Profits derived from tolls, dues etc which do not arise from the ownership or occupation of lands etc and therefore are not taxable as trading income are taxable as miscellaneous income under the sweep-up provisions.
> In the case of *CIR v The Forth Conservancy Board* [1931] 16 TC 103 the Conservancy Board was empowered to levy dues on vessels, goods and passengers coming within its jurisdiction.
> In the House of Lords it was held that the Conservancy Board's surplus revenues from these dues were profits within the sweep-up provisions.
> It was not disputed that the assessment could not be greater than the surplus of the dues over the Conservancy Board's expenses.

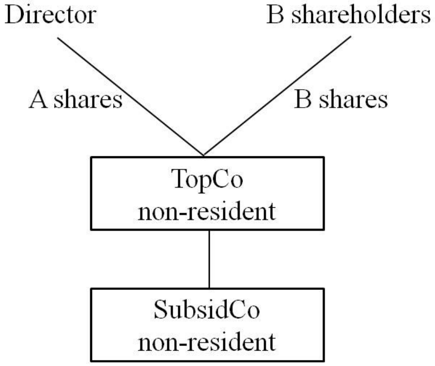
33.8 Income from company

Income distributions from a non-resident company are taxed as misc sweep-up income; see 30.5.4 (Income-distribution: IT charge).

33.8.1 *Loan waiver by company*

Kerrison v HMRC[40] concerned an avoidance scheme intended to generate a tax loss. So far as relevant here, the facts were:

(1) A company with A and B shares held a subsidiary ("SubsidCo"):



[40] [2019] UKUT 8 (TCC).

(2) In June 2006 SubsidCo made a loan of £155m to the B shareholders in order for them to purchase B shares in TopCo.
(3) In November 2006 SubsidCo waived the loan (and the shares became more or less worthless).

This was therefore a case of a gift from a company to individuals who:
(1) were not direct shareholders, but
(2) were indirect shareholders; the B shareholders no doubt held (more or less) all the value of SubsidCo

The question was whether this gift was an income receipt, and the answer was no, for the following set of reasons:[41]
(1) The waiver was voluntary; though this was just "a factor".
(2) The waiver was a one-off event.
(3) The waiver was for a capital purpose, because the waived loan was itself made for a capital purpose, (namely, to repay an earlier loan which the B shareholders had taken out at an earlier stage of the scheme)
(4) It did not matter that:
    (a) Ordinary shares in TopCo remained intact after the waiver,
    (b) there was no reduction or repayment of capital,
    (c) TopCo approved the waiver,

Apparently there was no analogy between the waiver and a distribution in respect of the shares of TopCo. In any case, the waiver was apparently not made in respect of the shareholders' B shares.

The reader may think HMRC had the better argument. The loss scheme failed on other grounds (value shifting) and underling the decision might perhaps have been the unstated consideration, with which many (though not all) may agree:[42] that although the taxpayer should not obtain a loss from a circular (self-cancelling) transaction, nor should they pay tax when, taking the scheme as a whole, they had not received anything. Though of course the decision was not expressed in those terms, nor could it be.[43]

33.8.2 *Gift by non-resident company*

Suppose:

[41] at [72] ff.

[42] That view is not self-evident, because the taxpayer was playing with fire; see 2.5.4 (Pro-avoidance rationale).

[43] See App 7.9.2 (Cardinal principle affirmed).

(1) a non-resident company is owned by A, an individual ("the shareholder"), and
(2) the company makes a gift to B.

The shareholder (if UK resident) will be chargeable to tax on the distribution if a person receiving or entitled to the dividend.[44] Appropriate documentation would of course achieve this, but in the absence of a payment to the shareholder, it is wrong to regard them as receiving or entitled to income.

After *Kerrison,* it seems clear that B is also not in receipt of income.

This is why the rules for UK resident close companies extend the meaning of distribution to include benefits to associates of participators.

What if the company is owned by a discretionary trust, and the company makes a gift to B, a beneficiary? There are six possible solutions:

(1) The gift is income of the trustees in the form of a distribution and it is:
    (a) income of B in the form of an annual payment
    (b) income of B in the form of a distribution, or
    (c) a capital receipt by B
(2) The gift is *not* income of the trustees, but it is:
    (a) income of B in the form of an annual payment
    (b) income of B in the form of a distribution, or
    (c) a capital receipt by B

Appropriate documentation would of course bring the matter into any of solutions (1)(a)(b)(c) but it seems be wrong to regard them as receiving or entitled to income, in the absence of:

(1) a payment to the trustees, or
(2) a payment at the direction of the trustees[45]

Solution (2)(b) seems sensible but is inconsistent with the rule that discretionary trusts are not transparent.[46]

[44] See 15.6.7 (Offshore dividend regime). In the tax avoidance case of *McGuckian v IRC* 69 TC 1, a shareholder-trustee sold the right to a dividend of £400k for £396k (99% of the value) to a third party purchaser. The receipt of the sale price was held to be a receipt of income, but the trustees (and life tenant) were subject to income tax on the amount the trustees (and life tenant) received, ie the sale price; not the (slightly) greater amount of the dividend (which was received by the purchaser).

[45] See 42.3 (Income mandated).

[46] See 41.3.1 (Source/categorisation of income).

The choice is therefore between solutions (2)(a) or (c).

It seems clear that:

(1) A company held by a trust may make a capital payment (within the s.87 definition) to a beneficiary[47]

(2) A company may make a transfer of value (for IHT purposes)[48]

That is assumed in CGT and IHT provisions (which will need separate consideration).[49]

It is considered that the gift may be Annual Payment income of B (solution (2)(a)), or a capital receipt (solution (2)(c)), depending on the circumstances of the distribution: the same principles apply as any trust distribution: what power are the trustees using when they authorise the company to make the distribution?[50]

The position is different if a company held by a *Baker* IIP trust makes a gift to a life tenant. The trust is transparent, the life tenant has an interest in the company, and the distribution is taxable as an income-distribution. See 29.7 (Gift to non-shareholder).

33.9 Services

In *Ryall v Hoare*:[51]

> ... where an emolument is received, or, rather, where an emolument accrues, by virtue of some service rendered by way of action or permission, or both, at any rate that is included within the words "profits or gains" [now, Misc Sweep-up Income].

The paradigm cases of this category of Misc Sweep-up Income involve activity which comes close to a trade of providing services but falls short. The term used here is "casual income", which is an apt label. Of course,

[47] See 61.10 (Payment from close co: s.96(1)). But capital payment for that purpose would include allowing a beneficiary to use or occupy property owned by the company, which is not a distribution for IT purposes; so the CGT provision does not shed much light on the issue discussed here.

[48] See 81.2 (Transfer of value by close co). The transactions in securities code may also need to be considered.

[49] See 79.14 (Transfers to/from underlying co).

[50] See 41.8 (Trust payment: Income/capital). Could it make a difference if the distribution was to the ultimate beneficial owner of the company?

[51] 8 TC 521 at p.525. The word "emolument" nowadays would be reserved for employment income; but the meaning is clear, and nothing turns on the use of that word.

if the activity passes the trading borderline, then the trading income charge takes priority.

The BI Manual provides:

> **BIM100110 scope of the provisions: services** [Jan 2019]
> A casual receipt is taxable under the miscellaneous income sweep-up provisions where it is received for a service performed as agreed/arranged for reward. This contrasts with a simple gift as a 'thank you', for example, after performing a casual service where there was no agreement/arrangement/common expectation that such was for reward. Voluntary gifts are not taxable under the miscellaneous income provisions. This can be a difficult area depending on the facts of the specific case. The treatment contrasts with treatment of voluntary receipts from a trade or profession, see BIM41801.
> The distinction was set out by Lord Hanworth MR in *Brocklesby v Merricks* [1934] 18 TC 576 at p.584:
>
> > 'He was in a position to say: "A part of the profit which has been earned does, under the arrangement made between us, in fact belong to me."'
>
> ...

33.9.1 *Significance of contract*

The BI Manual provides:

> **BIM100115 services - contracts and arrangements** [Jun 2016]
> The distinction which determines whether income is within the miscellaneous income sweep-up charge is between a gratuitous payment and a payment where it was agreed that the service would be for reward.
> **Contracts**
> Clearly if the payment is made under a contract for services, this shows that it is not gratuitous. The contract can be in writing or it can be verbal. The importance of the contract is that it shows that it was agreed that the service was not gratuitous and that there was going to be a reward.
> It is important to remember that the fact that a payment is made under a contract is not enough to make the payment taxable under the miscellaneous income sweep-up provisions. Lord Denning MR said, in *Scott v Ricketts*:[52]
>
> > 'The judge seems to have thought that, as the payment was made under a contract, that was enough to bring within [the charge]. I

[52] 44 TC 303 at p.321.

> cannot agree with him. It must be a contract for services or facilities provided, or something of that kind.'

For payments under a contract to be taxable under the sweep-up provisions, the contract must be one that produces income.

Implied contracts

In cases where there is no express contract, a party may still be able to take action in the courts to obtain a payment where there is evidence that shows that the work was not to be done gratuitously.

An example is a quantum meruit payment - a payment by reference to what the work carried out was worth. A contract may be 'implied in fact' if it is suggested by the facts and circumstances that there is a mutual intention to contract.

If a realistic view of the facts shows that a service was provided for reward, it is not a gratuitous payment and is taxable under the sweep-up provisions.

Void contracts

A contract or agreement may be void for reasons of public policy, for example because it is illegal and therefore not enforceable, but this does not alter the fact that there was an intended agreement that a service was to be provided for reward and thus a taxable source.

Brightman J in *Alloway v Phillips* [1980] 53 TC 372 at p.381 dismissed the argument that a sum was not taxable because the contract was unenforceable as void:

> 'Nor have I been referred to any authority for the proposition that money received and retained under a contract void as against public policy escapes taxation for that reason.'

The comment was not a necessary part of the decision, and so *obiter*, ie non-binding. On the appeal the CoA laid stress on the existence of a valid contract. But the issue of void contracts will rarely if ever arise.

Arrangements

The parties may have entered an arrangement under which one would pay the other for a service. A payment under such an arrangement is not gratuitous and is taxable under the miscellaneous income sweep-up provisions.

[The Manual makes some general comments on the meaning of "arrangement" and continues:]

BIM100120 services - amount of work done [Jan 2019]

That an agreement does not require much work to be done does not affect the fact that the sum received is a payment for services, and is chargeable under the miscellaneous income sweep-up provisions.

> However, lack of proportion may be an indication that, where there is some other potential reason for the payment, the payment comes from that alternative reason and not from the service.
>
> That the service being provided does not need to be large can be seen from the judgment of Finlay J in *Brocklesby v Merricks* [1934] 18 TC 576. In this case the taxpayer had got a favourable contract because he had previously rendered voluntary services. Finlay J said (in a judgment approved by the Court of Appeal) at p.583:
>
> > 'It seems to me that it was a payment made to the appellant for services rendered. It is perfectly true that he did very little ... but I cannot doubt that this was a contract for remuneration in respect of services rendered.'
>
> Similarly in the case of *Bradbury v Arnold* [1957] 37 TC 665 Upjohn J said at p.669:
>
> > 'There is no doubt that a contract for services may, and clearly does, form a matter for assessment under [the sweep-up provisions] and not the less so that the services to be rendered are trivial or that they are to be rendered once and for all so that the remuneration may be regarded as a casual profit arising out of a single and isolated transaction.'
>
> Upjohn J confirmed the point that, where the payment is large and the services trifling, the Tribunal may draw the inference that there was some other reason for payment:
>
> > 'It was submitted on behalf of Mr. Arnold, amongst other things, that any services of introduction of the kind rendered to Major Martineau by Mr. Arnold could not have been other than trifling and that a payment of £9,000 would not be attributable to such services. The Commissioners make no finding on that point, but I think ... they must have accepted that view and I do not understand Counsel for the Crown seriously to challenge that.'
>
> This shows the importance of establishing all the facts around the payment.

In *Andrew v HMRC* a transaction was intended to yield a benefit for the settlor, (a tax loss on the grant of the option); but that did not amount to providing a service:

> 155.... the NA Trustee was provided with a valuable asset (its rights under the Call Option Agreement) and then realized its value. The provision of the valuable asset to the NA Trust was a key aspect of the scheme, but I find it difficult to characterize the provision of that asset to the trust or the subsequent realization of that asset through its cancellation as a reward for a separate service beyond the transactions

themselves ... [53]

33.10 Examples of services

33.10.1 *Providing information*

The BI Manual provides:

> **BIM100130 Sweep-up - judicial comment** [Jun 2016]
> **...Income from "property"**
> The case of *Alloway v Phillips* [1980] 53 TC 372 involved the wife of one of the Great Train Robbers. Whilst living in Canada, she received £39,000 from a newspaper. It was not in dispute that she had provided information to the newspaper which led to the newspaper publishing a series of articles. It was found that she had entered into an agreement, governed by English law, to assist the newspaper.

This was clearly Misc Sweep-up Income.[54]

The BI Manual provides:

> **BIM100230 newspaper stories** [Jan 2019]
> Fees received for providing information to a newspaper are assessable as miscellaneous income under the sweep-up provisions if not otherwise taxable.
> In *Hobbs v Hussey* [1942] 24 TC 153 it was held that a solicitor's clerk, who had never carried on the profession of an author, was chargeable in respect of a payment received from a newspaper for the serial rights of his life story. It was contended for the taxpayer that the transaction was a sale of the copyright of the series of articles and, therefore, resulted in a sale of capital and not a revenue receipt. At p.156, Lawrence J held that the fact that a service involved an element of the sale of a capital asset did not prevent it being a service.
>
> > '... it is also true, in my opinion, that the performance of services, though they may involve some subsidiary sale of property (e.g., dentures sold by a dentist), are in their essence of a revenue nature, since they are the fruit of the individual's capacity which may be regarded in a sense as his capital but are not the capital itself.'
>
> The question then was: what is the nature of the transaction?
>
> > 'Does then the fact that the present transaction involved the sale of the copyright in the Appellant's series of articles, constitute

[53] [2019] UKFTT 177 (TC) at [155]. For another aspect of this case, see 33.5 (Disposal of asset).

[54] The issue was the location of the source: see 33.19.2 (Source: Income from services).

> therefrom capital; or is the sale merely subsidiary to what was in its essence a performance of services by the Appellant? In my opinion, the true nature of the transaction was the performance of services. The Appellant did not part with his notes or diaries or his reminiscences.'

As Hobbs was being paid for his services, he was taxable under the miscellaneous income sweep-up provisions.

The case of *Housden (Inspector of Taxes) v Marshall* [1958] 38 TC 233 differed in that Marshall, a famous jockey, did not write the articles. He agreed to make available, to a newspaper, reminiscences of his racing career together with certain documents relating to it. The agreement granted the newspaper the first British serial rights in the reminiscences and gave the right to publish the article under the taxpayer's name and to use a facsimile of his signature. In return, the taxpayer was to receive two payments of £750.

Subsequently, a journalist employed by the newspaper wrote four articles about the taxpayer. These articles were written as a result of the journalist's own researches and the taxpayer's only contribution was to suggest certain minor amendments. Because of a national newspaper strike only one article was published and the taxpayer received only one of the two proposed £750 payments.

The taxpayer appealed against an assessment under the miscellaneous income provisions in respect of the £750 payment. The Special Commissioners held that the agreement provided predominantly for a sale of publication rights, any services rendered being incidental and subsidiary, and that the £750 was therefore not assessable.

Harman J held that the Special Commissioners had misunderstood the agreement with the newspaper:

> 'I do not think that he sold any publication rights in his reminiscences. He had no reminiscences of which he could sell the rights. The reminiscences which he communicated to the journalist, if they had been used - which in the upshot they were not - were as I say not his; he had no secrets to impart, his life was open. He was not selling anything of which he had the property like the copyright. He was not selling anything secret. He was merely talking to the journalist and allowing the journalist's write-up to be put forward as his.'

As a result he reversed their decision holding that the £750 was assessable under the miscellaneous income sweep-up provisions as a payment for services.

This case shows the importance of understanding exactly in relation to what is money being paid. It is not simply a case of reading the agreement; it is important to see what was actually done as a result. Giving a judgment in the High Court of Australia in the case of *Brent v FCT* [1971] 71 ATC 4195, Gibbs J said that:

> 'I have not been referred to any case in which it has been held that information which was not acquired or used in connection with a business should be treated as a capital asset whose disposal would result in the receipt of a capital gain rather than of income.'

He distinguished information from copyright saying that:

> 'In *Trustees of Earl Haig v. I.R. Commrs*. (1939) 22 TC 725, the trustees who had the right to publish the war diaries of Earl Haig gave to an author the right to make full use of the diaries so far as the public interest permitted and the sum received by the trustees as consideration for so doing was held to be a capital payment and not assessable to income tax. However, in that case, the trustees had the copyright in the diaries, which was indubitably property, and they did not merely sell information to the author, but in effect partially realised their copyright.'

33.10.2 *Photography*

The BI Manual provides:

> **BIM100235 photography** [Jan 2019]
>
> If someone, other than by way of trade, makes a profit by selling a photograph they are chargeable under the miscellaneous income sweep-up provisions.
>
> However if they sell the copyright then it is a capital transaction if the sale is not done as part of a trade and they are not liable under those provisions.
>
> This comes from the decision of Lord Simon in *Nethersole v Withers* [1948] 28 TC 501 at p.517 where he said that the assignment of copyright in a film:
>
> > 'amounts to a sale of property by a person who is not engaged in the trade or profession of dealing in such property, and the proceeds of such a sale is, for Income Tax purposes, in the nature of untaxed capital and not in the nature of taxable revenue.'

33.10.3 *Commission for introduction*

SP 4/97 (Taxation of commission, cashbacks and discounts) provides:

> **Case VI—receipts**
>
> 19 Commission etc may sometimes be received by a person as consideration for introducing a customer to a supplier of goods or

> services, other than in circumstances where the commission would be taxable as income under Case I or II of Schedule D (see para 11 above) or as employment income (see para 25 below). Subject to para 20 below, if the commission arises under an enforceable contract, it should be brought into account as a taxable receipt in calculating the profit from the transaction under Case VI of Schedule D...
>
> **Case VI—deductions**
>
> 21Where, in the circumstances described in para 19 above, some or all of the commission etc in question is passed on to the customer, a deduction is due where the customer requires the commission to be passed on as a condition of entering into the transaction or where for some other reason the payment is necessary to earn the commission.

33.10.4 *Cashback*

Commissions for introduction must be distinguished from cashbacks to the customer/client.

SP 4/97 (Taxation of commission, cashbacks and discounts) provides:

> **Case VI—receipts**
>
> 20 A sum, however described, which is received by an ordinary retail customer as consideration for the purchase by the customer of goods or services should not be regarded as a taxable receipt in computing profits under Case VI. This is the case whether the payer is the provider of the goods or services or another party with an economic interest in ensuring the transaction takes place.

The BI Manual provides:

> **BIM100210 cash-backs** [Jan 2019]
>
> ... When a customer, not carrying on a trade or property business, decides to take their business to one concern rather than another, they are not providing that concern with a recognisable service such as to bring them within the scope of the miscellaneous income sweep-up provisions. This applies even if a commission or cash-back which may be received by the customer as consideration for the purchase of goods or services is paid under an enforceable contract separate from the contract for the supply of the goods or services itself.
>
> However, if someone is paid for introducing some other customer to the supplier of goods or services then they are taxable under the miscellaneous income sweep-up provisions if:
>
> - they are not otherwise chargeable; and
> - the payment is not gratuitous (see BIM100110).

One-off cash-backs should be distinguished from regular payments, which are not Misc Sweep-up Income, but may be Annual Payments.[55]

33.10.5 *Partnership bonus scheme*

In *HMRC v BlueCrest Capital Management*[56] a partnership bonus scheme was set up so that:

(1) Profits intended for partners bonuses were received in the first instance by a corporate company

(2) When the bonus was allocated and relevant conditions were satisfied, the bonus was paid from the company to the partner.

At stage (1) the company paid corporation tax on the profits as a partner. But at stage (2) the bonus received by the partners were taxed again as Misc Sweep-up Income:[57]

> Although we have found that individual partners did not have the right to receive PIP Awards [partnership bonus] as part of the profit-sharing arrangements of the Partnership, [and so were not taxed on the individual partners as partnership income] this does not prevent those awards falling within Case VI. The FTT found that the PIP was intended to reward individual partners for their contribution to the success of the Partnership, because of the services they provided and to incentivise them for the future. In our judgment, the FTT was also entitled to find that these services were eiusdem generis with the services listed within the other Cases in Sch D.

It followed that the scheme, one of whose purposes was tax avoidance (reducing tax from individual to corporate rates) in fact led to a marked increase in taxation: tax at CT rates on the company's partnership income *and* tax on the partners' bonuses when distributed at the partners individual rates. But that is not regarded as objectionable double taxation.[58]

I would have favoured the view that the payment from the company was

[55] See HMRC Brief 4/13 (Payments of "trail commission" on investment products); *HMRC v Hargreaves Lansdown Asset Management* [2019] UKUT 246 (TCC).

[56] [2023] EWCA Civ 1481. *Bluecrest* is one of a trio of what should turn out to be leading cases; the other two are *Odey Asset Management v HMRC* [2021] UKFTT 31 (TC); *HFFX v HMRC* [2021] UKFTT 36 (TC). But further discussion should wait until these decisions are final.

[57] at [117].

[58] See 105.3 (Types of double taxation).

a distribution and taxed at dividend rates, which are less than the top individual rates. The source was the company and not the partnership. The partners haed an interest in the source, or at lease, there was sufficient connection. It is significant that the company was held by a purpose trust whose purposes included the advancement of the BlueCrest business, and to facilitate the BlueCrest incentive scheme; so the partners were effectively beneficiaries. But no-one argued for that.

33.11 Income from finance

Income from finance may be regarded as a particular kind of service, but it is convenient to consider it here as if it was a separate category.

33.11.1 *Guarantor fee*

The BI Manual provides:

> **BIM100215 guarantees** [Jun 2016]
> If a person agrees to act as guarantor in return for a reward, then they are chargeable under the miscellaneous income sweep-up provisions, if they are not otherwise chargeable.
> In *Sherwin v Barnes* [1931] 16 TC 278, a guarantee was given in respect of an overdraft in return for the payment of a bonus of £1,000. The guarantor was assessed to Income Tax in respect of his share of that £1,000. Rowlatt J said at p.280-281:
>
> > ... Earning a commission by pledging your credit was held, and considered rightly held, in *Ryall v Hoare*, to be in the nature of income. There it is, and I cannot get away from that.'

33.11.2 *Lender's fee*

The BI Manual provides:

> **BIM100225 loans** [Jan 2019]
> If a person makes a loan or provides money and receives a reward not otherwise chargeable to Income Tax, this is taxable as miscellaneous income under the sweep-up provisions.
> This can be seen from the case of *Ruskin Investments Ltd v Copeman* [1943] 25 TC 187. In this case, the company had made a loan to a builder. The debt was settled by the builder transferring the ground rents of properties to the company.
> The difference between the amount of the loan and the value of the ground rents received was held to be taxable as miscellaneous income.
> In his judgment at p.198, Scott LJ stated:
>
> > 'The result was that the reversion and ground rents of the 249 plots

> were received primarily in repayment of the capital loan of £15,000; the balance of their rather speculative value was the Company's remuneration for the service of the loan, taxable [as miscellaneous income].'

In the case of *Wilson v Mannooch* [1937] 21 TC 178, the taxpayer was a partner in a firm of solicitors. He verbally agreed with a building company, who were clients of the firm, that, in consideration of the respondent personally lending or arranging for the loan to the company of the purchase price of certain property, the respondent should receive, on the re-sale of the property, one-third of any resulting profit, with a limit of £500. The greater part of the purchase money was provided on first mortgage by certain clients of the respondent's firm, and the remainder on second mortgage carrying interest at 6 per cent by the respondent personally. The sum of £500 was duly paid to the respondent. Lawrence J said at p.185:

> 'In my judgment, the sums received in the present case are not analogous to the appreciation of capital upon the sale of an article, but are, in reality payments to the Respondent for the finding of money, and have the character of income, and not capital.'

But see 26.4 (Premium).

33.12 Futures and options

33.12.1 *Derivatives: Terminology*

The meaning of "derivative" is as follows:

> A transaction under which the future obligations of one or more of the parties are linked in some specified way to another asset or index, whether involving the delivery of the asset or the payment of an amount calculated by reference to its value or the value of the index. The transaction is therefore treated as having a value which is separate (although derived) from the values of the underlying asset or index. As a result, the parties' rights and obligations under the transaction can be treated as if they constituted a separate asset and are typically traded accordingly.[59]

The definition in FRS102 is as follows:

[59] *Lomas v JFB Firth Rixson* [2012] EWCA Civ 419 at [2] citing Firth's "important monograph" *Derivatives Law and Practice* (looseleaf) para 1.004 (What are derivatives?).

> A financial instrument or other contract with all three of the following characteristics:
>
> (a) its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable (sometimes called the 'underlying'), provided in the case of a non-financial variable that the variable is not specific to a party to the contract;
>
> (b) it requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and
>
> (c) it is settled at a future date.

I do not think the differences between these definitions are material.

Firth states:

> All derivatives transactions fall into one of three basic categories:
> (1) swaps and related products,
> (2) options and swaptions and
> (3) futures and forwards.[60]

33.12.2 *Futures/Options: IT relief*

Section 779(1) ITTOIA provides:

> No liability to income tax arises as a result of Chapter 8 of Part 5 (income not otherwise charged) in respect of a gain arising to a person in the course of dealing[61] in—
>
> (a) commodity or financial futures,
>
> (b) traded options, or
>
> (c) financial options.

In short, futures and options are excluded from the Misc Sweep-up Income charge. These transactions must either be trading or capital transactions. This makes obsolete some antique case law under which

[60] Firth, *Derivatives Law and Practice* (looseleaf) para 1.005 (Categories of transaction).

[61] Defined s.779(2) ITTOIA: "The reference in subsection (1) to a gain arising in the course of dealing in commodity or financial futures includes a gain regarded as so arising under section 143(3) of TCGA 1992 (gains arising from transactions otherwise than in the course of dealing on a recognised futures exchange, involving authorised persons)."

transactions in futures were held to be non-trading but constituted Misc Sweep-up Income.

It is therefore necessary to consider the meaning of these terms.

33.12.3 *"Commodity/financial future"*

Section 779(3) ITTOIA provides a partial definition:

> In this section—
> "commodity or financial futures" means commodity futures or financial futures that are for the time being dealt in on a recognised futures exchange[62]

That leaves the terms substantially undefined.

SP 3/02 provides:

> 1 This statement of practice sets out the HMRC's views on the tax treatment of transactions in futures and options of the sorts defined in TCGA 1992 s 143 and relating to shares, securities, foreign currency or other financial instruments.
> [The SP specifies some purposes for which the SP does not apply, not relevant here. and continues:]
> 4 "Financial futures" is a wide term. It includes-
> [a] contracts for future delivery of shares, securities, foreign currency or other financial instruments;
> [b] [i] contracts that are settled by payment of cash differences determined by movements in the price of such instruments (including contracts where settlement is based on the application of an interest rate or a financial index to a notional principal amount),
> [ii] as well as contracts settled by delivery; and
> [c] both exchange traded and over the counter contracts.

See 33.13 (Swaps).

33.12.4 *Traded/financial options*

Section 779(3) ITTOIA provides:

> In this section ...

[62] Defined s.288(6) TCGA: "In this Act "recognised futures exchange" means the London International Financial Futures Exchange and any other futures exchange which is for the time being designated for the purposes of this Act by order made by the Board."

> "financial option" has the meaning given by section 144(8)(c) of TCGA 1992, and
> "traded option" has the meaning given by section 144(8)(b) of that Act.

So we turn to s.144(8) TCGA:

> (b) "traded option" means an option which, at the time of the abandonment or other disposal, is listed on a recognised stock exchange[63] or a recognised futures exchange; and
> (c) "financial option" means an option which is not a traded option, as defined in paragraph (b) above, but which, subject to subsection (9) below—

The definitions are best read side by side:

(i) relates to currency, shares, securities or an interest rate and	(ii) relates to shares or securities which are dealt in on a recognised stock exchange and	(iii) relates to currency, shares, securities or an interest rate and	(iv) relates to shares or securities which are dealt in on a recognised stock exchange and
is granted (otherwise than as agent) by a member of a recognised stock exchange, by an authorised person within the meaning given by section 143(8); or	is granted by a member of such an exchange, acting as agent; or	is granted to such an authorised person as is referred to in sub-paragraph (i) above and concurrently and in association with an option falling within that sub-paragraph which is granted by that authorised person to the grantor of the first-mentioned option; or	is granted to a member of such an exchange, including such a member acting as agent.

33.13 Swaps

Firth defines a swap as follows:

> A swap is a contract which involves an exchange of payment streams,

[63] See App 2.18 (Listed/Recognised stock exchange).

> each of which is calculated on a different basis from the other.
> The classic example of such a contract is the interest rates swap, under which one party pays a variable or floating rate of interest on a specified notional amount and the other party pays a fixed rate on the notional amount, or a floating rate calculated on a different basis. Typically, the notional amount is not exchanged between the parties ... and so unlike a loan, no borrowing is involved.[64]

Income from swaps not otherwise taxable is Misc Sweep-up Income. RI 263 (Swaps held by non-corporates, 2003) provides:

> 5 Our general view is that profits or losses on a swap held by a non-corporate, if they are not within Case I of Schedule D, will fall within Case VI.
> 6 Case I takes priority over any other possible charge to tax. [The SP discusses when swaps constitute trading and continues:]
> 7 Where a swap is taken out by a non-corporate to hedge interest payments which are deductible in computing the profits or losses of a Schedule A business [now called a UK property business], then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that Schedule A business. ...
> 8 Profits or gains that are not of a capital nature, and which are not within Case I or Schedule A, will constitute "annual profits or gains not falling under any other Case of Schedule D" and will therefore be chargeable under Case VI (unless, exceptionally, they are within Case V). Periodic payments under a swap are not annual payments within Case III because they are not pure income profit—the person who receives them has counter-obligations under the swap contract. It follows that such sums are payable without deduction of income tax....
> 10 Users of swaps may sometimes receive or pay lump sums. For example, one party may pay a premium to enter into a swap, or a lump sum representing the net present value of outstanding rights and obligations under the contract may change hands if a swap is assigned or terminated early. Such lump sums will also be within Case VI if they are on revenue account. Whether a receipt or payment is capital or income is a question of fact in any particular case. But in general all cashflows made or exchanged under or in connection with a swap will be income, whether they take the form of periodic payments or are rolled up into a lump sum payable at any point.

If a swap were a listed "financial future" it would be taken out of the Misc

[64] Firth, *Derivatives Law and Practice* (looseleaf) para 1.006 (Swaps - meaning).

Sweep-up Income charge.[65] But a swap is not a future. RI 263 (Swaps held by non-corporates, 2003) provides:

> 11 It is sometimes contended that certain swaps are "financial futures" that, if not within Case I [trading], are taken out of [IT] by [s.779 ITTOIA] and are chargeable to capital gains tax by virtue of TCGA 1992 s 143. Statement of Practice 3/02 ... is sometimes quoted in support of this view.
> 12 We do not agree. Paragraph 4 of SP 3/02 makes the point that the statutory phrase "financial futures" is a wide term, encompassing cash-settled contracts as well as those settled by delivery, and over the counter contracts (including forward rate agreements) as well as exchange-traded contracts.[66] But, wide as it is, it can only cover derivatives that are "futures". The word "future" must be interpreted in its normal commercial sense. And—while there is some fluidity in commercial usage—the market will generally see swaps as falling into a different category from futures.[67]

33.14 Restraint of trade

The BI Manual provides:

> **BIM100240 restraint of trade** [Jan 2019]
> A payment for agreeing not to do something may be chargeable as miscellaneous income under the sweep-up provisions.
> The case of *Higgs v Olivier* [1952] 33 TC 136 relates to a payment made to Sir Laurence Olivier. Following the making of the film of Henry V, Olivier agreed not to act in, produce or direct a film for any other person for a period of eighteen months in return for a payment of £15,000. This was held not to be taxable as income from his profession as an actor/director.
> It was considered that a payment not to do something was not a trading receipt (see BIM35600), however the question of whether such a payment was taxable under the sweep-up provisions was not considered in this case.
> Judicial comments in later cases have indicated that such payments are a payment for a service chargeable under the sweep-up provisions.
> In *Murray v ICI Ltd* [1967] 44 TC 175, Cross J said at p.207:
> 'The Crown made no alternative argument under [the sweep-up

[65] See 33.12.2 (Futures/Options: IT relief).

[66] See 33.12.3 ("Commodity/financial future").

[67] See 33.12.1 (Derivatives law terminology).

> provisions] on the basis that the £15,000 was a payment for a service rendered by Sir Laurence Olivier at the request of the film company. Had it done so, then the question might well have arisen whether it was a casual profit of a revenue nature or a payment for parting with a capital asset: see the judgement of Rowlatt J. in *Ryall v Hoare* 8 TC 521. It may be - I say no more - that, had the claim been put that way, the Crown would have succeeded.'

The Court of Appeal approved Cross J's judgment in full.

33.15 US economic impact payments

Economic Impact Payments are made under the [USA] Coronavirus Aid, Relief, and Economic Security Act 2020 to eligible US citizens and green card holders.

The minutes of the Joint Expatriate Forum on Tax & NICs provide:

> **Question**: The vast majority of Americans in the UK will be entitled to an economic impact payment from the US if they haven't already received it. It is $1,200 per individual and $500 for children. I am aware that one individual has had correspondence confirming that HMRC would not view these payments as subject to UK tax, but the basis for this is not entirely clear... This is likely to affect over 100,000 people in the UK.
> **HMRC Answer:** You are correct that the answer we provided was that the economic impact payments are not taxable as income in the UK.
> **Question**: The technical reason why the US Stimulus payments are not taxable in the UK is that they are an advance refund of 2020 US taxes, and US tax refunds are not taxable in the UK.[68]

33.16 Tax avoidance cases

A number of misc sweep-up income cases have involved unsuccessful avoidance schemes. The BI Manual provides:

> **BIM100130 sweep-up - judicial comment** [Jun 2016]
> ...The Special Commissioners' case of *Property Company v Inspector of Taxes* [2004] SpC433 concerned a series of transactions including a tax avoidance scheme.
> Under a 'business sale agreement', 'Property Company' agreed to sell to another company in the C Group, all its assets excluding a payment

[68] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

of rental income (the retained rent payment), recoverable tax and cash. 'Property Company' was then sold out of the C Group.

At that point 'Property Company' had the right to the retained rent payment, less the expected tax thereon, and a liability in respect of an inter-group debt which was paid off out of the rent. The intention was to offset the retained rent payment by creating a deduction in 'Property Company', the benefit of the tax saving from which would be split between the C Group and the new owners of 'Property Company'. However, the proposed tax avoidance scheme to create a deduction did not work.

The question was whether 'Property Company' was taxable on the retained rent payment either as property income, or alternatively under the miscellaneous income sweep-up charge.

The Commissioners determined that part of the money was a post cessation receipt from its letting business, but the remainder was not income from land, but arose from the agreement, and was taxable under sweep-up provisions:

> 'The balance arises solely from the business sale agreement. The balance stands in the shoes of the remainder of the retained rent payment but it is not rent and it has no legal connection with land because the effect of the [Landlord and Tenant (Covenants) Act 1995] is that it is not possible to retain such an interest in land. The only property right relates to CGP's ownership of land that it, as successor in title to the appellant, has exploited by continuing to let it to CGI pursuant to the 1996 Agreement for Lease. The balance is a sum equal to the rent receivable from CGI but the fact that it is measured by reference to rent does not give it the necessary connection with land so as to be able to say that the source of it is derived from land. It is in the nature of income that is ejusdem generis with [property] income and, not being taxable under any other [provision], is accordingly taxable under [the miscellaneous income provisions].'

The case of *Black Nominees Ltd v Nicol* [1975] 50 TC 229 involved an elaborate scheme designed to reduce the taxable income of the actress, Julie Christie. As part of the scheme, Julie Christie entered into a service agreement under which she became an employee. The Court held that Black Nominees were not carrying on a trade of exploiting the professional services as an actress of Julie Christie, nor were they taxable as receiving profits of gains from a profession as Julie Christie had ceased to carry on her profession when she entered the service agreement. Templeman J held that:

> 'Tax is charged under [the sweep-up charge] in respect of annual

> profits or gains not falling under any other [provision]. In my judgment, the moneys received by Black Nominees in consequence of the transactions entered into in December 1965 fit within this description. If it were not for the trick with the £475,000, no one would suggest that the moneys received by Black Nominees were capital. Once the trick is exposed the moneys are seen to be what they are: namely, annual profits or gains. They escape any other [provision] and fall into [the sweep-up charge].'

Templeman J further held that:

> 'The sources of the moneys received by Black Nominees were the contracts between Cymbeline as assignee of Rosebroom and the film or theatrical companies for the services of Miss Christie, not the contract between Rosebroom and Miss Christie which, together with the transfer agreement, enabled Cymbeline to fulfil its contractual obligations to the film and theatrical companies by making available the services of Miss Christie.'

Templeman J held that the income was taxable under the sweep-up provisions...

33.17 Sweep-up income: Computation

Section 688(1) ITTOIA provides:

> Tax is charged under this Chapter on the amount of the income arising in the tax year.

This gives no guidance on how to quantify the amount of income. In *Curtis Brown v Jarvis* expenses of collecting royalties (then assessable as Misc Sweep-up Income) were deductible:

> I do not feel very much impressed by the words "full amount of profits and gains" in [what is now s.688 ITTOIA] because the question is, what are the profits and gains? ... I do not feel justified in differing from the Commissioners. After all, it is the right thing to do, if I may put it that way. The annual profits and gains derived from property in this country seem to me prima facie to indicate what can be got in the ordinary course of business from the property in this country, what can be received by it abroad - I will not say received abroad, but sent off from here to abroad, which is perhaps a more accurate way of putting it."

The Tax Law Rewrite replaced the former wording, "full amount", with the current wording, "amount"; which is perhaps more apt in the light of that decision.

RI 263 provides:

> The case of *Curtis Brown v Jarvis* (14 TC 744) makes it clear that in assessing receipts under Case VI it is permissible to deduct associated payments. And, under s 69 [ICTA],[69] income tax under Case VI is charged on the full amount of profits or gains for the year of assessment. So the amount to be taxed under Case VI (or the Case VI loss) for a year of assessment will be the net amount receivable (or payable) under the swap contract in that year. If, however, the non-corporate prepares accounts and accounts for the swap on either an accruals or a mark to market basis, there is no objection to using the accounts figure as the measure of the "full amount of profits or gains", provided that the accounts bring in the full economic profit on the swap over the life of the contract.

The BI Manual provides:

> **BIM100150 calculating the profits** [Jun 2016]
> For Income Tax, the sweep-up charge is on income arising in the tax year. For Corporation Tax, the sweep-up charge is on income arising in an accounting period...
> **Non Cash Receipts**
> As with trading income, the miscellaneous income sweep-up provisions charge money or money's worth.
> *Example*
> A non-transferable holiday offered as an alternative to a sum of money as payment for a 'story' by a newspaper is taxable as miscellaneous income. The sum for assessment being the amount of the cash alternative.
> A non-transferable holiday provided, with no cash alternative, as payment for a 'story' by a newspaper is not taxable as miscellaneous income as it cannot be converted into money....
>
> **BIM100155: Miscellaneous income: deductions** [Jan 2019]
> **Expenses**
> Expenses are allowable in computing income within the sweep-up charge, but there is only limited legislation on exactly what expenses are deductible. For example, there are rules disallowing business entertaining expenditure (similar to those which apply to trade profits - see BIM45000) where the activity concerned is a business.

[69] Now rewritten in different terms in s.688(1) ITTOIA, but I think without changing the law on this point.

> In practice you should follow the rules governing trade profits, so far as they are applicable (see the speech of Rowlatt J in *Curtis Brown Ltd v Jarvis* [1929] 14 TC 744 at pages 752-753).
>
> **Capital Allowances**
>
> There is normally no entitlement to capital allowances in respect of miscellaneous income. You should refer any case of doubt or difficulty to Business Profits.
>
> **Interest**
>
> Interest paid is normally not an allowable deduction in arriving at the profits chargeable under the miscellaneous income sweep-up provisions. This is because in the case of profits of a casual or occasional nature it is difficult for interest to satisfy the 'wholly and exclusively' test, and raising funds to support the activity would itself point to trading.
>
> **VAT**
>
> If any expenses deductible in computing miscellaneous income have borne VAT, which is irrecoverable, the deduction should be the amount inclusive of VAT. Otherwise, if the VAT is recoverable, then the allowable expense is the amount net of VAT.

It is considered that income should be computed by reference to accountancy principles.

33.18 Sweep-up income: Remittance basis

Section 688 ITTOIA provides:

> (1) Tax is charged under this Chapter on the amount of the income arising in the tax year.
> (2) Subsection (1) is subject to ...[70]
> (c) Part 8 (foreign income: special rules).

Section 688(2)(c) ITTOIA incorporates the remittance basis for foreign source Misc Sweep-up Income.

33.19 Misc Sweep-up Income: Source

The location of the source matters for the usual reasons, in particular:
(1) A non-resident is not taxed unless there is a UK source
(2) Foreign source royalties are RFI and qualify for the remittance basis[71]

[70] The exceptions in (a)(b) are specialist topics (rent a room relief and qualifying care relief) not discussed here.

[71] For source issues generally, see 16.3 (Approach to locating source).

There is very little authority on the location of the source of Misc Sweep-up Income. As there are many different types of sweep-up income,[72] the test will vary according to the type of income. The different types of sweep-up income have little in common except the absence of a charge under any other provision. It would be absurd to apply the same test to all types of the income. There is no single test to apply to all types of sweep-up income.

33.19.1 *Source: Income from assets*

Where the income arises from the exploitation of assets, the source is where the assets are situated.

If there is a simple hire[73] of an asset (without a trade) the source of income is the asset (not the contract) and one would expect the location of the income source to be where the asset is situate.

In *IRC v Hang Seng Bank*, the Privy Council said:

> If the profit was earned by the exploitation of property assets as by letting property ... the profit will have arisen in or derived from the place where the property was let ...[74]

But this was tactfully "explained" in *IRC v HK-TVB*:

> When Lord Bridge used the words "place where the property was let" he must have been referring to the place where the property was situated and not to the place or places where the lease happened to have been signed.[75]

Although the comment was made in the context of immovable property, it is considered that the same applies to chattels and other personal property.

Likewise in Australia:[76]

> The location of the property will be significant [to determine the source of income when the income is derived from property

[72] See 33.6 Types of misc sweep-up income).

[73] References to a hire here include a licence: the distinction does not matter for present purposes.

[74] [1990] STC 733 at p.740b.

[75] [1992] STC 723 at p.729e.

[76] *CT v Resource Capital Fund IV LP* [2019] FCAFC 51 at [52] citing: *FCT v United Aircraft Corporation* [1943] HCA 50.

It is true that chattels may be moved, but most chattels do not move often. If (say) a picture (subject to an existing chattel lease) was moved permanently, it is unclear whether the source changes. It is tentatively suggested that the source changes with a permanent move, but not with a temporary one.

If the chattel were a mobile asset (a plane or yacht) then it is suggested that one should not adopt the rule that the source is where the asset is situated. It is rational to have a separate rule for ships and aircraft. The IHT/CGT situs rules are also different for such assets.

If the hiring constitutes a trade, then trading principles apply to determine the source; see 21.18 (Hire of chattels).

33.19.2 *Source: Income from services*

Alloway v Phillips concerned a payment for services: the taxpayer, wife of a great train robber, received a fee for providing information to a journalist. The taxpayer was non-resident in the year that the income arose but payment was made under a contract which was a UK situate chose in action (UK resident payor and enforceable in the UK).

Section 108(1) ICTA 1970 then provided:

> Tax under this Schedule [schedule D] shall be charged in respect of -
> (a) the annual profits or gains arising or accruing …
> (iii) to any person, whether a British subject or not, although not resident in the UK, from any property whatever in the UK …

Alloway was a pre-ITTOIA case where the issue was whether a payment was income from "property in the UK" (a subtly different question from source under the contemporary legislation[77]):

> This contract gave to Mrs. Alloway a number of rights in which she could have sued in the UK if necessary. She had no property in Canada capable of producing profits. The information about her husband was not property. It required this contract to convert it into property. This sum of £39,000 was in my opinion a profit or gain arising from property in the UK. It is entirely within s.108(1)(a)(iii) [ICTA 1988]. It does not fall within any other class of Schedule D, and therefore is correctly charged under Case VI.[78]

[77] See 21.8.1 (Source in pre-ITTOIA legislation).

[78] 53 TC 372 at p.389. Lord Denning made the same point at p.387: "This case comes under Case VI of Schedule D. It seems to me clear that this wife had property in the

Alloway concerns the provision of services. It would be a mistake to say that *Alloway* governs the location of the source of other types of (what is now) Misc Sweep-up Income, such as income from assets. The court stressed that Mrs Alloway had no property in Canada. The only property was a contractual right (a chose in action) situated in the UK. These two points are related: it was because *Alloway* concerned the provision of services that the taxpayer had no property in Canada. She did not need property to provide those services.

Even in relation to the source of Misc Sweep-up Income from the provision of services, ie the facts of *Alloway* itself, the law has changed since *Alloway* was decided in 1980:

(1) In the case of the source of interest, the courts have moved from the view that the location of the source depended on the situs of the debt (or something very close), to a multi-factorial approach.[79]

(2) The charge under the pre-rewrite legislation depended on the location of property in the UK.[80] It made some sense that the courts applied a situs test, both for interest and in *Alloway*. But the charge under ITTOIA depends on the location of the source of the income. The statutory test is now different.

It may be said that *Alloway* is one of those result-determined cases where the court decided the result first and the reasoning second.[81] The reader may have some sympathy for the argument, rejected by the court that the contract was mere machinery for collection of a payment for services. But however that may be, the decision is no longer relevant. The law has changed.

If the same facts arose today, Mrs Alloway should claim relief under the UK/Canada DTA. When her income arose she was treaty-resident in

UK. She had a chose in action here. [Lord Denning referred to Dicey & Morris, *The Conflict of Laws* and continued:] The truth is that she had a chose in action in England. It was property in England: but she had no property at all in Canada. She had no copyright there. She only had the information in her head which she told to the newspaper reporter. That is not a species of property known to the law of England ...."

[79] See 26.9 (Interest: Location of source).

[80] See s.18(1) ICTA 1988 previously s.108 ICTA 1970, set out above.

[81] "If the criminals or their wives get money by relating their stories to newspapers, they ought to pay tax on their profits and gains. That is this very case. The wife is now in England. She is outside the jurisdiction of the Canadian courts. She received the money here and ought to pay tax here ..."; 53 TC 372 at p.387.

Canada, and even if the income were UK source it would not be taxable in the UK.[82]

It is considered that the correct test for the source of Misc Sweep-up Income for the provision of services is now in principle the place where the work is done, the same as the trading test: where does the profit substantially arise.[83]

33.19.3 *Source: futures and swaps*

Bayfine v HMRC discussed the source of income from a forward contract between a US and a UK company:

> [36] [Counsel for the taxpayer] submits that ... the broad guiding principle is that the source is treated where the service was rendered or the profit-making activity was carried on. Thus in the case of a forward contract the court should attach great weight to the place where the contract was performed.[84] In the case of investment income (which, as I understand it, would include investment income earned from short-term contracts such as the forward contracts in this case), factors such as the identity of the debtor, the law governing the debt instrument, the location of the assets to which the investment relates and currency of payment may have greater weight than in trading asset cases.[85] In this case ... this was US source income. The counterparty to this was a US resident operating from the US and the forward contract was negotiated in part in the US. It was executed in the US, governed by US law and related to assets with a US situs and it was enforceable in the US. It also had to be settled in US dollars. All of those factors point to the US. The only factor that points the other way is that one of the contracting parties ... was a UK resident. The fact that a party is a UK resident does not mean that its income has a UK source. Otherwise there would be no distinction between the source of a profit as a basis of taxation and residence.
>
> [54] As to source, if domestic law principles had applied ... I would have preferred the submissions of [counsel for the taxpayer] ... that the

[82] See 33.20 (DT relief: "Other Income"). The DTA in force at the relevant time did not contain an "Other Income" article, and it was unlikely that any treaty exemption applied.

[83] See 21.14 (Services).

[84] The Court cited: *IRC v Hang Seng Bank* [1990] STC 733 at p.740.

[85] The Court cited what is taken (though wrongly) to be the leading case on the source of interest: *National Bank of Greece v Westminster Bank Executor and Trustee Co* [1971] AC 945 at p.954–955.

> source of the ... profit was not in the state of residence [of the taxpayer] but in the US, where the profit was substantially generated.
> [63] [Counsel for the Revenue] ... refers to the test ... 'Where do the operations take place from which the profits in substance arise?'[86] He argues that on the basis of this test the profit was profit arising in the UK. However, in my judgment this argument is unpersuasive, even on [that test] when all the factors ... are taken into account. Thus, I consider that the ... profit was income 'arising' outside the UK for the purposes of [unilateral tax credit relief].[87]

This identifies two tests of source:
(1) The test for the source of interest
(2) The test for the source of trading income

These are two distinct tests, but so far as they both apply a multi-factorial approach, they may be regarded as a common test.

Interest is not closely analogous, as an important factor in the source of interest is what the borrowed money is used for. There is no equivalent in the case of a derivative. The source of trading income is closely analogous, as Misc Sweep-up Income is only just short of amounting to a trade (requiring a payment for services or in relation to assets) and is computed in a similar manner to trading income, ie receipts net of expenses. So the test is where the profits substantially arise. That can be difficult to apply, but it works quite well here.[88]

In relation to derivatives, it is suggested that the most significant factor should be the asset (if there is one) to which the derivative relates. A swap relating to a particular security is situate where that share is situate. That is where the profit is generated. A swap relating to an index such as the S&P 500 is situate in the US, as that is where substantially all the securities in the S&P 500 are situate. A swap relating to interest rates has no underlying asset, and one falls back on place of enforceability.

Residence of the debtor is clearly not the decisive test of source. Otherwise then the profit would be UK source if the market moved one

[86] The Court cited the classic trading source cases: *Smidth v Greenwood* 8 TC 193 at p.203–204, and *Yates v GCA International* 64 TC 37 at p.55–56.

[87] *Bayfine v HMRC* [2011] STC 717 at [36], [54]. See 111.1 (Credit for foreign tax). For completeness: The issue in *Bayfine* was source for the purposes of the US/UK DTA, but there is nothing in the DTA to suggest that treaty-source for this type of income is distinct from domestic-law source.

[88] See 16.11 (Where profits in substance arise).

way and the UK company received the profit, and US source if the market moved the other way and the US company received the profit; that would be an odd result.

33.20 DT relief: "Other Income"

Article 21(1) OECD Model provides:

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

I refer to income within this article as **"Other Income"**, with initial capitals to reflect the technical nature of the term.

Article 21(2) deals with the overlap between the Other Income article and business income.[89]

Article 21 includes more than Misc Sweep-up Income. For other contexts where the Other Income article is important, see:

Topic	**See para**

34.1 Employment income: Introduction

The taxation of employment income is mainly governed by ITEPA. Though dwarfed by the CTAs 2009 and 2010, ITEPA was for its day (2003) a mammoth Act: the table of contents was 36 pages long. How many dozen volumes would be required for a full discussion?

The drafter of ITEPA was fond of signpost provisions, preferred repetition to cross referencing, and believed very firmly in the value of dotting *I*'s and crossing *T*'s. That may be useful to a non-lawyer reading the statute unmediated by any other assistance: that reader needs all the help they can get! I find this approach makes a textbook exposition rather more difficult, as there is more statutory text to navigate than need have been. Behind what appear to be stylistic issues lie deeper questions: who are tax statutes written for? and how best to cater for readers with different needs? Be that as it may: we must take the text as we find it.

This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole, so I begin with a general outline. Most readers will no doubt cut to the chase, but they will later find themselves referring back to these fundamentals.

I do not discuss employment-related securities, or employment income provided through third parties (disguised remuneration), though I hope to do so in a future edition.

34.2 Employment income Parts

Section 3(1) ITEPA provides:

The structure of the employment income Parts is as follows-[1]

Part	**Content**
2	Charge to tax, computation of charge, who is liable
3	Earnings
4	Exemptions
5	Deductions
6	Miscellaneous ITEPA income: retirement benefits, termination payments
7	Employment-related securities
7A	Employment income provided through 3rd parties (disguised remuneration)

Section 3(2) ITEPA provides:

> In this Act "the employment income Parts" means this Part [Part 2] and Parts 3 to 7A.

[1] For clarity I have set this out in tabular form, in my own words, rather than the layout and wording of the statute.

34.3 Employment/employer/employee

Traditional employment-law terminology is somewhat opaque:

"**Contract of service"** means a contract of employment, ie between employer and employee; I prefer to use the term **"contact of employment"**

"**Contract of services"** (in the plural) means a contract which is not an employment, ie between an independent contractor/self-employed person and their client

Section 4 ITEPA provides an inclusive definition:

> (1) In the employment income Parts[2] "employment" includes in particular—
>
> (a) any employment under a contract of service,
>
> (b) any employment under a contract of apprenticeship, and
>
> (c) any employment in the service of the Crown.
>
> (2) In those Parts "employed", "employee" and "employer" have corresponding meanings.

Employment/contract of service are employment law terms which are is elucidated in case law rather than the statutory provision. This topic needs a book to itself; it is too far from the themes of this book to discuss here.

EN ITEPA comments on the definition of employment:

> ... the decisions of the courts have given rise to a number of different tests, none of which has proved to be definitive. Given the diversity of approach in the courts it seems unlikely that an exhaustive definition of "employment" could be produced, or indeed that one could produce more than an incomplete list of criteria that might or might not be useful in a given case for determining whether an employment exists.
>
> On the other hand it is thought that it would be helpful to have a non-exhaustive explanation which gave an indication of the core meaning of "employment" by listing certain arrangements that on any view constitute an employment. As such, it would not attempt to delineate the boundary between employment and self-employment.
>
> Section 4 of the Act contains such an explanation. [The EN summarises the section and continues:]
>
> The reference to "any employment in the service of the Crown" is specifically included because it is not settled that all Crown servants have contracts of service.

[2] Parts 2-7A ITEPA; see 34.2 (Employment income Parts).

The OECD Commentary uses similar terminology:

> "employment relationship (contract of service)"
> "services rendered in an employment relationship"

But the concept is slightly different; see 37.9 (Labour-hire arrangement).

Salaried partners may be treated as employees under s.863A ITTOIA. This topic needs a chapter to itself, and is not discussed here.

34.3.1 *Offices*

Section 5 ITEPA extends the term "employment" to include an office. The most common example is company directorship. This is needed because a company director need not as a matter of employment law have an employment (a contract of service):

> (1) The provisions of the employment income Parts[3] that are expressed to apply to employments apply equally to offices, unless otherwise indicated.
> (2) In those provisions as they apply to an office—
> (a) references to being employed are to being the holder of the office;
> (b) "employee" means the office-holder;
> (c) "employer" means the person under whom the office-holder holds office.

Section 5(3) ITEPA provides an inclusive definition of "office":

> In the employment income Parts "office" includes in particular any position which has an existence independent of the person who holds it and may be filled by successive holders.

EN ITEPA comments on the definition of office:

> The concept of an "office" is one that has also been considered by the courts: see in particular *Great Western Railway Company v Bater* (1922) 8 TC 231 and *Edwards v Clinch* (1981) 56 TC 367. But in this case it does seem possible to construct a definition based on the guidelines established by the courts. However, since these are only guidelines, any explanation can, again, only be non-exhaustive.
> Section 5(3) of the Act contains such an explanation. ....

I refer to the definition of employment (etc) in s.4, 5 ITEPA as the

[3] Parts 2-7A ITEPA; see 34.2 (Employment income Parts).

"standard ITEPA definition[4]**"**.

A shadow director does not hold an office, and so (in the absence of a contract of employment) is not an employee within the standard ITEPA definition.[5]

All these definitions are expressed to apply only in the employment income Parts, so elsewhere they have to be repeated verbatim,[6] or incorporated by reference.[7] (If there were taxes-act-wide definitions, that would not be necessary.)

34.4 Employment income/earnings

This section considers the following ITEPA terminology:

Term	**See para**
Ordinary earnings (my term)	34.4.1
General earnings	34.4.2
Specific employment income	34.4.3
Employment income	34.4.4

Items (2)-(4) are opaque technical terms, defined in s.7 ITEPA which begins:

> (1) This section gives the meaning for the purposes of the Tax Acts of "employment income", "general earnings" and "specific employment income".

34.4.1 *"Ordinary" earnings*

Section 62 ITEPA defines "earnings".

Section 62 is the only section in Chapter 1 Part 3 ITEPA. The legislation refers on a number of occasions to earnings "within Chapter 1 of Part 3" (or "as defined in Chapter 1"). This seems a rather cumbersome way of referring to s.62, but there it is.

Section 62 ITEPA provides:

> (1) This section explains what is meant by "earnings" in the employment income Parts[8].

[4] For employment/employee in the OECD model, see 37.9 (Labour-hire arrangement).

[5] A shadow director is not an employee unless expressly specified, eg as in the benefits code; see 39.6.4 (Application of the benefits code to shadow directors).

[6] See eg 38.4.1 ("Pension").

[7] See eg 6.26.1 ("Employment").

[8] Parts 2-7A ITEPA; see 34.2 (Employment income Parts).

> (2) In those Parts "earnings", in relation to an employment, means—
> (a) any salary, wages or fee,
> (b) any gratuity or other profit or incidental benefit of any kind obtained by the employee if it is money or money's worth,[9] or
> (c) anything else that constitutes an emolument of the employment.

"Earnings" is not an ideal label, and I call it **"ordinary" earnings** to distinguish it from the (wider) concept of "general earnings" discussed below.

34.4.2 *"General earnings"*

"General earnings" is a technical term. Section 7(3) ITEPA provides:

> "General earnings" means—
> (a) earnings within Chapter 1 of Part 3, [ordinary earnings][10] or
> (b) any amount treated as earnings (see subsection (5)),
> excluding in each case any exempt income.

Section 7(5) ITEPA specifies 5 categories of earnings, or deemed earnings, classified as general earnings:

> Subsection (2)(b) or (3)(b) refers to any amount treated as earnings under—[11]

Provision	**Topic**	**See para**
Chap 7-10 Part 2	Agency worker/intermediary/managed service company	
Chap 2-10 Part 3	The benefits code	39.2
Chap 12 Part 3	Misc payments treated as earnings	*Not discussed*
s.402B	Termination awards (Post-employment notice pay)	34.38
s.262 CAA 2001	Balancing charge treated as earnings	*Not discussed*

34.4.3 *"Specific employment income"*

Section 7(4) ITEPA provides:

> "Specific employment income" means any amount which counts as employment income (see subsection (6)), excluding any exempt

[9] Defined in s.62(3) ITEPA: "For the purposes of subsection (2) "money's worth" means something that is—
(a) of direct monetary value to the employee, or
(b) capable of being converted into money or something of direct monetary value to the employee."

[10] See 34.4.1 ("Ordinary" earnings).

[11] For clarity, I set this out in a table format, and abbreviate the section descriptions.

> income...

Section 7(6) ITEPA sets out four categories of deemed employment income classified as specific employment income:

> Subsection (2)(c) or (4) refers to any amount which counts as employment income by virtue of—[12]

Provision	**Topic**	**See para**
Part 6 ITEPA	"Income which is not earnings or share-related":	
	Retirement benefits	
	Termination payments	34.36
Part 7 ITEPA	Employment-related securities	39.8
Part 7A ITEPA	Disguised remuneration	*Not discussed*
Any other enactment		

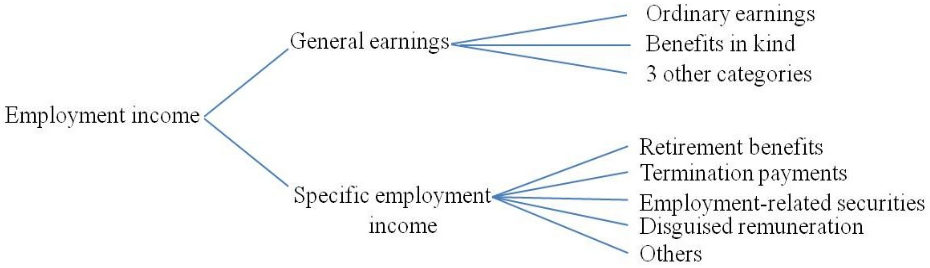
Specific employment income includes some important if specialist categories. The focus of this chapter is on general employment income, but I hope to cover these topics in a future edition.

34.4.4 *"Employment income"*

Section 7(2) ITEPA provides:

> "Employment income" means—
> (a) earnings within Chapter 1 of Part 3 [ordinary earnings][13],
> (b) any amount treated as earnings (see subsection (5)) [other general earnings], or
> (c) any amount which counts as employment income (see subsection (6)) [specific employment income].

In summary:



Employment income
General earnings
Ordinary earnings
Benefits in kind
3 other categories
Specific employment income
Retirement benefits
Termination payments
Employment-related securities
Disguised remuneration
Others

[12] For clarity, I set this out in a table format, and abbreviate the section descriptions.
[13] See 34.4.1 ("Ordinary" earnings).

34.5 Earnings causation tests

Statute provides two causation or derivation tests:

Test applies to	**Statutory wording/Pre-rewrite wording**	**See para**
Ordinary earnings	Emoluments *of* employment/*from* employment[14]	*Here*
Benefits in kind	Benefit provided *by reason of* employment	39.10

In each case there must be a nexus between the employment and the earnings/benefit, but what that nexus must be has been left to the Courts to sort out.

EIM provides:

> **EIM20503: The benefits code** [Jan 2021]
> ... Section 62 is based on what was previously Section 19 ICTA 1988, which charged to tax emoluments "from an employment". Case law shows that the phrase "by reason of the employment" [in the benefits code] has a wider meaning than "from the employment" (EIM00600). The words "from the employment" are not reproduced in Section 62 but earnings chargeable under that section include emoluments "of the employment" and in this context "of the employment" has the same meaning as "from the employment"...

The tax law rewrite, unhelpfully, changed the preposition, from *therefrom* (s.19 ICTA) to *of* (s.62 ITEPA). But there is no change of meaning: the old case law continues to apply.[15] HMRC agree:

> **EIM00600 earnings are not taxable unless they are from the employment** [Jan 2021]
> Section 19(1)1 ICTA 1988 referred to taxable emoluments, or earnings, as "emoluments therefrom". That is, emoluments that come from the employment and not from elsewhere. Section 62(2) ITEPA 2003 refers to earnings as "anything that constitutes an emolument of the employment". The words have changed, but not their meaning. So we can still use the case law relating to Section 19 ICTA 1988 (and its statutory predecessors) to help us decide if a particular payment is or is not earnings within Section 62(2) ITEPA 2003.

I refer to that as "**s.62 case law**". This case law is voluminous: EIM

[14] Section 19 ICTA 1988 provided: "Schedule E: Tax under this Schedule shall be charged in respect of any office or employment on emoluments therefrom".

[15] If authority is needed, see *Uniplex v HMRC* [2010] UKFTT 422 (TC) at [29]: "Although the statutory words are now slightly different the same principle applies today."

devotes more than 60 pages to the topic.

34.5.1 *Latin causation test rejected*

We start with *Hochstrasser v Mayes*:[16]

> the issue turns ... upon whether the fact of employment is the *causa causans* or only the *sine qua non* of benefit, which perhaps is only to give the natural meaning (!) to the word "therefrom" in the Statute,

Latin terminology is not (or at least, not nowadays) a helpful way to express a causation test. *Causa sine qua non* is simply an erudite way to refer to a "but for" test and *causa causans* means, I think, the same as operative or proximate cause (which is itself an elusive and evaluative concept).

Criticism of this Latin terminology has a long history. In *Pritchard v Arundale* (1971):[17]

> I cannot help deprecating the use of Latin or so called Latin phrases in this way. They only distract the mind from the true problem which is to apply the principles of English law to the realities of the case. ... English law can furnish in its own language expressions which will more fitly state the problem in any case of this type...
> ... the expression causa causans ... has no certain meaning for legal purposes, or, if it has, ... its use in some cases was catachrestic. It can be a dress for what would otherwise be a naked *petitio principii* (!).

HMRC v PA Holdings puts the point more curtly:[18]

> questions of causation are not to be cloaked in the obscurity of a classical tongue

34.5.2 *What is the test?*

EIM starts with basic principles and avoids Latin:

> **EIM00600 earnings are not taxable unless they are from the employment** [Jan 2021]
> ... In *Laidler v Perry* (42 TC 351), Lord Reid put succinctly the question

[16] 38 TC 673 at p 705; likewise at p.709: "The Court must be satisfied that the service agreement was the causa causans and not merely the causa sine qua non of the receipt of the profit."

[17] 47 TC 680 at 687; see too 39.9.2 (What is the test?).

[18] [2011] EWCA Civ 1414 at [38].

> that has to be answered in all cases:
>
> > "Did this profit arise from the employment? The answer will be no if it arose from something else."[19]
>
> Judges have tried to explain the meaning of the words from the employment in various ways. As Lord Radcliffe pointed out in *Hochstrasser v Mayes* their attempts help to illustrate the idea expressed in the words of the statute but they do not replace those words. He went on to say:[20]
>
> > "For my part I think that their meaning is adequately conveyed by saying that, while it is not sufficient to render a payment assessable that an employee would not have received it unless he had been an employee, it is assessable if it has been paid to him in return for acting as or being an employee."
>
> In *Shilton v Wilmshurst* (64 TC 78), Lord Templeman explained the statutory words in this way.
>
> > "An emolument from employment means an emolument from being or becoming an employee. The authorities are consistent with this analysis and are concerned to distinguish in each case between an emolument which is derived from being or becoming an employee on the one hand, and an emolument which is attributable to something else on the other hand.
>
> Note that to be taxable as earnings a payment does not have to be remuneration or a reward for services (see EIM00610). Many other types of payment fall within the statutory definition of earnings.

This is in effect a capacity test. Perhaps it is the best that can be done; but one person may have many capacities and matching an act to a capacity is not so easy.[21]

> **EIM00610 earnings from employment: important principles** [Jan 2021]
>
> ... Section 62 is not restricted to payments such as salaries, wages and tips in return for the performance of services. It also taxes other types of employment related payment, such as:
>
> - payments made to employees solely in recognition of changes made in their conditions of service. Such payments relate to the employment and to nothing else. They are from the employment. They come to the employee because he or she is an employee and

[19] 42 TC 351 at p.363.

[20] 38 TC 673 at 707.

[21] Such as Pooh-Bah in *The Mikado;* see 9.21.1 (Trust law background).

for no other reason (see EIM00600) and

- payments made solely for the purpose of inducing a prospective employee to enter into a contract of employment. Payments of this kind usually come from the prospective employer, but they may also be paid by a third party who has no interest in the performance of the services which the employee will undertake under his contract of employment (see EIM00700).

In the High Court in *Hochstrasser v Mayes* (38 TC 673) Upjohn J said that to be a profit from the employment a payment "must be in the nature of a reward for services past, present or future". Decisions in later cases have shown that the words "reward for services" should not be taken literally. In *Bray v Best* (61 TC 704) Lord Oliver said:

> "I cannot read the phrase reward for services as anything more than a conventional expression of the notion that a particular payment arises from the existence of the employer-employee relationship and not, to use Lord Reids words in *Laidler v Perry* (42 TC 351), from something else" (page752).

Other decided cases that demonstrate that taxable earnings do not have to be remuneration or reward for services include *Brumby v Milner* (51 TC 583) (see EIM00740) and *Hamblett v Godfrey* (59 TC 694) (see EIM00690).

- Payments for services under a contract of employment are taxable. A sum that an employee receives for her services under her contract of employment is taxable as earnings within Section 62 whatever the payment is called. There is more about this at EIM00630.
- Taxable earnings may be paid by a person who is not the employer. A payment may be from the employment and therefore taxable as earnings within Section 62, even if it is paid by somebody other than the employer. What matters is that the payment is made because the recipient holds the employment, or as a reward for services provided in the employment, and not for any personal reasons. Some tax cases that illustrate this principle are shown in the table below.
- Payments made voluntarily can be taxable earnings. The cases listed below also demonstrate that the absence of a legal obligation on a person to make a payment does not prevent it being taxable as earnings within Section 62. A hairdressers tip is an example of earnings that are paid voluntarily. A voluntary payment is taxable as earnings if it is from the employment (see EIM00600). The mere fact that it stems from the generosity of the payer on whom the employee has no legal claim does not prevent it being taxable. A gift that does not come from the employment is not taxable under Section 62 (see EIM01460). But there may be a charge under the

> benefits code ...

But once we have agreed the words which express the causation test, which must be general words, we then have to apply them to the facts of individual cases; and as the following 60 pages of the Manual can attest, that is where the real difficulty lies, and that is where the effective guidance can be found.

The decision on the facts of *Hochstrasser v Mayes* (reimbursement of loss on a disposal of property occasioned by moving work location - not taxable) should be seen as out of line with subsequent decisions, though the lower courts continue to pay lip service to it.[22]

34.6 Charge on employment income

One might expect ITEPA to begin with a provision saying that income tax is charged on employment income. In fact this is implied rather than expressed; s.6(1) ITEPA provides:

> **Nature of charge to tax on employment income**
> (1) The charge to tax on employment income under this Part is a charge to tax on—
> (a) general earnings, and
> (b) specific employment income.

Still, the imposition of the charge is clear enough.

34.7 Amount charged to tax

Section 6(2) provides:

> The amount of general earnings or specific employment income which is charged to tax in a particular tax year is set out in section 9.

So we turn to s.9 ITEPA which provides:

> (1) The amount of employment income which is charged to tax under this Part for a particular tax year is as follows.
> (2) In the case of general earnings, the amount charged is the net taxable earnings from an employment in the year....
> (4) In the case of specific employment income, the amount charged is the net taxable specific income from an employment for the year.

[22] See *HMRC v Murphy* [2022] EWCA Civ 1112, reversing the UT decision which the 2023/24 edition of this work described as “doubtful”.

Thus the legislation draws a distinction between:
(1) What is charged: employment income; and
(2) The amount which is charged; that is:
  (a) net taxable earnings (or net taxable specific income)
  (b) from an employment.

ITTOIA adopts a similar distinction.[23]

"Taxable" earnings is a label which brings in a large number of rules, for in the various situations where the statute desires to bring earnings into charge in a year it provides that they are "taxable" earnings from the employment in that year.

"Net" taxable earnings is a label which brings in rules relating to deductions, not discussed here.

Section 9(6) ITEPA provides:

> Accordingly, no amount of employment income is charged to tax under this Part for a particular tax year unless—
> (a) in the case of general earnings, they are taxable earnings from an employment in that year ...

34.8 "Taxable earnings"

Section 10 ITEPA provides the starting point of the definition:

> (1) This section explains what is meant by "taxable earnings" and "taxable specific income" in the employment income Parts[24].
> (2) "Taxable earnings" from an employment in a tax year are to be determined in accordance with Chapters 4 and 5 of this Part.

So we move on to Chapters 4 and 5 Part 2 ITEPA. The pace is leisurely. We eventually find four sections that identify amounts of taxable earnings: ss.15, 22, 26 and 27 ITEPA. There are four bases of taxation of employment income.
(1) UK residents: the arising basis applies (unless one of the remittance bases applies)
(2) Foreign domiciled UK residents: a remittance basis applies to two types of earnings:
  (a) Chargeable overseas earnings **("COE"**)
  (b) Overseas Workday Relief earnings **("OWR earnings")**

[23] See 2.3.1 (Unremitted RFI "chargeable").

[24] Parts 2-7A ITEPA; see 34.2 (Employment income Parts).

These might be considered two routes to qualify for the remittance basis; but the remittance basis rules differ so much between the two that they are better considered as distinct remittance bases:

Remittance basis (my term)	**See para**
COE remittance basis	34.13
OWR remittance basis	34.22

(3) Non-residents: charged on UK earnings only 34.29

The taxation of general earnings can be summarised in this table:

	UK Resident	**UK Domicile**	**Taxable earnings**	**ITEPA Section**	**Part 2 Chap**
Arising basis	Yes	n/r	All earnings: AB	15	4
COE Rem. Basis	Yes	No	(1) COE: RB (2) Other earnings: AB	22(2) 15	5
OWR Rem. Basis	Yes	No	(1) OWR earnings: RB (2) Other earnings: AB	26(2) 15	
Non-resident	No	n/r	(1) Foreign earnings: no tax (2) UK earnings: AB	27 –	5

Key AB: Arising basis
COE: Chargeable Overseas Earnings
OWR: Overseas Workday Relief
RB: Remittance basis

34.9 Earnings for year/from employment/received

ITEPA uses three distinct expressions:

Term	**Section**	**See para**
Earnings *"for" tax year*	16, 29	34.10
Earnings *from employment in tax year*	18-19	
Earnings *received in tax year*		

Earnings which are "for" one year may be earnings from the employment in a different year.

34.10 Earnings "for" tax year

It is clumsy to refer to the year which earnings are "for". ITEPA sometimes resorts to quotation marks to help the reader grasp the elusive preposition. I adopt the statutory usage as a paraphrase is even more confusing; but sometimes a paraphrase such as earnings "attributable to" or "relating to" or "earned in" a year would be easier to follow.

The concept is fundamental as the taxability of earnings depends on the employee's residence and domicile in the year which the earnings are "for". The policy behind this is that the timing of receipt may be arranged to ensure receipt in a year of non-residence; but one cannot so easily modify the year which earnings are "for".

The concept is (slightly) elucidated in s.16 ITEPA:

> (1) This section applies for determining whether general earnings are general earnings "for" a particular tax year for the purposes of this Chapter.
> (2) General earnings that are earned in, or otherwise in respect of, a particular period are to be regarded as general earnings for that period.
> (3) If that period consists of the whole or part of a single tax year, the earnings are to be regarded as general earnings "for" that tax year.
> (4) If that period consists of the whole or parts of two or more tax years, the part of the earnings that is to be regarded as general earnings "for" each of those tax years is to be determined on a just and reasonable apportionment.
> (5) This section does not apply to any amount which is required by a provision of Part 3 to be treated as earnings for a particular tax year.[25]

Since this section only applies for the purposes of Chapter 4, it has to be repeated verbatim in s.29 ITEPA for Chapter 5. (If there had been an ITEPA-wide definition the duplication would not have been necessary.)

This is only intended to set out the natural meaning that would have applied in the absence of a definition. EN ITEPA Note 6 provides:

> Sections 16 and 29 of the Act therefore spell out that general earnings are "for" a particular period consisting of the whole or part of a tax year if they are general earnings earned in or otherwise in respect of that period. It is thought that this reflects the meaning that a court would give to "for" if the point ever arose.

The EI Manual provides:

EIM40008. The year that earnings are "for" [Nov 2019]
... This question has no relevance when deciding the tax year in which the tax charge arises. Earnings are assessed to tax in the tax year in which they are "received". The definition of "received" is set out in Section 18 (see EIM42200).

[25] This is a reference to s.72(2) ITEPA; see too s.222(2) ITEPA and 223(4) ITEPA for definitions in specialist circumstances.

Why is it important to know the tax year that earnings are "for"?

Section 16 establishes the year that earnings are "for". Once this has been done, the next step is to decide which of the rules in Part 2 Chapters 4 and 5 apply to calculate taxable earnings.

For the majority of UK Resident and Ordinarily Resident (R/OR)[26] and domiciled employees, the question of the year earnings are "for" has little consequence. This is because all of their earnings are chargeable to UK income tax in consequence of their residence and domicile status. In addition, most earn and receive their earnings in the same tax year. However, for those employees who are other than R/OR and UK domiciled and who receive earnings in different years from those in which they earn them, the question continues to be relevant.

Principles from case law

The absence of statutory provision in ICTA 1988 and earlier enactments resulted in various cases being litigated through the 20th century.

- *Edwards v Roberts* (19 TC 618)
- *Hunter v Dewhurst*, (*Henry v Foster*) (16 TC 605)
- *Draycup v Radcliffe* (27 TC 188)
- *Heasman v Jordan* (35 TC 518)
- *Board of Inland Revenue v Suite* ([1986] 2 All ER 577)
- *Griffin v Standish* (67 TC 317)
- *Bray v Best* (61 TC 705)

Before 1989, the year that earnings were "for" also dictated the year in which income tax was assessed. "Receipts basis" replaced "earnings basis" in 1989.

The case of *Bray v Best* (61 TC 705), was heard by the House of Lords in 1988. Lord Oliver set out the preferred approach at page 752:

> "The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances."

Lord Oliver's approach to determining the year that earnings are "for" continues to apply. Section 16 simply confirms the recommended approach.

EIM40009. The year that earnings are "for" - arrangement of guidance [Nov 2019]

In 2007 and 2008, HMRC consulted with professional advisers with particular expertise regarding the treatment of foreign nationals coming to work in the UK and UK residents leaving the UK to work abroad. Many of the advisers' clients have complex remuneration packages. Some are members of Long Term Incentive Plans or participants in other deferred remuneration schemes. The aim of the exercise was to establish principles for determining the tax year that earnings, delivered by these arrangements, are "for".

The guidelines set out on the following pages were adopted by HMRC with effect from 28 February 2008. They are intended to be comprehensive but do not claim to cover every plan and set of circumstances that will arise.

... The guidance sets out general principles and indicates the views HMRC is likely to take in specified circumstances. It is intended to aid and inform fact finding and decision

[26] The Manual has not been revised following the abolition of ordinary residence in 2013, but that does not affect the points made here.

making. It is not a substitute for obtaining all of the relevant information and exercising good judgment by applying the principles to the facts. This is not an easy task as you may be required to balance one set of conditions against others. (This content has been withheld because of exemptions in the Freedom of Information Act 2000)...

EIM40011. The year that earnings are "for" - the approach to take [Nov 2019]

[The Manual repeats the quote from *Bray v Best* set out in EIM 40008 above, and continues;]

Finding out the facts

An essential starting point is to obtain contemporaneous evidence. This may include all or any of the following:

- An understanding of the intention of the employer in developing the incentive programmes
- Bonus plans
- Award letters
- Notes of meetings
- Correspondence between the parties
- Obtain an analysis of amounts paid out
- An explanation of how awards are treated in the employer-company accounts

These documents may indicate the understanding of the parties regarding the performance period that awards are intended to be "for". The intention of the employer as disclosed to the employee and the understanding of the employee are particularly significant.

Unsubstantiated recollections of the employee regarding intention should be considered but given less weight than contemporaneous documented statements.

If plan documents and contemporaneous information do not provide clarity, it's reasonable to make inferences from available evidence.

You may ask the Large Business Team or Customer Compliance Manager dealing with the Corporation Tax affairs of the employer company how the bonus awards have been treated in the employer company accounts. The company may claim a deduction for a single year or may create provisions to spread the deduction over a longer period. This may indicate the period the employer considers the award to be "for". The accounting treatment is not conclusive, but it is significant. In the absence of clear statements in the plan documents the accounting treatment may be evidence of the employer's understanding of what the scheme was intended to achieve.

Lump sums may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

EI,M0012. Annual bonuses awarded for meeting corporate, team or personal targets [Nov 2019]

Many employers operate annual bonus schemes for their employees. There are usually performance criteria. These may require employees to meet corporate, team or individual targets.

Bonuses may be paid out by the employer or through a trust - usually an employee benefit trust (EBT). The identity of the payer is not relevant when determining the year that the award is "for". However, see the guidance below on "discretion".

In some schemes, particularly those referenced to company performance, employees may accrue entitlement to receive bonuses as the performance period passes. In others, entitlement is conditional on remaining in employment until a specified date (see below). The performance period and therefore the period that the bonus is "for" may be set out in the scheme documents.

If the performance period spans more than one tax year, Section 16(4) ITEPA 2003 applies. The bonus should be apportioned to the relevant tax years on the basis of a just and reasonable apportionment.

Section 16 attributes general earnings to one or more tax years. You should not accept that awards can be "for" a shorter period, even a day, to which the rules in Part 2 Chapters 4 and 5 can be applied. Employers may spontaneously award "spot-bonuses" to all employees in post on a particular date, or entitlement to a performance bonus may crystallise when a particular performance factor is satisfied. Even though these events make take place on a particular day, the resultant awards should be treated as general earnings "for" the tax year in which the event occurred.

Unless there is evidence to the contrary, HMRC takes the view that performance bonuses are "for" the performance period. This may be a calendar year or the company accounting period. In the case of specific projects, it may be the period beginning on the date when work started and ending when the specified outcomes were achieved.

Impact of Extra Statutory Concession A11 (ESC A11)[27]

ESC A11 is a non-statutory concession that permits tax years to be split. It is usually relevant to years in which individuals arrive in or depart from the UK. In consequence of arrival or departure, there are discrete periods of non-residence (NR) and ordinary residence (OR) for tax purposes. If the conditions are satisfied, the tax year is split and each part treated as a separate tax year.

Where entitlement to spot bonuses or conditional bonuses arises on a single day the advice set out above indicates that the award is to be treated as earnings "for" the year in which that days falls. In ESC A11 cases this will be that part of the split year in which the relevant day falls.

Evidence suggests spot bonuses and similar payments are relatively unusual and will be seen infrequently. If you suspect that the timing of entitlement has been manipulated to gain a tax advantage from the use of ESC A11, HMRC may decide to set aside the Concession and treat the individual as resident in the UK for the whole tax year. ...

EIM13. Bonuses and deferred remuneration plans - the effect of conditionality and employer's discretion [Nov 2019]

Conditionality

Many bonus schemes are referenced to performance periods, but awards will not be paid unless employees are in employment on the date of payment. For example, a bonus is referenced to company profits for year ended 31 December but is not paid until the following 30 June. Employees who worked for the employer during the performance year forfeit their entitlement if they leave employment before 30 June.

Up to 28 February 2008, HMRC took the view that the bonus award could only be "for" the year in which unfettered entitlement to receive it arose. The year that the bonus was "for" was the year in which the employment condition was satisfied. Since 28 February 2008, HMRC has adopted the principles set out in EIM40008 and subsequent pages.

[27] The Manual has not yet been revised for the 2013 changes which have put the ESC on to a statutory basis, but the general points made here still apply.

Good and bad leavers

Many of the plans with employment conditions identify "good" and "bad" leavers and prescribe different treatments for the 2 categories. "Good leavers" are employees who cease employment before the bonus payment date through retirement, redundancy or ill-health. "Bad leavers" are those who are dismissed for cause or resign to join a competitor.

It's possible to take various views on the year that such bonus awards are "for" where there is an employment condition:

- The performance period
- The performance period plus the period from the end of the performance period to the date of payment, sometimes referred to as the "vesting period"
- The year in which the date of payment falls

Your decision should take account of what the bonus scheme is intended to achieve. If this is not clear from the documents, you may base judgments on how the employer treats good and bad leavers.

Plans that:

- are designed to provide incentives to employees for performance periods, but,
- do not pay out unless the participants are still in employment at the specified date, but,
- do not specify any additional performance conditions in the period beginning after the original performance period and ending on the payment date,

are likely to pay out awards that are "for" the original performance period. However, if the plan introduces additional performance conditions for the second period the period that the award is "for" is likely to be the aggregate of both periods.

If "good leavers" are entitled to receive awards; that may indicate that the awards are "for" the original performance period. Entitlement to pro-rated awards may indicate that entitlement is "for" the performance and the vesting periods.

Some schemes provide for deferred bonuses to be paid out when ownership of the company changes hands. This may be an indicator that the bonus is earned by that date and is "for" the relevant performance period.

Even though these contingencies may not occur for all or any of the plan participants, their existence may shed light on the period the bonus is intended to be "for".

It is sometimes argued that the employment condition is never just about being in employment on the specified date; that the intention of the employer in introducing this condition is to obtain satisfactory performance in the period ending on the date of payment. This may well be the case. If evidence can be found to support the contention you should accept that the period the awards from the plan are "for" is the combined performance and vesting periods.

Employers' discretion

Some bonus schemes give the employer absolute discretion to award or refuse to award bonuses. The discretion may lie with the trustees if an Employee Benefit Trust (EBT) pays out the awards. The courts have held that, whatever the plan says, an employer's discretion in awarding or withholding a bonus is not unfettered. However wide the discretion appears to be, the employer is required to exercise his discretion rationally and in good faith, and not irrationally or perversely.

There may be a pattern of awards that may indicate the year the awards are "for". Employees may also have an understanding of how the bonus scheme works, and the period awards are referenced to, while accepting the employer's discretion.

A discretionary bonus may therefore be "for" the performance period, the combined performance and "vesting" period or the year in which discretion is exercised and payment is made. It is important to consider all of the relevant information.

EIM14. Long Term Incentive Plans and Deferred Remuneration [Nov 2019]

Various schemes exist to reward and provide incentives to employees. Not all intended outcomes will be the same. The intention of the employer and the intended behavioural effect will influence the design of the scheme. For example, plans may be intended to:

- Tie-in valued employees and create a disincentive for leaving and moving to a competitor, or,
- Motivate and reward outstanding performance by aligning the interests of employees with those of the shareholders

Schemes intended to aid retention may include the following features:

- Bonuses are paid after 3 – 5 years of satisfactory employment
- The employer has discretion to award or deny bonuses for good or bad leavers
- Part bonuses are paid year on year with other entitlement remaining in the Plan
- Part entitlement to bonuses "vests" each year, but is not paid until a later year

Schemes intended to motivate and reward outstanding performance may include:

- Employment targets linked to growth in the company's:
  - share price
  - turnover
  - net profits
  - expansion of certain markets
  - market share
- Granting employees real stocks and shares or "phantom" shares in the company. (In the phantom schemes, no stocks or shares are assigned to the employees. Bonus entitlement is calculated by reference to a notional share portfolio.)

Payments may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

Awards from both types of schemes are likely to be "for" the whole performance or reference period. If this is greater than one tax year then the final award should be apportioned over the tax years falling into the performance period on a reasonable basis.

EIM15. The year that awards from Long Term Incentive Plans and other deferred remuneration arrangements are "for" [Nov 2019]

Entry to Long Term Incentive Plans (LTIPs)

If employees perform exceptionally well, they may be invited to participate in an LTIP. LTIPs run for pre-determined period that can be as long as 10 years. This process may repeat year after year so that employees are simultaneously members of several Plans. In any particular year they may receive part awards from some and entire awards from others.

The initial investment is often funded by part of the participant's bonus for the previous year. The employee may be obliged to defer all or part of the previous year's bonus or may do so voluntarily. Plans may require a mixture of the two. The initial contribution may be guaranteed, in the sense that it cannot be lost, and/or it may have the potential to increase and decrease dependant on what the Plan tracks, for example, share price or company turn-over.

Other plans, particularly phantom share schemes, may simply award notional stock without any requirement for deferral from an earlier bonus.

In addition to the anticipated growth in the share price that adds value to the participants' awards, employers may make additional awards of stock to increase the value of the notional portfolio. These "matching awards" may be granted throughout the life of the scheme at times specified in the plan document.

Deferred bonuses and matching awards

Employers may defer the payment of bonuses and make eventual payment subject to conditions. For example, the employer awards a bonus of £100,000 referenced to a performance period. £75,000 is paid in cash immediately following the bonus year; £25,000 is to be paid three years later in cash or shares, if the employee has not resigned or been dismissed before the vesting date. Such a deferral may be imposed by the employer, or it may be entered into voluntarily by the employee. To develop the example, the £25,000 deferral may be required by the employer but the employee has the choice of voluntarily deferring a further £25,000. In both scenarios, the employer may offer an enhancement or matching award. The matching award may be delivered in the form of shares or cash. The matching award may be added to the LTIP at the beginning of the period. Additional matching awards may be added at specified dates during the deferral or vesting period.

What year are LTIP awards "for"?

It is important to consider all of the relevant facts. The deferred bonus may be "for" the original bonus year, or for the whole deferral period. If there is particular emphasis on the employee remaining in service at a future date, it may be for the tax year in which that condition is met. However, this feature is unlikely to exist in isolation as the employer wants to motivate the employee to perform well while remaining in employment. In order to determine the period that the deferred bonus is "for", it is necessary to consider all of the relevant information and weigh the emphasis given to each factor.

In general terms, simple deferred bonuses will remain earnings for the original bonus period, and growth or matching awards will be "for" the deferral period. In more sophisticated schemes where the deferred bonus is "awarded" and "vests" after the bonus year, and especially where there are further performance conditions relating to this period, the deferred bonus may be earnings for the period between award and vest.

There may also be circumstances where "growth" in the value of the fund is treated as being "for" the performance period of the original deferred bonus. This view is likely where no additional performance criteria are imposed during the deferral period or, if there are, the conditions are the same as for the deferred bonus.

If the conditions are significantly different, e.g. the matching awards are conditional upon new performance criteria, the "growth" or matching awards are likely to be "for" the deferral or vesting period itself.

If the conditions of the matching award are referenced solely to the employee remaining in employment on the vesting or payment date in order to receive payment, the matching award is likely to be earnings for the tax year in which entitlement to receive the award matures.

Enhancements or matching awards may be paid out of LTIPs at the same time as deferred bonuses. Awards may be aggregated amounts that are "for" different periods. It is important to understand how sums are calculated and whether different performance periods should be considered.

> **EIM16. Long Term Incentive Plans and Deferred Remuneration – staged vesting** [Nov 2019]
> Some Long Term Incentive Plans (LTIPs) pay out awards in tranches. The details of different schemes will vary. For example, an LTIP fund containing deferred bonuses and matching awards may pay out 20% per annum over five years or nothing in Years 1 and 2 and 33% per annum in Years 3 to 5. Entitlement may be conditional upon participants meeting performance conditions and remaining in employment.
> The period that each tranche is "for" has to be determined. If the evidence shows that the Plan is intended to reward performance over the period from award to vest, each part of the final payment is "for" the period from the original award date until it vests, calculated as per Section 16(4) on a just and reasonable apportionment. In the first example, 20% is "for" Year 1; 20% is "for" Years 1 and 2, and so on. Alternatively, if there are no performance conditions and the Plan emphasises being in employment at each vesting date, each payment may be treated as earnings "for" the tax year of receipt.

34.11 Pre/post-employment earnings

There are special rules for pre-commencement and post-cessation earnings. Section 17 ITEPA provides:

> (1) This section applies for the purposes of this Chapter in a case where general earnings from an employment would otherwise fall to be regarded as general earnings for a tax year in which the employee does not hold the employment.
> (2) If that year falls before the first tax year in which the employment is held, the earnings are to be treated as general earnings for that first tax year.
> (3) If that year falls after the last tax year in which the employment was held, the earnings are to be treated as general earnings for that last tax year.
> (4) This section does not apply in connection with determining the year for which amounts are to be treated as earnings under Chapters 2 to 11 of Part 3 (the benefits code).

Since this section only applies for the purposes of Chapter 4, it has to be repeated verbatim in s.30 ITEPA for Chapter 5.

The EI Manual provides:

> **EIM40005. Special rules for determining the year that general earnings are "for": Pre-commencement and post-cessation earnings** [Nov 2019]
> ...
> It's unlikely the rules will often apply in practice because general earnings can normally be attributed to periods in which the job is held.

> **EIM40006. Effect of non-residence on pre-commencement and post-cessation earnings** [Apr 2015]
> Where the special rules in [s.17 ITEPA] EIM40005 apply, instead of being taxable when they are received, general earnings will be taxable in the last or first year the taxpayer held the job if the provisions in sections 15 or 27 apply.
> ...
> **EIM40007. Effect of non-residence on pre-commencement and post-cessation earnings: Examples** [Nov 2019]
> This page provides examples of how the above sections apply. ...

The first example concerns pre-commencement earnings of an employee who is resident and domiciled throughout:

> ***Example 1***
> An employee is approached by another employer. She is offered a job by the new organisation. As an inducement to change jobs she is paid £50,000 on 1 April 2013. She commenced work for the new employer on 1 May 2013. The employee is resident and domiciled in the UK so the relevant charging provision is Section 15 in Part 2 Chapter 4.
> Section 17 operates to make the payment earnings of the year in which the employment commences. Even though paid in tax year 2012/2013 they are earnings "for" the year 2013/2014.

The Manual then considers whether domicile makes any difference:

> The result will be the same if the employee is resident but not domiciled in the UK.

It is assumed that the earnings are not chargeable overseas earnings.[28] The Manual now considers someone becoming UK resident:

> ***Example 2***
> An employee worked in Singapore for many years for a UK resident company. The employment ceased on 31 December 2012. For 10 years prior to that date the individual was not resident and not ordinarily resident although domiciled in the UK. On 6 April 2013 the employee returned to the UK. From the date of arrival he became resident.
> 6 months after the job ended the employer made a payment of £50,000 to the former employee in recognition of the contribution he had made to the expansion of business in the Far East.
> Section 17 makes the payment earnings of the year in which the

[28] See 34.13 (COE remittance basis).

employment was last held, 2012-2013. In that year the employee was not resident in the UK and performed all of the duties in Singapore. In consequence, the payment does not fall into any of the charging provisions in Part 2 Chapters 4 and 5 and is therefore not chargeable to tax as general earnings.

34.12 UK resident/dom employee

Section 15 ITEPA provides:

> (1) This section applies to general earnings for a tax year for which the employee is UK resident ...[29]
> (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of "taxable earnings" from the employment in that year.
> (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

Section 15 sets out the general rule: in short, earnings of a UK resident are "taxable earnings", taxed on receipt, on an arising basis.

"Receipt" is defined in ss.18, 19 ITEPA (not discussed here).

The s.15 rule has two exceptions:

(1) COE remittance basis[30]
(2) Overseas Workday Relief[31]

34.12.1 *Employment income: Split year*

Section 15(1)(1A) ITEPA need to be read together:

> (1) This section applies to general earnings for a tax year for which the employee is UK resident except that, in the case of a split year, it does not apply to any part of those earnings that is excluded.
> (1A) General earnings are "excluded" if they—
> (a) are attributable to the overseas part of the split year, and
> (b) are neither—
> (i) general earnings in respect of duties performed in the UK,[32]

[29] The omitted words deal with split years and are considered below.

[30] See 34.13 (COE remittance basis).

[31] See 34.22 (Overseas Workday Relief).

[32] Defined by reference: Section 15(5) ITEPA provides:
"The following provisions of Chapter 5 of this Part apply for the purposes of subsection (1A)(b) as for the purposes of section 27(2) ...
(b) sections 38 to 41 (which contain rules for determining the place of performance of duties of employment), and

> nor
>
> (ii) general earnings from overseas Crown employment subject to UK tax...[33]

Section 15(4) ITEPA deals with attribution:

> Any attribution required for the purposes of subsection (1A)(a) is to be done on a just and reasonable basis.

34.13 COE remittance basis

This section considers the chargeable overseas earnings (COE) remittance basis, which is the first of the two remittance bases which may apply to earnings of a UK resident foreign domiciled individual.[34]

Section 809F ITA provides:

> (1) This section applies if section 809B, 809D or 809E applies to an individual for a tax year.
> (2) The individual's relevant foreign earnings for that year are charged in accordance with section 22 or 26 of ITEPA 2003.

So we turn to s.22 ITEPA which (somewhat repetitively) provides:

> (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
>
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
>
> (b) the employee does not meet the requirement of section 26A [recent arrival] for that year.

The point of para (b) is that Overseas Workday Relief (which is more generous) has priority, if it applies.

> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year. ...

(c) section 41ZA (which is about determining the extent to which general earnings are in respect of UK duties)."

[33] Defined by reference: Section 15(5) ITEPA provides:
"The following provisions of Chapter 5 of this Part apply for the purposes of subsection (1A)(b) as for the purposes of section 27(2)—
(a) section 28 (which defines "general earnings from overseas Crown employment subject to UK tax")"
See 34.40 (Overseas Crown employment).

[34] See 34.8 ("Taxable earnings").

In short, the remittance basis applies to chargeable overseas earnings. Section 22(7) ITEPA provides:

> Section 15(1) does not apply to general earnings within subsection (1).

Thus earnings which are not chargeable overseas earnings continue to fall under the s.15 arising basis.

34.13.1 *Pre-2008 earnings*

Suppose:

(1) Chargeable overseas earnings accrue to T before 2008/9 and
(2) The earnings are remitted in 2008/9 or later (when T is still resident).

In the absence of a transitional rule, the earnings would not be taxable under s.22 ITEPA because the condition in s.22(1)(a) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 82(2)(a) Para 82 sch 7 FA 2008 fills that gap:

> (1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if the individual—
> (a) was UK resident in that year, but
> (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year.
>
> (2) Section 22 or 26 of ITEPA 2003 (as amended by this Part of this Schedule) applies in relation to the general earnings as if—
> (a) section 809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year and
> (b) section 22(7) or 26(6) of ITEPA 2003 were omitted.

I think para 82(2)(b) is misconceived, though it does no harm.

34.14 Chargeable overseas earnings

The expression "chargeable overseas earnings" is a label which brings in two sets of requirements: the earnings must be "overseas" earnings and they must be "chargeable". The key part of the definition is "overseas earnings".

34.14.1 *"Overseas" earnings*

Section 23(2) ITEPA provides:

> General earnings for a tax year are "overseas earnings" for that year if—

> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year,
> (aa) the employee does not meet the requirement of section 26A [recent arrival] for that year,
> (b) the employment is with a foreign employer, and
> (c) the duties of the employment are performed wholly outside the UK.

34.14.2 *"Chargeable" overseas earnings*

The concept of "chargeable" overseas earnings brings in rules for deductible expenses and associated employments. Section 23(3) ITEPA provides:

> (3) To calculate the amount of "chargeable overseas earnings" for a tax year—
> *Step 1*
> Identify—
> (a) in the case of a tax year that is not a split year, the full amount of the overseas earnings for that year, and
> (b) in the case of a split year, so much of the full amount of the overseas earnings for that year as is attributable to the UK part of the year.
> *Step 2*
> Subtract any amounts that would (assuming they were taxable earnings) be allowed to be deducted from the earnings identified under step 1 under—
> (a) section 232 or Part 5 (deductions allowed from earnings),
> (b) sections 188 to 194 of FA 2004 (contributions to registered pension schemes), or[35]
> (d) section 262 of CAA 2001 (capital allowances to be given effect by treating them as deductions from earnings).
> *Step 3*
> Apply any limit imposed by section 24 (limit where duties of associated employment performed in UK).
> The result is the chargeable overseas earnings for the tax year.

Section 23(4) ITEPA provides:

> Any attribution required for the purposes of step 1 or step 2 in subsection (3) is to be done on a just and reasonable basis.

[35] Para (c) has been deleted.

34.14.3 *Pre-2008 earnings*

Suppose earnings accrue before 2008/09. At first sight the earnings cannot be "chargeable overseas earnings" within the definition of s.23(2) ITEPA since they do not meet the condition in s.23(2)(a): section 809B, 809D, or 809E did not apply before 2008/09. Moreover, para 82 which fills that gap in s.22 does not fill the gap in s.23. Construed strictly, therefore, pre-2008 earnings which were not remitted before 6 April 2008 have fallen out of charge!

However, I expect that the courts will to strive to construe the section avoid that result. After all, it is obvious (and para 82 confirms) that this result was not intended. One way to do that is to say that if income arises before 2008, the question of whether it constitutes chargeable overseas earnings is to be decided by reference to the legislation in the year that it arises and not the legislation in the year that it is remitted. It has to be said that para 82(3) sch 7 FA 2008 would not then be necessary. The alternative is to read para 82(2) as if it applied to s.23 as well as to s.22 and 26. Neither of these solutions is comfortable reading, but the conclusion that all pre-2008 earnings fall out of charge seems even worse. This is only one of many infelicities in the 2008 legislation: but a modern court will strive to make it work.

34.15 Foreign employer

Section 23(2) ITEPA provides:

> General earnings for a tax year are "overseas earnings" for that year if ...
> (b) the employment is with a foreign employer...

The definition is in s.721(1) ITEPA:

> "foreign employer" means an individual, partnership or body of persons resident outside the UK and not resident in the UK.

EI Manual provides:

> **EIM40106 Calculation of Chargeable Overseas Earnings - Section 23 ITEPA 2003** [Nov 2019]
> *Practical issues*
> An employee may maintain that general earnings are chargeable overseas earnings taxable on remittance under section 22 rather than on receipt ... This is likely to lead to a significant reduction in the amount of taxable earnings. You should examine the facts closely before accepting that earnings are chargeable overseas earnings within section 22. In particular

> you should find out whether the employer has any place of business in the UK.

While tax rules often turn on whether a person is resident in the UK, it is rare to see a requirement that they must be resident outside the UK.[36] It is suggested that this should be removed so that the only requirement is that the employer is non UK resident. It should not matter whether or not they are resident elsewhere. In practice I doubt it is possible to be non UK resident without being resident outside the UK, so this simplification makes no practical difference and has no cost implication.

34.16 Incidental duties in UK

Section 23(2) ITEPA provides:

> General earnings for a tax year are "overseas earnings" for that year if ...
> (c) the duties of the employment are performed wholly outside the UK.

Section 39 ITEPA qualifies "wholly" oustide the UK:

> (1) This section applies if in a tax year an employment is in substance one whose duties fall to be performed outside the UK.
> (2) Duties of the employment performed in the UK whose performance is merely incidental to the performance of duties outside the UK are to be treated for the purposes of this Chapter as performed outside the UK.

In short, UK duties may be ignored if they are "merely incidental". What are incidental duties? HMRC guidance is in:

(1) A paper entitled "Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of 'merely incidental' duties" the **("HMRC dual-contracts paper")**.[37]

(2) EI Manual:
   (a) EIM 40203 (Aug 2012), EIM 40204 (Aug 2012): this is a shorter version of the material in the HMRC paper, so it is not set out here.
   (b) EIM77030: this was withdrawn in February 2016 but some aspects are discussed here as it may still reflect HMRC practice.[38]

[36] For an exception, see 48.6 ("Resident outside the UK").

[37] (2012) *https://www.gov.uk/government/publications/dual-contracts*

[38] An earlier version of the text was in Tax Bulletin 76 (also classified as RI 273). See Ladkin, "Domicile: Working at Home and Abroad" Taxation Magazine, 27 March 2003, p.632.

The HMRC dual-contracts paper provides:

> **Background to the exception for merely incidental duties**
> 15. The Royal Commission Report [on the Taxation of Profits and Income][39] published in 1955 stated (paragraph 300)
>
> *"We recommend that work is not the less to be treated as performed wholly in one country because certain* ***merely incidental duties,*** *such as returning for report, to acquire samples, etc., are carried out in another."*
>
> 16. [HMRC set out s. 11(3) FA 1956, now s.39 ITEPA, and continue:]
> 17. However, the term "merely incidental" duties was not defined in FA1956 or in subsequent legislation. Following a common dictionary definition of "incidental", as something that is minor, casual or subordinate in nature, the Inland Revenue (as it was at the time) considered that a duty that formed part of the essential or fundamental requirements of the employment could not be incidental.
> **Robson v Dixon (48 TC 527)**
> 18. This is the only case where the courts have considered the meaning of "merely incidental" duties. It was decided in the High Court in 1972 and concerned section 10 and 11 of the FA 1956. Mr Robson was an airline pilot who lived in the UK but commuted to work in Amsterdam, where he was employed by a Dutch airline.
> 19. Robson flew aircraft on scheduled flights from Amsterdam to various parts of the world, mainly North and South America. None of the flights in the years under appeal commenced in the UK but of 811 take-offs and landings, 38 were made in the UK of which 16 were charter flights, which were outside his normal duties (he made in total only 22 charter flight landings and take-offs).
> 20. Robson contended that as his duties were performed substantially outside the UK, any duties in the UK were therefore merely incidental to his substantive duties abroad. Pennycuick VC disagreed –
>
> *"The expression "merely incidental" is a striking one, and effect must be given to the natural meaning of the words. The words "merely incidental to" are upon their ordinary use apt to denote an activity (here the performance of duties) which does not serve any independent purpose but is carried out in order to further some other purpose.*
>
> The judge set out the duties performed by Robson and went on:
>
> *In the present case, the duties performed by the taxpayer, apart from his duties on the ground at Schiphol, mainly consisted (putting it shortly) of taking a plane up at Schiphol, flying it to whatever its destination was and then bringing it down. In the case of the flights from Schiphol to some destination (normally in America) on which there was a stop at England, his duties consisted of taking the plane up at Schiphol, flying it to England, bringing it down at Heathrow or elsewhere, and then taking it up again and flying it again to the next destination, in America. With the best will in the world, I find it impossible to say that the activities carried on in or over England are merely incidental to the performance of the comparable activities carried on in or*

[39] Cmd 9474.

> *over Holland or in or over the ultimate destination, in America. The activities are precisely co-ordinate, and I cannot see how it can properly be said that the activities in England are in some way incidental to the other activities. Going back to the words of the section, when one asks, 'What exactly are the other duties outside the UK to which the performance of the duties are incidental?', no satisfactory answer can be given. The other duties are simply co-ordinate duties.*

21. Pennycuick was clear as well that the test of "merely incidental duties" is one of quality not quantity –

> *"Again, I think it is impossible to construe s 11(3) in the way in which it was sought to construe it in the taxpayer's contentions in the case stated, as indicating merely relatively short periods of employment in the UK in relation to the period of employment outside the UK. It would have been quite simple for the section so to provide; and it may well be that if the condition were imported only by the expression 'in substance', that would be the result. But the second requirement is expressed in quite different terms and cannot, I think, be treated as referring merely to what has been described as a quantitative, in contra-distinction to a qualitative, basis. ...*
>
> *It would be tempting to say that all the duties performed by a pilot are incidental to the purpose of transporting passengers from one place to another, but that approach clearly would not help here. What has to be shown is that the particular duties in the UK are incidental to the performance of other particular duties outside the UK."*

22. Consequently duties performed in the UK that are the same or similar in nature to those performed overseas are not merely incidental to the overseas duties, even if performed for only a very short time. They are, in Pennycuick's words, "precisely co-ordinate" and therefore of equal importance to the duties performed overseas.

Tax Bulletin 76

23. Inland Revenue published a Tax Bulletin article in April 2005 titled "Non-domiciled employees: dual contract arrangements" which referred to a range of issues relating to dual contract arrangements, including "merely incidental" duties and to the decision in *Robson v Dixon*.

24. TB76 explained that given the ease and speed of twenty first century communications, an employee who performs duties of one employment overseas and another in the UK, is liable to find it increasingly difficult whilst working in the UK to avoid performing substantive duties of their overseas employment. For example, HMRC take the view that an employee working in the UK under a UK contract to service the needs of UK clients, but also responsible under their overseas contract for servicing the business needs of overseas clients, who responds to a telephone call or email from an overseas client performs a substantive duty of the overseas employment. A response sent from the UK to an overseas client, is no different from a response sent from abroad to the same client. It represents a "precisely co-ordinate" duty.

Statement of Practice A10 – de minimis

25. In *Robson v Dixon*, Inland Revenue accepted that a landing in the UK caused by an emergency (e.g. due to weather conditions or mechanical trouble) might be

regarded as incidental to duties performed outside the UK.

26. After the decision was handed down, counsel for Robson asked if the de minimis principle could apply to one of the years under appeal in which Robson completed only one take-off and landing in the UK. Despite his decision that the test of "merely incidental" duties was one of quality and not quantity, Pennycuick agreed that this would be "proper" for a single event in a year. SP A10 was published in 1975 as a response to Pennycuick's comments.[40]

> *"Where only a single take-off and landing in this country occurred in a year, the Inland Revenue will normally disregard this on de minimis grounds in considering whether any duties were performed in this country."*

27.However, in another year, in which Robson performed four take-offs and landings in the UK (two for emergencies, plus two others for unspecified reasons) the Judge declined to accept the request for a de minimis exclusion.

Director - duties never merely incidental

28. The general principle in relation to a company director is that the management of a company is vested collectively in the board of directors. Therefore when a director attends a meeting of the board, HMRC takes the view that he or she performs a fundamental duty which is not "merely incidental" to other duties.

29. Consequently a director who in substance performs his duties overseas, except for visits to the UK to attend a meeting (whether as part of a formal board meeting or otherwise) cannot, in the view of HMRC, be within the exception in s39 [ITEPA]. Attendance at board meetings is part and parcel of a director's core duties and therefore if performed in the UK cannot be incidental to duties performed abroad. A director's attendance at other meetings (e.g. finance, strategy, personnel) is also likely to represent a substantive duty, because the director would not attend these meetings unless participation was deemed necessary.

[Para 30-32 discuss the former s.830 ITA; this concerns residence, not employment income.

Examples of duties that are "merely incidental"

33. To determine whether duties performed in the UK are "merely incidental" to duties performed overseas, it is necessary to consider both the nature of the duties performed in the UK and their relationship to the duties performed abroad.

34. Ultimately each case will depend on its particular facts but the types of activities, if performed in the UK in relation to the duties of an overseas employment, which can be regarded as "merely incidental" duties include –

- arranging meetings and business travel;
- feedback on employee performance and/or business results, if this does not involve the employee concerned in preparation or analysis whilst in the UK and as long as responsibility for these matters is not part of the employee's core duties of employment;
- input to team restructuring and staff matters, provided that the employee does not have a management role; and

[40] Author's footnote: SP A10 is now officially withdrawn; but there has been no announcement that HMRC adopt a different practice, and in view of its origin in the judge's comments, it is likely that it will continue. That will no doubt

- reading generic business emails that do not relate directly to the employee's role/responsibilities.

35. The examples below illustrate some situations where duties are regarded by HMRC as "merely incidental" -

A. A junior employee who works for an overseas subsidiary of a UK company who, on occasional visits to the UK headquarters, presents a report prepared by the overseas business to report on trade conditions or results overseas, and/or receive instructions for the next tour of duty overseas. The employee performs no other duties in the UK and has no control over the overseas activities on which he reports and is required only to pass on the report from his overseas employer and to take instructions from the UK company to take back to the overseas employer. These duties are regarded as "merely incidental" to his overseas duties.

B. An overseas employee visits the UK and whilst here arranges a meeting with a client overseas and the associated travel. As long as the employee does no more than arrange the meeting and travel, the duties performed are regarded as "merely incidental".

C. Whilst in the UK, an employee of an overseas subsidiary receives an email documenting the employer's global business results for the year. The employee is provided with the results for his information and is not required to take any further action or feedback to the sender of the email. The reading of such an email is "merely incidental" to those duties performed overseas. However, if the employee had any role or responsibility in producing the global results, and/or was involved in feedback or in confirming the results, reading the email is not a "merely incidental" duty.

Examples of duties that are not "merely incidental"

36. Types of activities performed by an employee that are not regarded as "merely incidental" duties include -

- instructions and/or guidance to colleagues and/or team members;
- work carried out on issues or projects that do not come to fruition;
- reporting on performance/business results where these matters are part of the employee's core duties;
- analysis of reports/information with the intention to produce results/recommendations that can be reported upwards in the organisation;
- preparation work carried out prior to discussions, meetings or presentations with customers/clients, colleagues, board members or shareholders and follow-up work after such discussions, meetings or presentations;
- discussions and meetings (including by telephone, teleconference or video conference) with customers/clients, colleagues, board members or shareholders; and
- applying generally expertise in any role or function which the employee is contracted to perform in his or her duties for the employer.

37. The examples below illustrate some situations where duties are not "merely incidental" -

A. A courier for a tour operator visits many countries in the course of the employment. Visits to the UK, however few and however short, are of the same nature to the job as visits to other countries and therefore cannot be "merely incidental".

B. Preparation in advance of a presentation to, and/or a meeting/discussion with, customers or potential customers, or actions subsequently which result from decisions taken in the presentation or meeting/discussion are not merely incidental to other duties, as preparation in advance and follow-up work afterwards are essential to an employee's effective participation in a presentation and/or meeting/discussion.

C. A company director, who works overseas for a UK based multinational company, usually participates by video conference in board meetings held each month in the UK. However, sometimes the director visits the company headquarters in the UK and attends in person at monthly board meetings. As attendance at board meetings is a core function and fundamental joint duty of a board of directors to manage the company, attendance at a board meeting cannot represent "merely incidental" duties, regardless of the fact that the director does not normally attend the meeting in person.

D. A company director who is resident in the UK has two directorships within the same overseas based group. One role is as CEO of the UK subsidiary and the other as a board member of the overseas parent company. The parent company's board meetings are held monthly in the overseas location and the director usually attends in person. However, sometimes he participates in the board meetings by telephone or video conference from the UK. As attendance at board/directors' meetings is a fundamental and joint duty of a board of directors to manage the company, participation from the UK in the parent's board meetings can not be "merely incidental" to duties performed overseas.

E. An employee of an international bank based in Frankfurt, visits a UK branch of the bank. Whilst in the UK branch, the employee responds to an investment enquiry sent by email from a customer of the bank in Germany. This represents a duty of his employment in Germany and by answering the email from the UK he performs a duty that is "precisely co-ordinate" with his duties in Germany. Consequently this cannot be a "merely incidental" duty.

Merely incidental duties: HMRC policy

38. Over more than half a century since the Royal Commission Report was published in 1955 and the introduction of the term "merely incidental" duties in FA1956, working arrangements have changed considerably.

39. At that time it was unusual for one employee to perform duties of two or more employments in different countries. Where such arrangements existed, there was likely to be a physical separation of duties between the two roles because of the restricted availability of effective international communications.

40. Clearly that is no longer the case but should the enormous advances in communications which allow an employee now to perform duties of an overseas employment and an UK employment consecutively, if not concurrently, be sufficient reason for HMRC to change its interpretation of, and policy for, "merely incidental" duties? The Royal Commission provided the example of a junior employee working in one country, returning to another country to report or to collect samples, as the type of duties that it considered should be "merely incidental". These duties would be still regarded as such today – see Example A in paragraph 35 above.

41. On the other hand, where duties performed in the UK are the same as, or

> similar to, duties performed overseas, they cannot be "merely incidental" because they are "precisely co-ordinate" duties.
> 42.HMRC accepts that it may be difficult in some circumstances for an employee to avoid performing co-ordinate duties unless, for example, the employee declines whilst in the UK to answer a mobile telephone, or respond to an email, from an overseas client.
> 43. However, to apply a broader interpretation of "merely incidental" to duties performed in the UK, than would apply otherwise to similar duties performed overseas, in HMRC's view would be not consistent with the Royal Commission in 1955, the case law in *Robson v Dixon* or the legislation.
> 44. Consequently HMRC does not believe there is good reason to revise its interpretation of"merely incidental" duties set out in the Tax Bulletin in 2005 and reiterated in this paper.

It is in practice just about impossible for a UK resident to satisfy the "incidental duties" requirement if it is understood in this way. Through the rigorous statutory interpretation of *Robson v Dixon,* HMRC have (more or less) achieved an arising basis for employment income which, in everyday language, is income of an overseas employment and so foreign income.[41]

This rule applies even though presence in the UK is due to Covid.[42]

If that is the policy, it would be sensible to repeal the COE remittance basis, which would be a simplification.

34.16.1 *Contract not to work in UK*

EIM formerly provided:

> **EIM77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [Nov 2019]...
> Where the commercial reality shows the existence of separate employment contracts, it is sometimes argued that contractual terms that prohibit the performance in the UK of duties connected with the business of the overseas employer, preclude HMRC offices from arguing that the employee has performed duties of the overseas employment in the UK. These arguments are based on the UK duties being "ultra vires".
> HMRC does not consider that the presence of such clauses allows the

[41] A similar process applied to bring foreign trading income on to the arising basis: see 21.4 (UK resident trader: IT). On the meaning of "incidental" see too *HMRC v Dolphin Drilling* [2024] EWCA Civ 1.

[42] ICAEW Taxguide 08/21 para 6.4 *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2021/taxguide-0821-covid-19-displaced-expatriate-employees.ashx*

> performance of duties in the UK that clearly benefit the overseas employer to be ignored. To that end, both employers ought to be closely monitoring the employee's UK activities. For example, where the employee has performed substantive duties in the UK that directly benefit the overseas employer, HMRC would expect the UK employer to mark the fact that the employee is effectively abusing its time and take appropriate disciplinary action. And if the UK work in question was valuable, the overseas employer should take it into account when calculating bonus entitlement. It is possible that clauses like this are frequently waived or ignored and may be inserted to create a misleading impression.

This is in principle correct. If the contact of employment formally prohibits UK work, but UK work is done, with the knowledge and tacit consent of the employer, then it is likely that the contract term has been varied by agreement of the parties, and so has no effect.

34.17 Dual contract arrangements

Unless the OWR remittance basis applies, all earnings from an employment with duties performed in and outside the UK are taxable on an arising basis. Prior to 2014, it was common for an employee in this situation to have two employment contracts:

(1) a contract covering the performance of duties in the UK and
(2) a contract covering duties performed outside the UK.

The intention was that earnings from employment contract (2) should be chargeable overseas earnings and therefore taxable on the remittance basis.

34.18 Dual-contract rule

FA 2014 introduced what I call the **"dual-contract rule"**. It will prevent use of dual contracts in most cases. This is perhaps why the lengthy discussion of dual contracts formerly in EIM77030 was withdrawn in 2016.

Development of the rule can be traced through draft legislation, together with a TIIN published in January 2014, but that is now of historical interest only.

HMRC have issued guidance **("HMRC dual-contract guidance")**.[43]

[43] Restrictions on the remittance basis – dual contracts (2014) *https://www.gov.uk/government/publications/remittance-basis-of-taxation-dual-contracts-restrictions-for-foreign-domiciled-employees*

34.18.1 *Relevant employer/employee; UK employment*

It is helpful first to deal with some straightforward definitions. Section 24A(4) ITEPA provides:

> In this section—
> (a) "the relevant employee" means the employee in respect of the relevant employment,
> (b) "the relevant employer" means the employer in respect of the relevant employment, and
> (c) "UK employment" means an employment the duties of which are not performed wholly outside the UK and "UK employer" is to be read accordingly...

34.18.2 *Dual-contract rule*

Section 24A(1) ITEPA provides:

> This section applies in relation to an employment ("the relevant employment") for a tax year ("the relevant tax year") if—
> (a) one or more of the paragraphs in subsection (5) applies,[44]
> (b) conditions 1 to 4 are met, and
> (c) condition 5 is not met.

I refer to **"dual-contract conditions 1 - 5"**.
Section 24A(2) ITEPA provides:

> The consequences of this section applying are set out in sections 23(1A), 41C(4A), 41H(5) and 554Z9(1A).

[44] This will normally be the case. Section 24A ITEPA provides:
(5) The paragraphs referred to in subsection (1)(a) are—
(a) general earnings from the relevant employment which are for the relevant tax year would, apart from section 23(1A) and Step 3 in section 23(3), be "chargeable overseas earnings" under section 23(3);
(b) employment income in respect of the relevant employment which is treated as accruing in the relevant tax year under section 41C(2) would, apart from sections 41C(4A), 41D and 41E, be "foreign" under section 41C(3);
(c) employment income in respect of the relevant employment which is treated as accruing in the relevant tax year under section 41H(2) would, apart from sections 41H(5), 41I and 41L, be "chargeable foreign securities income" under section 41H(3);
(d) section 554Z9(2) would, apart from section 554Z9(1A) and (4) and (5), apply to employment income in respect of the relevant employment which corresponds to the value of a relevant step, or a part of the value of a relevant step, which is "for" the relevant tax year as determined under section 554Z4."

The main rule is in s.23(1A) ITEPA which provides:

> But none of an employee's general earnings from an employment for a tax year are to be "chargeable overseas earnings" if section 24A applies in relation to the employment for the tax year.

This disapplies the remittance basis and brings the earnings back to the arising basis.

Section 24A(3) ITEPA provides a restriction relating to PAYE:

> But, for the purpose of determining if, and the extent to which, any provision of Part 11 (PAYE), or of PAYE regulations, applies in relation to any income, the application of any provision mentioned in subsection (2) in relation to the income is to be ignored.

34.18.3 *Condition 1: UK employment*

Section 24A(6) ITEPA provides:

> Condition 1 is that the relevant employee holds a UK employment—
> (a) at a time in the relevant tax year when the relevant employee also holds the relevant employment, or
> (b) if the relevant tax year is a split year as respects the relevant employee, at a time in the UK part of the relevant tax year when the relevant employee also holds the relevant employment.

34.18.4 *Cond. 2: Associated employer*

Section 24A(7) ITEPA provides:

> Condition 2 is that the UK employer is the same as, or is associated with, the relevant employer.

Section 24A(4) ITEPA provides:

> ...the rules in section 24(5) ("associated" persons) apply for the purposes of this section.[45]

34.18.5 *Cond. 3: Related employment*

The definition of related employment is wide and vague. Section 24A ITEPA provides:

> (8) Condition 3 is that the UK employment and the relevant employment are related to each other.

[45] See 34.21.1 (Associated employment).

> (9) Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies—
>
> (a) it is reasonable to suppose that—
>
> (i) the relevant employee would not hold one employment without holding the other employment, or
>
> (ii) the employments will cease at the same time or one employment will cease in consequence of the other employment ceasing;
>
> (b) the terms of one employment operate to any extent by reference to the other employment;

HMRC dual-contract guidance provides:

> **When might the terms of employments operate by reference to each other?**
> Employments might operate by reference to each other in lots of different ways, and will depend on the individual circumstances. You should take into consideration the terms of your employment contract, as well as the commercial reality of the relationship between your employments.
> For example, the contracts may take into account hours worked or leave taken under the other contract or may refer directly to duties performed under the other contract. There may be other circumstances in which the employments deal with the same customer or clients, so you will need to consider your individual circumstances.

Section 24A(9) ITEPA continues:

> Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...
>
> (c) the performance of duties of one employment is (wholly or partly) dependent upon, or otherwise linked (directly or indirectly) to, the performance of duties of the other employment;

HMRC dual-contract guidance provides:

> **How can the duties of different employments be linked?**
> Generally, employment duties will be linked where one employment's duties enables the other employment duties to be carried out. For example, where an individual carries out research under one

> employment, and under their other employment carries out marketing work made possible by the research. Duties of different employments may be linked in a number of different ways, and will depend on the facts of your individual circumstances.

Section 24A(9) ITEPA continues:

> Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...
> (d) the duties of the employments are wholly or mainly of the same type (ignoring the fact that they may be performed (wholly or partly) in different locations);

HMRC dual-contract guidance provides:

> **When might the duties of the employments be of the same type?**
> Where the duties of two or more employments are the same, but the client base or geographical location differs, the duties of the employments are of the same type. For example, marketing under a UK contract to UK clients has duties of the same type to an overseas contract involving marketing to clients in the rest of the world. There may be other circumstances in which the duties of the employments are of the same type, and you will need to consider your individual circumstances.

Section 24A(9) ITEPA continues:

> Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...
>
> (e) the duties of the employments involve (wholly or partly) the provision of goods or services to the same customers or clients;

HMRC dual-contract guidance provides:

> **When do employments deal with the same customer or clients?**
> The employments will deal with the same customer or clients where duties are performed in the provision of goods or services to the same customer or client. For example, if you give financial advice to a client under one employment and manage that client’s investments under another employment. This might apply equally to an individual client, a group of clients or a client base. There may be other circumstances in

> which the employments deal with the same customer or clients, and you will need to consider your individual circumstances.

Section 24A(9) ITEPA continues:

> Without prejudice to the generality of subsection (8), the UK employment and the relevant employment are to be assumed to be related to each other if one or more of the following paragraphs applies...
>
> (f) the relevant employee is—
>
> (i) a director (as defined in section 67) of the UK employer or the relevant employer who has a material interest (as defined in section 68) in the UK employer or the relevant employer,
>
> (ii) a senior employee of the UK employer or the relevant employer, or
>
> (iii) one of the employees of the UK employer or the relevant employer who receives the higher or highest levels of remuneration.

The term "senior employee" is not defined; it is a novel concept in tax law (or indeed in any area of the law). HMRC dual-contract guidance provides:

> **What does the term senior employee mean?**
> Whether you are a senior employee will depend on the facts of your case, taking into account your responsibilities and the size, nature and structure of your employer's organisation. HMRC will generally consider that employees involved in higher-level management and decision-making will be senior. For example, the following might be classed as activities of senior employees:
>
> - you are responsible for implementing higher-level or global business strategies
> - you participate in higher-level decision-making relating to management issues, finance, corporate restructuring or governance
>
> These indicators are not intended as a definitive list and you will need to consider your individual circumstances.
>
> **What does higher or highest paid mean?**
> The higher or highest levels of pay refers to the total pay from your UK and overseas employments, and whether your pay level is high relative to other employees in the same group of companies. There is no absolute level of pay that is relevant – rather it is a matter of comparing your overall remuneration from all your related employments to that of your

> fellow employees. HMRC considers that if you would be liable to tax at the additional rate on your combined pay (ignoring personal reliefs like donations to charities), it will be a good indication of an employee who is higher or highest paid. The UK additional rate of Income Tax is the highest rate for the tax year. Follow this link to see the UK's Income Tax rates and taxable bands. Pay includes any amounts which would constitute earnings, an amount treated as earnings or specific employment income.
>
> (10) In subsection (9)(f) references to the UK employer or the relevant employer include references to—
>
> (a) any person with which the UK employer or the relevant employer (as the case may be) is associated, and
>
> (b) if the UK employer or the relevant employer (as the case may be) is a company, the following companies taken together as if they were one company—
>
> (i) the UK employer or the relevant employer (as the case may be), and
>
> (ii) all the companies with which the UK employer or the relevant employer (as the case may be) is associated.

The statute includes a power to amend this by statutory instrument.[46] I am not sure if that is because the drafter did not have complete confidence in this definition, or to anticipate criticism as to its breadth. I do not expect that the power will ever be used.

It is hard to see that many, if any, dual contracts would not be caught by the dual-contract conditions 1 - 3.

34.18.6 *Cond. 4: 65% foreign tax credit*

Section 24A ITEPA provides:

> (13) Condition 4 is that X% is less than Y%.
>
> (14) "X%" is given by the following formula — (C÷I) × 100%
>
> See section 24B for the definitions of "C" and "I".
>
> (15) "Y%" is 65% of the additional rate for the relevant tax year.
>
> (16) The Treasury may by regulations amend this section so as to amend the definition of "Y%".

So we turn to s.24B ITEPA for the definitions of C and I. In short:

C is foreign tax **C**redit.

I is the dual-contract **I**ncome.

[46] Section 24A(11)(12) ITEPA.

In full detail, s.24B ITEPA provides:

> (1) This section applies for the purposes of section 24A(14).
> (2) "C" is the total amount of credit which would be allowed under section 18(2) of TIOPA 2010 (double taxation relief by way of credit) against income tax in respect of all the employment income falling within section 24A(5)(a) to (d) were none of that income to be, as relevant—
> (a) "chargeable overseas earnings",
> (b) "foreign",
> (c) "chargeable foreign securities income", or
> (d) income to which section 554Z9(2) applies.
> (3) For this purpose, assume—
> (a) that all relief is claimed within the applicable time limit given by section 19 of TIOPA 2010, and
> (b) that all reasonable steps are taken to minimise any amounts of tax payable as mentioned in section 33 of that Act.
> (4) "I" is the total amount of all the employment income falling within section 24A(5)(a) to (d).

This takes out cases where the foreign tax rate is 65% × 45% = 29.25%. The effective overseas tax rate will be lower than the headline rate and in practice I expect that few arrangements will be excluded by this condition.

HMRC dual-contract guidance provides a straightforward worked example:

Overseas employment income for duties in country Z	£500,000
Country Z tax paid on overseas employment income for duties in country Z (Foreign Tax Credit Relief)	£120,000
Effective rate of country Z tax £120,000 / £500,000 × 100%	24% (X%)
UK additional rate	45%
UK additional rate × 65%	29.25% (Y%)

As X% is less than Y% Condition 4 is met.

CIOT commented:

> There will also be timing issues in regard to working out available foreign tax credits and in allowing sufficient time for amendments to Self-Assessment returns. In particular, if the arising basis is used on a return and later on it is determined that the remittance basis could be claimed, eg because the final foreign tax credit proves to be higher than expected (which given that the UK and overseas territories will not have coterminous tax years could take a couple of years or so to determine)

then might not the taxpayer out of time to amend their return?[47]

HMRC dual-contract guidance provides:

> **What if I do not know the foreign tax amount when I have to submit my UK Self Assessment tax return?**
> Different tax laws in overseas territories may mean that you have to file a provisional UK tax return based on expected overseas taxes. When the actual amount of foreign tax is known you should submit an amended Self Assessment return, if necessary. You must do this within 12 months of the 31 January that follows the tax year in question.
> **What should I do if I have paid too much or too little tax to the foreign tax authorities?**
> You must tell HMRC as soon as possible so that any under or overpayment of UK Income Tax can be corrected.
> **What should I do if I have paid the Remittance Basis Charge but my overseas employment income becomes taxable on the arising basis?**
> If you are within the time frame to amend your return you may withdraw your claim to the remittance basis.

34.18.7 *Cond. 5: Offshore work*

Section 24A(17) ITEPA provides:

> Condition 5 is that—
>
> (a) were the duties of the relevant employment to be duties of the UK employment instead, all or substantially all of them could not lawfully be performed in the relevant territory (whether on the meeting of any condition or otherwise) by virtue of any regulatory requirements imposed by or under the law of that territory, and
>
> (b) were the UK duties of the UK employment to be duties of the relevant employment instead, all or substantially all of them could not lawfully be performed in the part of the UK in which they are performed (whether on the meeting of any condition or otherwise) by virtue of any regulatory requirements imposed by or under the law of that part of the UK.
>
> (18) In subsection (17)—
>
> "the relevant territory" means the territory in which the duties of the relevant employment are performed, and
>
> "UK duties" means duties performed in the UK.

[47] CIOT, "Artificial use of dual contracts by non-domiciles: Response" (2014).

HMRC dual-contract guidance provides:

> Examples of regulatory requirements include:
>
> - in order to get a work permit in some countries, you have to have an employment contract in that country
> - in order to provide certain types of financial services in the UK, you have to be employed by a person authorised by the Financial Conduct Authority

34.18.8 *Dual-contract rule: Critique*

ICAEW stated:

> Given that internationally mobile senior employees are the decision makers in a multi-national organisation targeting them in this manner could have significant long term implications for the competitiveness of the UK.[48]

The dual-contract rule was introduced on the grounds that dual contracts were (in general) artificial. One might debate whether that is so. But the policy issue is, or should be, not whether dual contracts are artificial, but what inducements the UK should offer for foreign domiciliaries to reside in the UK. The purpose of the remittance basis is to make the UK an attractive place for foreign domiciliaries to reside and to work.

I suspect there has been an inconsistency in government policy here. Those responsible for the HMRC dual-contracts paper in 2012 had little or no sympathy with the government policy decision in 2008 to accept and retain the principle of the remittance basis; so they sought to adopt as strict an interpretation of the law as was possible. When that statement did not produce the desired effect of preventing dual-contracts, this school of thought succeeded in introducing the s.24A dual-contract rule, which did. But there it is.[49]

34.19 Dual contract outside s.24A rule

In cases where the dual-contract rule does not apply, HMRC may attack the planning in the following ways:

(1) That what purport to be two contracts of employment are in fact only

[48] TAXREP 14/14.

[49] I discussed this topic at greater length in the 14th edition of the work para 22.16.9, but omit that now as it has become of historical interest only; there seems little current prospect of reform.

one contract of employment, of which some duties are performed in the UK.

(2) Some duties of the overseas employment are performed in the UK

(3) Incorrect apportionment of earnings between the two employments

Points (1) and (2) were formerly discussed at some length in EIM77030, parts of which were doubted in former editions of this work.[50] HMRC may have agreed, as the passage is now withdrawn. In brief:

(1) Whether there is one or two contracts of employment is a question of contract/employment law, and should not be a problem if the matter is properly documented.

(2) Whether duties are performed in the UK, depends on the terms of the employment contracts, and other facts.

There remains a legacy of pre-2014 dual contract arrangements currently being negotiated with HMRC.

34.19.1 *Record keeping*

The HMRC dual-contracts paper provides:

> 4. For the purpose of enquiries into dual contract arrangements, HMRC considers it is reasonable to require access to the following documents, for some or all of the period under review:
> - diaries
> - emails
> - expenses claims and supporting receipts
> - telephone records
> - client files.
>
> 5. A document means anything in which information of any description is recorded. This includes records held on a computer, on magnetic tape, optical disk (CD-ROM/DVD), hard disk, memory stick, flash drive, floppy disk or other recording media.
>
> 6. Where such records are in the possession of the employee, HMRC would expect the individual to comply with Section 12B TMA 1970 and retain any documents or information that would have enabled him or her to deliver a complete and correct return, until the later of either the closure of the enquiry window or, if applicable, the date an enquiry into the return is closed.

Section 12B(1) TMA provides:

[50] See the 14th edition (2015/16) para 22.15 (dual contract arrangements).

> Any person who may be required by a notice under section 8, 8A or 12AA of this Act to make and deliver a return for a year of assessment or other period shall—
>
> (a) keep all such records as may be requisite for the purpose of enabling him to make and deliver a correct and complete return for the year or period; and
>
> (b) preserve those records until the end of the relevant day ...

HMRC continue:

> 7. However where the employee does not have power or possession of the documents, HMRC will consider approaching the employer for the records they hold.
>
> 8. HMRC has sometimes experienced difficulty in obtaining documents which have not been retained by the employer. In a spirit of collaborative engagement HMRC asks all employers who utilise dual contract arrangements to implement a retention policy that will retain relevant documents for at least two years from the end of the tax year to which the document relates.
>
> 9. HMRC has also sometimes experienced difficulties in obtaining documents which have been retained by the employer or the employee. HMRC will not hesitate to use the powers in Schedule 36 FA 2008 to require production of documents. Where the individual is employed by an overseas employer and the information is not available to the individual, HMRC will make full use of Exchange of Information powers with the relevant overseas authorities.
>
> **Multiple risks**
>
> 10. HMRC will address all avenues of enquiry into dual contract arrangements (e.g. those relevant to both employee and employer) as equal risks from the outset of the enquiry; no risks will be deferred pending the outcome of enquiries into others. This should serve to mitigate some of the delays and other problems sometimes faced in obtaining the relevant records.

34.19.2 *Dual contract: Disclosure*

The HMRC dual-contracts paper provides:

> **Self Assessment**
>
> 11. An employee who has dual (or multiple) contracts of employment is required to complete a separate Employment page of the Self Assessment Tax Return for each employment, as specified at page EN1 of the Tax Return Guide [now page EN 1 of the Employment Notes 2016/2017].

34.19.3 *Implications for employer*

The employer will need to consider the following points before entering into dual contract arrangements:

(1) Deductibility: Is the cost of remunerating the individual under the contract for overseas duties effectively borne by a UK company and can it be claimed as a deduction for Corporation Tax?

(2) CFC and transfer of income abroad issues: Do the individual's activities under the contract for overseas duties generate income, and if so to whom does it accrue? Is income which would otherwise accrue to a company liable to Corporation Tax being routed to an overseas company?

(3) Transfer pricing: If the profits of a company within Corporation Tax are computed on a cost plus basis, are the costs being depressed by reason of the split employment?

34.20 Dual-contract apportionment

Section 24 ITEPA prevents an unreasonable attribution of income between the two employments in favour of the foreign employment. I refer to this as the **"dual-contract apportionment rule")**. It can only arise where the dual-contract rule does not apply, so it now has a relatively small role, but I discuss it here for completeness.

Section 24(1) ITEPA provides:

> This section imposes a limit on how much of an employee's general earnings are chargeable overseas earnings for a tax year under section 23 if—
>
> (a) in that year the employee holds
>
> [i] associated employments as well as
>
> [ii] the employment to which subsection (2) of that section applies ("the relevant employment"), [ie an employment which gives rise to chargeable overseas earnings, taxable on the remittance basis]
>
> (b) the duties of the associated employments are not performed wholly outside the UK.

34.20.1 *Overseas earnings limit*

Assuming the conditions of s.24(1) are met, we move on to s.24(2) ITEPA which sets out the limit on chargeable overseas earnings:

> The limit is the proportion of the aggregate earnings for that year from all the employments concerned that is reasonable having regard to—

> (a) the nature of and time devoted to each of the following—
> (i) the duties performed outside the UK, and
> (ii) those performed in the UK, and
> (b) all other relevant circumstances.

Section 24(3) ITEPA defines "aggregate earnings":

> For the purposes of subsection (2) "the aggregate earnings for a year from all the employments concerned" means the amount produced by aggregating the full amount of earnings from each of those employments for the year mentioned in subsection (1) so far as remaining after subtracting any amounts of the kind mentioned in step 2 in section 23(3).

Section 24(7) ITEPA provides:

> If an amount of chargeable overseas earnings is reduced under step 3 in section 23(3) as a result of applying any limit imposed by this section, the amount of general earnings corresponding to the reduction remains an amount of general earnings within section 15(1).

Of course, even in a case where the conditions of s.24(1) are not met, HMRC may in an appropriate case be able to say that sums which are purport to be earnings are in fact something else.

34.21 *Split year*

Section 24(2A) ITEPA provides:

> If the tax year is a split year as respects the employee, subsection (2) has effect as if for "the aggregate earnings for that year from all the employments concerned" there were substituted "so much of the aggregate earnings for that year from all the employments concerned as is attributable to the UK part of that year".

Amended as s.24(2A) directs, s.24(2) reads:

> The limit is the proportion of ~~the aggregate earnings for that year from all the employments concerned~~ so much of the aggregate earnings for that year from all the employments concerned as is attributable to the UK part of that year that is reasonable having regard to—
> (a) the nature of and time devoted to each of the following—
> (i) the duties performed outside the UK, and
> (ii) those performed in the UK, and
> (b) all other relevant circumstances.

Section 24(3A) ITEPA provides:

> Any attribution required for the purposes of subsection (2A) is to be done on a just and reasonable basis.

34.21.1 *Associated employment*

The definition of associated employment matters for the s.24A dual-contract rule, as well as for the dual-contract apportionment rule.

Section 24 ITEPA provides:

> (4) In this section—
> (a) "the employments concerned" means the relevant employment and the associated employments;
> (b) "associated employments" means employments with the same employer or with associated employers.
>
> (5) The following rules apply to determine whether employers are associated—
>
> *Rule A* An individual is associated with a partnership or company if that individual has control of the partnership or company.
>
> *Rule B* A partnership is associated with another partnership or with a company if one has control of the other or both are under the control of the same person or persons.
>
> *Rule C* A company is associated with another company if one has control of the other or both are under the control of the same person or persons.
>
> (6) In subsection (5)—
> (a) in rules A and B "control" has the meaning given by section 995 of ITA (in accordance with section 719 of this Act), and
> (b) in rule C "control" means control within the meaning given by sections 450 and 451 of CTA 2010 (meaning of expressions relating to close companies).

34.22 Overseas Workday Relief

This section considers the second of the two remittance bases which may apply to UK resident foreign domiciled employees.[51] HMRC call this **"Overseas Workday Relief"**. That label is not particularly apt, though the number of overseas workdays will generally be a relevant matter. I use the term **"OWR remittance basis"**. I refer to those who qualify for the relief as **"OWR Employees"**.

The development of the relief can be traced in the residence consultation

[51] See 34.8 ("Taxable earnings").

papers[52] but that is now of historical interest only.

HMRC have issued guidance in RDR4.[53]

The OWR remittance basis does not require a specific claim or election,[54] but where the relief applies the individual must tick box 2 in SA109 (Residence, remittance basis etc) (2022/23). The rubric to this box provides: "If you are eligible for Overseas Workday Relief... put 'X' in the box." The individual must also claim the remittance basis.

Where OWR is available, it may be better to be an employee than a self-employed sole trader, where there is no equivalent relief.

34.22.1 *OWR remittance basis*

Section 26(1) ITEPA provides:

> This section applies to general earnings for a tax year where
> [i] section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and
> [ii] the employee meets the requirement of section 26A [recent arrival] for that year,
> if the general earnings meet all of the following conditions—
> (a) they are neither—
> (i) general earnings in respect of duties performed in the UK, nor
> (ii) general earnings from overseas Crown employment subject to UK tax,[55] and
> (b) if the tax year is a split year as respects the employee, they are attributable to the UK part of the year.

Statute frequently refers to:

> general earnings within section 26(1) of ITEPA

[52] See 6.1 (Concepts of residence).

[53] HMRC "Guidance Note: Overseas Workday Relief" *https://www.gov.uk/government/publications/rdr4-overseas-workday-relief-owr/overseas-workday-relief-rdr4*

[54] The EIM recognises this:
EIM77020: General earnings in respect of duties performed in the UK [May 2020]
Although the amount that is not taxable is sometimes referred to as "overseas workday relief", it is not a statutory relief from tax subject to the claims machinery in Section 42 TMA 1970.

[55] See 34.40 (Overseas Crown employment).

On one occasion this is abbreviated to "section 26(1) earnings." For clarity I gloss this as **"OWR earnings"**.

Section 26(2) ITEPA provides the remittance basis for OWR earnings:

> The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

Section 26(6) ITEPA provides:

> Section 15(1) does not apply to general earnings within subsection (1).

Thus OWR earnings are taken from the arising basis (s.15) and moved the remittance basis; so earnings which do not qualify for OWR remittance basis continue to fall under the s.15 arising basis.

In short, a remittance basis taxpayer who qualifies for OWR remittance basis pays tax:

(1) on an arising basis on general earnings in respect of duties performed in the UK; and
(2) on a remittance basis on other earnings.

If the s.26A requirements (recent arrival) are met, it is easier to qualify for OWR than the COE remittance basis:

(1) It is not necessary to have a foreign employer
(2) It is not necessary that duties are performed *wholly* outside the UK

Much of the wording of the OWR remittance basis repeats that found in the COE remittance basis; so the reader is referred back to 34.13 (COE remittance basis).

See too 34.23 (OWR mixed fund rule).

34.22.2 *s.26A conditions: 3-year cap*

Section 26A ITEPA provides:

> (1) An employee meets the requirement of this section for a tax year if the employee was—
> (a) non-UK resident for the previous 3 tax years, or
> (b) UK resident for the previous tax year but non-UK resident for the 3 tax years before that, or
> (c) UK resident for the previous 2 tax years but non-UK resident for the 3 tax years before that, or
> (d) non-UK resident for the previous tax year, UK resident for the tax year before that and non-UK resident for the 3 tax years

> before that.
>
> (2) The residence status of the employee before the 3 years of non-UK residence is not relevant for these purposes.

Statute frequently refers to:

> the requirement of section 26A

For clarity I gloss this as [recent arrival].

If someone who has never been in the UK comes to the UK and remains:

Year	**Qualifies**	**s.26A(1) para**
1 (year of arrival)	Yes	(a)
2	Yes	(b)
3	Yes	(c)
4	No	-

That applies even if year 1 (or year 4) is a split year.

RDR4 provides:

> 6. The number of tax years you can be eligible for OWR in your lifetime is not limited. As long as there's a period of three consecutive tax years where you weren't resident in the UK, you may be eligible for OWR even if you've already previously benefited from the relief.

That all seems quite straightforward, but RDR4 gives four examples to hammer the points home. I think they can be conveniently summarised in a table:

	A		**B**		**C**		**D**	
Year	*Resid*	*OWR*	*Resid*	*OWR*	*Resid*	*OWR*	*Resid*	*OWR*
2010/11-2012/13	NR	n/a	NR	n/a	R in 2010/11		NR	n/a
2013/14	Split R	Yes	NR	n/a	Split R	No	R	No*
2014/15	R	Yes	R	Yes	R	No	NR	n/a
2015/16	R	Yes	R	Yes	R	No	Split R	Yes
2016/17	R	No	R	Yes	R	No	R	No
2017/18	NR	n/a	NR	n/a	NR	n/a	R	No

Key: R: Resident
NR: Non-resident
Spilt R: Split resident year
* *does not claim remittance basis*

> **Example 1 (Abdul)**
>
> A arrives in the UK on 1 February 2014 to begin a work secondment. He hasn't previously been to the UK and so has not been resident here before. He leaves the UK on 5 April 2017.
>
> Under the SRT, A is resident in the UK for the tax year 2013 to 2014 and

> is eligible for split year treatment. The UK part of his split year begins on 1 February 2014.
>
> A is also resident in the UK for the tax years 2014 to 2015, 2015 to 2016 and 2016 to 2017. He claims the remittance basis of taxation for the tax years 2013 to 2014, 2014 to 2015, 2015 to 2016 and 2016 to 2017. He isn't resident in the UK for the tax year 2017 to 2018.
>
> A's foreign earnings for 2013 to 2014 (from 1 February 2014), 2014 to 2015 and 2015 to 2016 are eligible for OWR and are only taxable in the UK if and when they're remitted to the UK. In 2016 to 2017 A isn't eligible for OWR as he's received the relief in the three preceding tax years. As such his foreign earnings for 2016 to 2017 are fully taxable in the UK.
>
> Provided A remains not resident in the UK for three consecutive tax years following 2016 to 2017 he may be eligible for OWR again from the 2020 to 2021 tax year.

A would have done better to postpone his arrival so he did not become resident until 2014/15; then he would qualify for OWR remittance basis in 2016/17. HMRC quietly make the point in example 2:

> **Example 2 (Burril)**
>
> B arrives in the UK on 1 March 2014 to begin a work secondment. He hasn't been to the UK previously and so has not been resident here. He leaves the UK on 5 April 2017.
>
> He is not resident in the UK under the SRT for the tax year 2013 to 2014. He's resident in the UK for the tax years 2014 to 2015, 2015 to 2016 and 2016 to 2017. He claims the remittance basis of taxation for the tax years 2014 to 2015, 2015 to 16 and 2016 to 2017. He isn't resident in the UK for the tax year 2017 to 2018.
>
> B's foreign earnings for 2014 to 2015, 2015 to 2016 and 2016 to 2017 are eligible for OWR and are only taxable in the UK if and when they are remitted to the UK.
>
> Unlike A, B isn't resident in the UK in 2013 to 2014 (the tax year in which his UK secondment commenced). B is therefore eligible for OWR for 2016 to 2017 because this is the third year for which he is UK resident.
>
> Provided B remains not resident in the UK for three consecutive tax years following 2016 to 2017 he may be eligible for OWR from the 2020 to 2021 tax year.
>
> **Example 3 (Colar)**
>
> C arrives in the UK on 1 February 2014 to begin a work secondment. He's previously been resident in the UK. He ceased to be resident in the

> UK on 5 April 2011.
> He was not resident in the UK for the tax years 2011 to 2012 and 2012 to 2013. He leaves the UK on 5 April 2017.
> He's resident in the UK for the tax year 2013 to 2014 under the SRT and is eligible for split year treatment. The UK part of his split year begins on 1 February 2014.
> He's resident in the UK for the tax years 2014 to 2015, 2015 to 2016 and 2016 to 2017. He claims the remittance basis of taxation for the tax years 2013 to 2014, 2014 to 2015, 2015 to 2016 and 2016 to 2017. He is not resident in the UK for the tax year 2017 to 2018.
> C has not been non-resident in the UK for three consecutive tax years immediately prior to his secondment to the UK. He's not eligible for OWR for 2013 to 2014, 2014 to 2015, 2015 to 2016 or 2016 to 2017. If he remains not resident in the UK for three consecutive tax years following 2016 to 2017 he may be eligible for OWR from the 2020 to 2021 tax year.

C would have done better to postpone his arrival so as to become resident in 2014/15. In that case he would have qualified for OWR.

The last example concerns an employee who does not claim the remittance basis. The point is that a failure to claim the remittance basis in one year does not allow an extension of the OWR remittance basis in a later year:

> **Example 4 (Drey)**
> D is employed by a US company and has visited the company's group office in the UK on short business projects on a number of occasions in each of several tax years prior to 2013 to 2014. He has not been UK resident prior to 2013 to 2014.
> In 2013 to 2014 D works on a short business project in the UK and is resident for the year under the SRT. He has further business visits to the UK during 2014 to 2015 but is not resident in the UK for that year. He's seconded to work at the company's group office in the UK for three years from 1 May 2015. D leaves the UK on 5 April 2018.
> D is resident in the UK for the tax year 2015 to 2016 and is eligible for split year treatment. The UK part of his split year begins on 1 May 2015. He is resident in the UK for the tax years 2016 to 2017 and 2017 to 2018. He does not claim the remittance basis of taxation for 2013 to 2014. He claims the remittance basis of taxation for 2015 to 2016, 2016 to 2017 and 2017 to 2018.
> In 2013 to 2014 D was not eligible for OWR because, even though he wasn't resident in the UK for the three previous consecutive tax years, he

> hadn't claimed the remittance basis of taxation for that year.
> D's foreign earnings for (the UK part of) 2015 to 2016 are eligible for OWR because 2015 to 2016 is one of three tax years immediately following three consecutive tax years for which he was not resident.
> His earnings for 2016 to 2017 and 2017 to 2018 are not eligible for OWR because neither year is one of three tax years immediately following three consecutive tax years for which he was not resident.

34.22.3 *Split years*

RDR4 provides:

> 7. Where the tax year for which OWR applies is a split year for you, OWR will only apply to foreign earnings which relate to the UK part of the year. For these purposes it doesn't matter whether the year is split into a UK part and then an overseas part of the year or the other way round.
> 8. Where the tax year for which OWR applies isn't a split year, OWR will apply to foreign earnings relating to duties in any part of that tax year.

This sets out the rules in s.26 ITEPA.

> 9. OWR doesn't apply to earnings which relate to duties you perform overseas in the overseas part of a split year. Such earnings aren't taxable in the UK, even if they're remitted. Earnings which relate to duties you perform in the UK in the overseas part of a split year are taxable in full unless they're exempt from UK tax under the terms of a Double Taxation Arrangement.
> 10. OWR doesn't apply to earnings which relate to duties you perform overseas in a tax year for which you're not resident in the UK. Such earnings aren't taxable in the UK, even if they're remitted. Earnings which relate to duties that you perform in the UK in a tax year for which you're not resident in the UK are taxable in full unless they're exempt from UK tax under the terms of a Double Taxation Arrangement.

34.22.4 *Earnings the year is "for"*

RDR4 provides:

> 12. Earnings are usually received shortly after you earn them. However you may receive some earnings in a year, such as a bonus, which is for an earlier period because it relates to duties you performed in that period.
> 13. You may perform duties in one tax year but receive some of the earnings for those duties in a later tax year. Or you may perform duties

> in an overseas or UK part of a split year, but receive payment in the other part of the split year (UK or overseas), or indeed in another tax year altogether.
>
> 14. It's your circumstances in the period that the earnings are for that determine your eligibility to OWR in relation to those earnings, and not, if they're different, your circumstances in the year you receive them.
>
> 15. The following examples demonstrate how the rules apply in practice. In each example, unless otherwise stated, the individual is not domiciled in the UK throughout the period and performs employment duties partly in the UK and partly overseas.
>
> **Example 5 (Drey)** [This continues on from example 4 above]
> In January 2017 D receives his 2016 performance bonus which is in respect of his duties throughout the calendar year 2016.
> He isn't eligible for OWR for 2016 to 2017 when he receives his bonus but as part of it was earned in respect of duties performed in 2015 to 2016, that part is eligible for OWR.

See 34.10 (Earnings "for" tax year).

34.22.5 *Deemed domicile/OWR interaction*

A deemed domiciled individual cannot claim the remittance basis and cannot claim OWR. RDR4 gives 2 straightforward examples:

> **Example 10** (Guy)
> G arrives in the UK on 6 August 2017. He performs his duties partly in the UK and partly abroad, and he claims OWR.
> G leaves the UK on 2 September 2020, having claimed OWR for 2017 to 2018, 2018 to 2019 and 2019 to 2020. He cannot claim OWR for 2020 to 2021, the year of his departure (OWR is only available for the first 3 years).
> G remains overseas for the following 3 full UK tax years – 2021 to 2022, 2022 to 2023 and 2023 to 2024, and returns to the UK on 8 July 2024. He claims OWR for the next 3 years, and leaves the UK on 10 August 2027.
> If G continues his pattern of working both overseas and in the UK indefinitely the maximum number of years G will be resident in the UK in any 20 year period is 12 years and so he will never meet Condition B of the deemed domicile legislation [15-year rule].
>
> **Example 11** (Francoise)
> F was born in the UK with a UK domicile of origin.
> F moved to New Zealand with her family at age 14 and acquires a

domicile of dependency there which became a domicile of choice. She doesn't return to the UK until 12 October 2015 when she is 24 and takes up employment based partly in the UK and partly in Germany.

F meets the pre 6 April conditions for claiming OWR, and claims it for the 2015 to 2016 tax year (a split year), the 2016 to 2017 tax year (year of arrival plus 1).

However due to the changes applicable from the 6 April 2017 F will not be able to claim OWR for 2017 to 2018. She meets Condition A of Section 835BA, and will be treated as deemed domicile from 6 April 2017. She cannot therefore claim remittance basis and so fails the conditions necessary to make a valid claim to OWR.

F will be taxable for both those duties performed in the UK and those in Germany, in the UK from 6 April 2017.

34.23 OWR mixed funds

This section considers the position where:

(1) An OWR Employee receives earnings for duties performed partly in and partly out of the UK
(2) The earnings are received abroad

The earnings constitute a mixed fund consisting of:

(1) Earnings taxed on an arising basis under s.15 ITEPA
(2) Earnings taxed on the remittance basis under s.26 ITEPA ("OWR earnings")

Under the usual mixed fund rules, in short:[56]

(1) s.15 earnings (UK earnings, mixed fund category (a)) are remitted before s.26 earnings (OWR earnings, mixed fund category (b)); but
(2) Later years' earnings are remitted before earlier years

So employees who wish to avoid taxable remittances would generally need:

(1) to pay each year's earnings in a separate account and
(2) not remit more than the UK earnings in that account

In the past, relief was allowed by concession. After consultation and response papers[57], FA 2013 introduced a statutory rule. This was slotted

[56] See 20.1 (Mixed funds: Introduction).

[57] HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (2011). HMRC, "Legislation of Statement of Practice 1/09 (SP1/09): summary of responses and draft legislation" (2012).

in after s.809R, so the provisions are numbered s.809RA - 809RD ITA. The heading to s.809RA is "Special mixed fund rules" but for clarity I prefer the term **"OWR mixed fund rules"**.

Section 809Q(1A) ITA provides:

> But this section must be read subject to section 809RA.

Thus the OWR mixed fund rules have priority over the normal mixed fund rules.

HMRC have issued 11 pages of guidance under the title FAQs; ("**OWR mixed fund FAQs**").[58]

34.24 OWR: Qualifying account

The OWR mixed fund rules apply to payments out of a qualifying account and it helpful to consider this concept first.

Claire Lillie reports:

> We have seen a lot of recent focus from HMRC on SMF account eligibility, particularly around whether qualifying criteria for the SMF account is maintained, and there has been little leniency from HMRC when individuals do not carefully follow SMF conditions. Some recent examples of HMRC challenges have been regarding the correct nomination of the SMF account in the tax return (which must be done by the normal filing date without extension for the amendment window) and a focus on prohibited sums being deposited to the SMF account (without corrective action being taken) during the qualifying period. Given the popularity of reliance on SMF conditions applying, it is important that both individuals and advisors remain vigilant of the rules, and for the qualifying status of the account to be regularly reviewed.[59]

The starting point is that an individual may nominate their qualifying account. Section 809RB ITA provides:

https://www.gov.uk/government/consultations/reform-of-the-taxation-of-non-domiciled-individuals

HMRC, "Legislation of Statement of Practice 1/09 (SP1/09): second summary of responses and draft legislation" (2013)

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/88349/09__-_Second_Summary_of_responses.pdf

[58] Issued July 2013, updated October 2013 [2013] STI Issue 40 (10 Oct 2013) *https://www.gov.uk/government/publications/residence-domicile-and-remittance-basis-rules-uk-tax-liability*

[59] Tax Journal, 5 July 2019.

> (1) An individual may by notice to the Commissioners nominate an account to be a qualifying account of the individual for the purposes of section 809RA.
> (2) The notice must specify the qualifying date for the account.

34.24.1 *How to nominate*

Nomination is a formal matter. Section 809RB(7) ITA provides:

> A notice under subsection (1) or (6) must be in writing and include such information as the Commissioners may reasonably require.

OWR Mixed Fund FAQs provide:

> **How do I tell HMRC which account is my qualifying account?**
> You can notify HMRC which account was your qualifying account for the tax year in the whitespace notes of your tax return. Where you have changed qualifying accounts part way through the year, you must include details of all qualifying accounts which you have used during the year. You will need to set out which accounts you have used as qualifying accounts for the tax year and the dates on which each account was a qualifying account.

34.24.2 *"Qualifying date"*

The concept of qualifying date is relevant for several purposes:

(1) It is the date from which the account is a qualifying account
(2) It is a date on which various conditions must be satisfied
(3) It is relevant to the time limit for nominating an account

Section 809RB ITA provides:

> (3) "The qualifying date" for the account is the first date on which there is paid into the account sums falling within subsection (4) which (in total) are more than £10.
> (4) A sum falls within this subsection if it is, or derives wholly (whether directly or indirectly) from, general earnings of the individual from an employment for a tax year which is a relevant tax year in relation to the employment.

Section 809RB(5) ITA defines "relevant tax year":

> A tax year is a "relevant" tax year in relation to an employment if the general earnings which the individual has for the tax year from the employment include both
> [a] general earnings within section 15(1) of ITEPA 2003 [UK earnings] and

> [b] general earnings within section 26(1) of that Act [OWR earnings].

34.24.3 *Change of nomination*

The nomination may be changed. Section 809RB(6) ITA provides:

> The individual may withdraw the nomination by giving a further notice to the Commissioners, specifying the date with effect from which the nomination is withdrawn.

A new account can then be nominated.

OWR mixed fund FAQs provides:

> ***Can an account that has been my qualifying account in the past be my qualifying account again in the future?***
> If an account has been your qualifying account in the past but then ceased to be your qualifying account for whatever reason, it cannot later be used as your qualifying account again. This is because an account can only become a qualifying account on its "qualifying date". An account can only have one qualifying date, and so cannot become a qualifying account a second time. ...
> Note that you may use the same qualifying account from one year to the next - a qualifying account does not automatically cease to be a qualifying account at the end of the tax year.

34.24.4 *Time limit for nomination*

There are time limits for:

(1) Nominating a qualifying account
(2) Withdrawing a nomination

Section 809RB(8) ITA provides:

> A notice under subsection (1) or (6) must be given no later than—
> (a) 31 January in the tax year following the tax year in which falls, as the case may be—
> (i) the qualifying date for the account, or
> (ii) the date with effect from which the nomination is withdrawn, or
> (b) such later date as the Commissioners may allow.

OWR mixed fund FAQs provides:

> ***What happens if I arrive and become resident in the UK part way through the tax year?***
> If, part way through the tax year you become UK resident for that year,

> you will need to consider whether the qualifying date for the account that you wish to nominate as your qualifying account has already passed. This might be the case if, for example, you are continuing the same employment that you had prior to becoming resident and your salary prior to that date was being paid into that account.
> If the qualifying date for an account has passed you will have to nominate a different account as your qualifying account.

HMRC say:

> *Please can HMRC explain the circumstances in which a late nomination for a Special Mixed Fund will be accepted as valid? Could HMRC be more flexible on this matter for tax years prior to 2018-19 given the requirement to nominate only came in with effect from 2013-14?*
> 5.2 HMRC explained this has been checked with technical colleagues locally. Notification should be made to the Commissioners by 31 January following the end of the tax year. The Commissioners take into account factors in SACM10040 in regard to the acceptance of a late claim. HMRC does not anticipate flexibility on the date of accepting a late notification. Exceptional circumstances are detailed in the Claims manual, however HMRC doesn't envisage circumstances other than being incapacitated by illness or accident.
> 5.3 If there is no acceptance of a late notification, HMRC expect a consequential claim to be made via S43A TMA 1970 and S36(2) TMA1970. To be accepted, the claimant (and anyone representing them) would have to demonstrate that they took reasonable care (as S43C restricts any claims if an individual or their representative has been careless). This is the current approach, and HMRC do not see any flexibility in regard to years prior to 2018-19.[60]

There was a small Covid-related extension for returns for the year 2019/20 (due by 31 January 2021):

> 5.1 ... the SA Filing deadline remained as 31 January 2021 for the 2019-20 tax returns. However, the £100 late filing penalty was not chargeable on any tax returns filed on or before 28 Feb 21.
> 5.2 HMRC advised that following this easement, it received some queries related to the late filing of returns and their contents.
> 5.3 One query was around the nomination of a qualifying special mixed

[60] Joint Expatriate Forum on Tax and NICs (April 2019) *https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions*

> fund account (S809RB(8)(b)ITA2007) which are usually made on the SA Return and need to be nominated by 31 January (or a date by which the Commissioners can allow). HMRC confirmed that it is able to allow nominations of qualifying special mixed fund accounts within returns if they are made on or before 28 February 2021.[61]

34.24.5 *Ordinary bank account*

Section 809RB(10) ITA provides:

> The account is not to be a qualifying account at all if—
> (a) at any time on the qualifying date, the account is not an ordinary bank account held by and for the benefit of the individual (alone or jointly with others)

Section 809RB(15) ITA provides a commonsense definition of "ordinary bank account:

> For the purposes of this section an account is an "ordinary bank account" if it is a cash account in a bank (whether a current or savings account) where sums standing to the credit of the account from time to time represent a debt owed by the bank to the account-holder.

The object is presumably to exclude accounts holding securities.

34.24.6 *No funds at qualifying date*

Section 809RB(10) ITA provides:

> The account is not to be a qualifying account at all if...
> (b) immediately before the qualifying date, the account has a credit balance of more than £10.

The object is to prevent other funds taking advantage of the OWR mixed fund rule.

HMRC mixed fund FAQs provides:

> ***I could have been using the new rules since the beginning of the tax year, but have only just found out about them. Can I use the account that I've been having my salary paid into as my qualifying account?***
> If the account had a balance of no more than £10 on the qualifying date for that account, then it may be nominated as a qualifying account from

[61] Joint Expatriate Forum on Tax and NICs (April 2021) *https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions*

> that date. If not you will need to use a different account, or open a new account, in order to use the special mixed fund rules.

34.24.7 *OWR remittance basis foreign earnings in year*

Section 809RB(11) ITA provides:

> The account is not to be a qualifying account at all if the qualifying date falls in a tax year—
>
> (a) for which the individual has no general earnings within section 26(1) of ITEPA 2003

It is necessary to have s.26 earnings (OWR earnings) in each year. But if the employee does not have such earnings, they do not need the OWR special mixed fund rules.

HMRC say:

> *Question*
>
> [The question refers to the FAQ statement that the only funds that can be paid into the account are *general earnings from an employment for a tax year when the individual is resident, qualifies for OWR and performs duties of that employment both in the UK and overseas (if the year is a 'split year' for residence purposes, then those duties must be performed in the UK part of the year).*]
>
> The question is - does this mean you have to qualify for OWR and perform UK + non UK duties in the year you receive the earnings, or the year you earned the earnings, or both?
>
> For instance if you have to qualify for OWR and have worked in and out of the UK in the year you receive the income, this would mean if you received a bonus in year 4 when you couldn't qualify for OWR but which was at least partly earned in an earlier year while you did qualify for OWR, you would not be able to pay this into a special mixed fund rules qualifying account and so avoid the normal mixed fund rules.
>
> If on the other hand, they're saying you look to the period when the income was earned, and if you qualified for OWR and worked in and out of the UK throughout that period, then you're ok and can get paid into a special mixed fund rules qualifying account after you cease to qualify for OWR on your current year earnings.
>
> [The question refers to the FAQ which addresses the issue of bonuses[62] and continues:]
>
> So that would mean you would be OK paying in a bonus in year 1 part

[62] See 34.28.1 ("Prohibited sum").

> of which was earned before you became resident, but implies that after the end of the three year initial OWR period, any earnings paid subsequently which were earned while the taxpayer still qualified for OWR (bonus, share related remuneration, etc) cannot be paid into a special mixed fund rules qualifying account even though could still claim OWR?
> *HMRC answer:*
> An account ceases to qualify in any year the individual has no general earnings within section 26(1) ITEPA 2003 (see section 809RB(9)(v) ITA 2007). General earnings under section 26(1) ITEPA 2003 will only arise when the individual meets the requirements of section 26A ITEPA 2003. In year 4 the section 26A ITEPA 2003 requirements will not be met so the account will no longer be a qualifying account. Any prior year bonuses containing section 26(1) ITEPA 2003 income paid into the account will be dealt with under the existing mixed fund rules ...[63]

34.24.8 *Breach of deposit rule*

Section 809RB(11) ITA provides:

> The account is not to be a qualifying account at all if the qualifying date falls in a tax year...
> (b) in which there is a breach of the deposit rule which is not remedied or cannot be remedied.[64]

See 34.28 (The deposit rule).

34.24.9 *Only 1 qualifying account*

Section 809RB(13) ITA provides:

> If, apart from this subsection, an individual might have nominated two or more accounts for which the qualifying date would be the same, the individual may nominate only one of those accounts.

HMRC mixed fund FAQs provides the reason for this rule:

> If multiple qualifying accounts were permitted, there are situations where it would be impossible to calculate the tax liability. For this reason, the

[63] Joint Expatriate Forum on Tax and NICs (July 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf*

[64] Section 809RB(12) ITA provides: "Subsection (9)(b)(iv) or (11)(b) (as relevant) is to be ignored if the breach occurs on or after a date falling within subsection (9)(b)(i) to (iii)."

rules are restricted to having only one qualifying account.

34.24.10 *Joint account*

Section 809RB(14) ITA provides:

> If, apart from this subsection, an account would be a qualifying account of two or more individuals at any time, it is not to be a qualifying account of either or any of them at that time or any other time.

OWR mixed fund FAQs provides:

> ***I have a joint account with my partner. Can I use that as my qualifying account?***
> Yes, provided that the account meets all the conditions for being a qualifying account, and that your partner doesn't make any financial contribution to the account (that is, they do not make any deposits to the account apart from their share of interest earned by the account).
> The same is true for accounts held jointly with anyone, not just those held jointly with a spouse or partner.
> But if you have nominated a joint account as a qualifying account, nobody else can nominate that account as their own qualifying account.
> ***I already have an overseas sterling bank account. Can I use that as my qualifying account?***
> Provided it meets the criteria set out above, any bank account may be used as a qualifying account. You will need to make sure the account balance is no more than £10 before qualifying earnings are first paid into the account.

34.24.11 *Qualifying account period*

Section 809RB(9) ITA provides:

> If an individual nominates an account under this section, the account is a "qualifying account" of the individual throughout the period—
> (a) beginning with the qualifying date, and
> (b) ending with the date before the earliest of the following dates—
> (i) the date on which the account is
> [A] closed or
> [B] ceases to be an ordinary bank account held by and for the benefit of the individual (alone or jointly with others);
> (ii) the date with effect from which the nomination is withdrawn under this section;
> (iii) the qualifying date for another qualifying account of the

individual;

(iv) 6 April in a tax year in which there is a breach of the deposit rule which is not remedied or cannot be remedied;[65]

(v) 6 April in a tax year for which the individual has no general earnings within section 26(1) of ITEPA 2003 [OWR earnings].

HMRC say:

> *Question:*
> Client qualifying account was set up on the 13th Sept.
> He was paid into the account on the 30th Sept but his income paid into the account was for the full month of Sept.
> Per the rules the account is considered a qualifying account from the date on which the first deposit of earnings is paid into it. Therefore as these earnings are for the month of Sept I would think it reasonable to calculate OWR from 1 Sept. Or should we only be calculating OWR from 30th Sept? We believe it is 1 September but please can this be confirmed?
> *HMRC answer:*
> We agree that all salary payments made to a qualifying account will be eligible for the special mixed fund rules provided all other qualifying conditions are met.[66]

34.24.12 *Minor definitions*

Section 809RA(11) ITA provides:

> For the purposes of this section and sections 809RB to 809RD—
> (a) "employment" is to be read in accordance with section 4(1) of ITEPA 2003, and includes an office (as read in accordance with section 5(3) of that Act),
> (b) whether general earnings are "for" a tax year is to be determined as for the purposes of the employment income Parts of ITEPA 2003[67] (see section 3(2) of that Act),
> (c) a reference to anything "paid into" an account includes anything credited to the account by whatever means, and

[65] Section 809RB(12) ITA provides: "Subsection (9)(b)(iv) or (11)(b) (as relevant) is to be ignored if the breach occurs on or after a date falling within subsection (9)(b)(i) to (iii)."

[66] Joint Expatriate Forum on Tax and NICs (July 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf*

[67] Parts 2-7A ITEPA; see 34.2 (Employment income Parts).

(d) references to a breach of the deposit rule are to be read in accordance with section 809RC.

34.25 OWR mixed fund rule

34.25.1 *Requirements for relief*

Section 809RA ITA provides:

> (1) This section applies if—
> (a) an individual has general earnings from an employment for a tax year,
> (b) those earnings include both
> [i] general earnings within section 15(1) of ITEPA 2003 ("section 15(1) earnings") and
> [ii] general earnings within section 26(1) of that Act ("section 26(1) earnings"),
> (c) at least some of the section 15(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 15(1) earnings, are paid into an account in that tax year at a time (a "relevant time") when the account is a qualifying account of the individual, and
> (d) at least some of the section 26(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 26(1) earnings, are also paid into the account in that tax year at a relevant time.

OWR Mixed Fund FAQs provide:

> **I no longer qualify for Overseas Workday Relief but I still have money in what was my qualifying account. Can I still use the Special Mixed Fund rules?**
> No. You are only eligible to use the Special Mixed Fund rules where the conditions set out in the answer to Q1 are met. As one of the conditions is that you qualify for OWR, the special mixed fund rules can't apply to the account after you have ceased to qualify for OWR.

Before turning to the rule, it is necessary to set out two more definitions.

34.25.2 *"Condition A transfer"*

Section 809RA(6) ITA provides:

> A transfer from the account is a "condition A transfer" if and to the extent that—

> (a) condition A in section 809L is met,[68] and
> (b) either—
> (i) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, the transfer, or
> (ii) the transfer, or anything deriving (wholly or in part, and directly or indirectly) from the transfer, is used as mentioned in section 809L(3)(c) [used in respect of relevant debt].

In short, a condition A transfer is an onshore transfer from the account.

34.25.3 *"Other transfer"*

Section 809RA(7) ITA provides:

> A transfer from the account is an "other transfer" if and to the extent that it is not a condition A transfer.

Section 809RA(8) ITA provides:

> Treat a transfer as an "other transfer" if and to the extent that, at the end of the tax year—
> (a) it is not a condition A transfer, and
> (b) on the basis of the best estimate that can reasonably be made at that time, it will not become a condition A transfer.[69]

In short, an "other transfer" is an offshore transfer from the account.

34.25.4 *OWR mixed fund rule*

Armed with these definitions, we can at last turn to the OWR mixed fund rule.

Section 809RA ITA provides:

> (2) If this section applies, the composition of each transfer made from the account in that tax year at a relevant time is to be determined as follows—
> *Step 1* Suppose that all the condition A transfers made from the account in the tax year at a relevant time had been a single transfer made from the account at the end of the tax year.
> *Step 2* Suppose that all the other transfers made from the account in the tax year at a relevant time had been a single offshore transfer made at the

[68] In short, property is received in the UK: see 18.14 (Remittance condition A: UK link).
[69] This is the equivalent of s.809R(6) ITA; see 20.6.2 ("Offshore" transfer).

end of the tax year immediately after the single transfer mentioned in step 1.

Step 3 Applying those suppositions—

(a) find under section 809Q(3) the extent to which the single transfer mentioned in step 1 is of the individual's income or chargeable gains, and

(b) find under section 809R(4) the content of the single offshore transfer mentioned in step 2.

Step 4 Each transfer made from the account in the tax year at a relevant time is to be treated as containing the specified proportion of each kind of income or capital contained in the relevant deemed transfer.

"The specified proportion" is the amount of the transfer divided by the amount of the relevant deemed transfer.

"The relevant deemed transfer" is—

(a) if the transfer is a condition A transfer, the single transfer mentioned in step 1, and

(b) otherwise, the single offshore transfer mentioned in step 2.

(3) Subsection (2) applies in determining the composition of a transfer for the purposes of sections 809Q and 809R but it does not otherwise affect the date on which a transfer is considered to occur for the purposes of this Chapter [Chapter A1, remittance basis].

OWR mixed fund FAQs provide a summary:

> If the employee uses the Special Mixed Fund rules they will not have to operate the normal mixed fund rules on each transaction from their qualifying account in order to determine whether any remittance they make is taxable. Instead they can total up all the remittances to the UK for the tax year and treat that as a single remittance made at the end of the year. Likewise, they can total the amount of offshore transfers made in the tax year and treat that as a single offshore transfer made at the end of the year...
>
> ***How do the Special Mixed Fund rules work?***
>
> Under the Special Mixed Fund rules, all remittances and offshore transfers made from a qualifying account in a tax year are treated as a single remittance and a single offshore transfer, both made at the end of the year.
>
> In other words, instead of applying the normal mixed fund rules to each transfer from the account as it is made over the year to work out the composition of each transfer from the account, at the end of the year the individual must—
>
> - work out the proportion of UK income and overseas income in the account for the year (this is normally based on the proportion of UK

and overseas workdays)

- identify all the different categories of income and gains in the account
- add together all remittances made to the UK from the qualifying account during the year and treat them as having been a single remittance made from the account at the end of the tax year
- add together all of the offshore transfers made from the account during the year and treat them as having been a single offshore transfer made from the qualifying account at the end of the tax year
- apply the normal ordering of the mixed fund rules to the single remittance in the third bullet point above
- apply the normal ordering of the mixed fund rules to the single offshore transfer in the fourth bullet point above

34.25.5 *Benefit in kind*

HMRC mixed fund FAQs provide:

> ***I receive UK and overseas benefits from my employer—how do I deal with these?***
> You add the value of the benefits to the rest of your income, and apportion as normal. UK benefits are treated as having been remitted to the UK, and that remittance is treated as coming primarily from the earnings of the employment relating to UK duties. Overseas benefits are treated as consisting primarily of earnings from the employment relating to overseas duties.
> You should note that because the value of the benefit has been included in the calculation of the apportionment of your earnings, this will mean that the ratio of earnings for UK and non-UK duties that are in your qualifying account may differ from your UK/ non-UK workday split.
> ***Example***
> Mr C has an employment where he performs 75% of his duties in the UK and 25% of his duties overseas.
> Mr C receives an annual salary of £150,000 and has a UK based benefit of £30,000 in respect of his children's school fees.

The HMRC analysis is as follows:

> First Mr C must apportion his earnings between UK and non-UK duties, based on work days. Based on this Mr C has:
> Total earnings for apportionment: £180,000 (£150,000 salary + £30,000) benefit.
> £135,000 relating to UK duties (£180,000 × 75%)
> £45,000 relating to non-UK duties (£180,000 × 25%)

> The UK benefit is treated as having been remitted to the UK and consists primarily of earnings relating to UK duties. As Mr C has more than £30,000 of earnings relating to UK duties, all £30,000 of the UK benefit is treated as being from those earnings.
> Therefore Mr C's remaining earnings consist of:
> £105,000 relating to UK duties.
> £45,000 relating to non-UK duties.

34.25.6 *Account becomes/ceases qualifying*

An account may become a qualifying account. Section 809RA(4) ITA provides:

> If the tax year is the tax year in which the account becomes a qualifying account, for the purpose of applying section 809Q(3) in relation to the single transfer mentioned in step 1 of subsection (2), treat the part of the tax year falling before the qualifying date for the account as a separate tax year.

An account may cease to be a qualifying account. Section 809RA(5) ITA provides:

> If the account ceases to be a qualifying account of the individual during the tax year other than as a result of a breach of the deposit rule—
> (a) subsection (2) has effect as if references to the end of the tax year were to the end of the day on which the account ceases to be a qualifying account, and
> (b) for the purpose of applying section 809Q(3) in relation to the single transfer mentioned in step 1 of subsection (2), treat the part of the tax year falling after the day mentioned in paragraph (a) as a separate tax year.
> (9) If the account ceases to be a qualifying account of the individual during the tax year other than as a result of a breach of the deposit rule, subsection (8) has effect as if the reference to the end of the tax year were to the end of the day on which the account ceases to be a qualifying account.

OWR mixed fund FAQs provides:

> When you change your qualifying account during the year, you should treat the date on which you changed the account as if it is the end of the tax year for the purposes of the special mixed fund rules, so that the single remittance and single offshore transfer are deemed to be made on that date. In other words, you will have to work out how the rules applied to the first qualifying account until the point that it ceased to be a

qualifying account (part way through the year), and must work out how they applied to the later qualifying account from the point it becomes a qualifying account to the end of the tax year.

But you can still apportion your earnings between UK and overseas duties for the whole year.

At the actual end of the tax year you will need to carry out the same procedure for the income in the new qualifying account - the single remittance and single offshore transfer will cover transactions made in the period between the date you first used the new qualifying account and the end of the tax year.

Can an account that has been my qualifying account in the past be my qualifying account again in the future?

If an account has been your qualifying account in the past but then ceased to be your qualifying account for whatever reason, it cannot later be used as your qualifying account again. This is because an account can only become a qualifying account on its "qualifying date". An account can only have one qualifying date, and so cannot become a qualifying account a second time. ...

Note that you may use the same qualifying account from one year to the next - a qualifying account does not automatically cease to be a qualifying account at the end of the tax year.

34.26 Two or more employments

HMRC FAQs provide:

I have more than one employment for which I perform duties both in the UK and overseas. I pay the earnings for all of these employments into my qualifying account. When I apportion my earnings, can I add together the workdays from all of my employments for calculating what proportion of my workdays were overseas?

No You have to apportion the income from each of the employments individually.

Example[70]

Ms B has two employments. For the first employment, Ms B performs 25% of the duties in the UK and 75% overseas, and has an annual salary of £40,000. For the second employment Ms B performs 50% of the duties in the UK and 50% overseas, and has an annual salary of £30,000.

Ms B must apportion the earnings from each employment separately between UK and non-UK duties.

[70] I have altered the layout for clarity.

So from the first employment Ms B has:

relating to UK duties (£40,000 × 25%)	£10,000
relating to non-UK (£40,000 × 75%)	£30,000
total	£40,000

And from the second employment Ms B has:

relating to UK duties (£30,000 × 50%)	£15,000
relating to non-UK duties (£30,000 × 50%)	£15,000
total	£30,000

34.27 Salary paid into 2 accounts

HMRC mixed fund FAQs provides:

> **If my pay is paid partly in the UK and partly overseas, how do I calculate what I have remitted?**
>
> Payments into a UK account will be a remittance and so will be primarily UK taxable income following the ordering in section 809Q(4) ITA 2007. The composition of the overseas account will be the remainder of the apportioned income
>
> ***Example***
>
> Mrs B has a salary of £100,000 of which £60,000 is paid into a UK account for general living expenses and £40,000 is paid into an overseas account. The workday split calculated at the end of the year is 75% UK workdays; 25% overseas workdays. Of the £75,000 UK earnings, £60,000 will have been paid into the UK account and the balance of £15,000 will be in the overseas account together with the £25,000 foreign earnings.
>
> If the workday split had been 50:50 the UK account would have contained £50,000 UK income and £10,000 overseas employment income which would be regarded as remitted.
>
> **If my pay is paid into two separate overseas accounts, one of which is my qualifying account, how will the mixed fund rules apply to remittances from the qualifying account**
>
> Each payment of salary will be a mixture of UK and overseas earnings however the proportion of each can not be calculated until the workday apportionment is completed at the end of the year. In addition the mixed fund rules operate by giving preference to remittances to the UK over offshore transfers (section 809R(5) ITA 2007). Although the technical analysis of the accounts is complicated the result is that remittances from the qualifying account will come first from the UK earnings
>
> ***Example***[71]
>
> Mr C is paid a salary of £1,000,000 in the year split equally between a

[71] I have altered the layout for clarity.

qualifying Jersey account and a non qualifying USA account. The workday apportionment determines that £750,000 of the salary relates to UK duties. Mr C remits £400,000 to the UK in the year from the qualifying account. The special mixed fund rules will look first at the combined £400,000 remittance which will, because section 809Q ITA 2007 takes preference over section 809R ITA 2007, consist entirely of UK earnings. The balance of £600,000 will be split proportionally between the amounts remaining in the 2 accounts.

So the £100,000 remaining in the qualifying account will consist of

UK earnings	£58,333
overseas earnings	£41,667
total	£100,000

the £500,000 in the USA account will be

UK earnings	£291,667
overseas earnings	£208,333
total	£500,000

HMRC mixed fund FAQs provides:

My salary is paid into two separate accounts, one in my home country and one sterling overseas account. The sterling account is my qualifying account. How do I decide how much of the salary in the sterling account relates to my UK workdays?

Where your salary is paid into two separate accounts in a “split-payroll” scenario the normal mixed fund rules determine what earnings are paid into each account.

In general, if you remit income from your qualifying account it will relate to income from your UK workdays in preference to income from your overseas workdays, provided that you receive more income relating to your UK workdays for that year than the amount you remit.

If earnings relating to UK duties from the employment remain after taking account of all remittances from the qualifying account, then how those earnings are split between your qualifying account and your non-qualifying account depends on whether you have made any remittances (directly or indirectly) from your non-qualifying account.

If you have not made any remittances from your non-qualifying account, then the proportion of the earnings in your sterling account which relate to UK earnings (after the remittance but before the single offshore transfer) can be calculated using the formula:

$(U - R) / (E - R)$

Where

U is the total of your earnings from the employment for the year that relate to UK duties,

R is the amount of the remittance, and
E is your total earnings from the employment for the year.

34.27.1 *Non-qualifying account*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

Question

Assumptions

Individual is paid £120,000 p.a., £10,000 pcm via the US payroll.

He is paid 60% into a qualifying US account (US$) and 40% into a non-qualifying account in Jersey (GBP)

Despite the fact that the Jersey account is non-qualifying, the only monies that have ever been paid into the account are assignment related earnings

The individual is entitled to OWR and performs 20% of his duties outside of the UK

The only money remitted to the UK is £3,600 pcm from the Jersey account.

Assumed UK tax position

There are no remittances from the US qualifying account so the SMFRs [OWR special mixed fund rules] are not in point.

Per HMRC's analysis, the amount credited to each account would, in the first instance be:

- US qualifying account - £4,800 of s.15 income and £1,200 of s.26 income pcm
- Jersey non-qualifying account - £3,200 of s.15 income and £800 of s.26 income pcm

However, £3,600 is remitted to the UK from the Jersey account each month so s.809R(4) is overridden by s.809R(5) such that the rules in s.809Q are applied. The remittance of £3,600 pcm is less than the amount of s.15 income received each month and so all of the amount remitted is regarded as s.15 income

This analysis is repeated each month so the balance on the Jersey account is:

Month	**s.15**	**s.26**
April	£3,600	£400
Less remittance	-£3,600	0
Balance	£0	£400
May	£3,600	£400
Less remittance	-£3,600	0
Balance	£0	£800

Etc

> The amounts remaining in each account at the end of the tax year are:
>
> - U S qualifying account – £52,800 of s.15 income and £19,200 of s.26 income
> - Jersey non-qualifying account - £0 of s.15 income and £4,800 of s.26 income
>
> The above assumes that you do not re-apportion the balance of the two accounts at year end.
>
> *HMRC answer*: We would agree with the analysis on the facts given and the assumption there are no "other transfers" from the qualifying account. However there may be a different result if there were "other transfers" from the qualifying account. Because the qualifying account must be looked at in priority to the non-qualifying account "other transfers" would reduce the amount of s.15 and s.26 income available to remit from the non-qualifying account.
>
> To take an example, if you assume that all of the payments made to the qualifying account were spent overseas in the year (£72,000 in total) it would remove £57,600 s.15 income and £14,400 s.26 income as an "other transfer" within section 809RA(2) ITA. The only monthly amounts available for remittance from the non-qualifying account would be £3,200 s.15 income and £800 s.26 income credited to it. Each monthly remittance of £3,600 on a transactional basis would therefore consist of £3,200 s.15 income and £400 s.26 income.

The Joint Forum on Expatriate Tax and NICs returned to this issue in July 2014. HMRC say:

> *Question:* I'm afraid that we don't completely understand how the rules are being interpreted and applied.
>
> The first example deals with the position where payments are made by the employer into two non-UK accounts, one of which is a qualifying account. We agree that each account should be treated as containing the same pro-rata share of s.15 and s.26 income. We also agree that remittances from the non-qualifying account are from s.15 income in that account in priority to s.26 income. We don't however understand the statement, "Because the qualifying account must be looked at in priority to the non-qualifying account, "other transfers" would reduce the amount of the s.15 and s.26 income available to remit from the non-qualifying account." HMRC's example shows that if all the funds in the US qualifying account are spent outside the UK, that reduces the funds in that account pro-rata, in accordance with the rule in s.809RA(2). Consequently the £72,000 spent from the qualifying account would be £57,600 s.15 earnings and £14,400 s.26 earnings. According to the

example, the £4,000 (s.15 £3,200 and s.26 £800) credited to the non-qualifying account are not affected by the offshore transfer from the qualifying account, which appears to contradict the sentence quoted above. Could HMRC please explain or clarify this?

HMRC answer:

The qualifying account is looked at in priority to the non-qualifying account because of section 809Q(1A) ITA 2007.

In the original question there were no remittances or offshore transfers from the qualifying account. The subsequent remittances from the non-qualifying account will follow the ordering rules in sections 809Q and 809R ITA 2007 as described in the second part of the question below. Each monthly remittance of £3,600 will therefore have a pool of £8,000 s.15 ITEPA 2003 and £2,000 s.26 ITEPA 2003 income for the mixed fund rules to operate on (i.e. the total amount deposited monthly to both accounts). The monthly remittance of £3,600 will therefore consist of s.15 ITEPA 2003 income (section 809Q(4)(a) ITA 2007).

In HMRC's original response we contrasted the above position with one where all of the money paid to the qualifying account was the subject of an offshore transfer in the year. As the qualifying account is looked at in priority to the non-qualifying account all of the income in the qualifying account is regarded as removed from it under the single offshore transfer in section 809RA ITA 2007. On subsequently dealing with the non-qualifying account using the transaction by transaction mixed fund rules, the monthly pool of income available for remittance is only £3,200 s.15 ITEPA 2003 and £800 s.26 ITEPA 2003 income. Each monthly remittance from the non-qualifying account therefore consists of £3,200 s.15 ITEPA 2003 and £400 s.26 ITEPA 2003 income under the normal operation of section 809Q ITA 2007. We are not entirely sure what the problem here is and suspect it may just be one of the language we used in the original response. Of course the offshore transfers do not *reduce* what is in the non-qualifying account in any way. We hope this further explanation is helpful in your understanding of the legislation.

34.27.2 *Example: Qualifying/non-qualifying accounts*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

Question

Assumptions

Individual is paid £120,000 p.a., £10,000 pcm via the US payroll.

He is paid 60% into a qualifying US account (US$) and 40% into a non-qualifying account in Jersey (GBP)

Despite the fact that the Jersey account is non-qualifying, the only monies that have ever been paid into the account are assignment related earnings

The individual is entitled to OWR and performs 20% of his duties outside of the UK

The individual remits £3,600 pcm to the UK from the Jersey account and also makes a one-off remittance of £20,000 to the UK from the qualifying US account in December after the earnings for November have been paid into the account but before the earnings for December have been added.

Assumed UK tax position

There is a remittance from the US qualifying account so the SMFRs [OWR (recent arrivals) mixed fund rules] are in point

Per HMRC's analysis, the amount credited to each account would, in the first instance be:

- US qualifying account - £4,800 of s.15 income and £1,200 of s.26 income pcm or £57,600 of s.15 income and £14,400 of s.26 income per annum
- Jersey non-qualifying account - £3,200 of s.15 income and £800 of s.26 income pcm

The SMFRs take precedence over the normal MFRs and so the position on the US account needs to be analysed first.

	s.15	**s.26**
Apportionment of earnings for the year	£57,600	£14,400
Less remittance	£20,000	0
Position after applying s.809RA but before s.809R	£37,600	£14,400

The next step is to analyse the Jersey account which must be analysed on a month by month basis. The starting point for the Jersey account is that £3,200 of s.15 and £800 of s.26 income is paid into the account each month. However, s.809R(4) is overridden by s.809R(5) which allows us to apply s.809Q to the monthly remittance. This is where we run into difficulty because of the interaction with the SMFRs that have been applied to the US qualifying account. We do not know how HMRC intend to apply the rules but one possible approach is to say that if you ignored the SMFRs there would have been £38,400 of s.15 income in the US qualifying account immediately prior to the one-off remittance of £20,000. This leaves £18,400. The amount of 'extra' s.15 income we need to allocate to the non-qualifying Jersey account is £400 per month and £18,400/8 is £2,300 which is more than £400 and so the amount remitted each month from the Jersey account is regarded as s.15 income only, i.e.

Month	**s.15**	**s.26**
April	£3,600	£400
Less remittance	-£3,600	
Balance	£0	£400
May	£3,600	£400
Less remittance	-£3,600	
Balance	£0	£800
Etc.		

The amounts remaining in each account at the end of the year are:

- US qualifying account – £32, 800 of s.15 (£57,600 – £20,000 –(£400×12*)) and £19,200 of s.26
- Jersey account - £0 of s.15 and £4,800 of s.26

*£400 is the amount reallocated each month from the US account to the Jersey account as a result of s.809R(5).

Our analysis of the example is as follows:

a) We agree you must look at the qualifying account first

b) After the £20,000 condition A transfer has been accounted for, the balance of income remaining is £76,000 s.15 income and £24,000 s.26 income (£100,000 total) - assuming there are no "other transfers" (see example (a)).

c) HMRCs view is the income is apportioned between the 2 accounts proportionately (see the final example in the FAQs) following the offshore transfer rule in section 809R ITA. Of course that will only total £100,000 (£76,000 + £24,000) so the £20,000 already identified as a remittance from the qualifying account must be included to match the apportionment with the amounts paid into the 2 accounts on a monthly basis. For the purposes of this example we will call this "remitted income" as it has already been identified as remitted s.15 income.

d) Each monthly salary payment to the qualifying account will consist of:
   - £3,800 s.15 income
   - £1,200 s.26 income
   - £1,000 "remitted income"

e) Each monthly salary payment to the non-qualifying account will consist of:
   - £2,533 s.15 income
   - £800 s.26 income
   - £667 "remitted income"

f) There is enough s.15 income in the monthly payments to the

> offshore accounts to ensure the £3,600 monthly remittance is entirely of s.15 income. This is the same result as CIOTs calculation, but arrived at via a slightly different methodology.
>
> g) We believe this methodology ensures the transfers identified by the special mixed fund rules are not double counted when looking at remittances from the non-qualifying account and the transaction by transaction basis of the normal mixed fund rules can be calculated accurately.
>
> h) For example, if the condition A transfers from the qualifying account totalled £72,000 rather than £20,000 the monthly payments to the qualifying account would be £1,200 s.15 income:
>
> - £1,200 s.26 income and
> - £3,600 "remitted income"
>
> Monthly payments to the non-qualifying account would be:
>
> - £800 s.15 income,
> - £800 s.26 income and
> - £2,400 "remitted income".
>
> The £3,600 monthly remittance from the non-qualifying account would consist of £2,000 s.15 income (£1,200 + £800) and £1,600 s.26 income.[72]

The Joint Forum on Expatriate Tax and NICs returned to this issue in July 2014. HMRC say:

> In the second example (remittances from both the qualifying and non-qualifying accounts) we find it difficult to understand the method applied. We agree that the first step is to identify the remittance of £20,000 from the qualifying account, which is all s.15 income. However, we do not understand why the remaining £100,000 is apportioned in the way it is on a monthly basis between the qualifying and non-qualifying accounts. For instance, if the £20,000 is remitted from the qualifying account, why is it subsequently split between the qualifying and non-qualifying accounts (pro-rata to the overall allocation of payments between them)? At f) HMRC say that there is enough s.15 income in the monthly payments to the offshore accounts to ensure the £3,600 monthly remittance is entirely of s.15 income. However, on HMRC's figures at e) the unremitted monthly s.15 income in the non-qualifying Jersey account is only £2,533. The only way in

[72] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

which the individual's monthly remittance of £3,600 from the non-qualiyfing account can be treated as entirely s.15 is to look across to the qualifying account and bring in the s.15 income in that account. Is that HMRC's interpretation?

Looking at HMRC's variation to the second example, where £72,000 is remitted from the qualifying account, it is again not clear how the earnings attributed to each account match with the funds in it. For instance, we're told that after factoring in the £72,000 remittance (which it appears is all s.15 income) we have to identify the monthly income credited to the qualifying account as s.15 £1,200, s.26 £1,200 and £3,600 remitted. In fact there is only £4,000 left in the account after the £72,000 remittance, so for HMRC's approach to work we have again to "borrow" s.15 income from the non-qualifying account and in effect treat the two accounts as one for the purpose of identifying the s.15 and s.26 income in them. Is that the intention?

In summary, it would be helpful to have a clear statement of the principles applied where there are two or more offshore accounts from both of which remittances are made to the UK and from both of which offshore transfers are also made. Please consider

- Condition A transfer from a qualifying account
- "Other transfers" from a qualifying account
- Remittances from a non-qualifying account
- Offshore transfers from a non-qualifying account.

HMRC answer:

It is HMRC's view that the mixed fund rules begin to apply to a salary payment at a point just before it is paid to employee. As each salary payment is a mixture of s.15 ITEPA 2003 and s.26 ITEPA 2003 income, the mixed fund rules will apply to determine the composition of each offshore account. As section 809R(5) ITA 2007 gives priority to section 809Q ITA 2007 the composition of each salary payment can not finally be determined until the single remittance from the qualifying account (and the single offshore transfer if there is one) has been dealt with. It is not possible to know in real time what the composition of either account is. The proportional rule in section 809R(4) ITA 2007 applies to the balance remaining after the single end of year condition A transfer. Having determined the composition of each salary payment into the accounts, the mixed fund rules will apply to each transaction from the non-qualifying account on a transaction by transaction basis through the year. It is HMRC's view that dealing with the accounts in this way will avoid any potential double counting of income when dealing with the non-qualifying account on the transaction by transaction basis.

On the second point, again because HMRC's view that the mixed fund rules begin to apply at a point just before it is paid to the employee and the legislation gives priority to section 809Q ITA 2007, a remittance from the non-qualifying account will be s.15 ITEPA 2003 income to the extent that such income has been paid into either offshore account at that time. This was the basis of the original question 1 where only £3,200 s.15 ITEPA 2003 income was paid into the non-qualifying account but each monthly remittance of £3,600 was treated as remitted. This is HMRC's view of the correct operation of the mixed fund rules in sections 809Q and 809R ITA 2007 in these circumstances and we do not recognise the concept of "borrowing" mentioned in the question.

HMRC's view on when the mixed fund rules begin to apply in a situation where salary is split between accounts should, in most circumstances, be beneficial to employees. It ensures remittances from the qualifying account will be of s.15 ITEPA 2003 income to the extent that such income has been paid into either offshore account and from the non-qualifying account to the extent that either account contains s.15 ITEPA 2003 income at the time of the remittance.[73]

34.28 The deposit rule

34.28.1 *"Prohibited sum"*

Section 809RC(6) ITA provides:

> A "prohibited sum" is anything other than a sum that is, or derives wholly (whether directly or indirectly) from, any of the following kinds of income or capital—

There are 5 permitted categories and everything else is prohibited. The permitted categories are:

> (a) general earnings of the individual from an employment for a tax year which is a relevant tax year in relation to the employment,
> (b) general earnings of the individual from an employment which consist of money and are paid in a tax year which is a relevant tax year in relation to the employment,
> (c) an amount of specific employment income which, by virtue of Part 6, 7 or 7A of ITEPA 2003 or any other enactment, counts as

[73] Joint Expatriate Forum on Tax and NICs (July 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf*

> employment income of the individual in respect of an employment for a tax year which is a relevant tax year in relation to the employment,
>
> (d) interest on the account, or
>
> (e) consideration for the disposal of employment-related securities or employment-related securities options in the circumstances described in subsection (7).

HMRC say:

> (25.3) If an employer pays an expense reimbursement into a Special Mixed Fund, and the expense reimbursement is exempt under Part 4 ITEPA 2003, can HMRC confirm that the payment is not a breach of the deposit rule as defined by s809RC ITA?
>
> **Answer**
>
> (25.3) We can confirm that a payment of an exempt expense into a Special Mixed fund will not be a breach of the deposit rule.[74]

Section 809RC(7)(8) ITA deals with employment-related securities, a topic not discussed here.

Section 809RC(9) ITA defines "relevant tax year":

> For the purposes of this section a tax year is a "relevant" tax year in relation to an employment if—
>
> (a) the individual has general earnings from the employment for the tax year,
>
> (b) those earnings include both general earnings within section 15(1) of ITEPA 2003 ("section 15(1) earnings") and general earnings within section 26(1) of that Act ("section 26(1) earnings"),
>
> (c) at least some of the section 15(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 15(1) earnings, are paid into the account in the tax year, and
>
> (d) at least some of the section 26(1) earnings, or sums deriving (wholly or in part, and directly or indirectly) from at least some of the section 26(1) earnings, are also paid into the account in the tax year.

[74] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

34.28.2 *Deposit rule*

Section 809RC(1) ITA provides:

> There is a breach of the deposit rule if a prohibited sum is paid into the account on or after the qualifying date.

34.28.3 *30-day grace period*

The employee should take care not to pay (say) dividend income into the qualifying account. But it is (just) possible to remedy a breach of the deposit rule. Section 809RC ITA provides:

> (2) A breach of the deposit rule is remedied if, within 30 days beginning with the day on which the individual became or ought reasonably to have become aware of the payment of the prohibited sum, the required amount is transferred out of the account by way of a single one-off transfer.
> (3) "The required amount" is an amount equal to—
> (a) the prohibited sum, plus
> (b) all the other prohibited sums (if any) that have been paid into the account since that sum was paid in.

The policy seems to be "three strikes and you are out". Section 809RC(4) ITA provides:

> If there are 3 breaches of the deposit rule in any 12 month period, subsection (2) does not apply to the third breach and, accordingly, the third breach cannot be remedied.

Section 809RC(5) ITA provides:

> The payment of a prohibited sum ("the later prohibited sum") into the account does not result in a breach of the deposit rule if—
> (a) a breach resulting from an earlier payment of a prohibited sum into the account is remedied, and
> (b) the later prohibited sum is represented by the required amount in relation to that breach.

The drafting is clumsy but it works. The point is that if there is an error, all errors must be cleared by the remedial steps.

OWR mixed fund FAQs offers a straightforward example:

> Mr A has a qualifying account at the beginning of 2015/16 into which his employment income is paid.
> On 15 May 2015 Mr A deposits some rental income from a property he

> has in Spain.
>
> This is a breach of the deposit rule. Realising this could affect the qualifying status of the account, Mr A transfers the full amount deposited to another of his offshore accounts on 29 May 2015. As the breach has been remedied within the 30 day period allowed, the account remains a qualifying account.
>
> On 30 June Mr A receives some dividends from a foreign company (not connected to his employment) and deposits them into his qualifying account. This is again a breach of the deposit rule and, once again, realising his mistake, Mr A transfers the full amount of the dividend to another offshore account within the 30 day period. The qualifying account again remains a qualifying account.
>
> On 15 September a further sum of income from the property in Spain is deposited into the qualifying account. As this is the third breach of the deposit rule in a 12 month period it can not be remedied and the account is treated as a normal mixed fund from 6 April 2015. The simplified mixed fund rules will no longer apply to the account for the year 2015/16.

OWR mixed fund FAQs provides:

> ***If I breach the deposit rule, do I need to report it to HMRC?***
>
> You do not need to report a breach of the deposit rule to HMRC. You will however need to remedy the breach within 30 days of finding out about it if you can do so and want to maintain the qualifying account status. If you do not remedy the breach the account will operate as a normal mixed fund for the whole tax year in which the breach occurred.

HMRC mixed fund FAQs provides:

> **I have one employment with UK duties, and one with overseas duties. Can I use the Special Mixed Fund rules for both?**
>
> No The Special Mixed Fund rules can only be used in relation to employments where the individual performs UK and overseas duties in the same tax year for the same employment.
>
> **I have one employment which requires me to work in the UK and overseas, and another employment where I only work overseas. Can I pay the salaries for both employments into my qualifying account?**
>
> No Income from an employment for which you have only UK or only overseas duties would be a prohibited sum, and cannot be deposited into a qualifying account.
>
> **My employer paid last year's bonus into my qualifying account. Does that count as an error?**

> No Any earnings from the employment that are paid in a year when you qualify for Overseas Workday Relief and have both UK and overseas duties of that employment can be deposited into the qualifying account, even where those earnings are for an earlier year.

34.28.4 *30-day deadline met*

Section 809RD ITA provides:

> (1) This section applies if the required amount in relation to a breach of the deposit rule was transferred out of the account in accordance with section 809RC(2).
> (2) Sections 809Q and 809R have effect as if—
> (a) the intervening transactions had never taken place, and
> (b) each prohibited sum represented by the required amount had instead been transferred directly (at the time that sum was paid into the qualifying account) into the account or other property into which the required amount was transferred by virtue of the single one-off transfer.
> (3) Each of the following is an "intervening transaction"—
> (a) each payment into the qualifying account of a prohibited sum represented by the required amount, and
> (b) the single one-off transfer out of the qualifying account.
> (4) If it is supposed under step 1 or 2 of section 809RA(2) that a single transfer had been made in the intervening period, re-apply section 809Q or 809R in relation to that transfer taking account of subsection (2).
> (5) "The intervening period" is the period—
> (a) beginning with the day on which the breach occurred, and
> (b) ending with the day on which the single one-off transfer was made in accordance with section 809RC(2).
> (6) If more than one transfer of a sum equal to the required amount was transferred out of the qualifying account within the 30-day grace period, the first of those transfers is assumed to be the single one-off transfer.
> (7) "The 30-day grace period" is the period of 30 days mentioned in section 809RC(2).

34.29 Non-resident employee

Section 27 ITEPA provides:

> (1) This section applies to general earnings for a tax year for which the employee is not resident in the UK if they are—
> (a) general earnings in respect of duties performed in the UK, or
> (b) general earnings from overseas Crown employment subject to

> UK tax.[75]
>
> (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of "taxable earnings" from the employment in that year.
>
> (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

This applies regardless of domicile. DTA short-term business visitors relief may override this charge.[76]

There are two concepts in para (1)(a):

(1) Duties performed in the UK; and
(2) Earnings in respect of those duties.

It is best to consider these separately.

The employer will also need to consider whether the non-resident employee constitutes a foreign permanent establishment.

34.30 Where are duties performed

The question of where duties are performed (or at least, whether they are performed in the UK) is relevant for two purposes discussed in this chapter:

Purpose	**Why it matters**	**See para**
Workday relief	Arising/remittance basis	34.22
Non-resident employee	Taxable/tax-free earnings	34.29

The expression is one of a cluster of (more or less) identical terms or concepts:

Expression	**Matters for**	**See para**
Where duties performed	*See above*	*Discussed here*
Where employment exercised	DT relief	37.5
Where work done	Statutory residence test	6.23
Where services provided	Remittances	18.15
Where services performed	Foreign tax credit; DIMF	108.8.2, 73.14
Where trading income arises	Source of income from services	21.14

There are differences of context and statutory wording, but discussion on one of these expressions is generally helpful in considering the others.

Duties are performed in the place where the employee is physically

[75] See 34.40 (Overseas Crown employment).
[76] See 37.6 (Short-term business visitors).

present when performing the activities. Thus an employee outside the UK who is on the phone/Skype/Zoom/Teams with a person in the UK is performing his duties outside the UK.

Duties are performed in the UK even if the employee is stranded here because of Covid. That is self-evident. EIM explains why HMRC do not allow a concession on this point:

> **EIM77045 COVID-19 considerations for non-residents and non-domiciled employees for 2020 to 2021** [Jan 2021]
>
> For UK residents eligible for Overseas Workday Relief (that is UK resident employees with a period of non-residence within the 3 previous tax years) a day spent working in the UK will continue to be treated as a UK workday, even if they have been prevented from leaving the UK as a result of COVID-19 travel restrictions.
>
> The rationale for this is as follows:
>
> The UK has a claim to tax the worldwide income of UK resident employees, but has chosen to restrict that right for those who meet the conditions of section 26 ITEPA, allowing them to receive Overseas Workday Relief. OWR allows for employment income which relates to duties performed overseas to be taxable only to the extent that it is remitted to the UK, provided certain relevant conditions are met. It is a condition of s26(1)(a) that the income eligible for OWR cannot be 'general earnings in respect of duties performed in the United Kingdom'. Therefore, if a UK resident performs duties related to their employment in the UK, even if they are stranded in the UK as a result of COVID-19 travel restrictions, the requirements of s26 will not be met and they will be ineligible for OWR on income earned during those days.
>
> Only the UK can establish any rights to tax the income for the period or periods the UK resident taxpayer spends in the UK, it is therefore reasonable for the UK to charge tax on its residents for work performed in the UK as no other state will have a claim to tax any earnings for such work.
>
> With regards to taxpayers chargeable under section 22 with a dual contract, the duties of the overseas employment cannot be performed in the UK without removing the earnings from treatment as overseas chargeable earnings (subject to sections 38 and 39). As this is effectively an all or nothing charge, section 41ZA is not relevant.

34.30.1 *Absence from employment*

During a period of absence from employment, the employee is not actually performing duties in the UK or anywhere else. However s.38 ITEPA

provides:

> (1) This section applies if a person ordinarily performs the whole or part of the duties of an employment in the UK.
>
> (2) General earnings for a period of absence from the employment are to be treated for the purposes of this Chapter as general earnings for[77] duties performed in the UK except in so far as they would, but for that absence, have been general earnings for duties performed outside the UK.[78]

EI Manual provides a straightforward example:

> **EIM40202 Location of duties: Absence from duties** [Nov 2019]
> ... *Example*
> An employee who is not [ordinarily][79] resident in the UK performs the duties of the employment in Manchester. Illness meant that a holiday in Florida was unexpectedly extended so the days normally spent in the UK were lost. The Inspector received a calculation of earnings chargeable under s.15 [ITEPA][80] that excluded salary attributable to the days of absence.
> The Inspector successfully contended that s.38 [ITEPA] applied on the basis that the duties of the employment were normally performed in the UK. The earnings that had been excluded were therefore UK-based earnings within s.15 [ITEPA]

34.31 Earnings "in respect of" UK duties

The identification of earnings in respect of UK duties is relevant for two purposes:

Purpose	**Why it matters**	**See para**
Workday relief	Arising/remittance basis	34.22
Non-resident employee	Taxable/tax-free earnings	34.29

Section 41ZA ITEPA provides:

[77] Section 38 refers to earnings "for" duties performed in the UK, whereas ss.26, 27 ITEPA refer to earnings "in respect of" duties performed in the UK, but the meaning must be the same.

[78] Special rules apply for:
(1) duties on board vessels or aircraft: s.40 ITEPA
(2) duties performed in the UK sector of the Continental Shelf: s.41 ITEPA

[79] The Manual has not been revised following the abolition of ordinary residence in 2013, but that does not affect the point made here.

[80] The reference from 2008/2009 is now s.26 ITEPA.

> The extent to which general earnings are in respect of duties performed in the UK is to be determined under this Chapter [Chapter 5 Part 2, Remittance basis & non-resident employees] on a just and reasonable basis.

This provision was introduced in 2013, as part of the project to put SP 1/09 on a statutory footing.[81] The pre-2013 guidance and case law will continue to apply.

SP1/09 provides:

> 13. Where the duties of a single office or employment are performed both in and outside the UK, an apportionment is required to determine how much of the general earnings are attributable to the UK duties. Apportionment of general earnings is essentially a question of fact, but for many years HMRC has accepted time apportionment, based on the number of days worked abroad and in the UK, except where this would clearly be inappropriate.
> For example, in the case of an employee with 200 working days in the UK and 50 working days outside the UK, the proportion of general earnings attributable to UK duties would be 200/250.[82]

It is difficult to see what other rule there could be.

There have been two cases discussing whether earnings are "in respect of" duties performed in the UK. I discuss them in more detail elsewhere:

Case	**Topic**	**See para**
Taylor v Provan	International business travel	34.31.2
Perro v Mansworth	Tax equalisation	34.43

EI Manual provides an outline:

> **EIM77020. Appendix 2: General earnings in respect of duties performed in the UK** [Nov 2019]
> ... In *Taylor v Provan* (49 TC 579), the courts agreed that the touchstone must be the wording of the statute. In that case, travel expenses paid to a director to come to the UK in order to perform duties here were considered to be "emoluments in respect of duties performed in the

[81] The reader may wonder whether s.41ZA was really needed; but it is here now, and does no harm. For the SP 1/90 consultation and response papers, see 34.23 (OWR mixed funds); but the purpose (if any) of s.41ZA is not discussed.

[82] SP 1/90 continues: "This practice does not, of course, apply where the charge arises under Section 15 ITEPA and relief is due under Part 5 Chapter 6 ITEPA (Deductions from seafarers' earnings)."

> UK". In *Perro v Mansworth* [2001] (SpC286), a Special Commissioner found that the payment by an employer of an employee's liability to tax on UK-based earnings (Case II Schedule E) was itself "an emolument in respect of duties performed in the UK".
>
> Where an attribution is required, Statement of Practice 5/84[83] approves time apportionment according to the number of days worked abroad and in the UK except where this would clearly be inappropriate. The *Perro* case is an example of where time apportionment is not appropriate. The starting point for the SP5/84 approach to time apportionment is that the employee's contractual right to earnings for the work performed usually accrues from day to day.

There have also been some cases on the former relief for UK resident employees who worked 30 or more days abroad.[84] But as was pointed out in *Perro v Mansworth*, the wording of that relief is not the same, and the context is different, so little if any guidance is to be had from those cases. EIM77020 does however refer to them:

> Authority for this view comes from *Varnam v Deeble* (58 TC 501), although that case was not directly concerned with attributing earnings to UK duties for the purposes of the charge to UK tax. In *Platten v Brown* (59 TC 408), it was held that correct attribution on a time apportionment basis should employ units of days rather than hours.
>
> The courts have consistently taken the view that time apportionment should not be applied to earnings that can be specifically allocated either to duties performed in the UK or to duties performed elsewhere. So time apportionment would be inappropriate in a case where the contract of employment specifically allocated earnings to periods spent working in the UK or overseas. Provisions in a contract of employment that regulate the amount of time to be devoted to the employment, dealing with matters such as the number of days to be worked, the length of holidays or how to calculate compensation do not amount to an allocation of particular parts of remuneration to particular days of work.
>
> This appendix gives examples of how the time apportionment approach envisaged by SP5/84 applies in practice. Self-Assessment Helpsheet IR211[85] approaches apportionment by calculating the earnings from the

[83] Author's footnote: This was later replaced by SP 1/09.

[84] *Varnam v Deeble* 58 TC 501; *Platten v Brown* 59 TC 408; *Coxon v Williams* 60 TC 659. The relief survives in an attenuated form for seafarers, not discussed here: see Part 5 Chapter 6 ITEPA.

[85] Now HS211 (Employment - residence and domicile issues (2017))

employment that are not taxable in the UK. The total earnings are multiplied by a fraction where the numerator is the number of days worked outside the UK and the denominator is the number of days worked in pursuit of the employment during the tax year. Where there are no UK-based earnings taxable under either section 25 or section 27 ITEPA, the resultant figure will be entered at Box 1.31 on the employment page as foreign earnings not taxable in the UK...

Note 4 to IR211 clarifies what is meant by days worked overseas. They are defined as those days that have been spent outside the UK substantially performing the duties of the employment.[86] "Substantially" should be taken as meaning "for the most part".

In *Platten v Brown* there is the example of an employee who spends a whole day working in the UK but then leaves the country that evening on an overseas business trip. It would be difficult to say as a matter of contract that the employee's earnings for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the earnings for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

There are two questions of fact to be addressed in order to attribute the earnings for a particular day. These are:

- whether the day has been spent substantially performing the duties of the employment
- where those duties have been performed.

Employees should retain evidence such as travel documents and business diaries to demonstrate how they have calculated the earnings from overseas workdays...

34.31.1 *HMRC example*

EI Manual provides:

EIM77020 General earnings in respect of duties performed in the UK [Nov 2019] ***Example** (Monica)*

M is resident but not ordinarily resident in the UK. Her salary of £100,000 is paid directly into an offshore bank account. Her contract of employment provides for a five-day 40-hour working week with 22 days holiday plus public holidays - a total of 230 workdays.

During 2005-06, her employer sent her to work at its branch in India for the whole of October and November, a period of 45 weekdays. She also

[86] Now Note 5 HS211, which provides: "Days worked overseas are those days which have been spent outside the UK substantially performing the duties of the employment."

attended the branch office in India on the first Saturday and Sunday in October and spent three other Saturdays working on her employer's Indian premises. She received a special bonus of £15,000 awarded solely in recognition of her work in India.
In addition, she attended her employer's Munich office on five separate occasions during the year. On four of these occasions, she left the UK after work and stayed overnight before returning to the UK on the following evening. On the final occasion, she left the UK on a Friday evening and spent the weekend in Munich. She spent three hours of the Sunday reading papers relevant to a meeting on the following day. She returned to the UK on Monday evening.

The HMRC analysis is as follows:

M was substantially performing the duties of her employment on the five non-weekdays spent working in India, giving a total 50 workdays in India. The Sunday in Munich was not an overseas workday so her duties in Germany encompassed five workdays. The special bonus was on the facts solely attributable to the performance of duties in India.
Time apportionment produces the following result –
UK duties - Salary 100,000 × 180/235 = 76,595 (Section 25 ITEPA)
Overseas duties - Salary 100,000 × 55/235 = 23,405 + 15,000 = 38,405

Example - variation A
Following her return to the UK, M's employer gave her time off in lieu of the weekends spent working in India. The denominator in the fraction would become 230 and not 235.
UK duties - Salary 100,000 × 175/230 = 76,086 (Section 25 ITEPA)
Overseas duties - Salary 100,000 × 55/230 = 23,914 plus 15,000 = 38,914

Example - variation B
Facts are as variation A plus M spent the whole of Sunday 30 September travelling to India and was granted a further day off in lieu when she returned to the UK. That day should also be counted as an overseas workday increasing the numerator by one to 56.
UK duties - Salary 100,000 × 174/230 = 75,652 (Section 25 ITEPA)
Overseas duties - Salary 100,000 × 56/230 = 24,348 + 15,000 = 39,348

34.31.2 *International travel*

Taylor v Provan concerned reimbursed travel expenses of a non-resident employee:[87]

[87] 49TC 579 at p.607. The deductibility of the expenses was a separate issue; see 35.14 (Travel in performance of duties).

> It was submitted that the taxpayer's travelling expenses to and from the United Kingdom ... were ... not emoluments in respect of duties performed in the United Kingdom'. I am unable to accept this submission. The taxpayer was not resident in the United Kingdom, and when he travelled to and from the United Kingdom in order to perform such part of his duties as had to be performed in the United Kingdom he was reimbursed his travelling expenses. I consider that the sums that he received were emoluments 'in respect of' his duties performed in the United Kingdom.

Note 5 HS211 provides:

> Days worked overseas are those days which have been spent outside the UK substantially performing the duties of the employment. This may include travelling, where the journey is itself part of the duties.

This is not exactly guidance. EI Manual provides something more specific:

> **EIM77020 General earnings in respect of duties performed in the UK** [Nov 2019]
> ***... international business travel***
> The time of departure or arrival and the duration of international business travel can make it extremely difficult to decide whether a particular day should be regarded as a UK or an overseas workday. In these specific circumstances, HMRC is prepared to accept that the following treatment provides a reasonable basis for determining the status of such a day:
> International flight or journey lasting no more than seven hours
> - Morning arrival – UK workday
> - Morning departure – overseas workday
> - Afternoon arrival – overseas workday
> - Afternoon departure – UK workday
>
> International flight or journey lasting more than seven hours
> - Morning arrival – half UK workday and half overseas workday
> - Morning departure – overseas workday
> - Afternoon arrival – overseas workday
> - Afternoon departure – half UK workday and half overseas workday
>
> A morning or afternoon arrival or departure is judged according to the time that the aircraft, vessel or train actually arrives or departs, not the scheduled times.
> Where a journey involves more than one international flight, a one hour transfer addition may be added to the actual flight times to determine

> whether the total flight time lasts more than seven hours. International business travel that takes place on a Saturday, Sunday or Bank Holiday is subject to the same treatment as any other day.
> Note: HMRC may accept alternative approaches to quantifying overseas workdays if the available evidence indicates that such an approach better reflects the facts.

34.31.3 *Work in UK due to Covid*

HMRC guidance provides:[88]

> **If you're a non-UK resident and were stuck in the UK because of coronavirus (COVID-19)**
> If you could not leave the UK when you intended because of coronavirus, you will not have to pay UK tax on employment income that:
>
> - you earned between the dates you intended to leave and when you actually left
> - you paid tax on in your home country
>
> **Example**
> You missed your departure flight because you were self-isolating and you worked in the UK until you could rearrange a flight home. As long as you pay tax on your wages in your home country, you will not have to pay tax in the UK.
> You must file a Self Assessment tax return, together with a completed SA109 form. Use the 'other information' section of your SA109 to include:
>
> - the dates you were stuck in the UK because of coronavirus
> - what you earned in that time
> - confirmation you paid tax on these earnings in another country
>
> ...HMRC may ask you for proof that you:
>
> - could not leave the UK when you intended, for example an NHS isolation note
> - paid tax in another country on what you earned while stuck in the UK
> - left the UK as soon as you reasonably could
>
> You may have to pay tax in the UK if you cannot prove you were unable

[88] HMRC, "Tax on your UK income if you live abroad" *https://www.gov.uk/tax-uk-income-live-abroad*
EIM77045 (COVID-19 considerations for non-residents and non-domiciled employees for 2020 to 2021) refers to this, but it does not provide further details so it need not be set out here.

to leave the UK and did not leave as soon as you could.

HMRC say:

> 5.5 HMRC advised that, since the last forum meeting, it has received a few queries regarding the guidance Tax on your UK income if you live abroad, which HMRC previously referred to as "s41ZA guidance" at previous forum meetings.
> 5.6 This is the guidance which means that, in certain circumstances, individuals will not have to pay UK tax on employment income relating to days stuck in the UK because of Coronavirus.
> 5.7 HMRC advised that, following feedback from the forum, the guidance page has been amended to make it clear that this relates to non-residents. The rationale for only applying to non-residents is held at the EIM Appendix which was previously shared...
> 5.9 A claim can only be made by an individual on a Self-Assessment Tax Return. HMRC specialists have confirmed that the guidance cannot be used to determine the amount on which PAYE is operated.
> 5.10 Therefore, when operating PAYE, an employer should not anticipate any claim which may be made by the employee and should instead operate PAYE as normal i.e. not excluding any employment income relating to days stuck in the UK because of Coronavirus. Employees should then file a tax return if they wish to make a claim for PAYE tax deducted to be refunded.
> 5.11 A consequence of this is that employees on an Appendix 8 scheme, who would not normally be required to submit a tax return, will need to file a return to make a claim.
> 5.12 Another consequence is that the days 'stuck' in the UK because of Coronavirus will count towards the 60 or less UK workdays criteria of an Appendix 8 scheme.

34.32 Remitting after year earnings are for

Suppose:

(1) T receives earnings for year 1; the earnings are taxed on the remittance basis and are not remitted in that year.

(2) The earnings are remitted in year 2.

For the COE remittance basis, s.22 ITEPA provides:

> (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and

> (b) the employee does not meet the requirement of section 26A [recent arrival] for that year.
>
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year. ...

Similarly, for the OWR remittance basis, s.26 ITEPA provides:

> (1) [a] This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee meets the requirement of section 26A [recent arrival] for that year, if
>
> [b] the general earnings are neither—
>
> (a) general earnings in respect of duties performed in the UK, nor
>
> (b) general earnings from overseas Crown employment subject to UK tax.
>
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

The earnings are "taxable earnings from the employment in that year" ie year (2). In year (1) the earnings are not "taxable earnings" (as defined).

34.33 Remittance after employment

Section 22(3) ITEPA provides:

> Subsection (2) [charge on remittance of COE] applies whether or not the employment is held when the earnings are remitted.

Section 26(3) ITEPA provides the same rule for the OWR remittance basis.

34.34 Earnings for year employee non-resident

To be "overseas earnings" the earnings must be "for" a year of assessment in which the employee was resident in the UK. Accordingly, any earnings "for" a year during which the employee was not UK resident can be remitted at any time without a charge to tax.

34.35 Remittance when non-resident

Suppose earnings taxable on the remittance basis are remitted in a year when the employee is non-resident. In the HMRC view the earnings are taxable. EI Manual provides:

> **EIM42371. Foreign earnings taxed at time of receipt in UK: *Example*** [Nov 2019]
> An employee is resident in the UK and meets the conditions of section 26A in 2014/15. She has earnings for that year of £10,000 in respect of duties performed outside the UK. She is paid the £10,000 in New York in 2015/16. In 2016/17 she remits £5,000 of those earnings to the UK. The result is that this employee is chargeable under Section 26(2) ITEPA 2003 on £5,000 in 2016/17.
> This employee is likely to be resident in the UK in the year of remittance but she is assessable on the remittance even if she is not. What matters is her residence status in the year when the money was earned (see EIM42201). She will also be assessable on any further remittances out of the £5,000 balance that remains.
> Note that the employee is chargeable on any remittances to the UK even if her employment ceases in 2015/16 (see EIM42370).

Is this correct? It is a surprising anomaly compared to the position for RFI, and enforcement may be difficult, but this is the natural reading of the legislation. The TNR rules are drafted on that basis: hence they apply to RFI but not to employment income.

34.36 Receipt/remittance after death

Section 13(4) ITEPA provides:

> If the tax is on general earnings received, or remitted to the UK, after the death of the person to whose employment the earnings relate, the person's personal representatives are liable for the tax.

EI Manual provides:

> **EIM42380. Basis of assessment for general earnings: earnings received after the death of an employee or office holder** [Nov 2019]
> When an employee or office holder dies, earnings received (or, if the employee was subject to the special rule for certain foreign earnings, received in the United Kingdom) after the date of death are assessable on the personal representatives in the same way as if they had been received by the employee or office holder (see generally EIM42201). The earnings will, of course, all have been earned in periods before the date of death and in many cases, adopting the statutory position could place an additional burden upon the personal representatives and family of the deceased but may not result in materially different overall tax liability. Sensible administrative procedures should be used in this type of case and a review should be undertaken to determine the assessing

basis which is most financially beneficial to the personal representative.
Note. The strict basis of assessment should always be applied when requested, and follow EIM42390.

When no request to apply the strict basis has been received and it is beneficial not to apply the strict basis you should take the pay and tax shown on the deceased's P45 as received in the period before the date of death (see generally EIM74101 for taxation of all pensions and annuities). Furthermore, when the death occurs close to the end of the tax year, a payment received in the year following death should also be treated in the way most beneficial to the estate. This is particularly relevant if the deceased was not liable to tax up to the date of death.

Note: State pension is treated as accrued income and is treat as income received prior to the date of death irrespective whether it is paid after.

The tax chargeable on the personal representatives is a debt due from and payable out of the deceased's estate.

As regards:

If it is contended that earnings cannot be attributed to any particular period during the lifetime of the deceased employee or office holder, see EIM40005.

So it is the place where duties were performed and the residence and ordinary residence status of the employee when the remuneration was earned that counts. The residence position of the personal representatives at the time the earnings are received (or, where the special rules for certain foreign earnings apply, received in the United Kingdom) is irrelevant.

In cases where an employee or office holder has died the employer will follow the instructions at page 12 of the Employer's Further Guide to PAYE. By following those instructions the employer will account for tax in the following way:

- when payments are made in a tax year following that in which the employee died the employer will prepare a new deductions working sheet and will use code OT Week1/Month1.

EIM42390 earnings received after the death of an employee or office holder: the charge on personal representatives [Nov 2019]

If an employee or office holder dies and earnings are received after the date of death, the personal representatives are charged to tax on them (see EIM42380). They are charged:

- at the OT rate only
- in the year the earnings are received (or, where the special rules for certain foreign earnings apply, received in the United Kingdom)
- without any allowances, deductions or reliefs except for the deductions, reliefs and exemptions that would have been due to the

employee had they lived.

The personal representatives cannot claim deductions for expenses that they incur separately themselves. The main deductions due are therefore:

- expenses within Sections 336 to 338 ITEPA 2003 incurred by the employee or office holder (see EIM31620 onwards)
- balancing allowances due to the employee or office holder; balancing charges will also fall on the personal representatives (see EIM36500 onwards)
- foreign travel and accommodation expenses within Sections 341, 342 and 370 to 376 ITEPA 2003 incurred by the employee or office holder (see EIM34000 onwards)
- professional fees and subscriptions within Sections 343 and 344 ITEPA 2003 (see EIM32880 onwards)
- where a lump sum is assessable under the "golden handshake" provisions the various exemptions that are available under Sections 404 to 414 ITEPA 2003 (see EIM13500 onwards).

A deduction that is due is not limited to expenses actually paid by the deceased. The personal representatives can have a deduction for an expense that the deceased was due to pay but that the representatives actually settle.

As regards:

- the time limit for assessing personal representatives, see EIM42400
- the treatment of earnings received up to the date of death, see EIM42410.

Where the arising basis applies, there is clearly a tax charge for earnings received after death by the PRs.

Where the remittance basis applies, it is difficult to see how there could be a charge on earnings received in the UK after the death of the employee, since the tax charge only arises on receipt by a relevant person, and there are no relevant persons after the death of an employee.

34.37 Earnings from Ireland

In the following discussion:

"Irish earnings" means earnings from an Irish resident employer; it is assumed that the conditions for the remittance basis are in principle all met (duties performed outside the UK, etc).

"Pre-2008 earnings" means earnings arising before 6 April 2008.

The UK/Ireland DTA also needs to be considered but it is not discussed here.

Similar points arise in relation to RFI; see 17.22 (RFI from Ireland).

34.37.1 *Earnings from 2008/09*

The position for earnings from 2008/09 is straightforward. The ITA remittance basis treats Irish earnings in the same way as any other foreign earnings. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish earnings were taxed on an arising basis.

34.37.2 *Pre-2008 earnings*

This change raised the problem of transition. Para 82 sch 7 FA 2008 provides:

> (1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if the individual—
> (a) was UK resident in that year, but
> (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year...
> (3) In relation to the general earnings, the definition of "foreign employer" in section 721(1) of ITEPA 2003 has effect as if at the end there were inserted "and not resident in the Republic of Ireland".

Amended as para 82(3) directs, s.721(1) ITEPA provides:

> "foreign employer" means an individual, partnership or body of persons resident outside the UK and not resident in the UK *and not resident in the Republic of Ireland*.

Thus (although this might surprise the residents of Eire) an Irish resident employer was not (for this purpose) a "foreign employer" so pre-2008 Irish earnings were not "chargeable overseas earnings" so the remittance basis does not apply to them. Para 82(3) is simply a roundabout way of disapplying the remittance basis charge for pre-2008 Irish earnings.

EN FB 2008 provides:

> 395. Subsection (3) ensures that the existing restriction on the application of the remittance basis in the case of employment income from employers resident in the Republic of Ireland continues to apply in relation to the remittance on or after 6 April 2008 of general earnings arising before that date. This will prevent double taxation as the general earnings have already been taxed when they arose.

In short, if:
(1) Irish earnings arose before 2008/09; and
(2) The earnings are remitted on or after 2008/09
there is no tax charge on remittance.

34.37.3 *Why is para 82(3) needed?*

Before 2008, s.721 ITEPA provided:

> *"foreign employer" means*
> *(a) in the case of an employee resident in the UK, an individual, partnership or body of persons resident outside the UK and not resident in the UK* ***or the Republic of Ireland,***

Under this definition, earnings from an Irish resident employer could not have been chargeable overseas earnings so at first it seems that para 82(3) is not needed. It may be that para 82(3) is otiose; it is inserted by mistaken analogy with para 83(3) (which is needed). However para 82(3) is needed on the assumption that where
(1) earnings arose before 2008/09 and
(2) the earnings are remitted from or after 2008/09
the question of whether the earnings qualify as chargeable overseas earnings is to be determined by the legislation as it stands in the year of remittance, and not by the legislation as it stood at the time that the earnings arose.

34.37.4 *Pre-2008 Irish earnings: Position pre-2008/09*

As noted above, according to statute, the remittance basis did not apply if the employer was resident in the Republic of Ireland: pre-2008 Irish earnings were taxable on the arising basis and not the remittance basis. The discrimination against Ireland was contrary to EU law.[89] Under para 82(3) discussed above, pre-2008 Irish source income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish source income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance. But the point will not now often arise.

34.38 Termination payments

A termination payment is charged under Part 6 ITEPA. A full discussion would need a long chapter.

[89] The point was discussed in the 6th edition of this book para 9.51 and 10.4.2.

Special rules which apply to seafarers are not discussed here.

34.38.1 *Post-employment notice pay*

Certain termination awards (post-employment notice pay) are taken out of s.403, and taxed as general earnings: s.402A-402E ITEPA. I hope to consider this in detail in a future edition.

Expat log Q&A provides:

> **Question**: The query that I raised yesterday is confirmation of HMRC's views on the period for which PENP general earnings is earned, for the purposes of the ITEPA 2003 sections that assess general earnings. FA (2) 2017 s 5(2) imported the s 402B PENP into the ITEPA 2003 s 7(5) list of amounts treated as general earnings (in sub-para (ca)). In HMRC's view, is the PENP earned for assessment purposes by reference to the period for which it is calculated as set out in the ITEPA 2003 s 402E rules?
>
> As another Forum attendee mentioned, HMRC's views would also be appreciated on the meaning of basic pay in s 402D(1) for PENP calculation in expatriate employee situations (in particular, taxequalised individuals).
>
> **HMRC answer**: PENP is 'for' the year it is received, unless the employment is not held in that year in which case s17 or s30 ITEPA will apply. In practice, this means that PENP will always be 'for' the year of termination.
>
> If the year of termination is a split year, PENP may be within s15 or it may be excluded earnings if it is attributable to the overseas part of the split year. Employers should decide to what extent PENP is attributable to the overseas part of the split year by considering where the employee would have worked during the period of notice, in line with Paragraph 2.6 of the commentary to the OECD model.
>
> For a tax-equalised employee, basic pay will be the total of:
>
> • The net amount of pay stipulated by the employment contract or assignment agreement
>
> • Any gross-ups on basic pay
>
> • Any gross-ups on disregarded amounts (e.g. allowances)[90]

The law in this area is to change next year. HMRC have published a policy paper, "Changes to the treatment of termination payments and

[90] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

post-employment notice pay for Income Tax" (July 2020). In short, the new rule is to be that non-residents are charged to tax and NICs on PENP to the extent that they would have worked in the UK during their notice period.

34.38.2 *Charge on termination payments*

In outline, s.401(1) ITEPA provides:

> This Chapter [Chapter 3 Part 6, termination payments] applies to payments and other benefits[91] which are received[92] directly or indirectly in consideration or in consequence of, or otherwise in connection with—
>
> (a) the termination of a person's employment
> (b) a change in the duties of a person's employment, or
> (c) a change in the earnings from a person's employment,
>
> by the person, or the person's spouse or civil partner, blood relative, dependant or personal representatives.

The charge is on the amount of the benefit: s.403(1) ITEPA provides:

> The amount of a payment or benefit to which this Chapter applies counts as employment income of the employee or former employee for the relevant tax year if and to the extent that it exceeds the £30,000 threshold.

34.38.3 *Territorial exemption*

Termination payments are categorised as specific employment income rather than general earnings. The consequence is to disapply the usual territorial rules. Instead, s.413(1) ITEPA provides a different territorial exemption:

> (A1) This section applies to a payment or other benefit if—
> (a) the payment or other benefit is within section 401(1)(a), and the employee or former employee is non-UK resident for the tax year in which the employment terminates, or
> (b) the payment or other benefit is within section 401(1)(b) or (c).
>
> (1) This Chapter [Chapter 3 Part 6, termination payments] does not apply if the service of the employee or former employee in the employment in respect of which the payment or other benefit is

[91] Benefit is defined in s.402 ITEPA (not considered here).

[92] Receipt is defined in s.401(3) ITEPA (not considered here).

> received included foreign service comprising—
> (a) three-quarters or more of the whole period of service ending with the date of the termination or change in question, or
> (b) if the period of service ending with that date exceeded 10 years, the whole of the last 10 years, or
> (c) if the period of service ending with that date exceeded 20 years, one-half or more of that period, including any 10 of the last 20 years.

The key term is "foreign service". The definition covers the entire history of the taxation of employment income. Section 413(2) ITEPA provides:

> (2) In subsection (1) "foreign service" means service to which subsection (2A), (3), (4) or (6) applies.
>
> (2A) This subsection applies to service in or after the tax year 2013-14—
> (a) to the extent that it consists of duties performed outside the UK in respect of which earnings would not be relevant earnings, or
> (b) if a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers' earnings).
>
> (3) This subsection applies to service in or after the tax year 2003–04 but before the tax year 2013-14 such that—
> (a) any earnings from the employment would not be relevant earnings, or
> (b) a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers' earnings).
>
> (3ZA) In subsection (2A)(a) "relevant earnings" means earnings for a tax year that are earnings to which section 15 applies and to which that section would apply even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year.
>
> (3A) In subsection (3)(a) "relevant earnings" means—
> (a) for service in or after the tax year 2008–09, earnings—
> (i) which are for a tax year in which the employee is ordinarily UK resident,
> (ii) to which section 15 applies, and
> (iii) to which that section would apply, even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year, and
> (b) for service before the tax year 2008–09, general earnings to which section 15 or 21 as originally enacted applies.
>
> (4) This subsection applies to service before the tax year 2003–04 and

> after the tax year 1973–74 such that—
>
> (a) the emoluments from the employment were not chargeable under Case I of Schedule E, or would not have been so chargeable had there been any, or
>
> (b) a deduction equal to the whole amount of the emoluments from the employment was or would have been allowable under a foreign earnings deduction provision.
>
> (5) In subsection (4) "foreign earnings deduction provision" means—
>
> (a) paragraph 1 of Schedule 2 to FA 1974,
>
> (b) paragraph 1 of Schedule 7 to FA 1977, or
>
> (c) section 192A or 193(1) of ICTA.
>
> (6) This subsection applies to service before the tax year 1974–75 such that tax was not chargeable in respect of the emoluments of the employment—
>
> (a) in the tax year 1956–57 or later, under Case I of Schedule E, or
>
> (b) in earlier tax years, under Schedule E,
>
> or it would not have been so chargeable had there been any such emoluments.

A payment satisfying the above conditions can be remitted free of income tax to the UK. It is a moot point why the payment does not give rise to CGT, but in practice HMRC do not take that point.

Section 414 ITEPA provides:

> (1) This section applies if—
>
> (za) either—
>
> (i) the payment or other benefit is within section 401(1)(a), and the employee or former employee is non-UK resident for the tax year in which the employment terminates, or
>
> (ii) the payment or other benefit is within section 401(1)(b) or (c),
>
> (a) the service of the employee or former employee in the employment in respect of which the payment or other benefit is received includes foreign service, and
>
> (b) section 413(1) does not except the payment or other benefit from the application of this Chapter.
>
> (2) The taxable person may claim relief in the form of a proportionate reduction of the amount that would otherwise—
>
> (a) be treated as earnings by section 402B(1), or
>
> (b) count as employment income as a result of section 403.
>
> (3) The proportion is that which the length of the foreign service bears to the whole length of service in the employment before the date of the termination or change in question.

(4) A person’s entitlement to relief under this section is limited as mentioned in subsection (5) if the person is entitled—

(a) to deduct, retain or satisfy income tax out of a payment which the person is liable to make, or

(b) to charge any income tax against another person.

(5) The relief must not reduce the amount of income tax for which the person is liable below the amount the person is entitled so to deduct, retain, satisfy or charge.

(6) In this section “foreign service” has the same meaning as in section 413(2).

EIM13680 Section 401 ITEPA 2003: Exceptions: Foreign Service: General [Jan 2020]

Section 413 ITEPA 2003

A payment or other benefit which falls within section 401 ITEPA 2003 is excepted from charge to income tax if a sufficient proportion of the employee’s, or former employee’s service in the employment in respect of which the payment or other benefit is received counts as ‘foreign service’. EIM13690 explains the rules for determining whether the employment included sufficient ‘foreign service’. Foreign service has a special meaning for this purpose (see EIM13690).

With effect from 6 April 2018, this exception is no longer available for payments and other benefits that fall within section 401(1)(a) ITEPA 2003, if all of the following criteria are met:

- the employee or former employee is UK resident for the tax year in which the employment terminates (see EIM42800)
- the employment is terminated on or after 6 April 2018
- the payment, or other benefit is received after 13 September 2017

…

EIM13692 explains how to treat termination payments that are no longer excepted from a charge to income tax because the employee, or former employee is UK resident for the tax year in which the employment was terminated.

Where the exception is available, it applies to:

- termination awards not benefiting from the £30,000 threshold and treated as general earnings
- a payment or other benefit which is chargeable to income tax as specific employment income by section 403 ITEPA 2003

In order to determine whether a sufficient proportion of the employee’s or former employee’s service counts as ‘foreign service’ it’s necessary to obtain the following information:

- the relevant date (this is the date of the termination (or change) in question) and
- the amount of foreign service during the employment down to that relevant date - EIM13690 explains how to do this

EIM13690 Section 401 ITEPA 2003: Exceptions: ‘Foreign Service’: Definition [Jan 2020]

Section 413 ITEPA 2003

EIM13680 explained that a payment or other benefit which falls within section 401

ITEPA 2003 may be fully excepted from a charge to income tax if a sufficient proportion of the employee's service counts as 'foreign service'. Foreign service has a special meaning for this purpose.

Meaning of 'foreign service'

For a payment or other benefit within section 401 ITEPA 2003 to which the exception may apply, it is necessary to establish whether a sufficient proportion of the employee's service counts as 'foreign service'. 'Foreign service' means service to which a), b), c) or d) below apply:

a) Service in or after the tax year 2013 to 2014 to the extent that it consists of duties performed outside the United Kingdom in respect of which earnings would not be relevant earnings.

b) Service in or after the tax year 2013 to 2014 if a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 ITEPA 2003 (deductions from seafarers' earnings) (see EIM33000).

c) Service in or after the tax year 2003 to 2004 but before the tax year 2013 to 2014 such that any earnings from the employment would not be relevant earnings.

d) Service in or after the tax year 2003 to 2004 but before the tax year 2013 to 2014 such that a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 ITEPA 2003 (deductions from seafarers' earning) (see EIM33000).

This guidance deals only with the legislation relating to periods of service after 5 April 2003. If service before 6 April 1974 is involved, see EIM13705.

If there is a period of service when there are no earnings from the employment, apply the guidance as if there were.

Up to 5 April 2008, 'relevant earnings' means earnings to which section 15 or section 21 ITEPA 2003 as then enacted applies (see EIM40002). So if the earnings fall within any other provision, the period counts as 'foreign service'.

From 6 April 2008, 'relevant earnings' means earnings which are for a tax year in which the employee is ordinarily resident in the UK and to which section 15 ITEPA 2003 applies (see EIM40002). So if any other situation applies to the earnings, the period counts as 'foreign service'.

Combine the periods within the duration of the employment that count as 'foreign service by applying the definitions above and then give the full exception if any one of the requirements from the table below are met (see example EIM13970).

Total period of service down to the relevant date	**Requirement for full exception to be given**
All cases of whatever duration	Three-quarters or more of the whole period of service comprises of foreign service.
More than 10 years	The whole of the last 10 years comprises of foreign service.
More than 20 years	One-half or more of the whole period of service (including any 10 of the last 20 years) comprises of foreign service.

For this purpose treat successive employments with different members of the same group of companies as if they were a single continuing employment where the payment takes account of that service, see example EIM13975.

With effect from 6 April 2018, the exception from income tax is no longer available where certain criteria are met. EIM13680 lists these criteria and the circumstances in which the exception is no longer available.

EIM13692 explains how to treat termination payments that are no longer excepted from a charge to income tax for 'foreign service' because the employee, or former employee was UK resident for the tax year in which the employment was terminated.

Note: a taxpayer with some foreign service who does not meet the requirements in the table above may be able to claim a foreign service reduction instead, see EIM13700.

EIM13692 Foreign Service: Interaction With PENP [Jan 2020]

With effect from 6 April 2018, 'termination awards' (see EIM13872) are split into 2 elements:

- termination awards not benefiting from the £30,000 threshold and treated as general earnings (see EIM13874)
- termination awards subject to section 403 ITEPA 2003 (see EIM13876)

With effect from 6 April 2018, exception from and reduction of income tax are no longer available where certain criteria are met. EIM13680 and EIM13700 list these criteria and the circumstances in which the exception and reduction are no longer available.

Where the exception from and reduction of income tax for "foreign service" are no longer available because the employee or former employee is UK resident for the tax year in which the employment was terminated consider the following treatment.

Post-employment notice pay (PENP)

Post-employment notice pay (PENP) is part of the element of the termination award which does not benefit from the £30,000 threshold and which is chargeable to income tax as general earnings for the tax year in which the employment ended. Section 15 ITEPA 2003 applies to general earnings for the tax year in which the employee is resident in the UK (see EIM40101 and RDR1 for further guidance on the application of split year treatment). In the case of a split year, a charge to income tax does not arise if the general earnings are attributable to the overseas part of the split year. Any attribution should be done on a just and reasonable basis.

Termination awards subject to section 403 ITEPA 2003

Termination awards subject to section 403 ITEPA 2003 are chargeable to income tax as specific employment income. The rules in Chapters 4 and 5 of Part 2 ITEPA 2003 don't apply to specific employment income. The amount of the termination award is chargeable to income tax irrespective of the employee, or former employee's residence status. However, in these circumstances it is necessary to consider any double taxation agreement (DTA) provisions in place (see EIM40601 and EIM13695) and the OECD commentary in Article 15 in respect of termination payments as appropriate (see EIM13698). These documents will determine which country has taxing rights over the income and how employers should comply with UK PAYE and foreign withholding tax requirements.

Foreign Service Relief is only available where the employee is non-UK resident for the tax year in which the employment terminates. EIM13877 explains the chargeability of post-employment notice pay for non-UK resident employees.

EIM13700 Section 401 ITEPA 2003: Foreign Service: Reduction Of Charge [Jan 2020]

Section 414 ITEPA 2003

EIM13690 explained that if an employee whose service includes 'foreign service' fails to satisfy the conditions for full exception, the employee might still qualify for a reduction in the charge to income tax for payments and other benefits that fall within section 401 ITEPA 2003.

Eligibility for reduction

With effect from 6 April 2018, the same restrictions apply to the availability of this reduction as apply to the full exception for "foreign service" (see EIM13680). A reduction of the charge to income tax is no longer available for payments or other benefits that fall within section 401(1)(a) ITEPA 2003, where all of the following criteria are met:

- the employee, or former employee is UK resident for the tax year in which the employment terminates (see EIM42800)
- the employment is terminated on or after 6 April 2018
- the payment or other benefit is received after 13 September 2017

However, the legislation, which removes the reduction in the circumstances above does not apply if the service of the employee or former employee includes 'foreign seafaring service' (see EIM33101). So, on, or after 6 April 2018, a reduction in the charge to income tax remains available for payments, or benefits received in connection with the termination of a person's employment if that employment included 'foreign seafaring service'. EIM13685 includes the definition of 'foreign seafaring service'.

If service before 6 April 1974 is involved, see EIM13705.

EIM13702 explains how the reduction applies where the employee or former employee is eligible for the reduction and their employment included 'foreign seafaring service'.

Calculation of reduction

Where an employee or former employee is eligible for the reduction and their employment included 'foreign service' follow the rules below.

The reduction for 'foreign service' applies to both the element of any termination payment that is post-employment notice pay (PENP) (see EIM13874) and the element which is subject to section 403 ITEPA 2003 (see EIM13872).

However, the reduction of each element must be calculated separately (see the examples at EIM13985).

The amount of the reduction in PENP is the amount of PENP multiplied by the length of 'foreign service' and divided by the length of total service before the relevant date (the meaning of relevant date is the same as in EIM13680).

EIM13877 explains the chargeability of post-employment notice pay for non-UK resident employees.

For the element which is subject to section 403 ITEPA 2003, the £30,000 threshold must be deducted before calculating the reduction (see example EIM13980). The excess over the threshold is called the 'amount charged to tax' (in section 414(2) ITEPA 2003 it is called the amount that would otherwise count as employment income).

The amount of the reduction is the 'amount charged to tax' multiplied by the length of 'foreign service' and divided by the length of total service before the relevant date. The result can be deducted from the 'amount charged to tax' if the qualifying conditions are met.

Note

The taxpayer can claim the foreign service reduction by notice in writing at any time up to 4 years from the end of the year of assessment to which the claim relates (for claims made before 2 April 2010 the limit is 5 years after 31 January following the end of the relevant year of assessment).

34.39 Relocation expenses

Section 271(1) ITEPA provides a somewhat limited relief for relocation expenses.

> (1) No liability to income tax in respect of earnings arises by virtue of—
> (a) the provision of removal benefits to which this section applies, or
> (b) the payment or reimbursement of removal expenses to which this section applies.

A full discussion of this relief requires a chapter to itself, but one point is relevant here. Section 271(2) ITEPA disapplies the relief for employees taxed on the remittance basis:

> Subsection (1) does not apply if (disregarding this section) the earnings are general earnings to which either of the following sections applies—
> (a) section 22 (chargeable overseas earnings for year when remittance basis applies and employee outside section 26), or
> (b) section 26 (foreign earnings for year when remittance basis applies and employee meets section 26A requirement).

However this is relaxed by informal concession:

> HMRC were asked to clarify whether or not the exemption for relocation expenses within Section 271 ITEPA 2003 was available against earnings taxed on the remittance basis. HMRC confirmed that the current legislation does not provide for relocation exemption to be available where the remittance basis is claimed. However HMRC were aware of existing practice whereby the relocation exemption was applied before apportionment in respect of non-UK workdays. Although this methodology was not consistent with the existing legislation HMRC were content to allow the practice to continue.[93]

34.40 Overseas Crown employment

General earnings from overseas Crown employment subject to UK tax[94]

[93] Joint Forum on Expatriates Tax and NICs Note of Meeting (September 2008) *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

[94] The expression "general earnings from overseas Crown employment subject to UK tax" is defined in s.28 ITEPA.

are taxed on an arising basis, regardless of residence, domicile and place of work. In the case of UK resident and ordinarily resident employees, such earnings are charged in the normal way under s.15 ITEPA and excluded from the remittance basis because the Crown is not a foreign employer. In the case of a UK resident employee, the earnings are charged in the normal way under s.15 and excluded from OWR by s.26(1)(b) ITEPA.[95] In the case of a non-resident employee, the charge is under s.27 ITEPA.[96]

The 1955 Royal Commission Report explains the reason:

> International comity does not permit the salary of the servant of one State to be taxed by another State: consequently a Crown servant, even if spending his whole time on work abroad, is not amenable to the local taxing jurisdiction and, if he is to be taxed at all, must be taxed by the UK taxing authority. No doubt the scale of remuneration for Crown servants abroad is fixed with these considerations in mind.[97]

34.40.1 *Low paid crown employee*

The EI Manual provides:

> **EIM40209: text of Board's Order under section 28(5)** [Nov 2019]
> ... On 19th June 2003 the Commissioners of Inland Revenue made an Order ("the 19th June Order") in exercise of the powers conferred upon them by section 28(5) of the Income Tax (Earnings and Pensions) Act 2003 ("the Act").
> The Commissioners for Her Majesty's Revenue and Customs now make this revised Order in exercise of the powers conferred upon them by section 28(5) of the Act.
> **Interpretation**
> In this Order
> "General earnings" has the same meaning as in Section 7(3) of the Act.
> "Overseas Crown employment" has the same meaning as in Section 28 of the Act.
> **General earnings excepted from the operation of section 27(2) Income Tax (Earnings and Pensions) Act 2003**
> General Earnings from overseas Crown employment in respect of an employee who-

[95] See 34.22 (Overseas Workday Relief).
[96] See 34.29 (Non-resident employee).
[97] Cmd 9474 para 307.

a. is not resident in the United Kingdom;
b. was engaged outside the United Kingdom; and
c. is employed in a grade the maximum rate of pay of which is less than the maximum rate of pay of a senior executive officer (or equivalent) employed in the same department of the United Kingdom Civil Service and working in inner London,

is excepted from the operation of Section 27(2) of the Act."

Amendments made to the 19th June Order by the Commissioners for Her Majesty's Revenue and Customs on 13th June 2006 and 26th March 2008 under section 28(5) of the Act continue to have effect so that paragraph 2 of this Order shall not apply to:

a. Queen's Gurkha Officers or any other members of the Brigade of Gurkhas who were recruited for that Brigade in Nepal; and
b. Members of the Royal Gibraltar Regiment.

34.41 Seafarers

The rules relating to seafarers and duties performed on vessels and aircraft are not considered here; see s.39(3), s.40, s.372 and Chapter 6 Part 5 ITEPA.

34.42 Lower-paid employee exemption

BN55 (22 April 2009) provides:

> Individuals with small amounts of foreign employment income
> 5. Individuals employed in the UK are currently required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. This is the case even where there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.
> 6. This obligation to file a return will be removed with effect from 6 April 2008 where such individuals have overseas employment income of less than £10,000 and overseas bank interest of less than £100 in any tax year, all of which is subject to a foreign tax.

EN FB 2009 provides:

> 11. This clause introduces a new income tax exemption for low-income employees working in the UK who meet certain conditions. Such individuals will typically be migrant workers employed in seasonal work in the agricultural or service sectors in UK and in other countries in the same tax year and whose overseas income is subject to tax where it is earned. Previously they were required to file a Self Assessment tax return, even in situations where there was no, or very little, tax to pay.

> This exemption removes that requirement in most cases.

According, s.828A ITA provides:

> This Chapter provides for an exemption from liability to income tax for an individual for a tax year if-
> (a) the individual is UK resident in the tax year but not domiciled in the UK in the tax year,
> (b) section 809B does not apply to the individual for the tax year, and
> (c) conditions A to F in section 828B are met.

I refer to these conditions as "**LPE conditions A to F**".

Section 809B will only apply if the individual makes a claim under s.809B, which where the LPE conditions are satisfied will never happen, so the important requirements are the LPE conditions.

34.42.1 *LPE cond. A: UK employment*

Section 828B(1) ITA provides:

> Condition A is that in the tax year the individual has income from an employment the duties of which are performed wholly or partly in the UK.

Section 828D ITA defines "employment":

> (1) This section applies for the purposes of this Chapter.
> (2) "Employed" and "employment" have the same meaning as in the employment income Parts of ITEPA 2003[98]: see Chapter 1 of Part 2 of that Act.

If these were income-tax wide definitions it would not be necessary to say this here.

34.42.2 *LPE cond. B: Cap on RFE*

Section 828B(2) ITA provides:

> Condition B is that, if the individual's income for the tax year consists of or includes relevant foreign earnings—
> (a) the amount of the relevant foreign earnings does not exceed £10,000, and
> (b) all of that amount is subject to a foreign tax.

[98] Parts 2-7A ITEPA; see 34.2 (Employment income Parts).

Section 828D(5) defines "relevant foreign earnings":

> "Relevant foreign earnings", in relation to an individual, means what would be the individual's relevant foreign earnings for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(3)).

Section 828D(4) ITA defines "foreign tax":

> "Foreign tax" means any tax chargeable under the law of a territory outside the UK.

See 108.13 ("Subject to tax").

The £10k limit for relevant foreign earnings applies for the full year and is not affected by split year treatment. So an individual who has already earned more than £10,000 abroad in the UK tax year before he or she arrived is not eligible.

The £10k limit has not changed since 2008.[99]

34.42.3 *LPE cond. C: Cap on interest*

Section 828B(3) ITA provides:

> Condition C is that, if the individual's income for the tax year consists of or includes income that is relevant foreign income by virtue of section 830(2)(e) of ITTOIA 2005—
> (a) the amount of that income does not exceed £100, and
> (b) all of that amount is subject to a foreign tax.

In order to understand the reference to s.830(2)(e) ITTOIA one needs to read it together with s.830(1):

> (1) In this Act "relevant foreign income" means income which—
> (a) arises from a source outside the UK, and
> (b) is chargeable under any of the provisions specified in subsection (2) (or would be so chargeable if section 832 did not apply to it).
> (2) The provisions are ...
> (e) Chapter 2 of Part 4 (interest)

34.42.4 *Cond. D: No other income/gains*

Section 828B(4) ITA provides:

[99] See 43.19 (Inflation/fiscal drag).

> Condition D is that the individual has no other foreign income and gains[100] for the tax year.

34.42.5 *Cond. E: Higher rate taxpayer*

Section 828B(5) ITA provides:

> Condition E is that the individual would not for the tax year be liable to income tax at a rate other than
> [a] the basic rate,
> [b] the savings basic rate,
> [c] the savings nil rate,
> [d] a Scottish rate below the Scottish basic rate,
> [e] the Scottish basic rate,
> [d] the Scottish intermediate rate or
> [e] the starting rate for savings
> if this Chapter did not apply to the individual for the tax year.

34.42.6 *LPE cond. F: No tax return*

Section 828B(6) ITA provides:

> Condition F is that the individual does not make a return under section 8 of TMA 1970 for the tax year.

Since a return is due if HMRC choose to require it, the position is that HMRC have a power to withdraw the exemption (by requiring a return). The rule is thus: no tax is due unless HMRC happen to ask for it. This is a new development in tax policy; one hopes it does not become standard. HMRC say:

> HMRC sought to clarify the intention behind the new legislation which was to remove the obligation on overseas migrant workers on low incomes to file an SA return in cases where there was little or no tax to pay in the UK. It was true that such individuals would no longer qualify for the tax exemption if they filed a return to claim a tax repayment, but the tax exemption was merely the vehicle for delivering the administrative saving. External delegates failed to understand why the

[100] Section 828D(3) ITA incorporates the standard commonsense definition of "foreign income and gains":
""Foreign income and gains", in relation to an individual, means what would be the individual's foreign income and gains for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(2))."

> exemption should also be lost if the individual filed not a tax return but an R40 to claim repayment of PAYE on UK income.[101]

In fact, the R40 form is not a tax return under s.8 TMA: *Osborne v Dickinson* [2004] STC (SCD) 104.

The RDR Manual provides:

> **RDRM32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income** [Jan 2019]
>
> Individuals employed in the UK are usually required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. However in many cases there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.
>
> From 6 April 2008 there is no obligation for individuals who are resident but not domiciled in the UK for a tax year to file a return as long as the individual is not claiming the remittance basis under ITA07/s809B and meets all of the following conditions (ITA07/s828A).
>
> [The Manual summarises conditions A - F and continues:] If all of these conditions apply, the individual receives an exemption from liability to income tax, in so far as that liability is attributable to the individual's foreign income or gains for the tax year (termed the 'relevant amount'). Broadly, the relevant amount is deducted from what would otherwise be the amount of the individual's liability to income tax for the tax year under ITA07/s23.
>
> This means that the individual is automatically taxed on the Arising Basis for that tax year, and does not have to complete a return.
>
> Most individuals who fulfil Conditions A to F are expected to use the Arising Basis and not complete a return. However there may be a small number of non-domiciled individuals who fulfil these conditions but who wish to use the remittance basis in respect of their foreign income and gains and are within the 'below £2,000 threshold' user group (ITA07/s809D). Such individuals will have to complete a return in order to claim the remittance basis under s809D; this will of course mean that Condition F of ITA07/s828A is no longer met, refer to RDRM32110 Unremitted foreign income and gains below £2,000 threshold. ...

[101] Joint Forum on Expatriates Tax and NICs July 2009 *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/consultations/expat-mins-160709.htm*

34.42.7 *The exemption*

Section 828C ITA provides:

> (1) The exemption is given by deducting the relevant amount from what would otherwise be the amount of the individual's liability to income tax for the tax year under section 23.
> (2) "The relevant amount" is so much of the amount of the individual's liability to income tax as is attributable to the individual's foreign income or gains for the tax year.

I refer to this as the "**Lower-paid employee exemption**."

34.42.8 *Restriction on exemption*

Section 828C ITA provides:

> (3) But if for the tax year the individual's total income is reduced by any deductions which fall to be made at Step 3 of the calculation in section 23 from the individual's foreign income or gains for the tax year, subsection (2) has effect as if the individual's foreign income or gains for the tax year were reduced by the amount of the deductions.
> (4) And if the individual is entitled under.
> (a) sections 2 and 6 of TIOPA 2010(double taxation arrangements: relief by agreement), or
> (b) section 18(1)(b) and (2) of that Act (relief for foreign tax where no double taxation arrangements),
> to a tax reduction in respect of the individual's foreign income or gains for the tax year, what would otherwise be the relevant amount is reduced by the amount of that reduction.

34.42.9 *Administration: Avoid SA return*

HMRC say:

> HMRC stressed that, whilst the exemption was not designed for employees on inter-company transfers, it had become clear that the exemption could be applied to certain assignees, in particular those from India and China.
> 3 The main issue was the difficulty in identifying the relevant individuals. Unless informed that they qualify for filing exemption, HMRC would issue SA returns, thereby preventing them from taking advantage of s828A. HMRC had designed an election letter for Expats to meet this need: agents should submit this letter at the same time as the 64-8, and after the P46 (Expat) had been filed, which would ensure that

> no SA return is issued.

This is essential as if a SA return is issued, the relief is lost. For the form of the letter, see Fisher, "Expat Exemption", *Taxation* 3 March 2011 p.18. HMRC continue:

> There was a separate issue with employers using EPM App 6 with a month 12 adjustment to eliminate any residual liability whose employees are required to submit a SA return. However, as some had very simple tax affairs, there was a case for allowing them to use s828A whilst remaining within EPM6. HMRC will seek to engage with such employers to reach a suitable agreement for their employee base. In such cases, the election letter will need to be completed but retained by the employer. If there are individuals who do not qualify, the employer or agent will need to submit an SA1 to request a return.
> A similar case existed for NR individuals who submit SA returns to get personal allowances under DTAs.[102]

34.42.10 *Critique*

Almost every requirement of the lower-paid employee exemption is anomalous. If the aim is to remove obligations to file a return where there is little or no UK tax at stake, why is it so limited? The provision presumably reflects effective lobbying by special interest groups concerned with lower-paid employees rather than a serious attempt to address compliance cost issues.

34.43 Tax equalisation

The EIM provides:

> **EIM77040. Appendix 4: Not ordinarily resident employees: Tax equalisation** [Nov 2019]
> ... In addition to salaries and benefits, employers may also provide their employees with the benefit of tax equalisation. This usually means that the employer undertakes to meet on the employee's behalf any additional tax payable above the tax that the employee would have paid in his home country. It is well established that such payments made on behalf of employees form part of their earnings. But before 2002, there was a difference of view between the then Inland Revenue and a number of accountancy firms about the extent to which such tax equalisation payments represent earnings in respect of duties performed in the UK.

[102] Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note *http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/expat-mins-290710.pdf*

The issue matters for NOR and NR employees: see 34.29 (Non-resident employee).

The view taken by the Inland Revenue and subsequently by HMRC is that tax equalisation payments represent earnings wholly referable to duties performed in the UK where the underlying tax liability is similarly wholly referable to duties performed in the UK. Therefore, where an employer pays a tax liability arising under section 25 on an employee's behalf, that payment will itself represent earnings wholly chargeable under section 25.

This view was approved by a Special Commissioner in 2001 in the case of *Perro v Mansworth* [2001] STC (SCD) 179. The Special Commissioner stated that it was an inescapable fact that the payment of tax by the appellant's employer was an emolument (earnings) in respect of UK duties since that tax was only payable because of the performance of duties in the UK.

Ms Perro's net earnings were time apportioned in accordance with SP5/84 in order to find the net attributable to UK duties as there was no specific attribution of salary or other benefits between UK and overseas duties. Following *Perro*, it has been accepted practice to gross up this net figure on the basis that the payment of tax on UK-based earnings represents additional earnings wholly referable to duties performed in the UK.

The Special Commissioner did not consider the treatment of reimbursement of tax on income other than employment income chargeable under what is now section 25. The employer of a tax-equalised employee may reimburse UK tax on investment income or capital gains. Employers may also pay foreign tax liabilities on the employee's behalf. Following the decision in *Perro*, the Inland Revenue was asked to give its view on the treatment of such reimbursements.

When apportioning earnings between sections 25 and 26, it is necessary first to consider whether those earnings are wholly referable to UK or non-UK duties on the facts. Clearly if this is so, there is no need to consider time apportionment. If the earnings are not wholly referable either to UK or non-UK duties, then time apportionment will be necessary in accordance with SP5/84.

If an employer reimburses personal tax liability arising on non employment income[103] such as bank interest, dividends or capital gains, then the first question is whether that reimbursement is a payment of earnings that relates wholly to either UK or non-UK duties. We do not consider that the physical presence of the employee in the UK in order to perform employment duties is sufficient justification for treating such reimbursements as wholly in respect of duties performed in the UK. In the absence of unusual facts, we believe that such earnings should be time apportioned. This will produce net section 25 earnings that will then need to be grossed up. The gross up will be on the basis that the payment of UK tax on earnings within section 25 is itself a payment of earnings wholly chargeable under section 25.

[103] Author's footnote: Employees are likely to claim the remittance basis so the tax charge is only on remitted income and remitted foreign gains. It is not clear that the employer ought to pay the charge on remitted income or gains as remittance is a decision of the employee. However it may be appropriate to do so.

With regard to foreign tax payments, the attribution between sections 25 and 26 will depend upon the facts and circumstances. If the foreign tax relates solely to overseas duties, then the payment of that tax by the employer will comprise earnings wholly referable to duties performed outside the UK that cannot be charged to tax under section 25. Alternatively, the foreign tax may be charged on worldwide income so that time apportionment is likely to provide the only practical mechanism for determining the attribution between sections 25 and 26.

With regard to the treatment of employer payment / reimbursement of tax chargeable under section 26, SP5/84 states that provided the earnings chargeable under section 25 are arrived at in a reasonable manner; HMRC is prepared to accept that a charge under section 26 will arise only where the aggregate of earnings received in the UK exceeds the amount chargeable under section 25 for that year. The amount chargeable under section 26 is therefore restricted to the excess of the aggregate over the amount chargeable under section 25.

Where the employer meets UK tax liability under section 26, the payment of that tax to HMRC will clearly be remitted to the UK. It is logical that the payment of the section 26 liability will itself be a payment of earnings chargeable under section 26 and as the tax payment will be remitted to the UK, the related gross up will also be wholly chargeable under section 26.

There can be significant practical difficulties in identifying whether earnings relate solely to non-UK duties and therefore fall within section 26. In such cases, HMRC would not generally dispute time apportionment between sections 25 and 26 on the basis of working days. If any earnings were allocated solely to section 26 as attributable wholly to non-UK duties, evidence should be available to justify the attribution, in the event of an HMRC enquiry.

Non resident employees

Some tax-equalised employees are not resident in the UK. They may perform substantive duties of their employment in this country. Unless the specific terms of a Double Taxation Agreement confer an exemption from UK tax on UK source employment income, such employees will be liable under section 27 ITEPA on earnings in respect of duties performed in the UK. Earnings for duties performed outside the UK will fall outside of the charge to UK tax on employment income. HMRC adopts the same approach to tax equalisation for non-resident employees as for those resident but not ordinarily resident employees whose earnings are apportioned between sections 25 and 26.

The following simple examples are intended to illustrate the basic approach to tax equalisation earnings described in this appendix. It is recognised that many cases will have much more complex facts and that the ensuing calculations will be similarly complex.

Example (Tanya)

T has been sent to the UK to work at her employer's UK branch for two years from 1 January 2005. She is resident but not ordinarily resident in the UK from the day of her arrival. In addition to her UK duties, her employer requires her to make regular and extensive visits to an overseas branch of its business in order to monitor an important project. Whilst assigned to the UK, T is subject to her employer's policy on tax equalisation which provides for her to receive the same net salary and benefits as if she had remained in her home state.

During 2005-06, T performed the duties of her employment on 225 days. She spent 158 days working in the UK and 67 days working overseas. Net salary and benefits from her employment were £100,000 of which £60,000 was received in the UK. Her employer was obliged to pay her tax liabilities in accordance with its tax equalisation policy. For simplicity, all calculations assume that T's income is chargeable to UK tax at 40%.

Scenario 1

T's only tax liability was incurred in the UK on the earnings from her employment.

Calculation of UK tax for 2005-06	
Net salary and benefits	100,000
Less amount attributable to overseas workdays – 67/225 (30%)	(30,000)
Attributable to the performance of UK duties	70,000
Gross up for UK tax at 4/6	46,666
UK-based earnings taxable under section 25 ITEPA	116,666
Tax at 40%	46,666
Remitted to the UK - 60,000 plus section 25 tax of 46,666	106,666
Section 26 ITEPA - SP5/84	Nil

Scenario 2

Facts as above but T's employer also paid UK tax liability of £5,000 on her investment income. As the £5,000 is not directly referable to the performance of duties inside or outside the UK, it falls to be time apportioned in accordance with SP5/84. Therefore, the £5,000 has been added to net salary and benefits before calculating and deducting the amount attributable to overseas workdays.

Calculation of UK tax for 2005-06	
Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to UK - 60,000 + s.25 tax 49,000 + other UK tax 5,000	114,000
Section 26 ITEPA - SP5/84	Nil

Scenario 3

Additionally, T's employer pays overseas tax liability of £5,000 direct to an overseas tax authority. The overseas tax is referable solely to the performance of duties outside the UK and is therefore excluded from the section 25 calculation.

Calculation of UK tax for 2005-06	
Net salary and benefits	110,000
Less overseas tax payment	(5,000)
Salary and benefits to be time apportioned	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to UK - 60,000 + s.25 tax 49,000 + other UK tax 5,000	114,000

Section 26 ITEPA - SP5/84	Nil

Scenario 4

Facts are the same as in Scenario 2 except that £70,000 out of the £100,000 net salary and benefits has been remitted to the UK.

Calculation of UK tax for 2005-06	
Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to UK - 70,000 + s.25 tax 49,000 + other UK tax 5,000	124,000
Net section 26 ITEPA - SP5/84	1,500
Gross up for UK tax at 4/6	1,000
Foreign earnings taxable under section 26	2,500
Total taxable earnings (sections 25 and 26)	125,000
Tax at 40%	50,000

34.44 Accountancy services benefit

Joint Forum on Expatriates Tax and NICs records a discussion on tax return preparation fee benefits:

> It was made clear that these discussions and any proposals or guidance based on them will relate only to circumstances where:
>
> - due to tax equalisation arrangements, the employer pays for accountancy services relating to the preparation and submission of the individual assignees' Tax Returns
> - tax return preparation is part of a wider bundle of services provided by the adviser as negotiated with the employer
> - S9A enquiry services are not included as part of the bundle
>
> In such circumstances HMRC accept that the level of benefit in kind should be arrived at by apportionment based on the facts. The mechanics of how the apportionment should be calculated are an operational issue and CPTT had already shared with delegates (within the meeting notes of 30 August 2007) an exchange with Ernst & Young LLP on this topic. CPTT did not have authority to agree fixed round sum figures applicable in all cases. Indeed, it was clear from the evidence submitted that there is no 'one size fits all'. However, CPTT were prepared, in due course, to provide some clarity of the level at which they perceive there to be a risk worthy of enquiry.
>
> The intention therefore would be to:
>
> - establish a level of tax return preparation benefit which if returned or exceeded will not prompt any enquiry
> - continue to allow for different figures to be reported based on the

available facts

- highlight that where levels of tax return preparation benefits are reported below this level it remains open to HMRC/CPTT to enquire into the precise figures and apportionment methodology to check the accuracy of Returns submitted

CPTT is still analysing the information provided but Martin Dwyer was able to say that the available evidence suggested that a level of around £600 per head would be reflective of a situation where a home and host country Return was completed.

HMRC remain of the view that any accountancy fees paid in respect of S9A enquiry work should be reported as benefits in kind. HMRC will continue to look for evidence of the payment of such fees and their position will be as clarified within the meeting notes of the Forum held on 30 August 2007, as follows:

> 'Where we find evidence to indicate that the costs of accountancy services related entirely to resolving the S9A enquiry, we will regard these costs as giving rise to a taxable benefit in kind. If your clients are unable to accept this treatment, we will need to refer an appropriate case to the Commissioners.'

Subsequent to the meeting HMRC has now completed its analysis of the information provided. From this we conclude that the levels of benefits which appear both realistic and reasonable are £650 per head where a home and host country Return is completed and £250 per head where only the host country (UK) Return is completed. Under existing circumstances these figures will represent levels which if returned or exceeded will not prompt an enquiry from CPTT. However, it has been recently highlighted by external representatives that the proposed levels of analysis necessary to support access to the remittance basis from 6 April 2008 is likely to lead to increases in the costs charged for UK Tax Return preparation where the remittance basis is claimed. If this proves to be the case there would be a need to recognise this and revise the figures for 2008-09 onwards accordingly.

HMRC reiterate that the sums quoted above are not intended to represent an agreed level of benefits which must be reported across the board. We recognise that there is unlikely to be consistency in the precise make up of the bundle of accountancy services provided across different cases and by the variety of advisers involved. Rather, the aim is to indicate a level at which CPTT perceive the level of risk to be worthy of enquiry.[104]

[104] Note of Meeting 18 September 2008 *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

A subsequent meeting of the forum records:

> **Q10: Accountancy fees in regard to partially tax-equalised employees**
> It is not clear which partially tax-equalised cases are covered by the agreement announced in the 18 September 2008 forum notes. By 'partially tax-equalised' we mean when the employer agrees to tax-equalise part of the employee's income/gains but not the whole. This is very common, often employers will tax equalise only employment income and even then might exclude elements such as share options.
>
> The notes mention 'due to tax equalisation arrangements, the employer pays for accountancy services' which perhaps suggests the precise nature of the equalisation arrangements is not in point. However, Appendix 6 of HMRC's Employment Procedures Manual – 'Modified PAYE' arrangements – says that those arrangements may be applied only to tax-equalised employees and, for that purpose, 'tax-equalised' means that:
>
> > ' ... the employer must equalise liability to UK Income Tax on all general earnings (see note) subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.
> >
> > Note: Where the employee is tax-equalised on all general earnings but not, for example, on taxable awards of securities options or the award of securities at undervalue (which is specific employment income) the employee may still be included within the arrangement as long as all the other conditions are satisfied'.
>
> It would seem rather restrictive to take the same approach in relation to accountancy fees as an employee's tax equalisation computations can be just as (possibly more) complex if only part of the earnings are equalised.
>
> **HMRC Answer:** It is the case that the guidance contained within the Forum meeting notes of 18 September 2008 was intended to relate to 'fully' tax equalised cases including those capable of inclusion within an EP Appendix 6 agreement.
>
> Where partial tax equalisation applies it seems to me that the extent to which the accountancy advice directly benefits the individual rather than the employer must increase and I would expect this to be reflected within the level of benefits reported.
>
> As in the case of tax equalised individuals, where HMRC wishes to check the amounts reported we will look at the amounts paid for the basket of services provided and seek to establish those parts of this basket which directly benefit the employer. It should then be possible to calculate a benefit in kind figure by reference to the balance on a per

> head basis.
>
> ...
>
> HMRC were asked to give clarification regarding whether or not the levels of accountancy fees, clarified at the meeting held on 18 September 2008, could be applied in respect of the 2008-09 SA Tax Returns. Martin Dwyer confirmed that these amounts were intended to reflect levels below which HMRC perceive there to be a risk and above which it was unlikely that HMRC would make an enquiry into the matter of accountancy fees relating to Tax Return preparation. They were not intended to represent mandatory levels of benefits which should be included on Tax Returns as HMRC accept that there will be cases where the true level of benefit varies from the figures provided for guidance. Against this background, however, HMRC confirmed that the same guidance could be extended to apply to 2008-09 SA Returns. As was confirmed in the answer to Q10, however, that guidance was intended to relate to fully tax equalised cases, including those capable of inclusion within an EP Appendix 6 agreement. Whilst it was accepted that this would include cases where tax equalisation applied to all employment income other than share based remuneration, the guidance was not intended to apply to circumstances where partial tax equalisation arrangements are in place which can often apply to a small proportion of the overall compensation package.[105]

The figures have since been increased:

> HMRC has .. taken a view to increase the levels for 2014-15 benefits in kind to £275 for one return and £700 for a home and host country return. The next review will be in April 2016.
>
> Members were reminded that the amounts are applied to fully tax equalised employees and are for tax return preparation fees only. Further benefits in kind should be reported where employers also bear the agent's fees for dealing with Section 9A enquires.[106]

CHAPTER THIRTY FIVE

TRAVEL EXPENSES: EMPLOYMENT INCOME

35.1 Introduction
35.2 "Workplace"
35.2.1 Necessary attendance
35.3 "Permanent" workplace
35.3.1 "Regularly"
35.4 "Temporary" workplace
35.4.1 Temporary purpose
35.5 Period of continuous work
35.5.1 24 month rule: Evidence
35.5.2 Continuous work
35.5.3 Change of temporary/permanent status
35.6 Minor workplace changes
35.7 Workplace a base
35.8 Deduction rule
35.8.1 Necessary attendance on occasion of travel
35.9 Ordinary commuting
35.9.1 Substantially ordinary commuting
35.10 Private travel
35.10.1 Substantially private travel
35.11 What is the journey?
35.12 Workplace an area
35.13 Remittance basis taxpayer
35.14 Travel in performance of duties
35.15 Wholly and exclusively
35.16 Conferences and seminars

35.1 Introduction

The deduction of travel expenses matters for two purposes:

(1) Taxation of employment income, obviously; and also

(2) Residence: time travelling counts as working if travel expenses are deductable, and time spent working in/out of the UK is important in ascertaining residence.[1]

Thus rules drafted for one purpose have been made to apply to a completely different purpose, for which they are rather less suitable.

The rules are set out in ss.337 - 342 ITEPA.

The development of the law can be traced through a series of consultation papers:

- Employee Travel & Subsistence (May 1996)

[1] See 6.22.8 (Travel).

- Tax relief for travel expenses: temporary workers and overarching employment contracts[2]

These are now of historical interest only.

OTS have issued two reports[3] and HMRC issued a consultation paper in 2015, but announced in Budget 2016 that it had decided not to make any changes.[4]

HMRC have issued guidance: Booklet 490 (Employee travel)[5] which I call "**HMRC travel guidance**" and the EI Manual contains almost 100 pages of guidance.

In outline, travel is deductable if the employee's attendance is necessary. There are two disallowance rules which override the general rule:

(1) Ordinary commuting
(2) Private travel

It may be helpful to have a summary:

Journey from/to	**Home**	**Temp workplace**	**Permanent workplace**	**Non-workplace**
Home		Deductible	Ordinary commuting	Private Travel
Temp workplace	Deductible	Deductible	Deductible	Deductible
Perm workplace	Ord commuting	Deductible	Deductible	Ord commuting
Non-workplace	Private travel	Deductible	Ordinary commuting	Private travel

In this chapter a journey is "**deductible**" if the expenses of travel are deductible from earnings.

I first consider the definitions of workplace, temporary and permanent.

35.2 "Workplace"

Section 339(1) ITEPA provides:

> In this Part "workplace", in relation to an employment, means a place at which the employee's attendance is necessary in the performance of the duties of the employment.

A home may be a workplace, but it does not matter because of the disallowance for ordinary commuting.

Workplaces are divided into permanent and temporary.

35.2.1 *Necessary attendance*

Necessity comes up twice in the provisions:

(1) In the definition of workplace: somewhere that "attendance is necessary" in general.
(2) In the attribution requirement: deductible expenses must be attributable to the employee's "necessary attendance" at a place.[6]

These rules may overlap but one may apply without the other.

Suppose the employee goes to visit an aunt, not in the performance of their duties, then:

(1) the aunt's house is not a workplace; and
(2) the attribution requirement is not met.

Suppose the employee goes to the office just to meet a friend, then:

(1) the office is a workplace; but
(2) the attribution requirement is not met.

Suppose the employee goes from X to office in order to work.

(1) W is (assume) a permanent workplace and the attribution condition is met.
(2) However deductibility depends on the status of X: the expense is deductible if X is a temporary workplace but not if it is a home or a non-workplace.

It is therefore best to consider separately the questions:

(1) whether a place is a workplace
(2) whether a journey is necessary.

[6] See 35.8 (Deduction rule).

> **EIM32270 The Necessary Attendance Rule** [Nov 2019]
> A workplace is defined by Section 339(1) ITEPA 2003 to mean a place at which the employee's attendance is necessary in the performance of his or her duties, see EIM32055.
> This means that a deduction for the cost of travel to a temporary workplace[7] will only be due where the employee can demonstrate that his or her attendance at that place was necessary on that occasion, in a real sense, to perform the duties of that employment.
> Usually the position will be straightforward and the requirement of the duties will be identical to the requirements of the employer. However, the strict test for a deduction is that the travel must be dictated by the duties of the employment. A deduction is only due where the travel or the attendance is an objective requirement of those duties, see EIM31647. T he personal convenience of the employee, or the employer, is not the factor that determines whether a deduction is due, see example EIM32271. ...

> **EIM32271 The Necessary Attendance Rule: Example** [Nov 2019]
> A technical writer normally works at his employer's head office. However, to enable him to look after an aunt who is unwell, his employer tells him[8] to work at his aunt's home for a few weeks.
> The employee's attendance at his aunt's home is not an objective requirement of the duties of his employment, see EIM32270. Even though he works from his aunt's home it is not a workplace, see EIM32055. ...

That is correct

> Therefore, no deduction is due for the cost of travel between his home and his aunt's home.

More analytically, there are two grounds for non-deduction (either of which would suffice): the attribution requirement is not met, and the private travel rule.

> **EIM32272 The Necessary Attendance Rule: Example** [Nov 2019]
> An employee works for a firm of estate agents that has branches across the West Midlands. She lives in Wolverhampton and works at the branch

[7] Author's footnote: or indeed any other travel cost.

[8] Author's footnote: It seems more likely that the employer would *permit* the employee to work at the aunt's home rather than *instruct* the employee to do so. But the result is the same either way.

> in Coventry. She has a number of business phone calls to make that can be made at any time during the day. Her employer tells her to stop off at the Birmingham branch on the way to her permanent workplace in Coventry in order to make some of the phone calls.
> No deduction is due for the cost of her travel from Wolverhampton to Birmingham. Her ordinary commuting journey does not become a business journey because she stops off at the Birmingham branch. The Birmingham branch is not a workplace on this occasion because her visit is not an objective requirement of the duties of her employment, see EIM32270.

More analytically, whether or not the Birmingham branch is a workplace, there is no deduction as the attribution requirement is not met.

It is not correct to say that the Birmingham branch is not a workplace "on this occasion." If it is a workplace as defined, it does not cease to be on the occasion of this visit. We are not told enough to say whether it is a workplace or not.

> Similarly, she is not entitled to relief for the cost of her journey from Birmingham to Coventry. Birmingham is not a workplace on this occasion and so the travel to her permanent workplace in Coventry is ordinary commuting, see EIM32055.

More analytically, there are two possibilities:

(1) The Birmingham branch might be a non-workplace. In that case the Birmingham to Coventry travel is disallowed under the ordinary commuting rule.

(2) The Birmingham branch might be a workplace, temporary or permanent. In that case the travel is disallowed as substantially ordinary commuting, since Birmingham is more or less on the commuting route from home (Wolverhampton) to the permanent workplace (Coventry).

35.3 "Permanent" workplace

Section 339(2) ITEPA provides:

> In this Part "permanent workplace", in relation to an employment, means a place which-
> (a) the employee regularly attends in the performance of the duties of the employment, and
> (b) is not a temporary workplace...

35.3.1 *"Regularly"*

The EI Manual provides:

> **EIM32070 Permanent Workplace: Regular Attendance** [Nov 2019]
> An employee regularly attends a particular workplace if the attendance is frequent, or it follows a pattern, or if the place is one at which the employee usually attends for all or almost all of the period for which he or she holds, or is likely to hold, that employment.
> The proportion of an employee's working time spent at a particular workplace is a factor in determining whether or not it is treated as a permanent workplace but it is not the only factor. Even if the employee attends the workplace only on one or two days a week, if it is on a regular basis, the workplace may still be a permanent workplace.

The last sentence is confirmed by *Kirkwood v Evans* where the employee worked four days a week at home, and one day a week in an office. The office was a permanent, not a temporary workplace.

35.4 "Temporary" workplace

The rule that travel to a temporary workplace is deductible is sometimes known as temporary workplace relief.

Section 339(3) ITEPA provides:

> In subsection (2) "temporary workplace", in relation to an employment, means a place which the employee attends in the performance of the duties of the employment-
> (a) for the purpose of performing a task of limited duration, or
> (b) for some other temporary purpose.

There are few words more vague than "temporary".[9] Section 339 restricts the concept specifying that three situations are not a temporary workplace (so they are classified as a permanent workplace). These relate to:

(1) Base of operations: s.339(4)
(2) Period of continuous work: s.339(5)
(3) Area of operations: s.339(8)

The second of these is the most important.

35.4.1 *Temporary purpose*

HMRC understand this quite liberally:

[9] "Permanent" is also surprisingly flexible; see 9.12.2 ("Permanent").

EIM32150 Attendance For A Temporary Purpose [Jan 2020]

...An employee may attend a workplace regularly and perform duties there that are not of limited duration without that workplace becoming a permanent workplace, provided that the purpose of each visit is temporary.

Where a visit is self-contained (that is, arranged for a particular reason rather than as part of a series of visits to the same workplace for the continuation of a particular task) it is likely to be for a temporary purpose.

HMRC give four examples of a temporary purpose:

EIM para	Job title	Frequency of Visit
32151	Safety Officer	Monthly
32152	Finance Director	Monthly
32153	Company Director	Monthly
32154	Teacher	Bi-weekly

EIM32151 Attendance For A Temporary Purpose: Example [Nov 2019]

An employee is a safety officer. He regularly visits a particular factory every month to carry out a safety check. His responsibility for that factory has been a duty of his employment for a period already spanning twenty years (so it is not of limited duration). However, the tasks he performs on each visit are self-contained and the purpose of each visit, considered alone, is temporary. So a deduction is due for the full cost of his travel.

He visits the factory regularly for the performance of his duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. His attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So the factory is a temporary workplace.

EIM32152 Attendance For A Temporary Purpose: Example [Nov 2019]

An employee is finance director of a large company based in Scunthorpe. Once a month her duties take her to the company's production unit in the south east. Her visits are to consider individual investment proposals but she takes the opportunity to discuss local welfare issues as a representative of senior management. A deduction is due for the full cost of travel between her home and the production unit.

She visits the production unit regularly for the performance of her duties.

So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. Her attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So the production unit is a temporary workplace.

EIM32153 Attendance For A Temporary Purpose: Example [Nov 2019]
An employee lives in Sidcup and has a permanent workplace in Broadstairs. He is a director of a company that has a number of regional offices. He has to attend a directors meeting on the last Friday of each month in Farnham. A deduction is due for the cost of travel between his home and Farnham.
He visits Farnham regularly for the performance of his duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. His attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So Farnham is a temporary workplace.

EIM32154 Attendance For A Temporary Purpose: Example [Nov 2019]
An employee is employed as a school teacher in Oswestry, which is a permanent workplace. Every fortnight she goes to an education authority meeting in Bridgnorth. A deduction is due for the full cost of travel between her home and Bridgnorth.
She visits Bridgnorth regularly for the performance of her duties. So it will be a permanent workplace if it is not a temporary workplace, see EIM32065. Her attendance is not of limited duration (see EIM32080) but each visit is for a temporary purpose, see EIM32150. So Bridgnorth is a temporary workplace.

35.5 Period of continuous work

Section 339(5) ITEPA provides:

> A place is not regarded as a temporary workplace if the employee's attendance is-
> (a) in the course of a period of continuous work at that place-
> (i) lasting more than 24 months, or
> (ii) comprising all or almost all of the period for which the employee is likely to hold the employment, or
> (b) at a time when it is reasonable to assume that it will be in the course of such a period.

A short term (ie temporary) job can and usually will have a "permanent" workplace.[10]

Section 339(6) ITEPA provides:

> For the purposes of subsection (5), a period is a period of continuous work at a place if over the period the duties of the employment are performed to a significant extent at the place.

The EI Manual provides:

> **EIM32080 Limited Duration, The 24 Month Rule** [Nov 2019]
> ...you should treat duties as performed to a significant extent at any workplace if the employee spends 40% or more of his or her working time at that place. ...
> The test is whether the employee has spent, or is likely to spend, 40% or more of his or her working time at that particular workplace over a period that lasts, or is likely to last, more than 24 months. Where that is the case the workplace is not a temporary workplace and so it is a permanent workplace. Travel between that place and home will be ordinary commuting and so is not deductible....
>
> **EIM32081 Temporary Workplace: Example** [Nov 2019]
> An employee has worked for 5 years at her employer's head office in Warrington. She is sent by her employer to perform duties at a branch office in Wigan for 18 months. A deduction is available for the full cost of her travel between home and the workplace in Wigan.
> Although the period in Wigan is a period of continuous work, because it is 40% or more of her working time (see EIM32080), that period does not exceed 24 months and so Wigan is a temporary workplace.

The next example is a straightforward application of the 24 month rule:

> **EIM32082 Temporary Workplace: Example** [Nov 2019]
> An employee has worked for his employer for 10 years and is sent to perform full-time duties at a workplace for 28 months. No deduction is due for the cost of travel between his home and that workplace because it is ordinary commuting.
> The workplace is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. However, the workplace is excluded from being a temporary workplace by the further

[10] This is self-evident but if authority is needed see *Kirkwood v Evans* [2002] STC 231 at [15]: "Commuting to and from work at a temporary job is ... ordinary commuting because the locus in quo is a 'permanent workplace' within [s.339(2)] and not a temporary one."

rule explained in EIM32080. His attendance is in the course of a period of continuous work (he works there for 40% or more of his working time) and it is known from the outset that it will exceed 24 months. So the workplace is treated as a permanent workplace.

The next examples illustrate the expectation test:

> **EIM32083 Temporary Workplace: Example** [Nov 2019]
> An employee has worked for her employer for 3 years and is sent to perform full-time duties at a workplace for 28 months, but the posting is unexpectedly ended after 18 months. No deduction is due for the cost of travel between her home and the workplace, because her attendance is expected to exceed 24 months (even though in fact it does not).
> The workplace is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. However, the workplace is excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works there for 40% or more of her working time) and it is expected at the outset that it will exceed 24 months. So the workplace is treated as a permanent workplace. The workplace is a permanent workplace even though, as it turned out, her actual attendance does not exceed 24 months.
>
> **EIM32084 Temporary Workplace: Example** [Nov 2019]
> An employee has worked for his employer for 3 years. He is sent to perform full-time duties at a workplace for 18 months. After 10 months the posting is extended to 28 months. A deduction is due for the full cost of travel to and from the workplace during the first 10 months but not after that.
> The workplace is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. At the outset the workplace is not excluded from being a temporary workplace by the further rule explained in EIM32080. Although his attendance is in the course of a period of continuous work (he works there for 40% or more of his working time) it is not expected at the outset that it will exceed 24 months. So the workplace is a temporary workplace at that time.
> After 10 months the expectation changes. The workplace is now excluded from being a temporary workplace by the further rule. His attendance is in the course of a period of continuous work and that period is expected to exceed 24 months. Therefore after 10 months the workplace becomes a permanent workplace.

In the next example the expectation test cuts both ways:

> **EIM32085 Temporary Workplace: Example** [Nov 2019]
> An employee has worked for her employer for 7 years and is sent to perform full-time duties at a workplace for 28 months. After 10 months the posting is shortened to 18 months. No deduction is due for the cost of travel to and from the workplace during the first 10 months but a deduction is available for the full cost of travel during the final 8 months.
> The workplace is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. At the outset the workplace is excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works there for 40% or more of her working time) and it is expected at the outset that it will exceed 24 months. So the workplace is a permanent workplace at that time.
> After 10 months the expectation changes. The workplace is no longer excluded from being a temporary workplace by the further rule. Her attendance is still in the course of a period of continuous work but it is no longer expected that the period will exceed 24 months. Therefore after 10 months the workplace becomes a temporary workplace.

In the next example the employee has two workplaces, one temporary and one permanent:

> **EIM32086 Temporary Workplace: Example** [Nov 2019]
> An employee lives and works in New Brighton where he is employed as an engineer. His employer sends him to work in Wrexham for 1½ days a week for 28 months. For the rest of the week he continues to work in New Brighton. A deduction is due for the full cost of travelling between the employee's home and Wrexham but not for the cost of travelling between his home and the workplace in New Brighton.
> New Brighton is and remains a permanent workplace of the employee. He attends it regularly for the performance of the duties of his employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.
> Wrexham is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. Wrexham is not excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance in Wrexham is not in the course of a period of continuous work because he does not work there for 40% or more of his working time. The 24-month test does not need to be considered. Wrexham is a temporary workplace and the employee is entitled to a deduction for the full cost of travel there and back.

In the next example the employee has two workplaces, both permanent:

> **EIM32087 Temporary Workplace: Example** [Nov 2019]
> An employee is employed as a food scientist by a manufacturer of ice cream cones. She lives in Porthmadog and works in Dolgellau. Her employer opens a new plant in Llandrindod Wells. She is sent to work there 4 days a week and expects to be there for 30 months. No deduction is due for the cost of travel between her home and Llandrindod Wells, or for travel between her home and Dolgellau.
> Dolgellau remains her permanent workplace. She attends it regularly to perform the duties of her employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.
> Llandrindod Wells is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. However, it is excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works there for 40% or more of her working time) and it is known from the outset that it will exceed 24 months. So the workplace is treated as a permanent workplace.
>
> **EIM32088 Temporary Workplace: Example** [Nov 2019]
> An employee is employed as a financial adviser working in Brighton. His employer sends him to an office in Bournemouth for one day a week over a 10 month period. He travels to Bournemouth directly from his home in Hastings. A deduction is due for the full cost of his travel between his home and Bournemouth but not for the cost of travel between his home and Brighton.
> Brighton remains his permanent workplace. He attends it regularly to perform the duties of his employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.
> Bournemouth is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. Bournemouth is not excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance is not in the course of a period of continuous work because he does not work there for 40% or more of his working time. The 24 month test does not need to be considered. Bournemouth is a temporary workplace.

In the next example the employee retains a permanent workplace and acquires a temporary workplace:

EIM32091 Temporary Workplace: Example [Nov 2019]

An employee is employed as a seal doctor at a zoo on the south coast. She is sent to Morecambe to supervise a seal sanctuary for one day each month. She was originally asked to undertake this task for 5 years. A deduction is due for the cost of travel between her home and Morecambe.

The south coast zoo remains her permanent workplace. She attends it regularly to perform the duties of her employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Morecambe is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. Morecambe is not excluded from being a temporary workplace by the further rule explained in EIM32080. Her attendance is not in the course of a period of continuous work because she does not work there for 40% or more of her working time. The 24 month test does not need to be considered. Morecambe is a temporary workplace.

EIM32092 Temporary Workplace: Example [Nov 2019]

An employee lives in Knaresborough and has a part-time employment working two days a week in Harrogate as a telephonist for an insurance company. He is asked to spend one of his two working days covering for a colleague at a branch in Ripon for a period of 32 months. No deduction is due for the cost of travelling between his home and Ripon or between his home and Harrogate.

Harrogate remains his permanent workplace. He attends it regularly to perform the duties of his employment and that attendance is not to perform a task of limited duration or for a temporary purpose, see EIM32065.

Ripon is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. However, Ripon is excluded from being a temporary workplace by the further rule explained in EIM32080. His attendance is in the course of a period of continuous work (he works there for 40% or more of his working time) and it is known from the outset that the period will exceed 24 months. So Ripon is treated as a permanent workplace.

This example shows that the percentage of working time at a workplace is determined by reference to the employee's actual working time and not by reference to a notional amount of working time appropriate to a full-time worker.

35.5.1 *24 month rule: Evidence*

The EI Manual provides:

> **EIM32100 The 24 Month Rule: How To Find Out The Expected Period Of Time At A Workplace** [Nov 2019]
>
> Usually it will be clear whether or not an employee expects to spend more than 40% of his or her working time at a particular workplace over a period of 24 months. Where there is some uncertainty you should decide cases on the facts that you can uncover.
>
> An obvious starting point is what the employer has told the employee. Another point to consider may be whether the employee has moved home as a result of the change in workplace. An employee may be less likely to relocate for a posting that is expected to last for less than 24 months and more likely to relocate for one that is expected to last longer. That is not to say that, if someone does move home as a result of a change of workplace, it necessarily means they expect the new workplace to be permanent, or that if they do not move home they necessarily expect the new workplace to be temporary. Moving home is not a test, it is only one factor to be taken into consideration, but it is an important one.
>
> You should look at each case in the round and consider not only any statements made by the employee and the employer, but also the expected duration of any project to which the employee is seconded and any agreements between the parties, whether or not they have been committed to writing. You may wish to look in more detail at any case in which the employee spends more than 24 months at a workplace and we had been told that he or she would not.
>
> In some cases there may have been a change in circumstances that has led to a change in the length of the secondment. The workplace will be a temporary workplace during any time in which the reasonable expectation was that the secondment would be for a period not exceeding 24 months, see EIM32080. Therefore we cannot conclude in all cases that a continuation of the secondment beyond the 24 month limit must mean that the workplace could not have been a temporary workplace at some stage. ...

35.5.2 *Continuous work*

The EI Manual provides:

> **EIM32105 The 24 Month Rule: Breaks In Attendance** [Nov 2019]
>
> ...A period of continuous work can remain continuous even where there is a break in attendance. This is illustrated by the examples beginning at EIM32106.

In the next example a 1 week break does not affect continuity:

> **EIM32107 The 24 Month Rule: Breaks In Attendance: Example** [Nov 2019]
> An employee is employed to work full-time on a construction contract that is expected to last for 6 years. Each time he gets close to having worked on the site for nearly two years his employer moves him to another workplace for a week before returning him to the long term project site. No deduction is due for the cost of travel between his home and the long term construction site.
> The site is capable of being a temporary workplace because his attendance is for a limited duration, see EIM32075. However, the site is excluded from being a temporary workplace by the further rule explained in EIM32080. His duties are performed to a significant extent (he works there for 40% or more of his working time) and the period on site is greater than 24 months. So the site is treated as a permanent workplace.

In the next example a 3 month break does not affect continuity:

> **EIM32108 The 24 Month Rule: Breaks In Attendance: Example** [Nov 2019]
> An employee is employed as a human resources consultant. She works full-time at a client's site for 17 months developing a new staff appraisal system and then deals with unexpected priority work elsewhere for 3 months. She then returns to the client's site for a further 6 months to co-ordinate the roll-out of the new system, as had been planned from the outset of the project. A deduction is due for the full cost of travel from her home to the client's site for the first 17 months but no deduction is due for travel costs for the further 6 months.
> The client's site is capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. For the first 17 months the client's site is not prevented from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in a period of continuous work (she works there for 40% or more of her working time) but it is not expected at the outset that the period will exceed 24 months. So for the first 17 months the client's site is a temporary workplace.
> For the further 6 month period the expectation has changed. She now expects to spend 40% or more of her working time at the client's site for a period that exceeds 24 months (17 + 3 + 6 = 26). Therefore, for the further 6 months the client's site is treated as a permanent workplace.

35.5.3 *Change of temporary/permanent status*

The EI Manual provides:

> **EIM32221 workplace ceases to be permanent: example** [Nov 2019]
> A full-time bank employee is sent to work for 6 months in a newly opened branch in another town. At the end of that period she accepts a promotion and stays at the new branch.
> For the first six months the new branch is a temporary workplace. Her attendance is for a limited duration, see EIM32075. A deduction is due for the full cost of travelling between her home and the new branch.
> After 6 months the new branch becomes a permanent workplace. Her attendance is not for a limited duration or for a temporary purpose, see EIM32065. A deduction is no longer due for her travel costs.
> Two years later she is asked to return to the old branch for 2 months to cover for an absent colleague. The old branch is now a temporary workplace because her attendance is for a limited duration, even though the old branch was a permanent workplace the last time she worked there. Her circumstances have changed and she is entitled to a deduction for the full cost of travelling between her home and the old branch.

35.6 Minor workplace changes

Section 339(7) ITEPA provides:

> An actual or contemplated modification of the place at which duties are performed is to be disregarded for the purposes of subsections (5) and (6) [period of continuous work at a place] if it does not, or would not, have any substantial effect on the employee's journey, or expenses of travelling, to and from the place where they are performed.

The EIM gives a straightforward example:

> **EIM32089 Temporary Workplace: Example** [Nov 2019]
> A computer consultant is the only employee of a company that she controls. She is a specialist in banking systems. She spends 18 months working full-time at the headquarters of a merchant bank in Lombard Street in the City of London. She then moves next door to design a new computer system for a different bank where she expects to stay working full-time for 22 months. After that assignment she moves to a bank close by on Cheapside for 17 months. The employee expects to work continuously in the City of London albeit on the premises of different banks. Her travel from home to work will be broadly the same every day. No deduction is due for the cost of travel between her home and any of these workplaces.
> ...Each of these workplaces would be capable of being a temporary workplace because her attendance is for a limited duration, see EIM32075. Each workplace taken in isolation would not be excluded

from being a temporary workplace by the further rule explained in EIM32080. Her attendance is in the course of a period of continuous work (she works at each workplace for 40% or more of her working time) but her time at each workplace taken in isolation does not exceed 24 months. However, when we ignore the change of workplace and consider the length of time spent at the three workplaces as if they were a single workplace, the total time spent does exceed 24 months. Therefore each of these workplaces is a permanent workplace.

EIM32280 Changes To A Workplace [Nov 2019]

An employee may change his or her workplace without that change having any substantial effect on his or her journey to work. If a change of workplace does not have any substantial effect on the employee's journey, or the expense of that journey, the change is ignored for the purposes of

- the 24 month rule (see EIM32100) and
- the fixed term appointment rule (see EIM32125).

The two workplaces are treated as a single workplace. So if an employee changes his workplace from Cardiff to Edinburgh that change would be recognised, while if the change is only to the office next door it would not be recognised.

The effect of this rule may be, for example, that two temporary workplaces are treated as a single permanent workplace. There will then be no deduction for the cost of travelling between the employee's home and either workplace because it will be treated as ordinary commuting.

Sometimes it may be difficult to decide whether a change of workplace should be recognised. The basic principle is that a change in the location or the boundaries of a workplace will be recognised as a change of workplace where the change has a substantial effect on:

- the journey an employee has to make to get to work and, in particular,
- the cost of that journey.

In practice you should recognise the change of workplace in all cases except where the change has made no significant difference to the commuting journey.

Where these conditions are met the new location is a new workplace even if it is close to the old workplace. The practical application of this rule is examined in examples EIM32281, EIM32282 and EIM32283.

EIM32281 Changes To A Workplace: Example [Nov 2019]

An employee is employed on a construction site for a period that is expected to last no longer than 18 months. At the end of that time his employer buys an adjacent plot to extend the site. The employee moves to work on the new plot and is expected to remain there for a further 9 months. His journey to work (and, in particular, its cost) does not change significantly.

The first site is a temporary workplace. His attendance is for a limited duration, see EIM32075. The site is not prevented from being a temporary workplace by the further rule explained in EIM32080. Although he attends it in a period of continuous work (40% or more of his working time), the period is not expected to last more than 24 months. So he can deduct the cost of travel between his home and the first site for that 18 month period.

The second site is not recognised as a new workplace because the change of site has no substantial effect on the employee's journey to work, see EIM32280. The two sites are treated as a single workplace. Although the attendance at that single workplace is for a limited duration the workplace is prevented from being a temporary workplace by the further rule explained in EIM32080. The attendance is in a period of continuous work that is expected to last for more than 24 months (18 + 9 = 27 months).

EIM32282 Changes To A Workplace: Example [Nov 2019]

An employee works for an employer who has several offices close to each other in London. Her employer rotates staff around the offices every 18 months. She works at one office and is then moved to another. She travels to work on the Underground and, although she now gets off ten stops further on than previously, her journey is largely unaltered and the price of her ticket does not change.[11]

The new office is not recognised as a new workplace because the change of site has no substantial effect on her journey to work, see EIM32280. Although her attendance at the new office is expected to be for a limited duration it will not be a temporary workplace. Her expected attendance at the single workplace represented by the two offices will be in a period of continuous work that is expected to exceed 24 months, see EIM32080. The new office is a permanent workplace and she cannot deduct the cost of travel between her home and the new office.

EIM32283 Changes To A Workplace: Example [Nov 2019]

An employee is employed on a major bridge construction project. To begin with he works on the north shore for a period that is not expected to exceed 16 months. At the end of that period he is transferred to the south shore for a further 16 months. Crossing the river is inconvenient

[11] Author's footnote: This seems unlikely.

(which is why a new bridge is needed) and it takes him longer to travel to the south shore than it did to travel to the north shore. It also costs him more. The two sites are not far apart as the crow flies and could be described as a single construction site. However the move from one part of the site to another has had a substantial effect on his journey to work. The two sites are separate workplaces and are not treated as the same workplace, see EIM32280. His attendance is for a limited duration and the sites are not prevented from being temporary workplaces by the further rule in EIM32080 because he does not expect to be at either for more than 24 months. So a deduction is due for the full cost of travel between his home and each site.

EIM32285 Changes To A Workplace: A Change In The Journey With No Change In Cost [Nov 2019]
The test for a change of workplace has two conditions, see EIM32280. So far we have focussed on a change in the cost of the journey.
However, where the journey to the new workplace is significantly different to the journey to the old workplace we can recognise a change of workplace even where the cost of the two journeys is similar. This is illustrated by example EIM32286.

EIM32286 Changes To A Workplace; A Change In The Journey With No Change In Cost: Example [Nov 2019]
An employee lives near Ludlow. Each day she used to drive 25 miles north to her workplace in Shrewsbury. Her job is moved and she now drives 25 miles south each day to her new workplace in Hereford.
Her mode of transport is the same, the time taken is the same and the cost of her journey is the same. However, this is an accidental consequence of where she lives. If she lived elsewhere the change in workplace might have had a substantial effect on the cost of her travel. The location of her new workplace is significantly different from the location of her old and her commuting journey is also significantly different. The new location is a new and different workplace, see EIM32285.

35.7 Workplace a base

Section 339(4) ITEPA provides:

> A place which the employee regularly attends in the performance of the duties of the employment is treated as a permanent workplace and not a temporary workplace if-
>
> (a) it forms the base from which those duties are performed, or
>
> (b) the tasks to be carried out in the performance of those duties are allocated there.

The EIM has a discussion which is not set out here.

35.8 Deduction rule

Section 338(1) ITEPA provides:

> A deduction from earnings is allowed for travel expenses if-
> (a) the employee is obliged to incur and pay them as holder of the employment, and
> (b) the expenses are attributable to the employee's necessary attendance at any place in the performance of the duties of the employment.

I refer to s.338(1)(b) as the "**attribution requirement**." The place at which the employees attendance is necessary will *ex hypothesi* be a workplace (as defined). But the relief applies not just to travel to that workplace, but to travel expenses *attributable* to that attendance. That would in principle include travel to the workplace and travel back from the workplace. Suppose an employee in California needs to attend a director's meeting in Peterborough. They may fly to London, and then catch a train to Peterborough the next day. One might say there are two journeys, California/London and London/Peterborough. But even if that is so, the California/London journey may be deductible on the grounds that the expense is attributable to the attendance at the meeting in Peterborough.

35.8.1 *Necessary attendance on occasion of travel*

The EI Manual provides:

> **EIM32270 The Necessary Attendance Rule** [Nov 2019]
> ...A deduction is only available where the employee **has** to attend a temporary workplace on that particular occasion in order to carry out the duties of the employment, see example EIM32272.
> There will be cases where the position is not clear cut. You should closely examine any case where an employee appears to have been sent by his or her employee to a temporary workplace just to get a deduction for travel expenses.

35.9 Ordinary commuting

Section 338(2) ITEPA provides:

> Subsection (1) does not apply to the expenses of
> [a] ordinary commuting or

> [b] travel between any two places that is for practical purposes substantially ordinary commuting.

Section 338(3) defines ordinary commuting:

> In this section "ordinary commuting" means travel between-
> (a) the employee's home[12] and a permanent workplace, or
> (b) a place that is not a workplace and a permanent workplace.

The disallowance applies even if the home is a workplace.[13]

35.9.1 *Substantially ordinary commuting*

The EI Manual provides:

> **EIM32300 Journeys Treated As Ordinary Commuting** [Nov 2019]
> Sometimes an employee may travel to a temporary workplace without that journey being significantly different from his or her ordinary commuting journey. A journey that is for practical purposes substantially the same as the employee's ordinary commuting journey is treated as if it were also ordinary commuting. Therefore, no deduction is allowed for the journey, see EIM32055.
> This is intended as a common sense rule that applies where the journey between home and a temporary workplace is broadly the same as the employee's ordinary commuting journey. In particular, it will deny relief where employees or employers seek to turn an ordinary commuting journey into a business journey to try to get a tax deduction.
> Applying this rule will depend on the facts of the particular case and some common cases are illustrated by the examples beginning with example EIM32301. However, you should not try to argue that a journey to or from a temporary workplace is substantially ordinary commuting where the extra distance involved is 10 miles or more each way, see example EIM32306.
> A journey to a temporary workplace that takes the employee in a completely different direction to his or her ordinary commuting journey is not substantially ordinary commuting even if the distance is the same. Conversely, a journey that is made in broadly the same direction and is substantially the same length as the ordinary commuting journey is

[12] See 6.20 ("Home").

[13] This is self-evident, but if authority is needed, see *Kirkwood v Evans:* "The fact that his home was also a 'workplace' does not prevent it from being his home. [Section 338(3)](a) and (b) are alternatives. They do not both have to be satisfied for the definition of 'ordinary commuting' to apply."

> substantially ordinary commuting even if the employee takes a different route. The effect of this rule is illustrated by the examples beginning with example EIM32307.

The EI Manual gives 10 straightforward examples. In summary:

EIM no	**Temp/Permanent workplace distance**	**Special features**	**Relief**
32301	0.3 mile		no
32302	12 miles		yes
32303	15 miles	on route to permanent workplace	yes
32304	1.5 miles	on route to permanent workplace	no
32305	1.5 miles	different mode of transport	no
32306	11 miles beyond permanent workplace	drove past PW on the route	yes
32307	1 mile		no
32308	1 mile	two commuting routes	no
32309	15 miles		yes
32310	0.5 mile	outside normal working hours	no

In the first example the temporary workplace is 450 metres away from the permanent workplace:

> **EIM32301 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
> A health and safety inspector lives in Leicester and is employed in an office in Nottingham. His office is 500 yards from a bean processing plant that he has to inspect. He travels direct from home to the plant.
> Although the plant is a temporary workplace his journey to the plant is substantially the same as his ordinary commuting journey. Therefore his travel is treated as ordinary commuting and the cost is not deductible, see EIM32300.

In the next example the distance is 12 miles further:

> **EIM32302 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
> An employee lives in Pudsey and works 5 miles away in Leeds as a reprographics manager. One day she is asked to go to Ilkley to stand in for a colleague who is sick and so she travels an extra 12 miles.
> Ilkley is a temporary workplace and her journey to Ilkley is very different to her ordinary commuting journey to Leeds. The journey to Ilkley is not substantially ordinary commuting and so she is entitled to a deduction for the cost of the journey, see EIM32300.

In the next example the temporary workplace is on the commuting route but not close to the permanent workplace:

> **EIM32303 Journeys Treated As Ordinary Commuting: Example** [Mar 2020]
>
> An employee is a production manager. He normally drives to a permanent workplace 18 miles from his home. One day he has to visit a client to discuss in detail the specifications for a new product. The client's office is 3 miles along his ordinary commuting route. After he has seen the client he drives the remaining 15 miles along his ordinary commuting route to his permanent workplace.
>
> The client's office is a temporary workplace. The 3-mile journey to that workplace is on the same route as the employee's ordinary commuting journey but it is much shorter. So it is not substantially ordinary commuting, see EIM32300. The cost of the remaining 15-mile journey from the client's office to the employee's permanent workplace is also deductible as he is travelling between 2 workplaces, see EIM32360. The employee is entitled to mileage allowance relief for the full 18-mile journey, see EIM31330.
>
> This example can usefully be contrasted with example EIM32304.

In the next example the temporary workplace is on the commuting route and close to the permanent workplace:

> **EIM32304 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
>
> An employee is a housing officer who normally drives to a permanent workplace 4½ miles from her home. One day she has to visit a client who lives 3 miles along her ordinary commuting route. After seeing the client she drives the remaining 1½ miles along her ordinary commuting route to her permanent workplace.
>
> Her client's home is a temporary workplace. The journey to that workplace is along the same route as her ordinary commuting journey and is substantially the same length. So it is substantially ordinary commuting, see EIM32300. No deduction is due for the cost of the journey.
>
> This example can usefully be contrasted with example EIM32303. Although the two visits to clients are journeys of a similar length the outcome is different. The journeys have to be considered by reference to the ordinary commuting journey and cannot be considered in isolation.

The next example the temporary workplace is 1.5 miles from the permanent workplace:

> **EIM32305 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
>
> An employee is a teacher who normally travels the 15 miles to his school by moped. One day he has to visit a parent of one of his pupils to discuss the child's end of term report. The parent lives 1½ miles beyond the school. To save time he takes his car and drives along his ordinary commuting route, past the school and on to the parent's home. After his discussion with the parent he drives the 1½ miles back to school.
>
> The parent's home is a temporary workplace. The journey from home to the parent's home is along the same route as the employee's ordinary commuting journey and is substantially the same length. So it is substantially ordinary commuting, see EIM32300. No deduction is due for the cost of the journey.
>
> The fact that the employee uses a different mode of transport from normal does not effect the outcome. Regardless of the mode of transport this is substantially ordinary commuting.

In the next example the distance is 11 miles:

> **EIM32306 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
>
> An employee is a human resources manager who normally drives 9 miles to the office that is her permanent workplace. One day she has to visit a factory to discuss possible redundancies. The factory is 11 miles beyond her office. She drives the 20 miles to the factory along her ordinary commuting route and past her permanent workplace.
>
> The factory is a temporary workplace. The journey from home to the factory is along the same route as her ordinary commuting journey but is substantially longer. So it is not substantially ordinary commuting. She is entitled to mileage allowance relief for the whole journey.
>
> This example illustrates the practice of not treating a journey from home to a temporary workplace as ordinary commuting where the extra distance is 10 miles or more each way, see EIM32300.

In the next example the distance is one mile:

> **EIM32307 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
>
> An employee is a customer support manager for a computer company. He normally drives the 9 miles to his permanent workplace. One day he has to visit a client to sort out some problems with a computer. The client's premises are only a mile from his permanent workplace. His journey to the client is the same length as his ordinary commuting journey and is in almost exactly the same direction, although he does not follow exactly

> the same route.
> The client's premises are a temporary workplace. The employee's journey to the client is in almost exactly the same direction as his ordinary commuting journey and it is the same length. So it is substantially ordinary commuting, see EIM32300. No deduction is due for the cost of his travel.

In the next example the employee uses two commutes:

> **EIM32308 Journeys Treated As Ordinary Commuting: Example** [Nov 2019]
> An employee is a clerk in an insurance company. She works flexi-time and normally drives to the office that is her permanent workplace. The route she takes depends on what time she leaves the house. If she leaves before 8am she drives 8 miles along the A road. If she leaves later she drives 10 miles along the B road and drops her daughter off at school on the way. One day she has an early morning meeting with clients at their office which is 9 miles along the B road from her home. The early start means she cannot take her daughter to school.
> The client's office is a temporary workplace. The employee's journey from home to the client's office is along the same route as one of her ordinary commuting journeys and is substantially the same length. It is therefore substantially ordinary commuting, see EIM32300. No deduction is due for the cost of the journey.
> The fact that she has more than one commuting journey and that the journey to the client's office does not follow the route that she would take at that time is irrelevant. The journey is substantially an ordinary commuting journey.

In the next example the distance is 15 miles

> **EIM32309 Journeys Treated As Ordinary Commuting: Example** [Mar 2020]
> An employee is a senior executive in a publishing company. He normally drives 5 miles north from his home to the office that is his permanent workplace. One day he has to visit a client to discuss proposals for a new magazine. The client's office is 5 miles south of his home. After the meeting he drives 10 miles to his permanent workplace.
> The client's office is a temporary workplace. The 5-mile journey from home to the client's office is the same length as the employee's ordinary commuting journey but is in a completely different direction. So it is not substantially ordinary commuting, see EIM32300. He is entitled to mileage allowance relief for that journey. The cost of his 10-mile journey from the client's office direct to his permanent workplace is also

deductible because it is a journey between 2 workplaces, see EIM32360. The employee is entitled to mileage allowance relief on the full 15-mile journey, see EIM31330.

EIM32310 Journeys Treated As Ordinary Commuting: Example [Nov 2019]
An employee is an accountant. She normally works from Monday to Friday and drives the 20 miles to the office that is her permanent workplace. She needs to see a client who lives ½ mile away from her office. The client can only find time to discuss his accounts at the weekend. So one Saturday she drives to the client's home, travelling 19½ miles along her ordinary commuting route. After she has seen the client she carries on to her office to catch up on some paperwork.
The client's home is a temporary workplace. The journey to the client's home is along the employee's ordinary commuting route and is substantially the same length. So it is ordinary commuting, see EIM32300. No deduction is due for the cost of the travel.
This example is a reminder that a journey can be ordinary commuting, or substantially ordinary commuting, even if it is made outside the employee's normal working hours, see EIM32240.

35.10 Private travel

Section 338(4) ITEPA provides:

Subsection (1) does not apply to the expenses of
[a] private travel or
[b] travel between any two places that is for practical purposes substantially private travel.

Section 338(5) ITEPA defines private travel:

In subsection (4) "private travel" means travel between-
(a) the employee's home[14] and a place that is not a workplace, or
(b) two places neither of which is a workplace.

Para (a) is only needed where the home is a workplace.

Travel between a non-home and a workplace is not private travel, but it may be substantially private travel.

35.10.1 *Substantially private travel*

The EI Manual provides:

[14] See 6.20 ("Home").

> **EIM32320 Journeys Treated As Private Travel** [Nov 2019]
> ... Substantially private travel means journeys where the business purpose of the journey is merely incidental to some private purpose, or the journey is made substantially for private purposes rather than business purposes. ...

This adopts a purpose test, which is not the statutory test, but perhaps it is a reasonable way of approaching it, and in practice it should lead to the same result.

The EIM sets out some (apparently) straightforward examples of journeys with/without a main business purpose:

> **EIM32321 Journeys Treated As Private Travel: Example** [Nov 2019]
> An employee is harbour master at Larne. One day he travels to Belfast to visit his elderly mother but while he is there he calls in at a colleague's office to deliver some new charts of the Irish Sea.
> The purpose of the visit to Belfast was private and the trip to his colleague's office was merely incidental. So the journey is private travel, see EIM32320. No deduction is due for the cost of the journey.

More analytically, the journey was substantially home to Belfast (non-workplace); and so substantially private travel.

> **EIM32322 Journeys Treated As Private Travel: Example** [Nov 2019]
> An employee works in a dry cleaners in Carlisle. Her employer sends her to the Darlington branch to repair a machine that has been damaging clothes. While there she visits her ex- husband to discuss maintenance arrangements. She spends a longer time dealing with her private affairs than in fixing the machine.
> Her main purpose in going to Darlington was to fix the machine. The discussion with her ex- husband was time consuming but was merely incidental to her business travel. So this is not substantially private travel, see EIM32320. She can deduct the cost of travel between her home and Darlington.[15]

[15] There is another similar example, which does not add anything:
"EIM32324 Journeys Treated As Private Travel: Example [Nov 2019]
An employee lives and works in Norwich, where he is an administrator for a manufacturing company. His sister lives in Peterborough and he visits her there in February. Two months later he has to return to Peterborough to attend a meeting of the company's focus group. The meeting takes all day and he visits his sister for 2 hours in the evening.
His main purpose in visiting Peterborough is to attend the focus group meeting. The

More analytically, the journey was substantially Carlisle (home or maybe non-workplace) to Darlington (non-workplace); and so substantially private travel.

The second example is made easier as it identified the main purpose. But who is to say whether the main purpose was the ex-husband or the machine? The EI Manual acknowledges the problem:

> **EIM32320 Journeys Treated As Private Travel** [Nov 2019]
> ... You should not use this rule to deny a deduction where comparatively small sums and short distances are involved, see example EIM32325.
> It is sometimes not straightforward to identify journeys that are substantially private travel. It is easy enough to identify journeys that are substantially ordinary commuting because you can compare the journey to the ordinary commuting journey, see EIM32300. You do not have the same point of comparison to identify substantially private travel.
> As a result you may need to ask an employee about the purpose of particular journeys. Such enquiries need to be handled sensitively.

In the HMRC view:

(1) whether travel is substantially ordinary commuting depends on the geographical difference between the actual travel and the ordinary commute.

(2) whether travel is substantially private travel depends on identifying the main (substantial) purpose of the travel.

The first example involves a (relatively) short business extension or detour to a long private journey (US - home):

> **EIM32323 Journeys Treated As Private Travel: Example** [Nov 2019]
> An employee lives in Banbury and is employed as a systems analyst at an office in Aylesbury. He has a 3 week holiday in the USA. At the end of the holiday he flies back from New York to Heathrow. Instead of going home he drives direct from Heathrow to visit a client in Warwick who needs to see him urgently. The total cost of the journey from New York to Warwick is £2,500.[16]

visit to his sister on the same day is merely incidental to that business purpose. So the visit is not substantially private travel, see EIM32320. He can deduct the cost of his travel. It does not matter that he made the same journey for a private reason in February. That earlier journey was private travel but it does not follow that all travel by him to Peterborough must be private travel."

[16] Author's footnote: Presumably this employee travelled first class. The point of the figure is that it is not the "small sum" where can be disregarded.

> Although the employee had to visit his client, the reason for the greatest part of the journey, and for its cost, was private, his return from holiday. His journey was substantially private travel, see EIM32320. No deduction is due for the £2,500 that the travel cost.

More analytically, the journey was substantially New York (non-work) to Banbury (home); and so substantially private travel. Another way to reach the same conclusion would be to rely on the attribution requirement, and say that the expense is not attributable to the work, it is attributable to the holiday. The concept of attribution is flexible enough to reach the intuitively right result. But it is not necessary for HMRC to rely on that point.

> **EIM32325 Journeys Treated As Private Travel: Example** [Nov 2019]
> An employee lives in Cannock and has a permanent workplace in West Bromwich. One weekend she visits her grandmother in Lichfield. On Monday morning she drives from Lichfield direct to visit a client in Stafford.
> Although the employee began her journey from Lichfield for personal reasons, and her journey is 6 miles longer than it would otherwise have been, the journey is primarily made for a business reason. So it is not substantially private travel, see EIM32320. She is entitled to mileage allowance relief for that journey, see EIM31626.
> This example shows that you should not use the rule against substantially private travel to deny a deduction where small sums and small distances are involved.

More analytically, the journey was Lichfield (non-workplace) to Stafford (workplace); it was not substantially Cannock (home) to Stafford (which would be substantially private travel).

35.11 What is the journey?

In order to apply the ordinary commuting and private travel rules, one has to identify the journey.

> **EIM32230 Passing Work On The Way To Somewhere Else** [Nov 2019]
> An employee may pass a permanent workplace on the way to or from a temporary workplace. If the employee stops and performs substantive duties at the permanent workplace then there are two journeys; ordinary commuting between home and the permanent workplace and a business journey between the permanent workplace and the temporary workplace. A deduction will be due under Section 337 ITEPA 2003 for the cost of

the second of these journeys, but there is no deduction for the first.
If the employee does not stop at the permanent workplace, or any stop is incidental to the journey to the temporary workplace, the whole of the journey is a single journey. A deduction will be due under Section 338 ITEPA 2003, because the single journey is to a temporary workplace, unless the journey is substantially ordinary commuting, see EIM32300. See also example EIM32231.

EIM32231 Passing Work On The Way To Somewhere Else: Example [Nov 2019]
An employee drives each day between his home in Southampton and his office in Winchester. One day he has to travel on business to Birmingham. He travels directly from home to Birmingham but stops off at his office to collect some papers.
His stop in Winchester is incidental to his business journey to Birmingham. Therefore the whole of the travel between Southampton and Birmingham is treated as a single journey to a temporary workplace, see EIM32075. A deduction is available for mileage allowance relief, see EIM31626.

35.12 Workplace an area

Section 339(8) ITEPA provides:

> An employee is treated as having a permanent workplace consisting of an area if-
> (a) the duties of the employment are defined by reference to an area (whether or not they also require attendance at places outside it),
> (b) in the performance of those duties the employee attends different places within the area,
> (c) none of the places the employee attends in the performance of those duties is a permanent workplace, and
> (d) the area would be a permanent workplace if subsections (2), (3), (5), (6) and (7) referred to the area where they refer to a place.

Amended as s.339(8)(d) directs, s.339 provides:

> (2) In this Part "permanent workplace", in relation to an employment, means ~~a place~~ *the area* which—
> (a) the employee regularly attends in the performance of the duties of the employment, and
> (b) is not a temporary workplace.
> This is subject to subsections (4) and (8).
> (3) In subsection (2) "temporary workplace", in relation to an employment, means ~~a place~~ *the area* which the employee attends in the

performance of the duties of the employment—

(a) for the purpose of performing a task of limited duration, or

(b) for some other temporary purpose.

This is subject to subsections (4) and (5).

(4) ~~A place~~ *The area* which the employee regularly attends in the performance of the duties of the employment is treated as a permanent workplace and not a temporary workplace if—

(a) it forms the base from which those duties are performed, or

(b) the tasks to be carried out in the performance of those duties are allocated there.

(5) ~~A place~~ *The area* is not regarded as a temporary workplace if the employee's attendance is—

(a) in the course of a period of continuous work at that ~~place~~ *area*—

(i) lasting more than 24 months, or

(ii) comprising all or almost all of the period for which the employee is likely to hold the employment, or

(b) at a time when it is reasonable to assume that it will be in the course of such a period.

(6) For the purposes of subsection (5), a period is a period of continuous work at ~~a place~~ *the area* if over the period the duties of the employment are performed to a significant extent at the ~~place~~ *area*.

(7) An actual or contemplated modification of the ~~place~~ *area* at which duties are performed is to be disregarded for the purposes of subsections (5) and (6) if it does not, or would not, have any substantial effect on the employee's journey, or expenses of travelling, to and from the ~~place~~ *area* where they are performed.

The EIM has a discussion which is not set out here.

35.13 Remittance basis taxpayer

Section 335 ITEPA provides:

(1) The availability of certain deductions under this Chapter depends on whether the earnings are earnings charged on receipt or earnings charged on remittance.

(2) Sections 336 to 342-

(a) only apply if the earnings from which the deduction is to be made are earnings charged on receipt, and

(b) apply subject to section 354(1) if the earnings from the employment also include other earnings.

(3) Section 353 (which provides for a deduction for expenses of the kind to which sections 336 to 342 apply)-

(a) only applies if the earnings from which the deduction is to be

> made are earnings charged on remittance, and
>
> (b) applies subject to section 354(2) if the earnings from the employment also include other earnings.
>
> (4) In this Part-
>
> "earnings charged on receipt" means earnings which are taxable earnings under section 15 or 27, and
>
> "earnings charged on remittance" means earnings which are taxable earnings under section 22 or 26.

That takes us to s.354 ITEPA which provides:

> (1) If the earnings from an employment for a tax year include both earnings charged on receipt and other earnings (except earnings charged under section 22), no deduction is allowed under sections 336 to 342 from the earnings charged on receipt for an amount paid in respect of duties of the employment to which the other earnings relate.
>
> (2) If the earnings from an employment for a tax year include both earnings charged on remittance under section 26 and other earnings, no deduction is allowed under section 353 from the earnings charged on remittance for an amount paid in respect of duties of the employment to which the other earnings relate.
>
> (3) This section is to be disregarded for the purposes of the deductibility provisions.

35.14 Travel in performance of duties

Section 337(1) ITEPA provides:

> A deduction from earnings is allowed for travel expenses if-
>
> (a) the employee is obliged to incur and pay them as holder of the employment, and
>
> (b) the expenses are necessarily incurred on travelling in the performance of the duties of the employment.

This is very narrow.

> **EIM32171 Employees Who Work At Home: Example** [Nov 2019]
>
> An employee is employed to train animals to help disabled people. It is essential that these animals are familiar with a normal domestic environment and so most of the training takes place in his home. It is an objective requirement of his employment that his duties are carried out at his home.
>
> The employee's home is a workplace. A deduction is due for the cost of travel between his home and other workplaces that he attends to carry out the duties of his employment. A deduction is due whether those other

workplaces are permanent or temporary workplaces, see EIM32170.

EIM32172 Employees Who Work At Home: Example [Nov 2019]
An employee's duties are such that she often has to work late into the evenings. At such times she has no access to her employer's premises (her permanent workplace) and so she takes work home with her. It is nonetheless still a matter of personal choice where the work is done (it is not an objective requirement that it be done at home rather than elsewhere).

Her home is not a workplace. No deduction is due for the cost of travel between her home and her employer's premises because that is a permanent workplace. A deduction will be due for the cost of travel between her home and any workplace that is a temporary workplace, see EIM32170.

EIM32173 Employees Who Work At Home: Example [Nov 2019]
An employee works in his employer's office for 4 days every week but the requirements of the job dictate that he must work at home every Friday. It is accepted that his home is a workplace on Friday, see EIM32170.

His travel from home to his employer's office on Monday to Thursday is ordinary commuting because those premises are a permanent workplace, see EIM32065. His travel costs on those days are not deductible.

If he is unexpectedly required to visit the employer's premises on Friday to carry out the duties of his employment his travel costs are deductible under Section 337 ITEPA 2003. On that day he is travelling between two workplaces, see EIM32360.

EIM32351 Introduction [Nov 2019]
Section 337 ITEPA 2003 permits relief for travelling expenses necessarily incurred in travelling in the performance of the duties of the employment.

This was the original rule for employee travel expenses and was the only rule under which expenses could be deducted before 6 April 1998. It is a very restrictive rule because it is limited to travel that is carried out in the course of performing the duties of the employment, see EIM31650.

The extension of the rules for employee travel expenses from 6 April 1998 to include travel to temporary workplaces, see EIM32005, means that this rule is now only relevant to:

- travel between workplaces, see EIM32360 and
- travelling appointments, see EIM32366, and
- travel between home and work where

- home is a workplace (see EIM32760), and
- the place where the employee lives is dictated by the requirements of the job (see EIM32370).

EIM32356 Home To Work Travel [Nov 2019]

The Courts have established as a clear general principle that the cost of travelling from an employee's home to his or her normal place of work is not travel in the performance of the duties, see EIM31650. The expense merely puts the employee into a position to perform his or her duties.

The cases that have established this principle are:

Cook v Knott	2 TC 246
Revell v Directors of Elworthy Bros & Co Ltd	3 TC 12
Andrews v Astley	8 TC589
Ricketts v Colquhoun	10 TC 118, see EIM31641
Nolder v Walters	15 TC 380
Burton v Rednall	35 TC 435
Parikh v Sleeman	63 TC 75, see EIM32360
Miners v Atkinson	68 TC 629, see EIM32380
Kirkwood v Evans	74 TC 481, see EIM32374

The only exceptions to this rule are:

- travel from home to a temporary workplace, see EIM32000
- where the employee has a travelling appointment, see EIM32366
- where the employee's home is a place of work and the place where the employee lives is dictated by the requirements of the job, see EIM32370
- where the duties of the employment are carried out wholly or partly outside the UK, see EIM34020
- where a non-domiciled employee is working in the UK, see EIM35030
- emergency call-outs see EIM32386.

EIM32360 Between Places Of Work [Nov 2019]

Where an employee is required to travel between two places of work, in the same employment, in order to carry out the duties of that employment, the cost of travel is incurred in the performance of the duties.

The Courts have approved this practice, for example in *Taylor v Provan* (49 TC 579). On page 611 Lord Wilberforce commented:

> "If a man has to travel from one place of work to another place of work, he may deduct the travelling expenses of this travel, because he is travelling on his work, but not those of travelling from either place of work to his home or vice versa."

Note though that the expenses of travelling between two workplaces are not normally allowable when one of those places is the employee's home. See EIM32370.

Travel between two different employments

Where an employee has two employments and the duties of those employments are performed at different places, the cost of travelling between them is not travel in the performance of the duties of the employment.

This point is confirmed by the case of *Parikh v Sleeman* (63 TC 75), which concerned a doctor who had separate employments at three hospitals. When he was travelling between the hospitals he was not performing the duties of any of them and so no deduction could be given.

There is an exception to this rule for individuals who are directors of two or more companies within a group of companies, see EIM32035.

EIM32366 Travelling Appointments [Nov 2019]

An employee who holds a travelling appointment can deduct all of their business travelling expenses as travel in the performance of the duties of the employment, even where the journey starts from home.

There is little guidance in case law about what constitutes a travelling appointment but a commercial traveller can be said to be typical. A commercial traveller is travelling on his or her work, as distinct from travelling to it, from the moment of leaving home. Another example is a service engineer who moves about from place to place during the day carrying out repairs to domestic appliances at clients' premises. Such employees are often described as itinerant.

If an employee has to report to and work at a particular office at the start and end of the day, travel between there and home is not travel in the performance of the duties, unless the calls at that office are fortuitous or incidental.

Whether an employee is truly itinerant, or merely has two or more fixed places of work, is essentially a question of fact. There are bound to be marginal cases.

Many jobs require mobility, in the sense that an employee will have to work at a number of different places from week to week or month to month. But this does not mean that the duties themselves inherently involve travelling, merely that the employee will not always incur the same cost in getting to (or staying near) work. Clearly the frequency with which such changes take place is of major importance. There will be a strong presumption that anyone required to go to a number of different sites each day on an irregular basis will have a travelling appointment. Other factors, however, also need to be taken into account, such as the nature of the work itself and whether, for pay purposes, the employee is treated as starting work only on reaching each site.

It is important, therefore, when an employee considers that he or she has a travelling appointment, to obtain as much information as possible about work patterns. If necessary, ask for a record covering a typical period of weeks or months.

Even if the employee does not have a travelling appointment it is likely that for many such employees every place that they attend is a temporary workplace. So relief for their business travel is likely to be due under Section 338 ITEPA 2003, see EIM32005.

EIM32368 Travelling Appointments: Deductible Expenses: Responsibility For An Area [Nov 2019]

Where an employee has a travelling appointment the cost of travel between home and the place where work is done is usually travel in the performance of the duties of the employment, see EIM32366.

There is an exception where the employee's duties cover a particular area (for example, a county) but he or she chooses to live a significant distance outside that area.

In these circumstances the cost of travel between home and the boundary of the area is not travel in the performance of the duties. However, if the employee is travelling to a temporary workplace relief will be available for the full journey under Section 338 ITEPA 2003, see EIM32010.

A similar practice applies to travel for necessary attendance, see EIM32190.

EIM32370 Travel To And From Home Where It Is A Place Of Work [Nov 2019]

Where an employee's home is itself a place of work, the cost of travel between there and other permanent workplaces may sometimes be deductible under Section 337 as travel in the performance of the duties.

A detailed explanation of the circumstances in which you can accept that an employee's home is a place of work is at EIM32760.

Note though that the fact that an employee's home is treated as a workplace for tax purposes is not enough, on its own, to enable the employee to obtain relief under Section 337 for the expenses of travelling to another permanent workplace. For most people, the place where they live is a matter of personal choice. So the expense of travelling from home to any other place is a consequence of that personal choice, not an objective requirement of their job. The case law discussed in the following pages demonstrates that the expenses of travelling from home to another workplace do not qualify for relief under Section 337 unless the location of the employee's home is itself dictated by the requirements of the job.

Even where that condition is met, the cost of travel between the employee's home and another permanent workplace is only deductible during those times when the home is a place of work, see EIM32170.

Employees who work at home are of course entitled to a deduction for the expenses of travelling to a temporary workplace in the same way as any other employee, see EIM32170.

EIM32371 Travel To And From Home Where It Is A Place Of Work: Case Law [Nov 2019]

The Courts have considered employees' home to work travelling expenses on a number of occasions. Recent examples include *Miners v Atkinson* (68 TC 629), which concerned a director of a one-man service company, see EIM32380, and *Kirkwood v Evans* (74 TC 481), which concerned an employee who agreed to be based at home under a homeworking scheme, see EIM32374.

In two cases the House of Lords has accepted that in certain exceptional circumstances an employee's home to work travelling expenses qualified for relief under Section 337. The cases are:

- *Taylor v Provan* (49 TC 579), see EIM32372 and
- *Pook v Owen* (45 TC 571), see EIM32373.

EIM32372 Travel To And From Home Where It Is A Place Of Work: *Taylor v Provan* [Nov 2019]

The case of *Taylor v Provan* (49 TC 579) illustrates how difficult it can be for an employee to obtain a deduction under Section 337 ITEPA 2003 for the expenses of travelling between their home and another workplace.

Mr Taylor lived in Canada and was agreed to have unique and unrivalled knowledge and experience of arranging mergers of brewery companies. The terms on which he was employed acknowledged his unique experience and required him to perform his duties as far as he could from his home in Canada. The case concerned a deduction for the costs of travel from his home to other workplaces, costs that the Courts in *Ricketts v Colquhoun* had held to be not deductible as a general rule, see EIM31641.

In *Taylor v Provan* the Courts held that this general rule applies where the employee has to do part of his or her work at home. Lord Reid commented at page 605E:

> "If the holder of an office or employment has to do part of his work at home the place where he resides is generally still his personal choice. If he could do his home work equally well wherever he lived then I do not see how the mere fact that his home is also a place of work can justify a departure from the Ricketts ratio."

However, the Courts felt that an exception could be made in the very unusual circumstances of Mr Taylor's case. Lord Morris commented at page 609D:

> "The office or the employment was very special. There was probably no-one else who could have filled it. It was an office created to be held by one particular person."

In effect, the view of the Courts was that Mr Taylor's location was an integral, unavoidable and accepted element in determining the nature of the office or employment that he held. Mr Taylor was uniquely qualified to fill that post and his personal circumstances were central to the terms of his employment. Very few employees will be in a similar position.

EIM32373 Travel To And From Home Where It Is A Place Of Work: *Pook v Owen* [Nov 2019]

The other key case dealing with deductions under Section 337 ITEPA 2003 is *Pook v Owen* (45 TC 571). Dr Owen was a general practitioner who also had a part-time appointment at a nearby hospital. His duties required him to be available for emergency call-outs from home. He would be contacted by telephone and then took responsibility for the patient as soon as he took the call. The Courts held that he was entitled to a deduction for the cost of travel between home and the hospital while on call-out. This case forms the basis for the guidance at EIM32386 .

The reason for the decision is not easy to follow from the judgements. It is best explained in a comment by Lord Reid in *Taylor v Provan* at page 605F:

> "I am sure that the majority did not intend to decide that in all cases where the employee's contract requires him to work at home he is entitled to deduct travelling expenses between his home and his other place of work. Plainly that would open the door widely for evasion of the rule. There must be something more. I think that the distinguishing fact in Owen's case was that there was a part time employment and that it was impossible for the employer to fill the post otherwise than by way of appointing a man with commitments which he would not give up. It was therefore necessary that whoever was appointed should incur travelling expenses."

Thus it is not enough that there should be a contractual obligation to work from home. It is not enough that there should actually be work at home. What is required is something more; that the nature of the employment itself must necessarily require the employee to live in a particular location.

EIM32374 Travel To And From Home Where It Is A Place Of Work: *Kirkwood v Evans* [Nov 2019]

The case of *Kirkwood v Evans* (74 TC 481) illustrates the approach of the Courts to employees working at home under a voluntary homeworking scheme.

Mr Evans was a civil servant who lived in King's Lynn and worked in Leeds. His employer introduced a voluntary homeworking scheme under which Mr Evans was permitted to work at home and to travel to Leeds on one day each week. Under the scheme Mr Evans lost his office space in Leeds but was provided with equipment to support an office at home. Either Mr Evans or his employer could terminate the homeworking agreement.

Mr Evans argued that travel between his home and Leeds was travel in the performance of the duties of the employment, see EIM32360. The High Court reviewed the cases discussed at EIM32372 and EIM32373, rejected that argument and commented:

> "his choice to live in King's Lynn rather than Leeds was historical and is unconnected with any term of his employment. The necessity of travelling to Leeds is dictated by his choice of the place where he lives and not by the nature and terms of the job itself."

The High Court also rejected the Commissioners' apparent finding that Leeds was not a permanent workplace for the purpose of section 339(2) (see EIM32070). Mr Evans put forward no such argument, and conceded that the Commissioners' finding on the point was wrong.

Finally, Mr Evans argued that he was entitled to relief for the additional household costs he incurred while working at home. This was rejected because:

> "the homeworking scheme was optional. Mr Evans was permitted to work from home but he was not required to do so. He took up the option because for perfectly understandable reasons it was more convenient for him to remain at home for most of the week rather than to travel to Leeds. Working at home was not therefore a necessary incident of his employment."

The principle that underlies this decision is that sections 336 and 337 ITEPA 2003 only permit relief for those expenses that are incurred by a necessity arising from the nature of the employment, see EIM31641. They do not permit relief for expenses incurred out of choice, or because of the personal circumstances of the individual employee.

EIM32380 Travel To And From Home Where It Is A Place Of Work: Service Companies: *Miners v Atkinson* [Nov 2019]

Directors of small companies operating in service industries such as computer consultancy frequently contend that their home is a place of work (see EIM32760). As a consequence the director will ask for a deduction for the cost of travel from home to the various places at which the company is required to provide services, together with accommodation costs if the director needs to stay away from home. In very many cases, those expenses will not qualify for relief under Section 337 ITEPA 2003. The reason can be illustrated by the case of *Miners v Atkinson* (68 TC 629).

Mr Miners was a computer consultant who provided his services through his own service company. The registered office of the company was at Mr Miners' home, 4 Sandringham Road. Most of Mr Miners' duties were carried out at the sites of the clients of his company but he did some work at home. The case concerned a deduction under Section 337 ITEPA 2003 for Mr Miners' travel expenses from his home to the sites at which he worked.

A deduction was not permitted. The duties that Mr Miners carried out at home were not the substantive duties of his employment, see EIM32780. However, the focus of the decision in the High Court was on whether there was an objective requirement that any work carried out by Mr Miners at home had to be carried on at that place.

The question that needed to be answered, and will need to be answered in similar cases, was expressed in these terms:

> "The starting point is that 4 Sandringham Road was the appellant's home. On the authorities, it seems to me that one must ask whether the appellant was working at home out of choice."

In answer to that question the Special Commissioner had concluded that:

> "it was not necessary for the work which Mr Miners carried out at 4 Sandringham Road to be done at that precise address. It could have been done anywhere."

There was a clear finding by the High Court that there was no objective requirement for the work to be carried out at Mr Miners' home. This conclusion applies in the same way to the great majority of one-man service companies. However, in very unusual circumstances, there may be exceptions. There is some practical advice at EIM32800.

The effect of this case is illustrated by examples EIM32805 and EIM32806.

Remember that even where relief for travel expenses cannot be permitted under Section 337 ITEPA 2003 it will still be available under Section 338 ITEPA 2003 where the place to which the employee is travelling is a temporary workplace, see EIM32170.

EIM32385 Employee On Standby [Nov 2019]

The fact that an employee is on stand-by, or may be called out to work as and when needed, does not in itself affect the treatment of his or her travelling expenses.

In *Pook v Owen* (45 TC 571) Lord Wilberforce commented at page 595:

> "The mere fact of being on stand-by duty is not enough"... [to qualify for a deduction] ... "Nor, in my opinion, is the mere fact sufficient that he might be called upon, or might volunteer, to give some professional advice on the telephone before setting out. There are persons who hold positions of importance, who carry their responsibility with them wherever they are: they too may be called to their offices after working hours.....But this does not mean that they have more than one working place: cf. Newsom v Robertson (33 TC 452). What is required is proof to the satisfaction of the fact-finding Commissioners that the taxpayer, in a real sense, in respect of the office or employment in question, had two places of work, and that the expenses were incurred in travelling from one to the other in the performance of his duties".

The same principle applies to travel for necessary attendance, see EIM32250.

EIM32386 Emergency Callout [Nov 2019]

No deduction is due for the cost of travel between an employee's home and his or her permanent workplace even where the employee is on stand-by, see EIM32385. In the same way, no deduction is due for the cost of travelling on an emergency call-out between an employee's home and his or her permanent workplace.

There is one exception. The cost of emergency call-out travel between an employee's home and his or her permanent workplace is deductible where the employee's home is a place of work, see EIM32760 and all of the following conditions are met:

- the employee must give advice on handling the emergency before starting the journey and
- responsibility for those aspects appropriate to the employee's duties must be accepted from that time and
- the employee must have a continuing responsibility for the emergency while travelling to the workplace.

35.15 Wholly and exclusively

The EI Manual provides:

> **EIM31811 General: Introduction: Expenses Do Not Have To Be Wholly And Exclusively Incurred: Example** [Nov 2019]
>
> An employee has to travel to New York on business for two weeks. While she is there she has a free weekend and spends it taking a break in Boston. The cost of her flight to New York and any other necessary travelling expenses are deductible. They have been necessarily incurred in travelling to a temporary workplace. The fact that the break in Boston means that the travelling expenses have not been incurred wholly and exclusively for business does not matter.
>
> The costs of the break in Boston, such as travelling to Boston from New York and the cost of staying in Boston, are not deductible. These expenses are not attributable to attendance at the temporary workplace.
>
> You can find detailed instructions about the expenses incurred in attending overseas conferences, seminars or study tours at EIM31950

35.16 Conferences and seminars

The EI Manual provides:

> **EIM31960 General: Overseas Conferences, Seminars And Study Tours: Getting Evidence** [Nov 2019]
>
> Before a deduction can be permitted for the cost of an overseas conference, seminar or study tour it needs to be demonstrated that attendance was necessary to carry out the duties of the employment of the person attending.
>
> Some overseas trips are merely an incentive to reward or motivate employees, see EIM31970. This may be particularly the case where the trip is provided by a third party, see EIM31975.
>
> An itinerary should be available for the trip showing precisely what activities were involved. It is not enough that the trip was authorised, or even required, by the employer. It is necessary to be able to demonstrate that the duties of the employment could not be performed without it, see EIM31647.
>
> The insertion into an itinerary of a token business element, such as a meeting that could equally well have taken place at the employer's premises in the United Kingdom, does not make the travel cost necessarily incurred, see example EIM31991.
>
> It is not enough to demonstrate that a trip had a personal educational value. Expenditure incurred by an employee to improve his or her qualifications for doing the job, or to keep his or her knowledge up to date, are not deductible, see EIM31650. This is illustrated by example EIM31990.
>
> You should be particularly wary of those cases where the trip is made to

an exotic or desirable location that appears to be unrelated to the subject matter of the trip, for example, a dentists convention in St Lucia. You need to consider critically the reason for the trip. ...

EIM31965 General: Overseas Conferences, Seminars And Study Tours: Apportionment [Nov 2019]

If you accept that a particular overseas trip has been made necessarily to carry out the duties of the employment you may still find that some expenses are not deductible. For example, a short break may be taken during an overseas conference.

You should not accept an apportionment of the total cost of the trip on a percentage basis, calculated by looking at the relative time spent on business and non-business activities. There is no basis in law for such an apportionment, see EIM31660. Instead you should examine the expenses individually and permit a deduction only for those that are necessarily incurred.

The correct approach is illustrated by example EIM31811.

EIM31970 General: Overseas Conferences, Seminars And Study Tours: Overseas Trips As Incentives [Nov 2019]

Overseas trips that are variously described as conferences, conventions or seminars are often no more than incentives intended to reward past performance or to motivate employees for the future. Commonly the business element is minimal, for example an address by a company executive. The itinerary will consist largely of social occasions, excursions and leisure activities. No deduction should be permitted for the cost of such trips, see example EIM31991.

A deduction is only due in the circumstances described in EIM31950. It can generally be demonstrated that the cost of incentive trips is not incurred necessarily by the participants, less successful colleagues doing the same or similar jobs will not have needed to incur the expense. Nor is it a duty of the employment to attend.

Any enquiries from the promoters of such events about the potential tax liabilities for participants should be dealt with in accordance with EIM11235 onward.

EIM31990 General: Overseas Conferences, Seminars And Study Tours: Example [Nov 2019]

A consultant neurologist attends the annual conference of the World Council of Neurology. The conference takes place in Geneva and takes 4 days. The conference consists of a series of meetings, lectures and seminars on medical matters. The neurologist’s employer encourages her to attend and the conference is directly relevant to her work.

No deduction can be permitted for the cost of attending the conference. Attendance at the conference is not necessary expenditure, see EIM31950. Attendance at the conference is not one of the duties of her employment, see EIM31650.

CHAPTER THIRTY SIX

PAYE

36.1 PAYE: Introduction
36.2 Relevant payment
36.2.1 Net PAYE income
36.2.2 PAYE income
36.2.3 PAYE employment income
36.3 Employment/employer/employee
36.3.1 Payer/payee
36.4 Duty to deduct PAYE
36.5 Employee works for non-employer
36.5.1 Application conditions
36.5.2 General rule
36.5.3 "Work"
36.5.4 "Work for"
36.5.5 Special cases
36.6 PAYE clearance: s.690 direction
36.6.1 Application for s.690 direction
36.6.2 Effect of s.690 direction
36.6.3 Deemed PAYE income
36.6.4 HMRC practice
36.6.5 Covid
36.7 Leaving UK: PAYE
36.8 PAYE if no personal allowance
36.9 PAYE repayment not remittance
36.10 International employee schemes
36.11 DTA relief: PAYE NT code
36.12 PAYE 60-day rule: EP App 8
36.12.1 History and background
36.12.2 Who may benefit
36.12.3 Operation of EP App 8
36.12.4 60 UK workdays cap
36.12.5 Annual PAYE
36.12.6 Making/ending the agreement
36.12.7 2020 changes
36.13 PAYE exemption: EP App 4
36.13.1 PAYE exemption: Conditions
36.13.2 Remuneration ultimately borne by non-resident
36.13.3 Terms of EP App 4 agreement
36.13.4 EP App 4: Mistakes
36.13.5 EP App 4: Administration

36.14.1 Action once agreement authorised
36.15 Tax equalisation: EP App 6
36.16 NIC arrangements

36.1 PAYE: Introduction

A full discussion of PAYE needs a book to itself. This chapter focuses on matters closest to the themes of this book.

The law is mostly contained in the Income Tax (Pay As You Earn) Regulations 2003 (which I call the "**PAYE regulations**").

There is guidance in the PAYE Manual and CWG2 (Employer further guide to PAYE & NIC).

36.2 Relevant payment

The key term is "relevant payment". "Relevant payment" is a label for a number of rules.

There is the usual cascade of definitions. Subject to some exceptions, not discussed here, reg. 4(1) PAYE regulations provides:

> In these Regulations, any reference (however expressed) to relevant payments means payments[1] of, or on account of, net PAYE income...

36.2.1 *Net PAYE income*

Regulation 3(1) PAYE regulations provides:

> Net PAYE income means PAYE income less any—
> (a) allowable pension contributions, and
> (b) allowable donations to charity.

"Net" PAYE income is a label to introduce rules for deductions, not discussed here.

36.2.2 *PAYE income*

Section 683(1) ITEPA defines "PAYE income":

> For the purposes of this Act and any other enactment (whenever passed) "PAYE income" for a tax year consists of—
> (a) any PAYE employment income for the year,
> (b) any PAYE pension income for the year, and
> (c) any PAYE social security income for the year.

36.2.3 *PAYE employment income*

Section 683(2) ITEPA defines "PAYE employment income":

> "PAYE employment income" for a tax year means income which consists of—
> (a) any taxable earnings from an employment in the year (determined in accordance with section 10(2)),[2] and
> (b) any taxable specific income from an employment for the year (determined in accordance with section 10(3)).[3]

[1] For the meaning of payment, see 15.3 (Recognition/attribution: Analysis).

[2] See 34.8 ("Taxable earnings").

[3] For completeness: s.683 (3ZA) provides two narrow exceptions:

> "PAYE employment income" for a tax year does not include any taxable specific income treated as paid or received in that tax year by section 394A or 554Z4A (temporary non-residents).

These relate to temporary non-residence charges for employer-financed retirement

I do not address the topics of PAYE pension/social security income.
See too 36.6.3 (Deemed PAYE income).

36.3 Employment/employer/employee

Regulation 2(1) PAYE regulations incorporates the standard ITEPA definitions[4] with amendments:

> "employment", subject to regulations 10 to 12, has the meaning given in sections 4 and 5 of ITEPA; and "employer" and "employee" have corresponding meanings

Regulation 12(1) PAYE regulations provides:

> For the purposes of these Regulations—
> (a) other payers are treated as employers;
> (b) other payees are treated as employees; and
> (c) an other payee's "employment" with an other payer starts when relevant payments start and ends when relevant payments end.

Where it is necessary to distinguish between usual sense and the PAYE sense of employer/employee it is helpful to refer to "Paye-employer/employee".

36.3.1 *Payer/payee*

Regulation 2(1) PAYE regulations provides:

> "payee" means an employee, agency worker, pensioner or other payee;
> "payer" means an employer, agency, pension payer or other payer;

36.4 Duty to deduct PAYE

Armed with these definitions, we can turn to the obligation to deduct PAYE. Reg 21(1) PAYE regulations provides:

> On making a relevant payment to an employee during a tax year, an employer must deduct or repay tax in accordance with these Regulations by reference to the employee's code, if the employer has one for the employee.

36.5 Employee works for non-employer

I do not discuss:

benefits and disguised remuneration, where operating PAYE is obviously impractical.

[4] See 34.3 (Employment/employer/employee).

ITEPA	**Topic**
s.688	Agency workers
s.688A	Managed service companies
s.688AA	Workers' services provided through intermediaries

36.5.1 *Application conditions*

Section 689(1) ITEPA provides:

> This section applies if—
> (a) an employee during any period works for a person ("the relevant person") who is not the employer of the employee,
> (b) any payment of, or on account of, PAYE income of the employee in respect of that period is made by
> [i] a person who is the employer or
> [ii] an intermediary of the employer or of the relevant person,[5]
> (c) PAYE regulations do not apply to
> [i] the person making the payment
> [ii] or, if that person makes the payment as an intermediary of the employer or of the relevant person, the employer, and
> (d) income tax and any relevant debts are not deducted, or not accounted for, in accordance with the regulations by
> [i] the person making the payment
> [ii] or, if that person makes the payment as an intermediary of the employer or of the relevant person, the employer.

I refer to this as the **"s.689 application conditions"**.

The employer, being non-resident, may chose to operate PAYE but is not required to do unless the employer has a "UK presence".[6]

36.5.2 *General rule*

Assuming the application conditions are satisfied, s.689 ITEPA provides:

[5] Section 689(5) provides: "For the purposes of this section a payment of, or on account of, PAYE income of an employee is made by an intermediary of the employer or of the relevant person if it is made—
(a) by a person acting on behalf of the employer or the relevant person and at the expense of the employer or the relevant person or a person connected with the employer or the relevant person, or
(b) by trustees holding property for any persons who include or class of persons which includes the employee."

[6] *Clark v Oceanic* 56 TC 183; see 16.12 (Territorial principle: Application). HMRC accept this; see ICAEW Taxguide 08/21 para 6.3: "If there is no PAYE presence for an overseas employer in the UK, there will be no requirement to operate PAYE."

> (2) If subsection (1C) does not apply, the relevant person is to be treated, for the purposes of PAYE regulations, as making a payment of PAYE income of the employee of an amount equal to the amount given by subsection (3).
> (3) The amount referred to is—
> (a) if the amount of the payment actually made is an amount to which the recipient is entitled after deduction of income tax and any relevant debts due under the PAYE regulations, the aggregate of the amount of the payment and the amount of any income tax and any relevant debts deductible due, and
> (b) in any other case, the amount of the payment.

36.5.3 *"Work"*

Section 689(6) ITEPA provides:

> [a] In this section and sections 690 and 691 "work", in relation to an employee, means the performance of any duties of the employment of the employee and
> [b] any reference to the employee's working is to be read accordingly.

See 6.22.2 (Employment-work).

36.5.4 *"Work for"*

HMRC discuss the concept of "working for":

> 4.15 HMRC has previously described "working for" as "paid by, working on behalf of, or to the benefit of". HMRC does not regard "working for" as simply meaning "working for the benefit of".
> 4.16 There must be an element of control or management akin to an employee employer relationship for Section 689 to apply. This is not a new concept and has been the basis of "working for" for S689 purposes and its predecessor ...
> 4.17 There will be straightforward situations where the employee is clearly working for his overseas employer whilst in the UK - a simple example being an employee of a US car plant manufacturer who installs equipment in the UK as part of the contract between the UK and US Companies.
> 4.18 HMRC does understand that individuals sent from group companies may be working for their foreign employer whilst working at the premises of separate UK entity. In the above example, the entities may be part of a multi national group.
> 4.19 In connection with employment services for treaty purposes, the OECD commentary on Article 15 at 8.13 refers to services which are

> integral to the business of and bearing the responsibility or risk for the results produced by the individual's work.[7] HMRC does not regard the comments to be relevant in determining whether there is a domestic PAYE obligation although the concepts are similar and may result in the same conclusion.
>
> 4.20 It is the responsibility of the UK Company to decide whether there is a PAYE obligation based on the particular facts.[8]

36.5.5 *Special cases*

There are a number of exceptions to the general rule which are not discussed here:

s.689	**Topic**
(1ZA)	Oil and gas workers on the continental shelf
(1A)(4)(4A)	Disguised remuneration

The next provision relates to intermediaries of intermediaries:

> (1B) Subsection (1C) applies if—
> (a) the employee worked for the relevant person during the period under or in consequence of arrangements made between the relevant person and a third person,
> (b) the third person did not make the payment of, or on account of, PAYE income of the employee, and
> (c) PAYE regulations would apply to the third person if the third person were to make a payment of, or on account of, PAYE income of the employee.
>
> (1C) The third person is to be treated, for the purposes of PAYE regulations, as making a payment of PAYE income of the employee of an amount equal to the amount given by subsection (3).

36.6 PAYE clearance: s.690 direction

In the following cases it may be unclear how much employment income is taxable and so PAYE income:

(1) Non-resident employee
(2) Employee qualifying for overseas workday relief (recent arriver)
(3) Split years

[7] See 36.13 (PAYE exemption: EP App 4).

[8] Joint Expatriate Forum on Tax and NICs (July 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf*

Section 690 ITEPA provides a clearance mechanism:

> (1) This section applies in relation to an employee in a tax year if the employee—
>
> (a) [i] is either non-UK resident for the tax year or
> [ii] is UK resident but meets the requirement of section 26A for the tax year,[9] and
>
> (b) works or will work in the UK and also works or is likely to work outside the UK.
>
> (1A) This section also applies in relation to an employee in a tax year if it appears to an officer of Revenue and Customs that—
>
> (a) the tax year is likely to be a split year as respects the employee, and
>
> (b) the employee works or will work in the UK and also works or is likely to work outside the UK.

Assuming one of these conditions is met, we move on to the relief:

> (2) If in relation to an employee to whom this section applies and any tax year it appears to an officer of Revenue and Customs that—
>
> (a) some of the income paid to the employee by the employer[10] is PAYE income, but
>
> (b) some of that income may not be PAYE income,
>
> an officer of Revenue and Customs may, on an application made by the appropriate person,[11] give a direction for determining a proportion of any payment made in that year of, or on account of, income of the employee which is to be treated as PAYE income.

I refer to this as a **"s.690 direction."**

> (2A) For the purposes of subsection (2) as it applies in relation to an employee who is UK resident for a tax year but not domiciled in the UK in that tax year, the officer may treat section 809B of ITA 2007 (remittance basis) as applying to the employee for that year, even if no claim under that section has been made.

[9] See 34.22.2 (s.26A conditions: 3-year cap).

[10] Section 690(3)(b) ITEPA provides:
"any reference to a payment made by the employer includes a reference to a payment made by a person acting on behalf of the employer and at the expense of the employer or a person connected with the employer."

[11] Section 690(3)(a) defines appropriate person: "In this section—
(a) "the appropriate person" means the person designated by the employer for the purposes of this section and, if no person is so designated, the employer..."

HMRC Brief 17/09 explains s.690(2A) ITEPA is to correct an oversight in 2008:

> **Section 690 ITEPA directions**
> Prior to April 2008 non-domiciled individuals and not ordinarily resident individuals were automatically taxed on the remittance basis on their foreign employment income. However since April 2008 individuals have to make an annual claim to the remittance basis. Section 690 ITEPA was amended in FA 2008 to reflect this change for not ordinarily resident employees. Prior to April 2008 employers were able to ask for a section 690 direction which permitted them not to apply PAYE to certain employment income paid to not ordinarily resident employees entitled to be taxed on the remittance basis. These rules have been amended to allow this procedure to continue.

36.6.1 *Application for s.690 direction*

Section 690 ITEPA continues:

> (4) An application under subsection (2) must provide such information as is available and is relevant to the application.
> (5) A direction under subsection (2)—
> (a) must specify the employee to whom and the tax year to which it relates,
> (b) must be given by notice to the appropriate person, and
> (c) may be withdrawn by notice to the appropriate person from a date specified in the notice.
> (6) The date so specified may not be earlier than 30 days from the date on which the notice of withdrawal is given.

36.6.2 *Effect of s.690 direction*

Section 690(7) ITEPA provides:

> If—
> (a) a direction under subsection (2) has effect in relation to an employee to whom this section applies, and
> (b) a payment of, or on account of, the income of the employee is made by the employer in the tax year to which the direction relates,
> the proportion of the payment determined in accordance with the direction is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

36.6.3 *Deemed PAYE income*

Section 690 ITEPA continues:

> (8) If in any tax year—
>
> (a) no direction under subsection (2) has effect in relation to an employee to whom this section applies, and
>
> (b) any payment of, or on account of, the income of the employee is made by the employer,
>
> the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.
>
> (9) Subsections (7) and (8) are without prejudice to—
>
> (a) any assessment in respect of the income of the employee in question, and
>
> (b) any right to repayment of income tax overpaid and any obligation to pay income tax underpaid.

HMRC say:

> **Question:** This is a query with regard to inbound expats (business travellers), who are taxable on their UK workdays:
>
> Background – business travellers (Non-resident in the UK), who are taxable on their UK workdays (e.g. because of economic employment in the UK) and for whom there is a "deemed employer" for PAYE withholding purposes (e.g. as required per s689, ITEPA).
>
> HMRC guidance (CWG2, Page 70) states –
>
>> "Where, because work is performed both in the UK and abroad, it is unclear at the time of making a payment how much of the payment will ultimately be assessable as PAYE income, the whole payment should be subjected to PAYE unless we have directed otherwise."
>
> The question is, however, what one means by "unclear" in the above guidance. For example, some of our clients will obtain full UK / nonUK workday calendars from their business traveller population on a live basis each month. Such data, can be required, for example, to ensure that the overseas withholding (e.g. in Germany) is correctly calculated. As such, such employers do have a clear understanding of exactly what income relates to UK workdays. The question therefore is whether it is acceptable from an HMRC perspective to only account for PAYE withholding on the actual UK workdays in this case – or should they still be getting a s690 ruling from HMRC for example (even though the s690 ruling would only be based on estimated data and is therefore innately less definitive than the live calendars that the employees provide each month).

> **HMRC answer:** The legislation at s690(8) ITEPA 2003 is clear that where no direction under s690 (2) has effect, the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.
>
> However, in the case of a short term business visitor (STBV) who is taxable in the UK in relation to their UK workdays only, a s690 may not be appropriate. This could be, for instance, an STBV from a non-treaty country or from an overseas branch of a UK Company. The "relevant payment" processed through the UK shadow payroll would simply be the employment income relating to the UK workdays, and therefore a s690 is not required. In this example, there is no part of what would be considered to be the "relevant payment" which can be deemed to not be PAYE income, and so s690 is not applicable.[12]

36.6.4 *HMRC practice*

The PAYE Manual provides:

> **PAYE81545. UK employer's duties** [Jun 2020]
>
> ...
>
> **The employee works both inside and outside the UK and is not resident in the UK or, is resident, the remittance basis applies and the requirement of Section 26(A) ITEPA are met (a three year period of non residence)**
>
> The employer can apply under Section 690 ITEPA 2003 for a direction from HMRC to operate PAYE only on the percentage of the employee's total earnings that are for work in the UK. This applies to all payments made by the employer including termination payments and share based remuneration. An application for a direction must be sent to Self Assessment, HMRC, BX9 1AS UK, or Charities, Savings & International 3 HMRC, BX9 1AJ (see PAYE81555)
>
> **PAYE: apply for a Section 690 or informal treaty direction (S690)**
>
> The Section 690 application is only an estimate of the work done in and outside the UK and the employee should complete an SA return to report the actual position. See PAYE81555 - PAYE81565 on how to handle applications under Section 690 ITEPA 2003.
>
> If an employer does not make an application under Section 690 ITEPA 2003, then unless the employee is within an EP Appendix 6

[12] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

arrangement (see PAYE81740),[13] they must operate PAYE on all payments made to the employee for work done both in and outside the UK. The employee can claim a repayment of the tax deducted on earnings for work done outside the UK on their SA Return.

You must set up an SA record for an employee who works both in and outside the UK, whether or not a Section 690 application is made.

If the employer provides Tax Equalisation arrangements for the employee, you should refer to PAYE81740.

Amendments to S690 Directions where individual's travel has been restricted due to COVID-19

Where employees have suffered significant delay in travel restrictions caused by COVID-19, HMRC will allow employers to request amendments for the proportion of time to be changed in an existing S690 Direction. Requests should be made in writing to HMRC and sent to the relevant address contained within PAYE81555...

PAYE81550 PAYE Operation: Do Any Special Rules Apply For NICs? [May 2020]

Arrivals in the UK

The employer may ask you whether any special rules apply for NICs for a new arrival. Refer the employer to the CWG2 Employer Further Guide to PAYE and NICs, which provides specific guidance and points of contact for further help.

The employer should be advised that

- The rules governing tax and NICs are different and must be applied separately And
- HMRC decides whether the new arrival is liable to UK tax and NICs, and how PAYE should be applied

(Note: A direction under Section 690 ITEPA applies to the payment of income tax only.)

PAYE81555. Applications under Section 690 ITEPA 2003 - Who deals with the application? [May 2020]

Arrivals in the UK

On receipt of an application for a direction under Section 690 ITEPA 2003 you must decide which office is responsible for reviewing the application. Use the following table to determine the office and pass the application to them immediately.

Situation	**Responsible Office**
The employee is an Expat	Charities, Savings & International
All other employees	PT Operations

[13] See 36.15 (Tax equalisation: EP App 6).

PAYE81560. Applications under Section 690 ITEPA 2003 - reviewing the application [May 2020]

Arrivals in the UK

Use the flowchart[14] to review an application under Section 690. It contains links to a number of draft letters you should use depending on the circumstances of the case. These letters are available on SEES Forms and Letters, in the general subdirectory 'Regulation/Payment letters'.

When an application is accepted, you must take the following action

- Set up an SA record for the employee if there is not one already
- Arrange for an SA return with the non-residence and employment pages to be issued for the year(s) the application covers
- Make an SA note as follows 'Sec 690 approval given for [year] for earnings from [employer's name]. PAYE to be operated on [%].'
- If the employee is resident/not ordinarily resident, the remittance basis applies and the requirements of Section 26A ITEP are met (a three year period of non-residence
  - Amend their tax code to remove the basic personal allowance (and blind person's allowance if claimed)
- Place all the Section 690 papers in an SA Post batching range

PAYE81565. Applications under Section 690 ITEPA 2003 - At the end of the tax year [May 2020]

The employer must complete the employee's form P14, End of Year Summary or FPS, to show only

- The pay on which the employer has operated PAYE (this will include the amount representing the UK duties agreed by HMRC under Section 690 ITEPA and any other taxable pay) and the tax deducted from that pay

The employee should, when completing their SA return enter

- The earnings from their P60 / P45 in box 1 on the Employment page including any cash earnings from that employment that have not been included on the P60 / P45
- The tax deducted from their P60 / P45 in box 2 on the Employment page
- The remainder of their earnings in box 3 on the Employment page including paid earnings overseas from an earlier year which were not liable to UK income tax unless they were remitted to the UK during the Tax Return year
- The amount of their total earnings which relates to work done abroad in box 12 under the section 'Share Scheme and Employment Lump Sum, Compensation and Deduction' on the 'Additional

[14] See *http://www.hmrc.gov.uk/manuals/pommanual/paye81560.htm*

Information Page' (SA101)

No equivalent rule is needed for other UK resident non-domiciled employees, whose income is either taxable entirely on the remittance basis, or on the arising basis.

HMRC say:

> **Section 690 agreements**
> *Question:* (28.1) Can HMRC allow employers to operate PAYE on the basis of a s690 percentage in advance of an actual s690 notice being issued, provided the employer submits the s690 request to HMRC within a reasonable time period following the date of the first payment? We would suggest a two month period would be reasonable. Where the percentage used is not the percentage later agreed by HMRC the employer could be obliged to correct the position in the next PAYE period following receipt of the notice from HMRC.
> (28.2) Can HMRC allow employers to adjust the s690 percentage unilaterally during the tax year to more accurately reflect the employee's actual work pattern? The employer could be obliged to provide HMRC with written confirmation of the adjusted final percentage following the end of the tax year.
> **HMRC answer**
> (28.1) An application for a direction under Section 690 ITEPA 2003 must be sent to HMRC to operate PAYE on a particular percentage of an employee's earnings. If an employer does not make an application under S690, then unless the employee is within an EP Appendix 6 arrangement, they must operate PAYE on all payments made to the employee for work done both in and outside the UK.
> (28.2) The agreed s690 percentage cannot be adjusted unilaterally during the tax year without HMRC's agreement. If the employee's work pattern drastically changes during the year then the office which approved the initial direction should be contacted. This should be done as soon as it becomes apparent that there are any changes to the employee's circumstances that could affect the limited operation of PAYE that has been agreed.[15]

36.6.5 *Covid*

ICAEW Taxguide 08/21 (Covid-19: Displaced Expatriate Employees)[16]

[15] Expat Forum Q&A log (July 2019) (informally circulated).

[16] *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2021/taxguide-0821-covid-19-displaced-expatriate-employees.ashx*

provides:

> **6.1 S690 Determinations**
> Many s690 determinations that were issued will now, with hindsight, be invalid due to stranded employees working in the wrong country. Could HMRC consider a temporary measure of allowing employers to adjust the determination percentage as they discover more accurate data regarding the location of their employees? There would obviously need to be an audit trail of why any revised percentage was used and the guidance could cover records that HMRC would expect to be kept if an employer used such a concession.
> **Reply from HMRC**
> HMRC published updated guidance[17] on 20 October 2020.
> This confirmed that, if there is already a s690 agreement with HMRC in place, a customer will be able to ask to amend it, if the measures that have been introduced to stop the spread of coronavirus mean an employee has been unable to leave or return to the UK.
> This will mean if the employee:
> • has been unable to leave the UK in the 2020-2021 tax year, PAYE can be operated on 100% of their earnings (or another reasonable estimate)
> • is unable to return to the UK indefinitely, UK tax could be reduced or may not be due, depending on the employee's circumstances.

36.7 Leaving UK: PAYE

HMRC say:

> **Form P85 leaving the UK**
> In the past form P85 has been used in advance of an expat leaving the UK for the purposes of generating an NT code where appropriate, to be in place by the time the individual leaves. We note that the form has recently been updated to say that it should only be used "when you have left" whereas the previous version also stated it could be used "when you are leaving".
> Can form P85 still be submitted in advance of departure to request an NT code?
> **Answer:**
> HMRC's operations team have confirmed that normally form P85 would be rejected if there is still a continuing source of UK income. However, if the customer is leaving to work full time abroad for a UK employer for a period of at least a complete tax year, the form P85 can be

[17] *https://www.gov.uk/guidance/new-employee-coming-to-work-from-abroad*

> completed to enable to customer to receive code NT.[18]

See 10.16.2 (Departure: Form P85).

36.8 PAYE if no personal allowance

RDR1 provides:

> **What should you do if you have UK tax allowances and choose to use the remittance basis?**
> 8.9 If you decide during a tax year that you're going to use the remittance basis and you're still getting UK personal allowances through the PAYE system, you may not be paying enough UK tax.[19]
> 8.10 If you contact HMRC, we can arrange to amend your tax code to one which doesn't give relief for personal allowances, thus reducing any potential tax bill arising from you getting the benefit of allowances you're no longer entitled to. Your employer can't do this for you as your tax affairs are confidential between you and HMRC. Until they receive a new tax code from us, your employer will continue to deduct tax from you based on the code we originally issued before you were claiming the remittance basis.

It is hard to imagine anyone wishing to do this, but it may save the need for submitting a tax return. HMRC say:

> Employers have expressed concern that the P46 (Expat) does not allow them to operate a 0T code (no personal allowance) even where they are aware that the employee will claim the remittance basis or has income in excess of £100K.
> HMRC said that it was not the responsibility of employers to withdraw personal allowances and, if they did so, the New PAYE System (NPS) might reinstate the allowances when the P14 is filed and make a repayment to the individual.
> HMRC said that, if employers agree with their employee that they will claim the remittance basis or if the individual's earnings will exceed £100K, they should request a formal change of code number from the Expat Team. This would ensure that HMRC records mirror those of the employer when the P14 is submitted.
> HMRC confirmed that the Modified PAYE rules in EPM6 allows PAs to be withdrawn from remittance basis users but it would be sensible for Employers to notify the Expat Team of situations where that applies.

[18] Expat Forum Q&A log (July 2019) (informally circulated).

[19] See 57.5 (Allowances: remittance basis user).

> They agreed to make the necessary changes to the EPM6 agreement to make this clear.[20]

36.9 PAYE repayment not remittance

The minutes of the Joint Expatriate Forum record:

> HMRC had circulated a note explaining that the existing non-statutory practice could continue whereby remittances arising as a result of repayments of overpaid PAYE to non tax-equalised employees were disregarded. This statement was based on new legal advice and meant there was no need to provide for this treatment in primary legislation.[21]

This note is dated 7 October 2011 and provides:

> HMRC's long standing practice in relation to repayments of income tax for employees who remain not ordinarily resident in the UK has been to treat PAYE tax overpaid as not constituting a remittance in cases where:
>
> - under tax equalisation arrangements it would be refunded to the employer; or
> - the employee instructs HMRC to refund the money to an overseas account.
>
> The practice is however not consistent with the FA 2008 remittance basis legislation.
>
> At a Expats Forum sub group meeting held on 18 May 2011, HMRC confirmed that repayments of tax overpaid to an employer under a tax equalisation arrangement would not constitute income as the employee is contractually entitled to net remuneration and the actual UK taxes due on that remuneration. The repayment of the tax overpaid is in effect a refund of overpaid earnings by employee to employer.
>
> However, for gross paid employees, PAYE repayments represent a part repayment of earnings delivered in the UK and as such a remittance to the UK under section 809L ITA. HMRC agreed to consider the views expressed and how the matter could be resolved. In the meantime, the existing practice would continue until at least 5 April 2012.
>
> The suggestion was made at the subgroup that, if the practice was ultra vires HMRC's management discretion, it should be legislated, possibly

[20] Joint Expatriate Forum on Tax and NICs: (May 2010) Meeting Note *http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf*

[21] Joint Expatriate Forum on Tax and NICs (October 2011) *http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/expat-mins-oct-2011.pdf*

as part of the current review of non domiciled taxation.
HMRC has since taken further legal advice on this matter. This has confirmed that the current informal practice can continue as an informal concession. As such, there is no need for any legislative fix.

36.10 International employee schemes

The PAYE Manual sets out several special PAYE arrangements for internationally mobile employees/short term business visitors.

Some of these are known, confusingly, as "EP App [no. 4, 5, 6 etc]", after the appendices used in the Employment Procedures Manual. That Manual was withdrawn in 2011, and the material is now in the PAYE Manual, but these labels have survived. It would be sensible to use new names, but it does not matter.

In outline:

Arrangement	**For**	**Relief**	**See para**
NT code	STBV with DTA relief	Individual PAYE exemption	36.11
EP App 8	STBV with no DTA relief	Annual PAYE	36.12
EP App 4	STBV with DTA relief	General PAYE exemption	36.13
EP App 5	Provisional foreign tax credit relief		36.14
EP App 6	Tax equalisation		36.15

Two further arrangements deal with NIC:

EP App 7A: For employees subject to an EP App 6 agreement, who are assigned to work in the UK from abroad and have an employer or host employer in the UK liable for secondary UK NICs. The employee pays NICs on earnings in this employment above the annual upper earnings limit (UEL) for the year or on earnings at or above the UEL in each earnings period throughout the year

EP App 7B For employees employed by a UK employer who are assigned to work abroad for a period of limited duration, but for more than a complete tax year, who have an ongoing liability to UK NICs whilst abroad. The employee will be paid above the UEL in every earnings period throughout the tax year and will receive some earnings and benefits derived from the employment from sources other than the UK employer. The employee will not be liable to UK tax on the earnings from employment

36.11 DTA relief: PAYE NT code

The PAYE Manual provides:

> **PAYE81625: employee's earning paid for by overseas employer: double taxation relief** [May 2020]
> **Arrivals in the UK**
> Where a new arrival's UK earnings are paid by an overseas employer, Double Taxation relief might be due. If so, you may be able to issue code NT to the UK employer. But before you do so, ensure that a claim has been made. It is up to the employee to make a claim for Double Taxation relief and prove this claim...
> Always send any correspondence about Double Taxation relief claims to the employee, not the employer.
> If you do issue code NT to cover UK earnings
> - Send a separate instruction to the employer to confirm the date from which the tax code operates
> - Tell the employer to refund any tax already deducted
> - Do not carry code NT forward to the second year's coding - apply a cumulative tax code to all earnings

36.12 PAYE 60-day rule: EP App 8

36.12.1 *History and background*

This topic has been discussed in HMRC consultation and response papers:

> Consultation on short-term business visitors: Consultation document (May 2018) (**"the STBV consultation paper"**)
> Tax and Administrative Treatment of Short Term Business Visitors from Overseas Branches: Summary of Responses (Aug 2018) (**"the STBV consultation response paper"**)[22]

The current rules replace the scheme introduced in 2015. PAYE Manual provides:

> **PAYE81950: PAYE special arrangement for short term business visitors** [May 2020]
> The PAYE special arrangement for STBV introduced in 2015 under regulation 141 ceased on 5 April 2020. For information concerning the

[22] For these documents see *https://www.gov.uk/government/consultations/tax-and-administrative-treatment-of-short-term-business-visitors-from-overseas-branches*

> previous arrangement see PAYE81949.
> ... This arrangement has been agreed under Regulation 141 of the Income Tax (PAYE) Regulations 2003. This regulation allows HMRC to arrange for the collection of tax in respect of PAYE income, if the normal operation of PAYE is considered 'impracticable'.
> The arrangement is a contractual agreement between the employer and HMRC ...

This scheme is confusingly called "EP App 8" (though the EP, withdrawn in 2011, never actually had an appendix 8).

36.12.2 *Who may benefit*

This scheme is for short term business visitors (as defined) who do not qualify for DTA relief.

The PAYE Manual provides:

> **PAYE81950: PAYE special arrangement for short term business visitors** [May 2020]
> ... **Who does it cover?**
> UK based employers who operate internationally. Many countries will be covered by a Double Taxation Treaty with the UK, but not all. These employers may also have branches overseas.[23] It will often be normal business practice to require non-resident employees to come into the UK to work for them and a liability to UK PAYE will arise.
> However, in most cases these non-resident employees will only work in the UK for a short period of time usually no more than a few days or weeks. There can be a significant employer burden in monitoring employee movements and keeping all the records that are required so that PAYE can be reported in real time. If the employees are eligible for personal allowances, then in most cases there is ultimately no UK tax liability.
> This arrangement allows the employer to return the information at month 12. This means that employees with no overall liability do not need to have tax deducted and apply for repayments through Self Assessment.

There are two exceptions where the annual PAYE arrangement does not apply:

> However, any STBVs who meet the conditions for EP Appendix 4

[23] Author's footnote: Employees of the foreign branch do not qualify for STBV relief; see 37.14 (Employer foreign PE of UK co).

> should be reported under that arrangement.[24] ...
> Non-resident directors of the UK company must not be included in this arrangement.

Why are directors excluded? Perhaps they are assumed likely to have substantial earnings, or at least exceeding the personal allowance? The way forward for directors with taxable earnings under the personal allowance would be to seek a NT code; see 36.11 (DTA relief: PAYE NT code).

36.12.3 *Operation of EP App 8*

The PAYE Manual continues:

> **What does it cover?**
> The special arrangement covers relevant payments of PAYE income and / or taxable benefits in kind provided to the STBV for the tax year that the arrangement is signed and any subsequent tax years until it is either terminated or reviewed.
> The UK employer will total all relevant payments made by both the UK employer and home country employer to the STBV for UK workdays in the year and pay the tax due to HMRC. This will take into account Personal Allowances where appropriate, based on the tax tables at month 12 of the relevant tax year. If the employee is covered by employer tax equalisation arrangements, the tax must be grossed up within the calculation.
> If the UK employer provides a benefit in kind to a STBV, they are not required to prepare a Form P11D in respect of that benefit. However, they must include the cash equivalent of the benefit and any other benefit provided by the home country employer (calculated in accordance with relevant sections of the Income Tax (Earnings and Pensions Act 2003) within any month 12 calculations they are making for the PAYE income paid to these employees.
> If the employer bears the tax on the provision of the benefit in kind, the amount of the tax must also be grossed up within the calculation.

36.12.4 *60 UK workdays cap*

The PAYE Manual continues:

> The arrangement only applies to a STBV whose UK workdays in the tax year total 60 days or less.[25]

[24] See 36.13 (DTA PAYE exemption: EP App 4).

[25] The limit increased from 30 to 60 days in 2020/21; see 36.12.7 (2020 changes).

This is a different test from the DTA 60-day rule[26] because:

(1) One counts workdays, not days of presence.

(2) The 60 days may form part of a more substantial period (eg straddling a tax year).

> This limit will not be relaxed and the employer will not be able to pay any tax via other methods, such as PAYE Settlement Agreement. The employer must include any STBV whose UK workdays total more than 60 days in their regular payroll or, if applicable, in accordance with EP Appendix 6 [tax equilisation scheme] payroll.
>
> The 60 UK workdays does not include any day where the conditions for a PAYE Special Arrangements under EP Appendix 4 are met in respect of a whole day.[27]
>
> Employers must determine whether days of travel to or from the UK are to be counted as UK workdays. Employers may apply the rule of thumb at EIM77020.[28]
>
> However, where the STBV undertakes UK work other than travel on the particular day, overseas workday should be replaced by half UK workday and half overseas workday.

HMRC say:

> *Question:* How are the work days counted in respect of the STBV Special Arrangement for the following circumstances: an STBV with 2 distinctive roles, 1 of which can be included on the EP Appendix 4 (as the economic employer remains overseas), and the other role which results in taxable workdays in the UK.
>
> Are all days counted? Or just those relating to the taxable role?
>
> *HMRC answer:* The Special Arrangement at PAYE81950 defines a "UK Workday" within the arrangement as "a day (or part day) where duties are carried out in the United Kingdom for the UK Employer."[29]
>
> This means that, for the purposes of the Special Arrangement, the days relating to the duties/role performed for the overseas employer (and so qualifying under EP Appendix 4) are not counted as part of the 30 UK workdays, except where duties of the taxable role are performed on the same day. This is on the understanding that the facts do indeed support the basis that the individual remains economically employed by the

[26] See 37.10 (DTA 60-day rule).

[27] See 36.13 (PAYE exemption: EP App 4).

[28] See 26.30.2 (International business travel).

[29] Author's footnote: Where does it say this?

> overseas entity for the duties for which PAYE is relaxed under EP Appendix 4.[30]

36.12.5 *Annual PAYE*

The PAYE Manual continues:

> **Annual PAYE scheme**
> Upon receipt and acceptance of the Appendix 8 application, HMRC will set up an annual PAYE Scheme to enable the employer to account for the tax on the payments made and the cash equivalent of any benefits provided to employees covered by this arrangement.
> The UK employer must report the relevant payments made and/or the cash value of any benefits in kind provided for the UK workdays to one or more STBV(s) in that tax year on an RTI submission. These schemes RTI submissions must be delivered to HMRC by 31 May following the end of the relevant tax year up until the scheme is closed by HMRC or the employer. If there are no employees eligible to be included in a tax year, a nil submission must be filed by the deadline of 31 May.
> The return must be made using an approved method of electronic communications.
> Only one Appendix 8 scheme is permitted per each individual UK company or UK branch of an overseas company covered by this arrangement.
> **Payment of tax**
> Tax is due on the payments made and any benefits provided by 31 May following the end of the relevant tax year.
> The payment must be made using a 17-character reference, which is made up of the 13-character Accounts Office reference, followed by the last two digits of the year and the month of the tax period. The month used should always be 12.
> For example, using tax year ending 2021, the reference format would be 123PP001234562112.
> Interest will be charged on any tax due which is paid late.
> **Treatment of any taxable benefits in kind**
> The employer must gross up the tax liability on the benefits in kind unless they recover the tax from the employee. A gross up of tax on PAYE income will only be required where the STBV is covered by employer tax equalisation arrangements.

[30] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

36.12.6 *Making/ending the agreement*

The PAYE Manual continues:

> **Ending the Special Arrangement**
> Both the employer and HMRC can terminate the Special Arrangement. The employer is entitled to cancel the arrangement by giving HMRC written notice of the cancellation. This will take effect from a date agreed by the parties or, if the parties cannot agree, the earlier of the end of a period of 3 months from the date of issue of the notice or 6 April following the tax year in which the cancellation notice is given.
> If the employer terminates the arrangement, the PAYE Regulations will apply to the relevant payments and form(s) P11D must be prepared in respect of benefits in kind provided to a STBV by the UK employer from the date that the cancellation notice takes effect.
> If there is
> - an amendment to legislation which has a consequential effect on the arrangement;
> - any change to a material fact which was a relevant factor in HMRC's decision to enter into the arrangement; or
> - any operational difficulty which arises as a result of operating this arrangement.
>
> HMRC can review the arrangement and where it considers the employer has not complied with its terms, it can cancel it by giving a cancellation notice in writing. This will take effect from a date agreed or, if not agreed, the earlier of the end of a period of 3 months from the date of issue or 6 April following the tax year in which the cancellation notice is given.
> Following cancellation, the employer will be required to submit:
> - Payments in real time, and
> - Form(s) P11D in respect of any benefits in kind provided
>
> **Self Assessment**
> HMRC does not expect employees under this arrangement to submit SA returns unless they have another UK tax liability.
> If a STBV needs to complete a UK tax return for other reasons, then the STBV would also need to include all Appendix 8 earnings within the Employment page.
> **National Insurance contributions**
> The arrangement is agreed under the authority of the PAYE Regulations and there is no equivalent legislation for National Insurance. Any STBV who has a Class 1 NICs liability cannot be included and any Class 1 NICs must be paid within the relevant earnings period.
> Any requests to review this decision should be referred to the Expat

> Team within Business Tax & Customs.

36.12.7 *2020 changes*

The STBV consultation response paper provides:

> 3.1. On 29 October 2018, the government announced that two changes would be made to the PAYE special arrangement to better ease the administrative burden of operating PAYE on STBVs from foreign branches.
> 3.2. Firstly, the UK workday rule will be increased from 30 days or less to 60 days or less.
> [1] This will open up the PAYE special arrangement to a greater number of STBVs from branches, and
> [2] it will reduce the need for employers to monitor or restrict business travel when STBVs approach the 30 workday limit.

Perhaps the less said about the wording of point [2] the better.

> 3.3. Secondly, the existing PAYE reporting and payment deadlines of 19 April and 22 April will be changed to 31 May to allow employers more time to gather relevant information about their STBVs to operate PAYE accurately. It was clear that these deadlines are too restrictive to businesses and are making it difficult for them to comply with their obligations.
> 3.4. Both changes will be introduced from 6 April 2020.

HMRC Employer Bulletin provides:

> If you are using the current PAYE special arrangement, you will need to sign-up to the new Appendix 8. We will write to you with more information on how to do this later this year.
> Please note that the filing and payment deadlines for 2019 to 2020 annual return will remain as 19 April 2020 and 22 April 2020 respectively. The UK workday limit for the 2019 to 2020 tax year will remain as 30 workdays.[31]

But the PAYE Manual provides:

> **PAYE81950: PAYE special arrangement for short term business visitors** [May 2020]
> Important Note: Due to the recent COVID-19 outbreak and

[31] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/839773/English.pdf* (Oct 2019).

> accompanying advice the Prime Minister and HM Government have issued, we recognise most customers and agents may either be in self-isolation or will be working from home, therefore access to your usual resources may be limited. Therefore, we've reassessed our position and outline the following:
>
> - The deadline to return the end of year report has been extended from 31 May 2020 to 31 July 2020.

36.13 PAYE exemption: EP App 4

The STBV consultation paper provides a summary:

> 1.5 In the UK an administrative easement is available to UK companies with STBVs arriving from their overseas subsidiaries. The UK company can apply to relax their obligation to operate Pay As You Earn (PAYE) on the relevant earnings of an individual who is:
>
> - tax resident in a country with which the UK holds a DTA;
> - coming to the UK to work for a UK company for less than 183 days in any twelve month period; and
> - economically employed by a non-resident entity

The PAYE Manual provides:

> **PAYE 82000 PAYE operation: international employments: EP appendix 4: criteria for short term business visitors** [Jun 2020]
>
> **... Short Term Business Visitor Arrangements**
>
> The CWG2 Employer Further Guide to PAYE and NICs advises employers that it may be possible to relax strict PAYE requirements for employees on short-term business visits to the UK, and tells employers to contact their HMRC Office.
>
> This arrangement provides that PAYE can be disregarded in certain circumstances.
>
> If an employer has only one or two employees potentially affected they may like to consider applying for an NT code (see PAYE81625) on an individual basis instead.[32]

36.13.1 *PAYE exemption: Conditions*

The PAYE Manual continues:

> **Conditions**
>
> This arrangement must only be applied where individuals are
>
> - Resident in a country with which the UK has a Double Taxation

[32] See 36.11 (DTA relief: PAYE "NT" code).

> Agreement under which the Dependent Personal Services / Income from Employment Article (Article 15 or the equivalent) is likely to be competent
> - Coming to work in the UK for a UK company or the UK branch of an overseas company, or are
> - Legally employed by a UK resident employer, but economically employed by a separate non resident entity
> - Expected to stay in the UK for 183 days or less in any twelve month period
>
> Provided that it can be shown that for specifically named employees whose presence in the UK is 60 days or more, the UK Company or branch will not in fact ultimately bear the remuneration specified.

In short, the arrangement applies where an employee can expect DT relief on UK source employment income. For DT relief, see 37.2 (Employment income DT relief).

> Where agreement is reached and in all other aspects the employee falls within the guidelines, then that part of the remuneration not ultimately borne by the UK Company or branch can fall within this arrangement. See also the three 'Notes: Definitions' below regarding employees receiving some remuneration that is ultimately borne by the Company or branch and some which is not.
>
> These arrangements will not apply where the expense of the remuneration is passed on to another UK Company or branch and not recharged overseas.
>
> For those whose presence in the UK is 59 days or less, it is only necessary to show that the employees were paid via a non resident employer's payroll.
>
> This arrangement must not be applied where individuals are employed by a UK resident employer including an overseas branch of a UK resident employer except where the individuals are sent abroad to work for a separate non resident entity and return to perform duties in the UK solely for that non resident employer. Such individuals are not covered by the 60 day rule.

36.13.2 *Remuneration ultimately borne by non-resident*

The PAYE Manual continues:

> **Notes: Definitions**
>
> Where used in this arrangement, the term remuneration has its widest possible meaning and includes salary, wages, benefits, allowances and expenses
>
> Where an employee otherwise falling within this arrangement receives

> remuneration borne by companies in different countries then
>
> 1. Remuneration not ultimately borne in the UK - falls within this agreement[33]
> 2. Remuneration ultimately borne in the UK - does not fall within this agreement unless the presence in the UK is for 59 days or less and those days do not form part of a longer period (see below) or HMRC Office has agreed a dispensation for it. It is therefore possible for an employee falling within this arrangement to also have a PAYE liability. If otherwise appropriate this PAYE liability can be met using modified PAYE procedures as described in EP Appendix 6, PAYE82002[34]
>
> 'Ultimately borne' means the company finally bearing the cost after all recharging of any nature
>
> Although employee remuneration ultimately borne by the UK Company (except in 2 above) is not normally covered by this particular arrangement, the OECD commentary provides examples of situations where the UK Company would not be regarded as the economic employer and treaty exemption may therefore apply, including where the employee is present for 60 days or more. Employers may request agreement from HMRC for specified circumstances where these arrangements may be applied and PAYE deductions need not be made. Failing such agreements, a separate claim for treaty relief should be made by the employee. This further relaxation is initially for a trial period and may be withdrawn.

The employee does not have to claim treaty relief where a STBV scheme is in operation.[35]

HMRC refer to the last sentence, and say:

> The trial period is continuing with no specific end date. HMRC will continue to monitor the position and will endeavour to liaise with Forum members before any further changes are made.[36]

The PAYE Manual continues:

> **PAYE 82000 EP appendix 4: criteria for short term business visitors** [Jun 2020]
>
> **...**
>
> Full Payment Submissions do not need to be completed for EP

[33] This is consistent with the OECD Model: see 37.3 (Salary/wages/ remuneration).

[34] See 36.15 (Tax equalisation: EP App 6).

[35] See STBV scheme consultation document para 3.16.

[36] Expat Forum Q&A log (July 2019) (informally circulated).

Appendix 4 employees

The PAYE manual next discusses the various rules for application of treaty relief, but that need not be set out here, as it is fully discussed elsewhere.[37]

36.13.3 *Terms of EP App 4 agreement*

General principles of an EP Appendix 4 arrangement

1. It applies where there would otherwise under PAYE regulations be a requirement on the part of the host employer, UK branch or legal employer to make PAYE deductions
2. It only applies to employees who have not become UK resident for tax purposes or if UK resident, are treaty resident in the treaty partner country
3. In all cases involving short-term assignment of employees to the UK, the employer will put in place some form of internal reporting system to keep as accurate as possible a record of employees visiting the UK on business. It is expected that this system will have the following minimum requirement
   - Employees will periodically report days spent in the UK on business to the central point controlling this arrangement
   - Employees should not spend more than 30 days intermittently in the UK in any 12 month period without reporting to that central point
4. All records that are kept under this arrangement are within Regulation 97 IT (Pay As You Earn) Regulations 2003 and so must be retained for the time limits that apply and produced for inspection
5. Where liability is subsequently found to arise on payments of PAYE income made to an employee, the employer will be expected to pay the tax that ought to have been deducted from or otherwise paid in respect of each payment. Late payment of PAYE tax will attract interest in the usual way. Late filing and late payment penalties will not apply where HMRC accepts that the employer backdated the PAYE and filed the FPS as soon as could be reasonably expected following a change in circumstances preventing an employee from being included in this arrangement
6. Should it become apparent that PAYE is not being applied in the case of employees who do not satisfy the relevant criteria, HMRC reserves the right to insist that PAYE be operated strictly for all employees from day 1
7. Any employee who cannot fulfil the conditions set out below should have PAYE operated from day 1
8. The treatment for NICs purposes of employees coming to the UK is covered in the CWG2 Employer Further Guide to PAYE and NICs

The time limits given in EP Appendix 4 are administrative only and are over-ridden by any legislative time limits. For example if a taxpayer needs to complete a Self Assessment return then the normal rules relating to Self Assessment apply.

[37] See 37.13.2 (Counting days).

Visitors to the UK covered by the 60 day rule[38] for 1 - 30 days

No requirements for either employer or employee to fulfil other than where the period is part of a longer period of 60 days or more.

Visitors to the UK covered by the 60 day rule for 31 - 59 days

For an employee who spends no more than 59 days in the UK during the tax year, PAYE can be disregarded provided it is confirmed that

1. there is no formal contract of employment with the UK employer
2. the 59 days do not form part of a more substantial period. (See DT1922 and above regarding the 60 day rule.)

All visitors to the UK not covered by the 60 day rule for 1 - 90 days and other visitors to the UK for 60 - 90 days

For an employee in the UK for not more than 90 days in the tax year, PAYE can be disregarded provided that the employer supplies the information below by 31 May following the end of the tax year

- Full name of employee
- Last known UK and overseas addresses of employee
- Nature of duties undertaken
- Date commenced
- Date ceased
- To which country a tax return covering worldwide income is submitted

And confirms that the UK Company does not

- Ultimately bear the cost of the employee's remuneration
- Function as the employee's employer during the UK assignment. (See DT1922 for further information)

Visitors to the UK 91 to 150 days

For an employee in the UK for a period of 91 days but not exceeding 150 days in the tax year PAYE can be disregarded provided that

1. All of the information requested for visitors up to 90 days is provided and in addition
2. In the case of non-US citizens and Green Card holders, the employee provides a statement from the overseas Revenue authority confirming residence in the other state for tax purposes throughout the period in the UK. This statement should be passed to the HMRC Office by 31 May following the end of the relevant overseas tax year. This arrangement is only provisional until the relevant certificate is received.

In the case of US citizens and Green Card holders it will only be necessary for the employee to provide evidence of continuing residence in the US. (See DT19861A for further information.)

Visitors to the UK 151 to 183 days

Applications will be made on a named individual basis for authority to include the employee in this arrangement. The application will be made as soon as it can reasonably be anticipated that the employee will be present in the UK for more than 150 days. The application will include

1. All of the information requested for visitors up to 90 days and confirmation

[38] See 37.10 (The 60-day rule).

that the statement from the overseas Revenue authority will follow by the relevant 31 May

2. A statement by the employee giving reasons why he/she considers himself/herself to be treaty resident in the treaty partner country by reference to the appropriate article in the Double Taxation Treaty

Helpsheet HS302 provides more information about dual residence generally and the tests to be applied to determine the country of tax residence.

HMRC will consider the circumstances and will

1. Notify the employer that the individual can be included in the Appendix 4 arrangement, or
2. Authorise code NT and issue a Self Assessment tax return, or
3. Confirm that PAYE should be applied and issue a Self Assessment tax return

Signed [etc]

Authorised on behalf of HMRC: Signed [etc]

Applications should be sent to: Charities, Savings & International 3, HM Revenue and Customs, BX9 1AJ

36.13.4 *EP App 4: Mistakes*

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> 3.9 Another common area that HMRC find errors is in respect of EP Appendix 4 Arrangements, particularly the practical operation.
>
> 3.10 The arrangement only applies where individuals are:
>
> - Resident in a country with which the UK has a double Taxation Agreement under which the Dependent Personal Services/Income from employment article is likely to be competent.
> - Coming to work in the UK for a UK company or the UK branch of an overseas company, or are
> - Legally employed by a UK resident employer, but economically employed by a separate non-resident entity.
> - Expected to stay in the UK for 183 days or less in any 12 month period.
>
> 3.11 HMRC has found the most common error is when individuals have been included even if the country in which they are resident has no DTA with the UK.
>
> 3.12 Recently a case has come to light where a customer came the UK from Hong Kong as a STBV. Whilst the UK and HK do have a DTA, there is a fourth condition within Article 14 Paragraph 2 which is not present in other DTAs. It states: d) the remuneration is taxable in the first-mentioned Party according to the laws in force in that Party. This means that for STBVs in the UK, the remuneration has to be taxable in Hong Kong for condition d) to be met and hence for double taxation relief to be claimed.
>
> 3.13 If an employee is employed by a Hong Kong company to work in

> Hong Kong then their full income is chargeable in Hong Kong even if part of the duties are carried on outside Hong Kong. However, they may claim exemption of income or relief from tax under certain circumstances on a year-by-year basis.
>
> 3.14 In the case in question an employee of a UK employer that was assigned to work in Hong Kong made visits to the UK as a STBV.
>
> They were included in an appendix 4 arrangement but subsequently the employer realised that the UK duties would not be assessable in Hong Kong and as such condition d) of para 2 Article 14 is not satisfied and treaty relief is not available. The remuneration from their duties in the UK should therefore be taxed in the UK.
>
> 3.15 HMRC wanted to flag this up to employers as there may be similar problems with STBVs coming from Singapore as this DTA contains a similar clause to the Hong Kong DTA[39]

36.13.5 *EP App 4: Administration*

HMRC say:

> Unfortunately, Appendix 4 returns can no longer be filed via the mailbox. The available methods for filing are either via the postal system or via shared workspace.[40]

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

> 5.2 Please do not send EP Appendix 4 reports to us using more than one source. The preferred method is through our digital mail system, the postal address is:
>
> HMRC Personal Tax International Operations S0733 PO Box 203 BOOTLE L69 9AP
>
> We have received a number of emails stating that the agent or employer has also sent a hardcopy of the report. This is not required – as it just duplicates our work and as this time of year is extremely busy for us, it creates major delays in us dealing with more pressing issues.
>
> 5.3 we will no longer be acknowledging all EP 4 reports. If we need any further information we will write out and ask for it. This means that for

[39] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/642764/JOINT_EXPATRIATE_FORUM_ON_TAX_AND_NICS_-_Minutes_12_July_2017.pdf* (12 July 2017)

[40] Expats Forum: Q & A Log *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

reports only recording STBVs of less than 60 days no acknowledgement will be issued.
5.4 Not all Business areas within HMRC can accept and receive post via email. The reason being that not all emails are secure. Operations have been receiving an increasing amount of unsolicited emails from agents where correspondence really should be coming through DMS or through Shared Workspace.
5.5 HMRC can still receive post by fax. The fax number is 03000 533121.
5.6 Customer calls now go through to staff on another team. These customer operations staff have been trained to deal with general expat issues, however anything technical will still be dealt with by out expat operations team.
5.7 Finally when submitting information to HMRC regarding new starters, please:

- Supply the (correct) date of birth.
- Provide us with the correct PAYE ref for the employer
- Confirm when (if applicable) the first Full Payment Submission was made.[41]

36.14 Foreign tax credit: EP App 5

The PAYE Manual provides:

> **PAYE82001: EP appendix 5: net of foreign tax credit relief** [May 2020]
> ... **Employer required to deduct foreign tax**
> The CWG2 Employer Further Guide to PAYE and NICs, advises employers to contact HMRC if they have to do this. If they do, HMRC considers the position as set out in PAYE81715.
> PT Operations North East England, BX9 1BX are responsible for authorising the employer to operate an Appendix 5 arrangement.
> Appendix 5 arrangements
>
> - Only apply to UK employers who are required to deduct foreign tax from payments being made to employees sent to work abroad whilst continuing to deduct UK PAYE from an employee's pay using their UK tax code and UK tax tables
> - Allow provisional relief for double taxation for employees who must pay both UK tax (by a PAYE deduction) and foreign tax from the same payment of earnings
> - Should not be followed by the employer or agent for any other contract(s) or employees not notified to HMRC without prior application and

[41] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/642764/JOINT_EXPATRIATE_FORUM_ON_TAX_AND_NICS_-_Minutes_12_July_2017.pdf* (12 July 2017)

authorisation

All PAYE and NIC reporting requirements must still be fulfilled by the employer. There can be no question of abandoning PAYE/NIC altogether for the duration of the overseas contract.

Double taxation

If the employee has to pay foreign tax direct to an overseas Revenue authority on payments taxed through PAYE, advance DTR can be given through the PAYE code (see PAYE81715).

In many overseas contract situations, where an employee is abroad for less than 6 months no overseas tax is ultimately found to be due. This is because the employee will usually have personal protection under the terms of many Double Taxation Agreements (DTA).

However, it cannot be assumed that DTA protection is available on the basis that the employee works in an overseas country for less than 183 days. The relevant DTA and the other authority should be consulted. In particular, the 183 day protection may not be available where

- The employee works for a resident of the overseas country who functions as their employer

Or

- Their contractual employer has an identifiable `permanent establishment' in the overseas country

Or

- The DTA says so

If these circumstances apply, or where no DTA exists, overseas tax is due from day 1. The overseas country may also impose withholding at source obligations on the employer even though the UK employer is still required to operate PAYE/NIC on payments made to the employee.

It is in these specific circumstances or where the 183 days period is exceeded but the taxpayer remains UK resident, that HMRC may then authorise an Appendix 5 arrangement.

Note: If foreign tax is paid by the employer on the emploee's behalf, HMRC would not authorise an Appendix 5 arrangement. Payment in this manner could also constitute a pecuniary liability.

Employers responsibilities under this arrangement

The employer must only give credit by this method for foreign tax actually payable on and deducted from the employee's wages and paid to the overseas authority. Credit is given by reducing the amount of UK PAYE due from wages by the amount of foreign tax deducted in the same tax period.

- The credit is restricted to the amount of UK PAYE tax due from the employee's wages (NICs deductions and contributions are not affected in any way)
- Any net UK PAYE tax balance remaining due should be reported and paid to HMRC by the normal payment date with all the NICs due
- Any UK PAYE refunds due during the year because of a change of code number must be restricted to the net UK PAYE deducted from the employee during the tax year
- The employer and/or the employee must advise HMRC where any foreign

tax has been refunded

If an employer advises that foreign tax is paid by the employer on the employee's behalf, HMRC would not authorise Appendix 5 if an application is made. Payment in this manner could also constitute a pecuniary liability.

Employee redeployed, no longer overseas

For employees who cease to work overseas but continue in the same employment in the UK or another location, the employer must

- Ensure details of pay and UK tax deducted up to the date of redeployment together with the foreign tax credit are reported
- Operate the employee's existing code on the Week 1 or Month 1 basis

Employee leaves employment or dies

Employers should take the following action where an employee leaves the employment or dies

- Submit a final FPS for the employee showing the date of leaving or death as appropriate and showing the code as if it had been operated on a Week 1 / Month 1 basis
- Any P45 issued to a leaver should be completed as if the tax code has been operated on the Week 1 or Month 1 basis, showing the net UK tax deducted. This is to ensure that any new employer does not operate it on a cumulative basis

A statement of the overseas tax deducted, for which credit has been given against UK PAYE, should be issued to the departing employee and it should contain

- The Total Taxable Pay to date
- The Total Foreign Tax deducted or paid
- The amount of UK PAYE that has been offset by the foreign tax

HMRC action once Appendix 5 is authorised

Where Employer Technical team authorise an Appendix 5 they

- Must confirm this in writing
- Request the name and NINO of each employee to be included in it (retrospective addition of employees cannot be authorised)
- Ask the employer to provide a quarterly tax year update of any changes in the number of employees included
- Use EBS Function AMEND EMPLOYER NOTES to record that an Appendix 5 arrangement has been agreed
- Record the employers details on a database spreadsheet

At the end of the tax year

At the end of the tax year the employer should send HMRC a statement showing

- The name and NINO of each employee included in the arrangement
- The total payment which both PAYE and foreign tax was operated on
- The total foreign tax deducted which was set off against that employees UK PAYE deductions due (foreign tax credit relief)
- The amount of foreign tax paid to the overseas authority - the employer should also provide evidence the foreign tax has been paid.

This information should be sent to a separate Employer technical team that completes an end of year tax review. Their address is HMRC, Appendix 5 team, The Triad, Stanley Road, Bootle, L75 1HW

This team takes the following actions in PAYE Service upon reviewing all employees in the arrangement

- Enter a Contact History note; 'employee is included in an Appendix 5 arrangement'
- Set the inhibit automatic reconciliation signal for CY and CY+1 (this should be set on the record for every year until the employment ceases)
- Set the PAYE direction indicator on the Employment details screen

For redeployments, leavers and deceased cases on receipt of the P45(1) or equivalent on each employee record

- Enter a Contact History note; 'Total tax to date (enter date of leaving or redeployment) is net of Foreign Tax Credit Relief'
- Update the current year's record to add a Week 1 / Month 1 basis to the latest code on the record

Errors

Employers should have included any net UK tax deducted on their employees Full Payment Submissions throughout the year and any errors should have been corrected before the end of the tax year.

If an error has not been corrected in the final FPS on or before 19 April, the employer must submit an Earlier Year Update (EYU).

Note: Employers should not use the FPS or EYU process to recover deductions of tax, where they discover the employee has overpaid foreign or UK tax.

Correction by FPS or submission of an EYU is only in respect of actual errors made by the employer. For instance showing a tax deduction of £1000 as £100, when £1000 was the amount actually deducted from pay – the employer would amend to increase tax by £900.

36.14.1 *Action once agreement authorised*

The PAYE Manual continues:

Following an agreement to the relaxation of PAYE in accordance with Appendix 5, you must take the following action

- On the employers record, use EBS Function AMEND EMPLOYER NOTES to record that an arrangement under Appendix 5 has been agreed
- The Employers Technical Team will update the database spreadsheet that records these schemes

Notification of employees included in the arrangement

The employer must send details of employees included in this arrangement and keep you up to date with changes to those details on a regular basis (at intervals agreed between you and the employer).

On receipt of these details, you must take the following action to ensure that the taxpayer's liability is reviewed at the end of the year.

In all cases on each employee's record

- Enter a note on Contact History that the employee is included in an arrangement under Appendix 5
- Set the inhibit automatic reconciliation signal on the PAYE Service record for CY and CY+1 (this should be set on the record for every year until the employment ceases)
- Set the PAYE direction indicator on the Employment details screen

For redeployments, leavers and deceased cases on receipt of the P45(1) or equivalent on each employee record

- Enter the following note on Contact History 'Total tax to date (enter date of leaving or redeployment) is net of Foreign Tax Credit Relief'
- Update the current year's record to add a Week 1 / Month 1 basis to the latest code on the record

Note: A cumulative code for these cases cannot normally be restored in-year. If you receive a request for a cumulative code or an in-year repayment, you should tell the customer that this is not possible. If they press the matter you should contact Personal Tax Customer, Product & Process, PAYE Technical, Shipley for advice.

At the end of the tax year

The introduction of PAYE reporting in real time does not change the application of Appendix 5, where the employee is liable to pay foreign tax as well as UK PAYE.

Employers should have included any net UK tax deducted on their Full Payment Submissions throughout the year and any errors should have been corrected before the end of the tax year. If not corrected on the last FPS or by 19 April, the employer will have to submit an Earlier Year Update (EYU).

At the end of the tax year the employer should send HMRC a statement showing

- The name and NINO of each employee included in the arrangement
- The amount of income subjected to both PAYE and foreign tax
- The total foreign tax deducted
- The amount of foreign tax deducted and remitted to the overseas authority which was set off against that employees UK PAYE deductions due (foreign tax credit relief)

The employer should also provide evidence that the foreign tax has been paid.

This information should be sent in the first instance to

HMRC, Appendix 5 team, The Triad, Stanley Road, Bootle, L75 1HW.

Action at employer level

When the employer submits details of the foreign tax credit given with the evidence of foreign tax paid for each employee included in the arrangement, Bootle will follow their existing guidance and risk assess the cases by checking NPS and SA as appropriate.

Action at employee level

On receipt of details provided by the employer, for each employee you should

- Make a note on Contact History to record the foreign tax credit given by that employer in that year
- Proceed in accordance with the guidance at PAYE93038. ...

HMRC say:

Individuals claiming FTCs with no other Self-assessment criteria

We have recently had some conflicting advice from HMRC in relation to the claiming of FTCs for groups of individuals with no other Self-Assessment criteria. These were relatively low paid employees and the Appendix 5 net of foreign tax credit relief scheme was not used. For one client, HMRC processed individual repayment claims without tax returns but HMRC has confirmed that Self-Assessment tax returns must be sent in response to a similar request on behalf of another client. In both cases, the employees were entitled to relief for relatively small amounts of foreign tax paid on earnings which were also fully taxed in the UK via RTI. Most claims were for no more than a few hundred pounds and relevant data/ repayment mandates were provided. Please let us whether HMRC is willing to continue to consider claims without returns in these circumstances and if so the information which should be supplied as part of the claim.

HMRC Answer

A claim to Foreign Tax Credit Relief is not one of the SA criteria, the criteria for SA is someone having any foreign income other than dividends of £300 or less. For Appendix 5 employees, however, though they might carry out the duties of their employment abroad their earnings are paid in the UK through a UK payroll to a UK resident so we don't interpret them as being foreign income. We won't, therefore, put someone in SA just because they are in an Appendix 5 arrangement. If they don't meet the SA criteria for any other reason we will give them Foreign Tax Credit Relief through the NPS calculation.[42]

36.15 Tax equalisation: EP App 6

See 26.42 (Tax equalisation).

The PAYE Manual provides:

> **PAYE82002 - PAYE operation: international employments: EP appendix 6: modified PAYE in tax equalisation cases** [May 2020]
>
> **Application for modified PAYE for tax equalised expatriate employees from 6 April 20__**
>
> Tax equalisation generally describes an arrangement between an employer (see Note 1) and a foreign national employee who comes to the UK to work. Under the terms of an agreement, the employee (see Note 2) is entitled to specified net cash earnings and non-cash benefits. The employer undertakes to meet the UK Income Tax liability arising from the earnings and to ensure that the employee's UK tax affairs will be handled by a professional adviser or by an in-house specialist experienced in tax equalisation issues.
>
> **For an employee to be included in an arrangement established under this application, the employer must equalise liability to UK Income Tax on all general earnings subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, or domiciled outside the UK.**
>
> An application indicates that the employer agrees to operate PAYE on a gross-up of cash earnings and non-cash benefits for all employees eligible to be included

[42] Expat Forum Q&A log (July 2019) (informally circulated).

in this arrangement and has undertaken with the employees to pay any residual UK liability on earnings based on each employee's self assessment. Employers should ensure that employees complete their self-assessment returns in accordance with the guidance in Help Sheet IR212.

Note 1: For the purposes of this application, 'employer' includes a 'relevant person' for whom an employee works in terms of section 689 Income Tax (Earnings and Pensions) Act 2003 (ITEPA).

Note 2: For the purposes of this application, 'employee' includes an 'office holder'.

Note 3: Where the employee is tax equalised on all general earnings but not on specific employment income, for example, on taxable share related events, or on restricted securities which are taxed both as general earnings on award and subsequently as specific employment income when restrictions are lifted, the employee may still be covered by the arrangement as long as all the other conditions are satisfied.

Note 4: Employers who payroll actual rather than estimated benefits in kind (excluding living accommodation, vouchers and credit cards , interest free and low interest (beneficial) loans) may register for the online Payrolling Benefits in Kind (PBIK) service. Where the PBIK service is used, forms P11D will not be required under paragraphs 15. and 16. below.

Employer name:…………………………………

Employer address: …………………………………

Employer PAYE reference: …………………………………

Calculation of estimated PAYE on tax equalised earnings

1. We will prepare a best estimate of all earnings including cash allowances and non-cash benefits for the year at the beginning of each year, grossed-up for tax purposes and calculate PAYE tax without restriction for the 50 per cent 'overriding limit'. We will use the Scottish rates of income tax for employees who are Scottish taxpayers. The best estimate will include, where relevant, the annual salary, any cash bonus awards made to 5 April and non-cash benefits provided by a home country employer.
2. We will undertake an in-year review during the period December to April to take account of any material changes, and in particular, to ensure that
   1. Calendar or tax year end bonuses are accounted for
   2. Taxable share related events are accounted for
3. Where we do not equalise liability in respect of awards under 2(b) above
   1. PAYE must be applied in accordance with all relevant statutory provisions and regulations and
   2. In the case of notional payments, where an employee does not make good the due amount within the period of 90 days specified by section 222(1) (c) ITEPA 2003, we will include additional earnings in this arrangement equivalent to the due amount. These additional earnings will be grossed-up for tax purposes.
4. We will update the estimated PAYE calculation during the year to reflect arrivals and departures of employees subject to this application.
5. We will exclude from the estimated PAYE tax calculation contributions we

make (employer contributions) to a qualifying overseas pension scheme in respect of an employee who is a relevant migrant member of that scheme. Subject to the conditions specified in paragraph 51 of Schedule 36 to the Finance Act 2004, we will exclude employer contributions to an overseas pension scheme in relation to which the employee received corresponding relief in 2005-06. We will also exclude employer contributions to overseas schemes where the employee is entitled to relief from UK tax under the terms of a Double Taxation Agreement.

6. We will take into account employee contributions to the overseas pension schemes referred to in paragraph 5 where we know the amounts involved and are satisfied that each employee is entitled to relief for contributions as a relevant migrant member or with pre-commencement entitlement to corresponding relief or under the terms of a Double Taxation Agreement.

7. Where we give provisional relief for overseas workday relief based on each employee's workday history or as anticipated by the employees where they join during the tax year, we will withdraw personal allowances, apply code 0T, or SOT for Scottish taxpayers and notify HMRC accordingly. Any tax gross-up will0 be applied after the earnings have been apportioned between UK and non-UK duties. We will enter code 0T, or S0T as applicable on the payroll record and Full Payment Submissions.

8. Where paragraph 7 does not apply, we will give personal allowances by applying the emergency code on a cumulative basis using the S prefix for Scottish taxpayers where applicable when calculating PAYE tax. We will enter that code on the payroll record and Full Payment Submissions.

9. We will take relief for foreign tax into account in respect of UK residents working abroad where an agreement has been reached with HM Revenue and Customs (HMRC) in accordance with the PAYE Manual EP Appendix 5. We note in particular the requirement that an overseas country imposes a withholding at source obligation on earnings that are subject to PAYE.

10. We will not apply PAYE to the earnings of a tax-equalised employee covered under separate arrangements in EP Appendix 4 of the PAYE Manual. Where it later appears that such earnings are not exempt from UK tax under the terms of the relevant Double Taxation Agreement, we will include the employee in this arrangement and notify HMRC accordingly.

11. We will send one FPS each month no later than the 19th of the month following the end of the tax month. The FPS will show the estimated earnings and income tax calculated in accordance with this agreement. The FPS will include an entry in the Late Reporting Reason field to prevent late filing warning letters. Enter A – Notional payment: Payment to Expat by third party or overseas employer. We undertake to pay 1/12th of the estimated PAYE for the tax year each month by the 19th or 22nd of the following month (depending upon the payment method). Where the number of employees covered by this arrangement at any one time is five or fewer, we undertake to pay 3/12ths of the estimated PAYE tax on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April ('the quarterly basis'). If the number of employees covered by this arrangement increases to more than 5 at any one time in the course of a year and is likely to remain at that higher level, we will make

payments of estimated PAYE by the 19th or 22nd of each month from the start of the following tax year. If the number of employees covered by this arrangement at any one time reduces to five or fewer in the course of a year and is likely to remain at that lower level, we will make payments of estimated PAYE on the quarterly basis from the start of the following tax year. Late payment penalties under schedule 56 of the Finance Act 2009 will not apply to payments under this arrangement providing that tax is paid at the agreed time. Schedule 56 penalties will be charged if the estimated tax is not paid as specified in this paragraph.

12. We agree that making an Earlier Year Update (EYU) is not appropriate for employees included in this arrangement. If a self-assessment tax return is submitted with an incorrect PAYE tax figure we undertake to ensure the return is amended, to reflect the correct figure, if we are within the amendment time limit (12 months from the original return deadline). If we need to amend the PAYE tax figure after the amendment limit we agree to

1. Write to HMRC to make an overpayment relief claim
2. Write to HMRC to make a disclosure of any further PAYE tax due

Arrivals and departures

13. We shall submit a Full Payment Submission which will confirm for each employee covered by this agreement

- That the employee is included in a EPM6 agreement
- A relevant starting date
- The length of time the seconded employee intends to work in the UK and if they intend to live here
- If they are from the European Economic area
- A leaving date - the actual leaving date may be entered on the final Full Payment Submission for the year where a month 12 reconciliation is undertaken. In these circumstances, the Irregular Employment Pattern Indicator should be set to keep the record open.

Year end requirements

14. Forms P60 will be given to the employees by 31 May after the end of each tax year. The figure of pay for each employee will comprise all cash payments and non-cash benefits in respect of which PAYE tax has been calculated after grossing-up. The figure of tax will be the total amount of PAYE tax paid under this arrangement in respect of the employee concerned.

15. We accept that due to the inherent nature of these modified arrangements, over and underpayments of tax may arise compared with the amount of tax that would otherwise have been due if normal PAYE procedures had been applied. Provided that the procedures as outlined in these arrangements are followed, interest will not be charged in accordance with the PAYE regulations in respect of any residual income tax liabilities as shown by the employees' tax returns. However, it is accepted that interest will run on any part of the estimated PAYE for a tax year due to have been paid under this agreement which (depending upon the payment method) reaches HMRC after 19 or 22 April, as appropriate, following the end of the tax year.

16. We shall submit in respect of each employee covered by these arrangements a form P11D, or an approved substitute, and associated form P11D(b) by 31

January following the end of the tax year. We acknowledge that where all statements are not submitted by 31 January following the end of the tax year, penalties under Section 98 TMA 1970 may arise. This is on the basis that the earnings in question ought to have been provided on forms P11D or approved substitutes before 7 July following the end of the tax year.

Submission of employee's self assessment tax return and calculation of tax liability

17. We will have systems and procedures in place to ensure that each employee's self assessment will include actual cash remuneration, all benefits and reimbursed expenses payments and other amounts chargeable to tax as employment income, grossed up on a current year basis. Each employee's tax return will include a note in the notes section of the relevant Employment Page to the effect that the employee is tax equalised and Modified PAYE has been applied.

Payment of residual Income Tax liability

18. We will pay any additional tax found to be due under these arrangements following the submission of the employee's tax return by 31 January following the end of the tax year. Alternatively, if a refund is due, the appropriate repayment claim mandated to us or (if different) to the employee's contractual employer will be submitted. We understand that as a consequence of these arrangements there will be no requirement to make payments on account of tax liabilities. We acknowledge that a tax return for an employee covered by these arrangements should incorporate a claim to cancel payments on account. We further understand that HMRC should not issue Statements of Payments on Account to employees included under these arrangements.

19. We understand that for employees who receive overseas workday relief any overpayments of PAYE will not be treated as a remittance of foreign earnings where repayment is mandated to an employer in the UK.

National Insurance Contributions

20. These arrangements do not apply to National Insurance Contributions (NICs). In cases where the employee is liable for Class 1 NICs and taxable benefits are provided that attract Class 1A NICs, NICs must be accounted for in the normal way unless separate arrangements are agreed with HMRC as set out in EP Appendix 7A of the HMRC PAYE Manual.

Statement

21. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law or should operational difficulties arise or the arrangements are seen to be deficient, for example

1. Where significant and / or regular underpayments of income tax on employment income have arisen in respect of employees' self assessment returns and in the opinion of HMRC that tax ought to have been accounted for in the calculation of estimated PAYE provided for under these arrangements
2. Where an employer fails to pay tax on time and / or to ensure that returns and P11Ds are filed on time such that a liability arises to pay interest and / or penalties.

We accept that as a result of a decision to cancel these arrangements, HMRC may require the strict operation of PAYE. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of PAYE. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the previously stated 6 April or 3 months from the date when the written notice was given.

36.16 NIC arrangements

PAYE82003: PAYE operation: international employments: EP appendix 7a: modified class 1 and class 1a national insurance contributions (NICs) for expatriate employees subject to an EP appendix 6 agreement [May 2020]

Application for modified NICs for expatriate employees from 6 April 20__
Employer name: ……………………………………..
Employer address: ……………………………………..
Employer PAYE reference: .…………………………………

Part 1 - Scope of agreement

1. This application applies only to those employees who

1. Are subject to an EP Appendix 6 agreement, and
1. Are assigned to work in the UK from abroad and have an employer or host employer in the UK liable for secondary UK NICs liabilities, and
1. Pay NICs on earnings in this employment, above the annual upper earnings limit (UEL) for the year, or on earnings at or above the UEL in each earnings period throughout the year. If an employee joins, commences liability part way through an earnings period, or leaves the employment part way through an earnings period, that shall not invalidate the agreement, provided that

* For employees with monthly earnings periods, NICs are calculated and paid on earnings at or above the UEL in all months other than the month in which the employee joined or left

* For employees with an annual earnings period, NICs are calculated and paid on earnings to the person’s pro-rata annual or annual UEL. (If an employee with an annual earnings period starts after tax week 1 they will have an annual pro-rata earnings period. If a person starts before or during tax week 1 they will have an annual earnings period irrespective of if and when they leave the employment)

Part 2 - Operation of agreement

2. We will calculate and pay Class 1 NICs on a best estimate of those elements

of earnings that are subject to Class 1 NICs. At the beginning of each year, or if liability commences after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, the annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. In accordance with Part 3 of this agreement, we will calculate and pay Class 1 NICs on all the estimated earnings which are subject to NICs.

4. We shall for each employee, in respect of every tax month estimated earnings are calculated for that employee, complete and maintain a payroll record and include the details about the payment, the National Insurance category letter and NICs data items on a Full Payment Submission (FPS). The FPS must be submitted to Her Majesty's Revenue and Customs (HMRC) no later than the 19th of the month following the end of the tax month.

5. We will undertake an in-year review during the period December to 5 April to take account of any material changes and in particular, will ensure that amounts that are earnings, as defined in sections 3 and 4 of the Social Security Contributions and Benefits Act 1992, which

* Must be included in the computation of a person's earnings when assessing Class 1 NICs, and
* Are bonuses and / or NICs due on amounts which count as employment income in relation to employment-related securities to which sections 698 or 700 of the Income Tax (Earnings and Pensions) Act 2003 applies, for example, share related events

are accounted for.

We will update the Class 1 NICs payable immediately following the review, amend payroll records and

* When completing the next FPS for submission to HMRC, adjust the year to date NICs data items to show the revised values to date, and
* Adjust the next payment to HMRC if too much or too little NICs have been paid.

6. During the year, we will update the estimated Class 1 NICs to be paid to reflect arrivals and departures of employees who are subject to this application, and changes in the scope of these arrangements as they apply to one or more employee.

7. We understand that where we have employees who are not ordinarily resident in the UK and who meet the conditions set out in Tax Bulletin 79 as workers for whom salary can be apportioned between UK and non-UK days, we can initially compute earnings for Class 1 NICs on the basis of an estimate of UK and non-UK workday that we have used for income tax purposes. When we complete our NIC Settlement Return, this initial estimate must be corrected using the statutory NICs rules for non-UK days set out in Tax Bulletin 79 and the correct NICs must be paid before 31 March following the end of the tax year.

Note: Due to the recent COVID-19 outbreak and accompanying advice from the Prime Minister and HM Government, we recognise most customers and agents may either be in self-isolation or will be working from home, with limited access to usual resources. To help with this, the 31 March 2020 deadline has been extended to 31 May 2020.

Part 3 - Payment of Class 1 NICs to HM Revenue and Customs (HMRC)

8. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the estimated earnings. These payments will be made each month, by the 19th or 22nd of the following month (depending upon our payment method).

9. Where the number of employees covered by this arrangement at any one time is 5 or fewer, we undertake to pay the Class 1 NICs due on 3/12ths of the total estimated earnings for the tax year, on or before the 19 or 22 (depending upon the payment method) of July, October, January and April (the quarterly basis).

10. If the number of employees covered by this agreement increases to more than 5 at any one time in the course of the year, and is likely to remain at the higher level, we will make the payments of Class 1 NICs by the 19 or 22 of each month, from the start of the following year. If the number of employees covered by this agreement at any one time reduces to five or fewer in the course of the year and is likely to remain at the lower level, we will make payments of Class 1 NICs on the quarterly basis, from the start of the following year.

11. If the NICs are paid in accordance with the terms of this agreement, late payment penalties under Schedule 56 of the Finance Act 2009, will not apply to payments under this arrangement. Schedule 56 penalties will be charged if the NICs due on the estimated earnings are not paid as specified in Part 3 of this agreement.

Part 4 - Arrivals and departures

12. We will notify HMRC of our intention to include new arrivals to the UK covered by this agreement. Similarly, we will notify HMRC of our intention to exclude an employee from the agreement in the event of the employee no longer being subject to PAYE under EP Appendix 6. We will make these notifications to HMRC in writing before the end of the relevant tax year.

Part 5 - Interest

13. We accept that due to the inherent nature of these modified arrangements, over and underpayments of Class 1 NICs may arise, compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return'. However, it is accepted that interest will run on any part of the NICs due on estimated earnings for a tax year due to have been paid under this agreement, which (depending upon the method of payment) reaches HMRC after 19 or 22 April following the end of the tax year.

14. It is accepted that if the payment of Class 1 NICs, due on estimated earnings payable by 19 or 22 April is paid late, HMRC will charge interest on amounts paid late.

Part 6 - Class 1A NICs

15. We understand that for individuals covered by this agreement we will have until 31 January following the end of the tax year in which to submit our P11D(b). By the normal statutory time of 19 July following the end of the tax year we will make a payment of Class 1A NICs based on a best estimate of Class 1A NICs due. We will calculate and pay to HMRC the correct amount of Class

1A by 31 March following the end of the tax year. However, we understand that when we make our best estimate of earnings for Class 1 NICs, it is permissible to include non-cash benefits that would statutorily attract a Class 1A NICs charge. Where our best estimate for Class 1 NICs includes payments and benefits that attract Class 1A NICs under the normal statutory provisions, and we have paid Class 1 NICs using that estimate, we are not then required to pay Class 1A NICs by the normal statutory time of 19 July. Where our best estimate of earnings for Class 1 NICs purposes includes non-cash benefits that would normally be subject to Class 1A NICs, we must correct this after the tax year end and pay the right amount of Class 1 NICs and Class 1A NICs using our NIC Settlement Return. The right amount of Class 1A NICs must be paid by 31 March following the end of the tax year.

16. We will submit form P11D(b) at the latest by 31 January following the end of the tax year. The P11D(b) will show the correct benefits for the tax year computed using the statutory rules. We will annotate the P11D(b) 'Appendix 7A' applies.

17. We understand that if we do not pay the Class 1A NICs due by the date set out in this agreement, then regulation 67B of the Social Security (Contributions) Regulations 2001 may apply (late payment penalties).

18. We understand that where the P11D(b) is not submitted by 31 January following the year end, penalties may arise under Regulation 81(1) Social Security (Contributions) Regulations 2001 and that interest under Regulation 76(1) Social Security (Contributions) Regulations 2001, will accrue from the original 19 July statutory date.

We understand that where we submit an incorrect return under the terms of this agreement, penalties may arise under Regulation 81 of the Social Security (Contributions) Regulations 2001

* On the Class 1A NICs due for payment no later than 19July following the end of the year in which benefits were provided; and
* That the earnings in question ought to have been included on forms P11D or approved substitutes and form P11D(b) before 7 July following the end of the tax year.

Part 7 - Payment of residual Class 1 and Class 1A NICs Liability - NIC Settlement Return

19. We accept that where additional Class 1 or Class 1A NICs are found to be due and are paid after 31 March following the end of the tax year, or errors in the NIC Settlement Return are discovered, interest and penalties will be charged in accordance with the legislation.

20. No later than 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 and Class 1A NICs due on all the employee's earnings and benefits both from the UK and abroad. We will calculate and pay to HMRC any additional Class 1 NICs and / or Class 1A NICs found to be due under these arrangements by the 31 March following the end of the tax year concerned. Any additional Class 1 or Class 1A NICs will be paid over to HMRC via a 'NIC Settlement Return' (NSR). An NSR will also account for any NICs due on any primary NICs paid on the employees' behalf under these arrangements, unless already accounted for.

Note: Due to the recent COVID-19 outbreak and accompanying advice from the Prime Minister and HM Government, we recognise most customers and agents may either be in self-isolation or will be working from home, with limited access to usual resources. To help with this, the 31 March 2020 deadline has been extended to 31 May 2020.

21. We agree that making an Earlier Year Update (EYU) is not appropriate for employees included in this arrangement. If an underpayment is identified after the submission of the NSR we agree to write to HMRC to make a disclosure of any further NIC due.

22. We will set out in the NSR the correct Class 1 and Class 1A NICs due for the year for each employee covered by this agreement taking into account what has been paid previously under parts 3 and 7 of this agreement. We will send HMRC the NSR no later than 31 March following the end of the tax year in which earnings were paid.

Note: Due to the recent COVID-19 outbreak and accompanying advice from the Prime Minister and HM Government, we recognise most customers and agents may either be in self-isolation or will be working from home, with limited access to usual resources. To help with this, the 31 March 2020 deadline has been extended to 31 May 2020.

23. We understand that where the employee is social security equalised, the payment of the primary NICs on the 'best estimate' of gross earnings will represent a payment of earnings. Therefore, earnings should be grossed up to take account of these NICs met on the employee's behalf. Where primary NICs are met on behalf of the employee in respect of earnings included in the NSR, the earnings on the return should be grossed up to take account of the primary NICs met on the employee's behalf.

Part 8 - Overpaid Class 1 NICs

24. We understand that if we discover that NICs have been overpaid in relation to the 'best estimate' we can complete the NSR to reflect any secondary (employers) Class 1 or Class 1A NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the 'best estimate', but only where:

- The Class 1 NICs paid by the employer are paid as part of the equalisation process and have not been recovered from the employee's earnings, or
- The Class 1 NICs have been paid by the employer and recovered from the employee and the employee mandates the repayment to the employer in writing.

25. We agree that making an Earlier Year Update (EYU) is not appropriate for employees included in this arrangement. If an overpayment is identified after the submission of the NSR we agree to write to HMRC to make a NIC refund claim.

26. We understand that, in all other cases, the NSR must be submitted together with a covering letter asking for a refund. This will be passed to HMRC Personal Tax International for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or by offsetting overpayments of primary NICs in respect of one employee against NICs due in respect of another.

Part 9 - Statement

27. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example

- * Where significant and / or regular underpayments of Class 1 and Class 1A NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 and Class 1A NICs ought to have been accounted for in the calculation of the estimated Class 1 and Class 1A NICs provided for under these arrangements
- * Where an employer fails to pay the Class 1 or Class 1A NICs on time and / or to ensure that returns are filed on time, such that a liability arises to pay interest and / or penalties.

28. We accept that as a result of a decision to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 and Class 1A NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 and Class 1A NICs.

29. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7A)' under which we will submit the NSR.

30. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

PAYE82004: PAYE operation: international employments: EP appendix 7b: modified class 1 national insurance contributions (NICs) for employees assigned from the UK to work overseas [Oct 2019]

Application for modified NICs for expatriate employees from 6 April 20__
Employer name:………………………………………..
Employer address: ……………………………………..
Employer PAYE reference: ……………………………

Part 1 - Scope of agreement

1. This application applies only to those employees who

- Are employed by a UK employer and are assigned to work abroad for a period of limited duration, but for more than a complete tax year, and
- Have an ongoing liability to UK National Insurance contributions (NICs) whilst abroad; and

- Earn above the upper earnings limit (UEL) in every earnings period throughout the tax year. (I understand that it shall not invalidate this agreement if an employee earns less than the UEL in the pay period they join the company, or in the pay period in which they leave, if in all other pay periods during the year, the UEL is exceeded. However, in the case of employees with annual pay periods, covered by the agreement, their earnings must exceed the annual UEL); and
- Not liable to UK tax on their earnings from employment; and
- Receive some earnings and benefits derived from the employment from sources other than the UK employer.

Part 2 - Operation of agreement

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of earnings that are subject to Class 1 NICs. At the beginning of each year, or if liability starts after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. We shall for every payment of estimated earnings calculated for each employee, complete and maintain a payroll record and include the details about the payment, the National Insurance category letter and NICs data items on a Full Payment Submission (FPS). The FPS must be submitted to Her Majesty's Revenue and Customs (HMRC) on or before the payment of regular earnings by the UK employer or no later than the 19th of the month following the end of the tax month where all earnings are paid by the overseas employer.

4. We will undertake an in-year review during the period December to 5 April to take account of any material changes and in particular, will ensure that amounts that are earnings, as defined in sections 3 and 4 of the Social Security Contributions and Benefits Act 1992, which

* Must be included in the computation of a person's earnings when assessing Class 1 NICs, and
* Are bonuses and / or NICs due on amounts which count as employment income in relation to employment-related securities to which sections 698 or 700 of the Income Tax (Earnings and Pensions) Act 2003 applies, for example, share related events

are accounted for.

We will update the Class 1 NICs payable immediately following the review, amend payroll records and

* When completing the next FPS for submission to HMRC, adjust the year to date NICs data items to show the revised values to date, and
* Adjust the next payment to HMRC if too much or too little NICs have been paid

Part 3 - Payment of Class 1 NICs to Her Majesty's Revenue and Customs

5. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the total estimated earnings for the tax year. These payments will be made each month by the 19 or 22 of the following month (depending upon our payment method).

6. If the NICs are paid in accordance with the terms of this agreement, late payment penalties under Schedule 56 of the Finance Act 2009, will not apply to payments under this arrangement. Schedule 56 penalties will be charged if the NICs due on the estimated earnings are not paid as specified in Parts 2 and 3 of this agreement.

Part 4 - Arrivals and departures

7. We will notify HMRC of our intention to include any new employees entering the agreement by providing details of the employees' departures from the UK. Similarly we will notify HMRC of our intention to exclude an employee from the agreement by providing details of the employee's return to the UK. We will make these notifications to HMRC in writing by the end of the relevant tax year.

8. We accept that in cases where an employee is repatriated to the UK before he/she has been overseas for a complete tax year and, as a result, his/her general earnings from the employment become chargeable to UK Income Tax, this agreement will no longer apply to that employee. In such cases, we will cease to use estimates in respect of all earnings paid and benefits received after the employee has returned to the UK, and use the statutory basis of calculating and returning both Class 1 and Class 1A NICs. We will carry out an exercise before the end of the tax year, to establish the correct amount of the earnings in the period covered by our earlier estimate.

For these employees, we will include on a Full Payment Submission for every payment of earnings subject to Class 1 NICs paid after the employee returns to the UK and the NICs data items relating to each payment, on or before each payment is made to HMRC. For these same employees, no later than the 19th April following the end of the tax year we will

* Record the correct earnings and NICs details for the period before the employee returned to the UK on that employee's payroll records, and
* Send a Full Payment Submission to HMRC to adjust the year to date NICs totals for each category letter to show the correct details for the year.

Forms P60 will be given to the employees by 31 May after the end of each tax year.

If the correct figures for Class 1 NICs exceed our earlier estimates, we will pay the balance to HMRC with our final payment for the year. Where Class 1A NICs becomes payable, we will make a P11D(b) return and pay Class 1A by 19 July following the end of the tax year.

Part 5 - Year end requirements

9. Forms P60 will be given to the employees by 31 May after the end of each tax year.

Where an employee leaves the UK part way through a tax year, we will

* Calculate Class 1A NICs payable to the date the employee left the UK
* Send HMRC a P11D(b) by the 19 July following the end of the tax year, and (For 2012-13 and later years, this concession will be withdrawn and so the P11D(b) filing date will be 6 July)
* Pay HMRC any Class 1A NICs due by 19 July following the end of the tax year

Part 6 - Interest

10. We accept that, due to the inherent nature of the modified arrangements, over and underpayments of Class 1 NICs may arise compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return' - See Part 8. However, it is accepted that interest will run on any part of the NICs due on the estimated earnings to have been paid under this agreement which (depending upon the method of payment) reaches HMRC after the 19 or 22 of April following the end of the tax year.

11. It is accepted that if the payment of Class 1 NICs, due on estimated earnings payable by 19 or 22 April, is paid late, HMRC will charge interest on amounts paid late.

Part 7 - Impact of HMRC dispensation

12. We accept that the terms of a dispensation will not apply to employees who do not have a 'taxable employment' as defined in Part 2 of the Income Taxes (Earnings and Pensions) Act 2003. Therefore, the 'best estimate' will reflect the total amount of earnings liable to Class 1 NICs taking into account any payments that can be disregarded from Class 1 earnings under the provisions of Regulation 25 and Schedule 3 of the Social Security (Contributions) Regulations 2001.

Part 8 - Class 1A NICs

13. With the exception of paragraph 12 of this agreement, we understand that any benefits provided to employees covered by this agreement will not fall to be chargeable to income tax under ITEPA as 'general earnings', therefore, liability for Class 1A NICs will not arise.

Part 9 - Payment of residual Class 1 NICs liability - NIC Settlement Return

14. No later than 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 NICs due on all the employee's earnings, both from the UK and from abroad. We will calculate and pay to HMRC Class 1 NICs on the difference between the correct figures for the year and those figures that we submitted to HMRC on our full payment submissions. Payment of the Class 1 NICs will be made by 31 March following the end of the tax year concerned. Any additional Class 1 NICs payable will be shown on our 'NIC Settlement Return' (NSR).

15. We will set out in the NSR the correct Class 1 NICs due for the year for each employee covered by this agreement taking into account what has been paid previously under parts 3 and 7 of this agreement. We will send HMRC the NSR no later than 31 March following the end of the tax year in which earnings were paid.

16. We accept that where the additional Class 1 NICs found to be due are paid after 31 March following the end of the tax year, or errors in the NSR are discovered, interest and penalties will be charged in accordance with legislation.

Part 10 - Overpaid Class 1 NICs

17. We understand that, if we discover that Class 1 NICs have been overpaid in relation to the 'best estimate', we can complete the NSR to reflect any secondary (employers) Class 1 NICs overpaid. We can also claim a refund of any primary

(employees) Class 1 NICs overpaid on the best estimate but only where

- The Class 1 NICs were paid by the employer and have not been recovered from the employee, or
- The Class 1 NICs are paid by the employer and recovered from the employee, and then only if the employee mandates the repayment to the employer in writing.

18. We understand that, to claim the overpayment, the NSR must be submitted together with an application for a refund. This will be passed to HMRC Payment Reconciliation in the National Insurance Contributions and Employer Office for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or offsetting overpayments in respect of one employee against underpayments in respect of another employee.

Part 11 - Statement

19. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example, where

- Significant and / or regular underpayments of Class 1 NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 NICs ought to have been accounted for in the calculation of the estimated Class 1 NICs provided for under these arrangements
- An employer fails to pay the Class 1 NICs on time and / or to ensure that returns are filed on time such that a liability arises to pay interest and / or penalties.

20. We accept that, if a decision is made by HMRC to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 NICs.

21. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7B)' under which we shall submit the NSR.

22. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April, or such earlier date as is agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

HMRC say:

> **Appendix 6 payroll**
> **Question:** Guidance has been issued that Earlier Year Updates (EYUs) should not generally be used for EP Appendix 6 payrolls. The references seem to be for individuals who have been included in the arrangements, but needing to make amendments to the submissions made. Where there is a case that an individual has not been included in the Payroll for the year and should have been (eg 'failed STBV' type employees), what is the best action to take to correct the position?
> The EYU still seems a reasonable route to take to ensure that some payroll reporting is undertaken and PAYE is paid across at the earliest point, with the final position still reconciled via a tax return, but this would seem to disagree with the guidance on first view. If that were the case, what would be the recommended alternative?
> **HMRC Answer** HMRC does not consider EYUs to be appropriate for Modified PAYE/NICs schemes. This is also the case in situations where individuals were not included in the Modified payroll but should have been – i.e. using your example of 'failed' STBVs. Under the terms of the Modified PAYE arrangements (PAYE82002) any additional tax found to be due should be accounted for via the individual's self-assessment tax return – please refer to section 18 of the agreement. Alternatively a disclosure can be made and these should be sent to HMRC using the following address:
> *eddisclosures.international@hmrc.gsi.gov.uk* [43]

HMRC say:

> **PAYE for tax equalised UK outbound assignees who remain UK treaty resident**
> It is not that unusual for a UK employee to be sent on an overseas assignment but, for various reasons, the employee remains UK treaty resident. Normally this means that the UK employer must continue to operate PAYE withholding. If the employee is tax equalised for the assignment period, so they are contractually entitled to an amount of net pay after deduction of hypothetical tax, it can be difficult for the employer to operate the PAYE correctly.
> PAYE is problematic for an employee who is tax equalised because the amount of PAYE calculated using the normal tax code approach is unlikely to match the final UK tax liability as determined following the tax reconciliation at the end of the tax year. These issues usually arise

[43] Expat Forum Q&A log (July 2019) (informally circulated).

> for a UK inbound assignee and are managed by using an Appendix 6 modified payroll. The issues are the same in the case of a UK outbound tax equalised assignee who happens to remain UK treaty resident and subject to PAYE but with the possible additional complexity of also requiring an appendix 5 net of tax agreement.
>
> (26.1) Would HMRC allow the employer to include such individuals on an Appendix 6 modified payroll for the period they are on assignment and are tax equalised? If HMRC would not allow this, how should the employer manage the PAYE issues?
>
> **Answer**
>
> HMRC guidance at PAYE81900 states that the Modified PAYE arrangement can only be used for employees assigned to work in the UK from abroad who are tax equalised.
>
> If employees of a UK employer are seconded abroad and their particular circumstances mean they continue to be liable to UK tax so the issue of a NT tax code is not appropriate, the employer is obliged to continue to deduct tax under PAYE.
>
> If your question relates to a particular case, please provide HMRC with the full facts and details including a more detailed explanation of the specific nature of the difficulties. Please also state how and where the employees are paid.[44]

HMRC say:

> **Interest charges on postponed payments on account**
>
> Question: HMRC's systems are applying late interest charges to individuals on modified payrolls who have postponed payments on account which later become due. Can this be stopped from happening?
>
> Payments on account should not be reduced, in modified cases, via the tax return. The self-assessment system cannot recognise modified cases and consequently the normal rules are applied. The correct way to reduce payments on account is to write to HMRC separately, providing the customer's name and UTR and request that the payments on account are reduced.
>
> UPDATE 27/07/2018
>
> We are aware of the guidance contained within the Modified PAYE agreement (PAYE82002) which, at the time was correct. In the past, before internet filing, when self-assessment tax returns were processed, HMRC were able to remove payments on account where the return indicated it was a Modified PAYE case. With the advancement of

[44] Expat Forum Q&A log (July 2019) (informally circulated).

online filing, fewer returns are manually processed and as such HMRC no longer have the chance to remove payments on account in appropriate cases.[45]

37.19 DT relief: Directors
  37.19.1 Fees and similar payments
  37.19.2 Directors share options
  37.19.3 Directors DT relief: Critique
37.20 DT relief: Government service

37.1 DT employment reliefs

I usually deal with DT relief for each category of income in the chapter on that type of income. But employment income DT relief needs a chapter to itself; a full discussion would require a book.

OECD Model has 4 DT reliefs which may apply to employment income:

Model article	Topic	See para
15	*Employment income*	
15(1)	Employment income generally	37.2
15(2)	Short term business visitors (STBV)	37.6
16	Directors fees	37.19
19	Government service	37.20

37.2 Employment income DT relief

Article 15(1) OECD Model provides:

> [A] Subject to the provisions of Articles
> [i] 16, [directors][1]
> [ii] 18 [pensions][2] and
> [iii] 19 [government service][3],
> salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State
> [B] unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

In this chapter:
"The residence State" is the State where the employee is resident
"The work State" is the State where the employment is exercised; OECD Commentary uses the term "source State".

To follow art 15 one must keep in mind which Contracting State is which. It may be easier to follow if rewritten with this terminology thus:

> 1. ... salaries, wages and other similar remuneration derived by a resident *of the resident State* in respect of an employment shall be taxable only in that State

[1] See 37.19 (DT relief: Directors).

[2] See 38.8 (DT relief: Pension income).

[3] See 37.20 (DT relief: Government service).

> unless the employment is exercised *in the work State*. If the employment is so exercised *in the work State* such remuneration as is derived therefrom may be taxed *in the work State*.

In outline:

(1) The general rule is that tax is charged only in the residence State: art 15(1)[A].

(2) The work State may also charge tax: art 15(1)[B] but:

  (a) This is subject to short term business visit relief, if that relief applies tax is in residence State only): art 15(2).

  (b) If the work State charges tax, the residence State gives foreign tax credit relief.[4]

37.3 Salary/wages/remuneration

Article 15 refers to "salaries, wages and other similar remuneration".

It is convenient to have a short label for this concept, and where context permits I call it **"art 15 remuneration"** or just **"remuneration"**.

For the remuneration/pension borderline, see 38.8.4 (Pension or employment income?).

37.3.1 *Derived in respect of employment*

The remuneration must derived by a person in respect of an employment. But that is not a separate requirement, because if a sum is remuneration it must by definition be derived in respect of an employment.

37.3.2 *What is remuneration?*

The OECD model does not define "salaries/wages/similar remuneration". So we look to the UK tax law meaning of those words,[5] but it seems to me that such UK material as has been found does not tell us anything which we would not have known from the ordinary meaning.

The OECD Commentary provides:

> 2.1 Member countries have generally understood the term "salaries, wages and other similar remuneration" to include benefits in kind received in respect of an employment (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

[4] See 111.18.1 (FTCR: Employment income).

[5] See 107.12 (Undefined treaty terms).

The DTR Manual presumably had that in mind:

> **DT1920 Employment** [May 2020]
> ... The words 'salaries, wages and other similar remuneration' should be understood in the broadest sense as covering all income from an employment, including benefits and share option gains ...

The question whether a sum constitutes remuneration can be problematic, and is discussed at some length in the OECD Commentary:

> 2.3 In some cases, it may be difficult to determine which part of salaries, wages and other similar remuneration paid to an individual is derived from the exercise of employment in a given State.
> ...
> Regardless of the terminology used to describe these payments, it is essential to identify the real consideration for each such payment on the basis of the facts and circumstances of each case in order to determine
> [1] whether the payment constitutes "salaries, wages or other similar remuneration" and
> [2] the extent to which the payment, or part thereof, may be considered to derive from the exercise of employment in a given State...

37.4 *Pay for work when employed*

This is straightforward. The OECD Commentary provides:

> 2.4 Any remuneration paid after the termination of employment for work done before the employment was terminated (e.g. a salary or bonus for the last period of work or commissions for sales made during that period) will be considered to be derived from the State in which the relevant employment activities were exercised.

37.4.1 *Holiday/sick pay*

The OECD Commentary provides:

> 2.5 A payment made with respect to unused holidays / sick days that accrued during the last year of employment is part of the remuneration for the period of work that generated the holiday or sick leave entitlement.
> An employee may also be entitled, at the end of employment, to the payment for holidays and sick days related to a number of previous years that were unused during these years. Absent facts and circumstances showing otherwise, a payment received after termination of employment as compensation for holidays and sick days related to

> previous years that were unused during these years should be considered to have been a benefit for which the employee was entitled for the last 12 months of employment, allocated on a pro-rated basis to where the employment was exercised during that period. One situation where a different conclusion would be justified would be where it would be established, on the basis of the taxpayer's employment records, that these holidays and sick days clearly relate to specific periods of past employment and that the payment constitutes remuneration for these periods of employment.
>
> States should take account, however, of the fact that the former employee may have been previously taxed on these holidays and sick days at the time of their accrual. Assume, for instance, that under a State's domestic tax law, holidays and sick days granted with respect to periods of work performed on the territory of that State are treated as a benefit taxable during the fiscal year during which the relevant work was performed and are taxed accordingly. In such a case, the State of residence of the former employee at the time of the subsequent payment with respect to the holidays / sick days would need to provide relief of double taxation for such tax and any State in which the former employee may have worked during his last year of employment should similarly consider that any payment for previous years' unused holiday / sick days that were already taxed on an accrual basis did not relate to employment activities exercised during the last year.

37.4.2 *Pay in lieu of notice*

For the background to this and related topics, see OECD, "Tax Treaty Treatment of Termination Payments Discussion Draft" (2013).[6]

A payment in lieu of notice was held to constitute art 15 remuneration,[7] a view now supported by the OECD Commentary:

> 2.6 In some cases, the employer is required (by law or by contract) to provide an employee with a period of notice before terminating employment. If the employee is told not to work during the notice period and is simply paid the remuneration for that period, such remuneration is clearly received by virtue of the employment and therefore constitutes remuneration "derived therefrom" for the purposes of paragraph 1. The remuneration received in such a case should be considered to be derived from the State where it is reasonable to assume that the employee would

[6] *https://www.oecd.org/ctp/treaties/Termination_Payments.pdf*

[7] See *Squirrell v HMRC* [2005] STC (SCD) 717 and 37.4.4 (Compensation for breach of employment contract).

have worked during the period of notice. The determination of where it is reasonable to assume that the employee would have worked during the period of notice should be based on all facts and circumstances. In most cases it will be the last location where the employee worked for a substantial period of time before the employment was terminated; also, it would clearly be inappropriate to take account of a prospective employment period in a State where the employee might have been expected to work but did not, in fact, perform his employment for a substantial period of time.

37.4.3 *Redundancy/severance pay*

OECD Commentary provides:

> 2.7 A different situation is that of a severance payment (also referred to as a "redundancy payment") which an employer is required (by law or by contract) to make to an employee whose employment has been terminated. Such a payment is often, but not always, calculated by reference to the period of past employment with the employer. Absent facts and circumstances indicating otherwise, such a severance payment should be considered to be remuneration covered by the Article for the last 12 months of employment, allocated on a pro-rated basis to where the employment was exercised during that period; as such it constitutes remuneration derived from that employment for the purposes of the last sentence of paragraph 1.

Expat forum Q&A log provides:

> **Question**: Termination Payments
> We frequently come across scenarios where an employer's policy (sometimes driven by local labour laws) provides for a payment to be made on termination of employment by the employer calculated by reference to the total service in the employment. The amount payable might be subject to an overall cap or a maximum service period. This is a bit like UK statutory redundancy but the payments are not limited to redundancy cases and are often payable where the employer decides to terminate the employment for any reason (usually with an exception for cases of misconduct). The payments are not made if the employee chooses to resign so they are by no means guaranteed.
> Our question is how HMRC would expect to source such payments for the purposes of the employment income article under a double tax treaty? A related question is how HMRC would expect to source the payment under UK domestic law?
> In most cases we would expect these payments to be considered

> contractual and, therefore, taxable as earnings in the UK, but we would look to the OECD guidance on severance payments to determine treaty sourcing. Would HMRC expect to source these payments across the whole period of employment in respect of which the quantum of the payment is calculated? Or would HMRC take the view that although the payments are calculated by reference to the length of service they are not in fact earned unless and until the employer chooses to terminate the employment, so that they are earnings for the final tax year of employment only? For treaty purposes, does this common scenario fall into the OECD default "last 12 months" sourcing rule or is this the type of payment where the relevant facts and circumstances point to the longer alternative sourcing period?
>
> **HMRC answer**: [HMRC refer to para 2.7 OECD Commentary and continue:] HMRC would therefore expect these payments to be sourced based on the last 12 months of employment, regardless of whether they fall to be taxed as s62 earnings or as specific employment income under s401-s403.

37.4.4 *Damages for breach of contract*

The OECD Commentary provides:

> 2.8 An individual whose employment is terminated may have legal grounds to claim that the employment was terminated in violation of the contract of employment, the law or a collective agreement; there may also be other legal grounds for claiming damages depending on the circumstances of the termination. This individual may receive a judicial award or settlement as damages for breach of the relevant contractual or legal obligations. The tax treaty treatment will depend on what the damage award seeks to compensate. For instance, damages granted because an insufficient period of notice was given or because a severance payment required by law or contract was not made should be treated like the remuneration that these damages replace.
>
> Punitive damages or damages awarded on grounds such as discriminatory treatment or injury to one's reputation should, however, be treated differently; these payments would typically fall under Article 21 [Other Income].

37.4.5 *Payment for restrictive covenant*

The OECD Commentary provides:

> 2.9 Under the provisions of an employment contract or of a settlement following the termination of an employment, a previous employee may

receive a payment in consideration for an obligation not to work for a competitor of his ex-employer. This obligation is almost always time-limited and often geographically-limited. Whilst such a payment is directly related to the employment and is therefore "remuneration ... derived in respect of an employment", it would not, in most circumstances, constitute remuneration derived from employment activities performed before the termination of the employment. For that reason, it will usually be taxable only in the State where the recipient resides at the time the payment is received.

Where, however, such a payment made after the termination of employment is in substance remuneration for activities performed during the employment (which might be the case where, for example, the obligation not to compete has little or no value for the ex-employer), the payment should be treated in the same way as remuneration received for the work performed during the relevant period of employment.

Also, in some States, part of an employee's monthly salary during employment constitutes consideration for an obligation not to work for a competitor during a certain period of time after termination of the employment so that no separate payment for non-competition is made after the termination of the employment; in such a case, the guidance in the first part of this paragraph is not applicable and the part of the remuneration received during the employment that is attributable to that obligation should be treated in the same way as the rest of that remuneration.

37.4.6 *Deferred remuneration*

The OECD Commentary provides:

> 2.11 Payments may be made after the termination of employment pursuant to various deferred remuneration arrangements. Such a payment should be treated as remuneration covered by Article 15 and, to the extent that it can be associated to a specific period of past employment in a given State, it should be considered to be derived from the employment activities exercised in that State. Since many States would not allow the deferral of tax on employment remuneration even if the payment of that remuneration is deferred, it will be important for States that will tax deferred remuneration payments received after the termination of employment to ensure that double taxation is relieved.

37.4.7 *Post-employment benefits in kind*

The OECD Commentary provides:

> 2.13 An employee may be entitled to medical or life insurance coverage

> for a certain period after termination of his/her employment. He/she may also be entitled to other benefits, such as the services of an employment consultant or agency. Absent facts and circumstances indicating otherwise, such benefits should be considered to be remuneration covered by the Article which is derived from the State where the employment was exercised when the employment was terminated (and when, therefore, the obligation to pay these benefits arose).

37.4.8 *Compensation for loss of earnings*

The OECD Commentary provides:

> 2.14 Another type of payment that could be made on or after termination of an employment is a compensation payment for loss of future earnings following injury or disability suffered during the course of employment. The tax treaty treatment of such a payment would depend on the legal context in which it was made. For instance, payments under a social security system such as a worker's compensation fund could fall under Article 18 [pensions], 19 [Government service] or 21 [Other Income] (see paragraph 24 of the Commentary on Article 18).[8]
>
> A payment that would constitute a pension payment would be covered by Article 18. A payment made because the employee has legal grounds for claiming damages from his employer with respect to a work-related sickness or injury would typically fall under Article 21. A payment made by the employer pursuant to the terms of the employment contract even though the sickness or injury is not work-related or the employer is not responsible for that sickness or injury should be dealt with in the same way as a severance payment: absent facts and circumstances indicating otherwise, such a payment should be considered to be remuneration covered by the Article for the last 12 months of employment, allocated on a pro-rated basis to where the employment was exercised during that period.
>
> A short-term disability payment made in the course of employment, however, should be treated in the same way as the payment of sick days during the course of employment; such a payment would be covered by Article 15 (Article 17 in the case of entertainers and sportspersons) and taxable in the State in which the employee normally exercised the employment before becoming sick or being injured.
>
> 2.15 After termination of employment, a salesperson may receive a payment in relation to the loss of future commissions. The tax treaty treatment of such a payment will depend on the legal context in which

[8] See 38.8.5 (Social security income).

the payment is made. Depending on the circumstances, this payment

[1] could constitute deferred remuneration to which the salesperson was entitled in relation to previous sales or

[2] could be made pursuant to a provision of the employment contract according to which the salesperson has a right to commissions on any future sales to a client that the salesperson brought to the employer;

in both cases, the payment should be dealt with as remuneration for the employment services that gave rise to the entitlement to the commissions.

A payment that would constitute a compensation for future commissions that the salesperson would likely have earned if she had continued to work for the same employer may also constitute a compensation for unlawful dismissal or a form of severance payment; where that is the case, the payment should be dealt with accordingly.

37.4.9 *Garden leave*

The OECD Commentary provides:

> 2.16 As part of a transitional arrangement leading to the termination of employment, an employee may receive a full or reduced salary for a period during which that employee will not work. Where the salary is paid by the employer for a period during which the employee is not required to work even though the employment has not been terminated, the salary is still received by virtue of the employment and therefore constitutes remuneration "derived therefrom" for the purposes of paragraph 1. The remuneration received in such a case should be considered to be derived from the State where it is reasonable to assume that the employee would have worked during that period, which will most often be the State where the employment activities were performed before the cessation of work.

37.4.10 *Covid payments (furlough)*

OECD Covid guidance[9] provides:

> ***Income of cross-border workers that cannot perform their work due to COVID-19 restrictions (e.g. wage subsidies to employers)***
> 49. Where a government has stepped in to subsidise the keeping of an

[9] *https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic*
See 105.27.1 (OECD Covid guidance).

> employee on a company's payroll during the COVID-19 pandemic despite being unable to work, the income that the employee receives from the employer should be attributable to the place where the employment used to be exercised. In the case of employees that work in one jurisdiction but commute there from another jurisdiction where they are resident (cross-border workers), this would be the jurisdiction they used to work in.
>
> 50.Some stimulus packages adopted or proposed by governments (e.g. wage subsidies to employers) are designed to keep workers on the payroll during the COVID-19 pandemic despite restrictions to the exercise of their employment. To the extent these may be the last payments received in respect of the employment, the payments resemble termination payments. These are discussed in paragraph 2.6[10] of the Commentary on Article 15 of the OECD Model, which explains that they should be attributable to the place where the employee would otherwise have worked. In most circumstances, this will be the place the person used to work before the COVID-19 pandemic. Alternatively the payments may resemble those which are routinely received during paid periods of absence the entitlement to which arises in connection with where the work was performed. Examples of such other routine payments include vacation pay, paid sick leave, or paid furlough, none of which have been known to cause difficulties in international taxation...
>
> 52. In conclusion, where an employee resident in one jurisdiction and who formerly exercised an employment in another jurisdiction receives a COVID-19 related government subsidy from the work jurisdiction to maintain the relationship with the employer, the payment would be attributable to the work jurisdiction under Article 15 of the OECD Model.

HMRC follow this.[11]

37.4.11 *Pure termination payment*

HMRC say:

> Attention was drawn to the agreement published in Germany in December 2011, whereby termination payments were to be treated as

[10] See 37.4.2 (Pay in lieu of notice).

[11] ICAEW Taxguide 08/21para 6.5.1. *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2021/taxguide-0821-covid-19-displaced-expatriate-employees.ashx*

> remuneration falling within the employment services article of the double tax treaty. HMRC confirmed that this treatment would not apply for the purposes of treaties other than the UK/German treaty.[12]

In *Resolute Management Services v HMRC*[13] a taxpayer received an ex gratia payment, after leaving her employment. For ITEPA purposes, it was not general earnings but it was a termination payment within Part 6 ITEPA.[14] For DT purposes, it was not art 15 remuneration. The ITEPA classification did not affect this:

> 35. ITEPA does not treat a termination payment as ordinary earnings (within which fall salary and wages and other similar remuneration) but as "an amount that counts as employment income".[15] The categorization of termination payments as "specific employment income" does not indicate that such payments are not "other similar remuneration" because income related to share incentives and share options within Part 7 of ITEPA (which the Treaty parties and OECD member countries regard as other similar remuneration) also falls within the category of specific employment income rather than ordinary earnings. Nevertheless, the statutory description of items within Part 6 of ITEPA ("Income which is not earnings or share related") suggest that items within that Part (e.g. termination payments) are not part of what would ordinarily be regarded as "salaries, wages and other similar remuneration". In other words, the context of ITEPA at least indicates that termination payments are not what the Act regards as ordinary earnings (as salary and wages and other similar remuneration would ordinarily comprise) even though termination payments are taxed within the framework of ITEPA as something counting as employment income.

The termination payment qualified for exemption under the Other Income article.

Expat forum Q&A log provides:

> **Termination payments and DTAs**
> **Question**: Now that foreign service relief is gone from termination payments to UK residents can we re-confirm whether HMRC's standard

[12] Minutes of Joint Expatriate Forum on Tax and NICs (January 2012) *http://webarchive.nationalarchives.gov.uk/20130410172938/http://www.hmrc.gov.uk/consultations/epf-mins-jan12.pdf*

[13] [2008] UKSPC SPC00710.

[14] See 34.38 (Termination payments).

[15] See 34.4 (Employment income/earnings).

view is that these are subject to employment income article of the treaty (and hence eligible for FTC offset) rather than the other income article and only taxed in country of residence (I assume this hasn't been an issue since the OECD change back in 2014 but was beforehand). However how will the issue of any conflicting domestic and treaty sourcing periods be resolved?

HMRC answer: A termination payment may comprise several elements, and these may be treated differently under UK tax legislation and/or international treaties. Paragraphs 2.4 to 2.16 of the OECD commentary on Article 15 explain how some of the more common elements should be treated.

Paragraph 2.7 says that a severance or redundancy payment required by contract or statute should be considered to be remuneration covered by Article 15 for the 12 months prior to the date of termination.

Paragraph 2.8 says that a compensatory payment should be treated like the remuneration that the damages replace.

In most cases, an "ex-gratia" termination payment will represent compensation for the loss of future earnings from the employment. In accordance with Paragraph 2.8 of the commentary, we consider that such a payment should be attributed to the State where the employee would have worked if not for the termination, using a similar method to that described in Paragraph 2.6 (concerning PILONs). In most cases this will be the last location where the employee worked for a substantial period of time before the employment was terminated.

HMRC would suggest the following approach:

1. Identify amounts for which the commentary mandates a particular treatment, such as:

- Arrears of earnings (para 2.4)
- Accrued holiday (para 2.5)
- Payments in lieu of notice (para 2.6)
- Statutory redundancy pay and similar (para 2.7)
- Consideration for restrictive undertakings (para 2.9)

2. Calculate PENP, which should be attributed to the State where notice would have been worked in line with Paragraph 2.6.

3. Attribute any remaining (ex-gratia) payment to the State(s) where the employee would have worked in future, as described above.

Where there is a conflict, relief should be given via Foreign Tax Credit Relief in the first instance.[16]

[16] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

37.5 Where is employment exercised

OECD Commentary on art 15(1) provides:

> 1. ... Employment is exercised in the place where the employee is physically present when performing the activities for which the employment income is paid.

This comment was followed in *Kljun v HMRC*.[17]

OECD Commentary provides:

> 2.2 The condition provided by the Article for taxation by the State of source is that the salaries, wages or other similar remuneration be derived from the exercise of employment in that State. This applies regardless of when that income may be paid to, credited to or otherwise definitively acquired by the employee.

37.5.1 *Work abroad due to Covid*

OECD Covid guidance[18] provides:

> ***Teleworking from abroad i.e. working remotely from one jurisdiction for an employer of the other jurisdiction.***
> 59. A change in the place where the employment is exercised may give rise to a change in the allocation of taxing rights under the current treaty rules.
> 60. Accordingly, if the jurisdiction where employment was formerly exercised should lose its taxing right following the application of Article 15, additional compliance difficulties would arise for employers and employees. Employers may have withholding obligations, which are no longer underpinned by a substantive taxing right. These would therefore have to be suspended or a way found to refund the tax to the employee. The employee would also have a new or enhanced liability in their jurisdiction of residence, which would result in new filing obligations.
> 61. Some examples illustrating changes in allocation of taxing rights over employment income are included below:
>
> - Before the COVID-19 pandemic, an employee resident in Jurisdiction A normally exercised their employment in Jurisdiction B. The employee began to exercise his employment from

[17] [2011] UKFTT 371 (TC) at [18]. See 34.30 (Where are duties performed).

[18] *https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic*
See 106.14.1 (OECD Covid guidance).

Jurisdiction A due the COVID-19 pandemic. According to Article 15:

  - if the employer was resident in Jurisdiction B, Jurisdiction B is entitled to tax the income derived from the period during which the employee was physically present in Jurisdiction B (i.e., a reduction in Jurisdiction B's taxing right);
  - if the employer was not resident in Jurisdiction B or did not bear the cost of the employee's remuneration through a PE in that jurisdiction, Jurisdiction B would likely lose its taxing right under a treaty if the employee spent less than 183 days there (i.e., a complete loss of Jurisdiction B's taxing rights)

- Before the COVID-19 pandemic an employee was resident in Jurisdiction A, became stranded in Jurisdiction B and began to exercise his employment there. Under Article 15, Jurisdiction B would be permitted to tax the employment income if the employer was also resident in that jurisdiction or bore the cost of the employee's remuneration through a PE in that jurisdiction. In cases where the employer was resident elsewhere, Jurisdiction B would be entitled to tax the employment income only if the employee exceeds the 183 day threshold.

62. Exceptional circumstances call for an exceptional level of coordination between jurisdictions to mitigate the compliance and administrative costs for employees and employers associated with an involuntary and temporary change of the place where employment is performed. Where relevant, MAP should be applied efficiently and pragmatically to help resolve issues arising out of the COVID-19 pandemic. Jurisdictions have issued useful guidance and administrative relief to mitigate the unplanned tax implications and potential new burdens arising due to effects of the COVID-19 pandemic. A sample of that guidance is included in Box 4.

63. In conclusion, changes in the jurisdiction where an employee exercises their employment can impact where their employment income is taxed: new taxing rights over the employee's income may arise in other jurisdictions and those new taxing rights may displace existing taxing rights. As payroll taxes are often withheld at source, addressing the change will result in compliance and administrative costs for the employer and employee. Some jurisdictions have issued guidance and administrative relief to mitigate the additional burden.

37.6 Short-term Business Visitors

This takes us to art 15(2) OECD Model:

> 2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:
>
> a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
> b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and
> c) the remuneration is not borne by a permanent establishment which the employer has in the other State.[19]

To follow this one must keep in mind which Contracting State is which. It is easier to follow if rewritten with my terminology thus:

> 2. ... remuneration derived by a resident of the resident State in respect of an employment exercised *in the work State* shall be taxable only in the *resident* State if:
>
> a) the recipient is present in *the work State* for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
> b) the remuneration is paid by, or on behalf of, an employer who is not a resident *of the work State*, and
> c) the remuneration is not borne by a permanent establishment which the employer has *in the work State*.

I refer to this as **"STBV relief"** (short-term business visitors).[20] The three conditions are **"STBV conditions (a) - (c)"**; and conditions (b) and (c) are the **"STBV payment conditions"**.

For PAYE issues, see 36.13 (PAYE exemption: EP App 4). For Hong Kong/Singapore, which have non-standard DTAs, see 36.13.4 (EP App 4: Mistakes).

[19] For completeness, art 15(3) continues: "Notwithstanding the preceding provisions of this Article, remuneration derived in respect of an employment exercised aboard a ship or aircraft operated in international traffic, or aboard a boat engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated."
This is not discussed here; see OECD Commentary para 9.

[20] The OECD term is: "the exception of paragraph 2 of Article 15". This relief should not be confused with the annual PAYE scheme which is available to short term business visitors (differently defined) who do not qualify for DTA relief.

37.6.1 *STBV relief: Policy*

OECD Commentary on art 15(2) provides:

> 8. There is a direct relationship between the principles underlying the exception of [art 15(2), STBV relief] and Article 7 (business profits). Article 7 is based on the principle that an enterprise of a Contracting State should not be subjected to tax in the other State [the source State] unless its business presence in that other State has reached a level sufficient to constitute a permanent establishment.[21] The exception of [art 15(2), STBV relief] extends that principle to the taxation of the employees of such an enterprise where the activities of these employees are carried on in the other State [the source State] for a relatively short period.

This neatly explains STBV condition (a) (183 day rule).[22]

OECD Commentary on art 15(2) provides:

> 6.2 The object and purpose of subparagraphs b) and c) of paragraph 2 are to avoid the source taxation of short-term employments to the extent that the employment income is not allowed as a deductible expense in the State of source because the employer is not taxable in that State as it neither is a resident nor has a permanent establishment therein. These subparagraphs can also be justified by the fact that imposing source deduction requirements with respect to short-term employments in a given State may be considered to constitute an excessive administrative burden where the employer neither resides nor has a permanent establishment in that State.

37.7 STBV payment condition (b)

It is helpful first to consider STBV payment condition (b).

Article 15(2)(b) OECD Model provides:

[21] See 21.23 (DT relief: trading income).

[22] The Commentary continues with an explanation of the policy behind STBV payment conditions which I find harder to follow:

> "Subparagraphs b) and c) make it clear that the exception [STBV relief] is not intended to apply where the employment services are rendered to [ie, the individual is an employee of] an enterprise the profits of which are subjected to tax in a State either
>
> [a] because it is carried on by a resident of that State or
>
> [b] because it has a permanent establishment therein to which the services are attributable."

> 2. ... remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if ...
> (b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the UK [the work State],

Unpacking paragraph (b), 3 issues arise:

(1) Identify the employer
(2) Identify the residence of the employer (that may be easy once the employer is identified)

STBV relief only applies if there is a non-resident employer (ie not resident in the work State)

(3) Does that employer pay the remuneration (directly or by someone on his behalf)?

These are logically distinct questions, but (1) and (3) may overlap because the question who pays remuneration may be relevant to identifying the employer.[23] I consider first some general comments on what amounts to paying remuneration, and then who is the employer.

37.8 Who pays remuneration

37.8.1 *"Ultimately borne"*

The requirement is:

> b) the remuneration is *paid by, or on behalf of*, an employer who is not a resident of the other State [ie not a resident of the work State]

DTR Manual provides:

> **DT1922 Employment** [May 2020]
> **'On behalf of'**
> Payments may be made 'on behalf of' a non-resident employer in cases where the payment is physically made by a UK company. It may be accepted that remuneration has been paid or benefits provided 'on behalf of' a non-resident employer if that non-resident ultimately bears the cost of such remuneration and benefits.

[23] See item [3] in OECD Commentary para 8.14, set out at 37.9.9 (Identifying effective employer).

"Ultimately borne" is a paraphrase but perhaps a useful one. That has been explained in turn as meaning "the employer finally bearing the cost after all recharging of any nature."[24]

Recharging (ie reimbursement) can work both ways. A UK person might pay remuneration directly and be reimbursed by the non-resident employer. Then the remuneration is ultimately borne by the non-resident, and STBV condition (b) is met. Conversely the non-resident employer might pay remuneration directly and be reimbursed by a UK resident. Then the remuneration is not ultimately borne by the non-resident and STBV condition (b) is not met.

HMRC say:

> **Question:** Do HMRC agree that a recharge, or series of recharges, whereby a cost is ultimately borne in the UK, is only relevant for Appendix 4 purposes [STBV PAYE scheme] [25] if that cost can be linked to both the specific employee's remuneration (as defined in Appendix 4) and the period that the employee in question spent working in the UK? If HMRC do not agree, please can you explain why a cost borne in the UK that cannot be linked to both of these factors would be relevant to the question of whether treaty exemption is available (and therefore to the application of Appendix 4)?
>
> **HMRC answer:** PAYE82000 defines 'Ultimately Borne' as the company finally bearing the cost of the employees work in the UK after all recharging of any nature. This could either be by a direct recharge or as part of a management charge made by the non-resident employer.
>
> If the formal employer charges the UK employer an amount that represents the remuneration, employment benefits and other employment costs for their time in the UK then this could be considered a direct recharge and therefore ultimately borne in the UK.
>
> If the formal employer charges the UK employer an amount, or a series of amounts, representing a management charge that includes an employees' remuneration relevant to their time in the UK then this could be considered being ultimately borne in the UK.[26]

[24] See 36.13.2 (Remuneration ultimately borne by non-resident).

[25] See 36.13 (Short-term visitor PAYE scheme).

[26] Expatriate Forum Minutes Oct 2019 *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf*

37.8.2 *Employer deduction in work State*

Clearly, if the remuneration is ultimately borne by a non-resident employer, no person in the work State can claim a deduction.

There is a certain sense in allowing STBV relief and disallowing the deduction in the work State.

The DTR Manual provides:

> **DT1922 Employment** [May 2020]
>
> Where it is argued that remuneration has been paid 'on behalf of' an overseas employer, even though a UK company has paid the individual's remuneration and the overseas employer has not reimbursed the cost, it should be pointed out that it is unlikely that, in these circumstances, the cost of the remuneration could be regarded as wholly and exclusively incurred for the purposes of the UK company's trade and that, therefore, no deduction should be claimed for the cost of the remuneration in computing the UK company's taxable profit. Reference should be made to the tax case of *Robinson v Scott Bader and Co Ltd* (54 TC 757) which considers the inadmissibility of remuneration paid on behalf of another employer.
>
> The decision in the *Scott Bader* case makes clear that the object of the person making the payment is decisive in determining whether or not a deduction is permissible in accordance with [s.34 ITTOIA/s.54 CTA 2009, wholly & exclusively test].
>
> In relation to seconded employees there are three possible situations
>
> - the payment to the employee is made solely in the interests of the overseas company;
> - the payment is made partly in the interests of the UK company and partly in the interest of the overseas company or
> - the payment is made solely in the interests of the UK company.
>
> Only in the third case is a deduction available to the UK company in computing its profits.

37.8.3 *DT relief: Benefits in kind*

A benefit in kind such as the occupation of land is not in the strict sense "paid" but the word should construed loosely, to include providing benefits in kind.[27] The question is then who "pays" the benefit in kind. The DTR Manual provides:

[27] See 15.11.2 ("Paid" and "payment").

> **DT1922 Employment** [Nov 2019]
> **Benefits**
> Even where basic remuneration continues to be paid by the overseas employer it is common for benefits (for example, the use of a flat) to be provided at the cost of the UK employer to whom the employee has been seconded. Subject to the other conditions in the Article, the basic remuneration may be exempt from UK tax but the condition in Article 15(2)(b) is not satisfied in relation to benefits in these circumstances because they are not 'remuneration paid by, or on behalf of,' the overseas employer (unless the cost of the benefits is borne by the overseas employer through a recharge).

37.8.4 *HMRC practice*

The DTR Manual provides:

> **DT1922 Employment** [May 2020]
> ... Not only must the claimant remain an employee of the overseas company but the remuneration in respect of which the exemption is claimed must be paid by the overseas employer and not, for example, by a UK subsidiary company to whom the employee may have been seconded. Any statement on this aspect of a claim should be checked to ensure that it is consistent with
> i) other information in the papers (for example what does the return show?) and
> ii) the position in other similar cases involving the same UK employer.
> If there is any doubt you should ask the agents to provide a statement from the UK company or the overseas employer, to confirm the extent to which, if at all, the overseas employer has continued to pay the claimant's remuneration either directly or by reimbursing the UK company...
> Claims should not be admitted where
> [1] a UK company pays remuneration or incurs the cost of benefits and
> [2] does not receive reimbursement from the overseas employer.
> Such payments and costs are incurred in the interest of the UK company and not on behalf of the overseas employer.
> Unless the claimant offers evidence that the UK company was reimbursed the cost of the taxpayer's remuneration and benefits by the non-resident employer (and this can be checked with the relevant HMRC corporation tax specialist or Customer Compliance Manager dealing with the UK company's Corporation Tax affairs) a claim under Article 15(2) should be resisted.

37.9 Labour-hire arrangement

An "employment" is essential to art 15, and (if there is one) the identity of the employer is, as noted, essential for STBV payment condition (b).

The terms employment/employer are not defined. Except for a few marginal points, there never is a definition. It has been left for the Courts to sort out.

37.9.1 *Labour-hire terminology*

For the purposes of discussion we need some neutral terms, which may apply to employment/non-employment relationships. In this chapter:
The **"worker"** is the individual supplying service(s) whether employed/ self employed[28]
The **"client"** is the person to whom the worker's services are supplied

A **"labour-hire"** arrangement is one under which there are two[29] contracts:

(1) A contract of employment[30] between the worker and an **"intermediary",** under which the intermediary is (or at least is expressed to be) the employer of the worker.
(2) A contract between the intermediary and the **"end user"**, under which the intermediary provides the services of the worker to the end user. The worker is not (or at least is not expressed to be) a party to this contract.

The state of the end user is therefore the work State.

Other terminology which might be used includes:
- Secondment; and the worker is called a secondee

[28] This is not the usual employment law terminology, where "worker" has a narrower meaning; it means in short an individual who works under (a) a contract of employment, or (b) any other contract, whereby the individual undertakes to work personally for another person whose status is not that of a client or customer of a profession or business carried on by the individual; see s.230 Employment Rights Act 1996.

[29] There could be more than one intermediary, with a series of contracts between them, but that would be unusual and I do not consider it here.

[30] This contract might alternatively be a contract under which the worker is (or at least is expressed to be) self-employed, and provides business services to the intermediary; but in the discussion below I assume this contract is (or is at least expressed to be) a contract of employment.

- Outsourcing
- A trilateral arrangement

If the worker and the intermediary are not resident in the work State (the State of the end user), that may be called an **"international labour-hire arrangement"**.

OECD Commentary uses different terminology:

My term	**OECD term**
Worker	*The individual*
End user	*The enterprise that acquires the services*
Intermediary	*Formal employer/enterprise by which the individual is formally employed*

It may happen that form and substance diverge, so:

(1) The intermediary is the *formal* or *de jure* employer

(2) The end user is the *effective/economic*[31]*/functional* or *de facto* or *real*[32] employer

I refer to these as the formal/effective employer, or the employer in form/in substance.

The question then is which of the two is the "employer" for DTA purposes.

If (as I will conclude) the treaty has an autonomous meaning, it would be necessary to distinguish:

"Domestic-law employer": the employer as a matter of domestic employment law

"Treaty-employer": the employer for the purposes of the DTA

The same distinction is relevant in identifying the personnel of an enterprise, for the personnel condition of a PE.[33]

37.9.2 *Employer: OECD Commentary*

The Commentary has changed over time. In the following discussion:

"1992 Commentary" means the Commentary in its 1992 form

[31] See App.7.7.1 (Economic terms with antonym).

[32] The expression "real employer" was used in the 1992 OECD Commentary, but (wisely) dropped from the 2010 Commentary.

[33] See 106.9.1 (Formal v effective employment).

“2010 Commentary” means the 2010 form, which is the current form[34]

Prior to 1992 there was no discussion of labour-hire arrangements.

37.9.3 *1992 Commentary*

The 1992 Commentary was concise:

> *8.[Article 15(2) STBV relief] has given rise to numerous cases of abuse through adoption of the practice known as “international hiring-out of labour”. In this system, a local employer wishing to employ foreign labour for one or more periods of less than 183 days recruits through an intermediary established abroad who purports to be the employer and hires the labour out to the employer. The worker thus fulfils prima facie the three conditions laid down by [art 15(2)] and may claim exemption from taxation in the country where he is temporarily working.*
> *To prevent such abuse, in situations of this type, the term “employer” should be interpreted in the context of [art 15(2)].*[35] *In this respect, it should be noted that the term “employer” is not defined in the Convention but it is understood that the employer is the person having rights on the work produced and bearing the relative responsibility and risks. In cases of international hiring-out of labour, these functions are to a large extent exercised by the user. In this context, substance should prevail over form, i.e. each case should be examined to see whether the functions of employer were exercised mainly by the intermediary or by the user.*

37.9.4 *2010 Commentary*

The 2010 Commentary now divides States into 2 categories. Firstly:

> 8.2 In some States, a formal contractual relationship would not be questioned for tax purposes unless there were some evidence of manipulation and these States, as a matter of domestic law, would consider that employment services are only rendered where there is a formal employment relationship.

[34] For pre-2010 discussion see: Avery Jones, “Short-term Employment Assignments under Article 15(2) of OECD Model” (2009) 63 Bulletin for International Taxation 1,6.

[35] This might perhaps be interpreted to mean that the form over substance approach only applied in cases of abuse, though that does not seem the most natural reading. The point does not now arise: the 2010 Commentary does not limit the substance-over form approach to cases of abuse.

The reference to "manipulation" gives plenty of wiggle-room. This is the only place in the OECD Commentary that the word is used. What does it mean? Is it the same as abuse?[36] Would a case with a formal employer distinct from an effective employer (at least) normally involve "manipulation"? If so, the distinction between form-over-substance States (within para 8.2) and substance-over-form States (within para 8.4) will (at least) normally not arise. For "manipulation" is essentially a substance-over-form concept.

However that may be, States in the second category do not have to consider what amounts to manipulation because they apply the substance-over-form approach proposed in the 1992 Commentary:

> 8.4 In many States, however, various legislative or jurisprudential rules and criteria (e.g. substance over form rules) have been developed for the purpose of distinguishing
> [1] cases where services rendered by an individual to an enterprise should be considered to be rendered in an employment relationship (contract of service) from
> [2] cases where such services should be considered to be rendered under a contract for the provision of services between two separate enterprises (contract for services) [ie the contract between the intermediary and the end user].

In the following discussion:
"Form-over-substance States" are those within para 8.2 (employment requires a formal contractual relationship)
"Substance-over-form States" are those within para 8.4

In short, the 1992 Commentary assumed that all States were form-over-substance states. But some States did not accept that, and the 2010 amendments were designed to accommodate them.

37.9.5 *Employment law background*

Where does the UK fall in this categorisation, in para 8.2 or 8.4? Is our law formal? or does substance prevail over form? The question is too broad, it does not have a yes or no answer at that level of generality. The answer depends on the issue which is being considered.

In short:

[36] See 108.7 (OECD-concept abuse).

(1) *Is a contract an employment contract?* If the question is whether a contract made between A and B is one of employment/non-employment, the English[37] employment law approach is one of substance, not form (ie the parties' description of the arrangement, or the wording of the contract, is not decisive).

(2) *Who are the parties to the contract?* If the question is whether under a labour-hire arrangement, there is a contract of employment between the worker and the end user, the English employment law approach is better described as one of form,[38] and the parties' description of the arrangement and the wording of the contracts is decisive (unless a contract written formally is varied orally, or a sham, which would not be lightly inferred).

This is why there is legislation dealing with labour-hire arrangements in Part 2 ITEPA:

Chapter	**Topic**
7	Agency workers
8	Intermediaries
9	Managed service companies

This view is supported by *The Independent Workers' Union, (R, oao) v Central Arbitration Committee*.[39] In this case the University of London (the end user) outsourced its front of house (security guards, receptionists etc, "the workers"). The workers had a formal contract of employment with a third party ("the intermediary"). The question was whether the University was the employer of the workers. The University did not have a contract with the workers. It did have significant involvement in determining their terms and conditions of employment.[40] The Court said:

> A *de facto* employer is not a known or recognised concept... Organisations are entitled to adopt outsourcing arrangements, should

[37] Further consideration would be needed for Scots or foreign law. Oxford Pro Bono Publico, "Joint Employers and Agency Workers" (2017) considers the position in USA, Canada, South Africa, New Zealand and Ireland; see *https://www.law.ox.ac.uk/sites/files/oxlaw/3._joint_employers_and_agency_workers.pdf*

[38] Though a substance/form dichotomy is not as straightforward or clear cut as those terms may suggest.

[39] [2019] EWHC 728 (Admin).

[40] It was assumed that the University substantially determined the terms and conditions of the workers.

> they wish to do so, as a legitimate means of organising their activities.[41]

Likewise in Australia. *Wilton & Cumberland v Coal & Allied Operations*[42] considered whether workers provided through a labour-hire arrangement were employees of the end user. The end user did not discuss essential contractual terms with the workers. The workers did not act in a way that indicated they regarded themselves as being employed by the end user. The Court held that there was no employment relationship between the workers and the end user. There was no contract between them at all.

37.9.6 *Do domestic-law rules apply?*

OECD Commentary continues:

> That distinction [form-over-substance/substance-over-form] keeps its importance when applying the provisions of Article 15, in particular those of subparagraphs 2 b) and c). Subject to
> [a] the limit described in paragraph 8.11 and
> [b] unless the context of a particular convention requires otherwise,
> it is a matter of domestic law of the State of source to determine whether services rendered by an individual in that State are provided in an employment relationship and that determination will govern how that State applies the Convention.

Thus where the UK is the work State, the question whether the end user is the employer, which is key for STBV relief in labour-hire arrangements, is said in principle to be a matter of UK domestic law.[43] But this is subject to two wide exceptions:

(1) Where the context of a particular convention requires otherwise. This does not refer to the case where a convention does not have standard OECD Model wording; it refers to a case where the domestic law of a State (which applies to undefined treaty terms) requires some other interpretation of OECD Model wording.
(2) The limit described in para 8.11: see 37.9.8 (Limit on work State powers).

In short, UK domestic law is not the only consideration in determining the

[41] [2019] EWHC 728 (Admin) at [74], [81].
[42] [2007] FCA 725.
[43] See 107.12 (Undefined treaty terms); 34.3 (Employment/employer/employee).

meaning of the term ‘employer’, and the identity of the employer, for the purposes of STBV relief. The context, object and purpose of the relief, and the payment conditions in particular, need to be considered in interpreting the term ‘employer’.

37.9.7 *Effective employment*

OECD Commentary provides:

> 8.5 In some cases, services rendered by an individual to an enterprise may be considered to be employment services for purposes of domestic tax law even though these services are provided under a formal contract for services between,
> [1] on the one hand, the enterprise that acquires the services, and,
> [2] on the other hand, either
> [a] the individual himself
> [b] or another enterprise [the Intermediary]
> [i] by which the individual is formally employed or
> [ii] with which the individual has concluded another formal contract for services.

The focus of discussion is on case 2[b][i], ie what I call labour-hire arrangements.

> 8.6 In such cases, the relevant domestic law may ignore the way in which the services are characterised in the formal contracts. It may prefer to focus primarily on the nature of the services rendered by the individual and their integration into the business carried on by the enterprise that acquires the services to conclude that there is an employment relationship between the individual and that enterprise.
> 8.7 Since the concept of employment to which Article 15 refers is to be determined according to the domestic law of the State that applies the Convention (subject to the limit described in paragraph 8.11 and unless the context of a particular convention requires otherwise),[44] it follows that a State which considers such services to be employment services will apply Article 15 accordingly. It will, therefore, logically conclude that the enterprise to which the services are rendered [the end user] is in an employment relationship with the individual so as to constitute his employer for purposes of subparagraphs 2 b) and c) [STBV payment conditions].

The OECD Commentary supports that approach:

[44] See Commentary para 8.4, set out at 37.9.2 (Employment: OECD Commentary).

> That conclusion is consistent with the object and purpose of [art 15(2), STBV relief] since, in that case, the employment services may be said to be rendered to a resident of the State where the services are performed.
> ... 8.10 The approach described in the previous paragraphs therefore allows the State in which the activities are exercised [the work State] to reject the application of [art 15(2), STBV relief]
> [1] in abusive cases and
> [2] in cases where, under that States's domestic law concept of employment, services rendered to a local enterprise by an individual who is formally employed by a non-resident are rendered in an employment relationship (contract of service) with that local enterprise.

37.9.8 *Limit on work State powers*

In short, the work State may refuse STBV treaty relief if it determines that the end user is the employer, rather than the intermediary. But the model treaty does not allow the work State an unfettered power to determine the "who is the employer" issue in an arbitrary way:

> 8.11 The conclusion that, under domestic law, a formal contractual relationship should be disregarded must, however, be arrived at on the basis of objective criteria. For instance, a State could not argue that services are deemed, under its domestic law, to constitute employment services where, under the relevant facts and circumstances, it clearly appears that these services are rendered under a contract for the provision of services concluded between two separate enterprises. The relief provided under paragraph 2 of Article 15 [STBV relief] would be rendered meaningless if States were allowed
> [1] to deem services to constitute employment services in cases where there is clearly no employment relationship or
> [2] to deny the quality of employer to an enterprise carried on by a non-resident where it is clear that that enterprise provides services, through its own personnel, to an enterprise carried on by a resident.

This conclusion has a knock-on effect for taxation of the intermediary:

> Conversely, where services rendered by an individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises, that State should logically also consider that the individual is not carrying on the business of the enterprise that constitutes that individual's formal employer; this could be relevant, for example, for

> purposes of determining whether that enterprise has a permanent establishment at the place where the individual performs his activities.[45]

37.9.9 *Identifying effective employer*

If we adopt an effective employment test, how do we determine whether there is an employment relationship between the worker and the end user? The 1992 Commentary provided:

> *It is therefore up to the Contracting States to agree on the situations in which the intermediary does not fulfil the conditions required for him to be considered as the employer within the meaning of [art 15(2)2, STBV relief].*
> *In settling this question, the competent authorities may refer not only to the above-mentioned indications [who has rights to work produced/who bears responsibility and risks] but to a number of circumstances enabling them to establish that the real employer is the user of the labour (and not the foreign intermediary).*[46]

The 2010 Commentary is longer, and there are some differences of detail between the 1992 and 2010 Commentary, but the 1992 Commentary no longer matters. The 2010 Commentary provides:

> 8.12 It will not always be clear, however, whether services rendered by an individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises. Any disagreement between States as to whether this is the case should be solved having regard to the following principles and examples (using, where appropriate, the mutual agreement procedure).
> 8.13 The nature of the services rendered by the individual will be an

[45] See 106.9.1 (Formal v effective employment).

[46] The pre 2010 Commentary then gave a list of factors which are an earlier version of the factors in the current OECD Commentary:
[1] Responsibility/risk for results produced by the employee's work; now Commentary para 8.13
[2] Authority to instruct the worker; now Commentary 8.14 [1]
[3] Control/responsibility of place where work performed; now Commentary 8.14 [2]
[4] Remuneration to the hirer calculated on the basis of the time utilised/or in other ways a connection between this remuneration and wages received by the employee; now Commentary 8.14[3]
[5] Provision of tools and materials; now Commentary 8.14[4]
[6] Number/qualifications of employees; now Commentary 8.14[5]

> important factor since it is logical to assume that an employee provides services which are an integral part of the business activities carried on by his employer. It will therefore be important to determine whether the services rendered by the individual *constitute an integral part of the business of the enterprise* to which these services are provided. For that purpose, a key consideration will be which enterprise *bears the responsibility or risk for the results* produced by the individual's work.

The tests offered here (emphasis added) are (1) whether the worker is an integral part of the enterprise, and (2) responsibility/risk. These are evaluative tests and may not offer much help in practice.

> Clearly, however, this analysis will only be relevant if the services of an individual are rendered directly to an enterprise. Where, for example, an individual provides services to a contract manufacturer or to an enterprise to which business is outsourced, the services of that individual are not rendered to enterprises that will obtain the products or services in question.

This seems rather shallow. What constitutes outsourcing is not explored.

> 8.14 Where a comparison of
> [a] the nature of the services rendered by the individual with
> [b] the business activities carried on
>   [i] by his formal employer and
>   [ii] by the enterprise to which the services are provided
> points to an employment relationship that is different from the formal contractual relationship, the following additional factors may be relevant to determine whether this is really the case:
> [1] who has the authority to instruct the individual regarding the manner in which the work has to be performed;
> [2] who controls and has responsibility for the place at which the work is performed;
> [3] the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided (see paragraph 8.15 below);[47]

[47] OECD Commentary para 8.15 explains the term "directly charged":
Where an individual [the worker] who is formally an employee of one enterprise [the intermediary] provides services to another enterprise [the end user], the financial arrangements made between the two enterprises will clearly be relevant, although not necessarily conclusive, for the purposes of determining whether the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided. For instance, if the fees charged by

[4] who puts the tools and materials necessary for the work at the individual's disposal;
[5] who determines the number and qualifications of the individuals performing the work;
[6] who has the right to select the individual who will perform the work and to terminate the contractual arrangements entered into with that individual for that purpose;
[7] who has the right to impose disciplinary sanctions related to the work of that individual;
[8] who determines the holidays and work schedule of that individual.

37.9.10 *OECD examples*

The OECD Commentary gives 6 examples.[48] I consider these in the following order:

Eg no.	Facts	STBV relief	Residence State	Work State
1	Training co provides trainer	Yes	Aco	Bco
2	Group co provides market strategist	Yes	Cco	Dco
6	Group co provides HR manager	Yes	Eco	Fco

the enterprise that formally employs the individual
[1] represent the remuneration, employment benefits and other employment costs of that individual for the services that he provided to the other enterprise,
[2] with no profit element or with a profit element that is computed as a percentage of that remuneration, benefits and other employment costs,
this would be indicative that the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided.
That should not be considered to be the case, however,
[1] if the fee charged for the services bears no relationship to the remuneration of the individual or
[2] if that remuneration is only one of many factors taken into account in the fee charged for what is really a contract for services (e.g. where a consulting firm charges a client on the basis of an hourly fee for the time spent by one of its employees to perform a particular contract and that fee takes account of the various costs of the enterprise),
provided that this is in conformity with the arm's length principle if the two enterprises are associated.
It is important to note, however, that the question of whether the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided is only one of the subsidiary factors that are relevant in determining whether services rendered by that individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises.

[48] See too the Australian version of the examples in TR 2013/1EC.

		Form	*Substance*		
3	Group co provides receptionist	Yes	No	Gco	Hco
4	Agency engineer	Yes	No	Ico	Jco
5	Engineering co provides engineer	Yes	No	Kco	Lco

We start with 3 cases (no. 1, 2 and 6) where labour hire arrangements are effective, ie the effective employer is the intermediary, not the end user:

> 8.16 **Example 1 [**Training co provides trainer**]**:
> Aco, a company resident of State A, concludes a contract with Bco, a company resident of State B, for the provision of training services. Aco is specialised in training people in the use of various computer software and Bco wishes to train its personnel to use recently acquired software. X, an employee of Aco who is a resident of State A, is sent to Bco's offices in State B to provide training courses as part of the contract.

The OECD analysis is as follows:

> 8.17 In that case, State B could not argue
> [1] that X is in an employment relationship with Bco or
> [2] that Aco is not the employer of X for purposes of the convention between States A and B.
> X is formally an employee of Aco whose own services, when viewed in light of the factors in paragraphs 8.13 and 8.14, form an integral part of the business activities of Aco. The services that he renders to Bco are rendered on behalf of Aco under the contract concluded between the two enterprises. Thus, provided that X is not present in State B for more than 183 days during any relevant twelve month period and that Aco does not have in State B a permanent establishment which bears the cost of X's remuneration, the exception of [art 15(2) STBV relief] will apply to X's remuneration.

That seems straightforward.

The next two examples concern company groups:

> 8.18 **Example 2**:[Group co provides marketing strategist]
> Cco, a company resident of State C, is the parent company of a group of companies that includes Dco, a company resident of State D.
> Cco has developed a new worldwide marketing strategy for the products of the group. In order to ensure that the strategy is well understood and followed by Dco, which sells the group's products, Cco sends X, one of its employees who has worked on the development of the strategy, to work in Dco's headquarters for four months in order to advise Dco with respect to its marketing and to ensure that Dco's communications department understands and complies with the worldwide marketing

> strategy.

The OECD analysis is as follows:

> 8.19 In that case, Cco's business includes the management of the worldwide marketing activities of the group and X's own services are an integral part of that business activity. While it could be argued that an employee could have been easily hired by Dco to perform the function of advising the company with respect to its marketing, it is clear that such function is frequently performed by a consultant, especially where specialised knowledge is required for a relatively short period of time. Also, the function of monitoring the compliance with the group's worldwide marketing strategy belongs to the business of Cco rather than to that of Dco. The exception of [art 15(2) STBV] should therefore apply provided that the other conditions for that exception are satisfied.
>
> 8.26 **Example 6**: [Group co provides HR manager]
> Kco, a company resident of State K, and Lco, a company resident of State L, are part of the same multinational group of companies. A large part of the activities of that group are structured along function lines, which requires employees of different companies of the group to work together under the supervision of managers who are located in different States and employed by other companies of the group.
> X is a resident of State K employed by Kco; she is a senior manager in charge of supervising human resources functions within the multinational group. Since X is employed by Kco, Kco acts as a cost centre for the human resource costs of the group; periodically, these costs are charged out to each of the companies of the group on the basis of a formula that takes account of various factors such as the number of employees of each company. X is required to travel frequently to other States where other companies of the group have their offices. During the last year, X spent three months in State L in order to deal with human resources issues at Lco.

The OECD analysis is as follows:

> 8.27 In that case, the work performed by X is part of the activities that Kco performs for its multinational group. These activities, like other activities such as corporate communication, strategy, finance and tax, treasury, information management and legal support, are often centralised within a large group of companies. The work that X performs is thus an integral part of the business of Kco. The exception of paragraph 2 of Article 15 [STBV] should therefore apply to the

> remuneration derived by X for her work in State L provided that the other conditions for that exception are satisfied.

Note that in example 2, marketing services are "frequently performed by a consultant" and in example 6, HR is "often centralised within a large group of companies."[49] There is a normative test lurking here; labour-hire arrangements which are regarded as standard practice within company groups are acceptable.

I turn to consider the 3 OECD examples of labour-hire arrangements where the intermediary is the formal employer, but the end user is the effective employer. These are examples no. 3, 4 and 5:

> 8.20 **Example 3** [Group co provides receptionist]
> A multinational owns and operates hotels worldwide through a number of subsidiaries.
> Eco, one of these subsidiaries, is a resident of State E where it owns and operates a hotel. X is an employee of Eco who works in this hotel.
> Fco, another subsidiary of the group, owns and operates a hotel in State F where there is a shortage of employees with foreign language skills. For that reason, X is sent to work for five months at the reception desk of Fco's hotel. Fco pays the travel expenses of X,[50] who remains formally employed and paid by Eco, and pays Eco a management fee based on X's remuneration, social contributions and other employment benefits for the relevant period.

The OECD analysis is as follows:

> 8.21 In that case, working at the reception desk of the hotel in State F, when examined in light of the factors in paragraphs 8.13 and 8.14, may be viewed as forming an integral part of Fco's business of operating that hotel rather than of Eco's business. Under the approach described above, *if*, under the domestic law of State F, the services of X are considered to have been rendered to Fco in an employment relationship, State F could then logically consider that Fco is the employer of X and the exception of paragraph 2 of Article 15 [STBV] would not apply.
>
> 8.22 **Example 4** [Agency provides engineer]
> Gco is a company resident of State G. It carries on the business of filling temporary business needs for highly specialised personnel.

[49] Is this in fact correct? and would it need to be proved by evidence to a tribunal, or would a tribunal be expected to know what is normal for international groups?

[50] Author's footnote: The analysis would not be different if Eco pays the travel expenses.

> Hco is a company resident of State H which provides engineering services on building sites. In order to complete one of its contracts in State H, Hco needs an engineer for a period of five months. It contacts Gco for that purpose. Gco recruits X, an engineer resident of State X, and hires him under a five month employment contract. Under a separate contract between Gco and Hco, Gco agrees to provide the services of X to Hco during that period. Under these contracts, Gco will pay X's remuneration, social contributions, travel expenses and other employment benefits and charges.

The OECD analysis is as follows:

> 8.23 In that case, X provides engineering services while Gco is in the business of filling short-term business needs. By their nature the services rendered by X are not an integral part of the business activities of his formal employer. These services are, however, an integral part of the business activities of Hco, an engineering firm. In light of the factors in paragraphs 8.13 and 8.14, State H *could* therefore consider that, under the approach described above, the exception of paragraph 2 of Article 15 [STBV] would not apply with respect to the remuneration for the services of the engineer that will be rendered in that State.
>
> 8.24 **Example 5**: [Engineering co provides engineer]
> Ico is a company resident of State I specialised in providing engineering services. Ico employs a number of engineers on a full time basis.
> Jco, a smaller engineering firm resident of State J, needs the temporary services of an engineer to complete a contract on a construction site in State J. Ico agrees with Jco that one of Ico's engineers, who is a resident of State I momentarily not assigned to any contract concluded by Ico, will work for four months on Jco's contract under the direct supervision and control of one of Jco's senior engineers. Jco will pay Ico an amount equal to the remuneration, social contributions, travel expenses and other employment benefits of that engineer for the relevant period, together with a 5% commission. Jco also agrees to indemnify Ico for any eventual claims related to the engineer's work during that period of time.

The OECD analysis is as follows:

> 8.25 In that case, even if Ico is in the business of providing engineering services, it is clear that the work performed by the engineer on the construction site in State J is performed on behalf of Jco rather than Ico. The direct supervision and control exercised by Jco over the work of the engineer, the fact that Jco takes over the responsibility for that work and

> that it bears the cost of the remuneration of the engineer for the relevant period are factors that could support the conclusion that the engineer is in an employment relationship with Jco. Under the approach described above, State J *could* therefore consider that the exception of paragraph 2 of Article 15 [STBV] would not apply with respect to the remuneration for the services of the engineer that will be rendered in that State.

In these 3 cases, OECD do not say that the end user *is* the employer. They say that the work State *could* consider the end user to be an employer, *if* it is a substance-over-form State. (The emphasis has been added to make the point.) But the UK is a substance-over-form State.

None of the examples involve tax avoidance or abuse: they are (as far as one can tell from the facts given) commercial, non-tax motivated arrangements.

In each of the examples the intermediary (the formal employer) carried on a genuine independent enterprise, and did not lack substance; but the effective employer was the end user. The focus is on the circumstances of the individual employee.

In making the form/substance distinction, the examples do not systematically identify and review the 8 factors identified in para 8.14 of the Commentary. Most of the factors are not expressly mentioned, though in some cases one might make an inference. The focus is almost exclusively on the two key factors of integration/risk:

Example	**Trainer**	**Marketing analyst**	**Group HR manager**	**Receptionist**	**Agency Engineer**	**Surplus Engineer**
Example no	1	2	6	3	4	5
Integral part of end user business	no	no	no	yes	yes	infer yes
End user responsibility/ risk	-	-		-	-	yes
End user may instruct	-	-		-	-	yes
End user controls place of work	infer yes	infer yes	infer yes	infer yes	infer yes	infer yes
Remuneration directly charged on end user	-	-	no	yes	infer yes	yes
End user provides tools/materials	-	-	-	-	-	-
End user determines worker no/qualifications	-	-	-	-	-	-
End user may hire/fire	-	-	-	-	-	-
End user has disciplinary sanctions	-	-	-	-	-	-

End user determines holiday/work schedule	-	-	-	-	-	-
Conclusion: end user employee	no	no	no	yes if …	yes if …	yes if …

37.9.11 *Economic employer: HMRC view*

In 1995 HMRC changed its practice to adopt the 1992 Commentary’s effective employment test. Tax Bulletin 15 (1995) provides:

> [The Bulletin refers to art 15(2) (STBV relief) and continues:] In many cases, it is clear that the employer is the non resident company for whom the taxpayer was working before he or she came to the UK. In other cases, the employee may have been seconded by his or her overseas employer to work for a UK company, or the overseas employer may carry on a business of hiring out staff to other companies. A formal contract of employment remains with the overseas employer, but the employee works in the business of the UK company, which obtains the benefits and bears any risks in relation to the work undertaken by the employee. In economic terms this state of affairs is recognised by the overseas employer recharging the cost of the employee's remuneration to the UK and the UK company might be described as the "economic employer".
>
> As mentioned in paragraph 1920(b) of the Inland Revenue's recently published Double Taxation Relief manual,[51] we have in the past accepted, other than in cases involving tax avoidance, that where the employee continued to be paid by the overseas employer and had no contract of employment with the UK company, the condition that the employee's remuneration must be "paid by or on behalf of an employer" who is not resident in the UK, was met regardless of the relationship between the employee and the UK company.
>
> More recently, the question of the identity of the employer in cases like these has been the subject of guidance in the 1992 and 1994 Editions of the Commentary on the OECD Model Double Taxation Convention. The Commentary concludes that the context of the provision concerning exemption for short stay employees requires that it is the "economic employer", and not the formal employer, who should be considered as the employer for the purposes of applying the provision.
>
> The UK is a member country of the OECD and the terms of modem UK

[51] I expect this refers to the text now in DT1922, see 37.11 (Labour-hire: Avoidance motive).

> double taxation agreements, including the condition concerning payment of remuneration, are based on the OECD Model Convention. The Revenue seeks, as far as possible, to apply double taxation agreements consistently with the guidance in the Commentary on the Model Convention. Consequently, the Revenue now intends to take an approach consistent with the guidance in the Commentary on the Model Convention in cases where remuneration is paid by a non-resident but the cost of that remuneration is borne by an "economic employer" in the UK. Inspectors dealing with claims to exemption from employees who commenced a work assignment in the UK after I July 1995 and with all claims for 1996-97 onwards, will take into account the terms of the Commentary on the OECD Model Convention. They will not accept claims where the cost of an employee's remuneration is borne by a UK company which acts as the "economic employer".[52]

This made sense in the light of the 1992 Commentary, which adopted an effective employment rule and did not offer any alternative.

The 2010 Commentary recognised that some States did not adopt this rule;[53] but HMRC practice has not changed.[54]

There is some support for this in *Kljun v HMRC.*[55] For a number of reasons, the authority of the case is quite weak. HMRC were not represented by Counsel, and the taxpayer was not represented at all. This was a case where the individual did not pay tax in the residence State and the Tribunal seems to have regarded that as significant.[56] More fundamentally, the treaty in point was in non-OECD model form, best seen in comparison with the OECD Model form:

[52] HMRC adopted the view that changes in the Commentary affect existing as well as future treaties; see 107.11.2 (Post-DTA Commentary changes).

[53] See 37.9.4 (2010 Commentary).

[54] See the STBV consultation paper which states that STBV relief does not apply where the individual is "legally employed by a UK resident employer, but economically employed by a separate non-resident entity".
https://www.gov.uk/government/consultations/tax-and-administrative-treatment-of-short-term-business-visitors-from-overseas-branches para 1.5, 3.7.
Similarly PAYE Manual:

> **82000 PAYE operation: international employments: EP appendix 4: criteria for short term business visitors** [Jun 2020]: “the OECD commentary provides examples of situations where the UK Company would not be regarded as the economic employer and treaty exemption may therefore apply”.

[55] [2011] UKFTT 371 (TC). The name is pronounced *Kleón.*

[56] Though that is considered to be wrong; see 107.6 (Double non-taxation).

Art 15(2)(b) Yugoslavia DTA (1981)	Art 15(2)(b) OECD Model
the remuneration is paid by, or on behalf of, a person to whom, or for whose benefit, the relevant dependent personal services are rendered and who is not a resident of the other State;	the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State

The Yugoslavia treaty wording (which is unusual)[57] is wider. But the Tribunal considered that made no difference:

> The Tribunal finds that "person" is capable of wider interpretation than "employer" but the test for paragraph 2(b) is essentially the same insofar as the entity which receives the economic benefit of the Appellant's work requires to be identified and therefore the Commentaries are of assistance.[58]

Lastly, the case concerned years before the 2010 changes to the Model Commentary and (though argued after the 2010 changes) did not refer to them. The reference was to the 1992 form of the Commentary.[59]

Still, it is clear that the Tribunal fully accepted that "employer" in the context of STBV relief meant the economic employer. On the facts it was reasonably clear that the UK end user was the economic employer, and so the claim to STBV relief was refused.

37.9.12 *Basis of HMRC view*

The point could be argued, but it is considered that a Court is likely to approve of HMRC's approach. If UK employment law does not have an effective employment test, as argued above, this entails the conclusion that DTA employer is different from the employer as determined by UK domestic employment law.

One could simply say that treaty-employment has an autonomous meaning,[60] but that is not supported by the 2010 Commentary which

[57] This wording now survives only in what is left of the Yugoslavia treaty, which applies in Serbia.

[58] *Kljun* at [17].

[59] See at [22] citing the text of the 1992 version of the Commentary. The treaty in point was made before the change to the Commentary; but this aspect was not noticed, or if noticed, was not considered worth mentioning.

[60] Dziurdz, "Article 15 of the OECD Model: The 183-day rule and the meaning of "employer" [2013] BTR 95.

states that domestic tax law meanings apply.

I think the best argument in support this view is that the UK tax code offers (at least) two definitions of employer:

- The standard ITEPA definition[61]
- PAYE definition[62]

The PAYE definition effectively includes an economic employer. But given the variety of UK tax definitions, the way is easy to say that the default rule (undefined treaty terms have UK tax meanings) does not have much strength, and the context supports an effective employer approach.

37.9.13 *Practice in Australia*

This is also consistent with the practice in Australia which adopts an effective employment test. The Australian Revenue comment:

> Even though ... an employment contract is not to be implied lightly, the substance over form approach may lead to a conclusion that an entity other than the party specified in the written contract of employment should be regarded as the employer for the purposes of the short-term visit exception where:
>
> [1] the conduct of the parties is not consistent with the terms of the written contract of employment or another contract with a third party... or
>
> [2] under the contractual terms, the true nature of the relationship(s) between the parties are misrepresented or disguised.[63]
>
> 85. The terms and conditions of the contract, whether express or implied, are of considerable importance to the proper characterisation of the relationship.
>
> 86. However, the parties cannot deem the relationship between themselves to be something that it is not. The parties to an agreement cannot alter the true substance of the relationship by simply giving it a different label...

[1] and [2] may fall under what OECD Commentary calls “manipulation”.[64]

The Australian Revenue discuss the issue at some length. I set out here

[61] See 34.3 (Employment/employer/employee).

[62] See 36.3 (Employment/employer/employee); 36.5 (Employee works for non-employer).

[63] Author’s footnote: Points [1] and [2] appear to amount to the same thing.

[64] See 29.9.4 (2010 Commentary).

the main part, though the whole of it is worth study:

88. In *Damevski*, the Federal Court found that a worker remained an employee despite his employer's attempt to end the employment relationship and deal with the employee as a contractor through a labour hire agency. In this case, the interposition of the labour hire agency was not genuine. The true nature of the relationship was that the worker remained an employee of his putative former employer because the labour hire agency did nothing more than pay his wages, while the putative former employer continued to direct the employee

89. In some circumstances, an intermediary firm may perform an agency role to bring about a contractual relationship between the worker and the end user. In this case, the worker will be an employee of the user enterprise, not the intermediary. However, the manner in which the relationship is described is not conclusive of the nature of the legal relationship between the parties. In *Swift Placements*, the Industrial Relations Commission rejected the argument that the relationship between Swift Placements and the worker was one of agency, notwithstanding that the business of Swift Placements was described as an employment agency.

Key indicators of employment relationship

90. While the factors discussed below are key indicators of whether an individual is an employee or independent contractor at common law, they are also relevant in determining who should be regarded as the employer for the purposes of the short term visit exception.

91. No one factor is determinative and not all factors will be relevant in a particular case...

Control

92. An important factor to consider is the degree of control which an enterprise engaging an individual to perform work has over that individual in terms of what, how and where work is to be done...

93. However, the importance of control lies in the right of the employer to exercise it, rather than its actual exercise, even though the actual exercise can still be relevant...

96. ... it is the ultimate or legal control over the individual non-resident which is most relevant, rather than practical control.

97. Ultimate control would, amongst other things, enable the relevant entity to withdraw the worker from an assignment and terminate the contract with the worker.

98. However, specifying in detail how contracted services are to be performed does not of itself necessarily imply an employment relationship.

99. Similarly, in international labour hire arrangements, it will not necessarily be inferred that the user enterprise is the employer for the purposes of the short-term visit exception merely because the user enterprise exercises practical control over the individual by having the work performed at the premises of the

user enterprise and under their direction...

Integration

101. It is relevant to consider the nature of the services rendered by the individual and whether they are an integral part of the business activities carried on by the enterprise to which the services are provided.

102. ... the distinction between an employee and independent contractor is 'rooted fundamentally in the difference between a person who serves his employer in his, the employer's business, and a person who carries on a trade or business of his own.'...

104. Where the facts indicate that individuals are not working on their own account, this points to the relationship being one of employment.

105. Furthermore, Mason J in *Stevens v. Brodribb* described the relevance of the integration test:

> ....For my part I am unable to accept that the organization test could result in an affirmative finding that the contract is one of service when the control test either on its own or with other indicia yields the conclusion that it is a contract for services. Of the two concepts, legal authority to control is the more relevant and the more cogent in determining the nature of the relationship.

106. In relation to international labour hire arrangements, it will not necessarily be inferred that the user enterprise is the employer for the purposes of the short-term visit exception merely because the work is being performed for the benefit of the user enterprise rather than the intermediary...

107. Accordingly, a non-resident individual engaged by an intermediary may be directed to work for the benefit of the user enterprise without the user enterprise becoming the employer for the purposes of the short-term visit exception.

Remuneration

108. The identity of the entity paying remuneration to an employee for their work is a factor to consider in determining the identity of the employer...

110. However ...payment of wages by a third party, or .. an 'intermediary', is not fatal to the existence of a contract of employment between a worker and a putative employer.

111. The identity of the entity that determines the amount of the remuneration will also be relevant...

Terms of engagement

112. ... the actual terms and terminology in the contract will be of considerable importance to the proper characterisation of the relationship between the parties, particularly where the criteria are balanced. ...

113. However, how the arrangement between the parties is labelled in a written contract is not conclusive of the nature of the legal relationship...

114. Terms of engagement also refers to such matters as length of assignment and the relevant role of the worker, rates of pay, workers compensation insurance, deduction of PAYG, superannuation contributions and other employee benefits.

Risk

115. A key consideration of whether there is an employment relationship is who bears the responsibility or risk for the individual's work...

Results

118. The notion of 'payment for result' is a strong (but not conclusive) indication that the contract is one for services, rather than of service. ... Undertaking the production of a given result has been considered to be a mark, if not the mark, of an independent contractor...

119. However, this notion is not necessarily inconsistent with a contract of service. ..

120. To the extent such a contract involves an employment relationship, who determines the results to be achieved is a factor to take into account in determining the identity of the employer.

Provision of tools and equipment and payment of business expenses

121. The provision of assets, equipment and tools and the incurring of expenses and other overheads by an individual have been held to be an indicator that the individual is an independent contractor.

122. However, the provision of necessary tools and equipment is not necessarily inconsistent with an employment relationship. ...

Delegation

124. The power to delegate or subcontract (in the sense of the capacity to engage others to do the work, or parts of the work) is a significant factor to determine whether a worker is an employee or an independent contractor. For example, if a worker is required contractually to perform work personally, then this is an indication that the worker is an employee.

125. In international labour hire arrangements, the power of delegation may be relevant in determining the nature of the relationship between the intermediary and the worker. The contract between the labour hire agency and the worker in most cases would require the worker to perform the relevant work for the client themselves with no ability to delegate the work to others...[65]

The assumption here is that the well established criteria which determine whether a contract is one of employment/self-employment can also be used to identify where there is clearly an employment, and the question is which of two competing parties are the employer. But the questions are

[65] TR 2013/1EC; footnotes omitted.

entirely distinct. If that is right the definition of employer proposed in this passage is not the domestic (in this case, Australian) employment law definition. But that does not matter if the treaty term has an autonomous meaning under which the DTA-employer may be different from the domestic-law employer.

37.9.14 *Hybrid employment/enterprise*

The OECD Commentary continues:

> This approach ensures that relief of double taxation will be provided in the State of residence of the individual even if that State does not, under its own domestic law, consider that there is an employment relationship between the individual and the enterprise to which the services are provided.

This is considering a hybrid employment/enterprise, ie an activity which is categorised as
(1) an employment in the work State
(2) an enterprise (in UK tax terms, a trade) in the residence State.

> Indeed, as long as
> [1] the State of residence acknowledges that the concept of employment in the domestic tax law of the State of source or
> [2] the existence of arrangements that constitute an abuse of the Convention allows that State to tax the employment income of an individual in accordance with the Convention,
> it [the residence State] must grant relief for double taxation pursuant to the obligations incorporated in Articles 23 A and 23 B [foreign tax credit relief] (see paragraphs 32.1 to 32.7 of the Commentary on these Articles).[66]
> The mutual agreement procedure provided by paragraph 1 of Article 25 will be available to address cases where the State of residence does not agree that the other State has correctly applied the approach described above and, therefore, does not consider that the other State has taxed the relevant income in accordance with the Convention.

It is possible that the residence and work States may agree there is an employment but take different views as to who is the employer:

[66] See 111.9 (Tax in accordance with DTA).

Work state				**Residence State**		
Approach	*Employer is*	*STBV relief*	*Source State tax*	*Approach*	*Employer is*	*Residence State tax*
Form over substance	Intermediary	Yes	No	Substance over form	End user	Yes
Substance over form	End user	No	Yes	Form over substance	Intermediary	Yes

In the second case, the income is taxable in both states; but there should not be double taxation, as the residence State should give credit for work State tax.

37.10 DTA 60-day rule

Tax Bulletin 68 provides:

> **Non-Residents Working In The UK For Short Periods: The "60-Day" Rule**
> ... [Tax Bulletin 25 stated] that the Inland Revenue would not consider that a short term business visitor was sufficiently integrated into the business of a UK company for it to be regarded as the employer where:
> [1] the employee concerned is in the UK for less than 60 days in a tax year; and
> [2] that period does not form part of a more substantial period when the taxpayer is present in the UK.
> This has become known as the "60-day rule".

I refer to this as the **"DTA 60-day rule"**.

The point is that if the conditions of the DTA 60-day rule are met, HMRC will accept that the formal (foreign) employer is the employer, and the UK company is not the effective employer, for the purposes of the STBV payment conditions, so the conditions for STBV relief can be met.

> **Does the worker have to be from a country with which we have a full double tax agreement for the 60-day rule to apply?**
> The 60-day rule is framed in terms of accepting without enquiry that the conditions in a DTA for short-term business visitors to be solely taxed in their country of residence have been satisfied. That exemption, and consequently the 60 day rule, is therefore only relevant if the person is resident in a country with which we have signed a comprehensive double tax agreement. If not, domestic legislation will apply in full.

Obviously.

> **Is the 60-day exemption available if the employee is on the UK payroll?**
> No. The FST's statement was made in the context of workers who were

> paid via a non-resident employer's payroll but whose economic employer might be in the UK.

"On the UK payroll" is layman's language. In legal terms, it is here assumed to mean (1) the worker is an employee of the UK company, and (2) the UK company pays the remuneration. On that basis the answer is self-evident.

37.10.1 *How to count 60 days*

The question is whether the employee "is in the UK for less than 60 days in a tax year". Tax Bulletin 68 provides:

> **How do you count the days for the 60-day rule?**
> It is based on physical presence in the UK in the same way as the 183 days are counted for the purposes of Article 15(2) of the OECD model Tax Convention.[67]

The test is days of presence, not just workdays.

37.10.2 *Position if 60 days exceeded*

Tax Bulletin 68 provides:

> **Is the 60 days a fixed limit? For example, an employer has a succession of people who work for him and he bears their wages, but they may be in the UK up to 90 days.**
> The 60-day rule represents a balance between a loss of tax revenue which may be due to the UK and the compliance costs to both employers and the Revenue of ascertaining and collecting such tax for very short-term visitors. There are no plans for it to be altered. However individuals working in the UK may be exempt under the relevant DTA anyway, for example if their earnings are
> [1] paid by an overseas company,
> [2] not recharged in any form to [ie, reimbursed by] a UK company or permanent establishment[68] and
> [3] no UK company acts as their employer.

37.10.3 *60-day rule for PE*

Tax Bulletin 68 provides:

[67] See 37.13 (STBV condition a: 183-day rule).

[68] See 37.8.1 ("Ultimately bourne").

> **Is the 60-day rule available where the earnings have been recharged [ie reimbursed] to a UK permanent establishment rather than a UK-resident company?**
> Although not covered in the actual wording of the 1996 statement, the Revenue accepts the 60-day rule should apply in these circumstances also.

37.10.4 *Part of substantial period*

The requirement is that:

[1] The employee is in the UK for less than 60 days in a tax year; and

[2] That period does not "form part of a more substantial period" when the taxpayer is present in the UK.

Tax Bulletin 68 provides:

> **How should the phrase "part of a more substantial period" be interpreted?**
> The aim is to provide consistency:
>
> - Between very short-term workers, regardless of the particular dates involved; and
> - Between short-term workers seconded from overseas and the normal workforce of the UK employer.
>
> The most obvious example met is where less than 60 days are worked up to 5th April and less than 60 days after, but the overall period is more than 60 days. In these circumstances, the 60-day exemption will not be available, to be consistent with periods of more than 60 days worked over, say, November to January.
>
> **What if there is a gap between two shorter periods of employment?**
> To consider whether the 60-day period has been exceeded, the following factors may be relevant:
>
> - Is there an expectation that the employee will return to the UK when they depart initially?
> - How long is the gap between visits in comparison to the length of those visits?
> - How frequently does the employee return to the UK?
> - How integral to the business are the duties performed?
>
> It is impossible to give an exact formula that will cover all circumstances. However, the following examples should assist in seeing how the Revenue will approach this question.

HMRC give 5 examples. In outline:

Number: Facts	**Part of substantial period**
1a: 35 UK days Feb/Mar; short holiday; + 40 days Apr/May (planned)	Yes
1b: as 1a, but no plan to return in Apr/May	Yes but from April only
2: 35 UK days year 1; 7 month gap; 40 UK days year 2 (unplanned)	No
3: Financial controller works 55-59 UK days p/a (planned)	Yes
4: 50 UK days in year 1; 15 UK days in year 2	Yes but for year 2 only

> **Example 1 (Alain)**
> **A visits the UK for 35 days in Feb/March 2003, then returns to Austria for a fortnight's holiday, and returns again to the same contract for 40 days in April/May.**
> The 75 days would be regarded as one period. The gap here is insignificant compared to the two periods either side and liability to UK tax would be consistent with a person who works for 75 days here continuously. As the periods are part of the same contract, the employer would be expected to operate PAYE from day one.

That is an easy example. Perhaps the point is to introduce the next example:

> [**Example 1(b)**] If there had been no expectation of returning during the first 35 days we would expect PAYE to be operated only for the second period even though liability to UK tax would exist for both for A. This is because the 60 days is an objective test whilst PAYE is based on "reasonable expectation" that payments are liable to UK tax.[69]

> **Example 2 (Beatrice)**
> **B visits the UK for 35 days in Year 1. She returns to Belgium but unexpectedly is asked to return in Year 2, after a 7 month gap, and does so for 40 days.**
> Each episode in the UK would be regarded as separate periods of less than 60 days. B's return was unexpected, and after a relatively long gap. So there is no UK liability for either and no PAYE is due.

That is an easy example.

> **Example 3 (Cedric)**
> **C is the financial controller for a Canadian group. Each year he visits the UK subsidiary for 55-59 days.**
> Once there is an expectation that this will be the work pattern, the Revenue would consider that the episodes of work here were part of a more substantial period. A financial controller will be significantly integrated into the business, whether this is of the UK subsidiary or possibly a permanent establishment of the parent company. PAYE will

[69] See 36.13.3 (Terms of EP App 4 agreement).

> apply from when it is clear that visits will recur as part of a regular and integrated pattern, although C may have to consider whether he is also liable under self assessment to UK tax for an earlier period of work, as for A in Example 1.[70]

That is not self-evident. But for the purposes of the DTA 60-day rule, the requirement that the 60-days does not form "part of a more substantial period" has to be understood in the light of HMRC's explanation.

What if C's work pattern was less that 55-59 days? It is suggested that if it was less than 20 days, so it would need 4 years to reach the 60 day cap, it does not form part of a more substantial period. The same might apply if it was less than 30 days (requiring 3 years to pass the 60 day cap).

> **Example 4 (Danielle)**
> **D spends 50 days working in UK between 10 April and 15 January, with visits averaging 3 days each. Then from 1 June to 6 October a further 15 days are spent visiting UK for business meetings on the same piece of work.**
> [1] Although D is taxable from the very start, we would not expect either her or the company to be able to recognise this.
> [2] However, the Revenue would expect PAYE to be operated in Year 2.

That is far from self-evident. On point [1] is it assumed that the 15 days in year 2 were not expected in year 1?

37.11 Labour-hire: Avoidance motive

The DTR Manual provides:

> **DT1922 Employment** [Nov 2019]
> ... Claims should not be admitted where payment by an overseas company forms part of an arrangement to avoid UK tax. PAYE Technical will advise in cases where, for example,
> [1] the overseas employer is based in a tax haven or
> [2] the employee is nominally employed by a company which exists to provide his services to the UK user of those services.
> Cases where an employment which existed prior to the employee's assignment to the UK continues during that assignment usually do not cause difficulty. Cases where the employee has taken up a new formal

[70] The passage concludes with a rhetorical flourish: "C and the group will then be able to decide the duration and timing of visits to the UK on business grounds rather than for individual tax considerations." But there is no need to pursue that.

> employment with an overseas company at the time of assignment should be reviewed critically.

An avoidance motive prevents relief under the DTA 60-day rule.

OECD Commentary provides:

> 8.1 ... While the [1992] Commentary previously dealt with cases where arrangements were structured for the main purpose of obtaining the benefits of the exception of paragraph 2 of Article 15 [STBV relief],[71] it was found that similar issues could arise in many other cases that did not involve tax-motivated transactions and the Commentary was amended to provide a more comprehensive discussion of these questions.

In cases where the requirements of the 60 day-rule are not met, the question is who is the effective employer, and avoidance as such is not necessary; though in practice where the effective employer is not the formal employer, avoidance is quite likely to be present.

37.12 STBV payment condition (c): PE

Article 15(2)(c) provides:

> 2. ... remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if ...
>
> c) the remuneration is not borne by a permanent establishment which the [non-resident] employer has in the UK [the work State].

There is no practical difference between remuneration *paid by or on behalf of*, in para (b), and remuneration *borne by,* in para (c). The thinking is that a PE (not being a legal person) cannot directly *pay* remuneration, but it can *bear* remuneration.[72]

The issues for payment condition (c) are:

(1) Does that employer have a PE in the work state, and if so

(2) does the PE bear the remuneration

See Dziurdz, "Article 15 of the OECD Model: The 183-Day Rule and the Meaning of Borne by a Permanent Establishment" Bulletin for International Taxation (2013).

[71] See 37.9.3 (1992 Commentary).

[72] See App.2.3.2 (Bear tax by deduction or otherwise).

37.12.1 *PE deduction in work State*

OECD Commentary on art 15(2) provides:

> 7. ... The phrase "borne by" must be interpreted in the light of the underlying purpose of subparagraph c) of the Article, which is to ensure that the exception provided for in [art 15(2), STBV relief] does not apply to remuneration that could give rise to a deduction, having regard to the principles of Article 7 and the nature of the remuneration, in computing the profits of a permanent establishment situated in the State in which the employment is exercised.[73]

It makes sense that a remuneration which qualifies for STBV relief should not be deductible by a PE in the work State. Although that is not stated expressly in the OECD Model, it would follow from the rule that the PE must not bear the remuneration.

> 7.1 The fact that the employer has, or has not, actually claimed a deduction for the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether any deduction otherwise available with respect to that remuneration should be taken into account in determining the profits attributable to the permanent establishment. That test would be met, for instance, even if no amount were actually deducted as a result
> [1] of the permanent establishment being exempt from tax in the source country or
> [2] of the employer simply deciding not to claim a deduction to which he was entitled.
>
> The test would also be met where the remuneration is not deductible merely because of its nature (e.g. where the State takes the view that the issuing of shares pursuant to an employee stock-option does not give rise to a deduction) rather than because it should not be allocated to the permanent establishment.

Para (c) applies where there is a UK PE of a foreign company (the foreign company is the employer).

The DTR Manual provides:

> **DT1923 Employment** [Nov 2019]
> ... [Payment condition (c)] should be considered carefully in all cases where the employee has not apparently been assigned to work in the UK for a UK-resident company. If an employee has simply been seconded

[73] See 37.6.1 (STBV relief: Policy).

by his overseas employer to work here for a UK-resident company it will not usually be necessary to consider this condition. [Instead payment condition (b) is relevant.]
[The Manual makes some comments on what is a PE and continues] If operations in the UK are carried out through a permanent establishment, it should be assumed in the absence of evidence to the contrary that the cost of remuneration of an employee seconded to the permanent establishment is a deduction in computing the profits of the permanent establishment. This will be the normal basis of allocating costs in accordance with international tax principles. The permanent establishment should therefore be regarded as bearing the cost of that individual's remuneration unless there is evidence that the overseas Head Office continues to pay the employee and the cost is not allocated to the UK permanent establishment for UK tax purposes. A permanent establishment cannot be said to 'bear the remuneration' unless it is charged against its profits without a corresponding credit, for example by way of a management charge. In doubtful cases advice may be sought from the Inspector dealing with the accounts of the permanent establishment.
Sometimes dealing with the PAYE District may be the first contact which an overseas company has with the UK Revenue and it may not yet have been established whether or not the company has a permanent establishment in the UK. If the company has had no prior contact with the Revenue the Corporation Tax District which would have responsibility for the company (the District dealing with the area where the business premises of the company are located) should be asked to advise whether or not a permanent establishment exists in the UK (see DT1715 in cases of difficulty).

37.13 STBV condition a: 183-day rule

Article 15(2)(a) provides:

> 2. ... remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:
> a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, ...

37.13.1 *The 12 month period*

OECD Commentary on art 15(2) provides:

> 4. ... The first condition is that the exemption is limited to the 183 day

period. It is further stipulated that this time period may not be exceeded "in any twelve month period commencing or ending in the fiscal year concerned". This contrasts with the 1963 Draft Convention and the 1977 Model Convention which provided that the 183 day period should not be exceeded "in the fiscal year concerned", a formulation that created difficulties where the fiscal years of the Contracting States did not coincide and which opened up opportunities in the sense that operations were sometimes organised in such a way that, for example, workers stayed in the State concerned for the last 5 ½ months of one year and the first 5½ months of the following year. The present wording of subparagraph 2 a) does away with such opportunities for tax avoidance. In applying that wording, all possible periods of twelve consecutive months must be considered, even periods which overlap others to a certain extent. For instance, if an employee

[1] is present in a State during 150 days between 1 April 01 and 31 March 02 but

[2] is present there during 210 days between 1 August 01 and 31 July 02,

the employee will have been present for a period exceeding 183 days during the second 12 month period identified above even though he did not meet the minimum presence test during the first period considered and that first period partly overlaps the second.

4.1 The reference to the "fiscal year concerned" must be interpreted as a reference to a fiscal year of the Contracting State in which a resident of the other Contracting State has exercised his employment and during which the relevant employment services have been rendered. Assume, for example,

[1] that the fiscal year of State S runs from 1 January to 31 December and

[2] that a resident of State R is present and performs employment services in State S between 1 August 00 and 28 February 01.

For the purposes of subparagraph 2 *a*), any twelve month period that begins between 1 January and 31 December 00 or ends between 1 January and 31 December 01 and that includes any part of the period of employment services would be relevant. For instance, the twelve month period of 1 August 00 to 31 July 01, which begins in the fiscal year 00 and during which the person was present in State S for more than 183 days, would include the employment services rendered in that State between 1 August and 31 December 00; similarly, the twelve month period of 1 March 00 to 28 February 01, which ends in the fiscal year 01 and during which the person was present in State S for more than 183 days, would include the employment services rendered in that State between 1 January and 28 February 01. The taxation of the remuneration

> for the relevant services need not take place in the fiscal year concerned: as explained in paragraphs 2.2 above and 12.1 below, the Article allows a State to tax the remuneration derived from employment exercised in that State in a particular year even if the remuneration for these employment services is acquired, or the tax is levied, in a different year.

37.13.2 *Present in the State*

> 5. Although various formulas have been used by Member countries to calculate the 183 day period, there is only one way which is consistent with the wording of this paragraph: the "days of physical presence" method. The application of this method is straightforward as the individual is either present in a country or he is not. The presence could also relatively easily be documented by the taxpayer when evidence is required by the tax authorities. Under this method the following days are included in the calculation: part of a day, day of arrival, day of departure and all other days spent inside the State of activity such as Saturdays and Sundays, national holidays, holidays before, during and after the activity, short breaks (training, strikes, lock-out, delays in supplies), days of sickness (unless they prevent the individual from leaving and he would have otherwise qualified for the exemption) and death or sickness in the family. However, days spent in the State of activity in transit in the course of a trip between two points outside the State of activity should be excluded from the computation. It follows from these principles that any entire day spent outside the State of activity, whether for holidays, business trips, or any other reason, should not be taken into account. A day during any part of which, however brief, the taxpayer is present in a State counts as a day of presence in that State for purposes of computing the 183 day period.

This is similar to SRT rules.

> 5.1 Days during which the taxpayer is a resident of the source State should not, however, be taken into account in the calculation. Subparagraph a) has to be read in the context of the first part of paragraph 2, which refers to "remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State", which does not apply to a person who resides and works in the same State. The words "the recipient is present", found in subparagraph a), refer to the recipient of such remuneration and, during a period of residence in the source State, a person cannot be said to be the recipient of remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State. The following examples illustrate this conclusion:

> *Example 1:*
>
> From January 01 to December 01, X lives in, and is a resident of, State S.
>
> On 1 January 02, X is hired by an employer who is a resident of State R and moves to State R where he becomes a resident.
>
> X is subsequently sent to State S by his employer from 15 to 31 March 02.
>
> In that case, X is present in State S for 292 days between 1 April 01 and 31 March 02 but since he is a resident of State S between 1 April 01 and 31 December 01, this first period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).
>
> *Example 2:*
>
> From 15 to 31 October 01, Y, a resident of State R, is present in State S to prepare the expansion in that country of the business of ACO, also a resident of State R.
>
> On 1 May 02, Y moves to State S where she becomes a resident and works as the manager of a newly created subsidiary of ACO resident of State S.
>
> In that case, Y is present in State S for 184 days between 15 October 01 and 14 October 02 but since she is a resident of State S between 1 May and 14 October 02, this last period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

The DTR Manual provides:

> **1921 Short term visitor exemption 183 day rule** [Nov 2019]
>
> ...From 6th April 2009 onwards, when counting to 183 days under Article 15(2)(a), any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and he would otherwise have qualified for the exemption) and death and sickness in the family should be included in the calculation as a day the person is present in the country of activity.
>
> Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded from the computation.
>
> From 2008/09 onwards (this overlaps for a year with the previous day counting method), days during which the tax payer is a resident of the UK should not be included in the calculation. The conditions in the treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State.

> For example if a person is a resident of the UK but is hired by an employer in another State, moves to that State where he becomes resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.
>
> Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

37.13.3 *183-day rule: Older version*

The DTR Manual provides:

> **1921 Short term visitor exemption 183 day rule** [Nov 2019]
>
> The first condition for exemption under Article 15(2) is that the employee must not be present in the UK for more than 183 days either
>
> [1] 'in the tax year concerned' (as in Article 15(2)(a) of the 1980 UK/USA agreement) or
>
> [2] 'in any period of 12 months' (found in Article 15(2)(a) of the 1985 UK/Norway agreement).

I refer to wording type [1] as modern wording and wording type [2] as the old wording.

The 2001 USA/UK DTA now uses the modern wording However the Manual is still relevant to DTAs which use the old wording.

> It is important to distinguish between these formulae. The latter formula is a much tighter test than that used in the agreement with the USA.
>
> For example, a US resident seconded to work in the UK for a two year assignment arrives here on 15 October 1990 and leaves the UK on 1 October 1992. Depending on all the circumstances, he could be taxable in the UK only for the year 1991-92. For the years 1990-91 and 1992-93 he could meet the condition in Article 15(2)(a) because in both periods he was not present in the UK for 183 days 'in the tax year concerned'.
>
> By contrast, a Norwegian resident working in the UK would be taxable here throughout the period 15 October 1990 to 1 October 1992 under the test in the agreement with Norway.
>
> Our agreements with Azerbaijan, Belgium, Bolivia, Denmark, Estonia, France, Ghana, Guyana, Iceland, Indonesia, Ivory Coast, Kazakhstan, Korea, Latvia, Malta, Mexico, Mongolia, Pakistan, Papua New Guinea, Sweden, Uganda, Ukraine, Uzbekistan, Venezuela and Vietnam also use

the wording of the Norwegian agreement; and the agreement with New Zealand is similar. Most of the UK's agreements, however, use the tax/fiscal year formula.

37.13.4 *Presence due to Covid*

OECD Covid guidance[74] provides:

> ***Stranded worker: exceeding days of presence threshold due to travel restrictions***
> 53. The COVID-19 pandemic has caused individuals who are resident in one jurisdiction and exercised an employment in another jurisdiction to become stranded in that other jurisdiction. Where an individual resident in one jurisdiction and exercising employment activities in another jurisdiction:
> a) is prevented from leaving that other jurisdiction by COVID-19 restrictions, and
> b)would otherwise have left that other jurisdiction and qualified for the exemption from source taxation in Article 15(2), some jurisdictions believe it is appropriate, given the exceptional circumstances, to disregard days to which these conditions apply when asserting a taxing right under the 183-day test ...
> 54. Where a person is resident in one jurisdiction and is exercising an employment in the other jurisdiction (the source jurisdiction), the source jurisdiction may tax the remuneration from the employment in certain circumstances –one of which is where the employee is present in the source jurisdiction for more than 183 days. Paragraph 5 of the Commentary on Article 15 explains that all days of presence count (working days or not) –and provides several examples, one of which is "days of sickness". But it contains an exception: if those days of sickness "prevent the individual from leaving and he would have otherwise qualified for the exemption", they do not count towards the days of presence test in Article 15(2)(a).
> 55. Given the nature of the COVID-19 public health measures of many governments, the exception can be understood to apply where conditions (a) and (b) above are satisfied. This may cover situations where an employee is prevented from travelling because they are in quarantine due to exposure to the COVID-19 virus. In addition, it may cover situations where either government has banned travelling and

[74] *https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic*
See 105.27.1 (OECD Covid guidance).

cases where it is, in practice, impossible to travel due, for example, to cancellation of flights. This may not cover the situation where an individual does not travel based on a mere recommendation by the governments involved to avoid unnecessary travel. Any decision to disregard days spent in a source jurisdiction as a result of COVID-19 restrictions may result in the source jurisdiction not exercising taxing rights allocated to it under the terms of a double tax treaty which it would be entitled to do.

56. In conclusion where an employee is prevented from travelling because of COVID-19 public health measures of one of the governments involved and remains in a jurisdiction, it would be reasonable for a jurisdiction to disregard the additional days spent in that jurisdiction under such circumstances for the purposes of the 183 day test in Article 15(2)(a) of the OECD Model. Some jurisdictions may however take a different approach or may have issued specific guidance outlining their approach to such ...

Special provisions in some bilateral treaties that deal with the situation of cross-border workers

57. A change of place where cross-border workers exercise their employment may also affect the application of the special provisions in some bilateral treaties that deal with the situation of cross-border workers. These provisions apply special treatment to the employment income (and in some cases replacement income such as short-time work compensation) of cross-border workers and may often contain limits on the number of days that a worker may work outside the jurisdiction they regularly works before triggering a change in their status.

58. Some jurisdictions have agreed special treaty provisions with neighbouring jurisdictions to which employees frequently commute for work. These provisions allocate the taxing rights in a different way to Article 15 of the Model Convention. For example, under some of those provisions employees commuting to a neighbouring jurisdiction are taxable on their employment income only in the home jurisdiction provided any employment activity carried on elsewhere is limited to a maximum stated period (typically ranging from 4 to 6 working weeks). Some of those treaties include provisions according to which teleworking days are considered working days within the work jurisdiction. Some jurisdictions have agreed to treat the COVID-19 pandemic as force majeure or an exceptional circumstance and, accordingly, the time spent by the employee teleworking in their home jurisdiction will not be included in the calculation of the maximum work days outside the work jurisdiction limitation for the purposes of the treaty.

HMRC say:

> the sickness is required to be that of the employee, rather than a relative or the pandemic in general.[75]

HMRC say:

> periods where an individual is forced to self-isolate will also count as days of 'sickness' for the purpose of counting 183 days. As with all exemptions/relaxations, individuals should ensure they have evidence to support any position they take.[76]

37.14 Employer foreign PE of UK co

HMRC say:

> Whereas an overseas subsidiary of a UK Company is a separate legal entity and is regarded as a 'person' within the meaning of a Double Taxation Convention, that is not the case for an overseas Branch of the UK Company. The Branch is not a separate legal entity and is not resident in the other country. It is merely part of a UK resident Company that carries out the business of the UK Company in that country.

In short, an overseas PE of a UK company is excluded from STBV relief. It is hard to see any good reason for that rule, but the position is clear.[77]

The 2018 STBV consultation paper suggested extending the relief to cover this, but the proposal was abandoned. The STBV response paper provides:

> 2.31.The government recognises that the contrasting tax treatment of STBVs from branches and subsidiaries creates different administrative obligations for some employers. However, this position is determined by the UK's double taxation treaties, which follow the OECD Model Tax Convention replicated across the globe.
> 2.32.A unilateral tax exemption on the employment income of STBVs would remove the underlying difference in tax treatment, particularly if this applied to STBVs from both branches and subsidiaries in the same

[75] Joint Expatriate Forum on Tax and NICs (Sep 2020) *https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions*

[76] Joint Expatriate Forum on Tax and NICs (Dec 2020) *https://www.gov.uk/government/groups/joint-forum-on-expatriate-tax-and-national-insurance-contributions*

[77] See 106.1 (PE: Introduction).

> way.
>
> 2.33.It would also remove the obligation for UK companies to operate PAYE on the remuneration of STBVs from foreign branches. This would reduce administrative burdens and costs, and would prevent UK companies from restricting business travel to the UK. It would particularly benefit key business sectors, including financial services and asset management.
>
> 2.34.However, the UK generally has the primary taxing right under DTAs where the STBV comes from a foreign branch. A tax exemption would mean that the UK would be unilaterally giving away its taxing right and its tax revenue to foreign jurisdictions without reciprocation.
>
> 2.35.Whilst the tax exemption might make the UK a more attractive place to do business, there is little evidence to suggest that it would influence the decision of multinational businesses to headquarter in the UK.
>
> 2.36.The government must consider its wider commitments to reducing the deficit. Such a tax exemption would only benefit a relatively small number of UK businesses, but would cost many millions of pounds each year. The government thinks this does not represent good value for money. The government will continue to consider the points raised by respondents to the consultation and will keep the area under review.[78]

37.15 Employer a partnership

OECD Commentary on art 15(2) provides:

> 6.1 The application of the second condition in the case of fiscally transparent partnerships presents difficulties since such partnerships cannot qualify as a resident of a Contracting State under Article 4 ...[79] While it is clear that such a partnership could qualify as an "employer" ... the application of the condition at the level of the partnership regardless of the situation of the partners would therefore render the condition totally meaningless.
>
> 6.2 ... In order to achieve a meaningful interpretation of subparagraph b) that would accord with its context and its object,[80] it should therefore be considered that, in the case of fiscally transparent entities or arrangements such as partnerships, that subparagraph applies at the level

[78] For the consultation and response papers, see *https://www.gov.uk/government/consultations/tax-and-administrative-treatment-of-short-term-business-visitors-from-overseas-branches*

[79] See 9.22.2 (Partnership "liable to tax").

[80] See 37.6.1 (STBV relief: Policy).

> of the partners or members. Thus, the concepts of "employer" and "resident", as found in subparagraph b), are applied at the level of the partners or members rather than at the level of a fiscally transparent entity or arrangement. This approach is consistent with the approach under paragraph 2 of Article 1[81] under which the benefit of other provisions of tax conventions must be granted with respect to income that is taxed at the partners' or members' level rather than at the level of an entity or arrangement that is treated as fiscally transparent.

This raises less difficulty for English partnerships, because as a matter of English employment law, employees are employees of the partners and not of the partnership as such.

The OECD Commentary continues:

> While this interpretation could create difficulties where the partners or members reside in different States, such difficulties could be addressed through the mutual agreement procedure by determining, for example, the State in which the partners who own the majority of the interests in the entity or arrangement reside (i.e. the State in which the greatest part of the deduction will be claimed).

OTS say:

> There is a technical argument that treaty relief under Article 15 (income from employment) is not available to employees of a partnership as they could be argued not to have a non-resident employer[82]. This could mean it may be argued that a short-term secondee from another country does not qualify for treaty protection even if their remuneration is borne by the non-UK branch of the same company.[83] We understand that in practice, HMRC do sometimes accept treaty relief is available.
> ... In practice, HMRC has treated the employer as a non-UK one if the individual is under the control and instruction of non-UK resident partners.... HMRC also told us that there is no general policy of denying this exemption to employees of partnerships. Eligibility will depend on whether the employing partnership is resident outside the UK based on the residence status of the partners.[84]

[81] See 103.3.2 (OECD hybrid-entity rules).

[82] Author's footnote: More analytically, the argument is that the employer is not a "resident of the foreign state", within the meaning of the treaty.

[83] Author's footnote: This sentence is muddled, but the passage makes sense if one ignores it.

37.16 Deemed employment/non-employment

37.16.1 *Deemed non-employment*

In *Fowler v HMRC*[85] the taxpayer was an employed diver, whose employment was exercised in the UK, and so his remuneration was in principle taxable in the UK. There is a special rule for North Sea divers: for IT purposes their employment is treated as a trade. But the deemed trade fiction did not apply for treaty purposes. I discuss this point in 107.22.1 (Deemed classification).

Section 6(5) ITEPA provides:

> Employment income is not charged to tax under this Part if it is within the charge to tax under—[86]

Section		**Topic (in outline)**
ITTOIA	*CTA 2009*	
s.15	-	Divers and diving supervisors
s.16A	-	Voluntary office with public body: compensation for incidental trading loss
s.16B	40A	Company directorship incidental to professional partnership
s.16C	40B	Office/employment incidental to professional partnership

Would the principle in *Fowler* apply to the other cases, ie those to which s.16A-16C applies? That is, would income within those cases be classified as employment income or trading income for DT purposes? The difference is that in the s.16A-16C cases, unlike *Fowler*, the individual is carrying on an actual trade/profession. The income concerned has a dual character. Sections 16A-16C merely reverse the usual priority rule that ITEPA prevails over trading income.[87] On that basis it is suggested that income within s.16A-16C should be categorised as business income for DT purposes and falls within the scope of OECD Model art 7.

The amounts involved are not likely to be substantial.

37.16.2 *Deemed employment*

What about disguised employment? Section 863A ITTOIA provides:

668/ots_partnerships_report_final.pdf

[85] [2020] UKSC 22.

[86] For clarity I have set this out in tabular form and with my own wording, rather than that in the statute.

[87] See 11A.3.9 (Trade/employment (ITEPA) income).

> (1) Subsection (2) applies at any time when conditions A to C in sections 863B to 863D are met in the case of an individual ("M") who is a member of a limited liability partnership in relation to which section 863(1) applies [ie the LLP is treated as a partnership for tax purposes].
> (2) For the purposes of the Income Tax Acts—
> (a) M is to be treated as being employed by the limited liability partnership under a contract of service instead of being a member of the partnership, and
> (b) accordingly, M's rights and duties as a member of the limited liability partnership are to be treated as rights and duties under that contract of service.

Is the income of M employment income or business income for DT purposes?

37.17 Share options

37.17.1 *Grant of share option*

Share options granted by reason of employment are in principle earnings and subject to income tax on the grant of the option.[88] For UK resident employees, s.475 ITEPA overrides that charge. That does not however apply to non-resident employees, and it is not uncommon to find non-resident employees who have taxable duties in the UK. In this case, the grant of an option falls outside of chapter 5 of part 7 ITEPA 2003 and therefore in principle subject to income tax on the grant of the option. DT relief is however likely to be available if the employee is resident in a jurisdiction with a DT relief in OECD Model form. In particular, the requirement of article 15(2)(c) is met: the remuneration is will not be borne by a permanent establishment which the employer has in the UK. For the remuneration is not borne by the company over whose shares the share option is issued. If anyone, it is the shareholders in that company who bear the burden of the remuneration.

37.17.2 *Exercise of share option*

Some gains on shares or share options are taxed as employment income. The profit (to use a neutral term) falls within the employment income article as earnings, and within the CG article as gains,[89] but some commentators take the view that the earnings article has priority and

[88] *Abbott v Philbin* 39 TC 82.

[89] See 56.23.2 (Gain subject to income tax).

excludes the CG article.[90]

The USA/UK DTA (more or less) follows OECD form. The Exchange of Notes for this treaty provides:

> With reference to Article 14 (Income from employment)—
> it is understood that any benefits, income or gains enjoyed by employees under share/stock option plans are regarded as "other similar remuneration" for the purposes of Article 14.
> It is further understood that where an employee—
>
> (a) has been granted a share/stock option in the course of an employment in one of the Contracting States;
> (b) has exercised that employment in both States during the period between grant and exercise of the option;
> (c) remains in that employment at the date of the exercise; and
> (d) under the domestic law of the Contracting States, would be taxable by both Contracting States in respect of the option gain,
>
> then, in order to avoid double taxation, a Contracting State of which, at the time of the exercise of the option, the employee is not a resident will tax only that proportion of the option gain which relates to the period or periods between the grant and the exercise of the option during which the individual has exercised the employment in that Contracting State.
> With the aim of ensuring that no unrelieved double taxation arises the competent authorities of the Contracting States will endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of Article 14 and Article 24 (Relief from double taxation) in relation to employee share/stock option plans.

37.18 DT claims & procedure

The DTR Manual provides:

> **DT1920: Employment** [May 2020]
> ... claims to exemption from UK tax in respect of employment income are made as part of the taxpayer's self assessment on the claim form attached, depending on the circumstances, to either Help Sheet IR302 (Dual-Residents) or Help Sheet IR304 (Non-Residents - Relief under Double Taxation Agreements). Both forms require the taxpayer to establish the fact of his residence in the other country for the purpose of the agreement (see INTM154000) and to declare that the relevant provisions of the particular agreement are considered to have been fulfilled. All claims under Article 15(2) should be checked carefully by

[90] See 107.9.4 (Other DTA category overlaps).

> reference to terms of the agreement and, where appropriate, to the guidance at DT1921 - DT1923, and enquiries raised in suitable cases.

The DTR Manual makes a few administrative comments:

> **DT1924 Employment** [May 2020]
> Refer to Employment Income Technical all claims to the exemption of employment income from UK tax (DT1920 onwards) where
>
> - the tax at stake in that case exceeds £50,000, or
> - the company claimed to be the employer is apparently based in a tax haven, or
> - difficulty is experienced in applying the guidance at DT1920 onwards in a particular case...

See 107.20 (Claim for DT relief).

37.19 DT relief: Directors

Article 16 OECD Model provides:

> Directors' fees and other similar payments derived [91] by a resident of a Contracting State in his capacity as a member of the board of directors of a company[92] which is a resident of the other Contracting State may be taxed in that other State.

OECD Commentary on art 16 provides:

> 1. This Article relates to remuneration received by a resident of a Contracting State, whether an individual or a legal person, in the capacity of a member of a board of directors of a company which is a resident of the other Contracting State.

The main significance of the provision is that STBV relief is not available for directors.

37.19.1 *Fees and similar payments*

OECD Commentary on art 16 provides:

> 1.1 Member countries have generally understood the term "fees and other similar payments" to include benefits in kind received by a person in that person's capacity as a member of the board of directors of a company (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

[91] See 15.11.1 ("Deriving" income").

[92] See 30.15.4 (Company: DTA definition).

See 37.3 (Salary/wages/remuneration).

> 2. A member of the board of directors of a company often also has other functions with the company, e.g. as ordinary employee, adviser, consultant, etc. It is clear that the Article does not apply to remuneration paid to such a person on account of such other functions.

While it is clear that a director may be an employee,[93] disentangling the duties and remuneration for the two roles is another matter. Documentation will be important, though not necessarily decisive, in determining whether a payment is made in the capacity as a director.

37.19.2 *Directors share options*

OECD Commentary on art 16 provides:

> 3.1 Many of the issues discussed under paragraphs 12 to 12.15 of the Commentary on Article 15 in relation to stock-options granted to employees will also arise in the case of stock-options granted to members of the board of directors of companies. To the extent that stock-options are granted to a resident of a Contracting State in that person's capacity as a member of the board of directors of a company which is a resident of the other State, that other State will have the right to tax the part of the stock-option benefit that constitutes director's fees or a similar payment (see paragraph 1.1 above) even if the tax is levied at a later time when the person is no longer a member of that board. While the Article applies to the benefit derived from a stock-option granted to a member of the board of directors regardless of when that benefit is taxed, there is a need to distinguish that benefit from the capital gain that may be derived from the alienation of shares acquired upon the exercise of the option. This Article, and not Article 13, will apply to any benefit derived from the option itself until it has been exercised, sold or otherwise alienated (*e.g.* upon cancellation or acquisition by the company or issuer). Once the option is exercised or alienated, however, the benefit taxable under this Article has been realised and any subsequent gain on the acquired shares (*i.e.* the value of the shares that accrues after exercise) will be derived by the member of the board of directors in his capacity of investor-shareholder and will be covered by Article 13. Indeed, it is at the time of exercise that the option, which is what the director obtained in his capacity as such, disappears and the recipient obtains the status of shareholder (and usually invests money in order to do so).

[93] *Lee v Lee's Air Farming Ltd* [1961] AC 12.

37.19.3 *Directors DT relief: Critique*

Why distinguish directors (Model art 16) from employees (art 15)? OECD Commentary provides:

> Since it might sometimes be difficult to ascertain where the services are performed, the provision treats the services as performed in the State of residence of the company.

It is no more difficult to ascertain where directors services are exercised than where employees services are exercised; and UK domestic law treats directors and employees in (more or less) the same way. But there it is. Instead we have to ascertain the meaning of director, and whether earnings are received in the capacity of director. Both questions are "sometimes be difficult to ascertain".

Perhaps the reasoning was that directors services (unlike non-director employees) are likely to be in the same State as the company. That was more likely to be the case formerly than now. There is something to be said for removing art 16, and treating directors/employees in the same way; but established treaty rules are difficult to change, and the change is not worth the trouble involved.

37.20 DT relief: Government service

Article 19 OECD Model provides:

> 1. a) Salaries, wages and other similar remuneration paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
>   b) However, such salaries, wages and other similar remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident of that State who:
>   (i) is a national of that State; or
>   (ii) did not become a resident of that State solely for the purpose of rendering the services.
>
> 2. [This deals with pensions; see 38.8.7 (Government pension)]
>
> 3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

OECD Commentary on art 19(1) provides:

> 2.2 Member countries have generally understood the term “salaries, wages and other similar remuneration ... paid” to include benefits in kind received in respect of services rendered to a State or political subdivision or local authority thereof (e.g. the use of a residence or automobile, health or life insurance coverage and club memberships).

Of course remuneration includes benefits in kind; the point is that such benefits may be said to be “paid”, ie “paid” is not construed narrowly; see 15.11.2 (“Paid” and “payment”).

CONTENTS AT A GLANCE

The chapters are organised thematically as follows:

Volume 1

Introduction and What's New

Obtaining further advice and disclaimer

A1 FIG Relief//Abolition of Domicile Rule

Non-dom policy & avoidance

1. Foreign Domicile: Tax Policy
2. Tax Avoidance
3. Targeted Anti-avoidance Rules (TAARs)

Domicile & residence

4. Domicile
5. Deemed Domicile
6. Residence of Individuals
7. Residence of Trustees

Volume 2

8. Residence of Companies
9. Treaty-Residence
10. Split Years
11. Temporary Non-residence
12. Exit Taxes
13. UK Arrival or Departure: Tax Checklist

Income tax: Principles & remittance basis

14. Income Categorisation
15. Income Recognition: Received /Entitled/Arise/Paid
16. Source/RFI/Territorial Principles
17. The Remittance Basis
18. The Meaning of Remittance
19. Remittance Reliefs
20. Mixed Funds

Income by category

21. Trading Income

Volume 3

22. Trading in Land

CHAPTER THIRTY EIGHT

PENSION AND ANNUITY INCOME

38.1 Pensions & annuities: Introduction
38.2 Pension income of split year
38.3 Types of pension scheme
38.3.1 "Occupational pension scheme"
38.3.2 "Registered pension scheme"
38.4 s.569 UK pension
38.4.1 "Pension"
38.5 Foreign pension
38.5.1 "Pension"
38.5.2 Remittance basis
38.6 Employment-related pension
38.6.1 Annuity for dependants
38.6.2 Non-registered occupational pension scheme annuity
38.6.3 Annuity for another's services
38.6.4 UK source annuities
38.6.5 Foreign source annuities
38.6.6 Remittance basis
38.7 Commonwealth pension
38.7.1 Commonwealth condition A
38.7.2 Commonwealth condition B
38.7.3 Commonwealth condition C
38.7.4 Commonwealth pension: Charge
38.8 DT relief: Pension income
38.8.1 Reason for residence taxation
38.8.2 Pension/similar remuneration
38.8.3 One-off payment
38.8.4 Pension or employment income?
38.8.5 Social security income
38.8.6 Consideration: Past employment
38.8.7 Government pension
38.9 Australia/UK DTA
38.10 USA/UK DTA: Pension income
38.10.1 "Pension scheme"
38.10.2 DTA relief for pension
38.10.3 Exemption recognition
38.10.4 Savings clause and art 17(1)
38.10.5 Lump sum payment
38.10.6 US Savings Clause
38.11 Income of pension fund
38.11.1 US Savings Clause
38.12 Transfer between schemes
38.13 Relief for pension contribution
38.13.1 Contribution by employer
38.13.2 US Savings Clause
38.13.3 Pre-existing scheme
38.13.4 Corresponding scheme
38.13.5 Contribution relief: Remittance basis
38.14 Cross border contribution relief
38.14.1 Cap by US tax rules
38.14.2 US Savings Clause
38.15 Canadian RRSP and RRIF
38.16 Annuity income: Introduction
38.17 Annuity terminology
38.17.1 "Annuity"
38.17.2 "Purchased life annuity"
38.17.3 "Annuity certain"
38.18 Purchased life annuity: Charge

38.1 Pensions & annuities: Introduction

This chapter considers:

(1) Pension income

(2) Annuity income

(3) Alimony (maintenance)

Pension taxation has a technical language of its own, and needs a book to itself. I would focus on matters closest to the themes of this work, but the subject can only be understood in the context of the provisions as a whole.

The legislation is in part 9 ITEPA. This follows the format of the charge on employment income in Part 2.[1] One might expect Part 9 to begin with a provision saying that income tax is charged on pension income. In fact this is implied rather than expressed. Section 566(1) ITEPA provides:

> **Nature of charge to tax on pension income and relevant definitions**
> (1) The charge to tax on pension income under this Part is a charge to tax on that income excluding any exempt income.

38.2 Pension income of split year

Section 575(1A) ITEPA provides:

> [a] If the person liable for the tax under this Part [Part 9 ITEPA] is an individual and the tax year is a split year as respects that individual, the taxable pension income for the tax year is the full amount of the pension income arising in the UK part of the year,
> [b] subject to
>   [i] subsection (3) [remittance basis] and
>   [ii] section 576A [temporary non-residents].

This applies to all types of pension income.

38.3 Types of pension scheme

38.3.1 *"Occupational pension scheme"*

Section 150(5) FA 2004 provides:

> In this Part "occupational pension scheme" means a pension scheme established by an employer or employers and having or capable of having effect so as to provide benefits to or in respect of any or all of the employees of—
> (a) that employer or those employers, or
> (b) any other employer, whether or not it also has or is capable of having effect so as to provide benefits to or in respect of other persons).

[1] See 34.6 (Charge on employment income) and following.

38.3.2 *"Registered pension scheme"*

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts...

So we turn to s.150(2) FA 2004:

> A pension scheme is a registered pension scheme for the purposes of this Part at any time if it is at that time registered under Chapter 2.

38.4 s.569 UK pension

Section 569 ITEPA provides:

> (1) This section applies to any pension paid by or on behalf of a person who is in the UK.
> (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as "**a s.569 UK pension**". Registered pension schemes fall within chapter 5A, rather than under this residual category.

The EI Manual provides:

> **EIM74003 UK pensions** [Nov 2019]
> ...Section 569 ITEPA 2003 charges pensions paid by or on behalf of a person in the UK. This includes pensions payable by the Crown. Section 569 does not apply to pensions charged under any other provision of Part 9 ITEPA 2003. For example, section 579A ITEPA 2003 charges pensions under registered pension schemes.
> Annuities paid by the Crown generally have the character of pensions and will therefore be chargeable to tax under section 569. See example EIM74004, which describes two payments charged by section 569.
> **Payments to residents of another country**
> The charge includes payments to people who live abroad as well as payments within the UK. Examine carefully claims for double taxation exemption or relief. These payments may be in respect of Government service and the UK usually retains primary taxing rights. ...
> **EIM74005 Pensions paid by or on behalf of a person who is in the UK** [Nov 2019]
> ...The legislation does not consider the residence status of the pensioner. If a pensioner is resident in another state it is necessary to consider the terms of the relevant double taxation treaty...

> **EIM74004 - Examples of United Kingdom pensions paid by the Crown** [Nov 2019]
> The following types of income payable by the Crown fall within the definition of pension and are therefore chargeable as UK pensions under Section 569 ITEPA 2003:
>
> - pensions paid to certain seamen under the Greenwich Hospital Act 1865
> - life annuities paid to certain farmers who have given up uncommercial holdings of land under the Agriculture Act 1967.

38.4.1 *"Pension"*

Section 570 ITEPA provides a short, inclusive, definition of "pension" for the purposes of s.569 UK pensions:

> In this Chapter "pension" includes a pension which is paid voluntarily or is capable of being discontinued.

The definition (perhaps for historical reasons) is different from the definition which applies for s.573 foreign pensions.

The EI Manual provides:

> **EIM74002 The meaning of pension and annuity** [Nov 2019]
> A pension is a periodical payment made by or on behalf of an employer, usually in recognition of past services. It may be paid either to the person who provided those services or to his or her spouse or any dependant.
> A recipient of a pension will usually be entitled to it under his or her contract of employment or under the rules of a pension scheme...
> **EIM74005 Pensions paid by or on behalf of a person who is in the UK** [Nov 2019]
> **... Voluntary pensions**
> The cases of *Benyon v Thorpe* (14 TC 1) and *Stedeford v Beloe* (16 TC 505) established the principle that pensions paid voluntarily by a former employer were not chargeable as income because they had the character of gifts. Section 570 ITEPA 2003 ensures that section 569 will apply to any pension, which is voluntary or capable of being discontinued. Isolated gifts to former employees are unlikely to be pension income but could possibly be chargeable as employment income either as general earnings or because they are in connection with the termination of the employment ...

Section 571 ITEPA provides:

> If section 569 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

Thus (as one would expect) a UK pension is taxed on an arising basis.

38.5 Foreign pension

Chapter 4 deals with foreign pensions. Section 573(1) ITEPA provides:

> This section applies to any pension paid by or on behalf of a person who is outside the UK to a person who is resident in the UK.

I refer to this as **"a s.573 foreign pension"**.

Section 573(2) ITEPA provides:

> But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

Chapter 10, in particular, has priority over this chapter. So in practice I expect that not many pensions fall within the s.573 category.

I do not discuss s.840 ITTOIA (relief for backdated pensions charged on arising basis).

38.5.1 *"Pension"*

Section 574 ITEPA sets out an inclusive definition of "Pension" for the taxation of s.573 foreign pensions. The definition (perhaps for historical reasons) is different from the definition which applies for UK pensions. Section 574(1) ITEPA sets out five types of foreign pension which are included in the term:

> For the purposes of this Chapter "pension" includes—
> (a) an annuity under, or purchased with sums or assets held for the purposes of, or representing acquired rights under, a relevant non-UK scheme or an overseas pension scheme,

The next three categories concern income withdrawals:

> (b) an amount paid under a relevant non-UK scheme or an overseas pension scheme which, if the scheme were a registered pension scheme, would be income withdrawal (within the meaning of paragraph 7 of Schedule 28 to FA 2004),
> (ba) an amount paid under a relevant non-UK scheme or an overseas pension scheme which, if the scheme were a registered pension scheme, would be dependants' income withdrawal or nominees'

> income withdrawal (within the meaning of paragraphs 21 and 27D of Schedule 28 to FA 2004),
>
> (bb) an amount paid under a relevant non-UK scheme or an overseas pension scheme which, if the scheme were a registered pension scheme, would be successors' income withdrawal (within the meaning of paragraph 27J of Schedule 28 to FA 2004), and
>
> (c) if conditions A and B are met, a pension which is paid voluntarily or is capable of being discontinued.

I refer to voluntary pension conditions A and B. Section 574 ITEPA then sets out those conditions:

> (2) Condition A is that the pension is paid to—
>
> (a) a former employee or a former office-holder,
>
> (b) the widow or widower or surviving civil partner of a former employee or a former office-holder, or
>
> (c) any child, relative or dependant of a former employee or a former office-holder.
>
> (3) Condition B is that the pension is paid by or on behalf of—
>
> (a) the person—
>
> (i) who employed the former employee, or
>
> (ii) under whom the former office-holder held the office, or
>
> (b) the successors of that person.

Section 574(4) sets out supplemental definitions:

> In this section—
>
> "office" includes in particular any position which has an existence independent of the person who holds it and may be filled by successive holders;[2]
>
> "overseas pension scheme" has the same meaning as in Part 4 of FA 2004 (see section 150(7) of that Act);
>
> "relevant non-UK scheme" is to be read in accordance with paragraph 1(5) of Schedule 34 to FA 2004.

Section 575(1) ITEPA provides:

> If section 573 applies, the taxable pension income for a tax year is the full amount of the pension income arising in the tax year, but subject to
> [a] subsections (1A)[split years] and
> [b] [subsection] (3) [remittance basis].

[2] This is the standard form definition: see 34.3.1 (Offices).

The FA 2017 removed the 10% deduction formerly allowable from foreign pensions, a reform which this book had advocated for many years.

38.5.2 *Remittance basis*

Section 575(3) ITEPA provides:

> The full amount of the pension income arising in the tax year, or (as the case may be) the UK part of the tax year, is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of ITTOIA 2005 (relevant foreign income: remittance basis and deductions and reliefs).

The significance of treating the income as RFI is that the foreign pension income can qualify for the remittance basis.

38.6 Employment-related pension

38.6.1 *Annuity for dependants*

Section 609 ITEPA provides:

> (1) This section applies to any annuity which was granted for consideration consisting in whole or in part of sums—
> (a) which, in the tax year 2012-13 or an earlier tax year, satisfied the conditions for relief under section 273 of ICTA or section 459 of ITA 2007 (obligatory contributions to secure an annuity for the benefit of dependants), or
> (b) which fall within subsection (3).
> (2) But this section applies to an annuity which arises from a source outside the United Kingdom only if it is paid to a person resident in the United Kingdom.
> (3) A sum falls within this subsection if—
> (a) in the tax year 2013-14 or a later tax year, the sum is paid by an individual, or is deducted from an individual's earnings,[3] under an Act or the individual's terms and conditions of employment,
> (b) the sum is for the purpose of—
> (i) securing a deferred annuity after the individual's death for the individual's surviving spouse or civil partner, or
> (ii) making provision after the individual's death for the individual's children, and
> (c) the individual—

[3] Defined by reference in s.609(5): "In subsection (3)(a) "earnings" has the meaning given by section 62."

> (i) is UK resident for the tax year in which the sum is paid or deducted, or
> (ii) at any time in that tax year, falls within any of paragraphs (a) to (f) of section 460(3) of ITA 2007 (matters relating to residence).[4]

38.6.2 *Non-registered occupational pension scheme annuity*

Section 610 ITEPA provides:

> (1) This section applies to—
> (a) any annuity paid under an occupational pension scheme[5] that is not a registered pension scheme, and
> (b) any annuity acquired using funds held for the purposes of such an occupational pension scheme.
> (2) But this section applies to an annuity which arises from a source outside the United Kingdom only if it is paid to a person resident in the United Kingdom.

Section 610(3) deals with an overlap of pension schemes:

> (3) This section does not apply to an annuity to which Chapter 5A of this Part applies.

Section 610 originally referred to a sponsored superannuation scheme; and s.610(3) originally provided:

> This section does not apply to an annuity to which any provision of Chapter 6, 7, 8 or 9 of this Part applies.

EN ITEPA provides:

> 2434. Subsection (3) ensures there is no overlap with other sections in the pension income Part. The definition of "sponsored superannuation scheme" in section 624(1) of ICTA predates the introduction of approved retirement benefits schemes in Chapter 1 of Part 14 of ICTA. An approved retirement benefits scheme is likely to be within the

[4] Section 609(4) provides: "Subsection (3)(a) does not cover contributions paid by a person under—
(a) Part 1 of the Social Security Contributions and Benefits Act 1992, or
(b) Part 1 of the Social Security Contributions and Benefits (Northern Ireland) Act 1992."

[5] Section 610(4) ITEPA provides a referential definition: "In this section "occupational pension scheme" has the same meaning as in Part 4 of FA 2004 (see section 150(5) of that Act)."

definition of "sponsored superannuation scheme". In ICTA an annuity paid by an approved retirement benefits scheme is taxed under Schedule E. The annuities identified in this section are taxed under Schedule D. A Schedule E charge takes priority over a Schedule D charge. This subsection preserves that order of priority.

38.6.3 *Annuity for another's services*

Section 611 ITEPA provides:

> (1) This section applies to any annuity purchased by any person in recognition of another person's services in any office or employment.
> (2) But this section applies to an annuity which arises from a source outside the United Kingdom only if it is paid to a person resident in the United Kingdom.
> (3) This section does not apply to an annuity to which Chapter 5A of this Part applies.
> (4) For the purposes of this section "office" includes in particular any position which has an existence independent of the person who holds it and may be filled by successive holders.

38.6.4 *UK source annuities*

Section 612 ITEPA provides:

> (1) The taxable pension income for an annuity to which section 609, 610 or 611 applies is determined in accordance with this section if the annuity arises from a source in the United Kingdom.
> (2) The taxable pension income for a tax year is the full amount of the annuity arising in that year.

38.6.5 *Foreign source annuities*

Section 613 ITEPA provides:

> (1) The taxable pension income for an annuity to which section 609, 610 or 611 applies is determined in accordance with this section if the annuity arises from a source outside the United Kingdom.
> (2) The taxable pension income for a tax year is the full amount of the annuity arising in the tax year, but subject to subsection (4).

38.6.6 *Remittance basis*

Section 613(4) ITEPA provides

> The annuity is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of ITTOIA 2005 (relevant foreign income:

remittance basis and deductions and reliefs).

The significance of treating the income as RFI is that the foreign pension income can qualify for the remittance basis.

For completeness, s.613(5) ITEPA provides:

> But if the annuity arises in the Republic of Ireland, section 839 of that Act (annual payments payable out of relevant foreign income)[6] applies with the omission of conditions B1 and B2 (and the reference to them in subsection (1) and subsection (5)(a)).

This specialist topic is not pursued here.

I do not discuss s.840 ITTOIA (relief for backdated pensions charged on arising basis).

38.7 Commonwealth pension

Section 615(1) ITEPA provides:

> This section applies to a pension if conditions A, B and C are met.

I refer to **"commonwealth pension conditions A - C"**.

Section 615(7) ITEPA provides:

> In this Chapter "pension" includes a pension which is paid voluntarily or is capable of being discontinued.

I refer to pensions within this definition as "**commonwealth pensions**" (though that is not a wholly accurate label).

I would be interested to hear from readers with experience in this area whether there are in fact many commonwealth pensions still payable.

38.7.1 *Commonwealth condition A*

Section 615 ITEPA provides:

> (2) Condition A is that the pension—
> (a) is payable—
> (i) to a person who has been employed in overseas government service, or
> (ii) to the widow, widower, surviving civil partner, child, relative or dependant of a person who has been employed in overseas government service, and
> (b) is payable in respect of that service...

[6] See 31.12 (Annual Payment from RFI).

> (6) In condition A the references to a person being employed in overseas government service are to the person being employed outside the UK—
>
> (a) in the service of the Crown, or
>
> (b) in service under the government of a country or territory which falls within subsection (4).

38.7.2 *Commonwealth condition B*

Section 615 ITEPA provides:

> (3) Condition B is that the pension—
>
> (a) is payable in the UK, and
>
> (b) is payable to a person who is resident in the UK.

38.7.3 *Commonwealth condition C*

Section 615 ITEPA provides:

> (4) Condition C is that the pension is payable by or on behalf of the government of—
>
> (a) a country which forms part of Her Majesty's dominions,
>
> (b) any other country which is for the time being mentioned in Schedule 3 to the British Nationality Act 1981, or
>
> (c) any territory under Her Majesty's protection.
>
> (5) But condition C is not met if the pension is payable out of the public revenue of the UK or Northern Ireland.

There are 55[7] countries in schedule 3:

Antigua and Barbuda
Australia
The Bahamas
Bangladesh
Barbados
Belize
Botswana
Brunei
Cameroon
Canada
Republic of Cyprus
Dominica
Eswatini
Fiji
Gabon
Ghana
Grenada
Guyana
India
Jamaica
Kenya
Kiribati
Lesotho
Malawi

[7] There are 56 Commonwealth countries, including the UK. However, there is often a delay between a country withdrawing from the Commonwealth and a consequential amendment to Sch 3. For present purposes, it is Sch 3 that is determinative. There is currently one country on the list that is not a member of the Commonwealth: Zimbabwe withdrew in 2003 but reapplied to join in May 2018; that application is not yet successful. The Gambia is not on the list, despite being a member of the Commonwealth.

Malaysia
Maldives
Malta
Mauritius
Mozambique
Namibia
Nauru
New Zealand
Nigeria
Pakistan
Papua New Guinea
Rwanda
Saint Christopher and Nevis
Saint Lucia
Saint Vincent and the Grenadines
Seychelles
Sierra Leone
Singapore
Solomon Islands
South Africa
Sri Lanka
Tanzania
Togo
Tonga
Trinidad and Tobago
Tuvalu
Uganda
Vanuatu
Western Samoa
Zambia
Zimbabwe

The EI Manual provides:

> **EIM75500. The taxation of pension income: foreign pensions** [Feb 2024]
>
> ...
>
> Certain overseas governments may pay pensions in the UK through any public department, officer or agent. Where the following conditions are met, these pensions are chargeable to Income Tax under section 615 ITEPA 2003, and not section 573 like other foreign pensions:
>
> ...
>
> - the pension is payable by or on behalf of the government of a country that is listed at schedule 3 of the British Nationality Act 1981 or a British Overseas Territory
> - the pension is paid to an individual who was employed outside the UK in service of the Crown, or the government of a country that is listed at schedule 3 of the British Nationality Act 1981 or a British Overseas Territory, or to the widow, widower, surviving civil partner, child, relative or dependant of that former employee.

Section 50(1) of the British Nationality Act 1981 provides:

> “ British overseas territory ” means a territory mentioned in Schedule 6...

Schedule 6 lists the following:

> Anguilla; Bermuda; British Antarctic Territory; British Indian Ocean Territory; Cayman Islands; Falkland Islands; Gibraltar; Montserrat; Pitcairn, Henderson, Ducie and Oeno Islands; St Helena, Ascension and Tristan da Cunha, South Georgia and the South Sandwich Islands, The Sovereign Base Areas of Akrotiri and Dhekelia (that is to say the areas mentioned in section 2(1) of the Cyprus Act 1960); Turks and Caicos

> Islands; Virgin Islands.

There are no longer any protectorates or protected states.

38.7.4 *Commonwealth pension: Charge*

Section 616 ITEPA provides:

> If section 615 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

The remittance basis is not applicable, perhaps because the pensions are "payable within the UK" and so regarded as received here.

Section 617 ITEPA provides for a 10% deduction:

> A deduction of 10% is allowed from an amount of taxable pension income determined under section 616 (see section 567).

This seems to have been overlooked by the drafter of the FA 2017 which otherwise abolished the former 10% deduction.

38.8 DT relief: Pension income

Article 18 OECD Model Convention provides:

> Subject to the provisions of paragraph 2 of Article 19 [government service],[8] pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State.

Where context permits, I use the word pension to include "other similar remuneration".

38.8.1 *Reason for residence taxation*

Why does OECD Model choose to tax pensions in the state of residence, rather than the state of source? OECD Commentary provides:

> 1... Various policy and administrative considerations support the principle that the taxing right with respect to this type of pension, and other similar remuneration, should be left to the State of residence. For instance, the State of residence of the recipient of a pension is in a better position than any other State to take into account the recipient's overall ability to pay tax, which mostly depends on worldwide income and

[8] See 38.8.7 (Government pension).

> personal circumstances such as family responsibilities. This solution also avoids imposing on the recipient of this type of pension the administrative burden of having to comply with tax obligations in States other than that recipient's State of residence.

These two arguments are invalid as they apply equally to every type of income, not just pensions. But the commentary later gives a better reason, the old difficulty of identifying the location of the source:

> 19. ... alternative provisions under which there is either exclusive or limited source taxation rights with respect to pensions require a determination of the State of source of pensions. Since a mere reference to a pension "arising in" a Contracting State could be construed as meaning either a pension paid by a fund established in that State or a pension derived from work performed in a State, States using such wording should clarify how it should be interpreted and applied.
> 19.1 Conceptually, the State of source might be considered to be the State in which the fund is established, the State where the relevant work has been performed or the State where deductions have been claimed. Each of these approaches would raise difficulties in the case of individuals who work in more than one State, change residence during their career or derive pensions from funds established in a State other than that in which they have worked. For example, many individuals now spend significant parts of their careers outside the State in which their pension funds are established and from which their pension benefits are ultimately paid. In such a case, treating the State in which the fund is established as the State of source would seem difficult to justify. The alternative of considering as the State of source the State where the work has been performed or deductions claimed would address that issue but would raise administrative difficulties for both taxpayers and tax authorities, particularly in the case of individuals who have worked in many States during their career, since it would create the possibility of different parts of the same pension having different States of source.

OECD Model adopts the pragmatic solution, but it is not surprising that there is a wide variety of provision in actual treaties. Some possibilities are discussed in OECD Commentary, but that need not be set out here.

Some pre-OECD Model treaties confer relief only if the income is subject to tax in the foreign state; see 108.13 ("Subject to tax").

38.8.2 *Pension/similar remuneration*

OECD Commentary provides:

> 3. The types of payment that are covered by the Article include not only pensions directly paid to former employees but also to other beneficiaries (e.g. surviving spouses, companions or children of the employees) and other similar payments, such as annuities, paid in respect of past employment. The Article also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provisions of paragraph 2 of Article 19.

38.8.3 *One-off payment*

OECD Commentary provides:

> 5. While the word "pension", under the ordinary meaning of the word, covers only periodic payments, the words "other similar remuneration" are broad enough to cover non-periodic payments. For instance, a lump-sum payment in lieu of periodic pension payments that is made on or after cessation of employment may fall within the Article.

38.8.4 *Pension or employment income?*

OECD Commentary discusses the pension/employment income boundary:

> 6. Whether a particular payment is to be considered as other remuneration similar to a pension or as final remuneration for work performed falling under Article 15 is a question of fact. For example, if it is shown that the consideration for the payment is the commutation of the pension or the compensation for a reduced pension then the payment may be characterised as "other similar remuneration" falling under the Article. This would be the case where a person was entitled to elect upon retirement between the payment of a pension or a lump-sum computed either by reference to the total amount of the contributions or to the amount of pension to which that person would otherwise be entitled under the rules in force for the pension scheme. The source of the payment is an important factor; payments made from a pension scheme would normally be covered by the Article. Other factors which could assist in determining whether a payment or series of payments fall under the Article include: whether a payment is made on or after the cessation of the employment giving rise to the payment, whether the recipient continues working, whether the recipient has reached the normal age of retirement with respect to that particular type of employment, the status of other recipients who qualify for the same type of lump-sum payment and whether the recipient is simultaneously eligible for other pension benefits. Reimbursement of pension

> contributions (e.g. after temporary employment) does not constitute "other similar remuneration" under Article 18. Where cases of difficulty arise in the taxation of such payments, the Contracting States should solve the matter by recourse to the provisions of Article 25 [mutual agreement].

38.8.5 *Social security income*

OECD Commentary provides:

> 24. Depending on the circumstances, social security payments can fall under this Article as "pensions and other similar remuneration in consideration of past employment", under Article 19 as "pension[s] paid by, or out of funds created by, a Contracting State [...] in respect of services rendered to that State..." or under Article 21 as "items of income [...] not dealt with in the foregoing Articles". Social security pensions fall under this Article when they are paid in consideration of past employment, unless paragraph 2 of Article 19 applies.[9] A social security pension may be said to be "in consideration of past employment" if employment is a condition for that pension. For instance, this will be the case where, under the relevant social security scheme:
>
> — the amount of the pension is determined on the basis of either or both the period of employment and the employment income so that years when the individual was not employed do not give rise to pension benefits,
>
> — the amount of the pension is determined on the basis of contributions to the scheme that are made under the condition of employment and in relation to the period of employment, or
>
> — the amount of the pension is determined on the basis of the period of employment and either or both the contributions to the scheme and the investment income of the scheme.
>
> 25. Paragraph 2 of Article 19 will apply to a social security pension that would fall within Article 18 except for the fact that the past employment in consideration of which it is paid constituted services rendered to a State or a political subdivision or a local authority thereof, other than services referred to in paragraph 3 of Article 19.
>
> 26. Social security payments that do not fall within Articles 18 or 19 fall within Article 21. This would be the case, for instance, for payments made to self-employed persons as well as a pension purely based on resources, on age or disability which would be paid regardless of past

[9] See 38.8.7 (Government pension).

employment or factors related to past employment (such as years of employment or contributions made during employment).

38.8.6 *Consideration: Past employment*

The INTM provides:

> **INTM153200 Pensions** [Jan 2018]
> ... Social security and old age pensions are not paid in consideration of past employment and do not, therefore, come within the pensions Article. They are within the other income Article (INTM153240). However, two agreements (Denmark, Finland) provide for sole source state taxation and two others (Luxembourg and Sweden) provide that pensions paid under social security legislation may be taxed by the source country.

OECD Commentary provides:

> 3... [Article 18] only applies, however, to payments that are in consideration of past employment; it would therefore not apply, for example, to an annuity acquired directly by the annuitant from capital that has not been funded from an employment pension scheme. The Article applies regardless of the tax treatment of the scheme under which the relevant payments are made; thus, a payment made under a pension plan that is not eligible for tax relief could nevertheless constitute a "pension or other similar remuneration" (the tax mismatch that could arise in such a situation is discussed below)...
> 7. Since the Article applies only to pensions and other similar remuneration that are paid in consideration for past employment, it does not cover other pensions such as those that are paid with respect to previous independent personal services. ...

38.8.7 *Government pension*

Article 19 OECD Model provides:

> 2. a) Notwithstanding the provisions of paragraph 1 [government service],[10] pensions and other similar remuneration paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
>   b) However, such pensions and other similar remuneration shall be

[10] See 37.20 (DT relief: Government service).

> taxable only in the other Contracting State if the individual is a resident of, and a national of, that State.
>
> 3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

38.9 Australia/UK DTA

Article 17(1) Australia/UK Convention provides:

> Pensions (including government pensions) and annuities paid to a resident of a Contracting State shall be taxable only in that State.

The Australian Revenue have given two rulings concerning compensation payments.

> **Income tax: are periodic workers' compensation payments made by Comcare, 'pensions' for purposes of the pensions articles in Australia's double taxation agreements?**
>
> 1. Yes. The term 'pension' is not defined in any of the DTAs and therefore takes the meaning it has under domestic law. A pension is defined in the Macquarie Dictionary as '1. a fixed periodical payment made in consideration of past services, injury or loss sustained, merit, poverty etc. 2. an allowance or annuity.' The meaning of the term 'pension' was considered by Hill J. in the Federal Court in *Tubemakers of Aust Ltd v FCT* 93 ATC 4207. His Honour concluded that the essential characteristic of a pension is only that there be periodical payments. Payments made by Comcare under [a statutory compensation scheme] are fixed periodical payments made in consideration of injury or loss of wages. They are therefore pensions within the ordinary meaning of that term and fall within the operation of the Pensions Article in Australia's DTAs.
>
> 2. Under Australia's DTAs, pensions paid by the Australian Government are generally included in the Pensions Article and are taxable only in the country of residence of the recipient. Although, in some DTAs, government pensions paid in respect of services rendered to that government are dealt with under the Government Services Article rather than the Pensions Article, this does not affect the treatment of Comcare payments made under section 19. This is because the Comcare payments are made in consideration of injury or loss of wages and not for past services to the Government.[11]

[11] TD 93/151 *https://www.ato.gov.au/law/view/pdf/pbr/td1993-151.pdf*

The second ruling is as follows:

> **Facts** A non-resident individual (the taxpayer) who is a UK resident for the purposes of the [Australia] UK Convention, received loss of earnings payments from Australia as a result of injury suffered in a transport accident in the State of Victoria.
>
> The payments comprised weekly statutory compensation payments [under a statutory compensation scheme]... for loss of income due to the injury.
>
> The payments are calculated by reference to the recipient's pre-accident earnings.
>
> **Reasons for Decision**
>
> [The ruling cites art.17 of the DTA and continues:] Therefore, pensions paid from Australia to an individual who is a resident of the UK shall be taxable only in the UK.
>
> Article 3(3) of the UK Convention provides that any term not defined in the Convention shall, unless the context requires otherwise, have the meaning it has under the domestic laws in respect of the taxes to which the Convention applies.[12] The term 'pension' is not defined in the UK Convention or in Australia's domestic taxation law.
>
> [The ruling referred to the authorities cited in Taxation Determination TD 93/151 and continued:]
>
> The loss of earnings payments made under [the statutory compensation scheme] have the essential characteristic of a 'pension' as per Hill J. in *Tubemakers* and fall within the Macquarie dictionary definition of 'pension' as they are fixed periodic payments made in consideration of injury or loss sustained. Accordingly, the periodic compensation payments made to the taxpayer ... are a 'pension' for the purposes of the Pension Article of the UK Convention.
>
> Therefore, the Pension Article applies to give the UK, as the country of residence of the taxpayer, sole taxing rights over the compensation payments.[13]

It is different if OECD Model wording is used, which only applies to pensions "in consideration of past employment".

38.10 USA/UK DTA: Pension income

OECD Model only deals with pension income. The commentary considers other aspects of cross border pensions: taxation of contributions,

[12] Author's footnote: this is OECD Model form; see 107.12 (Undefined treaty terms).

[13] ATO ID 2008/145.

relief for contributions, income arising in the scheme, transfers between schemes. I here consider the USA/UK DTA which addresses these issues.

38.10.1 *"Pension scheme"*

Article 3(1)(o) USA/UK DTA provides a restrictive definition of "pension scheme":

> the term "pension scheme" means any plan, scheme, fund, trust or other arrangement established in a Contracting State which is—
> (i) generally exempt from income taxation in that State; and
> (ii) operated principally to administer or provide pension or retirement benefits or to earn income for the benefit of one or more such arrangements.

I refer to this as a **"pension scheme (as defined in the treaty)"**. This is not the OECD Model wording but there are some similarities.[14]

The DTA Exchange of Notes provides:

> With reference to sub-paragraph (o) of paragraph 1 of Article 3 (General definitions)—
> it is understood that pension schemes shall include the following and any identical or substantially similar schemes which are established pursuant to legislation introduced after the date of signature of the Convention—
> (a) under the law of the UK,
> [i] employment-related arrangements (other than a social security scheme) approved as retirement benefit schemes for the purposes of Chapter I of Part XIV of ICTA 1988, and
> [ii] personal pension schemes approved under Chapter IV of Part XIV of that Act; and
> (b) under the law of the United States,
> [i] qualified plans under section 401(a) of the Internal Revenue Code,
> [ii] individual retirement plans (including
> [A] individual retirement plans that are part of a simplified employee pension plan that satisfies section 408(k),
> [B] individual retirement accounts,
> [C] individual retirement annuities,
> [D] section 408(p) accounts, and

[14] See 9.24 (Treaty-residence: Pension fund).

[E] Roth IRAs under section 408A),
[iii] section 403(a) qualified annuity plans, and
[iv] section 403(b) plans.

This is an inclusive definition.

The DT Manual provides:

> **DT19876B. Pension Contribution** [Jan 2020]
> ... The term "pension scheme" is defined for the purposes of the treaty at Article 3(1)(o). This means that Treaty benefits are for approved schemes only. As section 615 ICTA 1988 schemes [now Chapter 18 Part 9 ITEPA], which are UK established trusts for non-residents, are not approved they do not come within the definition of "pension scheme" in Article 3(1)(o) because they are not "generally exempt from income taxation in that State". They are therefore not included in the list in the Exchange of Notes.
> So called US section 401(k) plans are included within the definition of a pension scheme as they are within the definition of a pension scheme in Article 3(1)(o) because they are a type of section 401(a) plan.

The requirement that a pension fund must be "established in" a treaty state requires some nexus between the pension fund and the state, but the exact meaning is not precisely expressed.

The Upper Tribunal has held that the World Bank pension scheme was "established in" the US and so was a pension scheme (as defined in the treaty):

(a) "established in" refers to a pension scheme's physical location and
(b) a pension scheme need not necessarily be "generally exempt from taxation" as such.[15]

The word "physical" is not apt for a non-tangible thing such as a pension scheme, but the important point is the rejection of the HMRC argument that a pension is "established" in a state if it is established in conformity with that State's tax legislation relating to pension schemes.

The Australian Revenue takes a similar approach on whether a pension fund is "established in Australia" for the purposes of domestic (Australian) legislation:

> 100. ... there appears to be no case law which provides guidance on the location of the establishment of a superannuation fund. In the absence

[15] *Macklin v HMRC* [2015] UKUT 39 (TCC) at [46].

> of such guidance, it is considered that a superannuation fund will be established in Australia when the initial contribution that establishes the fund is paid to and accepted by the trustee in Australia.[16] It is not necessary that the deed for the fund is signed and executed in Australia. Whether the initial contribution to establish the fund occurred in Australia is a question of fact which is determined by reference to the circumstances of each case.
> 101. If there is a situation where the initial contribution to establish the fund occurred outside Australia, notwithstanding that one or more of the signatories executed the deed in Australia, the fund will not be established in Australia.[17]

It seems to me that this is the natural meaning of a trust being "established in" a state. The difficulty of applying the natural meaning in the treaty definition is that some arrangements which the DTA Exchange of Notes recognises would not be included.[18] A court could well have found that a pension scheme was established in a state if it was set up there *or* if it qualified for pension exemption there. The treaty and international law background of the World Bank might also benefit from examination. It seems anomalous that employment income of World Bank employees should be exempt, but pension income, which is deferred remuneration, is taxable.

38.10.2 *DTA relief for pension*

Article 17(1) USA/UK DTA provides:

> (a) Pensions and other similar remuneration beneficially owned by a resident of a Contracting State shall be taxable only in that State.

The DTA Exchange of Notes provides:—

> With reference to paragraph 1 of Article 17 ... it is understood that a payment shall be treated as a pension or other similar remuneration

[16] Footnote original: Those superannuation schemes that are established by or under the law of the Commonwealth, or of a State or Territory - see paragraph (a) of the definition of 'public sector superannuation scheme' in section 10 of the SISA - are established in Australia.

[17] Taxation Ruling TR 2008/9, "Income tax: meaning of 'Australian superannuation fund' in subsection 295-95(2) of the Income Tax Assessment Act 1997" *https://www.ato.gov.au/law/view/document?DocID=TXR/TR20089/NAT/ATO/00001*

[18] EU companies may establish registered schemes, and these are not likely to be set up by a payment in the UK.

> under paragraph 1 of Article 17 if it is a payment under a pension scheme as defined in sub-paragraph (o) of paragraph 1 of Article 3 (General definitions) of the Convention.

This is an exclusive definition, that is, if a payment is not under a pension scheme (as defined in the treaty) then it does not count as a pension for treaty purposes (even if it is a pension in the normal sense of the word.)[19]

In the case of payments which are not from pension schemes (as defined) the Other Income article may apply, though that (unlike article 17(1)) is subject to the US Savings Clause.

38.10.3 *Exemption recognition*

Article 17(1) USA/UK DTA continues:

> (b) Notwithstanding sub-paragraph (a) of this paragraph, the amount of any such pension or remuneration paid from a pension scheme established in the other Contracting State that would be exempt from taxation in that other State if the beneficial owner were a resident thereof shall be exempt from taxation in the first-mentioned State.

It is easier to follow a paraphrase identifying which Contracting State is which, and filling in the reference in the word "such":

> (b) ... the amount of any pension or remuneration [beneficially owned by a resident of the UK] paid from a pension scheme established in [the USA] that would be exempt from taxation in [the USA] if the beneficial owner were a resident [of the USA] shall be exempt from taxation in [the UK].

The USA/UK DTA Technical Explanation provides:[20]

> ... Thus, for example, a distribution from a U.S. "Roth IRA" to a U.K. resident would be exempt from tax in the UK to the same extent the distribution would be exempt from tax in the United States if it were distributed to a U.S. resident. The same is true with respect to distributions from a traditional IRA to the extent that the distribution

[19] If this view were wrong, the provision in the Exchange of Notes would not be necessary. This view is consistent with the approach in the commentary to the US Model Treaty: "The phrase "pensions and other similar remuneration" is intended to encompass payments made by *qualified* private retirement plans...". *https://home.treasury.gov/system/files/131/Treaty-US-Model-TE-2006.pdf*

[20] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> represents a return of non-deductible contributions. Similarly, if the distribution were not subject to tax when it was "rolled over" into another U.S. IRA (but not, for example, to a U.K. pension scheme), then the distribution would be exempt from tax in the UK.

The Tribunal has said:

> We do not accept that the purpose of the exemption under article 17(1)(b) of the DTA is to provide equal treatment for pensioners resident in either Contracting State with regard to the taxation of pension income. It is, as we discern it, to give exemption in both Contracting States to pension income which the parties to the DTA have chosen to exempt from income taxation under their respective domestic laws because they are schemes operated principally to administer or provide pension or retirement benefits, etc.[21]

38.10.4 *Savings clause and art 17(1)*

The USA/UK DTA Technical Explanation provides:[22]

> [Article 17(1)(a)] is subject to the saving clause of paragraph 4 of Article 1 (General Scope)[23] while subparagraph 1(b) is not, by reason of the exception in subparagraph 5(a) of Article 1. Thus, a U.S. citizen who is a resident of the UK and receives a pension will be subject to U.S. tax on the payment, notwithstanding the rules in those paragraphs that give the State of residence of the recipient the exclusive taxing right. However, a U.S. citizen who receives a distribution from a pension scheme established in the UK will be taxable on only the portion of the pension distribution that is taxable in the UK.

38.10.5 *Lump sum payment*

Article 17(2) USA/UK DTA continues:

> Notwithstanding the provisions of paragraph 1 of this Article, a lump-sum payment derived from a pension scheme established in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in the first-mentioned State.

It may be easier to keep track of this by identifying the states expressly. In the case of a UK resident:

[21] *Macklin v HMRC* [2014] SFTD 290 at [110].

[22] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[23] See 109.5 (Savings Clause).

> ... a lump-sum payment derived from a pension scheme established in [the USA] and beneficially owned by a resident of [the UK] shall be taxable only in [the USA].

In the case of a US resident:

> ... a lump-sum payment derived from a pension scheme established in [the UK] and beneficially owned by a resident of [the USA] shall be taxable only in [the UK].

The USA/UK DTA Technical Explanation provides:[24]

> Paragraph 2 is intended to deal with a particular type of double non-taxation that arose under the prior Convention because the UK does not tax lump-sum distributions from pension funds. Under the prior Convention, a lump-sum payment was treated in the same way as any other pension, and was taxable only in the country of residence of the beneficial owner. Accordingly, a person who anticipated receiving a lump-sum distribution from a U.S. pension scheme with respect to employment in the United States could avoid U.S. withholding tax on the distribution by establishing residence in the UK for the year in which he received the distribution. The person would not be subject to tax in either the United States or the UK with respect to the lump-sum distribution, resulting in a significant windfall.
>
> Paragraph 2 prevents this unanticipated benefit by providing that, notwithstanding the exclusive residence-country taxation of paragraph 1, any lump-sum payment derived by a resident of a Contracting State from a pension scheme established in the other Contracting State shall be taxable in that other State.

This problem arises because of the exemption for lump sum payments from UK pension schemes, which may be politically unassailable even if economically unjustifiable.

38.10.6 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:[25]

> Paragraphs 2 and 4 of Article 17 also are subject to the saving clause. Accordingly, a U.S. citizen who is a resident of the UK will be subject to U.S. tax on a lump-sum distribution from a pension scheme or an annuity, notwithstanding the rules in those paragraphs that give

[24] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[25] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> exclusive taxation rights to the State of source or residence, as the case may be.

The DTR Manual provides:

> **DT19876A. Pensions from 2003** [Jan 2020]
> ... ***Lump Sums***
> Under the old Agreement, a lump-sum payment from a pension scheme was taxable only in the country of residence. So if an individual moved from the US to the UK before receiving a lump sum from a US pension scheme, they would be taxable on the lump sum neither in the US (because of the treaty) nor in the UK (which does not tax lump sums anyway).
> The new provision prevents this occurring by providing that a lump-sum payment derived by a resident of one State from a pension scheme established in the other State shall be taxable only in that other State.
> The provision preserves the exemption from income tax of a lump sum relevant benefit where it is paid by a UK approved pension scheme to a beneficial owner who is a US resident. However, Article 1(4) will apply in respect of US citizens as the provisions of Article 17(2) are not amongst those listed at Article 1(5). So the US are able to tax lump sums received by US citizens from UK schemes.

38.11 Income of pension fund

Article 18(1) USA/UK DTA provides:

> Where an individual who is a resident of a Contracting State is a member or beneficiary of, or participant in, a pension scheme established in the other Contracting State, income earned by the pension scheme may be taxed as income of that individual only when, and, subject to paragraphs 1 and 2 of Article 17 (Pensions, social security, annuities, alimony, and child support) of this Convention, to the extent that, it is paid to, or for the benefit of, that individual from the pension scheme (and not transferred to another pension scheme).

It may be easier to keep track of this by identifying the states expressly. In the case of a UK resident, in short:

> Where an individual who is a resident of [the UK] is a member or beneficiary of, or participant in, a pension scheme established in [the US], income earned by the pension scheme may be taxed as income of that individual only when ... it is paid to, or for the benefit of, that individual from the pension scheme (and not transferred to another

pension scheme).

The USA/UK DTA Technical Explanation provides:[26]

> Thus, for example, if a U.S. citizen contributes to a U.S. qualified plan while working in the United States and then establishes residence in the UK, paragraph 1 prevents the UK from taxing currently the plan's earnings and accretions with respect to that individual. When the resident receives a distribution from the pension scheme, that distribution may be subject to tax in the State of residence, subject to paragraphs 1 and 2 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support).

The DTR Manual provides:

> **DT19876A. Pensions from 2003** [Jan 2020]
> ***IRAs***
> ...An IRA is a trust (or similar arrangement known as a custodial account) set up for the exclusive benefit of the taxpayer and, on his death, nominated beneficiaries, which satisfies certain conditions imposed by United States tax law. Contributions to an IRA are tax deductible in the United States and the funds can be invested in a wide range of investments. IRA funds can be withdrawn at any time, but if withdrawals are made before the taxpayer reaches the age of 59½ he must pay an additional penalty tax of 10% unless he is disabled.
> ...
> ***IRAs: Year 2003/04 et seq.***
> ... The new Agreement ... will mean that no liability will arise until it would have done so under US tax law. Under US law, this will be when distributions are made. As indicated above, this will generally not be before age 59½ but must be before age 70½. The important point to note is that income will no longer be assessable in the UK on the basis of income arising within the IRA. Any case of doubt or difficulty should be referred to HMRC, Customs & International, Tax Treaty Team.

The taxation of the pension scheme itself is outside the scope of this book, but note that the term "person" is defined in the DTA to include pension schemes and employee benefit trusts and arrangements. This is now also in the OECD Model.[27]

[26] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*
[27] See 9.24 (Treaty-residence: Pension fund).

38.11.1 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:[28]

> Paragraph 1 is not subject to the saving clause of paragraph 4 of Article 1 (General Scope) by reason of the exception in subparagraph 5(a) of Article 1. Accordingly, a U.S. citizen who is a resident of the UK will not be subject to tax in the United States on the earnings and accretions of a U.K. pension fund with respect to that U.S. citizen.

38.12 Transfer between schemes

The minutes of the Joint Forum on Expatriate Tax and NICs provides:

> **UK tax charges and transfers to US**
> *Question*: It is common practice for funds to be transferred between US pension schemes, particularly from a 401(k) to an IRA (individual retirement account). Although it is not necessarily a requirement, most people transfer their pension savings when they move employment.
> [The minutes refer to article 18 and continue]
> Where Article 18(1) is otherwise in point, is it HMRC's position that any unauthorised payments charge applies to the whole of the UK tax-relieved contributions deemed to be transferred to the IRA, treating those as transferred in priority to any fund income, or does Article 18(1) somehow confer total or partial exemption from this charge (if so, how)? The cumulative rate of charge on UK tax-relieved contributions (unauthorised payment charge and surcharge) is 55%, which is more than the tax relief originally given on the contributions. Does this mean that part of the tax represents a charge on fund growth, which would be prevented by Article 18(1) if the treaty is allowed to have any application to Schedule 34 FA 2004 charges? Or is Article 17 the provision that would relate to a transfer from a 401(k) to an IRA?
> *HMRC answer*: The provisions of the UK/US double taxation convention will not apply where both the individual and the pension scheme are in the US.
> Where a member of a US pension scheme is resident in the UK and receives UK tax relief on their pension savings that part of their pension savings will be subject to the provisions of Schedule 34 FA 2004 (the member payment provisions). If a transfer is made between a 401(k) and an IRA and the IRA is not a qualifying recognised overseas pension scheme (QROPS), the transfer will be an unauthorised payment. Any tax charge will be on the UK element of the pension savings and not to the

[28] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> investment growth in relation to the contributions. The wording of Article 18 refers to "income earned by the pension scheme" (in this case the US 401(k)). However, the income earned by the pension scheme would not be subject to UK tax charges.
>
> We do not see a transfer between pension schemes as being within Article 17 of the UK/US double taxation convention.[29]

38.13 Relief for pension contribution

Article 18(2) USA/UK DTA provides:

> Where an individual who is a member or beneficiary of, or participant in, a pension scheme established in a Contracting State exercises an employment or self-employment in the other Contracting State—
>
> (a) contributions paid by or on behalf of that individual to the pension scheme during the period that he exercises an employment or self-employment in the other State shall be deductible (or excludable) in computing his taxable income in that other State

The USA/UK DTA Technical Explanation provides:[30]

> Paragraph 2 [of article 18] provides certain benefits with respect to cross-border contributions to a pension scheme, subject to the limitations of paragraphs 3 and 4 of the Article. It is irrelevant for purposes of paragraph 2 whether the participant establishes residence in the State where the individual renders services (the "host State"). The benefits provided in paragraph 2 are similar to the benefits the U.S. Model provides with respect to contributions.
>
> Subparagraph (a) of paragraph 2 allows an individual who exercises employment or self-employment in a Contracting State to deduct or exclude from income in that Contracting State contributions made by or on behalf of the individual during the period of employment or self-employment to a pension scheme established in the other Contracting State. Thus, for example, if a participant in a U.S. qualified plan goes to work in the UK, the participant may deduct or exclude from income in the UK contributions to the U.S. qualified plan made while the participant works in the UK. Subparagraph (a), however, applies only to the extent of the relief allowed by the host State (e.g., the UK in the example) for contributions to a pension scheme established in that State.

[29] 29 January 2014 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf*

[30] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

38.13.1 *Contribution by employer*

Article 18(2) USA/UK DTA provides:

> Where an individual who is a member or beneficiary of, or participant in, a pension scheme established in a Contracting State exercises an employment or self-employment in the other Contracting State ...
>
> (b) any benefits accrued under the pension scheme, or contributions made to the pension scheme by or on behalf of the individual's employer, during that period shall not be treated as part of the employee's taxable income and any such contributions shall be allowed as a deduction in computing the business profits of his employer in that other State.
>
> The reliefs available under this paragraph shall not exceed the reliefs that would be allowed by the other State to residents of that State for contributions to, or benefits accrued under, a pension scheme established in that State.

The USA/UK DTA Technical Explanation provides:[31]

> Subparagraph (b) of paragraph 2 provides that, in the case of employment, accrued benefits and contributions by or on behalf of the individual's employer, during the period of employment in the host State, will not be treated as taxable income to the employee in that State. Subparagraph (b) also allows the employer a deduction in computing business profits in the host State for contributions to the plan. For example, if a participant in a U.S. qualified plan goes to work in the UK, the participant's employer may deduct from its business profits in the UK contributions to the U.S. qualified plan for the benefit of the employee while the employee renders services in the UK.
>
> As in the case of subparagraph (a), subparagraph (b) applies only to the extent of the relief allowed by the host State for contributions to pension schemes established in that State. Therefore, where the United States is the host State, the exclusion of employee contributions from the employee's income under this paragraph is limited to elective contributions not in excess of the amount specified in section 402(g). Deduction of employer contributions is subject to the limitations of sections 415 and 404. The section 404 limitation on deductions is calculated as if the individual were the only employee covered by the plan.

[31] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

38.13.2 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:[32]

> Paragraph 2 is not subject to the saving clause by reason of subparagraph 5(b) of Article 1. Accordingly, the benefits of paragraph 2 will be available to residents of the United States who are not citizens of the United States nor admitted for permanent resident ("green card" holders) in the United States.

The DT Manual provides:

> **DT19876B. Pension Contribution** [Jan 2020]
> ...It is a feature of several UK treaties from 2003 onwards that pension contributions made in one country are recognised for tax purposes in the other.
> The general premise of these is that if a member of a pension scheme established in one country goes to work (as an employee or in a self-employed capacity) in the other country, the state of residence will not tax the scheme member on income earned by the scheme unless it is paid to him (or for his benefit). Nor will tax be payable if income is transferred to another pension scheme until the benefits are actually received.
> Under the new Agreement, contributions to the scheme by that member (or those paid on his behalf) will be tax-deductible in the state of residence. In the same way, benefits accrued under the scheme, or employer contributions to the scheme, will not be treated as part of his taxable income and those contributions will be tax-deductible for the employer. The reliefs available cannot exceed those allowed by the state of residence for contributions of the same amount to a scheme established in the state of residence.
> The conditions for getting the relief are as follows
>
> - contributions were made by or on behalf of the individual or (in the case of an employee) his employer to the pension scheme (or to a similar scheme for which it was substituted) before the individual began to exercise an employment or self-employment in the other contracting state, and
> - the competent authority of the other State agrees that the pension scheme generally corresponds to a pension scheme established in that other State. ...

[32] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

38.13.3 *Pre-existing scheme*

Article 18(3) USA/UK DTA provides:

> The provisions of paragraph 2 of this Article shall not apply unless—
>
> (a) contributions by or on behalf of the individual, or by or on behalf of the individual's employer, to the pension scheme (or to another similar pension scheme for which the first-mentioned pension scheme was substituted) were made before the individual began to exercise an employment or self-employment in the other State

The DT Manual provides:

> **DT19876B. Pension Contribution** [Jan 2020]
>
> ...
>
> Where someone comes to work in the UK we will regard the first condition as having been met if the individual was a member of the US scheme before beginning to exercise an employment or self-employment in the UK. ...

The USA/UK DTA Technical Explanation provides:[33]

> Paragraph 3 limits the availability of benefits under paragraph 2. Under subparagraph (a) of paragraph 3, paragraph 2 does not apply to contributions to a pension scheme unless the participant already was contributing to the scheme, or his employer already was contributing to the scheme with respect to that individual, before the individual began exercising employment in the State where the services are performed (the "host State"). This condition would be met if either the employee or the employer was contributing to a scheme that was replaced by the scheme to which he is contributing. The rule regarding successor schemes would apply if, for example, the employer has been taken over by a company that replaces the existing scheme with its own scheme, rolling membership in the old scheme over into the new scheme.

38.13.4 *Corresponding scheme*

Article 18(3) USA/UK DTA provides:

> The provisions of paragraph 2 of this Article shall not apply unless...
>
> (b) the competent authority of the other State has agreed that the pension scheme generally corresponds to a pension scheme

[33] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> established in that other State.

The DTA Exchange of Notes provides:

> With reference to sub-paragraph (b) of paragraph 3 and sub-paragraph (d) of paragraph 5 of Article 18 (Pension schemes)—
> it is understood that the pension schemes listed with respect to a Contracting State in this exchange of notes in connection with sub-paragraph (o) of paragraph 1 of Article 3 (General definitions)[34] shall generally correspond to the pension schemes listed in this exchange of notes with respect to the other Contracting State.

The USA/UK DTA Technical Explanation provides:[35]

> In addition, under subparagraph (b) of paragraph 3, the competent authority of the host State must determine that the recognized plan to which a contribution is made in the other Contracting State generally corresponds to the plan in the host State. According to the notes, it is understood for this purpose that U.S. pension schemes eligible for the benefits of paragraph 2 include qualified plans under section 401(a), individual retirement plans (including individual retirement plans that are part of a simplified employee pension plan that satisfies section 408(k)), individual retirement accounts, individual retirement annuities, section 408(p) accounts and Roth IRAs under section 408A), section 403(a) qualified annuity plans, and section 403(b) plans.

38.13.5 *Contribution relief: Remittance basis*

Article 18(4) USA/UK DTA provides:

> Where, under sub-paragraph (a) of paragraph 2 of this Article, contributions to a pension scheme are deductible (or excludable) in computing an individual's taxable income in a Contracting State and, under the laws in force in that State, the individual is subject to tax in that State, in respect of income, profits or gains, by reference to the amount thereof which is remitted to or received in that State and not by reference to the full amount thereof, then the relief that would otherwise be available to that individual under that sub-paragraph in respect of such contributions shall be reduced to an amount that bears the same proportion to that relief as the amount of the income, profits or gains in respect of which the individual is subject to tax in that State bears to the amount of the income, profits or gains in respect of which he would be

[34] See 38.10.1 ("Pension scheme").

[35] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> subject to tax if he were so subject in respect of the full amount thereof and not only in respect of the amount remitted to or received in that State.

The USA/UK DTA Technical Explanation provides:[36]

> Paragraph 4 limits the availability of benefits under paragraph 2 of this article. Paragraph 4 provides a special rule in cases where income dealt with by the Convention is taxable to a resident of a Contracting State only if and to the extent it is remitted to or received by that person. In such cases, paragraph 4 reduces proportionately the deduction or exclusion of contributions to a pension scheme under subparagraph (a) of paragraph 2 based upon the amount of income subject to tax in the State of residence. Although this rule is written in bilateral fashion, it presently applies to residents of the UK only, because the United States does not tax on a remittance basis. Paragraph 4 would apply, for example, if a U.S. citizen resident in the UK earns income in the United States that is not subject to tax in the UK because the income is not remitted to the UK. In this case, paragraph 4 would reduce proportionately the amount of any deduction or exclusion allowed in the UK to the U.S. citizen by subparagraph (a) of paragraph 2 for contributions to a U.S. pension scheme.

The DT Manual provides:

> **DT19876B. Pension Contribution** [Jan 2020]
> ...Relief will be restricted where contributions to a pension scheme are deductible or excludable in computing a person's taxable income in the host country if he is subject to tax there not on his total income but only on amounts remitted to that country. Relief is available only on a corresponding proportion of the pension contributions.
> *An example*

Individual's total income, profits and gains	£100,000
Income, profits and gains remitted to the UK	£90,000
Individual's contributions to US pension scheme	£5,000

> Contributions deductible in computing individual's UK taxable income - £4,500 (i.e. 90% of individual's total contributions). ...

38.14 Cross border contribution relief

Article 18(5) USA/UK DTA provides:

[36] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> (a) Where a citizen of the United States who is a resident of the UK exercises an employment in the UK the income from which is taxable in the UK and is borne by an employer who is a resident of the UK or by a permanent establishment situated in the UK, and the individual is a member or beneficiary of, or participant in, a pension scheme established in the UK,
>
> (i) contributions paid by or on behalf of that individual to the pension scheme during the period that he exercises the employment in the UK, and that are attributable to the employment, shall be deductible (or excludable) in computing his taxable income in the United States; and
>
> (ii) any benefits accrued under the pension scheme, or contributions made to the pension scheme by or on behalf of the individual's employer, during that period, and that are attributable to the employment, shall not be treated as part of the employee's taxable income in computing his taxable income in the United States.
>
> This paragraph shall apply only to the extent that the contributions or benefits qualify for tax relief in the UK.

The USA/UK DTA Technical Explanation provides:[37]

> Paragraph 5 generally provides U.S. tax treatment for certain contributions by or on behalf of U.S. citizens resident in the UK to pension schemes established in the UK that is comparable to the treatment that would be provided for contributions to U.S. schemes. Under subparagraph (a) of paragraph 5, a U.S. citizen resident in the UK may exclude or deduct for U.S. tax purposes certain contributions to a pension scheme established in the UK. Qualifying contributions generally include contributions made during the period the U.S. citizen exercises an employment in the UK if expenses of the employment are borne by a U.K. employer or U.K. permanent establishment. Similarly, with respect to the U.S. citizen's participation in the U.K. pension scheme, accrued benefits and contributions during that period generally are not treated as taxable income in the United States.

There are three restrictions.

38.14.1 *Cap by US tax rules*

Article 18(5) USA/UK DTA provides:

[37] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> (b) The reliefs available under this paragraph shall not exceed the reliefs that would be allowed by the United States to its residents for contributions to, or benefits accrued under, a generally corresponding pension scheme established in the United States.

The USA/UK DTA Technical Explanation provides:[38]

> The U.S. tax benefit allowed by paragraph 5, however, is limited to the lesser of the amount of relief allowed for contributions and benefits under a pension scheme established in the UK and, under subparagraph (b), the amount of relief that would be allowed for contributions and benefits under a generally corresponding pension scheme established in the United States.

Article 18(5) USA/UK DTA provides:

> (c) For purposes of determining an individual's eligibility to participate in and receive tax benefits with respect to a pension scheme established in the United States, contributions made to, or benefits accrued under, a pension scheme established in the UK shall be treated as contributions or benefits under a generally corresponding pension scheme established in the United States to the extent reliefs are available to the individual under this paragraph.

The USA/UK DTA Technical Explanation provides:[39]

> Subparagraph (c) provides that the benefits an individual obtains under paragraph 5 are counted when determining that individual's eligibility for benefits under a pension scheme established in the United States. Thus, for example, contributions to a U.K. pension scheme may be counted in determining whether the individual has exceeded the annual limitation on contributions to an individual retirement account.

Article 18(5) USA/UK DTA provides:

> (d) This paragraph shall not apply unless the competent authority of the United States has agreed that the pension scheme generally corresponds to a pension scheme established in the United States.

The USA/UK DTA Technical Explanation provides:[40]

[38] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[39] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[40] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> Under subparagraph (d), paragraph 5 does not apply to pension contributions and benefits unless the competent authority of the United States has agreed that the pension scheme established in the UK generally corresponds to a pension scheme established in the United States. The notes provide that certain pension schemes have been determined to "generally correspond" to schemes in the other country. Since paragraph 5 applies only with respect to persons employed by a U.K. employer or U.K. permanent establishment, however, the relevant U.K. plans are those that correspond to employer plans in the United States. Accordingly, it applies with respect to retirement benefit schemes for the purpose of Chapter I of Part XIV of ICTA1988.

38.14.2 *US Savings Clause*

The USA/UK DTA Technical Explanation provides:[41]

> Paragraph 5 is not subject to the saving clause of paragraph 4 of Article 1 by reason of the exception in subparagraph 5(a) of Article 1. Accordingly, U.S. citizens who are resident in the UK will receive the benefits provided by paragraph 5 with respect to contributions made to pension schemes established in the UK.

38.15 Canadian RRSP and RRIF

The DT Manual formerly provided:

> **DT4617 Withdrawals from Canadian RRSPs/RRIFs** [Jun 2016 - Feb 2017]
> Canadian Registered Retirement Savings Plans (RRSPs) and Registered Retirement Income Funds (RRIFs)
> Where a UK resident makes a lump sum withdrawal from an RRSP or an RRIF, Canada imposes a 25 per cent withholding tax. No tax credit relief is allowable in the UK in respect of the tax withheld, however, because the Canadian tax is imposed upon the lump sum withdrawal (which does not itself give rise to a tax charge in the UK), whereas any UK tax charge is on the disposal of assets held within the Plan or Fund to enable the lump sum to be withdrawn (and no tax is levied on the disposal of fund assets in Canada). The Elimination of Double Taxation Article (Article 21) obliges the UK to give credit for Canadian tax paid only against UK tax computed by reference to the same profits, income or chargeable gains by reference to which the Canadian tax is computed. Since no UK tax is computed by reference to the subject of Canadian tax (that is, the

[41] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> withdrawal), no tax credit relief is allowable. Similarly, where the disposal of fund assets to facilitate a withdrawal gives rise to a UK tax charge, no tax credit relief is allowable since the disposal does not attract a tax charge in Canada.

This passage was withdrawn Feb 2017[42] and may now be of historical interest only.

Expat Q&A log provides:

> **Canadian RRSPs**
> **Question**: Does HMRC regard an RRSP as an "overseas pension scheme" under FA 2004 s150? Does the treatment set out in the IM1622 with regard to an RRSP still apply?
> If an RRSP is not an overseas pension scheme, is the group version of it an employer-financed retirement benefits scheme for the purposes of s393A ITEPA?
> **HMRC Answer**
> The response provided on 27/11/06 above[43] remains appropriate for periods prior to 6th April 2017. Subsequent to this date, HMRC consider that if the funds accrue in an RRSP or RRIF then we will tax them in the UK as a foreign pension. This change in approach regarding lump sums stems from the introduction of taxation of lump sums to UK residents from all foreign pension schemes introduced in FA 2017. If the funds have accrued in an RRSP or RRIF since 6 April 2017 they may be liable to tax in the UK (as a pension) and therefore from a treaty perspective we would rely on the conditions set out in the Pensions article of the UK/Canada Tax treaty. Prior to 6 April 2017 our position is outlined in the guidance at DT4605.[44]

38.16 Annuity income: Introduction

I would concentrate on the themes of this book, but the subject can only be understood in the context of the provisions as a whole.

[42] The passage is still online, see
https://www.gov.uk/hmrc-internal-manuals/double-taxation-relief/dt4617
But it does not appear in the index pages so someone browsing the manuals will not find it. It may be an accidental leftover or it may still be current.

[43] The text is set out in the original 2020/21 edition para 30.15 (Canadian RRSP and RRIF) but is now of historical interest only.

[44] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

Annuity income may be:

(1) pension income
(2) non-pension annuity income:
  (a) income from a purchased life annuity (see below)
  (b) misc sweep-up income
  (c) exempt (tax free)

The ITEPA charges on pension income have priority over the ITTOIA charge on annuity income.[45]

Non-pension annuities should perhaps be placed in a different chapter, but it is convenient to deal with them here.

A contract for a purchased life annuity in principle falls within the chargeable event rules.[46] So chargeable-event gains arising from the contract are in principle taxable.

I do not discuss deduction at source rules.

38.17 Annuity terminology

38.17.1 *"Annuity"*

The word "annuity" is used in many tax contexts and as far as I know, never defined. IPT Manual discusses the meaning:

> **IPTM1130. What is an annuity?** [Jun 2016]
> There is no single definition in the taxes acts. There is an ancient definition in Stroud's Judicial Dictionary, quoting Coke on Littleton:
>
> > An annuity is a yearly payment of a certaine summe of money granted to another in fee, for life, or yeares, charging the person of the grantor onely.[47]
>
> From an early case called *Foley v Fletcher*[48] the judgment of Watson B at 784-5 is often quoted:
>
> > But an annuity means where an income is purchased with a sum of money, and the capital has gone and has ceased to exist, the principal having been converted into an annuity.
>
> From this and other cases, notably *Southern-Smith v Clancy*, 24 TC 1, the following factors emerge as needing to be present
>
> - the payments must be made under a legal obligation

[45] See 14.7.7 (S & I Income/ITEPA income).

[46] See 70.2.4 ("Life annuity"); 70.3.1 (Policies within charge).

[47] *Stroud's Judicial Dictionary of Words and Phrases* (9th ed., 2016) pp. 129.

[48] (1858) 157 ER 678; 28 LJ Ex 100; 3 H & N 769 accessible *http://www.commonlii.org/uk/cases/EngR/1858/1107.pdf*

- those payments must be 'pure income profit'
- they must be capable of being characterised as 'annual', so being capable of recurrence on a periodic basis by reference to an annual time frame
- the purchase sum must pass absolutely to the provider
- no debtor/creditor relationship is created in relation to that sum; it is replaced by the annuity
- the annuitant's only right is to demand payments when due
- the payments must not be instalments of pre-existing debt.

38.17.2 *"Purchased life annuity"*

Section 423 ITEPA provides:

> (1) In this Chapter [Chapter 7 part 4 ITTOIA] "purchased life annuity" means an annuity—
>
> (a) granted for consideration in money or money's worth in the ordinary course of a business of granting annuities on human life, and
>
> (b) payable for a term ending at a time ascertainable only by reference to the end of a human life.
>
> (2) For this purpose it does not matter that the annuity may in some circumstances end before or after the life.

The definition of "annuity contract" in s.554V ITEPA is in the same terms.

In the UK, only insurance companies and friendly societies carry on the business of granting annuities. Outside the UK, a wider range of bodies may do so.

The IPT Manual discusses condition (1)(b) ("a term ending at a time ascertainable only by reference to the end of a human life") and identifies three types of annuity which meet this condition:

> **IPTM4210 guaranteed and temporary annuities** [Jun 2016]
>
> Annuities are flexible products and may take several forms.
>
> [1] A life annuity may, for example, be guaranteed to run for a specified period, even if the life ends before that period comes to an end, but will continue as a life annuity if the life survives the period.
>
> [2] Alternatively, there may be a guarantee that the purchase consideration will always be returned in full, even if the life ends before the end of the expected term. In this situation, the balance of the purchase price will usually continue to be paid out as continuing annuity payments following death. Naturally, all these potential benefits will be factored into the price of the annuity on actuarial principles.

> [3] Another variation is a temporary annuity, where the annuity comes to an end if the life survives beyond a specified period but otherwise terminates on the dropping of the life.
> For tax purposes, these arrangements are still dependent on human life, there is a life contingency, and payments made will be treated as purchased life annuities rather than as annuities certain, including those payments made in consequence of the guarantee, after the life has dropped.

38.17.3 *"Annuity certain"*

The IPT Manual provides:

> **IPTM4200 - Purchased life annuities: different types of annuity: annuities certain** [Jun 2016]
> Annuities certain provide a series of payments, usually in return for a single lump sum, that is payable for a fixed term. In particular, the term is not subject to alteration by the death of any person. In other words, there is no life contingency. If such an annuity is purchased from an insurance company or friendly society, part of each annuity payment is treated as a return of capital. This result, unlike the situation in relation to a life annuity, follows from first principles as determined by the Court - see *Perrin v Dickson* (1929), 14 TC 608. The reasoning is that, as the term is known from the start, it is straightforward and correct to determine the amount of exempt capital comprised within each payment. Only the interest, or income, element is treated as income for tax purposes. And it is taxed as interest rather than as an annual payment. Annuities certain are not annuities in the true sense at all. The tax treatment of the payments is thus similar to that of purchased life annuities, but they are not within the scheme described at IPTM4300 as the dissection arises on first principles. If written by an insurance company they are in fact a variety of capital redemption policy, see IPTM1120, and consequently are potentially within the chargeable events regime, see IPTM3300, though they are not likely to give rise to chargeable events, see IPTM3400.A UK-resident insurance company will deduct tax at the basic rate from the payments it makes, but from the interest parts only. In total, the interest parts will be equal to the amount by which the sum of the annuity payments exceeds the purchase price of the annuity.

The author is right to say that "annuities certain are not annuities in the true sense" and it would be better not to use the term annuity in this context.

38.18 Purchased life annuity: Charge

This is dealt with in Chapter 7 Part 4 ITTOIA.

Section 422(1) ITTOIA provides:

> Income tax is charged on annuity payments made under a purchased life annuity.

Section 424 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the annuity payments arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Subsection (2) incorporates the remittance basis for foreign source annuity income.

Section 422(2) ITTOIA lists exemptions:

> For exemptions, see in particular—
> (a) section 717 (exemption for part of purchased life annuity payments),
> (b) section 725 (annual payments under immediate needs annuities),
> (c) section 731 (periodical payments of personal injury damages), and
> (d) section 732 (compensation awards).

These exemptions are not discussed here.

The IPT Manual explains:

> **IPTM4100 - Purchased life annuities: background** [Jun 2016]
> ...In 1956, following the 1954 Report of the Committee on the Taxation Treatment of Provisions for Retirement, legislation was introduced that ... provides for the creation of what ICTA88 calls a 'capital element', and ITTOIA05 an 'exempt sum', or 'exempt proportion', depending on the type of calculation involved, see IPTM4310. It reflects the amount of exempt capital comprised within each of the annuity payments. In broad terms, the exempt capital amount is obtained by dividing the purchase price of the annuity by the subject's life expectation, determined according to prescribed mortality tables.

CHAPTER THIRTY NINE

BENEFIT IN KIND: FAMILY HOME AND CHATTELS

39.1 Home/chattels owned by company
39.2 The benefits code
39.3 Property law background
39.3.1 Company ownership: Home
39.3.2 Company ownership: Chattels
39.4 "Family" and "household"
39.4.1 "Family"
39.4.2 "Household"
39.4.3 Which family
39.5 "Director"
39.6 Shadow directors
39.6.1 "Shadow director"
39.6.2 Agent as shadow director
39.6.3 Occupier as shadow director

39.37.2 Shared use
39.38 Ordinary earnings/BiK border
39.39 BiK: Remittance basis
39.39.1 OWR (recent arrivers)
39.39.2 COE remittance basis
39.39.3 BiK earnings remitted to UK
39.40 Benefits in kind: Non-resident
39.41 Section 731 charge
39.42 Transfer pricing & BiK

39.1 Home/chattels owned by company

Until 2013 it was common for the family home to be acquired by a company and occupied by individuals with some interest in the company. IHT (excluded property) was often (perhaps generally) the main reason, but there were other advantages including confidentiality and limited liability.

Following the introduction of ATED in 2013, acquisition by companies became less attractive. The 2017 IHT residential-property code removed the IHT advantage, and ECTEA has removed the confidentiality. Corporate acquisition will now be rare. There remain a significant, if decreasing, number of companies holding properties acquired before 2013.

It is still common for valuable chattels to be held by companies.

Corporate ownership raises many tax issues. The main topics are covered in 3 chapters:

Topic	**Chapter**
Employment income benefits in kind	*This chapter*
IHT residential-property code and tax planning	82.1
ATED and ATED-SDLT	98.1

39.2 The benefits code

The "benefits code" is the statutory term for the provisions which charge benefits in kind (**"BiK"**) in Part 3 ITEPA.

Section 63(1) ITEPA lists them, non-numerically:

In the employment income Parts “the benefits code” means:[1]

Chapter	**Topic**	**See**
2	General	
3	Expenses payments	*Not discussed*
4	Vouchers and credit-tokens	*Not discussed*
5	Living accommodation	*Discussed here*
6	Cars, vans and related benefits	*Not discussed*
7	Loans	40.2
10	Residual benefit in kind charge	*Discussed here*

Thus there are six categories of benefits in kind. Part 3 is best regarded as six distinct sub-codes: each Chapter provides a (more or less) self-contained code. They share a few definitions and other rules, but they do not have much in common. Perhaps “benefit codes” (in the plural) would be a more apt label; but using the singular shows at least an aspiration to coherence.

This chapter deals with two of these codes:

(1) Chapter 5: (“**accommodation BiK charge**”)

(2) Chapter 10: I call this the “**benefit BiK charge**” and leave “residual” to be understood. This catches the benefit of use of chattels (except cars, which come under Chapter 6). Common examples are works of art, yachts and aircraft.

I go beyond the themes of this book and address these topics as a whole, in the following order:

(1) Property law background

(2) Definitions applying to the benefits code generally

(3) BiK codes:

  (a) Accommodation BiK code

  (b) The benefit BiK code

(4) Remittance basis, non-residence, and other issues which apply to the benefits code generally

39.3 Property law background

A company may hold property:

(1) Beneficially

(2) As nominee/bare trustee, for an individual, or other person, as a result of:

[1] I recast the statutory text into a table easier to follow.

(a) A declaration of nomineeship
(b) A resulting trust
(c) Sham (an ineffective trust)
I refer to that as **“corporate nomineeship”**.

39.3.1 *Company ownership: Home*

In *Prest v Petrodel Resources*:[2]

> Whether assets legally vested in a company are beneficially owned by its controller is a highly fact-specific issue. It is not possible to give general guidance going beyond the ordinary principles and presumptions of equity, especially those relating to gifts and resulting trusts.

Having issued the disclaimer, the court went on to give its guidance:

> But I venture to suggest, however tentatively, that in the case of the matrimonial home, the facts are quite likely to justify the inference that the property was held on trust for a spouse who owned and controlled the company.

The court gives two or three reasons for this view:

> [1] In many, perhaps most cases, the occupation of the company’s property as the matrimonial home of its controller will not be easily justified in the company’s interest, especially if it is gratuitous.
> [2] The intention will normally be that the spouse in control of the company intends to retain a degree of control over the matrimonial home which is not consistent with the company’s beneficial ownership.
> [3] Of course, structures can be devised which give a different impression, and some of them will be entirely genuine. But where, say, the terms of acquisition and occupation of the matrimonial home are arranged between the husband in his personal capacity and the husband in his capacity as the sole effective agent of the company (or someone else acting at his direction), judges exercising family jurisdiction are entitled to be sceptical about whether the terms of occupation are really what they are said to be, or are simply a sham to conceal the reality of the husband’s beneficial ownership.[3]

[2] [2013] 2 AC 415 at [52].

[3] The third reason is just an example or facet of the second.
A sham argument was rejected in *Skyparks v Marks* [2001] WTLR 607. But sham depends on the facts in each case.

In *Prest*, the refusal to co-operate by the companies concerned was said to evidence in favour of corporate nomineeship. It seems to me an exaggeration to say corporate nomineeship will *normally* be the intention where a company owns legal title to the family home. I have wondered whether there is a divide between the family and chancery divisions of the High Court, despite protestations to the contrary;[4] but perhaps corporate nomineeship is more common in those family law cases which come before the courts, while not typical of the whole. It would need some empirical research to answer that.

However that may be, there should be no difficulty in arranging beneficial ownership in the company, if that is what is desired, given proper advice to the client, proper documentation, and competent company directors who can attest that they know and fulfil their duties as directors. Proper conveyancing, company accounts and a lease or licence agreement between the company and the occupier are important indicators of corporate beneficial ownership.

In some cases the taxpayer may wish to argue that the company *does* hold property as nominee, to avoid benefit in kind, ATED and other charges associated with corporate ownership. In particular, if a person is a shadow director, that supports the view that the company is not beneficial owner,[5] which may be helpful from a tax viewpoint.

39.3.2 *Company ownership: Chattels*

Similar issues may arise as for the family home, but there may be a further conveyancing issue. The Bills of Sale Act 1878 (in short) applies where a person makes a transfer of goods (a "bill of sale" is widely defined) and retains possession of the goods. This could apply on a transfer from an individual to a trust or to a company. The transfer is void as against the trustees in bankruptcy of the transferor unless the bill of sale is registered in a public register. This is to prevent fraud on creditors. However, it really does not matter if a transfer of chattels is void as against a trustee in bankruptcy, in the event that the individual became bankrupt. After all, every gift and transaction at an undervalue can in principle be set aside

[4] *Prest* at [37]: "Courts exercising family jurisdiction do not occupy a desert island in which general legal concepts are suspended or mean something different. If a right of property exists, it exists in every division of the High Court and in every jurisdiction of the county courts. If it does not exist, it does not exist anywhere."

[5] *M v M* 16 ITELR 391 at [214].

within two years,[6] but no-one suggests that has significant tax implications for solvent taxpayers. Thus registration of a transfer of chattels (the bill of sale) is not necessary, and in practice it is never done.

39.4 "Family" and "household"

39.4.1 *"Family"*

Section 721(4) ITEPA defines "family":

> For the purposes of this Act the following are members of a person's family—
> (a) the person's spouse or civil partner,
> (b) the person's children and their spouses or civil partners,
> (c) the person's parents, and
> (d) the person's dependants.

Stepchildren are excluded, as are parents-in-law. They will however still qualify as family if they are dependants.

Illegitimate children do not count as "children"; see s.721(6) ITEPA.[7] This is unacceptable by contemporary standards, but it will not often matter, and the parent is not likely to complain. Section 721(6) should obviously be repealed.

39.4.2 *"Household"*

Section 721(5) ITEPA provides:

> For the purposes of this Act the following are members of a person's family or household—
> (a) members of the person's family,
> (b) the person's domestic staff, and
> (c) the person's guests.

39.4.3 *Which family*

In *Baylis v HMRC*[8] a benefit (care home fees) was provided to a non-employee who was:

(1) spouse of one employee ("the husband")
(2) mother of another employee ("the daughter")

[6] Section 339 Insolvency Act 1986.

[7] In Scots law there are no illegitimate children, so this does not apply to Scots domiciled individuals; see 4.18.5 (Abolition of illegitimacy).

[8] [2017] SFTD 217.

It seemed that:

(1) The husband was taxable as there was a benefit to his family (to his spouse) under s.721(4)(a).
(2) The daughter was taxable as there was a benefit to her family (to her mother) under s.721(4)(c).

But they could not both be taxable, so which was it to be? HMRC argued that the employer had the right to choose! but that could not be right. The tribunal inventively found the solution in the order in which the relationships were listed in s.721(4), so the husband was taxable in priority to the daughter.

The decision ought to be confirmed by statute, and it leaves a few loose ends, but it seems as good a solution as any other.

39.5 "Director"

Section 67(1) ITEPA provides:

> In the benefits code "director" means--
> (a) in relation to a company whose affairs are managed by a board of directors or similar body, a member of that body,
> (b) in relation to a company whose affairs are managed by a single director or similar person, that director or person, and
> (c) in relation to a company whose affairs are managed by the members themselves, a member of the company,[9]
>
> and includes [a shadow director, discussed in the next section below].

39.6 Shadow directors

39.6.1 *"Shadow director"*

Section 67(1) ITEPA provides:

> In the benefits code "director" ... includes any person in accordance with whose directions or instructions the directors of the company (as defined above) are accustomed to act.

Such a person is referred to as a **"shadow director"**.[10]

[9] When are the affairs of a company managed by the members themselves? An example is an unincorporated association which is a company for UK tax purposes but which may have members but no directors. Likewise some foreign law entities, for instance, perhaps, a foreign law LLP.

[10] A note on terminology. This useful and familiar label was first used in the Companies Act 1980. The wording of the concept behind the label goes back to the Companies

In *Secretary of State for Trade and Industry v Deverell* Morritt LJ comments in numbered paragraphs:[11]

> (1) The definition of a shadow director is to be construed in the normal way to give effect to the parliamentary intention ascertainable from the mischief to be dealt with and the words used. In particular, as the purpose of the Act is the protection of the public and as the definition is used in other legislative contexts, it should not be strictly construed because it also has quasi-penal consequences in the context of the Company Directors Disqualification Act 1986.

This suggests that the comments in *Deverell* will apply in all contexts where the standard definition of shadow director is used, including tax contexts. It is difficult to argue that the shadow director concept should have a different meaning in a tax context than in the director disqualification context of *Deverell*. But *Deverell* is considering "shadow directorship" in the context of a commercial trading company. The position of a relatively quiescent property holding company is different.

> ... (2) The purpose of the legislation is to identify those, other than professional advisers, with real influence in the corporate affairs of the company.

This paraphrase does not take us very far because it only raises the question as to what is meant by "real[12] influence".

> But it is not necessary that such influence should be exercised over the whole field of its corporate activities. ...

This is uncontentious. The BiK charge could apply where a trust held a company holding both a home and investments, even though the shadow director did not give instructions relating to the investments but only to the home.

> (3) Whether any particular communication from the alleged shadow director, whether by words or conduct, is to be classified as a direction

(Particulars as to Directors) Act 1917.

[11] [2001] Ch 340 at p.354. In his readable memoir, Kerr LJ deprecates "quotable pontific paragraphs, preferably numbered": *As Far as I Remember* (2006), p.285. Passages of that kind can be useful, but the point is not to elevate them to a higher status than other types of case law.

[12] The dangerous and beguiling word "real" is normally an indicator of vague if not sloppy legal thinking. See App 7.1 (What Do We Mean by "Real"?).

> or instruction must be objectively ascertained by the court in the light of all the evidence.

Obviously.

> In that connection I do not accept that it is necessary to prove the understanding or expectation of either giver or receiver. In many, if not most, cases it will suffice to prove the communication and its consequence. Evidence of such understanding or expectation may be relevant but it cannot be conclusive.

This is extraordinary. "Directions or instructions" are a subset of "communications" and the feature that distinguishes them is that a person giving instructions expects them to be followed and the person receiving them understands this.

> Certainly the label attached by either or both parties then or thereafter cannot be more than a factor in considering whether the communication came within the statutory description of direction or instruction.

This at least is correct.

> (4) Non-professional advice may come within that statutory description. The proviso excepting advice given in a professional capacity[13] appears to assume that advice generally is or may be included.

This is extraordinary, for the concept of "directions or instructions" is the antithesis of "advice". The distinguishing feature is that the former is mandatory and the other is not. This is confirmed (if confirmation was necessary) by Hansard. When (what is now) the proviso was proposed, the Lord Chancellor (Viscount Cave) said:

> it is unnecessary, because in my view the expression "any person in accordance with whose directions or instructions the directors are accustomed to act" does not include a person who merely gives them advice. Directors do not act by the directions or on the instructions of their solicitor or their auditor. Those persons advise them, but do not direct or instruct them.[14]

[13] See s.67(2) ITEPA:
"... a person is not to be regarded as a person in accordance with whose directions or instructions the directors of the company are accustomed to act merely because the directors act on advice given by that person in a professional capacity."

[14] *https://api.parliament.uk/historic-hansard/lords/1927/may/26/companies-bill-hl*

The clause was added for clarity. Lord Banbury said:

> This seems to me to be an extremely complicated Bill and therefore any Amendment which makes it clearer should, I venture to say, be accepted. The Amendment of the noble Earl makes it quite clear that any person who ... gives advice professionally shall not be included as a director. The Lord Chancellor says that is not necessary because it is already the meaning and interpretation of the Bill, but speaking only as an ordinary layman, I am not at all sure if I were asked to give my opinion on that, that I should think that really was so. Consequently there might be a certain number of people who would take advantage of this to go to law, spend money in bringing an action and then find they had no grounds for their case. ... I do think it would be an advantage if some words were put in to make the section quite clear.[15]

Of course, advice may slide imperceptibly into directions. For instance, if a solicitor advises a company that a particular act is required by law, and there is no option but too adopt it. Such advice may arguably be characterised as a direction or an instruction, and here the proviso may be useful.

The proviso excepting advice given in a professional capacity, properly understood, does not shed any light on the general meaning of shadow director.

The court in *Deverell* continued:

> Moreover the concepts of "direction" and "instruction" do not exclude the concept of "advice" for all three share the common feature of "guidance".

The less said about this line of reasoning the better.

> (5) It will, no doubt, be sufficient to show that in the face of "directions or instructions" from the alleged shadow director the properly appointed directors or some of them cast themselves in a subservient role or surrendered their respective discretions. But I do not consider that it is necessary to do so in all cases. Such a requirement would be to put a gloss on the statutory requirement that the board are "accustomed to act" "in accordance with" such directions or instructions. It appears to me that Judge Cooke, in looking for the additional ingredient of a subservient role or the surrender of discretion by the board, imposed a qualification beyond that justified by the statutory language.

[15] *https://api.parliament.uk/historic-hansard/lords/1927/may/26/companies-bill-hl*

If the statutory language were: "in accordance with whose *wishes* the directors were accustomed to act" this would be a fair comment. But the expression "directions or instructions" shows that the position must be one where the shadow director commands and the properly appointed directors obey.

The points made in the passage are wholly negative. That is, in determining the issue of "shadow directorship":

(1) The understanding or expectation of the parties is *not* conclusive.
(2) The label attached by the parties is *not* conclusive.
(3) The fact that the communication is "advice" is *not* conclusive (except in the case of professional advice).
(4) The fact that the properly appointed directors surrender their discretions or act in a "subservient" role is *not* essential.

This does not answer the question: how *does* one identify a shadow director? The mere fact that there is a stream of communications from the individual to the company, which is acted on by the company, is not conclusive. The author regularly sends "communications" to Amazon, and Amazon act on those communications without fail. Yet the author is not a shadow director of Amazon. The author regularly sends directions (a cheque is a direction) to his bank and the bank act on those directions without fail. Yet the author is not a shadow director of the bank. In the 4th edition of this work I concluded:

> one can expect some back-tracking, refinement or qualification from the Courts in cases they regard as more meritorious than that of Mr. Deverell.

This has now been confirmed by *Ultraframe v Fielding*:[16]

> 1267 ... where the alleged shadow director is also a creditor of the company, he is entitled to protect his own interests as creditor without necessarily becoming a shadow director.
> 1268 [Counsel] submitted that it is critical to distinguish the position of a lender (whether or not also a shareholder) from that of a director. A lender is entitled to keep a close eye on what is done with his money, and to impose conditions on his support for the company. This does not mean he is running the company or is emasculating the powers of the

[16] [2005] EWHC 1638, [2007] WTLR 835.

> directors, even if (given their situation) the directors feel that they have little practical choice but to accede to his requests. Similarly with customers who may, because of their buying power, be able effectively to dictate conditions to their suppliers (or the other way around). In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position. To find otherwise would place a wholly unfair and unnatural burden on men of business. In broad terms, I accept this submission.

The approach which applies to a creditor of the company also applies to a beneficiary of a trust which holds the company: they are entitled to protect their own interests … without necessarily becoming a shadow director … In other words a position of influence (even a position of strong influence) is not necessarily a a shadow directorship.

HMRC have in the past argued that where someone resides in a property held by a company which is held by a trust of which that person is a beneficiary, it is (at least) highly likely that that person must be a shadow director.[17] This is unjustified for the reason set out in *Ultraframe*.

Suppose a person treats the property owned by the company as their own and has no dealings with the directors: they just ignore them. They do nothing (except perhaps charge their fees). In such a case the company may be a sham (or nomineeship). Whether or not that is so, the individual is not a shadow director. They give no instructions.

A non-resident person may be a shadow director, but may fall outside the BiK charge for other reasons.[18]

The definition of shadow director is restricted to those who control all or the majority of the directors on a company's board. Control of a minority of directors does not suffice.

39.6.2 *Agent as shadow director*

It is suggested that an agency agreement under which the occupier of a property is responsible for routine maintenance matters on behalf of the company would not make the individual a shadow director as long as the decision to enter into contract was properly made by the directors and the

[17] Note that there is no support for this view in the HMRC Manuals. Employment Income Manual 11413 [Apr 2022] states correctly that *where* an individual residing in property is a shadow director, there is a BiK charge. It does *not* state that the mere fact of occupation makes a shadow directorship "highly likely".

[18] See 39.40 (Benefits in kind: Non-resident).

directors properly supervise the work of the individual.[19] This should not be difficult if the directors understand their duties are to all beneficiaries of the trust (not just to the settlor) and if the individual occupier of the property also understands this. It would be different if the agency agreement covered matters not usually delegated by an investment company to an agent.

39.6.3 *Occupier as shadow director*

Suppose an existing company purchases a home or chattels for use by a UK resident foreign domiciliary. The choice of a home and its chattels is a personal one and the individual would normally have to give at least a"communication" to the company which raises at least potential shadow directorship issues.

The position is different if:

(1) trustees purchase property directly, and
(2) the trustees transfer the property to a foreign company on their own initiative and without reference to the occupier.[20]

In this scenario the decision involving the company's acquisition is that of the trustees, not the individual.

It would be best if the directors and trustees were separate persons. All communications should be through the trustees and not the directors of the company.

If the foreign domiciliary desires to sell and, perhaps, purchase another home, they should communicate their wishes to the trustees. Then:

(1) The trustees may put the company into liquidation. The liquidator would sell the property.
(2) Alternatively, the trustees may sell the company.

In these circumstances it would be difficult to argue that the occupier was a shadow director.

39.6.4 *Charge on shadow director*

The House of Lords decided in *R v Dimsey*[21] that the benefits code applies

[19] This is consistent with the rule that the activities of an agent appointed by trustees to manage the day to day affairs of a trust were not relevant in determining the place of general administration (which was formerly important for determining CGT trust residence).See the 5th edition of this book, para 5.6.2.

[20] In the case of land, this may be done between contract and completion.

[21] [2001] UKHL 46. The reasoning continues to apply under ITEPA.

to shadow directors. In the context of a company holding a residence, the charge is unfair to a shadow director who (typically) does no work for the company. Income tax is, or should be, a tax on income, or at least a tax on something. This is a tax on nothing. But there it is.[22]

EI Manual states:

> **EIM11413 Avoidance area: shadow directors** [Apr 2022]
> A person in accordance with whose directions or instructions the directors of a company are accustomed to act is deemed to be a director of that company by s.67(1) ITEPA 2003. Where such a person (known as a shadow director) is provided with living accommodation by the company the individual will be within Part 3 Chapter 5 ITEPA 2003 in the same way as if the individual had held a formal appointment as a director. Section 67(1) defines director in relation to the benefits code and s.63 ITEPA 2003 includes Part 3 Chapter 5 within the benefits code. This interpretation was supported by the House of Lords in October 2001 in the case of *R v Allen*. Lord Hutton held that
>
> > "it was the intention of Parliament in enacting the concluding part of [what is now s.67(1) ITEPA] s.168(8) that accommodation and benefits in kind received by a shadow director should be taxed in the same way as those received by a director."
>
> ...Many shadow directors are individuals who, although not domiciled in the UK, have come to work and reside here. In order to avoid a possible charge to inheritance tax, which could be imposed if such an individual died whilst working in the UK, an arrangement is made to set up an offshore company that owns the UK property in which the individual lives. Where the individual is a shadow director of that offshore company s.97(2) ITEPA 2003 deems the UK property to be provided to the shadow director by reason of the deemed employment.

In practice taxpayers (if they have considered the matter at all) generally seem to have taken the view on their facts that they are not shadow directors. HMRC have to take the initiative to identify the cases suitable for investigation. In the author's experience even accommodation cases that HMRC have tentatively identified are not pursued with much gusto if at all. One wonders why. Perhaps the unfairness of the charge holds

[22] The problem did not unduly concern the House of Lords because of the countering unfairness to HMRC of the case where the services of a shadow director were as valuable as an actual director ([2001] UKHL 46 HL at [19]; two wrongs made a right to tax.

HMRC back.[23] Perhaps it is the consideration that if cases are identified, the taxpayer can still avoid a charge by belated reimbursement.

R v Allen[24] was an accommodation case. In law, the same points apply to the benefits code generally. In practice HMRC may well not pursue the point, and it is noteworthy that the only references to shadow directors in the EI Manual are in the context of accommodation.

HMRC practice may change without notice, and taxpayers cannot rely on it. Taxpayers cannot plan on the assumption that HMRC's benign neglect of the provisions will apply to them.

39.7 "Employment" & related terms

Section 66 ITEPA provides:

> (1) In the benefits code—
> (a) "employment" means a taxable employment under Part 2, and
> (b) "employed", "employee" and "employer" have corresponding meanings...
>
> (3) For the purposes of the benefits code an employment is a "taxable employment under Part 2" in a tax year if the earnings from the employment for that year are (or would be if there were any) general earnings to which the charging provisions of Chapter 4 or 5 of Part 2 apply.
>
> (4) In subsection (3)—
> (a) the reference to an employment includes employment as a director of a company, and
> (b) "earnings" means earnings as defined in Chapter 1 of this Part.[25]

Why does the benefits code not use the standard ITEPA definitions?[26] The definitions are the same. The reason lies in the long and convoluted history of the provisions.

Section 66(2) dots *I*'s and crosses *T*'s:

> Where a Chapter of the benefits code applies in relation to an employee—

[23] Conceivably (this is surmise) HMRC "officially" took the accommodation BiK point to deter IHT planning, but at the same time did not pursue it in practice because of the unfairness. If so, the tactic (while contrary to the Rule of Law) worked up to a point.

[24] [2001] UKHL 46.

[25] See 34.4.1 ("Ordinary" earnings).

[26] For this definition, see 34.3 (Employment/employer/employee).

(a) references in that Chapter to "the employment" are to the employment of that employee, and
(b) references in that Chapter to "the employer" are to the employer in respect of that employment.

Was it really necessary to say that?

39.8 Accommodation/benefit charge

There is similar wording used in the following:[27]

Topic	**ITEPA gateway provision**
Accommodation	s.97
Benefit BiK charge	s.201
Employment-related securities	s.421B
Securities options	s.471

Employment-related securities/options need a book to themselves, and this work does not cover them. But I discuss all four provisions here because guidance on one may be relevant to the others.

The gateway provision offers two tests which I call:

Test (my term)	**Accommodation/benefits**	**Securities/security option**
Employment-causation test	s.97(1)/s.201(2)	s.421B(1)/471(1)
Employer-provision test	s.97(2)/s.201(3)	s.421B(3)/s.471(3)

39.9 Employment-causation test

Accommodation: s.97(1)	**Benefits: s.201(1)**	**Securities: s.421B(1)**	**Security option: s.471(1)**
This Chapter [Chapter 5 Part 3] applies to living accommodation provided	In this Chapter [Chapter 10 Part 3] ... "employment-related benefit" means a benefit, other than an excluded benefit, which is provided in a tax year—	Subject as follows (and to any provision contained in Chapters 2 to 4A) those Chapters apply to securities, or an interest in securities, acquired by a person	This Chapter applies to a securities option acquired by a person
for— (a) an employee, or (b) a member of an employee's family	(a) for an employee, or (b) for a member of an employee's family	[No express equivalent!]	[No express equivalent!]

[27] This is not a full list.

or household,	or household,		
by reason of the employment.	by reason of the employment.	where the right or opportunity to acquire the securities or interest is available by reason of an employment of that person or any other person.	where the right or opportunity to acquire the securities option is available by reason of an employment of that person or any other person.

The main requirements here are in short:

(1) (a) Accommodation/benefit is provided for an employee or
(b) Securities/option acquired by a person under right available
(2) (in each case) by reason of employment.

39.9.1 *The two causation tests*

There are two distinct causation tests, or so it has been said, and if that is right we need labels for them:

Causation test	**Statutory wording**	**See**
Benefit in kind causation test	By reason of employment”	*discussed here*
Ordinary earnings causation test	“therefrom” ie from the employment	34.4.1

That these are distinct tests is supported by high authority. In *Wicks v Firth*:[28]

> It seems to me that the words “by reason of” are far wider than the word “therefrom” in [s.19 ICTA 1988]. They are deliberately designed to close the gap in taxability which was left by the House of Lords in *Hochstrasser v Mayes*[29].

And in *Mairs v Haughey*:[30]

> I respectfully agree ... that the words “by reason of” in s 154 are wider than the word "therefrom" in s 19(1) [ICTA].

There is in fact no perceptible difference between:

[28] p363; Watkins LJ agreed : p.372 . This point was not considered on the appeal.

[29] 38 TC 673.

[30] 66 TC 273 at p.312.

(1) *by reason of* an employment, the wording of the benefit in kind causation test; and
(2) *from* an employment, the wording of the ordinary income causation test.

What happened was that the Courts wished to step back from the wrong turn which the law took in *Hochstrasser v Mayes* and seized on the difference in wording to justify it. But since the ordinary income causation test has moved on since *Hochstrasser v Mayes* I am still not sure that there is much difference.

However that may be, a satisfactory tax system would have only one employment-causation test, the same applying for ordinary earnings and for benefits in kind. That change cannot be achieved by statute without a change of wording which would lead to a review of all the existing case law, which is a high price for coherence and simplicity. But the Supreme Court could bring coherence to the topic, and merge the two tests, if the opportunity arises.

39.9.2 *What is the test?*

Since we have a causation test in the benefit in kind code, we need to define it. In *Wicks v Firth*, Lord Denning said:[31]

> [1] The words cover cases where the fact of employment is the *causa sine qua non* of the fringe benefits, that is, where the employee would not have received fringe benefits unless he had been an employee.
> [2] The fact of employment must be one of the causes of the benefit being provided, but it need not be the sole cause, or even the dominant cause. It is sufficient if the employment was an *operative cause* - in the sense that it was a condition of the benefit being granted. In this case the fact of the father being employed by ICI was a condition of the student being eligible for an award.

Oliver LJ said:

> Speaking only for myself I do not, in the case of this legislation, find the philosophical[32] distinction between a "causa causans" and a "causa sine

[31] p363; Watkins LJ agreed : p.372 . This point was not considered on the appeal.

[32] "Philosophical" here is used rhetorically and pejoratively. But the reader may think the law needs more rather than less philosophy when grappling with causation, which HLA Hart sought to provide in his influential *Causation in the Law* 2nd ed, (1985).

> qua non" helpful.

Distinctions between different concepts or tests of causation are certainly necessary. Latin terminology is not (or at least, not nowadays) a helpful way to express them.[33] But with or without the use of Latin terminology, what *is* the benefit in kind causation test? Oliver LJ put it this way:

> One is directed to see whether the benefit is provided by reason of the employment and in the context of these provisions that, in my judgment, involves no more than asking the question "what is it that enables the person concerned to enjoy the benefit?" without the necessity for too sophisticated an analysis of the operative reasons why that person may have been prompted to apply for the benefit or to avail himself of it.

I am not sure that there is much (if any) difference between the two judges, because although Lord Denning at [1] appears to put forward a simple "but for" test, the test is somewhat refined at [2]. But case law has generally perceived a difference, and favoured Oliver LJ's approach to the meaning of "by reason of".[34] It is sufficient to cite *Mairs v Haughey*:[35]

> I prefer, with respect, the test suggested by Oliver L.J. which involves asking the question "what is it that enables the person concerned to enjoy the benefit?" than the *causa sine qua non* test suggested by Lord Denning.
> ... if one does not apply to [benefits in kind] the *causa causans* test approved by the House of Lords in relation to s 19(1) [ICTA],[36] a *causa sine qua non* may constitute a "reason" for the provision of a benefit. But I consider, with respect, that the *causa sine qua non* test suggested by Lord Denning is too wide and could let in a factor in the past which, in ordinary language, would not constitute a "reason" for the provision of the benefit.

Vermilion v HMRC offers generalities:[37]

[33] See 34.5.1 (Latin causation test rejected).

[34] See *HMRC v Vermilion Holdings* [2023] UKSC 37 at [12], citing 3 cases:
Mairs v Haughey [1992] STC 495 at p.525
Wilcock v Eve [1995] STC 18 at p.29
Charman v HMRC [2022] 1 WLR 2277 at [47]

[35] 66 TC 273 at p.312.

[36] The reference is to *Hochstrasser v Mayes* 38 TC 673 at p 705 but see 33.5.1 (Latin causation test rejected).

[37] [2020] UKUT 162 (TCC) at [71]. In the appeal to the Supreme Court, the causation test was not considered.

> What we take from *Wicks v Firth* is that the phrase "by reason of employment" is to be given its ordinary meaning (!) and must be considered in the circumstances of the particular case. We note also that the employment need not be the sole reason: it is enough that the employment was a condition of a benefit being granted.

Once we have agreed the words which express or explain any causation test, which whatever they are, must be general words, we then have to apply them to the facts of individual cases; that is where the real difficulty lies, and that is where such guidance as exists must be found.[38] In *Wicks v Firth*, if there was substantial disagreement on the benefit in kind causation test (which I doubt), there was at least agreement on the outcome. In that case the benefit in kind was a scholarship under a scheme limited to employees' children, and this benefit was provided by reason of employment:[39]

> In this case the fact of the father being employed by ICI was a condition of the student being eligible for an award. There were other conditions also, such as that the student had sufficient educational attainments and had a place at a university. But still, if the father's employment was one of the conditions, that is sufficient.

39.10 Employer-provision test

Accommodation: s.97(2)	**Benefits: s.201(3)**	**Securities: s.421B(3)**	**Security option: s.471(3)**
Living accommodation provided for any of those persons	A benefit provided	A right or opportunity to acquire securities or an interest in securities made available	A right or opportunity to acquire a securities option made available
by the employer	by an employer	by a person's employer, or by a person connected with a person's employer,	by a person's employer, or a person connected with a person's employer,
is to be regarded as provided by reason	is to be regarded as provided by reason	is to be regarded for the purposes of	is to be regarded for the purposes of

[38] *Charman v HMRC* [2021] EWCA Civ 1804; *Vermilion v HMRC* (not yet final).

[39] p363.

of the employment...	of the employment...	subsection (1) as available by reason of an employment of that person ...	subsection (1) as available by reason of an employment of that person...

[Personal relationship exemption: see 79.9 (Personal relationship exemption)]

The main requirements here are in short:

(1) Accommodation/benefit is provided by the employer or

(2) Securities/option acquired under a right made available by the employer

There is no requirement that the provision is actually by reason of employment. In this case, causation is not relevant. However accommodation/benefits do have to be "provided by" the employer and securities/options have to be "made available by" the employer/connected person.

In *HMRC v Vermilion Holdings*:[40]

> It is not difficult to ascertain the purpose of the deeming provision in section 471(3). The causation questions which can arise under section 471(1) may be difficult and may give rise to disagreement among judges as has occurred in this case. To avoid such difficult questions, subsection (3) creates a bright line rule: if a person's employer (or a person connected to that person's employer) provides the employee the right or opportunity to acquire a securities option, that right or opportunity is conclusively treated as having been made available by reason of the employment of that person (unless subsections (a) and (b) apply). This involves a straightforward examination of the agreement or transaction to ascertain who conferred the right or opportunity. The question is not concerned with the reason why the employer conferred the right or opportunity.

The facts of *Vermilion* were:

(1) The taxpayer (at the time, a consultant) was granted a share option which was not provided by reason of employment, or provided by an employer, so was outside the income tax charge.

(2) Subsequently under a reorganisation carried out for commercial reasons, that option was abandoned and a new one granted, at a time

[40] [2023] UKSC 37 at [24], reversing the Court of Session decision which had been criticised in the 2023/24 edition of this work.

when the taxpayer was an employee.

In these circumstances a number of judges in the lower courts thought that the income tax charge was anomalous, absurd and unjust. The supreme court found that it was none of these.[41] One might conclude that anomaly, absurdity and injustice are matters on which opinion may differ; but I think it would be more accurate to say that these are expressions commonly used (or misused) for rhetorical or adversarial purposes. The reader may think the truth lies between these two extremes: the outcome was somewhat unfair. I only say "somewhat" unfair because it should have been possible to retain the existing option, perhaps in varied form, rather than cancel it and grant a new one. The moral is that more care needed to be taken in the drafting. It is often the case that drafting determines outcomes.[42]

But however one assesses the level of unfairness, it is in the nature of a bright line test that outcomes can be unfair. The alternative is uncertainty, which may be worse than unfairness.[43]

[41] at [33].

[42] See app 4.3 (Contract states consideration).

[43] In the 2023/24 edition, I criticised the Court of Session decision [2021] CSIH 45 for this reason, saying:

> In *Vermilion v HMRC*, by a majority decision, the Court of Session gave an narrow reading to the scope of the employer-provision test. The Court raised the example of a bank making a securities option available to customers, some of whom would be employees and others not. Even HMRC did not argue the bank's employees were taxable, though if one takes the words literally, they must be. As an exercise in advocacy this concession was no doubt a tactically wise one. So everyone agreed that this was not within s.471(3); but what then is the test of taxability?
>
> Lord Malcolm floated a capacity test:
>
> > In the bank example mentioned above the benefit was made available by the employer, but not in that capacity; not as the recipient's employer.
>
> That is probably the best solution. Though if this test is met, the securities option would be available "by reason of" employment, and the provision test would not add anything.
>
> HMRC proposed a "real link" test (at [66]). References to reality do not much assist us, see App 7.1 (What do we mean by real), so that amounts to a sufficient-link test by a more attractive name; but it would not possible to know what amounts to a real or sufficient link until we have many more decided cases. So that is no more satisfactory, and the reader looking for certainty may think, much less.
>
> Or perhaps the test is whether the tax charge is "anomalous, absurd and unjust". Two of the 3 judges thought that this was the case, and one disagreed; which only shows that this is not a clear test either.

I concluded: "Let us hope the final decision leaves the law in a clearer state." And

39.10.1 *Causation/provision tests compared*

In short:

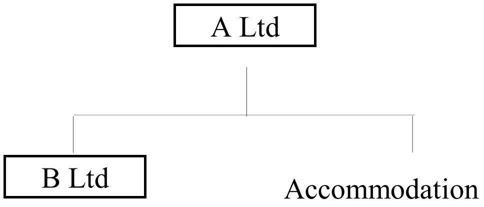
(1) Where accommodation/benefit is provided by the employer, it does not matter if it is actually provided by reason of employment: it is deemed to be so provided.

(2) Where accommodation/benefit is not provided by the employer, the charge only applies if the accommodation is actually provided by reason of the employment.

Suppose a company A Ltd owns:

(1) accommodation which it provides to T,

(2) another company, B Ltd:



If T is an employee of A Ltd, the accommodation is deemed to be provided by reason of the employment.

If T is an employee of B Ltd, T is only taxed if the accommodation is actually provided by reason of T's employment.

B Ltd is (by definition) a person "involved" in providing the accommodation[44] but B Ltd is not deemed to provide the accommodation.

39.10.2 *Made available - to whom?*

The accommodation/benefit rules apply when the accommodation/benefit is made available to employees or their families.

In the security/security option rules, there is a remarkable gap: the legislation does not say to whom the securities/options right must be made available. Where the right is provided by reason of employment, this does not matter. The causation test does the work and is sufficient. But what is the position under the provision test (deemed causation)? The legislation cannot apply where an employer/connected person makes the right

so it has.

[44] See 39.17.1 (Involved in providing).

available to anyone at all. The courts will need to read in some appropriate restrictions here, or else read the deeming provision restrictively. This is one of those (fortunately, rare) situations referred to in *Drummond v Collins*:[45]

> The Income Tax Acts are framed in very general terms. ... But Courts of Law have cut down or even contradicted the language of the Legislature when on a full view of the Act, considering its scheme and its machinery and the manifest purpose of it, they have thought that a particular case or class of cases was not intended to fall within the taxing clause relied upon by the Crown.[46]

Perhaps the provision (deemed causation) test only applies where the person to whom the right is made available is the employee.

39.10.3 *Who provides benefit*

If a benefit is provided, it is necessary to ask who provides it. For the benefit BiK charge, this is addressed by statute. Section 209 ITEPA provides:

> For the purposes of this Chapter [Chapter 10 Part 3] the persons providing a benefit are the person or persons at whose cost the benefit is provided.

The EI Manual provides:

> **EIM21220 who is the person providing a benefit?** [May 2022]
> [The Manual refers to s.209 and continues:]
> That person need not necessarily be the one who physically "hands over" the benefit to the director or employee so long as they are, ultimately, the source of the funds used to pay for the benefit, see *Wicks v Firth* (56 TC 318).
> In most cases it will be the employer who is paying for, and therefore providing, the benefit. If the benefit is provided by the employer, in other words he is incurring the cost of providing it, it is automatically deemed to have been provided by reason of the employment under Section 201(3) ITEPA 2003 (EIM20502).

[45] 6 TC 525 at p.538.

[46] The passage gives the example of *Colquhoun v Brooks* 2 TC 490, now of historic interest only; a currently relevant example is the addition of a bounty requirement to the definition of settlement-arrangement; see 87.4 (Settlement-arrangement definition).

> If the employer is a company and the employee gets the benefit from a subsidiary company it is the employer who is providing the benefit if the subsidiary charges the expense to the parent company.
> Occasionally the benefit will be provided by a third party. For example, a motor manufacturer may incur expense in providing benefits for the employees of dealers who sell the manufacturer's cars. ...

39.11 Personal relationship exemption

There is one exception to the employer-provision test:

Accommodation/benefits: s.97(2)/s.201(3)	**Securities/options: s.421B(3) /s.471(3)**
unless—	unless—
(a) the employer is an individual, and	(a) the person by whom the right or opportunity is made available is an individual, and
(b) the provision is made in the normal course of the employer's domestic, family or personal relationships.	(b) the right or opportunity is made available in the normal course of the domestic, family or personal relationships of that person.

39.12 Former employee

Former employees are not within the accommodation charge. HMRC agree. The EI Manual provides:

> **EIM11408 meaning of by reason of the employment: provided by someone other than the employer** [Dec 2021]
> ...Part 3 Chapter 5 ITEPA 2003 does not apply to a pensioner or a former employee. But if the continued use of living accommodation is provided after termination of employment see EIM12805 onwards [Termination payments and benefits]...

The rules for disguised remuneration, and EFURBS, would also need consideration.

39.13 Market rent

If a market price is paid for something, there is no benefit in the normal sense. The payment of a market price for something in the residual category takes the (non)benefit out of charge. The courts held that this principle applies to Chapter 6 of the benefits code (cars), and the reasoning would apply to the accommodation BiK charge.[47] The decision was a

[47] *HMRC v Apollo Fuels*; see 39.35.4 (Fair bargain rule).

surprising win for the taxpayer, but it is now of historical interest only. From 2016/17, the charge applies in the case of arm's length rent. Section 97(1A) ITEPA provides:

> In determining for the purposes of this Chapter whether this Chapter applies to living accommodation provided for an individual it is immaterial whether or not the terms on which it is provided constitute a fair bargain.

39.14 Accommodation: The charge

Section 102(1) ITEPA provides:

> If living accommodation to which this Chapter applies is provided in any period—
> (a) which consists of the whole or part of a tax year, and
> (b) throughout which the employee holds the employment,
> the cash equivalent of the benefit of the accommodation is to be treated as earnings from the employment for that year.

This is not, strictly, a charging section, but it feeds into the general charge to tax on employment income.[48]

As to the meaning of "living accommodation" see 6.21.4 (Home/living accommodation compared).

39.15 Available but not used

EIM provides:

> **EIM11405 Living accommodation: meaning of provided:** [Dec 2021]
> ... Provided is not defined in the legislation and its meaning has not been considered by the Courts in relation to a charge under [what is now] Part 3 Chapter 5 ITEPA 2003. The word provided must be given its ordinary dictionary meaning of supplied or furnished with a thing.

This paraphrase does not take us far, but we move on:

> In some cases provided will mean available for use whereas in others it will mean actually used .... The meaning of provided is often an issue in the case of provided holiday living accommodation.
> **EIM11406 Meaning of provided: practical considerations** [Apr 2022]
> ... In deciding in a particular case whether provided means available for use, or means actually used, the following questions should be asked.

[48] See 34.4.2 ("General earnings"); 34.6 (Charge on employment income).

> - Who can use the living accommodation? We accept that if living accommodation is genuinely available for use by more people than could actually use it at any one time then provided only means the periods actually used. For example if five unrelated employees were allowed to use an employer owned two bedroom holiday villa we would only seek a provided living accommodation charge on each employee for the period in which that employee actually used the villa.
> - Why was the living accommodation bought or rented and how has it been used since acquisition? If the living accommodation was bought as holiday accommodation for a director and family, provided is likely to mean available for use. By contrast if it was bought as a genuine letting business by the employer and has been let out commercially then provided will only mean the periods of actual use by the employee. ...

EIM11421 to 11423 provides three examples. In the first example accommodation is provided as a holiday home solely for husband and wife directors:

> **EIM11421 Meaning of provided: Example 1** [Jan 2021]
> ... A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company.
> *The employer advises that the sole reason the property was bought was as a holiday home for the husband and wife. It has only been used by them as a holiday home.*[49]

The HMRC analysis is as follows:

> We would argue in this case that provided is equivalent to available for use. Assuming that the flat was habitable for the whole of the year we would seek a benefit under Part 3 Chapter 5 measured on availability for the whole of the year.
> The employer may argue that the husband and wife work full time and that this prevents them using the flat for more than the 4 weeks in the year of actual use and so they are effectively only provided with it for 4 weeks. We do not accept that argument.

[49] Author’s footnote: Emphasis added to show how example 1 differs from the others.

> If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91 the cash equivalent of the benefit is restricted to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £15,600 (£500 × 26 + £100 × 26). Under s.108 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

In the second example, the property was purchased for holiday letting, and used for that purpose for 12 weeks, though the directors also used it for 4 weeks:

> **EIM11422. Meaning of provided: example 2** [Jan 2021]
> ... A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company.
> *The company bought the property to let as a commercial letting business. They have employed professional agents to let the property and have managed to let the property for 12 weeks of the year in addition to the period it was used by the husband and wife directors.*[50]

The HMRC analysis is as follows:

> In this case we would accept that provided is equivalent to actual use.
> If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91 the cash equivalent of the benefit is restricted to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £1,200 (£15,600 × 4/52). Under s.108 ITEPA 2003 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).
> You may ask why the s.105 ITEPA 2003 charge is not £1,600 (being 3 weeks at £500 in the skiing season and 1 week at £100 outside the season). The answer is that the wording of s.105(3) requires us to look at a proportion of the annual rent rather than the rent for the actual weeks it

[50] Author's footnote: Emphasis added to show how the example differs from the others.

> was used.

In the third example, the employer claimed that the property was purchased for holiday letting, but it was not actually used for that purpose, so the employer's narrative might reasonably be open to question:

> **EIM11423. Meaning of provided: example 3** [Jan 2021]
> ... A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company.
> *The employer says that the property was bought to let commercially and for the use of other employees of the company. In fact there have been no commercial lettings during the year and it has only been used for one week of the year by an employee of the company who was the director's secretary.*[51]

The HMRC analysis is as follows:

> This is a case where in practice we would seek to test whether what the employer was telling us was correct. For example, what if any evidence is there of attempts to let the property commercially or to advise other employees of the company of its availability for use by them? Based on that evidence it is then a matter of judgement whether in reality the sole reason the property was bought was as a holiday home for the husband and wife directors, in which case the tax consequences would be as in example EIM11421. Or it may be that genuine attempts have been made to let the property commercially and make it available for use by other employees of the company, in which case the tax consequences in example EIM11422 will follow.

39.16 Cash equivalent: Computations

The charge is on the "cash equivalent". Section 103 ITEPA provides:

> (1) The cash equivalent is calculated—
> (a) under s.105 if the cost of providing the living accommodation does not exceed £75,000; and
> (b) under s.106 if the cost of providing the living accommodation exceeds £75,000.

[51] Author's footnote: Emphasis added to show how the example differs from the others.

Thus there are two methods of calculating the cash equivalent, here called **"s.105 and s.106 computations"**. This is for historical reasons, the s.106 computation having been introduced in 1983 to supplement the ancestor of s.105. This structure makes the law twice as complicated as it need be. OTS noted the problem, but their conclusion was banal[52] and nothing has changed.

39.17 Cost of providing accommodation

One needs to know the "cost of providing living accommodation":
(1) in order to decide between the s.105 and s.106 computation;
(2) in order to make the s.106 computation (if applicable, as it usually is).

This expression is defined in s.104 ITEPA:

> **General[53] rule for calculating cost of providing accommodation**
> For any tax year the cost of providing living accommodation is given by the formula A + I – P

In short, *A* is **A**cquisition cost, *I* is **I**mprovement cost, and *P* is **P**ayment of reimbursement. In full detail:

> *A* is any expenditure incurred in acquiring the estate or interest in the property held by a person involved in providing the accommodation,
> *I* is any expenditure incurred on improvements to the property which has been incurred before the tax year in question by a person involved in providing the accommodation, and
> *P* is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—
> (a) reimbursement of A or I, or
> (b) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

I consider reimbursement further in 39.25 (Settlor finance).

[52] OTS, "Review of employee benefits and expenses: Interim report" (2013): **Conclusions**... 6.32 The calculation of the benefit, for those who are charged is outdated and anomalous. Logic would suggest it should be based on the current market value of the property but that has obvious practical issues as well as significant transitional impacts that need to be evaluated."
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/227088/ots_employee_benefits_interim_report.pdf

[53] For the exception see 39.21 (Revaluation: delayed occupation).

39.17.1 *Involved in providing accommodation*

This phrase is only used in the definition of "cost of providing living accommodation".[54] Section 112 ITEPA provides a wide definition:

> For the purposes of this Chapter [Chapter 5 Part 3] "person involved in providing the accommodation" means any of the following—
> (a) the person providing the accommodation;
> (b) the employee's employer (if not within para (a));
> (c) any person, other than the employee, who is connected with a person within para (a) or (b).

EN ITEPA explains:

> 412. This definition makes it clear that it is necessary to look beyond the employer and the apparent owner of an interest in the accommodation. This is anti-avoidance legislation to counter schemes which depress the cost to the employer by using intermediate owners of interests.

39.18 Home sub-£75k: Computation

Section 105 applies where the cost of providing accommodation does not exceed £75,000. This was a meaningful figure when the legislation was introduced in 1983 but inflation, the Chancellor's friend, has whittled away the real value of this limit so it must be exceptional now to find a purchase of less than £75,000. One might think the s.105 computation was a dead letter and one can turn directly to s.106. But s.106 refers back to s.105 so one needs to make the s.105 computation even in a s.106 case.

Section 105 ITEPA provides:

> (1) The cash equivalent is to be calculated under this section if the cost of providing the living accommodation does not exceed £75,000.
> (2) The cash equivalent is the difference between—
> (a) the rental value of the accommodation for the taxable period, and
> (b) any sum made good , on or before 6 July following the tax year which contains the taxable period, by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The key concepts are "rental value of the accommodation" and "making good".

[54] See 39.17 (Cost of providing accommodation) and 39.21 (Revaluation: delayed occupation).

39.18.1 *"Rental value"*

Section 105 ITEPA provides:

> (3) The "rental value of the accommodation" for the taxable period is (subject to subsections (4) and (4A) the rent which would have been payable for that period if the property had been let to the employee at an annual rent equal to the annual value. ...
> (4) Subsection (4A) applies where—
> (a) a rental amount is payable by the person ("P") at whose cost the accommodation is provided in respect of the whole or part of the taxable period ("the relevant period"), and
> (b) the amount so payable is payable at an annual rate greater than the annual value.
> (4A) Where this subsection applies—
> (a) subsection (3) does not apply to the relevant period, and
> (b) instead the "rental value of the accommodation" for the relevant period is the rental amount payable by P in respect of the relevant period.
> (4B) A reference in subsection (4) or (4A) to a rental amount payable by P in respect of the relevant period is to the sum of—
> (a) any rent for the period payable by P, and
> (b) any amount attributed to the period in respect of a lease premium (see sections 105A and 105B)
> (5) If the rental value of the accommodation for the taxable period does not exceed any sum made good by the employee as mentioned in subsection (2)(b), the cash equivalent is nil.

The key expression is "annual value". This is defined in s.110 ITEPA but it is not usually necessary to refer to that for UK property. ITEPA Explanatory Note states:

> 404. [Section 110] does not affect the Inland Revenue practice of using the gross rateable value as a proxy for "annual value". That practice will continue. The main use of this section is to provide guidance on how to arrive at the annual value of properties for which rent is not paid and in practice is only needed in cases where no gross rateable value can be found.[55]

[55] Likewise the EN at Change 23:
"These provisions [ss.110 and 207 ITEPA] will clarify how to find annual values in respect of those properties for which the practice of using gross rateable values or a proxy for them is inapplicable – for example overseas properties. In the case

The EI Manual provides:

> **EIM11434 Meaning of annual value for UK properties** [Mar 2022]
> ... The amount of annual value for UK properties is set out in the table below.
>
> | **Country** | **When first valued** | **Annual value to take** |
> |---|---|---|
> | England & Wales | All cases | The 1973 gross rating value |
> | Northern Ireland | All cases | The 1976 gross rating value |
> | Scotland | | 100/270 × 1985 gross rating value |
> | Anywhere in UK | No gross rating value set | Ask the appropriate District Valuer to confirm any estimated figure provided by the employer that you want to check.[56] |
>
> For the formula to convert a net rating value figure to a gross rating value figure see EIM11438.

Thus for most purposes the s.105 computation is rateable value less sums "made good" to the employer. That is usually a trivial amount which has no relation to the value of the benefit of the accommodation. It is a substantial amount in two cases:

(1) where the company employer pays a market rent for the property;
(2) where the property is not UK situate (and so there is no rateable value).

This practice (which is concession not law) exists for historical reasons. It is not surprising the Tax Law Rewrite did not think it appropriate to express all this in ITEPA. The rules are incoherent.

39.19 "Making good"

The concept of making good is relevant to the accommodation and the residual benefit BiK charges so I consider both together in this section.

39.19.1 *Making good: Meaning*

The EI Manual provides:

> **EIM21120 What is meant by "making good"** [Jan 2024]
> "Making good" simply means giving something in return for the benefit. What is being made good is the expense incurred by the employer or

of both these and other properties, all the current practices used in quantifying the cash equivalent of the benefit of living accommodation will continue."

[56] The Manual continues:
"If no such estimate is provided or the estimate is not acceptable the District Valuer will provide a (not negotiated) figure. If the taxpayer does not accept that figure the District Valuer will try to agree a figure with the taxpayer. For the procedure for referring to the District Valuer see EIM11437."

> other person providing the benefit. It follows that in order to make good that expense the employee will give money, or something that can be measured in money. Usually the employee will "make good":
>
> - by a direct payment or
> - by deduction from salary or
> - by a suitable debit to the employee's current account in the employer's books and records.
>
> Any of these methods is acceptable.
>
> The giving of services by the employee, or anything that is not measured in money terms is not "making good", see *Stones v Hall* (60 TC 737). (This content has been withheld because of exemptions in the Freedom of Information Act 2000)[57]
>
> As regards "making good" by waiver of remuneration see EIM21122.

It is clearly "making good" if:

(1) the company pays the costs of maintenance and insurance; and

(2) the individual reimburses the company by a cash payment.

Does the employee make good the cost if they pay the cost of maintenance and insurance directly? Section 110 ITEPA envisages that this expenditure will be paid by the employer. In addition, the maintenance of the building is probably not a "sum" made good. EIM Manual is equivocal:

> **EIM11439. Annual value of UK property: Employee responsible for repairs or insurance.** [Apr 2022]
>
> ... An employee may be responsible for the cost of repairs or insurance under the terms of his or her lease or employment. *(This content has been withheld because of exemptions in the Freedom of Information Act 2000.)*[58] As regards the discharge of the employee's pecuniary liability in respect of such items *see* EIM00580.

Note that the payment of a sum "making good" may constitute taxable property income of the company which receives it. The IHT and CGT

[57] Author's footnote: The "text withheld" announcement was added in June 2006. Previously the Manual stated "In any case where the taxpayer argues that an interest-free loan has been made to this employer specifically to make good the cost or value of a benefit, make a submission to Personal Tax (Technical), Solihull." That instruction probably survives in the withheld text.

[58] The text formerly read:
"If an employee claims an adjustment to the annual value (derived from the table in EI Manual 11434) because the facts of an employee's case are not those envisaged by s.110 ITEPA, make a full report to Personal Tax (Technical), Solihull."
It seems a safe bet that that passage survives in the withheld text.

implications may also need to be considered, but the sums involved may not be significant.

39.19.2 *Making good: Timing*

The time limit is 6 July following the tax year which contains the taxable period.[59]

39.20 Home over £75k: Computation

Section 106 ITEPA provides:

> **Cash equivalent: cost of accommodation over £75,000**
> (1) The cash equivalent is calculated under this section if the cost of providing the living accommodation exceeds £75,000.
> (2) To calculate the cash equivalent—
> *Step 1* Calculate the amount that would be the cash equivalent if s.105 applied (cash equivalent: cost of accommodation not over £75,000).

See 39.18 (Home sub-£75k: computation).

> *Step 2* Calculate the following amount ("the additional yearly rent")—
> ORI × (c) – £75,000)

In short, *ORI* is **O**fficial **R**ate of **I**nterest; *C* is **C**ost. In full detail:

> ORI is the official rate of interest in force for the purposes of Chapter 7 of this Part (taxable benefits: loans) on 6 April in the tax year, and
> C is the cost of providing the accommodation calculated—
> (a) in accordance with s.104 (general rule for calculating cost of accommodation),[60] or
> (b) in a case where s.107 applies (special rule for calculating cost of providing accommodation), in accordance with that section instead.[61]

The label "additional yearly rent" is misleading: the "additional yearly rent" calculated in this way will not bear a close relationship with the actual market rent.

[59] This rule was introduced in 2017. For the background, now of historical interest only, see HMRC, "Alignment of dates for 'making good' on benefits-in-kind" (2016) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/544638/Alignment_dates_making_good_benefits-in-kind_consultation.pdf*

[60] See 39.17 (Cost of providing accommodation).

[61] See 39.21 (Revaluation: delayed occupation).

> *Step 3* Calculate the rent which would have been payable for the taxable period if the property had been let to the employee at the additional yearly rent calculated under step 2.

This step reduces the "additional *yearly* rent" to that for the "taxable period" (defined in s.102(2)).

> *Step 4* Calculate the cash equivalent by—
> (a) adding together the amounts calculated under steps 1 and 3, and
> (b) (if allowed by subsection (3)) subtracting from that total the excess rent paid by the employee.

Section 106(3) ITEPA provides:

> In step 4—
> (a) para (b) only applies if, in respect of the taxable period, the rent paid—
> (i) by the employee,
> (ii) in respect of the accommodation,
> (iii) to the person providing it, and
> (iv) on or before 6 July following the tax year which contains the taxable period,
>
> exceeds the rental value of the accommodation for that period as set out in s.105(3) or (4)(b), as applicable, and
> (b) "the excess rent" means the total amount of that excess.

In short, the charge is (1) the s.105 computation (rateable value) and (2) (official rate of interest on purchase price less £75,000) less rent.

This works (more or less) where the s.105 computation is based on the nominal amount of rateable value. It gives double taxation where the s.105 computation is based on actual market rental value. ESC A91 gives relief here:

> *Living accommodation provided by reason of employment*
> This concession applies to living accommodation treated as earnings under ITEPA 2003 Part 3, Chapter 5. Where ITEPA 2003 s.106 applies and the cash equivalent of the benefit of the accommodation is calculated by reference to the annual rent the property might fetch on the open market, the Inland Revenue will disregard "the additional yearly rent". If "the additional yearly rent" is disregarded then the amount of "the excess rent" is deemed to be nil.[62]

[62] I do not understand the point of the last sentence, for if the additional yearly rent is disregarded, the "excess rent" is irrelevant.

39.21 Revaluation: Delayed occupation

Normally the s.106 computation is based on the employer's acquisition cost (ie historic cost). Market value of the property later is not relevant. This rule could favour HMRC, but as time passes it is likely to favour the taxpayer. In one case only there is an adjustment to market value. Section 107(1) ITEPA provides:

> This section contains a special rule for calculating the cost of providing living accommodation which—
> (a) operates for the purposes of step 2 of s.106(2) (calculating the additional yearly rent), and
> (b) accordingly only operates where the cost of provision for the purposes of s.106(1) (as calculated under s.104) exceeds £75,000.

In practice condition (b) will almost always be satisfied (except perhaps for property purchased many years ago).

Section 107(2) ITEPA provides:

> This section applies if, throughout the period of 6 years ending with the date when the employee first occupied the accommodation ("the initial date"), an estate or interest in the property was held by a person involved in providing the accommodation.
> It does not matter whether it was the same estate, interest or person throughout.

In short, this condition is that the property has been owned by the company for six years before the employee moves in.

Section 107(3) ITEPA provides:

> For any tax year the cost of providing the living accommodation for the purposes mentioned in subsection (1)(a) is given by the formula—
> MV + I – P

In short, *MV* is **M**arket **V**alue; *I* is **I**mprovement cost; *P* is **P**ayments in return. In full detail:

> MV is the price which the property might reasonably be expected to have fetched on a sale in the open market with vacant possession as at the initial date,
> I is any expenditure incurred on improvements to the property which has been incurred during the period—
> (a) beginning with the initial date, and
> (b) ending with the day before the beginning of the tax year, by a person involved in providing the accommodation, and

> P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—
> (a) reimbursement (up to an amount not exceeding MV) of any expenditure incurred in acquiring the estate or interest in the property held on the initial date,
> (b) reimbursement of I, or
> (c) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

This may arise where:

(1) a foreign domiciliary (or trust) purchases a company holding a property acquired more than six years previously;
(2) an individual then occupies the property and becomes a shadow director.

Next is an anti-avoidance provision to block an obvious scheme to devalue MV. Section 107(4) ITEPA provides:

> In estimating MV no reduction is to be made for an option in respect of the property held by—
> (a) the employee,
> (b) a person connected with the employee, or
> (c) a person involved in providing the accommodation.

Lastly, for completeness, there is transitional relief where the employee first occupied the property before 31 March 1983: para 21 sch 7 ITEPA.

39.22 Home for more than 1 employee

Section 108 ITEPA provides:

> **Cash equivalent: accommodation provided for more than one employee**
> (1) If, for the whole or part of a tax year, the same living accommodation is provided for more than one employee at the same time, the total of the cash equivalents for all of the employees is to be limited to the amount that would be the cash equivalent if the accommodation was provided for one employee.
> (2) The cash equivalent for each of the employees is to be such part of that amount as is just and reasonable.

EIM provides at 11411:

> **EIM11411 Provided to more than one employee in the same period: practical points** [Apr 2022]
> The following is an example of how s.108 ITEPA 2003 works.

An employer provides a 10-room house for the shared use of 3 unrelated employees. Each employee has sole use of a bedroom and shared use of the other 7 rooms. Without s.108 the cash equivalent of the benefit of the living accommodation provided to each employee would be 80% of the whole house. However s.108 limits the sum of the charges on the 3 of them to one full charge on the whole house. If there are no special factors each employee will be chargeable on the cash equivalent of a benefit of 33.3% of the cash equivalent for the whole house.

Section 108 is not relevant in some family situations. For example, a husband and wife both work for the same employer and live together in a house provided by their employer. The husband's job is the one that has accommodation provided with it and the wife's does not. The true construction here is that the living accommodation is only provided by the employer to the husband and the wife lives in it with her husband as part of normal domestic arrangements. So the full living accommodation charge would be on the husband with no charge on the wife.

By contrast, for an example of s.108 being relevant in a family situation, see example EIM11421.

39.23 Accommodation charge: Planning

Ways to avoid the entire accommodation BiK charge are (in short):

(1) to ensure that the occupier is
   (a) not an officer (ie not a director or company secretary), which is straightforward;
   (b) not an employee (which should be straightforward); and
   (c) not a shadow director; or
(2) not to use a company; or
(3) to reimburse the company for its expenditure.

39.24 Reimbursement solution

Reimbursement of "A" and "I" will solve the s.106 charge if it reduces the "cost of providing the accommodation" to nil (or at least to below £75,000).

Reimbursement does not avoid the s.105 charge (but that may be trivial, or avoided by "making good", or by arranging that the individual is not a shadow director).

39.24.1 *Who reimburses?*

Reimbursement is only deductible if it is made by the employee. For example, if

(1) a company purchases property;
(2) an individual (F) reimburses the cost;
(3) another individual (G) comes to occupy the property (and is a shadow director);

then F's reimbursement will not reduce the s.106 computation for G. Again, if a member of the family or household of the shadow director occupies the property, and that member of the family or household reimburses the company, that reimbursement will not reduce the s.106 computation for the shadow director. In practice this is not likely to happen often.

The IHT and CGT implications of making the reimbursement need to be considered.

39.25 Settlor finance

Sometimes a company structure is set up specifically for the purpose of purchasing the home. That is, there is an arrangement under which:

(1) The individual agrees in principle to purchase a property.
(2) The individual:
    (a) lends the purchase price to a company, or
    (b) transfers the purchase price to a trust which lends the purchase price to a wholly-owned company.
(3) The company makes the purchase.

This section considers whether an arrangement of this kind offers a defence to the accommodation BiK charge.

39.25.1 *Settlor finance: Making good*

The s.105 computation allows a deduction for:

> any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The taxpayer would have to show that the interest forgone on the interest-free loan from the individual (directly or indirectly to the company):

(1) is a "sum", and
(2) "makes good" the provision of the accommodation.[63]

Whether the interest forgone "makes good" the provision of

[63] It is assumed that the interest forgone exceeds the annual or rateable value of the accommodation, which will normally be the case.

accommodation is a question of fact. Assuming the reason the interest is forgone is to enable the company to provide the accommodation, this condition should be satisfied.

Whether the interest forgone is a "sum" is a question of law; it is suggested that the word should not be construed strictly or technically, and an amount of interest forgone may be a "sum". See 39.19 ("Making good").

Sums "made good" are not deductible as such in the s.106 computation. Rent is deductible in a s.106 computation but the interest forgone on an interest-free loan is not rent. No-one suggests that the company would be taxable on the interest forgone as property income!

39.25.2 *Settlor finance: Reimbursement*

In computing the "cost" of providing the accommodation one may deduct payments representing reimbursement. This deduction would reduce the s.106 computation.[64] However, interest forgone on a loan is not "reimbursement". In addition, it is also not a "payment".

A possible solution would be for the individual to release the debt due from the company.

Statute requires a "payment" representing a reimbursement. It is a moot point whether release of a debt constitutes a "payment". One should take the cautious view that it may not be. The matter should be dealt with as follows:

(1) The individual transfers the funds to the company. They should be received in the company's bank account. This should be accompanied by a letter to the company saying: "I have today procured the payment of £X to your account. This is reimbursement for the expenditure you have incurred in acquiring [the property]. However, I require repayment of the debt due to me of £X."
(2) The company may then use its funds to repay its debt due to the individual.

Although this is a circular transaction (the payment being matched by immediate repayment) that does not nullify it for tax purposes: compare *MacNiven v Westmoreland* [2001] STC 237.

If the company incurs additional improvement expenditure in the future, this should be matched by further reimbursements so the total cost of

[64] See 39.24 (Reimbursement as solution).

providing the accommodation (A+I–P) remains less than £75,000.

The reimbursement of the company is not a transfer of value for IHT purposes if the individual is (or is treated as) the beneficial owner of the company. For the same reason the reimbursement is not a disposal by way of gift and so is outside the scope of s.102 FA 1986 (gifts with reservation). In other cases IHT needs consideration.

The effect of the gift (the reimbursement) is to increase the value of the shares of the company without any corresponding rise in the CGT base cost. So the gift increases the chargeable gain on the disposal.

39.25.3 *Reimbursement: Timing*

When must reimbursement be made? It is considered that reimbursement must be done within a reasonable time of the taxpayer becoming aware that the accommodation BiK charge can be reduced by reimbursement. HMRC accepted this in practice, before the introduction in 2017 of a time limit for making good.[65] Since there is no provision imposing a time limit for reimbursement, that should continue to be the case.

39.26 Co-ownership of home

This section considers the position where an individual owns a share in the property jointly with the company.

Co-ownership raises similar but not identical issues for all provisions which charge tax on benefits, such as s.87 TCGA, s.731 ITA, s.203 ITEPA, and IHT gift with reservation rules as well as the accommodation charge. The discussion here is limited to the case where an individual and a company are co-owners. Similar but not identical issues arise with these provisions where an individual and a trust are co-owners.

39.26.1 *Land law background*

The starting point is to ascertain the rights of the co-owners as a matter of land law. Co-owned land in England and Wales is always held on trust. The person(s) holding legal title to the land are here called "the trust-of-land trustees".[66] The position is governed by the Trusts of Land and

[65] See 39.19.2 (Making good: Timing).

[66] (The term used in the legislation is "the trustees of land".) The company may be the (or one of the) trust-of-land trustees; it makes little practical difference and no difference at all for tax. (If the company is not a trustee it can apply to court to require the trustees to exercise their powers.) The shares in the company may also be held on trust but that trust is not relevant here.

Appointment of Trustees Act 1996.[67] Section 12(1) TOLATA provides:

> A beneficiary who is beneficially entitled to an interest in possession in land subject to a trust of land is entitled by reason of his interest to occupy the land at any time if at that time—
> (a) the purposes of the trust include making the land available for his occupation (or for the occupation of beneficiaries of a class of which he is a member or of beneficiaries in general), or
> (b) the land is held by the trustees so as to be so available.

Prior to 1997, a co-owner of land had a right to occupy that land, in the absence of any contrary indication or agreement with the other co-owners:

> It has been well established law ... that a tenant-in-common under a trust for sale has the right to occupy the whole property without payment of rent ...[68]

This co-ownership right has been superseded and replaced by s.12 TOLATA. In *IRC v Eversden*, Lightman J explained:

> On and after 1 January 1997 when the TOLATA came into force, a tenant in common in equity ... was no longer automatically entitled ... to occupation of the property purchased. Section 12 of the TOLATA provided that he should only become so entitled if one of two alternative conditions were satisfied…[69]

While arguments might be advanced to the contrary this analysis should be followed, because it is a clear and workable rule. Otherwise it would be necessary to consider the pre-1997 law and try to work out the combined effect of that when read with s.12.[70]

[67] Further consideration is needed for:
(1) Land outside England and Wales.
(2) Jointly owned chattels.
TOLATA does not apply in Northern Ireland. I would be grateful to any reader who could inform me of the position in Scotland.

[68] *IRC v Lloyds Private Banking* [1998] STC 559 at p.561; likewise *City of London Building Society v Flegg* [1988] AC 54 at p.81.

[69] [2002] STC 1109 at [24] reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

[70] Barnsley "Co-owner rights to occupy land" [1998] CLJ 123 is a minority view; contrast Smith, *Plural Ownership* (2005) p.136.
This conclusion is not affected by *Re Byford* [2003] EWHC 1267. In this case the co-owners were a wife and her former husband's trustee in bankruptcy. The issue was the relative size of their shares. The wife claimed a larger share because she had paid

In the following discussion, the entitlement to occupy land conferred by s.12(1) is called the "statutory occupation right".

The individual will obviously have a statutory occupation right to occupy the property under s.12 because:

(1) They are a beneficiary under the trust-of-land.
(2) They are beneficially entitled to an interest in possession in the land.
(3) Both conditions (a) and (b) of s.12(1) are satisfied:[71]
    (a) the purposes of the trust-of-land include making the land available for their occupation; and
    (b) the land is held by the trust for land trustees so as to be available for the purpose.

The company does not have a statutory occupation right. It does not meet the conditions of s.12(1). No third person would have a statutory occupation right even if the company sold or sub-let their interest under the trust-of-land to that person. The third person would not satisfy conditions (a) or (b) of s.12(1).[72]

The trust-of-land trustees have various powers, but they do not have power to override the individual's occupation right or to require them to pay an occupation rent. This is fundamental so I set out the provisions in detail.

Section 13(1) TOLATA provides:

> Where two or more beneficiaries are (or apart from this subsection would

the mortgage since her husband's bankruptcy. The issue is not covered by any provision in TOLATA. So the common law principles (known as "equitable accounting") applied. The general principle of equitable accounting is that one co-owner cannot take the benefit of an increase in the value of the property without making an allowance for what has been expended by the other in order to obtain it. Thus the wife had credit for her payments of mortgage capital and improvement expenditure. She wanted credit for interest payments, but it was held that she must set against that credit the benefit of occupation (the wife had occupied the property and the trustee in bankruptcy of course had not occupied). There is nothing in this which affects rights of occupation or other rights under ss.12, 13 TOLATA; though note Helen Conway's criticism in [2003] *The Conveyancer* 533.

[71] Though it would suffice if only one of the conditions of s.12(1) were satisfied. Section 12(2) provides: "Subsection (1) does not confer on a beneficiary a right to occupy land if it is either unavailable or unsuitable for occupation by him." This will not apply here.

[72] Also s.12(2) TOLATA would probably apply, though it is not necessary to rely on that.

> be) entitled under s.12 to occupy land, the trustees of land [ie the trust-of-land trustees] may exclude or restrict the entitlement of any one or more (but not all) of them.

The trust-of-land trustees cannot under s.13(1) override the individual's statutory occupation right because it is not the case that "two or more beneficiaries are … entitled under s.12 to occupy land".

Section 13(6) TOLATA provides:

> Where the entitlement of any beneficiary to occupy land under s.12 has been excluded or restricted, the conditions which may be imposed on any other beneficiary under subsection (3) include, in particular, conditions requiring him to—
> (a) make payments by way of compensation to the beneficiary whose entitlement has been excluded or restricted, or
> (b) forgo any payment or other benefit to which he would otherwise be entitled under the trust so as to benefit that beneficiary.

The trust-of-land trustees cannot require the individual to pay compensation (an occupation rent) to the company under s.13(6) because the company has no statutory occupation right: s.13(6) assumes that compensation can only be required in a case where:

(1) a co-owner had such a right; and
(2) the right was excluded or restricted (which can only be done under s.13(1)).

Section 13(3) TOLATA provides another power:

> (3) The trustees of land [ie the trust-of-land trustees] may from time to time impose reasonable conditions on any beneficiary in relation to his occupation of land by reason of his entitlement under s.12.
> …
> (5) The conditions which may be imposed on a beneficiary under subsection (3) include, in particular, conditions requiring him—
> (a) to pay any outgoings or expenses in respect of the land, or
> (b) to assume any other obligation in relation to the land or to any activity which is or is proposed to be conducted there.

The trust-of-land trustees can do little under s.13(3) except to require the individual to pay outgoings.[73]

[73] In particular, the trust-of-land trustees cannot use this power to require the individual to pay an occupation rent, as that must be done under s.13(6) or not at all. Otherwise s.13(6) would be entirely otiose. There is a further restriction in s.13(7) but that is not

It is reasonably clear that ss.12–14 TOLATA are a comprehensive code and there is no common law right to an occupation rent except in a case of ouster.

The trust-of-land trustees also have power to sell the property but the court has discretion either to prevent or to require a sale.[74] The question here is whether the court would require a sale of the property if the individual did not want a sale but the company did. In my opinion a court would not do so, unless either the individual no longer wished/ceased to occupy the property, or the company had a good reason for a sale, eg it was insolvent. Section 15(1) TOLATA provides:

> The matters to which the court is to have regard in determining an application for an order under s.14 include—
>
> (a) the intentions of the person or persons (if any) who created the trust,
>
> (b) the purposes for which the property subject to the trust is held,
>
> (c) the welfare of any minor who occupies or might reasonably be expected to occupy any land subject to the trust as his home, and
>
> (d) the interests of any secured creditor of any beneficiary.

None of these factors would support a sale.[75]

In short, the company, although co-owner, can do almost nothing while the individual remains in occupation, except require them to pay the outgoings.

Since this is the case, then the fact that the company does nothing, and the individual remains in occupation, does not mean that the company has provided accommodation, or conferred a benefit, in the years in which the individual occupies. This is because the individual has the right of

so important here.

[74] Sections 6, 14 TOLATA.

[75] An individual's position is even stronger if they have more than a 50% share, as s.11(1) TOLATA normally gives them further support. This provides:

> "The trustees of land shall in the exercise of any function relating to land subject to the trust—
>
> (a) so far as practicable, consult the beneficiaries of full age and beneficially entitled to an interest in possession in the land, and
>
> (b) so far as consistent with the general interest of the trust, give effect to the wishes of those beneficiaries, or (in case of dispute) of the majority (according to the value of their combined interests)."

See too s.15(3) TOLATA which requires a court to have regard to the beneficiary with a majority share. But it is not necessary to rely on this.

occupation independently of anything the company does or can do.

In *IRC v Eversden*[76] the settlor gave a trustee co-owner a 95% share in a house, the settlor retaining 5%. The settlor continued to occupy. It was held that the trustee had not provided a benefit as the settlor was entitled to occupy. This took place before the TOLATA 1996 but the position would be the same under the TOLATA.

The matter is made more complicated by *Christensen v Vasili* 76 TC 116. This concerned a co-owned car. The question was whether there was a tax charge under (what is now) s.144 ITEPA which applies where a car is "made available" to an employee. The Special Commissioner held that the car was not made available:

> As co-owners the employer and employee each have the right to use the car, but they each have that right because they are each owners, not because one has "made available" the car to the other.[77]

This conclusion was plainly right. Unfortunately it was flatly if unconvincingly rejected in the High Court:

> In their ordinary sense, the question "who made the car available to Mr. Vasili?" must be answered in the sense that his employer did so ...[78]

It is suggested that *Vasili* must be distinguished from the normal co-ownership situation because:

(1) in *Vasili* both employer and employee were entitled to possession of the car: in the co-ownership situation considered here the company is not entitled to occupation;

(2) in *Vasili* the car belonged to the employer before he sold a 5% share to the employee. In that sense the employer made the car available. The position would have been different if the car had been purchased in those shares from the outset.

It is unfortunate that *Eversden* was not cited in *Vasili* since the two cases are difficult to reconcile.

39.26.2 *Employment-related benefit*

It might be argued that the company co-owner provides a benefit other than accommodation:

[76] [2002] STC 1109 reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

[77] 76 TC 116 at p.124, para 22.

[78] 76 TC 116 at p.131, para 13.

(1) If the company is the trustee, by not exercising its powers of sale (or to require the individual co-owner to pay an occupation rent); or
(2) If the company is not sole trustee, by consenting to the trustees not exercising those powers.

There is normally no benefit here because the trustees have no such powers. If there were a benefit, the value of the benefit is "the expense incurred in or in connection with the provision of the benefit". The company incurs no expense, so the value of the benefit for tax purposes is nil.[79]

If the company incurs costs of maintenance, that is an employment related benefit.

39.26.3 *Starting co-ownership charge*

It follows that the company provides a significant benefit to the individual when and if it uses its funds to acquire a share as co-owner (unless it pays a discounted price for the share). Could this benefit be taxable?[80]

In *IRC v Eversden (Greenstock's Executors)* trustees purchased a 95% share in a house ("Meadows"), and the settlor purchased 5%. The judge said:

> Under the agreement with the trustees (providing as it did for the settlor to pay 5% of the purchase price of Meadows and acquire in consequence a right of occupation) *the trustees conferred on the settlor the right to occupy Meadows for an indefinite period rent free.*[81]
> (Emphasis added)

This took place before the TOLATA 1996, but the position would be the same now.

In a case where the company provides its funds towards a joint purchase of a new property, and the individual holds as co-owner, the company has provided a benefit of indefinite rent-free occupation; more accurately the

[79] It is considered that this particular benefit does not "consist of an asset being placed at the disposal of the employee" so the valuation is not in accordance with s.205 ITEPA.

[80] This issue does not arise where the company receives its share of the land gratuitously.

[81] 75 TC 340, [2002] STC at p.1129. The point was rightly not appealed. Prior to purchasing Meadows another house in joint ownership had been sold. The position for Meadows would be different if the sale of the first house had been conditional on the purchase of Meadows (the new one), that is, if the settlor only agreed to join in the sale of the first if the trustee agreed to join in the purchase of Meadows.

benefit is giving the individual the opportunity to acquire a right to indefinite rent-free occupation at a "knockdown price". The benefit is provided at the time the company completes the contract to purchase the land as co-owner.

The benefit would in principle be chargeable in co-ownership cases under s.87 TCGA or s.731 ITA. Since there are no express valuation rules the charge would be on the market value, which would have to be ascertained as best as one can in the light of the circumstances.

For employment income purposes the position is different. It is arguable that:

(1) The benefit is not the provision of accommodation.
(2) The value of the benefit for IT purposes is nil because:
    (a) The company incurs no expense in connection with its provision. (The purchase price is not such an expense, because the money going out is matched by a property share coming in.)
    (b) The special valuation rules of ss.205, 206 ITEPA do not apply.

39.26.4 *HMRC view*

The EI Manual provides:

> **EIM11414 Avoidance area: co-ownership cases** [Jan 2024]
> *Part 3 Chapter 5 ITEPA 2003*
> In these cases the employer and employee co-own the living accommodation. The usual arrangement is that the employer and employee own the property as tenants in common through a trust.
> A tenant in common has a legal right to use 100% of the property 100% of the time even though a tenant in common may only own a much smaller interest in the property (say 30%). It is argued against us in such a case that the employee's rights to use the living accommodation come from the employee's legal rights as a tenant in common. So it is argued that no living accommodation has been provided by reason of the employment.
> There are arguments to support a benefit charge within Part 3 Chapter 5 ITEPA 2003 in these cases and the strength of those arguments will depend on the facts of the case. (This content has been withheld because of exemptions in the Freedom of Information Act 2000).

It is interesting to note that HMRC accept that there is not always a charge in co-ownership cases: "it depends on the facts of the case". That is consistent with the view taken here.

In the context of s.87 TCGA, the current HMRC view is that there is an annual benefit which is the difference between:

(1) the rental value of the property in question; and

(2) the hypothetical rental value of a hypothetical property of a value equal to the proportionate value of the taxpayer's share in the property, ie if the taxpayer holds a 50% share, one looks to the rental value of a property worth 50% of the actual property.[82]

But this view is very difficult to defend.

39.27 Defences to home BiK charge

39.27.1 *Caretaker*

Section 99 ITEPA provides:

> (1) This Chapter [Chapter 5 Part 3] does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the employee's duties that the employee should reside in it.
>
> (2) This Chapter does not apply to living accommodation provided for an employee if—
>
> (a) it is provided for the better performance of the duties of the employment, and
>
> (b) the employment is one of the kinds of employment in the case of which it is customary for employers to provide living accommodation for employees.

It has been suggested that one can use this to avoid the charge. The idea is to enter into a contract whereby the individual who is to occupy the property does so as caretaker for the company. This does not work. While it may normally be necessary or customary for a caretaker to reside in accommodation, a person does not become a "caretaker" just by being labelled as such. If the individual is occupying an extremely valuable property with only nominal caretaking duties, this is not the same "type of employment" as a normal caretaker. The EI Manual rightly provides:

> **EIM11342 Living accommodation exemption: necessary for proper performance of the duties: types of employee** [Jan 2021]
>
> *Section 99(1) ITEPA 2003*
>
> Part 3 Chapter 5 ITEPA does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the duties that the employee live in the accommodation provided (see

[82] Private correspondence.

> EIM11341).
> The following types of employee may be accepted as being within the exemption: ... Caretakers living on the premises. This only covers those with a genuine full time caretaking job ...

39.27.2 *Payment of rent*

The payment of rent will count as "making good" for the s.105 computation and reduce the s.106 computation. However, this proposal raises the problems of IT on the rent. Also, to reduce the s.106 computation to zero, the rent may have to exceed the market rent, especially for very valuable properties.

39.27.3 *Lease premium*

This is the subject of the long and complex provisions of s.105A, 105B ITEPA, which I hope to consider in a future edition.

The EIM suggests an argument that premiums should sometimes be treated as rent. This was discussed in detail in the 2008/09 edition of this work, but I expect that HMRC will not pursue that point now (if indeed they ever took it seriously).

39.28 Foreign homes relief

Section 100A(1) ITEPA provides a relief which I call "**foreign homes relief**":

> This Chapter [Chapter 5 Part 3] does not apply to living accommodation outside the UK provided by a company for a director or other officer of the company ("D") or a member of D's family or household if—
> (a) the company is wholly-owned by D or D and other individuals (and no interest in the company is partnership property), and
> (b) the company has been the holding company of the property at all times after the relevant time.

I refer to the company providing the property as the "**provider company**". I refer to the condition in (1)(a) as the "**wholly-owned condition**" and the condition in (1)(b) as the "**holding company condition**". Thus the relief applies where:

(1) The provider company provides accommodation for a director[83] of the

[83] Or other officer; for brevity references to "directors" in this section include other officers.

provider company ("D") or a member of D's family or household. If the accommodation is provided for an employee who is not a director (or a member of a director's family or household) of the provider company the relief will not apply. In practice that is not likely to matter.

(2) The provider company meets the wholly-owned condition.
(3) The provider company meets the holding company condition.

39.28.1 *Wholly-owned condition*

The relief does not apply if any shares in the provider company are held by a trust or partnership, or if some of the shares are held by a company. The position for 100% subsidiaries is considered below.

39.28.2 *Holding company condition*

Section 100A(4) ITEPA defines "relevant interest in the property":

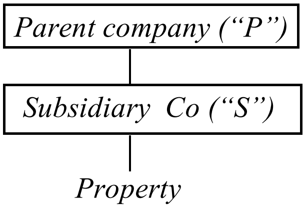
> "Relevant interest in the property" means an interest under the law of any territory that confers (or would but for any inferior interest confer) a right to exclusive possession of the property at all times or at certain times.

Armed with this definition, we can turn to the definition of "holding company" of the property. Section 100A(2) ITEPA provides:

> The company is "the holding company of the property" when—
> (a) it owns a relevant interest in the property,
> (b) its main or only asset is that interest, and
> (c) the only activities undertaken by it are ones that are incidental to its ownership of that interest.

39.28.3 *Subsidiary holding property*

Suppose the property is held via a subsidiary company thus:



S is in principle the holding company of the property but it does not meet the wholly-owned condition. P is not the holding company of the property within s.100A(2). However s.100A(3) ITEPA provides:

> The company is also "the holding company of the property" when—
> (a) a company ("the subsidiary") which is wholly owned by the company [*ie the parent company*] meets the conditions in paras (a) to (c) of subsection (2),
> (b) the company's [*ie the parent company's*] main or only asset is its interest in the subsidiary, and
> (c) the only activities undertaken by the company [*ie the parent company*] are ones that are incidental to its ownership of that interest.

Thus P also qualifies as "the holding company of the property." Strictly this does not help as P is not the company providing the accommodation but in practice the relief is clearly intended to apply here.

39.28.4 *"The relevant time"*

Section 100A(5)(6) ITEPA defines "relevant time":

> (5) "The relevant time" is the time the company first owned a relevant interest in the property; but this is subject to subsection (6).
> (6) If—
> (a) none of D's interest in the company was acquired directly or indirectly from a person connected with D, and
> (b) the company owned a relevant interest in the property at the time D first acquired an interest in the company,
> "the relevant time" is the time D first acquired such an interest.

39.28.5 *Exceptions*

Section 100B ITEPA sets out three wide exceptions to this narrow relief:

> (1) Section 100A(1) does not apply if subsection (2), (3) or (4) applies.

The first two exceptions concern connected[84] companies:

> (2) This subsection applies if—
> (a) the company's interest in the property was acquired[85] (directly or

[84] "Connected" is very widely defined in s.100B(9) ITEPA:
"In this section 'connected company' means—
(a) a company connected with D, with a member of D's family or with an employer of D, or
(b) a company connected with such a company."

[85] Section 100B(5) ITEPA provides a commonsense definition:
"In subsection (2), references to the acquisition of an interest include the grant of an

> indirectly) from a connected company at an undervalue, or
>
> (b) the company's interest in the property derives from an interest[86] that was so acquired.
>
> (3) This subsection applies if, at any time after the relevant time—
>
> (a) expenditure in respect of the property has been incurred (directly or indirectly) by a connected company, or
>
> (b) any borrowing of the company (directly or indirectly) from a connected company has been outstanding (but see subsection (7).
>
> ...
>
> (7) For the purposes of subsection (3)(b), no account is to be taken of—
>
> (a) any borrowing at a commercial rate, or
>
> (b) any borrowing which results in D being treated under Chapter 7 (taxable benefits: loans) as receiving earnings.

Lastly there is an all-purpose tax motive restriction:

> (4) This subsection applies if the living accommodation is provided in pursuance of an arrangement[87] the main purpose, or one of the main purposes, of which is the avoidance of tax or national insurance contributions.

39.28.6 *Critique*

Foreign homes relief would serve as a case study for what has gone wrong with tax reform in recent years. Almost every restriction on this relief is anomalous. Why should there be a relief for a company owning land and not for chattels? Yachts and aeroplanes are generally held through companies. Why should the relief apply to companies held by individuals and not by trusts? We need rationalisation and simplification, not yet another narrowly targeted relief. But there it is.

interest."

[86] Section 100B(6) ITEPA provides a commonsense definition:

"For the purposes of that subsection [subsection (2)], an interest is acquired at an undervalue if the total consideration for it is less than that which might reasonably have been expected to be obtained on a disposal of the interest on the open market; and 'consideration' here means consideration provided at any time (and, for example, includes payments by way of rent)."

[87] Section 100B(8) ITEPA provides the definition:

"In subsection (4) 'arrangement' includes any scheme, agreement or understanding, whether or not enforceable."

The wording is slightly different from the standard (unnecessary) definition, see App 2.2.3 (Definitions of "arrangement"); but there is no practical difference.

39.29 Other planning

More complex possibilities involve:
(1) acquiring a property,
(2) granting (say) a ten-year lease to trustees or to the individual, and
(3) transferring the freehold reversion to a company. Watch SDLT.
The accommodation charge would not apply, because the company would not be providing accommodation. Similar arrangements can be carried out with options. In practice, arrangements of this complexity would not often be needed.

39.30 BiK/general earnings: Interaction

Section 109 ITEPA provides:

> (1) This section applies if—
> (a) under this Chapter [Chapter 5 Part 3] the cash equivalent of the benefit of living accommodation is to be treated as earnings from an employee's employment for a tax year, and
> (b) under Chapter 1 of this Part an amount would, apart from this section, constitute earnings from the employment for the year in respect of the provision of the accommodation.
> (2) The full amount of the cash equivalent is to be treated as earnings from the employment for that year under this Chapter.
> (3) The amount mentioned in subsection (1)(b) is to constitute earnings from the employment for the year under Chapter 1 of this Part only to the extent that it exceeds the amount mentioned in subsection (2).

This is the opposite of the rule which applies to other classes of benefits in kind.

39.31 Planning for home charge

Many company structures have been set up in the past. The risk of an accommodation charge depends on the facts of each case, but in practice it is often a concern. What can be done?

39.31.1 *Winding-up company*

If practical, the safest course is to extract the property from the company so as to put an end to the charge (or risk of a charge) under the benefit in kind rules. One way to do this is to liquidate the company.

The liquidation may give rise to a capital gain which may rule out this course. But SDLT and CGT may rule out this course.

Another possibility may be to reimburse the company for the cost of providing the accommodation. Watch the CGT implications.

39.31.2 *Planning without winding-up*

CGT may make it impractical to wind up the company. In that case the solution may be to take steps to ensure that the individual is not a shadow director.

39.32 Home BiK: HMRC enquiries

In practice, as *Al Fayed v Advocate General* frankly reports,[88] shadow directorship arguments before the decision in *R v Dimsey* were "settled by horse trading as opposed to on any strict statutory basis". It is likely that this will continue to be the case. Except for companies which were carefully set up and run, HMRC will at least be able to exact a sum equal to the cost of litigating the issue before the first-tier tribunal or beyond.

39.33 Home BiK: Critique

Anyone who has followed the text to this point will agree that the law in this area is defective. It is unnecessarily complicated, rests to a large part on formal and informal concessions, and is sometimes so very unfair that HMRC do not exert themselves to apply the law correctly set out in the Manuals. The following reforms should solve these problems:

(1) Abolish the s.105 charge and extend s.106 to cover the first £75,000 of acquisition cost. All the concessions would then drop away.

(2) The application of the charge to shadow directors who do no real work for the company is a nonsense. Given the widespread use of holding companies to hold wealth, *Dimsey & Allen* is arguably one of the worst tax decisions made by the House of Lords. Simply to abolish the charge (reversing *R v Dimsey*) would go too far the other way, since it is fair that a shadow director who receives what is in reality remuneration from a company should be charged. The solution is to restrict the rule that any benefit from an employer is deemed to be "by reason of employment". The deeming should not apply to a shadow director (whose connection with the company may be tenuous). That would strike the right balance.

[88] [2002] STC 910 para 44.

My impression is that the BiK rules have been used by HMRC as a threat or weapon in two ways:

(1) in tax investigations, and

(2) to discourage IHT planning (placing homes in companies for IHT reasons). That is not the purpose for which the BiK rules were designed, and it is not surprising that they did not succeed in preventing that planning. But the IHT residence-property rules now prevent planning of this kind.

39.34 SDLT on accommodation charge

Para 12 sch 4 FA 2003 provides:

> (1) Where a land transaction is entered into by reason of the purchaser's employment, or that of a person connected with him, then—
>
> (a) if the transaction gives rise to a charge to tax under Chapter 5 of Part 3 of the ITEPA (taxable benefits: living accommodation) and—
>
> (i) no rent is payable by the purchaser, or
>
> (ii) the rent payable by the purchaser is less than the cash equivalent of the benefit calculated under s.105 or 106 of that Act,
>
> there shall be taken to be payable by the purchaser as rent an amount equal to the cash equivalent chargeable under those sections;
>
> (b) if the transaction would give rise to a charge under that Chapter but for s.99 of that Act (accommodation provided for performance of duties), the consideration for the transaction is the actual consideration (if any); ...

This will not usually affect a foreign domiciliary who occupies a UK home through a company, even if the foreign domiciliary is a shadow director and within the BiK provisions. The reasons are:

(1) The acquisition of a licence (as opposed to a lease) is not a land transaction. The distinction between lease and licence is fraught but usually the individual will occupy under licence and not a lease.

(2) Even if the shadow director acquires a lease, they will not usually do so by reason of their employment. The extended definition in the benefits code[89] does not apply here.

[89] See 39.10 ("By reason of employment").

39.35 Benefit BiK charge

39.35.1 *Benefit BiK: The charge*

Section 201(1) ITEPA provides:

> This Chapter [Chapter 10 Part 3] applies to employment-related benefits.

The effective charge[90] is in s.203(1) ITEPA:

> The cash equivalent of an employment-related benefit is to be treated as earnings from the employment for the tax year in which it is provided.

The key expressions are "employment-related benefit" and "cash equivalent".

39.35.2 *"Employment-related benefit"*

See 39.8 (Accommodation/benefit charge).
The relief for excluded benefits is not considered here.

39.35.3 *"Benefit"*

Section 201(2) ITEPA provides:

> In this Chapter [Chapter 10 Part 3]—
> "benefit" means a benefit[91] or facility of any kind;

EI Manual provides:

> **EIM21002 What is meant by a "benefit"** [May 2022]
> ... The definition of what is a benefit is thus very wide and includes everything that confers a special bounty of any description on the recipient.

HMRC do not argue that the word "facility" applies to a facility which is not a benefit in the ordinary sense. Thus s.201(2) is a non-definition of benefit: it only says that "benefit" means benefit. But non-definitions are common in tax legislation.

39.35.4 *Fair bargain rule*

There is no benefit – and so no charge – if full consideration is paid for

[90] This is not, strictly, a charging section, but it feeds into the general charge to tax on employment income: see 34.4.2 ("General earnings"); 34.6 (Charge on employment income).

[91] For the meaning of "benefit" see 50.4 (Benefit).

anything which would be a benefit if provided at an undervalue. This is so even if the full consideration is less than the "cash equivalent", which is often, perhaps usually, the case.[92]

There is no benefit - and so no charge - if what is paid is less than full consideration, as long as the transaction is a "fair bargain". I refer to that as the **"fair bargain rule"**.

The EI Manual provides:

> **EIM21004 benefits and fair bargain** [May 2022]
> Although the definition (?) of "benefit" in Section 201(2) is extremely wide, it does not cover everything that may be provided by an employer to someone who happens to be an employee or director of that employer. As a general principle, a benefit must provide an element of "special bounty" to the recipient. In other words the employee must get something over and above what the employer gives as a **fair bargain,** or would be prepared to give as a fair bargain, to a member of the public, or other independent third party, dealing on arms length terms with the employer...[93]
> The principle of "fair bargain" in relation to a benefit arose in the case of *Mairs v Haughey*,[94] which concerned a payment to an employee in return for giving up rights under an enhanced redundancy scheme. The Special Commissioners held that the payment was not a benefit because it did not overvalue the employee's contingent right to receive a payment from the scheme ...In the Court of Appeal (Northern Ireland) Lord Chief Justice Hutton supported the Commissioners' view:
>
>> "The respondent received the payment .... in return for surrendering his contingent right to receive payment under the enhanced redundancy scheme and the Special Commissioners held that the payment did not overvalue that right. Therefore I consider that the Respondent did not receive a "benefit" .... where the money received was paid to him by way of **fair bargain,** in consideration of his surrender of a right to receive a larger sum on the event of the contingency of redundancy occurring."[95]

By the time *HMRC v Apollo Fuels* reached the CoA, it was common

[92] FA 2016 reversed this rule in relation to accommodation, cars and loans, but the fair bargain rule continues to apply for the benefit BiK charge.

[93] These words are copied into the decision in *Excel Computer Systems v HMRC* [2018] UKFTT 346 (TC).

[94] 66 TC 273.

[95] *Id.* at 406.

ground "that fair bargains are excluded from the meaning of 'employment-related benefit' in s.203 for the purposes of Ch 10 of Pt 3".[96]

39.35.5 *Unintendedly bad bargain*

Whether arrangements constitute a "fair bargain" is a question of fact. The EIM provides:

> **EIM21004 benefits and fair bargain** [May 2022]
> **... Wilson v Clayton**[97]
> This case concerned an employee who was dismissed by his employer for failing to agree to withdrawal of his entitlement to an Essential Car User Allowance (ECUA). He was immediately re-employed on the same terms except that he was no longer entitled to receive ECUA. An Employment Tribunal found that he had been unfairly dismissed and ordered the employer to reinstate the ECUA, and to pay him the arrears of ECUA due since it had been withdrawn. The Tribunal also ordered the employer to pay him a "Basic Award" of compensation.
> Under the Employment Rights Act 1996 the Tribunal had no authority to order the compensation payment but the employer paid it. Arguably the payment to the employee was a pure windfall to him as it had no statutory basis and the employee was not entitled to receive it. Nevertheless the employer paid it in order to avoid further litigation and consequently it was paid as part of a genuine compromise agreement made at arm's length.
> The Court of Appeal held that in these particular circumstances the payment of compensation was not a benefit, as it represented a "**true bargain**" between employer and employee. Gibson, LJ held that –
>
> > "Where parties at arm's length arrive at a genuine compromise in settlement of hostile litigation, it would be an extremely difficult task for any tribunal or court to unpick the constituent parts of the bargain and to put a value on those parts."[98]
>
> Consequently the value of the "bargain" agreed by an employer and an employee **in a genuine compromise agreement at arm's length** is not generally relevant to determining whether the bargain represents a "fair bargain". But this principle does not apply where, as Gibson LJ set out,
>
> > "the reason for the payment was to confer a gratuitous benefit within a compromise agreement.. ."

[96] [2016] STC 1594 at [41].
[97] 77 TC 1.
[98] at [50].

> Following *Wilson v Clayton*, where it is claimed that the payment represents a fair bargain, you must investigate carefully the reason for a payment made as a result of a compromise agreement at arm's length. If it was a genuine compromise agreement it will probably be a fair bargain. On the other hand, if it was intended purely to provide a benefit, it will be chargeable as such. The decision does not have any read across to payments made under a compromise agreement not made at arm's length.

These decisions were approved in *HMRC v Apollo Fuels:*

> *Mairs v Haughey* and *Wilson v Clayton* are authorities establishing that fair bargains are excluded from the regime for taxing benefits conferred on employees because there is no benefit which is properly subject to tax.[99]

The fair bargain rule is not limited to compromise agreements in litigation; it applies to any unintendedly bad bargain, that is, where both sides intended to reach a fair bargain, ie to give full consideration, but owning to some mistake, the price reached was not an informed market value. A unintendedly bad bargain is not a benefit for the purposes of the benefit BiK charge.

The fair bargain rule is based on the meaning of benefit, in the general sense, so it also applies for the purposes of s.731 and s.87, though in the latter case it overlaps with arm's length transaction relief.[100]

39.35.6 *Benefit available to all*

The EI Manual provides:

> **EIM21004 benefits and fair bargain** [May 2022]
> ... something provided by an employer, on identical terms both for employees and for the general public (for example, "free" refuse collection or state education), does not become a benefit within the legislation simply because it is provided for people who happen to be employees of that employer. The employees receive on the same terms exactly what they would have received if they had not been employees. That indicates that what they get is a fair bargain and there is therefore no "benefit".
> It is not necessary that the employer actually does deal with members of the public for this principle to apply. If an employer provides something

[99] *HMRC v Apollo Fuels* [2014] UKUT 95 (TCC) at [71].

[100] See App.4.10.4 (Bad/fair bargain).

> to an employee, and they would be prepared to provide it to any member of the public on exactly the same terms, then that is a fair bargain and not a benefit.

This is a purposive construction, but it must be correct. The reason given is not persuasive: in what sense is the provision of refuse collection or state education a "bargain"? But the context shows that this sort of benefit does not count. This is the reason that the HMRC Manual refers to benefit as a *special* bounty, ie a benefit not available to all.

39.35.7 *Cash payment*

The EI Manual provides:

> **EIM21006 cash payments can be benefits: Wicks v Firth** [May 2022]
> The statutory definition of a benefit is wide enough to include a cash payment which a director or an employee ... receives by reason of the employment and which is not chargeable to income tax under some other provision. ...
> For example, in *Wicks v Firth*[101] payments made as scholarships to the children of an employee within the benefits code were held to be benefits within Section 201 ITEPA 2003.
> In that case the payments were exempt from charge by Section 331 ICTA 1988 (this exemption was subsequently removed in most cases by Section 212 ITEPA 2003) but that does not alter the general principle that cash payments can be a chargeable benefit.
> The decision in *Mairs v Haughey* (EIM21004) is further support for the view that a cash payment can be a chargeable as a benefit.

That seems self-evident.

39.35.8 *Employer self-interest*

The EI Manual provides:

> **EIM21003 Motive of employer is irrelevant** [May 2022]
> [The Manual refers to the definition of "benefit" and continues:] It does not matter whether in providing a benefit an employer is intending to benefit himself rather than, or as well as, the employee. So long as the employee or a member of his family or household (Section 721(5) ITEPA 2003) is provided with a benefit by reason of his employment, a tax charge will arise.

[101] 56 TC 318.

> In *Rendell v Went* (41 TC 641) the company took over and paid for the defence of a director against a dangerous driving charge. It did so because it feared the loss of the director's services if he was sent to prison. The full amount paid by the company was held to be a chargeable benefit. The fact that the company spent the money primarily for its own benefit and only as a by-product benefited the director, did not prevent the payment giving rise to a chargeable benefit.

The legal costs (including leading counsel) amounted to £641 (in 1958 prices).[102] It seems the money was well spent, as the director was acquitted.

> The decision in the House of Lords was unanimously in the Crown's favour. [The Manual cites a comment of Lord Reid, and continues:] Viscount Radcliffe made the same point in more succinct terms (page 656):
>
> > "But an expenditure is not the less advantageous to a director because it suits or advantages his company to make it."

39.35.9 *"Excluded benefit"*

Section 202(1) ITEPA provides:

> A benefit is an "excluded benefit" for the purposes of this Chapter [Chapter 10 Part 3] if–
>
> (a) any of Chapters 3 to 9 of the benefits code applies to the benefit,
>
> (b) any of those Chapters would apply to the benefit but for an exception,[103] or
>
> (c) the benefit consists in the right to receive, or the prospect of receiving, sums treated as earnings under section 221 (payments where employee absent because of sickness or disability).

Other Chapters of the benefits code (such as accommodation) have priority, and only benefits not caught elsewhere fall into the residuary benefits charge. For this reason the label "employment-related benefit" is not particularly apt, but it is hard to think of a better one.

39.35.10 *Former/prospective employee*

Section 201 ITEPA provides:

[102] The equivalent value in 2023 is about £15,130: see *http://www.measuringworth.com*

[103] Section 202(2) ITEPA provides a commonsense definition: "In this section "exception", in relation to the application of a Chapter of the benefits code to a benefit, means any enactment in the Chapter which provides that the Chapter does not apply to the benefit..."

> (4) For the purposes of this Chapter [Chapter 10 Part 3] it does not matter whether the employment is held at the time when the benefit is provided so long as it is held at some point in the tax year in which the benefit is provided.
> (5) References in this Chapter to an employee accordingly include a prospective or former employee.

39.35.11 *When is benefit provided*

The time that the benefit matters as it may affect the year of the charge or whether there is a charge at all.

In *Templeton v Jacobs*:

> In January 1991 Jacobs agreed to become an employee of a company in May 1991 and it was agreed between the parties that Jacobs would work from home and that the prospective employer would pay for the costs of converting the loft in Jacobs' home into an office. Before 6 April 1991 the employer entered into a contract with, and paid, a builder for the conversion work. The work was started in July 1991 and the loft conversion was available for use as an office in September 1991.

The question was when the benefit was provided: when the work was paid for or when the work was completed. The judge accepted the argument of HMRC:

> Suppose ... that the taxpayer had been employed continuously throughout the years 1990-91 and 1991-92. If the [benefit was in 1990/91] a charge to tax would arise during the earlier of those two years when the employer company entered into the building contract or alternatively paid the consideration under it. Yet the work might never be carried out, with the result that no benefit ever became available to the taxpayer for his use and enjoyment. This could have happened for a number of reasons: the liquidation of the building contractor or even simply an agreement between the builder and employer not to proceed with the contract.[104]

So:

> No benefit is provided for the purposes of Section 154(1) until the benefit in question becomes available to be enjoyed by the taxpayer. Prior to that

[104] 68 TC 735 at p.743. The possibility that the builder and employer may have agreed not to proceed would not have arisen if the employee had been party to the contract. But that would have made no difference, as the possibility of liquidation of the builder would still remain.

> point in time there can be no relevant benefit to the taxpayer in respect of which a charge to tax can arise under Section 154(1). The arrangements made by the employer, or the steps taken by him, or the cost which he has incurred are not the relevant touchstones for determining whether or not a benefit has been provided. There can be no benefit until the relevant benefit is available to the taxpayer.[105]

39.36 "Cash equivalent"

This is defined in s.203(2) ITEPA:

> The cash equivalent of an employment-related benefit is
> [a] the cost of the benefit less
> [b] any part of that cost made good[106] by the employee, to the persons providing the benefit, on or before 6 July following the tax year in which it is provided.

This takes us to the elaborate definition of "cost of the benefit". Section 203(3) ITEPA sets out the three rules and their priority:

> The cost of an employment-related benefit is determined in accordance with section 204 unless—
> (a) section 205 provides that the cost is to be determined in accordance with that section, or
> (b) section 206 provides that the cost is to be determined in accordance with that section.

Thus s.204 ITEPA contains the default rule which applies unless trumped by s.205 or 206. I refer to that as the "**s.204 default cost rule**". There are two cases where the s.204 default cost rule does not apply:

(1) Asset made available without transfer: the **"s.205 cost rule"**.
(2) Transfer of used or depreciated asset: the **"s.206 cost rule"**. This is not discussed here.

39.36.1 *s.204 default cost rule*

Section 204 ITEPA provides:

> The cost of an employment-related benefit is the expense incurred in or in connection with provision of the benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters).

[105] 68 TC 735 at p.744.
[106] See 39.19 ("Making good").

39.37 s.205 cost rule

Section 205(1) ITEPA provides:

> The cost of an employment-related benefit ("the taxable benefit") is determined in accordance with this section if—
> (a) the benefit consists in—
> (i) an asset being placed at the disposal of the employee, or at the disposal of a member of the employee's family or household, for the employee's or member's use, or
> (ii) an asset being used wholly or partly for the purposes of the employee or a member of the employee's family or household, and
> (b) there is no transfer of the property in the asset.

In particular, the s.205 cost rule applies on the use of chattels, which is the main focus in this chapter. Where that is the case, the cost rule is in s.205(2) ITEPA:

> The cost of the taxable benefit is the higher of—
> (a) the annual value of the use of the asset, and
> (b) the annual amount of the sums, if any, paid by those providing the benefit by way of rent or hire charge for the asset,
> together with the amount of any additional expense.

Section 205(3) ITEPA defines "annual value of the use of the asset":

> For the purposes of subsection (2), the annual value of the use of an asset is—
> (a) in the case of land, its annual rental value;[107]
> (b) in any other case, 20% of the market value[108] of the asset at the time when those providing the taxable benefit first applied the asset in the provision of an employment-related benefit (whether or not the person provided with that benefit is also the person provided with the taxable benefit). ...[109]

Section 205(4) ITEPA defines "additional expense":

> In this section "additional expense" means the expense incurred in or in

[107] "Annual rental value" is defined in s.207 ITEPA. This only applies to land other than accommodation, so in practice it is less important.

[108] "Market value" is has a commonsense definition in s.208 ITEPA.

[109] There is transitional relief where those providing the taxable benefit first applied the asset in the provision of an employment-related benefit before 6 April 1980.

> connection with provision of the taxable benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters), other than—
>
> (a) the expense of acquiring or producing the asset incurred by the person to whom the asset belongs, and
>
> (b) any rent or hire charge payable for the asset by those providing the asset.[110]

Note that there is a reference to "a proper proportion" in the computation of the additional expense, but not in the computation of the annual value.

39.37.1 *Available for part of year*

Where the asset is available for part of a year, there clearly has to be a time apportionment. Section 205A ITEPA provides:

> (1) A deduction is to be made under section 205(1C)(b) if the asset mentioned in section 205(1) has been unavailable for private use on any day during the tax year concerned.
>
> (2) For the purposes of this section an asset is "unavailable" for private use on any day if—
>
> (a) that day falls before the day on which the asset is first available to the employee,
>
> (b) that day falls after the day on which the asset is last available to the employee,
>
> (c) for more than 12 hours during that day the asset—
>
> (i) is not in a condition fit for use,
>
> (ii) is undergoing repair or maintenance,
>
> (iii) could not lawfully be used,
>
> (iv) is in the possession of a person who has a lien over it and who is not the employer, not a person connected with the employer, not the employee, not a member of the employee's family and not a member of the employee's household, or
>
> (v) is used in a way that is neither use by, nor use at the direction of, the employee or a member of the employee's family or household, or
>
> (d) on that day the employee—

[110] EIM states at 21631 [May 2022]:

> This will include expenditure on running costs and could include expenditure on alterations or improvements, repairs, maintenance, etc depending on whether it was incurred for the purpose of providing the benefit. It would not include interest paid on a loan to acquire the asset.

(i) uses the asset in the performance of the duties of the employment, and

(ii) does not use the asset otherwise than in the performance of the duties of the employment.

(3) The amount of the deduction is given by—

(U/Y) × A

where—

U is the number of days, in the tax year concerned, on which the asset is unavailable for private use,

Y is the number of days in that year, and

A is the annual cost of the benefit of the asset determined under section 205(2).

(4) The reference in subsection (2)(a) to the time when the asset is first available to the employee is to the earliest time when the asset is made available, by reason of the employment and without any transfer of the property in it, for private use.

(5) The reference in subsection (2)(b) to the time when the asset is last available to the employee is to the last time when the asset is made available, by reason of the employment and without any transfer of the property in it, for private use.

The EIM gives an example:

EIM21890 Example of Calculating the Unavailable for Private Use Deduction [May 2022]

... A director is provided with the use of a helicopter I a tax year. The market value of the helicopter when it was first made available for the director' private use is £800,000.

The asset was used for a mixture of business and private purposes and was first provided on 6 July in that tax year (91 days after the start of the tax year). During the rest of the year there were 10 days when the helicopter is only used for the duties of the employment (and so is treated as unavailable for private use under section 205A(2)(d)) and 10 days when another employee had sole use of the asset (and so is treated as unavailable for private use on the day under section 205A(2)(c)(v)).

The employee pays £6,000 towards the use of the asset before 6 July following the end of the relevant tax year.

There are 365 days in the relevant tax year (Y).

20% market value when first available	£160,000
Additional expenses associated with its provision	£20,000
Annual cost of the asset (A)	£180,000

Number of days in the tax year before the benefit was provided 91 days

Number of days the asset was only used for employment 10 days

> Number of days when the asset was used only by another employee 10 days
> Total number of days the asset was unavailable for private use during the tax year (U) 111 days
> Deduction from annual cost: U/Y × A = 111 /365 × 180,000 = £54,740
> Chargeable cost of the asset is £180,000 −£54,740 which is £125,260.
> As the employee has made good part of the cost by paying £6,000 and it was paid before 6 July following the end of the relevant tax year the cash equivalent of the benefit for both tax and Class 1A NICs is £119,260.

39.37.2 *Shared use*

Section 205B ITEPA provides:

> (1) This section applies where the cost of an employment-related benefit ("the taxable benefit") is to be determined under section 205.
> (2) If, for the whole or part of the tax year concerned, the same asset is available for more than one employee's private use at the same time, the total of the amounts which are the cost of the taxable benefit for each of those employees is to be limited to the annual cost of the benefit of the asset determined in accordance with section 205(2).
> (3) The cost of the taxable benefit for each employee is determined by taking the amount given by section 205(1C) and then reducing that amount on a just and reasonable basis.
> (4) For the purposes of this section, an asset is available for an employee's private use if it is available for private use by the employee or a member of the employee's family or household.

39.38 Ordinary earnings/BiK border

The expression "general earnings" includes:
(1) Ordinary earnings, and
(2) BiK earnings[111]

So it may not often matter whether earnings are classified one way or the other. But clearly there should not be a double charge, and sometimes the distinction does matter.

Section 64 ITEPA defines the border:

> (1) This section applies if, apart from this section, the same benefit would give rise to two amounts ("A" and "B")—
> (a) A being an amount of [ordinary] earnings as defined in Chapter

[111] See 34.4.2 ("General earnings") and 34.6 (Charge on employment income).

> 1 of this Part,[112] and
>
> (b) B being an amount to be treated as earnings under the benefits code.
>
> (2) In such a case—
>
> (a) A constitutes earnings as defined in Chapter 1 of this Part, and
>
> (b) the amount (if any) by which B exceeds A is to be treated as earnings under the benefits code.

A different rule applies for accommodation:

> (3) This section does not apply in connection with living accommodation to which Chapter 5 of this Part applies.
>
> (4) In that case section 109 applies to determine the relationship between that Chapter and Chapter 1 of this Part.[113]

The EI Manual provides:

> **EIM20503 third party benefits** [Jan 2021]
>
> **... Interaction of "by reason of the employment" with s.62 ITEPA**
>
> It is important to understand the distinction between
>
> [1] Section 62 [ordinary earnings] on the one hand, and
>
> [2] Sections 70(1) [expenses payments BiK earnings] and 201(2) [benefit BiK earnings] on the other hand.
>
> Section 62(1) applies to earnings "in relation to an employment", including anything that is an "emolument of the employment" (Section 62(2)(c)). Section 70(1) and Section 201(3) apply to expense payments and benefits provided "by reason of the employment". Section 62 is based on what was previously Section 19 ICTA 1988, which charged to tax emoluments "from an employment". Case law shows that the phrase "by reason of the employment" has a wider meaning than "from the employment" (EIM00600). The words "from the employment" are not reproduced in Section 62 but earnings chargeable under that section include emoluments "of the employment" and in this context "of the employment" has the same meaning as "from the employment".

39.39 BiK: Remittance basis

This section deals with the position of a remittance basis taxpayer who is an employee, director or shadow director, and receives benefits in kind. The same points arise for the accommodation and the benefit BiK charges. In each case, a specified amount (the cash equivalent) is "treated as

[112] See 34.4.1 ("Ordinary" earnings).

[113] See 39.30 (BiK/general earnings: Interaction).

earnings from the employment".[114] I refer to this as **"BiK earnings"**. BiK earnings can qualify for the remittance basis in one of two ways:

(1) Under the COE remittance basis[115]
(2) Under the OWR (recent arrivers) remittance basis[116]

It is best to consider these separately.

39.39.1 *OWR (recent arrivers)*

This remittance basis applies if the general earnings are not "in respect of duties performed in the UK".
Thus one has to ascertain:

(1) What are the duties?
(2) Where are they performed?
(3) Are the BiK earnings "in respect of" those duties?

What are the duties?
To ascertain the duties of an employee is a matter of employment law, and the contract of employment, and the question is relatively straightforward.

To ascertain the duties of a formally appointed director is a matter of company law, and employment law (if the director has a contract of employment), and is also generally straightforward.

To ascertain the duties of a shadow director is more complicated. Assuming UK law principles apply,[117] the starting point is Part 10 Companies Act 2006, which is headed "A director's duties". The law was amended on 26 May 2015.[118] Before that date s.170(5) Companies Act 2006 provided:

> *The general duties apply to shadow directors where, and to the extent that, the corresponding common law rules or equitable principles so apply.*

Section 170(5) Companies Act 2006 now provides:

> The general duties apply to a shadow director of a company where and to the extent that they are capable of so applying.

[114] See 39.14 (Accommodation: the charge); 39.35.1 (Benefit BiK: The charge).

[115] See 34.14 (Chargeable overseas earnings).

[116] See 34.22 (Overseas workday relief).

[117] Further consideration would be needed if the relevant company law was significantly different.

[118] See s.89 Small Business, Enterprise and Employment Act 2015.

The Explanatory Notes comment on this change:

> At present the general duties of directors can only apply to shadow directors in the same way as the corresponding common law rules and equitable principles can. In future, the starting point for shadow directors will be that the general duties apply to them unless they are not capable of applying (removing the current restriction). This is achieved by replacing section 170(5) of the CA 2006. This change in default position is neither intended to preclude the courts from looking at the application of the duties on a case by case basis, nor from drawing on existing case law in any given case.

The position therefore continues to be that there is no clear statement of the general duties of a shadow director.

There are seven general duties:

(1) Duty to act within powers
(2) Duty to promote the success of the company
(3) Duty to exercise independent judgment
(4) Duty to exercise reasonable care, skill and diligence
(5) Duty to avoid conflicts of interest
(6) Duty not to accept benefits from third parties
(7) Duty to declare interest in proposed transaction or arrangement[119]

Duties (1) - (4) are expressed in general terms which do not identify specific duties. Duties (5) - (6) are negative duties (duties not to do something) which are not performed in any particular place. Duty (7) will rarely if ever arise.

It can be argued that a shadow director has no "duties". The director may choose to give instructions and directions, but is not under any duty to do so. I think the better view is that if a shadow director is deemed to have an employment, it follows that they should be deemed to have some duties. The question is: what are the duties of a shadow director? The duties may be regarded as the instructions or directions which the shadow directors give to the company. Another possible view is that everything that the shadow director does for the company (or its assets) is regarded as part of their "duties"; or alternatively everything they do if their actions concern matters which would (apart from them) be the responsibility of the actual directors.

[119] Sections 171-177 Companies Act 2006.

Where are the duties performed? Where these duties are performed is a question of fact, but in most cases it is likely that at least some of the duties will be performed outside the UK. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad) - but only if the duties are in fact performed abroad.

Are the BiK earnings in respect of the duties? Are BiK earnings "in respect of" the duties of a shadow director? In the case of a standard property owning company, it is considered that the answer is "no". Certainly if there were no duties there would be no shadow directorship and so no BiK earnings, but that is not enough. The benefit of accommodation (which the earnings represent) would arise independently of the duties. The fiction that the benefit is deemed to be received by reason of the employment does not entail that the earnings are in respect of the employment.

There is no income tax avoidance possibility here, because in the case where actual, substantial services were provided by a shadow director (comparable to the services of a properly appointed director) then the earnings could and probably would be in respect of the duties.[120]

If I am wrong on "in respect of", and some of the duties are performed in the UK, there is an apportionment. The difficulty of apportionment is immense, which suggests that my interpretation of "in respect of" is the correct one.

Similar points apply to an a properly appointed director (not a shadow director) who is owner, or ultimate beneficial owner, of a company. While such a person clearly has duties, the benefit in kind may be attributable to the share ownership, not to the duties, and so not "in respect of" the duties.

For these reasons it is considered that BiK earnings can in principle qualify for the OWR (recent arrivers) remittance basis.

39.39.2 *COE remittance basis*

This remittance basis applies if the duties of the employment are performed wholly outside the UK.

Thus one has to ascertain:
(1) What are the duties?
(2) Where are they performed?

In a accommodation case, where a company holds a UK dwelling house, it

[120] See *R v Dimsey* [2002] 1 AC 509 at [19].

would be difficult in practice for a UK resident remittance basis taxpayer to ensure that his duties are performed *wholly* outside the UK. However, it should be possible in other cases, eg where the BiK consists of non-UK situate accommodation or chattels, or for the BiK of employment-related loans. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad).

For these reasons it is considered that BiK earnings may qualify for the COE remittance basis.

39.39.3 *BiK earnings remitted to UK*

If BiK earnings qualify for the COE or OWR remittance basis, they are taxable only if remitted to the UK.

BiK earnings are not on any view remitted to the UK if:

(1) The accommodation is not in the UK; or
(2) The benefit is not received/used/brought to the UK by a relevant person.

If the accommodation or benefit is in the UK, common sense suggests that there ought to be a taxable remittance. But there is a sound technical argument that the deemed earnings cannot be remitted, because they do not exist. The tax charge arises only if the earnings are remitted. The property (or benefit) is not the same as the earnings.

HMRC do not agree. The EI Manual provides:

> **EIM20507 expenses and benefits from non-resident employers** [Mar 2022]
> The residence of the employer has no effect on whether benefits and expenses within the rules in the benefits code are chargeable.
> The residence of any other person providing benefits or expenses payments within those rules similarly has no effect.
>
> **EIM20508 Expense payments to and benefits provided for a director or employee whose earnings are taxable on remittance** [Mar 2022]
> **Sections 22 and 26 ITEPA 2003**
> The earnings of a director or employee, (except for 2015/16 and earlier in an excluded employment (EIM20007)), who is chargeable on remittances to the UK under either s.22 or s.26 ITEPA include
>
> - expenses payments remitted to the UK
> - expenses paid in the UK
> - *benefits provided or enjoyed in the UK (for example, a motorbike available for use in the UK)...*

> **EIM40303 Meaning of "remitted to the UK": benefits in kind ...** [Apr 2022]
> **Sections 809L ITA 2007 (inserted by Finance Act 2008)**
> **Benefits in kind**
> The definition of "remitted to the UK" in Section 809L ITA 2007 (see EIM40302) includes general earnings brought to, received in or used in and enjoyed in the UK in a form other than money. The benefits code as defined by Section 63(1) ITEPA 2003 provides a number of examples of earnings that are capable of satisfying the definition including taxable benefits arising from the provision of:
> - living accommodation
> - loans
> - cars available for private use.

This view was doubtful before 2008, but it is even harder to defend under the ITA remittance basis because where there is deemed income or gains, the statute specifically deals with the issue by identifying specific assets which are deemed to be derived from those income or gains.

39.40 Benefits in kind: Non-resident

This section deals with the position of a non-resident individual who is an employee, director or shadow director and receives benefits in kind. The same points arise for the accommodation and the benefit BiK charges. Earnings are taxable only if they are in respect of duties performed in the UK.[121]

Thus one has to ascertain:

(1) what are the duties
(2) where are they performed
(3) are the BiK earnings "in respect of" those duties

These questions are discussed above.[122] I conclude even if a shadow director has duties, and even if the duties are performed in the UK, the BiK earnings are not *in respect of* those duties, and so a non-resident shadow director is not taxable.

This conclusion is consistent with the POA exemption for non-residents[123] (though consistency between different tax codes does not count for much).

In practice, so far as the author is aware, HMRC do not assess non-

[121] See 34.29 (Non-resident employee).
[122] See 39.39.1 (OWR (recent arrivers)).
[123] See 39.10 (Non-resident individual).

resident individuals on benefits in kind. Of course, in many cases, collection of tax would be problematic. But it is significant that EI Manual in this context refers specifically to directors who "reside here" (ie, in the UK).[124]

39.41 Section 731 charge

One should arrange, if possible, that any trust or company holding the family home and chattels has no relevant income within s.731. Otherwise the use of the property would be a benefit, which in principle would rise to an income tax charge on a UK resident user.[125] This only applies if the benefit is not otherwise chargeable to income tax. If there is a BiK charge, there is no charge under s.731. One possibility may be to arrange that the amount of the BiK charge is a small one (eg by a reimbursement of the company's expenditure). Whatever the charge is, it should avoid a taxable benefit under s.731.

39.42 Transfer pricing & BiK

The transfer pricing code (in short) deems transactions between persons under common control to be at arm's length prices.[126]

HMRC formerly accepted that transfer pricing rules apply only to transactions between two "enterprises".[127] The INT Manual provided two reasons for this view.

The first is based on s.147(1) TIOPA, which sets out the "basic pre-condition" for transfer pricing. This provides (so far as relevant):

> ... "the basic pre-condition" is that—
> (a) provision ("the actual provision") has been made or imposed as between any two persons ... by means of a transaction or series of transactions...
> (d) the actual provision differs from the provision ... which would have been made *as between independent enterprises*.

From 2006 to 2012, the INT Manual provided:

> ***INTM412030. The affected persons: Enterprises*** *[Jun 2018]*
> *Section 147 TIOPA 2010 refers to provision made or imposed between*

[124] See 39.6.4 (Charge on shadow director).

[125] See 50.10 (Benefit of loan).

[126] See 25.6 (Transfer pricing/thin capitalisation).

[127] Accepting the argument in Venables, "The Transfer Pricing Provisions and Benefits from Offshore Structures" 8 OTR 165 *http://www.khpplc.co.uk/reviews*

> *any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals. The reference in S147(1)(d) requires the actual provision to be compared with the arm's length provision that would have been made between independent enterprises.*

The second argument is based on s.164 TIOPA which provides:

> (1) This Part is to be read in such manner as best secures consistency between—
> (a) the effect given to sections 147(1)(a), (b) and (d) and (2) to (6), 148 and 151(2), and
> (b) the effect which, in accordance with the transfer pricing guidelines, is to be given, in cases where double taxation arrangements incorporate the whole or any part of the OECD model,[128] to so much of the arrangements as does so...

OECD Model applies to enterprises. Article 9(1) OECD Model provides:

> Where
> *a)* an *enterprise* of a Contracting State participates directly or indirectly in the management, control or capital of an *enterprise* of the other Contracting State, or
> *b)* the same persons participate directly or indirectly in the management, control or capital of an *enterprise* of a Contracting State and an *enterprise* of the other Contracting State,
>
> and in either case conditions are made or imposed between the two *enterprises* in their commercial or financial relations which differ from those which would be made between independent *enterprises*, then any profits which would, but for those conditions, have accrued to one of the enterprises, but, by reason of those conditions, have not so accrued, may be included in the profits of that enterprise and taxed accordingly.

From 2006 to 2012, the INT Manual said:

> ***INTM412030 The affected persons: Enterprises***
> *Section 164 TIOPA 2010 requires Part 4 to be construed in accordance with the OECD model convention, as interpreted by the OECD transfer*

[128] Defined s.164(3): "In this section "OECD model" means—
(a) the rules which, at the passing of ICTA (which occurred on 9 February 1988), were contained in Article 9 of the Model Tax Convention on Income and on Capital published by OECD, or
(b) any rules in the same or equivalent terms."

> *pricing guidelines. Article 9 of the convention sets out the arm's length principle by reference to conditions made or imposed between enterprises.*

The INT Manual concluded:

> *This suggests that Part 4 TIOPA 2010 should be applied only where both parties are enterprises*

As to what is an enterprise, see 21.23.2 ("Enterprise"); but it is clear that an individual not carrying on a business is not an enterprise.

It is also worth noting that the pre-1998 transfer pricing rules did not apply in this situation: they referred to buyers and sellers (not persons).

HMRC held this view (more or less) from the inception of the current provisions. Tax Bulletin 46 (April 2000) provided:

> ***Will a charge be imputed on a non-resident landlord providing rent-free residential accommodation within the UK to a UK individual who is a participant?***
> *It will not be Inland Revenue practice to impute a charge under Sch 28AA [ICTA] [now Part 4 TIOPA] in these circumstances.*

However the INT Manual was rewritten in 2012 and now takes the opposite view:

> **INTM412030 Transfer pricing: ... meaning of 'person'** [Sep 2021]
> Section 147 TIOPA refers to provision made or imposed between any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals.
> The reference in S147(1)(d) requires the actual provision to be compared with the arm's length provision that would have been made between independent enterprises. This merely requires that the comparison is with the transaction that would be entered into by independent enterprises; it does not require that the persons themselves must be enterprises.
> Consequently, for example, charities will meet the basic pre-condition of s.147(1)(a) TIOPA - see INTM412020 - as they are 'persons' within the meaning of 147 TIOPA regardless of the fact that they will not usually be enterprises.
> The basic transfer pricing rule of s.147(3) or (5) TIOPA will not apply to charities in respect of any of their profits which are exempted from tax (under, for example s.478 CTA) as they will then fail to meet the 'potential advantage' requirement of s.147(2)(b) or 4(b) TIOPA.
> A person includes both individuals and legal persons such as companies. Person also includes a body of persons.

> Section 164 TIOPA requires Part 4 to be construed in accordance with the OECD Model Tax Convention, as interpreted by the OECD Transfer Pricing Guidelines. Article 9 of the convention sets out the arm's length principle by reference to conditions made or imposed between enterprises. Article 3 defines enterprise as "the carrying on of any business".

It is considered that the former HMRC view was correct. Many difficulties arise if it is not.

In practice, HMRC do not take the transfer pricing point in relation to individuals. If they want to seek to change their practice, that should be announced in a public statement, such as an HMRC brief; not quietly slipped into the text of a Manual rewrite.

Transfer pricing rules could apply in the (unusual, perhaps only theoretical) case where:

(1) a company provides accommodation or chattels in the course of its enterprise, and

(2) the individual uses the accommodation or chattels in the course of an enterprise carried on by the individual.

CHAPTER FORTY

BENEFIT IN KIND: LOANS FROM NON-RESIDENT COMPANIES

40.1 Loans from non-resident company
40.1.1 Loan from company: Navigation
40.2 Employment-related loan
40.2.1 Shadow director: HMRC practice
40.3 "Employment-related loan"
40.3.1 "Loan"
40.3.2 "Making" a loan
40.4 "Employment-related"
40.4.1 Borrower condition
40.4.2 Specified lender condition
40.4.3 By reason of employment
40.4.4 Personal loan exemptions
40.4.5 Change in employee status
40.4.6 Employee coming to UK
40.5 Official rate of interest
40.5.1 Foreign currency loan
40.6 Loan released/written off
40.6.1 Post-employment release
40.6.2 Replacement loans
40.7 Death of employee
40.8 Loan to participators
40.9 Benefit to participators
40.10 Company loans: GAAR

Cross references
The following topics are considered elsewhere:
55.1 (Transactions in Securities)

40.1 Loans from non-resident company

A dividend (or other income distribution) from a non-resident company will often cause an income tax charge:

(1) A dividend received by a UK resident, directly or through an IIP trust, will be taxable on the arising or remittance basis.
(2) A dividend received by a non-resident discretionary trust or company will be income for the purposes of s.624/ToA provisions (if they apply)

By contrast a loan, even if interest-free, does not constitute an income receipt and so will avoid these charges. Loans therefore seem an attractive method of extracting funds from companies. However, they raise tax issues of their own. This chapter considers:

(1) Employment-related loans
(2) Loans and benefits to participators in close companies

40.1.1 *Loan from company: Navigation*

Loans from companies raise further issues which are discussed elsewhere:

Topic	**See**
General law issues	App 2.5
Benefits for s.731/s.87	50.10
UK receipt a taxable remittance ,if sum lent derives from:	
- s.624/s.720/s.731 income of settlor/transferor	47.8; 49.26; 50.39
- foreign income/gains of individual	18.18.7
Loan to transferor/settlor: 727 ITA/s.641 ITTOIA	49.23; 47.14
Loan to trustees: sch 4B CGT	62.10
Loan may trigger transactions in securities rules	55.3.1
Liability to repay may be non-deductible for IHT	80.1
Tainting protected trusts	92.7.7

Loans may be relevant for disguised remuneration; I do not discuss that topic in this book though I hope to do so in a future edition.

Loans *to* non-resident companies raise different issues, not discussed here.

40.2 Employment-related loan

The benefit of an employment-related loan is charged under the benefits code.[1]

Section 175(1) ITEPA provides:

> The cash equivalent of the benefit of an employment-related loan is to be treated as earnings from the employee's employment for a tax year if the loan is a taxable cheap loan in relation to that year.

This will in principle apply on a loan from a company to an employee, director, or shadow director.[2]

Section 173(1A) ITEPA provides:

> Where this Chapter applies to a loan—
> (a) the loan is a benefit for the purposes of this Chapter (and accordingly it is immaterial whether the terms of the loan constitute a fair bargain)

Although a "fair bargain" is outside the residual benefits in kind charge,[3]

[1] See 39.2 (The benefits code).

[2] See 39.6 (Shadow directors).

[3] See 39.35.4 (Fair bargain rule).

it is within the scope of employment-related loans. But that was the position even before s.173(1A) was enacted.[4]

A discussion of the meaning of "taxable cheap loan" and the computation of the cash equivalent is not discussed here. For DT relief see 37.8.3 (DT relief: Benefits in kind).

The BiK earnings of an employment-related loan may be chargeable overseas earnings or may qualify for overseas workday relief. In the case of a shadow director who is a remittance basis taxpayer, it is suggested that the earnings cannot be remitted so no tax charge can arise.[5]

40.2.1 *Shadow director: HMRC practice*

Where living accommodation is provided by a company, HMRC say that they take the somewhat unmeritorious point that the occupier of the property may be a shadow director of the company, so that a benefit in kind charge arises.[6] In relation to interest-free loans from offshore companies, the same point arises. However in this case HMRC do not seem to take the point. There are various possible explanations for this:

(1) The motivation for taking, or purporting to take, the living accommodation point may have been to discourage IHT planning on the family home (prior to the introduction of the IHT residential-property code). That consideration does not apply to interest-free loans.

(2) Borrowers are less likely to be shadow directors than occupiers. It is of course a question of fact in each case. But as a general rule, perhaps, a person occupying a home purchased by the company is more at risk of becoming a shadow director, because the company's acts to acquire the home and allow the individual to occupy are inherently more likely to be at the direction of the individual. By contrast, to put a beneficiary in funds, by way of loan (just as by way of distribution) is in the normal course of events a matter for the directors and (while no doubt made in conjunction with the trustees and beneficiary) there is less general reason to suspect the directors are acting at the direction of the beneficiary.

[4] See 50.4.1 (Arm's length transaction).

[5] See 39.39 (BiK: Remittance basis). If that is wrong, imponderable questions arise as to what happens if the money lent is remitted here and spent. Contrast 50.40.2 (Beneficial loan).

[6] See 39.6.4 (Charge on shadow director).

40.3 "Employment-related loan"

40.3.1 *"Loan"*

Section 173(2)(a) ITEPA provides:

> "loan" includes any form of credit

EIM para 26108 provides:

> **EIM26108. Meaning of loan** [Nov 2019]
> Loan means more than just lending money. It includes any form of credit. It follows that any kind of advance by reason of the employment is covered. For example, any amount shown in the employer's books or records as owed by an employee will count as a loan.
> *Grant v Watton*
> The case of *Grant v Watton* (71 TC 333) concerned credit extended by a company of which Grant was a director, to his sole trade and later to a partnership in which Grant was the general partner. In the High Court Pumfrey J. considered the meaning of credit –
>
> > "... credit is granted where payment is not demanded until a time later than the supply of goods to which the payment relates. Credit is the deferral of payment of a sum which, absent agreement, would be immediately payable."
>
> Regarding the application of Section 175 ITEPA 2003 to an overdrawn director's loan account see EIM26505.

40.3.2 *"Making" a loan*

Section 173(2)(b) ITEPA provides:

> references to making a loan (and related expressions) include arranging, guaranteeing or in any way facilitating a loan.

EIM26110 summarises this and continues:

> **Loan made by a third party – employee benefit trust** [Nov 2019]
> It is not uncommon for a third party, such as an employee benefit trust (EBT), to make a loan to a beneficiary who is also an employee of the employer which is associated with the EBT. It is sometimes suggested that the loan is not an "employment-related loan" (EIM26113) because the definition of that term does not include a loan provided by a third party.
> Whilst it is true that the definition includes no reference to a third party loan provider, HMRC does not accept that the loan is not an employment-related loan. The definition of "employment-related loan"

> includes a loan made by an employee's employer. As "making" a loan includes "in any way facilitating" a loan, if the employer provides the money to fund the EBT, the employer is regarded as making the loan. Consequently for the purposes of the loan benefit rules, the EBT is ignored and the loan is treated as made directly by the employer to the employee. It follows that the loan is an employment-related loan.

Suppose:

(1) A company is held by a trust, and lends funds to the trustees ("loan 1").

(2) The trustees lend funds to a beneficiary who is a shadow director ("loan 2").

At first sight this would not be an employment-related loan because it is not made by the "employer". But if loan 1 is made in order to allow the trustees to lend to the beneficiary, it may be said that the company has facilitated loan 2. The same applies to a back-to-back loan, ie if the company deposits funds with a bank, the trustees borrow from the same bank on the security of that deposit, and the trustees then lend to the beneficiary.

Section 174(4) ITEPA provides:

> References in this section to a loan being made by a person extend to a person who—
>
> (a) assumes the rights and liabilities of the person who originally made the loan, or
>
> (b) arranges, guarantees or in any way facilitates the continuation of a loan already in existence.

EIM para 26111 provides:

> **Loans taken over from another person** [Nov 2019]
>
> If the rights over an existing loan are taken over by another person the loan will remain within the charge if it was within the charge when it was first made.
>
> A loan within the scope of the charge cannot be removed from it by the original lender handing his or her rights over to another person.
>
> But a loan that was not within the charge when it was first made can be brought within it if it is taken over by a person mentioned in EIM26113.

40.4 "Employment-related"

Section 174(1) ITEPA defines "employment-related".

> For the purposes of this Chapter an employment-related loan is a loan—
> (a) made to an employee or a relative of an employee, and
> (b) of a class described in subsection (2).

There are two conditions, or sets of conditions.
Para (a) (the "**borrower condition**") specifies the borrower must be the employee or relative.
Para (b) (the "**specified lender condition**") specifies the lender must be the employer (or certain connected persons).

Section 174(3) ITEPA extends the definition of employer and employee:

> In this section—
> "employee" includes a prospective employee,[7] and
> "employer" includes a prospective employer...

40.4.1 *Borrower condition*

Section 174(1) ITEPA provides:

> For the purposes of this Chapter an employment-related loan is a loan—
> (a) made to an employee or a relative of an employee...

Section 174(6) ITEPA defines "relative" quite widely:

> For the purposes of this section a person ('X') is a relative of another ('Y') if X is—
> (a) Y's spouse or civil partner,
> (b) a parent, child or remoter relation in the direct line either of Y or of Y's spouse or civil partner,
> (c) a brother or sister of Y or of Y's spouse or civil partner, or
> (d) the spouse or civil partner of a person falling within para (b) or (c).

40.4.2 *Specified lender condition*

Section 174(1) ITEPA provides:

> For the purposes of this Chapter an employment-related loan is a loan...
> (b) of a class described in subsection (2).

So we turn to s.174(2) ITEPA which provides:

> For the purposes of this Chapter the classes of employment-related loan are—

[7] For the definition of "employee" see 34.3 (Employment/employer/employee).

A A loan made by the employee's employer.
B A loan made by a company or partnership over which the employee's employer had control.
C A loan made by a company or partnership by which the employer (being a company or partnership) was controlled.
D A loan made by a company or partnership which was controlled by a person by whom the employer (being a company or partnership) was controlled.
E A loan made by a person having a material interest[8] in—
(a) a close company which was the employer, had control over the employer or was controlled by the employer, or
(b) a company or partnership controlling that close company.

"Control" means control in the strict sense.[9]

40.4.3 *By reason of employment*

There is no requirement that the loan has to be made by reason of the employment. In this respect the employee-related loan code is unlike the other benefit in kind codes. But two other rules may lead to the same outcome as the "by reason of employment" causation test: personal loan exemptions, and the rule that a person who facilitates a loan is regarded as having made it.[10]

40.4.4 *Personal loan exemptions*

Section 174(5) ITEPA provides:

> A loan is not an employment-related loan if—
> (a) it is made by an individual in the normal course of the individual's domestic, family or personal relationships, or
> (b) it is made to a relative of the employee and the employee derives no benefit from it.

I refer to these rules as the **"personal loan exemptions"**. These are quite wide exemptions. In particular, straightforward loans to relatives of employees are not caught.

40.4.5 *Change in employee status*

What if a loan is made to someone who is not an employee (as defined) or

[8] "Material interest" is defined in s.68 ITEPA.
[9] See 104.2.2 (Definitions of "control").
[10] See 40.3.2 ("Making" a loan).

prospective employee, but later becomes a shadow director? At first sight, leaving an existing loan outstanding would not give rise to a tax charge even after the borrower becomes a shadow director. However, if the loan is repayable on demand, not calling in the loan amounts to a "form of credit". Thus there will be an income tax charge on the benefit in kind of loan repayable on demand if a borrower becomes a shadow director (and so becomes an "employee").

What is the position if a loan is made to a shadow director who ceases to be a shadow director? There is no charge on a loan to a former employee. This was deliberate. EN ITEPA provides:

> 76. Where the Schedule E legislation provides that an amount shall be treated as an emolument of an employment only if provided in a year when the employment is held, this Act reproduces that limitation. The sections in the benefits code make it clear that such amounts or benefits will only be treated as earnings if they are paid/provided in a year in which the employment is held. If they are paid/provided at any other time they will not be treated as earnings and will be outside the "general earnings" to which section 17 [ITEPA] applies.

The rules for disguised remuneration, and EFURBS, would also need consideration.

40.4.6 *Employee coming to UK*

The EI Manual provides:

> **EIM26105. Loans in foreign currencies: Taxation of overseas loans** [Nov 2019]
> ... *Taxation of overseas loans in foreign currencies*
> An employment-related loan (see EIM26102) made to an employee who comes to work in the UK is within the scope of the beneficial loans rules if:
>
> - the loan is made at a time when the employee's earnings are already chargeable to UK income tax as employment income (for example, if a loan is made after the employee has taken up employment in the UK and is resident and ordinarily resident in the UK for the year in which the loan is made); or
> - the loan is made in contemplation of the employee working or living in the UK (for example, if the loan is made as part of a package with a view to the employee working in the UK); or
> - the employee, at a time when the employee's earnings are chargeable to UK income tax as employment income, in any way facilitates the continuation of a loan which was already in existence before the

employee came to work in the UK.

As far as the final bullet is concerned, this is relevant where, for example, the loan is made not by the employer but by a third party such as a bank which is not connected with the employer and where the capital repayments and interest are deducted from the employee's salary. In these circumstances, the question is whether the loan continues when the employee is in the UK without any further involvement by the employer, or whether the employer does something which makes it easier for the employee to continue to have the loan.

An employer would not be facilitating the continuation of a loan merely because

- the loan is conditional on the employee continuing in the employment, or
- the employer deducts the interest and repayments of capital from the employee's salary.

If the employer pays a subsidy to the lender – for example, by paying annual interest on behalf of the employee – that would not necessarily mean that the employer was facilitating the continuation of the loan. The subsidy itself might however be taxable as an employment-related benefit under Section 201 ITEPA.

On the other hand the employer would be facilitating the continuation of the loan if

- the loan was conditional on the employer continuing to make regular payments to subsidise the interest which the employer might cease to make at any time, or
- the employer chose month by month or year by year whether to subsidise the loan.

40.5 Official rate of interest

Section 181(1) ITEPA provides:

> "The official rate of interest" for the purposes of this Chapter means the rate applicable under section 178 of FA 1989 (general power of Treasury to specify rates of interest).

Section 178 authorises regulations, and the law is in reg 5(1) Taxes (Interest Rate) Regulations 1989:

> Subject to paragraph (2), the rate applicable under section 178 for the purposes of Chapter 7 of Part 3 of the Income Tax (Earnings and Pensions) Act 2003 ("Chapter 7") shall, on and after 6th April 2020, be 2.25% per annum.

40.5.1 *Foreign currency loan*

There is (somewhat miserly) provision for foreign currency loans. Reg 5(2) Taxes (Interest Rate) Regulations 1989 provides:

> In relation to a loan outstanding for the whole or part of a year of assessment where—
>
> (a) the loan was made in the currency of a country or territory specified in the Table below,
>
> (b) the benefit of the loan is obtained by reason of the employment of a person who normally lives in that country or territory, and
>
> (c) that person has lived in that country or territory at some time in the period of six years ending with that year,
>
> the rate applicable under section 178 for the purposes of [Chapter 7] and the date on and after which that rate has effect shall be ascertained from the entries in the Table below relating to the country or territory concerned.

Country or territory	**Date on and after which applicable rate has effect**	**Applicable Rate**
Japan	6th June 1994	3.9% per annum.
Switzerland	6th July 1994	5.5% per annum.

The EIM provides:

> **EIM26106. Official rates for certain foreign currencies** [Nov 2019]
> ... There has been no change in either rate since 1994.
> [The Manual summarises s.181 and continues:] The intention of these rules is to give relief for employees working temporarily in the UK, where interest rates in the overseas country are lower than interest rates in the UK (!). The relief does not apply to employees who come to the UK and live here permanently.
> The expressions "normally lives" and "lived" have their natural commonsense meaning. An employee who came to work in the UK for four years and who returned home after the four years can be said to "normally live" in the home country. It is not necessary to maintain a residence in the overseas country during the period of employment in the UK. The terms "lives" and "has lived" connote a degree of continuance if not permanence. A holiday in the home country for an employee working in the UK would not in itself be sufficient to establish that the employee had "lived" in the overseas country within the meaning of these rules. "Living" implies more than returning for a short holiday.

40.6 Loan released/written off

A release may be earnings and taxed under usual principles.

Section 188(1) ITEPA provides:

> If—
>
> (a) the whole or part of an employment-related loan is released or written off in a tax year, and
>
> (b) at the time when it is released or written off the employee holds the employment in relation to which the loan is an employment-related loan ("employment E"),
>
> the amount released or written off is to be treated as earnings from the employment for that year.

What constitutes a release is not as simple as it might seem, but I do not pursue that here.[11]

40.6.1 *Post-employment release*

Section 188(2) ITEPA provides

> But if the employment has terminated or become lower-paid employment as a minister of religion and there was a time when—
>
> (a) the whole or part of the loan was outstanding,
>
> (b) the employee held the employment, and
>
> (c) it was not lower-paid employment as a minister of religion,
>
> subsection (1) applies as if the employment had not terminated or become lower-paid employment as a minister of religion.

40.6.2 *Replacement loans*

Section 188(3) ITEPA provides

> (3) Where subsection (2) applies, any loan which replaces directly or indirectly the employment-related loan is to be treated as an employment-related loan in relation to employment E if—
>
> (a) it would, if employment E had not terminated or become lower-paid employment as a minister of religion, have been an employment-related loan in relation to employment E, and
>
> (b) it is not an employment-related loan in relation to other employment.

[11] *Esprit Logistics Management v HMRC* [2018] UKFTT 287 (TC); *England v HMRC* [2023] UKFTT 00313 (TC).

Section 189(1) ITEPA[12] deals with double charges:

> Section 188 (loan released or written off: amount treated as earnings) does not apply if, by virtue of any other provision of the Income Tax Acts, the amount released or written off—
> (a) is employment income of the employee, or
> (b) is or is treated as income of the employee (or of the employee as a borrower) which is not employment income and upon which that person is liable to pay income tax.
> This is subject to subsections (2) and (3).

Section 189(2) ITEPA deals with a release in relation to a termination of employment:

> If, as a result of subsection (1), Chapter 3 of Part 6 (payments and benefits on termination of employment etc) would be the only provision by virtue of which the amount released or written off would be income of the employee—
> (a) section 188 does apply, and
> (b) accordingly Chapter 3 of Part 6 does not apply.

Section 189(3) ITEPA deals with the settlor-interested trust code:

> If—
> (a) an amount is treated as the employee's income under section 633 of ITTOIA 2005 (capital sums paid to settlor by trustees of settlement) in respect of a capital sum paid in relation to the release or writing-off of the loan, and
> (b) the amount released or written off exceeds the amount so treated as income,
> section 188 does apply but only the amount of the excess is to be treated as earnings from the employment for the tax year in question under that section.

40.7 Death of employee

Section 190 ITEPA provides:

> (1) On the employee's death a taxable cheap loan is to be treated—
> (a) for the purposes of this Chapter as ceasing to be outstanding, and
> (b) for the purposes of section 182 (normal method of calculating interest at the official rate) as being discharged on the date of death.

[12] Flagged by s.188(4) ITEPA.

(2) Section 188 (loan released or written off: amount treated as earnings) does not apply in relation to a release or writing off which takes effect on or after the death of the employee.

40.8 Loan to participators

Section 455 CTA 2010 imposes a charge where a close company lends money to (in short) a participator or an associate of a participator.[13]

There is no charge under this section provided the company is not UK resident (and so not close) at the time the loan is made. It does not matter if the company later becomes UK resident.

Section 415 ITTOIA imposes a charge if a loan chargeable under s.455 CTA 2010 is released or written off; again that would not apply if the loan is not within s.455 (non-resident lender); however the release may be a dividend or income distribution taxable under general principles.

40.9 Benefit to participators

Section 1064 CTA 2010 imposes a charge where a "close company incurs an expense in, or in connection with, the provision for any participator[14] of ... benefits or facilities of any kind". This does not affect a loan from a non-resident company, for two reasons (either of which would suffice):

(1) A company does not "incur expense" in making a loan or in leaving the loan outstanding.
(2) A non-resident company is not close.

The same applies to the charge under s.464A CTA 2010 (avoidance arrangements conferring benefit on participator or associate).

40.10 Company loans: GAAR

A loan (instead of a dividend) is not an artificial transaction.[15] So one can be confident that a straightforward loan is not caught by the GAAR. But of course a loan may form part of a set of transactions which is caught.[16]

[13] See 104.6 (Associates).

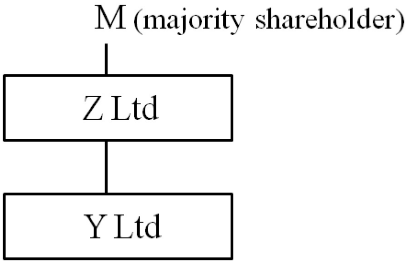
[14] "Participator" has the extended definition; see s.1068 CTA 2010 and 104.24 (Participator: Extended definition). It also includes associates of a participator: s.1069 CTA 2010; see 103.6 (Associates).

[15] See 3.21.2 ("Artificial/devices").

[16] *https://www.gov.uk/government/publications/gaar-advisory-panel-opinion-of-17-november-2017-extraction-of-cash-or-equivalent-through-trust-interests* It seems surprising that the taxpayer thought this worth arguing before the panel.

The GAAR panel opinion notice of 26 April 2022 concerned a scheme to avoid the charge on loans to participators.[17] Only limited weight can be given to GAAR panel decisions, as the panel is not a judicial body, and its decisions are short and without much detail. However these decisions are all the guidance on the GAAR that we currently have.

The company structure was:



Z Ltd had lent £10m to M, and the charge under s.455 CTA 2010 would arise if the loan was outstanding 9 months later, on 28/2/2017. In order to avoid this:

(1) Y Ltd lent £10m to M (at a commercial rate of interest)[18]
(2) M repaid his debt to Z Ltd

The panel found:

(1) The loans were not contrived or abnormal ("as Y Ltd had substantial assets of its own"). The fact that the loans carried interest made them a more reasonable course of action.[19] Repayment of the debt to Z Ltd was also not contrived or abnormal.
(2) The arrangement did exploit a shortcoming in the legislation (lack of provisions dealing with recycling loans round company groups).

[17] See 40.8 (Loan to participators). For the decision, see *https://www.gov.uk/government/publications/gaar-advisory-panel-opinion-of-26-april-2022-repayment-of-a-participator-loan-through-transactions-involving-group-companies*

[18] For completeness: The loan was in two tranches, and one suspects that the first loan found its way back to the company to finance the second loan; but the panel did not investigate that.

[19] The loans would have carried interest in order to avoid a benefit in kind charge on beneficial loans, and for company law reasons as M was only a majority shareholder, but the panel did not mention these points.

(3) However the arrangement was reasonable and not abusive. “Not covering group loans does seem a big and obvious matter and it does not seem to us that the GAAR can be used to cover such a gap.”

Eight months later the company did the same again, recycling the loans from Y Ltd back to Z Ltd. HMRC did not argue that this was part of the same arrangement; the reader may think they might have done. Had there been a single arrangement, the panel said “we might have come to a different conclusion”. So there is not much guidance there, but I would plan on the basis that the GAAR can apply to a series of recycled loans.

CHAPTER FORTY ONE

DISCRETIONARY TRUSTS: INCOME TAX

41.1 Discretionary trusts: Introduction
- 41.1.1 Outline: 3 tiers
- 41.1.2 Trust tax-credit systems

41.2 Tier 1: Trust charge on income receipt
- 41.2.1 Discretionary-trust IT rates
- 41.2.2 Settlor-interested trust
- 41.2.3 Trust-rate income
- 41.2.4 Types of trust-rate income

41.3 Tier 3: Discretionary payment charge
- 41.3.1 Source/categorisation of income
- 41.3.2 Annuity income
- 41.3.3 Charge on income
- 41.3.4 Location of source
- 41.3.5 When income arises
- 41.3.6 Tax return: Trust income
- 41.3.7 Scottish beneficiaries

41.4 Beneficiaries tax credit
- 41.4.1 UK resident trust
- 41.4.2 Non-resident trust

41.5 Tier 2: Trust withholding tax

41.6 Trust tax-pool credit
- 41.6.1 Immigrant/new trusts
- 41.6.2 Pre-2008 transitional rule

41.7 Examples
- 41.7.1 UK trust, dividend income
- 41.7.2 TSE Manual example

41.8 Trust payment: Income/capital
- 41.8.1 Power over income
- 41.8.2 Power over capital
- 41.8.3 Accumulated income paid as capital
- 41.8.4 HMRC view
- 41.8.5 Accumulated income paid as income

41.9 Discretionary trust transparency reliefs
- 41.9.1 UK trust, foreign income: s.111 relief
- 41.9.2 ESC B18: UK trust
- 41.9.3 Carry back (spreadback)
- 41.9.4 Confidentiality
- 41.9.5 Tax return: ESC B18 claim

41.10 ESC B18: Non-resident trust
- 41.10.1 ESC B18: HMRC example
- 41.10.2 Claim procedure

41.11 s.629 income: Settlor's child

41.12 UK trust, non-resident beneficiary: DT relief
- 41.12.1 Other Income article
- 41.12.2 Other Income article restricted

41.13 Dual-resident trustees

Cross references

The following topics are considered elsewhere:
16.2 (Source: IT territorial limit)
10.3.1 (Split year: Pt 4/5 ITTOIA Income)

I do not consider:
- the vexed topic of trust expenses; but see 41.10.1 (ESC B18: HMRC example)
- the standard rate band, which gives relief for the first (small) slice of trust income

- corporate beneficiaries
- share incentive plans

41.1 Discretionary trusts: Introduction

This chapter is concerned with the income taxation of discretionary trusts. The topic needs a book to itself. This chapter focuses on the matters closest to the themes of this work but it is necessary to review the general rules to understand these matters in their context.

The starting point is to appreciate that a receipt from a discretionary trust may in the hands of the recipient be:
(1) income ("income distribution" or "income receipt") or
(2) capital ("capital distribution")

I use the term **"discretionary income payment"** to refer to a payment from a discretionary trust to a beneficiary, which is income (not capital) in the hands of the beneficiary. The statutory term is "discretionary payment" (it is assumed that the payment is an income distribution).

The legislation in Part 9 ITA (settlements and trustees). Section 462 ITA provides an overview. Perhaps we need it:

Chapter	**Topic**
2	General provisions and definitions
3	Trust rates
4	Trust expenses
5	Approved share incentive plans
6	First slice of trust income exempt from trust rate
7	Trust distributions

In this chapter when I refer to a trust, I am referring to a discretionary trust, and assume that the trust is not settlor-interested (or if it is, that s.624 does not apply). I do not consider the rules for trust expenses or the small relief for the first slice of trust income.

41.1.1 *Outline: 3 tiers*

In outline, there are three tiers of IT charges:

Tier:	**My term**	**Paid by**	**When paid**
1:	Trust charge	Trustees	On receipt of income
2:	Trust withholding tax	Trustees	On discretionary income payment
3:	Beneficiary charge	Beneficiary	On discretionary income payment

Tier 1: Trust charge: on receipt of income

At this tier it is necessary to distinguish resident/non-resident trustees:

(a) UK resident trustees are charged on all their income
(b) Non-resident trustees are charged on UK source income only

Tier 2: Trust withholding tax: on making discretionary income payment
At this tier it is also necessary to distinguish resident/non-resident trustees:
(a) UK resident trustees pay trust withholding tax
(b) Non-resident trustees do not pay this

Tier 3: Beneficiary charge: on receiving discretionary income payment
At this tier it is necessary to distinguish resident/non-resident *beneficiaries*:
(a) UK resident beneficiaries: charge on all trust income
(b) Non-resident beneficiaries: charge on UK source trust income (ie from UK resident trusts) only

Trustees may consider creating an interest in possession to avoid these rules, and move to the simpler system under which there is a single tax charge. (This move generally has no IHT consequences.)

41.1.2 *Trust tax-credit systems*

The 3 tiers of taxation would generally result in triple taxation, but two distinct tax credits generally avoid this:
(1) Tax paid at tier 1 enters a "tax pool" and is allowed as a credit against withholding tax at tier 2. If the tax pool is large enough, no WHT is paid at tier 2. I refer to this as **"trust tax-pool credit"**.
(2) Withholding tax at tier 2 is allowed as a credit for Beneficiary tax at tier 3. So for a UK trust (subject to WHT at tier 2) no additional tax is paid at tier 3. On the contrary, a beneficiary who is not a top rate taxpayer, or who is entitled to some relief, may reclaim tax. I refer to this as **"beneficiary WHT (withholding tax) credit"**.

I refer to this together as the **"trust tax-credit systems"**.

In a purely domestic situation (UK trust, UK beneficiaries, UK source income) the trust tax credit systems work, so there is effectively a single tax charge and not a double or triple tax charge.[1]

Where there is a foreign element (non-resident trust, non-resident beneficiary, or foreign source income) the trust tax credit-systems would

[1] See 41.7 (Examples).

not work, and so needs to be supplemented by further reliefs:
(1) s.111 TIOPA (UK trust, foreign source income)
(2) ESC B18

41.2 Tier 1: Trust charge on income receipt

The starting point is that trustees are persons, and so when trustees receive income they are subject to income tax under the usual charging provisions. There is no special charging provision for trustees. Accordingly:
(1) UK trustees are subject to tax on all their income
(2) Non-resident trustees are subject to tax on UK source income (except so far as non-resident IT relief is available)

41.2.1 *Discretionary-trust IT rates*

There are special rules dealing with the rates of income tax. Section 479(1) ITA provides:

> This section applies if—
> (a) accumulated or discretionary income arises to the trustees of a settlement, and
> (b) the income does not arise under a charitable trust.

The key term is "accumulated or discretionary income". Section 480 ITA provides:

> (1) Income is accumulated or discretionary income so far as—
> (a) it must be accumulated, or
> (b) it is payable at the discretion of the trustees or any other person,
> and it is not excluded by subsection (3).
> (2) The cases covered by subsection (1)(b) include cases where the trustees have, or any other person has, any discretion over one or more of the following matters—
> (a) whether, or the extent to which, the income is to be accumulated,
> (b) the persons to whom the income is to be paid, and
> (c) how much of the income is to be paid to any person.

This covers common form discretionary trusts. Assuming we have a trust in that form, we read on. Section 479 ITA provides:

> (2) Income tax is charged on the income at the rates referred to in this section instead of at the rates which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)).
> (3) Income tax is charged on the income at the dividend trust rate so far

> as the income is dividend income.
> (4) Otherwise, income tax is charged on the income at the trust rate.

The rates are the top income tax rates (the Blair/Brown administrations disapproved of trusts and subsequent administrations have not changed the policy). Section 9 ITA provides:

> (1) The trust rate is 45%.
> (2) The dividend trust rate is 38.1%.

41.2.2 *Settlor-interested trust*

Section 480 continues with 3 exceptions, of which only the first is relevant here.[2] Section 480(3) ITA provides:

> Income is excluded for the purposes of subsection (1) so far as—
> (a) before being distributed, it is the income of any person other than the trustees...

I would have thought that this applies to the income of a settlor-interested trust, within s.624 ITTOIA applies, but HMRC do not agree. If that is right, when does s.480(3)(a) ever apply?

41.2.3 *Trust-rate income*

Section 481 ITA provides:

> (1) This section applies if—
> (a) the trustees of a settlement are liable for income tax on an amount of a type set out in section 482,
> (b) the trustees are not trustees of a unit trust scheme,[3] and

[2] The other exceptions are of specialist interest. For completeness, s.480 continues:
(3) Income is excluded for the purposes of subsection (1) so far as ...
(b) it is income from property within subsection (4), or
(c) it is income from service charges which are paid in respect of dwellings in the UK and are held on trust.
(4) Property is within this subsection if it—
(a) is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies, but
(b) is not held as a member of a property investment LLP.
(5) In subsection (3)(c) "service charges" has the meaning given by section 18 of the Landlord and Tenant Act 1985 (but as if that section also applied in relation to dwellings in Scotland and Northern Ireland).

[3] Para (1) is otiose as unit trust trustees are not "trustees of a settlement",

> (c) the amount is not income arising under a charitable trust.
>
> (2) Income tax is charged on the amount at one of the rates referred to in this section instead of at the rate which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)). This is subject to subsection (5).
>
> (3) If the amount is within Type 1 or Type 12 as set out in section 482, [purchase of own shares/arrangements offering a choice of income or capital return] income tax is charged on the amount at the dividend trust rate.
>
> (4) Otherwise, income tax is charged on the amount at the trust rate.

I refer to types of income within s.482 as **"trust-rate income"**.

This rule applies to all trusts, IIP as well as discretionary, but it is convenient to deal with it here.

Section 481 continues with 4 exceptions:

> (5) Income tax is not to be charged as mentioned in subsection (2) so far as the amount—
>
> (a) is accumulated or discretionary income,
>
> (b) would be accumulated or discretionary income apart from section 480(3)(a) or (c), or
>
> (c) is income from property within subsection (6).
>
> (6) Property is within this subsection if it is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies.

41.2.4 *Types of trust-rate income*

Section 482 ITA provides:

> The types of amount referred to in section 481 are as follows.

Section 482 goes on to specify 12 types of income, mostly fairly exotic categories, which constitute capital for trust purposes but income for tax purposes. In outline:

Type	Type of income
1	Purchase of own shares
2	Accrued income profits
3	Offshore income gains
4	Employee share ownership trusts
5	Lease premiums
6	Deeply discounted securities
7	Life insurance gains
8	Transactions in deposits

9 Futures & options
10 Foreign dividend coupons
11 Transactions in land
12 Arrangements offering a choice of income or capital return

In full detail:

Type 1: Purchase of own shares

A payment—

(a) which is made to the trustees or to which the trustees are entitled, and

(b) which is made by way of distribution by a company on the redemption, repayment or purchase of shares in the company or on the purchase of rights to acquire such shares.

Type 2: Accrued income profits

Accrued income profits treated as made by the trustees under section 628(5) or 630(2) [ITA].

Type 3: Offshore income gains

Income treated as arising to the trustees under regulation 17 of the Offshore Funds (Tax) Regulations 2009.

Type 4: Employee share ownership trusts

Income which the trustees are treated as receiving under section 68(2) or 71(4) of FA 1989 (which relate to employee share ownership trusts).

Type 5: Lease premiums

A sum to which Chapter 4 of Part 3 of ITTOIA 2005 (which provides for certain amounts to be treated as receipts of a property business) applies.

Type 6: Deeply discounted securities

A profit in relation to which the trustees are liable for income tax under section 429 of ITTOIA 2005 (profits from deeply discounted securities).

Type 7: Life insurance gains

A gain in relation to which the trustees are liable for income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc), other than a gain to which subsection (7) of that section applies.

Type 8: Transactions in deposits

A profit or gain in relation to which the trustees are liable for income tax under section 554 of ITTOIA 2005 (transactions in deposits).

Type 9: Futures & options

A profit or gain—

(a) in relation to which the trustees are liable for income tax under section 557 of ITTOIA 2005 (disposals of futures and options), and

(b) which does not meet any of conditions A to C in section 568 of ITTOIA 2005.

Type 10: Foreign dividend coupons
Proceeds in relation to which the trustees are liable for income tax under section 573 of ITTOIA 2005 (sales of foreign dividend coupons).

Type 11: Transactions in land
Income treated as arising to the trustees under Part 9A of this Act [ITA] (transactions in land).

Type 12: Arrangements offering a choice of income or capital return
Income treated as arising to the trustees under section 396A of ITTOIA 2005 (arrangements offering a choice of income or capital return).

41.3 Tier 3: Discretionary payment charge

41.3.1 *Source/categorisation of income*

In short: where the trust is a common form discretionary trust, and a beneficiary receives trust income in the exercise of the trustees' discretion:

(1) The trust is the source (not the underlying trust assets).

(2) The income is categorised as Annual Payments.

This applies regardless of the type of income received by the trustees, out of which they may make the payment.

In *Memec v IRC*:

> A discretionary trust ... is not transparent. No beneficiary is entitled unless and until the trustees exercise their discretion in his or her favour, and the trustees' exercise of discretion is regarded as ... creating a new source of income...[4]

[4] 71 TC 77 (HC) at p.95. The same point was made in *IRC v Berrill* 55 TC 429 at p.444.
For completeness: Venables expressed a dissenting view in "*Memec* and the Source of Discretionary Income Payments from Trusts" PTPR (1999) Vol. 7 p.87 *http://www.khpplc.co.uk/reviews;* and Venables, *Non-Resident Trusts* (8th ed., 2000), para 16.3 (Taxation of Beneficiary):
"Where there are discretionary trusts of income ...and the trustees distribute income in the exercise of their discretion, the taxability of the recipient beneficiary is a matter of some controversy. My own opinion is that in exercising their discretion the trustees simply perfect the settlor's gift so that the position at the end of the day is the same as if the trust instrument had expressly provided that the beneficiary

The TSE Manual provides:

> **TSEM3756. Individual beneficiary receives discretionary income payment from a resident trust (not settlor-interested)** [Sep 2021]
> In the case of trusts or settlements that are not settor-interested a discretionary income payment is treated as an amount that is net of tax at the trust rate. The beneficiary's income is the net amount grossed at the trust rate. It carries tax credit at that rate. It is available for relief or repayment.
> The gross amount is an annual payment. It is a new source of income, usually not identified with the underlying trust income. *Cunard's Trustees v IRC* (27 TC 122) supported the view that when the trustees exercised their discretion, a new source of income came into existence.
> ...

For completeness: If a discretionary trust becomes interest in possession in form, the trustees' discretion over income comes to an end and the source has ceased.[5] But the cessation of a source is not now significant for tax purposes.

41.3.2 *Annuity income*

For completeness, *Memec* also considers annuities:

> Similarly, the rights of an annuitant under a trust are regarded as a source of income distinct from that of the underlying trust investments.[6]

But trust annuities are now rarely, if ever, found; so this is of academic

should receive the income. Thus, the income which the beneficiary receives is the same income as that which the trustees received, the beneficiary's source is the same as the trustees' source and any tax paid by the trustees is to be treated as having been paid on account of the beneficiary."

Before 1973 this view might have been held. (Venables cites *Drummond v Collins* 6 TC 525 though it seems to me that this point was not considered. But in *Cunard's Trustees v IRC* 27 TC 122 at p.134 the payments are described as sch D case III.) However that may be, the discretionary trust code introduced in FA 1973, now Chapter 7 Part 9 ITA, clearly assumes that a discretionary trust is a separate source, and so provides a statutory basis (if needed) to confirm the view that discretionary trusts are not transparent.

The argument was mentioned in the CoA in *Memec*, but not addressed: 77 TC at p.111.

[5] *IRC v Berrill* at p.444.

[6] See too *R v Special Comrs ex p. Shaftesbury Homes & Arethusa Training Ship* 8 TC 367; *Inchyra v Jennings* 42 TC 388.

interest only.

41.3.3 *Charge on income*

Annual payments (including income from a discretionary trust) are charged under Chapter 7 Part 5 ITTOIA.[7] But although the charge is housed under Chapter 7, many of the rules which apply to Annual Payments are disapplied or amended for trust income distributions, so this is in some ways like a category of income in itself.

The income is not categorised as dividend income, so (obviously) it does not qualify for the dividend nil rate, or other dividend rates.

41.3.4 *Location of source*

Where the trust is the source, how does one decide its location? There are (as usual[8]) a variety of possible connecting factors, including: the residence of the trustees, the country in whose courts the trust will be enforced, the place where the discretion is exercised. It is suggested that trust residence is the deciding factor, and this is consistent with s.493(1)(b) ITA and s.899(5)(d) ITA.[9] HMRC agree. Normally all these factors will point the same way so the issue will not arise.

41.3.5 *When income arises*

In almost all cases:
(1) the trustee resolution to distribute income of a discretionary trust and
(2) payment of income to the beneficiary
will occur at the same time.

This is because:

(1) In the absence of a formal resolution, payment itself in principle constitutes an informal exercise of the trustees power to distribute income. (Indeed, in practice, payment without making a formal resolution is probably more usual than not.)
(2) A formal resolution will typically have the effect that the trustees hold the income on trust for the beneficiary, and that amounts to "payment". (There will subsequently be a bank transfer, transferring legal title to the beneficiary, but that step does not matter for tax

[7] See 31.1 (Annual Payments: Introduction). This is assumed in 685A(1) ITTOIA; see 47.10.1 (Beneficiary relief conditions).

[8] For source issues generally, see 16.3 (Approach to locating source) ff.

[9] See 31.10.2 (Annual Payments outside WHT).

purposes, as payment has already been made.)

It could happen that payment is made without a valid resolution (the payment itself not constituting a valid resolution, perhaps because some necessary consent is not obtained, or because the payment is made to a person who is not a beneficiary, or some other mistake). In that case nothing happens for tax purposes until a valid resolution is made, as until then the recipient would hold the payment on trust for the trustees.

It could happen that a resolution is made which did not amount to payment (it might give the beneficiary a right to a payment, but so that the trustees did not hold the income on trust for the beneficiary). In that case it is suggested that:

(1) The beneficiary does not receive income, and so is not subject to tax, until payment is actually made.

(2) The payment is treated as made on the actual payment date (not the resolution date), and (if it has changed) the "trust rate" is the rate at the time of the actual payment, not the rate at the time of the trustee resolution.

(3) The income is income of the beneficiary on the actual payment date, not on the resolution date.

This aligns with the treatment of interest paid late.[10]

I think the HMRC Manual is consistent with this view.[11]

[10] See 15.5.2 (Interest due, not paid).

For completeness: There are rules that certain types of payment which, if made after the due and payable date, are treated as made on the due and payable date (known as "relating back"). Examples are dividends, some payments made under deduction of tax at the basic rate, and income from specific legacies. But these rules do not apply here. See 15.6 (When are dividends recognised); 89.5 (Income from specific legacy); and (though the decision is obsolete, as the law changed long ago) *IRC v Crawley* 59 TC 728.

[11] TSEM provides:

> **TSEM3759. Beneficiary receives discretionary income payment from a resident trust: when payment made** [Mar 2018]
>
> For tax purposes the beneficiary receives a payment on
>
> [1] The date the trustees made the payment or
>
> [2] The date the beneficiary became legally entitled to require the trustees to pay over the income. This could be when the payment indefeasibly vested, following the trustees' resolution.

The Manual refers to *Cunard's Trustees v IRC* 27 TC 122 but this does not discuss the timing issue, and, more generally, cases decided before the current regime was

41.3.6 *Tax return: Trust income*

Discretionary trust income from non-resident trusts is entered in box 41 of the Foreign pages of the tax return, SA106 (2022/23): the side note to this box refers to "discretionary income from non-resident trusts".

HMRC Helpsheet 262 (2023) provides:

> If you've received a discretionary payment from the non-UK resident trust, enter all of the income in box 41 on page F6 of the 'Foreign' pages...[12]

For UK resident trusts, the income is entered in box 1 of the Trusts etc pages, SA107 (2022/23).

41.3.7 *Scottish beneficiaries*

HMRC say:

> 46. Income flowing through [discretionary] trusts loses its character - in other words, irrespective of whether the income arising to the trust was savings or non-savings income all the income would be treated as non-savings income in the hands of the beneficiaries. Income payments from discretionary trusts will therefore be liable at the Scottish rate when paid to Scottish beneficiaries.[13]
>
> 47. In broad terms the trustees of non-resident discretionary trusts are only liable to income tax at the trust rate on the UK source income that they receive. They are not liable to UK income tax on foreign source income although they may be liable to tax on this income in the overseas jurisdiction. Discretionary income distributions from non-UK resident trusts are treated as untaxed income of the beneficiary irrespective of whether the trustees have suffered tax on the trust income. The beneficiary may if certain conditions are met claim credit for some of the tax paid by the trustees. Such income should be included by Scottish taxpayer beneficiaries as part of their total income in the normal way, and this would be liable at the Scottish rate of income tax. This would be consistent with the current tax treatment and simple (!) to

introduced in 1973 need careful review to ascertain whether the points they decided apply to discretionary trusts now.

[12] The helpsheet continues: "... unless the situation mentioned in the next paragraph applies." The next paragraph refers to the special rules for settlor-interested trusts; see 47.10.2 (Relief for non-settlor).

[13] See 43.5.2 (Scottish rates).

administer.[14]

41.4 Beneficiaries tax credit

41.4.1 *UK resident trust*

The tax credit is in s.494 ITA, which is introduced by s.493 ITA:

> (1) Sections 494 and 495 apply for income tax purposes if—
> (a) in a tax year the trustees of a settlement make an annual payment to a person ('the beneficiary') in the exercise of a discretion (whether exercisable by the trustees or any other person),
> (b) the trustees are UK resident for the tax year, and
> (c) condition A or condition B is met.

The usual case is condition A. Section 493(2) ITA provides:

> Condition A is that what is paid to the beneficiary is, only because of the payment, income of the beneficiary for income tax or corporation tax purposes. 'Income' does not include employment income.

Condition B relates to payments to minor children of the settlor.[15]

Section 494 ITA provides the beneficiaries tax credit and grossing up. Grossing up comes first:

> (1) The discretionary payment is treated as if it were made after the deduction of a sum representing income tax at the trust rate on the grossed up amount of the discretionary payment.
> (2) The grossed up amount of the discretionary payment is the actual amount of the discretionary payment grossed up by reference to the trust rate.

Then the beneficiaries tax credit:

> (3) The person mentioned in subsection (4) is treated as having paid income tax of an amount equal to the sum deducted as mentioned in subsection (1).

[14] HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/395155/technote-scot-taxrate.pdf*

[15] Section 494(3) ITA provides: "Condition B is that the payment is treated for income tax purposes as the income of a settlor under section 629 of ITTOIA 2005 (income paid to relevant children of settlor)." See 47.15 (Payment to settlor's child.

> (4) That person is—
> (a) if condition A in section 493 is met, the beneficiary, and
> (b) if condition B in section 493 is met, the settlor.

41.4.2 *Non-resident trust*

The beneficiary WHT credit (along with withholding tax at tier 2) only apply if the trustees are UK resident: s.493(1)(b) ITA.

EN ITA Change 89 provides:

> This change makes it explicit that the Chapter dealing with the taxation of discretionary payments by trustees applies only to payments made and tax suffered while the trustees are UK resident.
>
> ... section 493 contains the condition that it only applies to UK resident trustees. It follows that where a payment is made by non-UK resident trustees:
>
> - the payment does not carry any tax credit in the hands of the beneficiary; and
> - the trustees are not liable for any tax in respect of the payment.
>
> As a corollary to the provisions of section 687 of ICTA not applying to non-UK resident trustees, tax only enters the trustees' tax pool if it is tax suffered on income arising while the trustees are UK resident - see section 497.
>
> This change does not affect the operation of ESC B18, which enables UK resident beneficiaries who receive discretionary payments to have a credit for the tax paid by non-UK resident trustees on UK source income.

41.5 Tier 2: Trust withholding tax

Although a trust distribution is an Annual Payment, the payment is taken out of the scope of Annual-Payment withholding tax.[16] Instead, s.496 ITA provides the trust withholding tax:

> (1) Income tax is charged for a tax year if—
> (a) in the tax year the trustees of a settlement make payments as a result of which income tax is treated as having been paid under section 494,[17] and
> (b) amount A is greater than amount B.
>
> (2) Amount A is the total amount of the income tax treated under

[16] See 31.10.2 (Annual Payments outside WHT); 26.19 (Withholding taxes: Introduction).

[17] That is, under s.494(3): see 41.4 (Beneficiaries tax credit).

> section 494 as having been paid.
> (3) Amount B is the amount of the trustees' tax pool available for the tax year (see section 497).
> (4) The amount of the tax charged under this section is equal to the difference between amounts A and B.
> (5) The trustees are liable for the tax.

I do not discuss the special case where the trust income is employment income or the trust is an EBT; s.496A, 496B ITA.

41.6 Trust tax-pool credit

Section 497(1) ITA deals with the trust tax pool:

> Take the following steps to calculate the amount of the trustees' tax pool available for a tax year ('the current tax year').
> This is subject to subsections (2) and (3).
> *Step 1* Take the amount of the trustees' tax pool available for the previous tax year and deduct from that amount (but not so that it goes below nil)—
> (a) the total amount of income tax treated under section 494 as having been paid as a result of payments made by the trustees in the previous tax year, and
> (b) the amount to which the trustees are entitled under section 496B [relief for payments by discretionary trust taxable as employment income] in respect of the previous tax year.
> *Step 2* Add together all amounts of income tax for which the trustees are liable for the current tax year and which are of a type set out in section 498.
> *Step 3* Add the sum calculated at Step 2 to the amount resulting from Step 1.

Section 498 ITA provides the list of types of income which qualify for the tax pool. It is (more or less) all the income tax paid by the trustees. In full detail:

> (1) The types of amount referred to at Step 2 in section 497 are as follows.
> *Type 1* The amount of any tax on income (other than income of a kind mentioned below in relation to Type 3A) charged at the dividend trust rate or at the trust rate...
> *Type 4* The amount of any tax on income on which tax is charged as a result of section 491 [£1k discretionary trust allowance].

The remaining rules concern specialist topics:

> *Type 3A* The amount of tax at the nominal rate[18] on any amount in respect of which—
> (a) the trustees are liable to income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc),
> (b) the trustees are liable to income tax at the trust rate by virtue of section 482 above, and
> (c) tax at the basic rate is treated as having been paid by virtue of section 530 of ITTOIA 2005 (life insurance).
>
> *Type 5* The amount of tax on any income determined in accordance with section 26 of FA 2005 (special tax treatment for trusts for the benefit of vulnerable persons).
>
> (3) In relation to Types 1 to 4, references to income do not include income the tax on which is reduced in accordance with section 26 of FA 2005.

41.6.1 *Immigrant/new trusts*

Section 497(2) ITA deal with the special cases of immigrant trusts and new trusts:

> If the trustees were non-UK resident for the previous tax year, references in subsection (1) to the previous tax year are to be read as references to the last tax year prior to the current tax year for which the trustees were UK resident.

Section 497(3) ITA deal with the special cases of new trusts:

> If—
> (a) the current tax year is the tax year during which the settlement is established, or
> (b) the trustees have been UK resident for no tax year prior to the current tax year,
>
> ignore Steps 1 and 3 and, accordingly, the trustees' tax pool available for the current tax year is the sum calculated at Step 2.

41.6.2 *Pre-2008 transitional rule*

ITA 2007 sch 2 para 104 provides:

> (1) Section 497 applies with the following modifications in relation to the trustees of a settlement established prior to the tax year 2007–08 if the current tax year is the tax year 2007–08.

[18] Defined in s.498(2A): "In relation to Type 3A, the reference to the nominal rate is a reference to a rate equal to the difference between the trust rate and the basic rate."

(2) It also so applies if—

(a) the current tax year is a tax year subsequent to the tax year 2007–08, and

(b) the trustees have been UK resident for no tax year prior to the current tax year or the last tax year prior to the current tax year for which they were UK resident is a tax year prior to the tax year 2007–08.

(3) It applies as if in subsection (1) for Step 1 there were substituted—

'Step 1

Take the amount of the trustees' final section 687(3) tax pool and deduct from that amount (but not so that it goes below nil) the total of all tax (if any) treated under section 687(2)(a) of ICTA as being paid as a result of payments made by the trustees in the tax year 2006–07.

'The amount of the trustees' final section 687(3) tax pool' is the total amount—

(a) available to the trustees under section 687(3) of ICTA for setting against tax assessable on them under section 687(2)(b) of that Act for the tax year 2006–07, or

(b) which would have been so available had tax been so assessable.'

(4) It applies as if subsections (2) and (3) were omitted.

41.7 Examples

41.7.1 *UK trust, dividend income*

Here is an example from Taxation Magazine.[19] Suppose a UK discretionary trust has dividend income of £9k in 2016/17. To simplify matters, assume there are no trust expenses.

Tier 1: Tax on dividend income	£1,000	7.5%	£75
	£8,000	38.1%	£3,048
Total	£9,000		£3,123
Tier 3: Tax paid by beneficiary			
Net payment to beneficiary:	£4,950		
Gross up at trust rate 45%	£9,000		
Tax paid by beneficiary	£9,000	45%	£4,050
less beneficiary tax credit			-£4,050
Tax due			£0

[19] 27 October 2016 (Mark Wallace).

Tier 2: Trust withholding tax	
Amount A: Beneficiary tax credit	£4,050
Amount B: Tax pool	-£3,123
Tax charge	£927

Total tax payable to HMRC	
On dividend	£3,123
On distribution	£927
Total	£4,050

41.7.2 *TSE Manual example*

The TSE Manual provides an example from 2010/11 (when dividends carried tax credits):

> **TSEM3024 The tax pool - trustees calculate maximum discretionary payment** [Mar 2018]
> In this example, in the tax year 2010-2011 a trustee of a discretionary trust receives a net dividend of £1,350 (tax credit £150). The trustee is chargeable at 42.5%, which is partly covered by the 10% non-payable tax credit.

Description		
Dividend received	£1,350	
Plus non-payable tax credit	£150	
Gross income	£1,500	
Tax at 10% on first £1,000 (standard rate band)		£100
Tax at 42.5% on the remainder £500×42.5%		£212.50
Total tax		£312.50
Less non-payable tax credit		- £150
Tax payable by trustee - goes into tax pool		£162.50
Net income after tax		£1187.50

> The trustee now has net income of £1,187.50 (net dividend of £1,350 less tax paid of £162.50). Only £162.50 of the total tax goes into the tax pool because the £150 dividend tax credit is not payable.
> If the trustee pays the net income of £1,187.50 to the beneficiary, the tax credit of 50% on that net payment is £1,187.50 (gross amount of £2,375 at 50%). But if the tax pool has nothing brought forward from the previous year and there is no other income on which tax has been paid, the tax pool of £162.50 will not cover the tax credit of £1,187.50 on the payment made. Under s.496 the trustee would have to pay £1,187.50 less £162.50 = £1,025, but there are no funds available.
> Instead, the trustees can calculate the maximum amount of discretionary

payment as follows:-

Description	
Net income after tax	£1,187.50
Add tax in tax pool	£162.50
Total amount to cover payment to beneficiary & tax credit @50%	£1,350.00

Tax credit at 50%	£ 675.00	£675.00
Less tax paid in tax pool		£162.50
Additional tax to be paid by trustee		£512.50
Net payment to beneficiary	£ 675.00	

The beneficiary is paid net income of £675 with a tax credit of £675, which is equivalent to gross income of £1,350 with tax credit at 50%. The trustee pays a total of £675 tax to HMRC, £162.50 tax on the dividend received and the additional £512.50 under S496. So if the trustee is relying on the dividend income to fund both the payment to the beneficiary and the additional tax there are sufficient funds to release only 50% of the actual dividend, that is £1,350×50% = £675.

HMRC offer an online tax pool calculator to do the computations, in simple cases.

41.8 Trust payment: Income/capital

It is no longer a universal truth that "Income tax is a tax on income"[20] but the question whether a trust distribution is an Annual Payment (ie, income) or not (ie, capital) continues to matter:

(1) The IT charge on a beneficiary receiving the distribution (tier 3) applies if the distribution is income.
(2) Trust withholding tax (tier 2) applies if the distribution is income.
(3) Section 87 and s.731 apply if the distribution is capital.[21]

The position depends on the terms of the power under which the payment is made.

41.8.1 *Power over income*

A common form discretionary trust[22] provides this type of power over trust income:

[20] See 14.5 (Income Tax: a tax on income?)

[21] See 50.16 (s.731 capital condition); 61.7.4 (Chargeable to IT).

[22] For discussion of the drafting, see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), Chap 15 (Discretionary Trust).

> The Trustees may pay or apply the trust income to or for the benefit of any Beneficiaries, as the Trustees think fit.

If trustees receive income and make a payment under such a power, the receipt is income and not capital. This has never been doubted.

41.8.2 *Power over capital*

A common form discretionary trust also provides this type of power over trust capital:

> The Trustees may pay or apply the capital of the Trust Fund to or for the advancement or benefit of any Beneficiary.

If trustees make a payment under such a power the receipt is capital and not income. This is the case even if:
(1) the payments satisfy an "income purpose", eg maintenance of a beneficiary; and
(2) the payments are recurrent (eg annual or even monthly).

This follows from *Stevenson v Wishart*.[23]

41.8.3 *Accumulated income paid as capital*

Suppose:
(1) trustees accumulate income and add it to capital; and
(2) the trustees pay that capital to a beneficiary in exercise of a power like that in para 41.8.2 (Power over capital).

The receipt is still capital and not income. This follows from *Stevenson v Wishart*. In that case the distributions which HMRC sought to tax as income represented original trust capital and not accumulated income. It is considered that this makes no difference. *Stevenson v Wishart* is authority for the proposition that the income/capital question is governed by the terms of the power concerned.[24]

It might be different in an extreme case, where for tax planning reasons there was an arrangement under which:

[23] 59 TC 740. The judgment of Knox J is clearer on this point than the CoA; this view is adopted in *Pierce v Wood* [2010] WTLR 253 at [29] "An appointment or advance of trust capital, in exercise of a power over capital, even if it were to meet an income need of the beneficiary, is normally a capital receipt in the beneficiary's hands."

[24] Provisions such as ss.631(1)(2) and 633 ITTOIA assume this is correct (deeming payments out of accumulated income to be treated as income).

(1) income was accumulated;
(2) the trustees pay that capital to a beneficiary (by exercise of a common form power of advancement or appointment) shortly afterwards.

HMRC would have an attractive argument that the receipt should be regarded as income under general principles (or perhaps under the GAAR but it would not be necessary to rely on that).

In practice it should be possible to avoid this by ensuring that advances of capital are not neatly identifiable with accumulated income.

41.8.4 *HMRC view*

HMRC agree with the views set out above. The TSE Manual provides:

> **TSEM3781 - Trust income and gains: beneficiaries: payment from trust capital - normally capital in beneficiary's hands** [Nov 2018]
> A payment made out of trust capital including
> - accumulated income
> - a capital receipt that is deemed to be income for tax purposes
>
> is normally regarded as capital of the beneficiary and so is not taxable. This view was supported in the case of *Stevenson v Wishart* (59 TC 740).
> Where
> - there is no pre-existing interest in income, or
> - the payment is made under an interest in capital that is separate from an interest in income payments out of trust capital constitute capital in the hands of the recipient.
>
> Examples that illustrate the normal rule are:
> - Anthony has no interest in income at all. But the trustees may advance capital to or for him at their discretion. Payments are capital and not taxable on him.
> - Barbara has a discretionary interest in income. The trustees may also advance capital to or for her at their discretion. Payments are capital and not taxable on her.
> - Carina has an annuity of £10,000 and in addition, the trustees have the power to apply capital at their discretion for her benefit. Payments are capital and not taxable on her.

The Manual notes three exceptional cases:

> **TSEM3783 - Trust income and gains: beneficiaries: payment from trust capital - exceptions to normal rule** [Nov 2018]
> There are certain circumstances in which payments from trust capital are treated as income of the beneficiary. They are:

> [1] express gift of an annuity (TSEM3784)
> [2] payments to supplement or augment an income interest (TSEM3785)
> [3] compensation for loss of income (where beneficiary entitled to compensation) (TSEM3786)

Exceptions [1] and [3] are of specialist interest and not considered here. The Manual explains the second exception in this way:

> **TSEM3785 payment to supplement or augment income** [Jul 2020]
> The cases of *Cunard's Trustees v IRC* (27 TC 122) and *Brodie v IRC* (17 TC 432) established that where there is a pre-existing income interest (whether in the form of an annuity or interest in possession) payments out of trust capital to supplement or augment income constitute income in the hands of the recipient.
> Where the beneficiary has a pre-existing annual income entitlement, and the trustees can or have to supplement or augment the trust income out of capital:
> - if they can use capital in this way, i.e. it is discretionary, ITA/S494 will apply
> - if they have to use capital in this way, the annual payments treatment will apply.
>
> **Example:**
> *Dilwar*
> D lives rent-free in trust property. The deed provides for income to be used to pay rates and other property expenses, while the rest of income is to be used for his benefit. If the income is insufficient, the trustees are empowered to use capital at discretion to keep the beneficiary at same level of comfort as in the past. D has a pre-existing income entitlement, so the payment from capital is treated as income in his hands. ITA/S494 applies to the capital payments.
> *Elena*
> E has an annuity of £10,000 a year. If the trust income is less than £10,000, the trustees have to make up the shortfall from trust capital. E has a pre-existing income entitlement, so the payment from capital is treated as income in her hands. The whole £10,000 is taxable as income and the annual payments treatment applies.

In practice UK trusts today do not use wording of the kind considered in these examples, though the issue might arise for foreign trusts.

41.8.5 *Accumulated income paid as income*

The Manual considers the special case of a payment of trust capital under s.31(2) Trustee Act 1925. In order to follow this, it is necessary to set out the terms of s.31. The section is intricate, and I set out the relevant parts as they normally apply:

> (1) Where any property is held by trustees in trust for any person for any interest whatsoever... then...
>
> (i) during the infancy of any such person, ... the trustees may... apply for or towards his maintenance, education, or benefit, the whole or such part, if any, of the income of that property as the trustees may think fit ...
>
> (2) During the infancy of any such person... the trustees shall accumulate all the residue of that income ... and shall hold those accumulations as follows ...
>
> (ii) In any other case the trustees shall ... hold the accumulations as an accretion to the capital of the property from which such accumulations arose, and as one fund with such capital for all purposes, ...
>
> [iii] but the trustees may, at any time during the infancy of such person ... apply those accumulations, or any part thereof, as if they were income arising in the then current year.[25]

The Manual argues that a payment under s.31(2)[iii] is a capital receipt:

> **TSEM3782 payment from trust capital - normally capital in beneficiary's hands - S31 Trustee Act 1925** [Nov 2018]
>
> The concluding words of Section 31(2) Trustee Act 1925 allow the trustees to apply accumulations 'as if they were income arising'.
>
> These words do not have the effect of de-capitalising the accumulations concerned. Once accumulated income is forever capitalised. Where such accumulations have been released the money must therefore have been received by the beneficiary as capital. The phrase 'as if they were income arising in the then current year' should be regarded as simply meaning that the trustees are bound by the proviso to Section 31(1), just in the same way as they would be if they were deciding whether or not to release current income to or for the benefit of the minor.
>
> When paid by virtue of this provision the payment is capital in the beneficiary's hands, so it would not fall within ITA/Ss493-494, i.e. there is no tax credit to the beneficiary. Such a payment may be subject to the application of ITTOIA/S629 to charge the amount as income of

[25] The provision has been amended by the Inheritance and Trustees' Powers Act 2014 but the amendments make no difference to the capital/income issue discussed here.

the settlor - see TSEM4300+.

The payment of a sum under s.31(2) TA 1925 seems to me a clear case of an income receipt, under the principle of *Cunard's Trustees* to which HMRC refer in the Manual passage set out above. HMRC are correct to say that the accumulated income is capitalised, ie it becomes and remains capital in the hands of the trustees. But that does not answer the question as it is clear that a payment out of trust capital may still constitute income in the hands of the beneficiaries. The important point is that the terms of the relevant provision of the settlement link the payment with an income interest of a beneficiary.[26]

I have wondered if it might perhaps be clearer if the trust accounts recorded an "Accumulated Income Fund" (instead of recording accumulated income as increasing the capital fund). However, the accounting treatment should make no difference.

The view that the receipt is a capital receipt will more often favour HMRC, but sometimes it will favour the taxpayer. The taxpayer cannot be criticised for adopting HMRC's official view when it suits them.

It has been said that two Special Commissioner decisions from the 1970s have held that the exercise of the s.31(2) power did not have the effect of making the payments income in the hands of the beneficiary.[27] But unreported Special Commissioner decisions cannot be cited as precedents.[28]

A common form discretionary trust generally has express powers similar to s.31. This allows trustees to accumulate income, adding it to trust capital, and typically gives the trustees power "to apply the accumulations as if they were income arising in the then current year". If trustees make a payment out of trust capital under such a power it is considered that the receipt is an income receipt of the beneficiary.

41.9 Discretionary trust transparency reliefs

In some cases discretionary trusts are treated as transparent in order to confer some relief.

[26] See the comment of Knox J in *Stevenson v Wishart* 59 TC 740 at p.757D.

[27] Sheasby, "Accumulations of Income" [2000] TACT Review issue 11 *https://www.tactweb.org/the_tact_review/accumulations-of-income/*

[28] See *Ardmore v HMRC* [2014] UKFTT 453 (TC) at [9] - [23]. The point was not discussed on the appeal.

41.9.1 *UK trust, foreign income: s.111 relief*

Where UK trustees receive foreign income, subject to foreign tax, they will in principle qualify for foreign tax credit relief. That reduces the UK tax that they pay at tier 1, but it also reduces the tax pool, and so reduces the tax pool credit available for trust withholding tax, tier 2. The trust tax-credit systems would not work, and the benefit of the foreign tax credit relief would effectively be lost.

Section 111 TIOPA deals with this:

> (1) Subsection (6) applies if each of conditions A to D is met.
> (2) Condition A is that a payment is made by trustees of a settlement.
> (3) Condition B is that income tax is treated under section 494 of ITA 2007 (treatment of discretionary payments by trustees) as having been paid in relation to the payment.

The reference to s.494 restricts s.111 relief to UK resident trusts.[29]

> (4) Condition C is that the income arising under the settlement includes taxed overseas income.[30]
> (5) Condition D is that the trustees certify—
> (a) that the payment is one made out of income consisting of, or including, taxed overseas income of an amount, and from a source, stated in the certificate, and
> (b) that the amount of taxed overseas income arose to the trustees not earlier than 6 years before the end of the tax year in which the payment is made.

Where these conditions are satisfied, s.111(6) TIOPA provides the relief:

> The person to whom the payment is made may claim that the payment, up to the certified amount, is to be treated for the purposes of this Part [Part 2 TIOPA, double taxation relief] as income received by the person—
> (a) from the certified source, and
> (b) in the tax year in which the payment is made.

The beneficiary's income is deemed to come from the foreign source, and so the beneficiary enjoys the benefit of the DT relief. The trust is treated as transparent in the sense that the source of the beneficiary's income is

[29] See 41.4 (Beneficiaries tax credit).

[30] This term is defined in s.111(7) TIOPA: "In this section "taxed overseas income", in relation to a settlement, means income in respect of which the trustees are entitled to credit under this Part for tax under the law of a territory outside the UK."

the underlying asset and not the trust.

The deeming only applies for the purposes of DT relief. For instance, the beneficiary's income does not qualify for the remittance basis, because it is UK source income and the s.111 deeming does not alter that.

The TSE Manual discusses when a payment is made out of taxed overseas income:

> **TSEM3675. Relief for overseas tax: expenses of discretionary trust** [Mar 2018]
>
> If trustees are claiming relief for overseas tax they will usually regard expenses as paid out of UK income. This means they can certify the overseas income to the beneficiaries [what is now s.111 TIOPA].
>
> They may sometimes regard expenses as paid from overseas income. This could be because there is not sufficient UK income to cover the expenses. Or maybe certification is not advantageous to the beneficiary. Trustees cannot certify, under [s.111 TIOPA], the overseas income they set against the expenses.
>
> **TSEM3680. Trustee's certificate of overseas taxed income** [Mar 2018]
>
> ...
>
> **Limits of the amounts certified**
>
> The trustees must ensure that:
>
> - the amounts they certify do not exceed the gross equivalent of the payments they made
> - the gross amounts they certify do not exceed, in the aggregate, the gross income they received.
>
> Trustees can accumulate, for future certification, overseas income that they have not paid out. Income ceases to be available for certification six years after the start of the tax year in which it arose.
>
> **TSEM3685. Relief for overseas tax: mixed trust** [Mar 2018]
>
> A mixed trust has both a discretionary interest and an interest in possession.
>
> The trustees may claim double taxation relief in respect of overseas tax that qualifies for relief. The instructions at TSEM3655 apply to income that the beneficiary is entitled to receive. The instructions at TSEM3670 apply to the balance of the income.

41.9.2 *ESC B18: UK trust*

ESC B18 provides:

> **UK resident trusts**
>
> A beneficiary may receive from trustees a payment to which [s.494(1)

> ITA] applies.[31] Where that payment is made out of the income of the trustees in respect of which, had it been received directly, the beneficiary would—
> [1] have been entitled to exemption in respect of FOTRA securities issued in accordance with [s.714 ITTOIA]; or
> [2] have been entitled to relief under the terms of a double taxation agreement; or
> [3] not have been chargeable to UK tax because of their [ie the beneficiary's] not resident [and/or not ordinarily resident[32]] status
> the beneficiary may claim that exemption or relief or, where the beneficiary would not have been chargeable, repayment of the tax treated as deducted from the payment (or an appropriate proportion of it).
> For this purpose, the payment will be treated as having been made rateably out of all sources of income arising to the trustees on a last in first out basis.

There are three reliefs (or sets of reliefs) here:

(1) Relief for interest on FOTRA securities (beneficiary non-resident)
(2) DT relief (beneficiary treaty-resident outside the UK)[33]
(3) Other exemptions for non-residents[34]

ESC B18 goes on to specify the conditions for the relief:

> Relief or exemption, as appropriate, will be granted to the extent that the payment is out of income which arose to the trustees not earlier than six years before the end of the year of assessment in which the payment was made, provided the trustees—
> [1] have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required, and
> [2] have paid all tax due, and any interest, surcharges and penalties arising; and
> [3] keep available for inspection any relevant tax certificates.
> Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the

[31] The reference to s.494 restricts this relief to UK resident trusts. See 41.4 (Beneficiaries tax credit).

[32] Author's footnote: Ordinary residence is not relevant from 2013.

[33] But s.111 TIOPA covers this.

[34] See 45.1 (Non-Residents Income Tax Relief).

> trustees.[35]

The INT Manual expands on B18 and provides a worked example. The Manual is not up to date, for example in the tax rates; I omit text referring to the position before 2004.

> **INTM367790. What methods of relief are available on discretionary payments from UK resident trustees** [Dec 2019]
> The way in which relief is calculated will depend on the terms of the treaty under which relief is claimed.
> - Under an "other income" article which does not exclude payments from trusts, relief is given in full.[36]...
> - Where there is no other income article or the article excludes trust income, relief is given by "looking through" to the underlying sources of the income. The way in which we "look through" is determined by ESC B18
> - Because payments are made at the discretion of trustees, it is not possible to allow relief at source to a beneficiary of a discretionary trust.
>
> ...
> **INTM367820. Extra Statutory Concession B18** [Dec 2019]
> Under ESC/B18, income underlying a discretionary payment is treated as arising from the sources of income received by the trustees in the tax year that the payment is made. Income is considered as arising rateably from the sources of income. By rateably we mean the beneficiary's payment contains the same proportion of each strand of income as the total received by the trustees.
> If there is not enough income arising in the year the payment is made to fund all of the payments made by the trustees (that is, if the trustees are drawing on accumulations – that is, income received by trustees in excess of payments out of trust income – made in previous years) we need to apply the proportions of trustees' income from the year(s) in which the accumulations were made. This is known as "spreading back" (see INTM367910).
> **INTM367830. ESC/B18 and dividends taxed at the dividend trust rate** [Dec 2019]
> When the Schedule F trust rate (now the dividend trust rate) was introduced in 1999/2000 at 25%, the wording of ESC/B18 was revised to exclude the element of tax credit included in that tax. For example, where trustees receive a dividend of £90, with a tax credit of £10, their liability is £15 (that is, £25 less £10 tax credit). However, when applying a beneficiary's share of dividends to a dividend article of a treaty, the tax credit is excluded from the calculation. Therefore for the purposes of ESC/B18, the 'gross' to which the restriction in the dividend article is applied is £90, the tax £15, and the net £75.

This is superseded now by the 2016 dividend tax reforms, which abolished

[35] Author's footnote: This time limit is out of line with the standard claim time limit, now 4 years, but it does not matter.

[36] See 41.12.1 (Other Income article).

the tax credit for UK residents.

A dividend article with a 15% restriction would apply to the dividend element underlying a beneficiary's distribution as follows:

- Restriction: £90 × 15% = £13.50
- Tax £15 less restriction £13.50 = £1.50

INTM367840. ESC/B18 and trustees' tax returns [Dec 2019]

It is a condition of ESC/B18 that in order to allow a beneficiary's claim to repayment, the trustees must have made their tax return for the year of the distribution, and paid over any tax due to HMRC.

It is therefore possible that a beneficiary's claim form can be received before the conditions of ESC/B18 are satisfied.

INTM367850. ESC/B18 and Self Assessment [Dec 2019]

As the conditions for relief under ESC/B18 include actions by trustees, we do not consider a claim as being valid until these actions have been carried out. We cannot accept that the beneficiary has made a valid claim until the trustees have met the conditions set out in ESC/B18.

In practical terms this means that a beneficiary's claim is not valid until the trustees have sent in their tax return for the year in which the distribution was made and paid any tax due.

INTM367860. Dealing with claims by non-resident beneficiaries of UK discretionary trusts under ESC/B18 [Dec 2019]

How to identify a repayment claim

The claim will usually be supported by a tax certificate on form R185, or an equivalent certificate prepared by the payer, showing tax deducted from the payment at 40%...

If the tax certificate is missing, the schedule will show that tax on the income is at 40% ...

Exceptionally, you may receive a claim on a payment from a UK discretionary trust where tax is not shown as having been paid at the Rate Applicable to Trusts (see INTM367950).

Procedure

You will need to request the trust file (the UTR for this should be quoted on the tax certificate) together with the trustees' tax return for the year of the distribution and all earlier years in date for time limit purposes during the year of distribution (you will need these if a 'spreadback' calculation is necessary).

You will need to advise the claimant or their agent that you have requested information from the trust's tax office to enable you to deal with the claim.

INTM367870. Calculating relief due under ESC/B18 [Dec 2019]

When the trust file is received the information concerning trust income and distributions provided by the trustees in their returns is extracted and used to calculate the relief due to the beneficiary.

Due to the complexity of the calculations, a computer program is used to apportion the trust income to the beneficiary's share.

If necessary a calculation can be made manually (INTM367890).

INTM367880. How to manually calculate relief due under ESC/B18 [Dec 2019]

Although the apportionment of the income will normally be performed using a computer program, if necessary the calculation can be performed manually, as follows:

1. Deduct any expenses and other obligations, for example Trust Management Expenses (see INTM367920) and annuities (see INTM367770), from the income received by the trustees.

2. For each income source (after deductions at 1 above) calculate the net amount available for distribution, that is the amount after deduction of tax at the rate applicable to trusts or the dividend trust rate as appropriate.

3. Calculate the total net distribution made to the discretionary beneficiaries.

4. Check that the total net distribution made to the discretionary beneficiaries is less than (or equal to) the total net available for distribution. If it is greater than the total net available for distribution, you will need to apply a 'spreadback' calculation (see INTM367910).

5. Allocate the net amount of each source of income arising to the trustees to the beneficiary's net distribution, by the following formula (each source of income must be treated separately because of the different tax rates to which the trust income is subjected):

(a ÷ b) × c =beneficiary's share of income source, where

- a = net income from source
- b = total income available to distribute
- c = beneficiary's net distribution

6. Calculate the beneficiary's gross share of each income source by reference to ESC/B18. For UK dividends the calculation for 2004–05 onwards is

(a ÷ 67.5) × 90 = beneficiary's gross share of dividends for the purposes of ESC/B18, where

- a = beneficiary's share of dividends

...

For other income (including foreign dividends) the calculation for 2004–05 onwards is

(a ÷ 60) × 100 = beneficiary's gross share of dividends for the purposes of ESC/B18, where

- a = beneficiary's share of income

...

7. Calculate the tax applying to each income source under ESC/B18 by deducting the net (calculated at 4) from the gross (calculated at 5).

8. Calculate the repayment due by reference to the relevant treaty articles, and/or UK legislation allowing relief to non-residents. Where repayment is restricted under a double taxation agreement, calculate the amount to restrict as a percentage of the ESC/B18 gross (calculated at 5) and deduct it from the tax (calculated at 6).

INTM367890. Non-resident beneficiaries of UK trusts [Dec 2019]

Example of a manual calculation under ESC/B18

In the tax year 2004–2005 a trust had income from the sources shown below (gross except for dividends paid). The trustees made net distributions of £1000 each to one beneficiary in Canada (who has made a claim to us) and to one beneficiary in the UK.

[Trust income is:]

• UK dividends paid	£1292
• UK interest	£1000
• Rents	£500
• Foreign dividends	£880
• Foreign interest	£1000

Trustees net management expenses were £500

First, deduct trust management expenses from dividends: 1292 less 500 = 792

Then calculate income available for distribution:

Dividends	792
plus (tax credit at one ninth of the dividend)	88
less (dividend trust rate 25%)	−220
	660

Interest	1000
less (tax at rate applicable to trusts 34%)	−340
	660

Rents	500
less (tax at rate applicable to trusts 34%)	-170
	330

Foreign dividends	880
less (tax at dividend trust rate 25%)	−220
	660

Foreign interest	1000
less (tax at rate applicable to trusts 34%)	−340
	660

Total available for distribution: 2970

Distribution: (2 × 1000) = 2000; this is less than the total available for distribution, so no spreadback required

Allocation to beneficiary:

Dividends:	(660 ÷ 2970) × 1000 = 222.22
Interest:	(660 ÷ 2970) × 1000 = 222.22
Rents:	(330 ÷ 2970) × 1000 = 111.11
Foreign dividends:	(660 ÷ 2970) × 1000 = 222.22
Foreign interest:	(660 ÷ 2970) × 1000 = 222.22

Grossing up and deducting net to find tax attributable under ESC/B18:

Dividends:	(222.22 ÷ 75) × 90 = 266.66 − 222.22 = tax 44.44
Interest:	(222.22 ÷ 66) × 100 = 336.70 − 222.22 = tax 114.48

Rents: (there is actually no need to calculate this, as there is no relief, but the calculation would be as follows)

(111.11 ÷ 66) × 100 = 168.35 − 111.11 = tax 57.24

Foreign dividends:	(222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48
Foreign interest:	(222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48

Calculating the repayment due

In this example the claimant is claiming under the Double Taxation Convention with Canada on dividends and interest, and under UK legislation applying to non-residents on foreign income. Under the treaty there is a 15% restriction on dividends and a 10% restriction on interest.

Dividends: Gross 266.64 × 15% = 40 restriction	Tax 44.44 less 40 =	4.44
Interest: Gross 336.70 × 10% = 33.67 restriction	Tax 114.48 less 33.67 =	81.21
Foreign dividends: Gross 336.70	Tax	114.48
Foreign interest: Gross 336.70	Tax	114.48
Total repayment		314.61

This content has been withheld because of exemptions in the Freedom of Information Act 2000.

INTM367900. Notes on types of underlying income in a discretionary trust
[Dec 2019]

- UK dividends: includes stock dividends.
- UK interest
- Dividends and interest are the most common types of income that you will see in discretionary trusts. With the exception of UK dividends, all of the tax associated with a particular source is considered for the purposes of ESC/B18 to be tax on that source. You may also see:
- Foreign income: relief is given under domestic legislation. Although foreign dividends are taxed in the hands of the trustees at the dividend trust rate of 32.5% ... , the beneficiary is treated as having been taxed at 40% ...
- Rental income: there are no double taxation agreements that allow relief to individuals on rental income. No repayment is due on any part of the tax applicable to rental income.
- Accrued income: income returned under the 'accrued income' scheme cannot be relieved under double taxation agreements.
- Royalties: these are unusual in discretionary trusts. Relief is given at the appropriate agreement rate.
- FOTRA securities: you may be considering relief under an agreement which has an interest article that restricts relief. However, income shown on the trust return as interest may be derived from FOTRA securities on which full relief is available to non- residents. As there is no indication in the trust return that income is derived from FOTRA securities, you will not usually be able to consider repayment on this as a separate source from interest. However, if there is any indication of the amount of FOTRA securities in the papers submitted with the return, or in figures originating from the trustees and provided by the claimant or their agent, you should use these to allow relief on the FOTRA securities.

41.9.3 *Carry back (spreadback)*

The INT Manual continues:

> **INTM367910. What happens if the total net distributed in a year exceeds the total net available for distribution ('overdistribution')** [Dec 2019]
>
> It the trustees have distributed more money in one year than is available to distribute from the income received in that year, you will need to analyse the balance from undistributed income arising in earlier years.
>
> This is known as a 'spreadback' calculation. The income arising in earlier years can be analysed using the trust report program.
>
> When spreading back we start with the most recent year in which income has been accumulated. If the trustees have over-distributed in earlier years we may have already made a spreadback calculation and used income accumulated in an earlier year. It is important that we do not use that accumulation again in the current spreadback. You cannot go back more than six years before the year in which the distribution was made. So if the trustees have made an excess distribution in 2003/04 you can only go back to 1998/99. But you only go back to accumulations made in that year if you have used up all the income accumulated in 2002/03, then 2001/02 and so on. The residence position of the beneficiary in the year(s) that the income was accumulated is not relevant.

41.9.4 *Confidentiality*

The INT Manual provides:

> **INTM367630. Claims by non-resident beneficiaries of non-resident discretionary trusts** [Dec 2019]
>
> ...
>
> *Confidentiality when advising a beneficiary or agent about a payment*
>
> A beneficiary of a discretionary trust has no rights against the income of the trust. Trustees may favour one potential beneficiary rather than another. Therefore, to provide information to a beneficiary about the income of a trust that you have used to calculate relief due under ESC/B18 will infringe the confidentiality of the trustees.
>
> Because of this we cannot provide a breakdown of the underlying income comprising the repayment. The claimant (and their agent) only has a right to the final figure of the repayment we have calculated. However, if the beneficiary obtains the written permission of a trustee we can release information concerning the underlying trust income.
>
> Sometimes a trustee will act as the nominated agent of the beneficiary. In that case you can release details of the computation to the trustee without seeking further written permission. If you are providing this information, you will need to show a full calculation. If the original apportionment of income was calculated using the computer program, you will need to make a full manual calculation (see INTM367890).

It is a strange state of affairs where a taxpayer is not entitled to know how their tax is computed, or whether it is correctly computed, and it is considered that HMRC could properly disclose the information.[37] No doubt a tribunal would order disclosure in an appropriate case.

41.9.5 *Tax return: ESC B18 claim*

HMRC say:

> It is a stand-alone claim and does not affect how the beneficiary completes his or her Self Assessment tax return.[38]

I think the point is that there is no box in the tax return for the figures to be entered.

41.10 ESC B18: Non-resident trust

Where a non-resident trust has UK source income, and makes a payment to a *UK* beneficiary, then:

(1) The foreign trustees are subject to UK tax on their income.
(2) They are not subject to trust withholding tax (tier 2) on making a distribution.
(3) The UK beneficiary is subject to tax on the distribution, but does not receive the beneficiary WHT credit.

The trust tax-credit systems do not operate, and there would effectively be double taxation.

Where a non-resident trust has UK source income, and makes a payment to a *foreign* beneficiary, then:

(1) The foreign trustees are subject to UK tax on their income.
(2) They are not subject to trust withholding tax (tier 2) on making a distribution
(3) The foreign beneficiary is not subject to tax on the distribution

The trust tax-credit systems do not operate. If the foreign beneficiary would have been entitled to some relief on the trust income, had it been received directly, the benefit of that relief is lost.

ESC B18 deals with these two problems. It provides:

> **Non-resident trusts**
> A similar concession will operate where a beneficiary receives a payment from discretionary trustees which is not within [what is now s.494(1) ITA, trust withholding tax] (ie where non-resident trustees

[37] See 51.20 (Taxpayer confidentiality).
[38] “HMRC Residency: Non-resident trusts” *https://www.gov.uk/non-resident-trusts*

> exercise their discretion outside the UK).
>
> [1] Where a non-resident beneficiary receives such a payment out of income of the trustees in respect of which, had it been received directly, it would have been chargeable to UK tax, then the beneficiary—
>
> [a] may claim relief under [now s.56 ITA] (personal reliefs for certain non-residents); and
>
> [b] may be treated as receiving that payment from a UK resident trust but claim credit only for UK tax actually paid by the trustees on income out of which the payment is made.
>
> [c] The beneficiary may also claim exemption from tax in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA] to the extent that the payment is regarded as including interest from such securities.[39]
>
> [2] A UK beneficiary of a non-resident trust may claim appropriate credit for tax actually paid by the trustees on the income out of which the payment is made as if the payments out of UK income were from a UK resident trust and within [s.494(1) ITA] .

There are three distinct sets of reliefs here:

(1) Personal reliefs for non-resident beneficiaries
(2) Credit for tax paid by the trust as if the trust were UK resident
(3) Relief for interest on FOTRA securities: I suspect that this is in practice academic, though strictly it applies if:
(a) the trust receives income from FOTRA securities;
(b) the trustees are outside the FOTRA exemption for trustees;[40]
(c) the income is paid to a beneficiary who is not UK resident and so is within the FOTRA exemption; and
(d) the trust complies with UK tax requirements

ESC B18 goes on to specify the conditions for the relief, which are similar to the conditions for UK resident trusts:

> This treatment will only be available where the trustees—
>
> – have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and
>
> – have paid all tax due and any interest, surcharges and penalties arising; and

[39] Para (c) assumes that FOTRA interest is exempt if payable to a non-resident life tenant: see 27.6 (FOTRA securities: Trust).

[40] Because there are UK beneficiaries: see 27.6.2 (Discretionary trust).

> – keep available for inspection any relevant tax certificates.
>
> Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.
>
> No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set off under s 687(2) if that section applied, and that tax is not repayable (for example on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the beneficiary under this concession.

There is no reference to a time limit here, and the relief is not limited to a payment out of income which arose to the trustees within 6 years before.[41]

41.10.1 *ESC B18: HMRC example*

The TSEM provides a worked example:[42]

TSEM10455 ESC B18 - example [Aug 2019]
Non-resident discretionary trust
Trust income for year 2013-14:

	Income	*Basic rate IT deducted at source*
UK Property Income	£10,000	£2,000
UK Bank Interest	£20,000	£4,000
Foreign Bank Interest	£1,000	0
Total	£31,000	£6,000

Allowable trust management expenses = £5,000
Discretionary income payment to UK resident beneficiary 2013-14 = £4,000

On these simple facts we turn to the complex computations:

Amount of income on which the trustees are chargeable to income tax, and income tax chargeable (In my terminology, the tier 1 charge)

Income taxed at basic rate	*Amount*	*Rate*	*Tax*
1st slice of income (interest)	£1,000	20%	£200

[41] I would have described that as self-evident but the High Court reached the opposite conclusion in a decision criticised in the 2023/24 edition of this work and reversed by CoA: *Murphy v HMRC* [2023] EWCA Civ 497.

[42] I have slightly amended the wording and layout for the sake of clarity.

trust management expenses[43]	£6,049	20%	£1,209.80
total	£7,049		£1,409.80
Income taxed at trust rate			
UK Bank Interest	£19,000		
UK Property Income	£10,000		
Total	£29,000		
Less trust expenses	£6,049		
Chargeable at trust rate	£22,951	45%	£10,327.95
Total tax chargeable			£11,737.75

Tax paid at source = £6,000.00
Tax due = £5,737.75

Expenses computation
The expenses are to be reduced by the proportion of income arising to trustees which is untaxed foreign income (ITA/S487(2)):

	Income
UK Property Income	£10,000
UK Bank Interest	£20,000
Foreign Bank Interest	£1,000
Total	£31,000

Expenses relating to foreign bank interest:
(£1,000 × £5,000) × £31,000 = £161

Expenses allowed in arriving at income chargeable to Income Tax at the special trust rates are £4,839 (£5,000 – £161).

Allowance due = £6,049 (£4,839 grossed up by reference to basic rate on savings income - ITA/S486(1) - Step 5). (See TSEM8245)

Amount of available income for each source of income, out of which discretionary income payment treated as made:

UK Bank Interest	*Amount*	*Rate*	*Tax*
Trust Management Expenses:	£6,049	20%	£1,209.80
Standard rate band	£1,000	20%	£200.00
Special trust rate	£12,951	45%	£5,827.95
Total	£20,000		£7,237.75

UK Bank interest	£20,000
Less trust management expenses[44]	- £4,839

[43] Trust management expenses are set against income to arrive at the amount chargeable to Income Tax at the special trust rates. [See expenses computation].

[44] Footnote original: Although the expenses have been grossed up for purposes of computing tax due, it is the actual amount of expenses paid by trustees which is to be

total	£15,161
Less tax charge	- £7,237.75
Net available	£7,923.25

UK Property Income	*Amount*	*Rate*	*Tax*
	£10,000	45%	£4,500

UK property income	£10,000
Less tax charge	- £4,500
Net available property income	£5,500

Foreign Bank Interest	£1,000
Less trust management expenses	-£161
Net available foreign income	£839

net available income

UK interest	£7,923.25
UK prop income	£5,500
Foreign interest	£839
Total	£14,262.25

The discretionary income payment of £4,000 is treated as met out of the following income:

Net available

UK Bank Interest: (£7,923.25 × £4,000) ÷ £14,262.25	£2,222
UK Property Income: (£5,500 × £4,000) ÷ £14,262.25	£1,543
Foreign Bank Interest: (£839 × 4,000) ÷ £14,262.25	£235
Total	£4,000

Relief due to beneficiary under ESC B18:

UK Bank Interest: (£2,222 × 7,237.75) ÷ £7,923.25	£2,030
UK Property Income: (£1,543 × £4,500) ÷ £5,500	£1,262
Total tax credit	£3,292

41.10.2 *Claim procedure*

After considering the case of a settlor-interested trust[45] the International Manual continues:

> **INTM339550. Claims by non-resident trustees of discretionary trusts** [Sep 2021]
> You may receive a claim or application from non-resident trustees of a

taken into account in arriving at the amount of income available, out of which a payment could be made to beneficiary.

[45] See 60.19.2 (Settlor treaty-resident outside UK).

> discretionary trust. ... If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD...
>
> ***What to do if one or more beneficiaries of the trust has a residential address in the UK***
>
> If the completed form 4467(trustee)/FD shows any beneficiaries with UK residential addresses, Specialist Personal Tax, PT International Advisory will refer the papers to Specialist PT, Trusts & Estates, who will consider whether the trustees will need to make UK tax returns.
>
> ***What to do if all of the beneficiaries are resident in the same country as the trustees and the settlor of the trust is excluded from benefit***
>
> If all of the beneficiaries of the trust are resident in the same country as the trustees and the settlor of the trust is excluded from benefit, you can allow relief to the trustees.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts, 6 April 2023) provides:

> If you wish to make a claim under Extra Statutory Concession B18, you should contact HMRC Trusts.[46] In addition, you should advise your tax office that you are making a claim under Extra Statutory Concession B18 and, in the 'Any other information' box, box 19, of your tax return, enter details of the name of the trust from which the income payment was received and the tax reference of the trust.
>
> If part or all of the income distribution has already been charged to tax in the UK on the settlor of the trust, see page TN 1 of the 'Trusts etc. notes'. Instead of entering the amount so charged in box 41 of the 'Foreign' pages, include it in box 2 of the 'Trusts etc' pages. If you are the settlor and already chargeable on the income arising to the trustees, there is no need to include in box 41 or box 2 in the 'Trusts etc' pages any discretionary payments made to you by the trustees.
>
> The amount you enter either in box 41 of the 'Foreign' pages or in box 2 of the 'Trusts etc' pages should take account of the effects of your residence or domicile status.

41.11 s.629 income: Settlor's child

For this topic generally, see 47.15 (Payment to settlor's child).

ESC A93 provides the equivalent of ESC B18:

> Income arising to a trust within the scope of Section 686 ICTA 1988 is

[46] *https://www.gov.uk/government/organisations/hm-revenue-customs/contact/trusts*

charged to tax on the trustees at the rate applicable to trusts or the Schedule F trust rate. Where such income is distributed to or for the benefit of an unmarried minor child, of the settlor, it is treated as the income of the settlor and becomes chargeable on them for the year in which it is distributed under Section 660B ICTA 1988.

Section 687 ICTA 1988 provides for the settlor of a resident trust to be given full credit against tax due from them under Section 660B for tax paid by the trustees at the rate applicable to trusts in respect of income distributed. Section 687 does not, however, apply where the trustees exercise their discretion outside the UK. The settlor of such a trust could therefore be liable to tax under Section 660B without being able to claim credit against their liability for any tax paid by the trustees.

By concession, the settlor will be able to claim credit against their liability to tax under Section 660B for tax paid by the trustees, as if the payments out of UK income were from a UK resident trust. This will apply to the extent that the distribution is made out of income which arose to the trustees not earlier than 6 years before the end of the year of assessment in which the distribution was paid.

For this purpose, the distribution will be treated as having been made rateably out of the total of the various sources of income arising to the trustees on a last in first out basis. Credit will be given to the settlor for the tax paid by the trustees on the income to the extent that:

- the distribution is regarded as being made from income chargeable to UK tax; and
- such income has not previously been allocated to earlier distributions on a last in, first out basis.

This concession will only apply where the trustees:

- have made trust returns, giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and

  -have paid all tax due, and any interest, surcharges and penalties arising; and
- keep available for inspection any relevant tax certificates.

Credit will be granted to the settlor on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set-off under Section 687(2) if that section applied, and that tax is not repayable (for example on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the settlor under this concession.

41.12 UK trust, non-resident beneficiary: DT relief

41.12.1 *Other Income article*

OECD Model article 21(1) (**"Other Income article"**) provides:

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

This wording would apply to UK source income from a UK discretionary trust so with a treaty in this form, a beneficiary who is treaty-resident will qualify for treaty relief on all their discretionary trust income (the tier 3 beneficiary charge).

After some vacillation, HMRC agree. SP 3/86 provides:

> **Payments to a non-resident from UK discretionary trusts..**
> **Introduction**
> 1 This statement explains how relief from UK tax under double taxation agreements will be given in respect of payments made to a non-resident [from] a UK discretionary trust or a UK estate.
> **Background**
> ***Discretionary trusts***
> 2 Generally speaking, a non-resident beneficiary receiving payments from a UK discretionary trust is not entitled to repayment of the tax paid by the trustees on the trust income. However, under concession B18 (which embodies a longstanding practice) HMRC 'looks through' the trust income to the underlying component parts of that income. The purpose of this 'looking through' is to allow the recipient of the income any relief that would have been available to him under the Taxes Acts had the income come to him direct instead of through the trustees.
> 3 Where the beneficiary is resident in a country with which the UK has a double taxation agreement, further relief under the 'looking through' principle may be due. Thus, for example, if the agreement provides for a withholding rate on interest of 15% and interest liable to UK tax formed part of the trust income which had suffered tax at 40% (ie the rate applicable to trusts)[47] then, under the 'looking through' principle, the beneficiary would be repaid the amount of tax suffered in excess of the withholding rate, in this case 25%.
> 4 Some of the UK's double taxation agreements include an 'other income' Article. The purpose of this Article is to determine in which

[47] Now 45%.

> country income not expressly dealt with elsewhere in the agreement should be taxed. In the UK's agreement the article sometimes gives sole taxing rights in respect of such income to the recipient's country of residence.
>
> 5 It has been the practice of HMRC to apply the 'looking through' principle to all cases where relief in respect of the discretionary payment was sought and to refuse claims where full repayment of UK tax was claimed under the provision of [the] 'other income' Article in the agreement.
>
> [Para 6 deals with estates: see 89.17 (Non-resident beneficiary of UK estate: DT relief).]
>
> **Change of practice**
>
> 7 Following a review of their practice in these two areas, HMRC have accepted that if a payment made by trustees out of a UK discretionary trust falls to be treated as a net amount in accordance with TA 1988 s 687(2) [now s.494 ITA], the 'looking through' principle is not appropriate where the beneficiary is resident in a country with which the UK has a double taxation agreement and the 'other income' Article gives sole taxing rights in respect of such income to that country. (This will usually be the case where income from trusts is not specifically excluded from the Article.) This means that tax paid by the trustees in respect of the discretionary payment will be repayable to the beneficiary, provided that any conditions set out in the 'other income' Article are met. For example, the recipient may be required to show that he is subject to tax on the income in his country of residence.
>
> 8 [This deals with estates]
>
> 9 Where the 'other income' Article does not give sole taxing rights to the country of residence in respect of the trust or estate income or there is no double taxation agreement with the country concerned, the existing 'looking through' practice will continue to be applied where it is to the advantage of the beneficiary.

The DTAs which confer relief under the Other Income article on discretionary payments made by UK resident trustees are mostly the older generation of treaties. I think the reason is that before 1973, discretionary trusts were regarded as transparent, so distributed income of discretionary trust was not regarded as falling under the Other Income article.[48] DTAs made from the 1980's onwards usually exclude trust and estate income from the Other Income article.

[48] See 41.3.1 (Source/categorisation of income).

The International Manual sets out a list of the countries whose DTAs provide relief for discretionary payments made by UK resident trustees. It is not however up to date and for convenience I divide it into two parts:

> **INTM367800 - DT applications and claims: Non-resident beneficiaries of UK trusts** [Dec 2019]
>
> DTAs where relief is available under the 'other income' article on discretionary payments made by UK resident trustees
>
> Armeia (to 5/4/2002) [1]
> Austria
> Barbados
> Belarus [1]
> Bosnia Herzegovina [2]
> Cote d'Ivoire
> Croatia [2]
> Egypt
> France
> Georgia (to 5/4/2002) [1]
> Germany
> Hungary
> Israel
> Jamaica
> Kenya
> Kyrgyzstan (to 5/4/2002) [1]
> Lithuania (to 5/4/2002) [1]
> Macedonia [2]
> Moldova (to 5/4/2002) [1]
> Montenegro [2]
> Morocco
> Namibia
> Portugal
> Romania
> Serbia [2]
> Slovenia [2]
> South Africa (to 5/4/2002)
> Spain
> Sudan
> Swaziland
> Tajikistan [1]
> Tunisia
> Tukmenistan [1]
> Zambia
>
> [1] Armenia, Belarus, Georgia, Kyrgyzstan, Lithuania, Moldova, Tajikistan, Turkmenistan: relief is given under the terms of the UK/USSR Double Taxation Convention.
>
> [2] Bosnia-Herzegovina, Croatia, Macedonia, Montenegro, Serbia, Slovenia: relief is given under the terms of the UK/Federal Republic of Yugoslavia Double Taxation Convention.

The following countries are still mentioned in the INT Manual list but should be deleted following new treaties (date of treaty in brackets):

Barbados (2012)
Hungary (2011).
France (2008)
Germany (2010)
Macedonia (2007)
Poland (2006)
Slovenia (2007)
South Africa (2002)
Spain (2013, in force 12/6/2014)

41.12.2 *Other Income article restricted*

UK DTAs from the 1980's onwards mostly exclude trust and estate income from the Other Income article. Art 23(1) of the France/UK DTA is typical:

> Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention, *other than income paid out of trusts or the estates of deceased persons in the course of administration*, shall be taxable only in that State.

This leaves relief to be claimed under ESC B18.

Interestingly, the UK/Germany treaty (2010) deals with the point expressly.[49] Article 21 provides:

> 1) Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.
> 2) Notwithstanding the provisions of paragraph 1, the following provisions shall apply with respect to income paid out of trusts or the estates of deceased persons in the course of administration:
> Where such income is paid to a beneficiary who is a resident of Germany by trustees or personal representatives who are residents of the UK out of income received by those trustees or personal representatives which would, if those trustees or personal representatives had been residents of Germany, have fallen within other Articles of this Convention, the beneficiary shall be treated as having received an amount of the income received by the trustees or personal representatives corresponding to the income received by him and any tax paid by the trustees or personal representatives on that amount shall be treated as having been paid by the beneficiary.

Why? Presumably the German authorities do not like German residents to be taxed by law and untaxed by HMRC extra-statutory concessions such as ESC B18 and A14. Those who believe that tax law should be statutory and not concessionary will approve.

It is curious that the programme to legislate ESCs, which has legislated many trivial ESCs, has not covered the important ESC B18. No explanation has been given, so it is tempting to speculate. Perhaps it has been filed as too difficult; perhaps HMRC are planning changes to the law; perhaps legislation will come eventually.

[49] Barbados (2012) is the same, so perhaps this will be the new standard form.

In the USA/UK DTA the treaty excludes trust and estate income in the standard wording, and point is dealt with by the DTA Exchange of Notes:

> With reference to paragraph 1 of Article 22 (Other income)—
> it is understood that the purpose of the exclusion from the paragraph for income paid out of trusts or the estates of deceased persons in the course of administration is to allow a recipient of such income the relief that would have been available to him under the provisions of the Convention had he received the income direct instead of through the trust or estate.

More accurately, the purpose is to prevent the recipient of such income from receiving more than the relief that would have been available to a person under the provisions of the Convention and ESC B18 had they received the income direct instead of through the trust or estate. But it comes to the same thing.

41.13 Dual-resident trustees

Suppose

(1) Trustees are dual resident (resident in the UK and in another state); but treaty-resident in the state (treaty non-resident under the tie-breaker).

(2) The beneficiary is solely resident in the UK

(3) The trustees receive income which is not subject to UK tax under the treaty

Tier 1: The trustees qualify for treaty relief for the charge at tier 1. That reduces the UK tax that they pay at tier 1., but it also reduces the tax pool, and so reduces the tax pool credit available for trust withholding tax (tier 2).

Tier 2: The distribution is subject to trust withholding tax. There is no double taxation relief for that charge.

Tier 3; The beneficiary is subject to tax on the distribution. There may be some foreign tax credit relief, under s.111 TIOPA, but not the full relief which applies to a treaty non-resident.

In short, for dual-resident trusts the trust tax-credit systems do not fully work, and the benefit of the DT relief may effectively be lost.

CHAPTER FORTY TWO

IIP TRUSTS: INCOME TAX

42.1 Introduction and terminology
42.2 Taxation of IIP trustees

42.11.1 Beneficial ownership reliefs
42.11.2 Baker trusts
42.11.3 Garland trusts
42.12 Baker or Garland trust jurisdiction?

42.1 Introduction and terminology

This chapter considers the income taxation of interest in possession trusts (**"IIP trusts"**), that is, in short, trusts which a beneficiary is entitled to the trust income. I call that beneficiary the **"life tenant"**; HMRC use the term "IIP beneficiary" which may be more accurate, but perhaps more opaque. The trustees may be called **"IIP trustees"**.

In *Crawley v IRC*:[1]

> The treatment of trustees in the Income Tax Acts is not altogether satisfactory. The legislation gives rise to serious problems as to the circumstances in which a trustee is liable for tax on income which is not actually received by him or which belongs beneficially to a beneficiary and as to the manner in which trustees are to be assessed.

[1] 59 TC 728.

That continues to be the case. But in practice we muddle through.

42.2 Taxation of IIP trustees

The starting point is that trustees are persons, and so if trustees receive/are entitled to income they are in general liable to income tax under the standard receipt/entitlement basis of liability.[2]

In general:

(1) UK trustees are subject to tax on all their income
(2) Non-resident trustees are subject to tax on UK source income (except so far as non-resident IT relief is available)

This applies even to IIP trustees.[3] But IIP trustees enjoy a number of exceptions to the general rule:

Exception	**See para**
Income mandated	42.3
Life tenant non-resident	42.4
Life tenant remittance basis user	42.5

Trustees liability to tax on interest will often be covered by a tax credit. Before 2016, trustees liability on dividend income was covered by a tax credit, but that is no longer the case for UK resident trusts, so the administrative burden has become much greater. Simplification would be appropriate.

42.2.1 *Rates of IT on trustees*

In the absence of express provision, the rates of tax payable by IP trustees are the Default Basic Rate, or for dividends, the dividend ordinary rate.[4]

42.3 Income mandated

The TSE Manual provides:

> **TSEM3040 trustees - beneficiary receives trust income directly** [Jul 2020]
> Sometimes there are instructions or arrangements for income to bypass the trustees of an interest in possession (IIP) trust. If trust income passes directly or indirectly to a beneficiary without going via the trustees, for

[2] See 15.2.1 (Receipt/entitlement basis of liability).

[3] See 15.8 (Receipt by nominee/trustee).

[4] See 43.6.5 (Application of Default Rates); 43.10.4 (Dividends: Non-individual); See too 42.10 (Scots IT rates).

> example income passes through an investment manager to the IIP beneficiary, there is no statutory basis for charging the trustees to income tax in respect of this income, because the trustees are neither entitled to it nor in receipt of it (TSEM3761).
> Trustees of interest in possession trusts (IIPs) (TSEM1564) exclude such income from the Trust and Estate Tax Return.
> See TSEM3763 about the beneficiary's and settlor's positions.[5]

CIOT say:

> CIOT and ICAEW, in response to questions raised by members sought HMRC's view as to what actually constitutes "mandated income". Our view is that (until it is revoked) any standing instruction given by the trustees as to the payment of income before it falls entirely under their control would constitute a mandate. HMRC were asked to consider the following examples:
> 1. The registrar of a company is given a mandate to pay the dividends directly to the beneficiary's bank account
> 2. The bank/building society is instructed to pay the interest as it arises into the beneficiary's bank account
> 3. The investments are held by an investment manager in nominee accounts the manager is instructed to pay the income as it arises into the beneficiary's bank account
> 4. The investments are held by an investment manager in nominee accounts and the manager has a standing instruction to pay the income periodically, say quarterly, into the beneficiary's bank account
> 5 The registrar of a company is given a mandate to pay the dividends directly to the trustees' bank account and the trustees forward the income to the beneficiary
> 6. The bank/building society is instructed to pay the interest as it arises into the trustees' bank account and the trustees forward the income to the beneficiary
> 7. The investments are held by an investment manager in nominee accounts and the manager is given ad hoc instructions to pay the income into the beneficiary's bank account.
> 8. Land where the life tenant manages the property including repairs, and collects and returns the rent directly
> **HMRC response**
> In simple terms the IIP trust income is mandated to the beneficiary when the beneficiary will receive that income directly from the source.

[5] Also see 47.11 (Trustees of settlor-interested trust).

> So, any scenario where the trust income does not go via the trustees' bank account, but straight to the beneficiary's is one within TSEM 3763. In these circumstances there is no basis for taxing the trustees, because they are not in receipt of the income. The beneficiary is chargeable on the income because they are entitled to it.
>
> The examples given in your question are all within the TSEM 3763, except numbers 5 and 6 where the trustees receive the income directly from the source, they are therefore taxable as being in receipt of the income. They therefore include this on the Trust and Estate tax return (SA900).
>
> The term 'mandated' has been causing the confusion so we are in the process of amending our guidance to clarify this matter.

Strictly, the correct question, in the words of the statute, is not whether the trustees have *mandated* income, but whether they have *received* income.[6] In cases of doubt, one should focus on the concept of receipt. But in general, "mandating income" is a convenient paraphrase for trustees "not receiving income".

The principle that IIP trustees are not taxable on mandated income was assumed without question in *Trustees of the Paul Hogarth Life Interest Trust v HMRC*[7] which discusses the implications of the rule in the context of penalties for failing to deliver a tax return.

IP trustees will normally mandate income to the life tenant, but with the consent of the life tenant it could be mandated to anyone.

42.4 Life tenant non-resident

This section considers the position of IIP trustees where:

(1) The trustees are UK tax-resident; and
(2) The life tenant is not UK tax-resident

The taxation of IIP trustees is affected by the residence of the life tenant. TSE Manual provides:

> **TSEM3160. Resident trustees with trust income from abroad: beneficiary is not resident** [Jul 2020]
>
> These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.
>
> The trustees' income tax liability is based on the beneficiary's residence

[6] See 15.2.1 (Person liable: receiving/entitled).

[7] [2018] UKFTT 595 (TC).

> position. Trustees are not chargeable in respect of the share of income from abroad payable to the non-resident beneficiary. They exclude it from the Trust and Estate Tax Return. [See] *Williams v Singer* 7 TC 387

IIP trustees are not taxed on income which is paid to the life tenant, if the life tenant is not taxable:

(1) Foreign source income payable to a non-resident life tenant
(2) UK source dividend income payable to a non-resident life tenant[8]
(3) Income for which the life tenant qualifies for non-residents IT relief

This applies even if the trustees are UK resident, and even if the income is received by them before it is paid on to the life tenant (ie it is not mandated to the life tenant directly).

UK resident IIP trustees are taxable on such income if it is not payable to a non-resident life tenant. Examples are:

(1) income used for trust expenses
(2) a receipt which is income for tax purposes but capital for trust purposes

42.5 Life tenant remittance basis user

This section considers the position of IIP trustees where:

(1) The trustees are UK tax-resident; and
(2) The life tenant is a remittance basis taxpayer

The taxation of trustees of an IIP trust similarly depends on whether the life tenant is a remittance basis taxpayer. TSE Manual provides:

> **TSEM3165. Resident trustees with trust income from abroad: beneficiary is resident but not domiciled** [Jul 2020]
> These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.
> The trustees' income tax liability is based on the beneficiary's domicile. The beneficiary must make a claim for any year that the remittance basis is to apply.
> If in any year the beneficiary claims the remittance basis the trustees' liability on the share of income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not

[8] See 30.7 (Non-resident recipient).

> remitted to the UK.
> If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.
> [See] *Williams v Singer* 7 TC 387

So IIP trustees are not taxed on unremitted foreign source income which is payable to a resident non-domiciled life tenant who is a remittance basis taxpayer. This applies even if the trustees are UK resident. The trustees would be taxable if the income is received by them in the UK, or otherwise remitted. What if income is remitted in a year after receipt? The trustees would only be taxable if the income was received by them. So there would be no charge on the trustees if the income was received out of the UK, paid to the life tenant, and the life tenant later remitted it to the UK by payment, say, to his own bank account. That makes sense, as the trustees would not know whether income has been remitted by the life tenant, unless they actually receive it.

Form SA904 Notes on Trusts & Estate Foreign 2022/23 provides:

> If the beneficiaries of the trust has an absolute interest in the trust (including a life tenant) and it's known that they will make a claim for the tax year to be taxed only on the amount of their foreign income and gains that is remitted to the UK, then do not include these amounts of foreign savings income remitted to the UK on page TF 2.

42.6 Taxation of life tenant

42.6.1 *Grossing up*

The TSE Manual provides:

> **TSEM3764. Beneficiary entitled to trust income - grossing up** [Jul 2020]
> If the trustees receive income that is taxed at source, or if they pay tax on it under self assessment, the beneficiary will receive a net amount. But he or she is entitled to the gross amount. Consequently he or she is taxable on the gross amount.
> For example, the trustees have gross bank interest of £1,000 on which tax is deducted at source £200.They pay £800 to the beneficiary. The beneficiary is entitled to the gross amount £1,000, and is taxable on that amount

42.6.2 *Beneficiary's credit for trustees tax*

The TSE Manual provides:

> **TSEM3765. Beneficiary entitled to trust income - credit for trustees' tax** [Jul 2020]
> If the trustees have paid tax or have received income with tax taken off, the beneficiary is given credit for that tax.
> For example, in 2009-10
> the trustees have gross rental income of £2,000 on which they pay tax £400.
> They pay £1,600 to the beneficiary.
> The beneficiary is entitled to the gross amount £2,000, and is taxable on that amount. He or she is given credit for the £400 tax paid by the trustees.
> If the beneficiary is a higher rate taxpayer, he or she will have further tax to pay see example in TSEM3766. If the beneficiary is a non-taxpayer, he or she may claim a repayment.
> The beneficiary is given credit for trustees' tax only if the beneficiary is taxable on the same item. If the IIP trustees receive an amount that is capital in trust law and deemed to be income for tax purposes (see TSEM3201 and TSEM3768), the beneficiary is not given credit for the trustees' tax. The IIP beneficiary would not be entitled to such a receipt, as it would not be trust income, and would not be taxable on the receipt...

I refer to this system as **"pay & reclaim"**. The trustees pay tax and the beneficiary reclaims it.[9]

42.6.3 *HMRC example*

The TSE Manual provides:

> **TSEM3766 Beneficiary entitled to trust income - grossing up and credit for trustees' tax example** [Jul 2020][10]
> An IIP trust where the Settlements legislation does not apply (see TSEM3765) receives income in 2009-2010:
> - rental income £2,000
> - bank interest £800 (basic rate tax of £200 deducted at source).

[9] The same system applies non-settlor interested IIP trusts, where trustees likewise pay tax and the settlor has a credit for that tax; see 47.11 (Trustees of settlor-interested trust).

[10] Author's footnote: I have slightly altered the wording of the examples to enhance clarity.

Trustee's position

	Rent	Interest
gross income	2,000	1,000
tax due	400	200
net income	1,600	800

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £[400][11] tax.

Beneficiary's position (***Beneficiary is a higher rate taxpayer***)

	Rent	Interest
net income (as above)	1,600	800
grossed up (@ 20%)	2,000	1,000
tax at 40%	800	400
less credit	-400	-200
further tax to pay[12]	400	200

For an example involving TMEs, see TSEM8345-8350.

TSEM3767. Beneficiary entitled to trust income - form R185 (Trust Income) [Jul 2020]
In the example in TSEM3766 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

	Net amount	Tax paid
Box 3 non-savings income	£1600	£400
Box 4 savings income	£800	£200

The beneficiary uses the information on form R185 (Trust Income) to make his or her tax return or to claim repayment.

42.6.4 *Completing tax return*

The TSE Manual later expands on this:

TSEM3763 beneficiary receives trust income directly, the beneficiary's return [Jul 2020]
Sometimes there are instructions or arrangements for income to bypass the trustees of an interest in possession (IIP) trust. If trust income passes directly or indirectly (for example, through an investment manager) to a beneficiary without going via the trustees the beneficiary needs to ensure that it is returned correctly on their tax return:
The beneficiary should return all income on the relevant pages of their tax return, in addition to their direct personal income. For example,

[11] Author's footnote: The Manual erroneously states the amount as £220.

[12] Author's footnote: If the beneficiary is a basic rate taxpayer, there is no further tax due.

include:

- dividends and interest on the SA100;
- rental income on the SA105 (UK property);
- foreign income on the SA106 (Foreign)

However, if income bypasses the trustees and the trust:

- is settlor interested (TSEM4200 onwards), or
- is not settlor interested but the trust income passes directly to the settlor's relevant minor child (TSEM4300 onwards)

then the settlor includes the income on his or her personal return. Other beneficiaries do not.

See TSEM3040 about the trustee's position.

Income received via the trustees

The beneficiary should use the SA107 (Trusts etc) to return all other trust income, which will have passed through the trustees (with the exception of foreign income, which is returned on the SA106 (Foreign).

42.7 Trustees expenses

42.7.1 *Deduction for trustees*

The TSE Manual provides:

> **TSEM8310. IIP trustees: basic rate, etc tax** [Jul 2020]
>
> In taxing the trustees of an IIP trust at rates up to basic rate, the usual deductions against various sources of income (e.g. deductions to arrive at net trading profit or rental income) are allowed. But the trustees do not get relief at those rates of tax for any 'trustees' expenses' whatsoever. The tax case of *Aikin v Macdonald's Trustees* (3 TC 306), concerned with income remitted to the UK from abroad, confirmed the general principle that trust management expenses are not to be taken into account in arriving at the measure of taxable income of the trustees. The case found that the full amount of income received in the UK was taxable without any deduction in respect of expenses incurred in this country in managing the trust. As Lord McLaren said, 'the only kind of deductions allowed is expenditure incurred in earning the profits there is no deduction under any circumstances allowable for expenditure incurred in managing profits which have already been earned and reduced into money' (p309).
>
> **TSEM8315. IIP trustees: deemed income** [Jul 2020]
>
> Unlike the trustees of accumulation/discretionary trusts, the trustees of IIP trusts are not normally chargeable to the special trust rates. Consequently there is generally no equivalent question of allowing TMEs against the special trust rates - but see 'Practical considerations' below.

For IIP trusts, there are certain items that are capital in trust law but deemed to be income for tax purposes, and are also taxable at the special trust rates. (See TSEM3201.)

...

From 6 April 2007 Section 484 ITA provides for all the deemed income items in ITA/482, now including accrued income, to be given relief for allowable TMEs

Practical considerations

In practice, if an IIP trust incurs allowable TMEs, they will reduce the beneficiary's entitlement to trust income and will not normally be taken into account for the trustees' deemed income purposes. A capital receipt would normally not find its way into the hands of an IIP beneficiary, as it would not be trust income. (But see exceptions in TSEM3786 to TSEM3787.) So, the fact that the trustees were liable to the special trust rates on certain receipts would have no direct effect on the income beneficiary, and Section 484 ITA TMEs would not come into question. But if there is a high enough level of allowable income expenses such that they reduce the IIP beneficiary's entitlement to nil, and at the same time there is deemed income taxable on the trustees at the special trust rates, excess income expenses could be used against the trust rate income.

42.7.2 *Deduction for life tenant*

The TSE Manual provides:

TSEM8320. IIP beneficiaries: case law [Jul 2020]

There is case law in *Murray v CIR* (11 TC 133), *MacFarlane v CIR* (14 TC 540), and *CIR v Dewar* (16 TC 93-94). A beneficiary with an absolute interest in income (for example a life tenant) is entitled to the amount arising to the trustees that is available after any management and administration expenses etc. of the trustees have been provided for. Consequently the beneficiary is taxable on the net amount - *CIR v Hamilton of Dalzell (Lord)* (10 TC 406).

TSEM8325. IIP beneficiaries: TMEs not a tax deduction [Jul 2020]

In an IIP trust, the income beneficiary is entitled to the income as it arises out of trust assets, with the exception of any part of that income that is properly paid away on trust expenses and some other items (see TSEM3762). TMEs are considered as part of establishing what net income the beneficiary is entitled to in law. That entitlement then provides the measure on which to tax the beneficiary. So, 'allowable' TMEs for an IIP beneficiary do not constitute a tax deduction or a tax relief, because they represent sums of money that the beneficiary was not

> entitled to in the first place.
>
> **TSEM8330. IIP beneficiaries: tax law** [Jul 2020]
>
> ITA Sections 499 to 503 provide generally for the IIP beneficiary's income to be reduced by allowable TMEs for tax purposes.
>
> ITA Sections 501 and 502 provide for relief for allowable TMEs for non-resident IIP beneficiaries.

Section 500 ITA provides:

> (1) Expenses of the trustees can be used to reduce the beneficiary's income for income tax purposes only so far as—
>
> (a) the expenses are incurred by the trustees in the current tax year or in an earlier tax year, and
>
> (b) as a result of the expenses being chargeable to income as mentioned in subsection (2) or (3), the beneficiary's entitlement to the beneficiary's income is reduced by reference to the expenses.

"Chargeable to income tax" is defined in s.500 ITA:

> (2) Expenses are chargeable to income for the purposes of subsection (1)(b) if they are chargeable to income by the trustees under a term of the settlement (subject to any overriding law which prevents the expenses from being so chargeable).
>
> (3) Expenses are also chargeable to income for the purposes of subsection (1)(b) if they—
>
> (a) are not chargeable to income by the trustees under a term of the settlement, but
>
> (b) are chargeable to income by the trustees in accordance with any law (subject to any overriding term of the settlement which prevents the expenses from being so chargeable).

Section 500(4) ITA prevents double counting (for the avoidance of doubt):

> Expenses cannot be used to reduce the beneficiary's income for income tax purposes so far as they are expenses which have fallen, or may fall, to be taken into account for the purpose of calculating the trustees' liability to income tax for any tax year.

42.7.3 *Non-resident beneficiaries*

Section 501 ITA provides:

> (1) This section applies if—
>
> (a) expenses of the trustees are to be used to reduce the beneficiary's income for income tax purposes, and

> (b) a proportion of the beneficiary's income is untaxed income (see section 502).
>
> (2) A proportion of those expenses is not to be so used.
>
> (3) That proportion is the same as the proportion of the beneficiary's income which is untaxed income.
>
> (4) In subsection (3) the references to the beneficiary's income and untaxed income do not, in either case, include so much (if any) of that income as is equal to the amount of income tax, or of any foreign tax, for which the trustees are liable on that income.
>
> (5) "Foreign tax" means any tax which—
>
> (a) is of a similar character to income tax, and
>
> (b) is imposed by the laws of a territory outside the UK.

Section 502 ITA provides a commonsense definition of "untaxed income":

> (1) For the purposes of section 501 the beneficiary's income is untaxed income so far as the beneficiary is not liable to income tax on it wholly or partly because the beneficiary—
>
> (a) has been non-UK resident, or
>
> (b) has been treated as resident in a territory outside the United Kingdom under double taxation arrangements.
>
> (2) If the income tax charged on the beneficiary for the beneficiary's income is limited under Chapter 1 of Part 14 (limits on liability to income tax of non-UK residents), the untaxed income includes so much of the beneficiary's income which is disregarded income (within the meaning of that Chapter) except so far as the disregarded income is within subsection (3).
>
> (3) The disregarded income is within this subsection so far as—
>
> (a) sums representing income tax have been deducted from the income, or
>
> (b) sums representing income tax have been treated as deducted from or paid in respect of the income.

Against which income does one set expenses? This question did not arise when all types of income were taxed at the same rates. Now we need s.503 ITA which provides the answer:

> (1) This section applies if the beneficiary's income is to be reduced for income tax purposes by expenses of the trustees.
>
> (2) The beneficiary's income is to be reduced in the following order—
> first, reduce dividend income within subsection (3) (if any),
> second, reduce dividend income not within that subsection (if any),
> third, reduce savings income (if any), and
> fourth, reduce other income (if any).

(3) Income is within this subsection so far as it is—

(a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),

(b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or

(c) chargeable under Chapter 6 of that Part (release of loan to participator in close company).

(4) If the trustees are liable for income tax charged on a component of the beneficiary's income at a particular rate, then any reduction of that component is to be made in accordance with the steps set out in subsection (5).

(5) Here are the steps.

Step 1 Deduct from the component the amount of income tax charged on it at the particular rate for which the trustees are liable.

Step 2 Take the result from Step 1 and reduce it (but not below nil) by the amount of the trustees' expenses so far as they have not already been used to reduce other components of the beneficiary's income.

Step 3 Take the result from Step 2 and gross it up by reference to the particular rate. The result is the reduced amount of the component of the beneficiary's income.

ITA change 91 provides:

Change 91: Settlements: trustees' expenses reducing beneficiary's income: sections 500, 503 and Schedule 1 (section 646A of ITTOIA)

This change makes explicit some of the rules about the way expenses incurred by trustees in connection with income to which a beneficiary is entitled reduce the amount of the beneficiary's income for tax purposes.

There are only two provisions in ICTA that concern the tax treatment of expenses in relation to income to which a beneficiary is entitled before it is distributed (where the beneficiary is regarded as having an interest in possession). These are:

- section 689A, which deals with the disregard of some expenses in the case of a non-resident beneficiary; and
- section 689B, which concerns the order in which expenses reduce the beneficiary's income.

While there are additional provisions in section 686(2AA) of ICTA that give some rules on the treatment of trustees' expenses in relation to accumulation or discretionary income, there is no corresponding provision for interest in possession trusts. The practices that have become established and which are reflected in these sections are based on the principle that the income of a beneficiary is the income arising to the trustees so far as the beneficiary is entitled to it.

There are two ways in which this principle operates.

First, if the trustees' expenses are chargeable to income under a provision of the settlement, then irrespective of whether they would be so chargeable in the absence of that provision, the expenses are to be taken into account. This is subject to the existence of any law that in a particular case (for example by way of a court order) overrides the provision in the trust deed.

This is different from the rule that operates in relation to accumulated or discretionary income where the terms of the settlement are to be ignored, and from what it appears that section 689A of ICTA provides for in this context.

If the deed is silent on whether a particular expense is chargeable to income then the expense is taken into account if it would be chargeable to income under general trust law.

These rules are reflected in section 500. They mean that an expense is allowable if it is chargeable to income under the trust deed, even if it would be chargeable to capital under general trust law. Conversely, in cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, then the change means that the expense is not allowable.

The second area concerns how trustees' expenses are taken into account in such cases.

The expenses do not affect the amount of income on which the trustees are chargeable to tax, but operate to reduce the amount of the beneficiary's income. It is not that the beneficiary gets relief for the expenses as such; it is simply that the beneficiary is not entitled to the income used to pay the expenses. So, the beneficiary's income (as reduced by allowable expenses) is grossed up at the normal rate appropriate to that income to arrive at the gross amount which is to be treated as part of the beneficiary's total income.

This is not set out in the source legislation but, based on the decision in *CIR v Lord Hamilton of Dalzell* (1926), 10 TC 406 CS, it is the accepted way that expenses are taken into account. Section 503 reflects this.

This change also provides rules about cases where the trustees' expenses exceed a beneficiary's income. Section 500(1) applies in relation to the tax year in which the beneficiary's entitlement to income is reduced, whether the expense was incurred in that tax year or an earlier tax year. The reference to an earlier tax year means that the section covers cases where the trustees' expenses in an earlier tax year exceed the income in that earlier year and so the trustees are carrying forward the excess.

This change is in principle adverse to some taxpayers and favourable to others. But it is expected to have no practical effect as it is in line with current practice.

The TSE Manual continues:

TSEM8335. IIP beneficiaries: tax law: Section 500 ITA [Jul 2020]

S.500 provides that if, as a result of the expense being chargeable to income it reduces the beneficiary's entitlement to income, it reduces the measure of the beneficiary's income for tax purposes.

An expense can reduce the beneficiary's entitlement in two ways:

If it is chargeable to income under general trust law and there is no specific provision about the expense in the trust deed.

If it is chargeable to income under the trust deed, whether it is chargeable to income or capital in general trust law.

In cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, the expense is not allowable, as it does not reduce the beneficiary's entitlement to income

In sum:

- if an expense is properly chargeable to capital in general trust law, but charged to income under the trust deed, the expense is allowed;
- if an expense is properly chargeable to income in general trust law, but charged to capital under the trust deed, the expense is not allowed.

The legislation for interest in possession trusts specifies that one must give priority to the provisions of the trust deed over general trust law when establishing whether the expense is an allowable trust management expense for tax purposes. In practical terms the provisions result in the IIP beneficiary being taxed on his or her entitlement to income.

TSEM8340. IIP beneficiaries: trust deed [Jul 2020]

The IIP beneficiary is taxed on the income of the trust net expenses properly chargeable to income.

'Properly chargeable to income' in the IIP trust context means properly chargeable to income under all four sources of trust law referred to in TSEM8020. By contrast with discretionary trusts, where Section 484 ITA specifically excludes provisions in the trust deed, this term for IIP beneficiaries includes expenses whose final incidence falls on income by virtue of the terms of the trust deed - Section 500(2) ITA.

So if an IIP trust deed allows the trustees to pay what are normally capital expenses out of income, those expenses reduce the measure of the beneficiary's income. If an IIP trust deed allows trustees to pay what are in general trust law income expenses out of capital, again the trust deed has priority over general trust law, and consequently the IIP beneficiary's income is not reduced by such expenses.

In the absence of a specific provision in the trust deed, general trust law applies. If the trustees pay expenses out of income that are properly chargeable to capital in general trust law, then the IIP beneficiary is taxable on the amount of income used to pay the expenses, even though he or she does not receive it.

TSEM8345. IIP beneficiaries: measure of income: net and gross amounts [Jul 2020]

Tax is charged on the beneficiary's entitlement. The beneficiary receives

- income net of tax and income expenses including TMEs (that receipt referred to below as ‘the net amount’), but is actually entitled to
- the untaxed amount of the income, net of income expenses including TMEs (that entitlement referred to below as ‘the gross amount’).

So the net amount is grossed up at the appropriate tax rates to arrive at the amount included in the beneficiary’s income for income tax purposes.

Example

Trustees income is £1,000; allowable TMEs are £250, income tax due is £200 (£1,000 at 20%).

The ‘net amount’ is £550

The ‘gross amount’ is £687.50 (£550 grossed up × 100 ÷ 80).

TSEM8350. IIP beneficiaries: measure of income: tax paid by trustees [Jul 2020]

The income tax paid by the trustees on that part of the income used for TMEs and other items excluded from the IIP beneficiary’s entitlement is not part of the beneficiary’s entitlement, because the income out of which the tax is paid is not part of the beneficiary’s entitlement. But the rest of the tax paid by trustees represents income to which the IIP beneficiary is entitled.

The beneficiary is given credit for the tax already paid by the trustees (or deducted at source) on the amount included in the beneficiary’s income for income tax purposes. That credit, i.e. tax already paid on the income to which the beneficiary is entitled, will necessarily be represented by the difference between the gross amount and the net amount as described in TSEM8345.

TSEM8355. IIP beneficiaries: Section 500 ITA: basis of allowance [Jul 2020]

Section 500(1)(a) ITA provides that allowable TMEs are allowed on the ‘incurred’ basis. So the beneficiary’s entitlement in any tax year is income arising less allowable TMEs incurred.

Section 500 provides for unused allowable TMEs incurred in an earlier year to be used against the current tax year. In a year where allowable TMEs incurred exceed income arising the beneficiary’s income entitlement will be nil. The excess allowable TMEs will be taken into account in later year/s.

For an expense to be properly chargeable to income in trust law the trustees must have authority to put the final burden of that expense on the income fund. Which fund they use to pay it out of temporarily is not relevant.

In a year where there is not enough income, trustees may borrow from capital to pay income expenses, and in the next year reimburse capital from income.

If an expense is properly chargeable to income, but the trustees pay all or part of it from trust capital in year 1 because there is no income or not enough income that year, the beneficiary’s net income in year 1 will be reduced to nil. If in year 2 the trustees reimburse capital from income, that amount will be allowable against the beneficiary’s income for tax purposes in year 2.

Example

Year 1, trust income £1,000, allowable TMEs £2,000.

Trustees pay £1,000 TMEs out of income, and £1,000 out of capital. Beneficiary's taxable income £1,000 less TMEs £1,000 = nil.

Year 2, trust income £3,000, allowable TMEs £1,000.

Trustees pay £1,000 TMEs of current year out of income, and reimburse capital £1,000 for income expenses of previous year.

Beneficiary's taxable income £3,000 less £2,000 = £1,000.

TSEM8360. IIP beneficiaries: tax law: order of set-off [Jul 2020]

Section 503(2) ITA provides the order of set-off for TMEs to reduce the income of an IIP beneficiary. The order of set-off of TMEs in an IIP beneficiary's tax calculation is the same as for accumulation/discretionary trustees (TSEM8250). But there is no grossing up of expenses as there is for accumulation/ discretionary trustees.

TSEM8365. IIP beneficiaries: tax law: order of set-off [Jul 2020]

Example

An IIP trust receives income in 2010-11:

rental income £1,000

bank interest £800 (basic rate tax of £200 has been deducted at source).

Trustee pays TMEs properly chargeable to income of £250.

Trustee's position

	Rent	Interest
Gross income	£1,000	£1,000
Tax due	£200	£200
Net income	£800	£800

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £200 tax on the rent. TMEs do not affect the trustee's position.

Beneficiary's position

	Rent	Interest
Net income (as above)	£800	£800
Minus TMEs (set first against savings income)		–£250
	£800	£550
grossed up (@ 20%)	£1,000	£687.50

TSEM8370. IIP beneficiaries: tax law: form R185 (Trust Income) [Jul 2020]

In the example in TSEM8365 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

	Net amount	Tax paid
Box 3 non-savings income	£800.00	£200.00
Box 4 savings income	£550.00	£137.50

The beneficiary uses the information on form R185(Trust Income) to make his or her tax return or to claim repayment.

42.7.4 *Mandated income: Expenses*

The TSE Manual continues:

> **TSEM8375. IIP beneficiaries: mandated income** [Jul 2020]
> Where
> [1] trustees mandate income (see TSEM3762) and
> [2] the beneficiary pays TMEs that are properly chargeable to income, such a beneficiary may set the TMEs against income chargeable at higher rate only.
> This practice of charging such income at no higher than the basic rate necessarily follows from the case law propositions that
> - there is no income tax relief at basic rate for income used to meet TMEs (see TSEM8310)
> - although an IIP beneficiary receives income mandated to him, to the extent that it is used to meet expenses properly borne by income it is not a part of his entitlement (see TSEM8325).

42.8 Life tenant's foreign tax credit

The TSE Manual provides:

> **TSEM3655. Relief for overseas tax: beneficiary entitled to trust income** [Jul 2020]
> These instructions apply to taxed overseas trust income that is treated as a beneficiary's income as it arises.
> The trustees can claim, and receive, tax credit relief on behalf of the beneficiary. The amount is based on the beneficiary's marginal rate and residence status. INTM367730+ onwards has instructions about tax credit relief.
> If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.
> A paying agent may have allowed provisional tax credit relief on overseas income. If that provisional relief is excessive, the beneficiary accounts for the excessive relief.

The Manual continues with a comment on annuities, but that does not arise in practice.

42.9 Life tenant: Source of income

42.9.1 *Source of income of beneficiary*

It is necessary to identify the source of income of a life tenant. For instance, a life tenant is subject to tax on income received from the trust if it is UK source income or if the life tenant is UK resident; and rates of tax may vary depending on the source.

The choice is between:

(1) regarding the trust as the source of trust income; or

(2) regarding the trust assets as the source, in which case one "looks through" the trust and it is described as "transparent".[13]

The answer depends on the terms of the trust, construed in accordance with the proper law of the trust.

Similar issues arise for unit trust income, see 69.1 (Unit Trusts – Introduction).

For the position where the life tenant pays the income (eg pays interest or rent to the trustees) see 50.10.6 (Loan to life tenant).

42.9.2 *England and "Baker" trusts*

The source of the life tenant's income is the underlying trust assets (not the trust) if, under the terms of the trust, construed in accordance with the proper law of the trust, the beneficiary is entitled to the income of each trust asset as it arises. This is the case for a standard form interest in possession trust governed by English law.[14] In other words, an IIP trust is transparent for IT purposes.

The TSE Manual provides:

> **TSEM10425 Non-resident trusts: beneficiary's chargeability: trust income - interest in possession trust: foreign law - Baker type trust**
> [Jul 2020]
> The beneficiary of a Baker type trust is entitled to his or her share of each source of income arising to the trust, less any amounts to which the beneficiary is not entitled (see (TSEM3762).
> Credit may be given to the beneficiary for tax deducted at source or paid by the trustees on the income. This includes tax credit relief where tax has been paid by the trustees on trust income in another jurisdiction.

[13] See 90.6 (Transparency issues).

[14] *Baker v Archer-Shee* 11 TC 749. This issue has given rise to academic debate ever since the House of Lord's 3:2 decision in *Baker*. See Waters, "The Nature of the Trust Beneficiary's Interest" (1967) 45 Can Bar Rev 219; Schabe, "The Trust Conduit Principle: A Foundationless Theory?" [1999] Journal of Australian Taxation 17 *http://www.austlii.edu.au/au/journals/JATax/1999/17.html*

Example
Interest in possession beneficiary has entitlement to all income of non-resident trust

Year 2013-14 - Trust income

UK Property Income	£10,000
Tax paid	£2,000
Net income	£8,000
Trust management expenses £1,000	

Trustees' position

Gross UK Property Income	£10,000
Less tax due	- £2,000
Less expenses	- £1,000
Net income	£7,000

Beneficiary's position - TSEM8345
Net UK Property Income = £7,000
Grossed amount (£7,000 × 100 ÷ 80) = £8,750
The beneficiary will need to include the amount of £8,750 property income as his or her income for income tax purposes, and will receive credit for £1,750 tax paid by trustees.

Rather surprisingly, this applies even if the life interest is subject to an annuity: *Nelson v Adamson* 24 TC 36. But in practice annuities are not used so the point is of academic interest only.

For completeness: it has been suggested in a tentative and *obiter* (non-binding) comment, that this does not apply to trading income, at least for the purposes of DTAs.[15] However there is no sound basis for that distinction and the correct view is that the transparency principle applies generally.

It is possible to draft an English law trust so that under the terms of the trust the beneficiary is not entitled to a proprietary interest in the income as it arises, but merely has the right to call on the trustees to transfer to them a sum equal to the net income.[16] Then the trust (not the underlying

[15] *Huitson (R, oao) v HMRC* [2010] STC 715 at [54]. The point was not considered on appeal, see [2011] STC 1860.

[16] *R v Special Comrs ex p Shaftesbury House & Arethusa Training Ship* 8 TC 367 appears to be an example. But that case was decided before *Baker*, and it should be decided differently now.

assets) will be the source. In practice this is not normally done.[17]

42.9.3 *New York and "Garland" trusts*

Common form interest in possession type trusts governed by some foreign trust laws do not give the beneficiary the right to income as it arises, but only the right to recover a sum from the trustees.[18] The right is *in personam* not *in rem*. In this case the trust is not transparent and the beneficiary's income is classified as an Annual Payment (regardless of the type of income arising to the trustee).[19] The location of the source is where the trustee is resident.

This is so even if the beneficiary is described as "life tenant" and is, in economic reality, in the same position as a life tenant under an English law trust. In this respect, a *Garland* trust is like an English law estate of a deceased person, not an English law trust.

The TSE Manual provides:

> **TSEM10430 interest in possession trust - foreign law - Garland type trust** [Jul 2020]
> The beneficiary of a Garland type trust is entitled to his or her share of the net trust income remaining after the trustees have ascertained the balance available after meeting the expenses of administering the trust. The nature of the income that arose to the trustees is irrelevant, and the amount to which the beneficiary is entitled is regarded as an untaxed source of foreign income. Consequently, in the example at TSEM10425,[20] the entitlement of the interest in possession beneficiary would be to foreign income (untaxed) of £7,000 and not to UK property income.
> If the trustees have paid tax on some of the income chargeable, and the beneficiary wishes to obtain credit for the tax, refer to Trusts & Estates Nottingham.

[17] Except perhaps unit trusts: see 69.7 (Unauthorised UT: Foreign trustees).

[18] This assumes that the trust income consists of money. What if there is income in specie, such as a dividend of an asset in specie? Presumably the beneficiary has the right to demand that the trustees transfer the asset. It is a matter of foreign law, but if the asset is non-fungible and unique, eg shares in a private company, the life tenant might have the right to receive *that* asset in specie, which would suggest a right to that asset; ie one would apply a *Baker* analysis rather than a *Garland* analysis. That supports the view that *Garland/Baker* is a strange distinction to draw.

[19] *Garland v Archer Shee* 15 TC 693.

[20] See 42.9.2 (England and "Baker" trusts).

42.9.4 *Scots trusts*

A liferent (the Scottish term for a life interest) under a Scots trust in common form is not transparent.[21]

This has been reversed for UK resident Scots trusts; s.464 ITA provides:

> (1) This section applies if—
> (a) income arises to trustees under a trust having effect under the law of Scotland,
> (b) the trustees are UK resident, and
> (c) a beneficiary under the trust ("B") would have an equitable right in possession to the income if the trust had effect under the law of England and Wales.
>
> (2) B is treated for income tax purposes as having an equitable right in possession to the income (even though B has no such right under the law of Scotland).

It is difficult to see why the statutory rule only applies to UK resident trusts. It is difficult to see why it applies to Scotland and no other *Garland* jurisdictions. The reason is that it is not part of a coherent

[21] *Inland Revenue v Clark's Trustees* [1939] SC 11 at p.24:

> "There is no difference between the law of Scotland as regards the beneficiary's rights and the law which is admitted in the record to be the law of the State of New York;" "the right of property in the estate of the trust is vested in the trustees to the exclusion of any competing property, and the right of the beneficiary, ... as under the law of New York, is merely a right *in personam* against the trustees to enforce their performance of the trust."

https://www.kessler.co.uk/wp-content/uploads/2012/04/CIR-v-ClarksTrustees.pdf approved *Leedale v Lewis* 56 TC 501 at p.538. See too Scottish Law Commission, *Discussion Paper on the Nature and the Constitution of Trusts* (2006) para 2.5:

> "The beneficiary has a … right to compel the trustee to administer the trust funds in accordance with the provisions of the declaration of trust. This is a personal right. It is axiomatic that in Scots law the beneficiaries do not have a real right or a quasi-real right in the trust property. They have no proprietary interest in the trust fund."

http://www.scotlawcom.gov.uk See Smith, "Scottish trusts in the common law" [2013] Edin LR 283.

For the background to the distinct English/Scots laws of trusts, see *AG for Scotland v Murray Group Holdings* [2015] ScotCS CSIH 77 at [50]: "the theoretical nature of a trust is different, being based on the notion of legal estate and equitable interest in England, whereas in Scotland it is based on the notion of dual patrimonies of the trustee." The passage continues: "Nevertheless the practical results are similar, and the institution of the trust fulfils similar functions in both jurisdictions" but in this case the outcome is different.

regime for the taxation of trusts but a late Finance Bill amendment to deal with a narrow domestic anomaly.[22] In practice it will not often matter.

One can create a transparent Scots law trust with appropriate wording.[23]

42.9.5 *Critique*

The tax rules strictly require one to ask whether every trust jurisdiction is:

(1) a *Baker* jurisdiction (where the life tenant of a standard form IIP trust has a right to income as it arises); or

(2) a *Garland* jurisdiction (where the life tenant only has a right against the trustee).

That is a somewhat metaphysical question as it is difficult to pin down any practical consequence (other than tax) which arises from the answer.

The distinction between *Baker* and *Garland* trusts should be abolished. It has no economic substance and precious little legal basis. It is to a large extent undone by concession. This could easily be done by extending s.464 ITA to apply to all *Garland* trusts.[24]

42.10 Scots IT rates

HMRC say:

> Payments from interest in possession trusts and from deceased estates are subject to a deduction of tax at the basic rate when they are made to beneficiaries by trustees and personal representatives respectively. This means that beneficiaries who are basic rate taxpayers will have no further tax to pay.
>
> The Technical Note[25] proposed that the deductions by trustees and personal representatives should continue to be made at the UK basic rate (irrespective of whether the beneficiary was a Scottish taxpayer), but also that the income should always be taxed at UK rates in the hands of the beneficiary. This was to avoid basic rate taxpayer beneficiaries facing potentially small over or underpayments of tax if the Scottish

[22] See Scottish Law Commission, *Discussion Paper on Apportionment of Receipts and Outgoings* (2003) para 4.5 *http://www.scotlawcom.gov.uk/download_file/view/49/*

[23] "Scottish Trust beneficiaries are not entitled to specific items of trust property *unless that is expressly provided for in the Trust Deed*." Discussion Paper on Apportionment of Receipts and Outgoings para 4.5.

[24] For a precedent, see 90.11.3 (Garland trust: SDLT).

[25] HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012).

> basic rate differed from the UK basic rate.
>
> However, when preparing the legislation to achieve this, it has proved extremely complex to identify this income separately in the hands of the beneficiary so that a different treatment can be applied to it – in law, such income is currently grouped with any other income of the same type arising to the beneficiary (e.g. property income from a trust in this scenario is not distinct from property income arising to the individual in their own right).
>
> Given the degree of complexity for taxpayers that the necessary legislative changes would have brought about, the Government has instead decided that income from interest in possession trusts and deceased estates should be taxed at the Scottish rates when arising to Scottish taxpayer beneficiaries (no legislative change is required to achieve this).
>
> This decision has been taken on the basis that, although it is recognised that this could cause some administrative issues if the Scottish and UK rates diverge in future, such an eventuality is preferable to making an already complex area of legislation even more challenging for taxpayers.[26]

42.11 DT relief

In relation to trusts, three states may be concerned:

(1) The state where trust income arises
(2) The state where the trustees are resident
(3) The state where the beneficiary is resident

In this book I only consider the matter from a UK perspective: it will be necessary to consider foreign law viewpoints but that is outside the scope of this book.

In this chapter "beneficial ownership" is used in the treaty sense.[27] See Avery Jones, "The Treatment of Trusts under the OECD Model Convention [1989] BTR 65.

42.11.1 *Beneficial ownership reliefs*

Article 10 OECD Model convention provides:

[26] HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (Dec 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/389889/SRIT_Consequential_TechNote_vFinal.pdf*

[27] See App 6.1 (Beneficial ownership: Meanings).

> 1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
> 2. However, dividends paid by a company which is resident of a Contracting State may also be taxed in that State according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
> a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company which holds directly at least 25 per cent of the capital of the company paying the dividends through a 365 day period that includes the day of the payment of the dividend (for the purpose of computing that periods, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend);
> b) 15 per cent of the gross amount of the dividends in all other cases.

Thus relief for UK dividends requires that the beneficial owner of the dividends is treaty-resident in the foreign jurisdiction.

Article 11 OECD Model convention provides:

> 1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.
> 2. However, interest arising in a Contracting State may also be taxed in that State according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.

Thus relief for UK interest similarly requires that the beneficial owner of the interest is treaty-resident in the foreign jurisdiction.

Article 12(1) OECD Model convention provides:

> Royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Thus relief for UK royalties similarly requires that the beneficial owner of the royalties is treaty-resident in the foreign jurisdiction.

In some treaties beneficial ownership is added as a requirement even where it is not in OECD Model.

42.11.2 *Baker trusts*

In the case of Baker trusts, for the purposes of DT reliefs:

(1) The trust is transparent ie the underlying trust income is regarded as the income of the beneficiary.

(2) The life tenant is the beneficial owner of the trust income payable to the life tenant. So if the trust receives (say) interest income, the income of the beneficiary is classified as interest, and if the beneficiary is treaty-resident in a treaty jurisdiction with an article providing exemption from UK source interest, the income qualifies for this DT relief.

(3) The trustees (if otherwise taxable) qualify for DT relief to the extent that the beneficiary qualifies for the relief. This is another case of the trustees enjoying reliefs applicable to life tenants.

(4) The position is different for a receipt which is income for tax purposes and capital for trust law purposes: in that case the trustees are the beneficial owner of the income.

HMRC agree. International Manual provides:

> **INTM339540. Baker and Garland Trusts** [May 2020]
> ...
> ***Baker trusts***
> Where 'Baker' applies, you cannot treat the trustees as being beneficial owners of a trust's income as it arises. Instead it is the beneficiaries who are the beneficial owners.

That is correct. The Manual continues:

> Strictly, each beneficiary should claim in his or her own right.

This is not strictly correct. A trustee could in principle claim third-party DT relief in a case where a beneficiary failed to do so.[28] But nothing turns on that since HMRC do not apply what they identify as the strict law:

> In practice it is acceptable to allow relief to the trustees, provided that you can be satisfied that the beneficiaries are entitled to relief under the same double taxation agreement as that under which the trustees have claimed. If this is not the case you may allow partial relief to the trustees by reference to the percentage of the interests that are relievable under the same DTA as the trustees. The beneficiaries who are not resident in the same country as the trustees will need to make their own claims against the income distributed to them.

[28] See 109.1 (Third-party DT relief).

42.11.3 *Garland trusts*

In the case of *Garland* trusts, for the purposes of DT reliefs:

(1) The trustee is the beneficial owner of the trust income.

(2) The income of the beneficiary will qualify for DT relief under the "Other Income" article in OECD Model form (but not under the UK preferred form): see 41.12 (UK trust - non resident beneficiary: DT relief).

(3) Point (2) would cause great difficulties. However by concession HMRC will regard a *Garland* trust as transparent *Baker* trust for DT purposes. I refer to this as the "**Garland concession**".

International Manual provides:

> **INTM339540. Baker and Garland Trusts** [May 2020]
> ...
> ***Garland trusts***
> Where 'Garland' applies, you can, for the purposes of the double taxation agreement, treat the trustees as the beneficial owners of trust income as it arises and allow relief. This treatment is given because we consider that the beneficiary's right to income from the trust is against the trustees, rather than in the underlying assets held in trust. However, you should still establish the identity and residence of the beneficiaries. If any beneficiary is in the UK you should notify their tax office.

International Manual provides:

> **INTM166030. Garland trusts** [May 2020]
> In the case of income of a non-discretionary foreign trust of the type considered in the case of *Garland v Archer Shee* 15 TC 693, the beneficiaries are not concerned with the source of the trust income and whether or not it has borne UK tax. It is the practice to allow relief to beneficiaries, other than annuitants, in respect of the proportion of the income assessable as foreign income which is regarded as being derived from trust income which has borne United Kingdom tax. It is a condition of the relief that the amount of the income for higher rate purposes is to be treated as the sum of the amount assessable and the amount of tax on a grossed up basis which is applicable to the part of the assessment on which relief has been given.
> Submit the first claim from a beneficiary for this relief to CSTD, BAI, Assets Residence & Valuation before admitting the claim.
> **INTM166040. Foreign tax** [May 2020]
> Where foreign tax has been paid on trust income (including, in the case

> of dividends, any underlying tax where, exceptionally credit for such tax is due under the terms of an agreement – see INTM164410), it is the practice, in the case of a trust of a type referred to in INTM166030, to allow credit relief to beneficiaries, other than annuitants, for that foreign tax. Credit relief is given in the same way and to the same extent as if each beneficiary were entitled to his proportionate share of the underlying investments of the trust.

42.12 Baker or Garland trust jurisdiction?

The English courts assume that foreign trust jurisdictions apply English law principles in the absence of evidence to the contrary. But the Scottish courts will, I expect, assume Scots law principles, in the absence of evidence, with the opposite result. In practice HMRC have helpfully published a list which would constitute evidence which (in the absence of other evidence) a tribunal should be expected to accept.[29] This list only represents the HMRC view and could be challenged on the basis of expert evidence. The list assumes the trust has standard form wording. It is in principle possible to draft a non-transparent trust in a *Baker* jurisdiction. It may be possible to draft a transparent trust in a *Garland* jurisdiction by using non-standard wording.

The HMRC list is as follows. The endnotes are my own.

Argentina	No Trust Law	Denmark	Garland
Australia[1]		Egypt	Baker
New South Wales	Baker	Estonia	Baker
Queensland	Baker	Fiji	Baker
South Australia	Baker	France[4]	No Trust Law
Victoria	Baker	Ghana	Baker
Western Australia	Baker	Gibraltar	Baker
Bahamas	Baker	Guernsey	Baker
Barbados	Baker	Guyana	Baker
Belgium	No Trust Law	Hong Kong	Baker
Belize	Baker	Hungary	Baker
Canada[2]		India	Garland[5]
British Columbia	Baker	Ireland, Republic of[6]	Baker
Nova Scotia	Baker	Isle of Man	Baker
Ontario	Baker	Italy	No Trust Law[7]
Saskatchewan	Baker	Japan	No Trust Law
Quebec	Garland[3]	Jersey	Baker[8]
Cayman Islands	Baker	Kenya	Baker

[29] TSEM10423 [Jul 2020].

Latvia	Baker
Liechtenstein	Garland[9]
Lithuania	Baker
Luxembourg	Baker
Malaysia	Baker
Malawi	Baker
Malta	No Trust Law[10]
Monaco	No Trust Law
Montserrat	Baker
Namibia	Garland
Netherlands	No Trust Law[11]
New Hebrides	Baker
New Zealand	Baker
Nigeria	Baker
Norway	Garland
St Helena	Baker
St Vincent	Baker
Singapore	Baker
South Africa	Garland[12]
South Yemen	Baker
Spain	No Trust Law
Sri Lanka	Baker
Sweden	Garland
Trinidad & Tobago	Baker
Uganda	Baker
USA[13]	
New York	Garland
Minnesota	Garland
Montana	Garland
North Dakota	Garland
South Dakota	Garland
Wisconsin	Garland
All other states[14]	Baker
Zambia	Baker
Zimbabwe	Garland

[1] The list omits Tasmania, Northern Territory and Australian Capital Territory. It is considered that these are *Baker* jurisdictions.

[2] This seems correct: see *Minister of National Revenue* [1956] SCR 49 especially [1953] Ex CR 292 at p.297 *https://www.kessler.co.uk/wp-content/uploads/2012/04/Minister-of-National-RevenuevTrans-Canada.pdf* The list of Canadian jurisdictions omits Alberta, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nunavut, Prince Edward Island and Yukon. It is suggested that these are the same as the other Canadian common law jurisdictions, i.e. *Baker* jurisdictions.

[3] This seems well founded in Art. 1261 Code Civil Québec:

Le patrimoine fiduciaire, formé des biens transférés en fiducie, constitue un patrimoine d'affectation autonome et distinct de celui du constituant, du fiduciaire ou du bénéficiaire, sur lequel aucun d'entre eux n'a de droit réel.	The trust patrimony, consisting of the property transferred to the trust, constitutes a patrimony by appropriation, autonomous and distinct from that of the settlor, trustee or beneficiary *and in which none of them has any real right*.

See also Gretton, "Trusts without Equity" (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5.

[4] France was omitted (accidentally?) from the version of the list published 1 April 2008, but the comment in the earlier version of the list is printed here as it is correct.

[5] *Duncan's Executors v Adamson* (1935) 14 ATC 22 so held. This seems soundly based on s.3 [India] Trusts Act 1882: "The 'beneficial interest' or 'interest' of the beneficiary is his right against the trustee as owner of the trust-property."

[6] The list omits Northern Ireland: this is a *Baker* jurisdiction.

[7] This is wrong: Italy does have a trust law.

[8] Harriet Brown agrees: see *Jersey Law of Trusts* (4th ed., 2013), 2.52.

[9] This will apply to a Treuhandschaft and *a fortiori* to other Liechtenstein entities classified as trusts; see 90.14 (Foundation: Stiftung); 90.16 (Treuunternehmen/Trust Enterprise). But in the case of a Treuhandschaft, the position may not be clear, as art 910(3) PGR does give a beneficiary some rights *in rem*.

[10] This is wrong: Malta has had a trust law since at least 1989. Section 9 [Malta] Trusts and Trustees Act 1989 provides: " A beneficiary has an entitlement, called a beneficial interest, in or to the trust property..."; so Malta is a *Baker* jurisdiction.

[11] This is wrong: The Netherlands does have a trust law.

[12] Honoré agrees: *South African Law of Trusts* (6th ed., 2018), para 302.

[13] New York was (rather implausibly) found to be a *Garland* jurisdiction in *Garland v Archer-Shee* 15 TC 693. The finding of fact in *Garland* was also made in *Timpson's Executors v Yerbury* 20 TC 155 at p.157, and was accepted as common ground in *Astor v Perry* 19 TC 255. See "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", Avery Jones in *Studies in the History of Tax Law*, 2004 p.46, *https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf* for contrary views as to US law. Since foreign law is a question of fact, a court would not be bound by those decisions, but in practice they are not likely to be challenged.

[14] This may not be correct for all the other states. In particular, Ohio and New Jersey have been found to be *Garland* jurisdictions. See *The Marchioness of Ormond v Brown* 17 TC 333 at p.341, *Kelly v Rogers* 19 TC 692 at p.696. But see the above footnote. In *Lawson v Rolfe* 46 TC 199 it was common ground that California was a *Baker* jurisdiction.

CHAPTER FORTY THREE

RATES OF INCOME TAX/CGT/CT

43.1 IT rates: Introduction
43.2 IT rates in outline
43.2.1 Names of rates: Terminology
43.3 Devolution issues
43.3.1 Why devolve IT rates?
43.3.2 Complexity
43.3.3 Public understanding
43.3.4 IT competition within UK
43.3.5 Devolved rates: DTAs
43.4 Dividend/Savings Income
43.4.1 "Dividend Income"
43.4.2 "Savings Income"
43.4.3 Savings/Dividends top of income
43.5 IT rates: Figures
43.5.1 Main Rates
43.5.2 Scottish rates
43.5.3 Scots rates: Analysis
43.5.4 Welsh rates
43.5.5 Default Rates
43.5.6 Savings Income rates
43.5.7 Dividend rates
43.6 IT rates: Application
43.6.1 Application of Main Rates
43.6.2 "Basic/higher rate limits"
43.6.3 Application of Scottish rates
43.6.4 Application of Welsh rates
43.6.5 Application of Default Rates
43.7 Application of savings rates
43.8 Starting rate for savings
43.9 Savings nil rate
43.9.1 "Step 3 income"
43.9.2 The nil rate
43.9.3 Amount of savings allowance
43.9.4 Interest under remittance basis
43.10 Application of dividend rates
43.10.1 Dividend rates for individuals
43.10.2 Dividend nil rate
43.10.3 Dividends: Remittance basis
43.10.4 Dividends: Non-individual
43.11 Settlor-interested trust IT rate
43.12 s.720: transferor IT rate
43.13 CGT rates: Introduction
43.13.1 Summary
43.14 CGT rates: Individuals
43.14.1 Residential/carried interest gain
43.14.2 Individual: Ordinary gain
43.14.3 Basic/higher CGT rates
43.14.4 Scots/Welsh CGT payers
43.15 CGT rates: PRs
43.16 CGT rates: Trusts
43.17 CGT rates: Critique
43.18 Inflation/fiscal drag
43.19 Rates of CT
43.19.1 Small profits rate
43.19.2 Close investment-holding company

Cross references

The following topics are considered elsewhere:
41.2.1 (Discretionary-trust IT rates)

43.1 IT rates: Introduction

Rates of income tax vary according to:

(1) The type of income:
  (a) Savings Income
  (b) Dividend Income
  (c) Other income (not Savings/Dividend Income)
(2) The type of person receiving the income:
  (a) Individuals:
    (i) Scottish/Welsh taxpayers
    (ii) Other UK residents: England/Northern Ireland taxpayers
    (iii) Non-residents
  (b) Non-individuals:
    (i) Trusts
    (ii) Others
(3) The amount of income of an individual

This topic requires a book to itself.

43.2 IT rates in outline

IT rates on individuals are as follows:

Name	**Rate**	**Charge on amount**	**Applies to**
Main Rates			England/N. Ireland
Basic rate	20%	up to basic rate limit	
Higher rate	40%	above basic rate limit	
Additional rate	45%	above higher rate limit	
Default Rates			Non-residents
Default Basic Rate	20%	up to basic rate limit	
Default Higher Rate	40%	above basic rate limit	
Default Additional Rate	45%	above higher rate limit	
Dividend rates			Everywhere
Dividend nil rate	0%		
Dividend ordinary rate	8.75%	up to basic rate limit	
Dividend upper rate	33.75%	above basic rate limit	
Dividend additional rate	39.35%	above higher rate limit	
Savings Income rates			Everywhere
Starting rate for savings	0%	up to starting rate limit	
Savings nil rate	0%		
Savings basic rate	20%	up to basic rate limit	
Savings higher rate	40%	above basic rate limit	
Savings additional rate	45%	above higher rate limit	
Scottish rates			Scotland
Scottish starter rate	19%	up to £2,306	
Scottish basic rate	20%	£2,306 - £13,991	

Scottish intermediate rate	21%	£13,991 - £31,092	
Scottish higher rate	42%	£31,092 - £62,430	
Scottish advanced rate	45%	£62,430 - £125,140	
Scottish top rate	48%	above £125,140	
Welsh rates			Wales
Welsh basic rate	20%	up to basic rate limit	
Welsh higher rate	40%	above basic rate limit	
Welsh additional rate	45%	above higher rate limit	

It is therefore necessary to distinguish:

(1) The *names* of IT rates, of which we have 24

(2) The *numbers* ie *percentages*, of which we have 11:

(a) Everywhere: 0%; 8.75%, 20%, 33.75%, 39.35%, 40%, 45%

(b) and in Scotland, also: 19%, 21%, 42%, 48%

In outline, the rates are imposed as follows:[1]

Type of taxpayer	**Rates on**		
Individuals	*Savings Income*	*Dividend Income*	*Other income*
England/N Ireland	Savings rates	Dividend rates	Main Rates
Scottish taxpayer	Savings rates	Dividend rates	Scottish rates
Welsh taxpayer	Savings rates	Dividend rates	Welsh rates
Non-UK resident	Savings rates	Dividend rates	Default Rates
Non-individual			
IP trust/non-res. co.	Default Basic Rate	Dividend ord. rate	Default Basic Rate
Discretionary trust	Trust rate	Dividend trust rate	Trust rate

43.2.1 *Names of rates: Terminology*

The terminology used for the rates is unhelpful:

(1) The 5 rates called "additional" rates are in fact the top rates.[2]

(2) The 5 rates called "higher" rates are in fact intermediate rates, in the sense that they fall between the lowest rates and the top rates.

(3) Similarly, the dividend "upper" rate is an intermediate rate, in the sense that it falls between the dividend ordinary rate (which is not "ordinary") and the top dividend rate.

(4) The Scottish "intermediate" rate is intermediate, in the sense that it falls somewhere between the lowest and the top Scottish rates, but it is one of 4 rates which do that, any of which could be described as

[1] This is a reworked version of the summary table in s.9A ITA.

[2] The terminology is better in Scotland, which uses the term "top rate" and does not use the term "additional rate".

intermediate.

(5) The 3 rates called "Default Rates" are not "default" in the normal sense of the word: they do not apply by default. They apply to non-resident individuals and non-individuals.

(6) The term "Main Rates" (used to describe the basic/higher/additional rates) is inapt: they are not "main" in the normal sense of the word.

(7) The starting rate for savings is 0%, and so would more naturally be called a nil rate; but that term has already been taken by the savings nil rate.

I adopt the statutory terminology, as anything else would be even more confusing, but for clarity:

- I refer to the 5 "additional" rates as **"additional (top) rates"**
- I write Main Rates/Default Rates with initial capitals

When studying this topic it is important to keep these points of terminology in mind, or the reader may become confused.

For distinctions between nil-rates and allowances, see 44.1.1 (Allowances terminology).

43.3 Devolution issues

43.3.1 *Why devolve IT rates?*

The Institute for Government provide some wider context:[3]

> The choice of which taxes to devolve to Scotland and Wales reflects several constraints. The easiest taxes to devolve are those relating to land or property, given that revenue is very easy to attribute geographically, and these fixed assets cannot easily be moved in search of jurisdictions with lower tax. Of the larger taxes, income tax was judged to be the best option for devolution, partly because of its high visibility to taxpayers, but also because of difficulties that would have arisen from devolving other taxes. The UK-wide system for national insurance would have been particularly complicated to break up due to the link between the National Insurance Fund and benefit payments (which are not devolved in Scotland and Wales). Meanwhile, devolving control of VAT rates would not have been compatible with EU law, and would also have created new costs for businesses operating across the

[3] Institute for Government, "Devolution at 20" (2019) *https://www.instituteforgovernment.org.uk/sites/default/files/publications/Devolution%20at%2020.pdf*

UK's four nations, and corporation tax was ruled out as an option for devolution in Scotland and Wales as it could (?) have resulted in unwelcome tax competition within Great Britain.[4]

43.3.2 *Complexity*

While devolution requires separate Scottish/Welsh rates, why do we have *four* types of basic rate (basic rate and Scottish/Welsh/Default basic rates); and likewise for the higher and additional (top) rates? This is to satisfy constitutional proprieties:

(1) The Scots/Welsh rates allow Scotland/Wales to set different tax rates
(2) The basic/Default Rates satisfied the requirements of EVEL (English votes for English laws)[5]; it allowed the Main Rates (which affect England/Northern Ireland) to be voted on separately from the Default Rates (which do not).

It is complicated; but devolution and simplicity are conflicting values. CIOT anticipated the complexity:

> 3.5 Scottish taxpayers will face a more complex system than taxpayers in the rest of the UK, since
> [1] their savings [and dividend] income will be subject to UK income tax rates and
> [2] their [non-savings non-dividend] income will be subject to Scottish income tax rates... This could make it difficult for many Scottish taxpayers to fully understand their tax calculations and liabilities.[6]

[5] EVEL was introduced in 2015 and abolished in 2021; see
https://en.wikipedia.org/wiki/English_votes_for_English_laws

[6] CIOT response to the paper implausibly entitled "Scotland in the United Kingdom: An enduring settlement" (2015)
https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/361e31bb-1780-4237-ad32-7df71f0f5538/150331%20Scotland%20in%20the%20United%20Kingdom%20-%20An%20enduring%20settlement%20-%20CIOT%2

In the 2018/19 edition of this work I said:

> This comment implies that UK taxpayers outside the Scottish rate system "fully understand" their tax calculations which readers of this chapter may think highly improbable.

But the challenge is not just for taxpayers but also for HMRC. In 2019 HMRC issued a number of tax calculations to Scottish taxpayers which incorrectly apply UK-wide rates instead of specific Scottish rates.[7] Readers might speculate whether HMRC would consider penalties appropriate, if a taxpayer made a similar mistake.

43.3.3 *Public understanding*

CIOT comment plaintively on public understanding of the Welsh rates:

> ... awareness and understanding of the WRIT by the public in Wales remains low despite considerable efforts to engage the public. Low levels of understanding in relation to the tax system are a national not just a devolved taxes issue. ... Realistically it is however challenging to generate interest when rates are aligned so the practical effect for most Welsh taxpayers is limited to the PAYE C code.[8]

Would anyone expect otherwise? It is rational to be clueless about the Welsh rates of income tax. There is no financial penalty for being wrong. The same is often true of the tax system more generally.

43.3.4 *IT competition within UK*

The Scottish Government have considered this:

> On the one hand, behavioural effects between Scottish and rUK taxpayers may be even more significant than standard assumptions because labour mobility between Scotland and the rest of the UK could be larger than between the UK and, say, the rest of Europe. This is because there are no cultural or language barriers and many individuals have much closer ties with the rest of the UK and may therefore relocate easily. In addition, many top rate taxpayers may be able to

0comments.pdf

[8] CIOT, "The fifth Welsh Parliament" Mar 2021 *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/ec887d7a-5f7c-4182-a91d-3e7aa9256f22/210308-fifth-welsh-parliament.pdf*

> choose their residency within the UK, particularly if they are employed or working in UK–wide businesses. It would also be possible for individuals to live in England but continue to work in Scotland or vice versa. In addition, instead of migrating physically, high-income Scottish taxpayers could move their residence by rearranging their domestic affairs – for example by deciding to spend more time at a London flat than in an Edinburgh house, and making the flat their base.
>
> On the other hand, income tax in Scotland will apply to non-savings non-dividend income only. Since this is largely income from employment, there are fewer opportunities for individuals to artificially minimise their tax liabilities compared to income from savings and dividends. Therefore, for those serving the Scottish market or based in Scottish institutions, it may be more difficult to engage in behaviours that reduce their Scottish tax burden. This could reduce the scale of the potential behavioural response.[9]

The practical effect of these considerations was to prevent the Scottish Government from raising the Scottish rate of income tax to 50%.[10] But the higher and top rates increased one further percentage point in 2023 and the top rate increased again in 2024. Perhaps the thinking is that incremental changes will not have the same effect. We will have to wait and see.

For some individuals with homes in Scotland and rUK, it can be finely balanced whether they are Scottish taxpayers or not: a small change in lifestyle may make the difference. In computing the loss to Scotland of a taxpayer moving jurisdiction, or incorporating an unincorporated business, one must bear in mind that the loss to Revenue Scotland is not the (relatively small) difference between the Scots/rUK rates; it is the whole of the income tax payable by that individual (which after migration is credited to rUK, not to Scotland).[11]

Similar considerations apply in Wales.[12]

[9] The Scottish Government, "The impact of an increase in the additional rate of income tax from 45p to 50p in Scotland" (2016)

[10] 2018 saw the Scots higher/additional rates nudge up to 41%/46%, but an increase to 50% was again rejected for the same reason: Scottish Government, "The Role of Income Tax in Scotland's Budget" at p.23 *http://www.gov.scot/Resource/0052/00527052.pdf*

[11] Except so far as Scotland may benefit from an increased grant, under the Barnett formula.

[12] See Welsh Parliament Finance Committee, "Impact of variations in national and sub-national income tax" (2020)

43.3.5 *Devolved rates: DTAs*

HMRC say:

> As the Scottish rate of income tax is not a discrete tax[13] it remains covered by existing UK double taxation agreements.[14]

43.4 Dividend/Savings Income

It is helpful next to consider the definitions of these terms.

43.4.1 *"Dividend Income"*

Dividend Income is defined in s.19 ITA:

> (1) This section applies for the purposes of the Income Tax Acts.
> (2) "Dividend income" is income which is—

There are 5 categories of Dividend Income:[15]

ITTOIA	Type of income	See para
Chap 3 Part 4	Dividend/distribution of UK resident company	30.3
Chap 4 Part 4	Dividends of non-UK resident company	30.8.1
Chap 5 Part 4	Stock dividends of UK resident company	*Not discussed*
Chap 6 Part 4	Release of loan to participator in close co	*Not discussed*
Chap 8 Part 5	Relevant foreign distributions[16]	30.8.4

That applies to distributions of non-resident companies other than dividends (which are Dividend Income as they are within Chapter 4). The drafting is cumbersome, but it works.

"Dividend Income" is not wholly apt to describe these categories of income, but it serves as a short label. "Dividend-type income" would be

https://senedd.wales/laid%20documents/cr-ld13276/cr-ld13276-e.pdf

[13] Author's footnote: This is self-evident, but if authority is needed, see *London County Council v Attorney General* 4 TC 265.

[14] HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (2012).

[15] For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

[16] Defined s.19(3) ITA:
"In subsection (2) "relevant foreign distribution" means a distribution of a non-UK resident company which—
(a) is not chargeable under Chapter 4 of Part 4 of ITTOIA 2005, but
(b) would be chargeable under Chapter 3 of that Part if the company were UK resident."

slightly more accurate but it seems best to adopt the statutory terminology. I write it with initial capitals to reflect the technical nature of the term.

43.4.2 *"Savings Income"*

Savings Income is defined in s.18 ITA:

> (1) This section applies for the purposes of the Income Tax Acts.
> (2) "Savings income" is income—
> (a) which is within subsection (3) or (4), and
> (b) which is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

There are five categories of Savings Income within s.18(3) and (4). Section 18(3) ITA lists interest and interest-like income:

> Income is within this subsection if it is—

There are 4 categories of income within s.18(3):[17]

Provision	**Type of income**	**See para**
ITTOIA		
Chap 2 Part 4	Interest	26.1
Chap 7 Part 4	Purchased life annuity payments[18]	*Not discussed*
Chap 8 Part 4	Deeply discounted securities	29.1
ITA		
Chap 2 Part 12	Accrued income profits	28.1

Section 18(4) ITA is chargeable event income:[19]

> Income is within this subsection if—
> (a) it is chargeable under Chapter 9 of Part 4 of ITTOIA 2005 (gains from contracts for life insurance etc), and
> (b) an individual is, or personal representatives are, liable for income tax on it (under section 465 or 466 of that Act).

"Savings Income" is not apt to describe these categories of income, but it serves as a short label and there is no better term. I write it with initial capitals to reflect the technical nature of the term.

[17] For clarity I have set this out in tabular form and use my own terminology, rather than a precise quote of the statute.

[18] other than income from annuities specified in s.718(2) ITTOIA (annuities purchased from certain life assurance premium payments or under wills).

[19] See 70.1 (Policies: Introduction).

There is again no good short term to describe these categories. "Earned income" is misleading, though it might be used as a shorthand term in some simple contexts.

43.4.3 *Savings/Dividends top of income*

Section 16 ITA(1) provides:

> This section has effect for determining—[20]

The section then identifies six purposes for which s.16 rules apply, numbered, non-numerically of course, (za) to (b):

Para	**Topic**
(za)	which part of a Scottish taxpayer's income consists of savings income
(zb)	the rate at which IT would be charged on the non-savings income of a Welsh taxpayer apart from s.11B ITA
(a)	the extent to which income up to the starting rate limit for savings consists of savings income,
(aa)	the extent to which income above the starting rate limit for savings consists of savings income, and
(ab)	the rate at which IT would be charged on savings income above the starting rate limit for savings apart from sections 11D and 12A,
(b)	the rate at which IT would be charged on dividend income apart from s.13.

Section 16(1) is just a signpost provision; s.16(2) ITA applies the s.16 rules more widely:

> It [s.16] also has effect for all other income tax purposes except for the purposes of—
>
> (a) section 491 (special rates not to apply to first slice of trustees' trust rate income), and
>
> (b) sections 535 to 537 of ITTOIA 2005 (gains from contracts for life insurance etc: top slicing relief).

Section 16 ITA then provides the rules:

> (3) If a person has savings income but no dividend income,[21] the

[20] For clarity I have set this out in slightly abbreviated tabular form, rather than a precise quote of the statute.

[21] Section 16(7) ITA provides: "References in this section to dividend income do not include dividend income which is relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis)."

> savings income is treated as the highest part of the person's total income.
>
> (4) If a person has dividend income but no savings income, the dividend income is treated as the highest part of the person's total income.
>
> (5) If a person has both savings income and dividend income—
>
> (a) the savings income and dividend income are together treated as the highest part of the person's total income, and
>
> (b) the dividend income is treated as the higher part of that part of the person's total income.

In short, Dividend Income comes at the top, then Savings Income, then other income.

Section 16(6) ITA provides:

> See section 1012 for the relationship between—
>
> (a) the rules in this section, and
>
> (b) other rules requiring particular income to be treated as the highest part of a person's total income.[22]

43.5 IT rates: Figures

This paragraph sets out the provisions which specify the *amounts* or *percentages* of the 23 IT rates; the paragraphs which follow identify identifies the types of income to which each of those rates apply.

43.5.1 *Main Rates*

Section 6(1) ITA defines the expression "Main Rates":

> The main rates at which income tax is charged are–
>
> (b) the basic rate,
>
> (c) the higher rate, and
>
> (d) the additional rate.

What are the rates? Section 6(2) ITA provides:

> The basic rate, higher rate and additional rate for a tax year are the rates determined as such by Parliament for the tax year.

So we turn to s.2 F(no.2)A 2024:

> For the tax year 2024-25 the main rates of income tax are as follows—
>
> (a) the basic rate is 20%;
>
> (b) the higher rate is 40%;

[22] See App.2.25 (Highest part of income).

(c) the additional rate is 45%.

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "basic rate" means the rate of income tax determined in pursuance of section 6(2),
> "higher rate" means the rate of income tax determined in pursuance of section 6(2),
> "additional rate" means the rate of income tax determined in pursuance of section 6(2)

In other words, references to basic/higher/additional rates are, unless otherwise indicated, references to the Main Rates.

43.5.2 *Scottish rates*

Section 80C(1) Scotland Act 1998 provides:

> The Scottish Parliament may by resolution (a "Scottish rate resolution") set the Scottish basic rate, and any other rates, for the purposes of section 11A of the Income Tax Act 2007 (which provides for the income of Scottish taxpayers which is charged at those rates).

The resolution was made 22 February 2024, and provides:

> That the Parliament agrees that, for the purposes of section 11A of the Income Tax Act 2007 (which provides for Income Tax to be charged at Scottish rates on certain non-savings and non-dividend income of a Scottish taxpayer to be charged above the personal allowance), the Scottish rates and limits for the tax year 2024-25 are as follows—
> (a) a starter rate of 19 per cent, charged on income up to a limit of £2,306,
> (b) the Scottish basic rate is 20 per cent, charged on income above £2,306 and up to a limit of £13,991,
> (c) an intermediate rate of 21 per cent, charged on income above £13,991 and up to a limit of £31,092,
> (d) a higher rate of 42 per cent, charged on income above £31,092 and up to a limit of £62,430,
> (e) an advanced rate of 45 per cent, charged on income above £62,430 and up to a limit of £125,140, and
> (f) a top rate of 48 per cent, charged on income above £125,140.

Scottish tax rates are distinct not just in amount but also by distinct

Scottish bands. The new 45% ‘advanced’ rate of tax for incomes below the top rate is an innovation of 2024/25.

43.5.3 *Scots rates: Analysis*

The starter rate is symbolic. In round terms, a 1% discount on the first £2k of income saves the taxpayer some £20.

Different rates raise the issue of tax equalisation for those posted to Scotland (and in due course, Wales).[23] Until 2018, tax equalisation was only an issue for those posted abroad.[24]

See too 1.3.1 (Tax competition within UK).

43.5.4 *Welsh rates*

Section 116D(1) Government of Wales Act 2006 provides:

> The Assembly may by resolution (a “Welsh rate resolution”) set one or more of the following—
> (a) a Welsh rate for the purpose of calculating the Welsh basic rate;
> (b) a Welsh rate for the purpose of calculating the Welsh higher rate;
> (c) a Welsh rate for the purpose of calculating the Welsh additional rate.

Section 6B(1) ITA provides:

> The Welsh basic rate, the Welsh higher rate and the Welsh additional rate for a tax year are calculated as follows.
> *Step 1* Take the basic rate, higher rate or additional rate.
> *Step 2* Deduct 10 percentage points.
> *Step 3* Add the Welsh rate (if any) set by the National Assembly for Wales for that year for the purpose of calculating the Welsh basic rate,

[23] The issue arose in the context of the armed forces: “The UK government is looking at ways to “counter tax rises” for armed forces personnel based in Scotland.... Gavin Williamson (then defence secretary) confirmed an “urgent review” is under way to look at how to counter “the unjustified raid on pay packets”: (2018) *http://www.bbc.co.uk/news/uk-scotland-43363923*
But the wording was tendentious and the story was political, not fiscal. Just as “the art of taxation consists in so plucking the goose as to procure the largest quantity of feathers with the least possible amount of hissing”, the art of opposition is to maximise the hiss.

[24] See 34.43 (Tax equalisation).

> the Welsh higher rate or the Welsh additional rate (as the case may be).

The relevant resolution provides:

> a) the proposed Welsh rate for the basic rate of income tax is 10p;
> b) the proposed Welsh rate for the higher rate of income tax is 10p; and
> c) the proposed Welsh rate for the additional rate of income tax is 10p.[25]

So the Welsh basic higher/additional rates are the same as for England/ Northern Ireland.

The Welsh rules are based on the Scottish Variable Rate, which was introduced by the Scotland Act 1998 but later replaced by the current Scottish rules.

43.5.5 *Default Rates*

Section 6C ITA provides:

> The default basic rate, default higher rate and default additional rate for a tax year are the rates determined as such by Parliament for the tax year.

So we turn to s.3(1) F(no.2)A 2024:

> For the tax year 2024-25 the default rates of income tax are as follows—
> (a) the default basic rate is 20%;
> (b) the default higher rate is 40%;
> (c) the default additional rate is 45%.

Note that s.989 ITA provides:

> "basic rate" means the rate of income tax determined in pursuance of section 6(2)[26]

That is, a reference to the basic rate is not a reference to the (so called) default basic rate.

43.5.6 *Savings Income rates*

Section 7 ITA provides:

[25] The same rate has been proposed for 2024-2025.
https://www.gov.wales/written-statement-welsh-devolved-taxes-and-welsh-rates-income-tax-draft-budget-2024-25
The rate might more clearly be expressed as 10%, not 10p, but it does not matter.

[26] See 43.5.1 (Main Rates).

> (1) The starting rate for savings is 0%.
> (2) The savings nil rate is 0%.

Section 7A ITA provides:

> The savings basic rate, savings higher rate and savings additional rate for a tax year are the rates determined as such by Parliament for the tax year.

So we turn to s.3(2) F(no.2)A 2024:

> For the tax year 2024-25 the savings rates of income tax are as follows—
> (a) the savings basic rate is 20%;
> (b) the savings higher rate is 40%;
> (c) the savings additional rate is 45%.

I refer to these together as **"savings rates"**.

43.5.7 *Dividend rates*

Section 8 ITA provides:

> (A1) The dividend nil rate is 0%.
> (1) The dividend ordinary rate is 8.75%,
> (2) The dividend upper rate is 33.75%.
> (3) The dividend additional rate is 39.35%.

I refer to these together as **"dividend rates"**.

43.6 IT rates: Application

Armed with the relevant terminology, I turn to identify the types of income to which each IT rate applies.

43.6.1 *Application of Main Rates*

Section 10 ITA imposes the charge at the Main Rates (basic/higher/additional rates):

> (2) Income tax on an individual's income up to the basic rate limit is charged at the basic rate.
> (3) Income tax is charged at the higher rate on an individual's income above the basic rate limit and up to the higher rate limit.
> (3A) Income tax is charged at the additional rate on an individual's income above the higher rate limit.

So the Main Rates apply to an individual's income, ie they apply generally unless disapplied by other provisions. They are, in a sense, default rates (though the term Default Rates is used elsewhere, and there are so many exceptions that the Main Rates are frequently disapplied.

Section 10(4) ITA signposts exceptions. In short:

Section	**Topic**
s.11A	Scottish rates
s.11B	Welsh rates
s.11C	Default Rates: non-UK residents
s.11D	Savings basic/higher/additional rates
s.12	Starting rate for savings
s.12A	Savings nil rate
s.13	Dividend rates

43.6.2 *"Basic/higher rate limits"*

Section 10(5) ITA provides the figure for the basic rate limit:

> The basic rate limit is £37,700.

This figure is frozen until 2028.[27]

Section 10(5A) ITA provides a formula for the higher rate limit:

> The higher rate limit for a tax year is equal to—
> (a) twice the amount specified in subsection (1) of section 35 (personal allowance) for the tax year, plus
> (b) the amount specified in subsection (2) of that section (amount at which personal allowance starts to be withdrawn).

Section 6(4) F(nol.1)A 2023 provides the figure:

> For each of the tax years 2023-24, 2024-25, 2025-26, 2026-27 and 2027-28, the amount of the higher rate limit is £125,140.

For the effect of freezing these limits, see 43.19 (Inflation/fiscal drag).

43.6.3 *Application of Scottish rates*

Section 11A ITA provides:

> (1A) Income tax is charged at Scottish rates on the non-savings income of a Scottish taxpayer.[28]

[27] Section 5(1) FA 2021, as amended.

[28] See 6.43 (Scottish/Welsh taxpayers).

> (4) For the purposes of this section, “non-savings income” means income which is not savings income.

So the Scottish rates apply to Scottish taxpayers non-Savings income unless disapplied by other provisions. Section 11A(5) ITA signposts exceptions; the main one is s.13 (dividend rates).[29] So Scottish rates apply to non-Savings/Dividend Income of a Scottish taxpayer.

43.6.4 *Application of Welsh rates*

Section 11B ITA provides:

> (1) Income tax is charged at the Welsh basic rate on the income of a Welsh taxpayer[30] which—
> (a) is non-savings income, and
> (b) would otherwise be charged at the basic rate.
> (2) Income tax is charged at the Welsh higher rate on the income of a Welsh taxpayer which—
> (a) is non-savings income, and
> (b) would otherwise be charged at the higher rate.
> (3) Income tax is charged at the Welsh additional rate on the income of a Welsh taxpayer which—
> (a) is non-savings income, and
> (b) would otherwise be charged at the additional rate.
> (4) For the purposes of this section, “non-savings income” means income which is not savings income.

Section 11B(5) ITA signposts exceptions; the main one is s.13 (dividend rates).[31] So Welsh rates apply to non-Savings/Dividend Income of a Welsh taxpayer.

43.6.5 *Application of Default Rates*

Section 11(1) ITA provides:

> Income tax is charged at the default basic rate on the income of persons other than individuals.

So the Default Basic Rate applies to:

[29] The remittance basis charge is another exception, see 17.12.16 (Scottish/Welsh taxpayer).

[30] See 6.43 (Scottish/Welsh taxpayers).

[31] The remittance basis charge is another exception, see 17.12.16 (Scottish/Welsh taxpayer).

(1) trustees where the trust rates does not apply
(2) non-resident companies where subject to IT
(3) PRs

The Default Basic Rate applies unless disapplied by other provisions. Section 11(2) ITA signposts exceptions, in short:
(1) s.14 ITA (dividend ordinary rate)
(2) Chapters 3 to 6 Part 9 ITA (trusts[32])

Section 11C ITA provides:

> (1) Income tax on a non-UK resident individual's income up to the basic rate limit is charged at the default basic rate.
> (2) Income tax is charged at the default higher rate on a non-UK resident individual's income above the basic rate limit and up to the higher rate limit.
> (3) Income tax is charged at the default additional rate on a non-UK resident individual's income above the higher rate limit.

The Default Rates apply to non-UK resident individual's income unless disapplied by other provisions. Section 11C(4) ITA signposts exceptions, in short:

Section	**Topic**
s.11D	savings basic/higher/additional rates
s.12	starting rate for savings
s.12A	savings nil rate
s.13	dividend rates

43.7 Application of savings rates

Section 11D ITA provides:

> (1) Income tax is charged at the savings basic rate on an individual's income which–
> (a) is saving income,[33] and
> (b) would otherwise be charged at the basic rate or the default basic rate.

Since the savings basic rate, the basic rate and the Default Basic Rate are all 20%, this does not have any effect.

[32] For rates of tax on trustees, see 41.2 (Tier 1: Income receipt: trust charge).
[33] This is a slip for Savings Income.

> (2) Income tax is charged at the savings higher rate on an individual's income which–
>
> (a) is savings income, and
>
> (b) would otherwise be charged at the higher rate or the default higher rate.

Since these rates are all 40%, this does not have any effect.

> (3) Income tax is charged at the savings additional rate on an individual's income which–
>
> (a) is savings income, and
>
> (b) would otherwise be charged at the additional rate or the default additional rate.

Since these rates are all 45%, this does not have any effect.

These savings rates apply to Savings Income unless disapplied by other provisions. Section 11D(4) ITA provides:

> Subsections (1) to (3)–
>
> (a) have effect after sections 12 and 12A [starting rate for savings/savings nil rate] have been applied (so that any reference in subsections (1) to (3) to income which would otherwise be charged at a particular rate does not include income charged at the starting rate for savings or at the savings nil rate), and
>
> (b) are subject to any other provisions of the Income Tax Acts (apart from sections 10 and 11C [Main Rates, Default Rates]) which provide for income to be charged at different rates of income tax in some circumstances.

Section 11D(6) ITA provides:

> In relation to an individual who is a Scottish taxpayer or Welsh taxpayer, references in this section to income which would otherwise be charged at a particular rate are to be read as references to income that would, if the individual were neither a Scottish taxpayer nor a Welsh taxpayer (but were UK resident), be charged at that rate (and subsection (5) is to be read accordingly).

43.8 Starting rate for savings

Section 12(1) ITA provides:

> Income tax is charged at the starting rate for savings on so much of an individual's income up to the starting rate limit for savings as–

> (a) is savings income, and
> (b) would otherwise be charged at the basic rate or the default basic rate.

As the starting rate for savings is 0%, this is in effect an allowance or exemption.

Section 12(3) ITA provides:

> The starting rate limit for savings is £5,000.

As to how one identifies an individual's "income up to the starting rate limit", see 43.4.3 (Savings/Dividends top of income).

In short, the starting rate for savings is not available to a taxpayer who has non-Savings Income in excess of the starting rate limit for savings. So in practice the benefit of the starting rate for savings is limited to:

(1) UK resident individuals with very low income
(2) Non-resident individuals with very low UK source income

The starting rate for savings applies to Savings Income unless disapplied by other provisions. Section 12(2) ITA provides:

> This is subject to any provisions of the Income Tax Acts (apart from section 10) which provide for income of an individual to be charged at different rates of income tax in some circumstances.

43.9 Savings nil rate

43.9.1 "*Step 3 income*"

The legislation uses the term "Step 3 income", defined s.12A(7) ITA:

> For the purposes of this section, an individual's "Step 3 income" is the individual's net income less allowances deducted at Step 3 of the calculation in section 23.

The allowances deducted are the personal allowance and the blind person's allowance.

43.9.2 *The nil rate*

Section 12A(1) ITA provides:

> (1) This section applies in relation to an individual if—
> (a) the amount of the individual's Step 3 income is greater than £L, where £L is the amount of the starting rate limit for savings, and

"L" stands for the starting rate **L**imit [£5k].

> (b) when the individual's Step 3 income is split into two parts—
> (i) one ("the individual's income up to the starting rate for savings") consisting of the lowest £L of the individual's Step 3 income, and
> (ii) the other ("the individual's income above the starting rate limit for savings") consisting of the rest of the individual's Step 3 income,
>
> some or all of the individual's income above the starting rate limit for savings consists of savings income (whether or not some or all of the individual's income up to the starting rate limit for savings consists of savings income).

Section 12A(2) ITA defines two more letters. In short:

"A" is the individual's savings **a**llowance
X (for "**ex**cess") is Savings Income above A (the individual's savings allowance). In full detail s.12A(2) ITA provides:

> In this section—
> £A is the amount of the individual's savings allowance (see section 12B),
> "the excess" is so much of the individual's income above the starting rate limit for savings as consists of savings income, and
> £X is the amount of the excess.

Armed with the meaning of these letters, we can turn to the relief. Section 12A ITA provides:

> (3) If £X is less than or equal to £A, income tax is charged at the savings nil rate (rather than the basic, higher or additional rate) or the default basic, default higher or default additional rate on the excess.
> (4) If £X is more than £A, income tax is charged at the savings nil rate (rather than the basic, higher or additional rate) or the default basic, default higher or default additional rate on the lowest £A of the excess.

The reader may think that this could have been more clearly expressed. The savings nil rate applies unless disapplied by other provisions. Section 12A(5) ITA provides:

> Subsections (3) and (4) are subject to any provisions of the Income Tax Acts (apart from sections 10 and 11C) which provide for income to be charged at different rates of income tax in some circumstances.

43.9.3 *Amount of savings allowance*

Section 12B ITA provides:

> (1) Subsections (2) to (4) determine the amount of an individual's savings allowance for a tax year.
> (2) If any of the individual's income for the year is additional-rate income, the individual's savings allowance for the year is nil.
> (3) If—
> (a) any of the individual's income for the year is higher-rate income, and
> (b) none of the individual's income for the year is additional-rate income,
> the individual's savings allowance for the year is £500.
> (4) If none of the individual's income for the year is higher-rate income, the individual's savings allowance for the year is £1,000.

These are cliff-edge rules, so an additional £1 income may cost £100 in tax. But anything else would have been even more complicated.

Section 12B(8)(a)(b) ITA define additional-rate/higher rate income. The definitions follow the same template so it is helpful to consider them side by side:

(8) For the purposes of this section—

(a) each of the following is "additional-rate income"—	(b) each of the following is "higher-rate income"—
(i) income on which income tax is charged at the additional rate, default additional rate or dividend additional rate,	(i) income on which income tax is charged at the higher rate, default higher rate or dividend upper rate,
(ii) income on which income tax would be charged at the additional rate, or default additional rate, but for section 12A (income charged at savings nil rate),	(ii) income on which income tax would be charged at the higher rate, or default higher rate, but for section 12A (income charged at savings nil rate),
(iii) income on which income tax would be charged at the dividend additional rate but for section 13A (income charged at dividend nil rate), and	(iii) income on which income tax would be charged at the dividend upper rate but for section 13A (income charged at dividend nil rate), and
(iv) income of an individual who is a Scottish taxpayer or Welsh taxpayer	(iv) income of an individual who is a Scottish taxpayer or Welsh taxpayer

which would, if the individual were not a Scottish taxpayer or Welsh taxpayer (as the case may be), be income on which income tax is charged at the additional rate or default additional rate	which would, if the individual were not a Scottish taxpayer or Welsh taxpayer (as the case may be), be income on which income tax is charged at the higher rate or default higher rate.

43.9.4 *Interest under remittance basis*

If the remittance basis applies, foreign interest income[34] (if remitted) is taxed at

(1) the Main Rates, ie, at 20%, 40%, 45%, or
(2) for Scottish/Welsh taxpayers, the Scottish/Welsh rates

This is achieved by the clumsy but effective technique of providing that such income is not Savings Income. But in practice the amount at stake will be trivial, or most likely, nil.

43.10 Application of dividend rates

43.10.1 *Dividend rates for individuals*

Section 13(1)-(2A) ITA adopt the same template so it is helpful to consider them side by side:

Dividend ordinary rate	**Dividend upper rate**	**Dividend additional rate**
(1) Income tax is charged at the dividend ordinary rate on an individual's income which—	(2) Income tax is charged at the dividend upper rate on an individual's income which—	(2A) Income tax is charged at the dividend additional rate on an individual's income which—
(a) is dividend income,	[identical]	[identical]
(b) would otherwise be charged at the basic rate or the Welsh basic rate and	(b) would otherwise be charged at the higher rate or the Welsh higher rate, and	(b) would otherwise be charged at the additional rate or the Welsh additional rate, and
(c) is not relevant foreign income	(c) is not relevant foreign income	[identical to 2]

[34] Including the interest-like income of the other categories specified in s.18(4) ITA.

charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).	charged in accordance with section 832 of ITTOIA 2005.

These rates apply unless disapplied by other provisions. Section 13(3) ITA provides:

> Subsections (1) to (2A) are subject to any provisions of the Income Tax Acts (apart from section 10 or 11A or 11B) which provide for income to be charged at different rates of income tax in some circumstances.

Section 13(4) ITA provides:

> Section 16 has effect for determining the extent to which an individual's dividend income would otherwise be charged at the basic, higher or additional rate or the Welsh basic, higher or additional rate.

See 40.4.3 (Savings/Dividends top of income).

Section 13(5) ITA provides:

> In relation to an individual who is a Scottish taxpayer, references in this section to income that would otherwise be charged at a particular rate are to be read as references to income that would, if the individual were not a Scottish taxpayer, be charged at that rate (and subsection (4) is to be read accordingly).

The scheme of s.13 is to replace the basic/higher/additional rates with different rates. Thus the rates of tax on UK Dividend Income are the dividend ordinary/upper/additional rates: 8.75%, 33.75%, 39.35%. I refer to that as **"dividend rates"**.

Foreign Dividend Income is taxed at the dividend rates when the arising basis applies.

43.10.2 *Dividend nil rate*

SA110 Notes (Tax calculation summary notes) 2022/23 provides:

> Where an individual receives dividend income that would otherwise be chargeable at the dividend ordinary, upper or additional rate, and the income is less than or equal to £2,000,[35] the dividend nil rate will apply

[35] For 2023/24 the £2,000 figures is reduced to £1,000.

> to all of the dividend income. Where the dividend income is above £2,000, the lowest part of the dividend income will be chargeable at 0%, and anything received above £2,000 is taxed at the rate that would apply to that amount if the dividend nil rate did not exist.

The rules are in s.13A ITA, which refers to:
D: Dividends charged at **D**ividend ordinary rate[36]
U: Dividends charged at dividend **U**pper rate
M: M = D - £1,000[37]
A: Dividends charged at dividend **A**dditional rate
X: X = (D + U) - £1,000

Section 13A ITA provides:

> (1) Subsection (2) applies if, ignoring this section, at least some of an individual's income would be charged to income tax at the dividend ordinary rate, the dividend upper rate or the dividend additional rate.
> (2) Income tax is charged at the dividend nil rate (rather than the dividend ordinary rate, dividend upper rate or dividend additional rate) on one or more amounts of the individual's income as follows—
> *Step 1*
> Identify the amount ("D") of the individual's income which would, ignoring this section, be charged at the dividend ordinary rate.
> *Rule 1A:* If D is more than £1,000, the first £1,000 of D is charged at the dividend nil rate (rather than the dividend ordinary rate), and is the only amount charged at the dividend nil rate.
> *Rule 1B:* If D is equal to £1,000, D is charged at the dividend nil rate (rather than the dividend ordinary rate), and is the only amount charged at the dividend nil rate.
> *Rule 1C:* If D is less than £1,000 but more than nil, D is charged at the dividend nil rate (rather than the dividend ordinary rate).
> *Step 2*
> If D is less than £1,000, identify the amount ("U") of the individual's income which would, ignoring this section, be charged at the dividend upper rate.
> *Rule 2A:* If the total of D and U is more than £1,000—
>
> (a) the first £M of U is charged at the dividend nil rate (rather than the dividend upper rate), where £M is the difference between £1,000 and D, and

[36] **"O"** would have been a better choice of letter.
[37] What is **"M"** meant to stand for? Perhaps Middle; or Muddle.

(b) the amounts charged under this Rule and Rule 1C are the only amounts charged at the dividend nil rate.

Rule 2B: If the total of D and U is equal to £1,000, U is charged at the dividend nil rate (rather than the dividend upper rate), and the amounts charged under this Rule and Rule 1C are the only amounts charged at the dividend nil rate.

Rule 2C: If the total of D and U is less than £1,000 but more than nil, U is charged at the dividend nil rate (rather than the dividend upper rate).

Step 3

If the total of D and U is less than £1,000, identify the amount ("A") of the individual's income which would, ignoring this section, be charged at the dividend additional rate.

Rule 3A: If the total of D, U and A is more than £1,000, the first £X of A is charged at the dividend nil rate (rather than the dividend additional rate), where £X is the difference between—

£1,000, and

the total of D and U,

and the amounts charged under this Rule, and Rules 1C and 2C, are the amounts charged at the dividend nil rate.

Rule 3B: If the total of D, U and A is less than or equal to £1,000, A is charged at the dividend nil rate (rather than the dividend additional rate), and the amounts charged under this Rule, and Rules 1C and 2C, are the amounts charged at the dividend nil rate.

Why is the drafting so convoluted? It appears to be a clumsy application of step-based drafting.[38]

The dividend nil rate is sometimes called the dividend allowance, but it is better to use the statutory term.[39]

The figure of £1k is reduced to £500 from 2024/25, at which point the dividend nil rate becomes trivial.

See too 30.16 (Dividend nil rate/DTA interaction).

43.10.3 *Dividends: Remittance basis*

Foreign Dividend Income taxed on the remittance basis does not fall within:

(1) s.13 (dividend rates): it does not meet the condition in s.13(1)(c) or s.13(2)(c) or s.13(2A)(c). The Main Rates apply (which are higher).

[38] See 61.15.7 (Method statements: Critique).

[39] See 44.1.1 (Allowances terminology).

(2) s.13A (dividend nil rate): it does not meet the condition in s.13A(1).

The amounts involved may be substantial. The result is that for a remittance basis taxpayer who remits, foreign Dividend Income is taxed more heavily than UK Dividend Income.

The discrimination was contrary to EU law. But the issue may not arise post-Brexit.

43.10.4 *Dividends: Non-individual*

Section 14(1) ITA provides:

> Income tax is charged at the dividend ordinary rate on the income of persons other than individuals which—
> (a) is dividend income,
> (b) would otherwise be charged at the basic rate, and
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).[40]

This applies to:
(1) trustees where the trust rates do not apply
(2) non-resident companies
(3) PRs

See too 30.7 (Non-resident recipient).

43.11 Settlor-interested trust IT rate

Section 619 ITTOIA provides (so far as relevant):

> (1) Income tax is charged on—
> (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest),
> (b) income which is treated as income of a settlor as a result of section 629 (income paid to relevant children of settlor)...
> (2) For the purposes of Chapter 2 of Part 2 of ITA 2007 (rates at which income tax is charged), where income of another person is treated as income of the settlor and is charged to tax under subsection (1)(a) or (b) above, it shall be charged in accordance with whichever provisions of the Income Tax Acts would have been applied in charging it if it had

[40] Section 14(1)(c) is otiose from 2008, since the remittance basis can only apply to individuals; but it does no harm.

arisen directly to the settlor.

What about foreign Dividend Income which qualifies for the s.624 remittance basis, but is later remitted and becomes taxable under the s.624 remittance basis?[41] This is taxable at the dividend rates.

43.12 s.720: transferor IT rate

The starting point is that s.720 income is taxed at:
(1) the Main Rates or
(2) for a Scots/Welsh taxpayer, the Scots/Welsh rates

Section 745(4) ITA applies the dividend rates where the income of the person abroad is Dividend Income. The wording is convoluted. First, s.745(1)(1A)(1B)(2) provide the transferor's credit.[42] With this in mind we can continue to s.745(3)(4):

> (3) Subsection (4) applies to income treated as arising to an individual under section 721 or 728 so far as none of subsections (1), (1A) and (1B) applies to it.
> (4) The charge to income tax under section 720 or 727 operates by treating the income as if it were income within section 19(2) (meaning of "dividend income") if the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad[43]] would be dividend income were it the income of the individual.

Dividend Income is taxed at the rates applicable to dividends: the dividend ordinary/dividend upper rates. What about foreign dividends of the person abroad, taxed under the s.720 remittance basis? That is still Dividend Income, so is still taxed at the dividend rates.

Section 745 ITA provides a special rule for Dividend Income. It says nothing about Savings Income. Accordingly, interest and other Savings Income within s.720 is taxed at the main (or Scottish/Welsh) rates.

43.13 CGT rates: Introduction

43.13.1 *Summary*

Rates of CGT vary according to:
(1) The type of gain:

[41] See 47.8 (s.624 remittance basis).
[42] See 51.2.1 (Transferor's credit).
[43] See 49.14 (Condition A: Power to enjoy).

(a) Ordinary gain
(b) Residential property/carried interest gain

(2) The type of person receiving the gain:
(a) Individuals
(b) Non-individuals:
(i) Trusts
(ii) Others

(3) The amount of income/gains of the individual

There are five rates of CGT:

Rate	**Basic rate taxpayer**	**Higher rate taxpayer/trust/PRs**
10%	Ordinary gain	
18%	Residential/carried interest gain	
20%		Ordinary gain
24%		Residential gain
28%		Carried interest gain

There are three types of gain:

Type of gain	**Definition**	**See para**
Residential property gain	sch 1B TCGA	57.37
Carried interest gain	s.1H TCGA	73.19
Other gain ("Ordinary gain")	-	-

The 24% rate was introduced in 2024. Another complication. According to Spring Budget 2024:

> This will encourage landlords and second home-owners to sell their properties, making more available for a variety of buyers including those looking to get on the housing ladder for the first time, while also raising revenue over the forecast period.

I doubt if anyone was intended to take that seriously.

The predicted yield from this change also seems strange:

2023-24	2024-25	2025-26	2026-27	2027-28	2028-29
-70m	+310m	+350m	+45m	+50m	+5m

But there it is.

43.14 CGT rates: Individuals

Section 1H(1) TCGA provides:

> This section makes provision about the rates at which capital gains tax

> is charged but has effect subject to—
>
> (a) section 169N (business asset disposal relief: rate of 10%), and
>
> (b) section 169VC (investors' relief: rate of 10%).

43.15 *Residential gain*

Section 1H(1A) TCGA provides:

> (1A) Residential property gains (see Schedule 1B) accruing in a tax year to an individual are charged to capital gains tax at a rate of 18% or 24%.
>
> (4A) Residential property gains accruing in a tax year to the personal representatives of a deceased individual are charged to capital gains tax at a rate [of][44] 24%.

43.15.1 *Carried interest gain*

Section 1H(2) TCGA provides:

> Chargeable gains accruing in a tax year to an individual that are—[45]
>
> (b) carried interest gains (see subsections (9) to (11)),
>
> are charged to capital gains tax at a rate of 18% or 28%.

43.15.2 *Individual: Ordinary gain*

I refer to gains which are not residential/carried interest gains as **"ordinary gains"**.

Section 1H TCGA provides:

> (3) Other chargeable gains accruing in a tax year to an individual are charged to capital gains tax at a rate of 10% or 20%.
>
> (4) The question as to which of the rates applies to the gains concerned is determined by section 1I (income taxed at higher rates or gains exceeding unused basic rate band).

43.15.3 *Basic/higher CGT rates*

This takes us to s.1I TCGA which provides:

> (1) If any of an individual's income for a tax year is chargeable to income tax at a higher income tax rate,[46] gains accruing to the

[44] This word is accidentally missing from the F(no2) Bill.

[45] There is no para (a).

[46] Section 1J(1) TCGA provides:
(1) For the purposes of section 1I—

individual in the tax year are charged—

(za) at the rate of 24% (if they are residential property gains),

(a) at the rate of 28% (if they are carried interest gains), or

(b) at the rate of 20% (if they are other kinds of gains).

(2) If—

(a) none of an individual's income for a tax year is chargeable to income tax at a higher income tax rate, but

(b) the individual is chargeable to capital gains tax for the tax year on an amount that exceeds the unused part of the individual's basic rate band,

the excess ("the higher rate excess") is charged at the rate of 24% (so far as comprising residential property gains), at the rate of 28% (so far as comprising carried interest gains) or at the rate of 20% (so far as comprising other kinds of gains).

(3) The remainder of this section sets out special rules which apply depending on the nature of the gains within subsection (2)(b).

[Subsections (4) to (6) concern business asset disposal relief not discussed here]

(7) The individual may allocate so much of the unused part of the individual's basic rate band as then remains to—

(a) any residential property gains or carried interest gains, or

(b) any other gains.

(8) The effect of the allocation is that the gains to which the allocation is made are charged—

(a) at the rate of 18% (if they are residential property gains or carried interest gains), or

(b) at the rate of 10% (if they are other kinds of gains).

(9) Any gains to which no allocation is made are charged—

(za) at the rate of 24% (if they are residential property gains),

(a) at the rate of 28% (if they are carried interest gains), or

(b) at the rate of 20% (if they are other kinds of gains).

43.15.4 *Scots/Welsh CGT payers*

Section 1J(6) TCGA provides:

In the application of section 1I in the case of any individual it is to be assumed that the individual is not a Scottish or Welsh taxpayer.

a "higher income tax rate" means—

(a) the higher rate or the default higher rate,

(b) the savings higher rate, or

(c) the dividend upper rate

CGT rates tax depend on the UK rates and thresholds. So, a Scottish taxpayer with earned income and chargeable gains has to consider UK and Scottish rates and thresholds. CIOT comment:

> ... this is something that could make it difficult for many taxpayers to fully understand their tax calculations and liabilities.[47]

But there it is.

43.16 CGT rates: PRs

Section 1H TCGA provides:

> (5) Chargeable gains accruing in a tax year to the personal representatives of a deceased individual that are—[48]
> (b) carried interest gains,
> are charged to capital gains tax at a rate of 28%.
> (6) Other chargeable gains accruing in a tax year to the personal representatives of a deceased individual are charged to capital gains tax at a rate of 20%.

43.17 CGT rates: Trusts

Section 1H TCGA provides:

> (7) Residential property gains accruing in a tax year to the trustees of a settlement are charged to capital gains tax at a rate of 24%.
> (8) Other chargeable gains accruing in a tax year to the trustees of a settlement are charged to capital gains tax at a rate of 20%.

UK trusts are treated in the same way as higher rate taxpayers.

43.18 CGT rates: Critique

FA 2016 made a significant reduction in CGT rates. HMRC say:

> The government wants to create a strong enterprise and investment culture. Cutting the rates of CGT for most assets is intended to support companies to access the capital they need to expand and create jobs.

[47] CIOT response to the paper implausabily entitled "Scotland in the United Kingdom: An enduring settlement" (2015) *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/361e31bb-1780-4237-ad32-7df71f0f5538/150331%20Scotland%20in%20the%20United%20Kingdom%20-%20An%20enduring%20settlement%20-%20CIOT%20comments.pdf*

[48] There is no para (a).

> Retaining the 28% and 18% rates for residential property is intended to provide an incentive for individuals to invest in companies over [residential] property.[49]

This is not serious policy analysis: it is advocacy. That is not to say that it might not be right, as far as the reduction concerns gains from shares.

Complexity, and, for upper rate assets, the CGT lock-in effect, are serious issues, but not addressed.

43.19 Inflation/fiscal drag

I consider tax rates in this chapter and allowances in the next. But for policy discussion one needs to consider them together. IFS comment:

> The personal allowance has risen by almost 60% in real terms over the past decade, reducing income tax revenue by an eye-watering £25 billion per year and meaning that 40% of adults do not pay any income tax at all. The planned freeze, representing a 7% real-terms cut, undoes only a small share of that rise, and brings another 1.3 million people into the income tax system.
>
> By contrast, the higher-rate threshold is already 9% below its 2009 peak in real terms, and the freeze will bring it 16% below. It has not kept up with earnings growth over recent decades, meaning that steadily more and more people have become subject to it. While fewer than 4% of adults paid higher-rate tax in 1990, by the time the freeze is over that figure will likely be more than 10%.[50]

The rising number of people subject to the higher rate was a point that Boris Johnson raised in his campaign for Conservative Party leadership, with a uncosted headline proposal to raise the threshold to £80k. But nothing came of that, and perhaps it was not meant to be taken seriously.

The former £150k higher rate limit had not been increased since introduced in 2009.

IFS say:

> Unlike many other countries, the UK routinely – and sensibly – uprates the cash values of most tax thresholds and benefit rates each year in line with inflation, in order to maintain their real value.

[49] HMRC, "Overview of Tax Legislation and Rates" (2016) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/513073/OOTLAR_complete_for_publication.pdf*
The passage also appears in EN FB 2016.

[50] *https://ifs.org.uk/collections/spring-budget-2021-0*

In a number of cases, however, this routine uprating has now been cancelled for extended periods:

- The inheritance tax threshold has been fixed at £325,000 since 2009–10.
- The VAT registration threshold has been frozen at £85,000 since April 2017, and the last Budget announced that it would remain frozen until April 2022.

Some of these policies raise revenue; others give money away[51]. But in neither case is it sensible policymaking.

When George Osborne announced a four-year freeze to benefit rates in his 2015 post-election Budget, he presumably did not intend that this would lead to an average loss among benefit recipients of zero in year 1 and £70 in year 2 before jumping to £270 in year 3 and £420 in year 4 as inflation rose. The government might believe that benefits should be more or less generous, but the extent of any change in generosity should be thought through and justified, not the arbitrary and accidental result of what the rate of inflation turns out to be.

Yet at least these cases are ostensibly temporary...

Perhaps more insidious is the gradual retreat from the assumption that inflation adjustments are the norm. When governments introduce new thresholds into the tax system, they are increasingly tending to build in the assumption that these thresholds will not routinely keep pace with inflation.

There have always been some thresholds that have not kept pace with inflation. Thresholds for SDLT, for example, are not increased routinely in line with inflation (let alone property price growth); instead, the rather unsatisfactory approach seems to be that the thresholds are kept frozen in cash terms until the number of purchases being dragged into tax reaches levels deemed unacceptable, and the threshold is then suddenly doubled (as happened in both 1993 and 2005, in both cases after more than a decade of being essentially frozen).

But over the past decade or so, this has moved from being a rare exception to being commonplace. New features of the tax landscape – from the apprenticeship levy allowance to the employment allowance in National Insurance, from the lifetime allowance for entrepreneur's relief to the personal savings allowance and the dividend allowance [dividend nil rate]– are frozen by default. In all of these cases, this builds in an assumption of rising taxes over time – tax rises which are both opaque (some would say stealthy) and depend arbitrarily on the rate of inflation...

[51] Author’s footnote: but that is quite rare.

> As for the withdrawal of the personal allowance, the number of people affected is growing much more rapidly as the bottom of the 60% band is frozen while the width of the band rises twice as quickly as the personal allowance, which the government has not merely been uprating with inflation but increasing rapidly in real terms.[52]

The list of non-indexed amounts mentioned above is just a start. The £2k and £10k remittance basis claim limits have not been increased since introduced in 2008. CGT allowable expenditure (base cost) is not indexed, so CGT is a tax on inflationary gains as well as economic gains.

The IFS are right, and the point is worth making. But taxation by stealth is a difficult temptation to refuse, and it would need a strong norm in favour of indexation to overcome that. Rates and allowances are at the heart of the interface of taxation and politics: they are salient and (relatively) easy to state.

As far as tax is concerned, inflation is the chancellor's friend.

43.20 Rates of CT

Section 3(1) CTA 2010 provides:

> Corporation tax is charged at the rate set by Parliament for the financial year[53] as the main rate.

That takes us to s.12 F(no2)A 2024 which provides:

> (1) Corporation tax is charged for the financial year 2025.
> (2) The main rate of corporation tax for that year is 25%.

The main rate applies to profits over £250k. Companies with profits of up to £50k may qualify for the small profits rate of 19%.

43.20.1 *Small profits rate*

The legislation is in Part 3A CTA 2010, slotted in after s.18, so the sections are numbered s.18A - s.18N. I consider this in outline only.

Section 18A CTA 2010 provides:

> (1) Corporation tax is charged at the standard small profits rate on a company's taxable total profits of an accounting period which are not

[52] Extracts from: IFS, "Dragging people into higher rates of tax" IFS Briefing Note BN247 (2019) *https://ifs.org.uk/sites/default/files/output_url_files/BN247.pdf*
I have omitted references to benefits and other matters outside the focus of this book.

[53] See 14.3.2 (Tax year/Financial year).

> ring fence profits if—
> (a) the company is UK resident in the accounting period,
> (b) it is not a close investment-holding company in the period, and
> (c) its augmented profits of the accounting period do not exceed the lower limit.
>
> (2) In this Act "the standard small profits rate" means a rate that—
> (a) is lower than the main rate, and
> (b) is set by Parliament for the financial year as the standard small profits rate.

That takes us to s.13 F(no2)A 2024 which provides:

> For the purposes of Part 3A of CTA 2010, for the financial year 2025—
> (a) the standard small profits rate is 19%, and
> (b) the standard marginal relief fraction is 3/200ths.

The small profits rate was abolished in 2014, providing a significant simplification, rare in UK tax. But it was restored in 2023 as a result of the increase in corporation tax rates and so we have returned to its complexities.

Companies with profits of £50k - £250k will pay at the main rate reduced by a marginal relief providing a gradual increase in the effective Corporation Tax rate. The relief is restricted for associated companies.[54]

The issue of LLP *v* company structure choice needs to be recomputed.

43.20.2 *Close investment-holding company*

Section 18N CTA 2010 provides:

> (1) For the purposes of this Part, a close company ("the candidate company") is a close investment-holding company in an accounting period unless throughout the period it exists wholly or mainly for one or more of the permitted purposes set out in subsection (2).
> There is an exception to this rule in subsection (5).
>
> (2) The candidate company exists for a permitted purpose so far as it exists—
> (a) for the purpose of carrying on a trade or trades on a commercial basis,
> (b) for the purpose of making investments in land, or estates or interests in land, in cases where the land is, or is intended to be, let commercially (see subsection (3)),

[54] For the definition of this term, see 104.17.1 ("Associated company").

(c) for the purpose of holding shares in and securities of, or making loans to, one or more companies each of which—

(i) is a qualifying company, or

(ii) falls within subsection (4),

(d) for the purpose of co-ordinating the administration of two or more qualifying companies,

(e) for the purpose of the making of investments as mentioned in paragraph (b)—

(i) by one or more qualifying companies, or

(ii) by a company which has control of the candidate company, or

(f) for the purpose of a trade or trades carried on on a commercial basis—

(i) by one or more qualifying companies, or

(ii) by a company which has control of the candidate company.

(3) For the purposes of subsection (2)(b), any letting of land is taken to be commercial unless the land is let to—

(a) a person connected with the candidate company ("a connected person"), or

(b) a person who is—

(i) the spouse or civil partner of a connected person,

(ii) a relative of a connected person, or the spouse or civil partner of a relative of a connected person,

(iii) a relative of the spouse or civil partner of a connected person, or

(iv) the spouse or civil partner of a relative of the spouse or civil partner of the connected person.

(4) A company falls within this subsection (see subsection (2)(c)(ii)) if—

(a) it is under the control of the candidate company or of a company which has control of the candidate company, and

(b) it exists wholly or mainly for the purpose of holding shares in or securities of, or of making loans to, one or more qualifying companies.

(5) If a company is wound up and was not a close investment-holding company in the accounting period that ends (by virtue of section 12(2) of CTA 2009) immediately before the winding up starts, the company is not treated for the purposes of this Part as being a close investment-holding company in the subsequent accounting period.

(6) In this section "qualifying company" means a company which—

(a) is under the control of the candidate company or of a company which has control of the candidate company, and

(b) exists wholly or mainly for either or both of the purposes mentioned in subsection (2)(a) or (b).

(7) In this section—

“control” has the meaning given by section 450, and

“relative” means brother, sister, ancestor or lineal descendant.

CHAPTER FORTY FOUR

PERSONAL ALLOWANCES

44.1 Personal allowances: Introduction
44.1.1 Allowances terminology
44.2 CGT annual exemption
44.2.1 Annual exemption: Individuals
44.2.2 Annual exemption: PRs
44.2.3 Exemption used in best way
44.2.4 Annual exemptions: Trusts
44.2.5 Grouped trusts
44.3 IT personal allowances
44.4 Allowance in year of birth/death
44.5 IT allowances: high earners
44.5.1 Total income
44.5.2 Net income
44.5.3 Adjusted net income
44.6 Allowances: remittance basis user
44.7 Entitlement to IT personal allowances
44.7.1 History and rationale
44.7.2 IT allowances: UK resident
44.7.3 IT allowances: Non-resident
44.7.4 IT allowances: UK/EEA national
44.7.5 IT allowances: Misc
44.7.6 Commonwealth citizens
44.8 Personal allowances under DTAs
44.8.1 Non-residents
44.8.2 Remittance basis claimants
44.9 Non-residents allowances: Reform
44.9.1 Nonresidents allowances: Significance
44.9.2 Nonresidents allowances reform

Cross references

The following topics are considered elsewhere:
36.8 (PAYE to recover personal allowance)
App. 11.2.4 (Visiting forces: Personal allowances)

44.1 Personal allowances: Introduction

This chapter considers:
(1) IT personal allowances
(2) CGT annual exemption

CGT is relatively straightforward, but a full discussion of IT personal allowances would need a short book. I focus on the aspects closest to the themes of this book.

An HM Treasury consultation paper (the **"PA Consultation Paper"**), though now dated, provides some interesting background.[1]

[1] HM Treasury, "Restricting non-residents' entitlement to the UK personal allowance" (2014) *https://www.gov.uk/government/consultations/restricting-non-residents-*

I do not consider the £500 exemption for low income estates and trusts.[2]

44.1.1 *Allowances terminology*

Act	**Statutory term**	**My Term**
ITA	Personal allowances	IT personal allowances
TCGA	Annual exemption	CGT annual exemption

I refer to these together as "**IT/CGT personal allowances**".

CIOT comment on the term "allowance":

> [The term "allowance"] is commonly understood to mean an amount that can be deducted from income, before calculating the tax on that income, for example, in the case of the personal allowance.
> However, the personal savings allowance and dividend allowance[3] ... cause confusion, because they are not allowances in the commonly understood sense of the term. Rather, they are 0% bands of tax. That is, the taxpayer does not deduct them from income before working out their tax; instead, they apply them when they are calculating the actual tax due using the rates and bands of income tax.
> Another example is the marriage allowance. Although the giver of the marriage allowance transfers part of their personal allowance to their partner (say £1,250 in 2020/21), the recipient does not receive additional personal allowance. Rather, they receive 20% of the amount transferred (say £250 in 2020/21), which they can offset against their income tax liability – it is thus a tax reducer or a tax credit in the hands of the recipient, rather than an allowance.[4]

Is that criticism pedantic? Discuss.

The meaning of "allowances" could matter if a statutory provision contained references to "allowances" (undefined), but I cannot think of any actual example.

entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance

[2] Section 24B ITA.

[3] See 43.8 (Starting rate for savings); 43.9 (Savings nil rate). The terms "dividend allowance" and "personal savings allowance" were used in the 2016 press releases, but not in the legislation, so perhaps PCO agreed.

[4] CIOT, Response to consultation The future of Welsh law: classification, consolidation, codification (Jan 2020).

44.2 CGT annual exemption

44.2.1 *Annual exemption: Individuals*

Section 1K(1) TCGA provides the CGT annual exemption:

> If an individual is (or, apart from this section, would be) chargeable to capital gains tax for a tax year on chargeable gains, the annual exempt amount for the year is to be deducted from those gains (but no further than necessary to eliminate them).

This applies to resident and non-resident individuals, though non-residents are less likely to pay CGT, so they may not need the exemption.

Unlike the IT personal allowance, a claim is not needed. But a person who has gains (even within the annual exemption) is required to notify HMRC, if they do not otherwise put in a tax return.[5]

Section 1K(2) TCGA specifies the amount:

> The annual exempt amount for a tax year is £6,000.

The amount for 2024/05 and subsequently is to be £3,000.[6]

Assuming the rate of CGT remains at 20%, the amount of tax at stake then reduces to £600, and the allowance ceases to be of much importance.

Section 1K(4) TCGA deals with the interaction with loss relief:

> The deduction of the annual exempt amount—
> (a) is made after the deduction of allowable losses accruing in the tax year, but
> (b) is made before the deduction of allowable losses accruing in a previous tax year or, if section 62 applies, in a subsequent tax year.

44.2.2 *Annual exemption: PRs*

Section 1K(7) TCGA provides:

> For the tax year in which an individual dies and for the next two tax years, this section applies to the individual's personal representatives as if references to the individual were to those personal representatives.

44.2.3 *Exemption used in best way*

Section 1K(5) TCGA provides:

[5] See 121.3 (Duty to notify: Exemption).

[6] Section 8 F(no.1)A 2023.

> The annual exempt amount may be deducted from gains in whatever way is most beneficial to a person chargeable to capital gains tax (irrespective of the rate of tax at which the gains would otherwise have been charged).

Contrast 63.9 (Losses used in best way).

44.2.4 *Annual exemptions: Trusts*

Para 5 sch 1C TCGA 1992 provides:

> (1) This paragraph applies if settlement is not a settlement for the benefit of a disabled person for a tax year.
> (2) Section 1K applies in relation to the trustees of the settlement for the year[7] as it applies in relation to an individual for the year but as if the annual exempt amount for the year were one-half of the amount available for the individual for the year.
> (3) This paragraph needs to be read be with—
> (a) paragraph 6 (cases where settlement is qualifying UK settlement comprised in a group), and
> (b) paragraph 8 (sub-fund settlements).

For application to s.87 gains, see 61.6.5 (CGT annual exemption).

44.2.5 *Grouped trusts*

Para 6 sch 1C TCGA provides:

> (1) This paragraph reduces the annual exempt amount for trustees of a settlement for a tax year if the settlement is one of two or more qualifying UK settlements comprised in a group.
> (2) [This concerns disabled trusts, not discussed here.]
> (3) In the case of any other settlement, the annual exempt amount for the year is to be reduced so that it is equal to—
> (a) one-tenth of an individual's amount for that year, or
> (b) the amount resulting from dividing half of an individual's amount for that year by the number of settlements in the group,
> whichever is the greater.
> (4) In this paragraph "an individual's amount", in relation to a tax year, means the annual exempt amount applying to an individual for the year

[7] Para 1 sch 1C TCGA provides:
> (4) In this Schedule any reference to the application of section 1K in relation to an individual for a tax year is to its application in relation to an individual who is resident and domiciled in the United Kingdom for the year.

> under section 1K.
> (5) For the purposes of this paragraph all qualifying UK settlements in relation to which the same person is the settlor constitute a group.
> (6) If—
> (a) two or more persons are settlors in relation to a settlement, and
> (b) a settlement is consequently comprised in two or more groups comprising different numbers of settlement, sub-paragraphs (2)(b) and (3)(b) have effect by reference to the largest group.

Para 7 sch 1C TCGA provides:

> (1) In this Schedule "qualifying UK settlement", in relation to a tax year, means any settlement in relation to which both of the following conditions are met—
> (a) the trustees of the settlement are resident in the United Kingdom during any part of the tax year, and
> (b) the property comprised in the settlement is not held for a charitable or pensions purpose.
> (2) Property comprised in a settlement is held for a charitable purpose if (and only if)—
> (a) it is held for charitable purposes only, and
> (b) it cannot become applicable for other purposes.
> (3) Property comprised in a settlement is held for a pensions purpose if (and only if) it is held for the purposes of—
> (a) a registered pension scheme,
> (b) a superannuation fund to which section 615(3) of the Taxes Act applies, or
> (c) an occupational pension scheme (within the meaning of section 150(5) of the Finance Act 2004) that is not a registered pension scheme.
> (4) For this purposes of any provision of this Schedule other than paragraph 8 a settlement is not a qualifying UK settlement if—
> (a) in the case of one for the benefit of a disabled person, it was made before 10 March 1981, or
> (b) in any other case, it was made before 6 June 1978.

44.3 IT personal allowances

Chapter 2 Part 3 ITA contains two allowances, the personal allowance and the blind person's allowance. I do not consider the latter.

Section 35(1) ITA provides:

> An individual who makes a claim is entitled to a personal allowance of £12,570 for a tax year if the individual meets the requirements of

> section 56 (residence etc).

The personal allowance had political salience, as a result of which it increased substantially. But it is now frozen until 2028. [8] The full picture, as always in tax, is more complicated.[9]

The PA consultation paper claimed that the UK has the highest personal allowance in the G20 and one of the largest in OECD and the EU.[10] No attempt was made to explain the basis of that claim. I expect it was based on a simple comparison of headline rates. That is likely to mislead, because what matters is not only the amount of the allowance but also the terms on which it is available. It is like comparing headline rates of tax without considering the tax base. A serious study of the point would paint a more complicated picture. I do not attempt that here.

44.4 Allowance in year of birth/death

Section 41(1) ITA provides:

> Any allowance to which an individual is entitled under this Chapter for any tax year, including the tax year in which the individual dies, is given in full.

That seems a generous rule, but it makes for simplicity.

44.5 IT allowances: high earners

Section 35(2) ITA provides:

> For an individual whose adjusted net income exceeds £100,000, the allowance under subsection (1) is reduced by one-half of the excess.

Thus (at 2021/22 rates) taxpayers with "adjusted net income" between £100k and £125,000 the marginal rate of income tax is 60% (61.5% in Scotland).

The £100k limit has not been increased since introduced in 2009.[11]

This rule was a parting shot from the Blair/Brown administration. It has

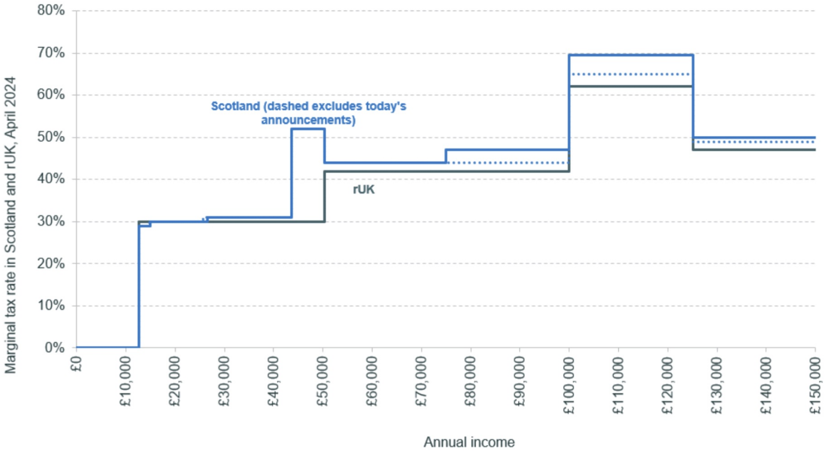
[8] Section 5(2) FA 2021 (as amended).

[9] See 43.6.2 ("Basic/higher rate limits").

[10] HM Treasury, "Restricting non-residents' entitlement to the UK personal allowance" (July 2014) para 3.1. *https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance*

[11] See 43.19 (Inflation/fiscal drag).

incurred strong criticism from the IFS[12] ("the absurd and arbitrary marginal income tax band"). And IFS as usual have done the graph for us:[13]



But no-one has taken any notice.

The definition of "adjusted net income" is best approached in three stages:

Term	**Definition**	**See para**
Total income	s.23 ITA Step 1	41.5.1
Net income	s.23 ITA Step 2	41.5.2
Adjusted net income	s.58 ITA	41.5.3

44.5.1 *Total income*

Section 23 ITA provides:

> To find the liability of a person ("the taxpayer") to income tax for a tax year, take the following steps.
> *Step 1* Identify the amounts of income on which the taxpayer is charged to income tax for the tax year.
> The sum of those amounts is "total income".
> Each of those amounts is a "component" of total income.

In *Asplin v White*:[14]

[12] IFS, *Tax By Design* (2011) para 4.3.1. (A Straightforward Income Tax Schedule).

[13] Differences in marginal tax rates between Scotland and the rest of the UK (2024-25) *https://ifs.org.uk/articles/initial-ifs-response-scottish-budget*

[14] 49 TC 93; for further discussion of this case, see 15.8 (Receipt by nominee/trustee).

> "total income" is necessarily beneficial income, and so sums received in a fiduciary capacity could not be included

44.5.2 *Net income*

Section 23 ITA provides:

> *Step 2* Deduct from the components the amount of any relief under a provision listed in relation to the taxpayer in section 24 to which the taxpayer is entitled for the tax year.
> See sections 24A and 25 for further provision about the deduction of those reliefs.
> The sum of the amounts of the components left after this step is "net income".

This takes us to s.24 ITA which has a list of about 20 reliefs (some quite obscure):[15]

ITA	**Relief**
s. 72	early trade losses relief
Chap 6 Part 4	share loss relief
Chap 3 Part 8	gift of securities/land to charity
s.457/458	trade unions or police organisations
s. 64	trade loss relief against general income
s. 83	carry-forward trade loss relief
s. 89	terminal trade loss relief
s. 96	post-cessation trade relief
s. 118	carry-forward property loss relief
s. 120	property loss relief against general income
s. 125	post-cessation property relief
s. 128	employment loss relief
s. 152	loss relief: misc. income
Chap 1 Part 8	interest payments
Chap 1A Part 8	irrecoverable peer-to-peer loans
Chap 4 Part 8	Annual Payments
s.574	manufactured dividends
s. 579	manufactured interest
Other Acts	**Relief**
s. 193(4) FA 2004	pension schemes
s. 194(1) FA 2004	pension schemes

[15] For clarity, I set this out in a table format, and abbreviate the relief description; I set out the list for individuals; a different list applies for non-individuals.

s.258 CAA 2001	plant/machinery
s.479 CAA 2001	patent allowances
s. 555 ITEPA	liabilities of former employment
s. 446 ITTOIA	government security strips: losses
s. 454(4) ITTOIA	listed securities held 26/3/2003: losses
s. 600 ITTOIA	patent expenses

44.5.3 *Adjusted net income*

"Adjusted net income" is defined in s.58(1) ITA:

> For the purposes of Chapters 2 and 3, an individual's adjusted net income for a tax year is calculated as follows.

There are 3 adjustments. In short:

Step	**Adjustment**
2	Deduct gross gift aid donations
3	Deduct pension relief
4	Add back relief for payments to trade unions/police organisations

In full detail:

> *Step 1* Take the amount of the individual's net income for the tax year.
> *Step 2* If in the tax year the individual makes, or is treated under section 426 as making, a gift that is a qualifying donation for the purposes of Chapter 2 of Part 8 (gift aid) deduct the grossed up amount of the gift.
> *Step 3* If the individual is given relief in accordance with section 192 of FA 2004 (relief at source) in respect of any contribution paid in the tax year under a pension scheme, deduct the gross amount of the contribution.
> *Step 4* Add back any relief under section 457 or 458 (payments to trade unions or police organisations) that was deducted in calculating the individual's net income for the tax year.
> The result is the individual's adjusted net income for the tax year.
> (2) The grossed up amount of a gift is the amount of the gift grossed up by reference to the basic rate for the tax year.
> (3) The gross amount of a contribution is the amount of the contribution before deduction of tax under section 192(1) of FA 2004.

Gift aid relief (including carry-back relief) makes it possible to avoid the worst unfairness of the withdrawal of allowances for high earners, as a donor with income marginally above £100k can avoid the 60% band by gift aid donations.

44.6 Allowances: remittance basis user

Section 809G ITA disapplies IT personal allowances for remittance basis claimants:

> (1) This section applies if s.809B (claim for remittance basis to apply) applies to an individual for a tax year.
> (2) For that year, the individual is not entitled to-
> (a) any allowance under Chapter 2 of Part 3 (personal allowance and blind person's allowance),
> (b) any tax reduction under Chapter 3 of that Part (tax reductions for married couples and civil partners), or
> (c) any relief under s.457 or 458 (payments for life insurance etc).

This does not apply to remittance basis taxpayers in the de minimis categories (sub-£2k taxpayers and non-taxpayers): they retain their allowances.

The editor of *Taxation* commented acerbically on s.809G(2)(c):

> So what are these valuable reliefs which it would be unfair to allow those claiming the remittance basis to enjoy? They are relief from tax on half of the premiums paid to trade unions and police organisations for superannuation, life insurance or funeral benefits, or to the employer so that benefits can be paid after the employee's death to their dependants, but limited to £100 a year of relief in each case.
> What on earth is the point of removing a relief like that for the non-domiciles? It is pointless complexity for the sake of a few tenners in tax which will have no impact whatsoever on the non-domiciles concerned. Unless there is some issue related to European law, or human rights (which seem to be the normal culprits in these situations) I really cannot see why the parliamentary draftsman should have been troubled with the need to include them. And, frankly, if there is some such problem, then given the minuscule levels of relief they offer even to those not on the remittance basis, wouldn't it be simpler to just abolish the sections altogether? That would at least be simplification.[16]

Likewise s.1K(6) TCGA disapplies the CGT annual exemption:

> An individual is not entitled to an annual exempt amount for a tax year if section 809B of ITA 2007 (claim for remittance basis) applies to the individual for the year.

[16] Mike Truman, *Taxation* 21 Feb 2008 p.161.

A DTA will occasionally restore the personal allowances and the CGT annual exemption, which are otherwise disapplied for remittance basis claimants.[17]

Individuals with income above £125k are not concerned with the loss of IT personal allowances since these are withdrawn anyway; they only suffer the loss of the CGT annual exemption.

The IT personal allowance and the CGT annual exemption are only lost in the year that a remittance basis claim is made. So an individual who has unremitted gains from earlier years, but who does not make a remittance basis claim in later years, may remit the exempt amount each year and set it against the CGT annual exemption.[18]

44.7 Entitlement to IT personal allowances

There are ten categories of individuals who qualify for IT personal allowances under Chapters 2 and 3 Part 3 ITA. In short:

(1) UK residents
(2) Non-residents:
 (a) Seven categories listed in s.56(3) ITA
 (b) Those entitled under DTAs
 (c) Visiting forces[19]

44.7.1 *History and rationale*

Originally, personal allowances were available to non-residents and residents alike. The Departmental Committee on Income Tax 1905 recommended personal allowances should not be available to non-residents and explains why:

> 128. First, while persons resident in, the United Kingdom obtain their total income from all sources is within the prescribed limits, in the case of persons resident abroad only the income derived from ths United Kingdom is taken into account. Thus a foreign millionaire who derives an income of £160, and no more, from investments in the United Kingdom is granted exemption on that £160, and similarly as regards abatements. This view of the law ... appears to us, on grounds of justice and common sense, indefensible.
>
> [The Committee note the issue of fraudulent tax reclaims by non-

[17] See 44.8.2 (Personal allowances under DTAs: remittance basis claimants).

[18] Note that a CGT loss election may also disapply the CGT annual exemption: see 65.18 (Effect of loss election).

[19] See App.11.2.4 (Visiting forces: Personal allowances),

> residents, and continue]:
> 129. Further, one of the main motives of equity in granting relief to persons in receipt of small incomes is that such persons contribute to the public revenue by means of indirect taxation in fair proportion to their taxable capacity. This ground for relief does not apply to residents abroad. We therefore recommend that the grant of exemption or abatement by reason of smallness of income should be abolished in the case of persons resident outside the United Kingdom. We believe that very few (if any) of the foreigners who invest in British securities have total incomes within the prescribed limits. If it be thought well to make an exception for British subjects residing abroad, relief should be granted only on a certificate from a British Consular officer (or, in a British colony, from the colonial fiscal authorities) that the claimant has produced proper evidence showing that his income from all sources is within the limits.[20]

Restrictions were first introduced in F(1919-10)A 1910, though not adopting the recommendation in the last sentence; with further reforms subsequently.[21]

44.7.2 *IT allowances: UK resident*

Section 56(2) ITA sets out the first category of individuals who qualify for IT personal allowances, which is UK residents:

> The individual meets the requirements of this section if the individual—
> (a) is UK resident for the tax year...

44.7.3 *IT allowances: Non-resident*

Section 56(2) ITA continues:

> The individual meets the requirements of this section if the individual...
> (b) meets the condition in subsection (3).

So we turn to s.56(3) ITA which sets out the next seven categories, which apply to non-residents. Non-residents who do not fall within one of these categories do not qualify for personal allowances.

In many but not all cases, the significance of personal allowances to non-residents is limited or nil.[22]

[20] The proposal was more straightforward at a time when there were no progressive rates of tax and IT was mainly collected at source.

[21] For further historical background, see para 61-66 Royal Commission on the Income Tax Cmd.615 (1920).

[22] See 44.9.1 (Non-residents allowances: Reform).

44.7.4 *IT allowances: UK/EEA national*

Section 56(3) ITA provides:

> An individual meets the condition in this subsection if, at any time in the tax year, the individual—
>
> (za) is a national of the United Kingdom or a national of an EEA state

44.7.5 *IT allowances: Misc*

The remaining categories are a strange ragbag. Section 56(3) ITA provides:

> An individual meets the condition in this subsection if, at any time in the tax year, the individual ...
>
> (a) is resident in the Isle of Man or the Channel Islands,[23]
>
> (b) has previously resided in the UK and is resident abroad for the sake of the health of—
>
> (i) the individual, or
>
> (ii) a member of the individual's family who is resident with the individual,
>
> (c) is a person who is or has been employed in the service of the Crown,
>
> (d) is employed in the service of any territory under Her Majesty's protection,[24]
>
> (e) is employed in the service of a missionary society, or
>
> (f) is a person whose late spouse or late civil partner was employed in the service of the Crown.

There is scope here for simplification: there is a strong case for repeal of s.56(3)(a)-(f), ie the entire list apart from EEA nationals (subject to some transitional relief).

44.7.6 *Commonwealth citizens*

Before 2010/11 there was an additional category: Commonwealth citizens. The Tax Law Rewrite considered that this was not Human Rights

[23] This category has been included since 1910: I would be grateful for any reader who could suggest the reason.

[24] British Protectorates ceased to exist well before the date of the ITA, so this provision has lapsed. The last British protectorate was the Solomon Islands which became independent in 1978. The last British protected state was Brunei which became independent in 1984.

compliant.[25] Accordingly this category was deleted by the FA 2009. The objection was that granting personal allowances solely on the grounds of Commonwealth citizenship (and denying the allowances to non-Commonwealth citizens) was unlawful discrimination on the grounds of nationality.[26] The Rewrite team did not consider that providing allowances to EEA nationals was unlawful discrimination, as discrimination between EEA nationals and the rest of the world was justified by the relationship which the UK had with the EEA.[27] That argument should logically be reviewed post-Brexit, but no doubt there are higher priorities, so the status quo may continue indefinitely.

This rule was just about the last remaining example of special treatment for Commonwealth citizens in UK tax legislation, so the issue does not have immediate tax implications in other areas, but it does illustrate two interesting points: a significant restriction on the UK's ability to impose tax; and the insignificance of the Commonwealth, at least in a Human Rights context. The Tax Law Rewrite rejected the argument that the UK's relationship with the Commonwealth would justify the discrimination.

44.8 Personal allowances under DTAs

The last category of individuals entitled to personal allowances relates to DTAs.

44.8.1 *Non-residents*

OECD Model Convention does not affect the rule that personal allowances are limited to UK residents (and other specific categories).[28] However most UK treaties are different. The PA consultation paper explains the position:

> Most tax treaties between the UK and other states extend entitlement to UK Personal Allowances to nationals of those states who are not entitled to claim a UK Personal Allowance under UK domestic statute. This is

[25] EN ITA para 135.

[26] Article 14 ECHR (Prohibition of discrimination) in conjunction with art 1 protocol 1 (Right to property).

[27] Private correspondence.

[28] OECD Model Convention art. 24(3) provides:
"This provision [non-discrimination] shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents."

> because of the interaction between the UK domestic statute and the UK's obligations under the non-discrimination articles in those tax treaties.
>
> Current UK statute provides that UK nationals are entitled to UK Personal Allowances wherever they are resident. The non-discrimination provisions found in most UK tax treaties extend the entitlement to UK Personal Allowances to nationals of the treaty partner state who are also resident there. Some of the UK's tax treaties also expressly provide that UK Personal Allowances will be granted to residents of the partner state regardless of nationality, or nationals of the partner state wherever they are resident....
>
> The UK's tax treaties do not all entitle overseas residents to a UK Personal Allowance. Some, such as that with the United States, do not contain a non-discrimination article of this sort or specifically exclude entitlement to Personal Allowances from the non-discrimination article.[29]

For instance, art. 25(1) Austria/UK DTA provides:

> Subject to the provisions of paragraph (3) of this Article, individuals who are residents of Austria shall be entitled to the same personal allowances, reliefs and reductions for the purposes of UK tax as British subjects[30] not resident in the UK. ...

Non-resident British subjects qualify for personal allowances as they are nationals of an EEA state (the UK) so individuals who are treaty-resident in Austria will likewise do so.

Sometimes there is a restriction. Article 25(3) Austria/UK DTA provides:

> Nothing in this Convention shall entitle an individual who is a resident of a Contracting State [Austria] and whose income from the other Contracting State [UK] consists solely of dividends, interest or royalties (or solely of any combination thereof) to the personal allowances, reliefs and reductions of the kind referred to in this Article for the purposes of taxation in that other Contracting State.

[29] HM Treasury Consultation Paper, "Restricting non-residents' entitlement to the UK personal allowance" (July 2014) *https://www.gov.uk/government/consultations/restricting-non-residents-entitlement-to-the-uk-personal-allowance/restricting-non-residents-entitlement-to-the-uk-personal-allowance*

[30] Defined in s.51 British Nationality Act 1981.

One could avoid the restriction by procuring income other than dividends, interest and royalties (maybe Annual Payments) but the amounts involved are small.

A list of DTAs which confer personal allowances on non-residents is set out in SA109 (Notes), with more details in HMRC, "Digest of Double Taxation Treaties".

The relief is claimed in form SA109 or else in form R43.

The practical significance of DTAs conferring personal allowances on non-residents is limited, since in many cases a claim for the relief is effectively cancelled by non-residents IT relief.[31] Also of course the personal allowance is only needed for UK source income which remains taxable in the UK under the treaty.

44.8.2 *Remittance basis claimants*

Remittance basis claimants (who would in principle qualify for personal allowances as they are by definition UK resident) lose their IT/CGT personal allowances on making a remittance basis claim.[32] This disallowance is overridden (so the right to IT/CGT personal allowances is restored) by a DTA if applicable.[33] The treaties which confer personal allowances are those set out in the lists mentioned above, with the exception of Greece and Myanmar.[34]

This treaty relief only affects remittance basis taxpayers who make a remittance basis claim, ie where:

(1) the individual is UK resident (so a remittance basis claim is made); and
(2) the individual is treaty-resident in the jurisdiction concerned (so that DT relief applies).

So this point will not be a common one, though it will arise from time to time.

[31] See 45.3 (Amount B (disregarded income and reliefs).

[32] See 44.6 (Withdrawal of IT personal allowances & CGT annual exemption for remittance basis claimants).

[33] Jane Kennedy (Financial Secretary to the Treasury) accepted this in the public Bill committee debate on the Finance Bill, Hansard 19 June 2008 col 818 *http://www.publications.parliament.uk/pa/cm200708/cmpublic/finance/080619/am/80619s05.htm*

[34] The antique treaties of Myanmar and Greece only grant personal allowances to residents of Myanmar/Greece who are not UK-law UK resident; they do not help UK-law UK residents even if also residents of Myanmar/Greece.

44.9 Non-residents allowances: Reform

44.9.1 *Nonresidents allowances: Significance*

The proposal discussed here is abolition of the IT personal allowances for non-residents. Reform proposals first require an analysis of the significance of personal allowances for non-residents. Needless to say, the picture is a complicated one. The PA consultation paper provides:

> **6.1 Impact on individuals**
> HMRC estimate there to be at least 400,000 individuals claiming Personal Allowances in the UK who are non-resident for tax purposes. Based on the data available, if non-residents were not entitled to the UK Personal Allowance most of them would face increased UK tax liabilities. However most of these individuals would be able to claim relief overseas either in the form of a credit for tax paid in the UK or exemption from tax in their home state. Therefore most individuals would not generally pay more tax overall than they do now. However this will depend on the relative level of tax rates and allowances between the UK and their country of residence. Those living in low tax jurisdictions are likely to pay more tax overall than they do now if they were not able to claim the UK Personal Allowance than they do now...
> **6.2 High income individuals**
> Around 5,000 high earning non-residents already have their Personal Allowance tapered away because their UK income is greater than £100,000...
> **6.3 Middle income individuals**
> There are more than 110,000 migrant taxpayers with incomes over the level of the Personal Allowance and a significant proportion of this group are middle income non-residents. This includes, for example, professionals or managers seconded to the UK for a few months to work on specific projects. Individuals in this cohort who are not tax resident in the UK but pay UK tax on their earnings are likely to earn in excess of the Personal Allowance, so they have UK tax to pay on their earnings.

Actually there are two classes of non-resident employees who perform some duties in the UK:

(1) Those who qualify for DTA relief as short term business visitors. These do not need UK allowances.

(2) Those who do not qualify (or do not fully qualify) for DTA relief, who do need the allowances.[35]

[35] See 36.12 (Short-term visitor PAYE scheme).

The paper is interested in group (2):

> Even without any policy change they are likely to claim double taxation relief in their country of residence to offset the UK taxation on their UK earnings. These individuals will not generally face a significant cash loss from the withdrawal of the UK Personal Allowance;

Instead the loss falls on the foreign Revenue authority; as often happens when the UK imposes tax on non-residents. It would be relevant to consider the converse situation: does the foreign state allow a personal allowance to residents in the UK who work in the foreign state (and so increasing UK tax revenues). If so, would the result of abolishing UK personal allowances be to encourage the foreign state to abolish theirs?

> however this will depend on the relative level of tax rates and allowances between the UK and their country of residence. Those living in low tax jurisdictions may face a cash loss...
>
> **6.4 Low income individuals**
>
> Around 250,000 migrants, many of whom are non-residents, receive UK income below the Personal Allowance. Although some will have higher incomes overseas, some of this group will have a very low overall income. This group includes a significant group who may not pay sufficient tax overseas to claim relief for any UK tax payable and might face a cash loss if their entitlement to a UK Personal Allowance is withdrawn.
>
> **6.5 Non-resident landlords and others with UK property income**
>
> There are around 175,000 non-UK resident taxpayers with rental income. Non-resident landlords will generally be taxed on their UK rental income in their country of residence as well as the UK. Although some may currently not need to claim double taxation relief as their UK income is below the Personal Allowance, many non resident landlords would be able to claim double taxation relief and so should not face an overall cash loss without a UK Personal Allowance...
>
> **6.6 Pensioners**
>
> Pensioners who live overseas are a significant group of British national expatriates, estimated by DWP at around 1,200,000 individuals. Most UK national pensioners living overseas would not be affected by any restriction on non-residents entitlement to the Personal Allowance. This is because:
>
> - some are still resident in the UK for tax purposes and so would not be affected by any change
> - provisions of tax treaties generally mean that UK state pensions, personal pensions or private sector occupational pensions are only

> taxable in recipients' states of residence and not in the UK
> - many non-resident UK national pensioners do not have any other income (i.e. employment or property) which is taxable in the UK and would not be affected by losing their Personal Allowance
>
> However, under double tax treaties, UK sourced government service pensions (a wide category which includes, amongst others, some NHS staff and those employed by local authorities) are generally only taxed in the UK, regardless of recipients' residence status. This can also be the case with some other forms of income under specific treaties. The withdrawal of the UK personal allowance from non-residents in receipt of a UK government service pension would result in them paying more tax overall as there is no overseas tax liability against which the additional UK tax could be relieved.

In addition, in relation to UK investment income, the practical significance of allowances for non-residences is limited, since in many cases any claim for a personal allowance is effectively cancelled by non-residents IT relief.[36]

44.9.2 *Nonresidents allowances reform*

Budget 2014 announced:

> **Personal allowances for non-residents** – To ensure the UK personal allowance remains well targeted, the Government intends to consult on whether and how the allowance could be restricted to UK residents and those living overseas who have strong economic connections in the UK, as is the case in many other countries, including most of the EU.

The issue has become more important because of the increase in personal allowance in recent years. But proposal is an old one, first proposed in 1905.[37] I wonder if the authors of the proposal were aware of that. But this time the withdrawal of allowances was intended to be targeted:

> The government is concerned that individuals, like those in receipt of government service pensions, who are not eligible for double taxation relief, would be disproportionately affected by the removal of the UK Personal Allowance.
>
> The government does not intend to raise taxes on vulnerable groups or in situations where the UK is the principal taxing authority and an individual has no recourse to relief as a result of the UK having sole

[36] See 45.3 (Amount B: Non-disregarded income/reliefs).

[37] See 44.7.1 (History and rationale).

> taxing rights under a tax treaty. If the government were to restrict non-residents' entitlement to the Personal Allowance, it would intend this to apply to types of income which are taxable both in the UK and overseas (such as that from immovable property) but to retain the Personal Allowance on income that is taxable exclusively in the UK.[38]

The Autumn Statement 2014 put the reform back to 2017[39] and in earlier edition of this work I commented:

> Withdrawal of allowances for non-residents poses particularly difficult problems in the case of employers, who will need to know how to operate PAYE for employees whose residence may be difficult to ascertain or may simply be unknown until after the end of the tax year. I expect that nothing will happen.

That prediction seems to have been correct.

CHAPTER FORTY FIVE

NON-RESIDENTS INCOME TAX RELIEF

45.1 Non-residents IT relief: Introduction
45.2 Amount A: Tax deducted at source
45.3 Amount B: Non-disregarded income/ reliefs
45.4 Disregarded reliefs
45.5 Disregarded income
45.6 Disregarded savings & investment income
45.6.1 Dividends
45.6.2 Interest
45.7 Disregarded Annual Payments
45.8 Disregarded pension/social security income
45.9 Individuals: Split years
45.10 Trusts: UK beneficiary rule
45.10.1 "Beneficiary"
45.10.2 HMRC example
45.11 Critique

45.1 Non-residents IT relief: Introduction

This chapter considers the IT relief for UK source income of non-residents. I use the following terminology:

Term	ITA	Applies to
Non-resident individual/trustee relief	s.811	Individuals/trustees
Non-resident company relief	s.815	Companies

I refer to these together as "**non-residents IT relief**".

In accordance with the principles of the Tax Law Rewrite, the two reliefs are written out separately, though the rules are more or less the same.

In the absence of relief:

(1) Non-resident individuals and trustees are subject to tax on UK source income at the same rates as UK residents. So non-resident individuals may be subject to income tax at higher/additional rates, and non-resident trustees may be subject to tax at the trust rate.

(2) Non-resident companies are in principle subject to income tax on UK source income at the basic rate/dividend ordinary rate.

In short, the relief is that UK source interest, dividend and pension income of non-residents is not subject to UK tax beyond withholding tax (where applicable).

Section 811/815 ITA provide the relief:

s.811(1) ITA (individuals/trusts)	**s.815(1) ITA (companies)**
This section applies to income tax to which— (a) a non-UK resident, other than a company, is liable, or (b) a non-UK resident company is liable as a trustee.[1]	This section applies to income tax to which a non-UK resident company is liable, otherwise than as a trustee.

The relief is as follows:

s.811(3) ITA (individuals/trusts)	**s.815(2) ITA (companies)**
The non-UK resident's liability to income tax for a tax year is limited to the sum of amounts A and B.	The non-UK resident company's liability to income tax for a tax year is limited to the sum of amounts A and B.

There is no equivalent CGT relief but that is not needed as a non-resident is not usually subject to CGT. It is possible to envisage a case where a non-resident would be subject to CGT on gains made through an investment manager, but it would be unusual, in practice no-one would expect compliance, and HMRC probably turn a blind eye. The former International Tax Handbook stated at ITH970:

> *it would be very rare to find a situation where a non-resident would be liable on capital gains made through an investment manager.*

We next need to ascertain amounts A and B.

45.2 Amount A: Tax deducted at source

s.811(4) ITA (individuals/trusts)	**s.815(3) ITA (companies)**
Amount A is the sum of—	Amount A is the sum of—
(a) any sums representing income tax deducted from the non-UK resident's disregarded income for the tax year (see section 813), and	(a) any amounts representing income tax deducted from the non-UK resident company's disregarded company income for the tax year, and

[1] Section 811(1)(b) is strictly otiose since a trustee is a separate person for income tax, and that person is not classified as a company (even if the actual trustee happens to be a company); see 7.3 (Trustees a distinct person). But it does no harm.

(b) any sums representing income tax that are treated as deducted from or paid in respect of that income.	(b) any amounts representing income tax that are treated as deducted from or paid in respect of that income.

The wording is effectively the same.

The disregard in para (a) is:

(1) for non-companies: "the non-UK resident's disregarded income"

(2) for companies: "the non-UK resident co's disregarded company income"

But the meaning is more or less the same. I refer to such income as **"disregarded income"**. I refer to other income as "**non-disregarded income**" which is a clumsy term but I cannot think of better.[2]

Simplifying slightly: amount A is tax deducted at source on disregarded income.

45.3 Amount B: Non-disregarded income/reliefs

We turn to amount B. Section 811(5) ITA provides:

s.811(5) ITA (individuals/trusts)	**s.815(4) ITA (companies)**
Amount B is the amount that, apart from this section, would be the non-UK resident's liability to income tax for the tax year,	Amount B is the amount that, apart from this section, would be the non-UK resident company's liability to income tax for the tax year
if the following were left out of account— (a) the non-UK resident's disregarded income for the tax year, and	if the non-UK resident company's disregarded company income for the tax year were left out of account.
(b) any relief mentioned in subsection (6) to which the non-UK resident is entitled for the tax year as a result of— (i) section 56(3) or 460(3) of this	

[2] The attentive reader will also note that (for no good reason) the word *sums* has become *amounts*.

Act (residence etc of claimants), or
(ii) double taxation arrangements.

I refer to the reliefs within s.811(5)(b) as "**disregarded reliefs**".

The wording is effectively the same except that for companies there is no reference to the disregarded reliefs (which makes sense as those reliefs only apply to individuals).

Thus one has a hypothetical tax computation which differs from the individual's normal tax computation by ignoring two matters:

- Ignore disregarded income: the effect is to decrease the tax liability
- (For individuals): Ignore disregarded reliefs: the effect is to slightly increase the tax liability.

Since one only ignores disregarded income in computing amount B, UK tax on non-disregarded income is included in computing amount B, ie tax on non-disregarded income remains payable in full.

Moreover although amount B is computed by ignoring disregarded income, tax deducted at source on disregarded income comes into amount A, so the result at the end of the day is that UK tax on disregarded income is limited to withholding tax. The wording is convoluted, but it works.

45.4 Disregarded reliefs

Section 811(6) ITA sets out the list of disregarded reliefs:

The reliefs referred to in subsection (5) are– [3]

Para	**Relief**	**Reference**	**See para**
(a)	Personal allowance, blind person's allowance	Chap 2 Part 3 ITA	44.8.1
(b)	Tax reduction for spouse born before 1935	Chap 3 Part 3 ITA	
(c)[4]	Trade union/police organisation subscriptions	s.457, 458 ITA	
(e)	Life assurance premium relief (pre-1984 policies)	s.266 ICTA	

The most important item in this list is the personal allowance.[5] The others are not likely to be significant.

These reliefs are not disapplied. The individual can in theory claim them. But that claim increases amount B, so reduces the benefit of non-residents IT relief. A higher rate taxpayer will often be no better off at all;

[3] For clarity I set this out in tabular form, and in the terminology of this book, rather than the layout of the statute.

[4] There is no para (d).

[5] See 44.8 (Personal allowances under DTAs).

sometimes there may be a small saving but it may be insufficient to justify the accountancy cost of making the claim.

In short, a non-resident individual must choose between (1) personal allowances and (2) non-residents IT relief: they cannot have both.

45.5 Disregarded income

The definition of "disregarded income" is crucial since disregarded income qualifies for non-residents IT relief and other income does not.

In practice, the most important categories are dividends and interest.

The definition is complex. There are six categories of disregarded income:

s.813(1) ITA (individuals/trusts)	**s.816 ITA (companies)**
For the purposes of this Chapter [Chapter 1 Part 14 ITA] income arising to a non-UK resident is "disregarded income" if it is—	(1) For the purposes of this Chapter [Chapter 1 Part 14 ITA] income arising to a non-UK resident company is "disregarded company income" if it is—
(a) disregarded savings and investment income (see section 825),[6]	[identical]
(b) disregarded annual payments (see section 826),[7]	[identical]
(c) disregarded pension income, (d) disregarded social security income,	[no equivalent]
(e) disregarded transaction income (see section 814),[8] or	(c) income arising from a transaction carried out through a broker in the UK acting as an agent of independent status in the ordinary course of the broker's business, (d) income arising from a transaction carried out through an

[6] See 45.6 (Disregarded savings & investment income).

[7] See 45.7 (Disregarded Annual Payments).

[8] See 72.3 (IME non-resident IT relief); 72.5.3 ("Transaction income").

	investment manager in the UK acting as an agent of independent status in the ordinary course of the investment manager's business,[9] or
(f) income of such other description as the Treasury may by regulations designate for the purposes of this section. [No regulations have been made].	(e) [identical to (f)]

The wording for companies is effectively the same. There are two apparent differences:

(1) References to pension or social security income are omitted (as they do not apply to companies).

(2) There are differences in the wording of s.816(1)(c)(d) which are the equivalent of the individual's exemption for "transaction income" but I cannot see they are of any significance.

Thus we have to turn to another five definitions. But first, s.813(2) ITA brings in an important exception:

> But income in relation to which the non-UK resident has a UK representative for the purposes of Chapter 2B is not disregarded income.

See 124.3 (UK representative).

45.6 Disregarded savings & investment income

Section 825(1) ITA provides the definition:

> For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is "disregarded savings and investment income" if—

There are two categories of disregarded savings & investment income: dividends and interest.

45.6.1 *Dividends*

Section 825(1) ITA provides:

> For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is "disregarded savings and investment income" if—

[9] See 72.1 (Investment manager exemptions).

> (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies)

Non-residents IT relief is not needed for dividends arising to:
(1) individuals who are not higher rate taxpayers
(2) non-resident companies
(3) interest in possession trustees

Persons in these categories pay only at the dividend ordinary rate,[10] and they qualify for a dividend tax credit which covers that.[11]

But non-residents IT relief is relevant for non-resident individuals who are higher rate taxpayers, and to discretionary trusts.

45.6.2 *Interest*

Section 825(1) ITA continues:

> For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is "disregarded savings and investment income" if ...
> (b) [i] it is within subsection (2) and
> [ii] is not relevant foreign income[12].

So we turn to s.825(2) ITA, which deals with interest and interest-like income:

> Income is within this subsection if it is chargeable under—[13]

Para	**ITTOIA Part 4**	**Type of income**
(a)	Chapter 2	Interest
(b)	Chapter 7	Purchased life annuity payments
(c)	Chapter 8	Deeply discounted securities
(e)[14]	Chapter 11	Transactions in deposits
(f)	Reg 15 UUTTR[15]	Distributions from unauthorised unit trusts

The terminology is not ideal, as "Savings & Investment Income" is a technical term best used as a label for income within Part 4 ITTOIA

[10] Or, for an individual with income of less than £2k, at the dividend nil rate, but the end result is the same.
[11] See 30.7 (Non-resident recipient).
[12] Why is para [ii] needed?
[13] For clarity I set this out in tabular form, and in the terminology of this book, rather than the layout of the statute.
[14] There is no para (d).
[15] Unauthorised Unit Trusts (Tax) Regulations 2013.

(which is headed Savings & Investment Income). But no harm arises as long as one remembers that the term does not carry quite that meaning here:
(1) it includes item (f), which is not in Part 4, and
(2) it does not include some categories of income which are in Part 4:

Topic	**Part 4 Chap**	**Comment**
Disguised interest	2	Accidental omission, perhaps
Non-UK dividends	4	Relief not needed
Life policies: chargeable-event gains	9	Relief not needed

45.7 Disregarded Annual Payments

Section 826 ITA provides the definition:

> For the purposes of this Chapter [Chapter 1 Part 14 ITA] income is "disregarded annual payments" if it is not relevant foreign income and is chargeable under—
> (a) section 579 of ITTOIA 2005, so far as it relates to annual payments (royalties etc from intellectual property),
> (b) Chapter 4 of Part 5 of that Act, so far as it relates to annual payments (certain telecommunication rights: non-trading income), or
> (c) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged).

Thus royalties which are Annual Payments are disregarded income, but royalties which are not Annual Payments are not.[16] In practice DT relief will often apply, so the distinction may not matter. But it is submitted all royalties ought to be treated in the same way.

45.8 Disregarded pension/social security income

Section 813(3) ITA provides:

> Income is "disregarded pension income" if it is chargeable under Part 9 of ITEPA 2003 (pension income) because any of the following provisions of that Act applies to it—
> section 577 (UK social security pensions),
> section 579A (pensions under registered pension schemes) (but see subsection (4) below),[17]

[16] For the distinction, see 32.4 (Non-trade royalties).

[17] Section 813(4) ITA provides:
"Income chargeable under Part 9 of ITEPA 2003 because section 579A of that Act

> section 609 (annuities for the benefit of dependants),
> section 610 (annuities under non-registered occupational pension schemes), or
> section 611 (annuities in recognition of another's services).

Section 813(5) ITA provides:

> Income is "disregarded social security income" if—
> (a) it is a taxable benefit listed in Table A in section 660 of ITEPA 2003, other than income support or jobseeker's allowance, and
> (b) it is chargeable under Part 10 of that Act (social security income).

45.9 Individuals: Split years

Section 810(4) ITA provides:

> In relation to an individual—
> (a) a reference in this Chapter [Chapter 1 Part 14 ITA] to a non-UK resident's liability to income tax is a reference to the liability of someone who is non-UK resident for the tax year for which the liability arises, and
> (b) accordingly, enactments under which income arising to a UK resident in the overseas part of a split year is treated as arising to a non-UK resident are of no relevance to this Chapter.

Thus non-residents IT relief does not apply for a split year of an individual. This seems unfair and inconsistent with the general scheme of the split-year rules. Perhaps the reason is that a tax return is needed for the split year, one object of the relief is to save the need for a tax return, so the relief is not appropriate in a split year.

The planning moral is that where possible leavers should defer UK source income until after the end of a split year; and arrivers should arrange UK source income to accrue before the beginning of a split year.

45.10 Trusts: UK beneficiary rule

Section 812(1) ITA provides:

applies to it is disregarded pension income only if the registered pension scheme in question—
(a) falls within para 1(1)(f) of Schedule 36 to FA 2004, and
(b) was, immediately before 6 April 2006, a retirement annuity contract to which section 605 of ITEPA 2003 applied."

> Section 811 does not apply to income tax to which non-UK resident trustees are liable for a tax year, if there is a beneficiary of the trust who is—
> (a) an individual who is UK resident, or
> (b) a UK resident company.

I refer to this as the "**UK beneficiary rule**". One UK beneficiary may disqualify the entire trust from the relief.

Non-resident's IT relief is available if:

(1) The trust is settlor-interested and the settlor is non-UK resident as the income is treated as the income of the settlor, not the trustees.[18]

(2) The trust is an IIP trust and the life tenant is non-resident.

It does not matter if the trustees do not qualify for relief in their own capacity, due to the UK beneficiary rule. The trustees may take the benefit of the non-resident individual's IT relief applicable to the settlor or life tenant.

45.10.1 *"Beneficiary"*

Section 812 ITA defines "beneficiary":

> (2) For the purposes of subsection (1) a person is a beneficiary of the trust if—
> (a) the person is an actual or potential beneficiary of the trust, and
> (b) condition A or B is met in relation to the person.
> (3) Condition A is that the person is, or will or may become, entitled under the trust to receive some or all of any income[19] under the trust.
> (4) Condition B is that some or all of any income under the trust may be paid to or used for the benefit of the person in the exercise of a discretion conferred by the trust.

At first sight it appears that a trust with power to add beneficiaries would not qualify for relief, since UK residents are potential beneficiaries. But such powers are standard form in offshore trusts, so if that were right, offshore trusts would not normally qualify. In practice I understand that HMRC do not take that point. But it would be different if there are UK

[18] See 47.9.2 (Non-resident trust, non-resident settlor).

[19] Income is in turn defined in s.812(5) ITA:

> "The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income."

residents:

(1) who expect to benefit (eg the settlor under a settlor-interested trust, or any other beneficiary under a letter of wishes); or
(2) who have benefited from the trust, and been excluded, but may be added to the class of beneficiaries again in the future.

45.10.2 *HMRC example*

The TSE Manual provides a straightforward example:

> **TSEM10220 effect of ITA/S811** [Aug 2019]
> ... *Example*
> Year 2013-14
> Income of non-resident trust:
> UK bank interest = £1,000. Tax deducted at source = NIL
> UK property income = £2,000. Tax deducted = NIL
> The trust is within ITA/S479, and all the beneficiaries (income and capital) are not resident in the UK for the year 2013-14. The provisions of ITA/S811 apply to cap the liability to income tax on bank interest.
> Income tax liability is limited to the sum of:
> (a) (ITA/S811(4) the income tax deducted from bank interest ('disregarded income') -NIL and
> (b) (ITA/S811(5) the income tax liability on property income - £2,000:
>
> Income chargeable at the standard rate band is £1,000 @ 20% = £200.
> Income chargeable at the trust rate = £1,000 @ 45% =£450
> The Income Tax liability is £650 for the year 2013-14.

45.11 Critique

Non-residents IT relief originated in a long standing concession, put on a statutory basis in 1995. As far as I know, no public discussion of the reasons for non-residents IT relief has taken place. Several different policy aspects can be identified.

(1) Tax competition considerations:
   (a) Non-residents are not likely to invest in UK securities if they had to pay progressive IT rates.
   (b) Even the imposition of basic rate tax may be a deterrent; this is typically dealt with by withholding tax exemptions which (together with non-residents IT relief) result in total exemption.[20]

[20] See 1.3 (Other tax competition).

(2) The practical difficulty in seeking to collect tax in excess of tax deducted at source. Tax collection would be possible in countries which have mutual assistance agreements so this is less of a problem than it once was. But perhaps collection may still not be easy. Also it would perhaps be odd to have one rule for the those countries and another for the rest of the world.

(3) Various policy considerations tend to suggest that higher and additional rates of UK tax ("progressive IT rates") are not appropriate for non-resident individuals:

   (a) Progressive rates of UK tax would not be applied to all non-residents income (most of their income may be foreign source income and not subject to UK tax).

   (b) Non-resident individuals are likely to be taxed in their country of residence, with credit for UK tax.

   (c) If every country applied its own progressive rates, taxpayers would have to fill in tax returns in as many countries as they held investments, which would be impractical for a worldwide portfolio.

   (d) Insofar as the right to tax is justified by the benefit principle,[21] the benefit provided to a non-resident individual is less than that provided by a UK resident.

These considerations form the basis for a general international acceptance that progressive rates are mainly a matter for the country of residence.[22]

Two important categories of UK income are not disregarded income: employment income and property income. These types of income do not qualify for non-residents IT relief and are therefore subject to progressive rates of tax if received by an individual.

The treatment of employment income is understandable since (1) tax competition may be less of a concern; (2) PAYE makes collection of tax easy in most cases; and (3) disparity compared to other employees might be regarded as unacceptable.

The treatment of property income is strange. Deduction at source on rent is limited to the basic rate, though enforcement of progressive rates would

[21] That is, the principle that in an equitable tax system, taxpayers should contribute in proportion to the benefits they receive from government expenditure.

[22] This view is expressed in "A Platform for Consultation" (Australia) para 30.61 (2010).

theoretically be possible because of the situation of assets in the UK (not to mention mutual enforcement treaties). In the past, the Inland Revenue did not attempt to collect progressive rates on UK property income of non-residents.[23] This is not the current practice, at least officially. However one wonders how often tax strictly due is actually collected. Of course well-advised non-residents will generally hold investment properties in non-resident companies, so there will not often be much progressive rate tax even strictly due.

Logically:

(1) the collection of tax at source rules on UK property ought to be extended to progressive rates, where land is vested in an individual or a trust; or (if this is thought to be too onerous to administer)

(2) property income ought to be disregarded income and so qualify for non-residents IT relief. Tax would be limited to deduction at source.

This aspect of non-residents IT relief reflects a lack of consistent thinking or an uneasy compromise between conflicting policy considerations.

The rule that non-residents IT relief effectively disallows personal allowances ensures that what can be deducted at source is retained in full, and simplifies administration for HMRC and for taxpayers.

[23] The point arose in *Burns v HMRC* [2009] UKSPC SPC00728 where HMRC argued that transfers of land from (supposedly) non-resident individuals to non-resident companies in 1980 and 1982 were made to avoid higher rate income tax on UK property income. The taxpayers argued that could not be correct, since the Inland Revenue did not collect higher rate tax. The Special Commissioner stated that in the 1980's there was "a certain level of expectation" that HMRC did not seek to collect higher rate tax on UK source rental income of non-residents. The practice was perhaps a routine blind eye, rather than anything more formal; though a thorough review of Inland Revenue files would be needed to find the answer.

46.1 NICs: Introduction

Of course NICs are a tax:

> It is now a common view, accepted by virtually all tax experts outside of HMRC and HM Treasury, that NICs are no more than an additional tax on earnings. There is just the slightest relationship between whether they are paid and rights to some benefits. There is almost no relation-

> ship at all between how much is paid and rights to anything. They are a tax.[1]

NICs should be regarded as a collection of seven (more or less) distinct taxes. They are numbered semi-numerically. Section 1(2) SSCBA summarises them but it is easier to read in a table:

Class: Section	**Payable by**
Earnings-related	
(a) *Class 1*: s.6	
(i) Primary class 1	employed earners
(ii) Secondary class 1	employers/persons paying earnings
(b) *Class 1A*: s. 10	persons liable to pay secondary Class 1 contributions/certain others
(bb) Class 1B: s.10A	persons accountable in accordance with a PAYE settlement agreement;
Flat-rate	
(c) *Class 2*: s.11	self-employed earners;
(d) *Class 3*: s.13, 13A	earners and others voluntarily, to obtaining benefits;
(da) *Class 3A*: s.14A	eligible people voluntarily, to obtain units of additional pension
(e) *Class 4*: s.15	in respect of profits/gains of a trade, profession or vocation, or
s.18	in respect of equivalent earnings.

The Institute of Directors say:

> To promote tax transparency, and in advance of ultimately merging income tax and national insurance contributions, the employees' contribution should be re-named 'earnings tax' and the employers' contribution 'employment tax'.[2]

That would be a good idea, and it might prevent misleading claims such as "We will take everyone earning less than £12,500 out of Income Tax altogether";[3] but there seems little prospect of it happening.

Each class of NIC needs a book to itself, except for class 1 which requires many volumes. I focus on matters closest to the themes of this book. I do not consider the special rules for mariners, aircrew, diplomats and service personnel.

SSCBA does not apply in Northern Ireland[4] so it refers to "Great

[1] Johnson, "Tax without Design: Recent Developments in UK Tax Policy" (2014) Fiscal Studies vol 35, p.243.

[2] Institute of Directors, "GE2015: The IoD's Key Priorities for Tax Reforms" (2015)

[3] Conservative Party Manifesto, 2015.

[4] Section 177(6) SSCBA provides: "Except as provided by this section, this Act does not extend to Northern Ireland."

Britain". (Northern Ireland has its own legislation, not discussed here.) SSCR applies throughout the UK, so it usually refers to the UK, or to "GB and Northern Ireland".

46.2 Employment/employed/self employed

46.2.1 *Employment/employed*

Section 122(1) SSCBA provides an artificial definition:

> "employment" includes any trade, business, profession, office or vocation and "employed" has a corresponding meaning

46.2.2 *Employed/self employed earner*

Section 2(1) SSCBA provides:

> In this Part of this Act and Parts II to V below—
> (a) "employed earner" means a person who is gainfully employed in Great Britain
> [i] either under a contract of service, or
> [ii] in an office (including elective office)[5] with general earnings; and
> (b) "self-employed earner" means a person who is gainfully employed in Great Britain otherwise than in employed earner's employment (whether or not he is also employed in such employment).

SSCBA, confusingly, (mis)defines the word "employment" to include trades and professions. But the terms "employed/self employed earner" are given (more or less[6]) their ordinary meanings.

In this chapter I use the word **"employee"** to mean an "employed earner" and **"self-employed"** means a "self-employed earner".

46.3 "Secondary contributor"

Section 6(4) SSCBA provides:

> The primary and secondary Class 1 contributions referred to in subsection (1) above are payable as follows—
> (a) the primary contribution shall be the liability of the earner; and

[5] The odd expression "elective office" is not defined and the words in brackets are otiose.

[6] To add to the confusion, SSCER deems some persons actually self-employed to be employees for NIC purposes and vice versa.

> (b) the secondary contribution shall be the liability of the secondary contributor; …

The identity of the secondary contributor is clearly crucial. Section 7(1) SSCBA provides:

> For the purposes of this Act, the "secondary contributor" in relation to any payment of earnings to or for the benefit of an employed earner, is—
>
> (a) in the case of an earner employed under a contract of service, his employer;
>
> (b) in the case of an earner employed in an office with earnings, either—
>
> (i) such person as may be prescribed in relation to that office; or
>
> (ii) if no person is prescribed, the government department, public authority or body of persons responsible for paying the earnings of the office...

SSCER reg. 5(1) prevents avoidance by foreign employers seconding to the UK:

> For the purposes of section 4 of the Act[7] (Class 1 contributions), in relation to any payment of earnings to or for the benefit of an employed earner in any employment described in any paragraph in column (A) of Schedule 3 to these regulations, the person specified in the corresponding paragraph in column (B) of that Schedule shall be treated as the secondary Class 1 contributor in relation to that employed earner.
>
> ...

Column (A) [Employment]	**Column (B)** [Secondary Contributor]
9 Employment- (a) (not being an employment described in sub-paragraphs (b) to (f)) by a foreign employer where the employed person, under an arrangement involving the foreign employer and the host employer, provides, or is personally involved in the provision of services, to a host employer;	9 Where the employment is- (a) employment within paragraph 9(a) of column (A), the host employer;

[7] Section 4 Social Security Act 1975 is now s.7 SSCBA.

(b) under or in consequence of a contract between a foreign agency and an end client where the worker provides services to that end client;	(b) employment within paragraph 9(b) of column (A), the end client;
(c) by a foreign employer where the worker provides services to an end client under or in consequence of a contract between that end client and a UK agency;	(c) employment within paragraph 9(c) of column (A), the UK agency who has the contractual relationship with the end client;
(d) by a foreign agency where the worker provides services to an end client under or in consequence of a contract between that end client and a UK agency;	(d) employment within paragraph 9(d) of column (A), the UK agency who has the contractual relationship with the end client;
(e) by a UK employer where the worker provides services to a person outside the UK under or in consequence of a contract between that person and a UK agency and the worker is eligible to pay contributions in the UK in relation to that employment; or	(e) employment within paragraph 9(e) of column (A), the UK employer or UK agency who has the contractual relationship with the person outside the UK; or
(f) by a foreign employer where the worker provides services to a person outside the United Kingdom under agency who has the contractual or in consequence of a contract relationship with the person between that person and a UK agency and the worker is eligible to pay contri-butions in the UK in relation to that employment.]	(f) employment within paragraph 9(f) of column A, the UK agency who has the contractual relationship with the person outside the United Kingdom;
	(g) employment within paragraphs 9(c) or (d) of column (A) and the end client provides at any time to the UK agency fraudulent documents in connection with the control, direction or supervision

Where the employment is as a mariner, this paragraph only applies where the duties of the employment are performed wholly or mainly in category A, B, C or D waters.]	which is to be exercised over the employed person, the end client; or (h) employment within paragraphs 9(c) or (d) of column (A) and a person who is resident in Great Britain (who is not the end client) with a contractual relationship with the UK agency provides at any time to the UK agency fraudulent documents in connection with the purported deduction or payment of contributions in connection with the employed person, the person who provides the fraudulent document.]

46.4 Territorial limitation: Outline

There are three categories:

(1) EU, EEA and Switzerland now governed by Brexit treaties
(2) Countries governed by specific bilateral Social Security agreements (Reciprocal Agreements & Double Contribution Conventions)
(3) Rest of the World: where neither TCA nor bilateral agreements apply.

46.5 Bilateral social security agreements

The NI Manual provides:

> **NIM33010 What is a Reciprocal Agreement?** [Apr 2019]
> A Reciprocal Agreement country is a country outside the EEA, including Switzerland, with which the UK has a bi-lateral convention on Social Security matters.
> The Social Security Conventions are more commonly referred to as Reciprocal Agreements.
> There are two types of Social Security Conventions:
> - A full Social Security Agreement which may include some benefit and health care provisions; or
> - A Double Contributions Convention (DCC) - these relate to contribution matters only and have no benefit or health care provisions.

> The countries with whom the UK has DCCs are: Canada, Japan, Republic of Korea, Chile
>
> Reciprocal Agreements are made between two countries to:
>
> - Give equality of treatment to people who are insured in one country and live or work in another country; and
> - Ensure that a person is not liable to pay Social Security Contributions in both countries for the same period.
>
> Each agreement is different.
>
> For a full list of all the countries with who the UK have agreements see NIM33012
>
> The UK also has Reciprocal Agreements with some countries in the EEA. In situations where it is not possible to apply European legislation then the Reciprocal Agreements may apply.
>
> **NIM33012 Reciprocal Agreement Countries** [Jul 2019]
>
> Barbados Bermuda Canada Chile Isle of Man Israel Jamaica Japan Jersey and Guernsey Republic of Korea Mauritius Philippines Turkey USA
>
> Republic of Former Yugoslavia (includes Bosnia-Herzegovina, Serbia, Kosovo, Montenegro, and the Republic of Macedonia). Croatia and Slovenia joined the EU in 2013 and 2004 respectively so the EC Regulations apply to those countries instead of the RA...
>
> **Isle of Man**
>
> The Isle of Man agreement is limited and liability is generally determined under place of residence.
>
> Contributions can only be paid in one country. As a general rule an employee will be insurable in the country where they work. Where a person falls within UK legislation they are treated as being ordinarily resident in the UK and are liable for Class 1 from the outset of employment in the UK.

I do not discuss reciprocal agreements in this book.

46.6 ROW: Employed in GB

I turn to consider what the NI Manual calls "ROW" (rest of the world) rules.

Unless the individual is employed *in* GB, they are not an employed or self-employed earner, and so in principle no NIC liability arises.[8] I refer to this as the "**GB employment rule**".

Tax Bulletin 79 explains:

[8] See 46.2.2 ("Employed" and "self-employed").

> This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed.

46.6.1 *UK board meetings concession*

CA44 (2023/24) (National Insurance for company directors) provides:

> A director, who is neither resident nor ordinarily resident in the UK:
> - comes to the UK from a country with which the UK does not have a social security agreement
> - the only work the director does in the UK is to attend board meetings
>
> We'll not seek payment of UK NICs if:
> - they attend no more than 10 board meetings in a tax year and each visit to the UK during which a board meeting takes place lasts no more than 2 nights
> - there is only 1 board meeting in a tax year and the visit to the UK during which that board meeting takes place lasts no more than 2 weeks
>
> If the director's attendance for board meetings does not fit the criteria above, the special concession will not apply.

46.6.2 *First year abroad*

Reg. 146 SSCR provides an extension to the GB employment rule:

> (1) Where
> [a] an earner is gainfully employed outside the UK, and
> [b] that employment, if it had been in Great Britain or Northern Ireland, would have been employed earner's employment,
>
> that employment outside the UK shall be treated as employed earner's employment for the period for which under para (2)(a) contributions are payable in respect of the earnings paid to the earner in respect of that employment provided that—
>
> (a) the employer has a place of business in Great Britain or Northern Ireland (as the case may be);
> (b) the earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be); and
> (c) immediately before the commencement of the employment the earner was resident in Great Britain or Northern Ireland (as the case may be).
>
> (2) Where, under para (1), the employment outside the UK is treated as an employed earner's employment, the following provisions shall apply

in respect of the payment of contributions—

(a) primary and secondary Class 1 contributions shall be payable in respect of any payment of earnings for the employment outside the UK during the period of 52 contribution weeks from the beginning of the contribution week in which that employment begins to the same extent as that to which such contributions would have been payable if the employment had been in Great Britain or Northern Ireland (as the case may be);

(b) subject to regulations 148 and 148A, any earner by or in respect of whom contributions are or have been payable under sub-para (a) shall be entitled to pay Class 3 contributions in respect of any year during which the earner is outside the UK from and including that in which the employment outside the UK begins until that in which he next returns to Great Britain or Northern Ireland (as the case may be);

(c) Class 1A contributions and Class 1B contributions shall be payable in respect of the period specified in sub-para (a).

In short, employment outside the UK is treated as employment in the UK (and so subject to NIC) for 52 weeks, provided the following conditions are satisfied:

(1) The employer has a place of business in the UK.
(2) The employee is ordinarily resident in UK.
(3) The employee was UK resident immediately before the employment commenced.

NI Manual provides:

> **NIM33535 people going to or coming from abroad: row: change of employment** [Dec 2018]
>
> **Change of employment overseas with the same employer**
>
> The 52 week period of continuing liability may cease when an employee changes employment. Whether or not an employee has entered into a new employment will be a question of fact. The contracts of employment will indicate if this were so.
>
> **Example**
>
> - Ralph was posted by the UK company to work in Australia for a period of 2 years as a General Manager of the Sydney office
> - After 6 months he applied for promotion as a Overseas Sales Executive with a separate department of the UK company
> - He was successful and immediately took up his new position in Malaysia
>
> The subsequent posting from Australia to Malaysia would be considered

> to arise in connection with the new employment with the UK Company. The 52 week period would cease.
>
> Had the UK employer simply posted him to Malaysia in connection with the original occupation/employment as a General Manager then the 52 week period would have continued in full.

The position depends on the documentation relating to the contract of employment.

HMRC say:

> The 52 week contributions rule will not apply to individuals working between the UK or an EU/EEA State or Switzerland after Brexit. Payment of National Insurance will be determined under the retained EU social security coordination rules.[9]

46.7 ROW: Residence requirements

Section 1(6) SSCBA provides a supplement to the GB employment rule:

> No person shall—
>
> (a) be liable to pay Class 1, Class 1A, Class 1B or Class 2 contributions unless he fulfils prescribed conditions as to residence or presence in Great Britain;
>
> (b) be entitled to pay Class 3 contributions unless he fulfils such conditions; or
>
> (c) be entitled to pay Class 1, Class 1A, Class 1B or Class 2 contributions other than those which he is liable to pay, except so far as he is permitted by regulations to pay them.

Reg. 145 SSCR provides five different sets of residence requirements.

46.7.1 *Primary Class 1 NIC*

Reg. 145(1)(a) SSCR provides that the requirement is:

> as respects liability of an employed earner to pay primary Class 1 contributions in respect of earnings for an employed earner's employment, that the employed earner is
>
> [i] resident or present in Great Britain or Northern Ireland
>
> [ii] (or but for any temporary absence would be present in Great Britain or Northern Ireland)
>
> at the time of that employment or
>
> [iii] is then ordinarily resident in Great Britain or Northern Ireland (as

[9] Expat forum EU Exit QA log, May 2019 (circulated informally).

the case may be).

There are four possible territorial connections, and if any one of them is satisfied Primary Class 1 NIC is in principle payable:

(1) Residence in UK.
(2) Presence in UK.
(3) Temporary absence from UK.
(4) Ordinary residence in UK.

Tax Bulletin 79 explains:

> The effect of Regulation 145 (1) SSCR 2001 is to provide for a kind of constructive presence for periods outside the UK which are merely a "temporary absence". This concept of temporary absence requires that:
>
> i. the person's absence be temporary,
> ii. that if he were not absent he would be present in the UK.
>
> This means that an employee who has employment based in the UK who goes abroad for a time on a short business trip or holiday abroad, and who departs from or returns to the UK, can continue to be within the UK scheme.
>
> An example of this would be the person who flies to a board meeting outside the UK and then returns to their UK based employment.

That seems obvious. The Bulletin continues:

> Taken together, Section 2(1)(a) SSCBA 1992 and Regulation 145 (1)(a) SSCR 2001 is enough to keep a person within Class 1 NIC if their employment is based here and their absence abroad is of a temporary or incidental nature. However, crucially, an employee who is not ordinarily resident in the UK and who normally works overseas cannot be said to be merely "temporarily absent" from employed earners employment in the UK if they are departing overseas for a time, to work for their foreign employer. In such a situation, the person is not performing duties which is merely incidental to the employed earner's employment in the UK but is returning to an employment based outside the UK. In the absence of an express contractual provision as to the attribution of the earnings, the earnings must be apportioned between the employed earner employment in the UK and the overseas duties for the foreign employer.

46.7.2 *First year in UK exemption*

Reg. 145(2) SSCR provides an exception, in a sentence so long and convoluted that it almost makes one appreciate the style of the Tax Law

Rewrite:

> Where
> [1] a person is ordinarily neither resident nor employed in the UK and,
> [2] in pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK (whether or not he also has a place of business in the UK) that person is employed for a time in Great Britain or Northern Ireland (as the case may be) as an employed earner and,
> [3] but for the provisions of this paragraph, the provisions of sub-para (a) of para (1) would apply,
> [4] the conditions prescribed in that sub-paragraph and in sub-para (b) of that paragraph shall apply subject to the proviso that—
>
> (a) no primary or secondary Class 1 contribution shall be payable in respect of the earnings of the employed earner for such employment;
> (b) no Class 1A contribution shall be payable in respect of something which is made available to the employed earner or to a member of his family or household by reason of such employment; and
> (c) no Class 1B contribution shall be payable in respect of any PAYE settlement agreement in connection with such employment,[10]
>
> after the date of the earner's last entry into Great Britain or Northern Ireland (as the case may be) and before he has been resident in Great Britain or Northern Ireland (as the case may be) for a continuous period of 52 contribution weeks from the beginning of the contribution week following that in which that date falls.

In short, employment in the UK is not subject to NIC for 52 weeks provided the following conditions are satisfied:

(1) employee not ordinarily resident in UK;
(2) employee not ordinarily employed in UK;
(3) employment mainly outside the UK;
(4) employer has a place of business outside the UK.[11]

[10] I have corrected a disastrous typographical error in the SSCR by inserting a paragraph break here. The last paragraph (beginning "after the date") governs paras (a), (b) and (c). This can be seen to be correct from context and by comparing the predecessor, reg.119(2) SSCR 1979.

[11] It might be inferred that the relief only applies if the employer's principal place of business is outside the UK, but the better view is that any place of business outside the UK is sufficient, and this is consistent with reg.146(2).

NI Manual provides:

NIM33515 people going to or coming from abroad: row: exemption [Jul 2019]

Regulation 145(2) SSCR 2001

This regulation provides exemption from the payment of primary and secondary Class 1 NICs for posted workers arriving in GB for a continuous period of 52 contribution weeks provided the worker is

- not ordinarily resident in GB; and
- not ordinarily employed in GB; and
- in pursuance of an employment that is mainly outside the UK;
- by an employer with a place of business outside the UK; and
- is employed for a time in GB as an employed earner

The exemption lasts until the employee has been resident in GB for a continuous period of 52 weeks starting from the beginning of the contribution week following the week in which the worker arrives in GB to take up employment.

A further 52 week period may commence where an employee returns to the overseas employment and then commences a new secondment in GB

The exemption does not apply to:

- EEA nationals as this would contravene the principle behind Regulation 883/04 see NIM33020
- RA countries where a person is treated as being ordinarily resident in the UK if they fall within UK domestic legislation see NIM33400
- To decide whether a person coming to the UK is ordinarily resident in the UK for NIC purposes, apply the tests suggested in NIM33505 and NIM33510.

NIM33520 example [Feb 2017]

A doctor works for a hospital in Egypt as a surgeon and sees an advert in a medical journal for surgeon's position in Newcastle for a 2 year period. The position will enable him to obtain further advanced surgical qualifications.

He applies and is successful. The Egyptian employer agrees to keep his employment position open until he returns. The doctor signs a contract of employment with the hospital in Newcastle for two years.

In this case the 52 week exemption tests are satisfied. He is not ordinarily resident or employed in GB. He is employed for a time in GB as an employed earner. A major indicator in this example is the continuing employment in Egypt and the employee being able to return after the period of employment in GB.

In order to satisfy the "in pursuance of employment" test the employment in GB must be related to the particular employment that the employee has outside of GB. The fact that the employee may be pursuing their own goals is not relevant. It is characteristic of much skilled work that the employer's interests in a person's improved skills will coincide with the employee's interest in advancing their career and marketability. Provided that the facts support that the employment in GB and obtaining of advanced qualifications (in this case advanced surgical qualifications) are required for the employment abroad then the test may apply

A different conclusion may have been reached if the employment and qualifications obtained in GB were diverse from the employment in Egypt.

46.7.3 *Secondary Class 1, 1B, NICs*

Reg. 145(1)(b) SSCR provides that the requirement is:

> as respect[12] liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions
>
> [i] that the person who, but for any conditions as to residence or presence in Great Britain or Northern Ireland (as the case may be and including the having of a place of business in Great Britain or Northern Ireland),[13] would be the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as "the employer") is
>
> [A] resident or
>
> [B] present
>
> in Great Britain or Northern Ireland when such contributions become payable or
>
> [C] then has a place of business in Great Britain or Northern Ireland (as the case may be),
>
> [ii] so however that nothing in this paragraph shall prevent the employer paying the said contributions if he so wishes.

Thus there are three possible connecting factors and if any of them is satisfied, secondary Class 1 NIC is due:

(1) employer resident in UK
(2) employer present in UK
(3) employer has a place of business in UK

The first year in UK and student exemptions may apply.

46.8 Class 1 NIC: HMRC examples

Tax Bulletin 79 provides:

[12] This is a slip for "*as respects* …" but nothing turns on that.

[13] The long phrase beginning "but for" (and continuing to the close of brackets which follows) appears to be otiose. The paragraph means:

> "as respects liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who is the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as 'the employer') is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland …"

Example 1 (Angus)

Sent from ROW country to work in the UK - contractual employer in ROW country but seconded to the UK "host" employer.

An Australian employer assigns A, who normally works in Australia to the UK for 2 years. Residence status is resident in the UK but not ordinarily resident in years 1 and 2.

A meets the criteria for a 52 weeks exemption from NIC because he is not ordinarily resident in the UK and he is not ordinarily employed in the UK and is working for his overseas employer and is in the UK in continuance of that employment. His Australian employer has no place of business in the UK.

Once the first 52 weeks period in Regulation 145(2) SSCR 2001 has expired, A will become liable for contributions in the UK. As his contractual employer has no place of business in the UK, the UK "host" employer to whom personal service is made available is the secondary contributor - liable for the employer part of the National Insurance. [Para 9 to Regulation 3, Social Security Categorisation of Earners Regulations 1978].

When he is in the UK, A is in employed earner's employment and meets the residence criteria in Regulation 145 (1) SSCR 2001 because he is present in the UK at the time of his employment.

A makes a short trip back to Australia in year 2 to brief the Australian company.

After 14 months in the UK, A returns to Australia for the month of June - 20 days holiday and 5 days working for the Australian company. He then returns to the UK to complete the rest of his assignment. A remains under contract to the Australian company and the costs of his employment in the UK is met by the Australian employer. There is no apportionment of salary specified in the contract. There can be apportionment of his salary for the days working outside the UK.

When A is in earners employment in the UK he is liable for NICs on his salary because he meets the criteria of residence and presence in Regulation 145 (1) SSCR 2001.

When in Australia, A is not in employed earners employment in the UK - his employment is one which is normally based outside the UK - so that the days working in Australia are not an incidental part of employed earners employment in the UK.

What if the employment had been funded by the UK company?

We would consider this a strong indicator that A was performing his duties in Australia for the purposes of the business of the UK "host" employer and his time in Australia was merely a "temporary absence" from employed earner's employment for the purposes of Regulation 145(1) SSCR 2001.

What if there is a letter of secondment - attaching A to his UK employer?

We consider that this would be a strong indicator that A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in Australia are incidental to the employment in the UK for which he is paid his salary.

What if A had travelled to China for 3 days to act on behalf of the UK company?

A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in China are incidental to the employment in the UK. No apportionment is required.

What if A had travelled to China for 3 days to act on behalf of the Australian company?

The duties are not further to the employment in the UK and cannot be regarded as merely a temporary absence. An apportionment is required.

What if A has been sent to the UK and become ordinarily resident here?

If A's normal base is the UK he will be in employed earner's employment in Great Britain. As he is ordinarily resident he meets the residence criteria in Regulation 145(1) SSCR 2001 - the duties in Australia are merely incidental to the employment in the employed earner's employment in the UK for which he is paid his salary. No apportionment is required.

Exactly how many days amounts to a "temporary absence"?

Whether an absence is a temporary absence is a question of fact and degree, which depends upon the nature of the circumstances. Examples of what we would consider to be temporary absence would include short business trips or holidays.

Method of Time Apportionment

In the absence of contractual provision, there is to be an apportionment between UK and non-UK workdays under Section 2 of the Apportionment Act 1870. Under the Apportionment Act, salary accrues on a daily basis. The earnings are to be multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment – in a full year this will be 365 days.

Where the employee is monthly or weekly paid, the computation has to take account of the "pay period" basis for computing NIC.

Example 2 (Patel)

Mrs P is ordinarily resident in India and is sent to the UK by her employer to work in the UK at the offices of a UK company which is part of the group. She remains under contract to the Indian employer and the Indian employer bears the cost of the employment. Her salary is £100,000. Her employer recalls her to India to advise on a hostile take-over for a period of 5 days - From 1 June until 5 June. The substantial part of 2 of those days is spent flying to India and back.

The earnings are multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment.

If Mrs P has an annual pay period, then the appropriate fraction can simply be applied to her annual salary.

Gross Pay £100,000×5/365

Amount attributable to overseas workdays less £1369.87

NIC is operated on the gross pay attributable to the UK £98,630.13

However, if Mrs P is monthly paid, the employer has to account for NIC each month as a payment is made, and is unable to "look back" over a year and know what percentage needs to be applied. So the apportionment has to be done in the monthly pay period.

In June, no NICs are due on the salary paid in respect of the work in India.

The earnings on which NICs are to be calculated are those for the month of June – after an apportionment to take account of the 5 days which were not in respect of the employed earners employment.

Monthly salary £8333.33×5/365×100,000 less £1369.87

Amount attributable to non-UK workdays £1369.87

NIC is operated on the monthly gross pay attributable to the UK **£6963.46**

Holidays

If Mrs P were to take a holiday in India, the holiday may need to be brought into the calculation of non-UK workdays in the apportionment – depending on the contractual provisions and whether the holiday is attributable to the UK or overseas employment.

In Example 2, if in June Mrs P took 10 days holiday in India – in the absence of contractual provisions setting out how holiday accrues, these would be added to the 5 days working in India:

Salary £8333.33×15/365×£100,000

amount attributable to non-UK workdays = £4109.59

Earnings in the Month on which NIC must be operated = £4223.74

What about part of a day worked in the UK and part overseas?

We operate the practice in SP 5/84 with regard to days spent working partly in the UK and partly outside the UK. That is to say, if a day is substantially worked overseas for the overseas business then it will count as a non-UK work day in the apportionment computation. Where an employee spends a whole day working in the UK but then leaves the country that evening on an overseas business trip, it would be difficult to say as a matter of contract that the employee's emoluments for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the emoluments for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

Records

Employees are required to retain evidence such as travel documents and business diaries to demonstrate how they have calculated non-UK workdays for tax. Where records of "non-UK workdays" for tax have been kept, these may be used as the basis for identifying non-UK days for National Insurance.

Expats forum Q&A log provides:

Employee of UK company who is based overseas, but visits the UK

Question: We have recently received several queries from different UK companies regarding the National Insurance position in relation to employees who are based overseas and usually perform their work duties in a country which is outside the EU and does not have a reciprocal social security agreement with the UK (for example, South Africa). However, these employees are required to visit the UK for a small number of days each year (between 10 and 30 workdays per annum).

Based on our understanding of the facts, all of the employees concerned are not ordinarily resident in the UK. This is because they continue to live overseas, together with their family, and maintain a home overseas, and merely stay in hotels in the UK when required to stay overnight for work purposes. However, we understand the 52 week exemption under regulation 145(2) of Social Security (Contributions) Regulations 2001 would not apply, as they are employed by a company with a place of business in the UK.

In accordance with our review of the applicable legislation and the publication Tax Bulletin 79, we understand that there is no liability to pay Class 1 National Insurance unless there is an employed earners employment (or employment treated as employed earners employment) here in the UK. Accordingly, an individual is defined as an "employed earner" by Section 2(1)(a) of the Social Security Contributions and Benefits Act, which states:

… "employed earner" means a person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office) with general earnings…

As such, in order to confirm whether a liability to Class 1 National Insurance is applicable, we have concluded it is necessary to determine whether such employees fulfil the criteria of being 'gainfully employed in Great Britain' under their UK employment contract. We understand this phrase is not defined in legislation, and therefore takes its ordinary meaning.

A view as to the meaning is expressed in Tax Bulletin 79 (which, although archived, is not marked as superseded), as follows:

An employed earner is defined in Section 2(1)(a) as a "person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office) with general earnings chargeable to income tax under ITEPA 2003".

This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed. Based on above interpretation provided in Tax Bulletin 79, we understand that the employees concerned would be 'gainfully employed in Great Britain' only when the employment duties physically take place in the UK and are usually performed here. In this regard, any temporary or incidental duties performed in the UK would be ignored.

In addition, the employees concerned would not be captured by reg. 146, as they are not ordinarily resident in the UK and therefore cannot be treated as performing an employed earner's employment here. Therefore, we should be grateful if you could confirm our opinion that the employees concerned would not be liable to pay Class 1 National Insurance on their earnings from the UK company.

HMRC answer:

Each case must be considered on its own facts however, Regulation 145 of the SSCR sets out, for the purposes of section 1(6) of the Social Security Contributions and Benefits Act 1992, the conditions as to residence or presence in Great Britain or Northern Ireland for the purposes of liability or entitlement to pay National Insurance contributions. Regulation 145(2) of the SSCR also provides for a limited exemption from paying Class 1 NICs (for up to 52 weeks) for workers coming to work in the UK for a time from a country outside of the

European Economic Area (EEA), or with whom there is no reciprocal agreement on social security - in other words those coming to the UK from somewhere we categorise as being a "rest of the world" country.

In order for the exemption at regulation 145 (2) of the SSCR to apply, all of the following conditions must be met:

- The person is not ordinarily resident in the UK, and
- The person is not ordinarily employed in the UK, and
- In pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK, and
- The person is employed in the UK for a time

From the information provided, the employees referred to would not meet all of the above criteria for the exemption in regulation 145 (2) of the SSCR to apply. In particular, whilst working in the UK they are not pursuing employment which is mainly employment outside the UK by an employer whose place of business is outside the UK. In fact, whilst back in the UK working they are actually working in the UK for their UK employer. As such, the exemption provided by regulation 145(2) would not apply. Furthermore, whilst in the UK they will be 'present' in the UK for the purposes of regulation 145(1)(a) SSCR which provides that a liability for primary (employee) Class 1 NICs will arise on any earnings they receive. The UK employer, having its place of business here, would also have a liability for secondary Class 1 NICs on those earnings under regulation 145(1)(b) SSCR.[14]

46.9 ROW: Class 2 NIC

Reg. 145(1) SSCR provide that the requirements are:

> (c) as respects entitlement of a self-employed earner to pay Class 2 contributions, that that earner is present in Great Britain or Northern Ireland (as the case may be) in the contribution week for which the contribution is to be paid;
>
> (d) as respects liability of a self-employed earner to pay Class 2 contributions, that the self-employed earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be), or, if he is not so ordinarily resident, that before the period in respect of which any such contributions are to be paid he has been resident in Great Britain [or Northern Ireland][15] (as the case may be) for a period of at least 26 out of the immediately preceding 52 contribution weeks under the Act, the Social Security Act 1975 or the National Insurance Act 1965 or under some or all of those Acts.

[14] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expat-Forum-Tax_NICs_minutes-11-June-2020.pdf*

[15] These words are omitted (presumably accidentally) from the SSCR but the context requires them.

Thus there are two possible connecting factors and if either is present, Class 2 NIC is due:

(1) ordinary residence in UK;
(2) residence for 26 out of 52 contribution weeks.

46.10 ROW: Class 3 NIC

Reg. 145(1)(e) SSCR provides that the requirement is:

> as respects entitlement of a person to pay Class 3 contributions in respect of any year, either that—
>
> (i) that person is resident in Great Britain or Northern Ireland (as the case may be) throughout the year,
>
> (ii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and has been or is liable to pay Class 1 or Class 2 contributions in respect of an earlier period during that year,
>
> (iii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and was either ordinarily resident in Great Britain or Northern Ireland (as the case may be) throughout the whole of that year or became ordinarily resident during the course of it, or
>
> (iv) that person not being ordinarily resident in Great Britain or Northern Ireland (as the case may be), has arrived in that year or the previous year and has been continuously present in Great Britain or Northern Ireland (as the case may be) for 26 complete contribution weeks, entitlement where the arrival has been in the previous year arising in respect only of the next year.

46.11 Place of business in UK

Tax Bulletin 49 provides:

> **Place of business in UK**
>
> We would normally accept as a strong indication that there is a place of business in the UK if a company is registered under the Companies Act 1985.[16] But whether there is a place of business in the UK is a question of fact based on the individual case. Case law has shown that a company establishes a place of business in the UK if it carries on part of its business here. Such business activity need not be either a substantial

[16] [Author's Note] Regulations made under s.1043 Companies Act 2006 impose a registration duty on a foreign incorporated company which establishes a place of business in GB; Northern Ireland has equivalent legislation.

> part of, or more than incidental to, its main objects (*South India Shipping Corporation v Export-Import Bank of Korea* [1985] 2 AER 219). However there must be a more or less permanent location, not necessarily owned or leased by the company but associated with the company, from which its business is conducted habitually or with some degree of regularity (*Re Oriel* [1985] 3 AER 216). In Canadian law the premises of a group company are not sufficient in themselves to be a place of business for another group member (*Imperial Oil v Oil Workers International* 69 WWR 702).
>
> We would not seek to claim in isolation that there is a place of business where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK business.[17]

46.12 Residence and ordinary residence

The NIC legislation does not define residence or ordinary residence. For residence, the NI Manual states:

> **NIM29009 DL Conditions of domicile or residence** [Feb 2017]
>
> You should operate Residence, Domicile and Remittance Basis Manual guidance in deciding whether a person is domiciled or resident. Any difficulties on residence should be submitted to Marine NICs in Cardiff (see NIM29034).

For residence, the pre-SRT IT rules should strictly speaking be applied, but in practice I expect close regard will be had to the SRT (which is supposed to represent the former common law rules).

For ordinary residence, the NI Manual states:

> **NIM33560 Meaning of "ordinarily resident" – Factors to consider** [Jul 2019]
>
> ... In considering whether a person is "ordinarily resident", you should take into account the following factors,
>
> - Will the person be returning to Great Britain or Northern Ireland during the period of employment abroad?
> - Will the person's family - spouse/partner and/or children - be staying in the UK?
> - Will the person retain a home in Great Britain or Northern Ireland during their period abroad?

[17] This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.

> - If the person retains a home, will it be available for their use when they return?
> - Will the person be returning to Great Britain or Northern Ireland at the end of the period abroad?
>
> The list is not exhaustive but, answering yes to any, or all, of the above questions is an indicator the individual remains "ordinarily resident". Answers of no would indicate it is less likely that the person will remain ordinarily resident.
>
> Additional questions you could consider include;
>
> - How long has the person lived in Great Britain or Northern Ireland prior to going abroad?
> - What will be the purpose(s) of the any return visit(s)?
>
> For guidance on the definition of "ordinarily resident" for tax purposes, see the Residence, Domicile and Remittance Basis Manual, RDRM.

The seven factors are unhelpful as no guidance is given how to deal with the practical problems when different factors point in different directions.

There are no statutory provisions on ordinary residence so case law is all we have. The leading case is *R v Barnet LBC ex p Shah.*[18] This is not a tax case but the expression “ordinary residence” is said to have a natural and ordinary meaning which is the same in tax and non-tax contexts.[19]

In *Shah* the House of Lords noted that ordinary residence was distinct from domicile and rejected a “real home” test (which was similar to a domicile test).

What is the test? A number of dicta were approved, saying (more or less) the same thing in different words:

> I think that [ordinary residence] connotes residence in a place with some degree of continuity and apart from accidental or temporary absences.[20]

> “Ordinarily resident” refers to a man’s abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or long duration.[21]

The important requirement is the residence must have the degree of

[18] [1983] 2 AC 309. The case is noteworthy for the fact that oral argument over the two words "ordinarily resident" lasted 9 days.

[19] *Shah* at p.340.

[20] *Shah* at p.341 citing Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.528.

[21] *R v Barnet LBC ex p. Shah* [1983] 2 AC 309 at p.343. This passage has often been cited with approval.

continuity, or in other words, it must be "for settled purposes." What does that mean?

> There must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled.[22]

46.12.1 *Accommodation*

Turberville at [9] notes that accommodation held long term is consistent with being non-ordinarily resident:

> We consider the retention of the house and flat in the UK as fairly neutral; he had retained these (or predecessor properties) throughout the time he was working abroad.

Accommodation is however a relevant factor in deciding whether a person is "settled".

46.12.2 *Minimum period*

One would have thought that if a person settled in a country, they became ordinarily resident immediately. This was the view expressed in HMRC. In *Tuczka v HMRC*[23] however the Upper Tribunal suggested that there was a minimum time (though the minimum is not very long):

> 12. ...After referring also to the dicta in the tax cases, Lord Slynn concluded that it was "plain that as a matter of ordinary language a person is not habitually resident in any country unless he has taken up residence and lived there for a period." Lord Slynn continued (at 1942G-1943B):
>
> > "It seems to me impossible to accept the argument at one time advanced that a person who has never been here before who says on landing, "I intend to settle in the UK" and who is fully believed is

[22] *Shah* at p.344.

[23] [2011] UKUT 113 (TCC).

> automatically a person who is habitually resident here. Nor is it enough to say I am going to live at X or with Y. He must show residence in fact for a period which shows that the residence has become "habitual" and, as I see it, will or is likely to continue to be habitual...
>
> The requisite period is not a fixed period. It may be longer where there are doubts. It may be short (as the House accepted in *In re S (A Minor) (Custody: Habitual Residence)* [1998] A.C. 750, my speech at p.763A, and *F (A Minor) (Child Abduction)* [1992] 1 FLR 548, 555, where Butler-Sloss L.J. said: "A month can be ... an appreciable period of time")."
>
> 13. Even assuming for the purpose of argument that "habitually" and "ordinarily" mean the same thing, we do not regard *Nessa* as in any way departing from Lord Scarman's clear rejection of any requirement to establish an intention to reside permanently or for an indefinite period. All that *Nessa* established in that regard is that a person would not qualify as "habitually resident" immediately on arrival, save in a case where he resumed his previous habitual residence. Some period of time is therefore needed to establish "habitual residence". But the fact that this period need not be long can be seen not only from Lord Slynn's reference to the observation of Butler Sloss LJ quoted above but from the resolution of the *Nessa* case itself. The House of Lords upheld the decision of the Court of Appeal that the case be remitted for rehearing before a social security appeal tribunal to determine whether the claimant had established habitual residence by the date of the initial tribunal hearing (ie, 6 December 1994, and thus less than four months after her arrival in the UK) or "even earlier": see at 1943D.

This overlooks the fact that the question of ordinary residence is determined with an element of hindsight: see 9.16.2 (Enquiry period: Habitual abode). It is considered that there is no minimum period.

46.12.3 *Intention*

In *Shah*, Lord Scarman said:

> There are two, and no more than two, respects in which the mind of the "propositus" is important in determining ordinary residence. The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is.

The "voluntary" requirement does not have much practical role to play, as it only concerns imprisoned, kidnapped or shipwrecked taxpayers.[24]

The speech continues:

> And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled. The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose.

In *Tuczka v HMRC* [2010] UKFTT 53 the tribunal said:

> The test requires objective examination of immediately past events, and not intention or expectation for the future ([1983] 2 AC 309 at 345).

It is considered that the concept of being "settled" necessarily requires an examination of intention or expectation for the future.

46.12.4 *Acquiring ordinary residence*

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) the taxpayer came to the UK to work and intended to stay 33 months (2.5 years). There were other facts which suggested he was settled, in particular that his girlfriend came

[24] "The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is." *Shah* at p.344.

to join him.

It was argued that an intention to reside here for that period was too short to constitute a "settled purpose". The argument was rejected. Even a period of just over one year could be sufficient.[25]

46.12.5 *Losing ordinary residence*

In *Turberville v HMRC* [2010] UKFTT 69 the taxpayer left the UK in July 2001 to work abroad. The taxpayer remained ordinarily resident until July 2001 even though he had formed the intention to leave earlier, in February 2001:

> 8. In relation to 2001-02, while it was clear in February 2001 that he would go to Dallas in July 2001 we do not consider that this changes the quality of his residence between 6 April 2001 and 30 June 2001, which was a continuation of his residence during the previous four tax years. Although it was then known that such residence would cease about 1 July 2001 it was nevertheless part of his residence for settled purposes and the fact that the Appellant's state of mind was such that he would be leaving the UK at around that time does not, until his actual departure, alter the position.

In July 2001 the taxpayer ceased to be ordinarily resident.

In October 2001 the taxpayer unexpectedly lost his job, but remained non-ordinarily resident. The judgment at [8] continues:

> From the date of actual departure, we consider that in deciding whether there was then a distinct break one should look at the position as it was in July 2001 without the benefit of hindsight. The three-year employment contract coupled with his expenditure on furnishing the apartment rented by his employer point to a distinct break.

In the absence of purchase of accommodation, three years has traditionally been regarded as the period of residence which is sufficient to amount to settled.

46.12.6 *Habitual/ordinary residence compared*

Schuz explains the concept of "Habitual residence"

> Habitual residence has been chosen as the main connecting factor in

[25] At [17] citing relying on *Reed v Clark* quoted at [15]; but *Clark* was not considering ordinary residence of the taxpayer (which was not an issue).

> many of the multinational conventions concluded under the auspices of the Hague Conference on Private International Law for nearly one hundred years.[26] It is now also used in other international conventions and in the domestic legislation of a number of countries, including England and Canada. However, there was very little discussion as to the meaning of the concept until the explosion of litigation under the Hague Convention on the Civil Aspects of Child Abduction began in the 1980s. Under this Convention, the determination of habitual residence is often critical to the outcome of an application for the return of the child in international abduction cases.[27]

The term is not found in tax legislation.

If the concept was the same as "ordinary residence" then cases on habitual residence might be valuable for tax. In principle the terms habitual residence and ordinary residence could be regarded as synonymous. The natural meaning of the two expressions is the same (or at least, equally vague). However the case law has not been consistent. In some cases the expressions are regarded as the same.[28] Some cases suggest that habitual residence is "something more than" ordinary residence,[29] though that "something more" is elusive. It has been said that the concepts merely share a "common core of meaning".[30] In the context of the Hague Abduction Convention, at least, "habitual residence" has been held to have an autonomous meaning (ie a meaning distinct from that in the domestic law of the parties to the Convention) and the Supreme Court refused to follow *Shah*.[31]

While it would be desirable that a person's habitual residence and ordinary residence should be in the same place for all purposes, the desire for conceptual simplicity should not override the need to give effect to the purpose of the legislation in question.

In any case, the authorities on "habitual residence" do not provide a clear

[26] It was first used in the Hague Convention on Guardianship in 1902, and is the main connecting factor in the Hague Convention on Jurisdiction and Foreign Judgments in Civil and Commercial Matters.

[27] Schuz, "Policy Considerations in Determining the Habitual Residence of a Child and the Relevance of Context" (2001) 11 Journal of Transnational Law and Policy 101, *https://papers.ssrn.com/sol3/papers.cfm?abstract_id=270991*

[28] *Mark v Mark* [2005] UKHL at [33].

[29] *Cruse v Chittum* [1974] 2 All ER 940 at p.943.

[30] *Nessa v Chief Adjudication Officer* [1999] 1WLR 1937 at p.1941.

[31] *A v A* [2014] AC 1 at [54].

definition or explanation of the term, and the authorities on the Abduction convention are best understood in the light of the policy considerations relevant to abduction.[32] In borderline cases, at least, the meaning of the term will vary according to the context. In a family law context, at least, the words are regarded as distinct:

> ... the Law Commissions deliberately adopted "habitual" rather than "ordinary" residence, because the latter frequently occurred in tax and immigration statutes and they thought that its use in the wholly different context of family law was a potential source of confusion.[33]

46.12.7 *Residence/ordinary residence compared*

Tuczka significantly reduced the difference between residence (the common law, pre-SRT concept) and ordinary residence or (if one prefers) it shows that the difference is not as great as had generally been thought:

> [18] Nor is it correct to suggest that a finding that Dr Tuczka was ordinarily resident in the UK in the tax year 1998-99 erodes a fundamental distinction between the concepts of residence and ordinary residence. The distinction is not as wide or as basic as the present appellant seeks to suggest. Hence, in *Levene*, Viscount Cave LC stated at p507:
>
> > "The expression "ordinary residence" is found in the Income Tax Act of 1806 and occurs again and again in the later Income Tax Acts, where it is contrasted with the usual or occasional or temporary residence; and I think that it connotes residence in a place with some degree of continuity and apart from accidental or temporary absences. So understood, the expression differs little in meaning from the word "residence" as used in the Acts..."

Unless the courts step back from this, HMRC6 was more generous than the law on the subject.

Ordinary residence needs to be reviewed in the light of *Carey v HMRC* [2015] UKFTT 466; *Ward v HMRC* [2016] TC 04902; *Milton Keynes*

[32] Habitual residence is "a question of fact to be determined by the circumstances of each case": [2014] AC 1 at [36]; and see Schuz, "Policy Considerations in Determining the Habitual Residence of a Child and the Relevance of Context" (2001) 11 Journal of Transnational Law and Policy 101. *https://papers.ssrn.com/sol3/papers.cfm?abstract_id=270991*

[33] *A v A* [2014] AC 1 at [38], see Law Com. No 138 *Family law, custody of children : jurisdiction and enforcement within the United Kingdom* (1985) para 4.15.

Council [2015] CSOH 156; *Mackay v HMRC* [2018] BTC 529.

46.13 EU/EEA/Switzerland

46.13.1 *Outline*

In summary: Cross-border workers are only liable to pay social security contributions in one state at a time:

(1) *General rule:* this will be in the country where work is undertaken, regardless of (a) whether the worker resides in the EU or the UK, and (b) whether the employer is based in the EU or the UK.

(2) *"Detached worker" rule:* UK workers sent by their employer to work temporarily in an EU Member State pay social security contributions in the UK only. Similarly, if an EU worker is sent by their employer to work temporarily in the UK from a Member State they pay contributions in that EU Member State only.

The rules were formerly in Regulation 883/2004 on the coordination of social security systems, and are now in the Protocol on Social Security Coordination ("SSC") which is part of the TCA.

These agreements also cover social security benefits but this chapter only considers the NIC aspects.

I focus here on the SSC but hope to cover EEA and Switzerland in a future edition.

The rules, unsurprisingly, continue the approach which formerly applied under and similar pre-Brexit rules. But there are changes, and I set out the old Reg 883/2004 rules side by side, so the changes can be identified.

The transitional protection for those who started working abroad before 1/1/2021 is not discussed here.

HMRC have published guidance ("**NIC guidance**")[34] and pre-2021 guidance is also useful, though it needs to be reviewed to check whether the law has changed.

46.14 Definitions

Art SSC.1: provides:

> For the purposes of this Protocol, the following definitions apply:
>
> (a) "activity as an employed person" means any activity or equivalent situation treated as such for the purposes of the

[34] *https://www.gov.uk/tax-right-retire-abroad-return-to-uk*

social security legislation of the State in which such activity or equivalent situation exists;

(b) "activity as a self-employed person" means any activity or equivalent situation treated as such for the purposes of the social security legislation of the State in which such activity or equivalent situation exists;...

(t) "period of employment" or "period of self-employment" mean periods so defined or recognised by the legislation under which they were completed, and all periods treated as such, where they are regarded by that legislation as equivalent to periods of employment or to periods of self-employment;

(v) "period of residence" means periods so defined or recognised by the legislation under which they were completed or considered as completed;

(aa) "residence" means the place where a person habitually resides;

46.15 Persons covered

Article SSC.2

This Protocol shall apply to persons, including stateless persons and refugees, who are or have been subject to the legislation of one or more States, as well as to the members of their families and their survivors.[35]

Art 2 reg 883/2004

1. This Regulation shall apply to nationals of a Member State, stateless persons and refugees residing in a Member State who are or have been subject to the legislation of one or more Member States, as well as to the members of their families and to their survivors.

2. It shall also apply to the survivors of persons who have been subject to the legislation of one or more Member States, irrespective of the nationality of such persons, where their survivors are nationals of a Member State or stateless persons or refugees residing in one of the Member States.

[35] In the UK, NICs (other than the voluntary Class 3 NIC) are only paid by employed or self-employed, so the reference to "members of their families and their survivors" is irrelevant for NIC, though it may be relevant for other purposes.

46.16 General rules

Article SSC.10(1) provides there can only be one charge to tax:

> 1. Persons to whom this Protocol applies shall be subject to the legislation of a single State only. Such legislation shall be determined in accordance with this Title.

Art SSC.10(2) defines "pursuing an activity":

> 2. For the purposes of this Title, persons receiving cash benefits because or as a consequence of their activity as an employed or self-employed person shall be considered to be pursuing the said activity. This shall not apply to invalidity, old-age or survivors' pensions or to pensions in respect of accidents at work or occupational diseases or to sickness benefits in cash covering treatment for an unlimited period.

Article SSC.10(3) provides the general rule:

> 3. Subject to Articles SSC.12 [Pursuit of activities in two or more States] and SSC.13 [Voluntary insurance or optional continued insurance]:
>
> (a) a person pursuing an activity as an employed or self-employed person in a State shall be subject to the legislation of that State;

The article continues with some more specialist rules:

> (b) a civil servant shall be subject to the legislation of the State to which the administration employing them is subject;
>
> (c) any other person to whom points (a) and (b) do not apply shall be subject to the legislation of the State of residence, without prejudice to other provisions of this Protocol guaranteeing them benefits under the legislation of one or more other States...

46.17 Detached workers

Article SSC.11 provides:

> 1. By way of derogation from Article SSC.10(3) [General rules] and as a transitional measure in relation to the situation that existed before the entry into force of this Agreement, the following rules as regards the applicable legislation shall apply between
>
> [i] the Member States listed in Category A of Annex SSC-8 [Transitional provisions regarding the application of Article SSC.11][36] and

[36] This wording was to allow Member States to opt in to the detached worker rules; but all Member States chose to opt in: Official Journal 16 Feb 2021

[ii] the United Kingdom:

We move on to the rule. It may be helpful to compare SSC and its predecessor:

SSC art 11 (post 1/1/21)	**Art 12(2) Reg 883/2004 (pre 1/1/21)**
(a) a person who	A person who
[A] pursues an activity as an employed person in a State for an employer which normally carries out its activities there	pursues an activity as an employed person in a Member State on behalf of an employer which normally carries out its activities there
[B] and who is sent by that employer to another State to perform work on that employer's behalf	and who is posted by that employer to another Member State to perform work on that employer's behalf
shall continue to be subject to the legislation of the first State, provided that:	shall continue to be subject to the legislation of the first Member State, provided that
(i) the duration of such work does not exceed 24 months; and	the anticipated duration of such work does not exceed twenty-four months and
(ii) that person is not sent to replace another detached worker.	that he is not sent to replace another person.

The term "posted" is replaced by "sent" but the meaning is the same. There are other changes.

There is now no power to extend the 24 month period.

SSC continues:

> (b) a person who normally pursues an activity as a self-employed person in a State who goes to pursue a similar activity in another State shall continue to be subject to the legislation of the first State, provided that the anticipated duration of such activity does not exceed 24 months.

This provides a rough equivalent of the ROW year abroad rule for employees, but the period here is 2 years.

https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=OJ%3AC%3A2021%3A055%3AFULL

EC guidance on the pre-brexit rules remains useful.[37]

46.17.1 *Where activities normally carried out*

The NI Manual provides:

> **NIM33080 Meaning of "Which normally carries out its activities there"** [Nov 2019]
> The expression "which normally carries out its activities there" means an undertaking which ordinarily carries out substantial activities in the territory of the Member State in which it is established. If the undertakings activities are confined to internal management, the undertaking will not be regarded as normally carrying out its activities in that Member State. In determining whether an undertaking carries out substantial activities, account must be taken of all criteria characterising the activities carried out by the undertaking in question. The criteria must be suited to the characteristics of each undertaking and the real nature of the activities carried out.
> The following factors are of particular importance
> - the place where the posting undertaking has its registered office and its administration.
> - the number of administrative staff present in the posting State compared to the State of employment.
> - the place of recruitment of the postal worker.
> - the place where the majority of contracts with clients are concluded.
> - the law applicable to the contracts signed by the posting undertaking with its clients and with its workers.
> - The turnover achieved by the posting undertaking in the posting State and in the State of employment during an appropriate typical period (e.g. turnover of approximately 25% of total turnover in the posting state could be a sufficient indicator, but cases where turnover is under 25% would warrant greater scrutiny).
>
> But the list of criteria outlined above is not an exhaustive.

46.17.2 *Sent to perform work*

The NI Manual provides:

> **NIM33085 Meaning of "Direct Relationship"** [Nov 2019]
> A direct relationship must continue to exist between the posting

[37] "Practical guide on posting" *https://op.europa.eu/en/publication-detail/-/publication/8ac7320a-170f-11ea-8c1f-01aa75ed71a1/language-en*

undertaking and the posted worker throughout the period of posting. There are some indicators of the existence of such a direct relationship, including:

- It must be evident that the contract was and still is applicable to the parties involved in drawing it up and stems from the negotiations that led to the recruitment;
- The power to terminate the contract of employment (dismissal) must remain exclusively with the posting undertaking;
- The posting undertaking must retain the power to determine the nature of the work performed by the postal worker, not in terms of defining the details of the type of work to be performed and the way it is to be performed, but in the more general terms of determining the end product of that work or the basic service to be provided;
- The obligation with regard to the remuneration of the worker rests with the undertaking which concluded the contract, irrespective therefore of who actually makes the payment.

There are some situations where it is impossible for someone to remain insured in the sending Member State under [Article SSC.11]:

- The undertaking to which the worker has been posted places him/her at the disposal of another undertaking in the Member State in which it is situated;
- The undertaking to which the worker is posted places him/her at the disposal of an undertaking situated in another Member State;
- The worker is recruited in a Member State in order to be sent by an undertaking situated in a second Member State to an undertaking in a third Member State;
- The worker is recruited in one Member State by an undertaking situated in a second Member State in order to work in the first Member State.

46.17.3 *Hire for immediate posting*

The NI Manual provides:

NIM33090 Workers hired for immediate posting [Apr 2019]

There are some additional restrictions in place in relation to workers hired and then immediately posted.

The rules on posting may also apply to workers recruited in one Member State with a view to being posted in another provided certain conditions are met.

One of these conditions is that:

- Immediately before the start of his/her employment the person is already subject to the legislation of the Member State in which the

> undertaking which employed him/her is established.

That is not quite what the legislation now says,[38] but it will not often matter.

> A period of at least one month can be considered as meeting this requirement, with shorter periods requiring a case by case evaluation taking account of all the factors involved.
>
> The other posting conditions also have to be met. So the "posting" undertaking must normally carry out its activities there and the worker must pursue an activity on behalf of the employer, there must exist throughout the period of posting a direct relationship between the posting employer and the posted worker, the posting undertaking must also be one which carries out substantial activities in the posting State, and so on.
>
> The point here is that the person does not need to have been employed by that particular employer before they are sent to work abroad, but they should have been in the UK and been insured when they are hired to be sent abroad. They can be UK insured by paying contributions, or because they are in receipt of UK benefits if out of work, or simply by being resident in the UK if they are not working and not in receipt of benefits. The purpose of the posting regulation is to let someone continue their existing contribution and benefit record in the sending Member State.

46.18 Forms

46.18.1 *Pre-brexit forms*

The NIC guidance discusses pre-brexit forms:

> The EU Regulations provide for a system of forms so that employers and employees can demonstrate that they are entitled to operate the legislation of one Member State and be exempt contributions under the legislation of another...
>
> For employees coming to the UK from the other Member States, you should operate National Insurance contributions from the start of the employment unless you hold a valid E101 (or from 1 May 2010 Form A1 or an E101) showing that they are exempt National Insurance in the UK and subject to the legislation of another Member State.
>
> For employees going to work in another Member State, you should apply to HMRC NIC&EO to find out whether the employee should remain in UK National Insurance and you can be issued Form E101 (or Form A1

[38] See 46.15 (Persons covered by SSC).

> after 1 May 2010). As long as the UK's legislation continues to apply, you should continue to operate employer and employee National Insurance rather than the contributions of the other Member State.

The NI Manual provides:

> **NIM33065 Posted workers general information** [Nov 2019]
> ... In certain circumstances a person who is sent by their employer in one Member State to work temporarily in another Member State can continue to pay contributions only in their home state.
> A system of portable documents (A1) exists within the European Union to ensure that the worker does not also have to pay contributions in the Member State they are posted to.
> A worker sent to the UK claiming to be exempt under Article 12 should be able to produce to HMRC a Portable Document A1 issued by the authorities in the Member State they have come from as proof of this exemption. If they do not then you should charge primary and secondary National Insurance until they produce the Portable Document A1.
> You should give the worker and their employer a reasonable amount of time to produce an A1. A delay of several months is not uncommon for the other Member States to issue the form.
> (This content has been withheld because of exemptions in the Freedom of Information Act 2000)
> **NIM33070** [Apr 2019]
> ... PT Ops International Caseworker (ICW) deals with people posted from the UK to other Member States and are in charge of issuing Portable Documents A1.
> You should liaise with NIC&EO International Caseworker before giving advice on whether a worker posted from the UK should continue to pay UK National Insurance -
> International Caseworker, PT Operations North East England, HM Revenue and Customs, BX9 1AN
> A worker who meets the conditions for posting at NIM33065 will continue to be liable for Class 1 National Insurance whilst abroad throughout the period of the posting.
> Where these posting rules apply, the residence rules at NIM33505 and NIM33510 do not apply

46.18.2 *Forms from 1 Jan 2021*

HMRC say:[39]

[39] *https://www.gov.uk/guidance/national-insurance-for-workers-from-the-uk-working-in-the-eea-or-switzerland*

Your circumstances	**Form to complete**
Your employer sends you to work temporarily in the EU, Iceland, Liechtenstein, Norway or Switzerland.	Form CA3822
You're normally self-employed in the UK and you're going to temporarily carry out some activities in the EU, Iceland, Liechtenstein, Norway or Switzerland.	Form CA3837
You're working in 2 or more of the UK, EU, Iceland, Liechtenstein, Norway or Switzerland.	Form CA8421
You're flight or cabin crew with a home base in the UK.	Form CA8421
You're a UK civil servant or other government worker	Form CA3822
You're a UK resident who works on a vessel at sea with a UK flag or an EU, Norwegian, Icelandic or Swiss flag but you're paid by someone based in the UK.	Form CA3822

46.19 Activity in 2 states: Tie-breaker

The place of employment rule needs a tie-breaker if there are two places of employment.

46.19.1 *2 places of employment*

Article SSC.12 provides:

> 1. A person who normally pursues an activity as an employed person in one or more Member States as well as the United Kingdom shall be subject to:
>
> (a) the legislation of the State of residence if that person pursues a substantial part of their activity in that State; or
>
> (b) if that person does not pursue a substantial part of their activity in the State of residence:
>
> (i) the legislation of the State in which the registered office or place of business of the undertaking or employer is situated if that person is employed by one undertaking or employer; or
>
> (ii) the legislation of the State in which the registered office or place of business of the undertakings or employers is situated if that person is employed by two or more undertakings or employers which have their registered office or place of business in only one State; or
>
> (iii) the legislation of the State in which the registered office or place of business of the undertaking or employer is situated other than the State of residence if that person is employed by two or more undertakings or employers, which have their registered office or place of business in a Member State and the United Kingdom, one of which is the State of residence; or
>
> (iv) the legislation of the State of residence if that person is

employed by two or more undertakings or employers, at least two of which have their registered office or place of business in different States other than the State of residence.

46.19.2 *Two places of self-employment*

Article SSC.12 provides:

> 2. A person who normally pursues an activity as a self-employed person in one or more Member States as well as the United Kingdom shall be subject to:
>
> (a) the legislation of the State of residence if that person pursues a substantial part of their activity in that State; or
>
> (b) the legislation of the State in which the centre of interest of their activities is situated, if that person does not reside in one of the States in which that person pursues a substantial part of their activity.

46.19.3 *Substantial*

What is "substantial"? The NI Manual provides:

> **NIM33100 Normally working in two or more Member States** [Dec 2018]
>
> ... In assessing whether a substantial part of the activity is carried out in the Member State of residence, a number of criteria are taken into account including:-
>
> - Working time
> - Remuneration
>
> If it is apparent that at least 25% of working time or earnings arise in the Member State of residence, this shall indicate that the substantial part of the activities is pursued in that Member State.
>
> Other relevant criteria can also be taken into account when making this assessment.
>
> Marginal activities which account for less than 5% of working time or remuneration in a Member State are not taken into account in making this assessment.

46.19.4 *Employment & self-employment*

Article SSC.12 provides:

> 3. A person who normally pursues an activity as an employed person and an activity as a self-employed person in two or more States shall be subject to the legislation of the State in which that person pursues an

> activity as an employed person or, if that person pursues such an activity in two or more States, to the legislation determined in accordance with paragraph 1.
>
> 4. A person who is employed as a civil servant by a State and who pursues an activity as an employed person or as a self-employed person in one or more other States shall be subject to the legislation of the State to which the administration employing that person is subject.

46.19.5 *Two employers*

Article SSC.12 provides:

> 5. A person who normally pursues an activity as an employed person in two or more Member States (and not in the United Kingdom) shall be subject to the legislation of the United Kingdom if that person does not pursue a substantial part of that activity in the State of residence and that person:
>
> (a) is employed by one or more undertakings or employers, all of which have their registered office or place of business in the United Kingdom;
>
> (b) resides in a Member State and is employed by two or more undertakings or employers, all of which have their registered office or place of business in the United Kingdom and the Member State of residence;
>
> (c) resides in the United Kingdom and is employed by two or more undertakings or employers, at least two of which have their registered office or place of business in different Member States; or
>
> (d) resides in the United Kingdom and is employed by one or more undertakings or employers, none of which have a registered office or place of business in another State.
>
> 6. A person who normally pursues an activity as a self-employed person in two or more Member States (and not in the United Kingdom), without pursuing a substantial part of that activity in the State of residence, shall be subject to the legislation of the United Kingdom if the centre of interest of their activity is situated in the United Kingdom.
>
> 7. Paragraph 6 shall not apply in the case of a person who normally pursues an activity as an employed person and as a self-employed person in two or more Member States.
>
> 8. Persons referred to in paragraphs 1 to 6 shall be treated, for the purposes of the legislation determined in accordance with these provisions, as though they were pursuing all their activities as employed or self-employed persons and were receiving all their income in the State concerned.

46.20 Class 4 contributions

Section 15 SSCBA provides:

> (1) Class 4 contributions shall be payable for any tax year in respect of all profits which—
>
> (a) are immediately derived from the carrying on or exercise of one or more trades, professions or vocations,
>
> (b) are profits chargeable to income tax under Chapter 2 of Part 2 of the Income Tax (Trading and Other Income) Act 2005 for the year of assessment corresponding to that tax year and
>
> (c) are not profits of a trade, profession or vocation carried on wholly outside the UK.
>
> (2) Class 4 contributions in respect of profits shall be payable—
>
> (a) in the same manner as any income tax which is, or would be, chargeable in respect of those profits (whether or not income tax in fact falls to be paid), and
>
> (b) by the person on whom the income tax is (or would be) charged,
>
> in accordance with assessments made from time to time under the Income Tax Acts...
>
> (3A) Where income tax is (or would be) charged on a member of a limited liability partnership in respect of profits arising from the carrying on of a trade or profession by the limited liability partnership, Class 4 contributions shall be payable by him if they would be payable were the trade or profession carried on in partnership by the members.
>
> (5) For the purposes of this section the year of assessment which corresponds to a tax year is the year of assessment (within the meaning of the Tax Acts) which consists of the same period as that tax year.

A trade carried on wholly outside the UK is exempt from class 4 NIC. This is almost impossible for a sole trader, though it may be possible for a partnership.[40] But in such a case the self-employed earner would not be employed in the UK, and so would be exempt anyway.

What about unremitted trading profits of a remittance basis taxpayer? It is considered that unremitted profits of a remittance basis taxpayer, (un)taxed on the remittance basis, do not count as "chargeable"[41] so a remittance basis taxpayer pays class 4 NIC on taxable (remitted) profits only. That is consistent with the general scheme of the remittance basis.

[40] See 21.4 (UK resident trader: IT).

[41] See App 2.3.1 (Unremitted RFI "chargeable").

46.21 Partnerships

Para 4 sch 2 SSCBA provides:

> (1) Where a trade or profession is carried on by two or more persons jointly, the liability of any one of them in respect of Class 4 contributions shall arise in respect of his share of the profits of that trade or profession (so far as immediately derived by him from carrying it on); and for this purpose his share shall be aggregated with his share of the profits of any other trade, profession or vocation (so far as immediately derived by him from carrying it on or exercising it).
> (2) Where sub-paragraph (1) above applies, the Class 4 contributions for which a person is liable in respect of the profits of the trade or profession carried on jointly (aggregated, where appropriate, as mentioned in that sub-paragraph) shall be charged on him separately.

The BI Manual provides:

> **BIM82060 Sleeping And Inactive Partners: Nics** [Jun 2016]
> Following a change of view taking effect from 6 April 2013, HMRC consider that sleeping and inactive partners in a partnership are gainfully employed as self-employed earners and so are liable to Class 2 and Class 4 National Insurance Contributions....
> **BIM82150 Limited Liability Partnership: NIC** [Jun 2016]
> The NIC position of members of a LLP is the same as that of partners in an ordinary partnership. Thus the members of a LLP are liable to Class 2 and Class 4 NIC as appropriate.

CHAPTER FORTY SEVEN

SETTLOR-INTERESTED TRUST CODE

47.1 Settlor-interested trust code
47.2 "Income" arising under a settlement

Offshore income gain	67.8.2 (UK trust); 67.10.1 (Non-resident trust)
Accrued income profits	28.1
Deeply discounted securities	28.13.1 (UK trust); 29.14 (Non-resident trust)

This chapter considers the IT rules. For CGT see 60.1 (Gains of non-resident settlor-interested trusts).

47.1 Settlor-interested trust code

Chapter 5 Part 5 ITTOIA contains a set of loosely related anti-avoidance rules:

Rule	**ITTOIA**	**See para**
Settlor-interested trust	s.624	47.5
Income paid to child of settlor	s.629	47.15
Capital sum paid to settlor by trust/connected body	s.633/641	47.14
Added by protected-trust regime in 2018:		
- s.643A charge: benefit to settlor/close-family	s.643A - G	47.19
- s.643A settlor-attribution/onward-gift rules	s.643H - N	47.28/47.31

These were formerly called the **"IT settlement provisions"**. Now that Chapter 5 is just one of many dealing with settlements, this label is opaque and potentially confusing. I coin the term **"settlor-interested trust code"**, which is not wholly accurate, but no short label could encapsulate these disparate charges.[1]

Settlement has the settlement-arrangement meaning.[2]

[1] The heading of Chapter 5 is now: "Settlements: amounts treated as income of settlor or family".

[2] See 87.4 (Settlement-arrangement definition).

The code has a century-long history (it dates back to 1922) and a large case law (some of which is now obsolete). The rules were recast in 1995, following the proposals of the Trusts Consultative Document (1991), but the consultative document is now of historical interest only.

47.2 "Income" arising under a settlement

"Income arising under a settlement" is a term used throughout the settlor-interested trust code. One might abbreviate that to **"Settlement Income"** but I prefer to use the statutory term.

In this section I consider what is income, and quantum of income; and in the next section I consider what is meant by income "arising under a settlement".

Section 648(1) ITTOIA provides what is in effect a referential definition of income:

> References in this Chapter [Chapter 5 Part 5, the settlor-interested trust code] to income arising under a settlement include— [3]
> (a) any income chargeable to income tax by deduction or otherwise,[4] and
> (b) any income which would have been so chargeable if it had been received in the UK by a person domiciled and resident there.

EN ITTOIA provides:

> In consequence [of this definition] the appropriate measure of income chargeable and the tax year of charge are provided by the charging sections of other Chapters of this Act (or the appropriate sections of the Income Tax Acts).

So "income" means "income for income tax purposes" which is a different concept from "income for trust law purposes" or "income for accountancy purposes".

The points made in 48.15 (Capital receipts deemed to be income) and 48.16 (Income of person: Quantum) apply also for ascertaining "income arising under a settlement".

Income may arise under the settlement (and so may be treated as the income of the settlor) even if the settlor is paying the income (eg if the

[3] The context suggests this is an exhaustive definition, ie the word "include" really means "mean", and only items within (a) and (b) fall within the expression "income arising under a settlement".

[4] See App.2.3.2 (Bear tax by deduction or otherwise).

settlor pays rent or interest to a settlor-interested discretionary trust).[5]

47.2.1 *Property business income*

The Property Income Manual discusses how to calculate property income for the purposes of the settlor-interested trust code:

> **PIM1045. Life interest trusts** [Jan 2023]
> ... Where the income [within s. 624] is property income, the normal property income rules apply in calculating the income. (S.623 ITTOIA)....

This is correct. It follows that interest paid by the trustees is in principle deductible in computing property income for s.624 purposes.

47.2.2 *Property business losses*

The Property Income Manual considers the treatment of losses:

> **PIM1045. Life interest trusts** [Jan 2023]
> *Trusts and the settlor - losses*
> ... The more common case is where the trustees carry on the rental business but the settlor is caught by Section 619(1). Under these circumstances the settlor can't set any trust rental business losses against personal rental business income.
> Similarly the settlor can't merge personal rental business losses and the trust rental business profits, which are deemed to be the settlor's income and charged under Section 619(1). Thus:
>
> - Where the trustees have a rental business loss and the settlor has a personal rental business profit, the trust loss is carried forward and the settlor is taxed on their personal rental business profit; the amount of the trustees' rental business profit charged on the settlor in the following year under Section 619(1) will be reduced by the trust loss carried forward.
> - Where the trustees have a rental business profit and the settlor has a personal rental business loss, the settlor is taxed on the trust rental business profit under Section 619(1); the settlor's personal rental business loss can't be merged with the trust profit; but, as a separate matter, the settlor may in some cases be able to set a personal rental business loss sideways against other income, including any Section 619(1) income deemed to arise from the trustees' rental business;

[5] See *Ang v Parrish* 53 TC 304. But it is different if the settlor is also life tenant; see 50.10.6 (Loan to life tenant).

> see PIM 4220.
>
> The position is different where the taxpayer is:
>
> - the settlor, and
> - the life tenant, and
> - carries on the rental business.
>
> Under these circumstances the settlor can merge their personal property losses with the deemed income from the trust and vice versa. ...

This is thought to be correct. See too 24.6 (Losses of overseas property business).

47.2.3 *Trust expenses*

Section 624(1A) ITTOIA provides:

> If the settlement is a trust, expenses of the trustees are not to be used to reduce the income of the settlor.

EN ITA provides:

> 3323.New subsection (1A) makes it explicit that trustees' expenses are not taken into account in measuring the income of a settlor under section 624 of ITTOIA. This follows from the fact that it is the income arising that is deemed to be the settlor's and the income arising is the gross amount out of which the trustees may pay expenses.

This is important because if s.624 does not apply, expenses do reduce the income of the life tenant.[6]

47.2.4 *Income must be ascertainable*

Section 624 assumes that one can *ascertain* the amount of income which arises under the settlement. If that is not possible then it is considered that s.624 does not operate.[7] In straightforward cases ascertaining the amount of income is not a problem. The issue can arise where there are two settlors[8] or on the supply of services.[9]

47.3 Arising under a settlement

There must be a link between the income and the settlement-arrangement;

[6] See 42.7 (Trustees expenses).

[7] The same point applies to the ToA provisions; see 48.9.2 (Income must be identifiable).

[8] See 100.2.2 (Loan/guarantee/paying trust expenses).

[9] See 99.25 (Provision of services).

exactly what that link is has been left to the Courts to sort out.

47.3.1 *Property comprised in settlement*

The wording of (what is now) s.624 has changed over time. In the 1938 version, what was treated as income of the settlor was:[10]

> any income arising under the settlement from the property comprised in the settlement

The underlined phrase was dropped in the ICTA 1988 consolidation. Under the current law, what is treated as income of the settlor is:

> income which arises under a settlement

Presumably the underlined phrase was thought to be unnecessary, as "income arising under the settlement" and "income from the property comprised in the settlement" were two ways of saying the same thing. Although the wording has changed, the meaning is the same.

I set out this history because it is necessary to have the older wording in mind when considering pre-1988 case law, such as *Chamberlain*. These cases focus on the (now deleted) phrase "property comprised in the settlement". Once that property is identified, the income arising under the settlement (which is treated as income of the settlor) is identified: it is income from that property. These cases are still relevant under the current legislation.

The term "property comprised in the settlement" is still found in the s.643A code, and a few dusty corners of the current legislation. It also has a statutory definition,[11] though that is not applicable where "settlement" has the settlement-arrangement meaning.

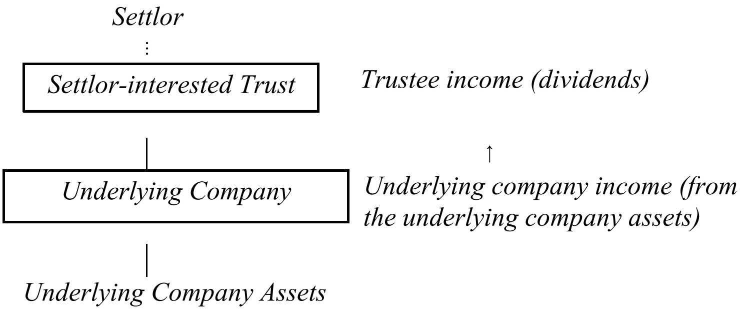
Nowadays, the more usual expression is "*property from which the income* [ie the Settlement Income] *arises*". Under this wording one first needs to identify "the income arising under the settlement", and then the property from which that income arises. But the expressions "property from which the income arises" and "property comprised in the settlement" should be regarded as synonymous.

47.3.2 *Underlying company income*

Suppose a settlor-interested trust holds an underlying company, thus:

[10] Section 38 FA 1938.

[11] See 87.3.1 (Property comprised in settlement).



Settlor
Settlor-interested Trust
Trustee income (dividends)
Underlying Company
Underlying company income (from the underlying company assets)
Underlying Company Assets

The trustees' income (dividends) is income arising under a settlement and taxed under s.624.

The company's income is not "income arising under the settlement" and not within the scope of s.624. This was decided in *Chamberlain v IRC*.[12]

Simplifying to bare essentials, *Chamberlain* concerned an arrangement with just two key steps. The settlor:

(1) transferred assets to the underlying company in exchange for securities; and
(2) transferred some shares in the underlying company to a trust.[13]

Chamberlain is a case on the 1938 version of the settlement provisions, where the relevant wording was "income arising under the settlement from the property comprised in the settlement". The issue was whether the "property comprised in the settlement" was:

(1) the underlying company assets or
(2) the trust fund (the underlying company shares).

But this also determines the issue of whether (adopting the current statutory term) the "income arising under the settlement" is:

(1) the underlying company income or
(2) the trustee income (dividends).[14]

Lord Thankerton gave the speech of the majority;[15] Macmillan and Romer agreed with the outcome, but their speeches are less important and Macmillan's has different reasoning.[16]

[12] 25 TC 317. For another aspect of this case, see App 2.2.7 (Pre-arrangement steps).

[13] In point of detail, the settlor transferred cash to 5 trusts which subscribed for shares in the underlying company; but nothing turns on that.

[14] See 47.3.1 (Property comprised in settlement).

[15] Viscount Simon and Lord Atkin agreed with this speech.

[16] Macmillan took the view that the arrangement consisted of the classic trust alone, and the first step (transfer of assets to the underlying company in exchange for an issue

The answer was that the property comprised in the settlement was the trust property, the underlying company shares; not the underlying company assets. The passage begins with a disclaimer:

> I may premise that, in seeking the due application of [s.38 FA 1938, now s.624], each case is apt to depend on its own facts, and other cases are not likely to be of material assistance.

Some wiggle room there.[17] But we move on to the analysis:

> Did the property comprised in the settlement consist of
> [1] the whole assets of Staffa [the underlying company], or
> [2] is the property comprised in the settlement to be found separately comprised in each of the five deeds of settlement [ie the shares in the underlying companies held by the 5 trust funds]...
> My Lords, I am of opinion that the latter alternative provides the correct view ... the sums settled under [the trust] deeds were the funds provided for the purpose of the settlement within the meaning of [what is now s.620 ITTOIA, the definition of settlor]. Staffa [the underlying company], though controlled by the Appellant, did not, in my opinion, hold its assets as part of the provisions settled on the children. I am of opinion that the whole assets of Staffa [the underlying company] did not constitute the property comprised in the settlement ...[18]

This was followed in the first *Vestey* case:[19]

of shares) was "merely preparatory". See App 2.2.4 (Identifying the arrangement). But this was a minority view.

[17] Likewise the first *Vestey* case, *Vestey v IRC* 31 TC 1 at p.120:
"I do not think that any hard and fast rule is laid down in *Chamberlain's* case. The ingenuity of those who devise these schemes is such that it might be rash to say that property can never be comprised in a settlement unless it is charged with rights in favour of others, but I think that as a general rule this must now be the test".

[18] *Vestey v IRC* 25 TC 317 at p.329.

[19] 31 TC 1 at p.89; likewise at p.107:
"I do not dissent from the Crown's contention that the lease and the deed of trust together constitute an "arrangement" within Section 41 (4) (b) of the Act of 1938 and are consequently a "settlement" for the purposes of Part IV of that Act. In my view, however, whether one looks for this purpose at the deed of trust alone, or at the deed of trust and the lease together, the only property comprised in the settlement" at any time was the rent payable by Union under the lease, together with any property resulting from the investment of the rent and from the accumulation of the income arising from such investment."
But the rule is not absolute. At p.120:
"I think that *Chamberlain's* case shews that the most profitable course to follow is

> even if the lease and the deed of settlement may both be properly treated as components of the "arrangement", yet the property "comprised in the settlement" is the property settled by the deed of settlement, that is the [trust property].

HMRC agree. In explaining why s.624 protected-trust relief[20] applies to a trust but not to its underlying company, they say:

> The settlor charges under the settlements legislation will not need to be dis-applied to foreign income of any corporate structure underlying the settlement, because the settlements legislation only applies to income arising to a settlement.[21]

HMRC only seek to apply the settlor-interested trust code to the dividends and not to the income of the underlying company.

What is the reason for this? One might think that a trust and the underlying company could in principle constitute one arrangement, so that both the company income and the trust income (dividends) could be described as income arising under the settlement-arrangement. *Chamberlain* gives the answer but no clear reason for that answer. It is considered that the context supports their conclusion.

47.3.3 *Use of co: Tax policy*

The policy background is that the use of a UK company to save the difference between IT and CT rates on sums retained in the company is not regarded as objectionable, in the absence of further features. This is so even if the arrangement involves:

(1) A key employee or contractor providing services to the company at an undervalue (so increasing income subject to CT and decreasing income subject to IT)[22]

first to determine what was the property comprised in the settlement, and that the way to find that property is to look for property charged with rights in favour of beneficiaries."

[20] See 92.10 (s.624 protected-trust relief).

[21] Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.3. *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf*

[22] This is now subject to limited exceptions: (1) the mixed partnership code, see 86.4 (Mixed partnership code); (2) disguised employment income. But the exceptions confirm the general rule.

(2) Extracting profits taxed at rates less than the marginal rate of the key employee

In the film star case, *Crossland v Hawkins*:[23]

> The heavy incidence of Surtax [now higher rate income tax] on large incomes has for some time led artistes and others in the world of entertainment to adopt the device of forming a limited company which they control, and giving the company, by means of a service agreement, the right to their services. In return the company pays the artiste some modest salary. The company then hires the artiste out to whomsoever requires his services and itself obtains the consideration for them. ... In this way Surtax on the whole of the artiste's earnings is reduced to Surtax on the salary he gets from the company plus such dividend as is distributed to him; and when eventually the company is wound up the accumulated reserves of past years will come to him as capital.[24]
> All this is perfectly legitimate and indeed, in the case of persons whose high earnings may be short-lived, understandable.

That this is still the policy is confirmed by the repeal of the former s.681(2)(b) ICTA (which had deemed income of an underlying close company to be "income arising under a settlement").[25]

It is considered that income of a unit trust held by trustees is similarly not "income arising under a settlement" (unless the unit trust is transparent in which case the income arises to the trustees).[26]

The position is different where trustees are members of a partnership. Insofar as income is distributed from the partnership to the trust it clearly constitutes income arising under the settlement. But even if income is retained by the partnership, the trustees share of the partnership income is

[23] 39 TC 493 at p.502.

[24] If winding up the company now, one would need to consider Chapter 4 Part 13 ITA (sale of occupation income) and 30.14 (Winding-up TAAR).
At the time of *Crossland v Hawkins* there were close company apportionment rules, to prevent avoidance IT by retaining income in a company. But they were not so harsh. The court explained: "From its profits the company must distribute a reasonable dividend if it is to avoid Surtax on the whole of its profits - see s.245 Income Tax Act 1952 - but it is allowed to make such reserves as are required for the maintenance and development of the business; and where the business depends on the fortunes of a particular artiste these reserves may be considerable."

[25] See sch 17 FA 1989. This was part of the repeal of the former close company apportionment provisions.

[26] See 69.7 (Unauthorised unit trust: Foreign trustees).

income of the trustees, since partnership income is regarded as arising to the partners.[27]

Income of a non-resident company or unit trust which is not "income arising under a settlement" may fall within the ToA rules.

47.3.4 *Underlying Co subject to CT*

For completeness: If the underlying company is subject to corporation tax (eg if the company is UK resident) there is an additional argument why the settlor-interested trust code does not apply. Section 3(1) CTA 2009 provides:

> The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—
> (a) the company is UK resident, or
> (b) the company is not UK resident and it is chargeable to corporation tax in respect of the income, or would be so chargeable but for an exemption.

Section 624 is a "provision of the Income Tax Acts relating to the charge of income tax;" so it does not apply to income subject to corporation tax. This makes good sense, because if the income is subject to corporation tax, HMRC do not need the settlor-interested trust code. But if it is correct that company income generally is not income arising under a settlement, this particular point does not arise here.[28]

47.3.5 *Income of life tenant (not settlor)*

Income payable under the trust to a life tenant is "income arising under a settlement". Admittedly, such income is usually regarded for tax purposes as the income of the life tenant, not of the trustees.[29] But that is not relevant, because:

(1) The expression is "income arising under a settlement", not "income arising to trustees".
(2) "Settlement" has the very wide meaning of settlement-arrangement.[30]

This can be seen to be the case by considering a trust made by S, revocable

[27] See 85.16 (Partnership transparency: IT/CT).

[28] I discuss this point in more detail in the context of ToA, where it is important: see 51.3.1 (Corporation tax override).

[29] See 42.9 (Life tenant: Source of Income).

[30] See 87.4 (Settlement-arrangement definition).

by S, under which income is payable to B for life. It could hardly be argued that such income falls outside the scope of s.624 ITTOIA.

47.3.6 *Income of life tenant settlor*

Where the settlor has an interest in possession, trust income actually received by the settlor is not within s.624 ITTOIA. It is subject to income tax under general principles. But the rates of tax are the same in either case,[31] so the issue does not now arise.[32]

47.4 Settlor deductions/reliefs

Section 623 ITTOIA provides:

> For the purpose of calculating liability to tax under this Chapter [Chapter 5 Part 5, the settlor-interested trust code] (but for no other purpose), a settlor shall be allowed the same deductions and reliefs as if any amount treated under this Chapter as income of the settlor had actually been received by the settlor.

The legislation does not identify what deductions and reliefs are applicable. The wording derives from s.5 FA 1914, where it was understood to allow the costs of collection and payment of foreign income. It was copied from there to FA 1938 which is the original version of the settlor-interested trust code. But now these costs are deductible whether or not the income is actually received.[33] As far as I can see, this provision survives only for historical reasons, and has no effect: it should be repealed.

47.5 Settlor-interested trust

Section 624(1) ITTOIA provides:

> Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone if it arises—
> (a) during the life of the settlor, and

[31] See 43.11 (Settlor-interested trust IT rate).

[32] The point was discussed in the 4th ed. of this work at 11.4.3 (Income of life tenant settlor). Trust income not received by the life tenant settlor is within s.624 ITTOIA. Examples are (1) income used for trust expenses, and (2) income for tax purposes which is capital for trust law purposes.

[33] See 16.10 (RFI collection costs). The background is set out in EN ITTOIA Change 137 and 138.

(b) from property in which the settlor has an interest.

I refer to income which is treated as the settlor's income under this section as **"s.624 income"**. Section 624 raises a number of issues:

Issue	**See para**
Identify the settlement (settlement-arrangement):	
What is the arrangement	App 2.2.4
Is there bounty (so the arrangement is a "settlement")	87.5
Identify the settlor	99.2
Identify income arising under the settlement	47.2
Identify property from which that income arises	47.3.1
Whether the settlor has an interest in that property	47.6
Do reliefs apply:	
Protected-trust relief	92.10
s.624 spouse exemption	93.15
Minor s.624 reliefs	47.7

I refer to this as the "**s.624 issue list**". In the case of a settlement-arrangement that is a classic trust, that is generally straightforward. More thought is needed for a settlement-arrangement which is not, or not just, a classic trust.[34] Tax cases often involve more than one of these issues. For clarity of thought it is necessary to consider them separately, though the consequence is that the same case has to be discussed in several separate places in this work.

47.6 Meanings of "settlor-interested"

47.6.1 *Concepts of "settlor-interested"*

The term "settlor-interested", first coined in the FA 2000, is used in connection with various provisions, of which the most important are:[35]

Context	**See**
IT settlor-interested trust code	*discussed here*
CGT settlor-interested trust rules	60.5

[34] See 87.4.1 (Non-trust arrangement); 87.4.2 (Trust + steps arrangement).

[35] Other examples, not discussed in this work, are:

Context	**See**
Hold-over relief restriction on gift to settlor-interested trust	s.169B-G TCGA
Disposal of interest in a settlor-interested trust	sch 4A TCGA

"Power to enjoy" in the ToA code is a similar concept with a different label. GWR is a comparable but not identical concept.

Consistent with the patchwork nature of UK tax, these provisions have significant differences, though they share a common framework. "Settlor-interested" is a convenient label, but not a wholly accurate one.

47.6.2 *"Settlor-interested" for s.624*

Section 625(1) ITTOIA provides:

> A settlor is treated for the purposes of section 624 as having an interest in property if there are any circumstances in which the property[36] or any related[37] property—
>
> (a) is payable to the settlor or the settlor's spouse or civil partner,
>
> (b) is applicable for the benefit of the settlor or the settlor's spouse or civil partner, or
>
> (c) will, or may, become so payable or applicable.

This is of course a wide definition. In particular, a settlor has an "interest" in property given outright to their spouse. When the definition is used in this context, scare quotation marks are appropriate.

Section 625(2)(3) ITTOIA contain half a dozen exceptions, which are not discussed here as they rarely arise. In practice, under a classic trust the settlor and spouse are usually expressly included as beneficiaries or expressly excluded.[38]

A trust is not settlor-interested merely because:

(1) The trustees may lend to the settlor, or purchase an asset from the settlor, on commercial terms; or

(2) The trustees do lend to the settlor, or purchase an asset from the settlor, on commercial terms.

Those transactions involve a payment of the money lent or the purchase price but "payable" in para (a) means payable in a manner conferring a benefit. That is why there needs to be a separate provision dealing with

[36] "The property" refers back to s.614: it means the property from which the Settlement Income arises.

[37] "Related property" is defined in s.625(5) ITTOIA:

> In this section "related property", in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it.

See App 2.9 ("Representing" assets).

[38] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), Chapter 13 (Settlor Exclusion Clauses and Default Clauses).

capital sums paid to the settlor.[39]

47.6.3 *"Spouse" in settlor-interested trust code*

Section 625(4) ITTOIA gives the expression "spouse" an artificial and slightly narrow meaning:

> In subsection (1) "the settlor's spouse or civil partner" does not include—
> (a) a spouse or civil partner from whom the settlor is separated under an order of a court or a separation agreement,
> (b) a spouse or civil partner from whom the settlor is separated where the separation is likely to be permanent,[40]
> (c) the widow or widower or surviving civil partner of the settlor, or
> (d) a person to whom the settlor is not married but may later marry or a person of whom the settlor is not a civil partner but of whom the settlor may later be a civil partner.

The ToA provisions and the s.86 provisions do not contain the same provision, which is anomalous, but that is the patchwork nature of UK tax. Fortunately it does not often matter.

For the general meaning of spouse, see App 3.2 ("Spouse").

47.6.4 *Beneficial loan or guarantee*

Beneficial loans and guarantees to trustees raise three distinct questions, so far as settlor-interested trusts are concerned:[41]

(1) Is the lender/guarantor a settlor by virtue of the loan/guarantee? (This question generally arises only if the lender/guarantor is not the original settlor, though it could also arise if one had to consider whether the settlor has provided additional property and so tainted the settlement).

(2) If so, what property has the lender/guarantor provided?

(3) Does the lender/guarantor have an interest in the trust property by virtue of the loan/guarantee? (This question does not arise if the lender/guarantor already has an interest in the trust property.)

[39] See 47.14 (Settlor receives capital sum).

[40] Para (a)(b) copies standard form wording to refer to a separated spouse: see App 3.4.3 (Living together: married couple). It could have been expressed more economically by taking advantage of the ITA definition, but it does not matter.

[41] For other issues raised by loans, see 62.1.1 (Loan tax issues: Navigation).

It is necessary to distinguish between loans which are (1) interest-free (2) beneficial but not interest-free, eg, at low interest; and (3) commercial loans. Guarantees are not the same as loans, but the issues overlap, so I also consider them in this section.

There are many possible permutations, which makes an exposition rather more difficult.

To start with the simplest case: suppose the settlor lends interest-free to a trust from which he or she is otherwise excluded. The HMRC view is that the trust is settlor-interested as the settlor may benefit by repayment of the loan:

> In *Jenkins v IRC* (26 TC 265) the Court of Appealfound that the making of an interest-free loan brought the settlement into what is now [s.624]. In the *Jenkins* case, the dispute was about whether certain income received by the trustees of the settlement could be assessed on the settlor under the provisions of FA 1938 s38(4). That provision contained an extended definition of retaining an interest in income that is in similar terms to the definition [in s.624].
>
> The effect of the decision in *Jenkins* was that a settlor who has made an interest-free loan to his/her trust has brought himself or herself within the scope of s38(4), and by implication [s.624] (albeit that there would be no charge [under s.624] unless income actually arose to the trustees).[42]

The contrary is faintly arguable[43] but for practical purposes this should be accepted as correct.

The same applies if the settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest. However a settlor (if otherwise excluded) has no interest if the loan is on commercial terms, as repayment of such a loan is not a benefit.

If an individual other than the original settlor lends interest-free to a trust, the loan makes the lender a settlor.[44] There is then a trust with two settlors, the original settlor and the lender. The lender will be within the scope of s.624 on the income originating from the lender, if one can

[42] Letter from HMRC to the Association of British Insurers, September 2004 *https://www.kessler.co.uk/tfd-archive*

[43] The point was conceded in *Jenkins v IRC* 26 TC 265 but the concession was held to be correct in *Wachtel v IRC* 46 TC 543. So the issue remains (just) arguable at the level of the CoA.

[44] A person who is not otherwise a settlor in principle becomes a settlor by virtue of making an interest-free loan: see 99.26 (Loans).

identify it.[45]

If an individual other than the original settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest, the loan still makes the lender a settlor. However the lender will not be within the scope of s.624 unless one can identify the income originating from the lender, which is not usually the case.[46]

If the settlor ("the guarantor") guarantees a loan or other obligation of the trustees, the trust is not settlor-interested (assuming the settlor is otherwise excluded). A guarantor's claim against a solvent trust would only arise if the trustees failed to meet their primary contractual obligations and the words "in any circumstance whatsoever" do not extend to a breach of contract of that kind.

If someone other than the settlor gives a guarantee, the guarantor would not fall within s.624, unless:

(1) one could identify the income originating from the guarantor (which is not usually the case) and
(2) the guarantor had an interest in that income under the trust (the existence of the guarantee alone does not constitute an interest).

47.6.5 *Settlor interest in part of trust*

The IT settlor-interested trust provisions only apply to income from property in which the settlor has an interest.[47] So if the settlor is excluded from part of the trust fund, the IT provisions do not apply to that part. HMRC agree. The TSE Manual provides:

> **TSEM4200 settlor retains an interest** [Sep 2021]
> ...**Settlement only partially settlor-interested**
> Where the settlor has retained a clearly defined interest in a distinct part of the settlement, for example in one fund forming part of a trust, only a corresponding part of the income is caught. In other cases of a settlor retaining a partial interest in a trust, you should submit the case to Trusts Technical for advice.

The TSE Manual provides:

> **TSEM4513 - Tax paid by trustees where trust is not wholly settlor interested** [Feb 2022]
> The income tax paid by trustees for a tax year may be paid partly on

[45] See 100.2.2 (Beneficial loans, guarantees, payments of trust expenses).
[46] See 100.2 (Just & reasonable apportionment).
[47] See 47.6 (Settlor-interested trust),

income attributable to a settlor and partly on income from property from which a settlor is excluded from benefit. The tax paid on income attributable to the settlor does not enter the tax pool - see TSEM4512. Tax paid on other income enters the tax pool in the normal way - see TSEM3756 onwards,

Example

A settles property into the A discretionary settlement. The settlement consists of two funds.

Fund A contains a house which is let and a block of shares in A plc.

Fund B contains a block of shares in B plc.

Under the terms of the settlement the settlor and any spouse or civil partner of the settlor are excluded from benefiting from Fund B.

In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:[48]

Fund A	*Amount*	*Rate (2009/10)*	*Tax*
Rental Income	£1,000	20%	£200
	£9,000	40%	£3,600
Dividend Income	£ 5,000	32.5% (but10% tax credit)[49]	£1,625
Total			£5,425

The settlor is given credit for the tax paid on the income attributable to the settlor - £5,425. Where the tax paid by the trustees exceeds the settlor's own income tax liability the tax (excluding the £500 non payable tax credit attached to the dividends) may be repaid to the settlor.

Fund B			
Dividend Income	£15,000	32.5% (but 10% credit)	£4,875
Total			£4,875

As the settlor is excluded from benefiting from Fund B, this tax is not available to the settlor. The normal rules apply and £3,375 of the tax paid (£4,875 less £1,500 non payable tax credit attached to the dividends) enters the tax pool.

47.6.6 *Settlor-interest ceases*

If the settlor originally had an interest in trust property but is later excluded (together with the settlor's spouse) then s.624 ITTOIA ceases to apply to income arising after the date of the exclusion.[50]

[48] Author's footnote: I have slightly changed the layout for greater clarity.

[49] The tax credit was abolished 2016, so the Manual is out of date, but this does not spoil the point being made here.

[50] A different rule applies for ToA and for s.86; If a settlor is excluded, s.86 and s.720 continue to apply for the rest of the tax year. see 49.14 (Condition A : Power to

If the settlor is excluded from part of the trust fund, then they are within the scope of s.624 only on the income arising from the part in which they still have an interest.

The TSE Manual provides:

> **TSEM4513 - Tax paid by trustees where trust is not wholly settlor interested** [Feb 2022]
>
> ... **Trust ceases to be, or becomes, settlor interested**
>
> A trust may cease to be settlor interested part way through a tax year, for example when the settlor dies.
>
> Similarly, a trust may become settlor interested part way through a tax year, for example the settlor may marry or enter into a civil partnership with an existing beneficiary of the trust.[51]
>
> Where this happens the tax paid by the trustees should be apportioned on a time basis so the part is available to cover the settlor's liability and the other part dealt with in the normal way.
>
> **Example**
>
> In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:[52]

	Amount	*Rate (2009/10)*	*Tax*
Savings Income	1,000	20%	£200
	9,000	40%	£3,600
Total	10,000		£3,800

> The settlor of the trust dies on 5 January 2010. The trust ceases to be settlor interested on that date because ITTOIA/S624 applies only to income arising under a settlement during the life on the settlor.
>
> The settlor is taxed on £7,500 and is given credit for £2,850 (75% of £3,800).
>
> The balance of the tax, £950 goes into the tax pool.

I would have expected to apportion by reference to the date income arises, not by time apportionment, but the in many cases the end result will be the same or similar.

47.6.7 *Transfer to new trust*

If the trust fund is transferred to a new settlement from which the settlor

enjoy); 60.5 (Settlor-interested condition).

[51] Author's footnote: In theory it is possible for a trust to become settlor-interested, on marriage of the settlor to a beneficiary. But in practice this is unlikely to happen; and standard form trusts would exclude the settlor and spouse from benefit.

[52] Author's footnote: I have slightly changed the layout for greater clarity.

is not excluded, then s.624(1) ITTOIA continues to apply. The original settlor is the settlor of the new trust.[53]

If the entire trust fund is transferred to a new trust from which the settlor (and spouse) are excluded then s.624 ceases to apply, and if they are excluded from part, it ceases to apply in part.

47.6.8 *Settlor-interested: non-trust*

In *Vandervell v IRC*,[54] the taxpayer gave shares to a third party[55] subject to an option which allowed the settlor to repurchase them. This was a settlor-interested settlement.

TSEM gives a similar example:

> **TSEM4200 Settlor Retains An Interest** [Sep 2021]
> *Example 3- gifted shares with conditions attached*
> Mr C is a higher-rate taxpayer who owns all the 100 issued shares in C Ltd. He wants to give his brother, a basic rate taxpayer £25,000 but Mr C's money is tied up in the company. To avoid a higher-rate charge on dividends paid out of the company, Mr C transfers 50 shares to his brother on the understanding that the shares are to be returned to him a month later. Mr C declares and the company pays a dividend of £500 per share so that £25,000 is paid to each shareholder. ...

The HMRC analysis is as follows:

> The plan, under which the gifted property is expected to return to the donor is an arrangement where the donor or settlor has retained an interest in the property so the income paid to the brother is deemed to be Mr C's under ITTOIA/S624.

That would clearly be the case if the "understanding" constituted a contract. What if the arrangement was non-contractual? It seems difficult to say that C has an interest. But the GAAR might perhaps apply.

The income-stream code also needs consideration here.[56]

47.7 Minor s.624 reliefs

Section 626 ITTOIA provides a relief for inter-spouse transfers, discussed elsewhere.[57]

[53] See 99.11.2 (Appointment rule conditions).

[54] 43 TC 519.

[55] In fact the gift was to a charity, but nothing turned on that.

[56] See 54.1 (Transfer of income streams).

[57] See 93.15 (S.624 spouse exemption).

Section 627 contains a further set of reliefs which I mention here for completeness. Section 627(1) deals with divorce situations:

> The rule in section 624(1) does not apply to income which—
> (a) arises under a settlement made by one party to a marriage or civil partnership by way of provision for the other—
> (i) after the dissolution or annulment of the marriage or civil partnership, or
> (ii) while they are separated under an order of a court, or under a separation agreement, or where the separation is likely to be permanent, and
> (b) is payable to, or applicable for the benefit of, the other party.

Section 627(2) ITTOIA provides:

> The rule in section 624(1) does not apply to income which consists of—
> (a) annual payments made by an individual for commercial reasons in connection with the individual's trade, profession or vocation

This is unnecessary, as these Annual Payments would not constitute a settlement. Perhaps it is there for historical reasons.[58]

> (b) qualifying donations for the purposes of Chapter 2 of Part 8 of ITA 2007 (gift aid), or

This ceased to be needed when qualifying donations ceased to be a charge on income.

> (c) a benefit under a relevant pension scheme.[59]

A relevant pension scheme is not likely to constitute a settlement.

Section 628 ITTOIA provides a relief for temporary charitable trusts, which I doubt is ever used in practice.[60]

47.8 s.624 remittance basis

47.8.1 *Scope of s.624 remittance basis*

Section 648 ITTOIA provides a relief for a settlor who is a remittance basis taxpayer; I call this the "**s.624 remittance basis**".

It will be rare for this to apply, because in almost all cases where the

[58] See 31.7 (Commercial Annual Payment).

[59] Defined in ss(3) but I need not set that out here.

[60] See Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 31.5 (Settlor-interested trusts).

conditions for the s.624 remittance basis are met, protected-trust relief will be available.[61]

47.8.2 *Remittance basis rule*

The legislation uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That term has a commonsense definition in s.648(1)[62] but s.648(3) ITTOIA then provides:

> [a] And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor

That is, if the settlor is a remittance basis taxpayer.

> [b] references in this Chapter [Chapter 5 Part 5, the settlor-interested trust code] to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year
> [c] only such of it as is remitted to the UK (in that tax year or any subsequent tax year)
> [d] in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax.

This applies to relevant foreign income arising under the settlement. Foreign source income of a non-resident settlor-interested trust is in general RFI.[63]

There are two aspects to this: unremitted income is not taxed, and remitted income is taxable.

In practice this mainly concerns settlor-interested discretionary trusts.

[61] See 92.10 (s.624 protected-trust relief).
For completeness: An example of an exceptional case where protected-trust relief does not apply, but the remittance basis may still apply, is:
(1) At a time when the settlor is deemed domiciled, the trust is "tainted" by an addition of property (from the settlor or a connected trust) so it ceases to be a protected trust.
(2) The settlor ceases to be UK resident and ceases to be deemed domiciled.
(3) The settlor subsequently becomes UK resident again.

[62] See 47.2 ("Income" arising under a settlement).

[63] See 16.9.2 (Relevant foreign income). I have wondered whether income of a non-resident settlor-interested trust meets the condition in s.830(1)(b) ITTOIA, that it is chargeable under one of the specified provisions. Foreign income of a non-resident is not in principle chargeable. But income of a non-resident settlor-interested trust is treated as income of the settlor, so this requirement is satisfied.

Income of a trust where the settlor has an interest in possession is in principle outside the scope of s.624;[64] though s.624 could apply:

(1) If the trustees have a receipt which is income for tax purposes but capital for trust purposes.
(2) If the trustees have expenses deductible from the life tenant's income.

47.8.3 *Charge on remitted s.624 income*

The charge under s.648(5) arises if two conditions are satisfied:

(1) The income "is remitted to the UK".
(2) The circumstances are "such that, if the settlor remitted it, the settlor would be chargeable to income tax".

For post-2008 income, the usual ITA remittance basis applies, so s.624 income is treated as remitted if it is brought/received/used in the UK by a relevant person (including the trustees).

The same rule applies to s.629 income (income of minor child of settlor). Receipt by the child in the UK after the child has reached the age of 18 is not in principle a taxable remittance, because the child is then not a relevant person in relation to the settlor.

47.8.4 *Remittance basis timing rule*

Section 648(5) ITTOIA provides an artificial timing rule:

> Where subsection (3) [s.624 remittance basis] applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

In the protected-trust regime this rule is disapplied, with the standard form (repeated whenever required):

> Section 648(3) to (5) (relevant foreign income treated as arising under settlement only if and when remitted) do not apply for the purposes of this section.[65]

47.8.5 *Pre-2008 s.624 income*

In the following discussion I use the term **"pre-2008 s.624 income"** to mean foreign income arising under a settlor-interested trust before 6 April 2008, which:

[64] See 47.3.6 (Income of life tenant settlor).

[65] s.628A(13) ITTOIA; s.628C(3) ITTOIA; s.630A(3) ITTOIA.

(1) fell within s.624 ITTOIA, but
(2) qualified for relief under the s.624 remittance basis.

There was no tax charge when the income arose if it was not received in the UK.

For pre-2008 income/gains, para 86(4) sch 7 FA 2008 provides that references to relevant person in s.809L have effect as references to the individual.[66] So there is a taxable remittance of pre-2008 s.624 income only if it is brought/received/used in the UK *by the settlor*. Receipt (etc) by a relevant person does not count.[67]

For this purpose it is necessary to decide whether s.624 income is income of the individual for the tax year 2007/08 or before. The artificial remittance basis timing rule[68] might treat pre-2008 income as post-2008 income and so disapply the transitional relief. Para 86(4A) sch 7 FA 2008 deals with this:

> For the purposes of sub-paragraph (4), section 648(2) to (5) of ITTOIA 2005 (and corresponding earlier enactments) do not apply (so that relevant foreign income which arose under a settlement in the tax year 2007-08 or any earlier tax year is to be treated as income for the tax year in which it arose).

The RDR Manual provides:

> **RDRM31490 Relevant persons and foreign income and gains arising to a settlement before 6 April 2008** [Jan 2019]
> ... Where a settlor claims to use the remittance basis, section 648 provides for the trust income to be treated as arising in the year in which it is remitted. Because of the narrower definition of remittance which applied before 6 April 2008 this would produce an inequitable result where relevant foreign income that arose to a settlement before 6 April 2008 is remitted and becomes chargeable on the settlor after 6 April 2008.
> *Transition*
> The transitional rule provides that in establishing whether there has been a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at s.809L ITA ... are applied as if references to 'relevant person' are to the

[66] See 18.10 (Relevant person: Pre-2008 income/gain).
[67] See 18.10 (Relevant person: Pre-2008 income/gain).
[68] See 47.8.4 (Remittance basis timing rule).

> individual.
>
> For the purpose of applying this transitional rule only, that is, for the purpose of determining whether there is any benefit under the provisions of paragraph 86(4) only the income is treated as arising in the year that it arose to the settlement.
>
> *Effect*
>
> This means that income arising under a settlement in tax years prior to 5 April 2008 but which is remitted after 6 April 2008 is not treated as remitted by the settlor unless it has been brought to, received by or used in the UK for his benefit.

I had thought that under the pre-2008 rules, there was taxable remittance if trustees of a settlor-interested trust brought s.624 income to the UK - even though the settlor did not receive the income. However HMRC presumably did not agree, as that is not now the position for pre-2008 s.624 income. There is a remittance only if the settlor actually becomes entitled to the pre-2008 s.624 income and brings/receives/uses it in the UK.

47.9 Non-resident settlor

The legislation again uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That term has a commonsense definition in s.648(1)[69] but s.648(2) provides:

> [a] But if, in a tax year, the settlor is not UK resident,
>
> [b] references in this Chapter [Chapter 5 Part 5, the settlor-interested trust code] to income arising under a settlement do not include
>
> [c] income arising under the settlement in that tax year in respect of which the settlor, if actually entitled to it, would not be chargeable to income tax by deduction or otherwise[70] because of not being UK resident.

I refer to this as the **"s.648(2) rule"**, and income within the rule is **"excluded income"**.

In short, where the settlor is non-resident, UK source trust income is within the scope of s.624, but foreign income is not.[71] Contrast s.720 ITA which does not apply at all unless the transferor is resident.

[69] See 47.2 ("Income" arising under a settlement).

[70] See App.2.3.2 (Bear tax by deduction or otherwise).

[71] This is self-evident, but if authority is needed, see *IRC v Countess of Kenmare* 37 TC 383.

47.9.1 *UK resident trust, non-resident settlor*

The trustees are taxed in full on foreign source trust income. The s.648(2) rule prevents s.624 applying where it might benefit the taxpayer.

However the settlor is taxed on UK source trust income. This is beneficial if:

(1) the settlor's marginal rate is less than the top rate of income tax, or
(2) non-resident IT relief applies[72]

This is not an anomaly because the object of the legislation, like the object of ToA, is to put the settlor in the same position as if the settlement had not been made.

47.9.2 *Non-resident trust, non-resident settlor*

Neither the trustees nor the settlor are taxed on foreign source income.

The settlor is taxed on UK source income. This is beneficial if:

(1) The settlor's marginal rate is less than the top rate of income tax.
(2) Non-resident IT relief is available to the settlor and not to the trustees, which could happen because of the UK beneficiary rule.[73]

If the settlor is UK resident but the year is a split year, the income of the offshore part of the year will qualify for split year treatment.

47.9.3 *Remittance of trust income*

Where the settlor is non-resident, it does not matter if trust income is remitted.

Suppose:

(1) Foreign income arises to the trustees of a settlor-interested trust while the settlor is non-resident (**"non-resident period income"**).
(2) The income is remitted by the trustees when the settlor is resident and a remittance basis taxpayer.

Section 648(3) ITTOIA provides that where the settlor is a remittance basis taxpayer:

> ... references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in

[72] See 45.1 (Non-resident IT relief).
[73] See 45.1 (Non-resident IT relief).

> that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax...
> (5) Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

It may seem at first sight that the non-resident period income is caught as it is treated under s.648(5) as arising in the year of remittance. However that is not the case, for two reasons:

(1) The circumstances are not "such that, if the settlor remitted the non-resident period income, the settlor would be chargeable to IT". Unless the settlor is UK resident when the income arises, the settlor would not be taxed on it when remitted later, even if it had been the settlor's income all along.
(2) Non-resident period income is not "income arising under the settlement" by virtue of s.648(2).

The result is sensible and consistent with rule that income of an individual arising during a non-resident period is not taxable if remitted during a resident period.[74]

47.10 s.624 double-charge relief

If income of a settlor-interested trust is distributed to a beneficiary there might in principle be a double charge to tax:

(1) The settlor is taxed under s.624 on the trust income
(2) The beneficiary could be taxed under normal trust tax principles

Section 685A ITTOIA avoids the double charge by giving relief to the beneficiary; I refer to this as **"s.624 double-charge relief"**.

For tax return disclosure when this relief applies, see 41.3.6 (Tax return: Trust income).

47.10.1 *Beneficiary relief conditions*

Section 685A(1) ITTOIA provides:

> This section applies if—

3 conditions then follow, which I call "beneficiary relief conditions":

> (a) a person receives an annual payment in respect of income from the

[74] See 17.21 (RFI/gains of non-resident, remitted when resident).

> trustees of a settlement,
> (b) the payment is made in the exercise of a discretion (whether of the trustees of the settlement or any other person), and
> (c) a settlor is charged to tax under section 619(1) on the income arising to the trustees of the settlement (whether in the current year of assessment or in a previous year of assessment) out of which the annual payment is made.

The wording of (b) is based on s.494 ITA; see 41.4 (Beneficiaries tax credit).

A settlor is not charged to tax, within the meaning of (c), if:

(1) s.624 protected-trust relief applies; or
(2) the s.624 remittance basis applies and the income is (un)taxed under the remittance basis.

In these cases, s.624 double-charge relief does not apply.

Section 685A(2) ITTOIA provides:

> This section applies only in respect of that proportion of the annual payment which corresponds to the proportion of the total income arising to the trustees of the settlement in respect of which a settlor is chargeable to tax under section 619(1).

Section 685A(2) may apply where:

(1) A settlement is partly settlor-interested (because there are two settlors or the settlor is partly excluded).
(2) A non-resident settlor is charged on part of the trust income (UK source income only).
(3) A remittance basis taxpayer settlor is charged on part of the trust income (UK source and remitted income only).

47.10.2 *Relief for non-settlor*

Section 685A(3) ITTOIA provides beneficiary relief by way of a tax credit:

> If and in so far as this section applies, the recipient of the annual payment shall be treated for the purposes of this Chapter [Chapter 5 Part 5, the settlor-interested trust code] as having paid income tax at the applicable rate[75] in respect of the annual payment.

[75] Defined s.685A(3A): “For the purposes of subsection (3), the “applicable rate” means—

Section 685A(4) ITTOIA prevents the beneficiary from using the tax credit except against the charge on the trust income:

> But—
>
> (a) tax which the recipient is treated by virtue of this section as having paid is not repayable,
>
> (b) tax which the recipient is treated by virtue of this section as having paid may not be taken into account in relation to a tax liability of the recipient in respect of any other income of his...

EN FB 2008 provides:

> 10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit ... which covers all the tax liability on that income.

The TSE Manual provides:

> **TSEM4570 Payments to beneficiary other than the settlor** [Sep 2021]
> ... The amount of the actual payment (it is not grossed up) should be shown in the beneficiary's return and it is included in the calculation of that person's total income. The tax credit ensures the beneficiary has no further liability in respect of the payment but it is ring-fenced so that no part of it can be repaid or set against liability arising from any other income of the beneficiary.

Section 685A(5A)(5B) ITTOIA provide:

> (5A) If the recipient of the annual payment is treated by subsection (3) as having paid income tax in respect of the annual payment, the amount of the payment is treated as the highest part of the recipient's total income for all income tax purposes except the purposes of sections 535 to 537 (gains from contracts for life insurance etc: top slicing relief).
> (5B) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—
>
> (a) the rule in subsection (5A), and
>
> (b) other rules requiring particular income to be treated as the highest part of a person's income.[76]

(a) in the case of a Scottish taxpayer, the highest Scottish rate,
(b) in the case of a Welsh taxpayer, the Welsh additional rate, or
(c) in any other case, the additional rate."

[76] See App.2.25 (Highest part of income).

EN FB 2008 explains subsections (5A)(5B):

> 10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit ... which covers all the tax liability on that income.
> 11. However, under current statutory ordering rules income from a trust is charged before savings and/or dividend income. The result is that a beneficiary of such a trust who also has savings and/or dividend income may find that the non-trust income is pushed into higher rates so that more tax is due overall.
> 12. The measure amends this ordering rule, so that income from a settlor-interested trust is treated within section 1012 ITA 2007 as one of the highest slices of income instead of being treated as part of the lowest slice.
> 13. The amending legislation backdates the correct position to 6 April 2006 to ensure that those affected are not disadvantaged by the omission.

The problem arose because s.624 double-charge relief takes the form of a non-repayable tax credit rather than an exemption for the trust distribution (which comes to the same thing but seems simpler). The reason for that drafting technique is not clear to me.

Two points arise from this which ought to raise serious questions about the Rule of Law in relation to UK tax. First the tax system is so complex that it took two years for the error in the FA 2006 to be noticed. (I confess I did not notice it myself.) Secondly, the error was corrected by casual retrospective legislation.

47.10.3 *Relief for settlor*

Section 685A(5) ITTOIA provides:

> If the recipient of the annual payment is a settlor in relation to the settlement, if and in so far as this section applies the annual payment shall not be treated as his income for the purposes of the Income Tax Acts (and subsection (3) does not apply).

The TSE Manual provides:

> **TSEM4570 Payments to the settlor** [Sep 2021]
> Where you tax the settlor on the income arising to the trust, discretionary payments out of the trust to the settlor are not further taxable. [The Manual comments on the position up to 2005-06 and then continues:] For 2006-07 onwards discretionary payments made by the

trustees to the settlor are taken out of charge by ITTOIA/S685A(5).

The legislation distinguishes between non-settlor beneficiaries and the settlor. Beneficiaries are given a credit but the settlor is exempt. At first sight this seems strange, but a reason will emerge.

The payment to the settlor is not a capital payment for s.87 purposes: see 61.7.4 (Chargeable to IT).

47.10.4 *Life tenant (not settlor) of settlor-interested trust*

Suppose a settlor-interested trust under which a beneficiary ("B", not the settlor) has an interest in possession. Section 624 beneficiary relief only applies to discretionary trusts. But if a trust confers an interest in possession (not on the settlor) then no relief is needed: the life tenant is not taxable as the trust income is the income of the settlor and of the settlor alone, so that B cannot be taxable on it.

If the settlor is non-resident, B is taxable on foreign income as that is not within s.624.

If the settlor is a remittance basis taxpayer, B is taxed on unremitted foreign trust income as that is not within s.624. The settlor will be taxed on the same income in a later year in which the income is remitted. Once remitted in that later year, the income will become "income arising under the settlement" and therefore income of the settlor and of the settlor alone B can then reclaim tax wrongly paid, at least if in time to do so. This may not work in practice, as B will not necessarily know when a settlor has remitted the income, but no doubt we muddle through.

47.11 Trustees of settlor-interested trust

47.11.1 *Tax on trust income*

If s.624 applies, the trust income is the income of the settlor "and of the settlor alone". So one might think that the trustees are not subject to tax on the income.[77] However s.646(8) ITTOIA provides:

> Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees[78] as persons by whom any income is received.[79]

[77] For completeness: that would be supported by a comment of Lord Russell in *Perry v Astor* 19 TC 255 at p.282 considering identical wording in a predecessor provision; this was a dissenting judgement, but the majority did not disagree on that point.

[78] In the case of a "settlement" which was not a trust, context suggests that "trustee" should be understood to include a deemed trustee; see 87.8.2 (Non-classic trust:

Thus:

(1) The trustees are in principle liable to tax under the receipts basis
(2) The settlor is *also* liable to tax under the entitlement basis[80]

Tax is paid the appropriate rates, in short:

Taxpayer	**Rates**	**See para**
Trust		
Discretionary trust	Trust rate or dividend trust rate	41.2.1
IIP trust	Basic or dividend ordinary rate	42.2
Settlor	Appropriate personal rates	43.1

47.11.2 *Settlor credit for trustees' tax*

Clearly there should not be double taxation on the same income. The tax paid by the trustees is regarded as paid on account of the settlor, ie the settlor gets a credit for, or refund of, the trustees' tax. I refer to this as the **"pay & reclaim"** system.[81]

TSEM provides:

> **TSEM4512 tax paid by trustees where income is treated as that of the settlor** [Sep 2021]
> Income arising under a settlement where the settlor retains an interest is treated as that of the settlor and the settlor alone. ITTOIA/S646(8) provides that where the income arises to trustees they are liable to tax on the income as recipients. Tax paid by the trustees in these circumstances is treated as paid on behalf of the settlor and is available to be used against the settlor's own tax liability.

47.11.3 *Excess credit returned to trust*

It can happen that the tax paid by the trustees on the trust income exceeds the tax which the settlor pays. This may be because the settlor is not a top rate taxpayer or because of the settlor's allowances or reliefs. The settlor can then reclaim the difference, but must return the repayment to the trustees. Section 646 ITTOIA provides:

Deemed trustee). But the issue will rarely (if ever) arise.

[79] See 15.2.1 (Receipt/entitlement basis of liability).

[80] This is self-evident, but if authority is needed, see *Rogge v HMRC* [2012] UKFTT 49 (TC) at [41].

[81] The same system applies for non-settlor interested IIP trusts, where trustees likewise pay tax and the life tenant has a credit for that tax; see 42.6.2 (Beneficiary's credit for trustees tax).

> (4) Subsection (5) applies if a settlor chargeable to tax under section 624 or 629 obtains a repayment by reason of the payment of the tax by—
> (a) any trustee, or
> (b) any other person to whom the income is payable by virtue of or as a result of the settlement.[82]
>
> (5) The settlor must pay an amount equal to the repayment to—
> (a) the trustee, or
> (b) the other person to whom the income is payable by virtue of or as a result of the settlement.
>
> (6) If there are two or more such persons, the amount must be apportioned among them as the case may require.

47.11.4 *Amount of tax*

For the purpose of this indemnity, it is necessary to ascertain the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629. The position is governed by s.619A ITTOIA:

> (1) This section applies to income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) or 629 (income paid to unmarried minor children of settlor).
>
> (2) The income is treated as the highest part of the settlor's total income for the purposes of section 619 (so far as it relates to the income).
>
> (3) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—
> (a) the rule in subsection (2), and
> (b) other rules requiring particular income to be treated as the highest part of a person’s total income.

Contrast 64.20.1 (Amount of distribution tax) - s.3 distribution relief.
The TSEM provides:

> **TSEM4550: trustee or beneficiary entitled to share tax repayment**
> [Feb 2022]
> Where the operation of the settlements legislation results in a repayment to the settlor in excess of any repayment otherwise due, the settlor should pay that excess to the trustee or other person who received the

[82] The wording in para (b) would apply:
(1) In relation to a settlor-interested trust under which a 3rd person (not the settlor) had an interest in possession
(2) In relation to a settlement-arrangement which was not a classic trust; see 87.8.2 (Non-classic trust: Deemed trustee)

income. For years to 2009-10, the settlor was obliged to pass any repayment made in respect of settlement where that arose because of an ‘allowance or relief’ set against that income. For 2010-11 onwards the legislation was amended so that it applies to such a repayment of tax for any reason. The change was made because it was recognised that the increase in the trust rate to 50% would result in many settlors receiving repayments of tax paid by the trustees. Tax paid by trustees will usually be that paid on their income under ITTOIA/S646(8) but it will also include any money they may have paid to the settlor under ITTOIA/S646(1) (see TSEM4505)).

ITTOIA/S624 and 629 are deeming provisions. In recognition of the fact that a settlor will be taxed on income that does not belong to him or her, ITTOIA/S646(1) provides for the trustees to provide the settlor with money to enable him or her to pay the tax due to HMRC. Where the tax paid by the trustees exceeds that due from the settlor, he or she is required to return the excess to the trustees. The amount of tax to be returned to the trustees will be:

Tax paid by trustees under ITTOIA/S646(8)

plus Any money to pay tax provided to the settlor under ITTOIA/S646(1)

less The amount of tax charged on the settlor in respect of settlement income

It is not necessary for an actual repayment to be made for the legislation to apply. The reference to a ‘repayment’ includes a set-off of tax ultimately borne by the trustees.

Example[83]

Trustees’ income in 2010-11:	**Band**	**Rate**	**Tax**
Trustees income: £10,000			
Tax due from trustees (646(8))			
Basic rate band	£1,000	20%	£200
	£9,000	50%	£4,500
Total tax paid			£4,700

Settlors income in 2010-11	
Income from Property	£50,000
‘Settlement' Income	£10,000
Total income:	£60,000

Tax due from settlor		
Personal allowance	£6,475	0%

[83] I have amended the format of the example for greater clarity.

	£37,400	20%	£7,480
	£16,125	40%	£6,450
Total			£13,930

(tax includes £4,000 on settlement income)

Tax due from settlor

Total tax due	£13,930
Less tax credit from trustees	-£4,700
Tax due per settlor's self assessment	£9,230

Here there will be no actual repayment made by HMRC but the tax due from the settlor is reduced by the tax credit of £4,700 of which only £4,000 has been used against settlement income.

£700 should be paid by the settlor to the trustees. That is made clearer if we consider the tax position of the settlor in the absence of the settlement income:

Settlors income in 2010-11

Income from Property £50,000 *ignoring settlement income*

Tax due from settlor

(personal allowance)	£6,475	0%	
	£37,400	20%	£7,480
	£6,125	40%	£2,450
Total			£9,930

The £700 difference between £9,930 and £9,230 is the tax 'overpaid' by the trustees

For years 2010-11 onwards, ITTOIA/S646 is amended so that if the settlor has difficulty in working out the amount of the 'repayment' to be paid to the trustees he or she can require HMRC to issue a certificate showing the amount of the repayment due to the settlor in respect of the income treated as belonging to him or her. If you are approached by the trustees you must not divulge information concerning the settlor's tax affairs without the permission of the settlor.

To request a certificate the settlor should submit a copy of form R185(Settlor) or any other notification of income and tax paid by the trustees to the settlor. You will not be able to issue the certificate until the settlor's liability for the year has been calculated, i.e. their tax return or R40 has been processed.

The R185(Settlor) should confirm the information already declared on the tax return or R40. If the total liability for the year has been calculated the certificate can be issued.

Section 646 ITTOIA provides:

> (6A) For the purpose of subsection (5), the settlor may require an officer of Revenue and Customs to provide the settlor with a certificate specifying—
>
> (a) that the settlor has obtained a repayment as mentioned in subsection (4), and
>
> (b) the amount of the repayment.
>
> (6B) A certificate provided under subsection (6A) is conclusive evidence of the facts stated in it.

This is standard drafting; see 101.2.1 (Certificate of tax paid).

47.11.5 *Planning: Mandating income*

Mandating income can avoid the liability on IIP trustees.[84] HMRC Trusts and Estates Newsletter (December 2010) provides:

> **Trusts and Estates - mandated income of settlor-interested trusts**
> ... that where income is mandated to an IIP beneficiary of a settlor-interested trust there is no statutory basis for taxing the trustees as being in receipt of the income. The settlor is taxed on any income (or income from property) in which he or she has a retained interest...
> HMRC will no longer require a fully completed return from trustees of settlor interested trusts in respect of income that is mandated to an IIP beneficiary.[85]

A discretionary trust which wishes to distribute all income to a beneficiary (typically, but not necessarily, the settlor) may consider creating a non-estate IIP and mandating the income to the life tenant,[86] in order to reduce the administrative costs.

47.11.6 *Pay & reclaim: Critique*

Malcolm Gunn (former editor of Taxation Magazine) described the pay & reclaim system as “ridiculous”,[87] and the reader will probably agree; but there it is. It is suggested that for settlor-interested trusts:

(1) The settlor should be liable

(2) If HMRC need further protection - I am not sure why they should - the trustees should become liable only if the settlor fails to pay on time

[84] See 42.3 (Income mandated).

[85] *https://www.gov.uk/government/publications/hm-revenue-and-customs-trusts-and-estates-newsletters* accepting the argument in Malcolm Gunn’s article.

[86] Or indeed to anyone else, at the direction of the life tenant.

[87] See Gunn, “Tax Charge Doubled!” Taxation Magazine, 22 Feb 2007.

Similarly, for non-settlor-interested IP trusts, where the same pay & reclaim system currently applies:

(1) The life tenant should be liable
(2) If HMRC need further protection, the trustees should be liable only if the life tenant fails to pay on time

IHT liability rules offer a precedent.

47.11.7 *Trust withholding tax*

There is usually a charge on trustees making an income distribution from a discretionary trust (trust withholding tax).[88] Section 685A(6) ITTOIA confers relief:

> Sections 494 and 495 of ITA shall not apply in relation to an annual payment if and in so far as this section applies.

47.12 Interaction of s.624/CGT

The general rule is that where the person making a disposal is subject to income tax on the proceeds, IT has priority over CGT, and there is no double charge.[89] This rule does not work where X makes a disposal but the income is treated as the income of Y; this is the case when s.624 applies, the income is treated for IT purposes as income of the settlor and not the trustees!

HMRC suggest a creative application of s.32 TMA may solve the problem. CG Manual provides:

> **CG14304. Sums chargeable as income** [Jun 2019]
> This exclusion does not apply to … situations where the income in question is not treated as the income of the person making the disposal. Typically this is a case of a settlor interested trust where the income is taxed on the settlor. If in this situation the settlor is assessable to both income tax and capital gains tax then relief may be available under s.32 TMA 1970.

Suppose a settlor-interested discretionary trust. Income accrues to the trustees. The settlor pays income tax. What stops the trustees realising a chargeable gain, on which the trustees may be chargeable if UK resident, or which may be s.1(3) amounts (trust gains) if the trust is not UK

[88] See 41.5 (Tier 2: Trust withholding tax).
[89] See s.37 TCGA, discussed at 56.4.12 (Interaction of IT/CGT).

resident? This solution does not lie in s.32 TMA as it is not the case that the settlor is assessable to both IT and CGT. There is nothing obvious to stop the trustees realising a chargeable gain. But no-one suggests that there is a charge. The solution must be in a general implied rule that receipts of an income nature are not within the scope of CGT.

47.13 s.624/s.720 compared

Sections 624 ITTOIA and 720 ITA cover similar ground. For a full comparison one would need to read all the relevant sections in this book. It may be helpful to summarise the major differences:

Difference	**Section 624**	**Section 720**
Applies to:	trusts	non-resident trusts & companies
Requires:	settlement-arrangement	transfer of assets
Tax on:	settlor	transferor[90]
Bounty:	bounty required	bounty not required
Motive defence:	does not apply	motive defence applies
Indemnity:	settlor indemnity	no indemnity for transferor
Non-resident:	applies to non-resident settlor	n/a to non-resident transferor
Income not taxed:	after settlor excluded	after tax year transferor excluded

The rates of tax are slightly different, a (probably accidental) result of the FA 2006.[91]

Section 624 has priority over s.720: see 49.27 (Interaction of s.720 /s.624).

See too 49.12 (Transferor/settlor compared).

47.14 Settlor receives capital sum

Section 633 ITTOIA provides:

> (1) Any capital sum[92] paid directly or indirectly in any tax year by the trustees of a settlement to the settlor[93] is treated for income tax purposes as follows.
> (2) The sum is treated as the income of the settlor for the tax year so far as the amount of the sum falls within the amount of income available up to the end of the year.

[90] See 49.12 (Transferor/settlor compared).

[91] See 43.11 (Settlor-interested trust IT rate).

[92] The definition of "capital sum" is in s.634 ITTOIA, which is set out and discussed at 49.24.2 ("Capital sum"), with the ToA definition which is (more or less) the same.

[93] Section 634 ITTOIA provides a wide definition of "paid to the settlor" which is the same as for s.87: see 61.8 (Receipt from trustees).

47.14.1 *"Available income"*

The key term is "available income." Section 635 ITTOIA provides the definition:

> (1) For the purposes of section 633 the amount of income available up to the end of any tax year is, in relation to any capital sum paid as mentioned in subsection (1) of that section by the trustees of a settlement, calculated as follows.
> (2) Add together the amount of unprotected[94] income arising under the settlement in that year and any previous year which has not been distributed.
> (3) Deduct from that figure—
> (a) the amount of that income taken into account under section 633 in relation to that sum in any previous year or years,
> (b) the amount of that income taken into account under section 633 in relation to any other capital sums paid to the settlor in any year before that sum was paid,
> (c) any income arising under the settlement in that year or any previous year which has been treated as income of the settlor under section 624 or 629 ...

Section 633 is generally irrelevant to settlor-interested trusts, because, in short:

(1) Trust income will be treated as accruing to the settlor under s.624, or
(2) If the income is protected income, neither s.624 nor s.633 apply, or
(3) If the settlor is non-resident, or if (which will be rare after 2017) the s.624 remittance basis applies, the income will not be "income arising under the settlement".

In each case, there is no "available income".

Section 633 is (in short) intended to catch capital sums paid to the settlor from a trust which is not settlor-interested. It is the settlement provision equivalent of the s.727 capital sum charge, which applies where a transferor does not have power to enjoy but receives a capital sum.[95] Accordingly I shall not discuss the section further here.

[94] Section 635(4) ITTOIA provides: "In subsection (2) "unprotected income" means income which is not protected foreign-source income, and sections 628A(2) to (13) and 628B (meaning of "protected foreign-source income") have effect also for this purpose." See 92.10 (s.624 protected-trust relief).

[95] See 49.23 (Transferor receives capital sum).

47.14.2 *Sum paid by connected company*

Section 641 ITTOIA expands the scope of s.633:

> (1) This section applies if—
> (a) a capital sum is paid to the settlor in a tax year by any body corporate connected with the settlement in that year, and
> (b) an associated payment has been, or is, made directly or indirectly to the body by the trustees of the settlement.
> (2) The capital sum is, in accordance with this section, treated for the purposes of section 633 as having been paid to the settlor by the trustees of the settlement.

47.14.3 *Capital sum: Critique*

There is no need for the capital sum provision, at least for UK trustees who now pay IT at the top rate. STEP note the point:[96]

> In our view, the capital sum provisions are not required at all where we are dealing with a trust that is onshore and the settlor lends to the trust and the loan is repaid. Imposing an income tax charge on the settlor who lends rather than gives to the trust, but is excluded from any benefit, is counter intuitive and causes frequent mistakes.

47.15 Payment to settlor's child

Section 619(1)(b) ITTOIA imposes the charge:

> (1) Income tax is charged on ...
> (b) income which is treated as income of a settlor as a result of section 629 (income paid to relevant children of settlor)

I refer to income which is treated as the settlor's income under this section as **"s.629 income"**.

So we turn to s.629 ITTOIA:

> (1) Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone for a tax year if, in that year and during the life of the settlor, it—
> (a) is paid to, or for the benefit of, a relevant child of the settlor, or

[96] STEP Scoping Document Response: OTS review of its approach to simplification and its aims, approach and priorities (Apr 2022). *https://www.step.org/sites/default/files/2022-04/step-response-to-ots-review-of-simplification.pdf*

> (b) would otherwise be treated (apart from this section) as income of a relevant child of the settlor...[97]
>
> ...
>
> (7) In this section and sections 631 and 632—
> (a) "child" includes a stepchild,
> (b) "minor" means a person under the age of 18 years, and "minor child" is to be read accordingly,
> (c) references to payments include payments in money's worth, and
> (d) "relevant child" means a minor child who is unmarried or not in a civil partnership.

The TSE Manual provides:

> **TSEM10315 - Non-resident trusts: settlor's chargeability: income tax - minor unmarried child** [Sep 2021]
> [The Manual summarises s.629 and continues:]
> Where the payment is made from income, because the provisions of ITA/S493 do not apply to non-resident trusts, there is no grossing up and no tax credit. The payment is regarded as untaxed foreign income (TSEM10255) and should be taken into account by the settlor when considering his or her liability to income tax for the year - but see TSEM10320 regarding the operation of ESC A93.

Where there is a discretionary trust, see 41.4.1 (UK resident trust); 41.11 (s.629 income: settlor's child).

47.15.1 *"Paid"*

Section 629(7) ITTOIA provides a wide meaning:

> (7) In this section and sections 631 and 632 ...
> (c) references to payments include payments in money's worth ...

For completeness, s.632 ITTOIA deals with offshore income gains held by nominees:

> (1) This section applies if—
> (a) an offshore income gain accrues in respect of a disposal by a

[97] I mention for completeness two very minor exemptions:
Section 629(5) ITTOIA provides: "Subsection (1) does not apply so far as provided by section 630 (exception for gifts to charities)." I cannot see how this could ever apply; but it does not matter.
Section 629(8) ITTOIA provides: "Subsection (1) is subject to section 28A of FA 2005 [vulnerable persons trusts]." But this rarely if ever arises.

> trustee of assets held by the trustee for a minor, and
> (b) the minor would be absolutely entitled as against the trustee but for being a minor.
>
> (2) The income which, under regulation 17 of the Offshore Funds (Tax) Regulations 2009 (SI 2009/3001) (charge to tax), is treated as arising by reference to that gain is treated for the purposes of sections 629 and 631 as paid to the minor.
>
> (3) In this section "offshore income gain" has the same meaning as in Chapter 5 of Part 2 of those Regulations.

47.15.2 *Interaction of s.624/s.629*

Section 629(2) ITTOIA provides:

> Subsection (1) does not apply to income which is treated as income of the settlor under section 624.

Thus the settlor-interested trust rule has priority.

47.15.3 *De minimis rule*

Section 629 ITTOIA provides:

> (3) Subsection (1) does not apply in relation to a child's relevant settlement income in any tax year if, in that year, the total amount of that income does not exceed £100.[98]
>
> (4) In subsection (3) a child's "relevant settlement income" means income—
> (a) which is paid to or for the benefit of, or otherwise treated as income of, the child, and
> (b) which (apart from subsection (3)) would be treated as income of the settlor under subsection (1).

47.16 Corporate settlor

It is common for a company to make a settlement in the standard CGT/IT sense. These are typically commercial trusts (pension trusts or employee benefit trusts) so the trust is not a settlement in the settlement-arrangement sense, for lack of bounty.[99] However it is possible (albeit not usual) for a company to make a settlement in the settlement-arrangement sense.

Section 627(4) ITTOIA provides:

[98] This limit was set in 1995, see s.660B(5) ICTA 1988, so the relief, which was never very large, has been allowed to die by inflation.

[99] See 99.39 (Pension/employee benefit trust).

> The rule in section 624(1) does not apply in relation to income which—
> (a) arises under a settlement, and
> (b) originates from any settlor who was not an individual.

This provision was introduced in 2012. EN FA 2012 provides:

> The purpose of the amendments to the settlements legislation is to confirm that income arising under a settlement is treated as that of the settlor only where the settlor is an individual. The proposed changes would close avoidance schemes that seek to exploit the settlements legislation by using corporate settlors of 'interest in possession' settlor-interested trusts to try to avoid income tax at higher or additional rates which would otherwise be due on dividends paid by a subsidiary of the corporate settlor. The amendments would ensure that the relevant provisions do not apply to settlors who are not individuals and hence that the income would not be treated as that of the settlor in those situations.

For completeness: the position was the same even before the enactment of this provision in 2012.[100] It is helpful to have clarified the law, even if the reason for the change was to stop a tax avoidance scheme which did not work anyway.[101]

47.17 Tax return: s.624 income

The trustees may inform the settlor of the s.624 income by completing form R185(Settlor) (Statement of trust income chargeable on settlor).

The settlor reports s.624 income in boxes 7-15 of form SA107 (Trusts etc) 2022/23. SA107 Notes (2022/23) provides:

> **Income chargeable on settlors**
> Use the figures in boxes 7 to 15 on your R185 (Settlor) to fill in this section. If you do not have this, ask the trustees for the details.
> If you've received income from a residential property, the trustee will supply you with details of the figure to include in box 25 'Amount of residential property income or restricted finance costs' where applicable. Use the working sheet on page TN 4 to help complete box 25.
> Do not include any foreign income in these boxes. Fill in the 'Foreign' pages instead.

[100] For the pre-2012 law, see the 10th edition of this work para 24.16 (Corporate Settlor). But the point is now of historical interest only.

[101] Namely, *Clipperton*, discussed 87.5.8 (No intention to benefit others).

47.18 DT relief: s.624 income

In the case of a settlor-interested trust, there are four states potentially involved:

(1) the state where the settlor is resident (here assumed to be the UK)
(2) the state where the trustees are resident
(3) the state where a beneficiary is resident
(4) the state where the source of the income arises

There are several ways s.624 could lead to double taxation:

(1) The settlor will be taxed if UK resident or if the trust has UK source income
(2) The trustees may be subject to foreign tax in another state
   (a) on income with a source in that state
   (b) on any income if they are resident in that state
(3) In the case of an IIP trust, the life tenant may be subject to foreign tax in another state
   (a) on income with a source in that state
   (b) on any income if they are resident in that state

47.18.1 *Foreign tax credit relief*

Where trust income is subject to a foreign tax, foreign tax credit relief in principle applies for the benefit of a settlor within s.624. That follows from first principles but if authority were needed, see s.623 ITTOIA.[102] HMRC agree. The TSE Manual provides:

> **TSEM4017 Calculation of Income - S623 ITTOIA** [Sep 2021]
> ITTOIA/S623 allows the settlor 'the same deductions and reliefs' the settlor would have been entitled to had the settlor actually received the income. Thus reliefs which can only be set against a particular type of income, such as a credit under a DTA for foreign tax suffered by the trustees on foreign source income, is available to the settlor even though the charge on the settlor is under ITTOIA/Part 5 ('Miscellaneous Income'). ...

I doubt if it is necessary to rely on s.623 to reach this result,[103] but it does not matter.

The INT Manual considers the position where a beneficiary is taxed in

[102] See 47.4 (Settlor deductions/reliefs).
[103] See 47.4 (Deductions & reliefs).

the UK and a settlor is taxed in some other country under a foreign equivalent of s.624:

> **INTM161040. Same income** [Sep 2021]
> The credit Article in an agreement and the corresponding provision for unilateral relief in s.9 TIOPA 2010 are concerned with relief from double taxation on income or gains. For credit to be allowed, it is not a requirement that the foreign tax on income or gains has to be borne by the same person who is liable to UK tax on the same income or gains. For example, if the foreign country taxes a settlor on the income of a UK resident beneficiary, who is chargeable to UK tax on that income, credit may be given to the beneficiary for the foreign tax paid by the settlor. However, it must be the same income which is being taxed in both countries. ...

47.18.2 *Trustees treaty-resident outside UK*

Suppose:

(1) A settlor-interested trust within s.624.
(2) The trustees are treaty-resident in a foreign State whose DTA has a standard form interest and dividend articles.
(3) The settlor is UK tax-resident and not treaty-resident in a foreign State.

The question is whether the settlor qualifies for third party DTA relief.[104] Where a Savings Clause applies, the answer is no.

What if the treaty does not have a Savings Clause? The settlor is subject to tax under s.624. It is considered that the settlor can in principle claim third-party DT relief.

Section 619 and 624 ITTOIA must be read together:

> **619(1)** Income tax is charged on ... (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) ...
> **624(1)** Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone...

Section 624 imposes a deeming which changes the recipient, that is, the income which actually arises to the trustees is deemed to accrue to the settlor. The character of the income is not altered. That is, the income which is "treated as the income of the settlor" is the actual income of the

[104] See 109.1 (Third-party DT relief).

trustees, and not different (notional) income.

It follows that the settlor can in principle claim third-party DT relief provided that the income is of a type which qualifies for DT relief.

Why in fact is there a charge to tax under s.619? If the settlor is treated as receiving (say) interest income, the income would be chargeable to tax under the charging provisions relating to interest. No separate charge to tax is needed. The drafter is in my view slightly muddled as to whether the income of the settlor is the settlement income or notional income. The confusion is understandable, for the distinction between the two is metaphysical: they amount to exactly the same thing.

It might be argued that since the income is deemed to be the income of the settlor and of the settlor alone, it is deemed not to be the income of the trustees, so the deeming disapplies the DT exemption. But that construction would put the UK in breach of the treaty, so it should not be regarded as correct. Section 624 is not a defence to trustees from an assessment.[105]

47.18.3 *Settlor treaty-resident outside UK*

This section considers whether DT exemptions are available where:

(1) income accrues to a settlor-interested trust whose trustees are not treaty-resident in a foreign state (so the settlor cannot claim indirect treaty relief).
(2) The settlor is treaty-resident in a foreign state.

The settlor is in principle subject to tax under s.624. It is considered that the settlor can claim DT exemption directly.

In some cases, DT exemption only applies if the income is "beneficially owned" by the settlor. In the case of a common form settlor-interested discretionary trust, the income is not "beneficially owned" by the settlor as a matter of English property/trust law. But since for tax purposes it is deemed to be the income of the settlor, this requirement is deemed to be satisfied. OECD Commentary is helpful here:

> The term "beneficial owner" is not used in a narrow technical sense (such as the meaning that it has under the trust law of many common law countries[106]), rather, it should be understood in its context and in light of

[105] See 47.11 (Trustees of settlor-interested trust).

[106] Footnote original: For example, where the trustees of a discretionary trust do not distribute royalties earned during a given period, these trustees, acting in their

> the object and purposes of the Convention ....[107]

In the US/UK DTA, this is expressly dealt with: see 91.7.8 (s.624/720 income; s.3/86 gain).

47.18.4 *HMRC view*

The TSE Manual provides:

> **TSEM3665. Relief for overseas tax: trust income deemed not to be the beneficiary's** [Sep 2021]
> For tax purposes, income may be deemed to be that of someone other than a beneficiary. For example, the anti-avoidance provisions may treat trust income as that of the settlor. The trustees can claim tax credit relief on the income.
> If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

The International Manual raises some of these questions but does not tell us what HMRC regard as the answers:

> **INTM339550 DT applications and claims: Applicants/claimants - Trusts** [Sep 2021]
> **Claims by non-resident trustees of discretionary trusts**
> You may receive a claim or application from non-resident trustees of a discretionary trust. For specific information about claims by non-resident trustees see the country specific pages. If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD.
> ***What to do if the settlor of a discretionary trust is not excluded from benefit under the trust***
> Where the settlor of a non-resident discretionary trust is not excluded from benefit under the trust, the trust may be subject to the provisions of [s.624 ITTOIA]. In this situation the trust may be described as a 'caught settlement'. The settlor will be chargeable on the income of the trust as their own personal income, regardless of whether the income is accumulated or distributed.
> Where we have a claim or application from trustees of a discretionary

capacity as such (or the trust, if recognised as a separate taxpayer) could constitute the beneficial owners of such income ... even if they are not the beneficial owners under the relevant trust law.

[107] See 108.10 (DTA beneficial owner rule).

> trust from which the settlor is not excluded from benefiting, Specialist Personal Tax, PT International Advisory will need to refer the papers to Specialist PT, Trusts & Estates for advice. They will also consider whether the settlor or the trustees need to make a UK tax return.
> If the settlement is caught, a claim by the trustees will not be valid.
> (This content has been withheld because of exemptions in the Freedom of Information Act 2000) ...

47.19 s.643A charge: Outline

This section discusses the close-family charge. This is one of the charges introduced by the protected-trust regime.[108]

In outline, where the settlor/close-family of the settlor receive a benefit from a protected trust, the recipient is subject to tax. I refer to this as the **"s.643A close-family charge"**.

Where the close-family beneficiary is non-resident (and so outside the scope of the charge) the settlor (if UK resident) is liable instead. I refer to this as the **"s.643A settlor-attribution charge"**.

Before 2018, where there was a foreign domiciled settlor-interested trust, there were income tax charges on:

(1) income distributions to UK beneficiaries
(2) remittance of s.624 income

However it was in principle possible to provide some benefits to the settlor or close-family, without those charges . From 2018, benefits are in principle chargeable.

47.19.1 *Section 643A/s.731 compared*

Sections 643A ITTOIA and 731 ITA cover similar ground: they apply on the receipt of a benefit not otherwise chargeable to income tax. It may be helpful to summarise the main differences:

	s.643A	**s.731**
Basic requirement	settlement-arrangement	transfer of assets abroad
Applies to	protected trusts	all trusts & companies
Tax on benefit to	settlor/close family	anyone
Tax limited by ref to	available protected income	relevant income
Motive defence	no	yes

Section 731 has priority over s.643A. So the main case where s.643A

[108] See 92.1 (Protected-trust regime).

applies will be benefits from protected trusts, with income at trust level (eg no underlying company), where the motive defence applies for s.731.

47.20 s.643A application conditions

Section 643A(1) ITTOIA is easier to follow if it is split into parts, the first part setting out the conditions for the application of the rule, and the second part containing the rule.

The first part of s.643A(1) ITTOIA provides:

> [a] If an individual [settlor/close-family beneficiary][109]
> [b] has an untaxed benefits total for a settlement for a tax year (see section 643B),
> [c] [i] an amount
> [ii] equal to so much of that total as does not exceed the settlement's available protected income up to the end of the year (see section 643C)
> [iii] is [s.643A income]

We can regard para [a] and [b] as a set of conditions for the s.643A charge and I refer to it as the **"s.643A application conditions"**.

The amount specified in s.643A(1)[c] is "**s.643A income"**.[110]

The amount of s.643A income is the lower of:

(1) Untaxed Benefits Total
(2) Available Protected Income

Although not the statutory usage, I write these expressions with initial capitals, to reflect the technical nature of the expression.

The definitions require:

(1) Settlor/close-family receive a benefit
(2) Protected s.624 income

The benefit does not have to be provided out of the protected income, or derived from it, or matched with any particular item of the income.

47.21 Untaxed Benefits Total

Untaxed Benefits Total (UBT) matters for two reasons:
